## SCIENTIFIC COLLOQUIA SERIES

### Debate:

Prescription Opioids are an Important Means of Treating Chronic Non-Cancer Pain.

Opioids are Beauty and The Beast of chronic pain management. While they undoubtedly reduce pain symptoms, opioids are also associated with many negative side-effects including dependence.

Join Drs. Mary Lynch and Ian Beuprie to debate the relative pros and cons of prescription opioids for treating chronic non-cancer pain.

Moderated by Dr. Jason J. McDougall.
