

Form and Function in Ocular Disease is a biennial symposium covering diverse topics in clinical ocular disease and visual neuroscience. The faculty includes world-class leaders in ophthalmology and vision research who will address topics ranging from treatments for inherited blindness to the role of biomechanics in ocular disease

form & function in ocular disease

The symposium is open to clinicians, scientists, trainees and students. There is no fee for attendance, lunch or refreshment breaks; however, registration is required.

**The symposium will take place at:
Alumni Hall, University of King's College
6350 Coburg Rd, Halifax, NS B3H 2A1
November 1-2, 2024**

TRAINEE TRAVEL AWARDS

We will provide an opportunity for trainees to present their research. Up to four travel awards will be awarded to trainees (graduate students, residents and post-doctoral (clinical or non-clinical) research fellows) based in Canadian academic institutions. Travel and accommodation costs will be covered.

Please submit the following information:

1. Name and degrees of candidate
2. Institution where training is taking place
3. Name of supervisor
4. Title of presentation
5. A 500-word structured abstract with the following sub-headings: Purpose, Methods, Results, Conclusions

Applications should be sent by email to Dr. Balwantray Chauhan (bal@dal.ca) by September 15, 2024.

Applications will be reviewed by the Departmental Research Committee.
