**DALHOUSIE
UNIVERSITY**

Inspiring Minds

A Statement of the Aims of Undergraduate Education at Dalhousie

Dalhousie University offers undergraduate education enriched by a longstanding institutional commitment to research and to graduate and professional education. The University tries to assist all its undergraduate students to become independent thinkers and articulate communicators, knowledgeable about their chosen disciplines or professions, conversant with a reasonable body of general knowledge, and committed to learning throughout their lives.

Dalhousie assists its students to learn how to think for themselves. Students in all disciplines and professions can expect to develop skills and attitudes crucial for logical and independent thought. The faculty strives to teach students how to think, rather than what to think, and to enable them to make fair-minded enquiries in their fields of study and into the broader ethical, cultural and social issues that shape our lives. An educated person thinks carefully, reconsiders received ideas, and leads an examined life. The development of these habits of mind is the primary goal of undergraduate study.

Dalhousie assists its students to learn to express themselves, orally and in writing with clarity, precision and style. It does so, not only because communication skills permit the efficient transfer of information, but also because they make possible dialogues which lead to new ideas and to deeper appreciation of existing knowledge. Because a communal effort to exchange ideas and information is at the heart of university life, students in all disciplines and professions need opportunities to develop their skills in writing and in speaking at all levels of the undergraduate curriculum.

Dalhousie assists its students to master a combination of specialized and general knowledge. The specialized knowledge acquired by undergraduates at Dalhousie varies from discipline to discipline and even from student to student. Such knowledge should include, not only data skills, but also an understanding of the theories, structures and processes central to the discipline or profession in question, and an awareness of their practical applications and ethical consequences. Undergraduate students at Dalhousie should become familiar with a significant body of general knowledge as well. All should become acquainted with concepts central to our own culture and those of others. All should acquire basic quantitative skills and some knowledge of the principles of science and technology. All should share a sense of history and an appreciation of achievements in literature, philosophy and the arts. Such general knowledge helps us not only to confront the practical demands of work and life, but also to comprehend more fully our experience of the human condition.

Dalhousie assists its students to develop the capacity for commitment to learning throughout their lives. Their educational experiences within and outside the classroom should be rich and diverse. By providing social, cultural, recreational and other opportunities for student involvement and leadership, Dalhousie acknowledges responsibility for promoting both personal and intellectual growth.

Smoke Free/Scent Free Dalhousie

Providing a Healthy Work and Study Environment

To protect people from involuntary exposure to tobacco smoke, in 2003, Dalhousie declared the University entirely smoke-free. The No Smoking Policy prohibits smoking in all University buildings, including University residences, on University property and in University Vehicles.

Under this policy, those wishing to smoke are asked to leave University property (http://safety.dal.ca/programs_services/smokefree/property.php). While smoking on public property, smokers are asked to avoid littering, to be respectful of others, and of course to abide by the municipal by-law.

The University has also acted to support its many students and employees who report that they are harmed when they are exposed to scents which are present in many scented personal care products. Scents in perfume, cologne, hair-spray, after-shave, and even some soap and fabric softeners, cause serious illness in people who are sensitive to these chemicals.

To provide an environment which supports teaching and learning, Dalhousie asks students, staff, faculty and visitors, to refrain from using such scented products while at the University. The scent reduction program is part of a broader effort to limit, to the fullest extent practical, exposure to all chemicals in our buildings.

For more information on the Smoking Policy and the Scent Reduction Program, contact the Safety Office by email at Safety.Office@dal.ca or consult the web sites http://safety.dal.ca/programs_services/scentfree/ and http://safety.dal.ca/programs_services/smokefree/.

Important Notices

Students are advised that the matters dealt with in this Calendar are subject to continuing review and revision. This Calendar is prepared some months before the year for which it is intended to provide guidance. Students are further advised that the content of this calendar is subject to change without notice, other than through the regular processes of Dalhousie University, and every student accepted for registration in the University shall be deemed to have agreed to any such deletion, revision or addition whether made before or after said acceptance. Additionally, students are advised that this calendar is not an all-inclusive set of rules and regulations but represents only a portion of the rules and regulations that will govern the student's relationship with the University. Other rules and regulations are contained in additional publications that are available to the student from the Registrar's Office, and/or the relevant faculty, department or school.

The University reserves the right to limit enrolment in any program. Students should be aware that enrolment in many programs is limited and that students who are admitted to programs at Dalhousie are normally required to pay deposits on tuition fees to confirm their acceptance of offers of admission. These deposits may be either non-refundable or refundable in part, depending on the program in question. While the University will make every reasonable effort to offer courses as required within programs, prospective students should note that admission to a degree or other program does not guarantee admission to any given course. However, no student in a graduating year may be excluded from a course required by that student to meet degree requirements because of lack of space (This rule does not apply to elective courses or to preferred sections of courses.). Students should select optional courses early in order to ensure that courses are taken at the most appropriate time within their schedule. In some fields of study, admission to upper level courses may require more than minimal standing in prerequisite courses.

Dalhousie University does not accept any responsibility for loss or damage suffered or incurred by any student as a result of suspension or termination of services, courses or courses caused by reason of strikes, lockouts, riots, weather, damage to university property or for any other cause beyond the reasonable control of Dalhousie University.

Inquiries should be directed to:

Winter Term

BA and BSc programs only	November 15
Returning Dalhousie Students ³	November 15
BEDS Transfer students.....	November 1

¹ Late applications may be considered but we cannot guarantee space in programs.

² Information on these programs is included in the appropriate calendar.

³ For students returning to the same undergraduate programs, or attending as Special Students in any faculty

NOTE: In order to be considered for entrance scholarships, applications for admission from high school students must be received by March 15 for most programs.

Definitions

The following definitions are intended to facilitate an understanding of the calendar and not to define all words and phrases used in the calendar which may have specific meanings.

Academic Dismissal

A student's required withdrawal from a program due to unsatisfactory academic performance.

Academic Program

A distinct group of courses and other requirements which lead to eligibility for a degree or other university-awarded credential.

Academic Terms

- Fall term: September - December
- Winter term: January - April
- Summer term: May - August
- Regular term: September - April

Advanced Standing

Students possessing advanced knowledge of a subject will be encouraged to begin their studies in that subject at a level appropriate to their knowledge, as determined by the department/school/college concerned. However, such students must complete, at Dalhousie, the full number of credits required for the particular credential being sought.

Audit Student

A student permitted to attend courses but not expected to prepare assignments, write papers, tests or examinations. Credit is not given nor is a mark awarded for courses. Courses appear on the transcript with the notation "Aud". If not already admitted to the University, audit students must apply. Students may register to audit a course only after the first day of courses.

Candidate

The term candidate for a doctoral degree is used to identify a student who has fulfilled all the requirements for the PhD except for the submission and defence of the thesis; thus, a candidate will have successfully completed the residency requirement, all course work, qualifying and comprehensive examinations (as applicable), and the thesis proposal defence (if applicable). This status is equivalent to the common terms "all but the thesis" or "all but dissertation" used at some institutions. The term candidate cannot be employed with regard to a Masters degree student.

Clerkship

See Internship.

Clinical Practice

See Internship.

Continuing Fees

The tuition fees charged to graduate students who have fulfilled their program fee requirements but have yet to complete all their degree requirements. See Faculty of Graduate Studies Regulations.

Co-operative Education

A program where academic study is combined with career related work experience.

Co-requisite

Requirement which can be fulfilled concurrently with the course being considered.

Course/Class

A unit of study in a subject area. Such a course is identified by a course/subject label, number, credit value and title (eg. ENGL 1000.06: Introduction to Literature).

Credit

A unit by which University course work is measured. A full year (X/Y) course is normally worth one full credit (six credit hours).

Credit Hours

One full credit is equal to six credit hours and one half credit is equal to three credit hours.

CRN

Each course has a course reference number (CRN) attached to it. This number is to be used when registering for courses.

Crosslisted Courses

Courses are crosslisted based upon course content that deals with more than one subject area in a substantive way. The crosslisting recognizes the interdisciplinary nature of the course.

Email

Email is an authorized means of communication for academic and administrative purposes within Dalhousie. The University will assign all students an official email address. This address will remain in effect while the student remains registered and for one academic term following a student's last registration. This is the only email address that will be used for communication with students regarding all academic and administrative matters. Any redirection of email will be at the student's own risk. Each student is expected to check her or his official email address frequently in order to stay current with Dalhousie communications.

Exclusion

An exclusion is when one course is sufficiently similar to another course that credit will only be given once if both are taken.

Externship

See Internship.

Fieldwork

See Internship.

Full-time Students

Those registered for three full courses (18 credit hours for UG, AC, HP level, 12 credit hours for TC level) or more in the Regular term, or the equivalent of three half credits (nine credit hours for UG, AC, HP level, six credit hours for TC level) courses or more in either the Summer, Fall or Winter term.

Good Standing

Students who meet the required GPA are considered to be in good academic standing.

Grade Point Average (GPA)

Weighted sum of the grade points earned, divided by the number of credit hours enrolled.

- Term GPA: Courses taken in a single term.
- Cumulative GPA: All courses taken while registered in a level of study.

In the case of a course that has been repeated, only the highest grade is included.

GSIS

Graduate Student Information System. The electronic database used to approve graduate student program requirements and progress.

Graduate Student

A student with a Bachelor's degree, usually with Honours or equivalent, enrolled in a Master's or Doctoral program, or a graduate diploma program.

Internship, Fieldwork, Clinical Practice, Externship, Practicum, Clerkship

These terms are used in programs to describe practical professional educational experiences that are conducted in a non-university setting such as a health or social service agency.

Letter of Permission

A Letter of Permission authorizes a Dalhousie student to take a course(s) at another institution for credit towards a Dalhousie qualification. Such permission must be obtained in advance of taking the course(s).

Level of Study

The following are levels of study:

TC	Technology Diploma - Faculty of Agriculture
AC	Architecture/Engineering (Years 3 and 4)
HP	Health Professions
UG	Agriculture
	Arts & Social Sciences
	Computer Science
	Engineering (Years 1 and 2) and Bachelor of Food Science
	Management Science

Non-thesis Program

A Master's program of study based on course work which may also include a research project. This includes many of the professional graduate programs. Some of these programs also offer a thesis option.

Part-time Students

Students registered for fewer than three full-credit courses (18 credit hours for UG, AC, HP level, 12 credit hours for TC level) or the equivalent of three half-credit (nine credit hours for UG, AC, HP level, six credit hours for TC level) courses in either the Summer, Fall or Winter term.

Part-time Graduate Student (Program Fee)

A part-time graduate student paying program fees is a student who has been approved by the department and the Faculty of Graduate Studies as working part-time on their graduate degree. A part-time graduate student is taking less than nine credit hours per term.

Part-time Student (Per Course Fee)

A student who is taking less than nine credit hours (three half-credit courses) in a term is considered a part-time student.

Per Course Fee

The fees charged to students in a Per-Course Fee Degree. Students pay fees according to the number of courses taken in any given term.

Practicum

See Internship.

Prerequisite

A requirement that must be fulfilled prior to registering in a specific course.

Probation

Warning to students that their academic performance is unsatisfactory and that they will be dismissed from their program unless their performance improves by the end of the next term.

Program Fees

The tuition fees charged to students in a program-fee degree. The program fee is based on total tuition for a specified number of years, varying according to academic program. Students who have not completed their program after the specified number of years are required to pay a continuing fee.

Qualifying Students (Master's only)

A full-time or part-time student with a Bachelor's degree or its equivalent in whom a department has expressed an interest as a potential graduate student, but who is without a sufficient GPA or academic background in a particular discipline to be enrolled directly in a Master's program.

Residency

The period of time that graduate students are expected to be on campus for fulfillment of their formal program requirements. In some programs, part of the residency period may, with permission, include some time off campus (e.g. for fieldwork or research).

Scholarship GPA

See Awards section page 600.

Special Students

Students who are not candidates for a degree or diploma but who wish to take courses which may be allowed for credit. This is not the same as auditing a course. Special students must satisfy normal admission requirements.

Special Student - Graduate Studies (SSGS)

A Student who is not registered in a graduate program but is taking graduate courses. Special students must satisfy normal admission requirements.

Supervisor

The supervisor is a member of Faculty of Graduate Studies who is directly responsible for the supervision of a graduate student's program. In this capacity, the supervisor assists the student in planning a program, ensures that the student is aware of all program requirements, degree regulations, and general regulations of the department and Faculty of Graduate Studies, provides counsel on all aspects of the program, and stays informed about the student's research activities and progress. The supervisor is also charged with ensuring that a student's research is effective, safe, productive and ethical. Specific duties of the supervisor include preparation of a program of study with the student, arrangement of and attendance at all supervisory committee meetings and candidate examinations, while ensuring that these exams are scheduled and held in accordance with Faculty of Graduate Studies and Departmental regulations, and reviewing the thesis both in draft and in final forms.

Thesis Only Fees

See Continuing Fees.

Thesis Program

A Master's or Doctoral program of study involving a major research component in the form of a written thesis. Some programs offer a non-thesis option.

Transcript

A transcript is a complete history of a student's academic record at Dalhousie. Partial transcripts, e.g. a portion of a student's record pertaining to registration in a particular degree, faculty, or level of study, are not issued.

Transfer Student

A transfer student is one who is awarded credit towards a Dalhousie degree for academic work completed at a previous university or equivalent institution of higher learning.

Undergraduates

Students who are candidates for an undergraduate degree or diploma.

Visiting Student

A person permitted to take courses at Dalhousie for transfer of credit to another university.

Visiting Student Graduate Studies (VSGS)

- A person permitted to take courses at Dalhousie for transfer of credit to another university (Letter of Permission required).
- A person permitted to work with a Dalhousie researcher for thesis work at another university (Research).

Work Term

Career related work experience required in Co-operative Education programs. Work terms are usually 13-16 weeks in duration.

Writing Intensive

Writing Intensive courses are those which emphasize the process of writing, frequency of writing assignments, and weighting of those assignments in the course grades. A Writing Intensive course is normally taken as a sequel to a Writing Requirement course, but does not satisfy the Writing Requirement.

I. Course Codes

Numbers

0010-0099 pre university preparation courses
 0100-0300 technology level courses
 1000 level courses are introductory
 2000-4000 level courses are advanced
 5000-9000 level are Graduate level (with some exceptions)

Credit Hours—examples only

.06 credit hours = 6 credit hours = 1 full credit UG, AC, HP level

.03 credit hours = 3 credit hours = ½ credit UG, AC, HP level

.02 credit hours = 2 credit hours = ½ credit TC level

Subject Codes

Four letter codes are used to describe the department offering a particular course as follows:

ACAD - Academic
 AGRI - Agriculture
 AGRN - Agronomy
 ANAT - Anatomy & Neurobiology
 ANSC - Animal Science
 APSC - Applied Science
 AQUA - Aquaculture
 ARBC - Arabic
 ARCH - Architecture
 ARTC - Applied Health Services Research
 ARTS - Art
 ASSC - Arts and Social Sciences Interdisciplinary
 BCBG - Community Building and Design
 BIOA - Biology (Faculty of Agriculture)
 BIOC - Biochemistry and Molecular Biology
 BIOE - Biological Engineering
 BIOL - Biology
 BIOT - Bioethics
 BMNG - Biomedical Engineering
 BUSI - Business Administration
 CANA - Canadian Studies
 CBBI - Computational Biology and Bioinformatics
 CH&E - Community Health & Epidemiology
 CHEE - Chemical Engineering
 CHEM - Chemistry
 CHIN - Chinese
 CHMA - Chemistry (Faculty of Agriculture)
 CIVL - Civil Engineering
 CLAS - Classics
 CMMT - Communications
 CNLT - Centre for Learning and Teaching
 COMM - Commerce
 CPST - Complimentary Studies
 CRNF - Creative Non-Fiction
 CRWR - Creative Writing
 CSCA - Computer Science (Faculty of Agriculture)
 CSCI - Computer Science
 CTMP - Contemporary Studies
 DCYT - Diagnostic Cytology
 DEHY - Dental Hygiene
 DENQ - Dentistry Qualifying
 DENT - Dentistry
 DISM - Disability Management
 DMUT - Diagnostic Medical Ultrasound Technology
 ECED - Electrical and Computer Engineering
 ECMM - Electronic Commerce
 ECOA - Economics (Faculty of Agriculture)
 ECON - Economics
 EDUC - Education
 EGLA - English (Faculty of Agriculture)
 EMSP - Early Modern Studies
 ENGI - Engineering
 ENGL - English
 ENGM - Engineering Math
 ENGN - Engineering (Faculty of Agriculture)
 ENSL - English Language (CE)
 ENVA - Environmental Sciences (Faculty of Agriculture)
 ENVE - Environmental Engineering
 ENVI - Environmental Studies
 ENVS - Environmental Science
 EARTH - Earth Sciences
 EURO - European Studies
 EXTE - Extension Education

FOOD - Food Science (Faculty of Agriculture)
 FOSC - Food Science & Technology
 FREN - French
 FRNA - French (Faculty of Agriculture)
 GELA - Geology
 GEOA - Geography (Faculty of Agriculture)
 GEOG - Geography
 GENE - Genetics
 GERM - German
 GWST - Gender and Women's Studies
 HAHP - Health and Human Performance
 HEED - Health Education
 HESA - Health Administration
 HINF - Health Informatics
 HISA - History (Faculty of Agriculture)
 HIST - History
 HLTH - Health Professions
 HORT - Horticulture
 HPRO - Health Promotion
 HSCE - Health Sciences Education
 HSTC - History of Science and Technology
 HUCD - Human Communication Disorders
 IAGR - International Development (Faculty of Agriculture)
 IDIS - Interdisciplinary Studies
 IENG - Industrial Engineering
 INFB - International Food Business
 INFO - Information Management
 INFX - Informatics
 INTA - Internship (Faculty of Agriculture)
 INTD - International Development Studies
 INTE - Interdisciplinary Studies (Graduate)
 INWK - Engineering Internetworking
 IPHE - Interprofessional Health Professions
 ITAL - Italian
 JOUR - Journalism
 KINE - Kinesiology
 KING - King's Foundation Year Programme
 LAWS - Law
 LEIS - Leisure Studies
 MARA - Marine Affairs
 MARI - Marine Biology
 MATH - Mathematics
 MATL - Materials Engineering
 MCRA - Microbiology (Faculty of Agriculture)
 MDLT - Medical Lab Technology
 MECH - Mechanical Engineering
 MEDI - Medicine
 MEDS - Medical Science
 MGMT - Management
 MGTA - Management (Faculty of Agriculture)
 MICI - Microbiology & Immunology
 MINE - Mineral Resource Engineering
 MTHA - Mathematics (Faculty of Agriculture)
 MUSC - Music
 NESC - Neuroscience
 NUMT - Nuclear Medicine Technology
 NURS - Nursing
 NUTR - Nutrition
 OCCU - Occupational Therapy
 OCEA - Oceanography
 ORAL - Oral & Maxillofacial Surgery
 PATH - Pathology
 PEAS - Process Engineering and Applied Science
 PERI - Periodontics
 PETR - Petroleum Engineering
 PGMD - Post-Graduate Medicine
 PGPH - Post-Graduate Pharmacy
 PHAC - Pharmacology
 PHAR - Pharmacy
 PHAS - Pharmaceutical Sciences
 PHDP - PHD Program
 PHIL - Philosophy

PHLA - Philosophy (Faculty of Agriculture)
 PHYC - Physics and Atmospheric Science
 PHYL - Physiology
 PHYS - Physics (Faculty of Agriculture)
 PHYT - Physiotherapy
 PLAN - Planning
 PLSC - Plant Science
 POLI - Political Science
 POLS - Political Science (Faculty of Agriculture)
 PORT - Portuguese Studies
 PROS - Prosthodontics
 PSYC - Psychology (Faculty of Agriculture)
 PSYO - Psychology
 PUAD - Public Administration
 RADT - Radiological Technology
 REGN - Registration Course - Graduate
 RELS - Religious Studies
 RESM - Research Methods/Project Seminars
 RSCH - Research Class for PDF's
 RSPT - Respiratory Therapy
 RURS - Rural Studies
 RUSN - Russian Studies
 SCIE - Science
 SLWK - Social Work
 SOCI - Sociology (Faculty of Agriculture)
 SOIL - Soils
 SOSA - Sociology and Social Anthropology
 SPAN - Spanish
 SPEC - Special Topics
 SPNA - Spanish (Faculty of Agriculture)
 STAA - Statistics (Faculty of Agriculture)
 STAT - Statistics
 SUST - Sustainability
 THEA - Theatre
 TYPR - Transition Year Program
 VISC - Vision Science
 VTEC - Veterinary Technology

Undergraduate Programs

Faculty of Agriculture

Bachelor of Agriculture - International Food Business (4 year)
 Bachelor of Science (Agriculture) (4 year major)
 Bachelor of Science (Agriculture) (4 year double major)
 Bachelor of Technology (4 year major)
 Diploma in Engineering (2 year)
 Diploma in Technology - Business Management (2 year)
 Diploma in Technology - Managed Landscapes (2 year)
 Diploma in Technology - Plant Science (2 year)
 Diploma in Technology - Veterinary Technology (2 year)

Faculty of Architecture and Planning

Bachelor of Environmental Design Studies (2 years)
 Bachelor of Community Design (3 years)
 Bachelor of Community Design (4 year honours)

Faculty of Arts and Social Sciences

Bachelor of Arts (3 year concentration)
 Bachelor of Arts (4 year major)
 Bachelor of Arts (4 year double major)
 Bachelor of Arts (4 year concentrated honours)
 Bachelor of Arts (4 year combined honours)
 Bachelor of Arts/Bachelor of Engineering Concurrent (5 years)
 Bachelor of Music (4 years)
 Advanced Diploma in Costume Studies (3 years)
 Diploma in Costume Studies (2 years)

Faculty of Computer Science

Bachelor of Computer Science (4 years)*
 Bachelor of Computer Science (4 year honours)*
 Bachelor of Informatics (4 year co-op)
 Bachelor of Science (4 year double major)*
 Bachelor of Science (4 year combined honours)*
 Bachelor of Arts (4 year double major)*
 Bachelor of Arts (4 year combined honours)*

Faculty of Engineering

Bachelor of Applied Science (Food Science)
 Bachelor of Engineering (4 years)*
 Bachelor of Science/Bachelor of Engineering Concurrent (5 years)*
 Bachelor of Arts/Bachelor of Engineering Concurrent (5 years)*
 Diploma in Engineering (2 years)

Faculty of Health Professions

Certificate in Disability Management
 Diploma in Emergency Health Services Management (1 year)
 Diploma in Health Science (3 years)
 Diploma in Health Services Administration (1 year)
 Bachelor of Science (Health Promotion) (4 years)
 Bachelor of Science (Health Promotion) (4 year honours)
 Bachelor of Health Science (4 years)
 Bachelor of Science (Kinesiology) (4 years)
 Bachelor of Science (Kinesiology) (4 year honours)
 Bachelor of Science (Nursing) (4 years)
 Bachelor of Science (Nursing) for registered nurses (3 years)**
 Bachelor of Science (Nursing) (Arctic Nursing) (4 years)
 Bachelor of Science (Pharmacy) (4 years)
 Bachelor of Social Work (3 years)
 Bachelor of Science (Recreation) (4 years)
 Bachelor of Science (Recreation) (4 year honours)*
 Bachelor of Science (Recreation)/Bachelor of Management (5 years)
 Bachelor of Science (Recreation)/Bachelor of Management (5 year honours)*

Faculty of Management

Bachelor of Commerce (4 year co-op)

Bachelor of Management (4 years)*

Bachelor of Science Recreation/Bachelor of Management (5 years)

Bachelor of Science Recreation/Bachelor of Management (5 year honours)*

*Also available as an internship program

** Suspension of program pending approval

Faculty of Science

Bachelor of Science/Bachelor of Arts (3 year with minor)

Bachelor of Science/Bachelor of Arts (4 year major)*

Bachelor of Science/Bachelor of Arts (4 year double major)*

Bachelor of Science/Bachelor of Arts (4 year concentrated honours)*

Bachelor of Science/Bachelor of Arts (4 year combined honours)*

Bachelor of Science (4 year multi-disciplinary honours)

Bachelor of Science/Bachelor of Engineering Concurrent (5 years)*

Bachelor of Science (Medical Sciences)

Diploma in Meteorology (1 year)

*Also available as a co-op program

Dalhousie University

Dalhousie University blends the finest academic traditions with innovative thinking and outstanding educational opportunities. Located on Canada's east coast - an area long known for its natural beauty and friendly people -- Dalhousie is a warm and welcoming university that attracts students from around the globe.

Dalhousie has been at the heart of Halifax, Nova Scotia - a lively coastal city - for almost 200 years. The university features both an historic, tree-lined urban campus and a rural agricultural campus, located about an hour from the city. Dalhousie combines a welcoming atmosphere with the international prestige of a big-name school. With 12 faculties and more than 4,000 classes in over 180 areas of study, the university offers its more than 18,000 students a wealth of choice and innovative degree programs.

Dalhousie encourages student learning through exchange programs, fieldwork, community service and cooperative education. Its collaborative learning environment encourages students to interact with one another and with faculty experts to share ideas and offer new perspectives. A member of the U15, Canada's elite research-intensive universities, Dalhousie combines the culture of a more intimate undergraduate college with the opportunities of a larger research institution.

This collaborative spirit also extends off campus. Dalhousie conducts research in partnership with teaching hospitals, professional organizations, businesses and industry, non-profit agencies and other universities. As Atlantic Canada's leading research university, Dalhousie attracts more than \$140 million in research grants and awards annually. The university is a world leader in marine-related research and home of the international Ocean Tracking Network. Dalhousie also offers Canada's first undergraduate program in Ocean Sciences.

Atlantic Canada's only Faculty of Agriculture, offering programs in areas such as international food business, pre-veterinary medicine and plant sciences, is located at Dalhousie's Agricultural Campus in Truro, Nova Scotia.

The University of King's College, situated adjacent to the Dalhousie campus, is an affiliated institution, and its students in arts and science receive Dalhousie degrees in the name of both institutions.

Dalhousie University is a member of the Association of Universities and Colleges of Canada, the Association of Atlantic Universities and the Association of Commonwealth Universities.

Executive Officers

President and Vice-Chancellor

Richard Florizone, BSc, MSc (Saskatchewan), PhD (MIT)

Vice Presidents

Academic and Provost

Carolyn Watters, BSc, MSc, MLS (Western), PhD (TUNS)

Senate

The Senate is the University's senior academic decision-making body. It is responsible for the approval of new programs and academic units and it manages the reviews of Faculties, Centers and Institutes. Senate approves the granting of degrees and diplomas, including the conferral of Honorary Degrees. It is responsible for setting academic regulations which affect the University as a whole, including regulations governing student conduct and discipline, as well as regulations concerning faculty tenure and promotion.

Senate has 77 members - 52 elected Faculty representatives, 17 academic administrators (President, Vice-President Academic and Provost, Vice-President, Research, University Librarian, and the Deans of each faculty), seven students elected by the Dalhousie Student Union (one of whom shall be a graduate student and one who should represent the Agricultural Campus), and a representative from the University of King's College.

Senate normally meets on the second Monday of each month from 4:00 - 6:00 pm. In addition, if there are sufficient items of business, Senate will meet on the fourth Monday of the month, from 4:00 - 6:00pm

Chair of Senate

Lloyd A. Fraser, EdD

Vice-Chair (Academic Programs)

Jeff Hoyle, BEd, PhD

Vice-Chair (Student Affairs)

Alan Pinder, BSc, PhD

Admission Requirements

Dalhousie University is an affirmative action and equal opportunity educational institution. Students who are Aboriginal, Black/persons of African descent, or persons with a disability and do not meet the normal admission requirements may choose to self-identify and request special consideration.

Dalhousie University reserves the right to rescind any acceptance of an applicant into a program or to rescind an offer of admission of an applicant into a program. Please refer to University Regulations, [page 20](#).

PLEASE NOTE: Admission to many programs is limited. Possession of minimum requirements does not guarantee admission.

I. General Admission Requirements

Applicants must meet the admission requirements as outlined in the appropriate section of this calendar.

1. Place of Residence

For the purpose of admission to the University, the place of residence of a student is the place of domicile. This is normally presumed to be the place (country, province, etc.) where the parents or guardian's home is located. That place remains unchanged unless the Registrar is satisfied that a place of residence is established elsewhere.

2. Age Requirement

No person under 16 years of age is admitted to any course except on the specific recommendation of the admissions committee of the relevant Faculty or School, which shall take into account all aspects of the applicant's preparedness for the course or program involved, and which may attach such conditions to the applicant's admission as the committee judges appropriate.

3. Students from Canadian High Schools

For general admission to most programs, students require grade 12 level university preparatory English and four additional university preparatory courses. Special attention will be paid to grades in English and mathematics. Final grades in mathematics (if required for the program) and English must be at least 65%. Students are expected to have an overall minimum average of 70%. Final grades in individual university preparatory courses other than mathematics and English must be at least 60%.

Any special or pilot course must have been previously approved by Dalhousie if it is to be used as one of the credits needed for admission.

4. Students from a Community College, College of Applied Arts and Technology (CAAT) or a CEGEP

Applicants who have completed studies in a Community College, College of Applied Arts and Technology (CAAT) or a CEGEP program, may qualify for transfer credits. Applications are considered on an individual basis.

5. Acceptable High School Courses for Admission

- English
- Biology, chemistry, French, geography (or global geography), German, history (or global history), Latin, mathematics, physics, calculus, comparative religion, computer related studies, economics, environmental studies, Gaelic, geology, journalism, law, music, political science, sociology, Spanish, theatre, drama and other courses provincially coded as academic or advanced.

6. For Students from Quebec

Students attending high schools offering Grade 12 must meet the distribution and average requirements outlined for students from the Atlantic provinces, or first

year CEGEP with minimum 70% overall average, with no individual academic subject below 65%.

PLEASE NOTE: Fulfillment of admission requirements does not necessarily provide the prerequisite background for all first year courses. Please consult the course description section of this calendar.

7. Students from Outside Canada

American High School Curriculum

Students studying in an American-based curriculum (in the United States, or abroad), are required to present a Grade 12 high school average of "C" or better. In addition, students must present a minimum SAT score of 1650 or an ACT score of 23 or better.

British Curriculum (GCE and GCSE)

Students studying in a British-patterned curriculum (GCE) are required to present the General Certificate of Education with at least five subjects. These must include at least two Advanced Level courses (A-levels), or four AS-level courses, with grades of at least "C". Exceptional candidates may be admitted on O-level results.

Advanced Placement (AP), Baccalauréat (French Baccalauréat), A-level (GCE) and International Baccalaureate (IB) courses are accepted towards meeting admission requirements. Please refer to the General Admission Requirements section of the Calendar for specific admission requirements. Courses may be eligible for transfer credits. Please refer to section 12.

Admission Requirements by Country

For most countries, we consider the same academic preparation that is required for university entrance in that country - that is, successful graduation from an academic secondary school program or equivalent. View our Admission Requirements by Country chart at www.dal.ca/admissions/international_students/admissions/requirements-by-country.html for more information.

8. English Language Proficiency Requirements

English is the language of study at Dalhousie; therefore all applicants whose first language is not English must provide proof of English proficiency. This requirement can be satisfied with one of the following criteria:

- Test of English as a Foreign Language (TOEFL)
 - TOEFL (computer based) - 237 with no band below 21
 - TOEFL (paper based) - 580 with no band below 55
 - TOEFL (iBT) - 90 with no band below 20
 - Students must achieve 4.0 or better on the essay or TOEFL Writing Test
- International English Language Testing System (IELTS) - 6.5 with no band below 6.0
- Michigan English Language Assessment Battery (MELAB) - 81
- Canadian Academic English Language Assessment (CAEL) - 70
- Certificate of Proficiency in English (CPE) minimum grade C and Certificate in Advanced English (CAE) minimum grade B
- IB Higher Level English class A1, A2 with a minimum grade of 5 or English B with a minimum grade of 6
- AP English Examination (Language Composition; Literature and Composition) with a minimum grade of 4
- O-Level GCSE or IGCSE English Language or English Literature course with a minimum grade of B
- CanTest of English for Scholars and Trainees (CanTest) - 4.5
- Student has graduated from a Dalhousie-recognized school which uses English as the primary language of instruction and the student has spent three successful years in the English program
- Student has studied full-time for at least three years (or equivalent in part-time studies) in a secondary school where the language of instruction and examination was English
- Student has studied full-time for at least one year in a recognized university where the language of instruction and examination was English and the course curricula require proficiency in English

The following Web links will provide more information on English Language proficiency tests:

TOEFL - <http://www.ets.org/toefl/>

IELTS - <http://www.ielts.org>

MELAB - <http://www.lsa.umich.edu/eli/testing/melab/>

CAEL - <http://www.cael.ca/>

CPE/CAP - <http://www.cambridgeesol.org/>

Arrange to have your English Language proficiency test score(s) sent directly by the testing agency to Dalhousie at the following address:

Dalhousie University
Registrar's Office
PO Box 15000
Halifax, NS B3H4R2
Canada
Dalhousie University TOEFL Code: 0915

9. Language Training

Students who meet the academic admission requirements whose English proficiency minimum test scores are TOEFL PBT 550, CBT 213, or iBT 79 or IELTS 6.0 or MELAB 76 or CanTest 4.0 or CAEL 60 may be offered part-time Dalhousie admission with the co-requisite of completing a full-time approved English training program.

10. Students with Learning Disabilities

Dalhousie University is committed to providing equal educational opportunities and full participation for students with learning disabilities.

Students with diagnosed learning disabilities who meet the current admission requirements for Dalhousie University may follow the current admission procedures. All new Dalhousie students will receive in the offer of admission a statement indicating that, if they have a learning disability or any other disability for which they will require accommodations or special assistance, they should contact the Advisor to Students with Disabilities, in order to ascertain the degree to which their needs can be met.

Students with diagnosed learning disabilities who do not meet the current admission requirements or who otherwise wish to have their learning disability considered may apply for special consideration as may all other students who have extenuating circumstances. These requests will be made to the appropriate admissions committee, acting in consultation with the Advisor to Students with Disabilities and other knowledgeable professionals.

The following documentation must be submitted by students who wish to apply for special consideration:

1. Letter(s) of recommendation from the individual(s) most familiar with the applicant's academic performance and/or potential for success at university;
2. A written, oral or electronic statement from the student. In this brief personal statement, students should describe their learning disability, how this affected their grades and the type of assistance they would require while at Dalhousie University;
3. A current (within three years) psychological assessment based on standard diagnostic instruments administered by a registered psychologist documenting the presence of learning disabilities. If a current report is not possible, Dalhousie University may accept an earlier report along with a current opinion (ie. within the past year) expressed in a letter by a registered psychologist (or individual supervised by a registered psychologist) that the student has a learning disability. This letter should specify the nature, extent and rationale for program modifications or accommodations that were deemed appropriate in the student's last two years of schooling.

11. Mature Students

Applicants who are Canadian Citizens or permanent residents and 21 years of age or older, by the first day of courses, and are not eligible for admission on the basis of regular admission requirements, may apply for admission to some programs as a mature applicant. In order to be eligible, the applicant must either have no university-level study, or have attempted less than one year of transferable coursework. The student cannot have been in full-time university-level study for a minimum period of two years.

Applicants must provide a completed application for admission, high school or post-secondary transcripts, any other relevant documents (e.g. SAT scores, if available), and a letter outlining life and work experience since last attending full-time study. Applicants will be expected to clearly outline their education goals and motivation to succeed at university study. All factors will be considered in the admission decision.

Admission under this policy is restricted to first year of undergraduate programs. Applicants must have completed grade 12 English (or equivalent) with a minimum grade of 65%. Admission to some programs will require completion of other required subjects.

A student admitted on this basis may be restricted in the number of courses he/she can register in during the first year. Otherwise, these students have the same rights, privileges and responsibilities as other students within their program.

12. Transfer Students

Students wishing to apply for transfer credit should consult Academic Regulation 7, in this calendar. Certified copies of course descriptions from calendars are acceptable in lieu of originals. Certificates in languages other than English or French must be accompanied by certified translations into English. Students applying with one year or less of university work must also submit high school transcripts.

The minimum GPA for admission as a transfer student may vary by program of study. Please contact the Registrar's Office for more information.

Note: Transfer credit will not be awarded for work completed while a student was academically ineligible.

13. International Baccalaureate (IB), Advanced Placement (AP), Baccalauréat (French Baccalauréat), A-Level (GCE) Courses

Students taking any of these courses, may qualify for advanced placement or transfer credits.

Transfer credits will be awarded based on equivalent Dalhousie courses. Credit may be awarded to students with Higher level IB courses with final grades of 5, 6 or 7 or with AP national exam results of 4 or 5. For students with a Baccalauréat exam result of 11 or higher on courses with a minimum coefficient of 4, transfer credits may be awarded. Those who have completed A-Level courses with a final grade of C or higher may receive transfer credit.

Students may opt to forgo transfer credit awarded for these programs. To do so, applicants must contact the Registrar's Office (902) 494-2450.

Lists of equivalent Dalhousie credits that have been previously determined can be found on the Registrar's Office website (<http://www.dal.ca/transferecredits>).

Transfer credits are evaluated on an individual basis and will vary depending on each student's personal academic program.

14. International and Exchange students attending Dalhousie as Visiting Students

International students must meet the following requirements:

- Good academic standing at the home institution
- Written academic approval from the appropriate department head, Dean or designate (e.g., Registrar) to undertake coursework at Dalhousie (written approval is usually in the form of a *letter of permission*)
- The required student visa to study in Canada
- Proof of adequate health insurance for the duration of the stay in Canada
- Proof of proficiency in English

PLEASE NOTE: Students studying for less than one full academic year are restricted from taking full-year courses (see Course Codes and Definitions).

15. Rescission of Acceptance into a Program

Dalhousie University reserves the right to rescind any acceptance of an applicant into a program or to rescind an offer of admission of an applicant into a program. Such rescission shall be in writing and may be made by the President or the Vice-President (Academic) and Provost, in consultation with the appropriate Dean, at any time prior to the applicant's registration being confirmed by the Registrar. Any such rescission shall be reported to the Senate in camera.

16. Canadian and Local Students attending Dalhousie as Visiting Students

All students wishing to attend Dalhousie University on a letter of permission from their home university must submit the following:

- A completed application for admission
- Letter of permission from the home university

- Students applying from Saint Mary's, Mount Saint Vincent, and NSCAD University are not required to pay the application fee, all other applicants are required to pay the application fee.

At the end of each academic session, grades will be forwarded to Saint Mary's, Mount Saint Vincent, and NSCAD University on the student's behalf. Students from all other universities must arrange for transcripts to be sent to the home university.

II. Specific Program Requirements

A. Faculty of Agriculture

Pre University Study

The Faculty of Agriculture offers pre university study in Math, Chemistry and Physics. Applicants who do not meet the stated admission requirements in Math or Science may still be admitted to a degree program in the Faculty of Agriculture on the condition that they complete the pre university level course prior to entering the degree level required subject.

1. Bachelor of Science (Agriculture) & Pre-Veterinary Studies

- English 12
- Pre Calculus Math 12
- Chemistry 12
- Two other acceptable university-preparatory courses at the grade 12 level
- Minimum final grades:
 - English 65%
 - Pre Calculus Math 65%
 - Chemistry 65%
 - Overall Average 70%

Applicants in all majors except Agricultural Business, Agricultural Economics and Plant Science will be required to have Physics 12 or to take the preparatory physics on campus prior to enrolling in university level physics.

It is recommended that applicants also take Biology 12, and where available at the high school level, courses in Agriculture or Food Science.

2. Bachelor of Agriculture - International Food Business

- English 12
- Academic Math 12
- Three other acceptable university-preparatory courses at the grade 12 level
- Overall average of 75%

3. Bachelor of Technology

Years one and two of the Bachelor of Technology - Environmental Landscape Horticulture program are satisfied by completion of the Diploma in Technology Managed Landscapes or a landscape-related program approved by the Department of Environmental Sciences in the Faculty of Agriculture. Applicants must have a cumulative GPA of at least 2.0 in the Diploma program to gain admission.

4. Diploma in Engineering

- English 12
- Pre Calculus Math 12
- Chemistry 12
- Physics 12
- One other acceptable university-preparatory course at the grade 12 level
- Minimum final grades:
 - English, Chemistry, Mathematics, Physics - 65%
 - Other subjects - 60%
 - Overall average - 70%

5. Diploma in Technology Business Management

- English 12
- Math 11
- Chemistry 11 or Biology 11 or Agriculture 11
- Science 10
- Four grade 12 level courses at the university-preparatory or general level
- Minimum overall final average of 60%

Applicants to the Equine concentration are expected to be experienced in the care and handling of horses. A Competency Form outlining practical experience and knowledge in the industry is required. This form can be found online at dal.ca/applynow

6. Diploma in Technology Managed Landscapes

- English 12
- Math 12
- Biology 12
- Chemistry 11
- One other acceptable university-preparatory course at the grade 12 level
- Minimum overall final average of 60%

7. Diploma in Technology Plant Science

- English 12
- Math 11
- Chemistry 11
- Science 10 or Biology 10
- Four grade 12 level courses at the university-preparatory or general level
- Minimum overall final average of 60%

8. Diploma in Technology Veterinary Technology

- English 12
- Pre-Calculus Math 12 or Academic Math 12 with a 70% or higher
- Chemistry 12
- Biology 12
- One other acceptable university-preparatory course at the grade 12 level
- Minimum overall final average of 60%

B. Faculty of Architecture and Planning

1. School of Architecture

1.a Bachelor of Environmental Design Studies (BEDS)

1. Admission Criteria

The Admissions Committee gives priority to applicants with a combination of academic performance and creative ability. Well-rounded personal and academic experience is beneficial, as well as experience in drawing, craft, and computer applications.

2. Minimum Academic Requirements

The minimum requirements for admission are:

- a portfolio of design work that demonstrates creativity and/or artistic skill;
- two years in a university degree program (10 full-year courses, 20 half-year courses, or a combination), with a 2.5 grade point average (B- average), including the following courses:
 - a full-year course (or two half-course) in mathematics or natural sciences, for which Grade 12 math is a prerequisite: e.g., algebra, calculus, trigonometry; biology, chemistry, engineering, physics;
 - a full-year course (or two half-year courses) in humanities or social sciences: e.g., art history, classics, literature, music, history, philosophy, anthropology, political science, psychology, sociology;
 - a half-year course that emphasizes written composition (often designated by a university as "writing requirement" or "writing intensive".)

2.a Post-Secondary Institutions

The Admissions Committee may grant up to one year of university credit for an applicant who has attended a post-secondary institution that is not considered a university. Two or more years at a college or an institute of technology plus one year of university is normally acceptable.

2.b Mature Students

An application will be considered from a Mature Student – an individual who will be at least 25 years old at the time of registration in the BEDS program and does not meet the minimum academic requirements for admission (two years of university, required courses, 2.5 GPA). All mature students must have completed at least one full year at a university. In the application, a Mature Student should describe related work experience and any other pursuits and skills that may serve as grounds for admission.

2.c Transfer Students

The School of Architecture welcomes applications from transfer students from other architecture schools in Canada and abroad. Admission and level of entry is based on courses completed elsewhere that are equivalent to required courses at Dalhousie; the level of achievement in the design portfolio and on the applicant's total years of university. To meet professional accreditation standards, the School cannot offer a level of entry that would permit a student to obtain the MArch degree with less than six full years of university, including two years of general studies.

3. Documents

A BEDS applicant must submit all of the following items before the application can be reviewed:

1. To be submitted to the Registrar's Office:
Admissions, Registrar's Office
PO Box 15000
Dalhousie University
Halifax, NS B3H 4R2
 - Undergraduate application form
 - Undergraduate application fee (see University Fees in this Calendar)

To confirm receipt of the items above, please contact the Registrar's Office: (902) 494-2450.

2. To be submitted to the School of Architecture:
Admissions, School of Architecture
Dalhousie University
5410 Spring Garden Road
PO Box 15000
Halifax, NS B3H 4R2
 - An official academic transcript from all previous post-secondary institutions;
 - A portfolio of design work (about 10-15 items) that demonstrates creativity and/or artistic skill.
 - A letter written by the applicant, describing his/her background and interest in architecture and in the BEDS program.
 - Two letters of recommendation, including at least one from an academic instructor;
 - Evidence of competency in English for applicants whose native language is not English (see University Admission Requirements in this Calendar).

To confirm receipt of the items above, please contact the Architecture Office: arch.office@dal.ca or (902) 494-3971. For additional application instructions, please visit <http://archplan.dal.ca>

4. Application Deadline

The deadline for undergraduate applications from Canada and all other countries is March 1. Transfer applications are reviewed three times every year: in February, June, and October. For an application to be considered, all items must be received by February 1, June 1 or October 1.

2. School of Planning

2.a Bachelor of Community Design

Admission to the Bachelor of Community Design program is limited. Not all applicants who meet the minimum requirements can be accepted.

Admission to the program is based on academic performance.

High School Applicants

- Satisfactory completion of grade 12 or equivalent with at least five academic university preparatory courses including:
 - English
 - Academic math
 - One science
 - Two additional university preparatory courses
 Biology, geology or geography are recommended courses for students interested in this field. Only applicants with a minimum average of 70% will be considered.

Applicants with Previous Post-Secondary Experience

- Satisfactory completion of the required academic grade 12 subjects as outlined or university level courses in these subject areas.
- Applicants must have a minimum GPA of at least 2.0.

- All applicants, both high school and transfer, are admitted to the first year of the program. Following admission, a limited number of transfer students may be considered for registration in second year planning courses based on availability of space and level of academic preparedness (including number and subject area of course credits transferring from previous post-secondary study), among other requirements. Students must complete the Expedited Program form available from the Registrar's Office, to be considered for admission to the second year class. For more information, please contact the School of Planning directly.

C. Faculty of Arts and Social Sciences

1. Bachelor of Arts

- English
- Four other acceptable university-preparatory courses
- Minimum final grades:
 - English - 65%
 - Other Subjects - 60%
 - Overall Average - 70%

2. Bachelor of Music, BA Music and other Music degree programs

- Satisfy the requirements for Bachelor of Arts
- Demonstrate proficiency as instrumental or vocal performer in an audition/interview
- Demonstrate knowledge of the basic rudiments of music theory (roughly equivalent to Grade II theory, Royal Conservatory of Music in Toronto), aural dictation and keyboard skills. Each is assessed through written diagnostic tests as part of the audition/interview.
- Submit the supplementary application form to the Fountain School of Performing Arts.

It is recommended that students apply early for the purposes of admission, audition, and music scholarship consideration. Audition dates are listed on the supplementary form and all audition procedures should be completed by June 30.

Applicants who, in the estimation of the Auditioning Committee, show considerable musical talent but are in need of more emphasis on preparatory skills will be required to take preparatory courses. Applicants with significant background deficiencies will be advised to seek further preparation through private instruction before reapplying.

Students wishing to transfer from another institution into the second or third year of their chosen Music program must take validation examinations in music history, theory, aural and keyboard skills, and their applied major instrument before transfer of credits can be considered. Failure to pass an examination will necessitate enrolment in the appropriate first- or second-year course. Validation examinations must be written at the same time as the audition/interview. Transfer applications are subject to the June 1 deadline.

3. Diploma in Costume Studies (two years)

- Satisfy the admission requirements for Bachelor of Arts
- Minimum 65% in Grade 12 English

Applicants are asked to submit a brief letter outlining their interest in the program, their background in sewing, costume study/design and/or the theatre. University credits will enhance applications. Due to the special nature of this program, transfer credits for university work are not offered.

D. Faculty of Computer Science

1. Bachelor of Computer Science

- English
- Pre-calculus mathematics
- Three other acceptable university-preparatory courses
- Minimum final grades:
 - English and mathematics - 65%
 - Other subjects - 60%
 - Overall average - 70%

2. Bachelor of Informatics

- English
- Academic mathematics

- Three other acceptable university-preparatory courses
- Minimum final grades:
 - English and mathematics - 65%
 - Other subjects - 60%
 - Overall average - 70%

E. Faculty of Engineering

1. Bachelor of Applied Science in Food Science

(Admission for this program is currently under review, contact the Registrar's Office for more information)

- English
- Pre-Calculus mathematics
- Three other acceptable university-preparatory courses
- Minimum final grades:
 - English, mathematics - 65%
 - Other subjects - 60%
 - Overall average - 75%
- It is recommended that students take two of the following science subjects: physics, biology, chemistry.

2. Bachelor of Engineering

2.a From High School

- English
- Pre-Calculus mathematics
- Physics
- Chemistry
- One other acceptable university-preparatory course
- Minimum final grades:
 - English, chemistry, mathematics, physics - 65%
 - Other subject - 60%
 - Overall average - 70%

2.b Transfer Students

Students wanting admission with advanced placement in the BEng degree program are advised that at least one half of the coursework must be completed at Dalhousie including the final two study terms with a full course load.

2.c Associated Universities Transfers

On completion of the Engineering Diploma at an Associated University, a student may be eligible for admission to the Bachelor of Engineering program at Dalhousie. Applicants must complete an Application for Admission form (available from the Registrar's Office), and submit the application plus an official transcript from their Associated University, verifying completion of the program entrance requirements, to the Registrar by the application deadline.

F. Faculty of Health Professions

Some programs in the Faculty of Health Professions have been established to meet the needs of the Maritime or Atlantic provinces. Admission of applicants outside the preferred region may be limited.

Affirmative Action

The Faculty of Health Professions recognizes that Affirmative Action is required to increase the admission of and number of graduates from underrepresented groups; Aboriginal peoples, African Canadians and Persons with (dis)Abilities. The constituent Units of the Faculty will develop and implement Affirmative Action policies that are consistent with the Human Rights Commission.

As a matter of priority, the Faculty will develop strategies to identify and create recruitment and support systems that will encourage and support members of these underrepresented groups to apply to and graduate from the Faculty of Health Professions

Statement Regarding Criminal Records Check

The Faculty of Health Professions of Dalhousie University does not require a Criminal Records Check or other screening procedure (e.g., Vulnerable Sector Screen) as a condition of admission into its programs. However, **students should be aware that such record checks or other screening procedures will be required by facilities outside the University used for clinical, fieldwork or co-op placements or experiences related to an academic course assignment which in some instances, may be a requirement for graduation.** It is the student's responsibility to have such procedures completed.

Such facilities may refuse to accept students on the basis of information contained in the record check or other screening procedure. If the student is unable to complete a clinical requirement due to a failure to meet the record check or screening requirements of the facility, or if the student is refused access to the facility on the basis of the information provided, such a student may fail the course, and as a result in some instances, may not be eligible for progression or graduation.

Students should check with their School/College for details concerning any record checks or screening requirements relevant to clinical, fieldwork, or placements in their particular program. Note that facility requirements may change from time to time and are beyond the control of the University.

Students should also be aware that some professional regulatory bodies may require a satisfactory record check as a condition of professional licensure.

Deposit

Due to the large number of applications, a non-refundable deposit of \$200 (applicable to tuition fees) is required on admission. For transfer students, this deposit is payable within three weeks of notification of acceptance.

1. School of Health and Human Performance

Admission to programs offered by the School of Health and Human Performance is limited. Not all applicants who meet the minimum requirements for admission can be accepted.

1.a Bachelor of Science (Health Promotion)

High School Applicants:

Satisfactory completion of grade 12 or equivalent, with a minimum average of 70% in at least five academic university preparatory courses including:

- English (minimum 70%)
- Biology or Chemistry (minimum 70%)
- Three other acceptable university-preparatory courses

Transfer Applicants

- Satisfactory completion of the required grade 12 academic subjects as outlined or university level courses in these subject areas.
- Applicants must have a minimum GPA of at least 2.3 (on a 4.3 scale)
- Experienced persons in the workplace may be admitted as mature students.

1.b Bachelor of Science (Kinesiology)

High School Applicants:

Satisfactory completion of grade 12 or equivalent, with a minimum average of 75% in at least five academic university preparatory courses including:

- English (minimum 70%)
- Academic mathematics (minimum 70%)
- Students are encouraged to have grade 12 courses in Biology or Chemistry or Physics.

Transfer Applicants

- Satisfactory completion of the required grade 12 academic subjects as outlined or university level courses in these subject areas.
- Applicants must have a minimum GPA of at least 2.3 (on a 4.3 scale)

1.c Bachelor of Science (Recreation)

High School Applicants:

Satisfactory completion of grade 12 or equivalent, with a minimum average of 70% in at least five academic university preparatory courses including:

- English (minimum 70%)

Transfer Applicants

- Satisfactory completion of the required grade 12 academic subjects as outlined or university level courses in these subject areas.
- Applicants must have a minimum GPA of at least 2.3 (on a 4.3 scale)

1.d Bachelor of Science (Recreation)/Bachelor of Management

A five year combined degree program is offered with a primary focus on Recreation Administration.

High School Applicants:

Satisfactory completion of grade 12 or equivalent, with a minimum average of 70% in at least five academic university preparatory courses including:

- English (minimum 70%)
- Academic mathematics (minimum 70%)

Transfer Applicants

- Satisfactory completion of the required grade 12 academic subjects as outlined or university level courses in these subject areas.
- Applicants must have a minimum GPA of at least 2.3 (on a 4.3 scale)

2. School of Health Sciences**2.a Bachelor of Health Science (Four-Year Entry-Level Program)**

Since all professional streams of the BHSc are limited enrolment programs, these requirements define eligibility. Not all applicants who meet the minimum requirements will be accepted into the program.

Requirements differ based on the previous education and background of the applicant.

1. Selection criteria

The selection criteria used by the Admissions Committee include:

- Place of residence
- Academic performance
- Non-academic performance

1.a Place of Residence Priority consideration is given to permanent residents of the Maritime provinces (NS, NB, PE), then to permanent residents of other Canadian provinces/territories and finally to all other applicants.

Applicants are considered to be from the Maritime provinces if:

- The principal residence of the applicant's parent(s) or guardian is located in the Maritime provinces; or

If the applicant is independent of his/her parent(s) or guardian, he/she must have lived and worked on a full-time basis in the Maritime Provinces for a minimum of one full year and not have attended school on a full-time basis.

1.b Assessment of Academic Performance

Assessment of academic performance based on the applicant's transcripts accounts for 80% of the applicant's overall total score.

High School Applicants

- Completion of academic Grade 12 with at least five Grade 12 university preparatory courses, including:
 - English
 - Academic Math
 - Two Sciences
- Diagnostic Cytology: Biology, Chemistry
- Diagnostic Medical Ultrasound: Biology, Physics
- Nuclear Medicine Technology: Physics, Chemistry
- Radiological Technology: Physics and either Biology or Chemistry
- Respiratory Therapy: Chemistry and either Biology or Physics
- Overall average of 75% in the five university preparatory courses used to meet admission requirements
- No grade lower than 70% in the five courses

Note: Admission to the BHSc Diagnostic Program is suspended for the 2014-2015 academic year.

Applicants with Previous Post-Secondary Experience

- Completion of courses in English, Math and two sciences as outlined above for high school applicants. If these courses were not taken as part of post-secondary study, they must be at the academic Grade 12 level with a minimum grade of 70%.
- A minimum grade of C in the required subjects if taken at the post-secondary level.
- Minimum cumulative GPA of 2.75 or in most recent year of full-time studies

1.c Assessment of Non-Academic Performance

Assessment of non-academic performance accounts for 20% of the applicant's overall total score.

A letter of intent and resume are required.

Forms and detailed instructions can be found on the School of Health Sciences website www.dal.ca/SHS.

Applicants will be assessed on the following non-academic criteria:

- Demonstrated knowledge of the selected health profession
- Leadership
- Community involvement
- Teamwork

1.d Special Circumstances

In exceptional situations, special consideration may be given by the Admissions Committee to applicants who do not meet all admissions requirements. Applicants will be required to submit a letter stating reasons for special consideration.

2. Personal Suitability

Students in the professional streams included in the BHSc program work with clients who trust them to provide safe and competent care. A criminal records check will be required for only those students accepted into the BHSc program.

3. Affirmative Action

In keeping with the Dalhousie University Faculty of Health Professions Affirmative Action Policy, the School of Health Sciences is committed to increasing the number of students who identify as African Canadian, Aboriginal Peoples and persons with disabilities.

Applicants wishing to apply under the Affirmative Action Policy must indicate on their admissions application and meet the minimum admissions requirements.

4. Application Submission

Application form, fee and all official transcripts should be sent to the Registrar's Office.

All other supporting documents should be sent directly to the School of Health Sciences.

Application deadline is **February 15**.

Applicants must submit the following:

- Completed application form and fee
- For high school applicants, an official high school transcript
- For other applicants, an official transcript from all previous post-secondary institutions
- Letter of intent
- Resume

Forms and detailed instructions on the School of Health Science website

www.dal.ca/SHS

5. Notification

Each applicant is notified of the status of their application by mail, normally by the end of April. Those applicants who are put on the waiting list may expect to hear about acceptance as late as September.

6. Deposit Fee

A non-refundable deposit of \$200 (applicable to tuition fees) is required within three weeks of receipt of written notification of acceptance in order to reserve a place in the program.

2.b Bachelor of Health Sciences (Post-Diploma Program)

The Bachelor of Health Science, Post-Diploma program, is a configuration of the BHSc developed for practitioners in the following professional streams:

- Diagnostic Cytology
- Diagnostic Medical Ultrasound
- Medical Laboratory Technology
- Nuclear Medicine Technology
- Radiological Technology
- Respiratory Therapy

The objective of the post-diploma program is to provide registered technologists and therapists the opportunity to obtain a degree in health science. It is not intended as an opportunity to merely refresh skills or competencies.

The program comprises 60 credit hours of university study (equivalent to two years full-time study). In recognition of the reality that potential students are likely to be working full-time, the program is available on a part-time basis.

Note: Respiratory Therapists wishing to apply to the Anaesthesia Assistant Certificate (AAC) must fulfill the admission requirements and follow the process for application to the Post-Diploma Program.

(Admission for 2014-2015 has been suspended)

1. Admission Requirements

- Successful completion of a diploma program in the profession for which you are applying*
- Two years of post-diploma work experience in that profession
- Evidence of good standing with the applicable Canadian professional association or college.

* For Diagnostic Medical Ultrasound, completion of advanced training in ultrasound following a diploma in another allied health profession, plus at least two years work experience in ultrasound, may be substituted.

2. Documentation Required

- Completed Dalhousie application form plus application fee (see Application for Admission form)
- Official transcript of diploma program, plus official transcripts from any other post-secondary institution attended
- Current registration number with applicable Canadian professional association or college, or photocopy of current membership card
- Letter of intent
- Resume with two contact references (two letters of reference for AAC program)

3. Guidelines for Letter of Intent

This letter provides the opportunity for applicants to expand upon their experience, any advanced or specialty education they may have and their interest in undertaking university studies.

Information to be included:

- Work experience
- Educational initiatives undertaken since diploma completion
- Other professional activities, e.g., in professional association
- How applicant thinks this program will contribute to her/his professional development
- Personal and professional motivation
- Readiness for university education

3. School of Health Administration

3.a Diploma in Health Services Administration

Applicants must meet the Dalhousie University undergraduate admission requirements. It is recommended that students not apply directly from High School and have work or volunteer experience in the Health Services industry. A complete application consists of the following documents:

- Application and fee
- An official transcript from high school and previous post-secondary institutions
- One letter of reference
- Resume

3.b Diploma in Emergency Health Services Management

Applicants must meet the Dalhousie University undergraduate admission requirements. It is recommended that students not apply directly from High School and have work or volunteer experience in the Health Services industry. A complete application consists of the following documents:

- Application and fee
- An official transcript from high school and previous post-secondary institutions
- One letter of reference
- Resume

4. School of Nursing

4.a Bachelor of Science (Nursing) - Four Year

Admission to the Bachelor of Science Nursing program is limited. Not all applicants who meet the minimum requirements can be accepted.

Requirements differ based on the previous education and background of the applicant.

1. Selection criteria

The selection criteria used by the Admissions Committee include:

- Place of residence
- Academic performance

1.a Place of Residence

Owing to the limited enrolment and the large number of applicants, this program primarily serves permanent residents of Nova Scotia but each year a limited number of places are also available for well-qualified residents of other Canadian provinces and international students.

Applicants are considered to be from Nova Scotia if:

- The principal residence of the applicant's parent(s) or guardian is located in Nova Scotia; or
- If the applicant is independent of his/her parent(s) or guardian, he/she must have lived and worked on a full-time basis in Nova Scotia (not attending school on a full-time basis) for a minimum of one full year; or
- The applicant, or his/her parent(s), guardian or spouse does not meet the preceding requirements as the direct result of a recent employment transfer in or out of Nova Scotia.

1.b Academic performance

High School Applicants

- Satisfactory completion of grade 12 or equivalent with at least five academic university preparatory courses including:
 - English
 - Biology
 - Chemistry
 - Academic Math
- A minimum grade of 70% in the required subjects.
- A minimum overall average of 70% in the five university preparatory courses used to meet admission requirements

Applicants with Previous Post-Secondary Experience

- A minimum grade of 70% in the required academic grade 12 subjects as outlined above for High School applicants; or
- A minimum grade of B- in the required subjects at the Post-Secondary level.
- A minimum cumulative GPA of 2.5 based on overall Post-Secondary career or most recent year of studies (30 credit hours).

2. Special Cases

In exceptional circumstances, special consideration may be given by the Admissions Committee to applicants who do not meet all admission requirements. These decisions are at the discretion of the Admissions Committee and are not subject to appeal.

3. Affirmative Action

The School of Nursing has an Affirmative Action Policy for residents of Nova Scotia who belong to the indigenous Black and Aboriginal population. Applicants wishing to apply under the Affirmative Action Policy must indicate on the self identification section of the application form. Applicants must meet the minimum admission requirements.

4. Final Date for Receipt of Applications for Admission

March 15

5. Notification

Each applicant is notified of the status of their application by mail, normally by the end of May. Those applicants who are put on the waiting list may expect to hear about acceptance as late as September. Incomplete and late applications will not be considered.

5.a Bachelor of Science (Nursing) (Arctic Nursing)

A program for Inuit is available. Please contact the School of Nursing for information.

6. Deposit Fee

Due to the large number of applications a non-refundable deposit of \$200 (applicable to tuition fees) is required on admission.

For High School students the \$200 deposit is payable by May 15 in order to reserve a place in the program.

For all other applicants the \$200 deposit is payable within three weeks of receipt of written notification of acceptance in order to reserve a place in the program.

The following guidelines have been established for the School of Nursing: if the deposit is not received by the deadline the place will be offered to another applicant without further notice. Students who have paid their deposits but who

have not appeared at the School of Nursing by the first day of the Orientation Program will be considered to have withdrawn from the School unless they have written permission from the Admissions Committee.

5. College of Pharmacy

5.a Bachelor of Science (Pharmacy)

Applicants to the BSc Pharmacy program must fulfill the requirements of a first year BSc at Dalhousie University as outlined in the Degree Requirements section of this calendar. Equivalent subjects from other universities will be given equal status for purposes of determining admission.

Courses required for admission are the following Dalhousie courses:

- CHEM 1011.03/1012.03 or 1021.03 /1022.03
- MATH 1000.03 or 1215.03
- STAT 1060.03 or 2060.03
- BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03
- ENGL 1000X/Y.06 or any two English courses designated as a writing requirement (ie. ENGL 1010.03, 1020.03, 1040.03, 1050.03 or 1100.03) or equivalent
- Six credit hours or two three credit hour courses in any Social Science subject
- Minimum grade of 70% in each prerequisite course
- Applicants must present at least one year of study in which they successfully complete five full credits of study (30 credit hours) over the fall and winter terms.

Transfer credits will not be granted for students who exceed the minimum admission requirements. The problem-based curriculum which integrates science, pharmaceutical science and pharmacy practice requires that students will complete all coursework in the four year program.

Incomplete applications and applications submitted after the deadline, February 1 (see Application Dates for details), will not be considered.

1. Selection Criteria

The selection criteria used by the Admissions Committee include:

- Place of residence
- Academic performance
- Assessment of non-academic criteria

A score out of 100%, is calculated for each applicant based on academic performance and assessment of non-academic criteria.

1.a Place of Residence

This is the only College of Pharmacy for the Maritimes and therefore preference is given to Maritime applicants. Attendance at a Maritime university does not, by itself, constitute having established residence in the Maritime provinces.

Applicants are considered to be from the Maritimes if:

- The principal residence of the applicant's parent(s) or guardian is located in the Maritime provinces, or
- The applicant (or spouse) has been employed full-time in the Maritime provinces for the preceding 12 consecutive months.

Applicants whose parent(s), guardian or spouse do not meet the residency requirements as a direct result of a recent employment transfer either into or out of the Maritime provinces would not necessarily be expected to conform to the above guidelines.

Exceptions to these guidelines will be considered on an individual basis. Residency will be determined for each applicant on February 1st of the year for which admission is being sought.

A limited number of students from outside the Maritimes are accepted into the first year of the program each year.

1.b Academic Performance

Applicants are chosen for evaluation of non-academic criteria based on an initial screening of academic performance. Academic performance is calculated on cumulative GPA. In the case of academic courses currently in progress, the initial screening will be based on Fall-term grades. The final assessment of academic performance is based on the applicants' grades and accounts for 60% of the applicants' overall total score. Applicants should note that admission is on a competitive basis so that the ability to obtain consistently better than average grades would be an asset for the applicant. An academic record containing failures or poor grades makes the prospect of admission very unlikely.

1.c Assessment of non-academic criteria

Only those applicants who have obtained a high level of academic performance on the initial screening are invited for evaluation of non-academic criteria. Applicants will be invited to participate in an interview. Applicants will be assessed on the following non-academic criteria:

- motivation
- ability to relate to others
- self-appraisal
- maturity
- professional attitude
- problem solving

The assessment of non-academic criteria accounts for 40% of the applicants' overall total score.

2. Notification

Applicants will be informed of the status of their applications no later than late July. Those applicants who are put on the waiting list may expect to hear about acceptance as late as September.

3. Deposit Fee

In addition to the deposit requirement ([page 14](#)), the following guidelines have been established for the College of Pharmacy: if the deposit is not received, the place will be offered to another applicant without any further notice. Students who have paid their deposits but who have not appeared at the College by the first day of the College of Pharmacy Orientation Program will be considered to have withdrawn from the College unless they have written permission from the Admissions Committee.

4. Special Cases

In exceptional circumstances, special consideration may be given to applicants who do not meet all admission requirements. These decisions are at the discretion of the Admission Committee and are not subject to appeal.

5. Affirmative Action

The College of Pharmacy has an Affirmative Action Policy for residents of the three Maritime provinces who belong to the African Canadian and Aboriginal population. Applicants wishing to apply under the Affirmative Action Policy must check "yes" on the Supplemental Form. Applicants must receive a minimum of 65% in each of the five prerequisites listed.

6. School of Social Work

6.a Bachelor of Social Work

The study and practice of social work is intellectually, emotionally and physically demanding. It is important for potential applicants to be familiar with the expectations and ethics of the profession before applying to the Bachelor of Social Work program in order to self assess for readiness. This material can be found on the websites for the Canadian Association of Social Workers and the Canadian Association for Social Work Education.

Admission to the Bachelor of Social Work degree is limited. Not all applicants who meet the minimum requirements can be accepted. A specified number of places are offered once a year to the most qualified candidates as selected by the School's Admissions Committee. Equal consideration is given to part-time and full-time applications. Applicants indicate if they are applying for on-site or distance study and the applications for each delivery method are given separate consideration. It is not possible to transfer between on-site and online delivery methods.

1. Required preparation for Social Work

- Academic requirements for the Bachelor of Social Work degree are the same for the on-campus and the on-line distance delivery method.
- The minimum academic requirement is five general university credits in subject areas other than social work.
- Applicants must have a minimum cumulative grade point average of 2.7 (B- or 70%) on a 4.3 scale.

There are no specific course pre-requisites for the BSW program. Potential social work applicants are advised to take social science courses (sociology, psychology, women's studies, and English are a few suggestions).

2. Application Process

Application and all supporting documents must be received by February 15. Please visit <http://www.socialwork.dal.ca> for detailed instructions on how to prepare and submit your application.

Applications for admission are assessed once a year and enrolment is in September only. Each applicant is notified by mail of the Admissions Committee's final recommendation to the University Registrar.

The BSW application is self-administered. The application can be downloaded including detailed instructions and forms for completing the application process. A full application includes the following: (Note: only two out of the three references are required).

- Dalhousie Undergraduate Application for Admission
- BSW Application Information and Instructions
- BSW Applicant's Checklist, Part B
- BSW Form Personal Statement Cover Sheet
- BSW Form Recommendation 1. Academic
- BSW Form Recommendation 2. Work
- BSW Form Recommendation 3. Volunteer
- BSW Form Work & Volunteer Experience Summary

2a. Affirmative Action

The School of Social Work has an affirmative action policy for applicants who are Acadian, Aboriginal, African Canadian, members of other racially visible groups, persons with (dis)Abilities and for Lesbian, Gay, Bisexual, Transgender, Two-Spirited, Queer and Intersex (LGBTQT) people. The school is committed to admitting and graduating the highest possible number of students who qualify under this policy. Members of these groups who have five general (non social work) university credits that average B- are encouraged to apply under this policy. Applicants make their request in a place provided on the Social Work Statement cover sheet, which is part of the BSW application package. Each candidate is considered individually on the basis of her/his qualification, rather than in relation to other applicants. The admissions prerequisites and selection criteria are otherwise the same for all candidates.

3. Selection criteria

The selection criteria used by the Admissions Committee include:

- academic achievement
- work and volunteer experience
- references
- social work statement

Interviews are not part of the admission process unless specifically requested by the Admissions Committee.

In the assessment of applications, priority is given to those who have completed or who are about to complete an undergraduate degree and who have related work/volunteer experience.

3.1 Academic Achievement

An initial screening is made on the basis of academic achievement. Grades from the last 60 credit hours attempted (equivalent to two years of full-time study), including failures, are used to determine the cumulative admission average. Repeated courses with lower grades will be excluded from the GPA calculations. Courses from non-university programs, including college level courses, do not qualify for consideration and are not included in the cumulative university average. A minimum cumulative GPA of 2.7 (B- or 70%) is necessary for an application to be considered.

3.2 Relevant work and/or volunteer experience

Relevant work and/or volunteer experience in areas of social or human services that bear a direct relationship to social work can contribute meaningfully to the applicant's preparedness for social work practice.

3.3 References

The BSW application requires two out of the following three reference forms: (academic, work, volunteer). These assist the Admission Committee in assessing the candidate's personal suitability and readiness for professional education in social work.

3.4 Social Work statement

Candidates write a statement that asks them to discuss a current social issue and their motivation to study social work. This also assists the Admission Committee in assessing the candidates' personal suitability and readiness for professional education in social work.

3.5 Canadian Residency Requirement for Distance Study

The online (distance delivery) option is only available to residents of Canada as defined by Canada Customs and Revenue Agency.

4. Studying by Distance Delivery

Taking a social work degree via distance delivery in your own community will give you access to a challenging, top quality, accredited education in social work. You will have access to a well structured, web based learning environment and have opportunities to apply new learning in supervised field work. Courses are delivered through an on-line learning management system known as Blackboard. Students are expected to participate in ongoing discussions in the courses. This requires students to post comments on the course discussion boards, to respond to other students' postings, and to work in small groups as required. The web-based courses provide the opportunity for a high-level of interactivity amongst students and between students and instructors. Please note that this delivery method differs significantly from correspondence courses. Regular ongoing access to a home computer is essential for effective interactivity in your courses.

If you are thinking about studying by distance we suggest you visit

<http://www.distanceeducation.dal.ca>.

G. Faculty of Management

1. Bachelor of Commerce Co-op

- English
- Academic mathematics **
- Three other acceptable academic courses
- Minimum final grades:
 - English, Math - 70%
 - Other subjects - 60%
 - Overall Average - 75%

** Required Math for Commerce:

- NS - Math 12 (academic or advanced) or Pre-Calculus 12 or Calculus 12
- PEI - Math 621 or 611
- NB - Math 120, 121, 122
- NFLD - Math 3204, 3205 or 3207
- Western Canada - Math 12, Math 30, Math 31, Math 40
- Ontario - MDM4U or MHF4U or MCV4U or OAC

Transfer Students

Transferring into the Dalhousie Commerce Co-op Program from another university program is usually quite easy, and we endeavour to give such students as many transfer credits as possible.

Regardless of what program in which they were previously enrolled, students who have earned at least four six credit hours courses (or eight three credit hours courses) in the following areas will usually be able to enter directly into the second year of Commerce Co-op at Dalhousie:

- Business in a Global Context (half-year course)
- Micro Economics (half-year course)
- Macro Economics (half-year course)
- Core Business Applications (Computer Science) (half-year course)
- Business Communications (written) (half-year course)
- Business Communications (oral) (half-year course)
- Introduction to Financial Accounting (half-year course)
- One other full-year (or two half-year) courses, in any area of study
- Mathematics for Commerce (half year course)

Otherwise, students will normally be placed in the first year of the program, but may be able to use transfer credits to reduce their course loads during some of their terms.

Transfer to the Bachelor of Commerce Co-op Program will not be allowed after September of the second year. Students transferring into this program will be assessed a co-op transfer fee.

Students transferring into the Bachelor of Commerce Co-op Program should note:

1. In order to ensure that all students pay the same co-op fees, students who transfer into the second year of the Bachelor of Commerce Co-op Program will be charged a transfer fee equivalent to the co-op fee that would have been paid in the first year of the program.
2. Due to the co-op structure of the program, a **minimum** of three years in the Dalhousie program will be required in order to complete the Commerce Co-op degree.

- To receive a major, more than half the major courses must be completed at Dalhousie.
- A maximum of eight and one half full credits may be transferred into the Commerce Program (17 half credits).

International Students

The work term requirements of the Bachelor of Commerce Co-op Program may involve job placement problems for some visa students. All commerce students must bear in mind that, although Management Career Services will assist students in the job search process, it is ultimately the students' responsibility to secure suitable employment for each of the three required co-op work terms.

2. Bachelor of Management

- English
- Math **
- Three other acceptable academic courses
- Minimum final grades:
 - English, Math - 65%
 - Other subjects - 60%
 - Overall Average - 70%

** Required Math for Bachelor of Management:

- NS - Math 12 academic or advanced or pre-calculus.
- PEI - Math 621A, 621B, 611B
- NB - Math 120, 121, 122
- NFLD - Math 3204 or Math 3205 or 3207
- Western Canada - Math 12/Math 30/MATH 31/Math 40
- Ontario - Math MDM4U or MHF4U or MCV4U

H. Faculty of Science

1. Bachelor of Science and Bachelor of Science Co-op

- English
- Pre-Calculus Math
- Three other acceptable university-preparatory courses
- Minimum final grades:
 - English, Math - 65%
 - Other subjects - 60%
 - Overall Average - 75%
- It is recommended that students take two science subjects.

2. Bachelor of Science (Medical Sciences)*

- English
- Pre-Calculus mathematics
- Three other acceptable university-preparatory courses
- Minimum final grades:
 - English - 80%
 - Pre-Calculus - 80%
 - Overall Average - 80%

*Subject to final MPHEC approval

3. Integrated Science Program (DISP)

- Satisfy requirements for Bachelor of Science
- At least one grade 12 science course
- Minimum grades:
 - English 75%
 - Mathematics 80%
 - Overall average 80%

4. Diploma in Meteorology

- For students entering from another university, a 15 credit BSc or preferably, a 20 credit BSc, in physics or mathematics or chemistry with appropriate physics courses
- Strong background in mathematics and physics
- Courses taken should also include statistics and computer science
- Dalhousie also offers an integrated program that leads to a BSc in physics (20 credits) and the Diploma in Meteorology. (See the Physics and Atmospheric Science Department entry, [page 558](#) for details.)

I. Faculties of Dentistry, Law, Medicine, and Graduate Studies

For information concerning admission into these faculties, consult the appropriate calendar, or contact the appropriate faculty office directly.

III. Application Submission

It is the responsibility of each applicant to ensure that the application file is complete. The following must be submitted by each applicant to the Registrar's Office:

- A completed application form
- The appropriate application fee for the program (refer to Application for Admission form)
- For students applying directly from high school, an official record of high school work
- An official academic transcript from all previous post-secondary institutions (if applicable)
- Evidence of competency in English for applicants whose first language is not English (see Section 7 on English Language Tests, [page 10](#))
- Supplementary information as required for specific programs
- Mature applicants should also enclose a letter

Documents, once submitted, become the property of Dalhousie University and cannot be returned.

1. January Admissions

Admission of first-year students in January is not recommended because the number of introductory courses in the winter term is very limited. Part-time students and transfer students may be admitted for courses beginning in January in BA, BCSc, BSc, BEDS, and Special Student programs. The application deadline for January admission is November 15.

2. Response to Applications

Dalhousie will respond to your application as promptly as possible and will advise you of any missing documentation. Please notify the Registrar's Office if your address changes.

When documentation is complete, applications are forwarded to the appropriate admissions committee. Although every effort is made to obtain decisions quickly, there will be some delay at times, particularly with limited enrolment programs. There may also be some delay in admission decisions for programs starting beyond the next academic session.

As soon as decisions are made, applicants will be advised by mail.

3. Early acceptance

Applicants currently attending high school, who have good academic records and a competitive admission average may be given early acceptance, conditional on satisfactory completion of work in which they are currently enrolled.

4. Final acceptance

Applicants must successfully complete high school courses in the required subjects with a minimum average of 70%. An official transcript of final grades must be submitted to the Registrar's Office by August 1st.

University Regulations

General

1. The Senate is charged with the internal regulations of the University, including all matters relating to academic affairs and discipline, subject to the approval of the Board of Governors. Within the general policies approved by Senate, academic requirements are administered by the Faculty concerned.
2. All students must agree to obey all the regulations of the University already made or to be made. Students must also comply with the regulations of the Faculty in which they are registered, and pay the required fees and deposits before entering any course or taking any examinations. Additionally, students are advised that this Calendar is not an all-inclusive set of rules and regulations but represents only a portion of the rules and regulations that will govern the student's relationship with the University. Other rules and regulations are contained in additional publications that are available to the student from the Registrar's Office and/or the relevant Faculty, Department or School.
3. Students are bound by the regulations of the home faculty regardless of the faculty in which the student takes courses.
4. Students should be aware that certain courses at the University involve required laboratory work where potentially hazardous materials are in use. These may include animals, other biological materials which may include crops and products, tissues, fluids, wastes, but also microorganisms and toxins as well as a wide variety of chemicals. Examples of physical hazards may include noise, radioactive isotopes and non-ionizing radiation (e.g. lasers). Since there are potential health risks associated with the improper handling of such materials resulting in exposure, Dalhousie University requires that, as a condition of taking a course where such materials are to be used, students must read and agree to comply with the instructions for the safe handling of such materials. In the event that students do not comply with the instructions for the safe handling of such materials, students will receive no credit for the required laboratory work unless other acceptable alternatives are arranged with the instructor. In many cases, alternate arrangements are not possible and students should consider enrolling in a different course.

Rescission of Acceptance into a Program

Dalhousie University reserves the right to rescind any acceptance of an applicant into a program or to rescind an offer of admission of an applicant into a program. Such rescission shall be in writing and may be made by the President or the Vice-President (Academic) and Provost, in consultation with the appropriate Dean, at any time prior to the applicant's registration being confirmed by the Registrar. Any such rescission shall be reported to the Senate in camera.

Official Examination Regulations

1. Candidates will not be admitted to the Examination Room more than thirty minutes after the beginning of the examination. Candidates will not be permitted to leave the examination within the first 30 minutes.
2. Candidates are required to present their valid Dalhousie ID card at all examinations scheduled during the official examination periods and sign the signature list when used.
3. No articles such as books, papers, etc. may be taken into the examination room unless provision has been made by the examiner for reference books and materials to be allowed to the students. All electronic computing, data storage, electronic dictionary and communication devices must be turned off, placed and sealed in the opaque storage bag on the exam writing surface. Calculators may be used at the discretion of the instructor.
4. Candidates may not leave their seats during an examination except with the consent of the invigilator.
5. If more than one book is used, the total number should be marked in the space provided above. The other books should be properly marked and placed inside the first book. All books supplied must be returned to the invigilator.

6. Candidates found communicating with one another in any way or under any pretext whatever, or having unauthorized books, papers, electronic computing, data storage, or communication devices in their possession, even if their use be not proved, will be investigated by the Chief Invigilator. A written report will be submitted to the Faculty Academic Integrity Officer.
7. After the first thirty minutes have elapsed, students may hand in their examination book(s) to an invigilator and quietly leave the examination room. Candidates may not leave the examination room during the last 15 minutes of the examination.

Policy in the Event that a Formal Examination Cannot be Completed at the Regularly Scheduled Time

Formal examinations, up to three hours in length, are scheduled by the Registrar each December and April during formal examination periods, as laid out in the Calendar. If, in the unusual event that one of these examinations must be postponed or abandoned at short notice, the following policies will apply.

1. If more than 50 percent of the time allocated for the examination has elapsed, students' work up to the premature end of the examination, but prorated for the actual time written, will lead to the mark to be obtained from the formal examination.
2. If less than 50 percent of the time allocated for any examination has elapsed, the examination will be rewritten as soon as possible, normally on a day when examinations are not scheduled. Students will be informed by the Registrar of the time and place of the rewrite on the Website of the Registrar (<http://www.dal.ca/exams>).
3. In all cases in which a formal examination cannot be written at its scheduled time and special arrangements must be made, it is essential that faculty ensure that all students in the course are treated fairly and equitably and according to the evaluative criteria in the course description given to students at the beginning of the term.
If an examination is terminated as under point #1, any student who feels disadvantaged by not having been able to write an examination for the length specified in the course description, may appeal through the appropriate departmental or school appeal mechanism for an examination of the specified length. Appeals will be in writing and in a timely fashion. If the appeal is granted, arrangements for such a makeup examination will be made between the student and the course professor.
4. If a formal examination cannot be written at its scheduled time, it is the responsibility of students to check the Registrar's Website for when the examination will be rewritten. Announcements will be made as soon as possible after the original time, normally within 24 hours, and rewrites will normally take place within the regular examination period.

Policy for the Scheduling of Courses/Examinations

Normally, the University schedules and conducts courses on weekdays, i.e., Monday to Friday, and sometimes Saturday, and examinations on weekdays and Saturdays, but not Sundays or statutory Holidays. No examinations or courses should be scheduled on Good Friday, Easter Saturday or Easter Sunday. Otherwise, exams will be scheduled full days Monday through Thursday and Saturday; Friday until 5 pm; and sometimes Sunday after 12 noon. However the University reserves the right, in exceptional circumstances and with the approval of Senate, to schedule courses or examinations on Sundays or statutory holidays, as the case may be.

Requests for an Alternative Final Examination Time

A student requesting an alternative time for a final examination will be granted that request only in exceptional circumstances. Such circumstances include illness (with medical certificate) or other mitigating circumstances outside the control of the student. Elective arrangements (such as travel plans) are not considered acceptable grounds for granting an alternative examination time. In cases where it is necessary to make changes to examination arrangements late in the term, or Senate has approved exceptional examination arrangements, a special effort will be made to accommodate difficulties the changes may cause for individual students.

The decision whether to grant a student's request for an alternative examination time lies with the instructor of the course concerned as does the responsibility for making the alternative arrangements.

This policy may also be applied at the discretion of the instructor to tests and examinations other than final examinations.

Retention of Student Work

Faculties of Architecture and Planning and Engineering

All work executed by students as part of their academic programs in the Faculties of Architecture and Planning and Engineering automatically becomes the property of the University and may be retained for exhibition or other purposes at any time and for an indefinite period.

Faculty of Computer Science

The Faculty of Computer Science has the right to retain the original or a copy of any work handed in by students. This will only be used for evaluation or for administrative purposes. The permission of the originator of the work is required if it is to be used in any other way.

Communication with Students

1. All students must report their local address while attending the University to the Registrar's Office, on registration or as soon as possible thereafter. Subsequent changes must be reported promptly. This may be done online at <http://dalonline.dal.ca>
2. Email is an authorized means of communication for academic and administrative purposes within Dalhousie. The University will assign all students an official email address. This address will remain in effect while the student remains a student and for one academic term following a student's last registration. This is the only email address that will be used for communication with students regarding all academic and administrative matters. Any redirection of email will be at the student's own risk. Each student is expected to check her or his official email address frequently in order to stay current with Dalhousie communications.
3. Students who change their name while attending Dalhousie must provide proof of name change to the Registrar's Office.

Freedom of Information and Protection of Privacy

The Freedom of Information and Protection of Privacy Act (FOIPOP) provides for the protection of an individual's right to privacy but also requires that certain records be disclosed upon request unless they are exempted from disclosure. The Act requires that the University not disclose personal information if that information would constitute an unreasonable invasion of personal privacy. Applicants to Dalhousie are advised that information they provide along with other information placed in a student file will be used in conjunction with university practices for internal university use and will not be disclosed to third parties except in compliance with the FOIPOP Act or as otherwise required by law.

Release of Information About Students

The following information is available, without application through the Freedom of Information and Protection of Privacy Act:

I. Disclosure to students of their own records

1. A transcript is a complete history of a student's academic record at Dalhousie. Partial transcripts, e.g., a portion of a student's record pertaining to registration in a particular degree, faculty or level of study only, are not issued.
2. Students have the right to inspect their academic record. An employee of the Registrar's Office will be present during such an inspection.
3. Students will, on submission of a signed request and payment of a fee where appropriate, have the right to receive transcripts of their own academic record. These transcripts will be marked "ISSUED TO STUDENT". Official transcripts will be sent on a student's request to other universities, or to business organizations, etc. The University will not release copies of transcripts if students owe monies to the University.
4. If transcripts are issued for a student while a senate discipline case is pending and the committee subsequently makes a decision that affects the student's

transcript, revised transcripts will be sent to recipients if transcripts are issued while the case was pending.

II. Disclosure to Faculty, Administrative Officers, and Committees of the University

Information on students may be disclosed without the consent of the student to University officials or committees deemed to have a legitimate educational interest.

III. Disclosure to Third Parties

1. The following information is considered public information and may be released without restriction:
 - Name
 - Period of Registration
 - Certificates, Diplomas, Degrees awarded
 - Field of Study (as relates to degree awarded)
 - Hometown and Awards/Distinctions*
 *As indicated in the convocation program.
2. Information will be released without student consent to persons in compliance with a judicial order or subpoena or as required by federal or provincial legislation.
3. Necessary information may be released without student consent in an emergency, if the knowledge of that information is required to protect the health or safety of the student or other persons. Such requests should be directed to the Registrar.
4. In compliance with Statistics Canada requirements, a student's national personal identification number assigned by the university or college first attended will routinely appear on a student's transcript of record.
5. The Federal Statistics Act provides the legal authority for Statistics Canada to obtain access to personal information held by educational institutions. The information may be used only for statistical purposes, and the confidentiality provisions of the Statistics Act prevent the information from being released in any way that would identify a student. Students who do not wish to have their information used are able to ask Statistics Canada to remove their identifying information from the national database by contacting us by:

Email: PSIS-SIEP_contact@statcan.gc.ca

Mail: Institutional Surveys Section
Centre for Education Statistics
Statistics Canada, Main Building
SC2100-K Tunney's Pasture
Ottawa, ON K1A 0T6

Students should also be aware that the Maritime Provinces Higher Education Commission (MPHEC) collects data on behalf of Statistics Canada, and that it uses the data for similar purposes. Statistics Canada will notify the MPHEC of any student choosing to have their personal information removed from the national database, and their information will subsequently be removed from the MPHEC's database.

Further information on the use of this information can be obtained from the Statistics Canada Website: <http://www.statcan.gc.ca>.

6. Other than in the above situations, information on students will be released to third parties only at the written request of the student, or where the student has signed an agreement with a third party, one of the conditions of which is access to her/his record (e.g., in financial aid). This restriction applies to requests from parents, spouses, credit bureaus and police.

Accommodation Policy For Students

Dalhousie University recognizes the diversity of its students and is committed to providing a learning environment and community in which students are able to participate without discrimination on grounds prohibited by the Nova Scotia Human Rights Act. In particular, the University is committed to facilitating students' access to the University's academic programs, activities, facilities and services.

The University's commitment to safeguarding students and employees from prohibited discrimination is set out in the Statement on Prohibited Discrimination, and the procedures for addressing alleged violations of the Statement by employees are set out in the Statement on Prohibited Discrimination Procedure for Complaints against an Employee of the University.

As stated in the Statement on Prohibited Discrimination:

The University operates in accordance with the Nova Scotia Human Rights Act. The Act prohibits discrimination in certain activities including the provision of or access to services and facilities, accommodation, publications and employment. Discrimination is defined as making “a distinction, whether intentional or not, based on a characteristic, or perceived characteristic [see list below] that has the effect of imposing burdens, obligations or disadvantages on an individual or class of individuals not imposed upon others or which withholds or limits access to opportunities, benefits and advantages available to other individuals or classes of individuals in society.” The Act prohibits discrimination based on the following grounds or characteristics:

- i) age
- ii) race
- iii) colour
- iv) religion
- v) creed
- vi) sex
- vii) sexual orientation
- viii) physical disability or mental disability
- ix) an irrational fear of contracting an illness or disease
- x) ethnic, national or aboriginal origin
- xi) family status
- xii) marital status
- xiii) source of income
- xiv) political belief, affiliation or activity
- xv) association with an individual or a class of individuals having characteristics referred to in (i) to (xiv)

The University recognizes that its obligation to provide a learning environment and community free from prohibited discrimination includes the obligation to make accommodations for students in instances where a student’s learning environment or the University community in which they operate has a discriminatory effect on the student’s ability to fully participate in, and have access to, University academic programs, activities, facilities and services. In particular, the university is obliged to make every reasonable effort short of undue hardship to take substantial, timely and meaningful measures to eliminate or reduce the discriminatory effects of the learning and community environment, including facilities, policies, procedures, and practices.

The purpose of this policy is to set out clear procedures to be followed in all instances where a student seeks accommodation to eliminate or ameliorate discrimination on one of the prohibited grounds. This policy replaces existing policies or practices concerning student accommodation.

The Advising and Access Services Centre and the Human Rights and Employment Equity Office are resources available to students seeking accommodation and to units considering or implementing an accommodation plan.

Policy

Definitions

1. In this policy, “academic accommodation” means accommodation in relation to the student’s participation in an academic program or particular course;

“administrative head” means the individual with day-to-day operational responsibility for a University operation, activity, service or non-academic program;

“non-academic accommodation” means accommodation in relation to University activities and services that are not otherwise considered academic accommodation;

“student” shall include individuals enrolled at the University;

“Student Accommodation Liaison” means the individual or committee assigned responsibility for managing accommodation requests by each Faculty in accordance with section 3 of this policy.

Role of Student Accommodation Office, Faculty and Administrative Heads

2. Subject to the terms of this policy, the Advising and Access Services Centre will be responsible for administering student requests for accommodation, in consultation with the Faculty’s Student Accommodation Liaison in relation to academic accommodation, and in consultation with the relevant administrative head in relation to non-academic accommodation.
3. Each Faculty shall either assign a senior academic administrator or a Faculty, School or Department committee the responsibility to act on behalf of the Faculty in relation to academic accommodation requests under this Policy. Such individuals or committee shall be referred to in this policy as the Student Accommodation Liaison.
4. Prior to the commencement of each academic year, the Student Accommodation Liaison shall be responsible for approving parameters for academic accommodations relative to the Faculty’s particular academic program and course requirements.

Requests for accommodation

5. It is the student’s responsibility to make a request for accommodation in accordance with this policy. The request for accommodation must be made reasonably in advance of the event or process in relation to which accommodation is being sought so that a decision can be made. Except in rare circumstances when significant psychological or mental health issues arise, there should be no “after-the-fact” accommodation. The University will consider a request for accommodation made by a third party (physician, family member, caregiver, advocate or other representative) only where the student has provided prior written consent.
6. A request for accommodation shall be made by the student in writing to the Advising and Access Services Centre, and shall contain the following information:
 - a) the reasons for the accommodation (*i.e. particulars of the discriminatory impact on the student on one of the prohibited grounds*) and any supporting documentation;
 - b) the accommodation being requested and/or any suggestions as to how the accommodation can be achieved;
 - c) where a medical condition is relevant to the request, copies of medical reports or additional medical documentation to substantiate the request and/or to assist in identifying the most appropriate means of accommodation; and
 - d) where the request relates to academic accommodation in relation to a learning disability, a current psycho-educational report describing the nature of the learning disability.

Assessment and Decisions concerning accommodation

7. The assessment by the Advising and Access Services Centre is a two-step process. First, the Advising and Access Services Centre screens the requests to ensure that only requests arising in relation to one of the prohibited grounds of discrimination are permitted to proceed. If the request does arise in relation to one of the prohibited grounds, The Advising and Access Services Centre shall proceed to the second step, and shall consider all relevant factors in making a preliminary assessment as to whether an accommodation could be made without imposing an undue hardship to the University. In making such an assessment, The Advising and Access Services Centre will usually consult with the student making the request. Relevant factors include, but are not limited to, the following:
 - a) Linkage – whether the proposed accommodation will have the practical effect of eliminating or reducing the identified barrier;
 - b) Safety – whether the proposed accommodation would pose a safety risk to faculty, staff or other students or to the student seeking accommodation;
 - c) Financial Cost – what are the costs (estimate out-of-pocket expenses to put the accommodation in place together with any long-term costs to sustain the proposed accommodation), and would such costs be prohibitive;
 - d) Size and nature of the program or service – how disruptive would the proposed accommodation be to the program or service, considering the number of students, faculty and staff and the nature and inter-relationships of their roles;
 - e) Impact on academic requirements – whether the proposed accommodation will substantially undermine the academic requirements of the program; and

- f) Alternatives – where a requested accommodation appears to create an undue hardship based on the above factors, whether an alternative accommodation may be available.
8. Where the request is for academic accommodation, the Advising and Access Services Centre, in consultation with the course instructor, shall assess the recommendation in light of the factors set out in section 7 above, and the parameters for academic accommodation approved by the Faculty responsible for the delivery of the course, and shall make a decision concerning the accommodation. Where the circumstances are not addressed by the approved parameters, the Advising and Access Services Centre shall also consult with the Student Accommodation Liaison. The Advising and Access Services Centre shall inform the student, those who are necessary for the implementation of the decision (such as the course instructor), and the Student Accommodation Liaison of the decision. Except in extraordinary circumstances, decisions concerning accommodation shall be communicated within five working days of the student's request. A request can be expedited at the request of the student if circumstances warrant. In consultation with the Student Accommodation Liaison, and course instructor as required, the Advising and Access Services Centre may review accommodation plans from time to time to determine whether any adjustments to the accommodation plan are necessary.
 9. Where the request is for non-academic accommodation, the Advising and Access Services Centre shall work with the appropriate administrative head to determine what accommodation should be provided, consulting others, including the student making the request, as necessary. The Advising and Access Services Centre shall communicate the decision to the student. Accommodation plans may be reviewed from time to time to determine whether any adjustments to the accommodation plan are necessary.
 10. The Advising and Access Services Centre in consultation with the Student Accommodation Delegates and the administrative heads, as appropriate, will monitor accommodation plans from time to time to ensure that they have been implemented in accordance with this policy.

Appeals

11. There shall be an Accommodation Appeals Committee comprising two members appointed by the Vice-President Finance and Administration, two members appointed by the Vice-President Academic and Provost, two members appointed by the Vice-President Student Services, and three students appointed by the Vice-President Student Services.
12. Where a student believes that his or her request for accommodation has not been handled in accordance with this policy or is not satisfied with the type of accommodation provided, the student may appeal such decision by providing written notice to the Advising and Access Services Centre within 10 working days of the date of the decision. Upon receipt of such notice, the Advising and Access Services Centre shall ask the Vice-President Academic to select a hearing panel comprising three employees and two student members of the Accommodation Appeals Committee to hear the appeal.
13. The Accommodation Appeals Committee hearing panel may uphold the initial decision concerning the accommodation or may determine that an alternate form of accommodation should be provided. The decision of the hearing panel is final, and cannot be appealed further.

Confidentiality

14. Particulars of requests for accommodation, including supporting documentation, shall be treated as strictly confidential, and shall not be disclosed to other persons without the consent of the student requesting accommodation, except and to the extent that such disclosure is reasonably necessary for the effective implementation of the accommodation plan.

Cooperation

15. All faculty, staff and students shall cooperate with accommodation plans implemented under this policy. Failure to cooperate may be considered prohibited discrimination under the Statement on Prohibited Discrimination.
16. Notwithstanding anything in this policy, students have the right at any time to seek the assistance of the Nova Scotia Human Rights Commission.

Procedures

1. Requests for accommodation under section 5 of the policy shall be on Form A.
2. The notice of appeal described under section 10 of the policy shall be on Form B.

Support Services

Dalhousie University endeavours to provide a broad range of support services to all of its students. Students wishing to obtain assistance from the University shall be expected to undertake a reasonable measure of self-advocacy to ensure that they are provided with the support services necessary. Such support services may include personal counselling, academic counselling, academic advising, and academic skill training.

NOTE: Accommodation of a student's needs due to disability will be facilitated if the student self-discloses and makes prior arrangements. Accommodation may be hindered if advance notification and/or prior arrangements have not been made

Policy on the Submission of Student Papers

Any instructor may require student assignments to be submitted in both written and electronic (computer-readable) form, e.g., a text file or as an email attachment, as defined by the instructor. Use of third-party originality checking software does not preclude instructor use of alternate means to identify lapses in originality and attribution. The results of such assessment may be used as evidence in any disciplinary action taken by the Senate.

Procedures

If an instructor plans to use originality-checking software in a course, students shall be informed in the course syllabus that their written work may be submitted to a text-matching software service, which is meant to assure students that everyone will be evaluated on the basis of their own work and to warn students that plagiarism is likely to be detected. The planned use of originality-checking software will also be included in the oral presentation of the course syllabus in the initial course meeting.

Students shall also be informed in the course syllabus that they are free, without penalty of grade, to choose an alternative method of attesting to the authenticity of their work.

Students shall inform instructors no later than two weeks after the commencement of courses of their intent to choose an alternate method.

Instructors shall provide students with at least two possible alternatives that are not unduly onerous and that are appropriate for the type of written work. Alternatives shall be chosen from the following:

- a) Submitting copies of multiple drafts demonstrating development of the work;
- b) Submitting an annotated bibliography;
- c) Submitting photocopies of sources; and
- d) Other alternatives devised by the instructor, provided that they are not unduly onerous.

Intellectual Honesty

A university should be a model of intellectual honesty. As such Dalhousie University shares in the academic values of honesty, trust, respect, fairness and responsibility (Centre for Academic Integrity, 1999 - of which Dalhousie University is a member). Failure to meet the University's standards with respect to these values can result in an academic offence. The length of time a student has attended university, the presence of a dishonest intent and other circumstances may all be relevant to the seriousness with which the matter is viewed.

Violations of intellectual honesty are offensive to the entire academic community, not just to the individual faculty member and students in whose course an offence occurs.

Instructors are responsible for setting examinations and assignments as part of the learning process and for evaluating those examinations and assignments, including ensuring that any rules stated for the procedures used in an examination or assignment are followed. Any violation of such stated rules that could result in a student gaining an unfair or unearned advantage may be considered to be an academic offence.

Examples of Academic Offences

There are many possible forms of academic dishonesty. Since it is not possible to list all instances of academic dishonesty, the following list of examples should be considered only as a guide. The omission of a dishonest action from this list does not prevent the University from prosecuting an alleged instance of that action.

A. Plagiarism

Members of academic communities are privileged to share in knowledge generated through the efforts of many. In return, each member of the community has the responsibility to acknowledge the source of the information used and to contribute knowledge that can in turn, be trusted and used by others. Consequently, the University attaches great importance to the contribution of original thought to learning and scholarship. It attaches equal importance to the appropriate acknowledgment of sources from which facts and opinions have been obtained.

Dalhousie University defines plagiarism as the submission or presentation of the work of another as if it were one's own.

Plagiarism is considered a serious academic offence that may lead to the assignment of a failing grade, suspension or expulsion from the University. If a penalty results in a student no longer meeting the requirements of a degree that has been awarded, the University may rescind that degree.

Some examples of plagiarism are:

- failure to attribute authorship when using a broad spectrum of sources such as written or oral work, computer codes/programs, artistic or architectural works, scientific projects, performances, web page designs, graphical representations, diagrams, videos, and images;
- downloading all or part of the work of another from the Internet and submitting as one's own; and
- the use of a paper prepared by any person other than the individual claiming to be the author.

The proper use of footnotes and other methods of acknowledgment vary from one field of study to another. Failure to cite sources as required in the particular field of study in the preparation of essays, term papers and dissertations or theses may, in some cases, be considered to be plagiarism.

Students who are in any doubt about how to acknowledge sources should discuss the matter in advance with the faculty members for whom they are preparing assignments. In many academic departments, written statements on matters of this kind are made available as a matter of routine or can be obtained on request. Students may also take advantage of resources available through the Writing Centre at writingcentre.dal.ca or the Dalhousie Libraries at library.dal.ca/services/infolit.

B. Irregularities in the Presentation of Data from Experiments, Field Studies, etc.

Academic research is based on the presentation of accurate information and data that are obtained honestly. The trustworthiness of our findings is essential to building knowledge in and across fields of study. Therefore, the falsification of data in reports, theses, dissertations and other presentations is a serious academic offence, equivalent in degree to plagiarism, for which the penalties may include the assignment of a failing grade, suspension or expulsion from the University or the withdrawal of a degree previously awarded.

C. Other Irregularities

Dalhousie University strives to provide equal opportunities for learners to demonstrate and to be recognized for their abilities. Any behaviour intended to gain unearned advantage over another person violates this principle. A member of the University who attempts, or who assists any other person in an attempt, to fulfill, by irregular procedures, any requirements for a course, commits an academic offence and is subject to a penalty.

In the absence of specific approval from the instructor of a course, all students should assume that every assignment is to be completed independently, without any form of collaboration.

Students should take reasonable precautions to prevent other students from having access, without permission, to their tests, assignments, essays or term papers.

The following are some examples of irregular procedures. The list should be used only as a guide since it is not possible to cover all situations that may be considered by the Senate Discipline Committee to be irregular.

- writing an examination or test for someone else;
- attempting to obtain or accepting assistance from any other person during an examination or test;
- during the time one is writing an examination or test, having material that is not specifically approved by the instructor;

- without authorization, obtaining a copy of an examination or test, topic for an essay or paper, or other work;
- without authorization from the faculty member in charge of that course, submitting any work for academic credit when one is not the sole author or creator;
- without authorization submitting any work that has been previously accepted for academic credit in any other course in any degree, diploma or certificate program, or has been completed as part of employment within the University, for example, as research activity. A repeated course is considered to be a separate course.

D. Aiding in the Commission of an Academic Offence

No student may encourage or aid another student in the commission of an academic offence, for example,

- by lending another student an assignment knowing that he or she may copy it for submission;
- by allowing another student to copy answers during an examination.

E. Misrepresentation

Any person who provides false or misleading information during an investigation of a suspected academic offence is guilty of an offence.

Discipline

1. Members of the University, both students and staff, are expected to comply with the general laws of the community, within the University as well as outside it.
2. Alleged breaches of discipline relating to student activities under the supervision of the Dalhousie Student Union are dealt with by the Student Union. Alleged breaches of discipline relating to life in the residences are dealt with by the residence discipline policy unless the President determines that some non-residence University interests are involved. Senate is charged with the authority to deal with cases of alleged academic offenses, see examples above, as well as with certain other offenses that are incompatible with constructive participation in an academic community.
3. On report of a serious breach of the law, or a serious academic offence deemed by the President, or in his or her absence by a Vice-President or the Dean of a Faculty, to affect vital University interests, a student involved may be temporarily suspended and denied admission to courses or to the University by the President, Vice-President or Dean, but any suspension shall be reported to the Senate, together with the reasons for it, without delay.
4. No refund of fees will be made to any student required to lose credit for any course taken, required to withdraw or who is suspended or dismissed from any course or any Faculty of the University.

Academic Dishonesty

Faculty Discipline Procedures Concerning Allegations of Academic Offences

I. Preamble

These procedures deal with allegations of academic offences and do not deal with violations of the student code of conduct. The purpose of these procedures is to delegate assessment of certain allegations of academic offences to the Faculty level.

Guideline for Evaluators

An alleged first or later breach of any academic standard by a student should never be dealt with by an evaluator, but in all instances, should be referred to the Academic Integrity Officer in accordance with these procedures. Any attempt by any person or body other than the Senate, the Senate Discipline Committee, or the Academic Integrity Officers to impose a penalty for an alleged offence is null and void and leaves the student still liable to discipline for that offence. Further, a student remains liable to discipline for a suspected offence notwithstanding a failure on the part of an evaluator to report the allegation in accordance with these procedures.

Where an allegation of a breach of academic standards has been made or is pending, the evaluator should not reveal the mark or grade to anyone until the Vice Chair (Academic Administration) has confirmed the disposition of the matter by the Senate Discipline Committee or the Academic Integrity Officer.

II. Academic Integrity Officers

1. Academic Integrity Officers are associated with the Faculties of Dalhousie University.
2. The Academic Integrity Officer shall act between the student and instructor, and may appear at Hearing Panels of the Discipline Committee or the Discipline Appeals Board to present the case against the student.
3. The Academic Integrity Officer is the Dean of the Faculty. The Dean may further delegate this role to one or more members of his/her academic staff except those who are Senate Officers, who are otherwise involved in the student discipline process, or who otherwise are in a potential conflict of interest relative to this role. Annually the name of the delegate(s) shall be communicated in writing to the Vice-Chair (Student Affairs) who shall report to Senate.
4. The Academic Integrity Officers shall meet as a group with the Senate Discipline Committee (SDC) at least once a year to discuss relevant policy issues and training requirements with a view to maximizing consistency and predictability in the administration of academic offences across the University. Such meetings will be convened and chaired by the Vice-Chair (Student Affairs).
5. **Penalties:**
Penalties shall follow the guidelines contained within the University's Academic Regulations and the Senate Discipline Committee terms of reference set out in Section 10 of the Senate Constitution, which are reproduced below for convenience.
"The range of penalties which may be imposed by the Senate Discipline Committee be circumscribed only by the requirement that such penalty or penalties be of an academic nature and, without restricting the generality of the foregoing, may include any one or more of:
 - 1) notation of the fact of discipline on the offender's transcript for a period of one or more years, but not exceed five years;
 - 2) repeat of the assignment that triggered the discipline;
 - 3) a failing grade or mark or assessment in the piece of work triggering the discipline;
 - 4) failure of the course or seminar or program;
 - 5) failure of the academic year;
 - 6) suspension for an academic term or year (to a maximum suspension of three academic years);
 - 7) expulsion from the University;
 - 8) loss of a current or continuing scholarship, or both, or loss of eligibility to receive or to maintain scholarships or prizes or bursaries; and
 - 9) removal from the Dean's List."
6. **Faculty Procedures**
When an academic offence is suspected, the instructor shall submit a signed statement outlining the basis for the allegation, together with all relevant supporting evidence, to the Academic Integrity Officer of the Faculty which is responsible for the delivery of the course at issue, or in the case of an allegation in relation to a graduate thesis or other non course graduate materials, to the Academic Integrity Officer of the Faculty of Graduate Studies, within 10 working days of becoming aware of the alleged offence, but in any event no later than the deadline for submission of final grades to the Registrar, except in extraordinary circumstances, as determined by the Academic Integrity Officer.
7. Upon receipt of the material from the instructor, the Academic Integrity Officer shall determine whether or not the material supports a *prima facie* case that the student has committed an academic offence. If no *prima facie* case is made out, no further steps are taken in relation to the allegation, and the instructor and student will be so advised in writing.
8. If a *prima facie* case is established, then the Academic Integrity Officer will take the following further steps:
 - a) Check the academic discipline database maintained by the Senate Office to determine if the student(s) has a record of prior academic offence(s);
 - b) With the exception of cases involving two or more students facing allegations arising from the same fact situation ("common allegation") which shall proceed in accordance with paragraph 9, if the student(s) has a record of prior academic offence(s), forward the allegation to the Senate Discipline Committee;
 - c) If the allegation appears to be a first offense, and in all cases of two or more students facing a common allegation, inform the student(s) in writing of the nature of the allegation, the instructor's statement, the evidence, the procedures to be followed, the possible penalties, and possible sources of advice and support (will be a standard document);
 - d) Convene a meeting with the student(s), the student(s)'s advisor, if any, and the instructor within five working days upon receipt of the allegation by the student, which time may be extended at the request of the student, instructor, or Academic Integrity Officer, in appropriate circumstances.;
 - e) If the meeting does not take place within the time set out above, the Academic Integrity Officer has the discretion to convene another meeting with the student(s), the student(s)'s advisor, if any, and the instructor. The Academic Integrity Officer also has the discretion to convene additional meetings as may be reasonably required. In the event an initial meeting does not occur within a reasonable time after a *prima facie* case is established, the Academic Integrity Officer shall refer the allegation to the Senate Discipline Committee.
9. Notwithstanding paragraph 8b, in the case of two or more students facing allegations arising from the same fact situation ("common allegation"), the Academic Integrity Officer has the authority to convene a meeting with all such students in accordance with paragraphs 8d and 8e and to make findings for all such students under these Procedures, regardless of the fact that one or more of such students may have a record of prior academic offence(s). If the Academic Integrity Officer's assessment is that there is sufficient evidence to support a finding that a student facing a common allegation has committed an academic offence, for any such student who has no record of prior academic offence(s), subject to paragraph 14, the Academic Integrity Officer shall assess an appropriate penalty for the student in accordance with these Procedures; and for any such student who has a record of prior academic offence(s), the Academic Integrity Officer shall forward the matter to the Senate Discipline Committee for assessment of an appropriate penalty.
10. Following the meeting convened in accordance with paragraph 8, the Academic Integrity Officer shall make a preliminary assessment of whether there is sufficient evidence to support a finding that the student has committed an academic offence, and if there is sufficient evidence, make a preliminary assessment of what penalty would be appropriate in the circumstances. In making the latter assessment, the Academic Integrity Officer shall exercise broad discretion in considering possible mitigating circumstances including but not limited to extraordinary personal circumstances and lack of educational experience.
11. If the Academic Integrity Officer's assessment is that there is insufficient evidence to support a finding that the student has committed an academic offence, s/he shall inform the student in writing with a copy to the Instructor within five working days of the meeting. This does not preclude an Academic Integrity Officer from proceeding with the allegation at a later date, should new evidence become available.
12. If the Academic Integrity Officer's assessment is that there is sufficient evidence to support a finding that the student has committed an academic offence, AND that the appropriate penalty for the student's conduct is any of the penalties described in paragraph 5, above, except those listed in subparagraphs 5 to 9 the Academic Integrity Officer shall provide the student with the option of accepting the finding and the proposed penalty, or of proceeding to the Senate Discipline Committee for a full hearing. The option shall be presented to the student within five working days of the meeting, and the student shall have two working days to respond. In the event that the student elects to accept the finding and proposed penalty, the Academic Integrity Officer shall so advise the Vice-Chair (Student Affairs).
13. Within 14 calendar days of the Vice-Chair (Student Affairs) being advised of the finding and agreed penalty under paragraph 12, the Vice-Chair (Student Affairs), or in his or her absence, the Chair or Vice-Chair (Academic Programs), and a student Senator appointed by the Dalhousie Student Union shall jointly review the finding and agreed penalty to determine whether the process is consistent with the Faculty Discipline Procedures Concerning Allegations of Academic Offences. If so, they shall ratify the matter on behalf of Senate and the Vice-Chair shall notify the student and the Academic Integrity Officer of such ratification. For ratification to occur, the decision must be unanimous. The finding and agreed penalty shall stand, despite possible insubstantial procedural errors. The Vice-Chair (Student Affairs) shall ensure that the offence is recorded on the Senate Discipline database and that the Registrar and any others are notified of the finding and penalty for immediate implementation. If the Vice-Chair (Academic Administration) and/or the student Senator have any material concerns about the process, the Vice-Chair (Student Affairs) shall consult with the Academic Integrity Officer to determine whether the concerns can be resolved. If the Vice-Chair (Academic Administration) and the Academic Integrity Officer are unable to resolve any concerns, the matter shall be referred back to the Academic Integrity Officer for further consideration under these Procedures, after which the Vice-Chair

(Academic Administration) and a student Senator shall jointly re-consider ratification. Should ratification still not occur, the matter shall be referred to the Senate Discipline Committee for a hearing.

14. If the Academic Integrity Officer's assessment is that there is sufficient evidence to support a finding that the student has committed an academic offence, but that the appropriate penalty for the student's conduct is one of those listed in subparagraphs 5 to 9 of paragraph 5 of these Procedures, the Academic Integrity Officer shall, within five working days of the meeting, notify the student in writing, with a copy to the instructor, that the matter will be forwarded to the Senate Discipline Committee for a full hearing.
15. Should a student request that an allegation be referred back to the Academic Integrity Officer after it has been forwarded to the Senate Discipline Committee, the Academic Integrity Officer has the discretion to grant such a request. A student's request shall be in writing, and delivered to the Vice-Chair (Student Affairs) within five working days of the date the allegation letter is sent to the student by the Vice-Chair (Student Affairs).
16. Prior to a hearing by the Senate Discipline Committee of an allegation against a student, the Academic Integrity Officer shall provide a written allegation to the Senate office identifying the evidence initially presented by the instructor pursuant to paragraph 6 and any additional evidence obtained by the instructor in the course of the assessment of the matter. The written allegation shall not include reference to whether or not any meeting(s) did occur pursuant to paragraph 8d or 8e, any statements that may have been made by the student at such meeting(s), or any alternate versions of the facts and circumstances that may have been presented by one or more students at such meeting(s). The student shall have the opportunity to provide a written submission in response prior to the hearing by the Senate Discipline Committee. Notwithstanding the foregoing, in the event of a statement made by a student at a hearing of the Senate Discipline Committee that is inconsistent with a statement previously made by that student in the meeting(s) with the Academic Integrity Officer, then the Academic Integrity Officer may refer to statements that may have been made by the student at such meeting(s).
17. Confidentiality must be maintained by those involved in each case when an academic offence is suspected and the instructor submits an allegation to the Academic Integrity Officer, except as is reasonably necessary to implement the finding and agreed penalty or as required in subsequent disciplinary proceedings related to the same matter.

Senate Discipline Committee

Jurisdiction of the Senate Discipline Committee

1. The Senate Discipline Committee has jurisdiction to hear:
 - a) Complaints referred to the Senate Discipline Committee under the Code of Student Conduct ("Code Complaints"); and
 - b) Allegations of academic offences referred to the Senate Discipline Committee under the Faculty Discipline Procedures Concerning Allegations of Academic Offences ("Integrity Allegations").
2. For the purpose of these procedures, the following definitions shall apply:
 - a) **Allegation** means a Code Complaint or an Integrity Allegation as the context requires.
 - b) **University Representative** means the President of the University or his/her designate in the case of Code Complaints, or the Academic Integrity Officer in the case of Integrity Allegations.
3. The Senate Discipline Committee's jurisdiction extends to Allegations against a student who, before or during the course of the disciplinary process involving him or her, but prior to adjudication, has:
 - i) been compelled to withdraw academically;
 - ii) chosen to withdraw from the course, the program, or the University prior to being disciplined, or;
 - iii) chosen not to register at the University.
4. In the case of Integrity Allegations, a Hearing Panel of the Senate Discipline Committee may:
 - a) dismiss the allegation; or
 - b) impose any of the following:
 - i) notation of the fact of discipline on the offender's transcript for a period of one or more years, but not exceeding five years;
 - ii) repeat of the assignment that triggered the discipline;
 - iii) a failing grade or mark or assessment in the piece of work triggering the discipline;
 - iv) an imposed limit on the grade that can be given for the assignment or course;
 - v) failure of the course;
 - vi) suspension for an academic term or year (to a maximum suspension of three academic years);
 - vii) expulsion from the University;
 - viii) any other remedy of an academic nature that is within the power of Senate to grant.
5. In the case of a Code Complaint, a Hearing Panel of the Senate Discipline Committee may:
 - a) dismiss the complaint; or
 - b) impose any of the penalties set out under the Code of Student Conduct
6. In the case where an Allegation is proven and is not dismissed under section 4(a) or 5(a), the Hearing Panel of the Senate Discipline Committee may consider any mitigating or aggravating circumstances in its determination of the appropriate penalty.

Initiating a Hearing/Pre-Hearing Procedures

7. To initiate a hearing of the Senate Discipline Committee the University Representative shall submit a written request to the Senate Vice-Chair (Student Affairs), or designate. The request shall include a written submission outlining the Allegation together with all supporting evidence, documentation and a list of the witnesses on which the University Representative intends to rely.
8. The Senate Vice-Chair (Student Affairs) shall provide the student with a notice of the Allegation that shall include:
 - a) The material filed by the University Representative under section 7;
 - b) Notice of the deadline for the student to submit a written defence, any supporting evidence and a list of individuals who will attend at the hearing on the student's behalf; and
 - c) Notification of the student's right to be represented.
9. The student shall provide the Senate Vice-Chair (Student Affairs) with a written defence, supporting evidence and a list of the individuals who will also be attending, as well as their capacity (ie. witness, support person, advocate) no later than the date specified in the notice of allegation. Any evidence or documentation provided after the deadline for submission may be ruled inadmissible by the Hearing Panel at the hearing.
10. The Chair of the Senate Discipline Committee shall constitute a Hearing Panel in a timely manner comprising three faculty and two students. No faculty member who is a current instructor of the accused student may serve as a member of the Hearing Panel. The student member of a Hearing Panel shall not be a member of the course from which the complaint originates. In the event that no student members of the Committee are able to participate on a Hearing Panel due to the provisions of this paragraph, the Dalhousie Student Union shall appoint an ad hoc member to the applicable Hearing Panel. The Committee Chair or an alternate faculty member shall chair the hearing.
11. The Student and University Representative shall be notified of the date, time and location of the hearing, as well as the names of all individuals who will be in attendance, no less than 10 working days in advance of the hearing.
12. Preliminary objections or issues must be raised as far in advance of the hearing as reasonably possible. The Chair of the Hearing Panel has sole discretion to rule on any preliminary issues or objections raised by either party that must be dealt with prior to the commencement of the hearing. The Hearing Panel may rule on any preliminary issues or objections raised at the commencement of the hearing.

Hearing Procedures

13. The Chair of the Hearing Panel shall determine procedures for the hearing in a manner that is consistent with the principles of natural justice and these Procedures.
14. In extenuating circumstances, the Chair of the Hearing Panel may decide to proceed with the hearing in the absence of one faculty member of the Hearing Panel.
15. In the event that the student fails to appear at the hearing, the Hearing Panel shall satisfy itself that reasonable efforts were made to notify the student and may proceed in the student's absence.
16. The student may participate at an oral hearing in person, by way of teleconference, or by such other means approved in advance by the Hearing Panel. The student may waive the right to an oral hearing and choose to proceed solely by written submissions.
17. Hearings shall be in camera.
18. At the commencement of the hearing, the Chair of the Hearing Panel shall explain the procedures to be followed and provide an opportunity for introductions as well as any questions, objections, or opening statements.

19. The University Representative shall present the Allegation and witnesses, if any. The student and any members of the Hearing Panel may question the University Representative and the University Representative's witnesses following the presentation of the Allegation.
20. The student may present his or her defence and witnesses, if any, following the University Representative's presentation. The University Representative and any members of the Hearing Panel may question the student and any of the student's witnesses following the presentation of the defence.
21. At the discretion of the Chair of the Hearing Panel, the parties may make final arguments following the presentations. The student shall have the last word.
22. At the discretion of the Hearing Panel, any evidence sought to be admitted by either party from witnesses who are not available to give evidence in person may be received in writing or in some other form.
23. The student is considered innocent until the Allegation is proven on a balance of probabilities, the burden of which lies with the University Representative.
24. The decision of the Hearing Panel shall be by majority.
25. The Hearing Panel shall report its decision including reasons for the decision and any penalty imposed, to the Vice-Chair (Student Affairs) who shall forward a copy of the decision to the student and the University Representative.
26. An audio recording of each oral hearing shall be made. The recording and all correspondence and documentary evidence relating to appeal proceedings shall be kept in accordance with the records management policies of the University Secretariat. The student may obtain a copy of the audio recording by making written request to the Senate Vice-Chair (Student Affairs) and may use such recording only for the purpose of an appeal of the decision in question.
27. Appeals from decisions of the Senate Discipline Committee may be made to the Senate Appeals Committee in accordance with the Senate Appeals Committee - Jurisdiction and Appeals Procedures.
28. The Senate shall maintain a confidential database of discipline decisions for the purposes of general reporting and proper adjudication of repeat offences.

University of King's College

The University of King's College Registrar shall notify the Dalhousie Registrar in the event that academic discipline proceedings have been commenced in relation to a Dalhousie student, and shall advise the Dalhousie Registrar of the outcome of such proceedings, including any sanctions imposed against the student. Where the student has been previously sanctioned for academic misconduct, the Dalhousie Registrar will provide the University of King's College Registrar with particulars of the offence and the sanction imposed.

I. Commentary on Penalties

A. Proactive Measures

Dalhousie University emphasizes education and proactive engagement, therefore a Proactive Measure, which is a form of recommendation, may be prescribed as an educational aid in addition to a Penalty. It may include but not necessarily be restricted to suggesting that the student seek some form of professional help from the Advising and Access Services Centre or Counseling Services or elsewhere which, for example may be time management or stress management, etc., and/or an apology for the infraction. The main purpose of a Proactive Measure is to help the student learn how to reduce the likelihood of future violations of academic integrity. It is important to note that it is the student's responsibility to decide whether or not to follow the Proactive Measure since it is not a formal Penalty but rather a recommendation. Therefore, there is normally no oversight by the University (AIO or SDC) to ensure that a Proactive Measure is followed.

B. Consequence

A Consequence is an outcome of the application of a Penalty. A Consequence is not imposed by the University's academic integrity policies but arises from the University's academic policies. For example the consequences of the Penalty of a failing grade may include but not necessarily be limited to: failure in a program, delay of graduation, loss of full-time student status, change in visa status (for a visa student), loss of eligibility for student aid, removal from the Dean's list. Similarly a notation on a transcript may have serious unforeseen consequences for future opportunities, etc. This list is not intended to be exhaustive. Therefore, while the university's academic integrity procedures (AIO or SDC) may foresee some consequences, ultimately the student bears the responsibility for any consequences of a Penalty.

Code of Student Conduct

I. Background

Dalhousie University is a community of faculty, staff and students, involved in teaching, research, learning and other activities. Students are members of the University for the period of their registration in an academic program and are subject to the disciplinary authority of the University during that time.

The University does not stand in loco parentis to its students. In the exercise of its disciplinary authority, the University treats students as adults free to organize their own personal lives, behaviour and associations subject only to the law, and to University regulations that are necessary to protect:

- the integrity and proper functioning of the academic and non-academic programs and activities of the University or its faculties, schools or departments;
- the peaceful and safe enjoyment of University facilities by other members of the University and the public;
- the freedom of members of the University to participate reasonably in the programs of the University and in activities on the University's premises;
- the property of the University or its members.

Other than this, regulation of student behaviour by the University is neither necessary nor appropriate.

Members of the University, including students, are not immune from the criminal and civil law. Provisions for non-academic discipline should not attempt to shelter students from the normal responsibilities of adult citizens nor add unnecessarily to these responsibilities. Thus, conduct that violates the Criminal Code or other statute should ordinarily be dealt with by the police and criminal courts. In cases, however, in which criminal or civil proceedings would not adequately protect the University's interest and responsibilities as defined above, proceedings may be brought under the Code of Student Conduct.

The University may also define standards of professional conduct for students in programs where these are appropriate, and this Code is not intended to replace or supersede such standards.

II. Code Of Conduct

A. Definitions

1. In this Code, the word "premises" includes lands, buildings and grounds of the University, or other places or facilities used for the provision of the University's programs or services or for University-approved events and activities.
2. In this Code, "student" means a person:
 - a) engaged in any academic work or placement which leads to the recording and/or issue of a mark, grade or statement of performance by the appropriate authority in the University or another institution; and/or
 - b) registered in, enrolled in, or attending any course, or otherwise participating as a learner in any activity which entitles the person to the use of a University library, library materials, library resources, computer facility or dataset.
3. In this Code, the words "Dalhousie University" refer to Dalhousie University and include any institutions affiliated with it, where such inclusion has been agreed upon by the University and the affiliated institution, with respect to the premises, facilities, equipment, services, activities, students and other members of the affiliated institution.
4. Unless otherwise stated, a student will only be liable for conduct that she or he knew or ought reasonably to have known would constitute conduct prohibited under this Code.
5. Nothing in this Code shall be construed to prohibit peaceful assemblies and demonstrations, or lawful picketing, or to inhibit freedom of speech.

B. Application

Conduct shall be deemed to be an offence under this Code, when committed by a student of Dalhousie University, provided that such conduct:

1. occurs on the premises of Dalhousie University;
2. occurs elsewhere in the course of activities sponsored by Dalhousie University (or by any of its faculties, schools or departments), or where the conduct is alleged to adversely affect, disrupt or interfere with another person's reasonable participation in Dalhousie University programs or activities; or
3. occurs in the context of a relationship between the student and a third party and involves the student's standing, status or academic record at the University.

However, this Code will not apply to conduct that:

4. is specifically assigned to another disciplinary body within the University; or
5. is subject to action as an alleged failure to meet standards of professional conduct as required by a college, faculty or school; or
6. is subject to action under a residence discipline policy unless some non-residence University interests are deemed to be involved, in which case the President may specifically authorize proceedings under this Code; or
7. is committed by a student in her or his capacity as an employee of the University unless some non-employment University interests are deemed to be involved, in which case the President may specifically authorize proceedings under this Code;
8. is subject to the disciplinary authority of the Dalhousie Student Union.

C. Offences

1. Offences Against Persons

- a) No student shall assault another person sexually, or threaten any other person with sexual assault or commit an act of sexual harassment toward another person.
- b) No student shall otherwise assault another person, threaten any other person with bodily harm, or cause any other person to fear bodily harm.
- c) No student shall create a condition that unnecessarily endangers the health or safety of other persons.
- d) No student shall threaten any other person with damage to such person's property, or cause any other person to fear damage to her or his property.
- e) No student shall engage in a course of vexatious conduct, harassment or discrimination that is directed at one or more specific persons and that is based on the age, race, colour, religion, creed, sex, sexual orientation, physical disability, mental disability, an irrational fear of contracting an illness or disease, ethnic or national or aboriginal origin, family status, marital status, source of income, political belief or affiliation or activity of that person or of those with whom he or she associates.
- f) No student shall engage in unwelcome or persistent conduct that the student knows, or ought to reasonably know, would cause another person to feel demeaned, intimidated or harassed. Examples of such conduct include, but are not limited to:
 - i) following another person, or anyone known to that person;
 - ii) unwanted communication with another person or anyone known to that person;
 - iii) watching the residence or place of work of another person or anyone known to that person;
 - iv) threatening another person or any member of the family, friends or colleagues of the other person;
 - v) coercing, enticing or inciting a person to commit an act that is humiliating or demeaning to that other person or to others.

2. Disruption

No student shall, by action, threat or otherwise, disrupt, obstruct or adversely affect any activity organized by Dalhousie University or by any of its faculties, schools or departments, or the right of other persons to carry on their legitimate activities, to speak or to associate with others.

3. Offences Involving Property

- a) No student shall take without authorization, misuse, destroy, deface or damage the property of Dalhousie University, or property that is not her or his own, or information or intellectual property belonging to Dalhousie University or to any of its members.
- b) No student shall possess the property of Dalhousie University, property in the custody of Dalhousie University, or property that is not her or his own, if the student knows that property to have been taken without authorization.
- c) No student shall create a condition that unnecessarily endangers or threatens destruction of the property of Dalhousie University or of any of its members.

4. Unauthorized Use of University Facilities, Equipment or Services

- a) No student shall use any facility, equipment or service of the University, or enter or remain on any premises, to which he or she does not have legitimate access, or contrary to the expressed instruction of authorized persons.
- b) No student shall use any University computing equipment, facility, network or system for any disruptive or unauthorized purpose, or in a manner that violates any law, Dalhousie University regulations, policies and procedures or in any way that is incompatible with the principles in the

Acceptable Use of Information Technology Resources sections. Examples of inappropriate use of computer equipment, facilities, networks and systems include, but are not limited to:

- i) copying, removing or distributing software and/or data without authorization;
- ii) using another person's account, or misrepresenting themselves as another user;
- iii) disclosing confidential passwords, access codes, etc., assigned to themselves or others;
- iv) interfering with the work of others using computing equipment, facilities, networks, systems or accounts;
- v) displaying, transmitting, distributing or making available information that is discriminatory, obscene, abusive, derogatory, harassing or otherwise objectionable;
- vi) breaching terms and conditions of software licensing agreements;
- vii) interfering with the normal operation of computing equipment, facilities, networks or systems by, among other things, flooding the network with messages, sending chain letters or pyramid solicitations;
- viii) using the University's computing equipment, facilities, networks and systems for profit or commercial gain.
- c) No student shall destroy, misplace, misfile, or render inoperable any stored information such as books, film, data files or programs from a library, computer or other information storage, processing or retrieval system.

5. Aiding in the Commission of an Offence

No student shall encourage or aid another student in the commission of an offence defined in this Code, or encourage or aid behaviour by a non-student which, if committed by a student, would be an offence under this Code.

6. Alcohol and Drug Use

No student shall contravene the Liquor License Act of Nova Scotia or a provision of the Campus Alcohol Policy, nor shall any student possess, use or sell a drug to which access is restricted by the Narcotics Control Act.

7. False Information and Identification

- a) No student shall knowingly furnish false information to any person or office acting on behalf of the University.
- b) No student shall forge, alter or misuse any document, record or instrument of identification.
- c) No student shall knowingly furnish false information to any person regarding his or her standing, status or academic record at Dalhousie University.

8. Unauthorized Possession of a Firearm or Weapon

No student shall possess a firearm or other weapon on the University premises without the specific written permission of the Chief of Security.

9. Contravention of University Regulations

When a rule, regulation or policy of the University prohibits or proscribes certain conduct but does not provide any penalty for breaches of the rule, regulation or policy, breaches shall be dealt with under this Code.

10. Other

No student shall contravene any provision of the Criminal Code or any other federal, provincial or municipal statute on the premises of the University or in the course of the University's programs or services, or University-approved events or activities.

D. Procedures

1. Whenever possible and appropriate, reason and informal measures shall be used to resolve issues of individual behaviour before resort is made to formal disciplinary procedures.
2. Any person may make a complaint against any student for misconduct. A complaint shall be prepared in writing and directed to the Vice-President, Student Services. Any complaint should be submitted as soon as possible after the event takes place. All complaints shall be presented to the accused student in written form. Along with notice of the complaint the accused student shall be advised of her/his right to be represented throughout the process, including by a Student Advocate.
3. The Vice-President, Student Services, or designate shall conduct an investigation to determine if the complaint has merit and/or if it can be disposed of informally by mutual consent of the parties involved on a basis acceptable to the Vice-President, Student Services, or designate. If an informal

disposition of the complaint results, such disposition shall be final, and there shall be no subsequent proceedings.

4. An agreement that a student will withdraw from the University for a period of time, or not re-register, may be part of an informal disposition of a complaint. In such instances this will not be recorded on the student's academic record, but a "block" on further registration may be entered in the student information system.
5. The Vice-President, Student Services, shall report annually to Senate regarding the number and nature of complaints that are disposed of informally.
6. If the complaint cannot be resolved informally through the procedures described in Section 3, or if in the judgment of the Vice-President, Student Services, it is not appropriate for the complaint to be so resolved, the Vice-President, Student Services, shall refer the complaint to the Senate Discipline Committee for a formal hearing. In determining whether to refer a case to the Senate Discipline Committee, the Vice-President, Student Services, may seek advice from a student Discipline Advisor or other appropriate source.
7. Where there are criminal or civil proceedings pending against the student for conduct related to the complaint, the Vice-President, Student Services, may defer prosecution of the complaint on such terms and conditions as are appropriate in the circumstances (including an interim suspension) until the conclusion of all or part of such proceedings where the circumstances of the case warrant. Conviction of a criminal offence will be considered *prima facie* evidence of a parallel offence under this Code.
8. Any statements an accused student makes to the Vice-President, Student Services, or designate in the course of an attempt to resolve a complaint informally may not be submitted to the Senate Discipline Committee as evidence.
9. Hearings shall be conducted by the Senate Discipline Committee according to procedures determined by the Committee. In other than exceptional circumstances, a hearing by the Senate Discipline Committee shall occur within 60 calendar days of the referral of a complaint to the Committee.
10. The President or designate shall appoint a person to present the complaint.
11. If a student fails to appear at a hearing, the hearing may proceed, provided that the student has been given adequate notice. Except in the case of a student charged with failing to obey the summons of the Committee or University official, no student may be found to have violated the Student Code solely because the student failed to appear before the Committee. In all cases, the evidence in support of the complaint shall be presented and considered.

E. Sanctions

1. In each case in which the Senate Discipline Committee determines that a student has violated the Student Code, the sanction(s) shall be determined and imposed by the Committee.
2. The following sanctions may be imposed upon any student found to have violated the Student Code:
 - a) **Warning** – A notice in writing to the student that the student is violating or has violated institutional regulations.
 - b) **Probation** – A written reprimand for violation of specified regulations. Probation is for a designated period of time and includes the probability of more severe disciplinary sanctions if the student is found to be violating any institutional regulation(s) during the probationary period.
 - c) **Loss of Privileges** – Denial of specified privileges for a designated period of time.
 - d) **Restitution** – Compensation for loss, damage or injury. This may take the form of appropriate service and/or monetary or material replacement.
 - e) **Discretionary Sanctions** – Work assignments, service to the University or other such discretionary assignments that are considered appropriate by the Discipline Committee.
 - f) **Conditions** – Conditions may be imposed upon a student's continued attendance.
 - g) **University Suspension** – Suspension of the student from the University for a specified period of time, after which the student is eligible to return. Conditions for readmission may be specified.
 - h) **University Expulsion** – Permanent separation of the student from the University.
3. More than one of the sanctions listed above may be imposed for any single violation.
4. Other than expulsion from the University and suspension for the duration of its effect, disciplinary sanctions shall not be made part of the student's academic record, but shall be kept on file in the Office of the Vice-President, Student Services, for use in the event of further breaches of this Code.

5. No student found guilty of an offence under this Code shall refuse to comply with a sanction or sanctions imposed under the procedures of this Code. Such refusal will constitute grounds for the imposition of additional sanctions.
6. The Committee may direct that a sanction be held in abeyance if a student's registration at the University is interrupted for any reason.

F. Interim Suspension

In the following circumstances, the President of the University, or a designate, may impose an interim suspension prior to the hearing before the Committee.

1. Interim suspension may be imposed only: (a) to ensure the safety and well-being of members of the University community or preservation of University property; (b) to ensure the student's own physical or emotional safety and well-being; or (c) if the student poses a threat of disruption or of interference with the operations of the University or the activities of its members.
2. During the interim suspension, students may be denied access to specified campus facilities (including courses) and/or any other University activities or privileges for which the student might otherwise be eligible, as the President or the designate may determine to be appropriate.
3. A student who is the subject of an interim suspension may request a hearing before the Senate Discipline Committee on the issue of the interim suspension itself. This request shall be submitted in writing, with reasons, to the Secretary of Senate. The Committee shall hear the matter, including submissions by the President or designate, within ten working days, and shall have the authority to confirm, negate, or alter the terms of the interim suspension.

Protection of Property

1. Dalhousie University is the owner and/or occupier of the lands and buildings which comprise its campuses. In addition to all other processes set out in this Calendar (including the Code of Student conduct), the University reserves the right to exercise all rights and remedies available to it pursuant to any statute, by-law, regulation, ordinance, order, or otherwise, in order to protect campus property and those who use it.
2. Without limiting the foregoing, Dalhousie University may issue a notice against a student pursuant to the *Protection of Property Act* prohibiting entry to all or part of the campuses or prohibiting a particular activity or activities on all or part of the campuses, where circumstances warrant. Such a notice may be issued either separately or in conjunction with the procedures set out in the Code of Student Conduct. The notice may be in force for the period stated in the notice which will normally be for up to one calendar year. If considered appropriate by the Vice-President, Student Services, a notice may be renewed for further periods.
3. A notice under the *Protection of Property Act* may also be issued by Dalhousie University in relation to the Student Union Building at the request of the Student Union. In the case of urgent or emergency situations, such a notice may be issued immediately. If the Student Union request is to have a prohibition extend beyond seven days for a registered Dalhousie University student, the Student Union shall make a written request to the Vice-President, Student Services, providing detailed reasons for the request and the process followed leading up to the request for the notice, including details of when the student was advised that his or her behaviour or activities were inappropriate and ought to cease, the reasons provided to the student, and whether the student was afforded the opportunity to respond or to rectify behaviors or cease the inappropriate activity.
4. A Dalhousie University student may appeal any notice issued against him or her under the *Protection of Property Act* in writing to the Vice-President, Student Services.

Senate Appeals Committee

Jurisdiction of the Senate Appeals Committee

1. The Senate Appeals Committee has appellate jurisdiction.
2. The Senate Appeals Committee is not an investigative body.
3. The Senate Appeals Committee does not receive or determine:
 - a) allegations of discrimination, which are addressed under the Statement on Prohibited Discrimination, or
 - b) requests for accommodation, which are addressed under the Accommodation Policy for Students.
4. The Senate Appeals Committee shall consider the following appeals initiated by students:

- a) Academic appeals from decisions or the refusal to make decisions at the Faculty level regarding academic standards, academic evaluation, academic progression, academic advancement, or the application of other University or Faculty academic regulations.
- b) Discipline appeals from decisions of the Senate Discipline Committee.
5. An appeal may be initiated on the following grounds:
 - a) the decision under appeal was made without jurisdiction,
 - b) a denial of natural justice, or
 - c) unfairness in the application of the relevant regulations regarding academic standards, academic evaluation, academic progression, academic advancement, or other University or Faculty academic regulations.
6. The Senate Appeals Committee shall not consider appeals:
 - a) by students in an academic appeal who have not exhausted the approved appeal processes of the relevant Faculty,
 - b) by students from the decision of a Faculty regarding professional unsuitability, said appeals falling under the jurisdiction of the Senate Steering Committee,
 - c) by a Faculty or faculty members,
 - d) by applicants for admission to University programs, or
 - e) by applicants for scholarships, awards or bursaries.
7. A Hearing Panel of the Senate Appeals Committee may:
 - a) dismiss the appeal,
 - b) allow the decision under appeal to stand, despite possible insubstantial procedural errors,
 - c) in an academic appeal, allow the appeal, with an appropriate remedy within the authority of Senate,
 - d) in a discipline appeal, allow the appeal and:
 - a) quash the decision of the Senate Discipline Committee in its entirety,
 - b) re-hear the matter itself, with the consent of the Appellant and the Faculty, or
 - c) direct a re-hearing on the merits by a newly constituted panel of the Senate Discipline Committee, no members of which were on the hearing panel whose decision was under appeal.
8. In an academic appeal, the Hearing Panel shall not conduct a substantive evaluation of the work of a student, but if unfairness in the evaluation procedure is established, the Panel may direct a re-evaluation of the work to be conducted by qualified persons designated by the Panel.
6. The Appellant is entitled to an oral hearing, in accordance with the principles of natural justice. The Appellant may participate at an oral hearing in person, or at their expense, by way of teleconference, or by such other means approved in advance by the Hearing Panel. The Appellant may waive the right to an oral hearing and choose to proceed solely by written submissions.
7. Each party is responsible for presenting to the Hearing Panel all relevant evidence and submissions for the Panel to consider in the determination of the appeal. Written submissions are required from each party and shall contain:
 - a) copies of all documents relevant to the appeal,
 - b) supporting arguments,
 - c) a list of all witnesses for that party and a brief description of their anticipated evidence, and
 - d) the decision and any remedy being sought.
8. Written submissions shall be made:
 - a) by the Appellant, within 15 calendar days of the Senate Vice-Chair (Student Affairs) requesting the submission, and
 - b) by the Respondent, within 15 calendar days of receiving the Appellant's submission.
 but these timelines may be extended or abridged by the Senate Vice-Chair (Student Affairs), or designate, in appropriate circumstances.
9. The hearing of each appeal shall be in camera. The Chair of the Hearing Panel shall determine procedures for the hearing in a manner that is consistent with the principles of natural justice and these Procedures. In extenuating circumstances, the Chair of the Hearing Panel may decide to proceed with the hearing in the absence of one faculty member of the Hearing Panel.
10. The decision of the Hearing Panel shall be by majority. The Hearing Panel shall deliver written reasons for its decision to the Senate Vice-Chair (Student Affairs). The decision of the Hearing Panel shall be final and binding on the parties, with no further appeal.
11. An audio recording of each oral hearing shall be made. The recording and all correspondence and documentary evidence relating to appeal proceedings shall be kept for a period of three calendar years from the date of the decision of the Hearing Panel, in accordance with the policy of the University Secretariat.

Appeals Procedures

1. An appeal shall be initiated by submitting a written Notice of Appeal to the Senate Vice-Chair (Student Affairs), or designate, containing:
 - a) the name, Banner identification number and mailing address of the Appellant,
 - b) a copy of the decision giving rise to the appeal,
 - c) a description of the matter under appeal,
 - d) the grounds for the appeal, and
 - e) the remedy sought by the Appellant.
2. An academic appeal alleging the refusal to make a decision at the Faculty level shall be submitted with reasonable promptness. All other appeals shall be submitted within 30 calendar days of the date that the decision under appeal was sent to the student. An extension of time to submit an appeal may be permitted by the Senate Vice-Chair (Academic Administration), or designate, if the Appellant establishes reasonable grounds for granting the extension.
3. The parties to an appeal are the student, as Appellant, and the Faculty, as Respondent. In an academic appeal, the Dean of the applicable Faculty shall designate one or more representatives to respond to the appeal. In a discipline appeal, the Academic Integrity Officer of the applicable Faculty, or designate, shall respond to the appeal.
4. Upon receiving notice of an academic appeal, the Senate Vice-Chair (Student Affairs) shall require a statement from the Dean of the applicable Faculty confirming that all appeal processes of the Faculty have been exhausted.
5. For each appeal, the Chair of the Committee shall constitute a Hearing Panel in a timely manner. The Hearing Panel shall consist of four faculty members and one student member of the Committee, and shall choose its own Chair. None of the faculty members of a Hearing Panel shall be a member of the Faculty from which the appeal originally emanates or belong to the department or program in which the student is or was enrolled. The student member of a Hearing Panel shall not be a member of the course, department, program, School or College from which the appeal emanates. In the event neither student member of the Committee is able to participate on a Hearing Panel due to the provisions of this paragraph, the Dalhousie Student Union shall appoint an ad hoc member to the applicable Hearing Panel.

Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability Faculty of Health Professions

The Faculty of Health Professions, acting through its Committees on Studies at the School/College and Faculty levels, and in consultation with the Directors and Dean, may suspend or terminate a student from a program if the student is judged to be unsuitable for the profession in which s/he is studying. Because of the nature of the study and practice of the various health professions, which places care givers in a position of special trust, certain impairments or some types of conduct unbecoming to a member of a health profession may be grounds for suspension or dismissal.

The following list includes examples of behaviors that might indicate unsuitability for the various health professions. The nature of these behaviors is such that, should any of them ever be repeated, grievous harm could be caused to clients. This list should not be considered to be all inclusive:

1. a criminal act (e.g., assault, sexual assault, fraud, and drug trafficking) which according to established Faculty processes was determined to be of such a nature as to bring disrepute to the profession, or by which in the opinion of the Faculty, the student demonstrated poor judgment, lack of integrity or (other) unsuitability for the profession; or evidence that, on the balance of probability, the student had committed such an act;
2. being under the influence of alcohol or drugs while participating in client care, any other professional activity, or any activity related to the practice of the health profession;
3. in accordance with provisions of the Nova Scotia Human Rights Act, the occurrence of a health condition that impairs essential performance required for the health profession;
4. unethical behaviour as specified by the code of ethics/standard of practice of the health profession.

The student's situation will be considered with discretion throughout the investigation of the allegation of unsuitability and these deliberations shall determine whether suspension, dismissal or neither is recommended. The principles of natural justice and due process will be observed in all investigations.

Any member of the University community can bring to the attention of the Director behaviors that are deemed unsuitable. These behaviors will be investigated and allegations heard.

Appeals will follow the appeal procedure for academic matters within the Faculty of Health Professions notwithstanding that the criteria are different. At the University level, appeals will require formation of an *ad hoc* Senate Committee.

Where the rules of a faculty, such as Health Professions, expressly provide that suitability, fitness, or aptitude for the practice of the profession is a requirement for advancement or graduation, or both, and a Faculty determines that a student should be suspended or dismissed or otherwise should not advance or graduate because of unsuitability for the relevant profession, an appeal from the Faculty decision may be made to an ad-hoc appeal committee established by the Senate Steering Committee. The Ad-hoc Appeal Committee shall: (1) hear an appeal by a student from the decision of a Faculty regarding suitability, fitness or aptitude for the practice of the relevant profession when: a) the student has exhausted the approved appeal regulations and procedures of the relevant Faculty; and b) the student alleges that there were irregularities or unfairness in the application of the regulations in question. The Ad-hoc Appeal Committee shall not hear appeals: a) by students on a matter involving a requested exemption from the application of Faculty or University regulations or procedures; b) on substantive aspects of a finding of unsuitability.

Acceptable Use of Information Technology Resources

A. Purpose

The purpose of this policy is to outline appropriate use of Information Technology Resources owned, leased, controlled and/or operated by the University.

B. Application

This policy applies to all individuals who have been granted a NetID and/or Banner account by the University.

This policy does not replace other policies, procedures or guidelines concerning the use of specific IT Resources or data management but rather sets out a minimum standard of acceptable use.

C. Definitions

In this Policy,

“User Account” means a NetID and/or Banner account issued by the University;

“Information Technology Resources”, or “IT Resources”, means computing equipment, peripherals, facilities, networks or systems owned, leased, controlled or operated by the University, including those purchased through research funds;

“User” means an individual who has been issued a User Account.

D. Policy

1. Accounts

1.1 Authorized access to IT Resources requires a User Account. User Accounts are non-transferable.

1.2 Users are responsible for any and all uses of their User Account and are expected to take reasonable steps to ensure the security of their User Account.

2. Acceptable Use

2.1 Users shall use IT Resources for authorized purposes only.

2.2 No User shall use IT Resources for any disruptive or unauthorized purpose, or in a manner that violates any law, University regulations, policies or procedures. Examples of unacceptable uses of IT Resources include, but are not limited to, the following:

2.2.1 using another person’s User Account, or misrepresenting themselves as another User;

2.2.2 disclosing passwords or other access codes assigned to themselves or others;

2.2.3 interfering with the normal operation of IT Resources by, among other things, unauthorized network interception, network traffic,

flooding the network with messages, sending chain letters or pyramid solicitations;

2.2.4 copying, removing or distributing proprietary software and/or data without authorization;

2.2.5 breaching terms and conditions of software licensing agreements;

2.2.6 accessing, displaying, transmitting, or otherwise making available information that is discriminatory, obscene, abusive, derogatory, harassing or otherwise objectionable in a university setting;

2.2.7 destroying, misplacing, misfiling, or rendering inoperable any stored information on a University administered computer or other information storage, processing or retrieval system;

2.2.8 unauthorized use of IT Resources for profit or commercial gain; and

2.2.9 attempting to or circumventing security facilities on any system or network.

3. Consequences of Unacceptable Use

3.1 If there is reason to suspect that a User has violated this policy, the Assistant Vice-President, Information Technology Services or the Information Security Manager may temporarily revoke or restrict User Account access privileges of any User, pending further investigation by the Information Security Manager

3.2 To aid in the investigation of a suspected violation of this policy, the Information Security Manager may examine a User’s User Account information, including, but not limited to, emails, files, and any other material or data connected with the User Account, provided that s/he obtains the Assistant Vice-President Information Technology Services’ prior written approval. If the User in issue works within the Information Technology Services Department, then approval must be obtained from the President

3.3 If the investigation concludes that a violation of this policy has occurred, the Assistant Vice-President Information Technology Services may restrict, suspend or revoke the User’s access to any or all of the University’s IT Resources, and may

3.3.1 in the case of students, initiate disciplinary proceedings under the Code of Student Conduct;

3.3.2 in the case of employees, refer the matter for consideration of discipline in accordance with applicable collective agreements or human resource policies, as appropriate.

Academic Regulations

These regulations apply to all students in the College of Arts and Science and the faculties of Agriculture, Architecture and Planning, Computer Science, Engineering, Health Professions and Management. Students in the faculties of Architecture and Planning, Computer Science, Engineering and Health Professions should also consult the regulations specific to their, faculty, school or college found in the appropriate sections of this calendar.

PLEASE NOTE:

A student is governed by the academic regulations in place at the time of initial enrolment as long as the degree is completed within the time permitted (see Section 15, [page 35](#)), and that subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

It is the student's responsibility to maintain documentation of registration and subsequent changes. The Registrar's Office will rely solely upon computer records and will not maintain paper records of changes to a student's registration.

1. Definitions

For definitions of some commonly used terms, see [page 3](#).

Within these regulations, reference to the Student Appeals Committee should be interpreted as the Student Affairs Committee in the Faculty of Arts and Social Sciences, as the Committee on Studies and Appeals in the Faculty of Science, the Undergraduate Committee on Studies in the Faculty of Health Professions, the Undergraduate Academic Appeals Committee in the Faculty of Management, the Academic Appeals Committee in the Faculty of Engineering, the Appeals Committee in the Faculty of Computer Science, the Appeals Committee in the Faculty of Agriculture and the dean's office in the Faculty of Architecture and Planning.

2. Course Selection

2.1 Numbering of Courses

Courses are numbered to indicate their general level. Those in the 1000 series are introductory degree level courses at Dalhousie. Courses in the 2000, 3000, 4000 series are usually first available to degree level students in the second, third and fourth year respectively. Often these courses have prerequisites. Some departments, schools, colleges have minimum grade requirements for entry into courses above the 1000 level. Such requirements are listed in the calendar entries for the departments, schools, colleges concerned.

Courses listed in the 0100 series are introductory technology level courses at Dalhousie. Courses in the 0200 series offer more detailed exploration of a discipline at the Technology level. 0200 level courses usually have prerequisites or require background knowledge.

Courses listed in the 0001-0099 series are university preparatory courses.

An example of a course identifier is as follows: CHEM 1011

CHEM	subject code
1011	course number & level

Courses with numbers below 0100 normally do not carry credit.

2.2 Academic Advice

At Dalhousie, academic advice is available to all students prior to registration. To find out who your advisor is, see the advising website (www.dal.ca/advising) and click on "Where to go for advising."

Academic advisors at Dalhousie strive to enable students to make a successful transition to university, to take responsibility for learning, how to set academic, career and personal goals as well as to develop strategies for achieving them. Specifically, academic advisors at Dalhousie help students:

- assess and clarify their interests, academic abilities and life goals;
- develop suitable educational plans consistent with their goals;
- select appropriate courses and complementary educational experiences;
- interpret institutional rules and requirements;
- develop decision-making skills;
- resolve academic problems, conflicts and concerns;
- evaluate their progress towards their goals;
- by referring them as necessary to other resources.

3. Workload

3.1 Regular Year

3.1.1 College of Arts and Science

Thirty credit hours per academic year shall be regarded as constituting a normal workload for a student. Students wishing to increase their workload to 18 credit hours in any term and have a sessional GPA greater than 3.00 need to contact the Registrar's Office. Students with a GPA less than 3.00 will need to contact the appropriate Assistant Dean to request permission.

3.1.2 Rowe School of Business

Thirty credit hours per academic year shall be regarded as constituting a normal workload for a student. However, winter term of third year and first term of fourth year require BComm Co-op students to take 18 credit hours. For this reason, BComm Co-op students must apply to exceed the normal workload policy (see below).

During the work term, the work assignment shall constitute the normal workload.

Note that the second and third summers are regular academic and workterms for co-op students.

Students wishing to increase their workload to 18 credit hours in any term and have a sessional GPA greater than 3.00 need to contact the Registrar's Office. Students with a GPA less than 3.00 will need to contact the Undergraduate Advising Office, Suite 2086, Rowe Building. Such permission will not normally be granted for more than three credit hours per term, nor to any student who is in his/her first year of study or who, in the preceding academic term, earned a term GPA of less than 3.00 on a full load of courses. Students are not permitted to take more than six courses in any single academic term.

3.1.3 Faculty of Agriculture

A normal full-time course load for students registered in degree programs in Agriculture is considered to be five courses per semester. A normal full-time course load for students registered in the technology programs is five to six courses per semester, depending on the program. Students wishing to increase their workload to six courses per semester (degree) or seven courses per semester (technology) with a sessional GPA greater than 3.00 should contact the Registrar's Office. Students with a GPA less than 3.00 will need the permission of the faculty advisor and the Assistant Dean - Students.

3.1.4 Faculties of Architecture and Planning, Computer Science, Engineering, Health Professions and Bachelor of Management

For normal workloads, see the individual school or college section of the calendar. Written permission from the school or college Committee on Studies or the Program Administrator for Bachelor of Management is required if the normal workload is to be exceeded. Applications from students who give good reasons for wishing to take an overload will be considered. Such permission will not normally be granted to any student in the first year of study, or to any student who, in the preceding academic term, obtained a grade point average of less than 3.00.

3.2 Summer Session

It is recommended that students take only six credit hours in each of the May - June or July - August parts of term. Students who want to exceed the recommended number of credit hours should speak to an academic advisor in their faculty, school or department.

4. Registration

1. It is a student's responsibility to register. Registration instructions are available on the web at <http://www.dal.ca/advising>. Registration for courses is completed using Dal.online. The timetable of courses for 2014-2015 and registration dates are available in March - June.
2. A student is considered registered after selection of courses. Selection of courses is deemed to be an agreement by the student for the payment of all assessed fees.
3. All students are required to obtain ID card or validate an existing ID card at the DalCard Office.
4. Space in class. Enrolment is limited in all courses, and admission does not guarantee that space will be available in any course or section. However, no student in a graduating year may be excluded from a course required by that student to meet degree program requirements because of lack of space. This rule does not apply to elective courses or to preferred sections of courses. Any student in a graduating year who encounters such a situation should immediately consult the department chair, school director or dean.
5. Students may be removed from courses for which they do not have prerequisites. Prerequisite waivers can be granted only by the instructor and must be submitted in writing, with the instructor's signature, to the Registrar's Office.

ID cards are mandatory and must be presented to write an officially scheduled examination. In addition, some services such as the issuance of bursary or scholarship cheques, library privileges, Dalplex and Langille Athletic Centre require the presentation of a valid Dalhousie ID card.

5. Course Changes and Withdrawal

5.1 Course Changes

It is recognized that some students may wish to make changes in programs already arranged. Course changes will normally be completed during the first two weeks of courses. (For Summer term information, see the Summer School Schedule.) The last dates for adding and deleting courses are published in the schedule of Academic Course Add/Drop Dates, [page 1](#) of this calendar. Course changes should be made on the Web at www.dal.ca/online

Please note that dropping or changing courses may affect your eligibility for student aid.

5.2 Withdrawal

Non-attendance does not, in itself, constitute withdrawal. Withdrawals are effective when a student withdraws from courses on the Web at www.dal.ca/online or written notification is received at the Registrar's Office.

In the Faculty of Health Professions students who wish to withdraw from the university must obtain written approval from the appropriate school or college and submit the appropriate forms to the Registrar. Students should not discontinue attendance at any course until their withdrawal has been approved.

Students withdrawing voluntarily from the University should consult the individual faculty regulations and the Fees section of this Calendar.

When the work of a student becomes unsatisfactory, or a student's attendance is irregular without sufficient reason, the faculty concerned may require withdrawal from one or more courses, or withdrawal from the Faculty. If a student is required to withdraw from a Faculty such a student may apply to another Faculty. However, in assessing the application, previous performance will be taken into consideration.

6. Counting of Credits for Two Dalhousie Programs

6.1 Undergraduate Degrees

Students who hold one undergraduate degree from Dalhousie and who wish to gain a second undergraduate degree must fulfill the requirements of the second degree and meet the following stipulations:

1. Only credit hours that are applicable to the program for the second degree may be counted for credit.
2. Each credit hour carried forward must have a grade of C or higher.

6.1.1 College of Arts and Science

For the honours degree, a minimum of 10 new full credits are to be taken, in accordance with "Degree Requirements" listed elsewhere in this calendar.

For the major (120 credit hour) BA degree, a minimum of 60 new credit hours, or the equivalent, must be taken. At least 36 of these are to be beyond the 1000 level in a new major subject, and at least 18 of the 36 must be beyond the 2000 level.

For the major (120 credit hour) BSc degree, a minimum of 60 new credit hours, or the equivalent, must be taken. At least 42 of these are to be beyond the 1000 level in a new major subject, and at least 24 of the 42 must be beyond the 2000 level.

For the 90 credit hour degree, a minimum of 45 new credit hours must be taken. At least 24 of these are to be beyond the 1000 level in a new area of concentration, and at least 12 of the 24 must be beyond the 2000 level. Normally, 12 credits will be in a subject other than the minor.

Students may obtain a second BSc by completing the above requirements. More than one BA is not awarded.

6.1.2 Management

For the BComm co-op degree a minimum of 60 new credit hours (plus three work terms) must be taken, of which at least 48 must be in the core area and include the three work term credits.

For the BMgmt degree (120 credit hour), a minimum of 60 new credit hours must be taken, and all core requirements met.

6.1.3 Health Professions

For degrees in the Faculty of Health Professions no more than half the credits required for an undergraduate degree may be carried forward from an earlier degree.

6.1.4 Architecture and Planning

For the BEDS degree, a minimum of one third of the credits required in the third and fourth years must be taken while registered in the BEDS program.

6.1.5 Computer Science and Engineering

For the BCSc, BINF, and BEng degrees, a minimum of 60 new credit hours must be taken.

6.1.6 Transfer Credits from Dental Hygiene

Students who have completed the Diploma in Dental Hygiene at Dalhousie University may receive 30 credit hours towards a BA or BSc.

6.1.7 Agriculture

For the BSc (Agr) a minimum of 60 new credit hours must be taken.

6.2 Counting of Credit for two Dalhousie Diplomas in Technology Programs

Students who hold one technology diploma from Dalhousie and who wish to gain a second technology diploma must fulfill the requirements of the second diploma and meet the following stipulations:

- a. Only credits that are applicable to the program for the second diploma may be counted for credit.
- b. Each credit carried forward must have a grade of C or higher.
- c. At least half of the credits in the second diploma must be new credits.

6.3 Counting of Credit from Diploma in Technology to Undergraduate Programs

Students who have completed technology level courses may be eligible to receive degree level credit for such courses, to a maximum of 60 credit hours, evaluated on a course by course basis with a minimum grade of "C". Students who successfully complete a Technical Diploma program in the Faculty of Agriculture and apply to the Bachelor of Science (Agriculture) program will receive a minimum of 30 credit hours toward the degree.

6.4 Counting of Credit from Continuing Education Courses toward Diploma in Technology Programs

Special permission to complete a limited number of select continuing education courses in the Faculty of Agriculture may be granted to students enrolled in technology diploma programs. These courses must be approved in advance by the Dean or designate. Any student who wishes to explore this option should contact their academic advisor.

7. Transfer Students

7.1 Transfer Credits - All Faculties

At Dalhousie transfer credits may be granted for courses which are offered by a recognized university or equivalent institution of higher learning and which are judged to be comparable to courses offered at Dalhousie and to be appropriate to a student's academic program at Dalhousie. Transfer credit will be granted for any course in which a final mark of C or higher was obtained.

Transfer credits are subject to the approval of the appropriate department/school/college. For courses not within the purview of a Dalhousie department/school/college, the Registrar's Office will assess transfer credits. Students may appeal, in writing, a negative decision and should justify the inclusion of such courses in the student's proposed program. Copies of calendar descriptions are necessary. Such descriptions are not normally included with university transcripts, and it is the student's responsibility to provide them.

Bachelor of Commerce and Bachelor of Management require course syllabi that includes the length of the course, topics covered, evaluation, textbook used, and required reading.

College of Arts and Science and Faculty of Management courses that are more than 10 years old may not be used to fulfill degree requirements unless a waiver is granted. See Regulation 15, [page 35](#) for information on other faculties.

Transfer credits may be counted towards fulfilment of the concentration, major or honours or Commerce/Management core area requirement of a bachelor's degree with specific advance approval from the appropriate department/school/college at Dalhousie.

To obtain a first degree or diploma, at least half of the credits, including at least half in the field of concentration or major or minor, must normally be taken at Dalhousie.

For the BComm Co-op degree, a minimum of 60 credit hours (plus three workterms) must be taken, of which at least 48 must be in the core area and include the three workterm credits.

For the BMgmt degree, a maximum of 60 credit hours may be counted towards the program.

In the Faculty of Health Professions to obtain a first degree, all or most of the advanced work of the program (i.e., at least half the credits taken in the second and subsequent years of study) must be taken at Dalhousie.

Note: Transfer credits will not be awarded for work completed while a student was academically ineligible.

7.2 Architecture and Planning

For the BEDS degree, at least one third of the credits required in the third and fourth years must be taken while registered in the BEDS program at Dalhousie. Courses taken to qualify for admission are not converted to transfer credits unless they are equivalent to BEDS courses. For the Bachelor of Community Design, at least half of the credits must be taken at Dalhousie, including half in the major field.

7.3 Computer Science

For the BCS and BINF degrees, at least half of the credits must be taken at Dalhousie. 60 credit hours of CSCI courses, including 36 of the third and fourth year CSCI courses, must be taken at Dalhousie

7.4 Engineering

For the BEng degree, at least half of the credits, including the final two study terms with a full course load, must be taken at Dalhousie. For the Bachelor of Applied Science, at least half of the credits for the degree must be taken at Dalhousie, including half in the major field.

7.5 Procedures

As soon as the student's record has been assessed the Registrar's Office will inform the student which transfer credits have been awarded. The number of credits which have been approved, and which Dalhousie courses may not be taken, will be included in the letter. If more credits have been approved than can be applied to the student's program, the Registrar's Office will decide the appropriate transfer credits. Transfer credits awarded on admission appear on a Dalhousie transcript as credits only; no marks are shown.

If by registration time the student has not received written confirmation of transfer credits, the student should check with the Registrar's Office. Information, although incomplete, may be available and may be helpful in choosing Dalhousie courses.

Before selecting courses the student should consult with the appropriate department/school/college to determine how the transfer credits will fit into the student's specific academic program at Dalhousie.

7.6 Courses Taken at Other Universities on Letter of Permission

A student who wishes to take courses at other institutions while registered at Dalhousie must obtain approval in advance on a form available online at www.dal.ca/lop. A Letter of Permission will be provided if all the following conditions are met:

- the student is in good academic standing, i.e., students who have been academically dismissed or are on probation are not eligible
- the student has not exceeded the allowable number of transfer credits
- the course at the other institution is acceptable for transfer to Dalhousie
- the workload will not exceed Dalhousie's limitations
- the course is not offered at Dalhousie in the term in which the student wishes to take it; or the student has a scheduling conflict; or the course is full; or the student is living outside the local area.

The departments of French, German, Russian Studies, and Spanish and Latin American Studies have special arrangements whereby up to 30 credit hours taken at other universities may be considered as part of a student's program at Dalhousie (see Regulation 13, [page 35](#)).

No credit will be given for any courses taken at another university while a student is not in good standing at Dalhousie. See [page 3](#) of this calendar for the definition of "good standing".

8. Advanced Standing

Students possessing advanced knowledge of a subject will be encouraged to begin their studies in that subject at a level appropriate to their knowledge, as determined by the department/school/college concerned. However, such students must complete, at Dalhousie, the full number of credit hours required for the particular credential being sought.

9. Part-Time Students

Part-time students are reminded of the university policy that limits programs of study to 10 years from the date of initial registration in the College of Arts and Science, Faculty of Agriculture and the Faculty of Management. See Regulation 15, [page 35](#) for details on duration of study. Note also, regulation 7 above concerning the number of credits that must be completed at Dalhousie.

9.1 College of Arts and Science

Part-time students are admitted to most of the programs offered in the College of Arts and Science. Admission requirements and regulations are the same for all students.

9.2 Faculty of Management

The Faculty of Management is committed to providing students the opportunity to obtain a degree/diploma through full-time study and part-time study where the latter is feasible.

9.3 Faculty of Health Professions

Because of the restriction on the duration of undergraduate studies (see Academic Regulation 15, [page 35](#)), the opportunity for part-time study is limited in the majority of programs.

The exceptions are the undergraduate programs in the School of Health and Human Performance, and the School of Social Work.

9.4 Faculty of Architecture and Planning

Part-time study is not available in the Bachelor of Environmental Design Studies (BEDS) program. Part-time study is available in the Bachelor of Community Design (BCD) program.

9.5 Faculty of Engineering

Because of the restriction on the duration of undergraduate studies, (see Regulation 15, [page 35](#)), the opportunity for part-time study is limited.

9.6 Faculty of Computer Science

Part-time students may be admitted to the Bachelor of Computer Science and Bachelor of Informatics program.

10. Audit of Courses

Students who have been admitted to a faculty may audit many of the courses offered with the permission of the instructor. Registration for an audit is available from the first day of courses until the last day to add a course. Students auditing courses will not be eligible to write examinations in the audited course and will not in any circumstance be granted credit for it. Fees are payable as indicated under Fees. A course may not be changed from credit to audit or from audit to credit status after the last date for dropping courses without 'W' (see the schedule of Academic Course Add/Drop Dates).

11. Experimental Courses—College of Arts and Science

Experimental courses, on any subject or combination of subjects to which arts or sciences are relevant, and differing in conception from any of the courses regularly listed in departmental offerings, may be formed on the initiative of students or faculty members.

If formed on the initiative of students, the students concerned shall seek out faculty members to take part in the courses.

Whether formed on the initiative of students or on the initiative of faculty members, the faculty members who wish to take part must obtain the consent of their department.

The course may be offered over the regular session or for one term only.

A course shall be considered to be formed when at least one faculty member and at least eight students have committed themselves to taking part in it for its full length.

Courses may be formed any time before the end of the second week of courses in the fall term to run the regular session or fall term, or any time before the end of the second week of courses in the winter term. If they are formed long enough in advance to be announced in the calendar, they shall be so announced, in a section describing the Experimental Program; if they are formed later, they shall be announced (a) in the *Dalhousie Gazette*, (b) in the *Dal News*, (c) on a central bulletin board set aside for this purpose.

One faculty member taking part in each experimental course shall be designated the rapporteur of the course with responsibility for (a) advising the curriculum committee of the formation and content of the course; (b) obtaining from the curriculum committee a ruling as to what requirement or requirements of distribution, concentration, and credit the course may be accepted as satisfying; (c) reporting to the Registrar on the performance of students in the course; (d) reporting to the curriculum committee, after the course has finished its work, on the subjects treated, the techniques of instruction, and the success of the course as an experiment in pedagogy (judged so far as possible on the basis of objective comparisons with more familiar types of courses).

Students may have 30 credit hours of experimental courses (or some equivalent combination of these with half-credit courses) counted as satisfying course for course any of the requirements for the degree, subject to the rulings of the relevant curriculum committee (above) and to the approval of the departments.

12. Summer School

12.1 Summer Session

Dalhousie currently offers a Summer session of approximately 16 weeks, May - August. See Regulation 3.2, [page 32](#) for permitted work-load.

13. International Exchange and Study Abroad Programs

A number of programs enable Dalhousie University students to pursue part of their studies in another country and culture. For details regarding courses taken at other universities, see Regulation 7.6, [page 34](#).

University-wide programs allow students from a variety of academic departments to take part in a study abroad or exchange program. These are coordinated by the Study Abroad and Exchange Advisor in International Centre, located in the Killam Library, main floor. Department-specific programs are coordinated by an individual within the department/faculty. Additional information is available at: www.dal.ca/exchange.

It is important to note that there are application deadlines for these programs; plan to apply up to a year prior to departure.

14. Preparation for Other Programs

Work in the College of Arts and Science is a prerequisite for various programs in other faculties and other institutions. A brief summary of the academic work required for admission to certain programs is given here. Further information may be found later in this calendar, or in the Faculty of Graduate Studies calendar or the Dentistry, Law and Medicine calendar.

Graduate Studies: The normal requirement for admission to a graduate program is an honours degree or the equivalent.

Students who are registered in an honours program may, with permission from their honours supervisor and the course instructor, be eligible to complete up to six credit hours of study at the graduate level. These credits could be used in place of undergraduate degree requirements toward completion of the undergraduate degree. With permission of the program's graduate coordinator and the Faculty of Graduate Studies, such credits may also be applied to a subsequent Master's degree in some programs. Please consult the Graduate Calendar, section 3.7 Advanced Placement, for details. Students registering in any graduate level course, regardless of their level of study, will be graded in accordance with the graduate grading scale and must obtain a grade of B- or higher in order to receive credit. For courses that are cross-listed between the undergraduate and graduate level, students who register in the graduate level course may switch to the corresponding undergraduate course by the dates specified in the Academic Dates listed at the front of the Calendar.

Architecture: Two years of university study are required for entry to the BEDS program in architecture. For details, see the Architecture section in this calendar.

Dental Hygiene: Completion of 30 credit hours at the university level of one regular session's duration in the following: biology, psychology, sociology, a writing course, a one term course in introductory statistics and a one term course in introductory chemistry. For details, see the Dentistry, Law and Medicine calendar.

Dentistry: See the Dentistry, Law and Medicine calendar.

Design: Students completing one year in the College of Arts and Science at Dalhousie may be admitted into the second year of the four year program leading to the Bachelor of Design degree in communication design at the NSCAD University.

Law: At least two years of work leading to one of the degrees of BA, BSc, BComm, BMgmt. For details, please see the Dentistry, Law and Medicine calendar.

Medicine: A BA, BSc, BComm, or BMgmt degree. For details, see the Dentistry, Law and Medicine calendar.

Veterinary Medicine: The equivalent of 20 one-term courses (two years of university study) are required for admission to the Atlantic Veterinary College of the University of Prince Edward Island. Credits must include two mathematics courses, including statistics; four biology courses, including genetics and microbiology; three chemistry courses including organic chemistry; one physics course; two English courses, including one with an emphasis on writing; three humanities and social sciences courses; five electives from any discipline.

15. Duration of Undergraduate Studies

15.1 College of Arts and Science/Faculty of Management

Students are normally required to complete their undergraduate studies within 10 years of their first registration, and to comply with the academic regulations in force at the time of that registration. This is also the normal limit for transfer credits. However, the student appeals committee of the appropriate Faculty or School may grant permission to continue studies for a reasonable further period, subject to such conditions as the committee deems appropriate and with the

stipulation that the student must meet the degree requirements in force when the extension is granted.

15.2 Faculty of Health Professions

With the exception of the undergraduate programs in the School of Health and Human Performance and the School of Social Work to which Regulation 15.1 applies, students in the Faculty of Health Professions are normally required to complete their undergraduate studies within six years of first registration in professional courses.

15.3 Faculty of Architecture and Planning

Students in the BEDS program are normally required to complete their degree within four years. Students in the Bachelor of Community Design program must complete their degree within 10 years.

15.4 Faculty of Computer Science

Students in the BSc degree program are normally required to complete their degree within eight years.

15.5 Faculty of Engineering

15.5.1 Diploma of Engineering

Students registered in the Diploma of Engineering program are normally required to complete their requirements in a period of time not exceeding four consecutive calendar years from their first date of registration.

15.5.2 Bachelor of Engineering (Upper Division)

Students registered in the upper division component of the BEng program are normally required to complete their degree, including any coop education requirements, in a period of time not exceeding five consecutive calendar years from their first date of registration in Term 5.

15.5.3 Food Science

Students in the BASc degree program in Food Science are normally required to complete their degree within eight years of their first registration in the program.

15.6 Faculty of Agriculture

Students in the Bachelor of Science (Agriculture) are normally required to complete their undergraduate studies within 10 years of their first registration. Students in the Bachelor of Technology and the Diploma in Technology are normally required to complete their studies within six years of their first registration. Students in the Diploma in Engineering are normally required to complete their studies within four years.

This is also the normal limit for transfer credits. However, the student appeals committee may grant permission to continue studies for a reasonable further period, subject to such conditions as the committee deems appropriate and with the stipulation that the student must meet the degree requirements in force when the extension is granted.

16. Assessment

16.1 Method

Examinations may be oral, written (closed or open book) under supervision, or take-home.

Students will be provided with a course outline by the instructor at the first meeting of the course. In order to complete a course satisfactorily, a student must fulfill all the requirements as set down in the course outline. Changes to the outline which affect assessment components, the weight of individual assessment components, or examination requirements with a value of 10 percent or more must have the approval of at least two-thirds of enrolled students in order to be valid.

When collaboration is included as part of course expectations as in group projects or group assignments, the instructor will provide in the course outline, a statement of the degree of collaboration permitted in the preparation and submission of assignments.

Within four weeks after the beginning of each term, course outlines will be placed on file with the appropriate faculty/school/college.

Students should be aware that certain courses at the University involve required laboratory work where potentially hazardous materials are in use. These may include animals, other biological materials which may include crops and products, tissues, fluids, wastes, but also microorganisms and toxins as well as a wide variety of chemicals. Examples of physical hazards may include noise, radioactive isotopes and non-ionizing radiation (e.g. lasers). Since there are potential health risks associated with the improper handling of such materials resulting in exposure, Dalhousie University requires that, as a condition of taking a course where such materials are to be used, students must read and agree to comply with the instructions for safe handling of such materials. In the event that students do not comply with the instructions for the safe handling of such materials, students will receive no credit for the required laboratory work unless other acceptable alternatives are arranged with the instructor. In many cases, alternate arrangements are not possible and students should consider enrolling in a different course.

16.1.1 Academic Accommodation for Students with Learning Disabilities

See Accommodation Policy [page 21](#).

16.2 Examinations and Tests

Tests are normally scheduled during course time. Tests scheduled outside course time should not conflict with the regularly scheduled courses. Dates and times must be included in the course syllabus.

Periods of approximately three weeks in the spring and one and one-half weeks in December are set aside for the scheduling of formal written examinations by the Registrar. Instructors wishing to have examinations scheduled by the Registrar for their courses must so inform the Registrar at the beginning of the first week of courses in the fall and winter terms. Instructors may also arrange their own examinations at times and places of their choosing during the formal examination periods, with the understanding that in cases of conflict of examinations for an individual student, the Registrar's examination schedule takes priority.

16.2.1 College of Arts and Sciences, Faculties of Agriculture, Architecture and Planning, Computer Science, Engineering, Health Professions and Management

No written tests or examinations, with the exception of project presentations and major papers, worth more than 25% of the final grade, may be held in the last two weeks of a term, without the explicit approval of the appropriate faculty, school or college. No tests may be held between the end of courses and the beginning of the official examination period with the exception of those activity modules and laboratory courses in the Faculty of Health Professions in which special facilities are required.

Students may contact the dean's/director's office of the appropriate faculty/school/college for assistance if they are scheduled for more than two examinations on the same day.

16.3 Submission of Grades

On completion of a course, the instructor is required to submit grades to the Registrar. Grades are due seven calendar days after an exam scheduled by the Registrar or 14 days after the last class where there is no final exam scheduled by the Registrar. Such grades are to be based on the instructor's evaluation of the academic performance of the students in the course in question.

16.4 Incomplete

Students are expected to complete course work by the prescribed deadlines. Only in special circumstances (e.g., the death of a close relative) may an instructor extend such deadlines. Incomplete work in a course must be completed by:

Fall term courses.....	Feb 1
Winter and regular session (September - April) courses.....	Jun 1
May - June courses	Aug 1
May - August courses.....	Oct 1
July - August courses.....	Oct 1

Exceptions to this rule will normally be extended only to courses which require field work during the summer months. At present the list of these courses consists of:

- ENVS 3000, 3001, 4901, 4902;

- HPRO 4495;
- LEIS 4597;
- NURS 2220, 3290 and 4240;
- PHAR 3000;
- SUST 3002, 3950
- Management Internship
- Courses in the Bachelor of Agriculture - International Food Business

Students taking any of these courses in their final year should note that they will not be able to graduate at the spring convocation.

The Registrar's Office is not permitted to accept a late clearance of INC or late grade changes other than those due to errors. If there are exceptional circumstances, a recommendation should be forwarded to the undergraduate coordinator or the Committee on Studies of the appropriate faculty/school. Unless INC is changed it counts in the GPA and has a grade point value of 0.00 - it is a failing grade.

16.5 Supplementals

Faculties of Engineering and Health Professions

In courses where supplementals are available, a student must have achieved a grade of "FM" in the course in which the supplemental is to be written.

On re-examination the grade awarded for the course will be recorded on the student's transcript along with a notation that the grade was earned by supplemental examination. In the Faculty of Health Professions, the highest grade that can be awarded is "C" for professional courses and "D" for other courses. Only the supplemental grade will be included in the grade point average. Supplemental exams will be administered by the participating faculty/school/college. Students should check directly with their faculty/school/college for detailed information on the awarding of FM grades and eligibility for supplemental examinations.

Rowe School of Business

All students who fail a core Bachelor of Commerce course will have an opportunity to write a supplemental exam. The following terms and conditions apply to the writing of supplemental exams.

- The course must offer a final examination as part of the normal evaluation process.
- The minimum final grade for the course must be FM to be eligible to write a supplementary exam.
- The supplemental exam is to be written within four calendar weeks following the original final exam at a time determined by the Commerce Program Manager.
- The grade obtained on the supplemental exam replaces the final exam grade in the calculation of the overall mark. However, under no circumstances shall the final grade in the course be raised higher than a D.
- There is a \$25 non-refundable fee per exam.
- Students may write only one supplementary exam at the 2000 level, one at the 3000 level and one at the 4000 level.

If you have questions about supplementary exams, please contact the Undergraduate Academic Advising Office.

16.6 Correction of Errors in Recorded Grades

Students must request correction in the calculation or recording of final grades by:

Fall term courses.....	Feb 1
Winter and regular session (September - April) courses.....	Jun 1
May - June courses.....	Aug 1
May - August courses.....	Oct 1
July - August courses.....	Oct 1

16.7 Reassessment of a Final Grade

Students who have questions about final grades that are assigned are encouraged to discuss them with the course instructor. In addition, students may consult the chair of the department, director of the school/college, dean of the faculty, an academic advisor or a student advocate. If their concerns cannot be resolved, students may also use the formal process that follows for the re-assessment of final grades, except when such grades are the result of an academic discipline penalty.

Once a final course grade has been submitted to the Registrar, a student who wishes to have a final grade re-assessed should make a written request to the Registrar and pay the requisite fee of \$50 per course. The request must identify the specific component which the student wishes re-assessed and the grounds for the request. Such requests must be made by:

Fall term courses.....	Mar 1
Winter and regular session (September - April) courses.....	Jul 1
May - June courses.....	Sep 1
May - August courses.....	Nov 1
July - August courses.....	Nov 1

When such a request is received, the Registrar will forward it to the dean of the faculty or director of the school/college offering the course. The re-assessment will be conducted according to procedures developed for the purpose by the faculty/school/college. These should reflect the nature of the academic disciplines and assessment involved, and should provide for a review of the assessment by a qualified person or persons not responsible for the original evaluation.

The student will be notified, by the Registrar's Office, of the outcome of the re-assessment. If the re-assessment results in the assignment of a grade that is different (higher or lower) from the original one, the new grade will replace the original one and the \$50 will be refunded.

Students who wish information about grade re-assessment procedures should contact their faculty/school/college office.

16.8 Special Arrangements for Examinations, Tests and Assignments

At the discretion of the instructor, alternate arrangements for examinations, tests or the completion of assignments may be made for students who are ill, or in other exceptional circumstances.

Where illness is involved, a certificate from the student's physician will be required. This certificate should indicate the dates and duration of the illness, when possible should describe the impact it had on the student's ability to fulfill academic requirements, and should include any other information the physician considers relevant and appropriate. To obtain a medical certificate, students who miss examinations, tests or the completion of other assignments should contact the University Health Services or their physician at the time they are ill and should submit a medical certificate to their instructor as soon thereafter as possible. Such certificates will not normally be accepted after a lapse of more than one week from the examination or assignment completion date.

For exceptional circumstances other than illness, appropriate documentation, depending on the situation, will be required.

Requests for alternate arrangements should be made to the instructor in all cases. The deadline for changing a grade of ILL is:

Fall term courses.....	Feb 1
Winter and regular session (September - April) courses.....	Jun 1
May - June courses.....	Aug 1
May - August courses.....	Oct 1
July - August courses.....	Oct 1

Requests to change grades after these deadlines must be submitted in writing to the appeals committee of the appropriate school, college or faculty.

NOTE: Any student whose request for special arrangements has been denied and wishes to appeal, should refer to Appeals, [page 40](#).

17. Academic Standing

Students' academic standing is normally assessed at the end of each term.

17.1 Grade Scale and Definitions

Grade	Grade Point Value		Definition	
A+	4.30	90-100	Excellent	Considerable evidence of original thinking; demonstrated outstanding capacity to analyze and synthesize; outstanding grasp of subject matter; evidence of extensive knowledge base.
A	4.00	85-89		
A-	3.70	80-84		
B+	3.30	77-79	Good	Evidence of grasp of subject matter, some evidence of critical capacity and analytical ability; reasonable understanding of relevant issues; evidence of familiarity with the literature.
B	3.00	73-76		
B-	2.70	70-72		
C+	2.30	65-69	Satisfactory	Evidence of some understanding of the subject matter; ability to develop solutions to simple problems; benefitting from his/her university experience.
C	2.00	60-64		
C-	1.70	55-59		
D	1.00	50-54	Marginal Pass	Evidence of minimally acceptable familiarity with subject matter, critical and analytical skills (except in programs where a minimum grade of 'C' is required).
FM	0.00		Marginal Failure	Available only for Engineering, Health Professions and Commerce.
F	0.00	0-49	Inadequate	Insufficient evidence of understanding of the subject matter; weakness in critical and analytical skills; limited or irrelevant use of the literature.
INC	0.00		Incomplete	
W	Neutral and no credit obtained		Withdrew after deadline	
ILL	Neutral and no credit obtained		Compassionate reasons, illness	
P	Neutral		Pass	
TR	Neutral		Transfer credit on admission	
Pending	Neutral		Grade not reported	

17.1.1 Grade Point Average (GPA)

The Grade Point Average is calculated by summing the values obtained by multiplying the grade points obtained in each course in accordance with the scale in 17.1, by the number of credit hours of each course then dividing that sum by the total credit hours attempted. A Term GPA includes only those courses attempted in a single term and the Cumulative GPA includes all courses attempted while registered in a level of study (see definition, [page 3](#)). If a course has been repeated, only the highest grade awarded is included.

17.2 Grade Points on Admission

Transfer credits on admission count as credits without grade points, i.e., they are neutral in the calculation of the GPA.

17.3 Grade Points on Letter of Permission

Courses taken on a Letter of Permission at a Canadian university, where a letter grade system is used, the appropriate Dalhousie letter grade and corresponding grade points will be assigned. For institutions not using letter grades, the grade will be translated into a Dalhousie grade and corresponding grade points assigned. For institutions outside of Canada, a grade of P (pass) or F (fail), as appropriate, will be recorded.

17.4 Repeating Courses for which a Passing Grade has been Awarded

With the permission of the department/school/college concerned, a student may repeat any course for which a passing grade has previously been awarded. The original passing grade will nevertheless remain on the transcript and a second entry will be recorded with the new grade and the notation "repeated course". No additional credit will be given for such a repeated course, and only the highest grade will be included in the calculation of the GPA.

18. Good Standing

Students who meet the required GPA are considered to be in good academic standing. In the Faculties of Agriculture, Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management, and Science a cumulative GPA of 2.00 is required.

19. Probation

19.1 Faculties of Agriculture, Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering (Lower Division, Years 1 and 2 and Bachelor of Applied Science), Health Professions, Management and Science

19.1.1 - Students with a cumulative GPA of less than 2.00 and greater than or equal to 1.70 who have completed at least 24 credit hours will be placed on academic probation.

19.1.2 - Students on probation are allowed to continue to register on probation provided their term GPA is at least 2.00. Students will be returned to "good standing" when they achieve a cumulative GPA of 2.00. Students on probation who do not achieve a term GPA of 2.00 will be academically dismissed.

19.1.3 - Students require a cumulative GPA of 2.00 to graduate. Therefore, no one will be allowed to graduate while on probation.

19.2 Faculty of Engineering (Upper Division, Years 3 and 4)

19.2.1 - Students in the Bachelor of Engineering (Upper Division) with a cumulative GPA of less than 2.00 and greater than or equal to 1.70 who have completed at least two full credits will be placed on academic probation.

19.2.2 - Students on probation may continue to register on probation provided their term GPA is at least 2.00. Students will be returned to "good standing" when they achieve a cumulative GPA of 2.00. Students on probation who do not achieve a term GPA of 2.00 will be academically dismissed.

19.2.3 - Students require a cumulative GPA of 2.00 to graduate. Therefore, no one will be allowed to graduate while on probation.

20. Academic Dismissal

20.1 Academic Dismissal - Faculties of Agriculture, Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering (Lower Division, Years 1 and 2 and Bachelor of Applied Science), Health Professions, Management and Science

20.1.1 - Students with a cumulative GPA of less than 1.70 who have completed at least 24 credit hours will be academically dismissed for a 12 month period.

NOTES:

Faculty of Architecture and Planning students who have been academically dismissed may apply for readmission. Bachelor of Environmental Design Studies students applying for readmission to the School of Architecture are required to submit a portfolio and further evidence of academic abilities that will be evaluated with the current BEDS admissions. Readmission is not guaranteed. In evaluating applications for readmission to the Bachelor of Community Design program, the School of Planning will consider evidence regarding the preparedness of the student to succeed academically after resuming studies. Students who have been dismissed twice from either program will not be readmitted.

BSW students who fail SLWK 4033 or who fail a repeated course, will be dismissed.

BHSC student who fail a required course for a second time will be dismissed.

DDM students who fail the same course twice will be dismissed.

BEng and DipEng students who fail the same course more than once will be dismissed.

20.1.2 - Students on probation who do not achieve a term GPA of 2.00 or greater will be academically dismissed for a 12 month period.

20.1.3 - Students who have been academically dismissed will not be allowed to apply for re-admission for at least 12 months.

20.1.4 - Students who have been academically dismissed for the first time and have subsequently been re-admitted after an absence of a 12 month period may re-register on probation.

20.1.5 - Faculty of Arts and Social Science students who have been academically dismissed for the second time will not normally be allowed to apply for re-admission for at least three calendar years. Students may, however, petition the Student Affairs Committee for re-admission after two years provided they have met with the Assistant Dean.

20.1.6 - Faculty of Health Professions students who have been academically dismissed twice will not be allowed to apply for re-admission.

20.1.7 - Faculty of Engineering students who have been academically dismissed for a second time will not be readmitted to any engineering program at Dalhousie.

20.1.8 - Faculty of Computer Science students who have been dismissed and who have been required to withdraw from the university for one term or more may be readmitted to a program in the Faculty of Computer Science only once.

20.1.9 - Faculty of Science students who have been required to withdraw for a second time must meet with the Assistant Dean (Student Affairs) who may recommend that they reapply for re-admission after two calendar years or who may refer the matter to the Faculty Committee on Studies and Appeals.

20.1.10 - Faculty of Management Students who have been academically dismissed for the second time will not normally be allowed to apply for re-admission for at least three calendar years. Students may, however, petition the Program Director for re-admission after two years.

20.1.11 - Faculty of Agriculture students who have been academically dismissed for the second time will not normally be allowed to apply for re-admission for at least three calendar years. Students who have been dismissed for either the first or second time may appeal this decision (see section 24 of the academic calendar).

20.2 Faculty of Engineering (Upper Division, Years 3 and 4)

20.2.1 - Students with a cumulative GPA of less than 1.70 who have completed at least 12 credit hours will be academically dismissed for an eight month period.

20.2.2 - Students on probation who do not achieve a term GPA of 2.00 or greater will be academically dismissed for an eight month period.

20.2.3 - Students who have been academically dismissed will not be allowed to apply for readmission for at least eight months.

20.2.4 - Students who have been academically dismissed for the first time and have subsequently been re-admitted after an absence of an eight month period, may re-register on probation.

20.2.5 - Students who fail the same course more than once will be dismissed.

20.2.6 - Students who have been academically dismissed for a second time will not be readmitted to any engineering program at Dalhousie.

20.3 Faculty of Health Professions - Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability

See University Regulations, [page 30](#).

20.A Policy on Academic Forgiveness

The Academic Forgiveness policy allows a returning student to apply to the Registrar's Office for academic forgiveness of his/her prior cumulative grade point average. The policy is designed for undergraduate and technology students who have had a period of absence from their academic program and have

demonstrated acceptable academic performance following their return. The Academic Forgiveness policy is subject to the following regulations.

20.A.1 Regulations

1. Academic Forgiveness applies only to returning undergraduate and technology students who have had an absence of at least three calendar years from their program or faculty at Dalhousie University.

2. For undergraduate students, a minimum of 24 credit hours of coursework, or for Diploma in Technology students, a minimum of eight credit hours, with a grade point average of at least 2.0, must be completed after returning before a written request for Academic Forgiveness may be submitted to the Registrar's Office.

3. Academic Forgiveness will affect the student's cumulative grade point average in all courses taken prior to the minimum three year absence. Academic Forgiveness applies to all courses taken at all colleges/universities during the forgiveness period, not only selected courses or terms.

4. No punitive grades resulting from an Academic Discipline decision will be forgiven.

5. A student can have the Academic Forgiveness policy applied to his or her academic record only one time.

With the approval of the Registrar or designate, in consultation with the Dean, the student will be granted Academic Forgiveness. The student's transcript will remain a record of all coursework completed and original grades obtained. Courses taken prior to the three or more year absence will not be used in computing the student's cumulative grade point average, with the exception of punitive grades awarded as the result of an Academic Discipline decision. Students will be eligible to retain credit for courses in which they received a passing grade. However students will be required to complete at least half the credits required for their academic program following Academic Forgiveness before they will be eligible to graduate.

The transcript will have "Academic Forgiveness" noted on it at the end of the last term for which the student receives forgiveness.

21. Graduation Standing

Note that students entering the College of Pharmacy in September 1997 or later should consult the College of Pharmacy for information on graduation and scholarship standing.

21.1 Minimum Cumulative GPA

21.1.1 - A minimum cumulative GPA of 2.00 is required for the awarding of an undergraduate degree in the Faculties of Agriculture, Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management and Science.

A minimum cumulative GPA of 2.0 is required for the awarding of Diploma in Technology in the Faculty of Agriculture.

For details on the required standing for graduation in honours programs, see the Degree Requirements section of this calendar for the Faculties of Arts and Social Sciences, Science and the appropriate faculty/school section for honours programs in other faculties.

21.2 Graduation with Distinction

Faculties of Agriculture, Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Science and Management

A cumulative GPA of at least 3.70 is required to graduate with distinction. For the purpose of determining whether a student will graduate with distinction, all courses taken while registered in a level of study at Dalhousie, including courses taken on letter of permission, repeated courses, and courses for which non-passing grades were obtained, are included. At least half of the courses must be completed at Dalhousie. The notation "Distinction" will appear on the transcript.

Faculty of Health Professions

A cumulative GPA of at least 3.70 is required to graduate with Distinction from the Faculty of Health Professions programs. For the purpose of determining whether a student will graduate with distinction: credits that are transferred into a degree program from other Dalhousie programs are included in final GPA calculations, credits from programs outside Dalhousie taken prior to program

entry are not used in final GPA calculations. Credits taken on Letters of Permission while in the program are used towards Distinction calculations. At least half of the courses must be completed at Dalhousie. Students who have been on the Dean's List for three of the four years of the BSc Pharmacy program and have a cumulative GPA of at least 3.70 or higher will graduate with Distinction

Sexton Distinction List

Students in the Faculties of Architecture and Planning, Computer Science, and Engineering who have achieved a cumulative GPA of 3.85 upon graduation will be placed on the "Sexton Distinction List". The notation "Sexton Distinction" will appear on the transcript.

21.3 Scholarship Standing

Please see Awards Section, Scholarship GPA, [page 600](#), for information on the GPA required for scholarship purposes.

22. Graduation

In order to graduate students must submit an Intention to Graduate Form to the Registrar's Office by the deadlines indicated:

Graduation Month	Deadline
May	December 1
October	July 1

In cases where requests can be accommodated after the deadline, a \$50 fee will be charged.

23. Dean's List

23.1 Eligibility

Full-time students will be assessed for eligibility for the Dean's list at the end of each academic term. Students who take a minimum of nine credit hours in a term and achieve a term GPA of 3.70 will be placed on the Dean's list.

Part-time students will be considered once at the end of each academic year. For this purpose, a part-time student is one who takes at least nine credit hours during the academic year but less than nine credit hours in any one term in the academic year. The student must achieve a GPA of 3.70 in every term in the academic year.

NOTES:

1. The number of students placed on the Dean's list will normally not exceed 15% of the class.
2. Students registered for full year courses, i.e., courses that run from September through April will be considered for the Dean's list when full year course results are available.
3. The notation "Dean's List" will appear on the transcript.

23.2 Sexton Scholar List

Students in the Faculties of Architecture and Planning, Computer Science, and Engineering who have taken a full course load, as determined by the faculty and achieved a term GPA of 3.85 will be placed on the Sexton Scholar List.

24. Appeals

24.1 Appeals for Students with Learning Disabilities

Appeals by students with learning disabilities will follow the usual procedures of the relevant faculty at Dalhousie University. See Accommodation Policy, [page 21](#).

24.2 College of Arts and Science/Faculty of Management/Faculty of Agriculture

Any students who believe they will suffer undue hardship from the application of any of the academic regulations may appeal for relief to the academic appeals committee of the faculty or school in which they are registered. Students wishing to appeal a decision based on faculty/school regulations must complete an "Application for a Waiver of an Academic Regulation" form, available online at www.dal.ca/campus_life/student_services/academic-support/grades-and-student-records/appealing-a-grade.html or in the Registrar's Office. The arguments and expectations of the petitioner must be clearly stated.

An appeal from a student, arising from an academic dismissal from the faculty should be addressed to the Assistant Dean in the Faculty of Arts and Social Sciences, the Committee on Studies and Appeals in the Faculty of Science, Academic Director, Undergraduate Programs, in the Faculty of Management, or to the Assistant Dean, students in the Faculty of Agriculture, as appropriate.

24.3 Faculty of Architecture and Planning

Appeals should be directed to the School of Architecture office or the School of Planning office.

24.4 Faculty of Computer Science

Appeals should be directed to the Administrator, Dean's Office.

24.5 Faculty of Engineering

Appeals should be directed to the Academic Appeals Committee.

24.6 Faculty of Health Professions

School/College Committee on Undergraduate Student Appeals

Contact the School/College or Faculty of Health Professions office for the complete terms of reference for the Committee on Undergraduate Student Appeals and the application regarding academic appeals.

Faculty Committee on Undergraduate Student Appeals

The jurisdiction of the Faculty Committee on Undergraduate Student Appeals is to hear academic appeals beyond the school/college level when the approved appeal regulations and procedures of the respective school/college have been fully exhausted by the student. Decisions of the Faculty Committee may be appealed to the Senate Academic Appeals Committee.

The Committee has no jurisdiction to hear student appeals on a matter involving a requested exemption from the application of faculty or university regulations or procedures except when irregularities or unfairness in the application thereof is alleged. This means that only procedural issues and not the merits of the case, are subject to appeal.

25. Changes in Regulations

In general, any change to academic regulations which affects a currently registered student adversely will not apply to that student. Any student suffering undue hardship from application of any of the academic regulations may appeal for relief to the appropriate academic appeals committee as in Section 24.

I. Introduction

Dalhousie University College of Continuing Education was created in July 2003 in response to growing needs nationally to retool personal and organizational skill sets. The College represents a fusion of talents, expertise, heritage and experience of two long standing successful Continuing Education units at Dalhousie.

The programs and services of the College are offered through a number of locations across campus and across Canada, face-to-face and online.

The mandate of the College is to provide leadership and support for Dalhousie in its efforts to meet the learning needs of the communities it serves. Using the tools of program design and delivery, applied research, innovative teaching and technology, consulting, outreach and increased accessibility, the College partners with constituencies far beyond Dalhousie's traditional student population.

The College is committed to enhancing Dalhousie's contribution to regional and national economic, social and cultural development. It reinforces long-standing partnerships and builds new ones. It works closely with other faculties and units at Dalhousie. It connects with community groups, private sector and professional organizations, governments at all three levels, and a wide range of individuals and voluntary agencies.

Built upon this base, Dalhousie University College of Continuing Education programs are well-known and highly regarded outside the region; they serve regional, national, and international constituencies.

Programs and Services

The College offers a wide range of specific programs and services, special seminars, and specialized consultant resources. These are focused around a number of key development themes. The College continually evaluates and adapts its efforts in order to respond to the new learning needs of individuals, groups and organizations. What follows is a general description of College programs and themes.

College programs and services are focused in two distinct areas - Pathways and Professional Development.

II. Pathways

Our Pathways Division provides options for those who may require some additional preparation to ensure their success or those who may not be taking a traditional approach to university admission. Pathways programs are: Transition Year Program (TYP), University Preparation classes (UPrep) and English as a Second Language Programs (ESL). We also offer Mature Student Advising for older students returning to learning.

1. Transition Year Program

Address: 1400 LeMarchant Street
PO Box 15000
Halifax, NS B3H 4R2

Phone: (902) 494-3730
Fax: (902) 494-2135
Website: <http://collegeofcontinuinged.dal.ca/Transition Year Program>

TYP has served the post-secondary educational needs of the Mi'kmaq and Black Nova Scotian communities for over 40 years. It is a one-year program designed for African-Canadian and First Nations students who wish to enter university but who do not yet meet standard entrance requirements. TYP was established to redress historical and current educational disadvantages to members of the Mi'kmaq and Black Nova Scotian communities.

TYP prepares its students for full admission to regular Dalhousie BA degree programs at the beginning of their second year on campus. Some students may qualify for entry into other degree programs at Dalhousie. The program introduces students to the university in a variety of ways. Its curriculum, which includes a variable number of non-credit classes, can be adapted to individual needs and objectives. TYP core curriculum includes classes in Black and Native Studies, Strategies for University Learning, English and Mathematics. Students may also choose a regular first-year elective. Classroom instruction is complemented by an orientation session, special lectures, campus tours, workshops and field trips. The program's staff are drawn from the Dalhousie University community as well as the Nova Scotian Black and First Nations communities.

African-Canadian, non-status Aboriginal and Metis students accepted into the program may be eligible for university bursaries during their transition year. If they successfully complete TYP, they may become eligible for continued financial assistance as long as they remain in good academic standing and progress toward a first degree.

The admission criteria are somewhat flexible, and the Admissions Committee considers each case comprehensively on its own merits. The candidate's overall maturity, commitment, and focus are vitally important.

Deadline for receipt of complete applications for the following September: April 30th.

2. University Preparation Classes

Address: 1459 LeMarchant Street, Suite 2201
PO Box 15000
Halifax, NS B3H 4R2

Phone: (902) 494-2375
Fax: (902) 494-3662
Website: <http://collegeofcontinuinged.dal.ca>

Dalhousie offers a "bridging program" for high school and mature students who are not fully prepared to start university or for those needing assistance in a particular subject area while enrolled in university. The university prep classes offered through the College are designed to help students develop their academic skills in a specific subject, improve their marks, complete a prerequisite to enter a specific university program and build confidence before taking a university credit class.

University Preparation Classes Offered

The Writing Skills for Academic Study class prepares students for the writing demands in all university level classes and is accepted by Dalhousie in place of NS English 12. University Prep Chemistry is accepted in place of NS Chemistry 12 and may be used as the prerequisite for all Dalhousie first-year chemistry classes. Math 0010: Pre-Calculus and Math 0011: Pre-Calculus Plus are accepted in place of NS Math 12 Pre-Calculus and enable students to pursue university math and science classes. Math 0009.00: Academic Math is accepted in place of NS Math 12 for entrance to the Faculty of Arts, Bachelor of Commerce, Management and Nursing programs. PHYC 0010.00: University Prep Physics is

accepted by Dalhousie in place of NS Physics 12 and enables students to enter Physics 1100.06 and Physics 1300.06. University Prep Biology is also accepted by Dalhousie as an admission requirement to all undergraduate programs.

3. English as a Second Language Programs (ESL)

Address: 1459 LeMarchant Street, Suite 2201
PO Box 15000
Halifax, NS B3H 4R2
Phone: (902) 494-6060
Fax: (902) 494-3662
Website: <http://dal.ca/esl>

English for Academic Purposes (EAP)

Dalhousie's English for Academic Purposes (EAP) is designed for students planning to pursue a Bachelor's, Master's or PhD at Dalhousie but who do not meet English language requirements of the university. Dalhousie's intensive EAP courses prepare students for success at an English-speaking university by developing reading, listening, writing, speaking, and academic research skills. The EAP courses consist of 30 hours a week of classroom instruction, and include attendance at lectures, academically-relevant visits to museums and exhibits off and on-campus, and cultural events. Students do not have to be conditionally accepted into a Dalhousie academic program to take Dalhousie's EAP courses.

The Global Assessment Certificate Program™ (GAC)

The Global Assessment Certificate Program™ is an internationally recognized 9.5 month university preparation program that prepares students for success at an English-speaking university. It is designed for students who have applied and been accepted into a Dalhousie undergraduate program but do not meet the University's English language proficiency requirements. The GAC is more than simply an English course. Students prepare for university by studying a variety of subjects including Mathematics, Science, Computing, Business, and Social Science. Students also develop skills in university research, study strategies and time management. All GAC Students live on-campus in one of Dalhousie's residences, close to classes and other important university resources, such as the library, health care services, international student associations, and Dalhousie student services.

Direct Entry to Dalhousie after the EAP and the GAC

If students meet the academic requirements for admission and complete EAP Level 2, they are not required to provide additional proof of English proficiency, such as TOEFL or IELTS test.

ESL Course Placement

All students must be placed at an appropriate level before starting any program. Recent official results from a recognized English language placement test, such as IELTS or TOEFL, can be used for placement in classes. Dalhousie also offers a Placement Test, which applicants can take in lieu of other tests.

4. Programs and Services for Full and Part-Time Mature Students

Address: 1459 LeMarchant Street, Suite 2201
PO Box 15000
Halifax, NS B3H 4R2
Phone: (902) 494-2375
Fax: (902) 494-3662
Website: <http://collegeofcontinuingeducation.dal.ca>

Applicants who are Canadian Citizens or permanent residents and 21 years of age or older, by the first day of classes, and are not eligible for admission on the basis of regular admission requirements, may apply for admission as a mature applicant. In order to be eligible, the applicant must either have no university-level study, or have attempted less than one year of transferable classwork. The student cannot have been in full-time university-level study for a minimum period of two years.

Applicants must provide a completed application for admission, high school or post-secondary transcripts, any other relevant documents (e.g. SAT scores, if available), and a letter outlining life and work experiences since last attending full-time study. Applicants will be expected to clearly outline their education goals and motivation to succeed at university study. All factors will be considered in the admission decision.

Admission under this policy is restricted to first year of undergraduate programs. Applicants must have completed grade 12 English (or equivalent) with a

minimum grade of 65. Admission to some programs will require completion of other required subjects.

A student admitted on this basis may be restricted in the number of classes he/she can register in during the first year. Otherwise, these students have the same rights, privileges and responsibilities as other students within their program.

Services include pre-admission counselling and university preparation classes such as Writing Skills for Academic Study, Chemistry, Physics, Biology, Academic Math and Pre-Calculus.

III. Professional Development

In an era of decreasing resources and increasing demand, effective management development and training is crucial in every sector and organization. The College has long provided programs designed to meet the needs of the business, governmental and voluntary sectors.

For more than 30 years Dalhousie University has been a leading Canadian provider of professional development in Engineering, Management and Technology. Our programs are offered in Halifax and major centres across Canada in a variety of formats including seminars, short classes, and certificate programs. Programs are facilitated by instructors from both industry and academia, many of whom have international consulting and lecturing experience.

We offer unique certificate programs that enable participants to consolidate their knowledge and enhance their experience in specific technical areas. Programs are multiple classes assembled to deliver a comprehensive understanding of the critical topic issues.

Those who do not wish to complete a full certificate program are welcome to register for individual classes. Conversely, those who have taken component classes of a certificate program can submit their application for admission to complete the full certificate.

Certificates

- Certificate in Computer Science
- Certificate in Information Systems Management
- Certificate in Software: Management and Development
- Certificate in Information Design and Management for the Web
- Business Analysis Certificate
- Technical Writing Certificate
- Certificate in Quality Management
- Certificate in Project Management (Classroom Delivery)
- Certificate in Advanced ISO 9001:2008 Implementation and Management (AIIM):2008
- Certificate in Leadership Development
- Certificate in Negotiation and Conflict Resolution
- Certificate in Environmental Management
- Certificate in Occupational Health and Safety Management
- Certificate in Ergonomic Program Management
- Canadian Risk Management (CRM) Designation
- Home Inspection Certificate

The following are available by distance education:

- Certificate in Business Management
- Certificate in Financial Management
- Certificate in Human Resource Management
- Certificate in Local Government Administration
- Certificate in Local Government Financial Administration
- Certificate in Local Government Human Resource Administration
- Certificate in Local Government Law and Ethics
- National Advanced Certificate in Local Government Administration
- Certificate in Fire Service Leadership
- Certificate in Fire Service Administration
- Certificate in Incident Command
- Police Leadership Certificate
- Advanced Police Leadership Certificate
- Introduction to Employment Services
- Improving Non-Profit Governance
- Certificate in Project Management (Online option)
- Certificate in Process Instrumentation and Control (Online option)

The College also works with Dalhousie and external partners to offer specialized programs. Each of these programs incorporates distance education in their delivery.

The Certified Employee Benefit Specialist (CEBS) Program is offered in partnership with the International Foundation of Employee Benefit Plans in Brookfield, Wisconsin. This professional designation program is aimed at benefit managers, consultants, human resource administrators, investment specialists, professionals, insurance company representatives, trust officers and others interested in employee benefits.

The Credit Union Institute of Canada (CUIC) Management Studies and General Studies Programs are offered in cooperation with CUSOURCE and designed for credit union employees across Canada. The Credit Union Director Achievement (CUDA) Program is offered by CUSOURCE and jointly certified by Dalhousie University.

IV. Consultation

Based on the expertise of its resident and associated faculty, the College offers consulting in the areas of: Municipal Management, Fire and Police Management; Distance Education Design; Survey Research; Adult Education; Workshops, and Focus Groups; Community Development; and Needs Assessment.

I. Introduction

The Dalhousie College of Sustainability provides an interdisciplinary forum for collaborative teaching and learning to address global issues in sustainability. A core of cross-appointed Dalhousie teachers are joined by visiting fellows from within the university and from other institutions and advocacy groups to collaborate with students in energetic, problem-based courses and community-based experiential learning opportunities. Teaching is integrated with a broad range of existing Dalhousie degrees and programs, providing a rigorous disciplinary basis for responsive, issues-oriented study. The continual flow of individual students, teachers and community leaders through the College creates an ongoing exchange of ideas, expertise and passions. The College provides a common place at the centre of the Dalhousie community for the study of sustainability-based problems, and hosts an exciting range of public lectures, seminars and other activities.

The undergraduate programs are the first offerings of the College, and will soon be joined by interdisciplinary research, scholarship and graduate programs.

II. Degree Programs

The College offers unique transdisciplinary undergraduate programs in Environment, Sustainability and Society (ESS) in the Bachelor of Arts, Bachelor of Community Design, Bachelor of Management, Bachelor of Science, Bachelor of Computer Science, Bachelor of Journalism, and Bachelor of Informatics programs.

- Bachelor of Arts (BA): ESS can be subject A or B with any major/honours subject in the Faculty of Arts and Social Science or the Faculty of Science.
- Bachelor of Science (BSc): ESS can be subject A or B with any major/honours subject in the Faculty of Science. ESS can be subject B in the BSc double major or combined honours with Computer Science.
- Bachelor of Management (BMgmt): ESS can be done as a major.
- Bachelor of Community Design (BCD): ESS can be subject B of a double major or honours, double major.
- Bachelor of Computer Science (BCSc): ESS can be done as a minor.
- Bachelor of Journalism (BJH): ESS can be subject B of the BJH combined honours.
- Bachelor of Informatics (BInf): ESS can be done as a major.

Program Requirements

A. BA, BSc, Double Major/Combined Honours, Environment, Sustainability and Society

i. Environment, Sustainability and Society as Subject A

Subject A: Environment, Sustainability and Society

- SUST 1000.06 (one full credit in fall term)
- SUST 1001.06 (one full credit in winter term)
- SUST 2000.06 (one full credit in fall term)
- SUST 2001.06 (one full credit in winter term)
- SUST 3000.03
- SUST 3502.03
- SUST 4000X/Y.06

Double Major:

- three full credits (18 credit hours) ESS electives (at least two credits outside subject B)
- may be combined with minor(s)

Combined Honours:

- two full credits (12 credit hours) ESS electives (at least one credit outside subject B)
- SUST 4900X/Y.06
- Cumulative GPA in Honours subject courses of 3.3, with no individual grade less than C
- may be combined with minor(s)

Subject B: Any Major/Honours subject in the Faculties of Arts and Social Sciences or Science

For detailed requirements, please consult the Calendar and Academic Advisor for your allied subject.

ii. Environment, Sustainability and Society as Subject B

Subject A: Any Major/Honours subject in the Faculties of Arts and Social Sciences or Science or Computer Science

For detailed requirements, please consult the Calendar and Academic Advisor for your allied subject.

Subject B: Environment, Sustainability and Society

- SUST 1000.06 (one full credit in fall term)
- SUST 1001.06 (one full credit in winter term)
- SUST 2000.06 or SUST 2001.06
- one additional full credit (six credit hours) in SUST at the 2000 level or above
- three credits (18 credit hours) from the approved list of ESS elective (at least two credits outside subject A)
- at least two full credits (12 credit hours) must be at the 3000 level or above.

General Degree Requirements

For BA and BSc students SUST 1000.06 satisfies the writing requirement. For BA students either SUST 1000.06 or SUST 1001.06 satisfies the Life and Physical Sciences requirement. For BSc students either SUST 1000.06 or SUST 1001.06 satisfies the Social Science requirement. For general BA/BSc degree requirements, please go to [page 126](#), College of Arts and Science Degree Requirements.

B. BCD Double Major in Community Design and Sustainability

Subject A: Community Design

See School of Planning for specific requirements

Subject B: Environment, Sustainability and Society

- SUST 1000.06 (one full credit in fall term)
- SUST 1001.06 (one full credit in winter term)
- SUST 2000.06 (one full credit in fall term)
- SUST 2001.06 (one full credit in winter term)
- SUST 3000.03
- SUST 3502.03
- SUST 3002.03
- SUST 4000X/Y.06
- One credit (six credit hours) from the approved list of ESS electives, outside PLAN
- SUST 1000.06 satisfies the BCD English writing requirement
- SUST 1000.06 and SUST 1001.06 both satisfy the science requirement and social science requirement for BCD students

C. BCD Honours, Double Major in Community Design (Environmental Planning or Urban Design and Planning) and Sustainability

Qualified BCD students may apply for the Honours program in year 3. See School of Planning for details.

Subject A: Environmental Planning or Urban Design and Planning

See School of Planning for specific requirements

Subject B: Environment, Sustainability and Society

- SUST 1000.06 (one full credit in fall term)
- SUST 1001.06 (one full credit in winter term)
- SUST 2000.06 (one full credit in fall term)
- SUST 2001.06 (one full credit in winter term)
- SUST 3000.03
- SUST 3502.03
- SUST 1000.06 satisfies the BCD English writing requirement
- SUST 1000.06 and SUST 1001.06 both satisfy the science requirement and social science requirement for BCD students

D. BMgmt Major in Environment, Sustainability and Society

See Faculty of Management, Bachelor of Management Degree program for general requirements

- SUST 1000.06 (or SUST 1001.06) *
- SUST 2000.06 or SUST 2001.06
- Three credits (18 credit hours) from the approved list of ESS electives (at least two credits outside MGMT and at least two credits at the 3000 level or above)

* SUST 1000 or SUST 1001 satisfy the first year ESS Major requirement, however, SUST 1000 also satisfies the BMgmt writing requirement and can be more easily accommodated in the first year BMgmt schedule. SUST 1001 does not satisfy the BMgmt Writing Requirement.

E. BCSc Minor in Environment, Sustainability and Society

- SUST 1000.06
- SUST 1001.06
- SUST 2000.06 or 2001.06
- two full credits (12 credit hours) from approved list of ESS electives at the 3000 level or above
- one full credit (six credit hours) from approved list of ESS electives at the 2000 level or above

F. BJH Combined Honours in Journalism and Environment, Sustainability and Society

See University of Kings College, Bachelor of Journalism program for general requirements.

- SUST 1000.06
- SUST 1001.06
- SUST 2000.06 or SUST 2001.06
- two credits (12 credit hours) from approved list of ESS electives at the 3000 level or above

- one credit (six credit hours) from approved list of ESS electives at the 2000 level or above

G. BInf Major in Environment, Sustainability and Society

See Faculty of Computer Science, Bachelor of Informatics program for general requirements.

- SUST 1000.06
- SUST 1001.06
- SUST 2000.06 or SUST 2001.06
- two credits (12 credit hours) from approved list of ESS electives at the 3000 level or above
- one credit (six credit hours) from approved list of ESS electives at the 2000 level or above

III. Minor in Environment, Sustainability and Society

- a minimum of three full credits (18 credit hours) and a maximum of four and one half credits at the 2000 level or above in SUST courses
- prerequisites: SUST 1000.06 and SUST 1001.06

IV. RBC Sustainability Leadership Certificate

The RBC Sustainability Leadership Certificate offers a powerful, creative, hands-on program consisting of three weekend modules, two personal action projects and a series of written reflections. The program is designed to cultivate students' skills and confidence to lead social and environmental change.

All students at Dalhousie University are eligible to apply for the program. Prerequisites are one of: SUST 1000, SUST 1001, AGRI 1000 or evidence of experience or course work in fields related to environmental and social sustainability. Applications may be made online at the College of Sustainability website in September and the program begins each year in October. For more information and to apply for the program please go to:

<http://www.dal.ca/faculty/sustainability/programs/slc.html>

V. Course Descriptions

SUST 1000.06: Introduction to Environment, Sustainability and Society 1.

An interdisciplinary issues-based approach to environment, sustainability and society drawing on themes from across the faculties, this course introduces students to the conceptual frameworks underlying our understanding of the environment and sustainability. Topics include energy, water, climate change, human population, economics, policy, food, urbanization and equity.

NOTE: One full credit in fall term.

FORMAT: ✍ Writing requirement. Team taught lecture/tutorial

SUST 1001.06: Introduction to Environment, Sustainability and Society 2.

Drawing on themes from across the disciplines, diverse conceptual frameworks and analytical methods underlying our understanding of the environment and sustainability are explored. Topics include energy, water, climate change, human population, economics, policy, food, urbanization and equity.

NOTE: One full credit in winter term.

FORMAT: Team taught lecture/tutorial

SUST 2000.06: Humanity in the Natural World: An Introduction to Problem Based Learning.

This course introduces students to problem-based learning. Students examine the development of environmental thought, ideas of sustainability, and conflicting positions on humanity's place in the natural world. Issues are explored utilizing multiple perspectives drawn from the University. Students undertake group and individual research and develop critical analytical and quantitative skills.

NOTE: One full credit in fall term.

FORMAT: Team taught lecture/tutorial

PREREQUISITE: SUST 1000.06 and SUST 1001.06 or permission of instructors.

SUST 2001.06: Environment, Sustainability and Governance: a Global Perspective.

An examination of the interface between human development and the environment at the global level using a problem based approach. Various

perspectives are used to explore the link between environmental issues, poverty, consumption, population, economic globalization, urbanization and international organizations. The course includes group project work.

NOTE: One full credit in winter term.

FORMAT: Team taught lecture/tutorial

PREREQUISITE: SUST 1000.06 and SUST 1001.06 or permission of instructors

SUST 3000.03: Global Approaches to Environmental Decision-Making.

Examination of the historic and current context for environmental decision-making in terms of public policy, global and domestic economy, political and business agenda-setting, science, technology and ethics. Alternative solutions that support the goal of long-term ecological integrity are examined. Students are encouraged to critically reflect on their 2nd year experience.

FORMAT: Lecture/tutorial/individual research paper

PREREQUISITE: SUST 2000.06 or SUST 2001.06

SUST 3002.03: Environment, Sustainability and Society Internship.

Students gain hands-on experience while addressing a question of personal and academic interest relevant to the field of environment and sustainability. Students work as unpaid interns for 8 hours a week over one semester on an approved project with a sponsoring agency.

NOTE: Instructor approval required for registration. Visit: ess.dal.ca and click on "Community Engagement."

FORMAT: Internship

PREREQUISITE: SUST 2000.06 or SUST 2001.06. Cumulative GPA 3.0 or better. Must be in ESS program.

SUST 3502.03: The Campus as a Living Laboratory.

In this course students apply the skills and tools of interdisciplinary research and problem solving to current real-life problems on Dalhousie University's campus. Students use qualitative and quantitative research methods to evaluate and assess indicators of progress toward greater campus sustainability and make recommendations based on their analysis.

FORMAT: Lecture/tutorial/group research project

PREREQUISITE: SUST 2000.06 or SUST 2001.06

CROSS-LISTING: ENVS 3502.03

EXCLUSION: MGMT 3701.03

SUST 3950.03: Topics in Environment Sustainability and Society.

This course addresses current interdisciplinary issues in sustainability with topics varying each semester. The course is taught by Dalhousie faculty, and/or visiting scholars.

PREREQUISITE: This class is restricted to students in the Environment, Sustainability and Society (ESS) program, or with permission from the Academic Advisor in the College of sustainability.

RESTRICTION: Must have third year status or above

SUST 4000X/Y.06: Environment, Sustainability and Society Capstone.

Students work in multidisciplinary groups, with community partner organizations to identify real problems and develop meaningful strategies to address them.

Groups work with advisors and experts to create detailed plans of action based on strong research and analysis, working in a studio environment.

FORMAT: Seminar/studio/group research project

PREREQUISITE: SUST 3502.03 or MGMT 3701.03 or permission of instructor

SUST 4800.03: Environment Sustainability and Society Independent Study.

This Independent study course allows fourth-year students to study a topic in Environment, Sustainability and Society not covered in other courses, or in more depth. Student must first consult with a faculty member to arrange the topic of study. An outline of the Independent Study must be approved by the Associate Director Undergraduate of the College of Sustainability.

PREREQUISITE: This class is restricted to fourth-year students in the Environment, Sustainability and Society (ESS) program, or with permission from the Associate Director Undergraduate of the College of Sustainability.

RESTRICTION: Must have completed 90 credit hours, permission required

SUST 4900X/Y.06: Honours Thesis Project.

Independent research project carried out under the supervision of an approved faculty member or affiliated professional.

FORMAT: Thesis

PREREQUISITE: SUST 3000.03 and SUST 3502.03 and permission of instructor

SUST 4950.03: Advanced Topics in Environment Sustainability and Society.

This course addresses current interdisciplinary issues in sustainability with topics varying each semester. The course is taught by Dalhousie faculty, and/or visiting scholars.

PREREQUISITE: This class is restricted to students in the Environment, Sustainability and Society (ESS) program, or with permission from the Academic Advisor in the College of Sustainability.

RESTRICTION: Must have third year status or above

VI. List of Approved ESS Electives

Note: It is the student's responsibility to check the course calendar for pre-requisites to these courses.

College of Sustainability

SUST 2000.06: Humanity in the Natural World: An Introduction to Problem Based Learning.

SUST 2001.06: Environment, Sustainability and Governance: a Global Perspective.

SUST 3000.03: Global Approaches to Environmental Decision-Making.

SUST 3002.03: Environment, Sustainability and Society Internship.

SUST 3502.03: The Campus as a Living Laboratory.

SUST 3950.03: Topics in Environment Sustainability and Society

SUST 4000X/Y.06: Environment, Sustainability and Society Capstone

SUST 4950.03: Advanced Topics in Environment Sustainability and Society

I. Introduction

The Faculty of Agriculture was established in 1905 as the Nova Scotia Agricultural College and merged with Dalhousie University in 2012.

Students in the Faculty of Agriculture study a range of undergraduate degree programs including animal science, agricultural business, agricultural economics, aquaculture, environmental landscape horticulture, environmental science, integrated environmental management, international food business, plant science and pre-veterinary medicine.

The Faculty offers diploma and technical programs in business management, engineering, managed landscapes, plant science and veterinary technology, as well as a variety of certificate programs.

Dalhousie's beautiful Agricultural Campus, located just outside Truro in Bible Hill, Nova Scotia, is home to the Faculty of Agriculture's more than 950 students. The campus is well equipped with a range of student services, residences, food and athletic facilities, clubs and societies; all of which lend to a rich and personable student experience. Hands-on learning in the classroom, the lab and the field, give students practical experience and prepare them well for careers on a local, national and global scale.

Sanderson, L. L., BSc (Agr), MSc (Guelph)
Stiles, D., AB (Marshall), MA, PhD (Maine)
Yiridoe, E. K., BSc (Univ of Science & Technology, Ghana), MSc, PhD (Guelph)
Zaman, Q. U., BSc (Agr Eng), MSc (Agr Eng) (A. Faisalabad) PhD (Newcastle-upon-Tyne)

Assistant Professors

Barrett, D. M. W., BSc (MUN), PhD (Saskatchewan)
Dukeshire, S. R., BComm, BA Hon (Saint Mary's), MAsC, PhD (Waterloo)
Dunlop, D. M., BSc (Agr) (NSAC), MSc (Alberta)
Hammermeister, A. M., BSc (Agr) (Saskatchewan), MSc, PhD (Alberta)
Hartt, C. M., BA (Dalhousie), MBA, PhD (Saint Mary's)
He, Q., BSc, MSc (East China Un of Science & Technology), PhD (Western)
Kevany, K. M., BA (Carleton), MEd, EdD (Toronto)
Lu, J., BA (China Renmin U), MA (Beijing Normal U), PhD (McGill)
MacKenzie, T. S., Dip LH (NSAC), BSc, MES (Dalhousie)
Martynenko, A. I., BSc (Kiev), MSc (Moscow), PhD (Guelph)
McLean, N. L., BSc (Agr), MSc (McGill), PhD (Dalhousie)
Myles, S. A., BA (St. Thomas), MSc (Oxford), PhD (Max Planck)
Nguyen Quang, T., BSc (Nat. Polytechnic Inst. of Grenoble), MSc (Joseph Fourier), PhD (Montreal, Mediterranean)
Niu, H., BEng (Xi'an Architecture & Tech), MEng, PhD (Memorial)
Parsons, L. D., BSc (Agr) (NSAC), DVM (UPEI)
Price, G. W., BSc (British Columbia), MSc, PhD (Guelph)
Smith, J. M., BPEd (Dalhousie)
Stewart-Clark, S., BSc, MSc, PhD (UPEI)
Udenigwe, C. C., BSc Hons (Nigeria), MSc, PhD (Manitoba)

Adjunct, Research, Honorary Research Professors and Honorary Research Associates

Al-Mughrabi, K. I., BSc, MSc (Jordan), PhD (Dalhousie) - Adjunct
 Annan, N. T., BSc (Ghana), MSc (Dalhousie), PhD (Ghana, Copenhagen) - Adjunct
 Belanger, G., BScA (Laval), MSc (Guelph), PhD (Paris-Sud) - Adjunct
 Benchaar, C., DEA (Toulouse), MSc (Algeria), PhD (Toulouse) - Adjunct
 Bernier, R. L., BSc, MSc, PhD (Montreal) - Adjunct
 Boiteau, G., BSc, MSc (Laval), PhD (North Carolina) - Adjunct
 Boyle, D., BSc (Queen's), MSc (Dalhousie), PhD (Laval) - Adjunct
 Castell, J. D., BSc, MSc (Dalhousie), PhD (Oregon) - Adjunct
 Christie, B. R., BSA (Guelph), MSA (Toronto), PhD (Iowa) - Adjunct
 Coleman, W. K., BA, PhD (Western Ontario) - Honorary Research Associate
 Daniels, R. W., BSc (Agr) (McGill), MS (Michigan State), PhD (Penn State) - Adjunct
 De Jong, H., BA (Bethel College), MSc (Kansas), PhD (Wisconsin) - Adjunct
 DeKoeyer, D. L., BSc (Agr) (Guelph), MS, PhD (Minnesota) - Adjunct
 Drizo, A., BSc (Belgrade), MSc, PhD (Edinburgh) - Adjunct
 Duynsvelt, J. L., BSc (Agr), MSc (NSAC) - Adjunct
 El-Mowafi, A., BVM, MSc, PhD (Zagazig) - Adjunct
 Embree, C., BSc (Guelph), MSc (British Columbia) - Adjunct
 Falk, K. C., BSc, MSc (Agr) (Guelph), PhD (Saskatchewan) - Adjunct
 Garbary, D. J., PhD (Liverpool) - Adjunct
 Gaul, S. O., BSc (MSVU), MSc (Dalhousie), PhD (Guelph) - Adjunct
 Hardman, J. M., BSc (Dalhousie), MSc (London, UK), PhD (Simon Fraser) - Adjunct
 Hillier, N. K., BSc, PhD (MUN) - Adjunct
 Ju, H. Y., BSc (Agronomy) (Seoul), MSc, PhD (McGill) - Adjunct
 Kemp, R., BSc, PhD (Guelph) - Adjunct
 Lall, S., BSc (Allahabad), MSc, PhD (Guelph) - Adjunct
 MacLeod, J., BSc (Agr) (Macdonald), MSc (McGill), PhD (Cornell) - Adjunct
 MacRae, K. B., BEd (British Columbia), MSc, PhD (Oregon) - Adjunct
 Mikitzel, L. J., BSc (Agr), MSc (Guelph), PhD (Alberta) - Adjunct
 Miller, M., BSc (Agr), MSc (NSAC), PhD (Guelph) - Adjunct
 Murphy, A., BSc (MUN), MSc (Guelph) - Honorary Research Associate
 Murray, G. B., BSc (Agr) (NSAC), MSc (McGill), MBA (Executive) (Saint Mary's), PhD (Dalhousie) - Adjunct
 Norrie, J. P., BSc (Mount Allison), MSc (Dalhousie), PhD (Laval) - Adjunct
 Papadopoulos, Y., BSc (Agr), MSc, PhD (Guelph), MBA (Saint Mary's) - Adjunct
 Peters, R. D., BSc (Guelph), BEd (Western), MSc, PhD (Guelph) - Adjunct
 Pink, D., BSc (St. FX), PhD (British Columbia) - Adjunct
 Platt, H. W., BSc (Manitoba), PhD (Saskatchewan) - Adjunct
 Rathgeber, B., BSc (Agr) (Saskatchewan), MSc (Arkansas), PhD (Saskatchewan) - Adjunct
 Rise, M. L., BSc (Whitworth), MSc (Boston), PhD (Victoria) - Adjunct
 Robinson, A. R., BSc (Agr), MSc, PhD (McGill) - Adjunct
 Robinson, M. C., BSc (Acadia), MSc, PhD (Simon Fraser) - Adjunct
 Rodd, V., BSc (UPEI), MSc (Manitoba) - Affiliated Researcher
 Ross, N. W., BSc, PhD (McGill) - Adjunct
 Schumann, A. W., BSc, MSc (Natal), PhD (Georgia) - Adjunct
 Shahidi, F., PhD (McGill) - Adjunct
 Silversides, F. G., BSA (Saskatchewan), MS (Massachusetts), PhD (Saskatchewan) - Adjunct
 Small, J. A., BSc (Agr) (Guelph), MSc (Manitoba), PhD (British Columbia) - Adjunct
 Stratton, G. W., BSc (Agr), MSc, PhD (Guelph) - Adjunct
 Sturz, A. V., BSc (Newcastle-upon-Tyne), PhD (Manchester) - Adjunct
 Tai, G. C. C., BSc, MSc (Taiwan), PhD (Saskatchewan) - Adjunct
 Thomas, W. G., BSc (British Columbia), MSc (Dalhousie) - Adjunct
 Wang, Y., BSc, MSc (Gansu), PhD (Alberta) - Adjunct
 Warman, P. R., BSc (Agr) (Rutgers), MSc, PhD (Guelph) - Adjunct
 Wright, J. M., BSc (Mount Allison), PhD (Memorial) - Honorary Research Associate

Dalhousie University and CAH Viltum University in the Netherlands have partnered to offer a new, four-year, dual-degree program. Graduates will be awarded a Bachelor of Agriculture in International Food Business from Dalhousie University and a Bachelor of Administration in International Food Business (Honours) from CAH Viltum.

This exciting new dual degree program offers a year of international study and two work terms: one in North America and one in Europe. In year one, North American students will study at Dalhousie University, and European students will study at CAH. Year two is offered in The Netherlands when both groups of students will study together. This continues in year three when both groups of students study on Dalhousie's Agricultural Campus in Truro, NS. Students complete year four at their home university.

This four-year degree emphasizes its international focus by beginning with a one-week orientation in Iceland, where European and North American students get to know one another while exploring the Icelandic food industry. This unique program will appeal to students who enjoy studying independently, have an interest in business and are keen to explore the world.

Program Design and Delivery

The Bachelor of Agriculture in International Food Business is a modularized, competency-based program of study. The academic courses are integrated into a series of 10 modules throughout the first three years of the program. The module titles are listed below

Year 1 Theme: International Business Essentials	
Semester 1	Semester 2
Module 1. Acquiring Knowledge of International Food Systems	Module 3. Analyzing Food Value Chains
Module 2. Analyzing Business Processes	Module 4. Developing External Communication Strategies

Year 2 Theme: Innovation and Marketing	
Semester 1	Semester 2
Module 5. Innovating and Entrepreneurship in Food Business	Module 7. Performing Market Research
Module 6. Marketing Management	European Placement

Year 3 Theme: Leadership, Finances and Business Planning	
Semester 1	Semester 2
Module 8. Performing as a Leader and Manager	Module 10. Developing Business Plans
Module 9. Analyzing and Realizing Financial and Managerial Information and Forecasts	North American Placement

Students who complete all modules plus year 4 will receive credit in the following courses to meet the core requirements of the program:

ECO1002: Introduction to Economic Reasoning
 EGLA 1003: Business Writing
 FOOD 1000: Food Safety and Quality Assurance
 INFB 1000: International Food Policy and Environment
 INFB 1001: International Food Business Project I

III. Degree Requirements

A. Bachelor of Agriculture - International Food Business *

* a dual degree awarded with a Bachelor of Administration (Honours) from CAH Viltum University in The Netherlands

INFB 1002: International Food Business Project II
 INFB 1003: Introductory Second Language
 MGTA 1001: Introduction to International Business
 MGTA 1002: Food Supply Chain Management
 MGTA 1003: International Business Communications
 MGTA 2002: Marketing
 MGTA 2003: Financial Management
 MGTA 2004: Financial Accounting
 MGTA 2006: Advertising and Promotion
 MGTA 2010: Innovation Management
 MGTA 2011: International Marketing Research
 MGTA 2012: Fundamentals of Management
 MGTA 2013: Business Planning
 MGTA 3000: Management Accounting
 MGTA 3003: European Placement I
 MGTA 3004: European Placement II
 MGTA 3005: New Product Development
 MGTA 3006: Retail Management
 MGTA 3007: Quality Management
 MGTA 3008: Intermediate Marketing Research
 MGTA 4001: Advanced Entrepreneurship
 MGTA 4002: North American Placement I
 MGTA 4003: North American Placement II
 MTHA 1002: Business Math
 RESM 4004: Research Methods for Economics and Business
 RESM 4005: Project-Seminar for Economics and Business

nine electives (including two, four course specializations)

Year 1 Semester I

ECO A 1002: Introduction to Economic Reasoning
 EGLA 1003: Business Writing
 INFB 1000: International Food Policy and Environment
 INFB 1001: International Food Business Project I
 MGTA 1001: Introduction to International Business

Semester II

INFB 1002: International Food Business Project II
 FOOD 1000: Food Safety and Quality Assurance
 MGTA 1002: Food Supply Chain Management
 MGTA 1003: International Business Communications
 MGTA 2006: Advertising and Promotion

Year 2 Semester III

MGTA 2002: Marketing
 MGTA 2010: Innovation Management
 MGTA 3005: New Product Development
 MGTA 3006: Retail Management
 MTHA 1002: Business Math

Semester IV

INFB 1003: Introductory Second Language
 MGTA 2011: International Marketing Research
 MGTA 3008: Intermediate Marketing Research

Semester V

MGTA 3003: European Placement I
 MGTA 3004: European Placement II

Year 3 Semester VI

MGTA 2003: Financial Management
 MGTA 2004: Financial Accounting
 MGTA 2012: Fundamentals of Management
 MGTA 2013: Business Planning
 MGTA 3000: Management Accounting

Semester VII

MGTA 3007: Quality Management
 MGTA 4001: Advanced Entrepreneurship
 Elective

Semester VIII

MGTA 4002: North American Placement I
 MGTA 4003: North American Placement II

Year 4 Semester IX

RESM 4004: Research Methods for Economics and Business
 Elective (First Specialization)
 Elective (First Specialization)
 Elective (Second Specialization)
 Elective (Second Specialization)

Semester X

RESM 4005: Project-Seminar for Economics and Business
 Elective (First Specialization)
 Elective (First Specialization)
 Elective (Second Specialization)
 Elective (Second Specialization)

In year four, students must take two, four course specializations. The following is a list of Specializations students can choose in consultation with the International Food Business Coordinator:

- Agronomy Studies
- Animal Studies Development Studies
- Environmental Studies
- Economic Studies
- Horticultural Studies
- Management Studies
- Organic Agricultural Studies
- Quantitative Methods Studies
- other

B. Bachelor of Science (Agriculture)

Dalhousie offers a four-year program leading to a degree in Agricultural Science. Students in the Agricultural Sciences who successfully complete the prescribed courses with a cumulative GPA at or above the minimum required (2.0), and who are in good standing, will be granted the degree of Bachelor of Science in Agriculture, BSc (Agr). Graduates of this program meet the formal educational requirements for Professional Agrologists in the provincial Institutes of Agrologists of the Atlantic Provinces.

Normally, students select a major during their first year and continue in that field of study until they graduate.

- 120 Credit Hours
- 36 credit hours of required courses as outlined below
- six credit hours of approved Languages and Humanities/Social Sciences electives from the list, of which three credit hours must be at the 3000 level or above.
- 18 credit hours at the 3000 level or above
- 36 credit hours of approved agricultural courses from the list below
- Specific Major Requirements as follows

Major Subjects

Agricultural Business, Agricultural Economics, Animal Science, Aquaculture, Environmental Sciences, Integrated Environmental Management, Plant Science. See specific degree requirements listed below.

Double Major

Students wishing to complete a double major must satisfy all of the degree requirements for the BSc (Agr) and the program specific requirements of each major with the exception of the research methods courses. One set of research methods courses should be completed and the research project should cover both majors. Students must complete a minimum of 24 credit hours in the second major that are not included in the first major. A degree with a second major may take longer to complete than a single degree major due to scheduling challenges.

Required Courses for All Majors

1000 Level

AGRI 1000: Agricultural Ecosystems
 BIOA 1002: Biology I
 BIOA 1003: Biology II
 CHMA 1000: General Chemistry I
 CHMA 1001: General Chemistry II
 ECOA 1000: Principles of Microeconomics
 MTHA 1000: Introductory Calculus I
 MTHA 1001: Introductory Calculus II

One of:

EGLA 1000: Composition

EGLA 1001: The Novel or

EGLA 1002: Nature in English & American Literature

2000 Level

STAA 2000: Introduction to Statistics

4000 Level

RESM 4XXX: Project Seminar I

RESM 4XXX: Project Seminar II

Approved Agricultural Courses

- AGRI 1000, 1001, 2000, 3001, 4000
- AGRN 2000, 2001, 2002, 2008, 4000
- ANSC 2001, 2002, 2004, 2005, 2007, 3000, 3001, 3002, 3003, 3004, 3005, 4000, 4003, 4004, 4005, 4006, 4007
- APSC 2000, 2004, 2012, 2013, 3001, 3013, 4001, 4006
- BIOA 2005, 3000, 3002, 3004, 3005, 3008, 4000
- CHMA 2003, 2004, 3002, 3007, 3008
- ECOA 1000, 2002, 2003, 2004, 3002, 3003, 3004, 4001, 4002, 4004
- ENVA 2000, 2001, 2002, 3002, 3004, 3021, 4000, 4002, 4003, 4005, 4006, 4008
- FOOD 3000, 3001, 4000
- GENE 4000
- HORT 2000, 2001, 2004, 2006, 2007, 2009, 2010, 4001, 4002
- IAGR 2003, 3000, 3001, 4000
- MGTA 2003, 4001
- MCRA 3000, 4000
- NUTR 3000, 3001, 3002
- PLSC 1000, 2000, 2001, 3000, 4000, 4002, 4003, 4004
- RESM 4001, 4002, 4003, 4004, 4005, 4006, 4007, 4008, 4009, 4010, 4011
- SOIL 2000, 3000, 3001, 4001
- SPEC 2000, 2001, 4001, 4002, 4003, 4004, 4005, 4006, 4007, 4008, 4010, 4011, 4012, 4014

Approved Languages and Humanities/Social Sciences Electives

Courses in the following subject areas, and the additional specific courses listed below, meet the Languages and Humanities/Social Sciences elective requirements:

- Languages and Humanities: EGLA (English), ARTS (Art), HISA (History), FRNA (French), SPNA (Spanish), PHLA (Philosophy)
- Social Sciences: ECOA (Economics)*, EXTE (Extension Education), CMMT (Communications), GEOA (Geography), HISA (History), PSYC (Psychology), POLS (Political Science), RURS (Rural Studies), SOCI (Sociology)
- AGRI 3001: Issues in Agricultural Health and Safety
- HORT 3008: Horticultural Therapy
- IAGR 2002: International Rural Development
- IAGR 2003: Food Security and Rural Development in Cuba
- SPEC 4009: Special Topics in Rural Studies

*Students taking majors or minor in Agricultural Business or Agricultural Economics cannot use ECOA courses for completion of their Languages and Humanities/Social Sciences Electives.

1. BSc (Agr) - Agricultural Business

Required Courses & Suggested Schedule

Year II: Semester III

ECOA 2000: Intermediate Microeconomics

ECOA 3000: Mathematical Economics

MGTA 2002: Marketing

MGTA 2004: Financial Accounting

three credit hours of electives

Year II: Semester IV

ECOA 1001: Principles of Macroeconomics

MGTA 3001: International Marketing or

MGTA 3002: Consumer Behaviour

STAA 2000: Introduction to Statistics

six credit hours of electives

Year III: Semester V

ECOA 3006: Statistics for Economics & Business

MGTA 2003: Financial Management

MGTA 3000: Management Accounting

six credit hours of electives

Year III: Semester VI

ECOA 3002: Agricultural & Food Policy

ECOA 3003: Mathematical Programming

MGTA 4001 Advanced Entrepreneurship

six credit hours of electives

Year IV: Semester VII

MGTA 4000 Strategic Management

RESM 4004: Research Methods for Economics & Business

nine credit hours of electives

Year IV: Semester VIII

RESM 4005: Project-Seminar for Economics & Business

12 credit hours of electives

Electives must include:

- six credit hours of Languages and Humanities/Social Science courses which cannot be from the ECOA destination and three credit hours of these must be at the 3000 level or above.
- 12 credit hours of approved Agricultural Courses.

2. BSc (Agr) - Agricultural Economics

Required Courses & Suggested Schedule

Year II: Semester III

ECOA 2000: Intermediate Microeconomics

ECOA 2003: Agricultural Future and Options

ECOA 3000: Mathematical Economics

MGTA 2002: Marketing

MGTA 2004: Financial Accounting

Year II: Semester IV

ECOA 1001: Principles of Macroeconomics

ECOA 2004: Issues in Environmental Economics

STAA 2000: Introduction to Statistics

six credit hours of electives

Year III: Semester V

ECOA 2001: Intermediate Macroeconomics

ECOA 3006: Statistics for Economics and Business

ECOA 4004: Trade

MGTA 2003: Financial Management

three credit hours of electives

Year III: Semester VI

ECOA 3002: Agricultural & Food Policy

ECOA 3003: Mathematical Programming

ECOA 3004: Agricultural Markets & Prices

six credit hours of electives

Year IV: Semester VII

RESM 4004: Research Methods for Economics & Business

12 credit hours of electives

Year IV: Semester VIII

RESM 4005: Project-Seminar for Economics & Business

12 credit hours of electives

Electives must include:

- six credit hours of Languages and Humanities/Social Science courses which cannot be from the ECOA destination and three credit hours must be at the 3000 level or above.
- three credit hours of approved Agricultural Courses.

3. BSc (Agr) - Animal Science

Required Courses & Suggested Schedule

Year II: Semester III

ANSC 2005: Animal Agriculture
CHMA 2000: Organic Chemistry I
GENE 2000: Genetics
PHYS* or
STAA 2000*: Introduction to Statistics
three credit hours of electives

Year II: Semester IV

BIOA 2006: Mammalian Physiology
CHMA: 3001: Biochemistry
PHYS* or
STAA 2000*: Introduction to Statistics
six credit hours of electives

Year III: Semester V

BIOA 3008: Growth, Reproduction and Lactation
NUTR 3000: Animal Nutrition
nine credit hours of electives

Year III: Semester VI

ANSC 3000: Animal Breeding
NUTR 3001: Applied Animal Nutrition
nine credit hours of electives

Year IV: Semester VII

RESM 4002: Animal Science Project-Seminar I
12 credit hours of electives

Year IV: Semester VIII

RESM 4003: Animal Science Project-Seminar II
12 credit hours of electives

Electives must include:

- six credit hours of Languages and Humanities/Social Science courses of which three credit hours must be at the 3000 level or above.
- nine credit hours of approved Agricultural Courses.
- 12 credit hours of approved Animal Science electives at the 3000 or 4000 level from the following list:
 - ANSC, 3001, 3002, 3003, 3004, 3005, 3006, 4000, 4003, 4004, 4005, 4006, 4007, 4008, 4009
 - AQUA 3000, 4000, 4001
 - BIOA 3004, 3005, 3006, 4000, 4001, 4003, 4004
 - GENE 3001, 4000
 - NUTR 3002, 4000
 - SPEC 4000

4. BSc (Agr) - Aquaculture

Required Courses & Suggested Schedule

Year II: Semester III

AQUA 2000: Introduction to Aquaculture
CHMA 2000: Organic Chemistry I
GENE 2000: Genetics
PHYS*: Physics or
STAA 2000: Introduction to Statistics
three credit hours of electives

Year II: Semester IV

CHMA 3001: Biochemistry
APSC 2004: Aquacultural Environment
MCRA 2000: Microbiology
PHYS*: Physics
STAA 2000*: Introduction to Statistics
three credit hours of electives

Year III: Semester V

BIOA 3005: Physiology of Aquatic Animals
BIOA 3006: Aquatic Ecology
NUTR 3000: Animal Nutrition** or elective (three credit hours)
six credit hours of electives

Year III: Semester VI

ANSC 3000: Animal Breeding
AQUA 3000: Fish Health
APSC 3013: Aquacultural Systems Technology
NUTR 3002: Fish Nutrition ** or elective (three credit hours)
three credit hours of electives

Year IV: Semester VII

AQUA 4000: Finfish Production***
RESM 4010: Aquaculture Project-Seminar I
nine credit hours of electives

Year IV: Semester VIII

AQUA 4001: Shellfish Production***
RESM 4011: Aquaculture Project-Seminar II
nine credit hours of electives

* Physics - Students must complete the combination of PHYS 1000 or PHYS 1002 and STAA 2000 in year II. If PHYS 1000/1002 is done in semester I, then STAA 2000 will be done in semester II. If STAA is done in semester I, then PHYS 1000 or 1002 will be done in semester II.

** Students must complete either NUTR 3000 or NUTR 3002.

*** Students must complete either AQUA 4000 or AQUA 4001.

**** Students must complete either MGTA 1000 or MGTA 2002 or MGTA 2004

Electives must include:

- six credit hours of Languages and Humanities/Social Science courses of which three credit hours must be at the 3000 level or above.
- three credit hours of approved Agriculture courses.

5. BSc (Agr) - Environmental Sciences

Required Courses & Suggested Schedule

Year II: Semester III

CHMA 2000: Organic Chemistry I
ENVA 2000: Environmental Studies I
SOIL 2000: Introduction to Soil Science
STAA 2000: Introduction to Statistics
three credit hours of electives

Year II: Semester IV

CHMA 3001: Biochemistry or
CHMA 3009: Environmental Chemistry
ENVA 2001: Environmental Studies II
MCRA 2000: Microbiology
STAA 3000: Introduction to Planned Studies: Surveys & Experiments
three credit hours of electives

Year III: Semester V

BIOA 3001: Ecology
CHMA 3010: Bio-Analytical Chemistry or
ENVA 4005: Geographic Information Systems (GIS)
ENVA 3001: Environmental Sampling & Analysis
PHYS 1000: Physics for the Life Sciences* or
PHYS 1002: Physics I* or three credit hours of electives
three credit hours of electives

Year III: Semester VI

ENVA 3002: Waste Management & Site Remediation
PHYS 1000: Physics for the Life Sciences I* or
PHYS 1002: Physics I* or three credit hours of electives
nine credit hours of electives

Year IV: Semester VII

ENVA 3004: Principles of Pest Management
ENVA 4006: Air, Climate and Climate Change
HORT 3000: Environmental Processes & Natural Landscape Functions
RESM 4006: Environmental Sciences Project Seminar I
three credit hours of electives

Year IV: Semester VIII

ENVA 3000: Environmental Impact Assessment
RESM 4007: Environmental Sciences Project-Seminar II
nine credit hours of electives

* Physics - Students must complete either PHYS 1000 or PHYS 1002 but not both for credit.

Within the Environmental Sciences major, students may select any one of the following areas of specialization:

- Environmental Biology
- Environmental Chemistry
- Environmental Soil Science
- Pest Management
- Waste Management

Interested students are to consult with the academic advisor.

Electives must include:

- six credit hours of Languages and Humanities/Social Science courses of which three credit hours must be at the 3000 level or above.
- Students who complete CHEM 3010 must include six credit hours of approved Agriculture electives. Students who complete ENVA 4005 must include three credit hours of approved Agriculture electives.

6. BSc (Agr) - Integrated Environmental Management

Required Courses & Suggested Schedule

Year II: Semester III

APSC 2002: Bioresource Systems Analysis
 APSC 2011: Technology for Precision Agriculture
 APSC 2012: Introduction to Bioresource Science
 PHYS 1000: Physics for Life Sciences I* or
 STAA 2000: Introduction to Statistics*
 three credit hours of electives

Year II: Semester IV

APSC 1003: Practices & Mechanics of Materials
 ENGN 2014: Bioresource Processing
 APSC 3001: Electrotechnology
 PHYS 1000: Physics for Life Sciences I* or
 STAA 2000: Introduction to Statistics*
 three credit hours of electives

Year III: Semester V

APSC 2013: Machinery & Building Technology
 APSC 3020: Energy Production & Utilization
 ENVA 3021: Ecohydrology
 six credit hours of electives

Year III: Semester VI

ENGN 3016: Engineering Economy
 ENVA 3002: Waste Management & Site Remediation
 MGTA 1000: Small Business Entrepreneurship
 RESM 4000: Bio-Environmental Systems Management Project Seminar I
 three credit hours of electives

Year IV: Semester VII

APSC 4006: Wastewater Management
 RESM 4001: Bio-Environmental System Management Project Seminar II
 nine credit hours of electives

Year IV: Semester VIII

APSC 4004: Energy Conversion & Assessment
 APSC 4005: Waterscape Ecology & Management
 nine credit hours of electives

* Physics - Students must complete the combination of PHYS 1000 and STAA 2000 in year II. If PHYS 1000 is done in semester III, then STAA 2000 will be done in semester IV. If STAA is done in semester III, then PHYS 1000 will be done in semester IV.

Electives must include:

- six credit hours of Languages and Humanities/Social Science courses of which three credit hours must be at the 3000 level or above.
- three credit hours of approved Agriculture electives

7. BSc (Agr) - Plant Science

Required Courses & Suggested Schedule

Year II: Semester III

BIOA 2000: Cell Biology or
 BIOA 2001: Cell Biology Laboratory
 BIOA 2008: Plant Diversity
 CHMA 2000: Organic Chemistry I
 GENE 2000: Genetics
 SOIL 2000: Introduction to Soil Science

Year II: Semester IV

BIOA 2002: Plant Physiology
 BIOA 2004: Structural Botany
 CHMA 3001: Biochemistry
 MCRA 2000: Microbiology
 three credit hours of electives

Year III: Semester V

BIOA 3000: General Entomology
 BIOA 3002: Weed Science
 STAA 2000: Introduction to Statistics or
 three credit hours of electives
 six credit hours of electives

Year III: Semester VI

BIOA 2005: Principles of Plant Pathology
 RESM 4008: Plant Science Project Seminar I or
 SOIL 3000: Soil Fertility & Nutrient Management or
 three credit hours of electives
 STAA 2000: Introduction to Statistics or
 three credit hours of electives
 three credit hours of electives

Year IV: Semester VII

PLSC 4002: Plant Ecophysiology
 RESM 4009: Plant Science Project Seminar II
 nine credit hours of electives

Year IV: Semester VIII

SOIL 3000: Soil Fertility & Nutrient Management or
 three credit hours of electives
 12 credit hours of electives

Electives must include:

- six credit hours of Languages and Humanities/Social Science courses of which three credit hours must be at the 3000 level or above.
- six credit hours Plant Science Production courses from the following list:
 AGRN 2000, 2001, 2002, 2008, HORT 2000, 2001, 2004, 2006, 2007, 2009, 2010, 4002, PLSC 1000, 2000, 3000.

C. Diploma in Engineering

The first two years of the Bachelor of Engineering program may be completed in the Faculty of Agriculture. After the first two year students will receive the Diploma in Engineering and may progress into the upper years of Engineering in the Faculty of Engineering.

Required Courses & Suggested Schedule

Year I Semester I

BIOA 1030: Biology for Engineers
 CHMA 1000: General Chemistry I
 ENGN 1001: Engineering Design I
 MTHA 1000: Introduction to Calculus I
 PHYS 1002: Physics I

Year I Semester II

CHMA 1001: General Chemistry II
 CSCA 2000: Computer Science
 ENGN 3006: Engineering II
 MTHA 1001: Introduction to Calculus II
 MTHA 3000: Applied Linear Algebra
 PHYS 1003: Physics II

Year II Semester III

ENGN 3000: Electric Circuits

ENGN 3002: Thermo-fluids I

MTHA 2000: Multivariable Calculus

six credit hours Discipline - Specific (see list below)

Year II Semester IV

ENGN 3017: Engineering Design II

MTHA 2001: Differential Equations

STAA 2001: Probability & Statistics for Engineering

nine credit hours Discipline - Specific (see list below)

Required Discipline-specific courses:**Semester III:**

Chemical	CHMA 2000 & ENGN 2202
Civil	ENGN 2005 & Writing Elective
Electrical	ENGN 3004 & Writing Elective
Environmental	CHMA 2000 & ENGN 2202
Industrial	ENGN 2202 & Writing Elective
Mechanical	ENGN 2005 & Writing Elective
Materials	CHMA 2000 & ENGN 2202
Mineral Resources	ENGN 2202 & Writing Elective

Semester IV

Chemical	ENGN 2014 & Writing Elective + Writing Elective
Civil	GEOA 2000 & ENGN 3011 + Writing Elective
Electrical	ENGN 3008 & ENGN 3016 + Writing Elective
Environmental	ENGN 2014 & Writing Elective + Writing Elective
Industrial	ENGN 2014 & ENGN 3016 + Writing Elective
Mechanical	ENGN 3011 & ENGN 3016 + Writing Elective
Materials	ENGN 2014 & Writing Elective + Writing Elective
Mineral Resources	ENGN 3016 & GEOA 2000 + Writing Elective

and Writing Elective to each of the disciplines listed.

Writing Elective: Any of the following courses satisfy the writing requirement:

EGLA 1000, 1001, 1002, SOCI 1000 and GEOA 1000.

D. Pre-Veterinary Medicine Studies

The Faculty of Agriculture offers the courses needed to apply to the Atlantic Veterinary College (University of Prince Edward Island). Students intending to apply to Veterinary Medicine at UPEI or another University may register in the Bachelor of Science (Agriculture) with an undeclared major in Pre-Veterinary Studies. Students will be exposed to animals such as sheep, cattle, and poultry. Students can take part in the active Pre-Vet Club and volunteer to help with lambing, milking, or egg collection on the Agricultural Campus. Students should consult section 14 of the Academic Regulations and with the Atlantic Veterinary College for specific admission requirements. The following is the recommended courses and schedule. For a detailed list of acceptable classes please visit www.dal.ca/agriculture. After year two students may opt to complete the Bachelor of Science (Agriculture).

Year I Semester I

AGRI 1000: Agricultural Ecosystems

BIOA 1002: Biology I

CHMA 1000: General Chemistry I

EGLA 1000: Composition

MTHA 1000: Introduction to Calculus I

Year I Semester II

BIOA 1003: Biology II

CHMA 1001: General Chemistry II

ECO A 1000: Principles of Microeconomics

EGLA 1001: The Novel

MTHA 1001: Introduction to Calculus II

Year II Semester III

ANSC 2005: Animal Agriculture

CHMA 2000: Organic Chemistry

GENE 2000: Genetics

PHYS **: Physics or

STAA 2000: Introduction to Statistics

three credit hours of Languages and Humanities/Social Sciences electives chosen from:

- AGRI 3001
- ARTS 2000
- CMMT 3000
- EGLA 1000, 1001, 1002, 1005, 3000
- EXTE 3001
- FRNA 1000, 1001
- GEOA 1000, 3000
- HISA 1000, 1001, 3000
- HORT 3008
- IAGR 2002, 2003
- PHLA 3000
- any ECOA course except ECOA 1000
- POLS 1000, 1001
- PSYC 1000, 1001
- RURS 3000
- SOCI 1000, 1001, 3000
- SPNA 1000, 1001
- SPEC 4009

Year II Semester IV

BIOA 2006: Mammalian Physiology

CHMA 3001: Biochemistry

MCRA 2000: Microbiology

PHYS **: Physics or

STAA 2000: Introduction to Statistics

three credit hours of Languages and Humanities/Social Sciences electives chosen from:

- AGRI 3001
- ARTS 2000
- CMMT 3000
- EGLA 1000, 1001, 1002, 1005, 3000
- EXTE 3000
- FRNA 1000, 1001
- GEOA 1000, 3000
- HISA 1000, 1001, 3000
- HORT 3008
- IAGR 2002, 2003
- PHLA 3000
- POLS 1000, 1001
- PSYC 1000, 1001
- RURS 3000
- SOCI 1000, 1001, 3000
- SPNA 1000, 1001
- SPEC 4009
- any ECOA course except ECOA 1000

** PHYS 1000 Physics for Life Sciences I or PHYS 1002

E. Minors

The purpose of a minor is to attain a significant body of knowledge within a specific discipline that is outside of the student's major or substantially exceeds what a student would obtain through studies in their major. Students may take a minor in one of the areas listed below as part of the BSc (Agr) degree program. Students who wish to take a minor must meet the requirements for a major in their chosen discipline.

1. Minor in Agricultural Business

18 credit hours to include:

- MGTA 2002: Marketing
- MGTA 2003: Financial Management

12 credit hours of additional courses approved by the Business & Social Sciences Department Head

Students may count a maximum of nine credit hours of MGTA or ECOA courses from their major towards their minor (ECO A 1000 excluded). Interested students need the approval of the department head and should consult the department.

2. Minor in Agricultural Chemistry

15 credit hours of chemistry courses including:

- CHMA 2000: Organic Chemistry I
- CHMA 3003: Advanced Integrated Chemistry Laboratory I

Nine credit hours of courses approved by the Department of Environmental Sciences.

Students may not select courses which are required for their major.

3. Minor in Agricultural Economics

18 credit hours including:

- ECOA 1001: Principles of Macroeconomics

15 credit hours of additional courses approved by the Business & Social Sciences Department Head

Students may count a maximum of nine credit hours of MGTA or ECOA courses from their major towards their minor (ECOA 1000 excluded). Interested students need the approval of the department head and should consult the department for additional information.

4. Minor in Animal Science

18 credit hours of courses approved by the Plant & Animal Science Department. The content of the minor will be decided on a student-by-student basis. Students cannot select courses which are required for their major. Students should consult the department for additional information.

5. Minor in Animal Welfare

18 credit hours including:

- ANSC 3002: Domestic Animal Behaviour
- ANSC 3005: Animal Welfare

12 credit hours of the following courses taken in consultation with the Animal Science advisor:

- ANSC 3001: Animal Health
- ANSC 4009: Directed Study in Animal Sciences (can be used for the minor if the topic is within the area of animal welfare science)
- BIOA 3004: Environmental Physiology
- BIOA 4004: Animal Adaptation & Stress
- PHLA 3000: Environmental & Agricultural Ethics
- RESM 4XXX: Project Seminar I&II (can together count as one course towards the minor if the research project is conducted in the field of animal welfare science)

Students may select up to nine credit hours to count towards the minor as well as the major.

6. Minor in Aquaculture

18 credit hours chosen from the following, in consultation with the Aquaculture advisor:

- AQUA 2000: Introduction to Aquaculture
- AQUA 3000: Fish Health
- AQUA 4000: Finfish Production
- AQUA 4001: Shellfish Production
- BIOA 3005: Physiology of Aquatic Animals
- BIOA 3006: Aquatic Ecology
- APSC 2004: Aquacultural Environment
- APSC 3013: Aquacultural Systems Technology
- NUTR 3002: Fish Nutrition

Students may select up to nine credit hours to count toward the minor as well as the major.

7. Minor in Environmental Sciences

15 credit hours including:

- ENVA 2000: Environmental Studies I
- ENVA 2001: Environmental Studies II

Nine credit hours of courses approved by the Department of Environmental Sciences.

Students may not select courses which are required for their major.

8. Minor in Food Science & Technology

15 credit hours including:

- CHMA 2003: Food Chemistry I
- FOOD 3000: Food Quality Assurance
- MCRA 2000: Microbiology*
- MCRA 3000: Food Microbiology

Three credit hours chosen from the following:

- ANSC 3003: Eggs & Dairy Products
- ANSC 3004: Meat Science
- CHMA 3007: Food Chemistry II** or

- CHMA 3008: Intermediate Food Chemistry**
- CHMA 4001: Directed Studies in Chemistry
- FOOD 3001: Functional Foods & Nutraceuticals
- FOOD 4000: Directed Studies in Food & Bioproduct Science

* Students may not select courses which are required for their major. However, if MCRA 2000 is required in a student's major, an additional elective must be selected from the above list.

** Either CHMA 3007 or CHMA 3008, but not both, can count towards the minor.

9. Minor in Genetics & Molecular Biology

18 credit hours including:

- BIOA 2000: Cell Biology or
- BIOA 2001: Cell Biology Laboratory
- GENE 2000: Genetics
- GENE 3000: Introduction to Molecular Genetics

Nine credit hours selected from the following:

- ANSC 3000: Animal Breeding
- GENE 3001: Population & Quantitative Genetics
- GENE 4000: Molecular Applications to Animal Production
- GENE 4003: Biotechnology
- GENE 4004: Lab Techniques in Genomics
- PLSC 4000: Plant Breeding
- RESM 4XXX: Project Seminar I&II can together count as one course toward the minor if the research project is conducted within the field of genetics and molecular biology.

Students are encouraged to select courses that can count toward this minor as well as toward their major.

10. Minor in Mathematics

15 credit hours including:

- MTHA 4000: Agricultural Modeling

12 credit hours courses approved by the Head of the Engineering Department selected from the following:

- MTHA 2000: Multivariable Calculus
- MTHA 2001: Differential Equations
- MTHA 3000: Applied Linear Algebra
- STAA 3000: Introduction to Planned Studies: Surveys & Experiments
- STAA 4000: Intermediate Statistical Methods
- CSCA 2000: Computer Science
- CSCA 3000: Data Structures & Numerical Methods
- ECOA 3000: Mathematical Economics
- ECOA 3003: Mathematical Programming
- ECOA 3006: Statistics for Economics & Business
- PHYS 1001: Physics for the Life Sciences II
- PHYS 1003: Physics II

11. Minor in Pest Management

15 credit hours including:

- ENVA 3004: Principles of Pest Management
- MCRA 2000: Microbiology *

Nine credit hours from the following:

- BIOA 2005: Principles of Plant Pathology
- BIOA 3000: General Entomology
- BIOA 3002: Weed Science
- BIOA 4003: Plant-Microbe Interactions
- ENVA 4002: Economic Entomology
- ENVA 4003: Advanced Weed Science

* If MCRA 2000 is required in a student's major an additional elective must be selected from the list above.

Students may not select courses which are required for their major.

Students in the Plant Science major are required to take 12 credit hours of the courses listed above for their major, they will only be required to complete the additional 12 credit hours to be granted the Minor in Pest Management.

Students should see the academic advisor in the Environmental Science Department for selection of appropriate courses.

12. Minor in Plant Science

15 credit hours of approved Plant Science courses (see Plant Sciences section, [page 98](#))

Students cannot select courses which are required for their major. Students should see the academic advisor in the Plant & Animal Science Department for more information.

Approved Plant Science Courses:

AGRN 2000, 2001, 2002, 2008
HORT 2000, 2001, 2003, 2004, 2005, 2006, 2007, 2009, 2010, 3000, 3001, 3008, 4000
IAGR 3000
PLSC 1000, 2000, 3000, 4000, 4002, 4003, 4004
SPEC 4010, 4011

F. Bachelor of Technology - Environmental Landscape Horticulture

Required Courses & Suggested Schedule

The Bachelor of Technology Environmental Landscape Horticulture is designed to prepare students for a career in the landscape horticulture profession. It will prepare students to work successfully in the diverse landscape industry or to create their own business within the industry. Years one and two of the program are satisfied by the successful completion of the Diploma of Technology - Managed Landscapes or a two year landscape-related program approved by the Department of Environmental Sciences. Students who wish to pursue graduate studies should take RESM 4006 and RESM 4007.

Year III: Semester V

BIOA 2008: Plant Diversity
CHMA 1000: General Chemistry I
APSC 3019: Communications Technology
ENVA 2000: Environmental Studies I
HORT 3000: Environmental Processes & Natural Landscape Functions

Year III: Semester VI

ENVA 2001: Environmental Studies II
MGTA 1000: Small Business Entrepreneurship
HORT 2009: Landscape Plant Nursery Management
PLSC 3000: Theory & Practice of Plant Propagation
SOIL 2000: Introduction to Soil Science* or
Three credit hours of electives

Year IV: Semester VII

ENVA 3004: Principles of Pest Management
ENVA 4005: Geographic Information Systems (GIS)
HORT 3001: Landscape Project Management
HORT 4000: Urban Tree Management
three credit hours of electives

Year IV: Semester VIII

APSC 3015: Irrigation & Drainage or
three credit hours of electives
HORT 2005: Design & Construction of Turf Facilities
HORT 3008: Horticultural Therapy
six credit hours of electives

* Students who have not met the Soil Science requirements of the Diploma of Technology - Managed Landscapes will be required to take SOIL 2000.

G. Certificate Programs

Certificate of Specialization in Organic Agriculture

The Certificate of Specialization in Organic Agriculture initiative provides students with an opportunity to specialize in the expanding area of organic agriculture. The Certificate of Specialization in Organic Agriculture enables students to approach agriculture from their area of interest, to know they can be recognized for this accomplishment, and to continue to take other courses in agriculture toward a degree. Any student who has successfully completed four of the eligible organic agriculture credit courses and has an overall GPA of at least 2.0 in these courses can apply to receive a Certificate of Specialization in Organic Agriculture. Two of the courses may be substituted with approved organic

agriculture courses offered by external institutions (see below). A Letter of Permission is required for these alternative courses.

Eligible Courses

AGRI 2000: Transition to Organic Agriculture
AGRN 2000: Organic Field Crop Management
ANSC 2004: Organic Livestock Production
ENVA 2002: Composting and Compost Use
HORT 2001: Principles of Organic Horticulture

Note: Students will not be required to take the courses in any particular order. AGRI 2000, ENVA 2002, and HORT 2001 are currently offered in the Fall semester. AGRN 2000 and ANSC 2004 are currently offered in the Winter semester.

All courses in the Certificate of Specialization in Organic Agriculture program are offered only through web-based distance education. Other institutions offering web-based courses that are approved for the certificate program:

- McGill University (Organic Soil Fertilization)
- Université Laval [French translation of courses AGRI 2000, AGRN 2004, ANSC 2004, and ENVA 2002]*
- University of British Columbia (Key Indicators of Agroecosystem Sustainability)
- University of Guelph (Organic Marketing)
- University of Manitoba (Organic Crop Production on the Prairies)
- University of Saskatchewan (Weed Control in Organic Agriculture)

* A student cannot receive credit for the same course in both French and English.

Certificate in Technology Education

The Certificate in Technology Education Program is intended to upgrade and diversify the technology background of Technology Education teachers presently working in Nova Scotia schools. It is approved in Nova Scotia by the Minister of Education for teaching license upgrading. This program is an innovative collaboration between the Faculty of Agriculture and Nova Scotia's Technology Education Teachers Association, the Nova Scotia Department of Education, and Acadia University. The program provides a variety of hands-on experiences and teaching methodologies that strengthen traditional skills and introduce new technologies to better meet the demand for qualified technology educators for the public school system.

Instruction is conducted outside regular school hours, in evening or summer sessions.

Students must complete 30 credit hours of approved courses with a cumulative GPA of 2.0. Twenty four credit hours must be from the Faculty of Agriculture course list; the remaining six credit hours are teaching methodology courses offered by Acadia University. The program must be completed in a maximum of six years. Courses can be taken in any sequence. The offering of this program is subject to and sufficient enrolment.

Required Courses (eight required)

ENGN 1001: Engineering Design I
APSC 1003: Practices and Mechanics of Materials
APSC 1004: Wood Construction Technology
APSC 1005: Metal Construction Technology
APSC 2000: Environmental Impacts and Resource Management
APSC 2007: Fluid Power Technology
APSC 2008: Digital Electronics and Computer Interfacing
APSC 3001: Engineering Measurements and Controls
APSC 3018: Technology Modules
APSC 3019: Communications Technology

Acadia Courses

EDUC 5053: Problems in Education: Technological Education and Sustainability
EDUC 5873: Technology & Curriculum: Technology Studies

Note: It is the responsibility of individual teachers to ensure that they comply with the requirements of the NS Department of Education for continuing education and upgrades. For more information, see certification.ednet.ns.ca/approval_upgrading.shtml.

H. Diploma in Technology - Business Management

The Diploma in Technology - Business Management is a program designed to provide the fundamentals of business management and at the same time allow students to concentrate in one of the following areas: Agriculture, Dairy Farming, Equine Studies, Greenhouse and Nursery, or Pet Studies. This two-year diploma provides students with the management, communication, and leadership skills necessary to manage a business such as a farm, a stable, or a pet related or greenhouse and nursery retail operation. Careers in marketing, sales, or service are other options.

This diploma is a unique mix of technical-credit courses and courses designated as workplace readiness courses (non-credit). The workplace readiness courses develop the practical skills and knowledge required to work in business and in the area of concentration. The workplace readiness courses common to all the options include: career preparation, public speaking, first aid, Occupational Health and Safety (OHS), Workplace Hazardous Materials Information System (WHMIS), business ethics, and professionalism. Specialty workplace readiness courses are specific to the area chosen, e.g., Hazard Analysis and Critical Control Point (HACCP) and livestock medicines for the dairy farming and Agriculture options. Some of these courses will be scheduled throughout the semester, and others will be offered at the beginning of the semester. Students may be required to bring protective clothing and footwear, depending on the option chosen.

Some of the options - Pet Specialty, Agriculture, and Greenhouse and Nursery - have an internship requirement for the spring and summer semesters. Students will be expected to obtain employment in their area of specialty and complete a designated list of competencies. The employer will be expected to complete an assessment of the student's performance. See the course descriptions for more details.

Pathway to Bachelor of Science (Agriculture) Major In Agricultural Business Degree

Students who graduate from the Diploma in Technology Business Management program have the option of continuing their studies in the Bachelor of Science (Agriculture) program. Students who graduate from the Diploma in Technology Business Management program are awarded a minimum of 30 credit hours toward the BSc (Agriculture) degree, provided all other program requirements are met. In addition, in consultation with the academic advisor, DBM students may identify additional elective courses that are available to transfer for credit towards the BSc (Agriculture) program. Diploma in Technology Business Management students interested in exploring or developing a pathway to the BSc (Agriculture) are strongly encouraged to meet with their academic advisor early in their program.

Diploma in Technology - Business Management Concentrations

1. Agriculture

Students planning to operate/manage a farm or who wish to work in the agricultural industry in sales or service should choose this specialization. Along with the primary emphasis on business, students pick and choose among a number of livestock, field crop, or horticulture electives to develop a program best suited to their long-term career interests.

Required Courses

Year I Semester I

ACAD 0020: Skills for Academic Success*
 ANSC 0112: Animal Biology and Management or
 PLSC 0100: Utilization of Plant Resources
 ECOA 0100: Introductory Microeconomics
 EGLA 0101: Writing For Business
 MTHA 0100: Business Math
 MGTA 0100: Accounting
 SOIL 0100: Principles of Soil Science

Year I Semester II

CMMT 0020: Career and Employment Skills*
 MGTA 0101: Applied Accounting & Taxation
 MGTA 0104: Small Business Entrepreneurship
 SOIL 0200: Soil Management
 Elective**
 Elective**
 Elective**

Year I Semester III (Spring/Summer)

INTA 0100: Internship

Year II Semester IV

APSC 0200: Environmental Management
 MGTA 0020: Business Leadership, Ethics, and Professionalism*
 MGTA 0204: Financial Management
 MGTA 0206: Marketing
 Elective**
 Elective**
 Elective**

Year II Semester V

CMMT 0021: Introduction to Public Speaking*
 ECOA 0202: Production Economics
 FOOD 0020: Topics in Agriculture and Food Enterprise Management*
 MGTA 0103: Business Law
 MGTA 0201: Business Project
 MGTA 0205: Human Resource Management
 Elective**
 Elective**

Required Workplace Readiness certificates:

WHMIS, First Aid, OHS, Farm Safety, On-farm HACCP or QA, Livestock Medicines course (for students interested in livestock production)

* Workplace Readiness course

** Students can select elective courses from a number of areas (both degree and diploma, provided prerequisites are met) including agronomy, horticulture, and animal science. Distance Education courses on specific topic areas such as beef and sheep are also available. ENGN2011 Technology in Precision Agriculture is highly recommended for students interested in crop production. Students will need to consult with the Agriculture Program Advisor to assist in the selection of courses best suited to their future career plans.

2. Dairy Farming

This specialization is designed for students interested in a career in the dairy industry, whether it is operating their own dairy farm, working as a herds person, or employed in sales or service for the dairy industry.

Required Courses

Year I Semester I

ACAD 0020: Skills for Academic Success*
 ANSC 0020: Dairy Industry I*
 ANSC 0112: Animal Biology and Management
 ECOA 0100: Introductory Microeconomics
 EGLA 0101: Writing For Business
 MTHA 0100: Business Math
 MGTA 0100: Accounting
 SOIL 0100: Principles of Soil Science

Year I Semester II

AGRN 0202: Forage-Based Cropping Systems
 ANSC 0021: Dairy Industry II*
 ANSC 0113: Principles of Animal Welfare & Husbandry
 ANSC 0114: Animal Feed and Nutrition Management
 ANSC 0205: Optimizing Bovine Reproductive and Genetic Performance
 CMMT 0020: Career and Employment Skills*
 MGTA 0101: Applied Accounting & Taxation
 SOIL 0200: Soil Management

Year II Semester III

AGRN 0201: Cereal-Based Cropping Systems
 ANSC 0206: Managing Dairy Milking Systems and Housing Facilities
 APSC 0200: Environmental Management
 APSC 0201: Machinery and Building Technology
 MGTA 0020: Business Leadership, Ethics, and Professionalism*
 MGTA 0204: Financial Management
 MGTA 0206: Marketing

Year II Semester IV

ANSC 0204: Dairy Herd Health and Nutrition Management
 ANSC 0207: Records Management and Decision-making for Dairy Herds
 CMMT 0021: Introduction to Public Speaking*

ECO A 0202: Production Economics
 MGTA 0103: Business Law
 MGTA 0201: Business Project
 MGTA 0205: Human Resource Management

Required Workplace Readiness certificates and experience:

WHMIS, First Aid, OHS, Farm Safety, On-farm HACCP, Dairy Medicines course, Dairy Skills experience**

* Workplace Readiness course

** Students will be expected to complete two weeks of work experience at the Agricultural Campus dairy farm as part of the requirements for the program. This work experience normally is completed in the first year.

3. Equine Studies

This concentration is designed specifically for those students interested in someday owning or managing an equine-related business. It provides students who have a passionate interest in horses the opportunity to study something they love and at the same time receive a solid business education that is directly transferable to any type of business operation.

Required Courses

Year I Semester I

ACAD 0020: Skills for Academic Success*
 ANSC 0022: Equine Industry*
 ANSC 0112: Animal Biology and Management
 ECOA 0100: Introductory Microeconomics
 EGLA 0101: Writing For Business
 MTHA 0100: Business Math
 MGTA 0100: Accounting
 SOIL 0100: Principles of Soil Science

Year I Semester II

AGRN 0202: Forage-Based Cropping Systems
 ANSC 0113: Principles of Animal Welfare and Husbandry
 ANSC 0114: Animal Feed and Nutrition Management
 CMMT 0020: Career and Employment Skills*
 MGTA 0101: Applied Accounting & Taxation
 MGTA 0104: Small Business Entrepreneurship
 SOIL 0200: Soil Management

Year II Semester III

ANSC 0213: Equine Growth & Nutrition
 ANSC 0214: Equine Health, Genetics and Reproduction
 APSC 0200: Environmental Management
 MGTA 0020: Business Leadership, Ethics, and Professionalism*
 MGTA 0203: Customer Relations Management
 MGTA 0204: Financial Management
 MGTA 0206: Marketing

Year II Semester IV

ANSC 0215: Equine Facilities Management
 ANSC 0216: Equine Health & Fitness
 ANSC 0219: Equine Behaviour & Learning
 CMMT 0021: Introduction to Public Speaking*
 MGTA 0103: Business Law
 MGTA 0201: Business Project
 MGTA 0205: Human Resource Management

Required Workplace Readiness certificates:

WHMIS, First Aid, OHS, Work Safety, Equine Medicines course

* Workplace Readiness course

4. Greenhouse and Nursery

This concentration is designed for people who are passionate about plants and would like a business career in a “green” and “growing” industry. Along with a solid business education, this program provides a detailed understanding of the production and marketing of ornamental plants including greenhouse- and field-grown nursery stock, and of greenhouse vegetable crops such as tomatoes and cucumbers. Career possibilities include: owner of a greenhouse operation focused on bedding plants, manager of a garden centre, and production manager of field nursery stock.

Required Courses

Year I Semester I

ACAD 0020: Skills for Academic Success*
 ECOA 0100: Introductory Microeconomics
 EGLA 0101: Writing For Business
 MTHA 0100: Business Math
 MGTA 0100: Accounting
 PLSC 0100: Utilization of Plant Resources
 SOIL 0100: Principles of Soil Science

Year I Semester II

CMMT 0020: Career and Employment Skills*
 MGTA 0101: Applied Accounting & Taxation
 MGTA 0103: Business Law
 MGTA 0104: Small Business Entrepreneurship
 SOIL 0200: Soil Management
 Elective**
 Elective**

Year I Semester III (Spring/Summer)

INTA 0100: Internship

Year II Semester IV

HORT 0201: Greenhouse & Floriculture Crop Management
 MGTA 0020: Business Leadership, Ethics & Professionalism*
 MGTA 0202: Managing Retail Operations & Physical Resources
 MGTA 0203: Customer Relations Management
 MGTA 0204: Financial Management
 MGTA 0206: Marketing
 PLSC 0200: Plant Propagation

Year II Semester V

BIOA 0102: Plant Physiology and Stress Management
 CMMT 0021: Introduction to Public Speaking*
 HORT 0200: Landscape Plant Nursery Management
 MGTA 0201: Business Project
 MGTA 0205: Human Resource Management
 MGTA 0208: Retail Sales Management
 PLSC 2000: Specialty Crops

Required Workplace Readiness certificates:

WHMIS, First Aid, OHS, Workplace Safety, HACCP or QA

* Workplace Readiness course

** Students can select elective courses from a number of areas including agronomy, horticulture, and animal sciences. Students will need to consult with the Greenhouse and Nursery Advisor to assist in the selection of courses best suited to their future career paths.

5. Pet Specialty

This concentration is best suited for students interested in working in the pet industry as either owners or managers of pet-related businesses. Sales and service are other areas of employment, e.g., managing the pet section of a department store or selling pet-care products to other businesses. Along with the business courses, students will study the care and management of small animals, reptiles, and fish.

Required Courses

Year I Semester I

ACAD 0020: Skills for Academic Success*
 ANSC 0116: Companion Animal Enterprise
 ECOA 0100: Introductory Microeconomics
 EGLA 0101: Writing for Business
 MTHA 0100: Business Math
 MGTA 0100: Accounting
 MGTA 0206: Marketing

Year I Semester II

ANSC 0117: Companion Animal Growth, Development, and Nutrition
 ANSC 0208: Biology and Care of Aquarium Fish and Reptiles** or
 ANSC 0209: Biology and Care of Pet Birds and Small Mammals**
 ANSC 0217: Companion Animal Behaviour
 CMMT 0020: Career and Employment Skills*

MGTA 0101: Applied Accounting & Taxation
 MGTA 0104: Small Business Entrepreneurship
 MGTA 0207: Advertising and Promotion

Year I Semester III (Spring/Summer)

INTA 0100: Internship

Year II Semester IV

ANSC 0210: Introduction to Companion Animal Health
 ANSC 0212: Companion Animal Genetics and Reproduction
 MGTA 0020: Business Leadership, Ethics, and Professionalism*
 MGTA 0202: Managing Retail Operations and Physical Resources
 MGTA 0203: Customer Relations Management
 MGTA 0204: Financial Management

Year II Semester V

ANSC 0208: Biology and Care of Aquarium Fish and Reptiles** or
 ANSC 0209: Biology and Care of Pet Birds and Small Mammals**
 ANSC 0211: Companion Animal Facilities Management
 CMMT 0021: Introduction to Public Speaking*
 MGTA 0103: Business Law
 MGTA 0201: Business Project
 MGTA 0205: Human Resource Management
 MGTA 0208: Retail Sales Management

Required Workplace Readiness certificates and experience:

WHMIS, First Aid, OHS, Workplace Safety, Small Animal Work Experience***

* Workplace Readiness course

** Courses are offered in alternate years.

*** Students will be expected to complete 40 hours of small animal work experience as part of the requirements for the program. This may be completed at the Boulden Animal Centre, an animal shelter, or any acceptable animal facility.

I. Diploma in Technology Managed Landscapes

The Diploma in Technology Managed Landscapes is a two-year program which helps prepare students for careers with landscaping firms, planning agencies, recreational parks, or institutions, or in self-employed roles as landscape horticultural technologists.

The Diploma in Technology Managed Landscapes is a fully approved Certified Horticultural Technician integrated educational program, recognized by the International Certification Council (ICC) and the Certification Committee of the Canadian Nursery Landscape Association (CNLA). Interested students can apply for a Passport to Certification that enables modular training and testing toward international recognition as a Certified Horticultural Technician. The curriculum fully encompasses the requirements for certification in various industry sectors. Students who successfully complete the Diploma in Technology Managed Landscapes with a cumulative average of at least 2.0 are eligible for admission to the two-year Bachelor of Technology Environmental Landscape Horticulture program, as years one and two of the BTech Environmental Landscape Horticulture program are satisfied by the successful completion of the Diploma.

Required Courses

Year I Semester I

EGLA 0101: Writing for Business
 HORT 0100: Landscape Plants I
 HORT 0102: Turfgrass Production and Management
 HORT 0103: Landscape Horticulture I
 SOIL 0100: Principles of Soil Science

Year I Semester II

BIOA 0102: Plant Physiology and Stress Management
 APSC 0101: Horticultural Technology
 HORT 0101: Landscape Plants II
 HORT 0208: Landscape Maintenance
 HORT 0210: Landscape Installation

Year II Semester III

BIOA 0200: Entomology
 APSC 0100: Surveying
 HORT 0204X: Landscape Plants III
 HORT 0207: Arboriculture
 HORT 0209: Landscape Horticulture II

Year II Semester IV

BIOA 0101: Plant Pathology
 BIOA 0103: Weed Science
 HORT 0204Y: Landscape Plants III
 HORT 0205: Residential Landscape Design and Construction
 SOIL 0200: Soil Management
 Elective

Required Workplace Readiness certificates:

WHMIS, First Aid, OHS

Recommended Workplace Readiness courses:

CMMT0020 Career and Employment Skills
 CMMT0021 Introduction to Public Speaking

J. Diploma in Technology Plant Science

The two-year Diploma in Technology Plant Science program prepares graduates for exciting careers in the dynamic plant-based industries of the future. Emerging information and technology related to bio-energy, nutrition, health, environmental protection, and plant genetics will make a plant science education a valuable asset. This program provides an innovative approach to the production and use of plant resources, with emphasis on responsible environmental and social stewardship, commercialization of ideas and strong practical skills in horticultural or agronomic plant production techniques, entrepreneurship, problem-solving, communication, and decision-making, all built on a solid foundation in the bio-sciences.

Studies begin with a first year of required courses that allow students to build their knowledge in the bio-sciences, plant production, and business, and to develop their interests. The program then provides the opportunity in the second year to select from a wide variety of courses to give each student the flexibility to match courses to their interests and career goals. With the help of a knowledgeable program advisor, students can choose from courses in edible horticulture, ornamental horticulture, agronomy, plant science, business, or engineering.

Pathway to Bachelor of Science (Agriculture) Major in Plant Science Degree

Students who graduate from the Diploma in Technology Plant Science program have the ability to make significant progress towards the completion of the BSc (Agriculture) major in Plant Science degree program. Students who graduate from the technology program are awarded a minimum of 30 credit hours toward the BSc (Agriculture) degree, provided all other program requirements are met. In addition, in consultation with the Plant Science Technology Academic Advisor, students can identify additional elective courses that will transfer for credit toward the BSc (Agriculture) major in Plant Science degree program. Plant Science students interested in exploring a pathway from the Diploma to the BSc (Agriculture) are strongly encouraged to meet with their academic advisor early in their program.

Required Courses

Year I Semester I

BIOA 0200: Entomology
 EGLA 0101: Writing for Business
 MGTA 0100: Accounting
 PLSC 0100: Utilization of Plant Resources
 PLSC 0200: Plant Propagation
 SOIL 0100: Principles of Soil Science

Year I Semester II

BIOA 0102: Plant Physiology and Stress Management
 BIOA 0103: Weed Science
 BIOA 0101: Plant Pathology
 CSCA 0200: Computer Methods
 MGTA 0104: Small Business Entrepreneurship
 MGTA 0205: Human Resource Management

Semester III and Semester IV

Twenty four credit hours (six courses in each semester) chosen in consultation with a program advisor. One course (PLSC 0202), if chosen, is taken during the Spring/Summer between Semesters II and III.

Recommended Electives

The following courses are suggested as electives in the study areas related to the Diploma in Technology Plant Science. Courses not on the list may also be eligible as electives; students may choose either technical-level courses or degree courses at the 1000 and 2000 level. Consultation with the program advisor is recommended. Many of these courses have prerequisites; it is the student's responsibility to ensure that these requirements are met.

Fall

AGRN 0201: Cereal-Based Cropping Systems
 ANSC 0112: Animal Biology and Management
 APSC 0200: Environmental Management
 APSC 2011: Technology for Precision Agriculture
 HORT 0100: Landscape Plants I
 HORT 0201: Greenhouse and Floriculture Crop Management
 HORT 0211: Vegetable Production
 HORT 0202: Small Fruit Crops
 HORT 0204: Landscape Plants III
 HORT 0102: Turfgrass Production and Management
 HORT 0103: Landscape Horticulture I
 HORT 0207: Arboriculture
 HORT 2001 Principles of Organic Horticulture (Distance)
 MGTA 0204: Financial Management
 PLSC 1000: Farm Woodlot Management

Winter

AGRN 0200: Potato Production
 AGRN 0202: Forage-Based Cropping Systems
 ANSC 0113: Principles of Animal Welfare and Husbandry
 ANSC 0114: Animal Feed and Nutrition Management
 APSC 0101: Horticultural Technology
 HORT 0101: Landscape Plants II
 HORT 0200: Landscape Plant Nursery Management
 HORT 0203: Tree Fruit Crops
 HORT 0204: Landscape Plants III
 MGTA 0103: Business Law
 MGTA 0207: Advertising and Promotion
 MGTA 0208: Retail Sales Management
 PLSC 2000: Specialty Crops
 SOIL 0200: Soil Management

Spring/Summer (between Years 1 and 2)

PLSC 0202: Plant Science Techniques

K. Diploma in Technology Veterinary Technology

The Veterinary Technology (VT) Program prepares graduates with the skills and knowledge required to enter veterinary practice as technical assistants to veterinarians. Veterinary technicians have also made successful careers in a variety of other fields, including the management of animal shelters; research with animals in universities and for private companies; sales for veterinary supply companies; and employment with zoos and in wildlife rehabilitation.

The Veterinary Technology Program is a two-year program with four standard semesters and an intersession after the first year. In addition to on-campus learning there are off-campus externships at the Atlantic Veterinary College and in general veterinary practices. To reflect the major employment opportunities in Atlantic Canada, the program is oriented mainly towards companion animals. The modest large-animal content is appropriate for graduates entering mixed practice and for those who wish to further develop their livestock or equine competence. Under the supervision of veterinarians and veterinary technicians in the VT program's Boulden Animal Clinic, students learn the skills and tasks required of them in companion animal practice.

Students in the Veterinary Technology Program must successfully complete 16 credit hours of required courses each academic year (Fall/Winter) to be eligible to continue in the program the following year. Students who do not meet this requirement, or who withdraw for any reason, will need to reapply if they want to return to the program. They will be considered along with the new pool of applicants and will not have preferential admittance. They must fulfill all orientation and application procedures, and adhere to the February 28 application deadline. Students who wish to return in the winter semester may only do so if there is space in the program, and they are required to reapply by December 1.

The Veterinary Technology Program is accredited by the Canadian Veterinary Medical Association. The animal facilities are approved for teaching by the Canadian Council on Animal Care. The Animal Clinic is accredited by the Nova Scotia Veterinary Medical Association.

Required Courses

Year I Semester I

EGLA 0101: Writing for Business
 VTEC 0111: Animal Medicine and Nursing I
 VTEC 0112: Clinical Exercises I
 VTEC 0113: Veterinary Clinical Pathology I
 VTEC 0114: Fundamentals in Veterinary Technology I
 VTEC 0115: Anatomy-Physiology-Pathophysiology I

Year I Semester II

ANSC 0217: Companion Animal Behaviour
 VTEC 0121: Animal Medicine and Nursing II
 VTEC 0122: Clinical Exercises II
 VTEC 0123: Veterinary Clinical Pathology II
 VTEC 0124: Fundamentals in Veterinary Technology II
 VTEC 0125: Anatomy-Physiology-Pathophysiology II

Year II Semester III

VTEC 0131: Internship in Veterinary Technology
 VTEC 0132: Externship at the Atlantic Veterinary College
 VTEC 0133: Externship in General Veterinary Practice

Year II Semester IV

VTEC 0211: Animal Medicine and Nursing III
 VTEC 0212: Clinical Exercises III
 VTEC 0213: Veterinary Clinical Pathology III
 VTEC 0214: Fundamentals in Veterinary Technology III
 VTEC 0215: Livestock and Equine Principles
 Elective*

Year II Semester V

VTEC 0221: Animal Medicine and Nursing IV
 VTEC 0222: Clinical Exercises IV
 VTEC 0223: Veterinary Clinical Pathology IV
 VTEC 0224: Fundamentals in Veterinary Technology IV
 VTEC 0225: Lab Animal & Alternative Pet Medicine
 Elective*

* Electives must be approved by the Program Coordinator.

IV. Continuing and Distance Education

A variety of courses and programs, including credit and non-credit certificates, online programs, professional development and skills training are offered through Continuing and Distance Education. Our education is outcome-based, and with formats and scheduling that work for the students. Continuing and Distance Education offers on-site training, including the block release sections of the Farm Technician Apprenticeship Program held on Prince Edward Island.

For information on courses and programs visit dal.ca/agriculture or call (902) 893-6666.

V. Canadian Association of Diploma in Agriculture Programs

The Canadian Association of Diploma in Agriculture Programs (CADAP) is an association of post-secondary educational institutions offering diploma programs in agriculture. The purpose of the association is to promote excellence in agricultural education. The association provides opportunities for technical students in several of the programs to enroll in another college for one semester of their second academic year. By encouraging participation in the programs of another CADAP institution, another region of Canada, or another country, CADAP provides opportunities for students:

- to broaden their studies
- to become more familiar with another region of Canada, or another country
- to live a different cultural experience, and
- to gain practical experience in another region of Canada or in another country.

CADAP offers scholarships to students in diploma programs. For more information please see their website (www.cadap-apdac.ca).

Any student wishing to do a technical exchange program at another institution must have that program approved. The request should be submitted to the Registrar's Office by the student's program advisor or the Department Head. Upon approval of the program, the student will be issued a Letter of Permission detailing which courses will be replaced in the student's program and which courses must be completed at the host institution. The program must be laid out before the student leaves for the exchange institution.

VI. Professional Organizations for Agrologists

Agrology is "the profession of applying science and scientific principles to the business and art of agriculture". University graduates who are skilled in the science and business of agriculture are encouraged to join their provincial Institute of Agrologists. Provincial Institutes offer the opportunity to get to know and exchange ideas with other professional agrologists in the province and in other parts of Canada through membership in the Agricultural Institute of Canada. Membership in an Institute of Agrologists provides an element of fellowship in the profession, as well as opportunities to attend scientific conferences and educational tours and to receive newsletters and technical publications. Membership in an Institute is required by provincial statute to practice agrology in most provinces.

Academic

I. Undergraduate Degree Level Course Description

ACAD 1050.03: Foundations in Academic Study & Research.

This course introduces participants to university culture and helps them to enhance academic performance. Course experiences build a practical understanding of the learning process at the university level, enabling students to develop strategies to be more effective learners. Topics include performance expectations, conventions of academic critical reading and writing, research methods, academic literature review and analysis, discipline-specific learning strategies, goal setting, and effective use of university resources.

NOTE: Fall Semester

FORMAT: Lecture 3 hours

II. Technology Level Course Descriptions

ACAD 0020.00: Skills for Academic Success.

The objective of this course is to facilitate the successful transition from high school or the workplace to university life. This course will expose students to the functions of various student services on campus, encourage the development of good study skills, and explore the life management skills necessary to achieve success at university.

NOTE: Fall semester – This is a Workplace Readiness course required for the Diploma in Business Management.

FORMAT: Lecture 1 hour per week.

ACAD 0021.00: University Study Skills.

This course provides students with the skills they need to be successful university students, including note taking, textbook reading, exam taking, and time management skills. The course will introduce students to the resources available on campus and will help them understand their learning styles and strengths. Students in this course will learn how to balance their commitments and use their study time efficiently. It provides an essential bridge for students coming to university directly from high school, as well as an important refresher for students who have had a break in their studies.

NOTE: Fall and Winter semesters

FORMAT: Lecture (six two-hour sessions).

Agriculture

I. Undergraduate Degree Level Course Descriptions

AGRI 1000.03: Agricultural Ecosystems (A).

This course is an introduction to agriculture and food systems. The principles of agricultural production as studied in the disciplines of animal science, plant science, agricultural engineering, and soil science will be integrated to give a comprehensive view of agricultural ecosystems. Course work will include lectures, laboratories, problem-solving exercises, and small-group work. There will be a farm tour for all AGRI 1000 students on September 19, 2012, from 1 pm until 7 pm. The course will expose students to issues and raise questions to be considered during the remainder of their undergraduate careers. The goals of this course are to provide students with knowledge of the application of science to agriculture, and to assist students to understand the integrated nature of agriculture and food systems in both regional and global contexts. Associated course goals are to develop communication and independent learning skills and the ability to function effectively in team situations, and to stimulate students to think critically, logically, and quantitatively while respecting the values and ideas of others.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab and/or tutorial 2 hours per week.

AGRI 2000.03: Transition to Organic Agriculture (A).

This course is recommended for students looking for a general introduction to organic agriculture. The course consists of five stand-alone modules: Why organic?, Organic Certification, Planning the Farm System, Transition to Organic Crop Production, and Transition to Organic Livestock Production. Throughout the course students will be encouraged to participate in discussion groups and use the organic information resources currently available over the Internet.

NOTE: Fall semester

FORMAT: DE– only offered as a web-based distance education course.

AGRI 3001.03: Issues in Agricultural Health and Safety (A, H).

This course is a series of ten online modules on Agricultural Health & Safety designed for agricultural students, farm managers and owner-operators, and anyone else who wishes to obtain a better understanding of the health and safety issues present on Canadian farms. The course describes the health and safety situation and the major health and safety risks in the agriculture industry, and highlights the importance of improving the current situation.

NOTE: Fall or Winter semester

FORMAT: DE– only offered as a web-based distance education course.

PREREQUISITE: Third-year standing

AGRI 4000.03: Contemporary Issues in Agriculture (A).

This course allows senior students in all disciplines to discuss current topics of interest to agricultural professionals. These topics could include soil degradation, integrated pest management, antibiotics in feed, the occupation of farming, animal welfare, etc. Students will be given weekly required readings.

NOTE: Fall semester – This course has limited enrollment.

FORMAT: 3-hour seminar weekly.

PREREQUISITE: Third- or fourth-year standing

Agronomy

I. Undergraduate Degree Level Course Descriptions

AGRN 2000.03: Organic Field Crop Management (A) DE.

This course will introduce students to organic principles and practices applied to the production and management of field crops. The criteria for optimum yield and quality of field crops are presented within the context of organic farming principles, sustainable soil and nutrient management, and the requirements for organic certification. Five stand-alone modules provide a framework for study: *Soil and Field Management Practices: methods used in organic farming to build and maintain soil fertility, preserve soil structure, conserve and recycle nutrients, reduce weed pressure, and reduce outbreaks of pest and disease; *Nutrient Management Planning: how to optimize the efficiency of nutrient cycling, improve resource utilization, and minimize nutrient loss on the farm; *Forages: organic methods of production for pasture, hay, silage, cover crops, or green manure; *Row Crops: organic methods of production of cereal row crops (corn, sorghum), root crops (carrots, potatoes), seed legumes (soybean, peas, beans), and others (e.g., hemp); and *Small Grains and Oilseeds: organic methods of production of winter-seeded grains (winter wheat, winter rye), spring-seeded grains (spring wheat, oats, and barley), oilseeds (canola, flax), and others.

NOTE: Winter semester

FORMAT: DE– only offered as a web-based distance education course.

AGRN 2001.03: Cereal-Based Cropping Systems (A).

This course takes a systems approach to the study of crop and soil management in rotations involving the growing of the principal cereals, oilseeds, pulses, and other grains, and their relationship to other crops in a rotation. Through a whole-farm approach over time, it studies environmentally and economically sustainable methods for grain cash crops and grain-based animal feed production. It stresses soil and water conservation and an understanding of the principles and processes of the nutrient cycles, which are critical to improving the food production environment. Students will gain knowledge of grains as they relate to people and the environment, from soil to shelf, both in a Maritime temperate climate and in an international context.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours per week.

CROSS-LISTING: AGRN 0201

AGRN 2002.03: Forage-Based Cropping Systems (A).

Forage crop production, management, and use will be discussed in the context of agricultural ecosystems. Emphasis will be placed on beneficial management practices to reduce negative impacts on the environment, while maintaining profitability and sustainability of rural communities. Topics covered will include pasture, hay, and silage, as well as the role of perennial and annual forages in crop rotations.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours per week.

CROSS-LISTING: AGRN 0202

AGRN 2008.03: Potato Production (A).

History, biosystematics, and eco-physiology of the crop are emphasized. Production practices for seed, table, and processing stock and marketing in the Atlantic Provinces are examined. Soil fertility, crop health management strategies, and nutritional qualities and storage are covered in detail. Some commercial operations are visited.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours per week.

PREREQUISITE: Preparatory: AGRI 1000

CROSS-LISTING: AGRN 0200

II. Technology Level Course Descriptions

AGRN 0200.02: Potato Production.

History, biosystematics, and eco-physiology of the crop are emphasized. Production practices for seed, table, and processing stock and marketing in the Atlantic Provinces are examined. Soil fertility, crop health management strategies, and nutritional qualities and storage are covered in detail. Some commercial operations are visited.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours per week.

CROSS-LISTING: AGRN 2008

AGRN 0201.02: Cereal-Based Cropping Systems.

This course takes a systems approach to the study of crop and soil management in rotations involving the growing of the principal cereals, oilseeds, pulses and other grains, and their relationship to other crops in a rotation. Through a whole-farm approach over time, it studies environmentally and economically sustainable methods for grain cash crops and grain-based animal feed production. It stresses soil and water conservation and an understanding of the principles and processes of the nutrient cycles, which are critical to improving the food production environment. Students will gain knowledge of grains as they relate to people and the environment, from soil to shelf, both in a Maritime temperate climate and in an international context.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours per week.

CROSS-LISTING: AGRN 2001

AGRN 0202.02: Forage-Based Cropping Systems.

The second course in cropping systems focuses on the forage crops. Students will acquire the basic knowledge and skills for the management of forage crops within cropping systems in a socially and environmentally responsible manner. Soil and water conservation will be emphasized in the context of production agriculture. Production and management for sustainable yields of forage crops under conditions specific to Atlantic Canada will be emphasized. Students will develop investigative and critical thinking skills to evaluate forage publications and enable themselves to address production challenges as they arise.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours per week.

CROSS-LISTING: AGRN 2002

Animal Science

I. Undergraduate Degree Level Course Descriptions

ANSC 2002.03: The Horse: Its Biology and Use (A).

This course is an introduction to the behaviour, anatomy, nutrition, and history of horses. What behavioural principles underlie horse training? How is their performance influenced by their conformation? What is unique about their digestive system? How did horses evolve? The course will include discussion of sources and treatment of illness and disabilities, and the biology and control of common parasites; demonstrations of English and Western riding (students will not be taught to ride); visits to the Truro Raceway; study of the importance of shoeing to the working horse; and exposure to the use of horses as draft animals.

NOTE: Fall semester

FORMAT: Lecture/lab 3 hours per week with online component.

PREREQUISITE: second-year standing or equivalent, in any program

ANSC 2003.03: Companion Animal Behaviour.

In this course, students will study the fundamentals of animal learning and how those principles affect success in training and behaviour modification. Attention will be given to understanding and solving behaviour problems (e.g., separation anxiety, dominance aggression, fighting, inappropriate urination, and behavioural stereotypes). The focus is on companion animals – dogs and cats, and to some extent horses. The normal development of behaviour in those species will be covered.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

CROSS-LISTING: ANSC 0217

ANSC 2004.03: Organic Livestock Production (A) DE.

This course provides information on organic livestock production in general, as well as more detailed analyses of organic beef and sheep, dairy, and swine and poultry production. An in-depth study of organic approaches to livestock health is included. The course is divided into five stand-alone modules: Introduction to Organic Livestock Production, Organic Beef and Sheep Production, Organic Dairy Production, Organic Swine and Poultry Production, and Health Management in an Organic Livestock System. A variety of information delivery methods will be used, including text on the Internet, a printed resource guide, and a CD-ROM with video clips and slide shows. Students will be encouraged to participate in discussion groups and use the organic information resources currently available over the Internet. Evaluation will be based on participation, written assignments, module quizzes, and a final exam.

NOTE: Winter semester

FORMAT: DE - only offered as a web-based distance education course.

ANSC 2005.03: Animal Agriculture (A).

Through a mixture of classroom lectures and exercises at Faculty of Agriculture, Dalhousie, this course will enable students to recognize common breeds of farm animals, to describe livestock production cycles and methods, and to understand the place of farm animals in the world food system. The course will provide introduction to subject matter covered in more senior animal science courses, such as nutrition, reproduction, behavior and welfare, animal anatomy, and environmental physiology. The interaction of livestock production with our environment will be examined.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: AGRI 1000

ANSC 2006.03: Equine Health, Genetics and Reproduction.

Students examine in detail the processes of reproduction and lactation in horses, as well as the requirements for care and management of the mare during breeding, parturition, and lactation. Students also study the growth and development of the foal and the requirements for the care of the foal. The common breeds of horses

and the genetics of coat colour, conformation, and performance potential will be discussed. The course will enable students to evaluate the genetic merit of sires and dams, and to plan matings and genetics strategies to meet the genetic goals of their particular operation. Students will obtain a basic knowledge of health care and disease prevention, and be able to address issues relating to biosecurity.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ANSC 2002

CROSS-LISTING: ANSC 0214

ANSC 2007.03: Beef Production and Management (A).

This course will focus on the management of commercial beef farms, ranging from cow/calf to stocker/feeder operations. Components of breeding, nutrition, and behaviour will be discussed. A systems approach to the management of the farm will be undertaken. The role of the manager in optimizing production is an important component. A historical perspective on the Atlantic beef industry along with coverage of emerging trends will be part of the course. Key beef industry issues such as the impact of BSE, animal welfare, and beef marketing will be discussed.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ANSC 2000 or ANSC 2005

CROSS-LISTING: ANSC 0218

ANSC 3000.03: Animal Breeding (A).

The course covers variation in animal performance and the techniques whereby genetic superiority can be recognized and improved. Goals and programs of improvement are discussed with reference to commercial farm species. The emphasis is on programs in current use but applications of new technologies are included. Labs deal primarily with data collection, analysis, and computer applications.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: GENE 2000, STAA 2000

ANSC 3001.03: Animal Health (A).

This course seeks to impart an understanding of animal health and its importance in livestock production enterprises. Students are taught to recognize signs of health and ill health and to understand the principles and practices of disease prevention and treatment. Conditions of disease and ill health common in Atlantic Canada are studied. The need for veterinary collaboration is emphasized, and the circumstances in which this should be sought are discussed.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: MCRA 2000

ANSC 3002.03: Domestic Animal Behaviour (A).

This course studies the behaviour of farm animals and presents information that is relevant to the care and management of animals. Topics covered include domestication, animal communication, social behaviour, reproductive and maternal behaviour, development of behaviour, genetics of behaviour, and the influence of management systems and practices on behavioural characteristics. Considerable attention is also given to welfare issues in animal agriculture.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: BIOA 2006 or BIOA 3005

ANSC 3003.03: Eggs and Dairy Products (A).

This course deals with the nature and composition of eggs and milk and their products such as cheese and yogurt; hygiene; processing; and storage.

NOTE: Fall semester

FORMAT: Lecture 2 hours, lab 2 hours

ANSC 3004.03: Meat Science (A).

This course covers growth of meat animals and the nature of muscle, bone, and fat; conversion of muscle to meat; quality and grading of fresh meat; hygiene and storage; meat processing, meat products, and by-products.

NOTE: Winter semester

FORMAT: Lecture 2 hours, lab 2 hours

ANSC 3005.03: Animal Welfare (A).

This course deals with the well-being of animals, with emphasis on farm animals. Issues include what we mean by animal welfare, what the animal welfare issues are in modern agriculture and in modern society, and how we use ethology and physiology to assess animal welfare. The course outlines the international efforts to improve on farm animal welfare. There is a term project in which students

attempt to assess animal welfare in a particular farm (or other) environment, and all students will participate in class debates on current issues in animal welfare.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: At least third-year standing

ANSC 3006.03: Companion Animal Biology.

This course focuses on digestive and reproductive physiology, nutritional, genetic, and breeding programs, and the importance of these for management of companion animals. The emphasis is on domestic dogs and cats, with other companion animals included as the topic permits. Laboratory sessions include evaluation of diets and dietary supplements, reproductive and digestive anatomy, simulation of breeding programs, and guest lecturers or field trips to companion animal facilities.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours. Offered in alternate years; next offered in 2014/2015.

PREREQUISITE: BIOA 3008, GENE 2000

ANSC 4003.03: Avian Production Systems (A).

This course will focus on management of commercial poultry, from hatching to the production of value-added products. The course material will require the application of the sciences of nutrition, genetics, physiology, and behavior to understand the key aspects of growth, reproduction, and health of commercial poultry species.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: ANSC 2005, NUTR 3000

ANSC 4004.03: Ecology of Milk Production in Ruminants (A).

Milk is a highly prized food, the efficient forage-based production of which has been a major economic phenomenon in agriculture for millennia. Four main species – cattle, buffalo, goats and sheep – have been selected to produce milk for humans. All are from the Bovidae Family (Suborder Ruminantia) of cudchewers. Chosen initially because they didn't compete for the scarce food supplies of our ancestors, ruminants, especially cows, have been selected intensively for milk-yielding characteristics and conformation. The objectives of this course are to examine the production of milk, from provision of feed for the animals to processing the milk into products, and the important contribution made by the dairy industry in providing sustainable food security for society. This course will challenge perceptions of students who will become future dairy farmers or consumers and thus will influence future policy.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours. Offered in alternate years; next offered in 2014/2015.

PREREQUISITE: ANSC 2005

ANSC 4005.03: Swine Science and Pork Production (A).

Globally, pork production is a significant source of animal protein. Swine science provides the tools to accomplish pork production. This course will cover aspects of pork production including nutrition, management, breeding, housing, health and post-farmgate opportunities. The science of swine will be discussed, including biology and the role of swine as models for human studies.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: ANSC 2005, ANSC 3000, BIOA 2006, NUTR 3001

ANSC 4006.03: The Science of Modern Sheep Farming (A).

Sheep were among the first animals to be domesticated and since then, sheep have been bred for different roles: wool, meat, milk. In the Maritimes, the importance of sheep in the rural economy is on the increase. This course will guide students through the science of sheep production. Nutrition, pasture management, breeding, lambing and flock health will be covered. The traditional roles of sheep for meat and wool production will be emphasized, but also newer uses in Canada such as dairy sheep production will be explored.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: BIOA 3008, NUTR 3000

ANSC 4007.03: Pastures in Sustainable Livestock Systems (A).

An advanced course that provides students with an overview of current sustainable pasture management practices in northern latitudes, with a focus on grassland ecology, the environmental impacts of livestock production, and applied pasture management. In addition to attending lectures and presenting material in class, students will participate in lab sessions on practical grazing management techniques as well as participate in investigative tours of local pasture producers.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: AGRI 1000, AGRN 2002

ANSC 4008.03: Carnivore Biology.

This is an advanced-level course in mammalian biology focusing on species in the Order Carnivora. The specialized features of the biology of mammalian carnivores will be reviewed, emphasizing seasonal breeding and reproduction, nutrition and physiology, and health and disease. Species discussed will include livestock, companion and zoo animals, and wildlife. The practical aspects of the course will use the mink as a model animal.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: BIOA 3008, NUTR 3000

ANSC 4009.03: Directed Studies in the Animal Sciences.

This course permits senior students, under the direction of faculty members, to pursue their interest in areas not covered, or not covered in depth, by other courses.

NOTE: Fall, Winter or Summer semester

PREREQUISITE: Permission of the Department/Program Advisor; students must obtain consent of an instructor who is willing to be a supervisor

EXCLUSION: Note: ANSC 4009 cannot duplicate subject matter covered through regular course offerings.

II. Technology Level Course Descriptions

ANSC 0020.02: Dairy Industry I.

Students participate in an examination of the structure of the dairy industry and of the supply management system in which dairy farms operate. They will also be required to identify current issues facing the industry and to examine their potential impact on sustainability and opportunities in the Atlantic Canadian industry.

NOTE: Fall semester – This is a Workplace Readiness course required for the

Dairy Farming option in the Diploma in Business Management.

FORMAT: Lecture 1 hour.

ANSC 0021.02: Dairy Industry II.

A continuation of the topics in ANSC 0020. Students extend their examination of the issues facing the dairy industry in a series of lectures presented by speakers from a variety of fields.

NOTE: Winter semester – This is a Workplace Readiness course required for the

Dairy Farming option in the Diploma in Business Management.

FORMAT: Lecture 1 hour.

ANSC 0022.00: Equine Industry.

This course enables students to examine the structure of the equine industry and to discuss the issues, challenges, and opportunities facing the industry. Speakers from the equine industry are invited to discuss relevant topics, and students participate in the discussion and write summaries of the discussion.

NOTE: Fall semester – This is a Workplace Readiness course required for the

Equine Specialty option in the Diploma in Business Management.

FORMAT: Lecture 1 hour.

ANSC 0112.02: Animal Biology and Management.

Students examine production cycles, reproduction, and genetics in farm animals, with a focus on care and management during breeding, parturition, growth, and lactation. Lectures cover the principles that are common to all species, and the labs and tutorial sessions focus on more specialized topics that are relevant to the management of bovine, equine, and other ruminant species.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

ANSC 0113.02: Principles of Animal Welfare & Husbandry.

Students examine the biological basis for animal behaviour, animal welfare, environmental physiology, and animal health. They also examine the role and importance of legislation and voluntary codes of practice in animal welfare and animal health. The course will enable the student to analyze and select handling practices, housing options, biosecurity, and disease prevention options that meet the needs of the animal and the enterprise. Lectures cover the principles that are common to all species, and the labs and tutorial sessions focus on more specialized topics that are relevant to the management of bovine, equine, and other ruminant species.

NOTE: Winter semester

FORMAT: Lecture 2 hours, lab 2 hours

ANSC 0114.02: Animal Feed and Nutrition Management.

Students examine in detail the biology of digestion and nutrient metabolism and the assessment of feedstuff quality in forage-based feeding systems. The course will enable the students to analyze strategies for meeting nutrient requirements and avoiding nutritional problems, and to assess feed efficiency and feed costs for the enterprise. Lectures cover the principles that are common to all species, and the labs and tutorial sessions focus on more specialized topics that are relevant to the management of bovine, equine, and other ruminant species.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

ANSC 0116.02: Companion Animal Enterprise.

This course will enable the student to oversee the routine care of animals in a companion animal facility and to develop some of the basic workplace communication skills necessary in such an enterprise. Students examine the structure of the companion animal industry and discuss the issues, challenges, and opportunities facing the industry. The basic care component covers mainly dogs and cats, with some coverage of other species, and a portion of this will be conducted outside class time. The industry overview component covers all species represented by the industry, as well as the different segments of the industry.

NOTE: Fall semester

FORMAT: Lab 3 hours

ANSC 0117.02: Companion Animal Growth, Development, and Nutrition.

Students examine the biology of growth and development in companion animals and analyze the requirements for care and management throughout the life cycle. They also examine the biology of nutrition and the nutritional requirements throughout the life cycle, and relate this to information on specific products, supplements, and feeding regimes. The course will enable the student to work with a nutritionist or veterinarian in establishing and implementing feeding and nutritional programs, and to interpret the legal and other limitations to providing foods and nutrition products and services for companion animals. The course covers mainly dogs and cats, with some coverage of other species.

NOTE: Winter semester

FORMAT: Lab 3 hours

PREREQUISITE: ANSC 0116

ANSC 0204.02: Dairy Herd Health and Nutrition Management.

Students participate in an in-depth examination of the health and nutrition requirements of the individual dairy cow, and of the requirements for maintaining high standards of health and optimal nutrition in the dairy herd. The course will enable the students to use herd records and on-site evaluations to troubleshoot health and nutrition problems and to identify solutions to those problems. The course will also enable the student to use a variety of technical and human resources in meeting future challenges in health and nutrition.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ANSC 0112, ANSC 0113, ANSC 0114

ANSC 0205.02: Optimizing Bovine Reproductive and Genetic Performance.

Half of the course is devoted to an in-depth examination of bovine reproduction and of the requirements for maintaining high success rates in heat detection and AI procedures. Students will use herd records and on-site evaluations to troubleshoot breeding problems and to identify solutions to those problems, and use a variety of technical and human resources in meeting future challenges in breeding management. In the other half of the course, students participate in an in-

depth examination of dairy genetics and of the tools and systems used for evaluating performance and genetic merit in the dairy industry. Students will use herd records and on-site evaluations to identify breeding goals for the herd and to select sires and dams that will help the herd achieve these goals. The course will enable students to use a variety of technical and human resources in meeting future challenges in dairy genetics. Applications to the beef industry will be discussed as well.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ANSC 0112

ANSC 0206.02: Managing Dairy Milking Systems and Housing Facilities.

Students examine in detail the management of the milking system and evaluate current and future options in milking systems technology. They also examine current and future options for housing and equipment, and analyze the ability of those options to meet the financial, environmental, and animal welfare goals of the operation. Tours and field trips give the students an opportunity to view a variety of housing and milking systems. Some of the tours or field trips may be conducted outside scheduled class time.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ANSC 0113

ANSC 0207.02: Records Management and Decision-making for Dairy Herds.

Students examine record-keeping options for dairy herds and use herd records to analyze key aspects of herd and farm performance. They also use case studies and records summaries to benchmark performance and to analyze the herd's ability to meet its targets. Establishing and maintaining the records required to meet certification (e.g., HACCP) requirements are also integral components of the course.

NOTE: Winter semester

FORMAT: Lab 3 hours

CO-REQUISITE: ANSC 0204, ANSC 0205

ANSC 0208.02: Biology and Care of Aquarium Fish and Reptiles.

Students examine the biology of growth and development in aquarium fish and reptilian species, and analyze the requirements for care and management throughout the life cycle, including the requirements for nutrition and health care. A considerable portion of the course is devoted to the selection and set-up of aquarium and terrarium systems and to troubleshooting problems. The course will enable the student to ensure high standards of health and nutrition for fish in aquarium systems and for reptiles.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours. Offered in alternate years; next offered in 2015/2016.

PREREQUISITE: ANSC 0116

ANSC 0209.02: Biology and Care of Pet Birds and Small Mammals.

Students examine the biology of growth and development in avian and small animal species and analyze the requirements for care and management throughout the life cycle, including the requirements for nutrition and health care. The selection and set-up of housing systems are important components of the course. The course will enable the student to ensure high standards of health, nutrition, and care for birds and small animals.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours. Offered in alternate years; next offered in 2014/2015.

PREREQUISITE: ANSC 0116

ANSC 0210.02: Introduction to Companion Animal Health.

Students examine the causes and predisposing factors of diseases common to companion animals, and of the principles of disease management and prevention as they apply to companion animal facilities. The course will enable students to establish and implement biosecurity and health management protocols, and to interpret the legal and other limitations to providing health care products and services in consultation with the facility veterinarian. The course covers mainly dogs and cats, with some coverage of other species.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ANSC 0117

ANSC 0211.02: Companion Animal Facilities Management.

Students examine the biological and behavioral considerations important in designing companion animal housing and facilities, and explore the options available for ensuring high standards of animal welfare in the facility. The course will enable the student to design and implement protocols for managing the facility and for ensuring compliance with regulatory requirements or industry standards. Students participate in tours and field trips to view a variety of housing and facilities options. Some of the tours or field trips may be conducted outside scheduled class time. The course covers mainly canine and feline facilities, with some coverage of facilities for other species.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

ANSC 0212.02: Companion Animal Genetics and Reproduction.

Students examine the processes of reproduction and lactation in companion animals, and analyze the requirements for care and management during mating, parturition, and lactation. They also study the common breeds and the genetics of colour and conformation, and examine the requirements for choosing breeders and planning matings that meet the objectives of the breeding program. The course covers mainly dogs and cats, with some coverage of other species.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ANSC 0116

ANSC 0213.02: Equine Growth and Nutrition.

Students will study the physiological growth and development at every life stage from conception to old age in the horse. The nutrition component focuses on the digestive system of the horse and the requirements for specific nutrients at different stages of growth and development. Analysis of different types of feeds and the formulation of diets based on life stage and level of activity will be conducted. The course will enable the student to troubleshoot nutrition problems in a variety of equine enterprise types.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ANSC 0113, ANSC 0114

ANSC 0214.02: Equine Health, Genetics, and Reproduction.

Students examine in detail the processes of reproduction and lactation in horses, as well as the requirements for care and management of the mare during breeding, parturition, and lactation. Students also study the growth and development of the foal and the requirements for the care of the foal. The common breeds of horses and the genetics of coat colour, conformation, and performance potential will be discussed. The course will enable students to evaluate the genetic merit of sires and dams, and to plan matings and genetics strategies to meet the genetic goals of their particular operation. Students will obtain a basic knowledge of health care and disease prevention, and be able to address issues related to biosecurity.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ANSC 0113

CROSS-LISTING: ANSC 2006

ANSC 0215.02: Equine Facilities Management.

Students examine the behavioural and environmental considerations important in designing an equine facility, and explore the options available for ensuring high standards of animal welfare in the facility. The course will enable students to design and implement protocols for managing the facility and for ensuring compliance with regulatory requirements or industry standards. Students participate in tours to view a variety of facility options. Some of these tours may be conducted outside scheduled class time.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ANSC 0213, ANSC 0214

ANSC 0216.02: Equine Health and Fitness.

Students examine the anatomy and physiology of the horse with special attention to the respiratory, skeletal, muscular, and cardiovascular systems. The course will enable students to analyze how the horse's health and soundness is affected by its environment, level of fitness, and condition.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ANSC 0213

ANSC 0217.02: Companion Animal Behaviour.

In this course, students will study the fundamentals of animal learning and how those principles affect success in training and behaviour modification. Attention will be given to understanding and solving behaviour problems (e.g., separation anxiety, dominance aggression, fighting, inappropriate urination, and behavioural stereotypes). The focus is on companion animals – dogs and cats, and to some extent horses. The normal development of behaviour in those species will be covered.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

CROSS-LISTING: ANSC 2003

ANSC 0218.02: Beef Production and Management.

This course will focus on the management of commercial beef farms ranging from cow/calf to stocker/feeder operations. Components of breeding, nutrition, and behaviour will be discussed. A systems approach to the management of the farm will be undertaken. The role of the manager in optimizing production is an important component. A historical perspective on the Atlantic beef industry along with coverage of emerging trends will be part of the course. Key beef industry issues such as the impact of BSE, animal welfare, and beef marketing will be discussed.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ANSC 0114

CROSS-LISTING: ANSC 2007

ANSC 0219.02: Equine Behaviour and Learning.

This course explores the evolution of the horse and the history of equine domestication. Equine behaviour in both the feral and domesticated horse will be examined, and students will learn how understanding equine body language has practical applications within current training and husbandry practices. Type and causation of various abnormal equine behaviours and methods of behavioural rehabilitation will be covered. Students will examine equine perception and principles of learning, and how application of these principles can improve training and behaviour. Students will also study the human horse relationship.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: ANSC 0113

Applied Science

I. Undergraduate Degree Level Course Descriptions

APSC 1000.03: Computer Aided Graphics and Projection.

Freehand sketching, instrument drawing, and Computer Aided Drafting (CAD) techniques are used to develop proficiency in understanding and communicating in the graphical language. Experience is gained in reading and drawing orthographic, isometric, and oblique projections of objects as well as sectional and auxiliary views. Both Architectural and SI units of linear measure will be used in producing scaled drawings.

NOTE: Fall semester

FORMAT: Lecture 2 hours, lab 3 hours

APSC 1003.03: Practices and Mechanics of Materials.

This course deals with the practices of selecting and working with materials, including considerations for green practices. Selection of materials is based on many properties depending on the application; usually strength, workability, durability, and costs are key concerns. Green practices during the construction of machines, structures and buildings will include traditional properties and their environmental and resource efficiency including their deconstruction. Using green materials and products promotes conservation of dwindling non renewable resources and helps to reduce the environmental impacts associated with the extraction, transport, processing, fabrication, installation, reuse, recycling, and disposal of these source materials.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

APSC 1004.03: Wood Construction Technology I.

This is an introductory course in the selection, operation, and maintenance of woodworking hand and power tools. The principles of selection, operation, and maintenance of workshop tools in the modern woodworking shop are studied. Students will be required to present seminars on various fabrication techniques and construction tools. Occupational Health and Safety issues pertaining to wood shop work procedures will be covered.

NOTE: Winter semester

FORMAT: Lecture 2 hours, lab 3 hours

APSC 1005.03: Metal Construction Technology I.

This is an introductory course to familiarize students with common metal construction technologies, machines, and tools used in a metal fabrication shop. The principles of welding and welding applications will be emphasized. Students will be required to present demonstrations on the use of various metal hand and power tools, as well as present a seminar on some form of metal fabrication technology. Occupational Health and Safety issues pertaining to metal shop work procedures will be covered.

NOTE: Fall semester

FORMAT: Lecture 2 hours, lab 3 hours

APSC 2000.03: Environmental Impacts and Resource Management (A).

This course is an introduction to environmental engineering and technology, emphasizing a quantitative engineering approach. The course addresses the issues associated with the safe and ecologically appropriate handling, processing, storage, and utilization of organic wastes arising from human activities, including agricultural and bio-resource production systems. Topics covered will include: growth models for populations of living organisms, as well as models for depletion and replenishment of natural resources; the concept of mass and energy balances applied to quantify changes in environmental systems; physical, chemical, and biological unit operations for treatment and reduction of solid,

liquid, and gaseous wastes; and reduction of pollution impacts on air and water resources.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: BIOA 1002, CHMA 1001

APSC 2002.03: Bioresource Systems Analysis.

The objective of this course is to introduce the concept of systems theory and analysis. The emphasis will be on the use of bioresource science principles applied to environmental and technological systems. Students will be exposed to case studies and special lectures focusing on bioresource science and systems analysis as an integrated problem-solving tool. Real-world systems will be examined through field tours and guest speakers. New faculty will give case studies in their areas of specialization.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

APSC 2004.03: Aquacultural Environment (A).

Principles necessary for understanding and providing optimal aquatic environments for aquaculture production are reviewed. Topics in water habitat management will be emphasized, including: water properties of both fresh- and salt-water systems; water quality and reconditioning techniques; maintenance of dissolved oxygen and removal of metabolic wastes in aquaculture rearing systems; and evaluation of water resource requirements for aquaculture.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

APSC 2007.03: Fluid Power Technology.

This course covers the subjects essential to understanding the design, analysis, operation, and maintenance of fluid power systems: hydraulic, pneumatic, and water. Emphasis is placed on the practical applications of fluid power and the functioning of system components such as reservoirs, pumps, compressors, motors, valves, filters, lines and hoses, and mechanical and electrical controls in typical fluid power circuits. The principles of fluid flow, pressure and force, energy conservation, and power in the context of using fluid energy to do useful mechanical work are covered. Theory is presented to emphasize how and why fluid power systems operate. General maintenance, safety, and environmental issues associated with fluid power systems are also discussed.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

APSC 2008.03: Digital Electronics and Computer Interfacing.

This course covers the theory and applications of digital electronics technology and the control of digital devices by computers and programmable logic controllers (PLCs). Digital technology has become the dominant method of communication, control, sensing, computation, and amusement in modern society. This course will provide the foundation to better understand current and future digital systems. Digital logic circuits, data forms, and applications are studied. Computers in the laboratory are used to interface with and control a variety of digital devices such as computer numerical controlled (CNC) machines, robotics, cameras, scanners, lab equipment, etc. Students are introduced to Visual Basic programming for interfacing with computer ports and analog input devices. Hands on projects are completed to control real-world applications such as traffic lights, process control and experimentation equipment.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

APSC 2009.03: Metal Construction Technology II.

This is an advanced course in metal construction technologies using power machines (including CNC) and tools used in a metal fabrication shop. Advanced principles of welding and welding applications will be emphasized. Students will be required to present demonstrations on the use of various power machines, and to design and construct a major metal project using the skills learned in both Metal Construction Technology courses.

NOTE: Winter semester

FORMAT: Lecture 2 hours, lab 3 hours

PREREQUISITE: ENGN 1005

APSC 2010.03: Wood Construction Technology II.

An advanced course in the operation and maintenance of woodworking hand and power tools, and shop machinery. Students will learn about specialized machinery and advanced joinery technologies. The operation, maintenance, and repair of workshop tools in the modern woodworking shop are studied, with emphasis on re-alignment and setting up for accessories and jigs. Written work safety

procedures will be reviewed. Individual projects are undertaken by students with the skills acquired in both Wood Construction Technology courses, utilizing the shop equipment.

NOTE: Fall semester

FORMAT: Lecture 2 hours, lab 3 hours

PREREQUISITE: ENGN 1004

APSC 2011.03: Technology for Precision Agriculture.

This course will provide students with a fundamental understanding of the concepts and principles related to precision agriculture. This includes the technology and use of electronics in collecting and analyzing data with emphasis on spatial variability: electronic sensors, monitoring instrumentation, computer equipment, and machine controllers. Nutrient management systems, application of GPS-based surveys, precision farming software (e.g., SSToolBox), geographic information system (GIS) software utilization, and GPS hardware are examined.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

APSC 2012.03: Introduction to Bioresource Science (A).

This course is an introduction to environmental science and engineering technology with a specific focus on agriculture, and consists of the ENVA 2000 lectures plus additional weekly tutorials and labs by the Engineering department. This combination provides an efficient means to provide the environmental science and the applied management of resources. The course is designed to provide an introduction to horizon topics in this rapidly developing field that are the subjects of specialized, upper-level courses available in the program, and it provides a solid foundation for some environmental science courses. Topics to be covered include: overviews of green-collar jobs and the new bioresource economy, and of sustainable agroecosystem management; introductions to the management of sustainable water and energy resources, including alternative waste water, biosolids, and biofuels; introductions to materials life-sourcing; geographic information systems and precision agriculture.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: BIOA 1002, CHMA 1001

EXCLUSION: Students can receive credit for either ENGN2012 or ENVA2000, but not both.

APSC 2013.03: Machinery and Building Technology (A).

Two keys to the success of utilizing biomaterials are selection of appropriate machines and designing effective facilities to manage the production/processing system. In the first half of the course, students are introduced to the types of equipment, their productivity, and methods of selection for efficient operation. This will include machinery for soil preparation, planting, crop care, and harvesting. The machines and their unit operation are analyzed with respect to functions, work rates, material flow and power usage. The importance of monitoring machine performance relating to work quality and environmental effects of machine operation will be studied. The labs will emphasize safety, basic maintenance, adjustment, calibration and performance testing. The second half of the course provides an introduction to the planning process of structures and various topics related to the use of building materials, particularly "green" materials. Functional layouts and ventilation principles of storage and production buildings are considered. Field trips supplement the lecture material. A term paper is required.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

CROSS-LISTING: ENGN 0201

APSC 3001.03: Electrotechnology (A).

Electricity is integral to our society, and this course reviews application of AC and DC electricity. Safety and measurements are practised during hands-on lab sessions. Common sensors, measurements and control systems are discussed and applied to improve energy management.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: PHYS 1000 or PHYS 1002

APSC 3013.03: Aquacultural Systems Technology (A).

Support facilities, equipment, and systems for aquatic production will be examined. Topics studied will include: selection of component materials and structures suitable for confinement, protection, and growth of aquaculture species; principles of design and selection of equipment for recirculation systems for

aquaculture; and the principles of water flow and handling in open and closed conduits.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

APSC 3015.03: Irrigation and Drainage.

This course examines basic soil/water/plant/atmosphere relationships. It introduces students to soil and water conservation and management principles. The course covers irrigation and drainage of golf courses, athletic areas, parks, and residential landscapes.

NOTE: Winter semester

FORMAT: Lecture 2 hours, lab 3 hours. Offered in alternate years; next offered in 2015/2016.

EXCLUSION: Students who have credit for ENGN 3010 may not take ENGN 3015 for credit.

APSC 3018.03: Technology Modules.

This course deals with the operating concepts of CNC machines, plastics forming and construction technology, and transportation technology in a modular format. Approximately 4 weeks will be allocated to the study of each module area. The students will be able to perform operations in each technology area upon completion of the appropriate module. Practical hands-on laboratory and shop experiences are emphasized, as are associated aspects of Occupational Health and Safety. Students will also make presentations to the class regarding specific features and operations of the technologies studied.

NOTE: Winter semester

FORMAT: Lecture 5 hours

APSC 3019.03: Communications Technology.

This course addresses issues, systems, and methodology in computer-related communications technology. Among the topics studied are desktop publishing, digital photography and image editing, video production, web page design, and presentation software usage. Supplementary classes in graphic design and screen printing will be available as time allows. Emphasis is placed on practical production techniques and individual design situations.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

APSC 3020.03: Energy Production and Utilization.

This lecture-based course provides an overview of the whole energy system, focusing on selected attributes of energy. The assessment, management and remediation of energy production is a global issue, which will ultimately impact all walks of life, business, industry and future infrastructure. It includes an introduction to the energy supply chain, transmission and distribution systems, energy use, energy policy and the environment and methods of generation. It also includes an overview of renewable energy assessment techniques and feasibility tools.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: MTHA 1001, preparatory: PHYS 1000 or PHYS 1002

APSC 4001.03: Water Quality Issues (A).

Current environmental water quality issues such as contamination of surface and ground water are discussed. Emphasis is placed on providing solutions to the water quality problems. Agricultural water quality models will also be examined.

NOTE: Winter semester

FORMAT: Lecture 3 hours. Offered in alternate years; next offered in 2015/2016.

APSC 4004.03: Energy Conversion and Assessment (A).

This lecture-based course focuses on selected attributes of existing and renewable energy options, including the reserves and consumption of oil, coal and gas; fossil energy technologies for power generation; fundamental principles, applications and status of solar energy, biomass energy, wind energy and hydro-power; and outlook and evaluation of renewable energy.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: APSC 3020

APSC 4005.03: Waterscape Ecology and Management (A).

This lecture-based, non-quantitative course focuses on selected basic attributes of land-water interactions and aquatic degradation as they relate to issues of waterside and watershed development in rural and (sub)urban environments. The course provides an introduction to a variety of aquatic principles and how they in

turn are influenced by human activity, followed by an introduction to and review of the many management options available to land-use planners to mitigate development pressures. Broad latitude will be permitted in the subject areas of the assignments in order to appeal to individuals' interests and career aspirations in environmental engineering, environmental science, horticulture, international development, and environmental governance and sociology.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

APSC 4006.03: Wastewater Management (A).

This course gives an overview of sources of water pollution, particularly in the rural situation, and standard methods of treatment. Alternative approaches such as wetlands and filters will be discussed. Laboratory sessions will include field trips, methods of sampling, and some testing of water.

NOTE: Fall semester - Environmental Sciences

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: At least third-year standing

II. Technology Level Course Descriptions

APSC 0100.02: Surveying.

An introduction to surveying principles and recording techniques. Students are given lectures and assignments to assist in understanding the principles employed in surveying, and they practise these during the labs by conducting various surveying exercises. Practice is gained in the proper use of surveying instruments (tape, level, and transit) through exercises involving measurements of horizontal and vertical distances and angles. These include chaining, stadia, benchmark, profile and contour leveling, triangulation and traverse exercises, and construction surveying, with emphasis on their application to farm construction projects.

NOTE: Fall semester

FORMAT: Lecture 2 hours, lab 3 hours

APSC 0101.02: Horticultural Technology.

Small gasoline engine structure and operating theory are studied, with emphasis on engine maintenance and troubleshooting. This course includes basic hydraulic theory, emphasizing the operation of common systems in use today. A wide range of horticultural machinery is studied, as well as the principles of mixing, placing, and curing concrete, fence making, and chainsaw operation.

NOTE: Winter semester

FORMAT: Lecture 2 hours, lab 3 hours

APSC 0200.02: Environmental Management.

Students examine the major environmental issues and risks in agricultural production. The emphasis is on how agricultural activities impact the environment and how environmental issues, regulations, and programs impact the way agricultural activities are carried out. The course will enable the student to identify the legal and other requirements for reducing the environmental risks associated with production activities, and to work with an engineer or environmental specialist in determining ways to minimize environmental risk.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: SOIL 0100

APSC 0201.02: Machinery and Building Technology.

Two keys to the success of utilizing biomaterials are selection of appropriate machines and designing effective facilities to manage the production/processing system. In the first half of the course, students are introduced to the types of equipment, their productivity, and methods of selection for efficient operation.

This will include machinery for soil preparation, planting, crop care, and harvesting. The machines and their unit operation are analyzed with respect to functions, work rates, material flow and power usage. The importance of monitoring machine performance relating to work quality and environmental effects of machine operation will be studied. The labs will emphasize safety, basic maintenance, adjustment, calibration and performance testing. The second half of the course provides an introduction to the planning process of structures and various topics related to the use of building materials, particularly green materials. Functional layouts, ventilation principles of storage, and production buildings are considered. Field trips supplement the lecture material. A term paper is required.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

CROSS-LISTING: ENGN 2013

Aquaculture

I. Undergraduate Degree Level Course Descriptions

AQUA 2000.03: Introduction to Aquaculture (A).

The history and the current status of world aquaculture production are discussed, with emphasis on species with potential in Atlantic Canada. Advances in freshwater or marine finfish and shellfish culture are included. Aquatic plant production is discussed. Business aspects of aquaculture are introduced. The course includes field trips to aquaculture and related facilities.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

AQUA 3000.03: Fish Health (A).

This course outlines concepts of disease with special reference to fish. Diseases of various etiological types are considered, with emphasis on those in the aquaculture environment. The relationships of management and economics to disease in cultured fish are detailed, and public health concerns are addressed. Diagnostic, prophylactic, and treatment methods are outlined and practised.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: Preparatory: BIOA 3005

AQUA 4000.03: Finfish Production.

Aspects of breeding and genetics, fish management, financial management, economics, marketing, housing systems, and water management are presented in an integrated approach to provide a sound understanding of this aspect of aquaculture. Management of finfish throughout the life cycle is presented. The course includes a weekend field trip to commercial farms; attendance is obligatory.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: NUTR 3000 or NUTR 3002, AQUA 3000, BIOA 3005

AQUA 4001.03: Shellfish Production.

Factors affecting profitable production of shellfish are discussed in the context of developing a sound industry with potential to address future opportunities. A survey of culture techniques used in shellfish production is undertaken.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: NUTR 3000 or NUTR 3001, AQUA 3000, BIOA 3005

Art

I. Undergraduate Degree Level Course Description

ARTS 2000.03: Nature's Image: A Survey of Landscape Art (H).

This course will provide an introduction to the history of art forms depicting landscape, with the major focus being on landscape painting. The course will consist of art history lectures and a studio component in which drawing techniques, collage, and colour theory will be explored. Students will develop skills in composition and will gain an increased appreciation for landscape art traditions.

NOTE: Fall semester

FORMAT: Lecture/studio 3 hours per week.

Biology

Below are courses offered in Biology by the Faculty of Agriculture. Please see the Biology Section in the Faculty of Science for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

BIOA 1002.03: Biology I.

This is the first of a two-semester course sequence exploring various general principles common to the biological sciences. The biological significance of cell structure and function, metabolism, the cell cycle, sexual reproduction, Mendelian genetics and basic gene structure are among the topics to be considered in the lecture sessions. The labs reinforce and enhance the learning of selected topics discussed in the lectures.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

BIOA 1003.03: Biology II.

This is the second of a two-semester course sequence exploring various general principles common to the biological sciences. In addition to evolutionary processes and patterns, the fundamental systematics and diversity of procaryotes, protists, plants, fungi and animals are emphasized in the lecture sessions. The laboratory continues to reinforce and enhance the learning of selected topics discussed in the lectures.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: BIOA 1002

BIOA 1030.03: Biology for Engineers

This course is intended to give engineers a biological/environmental perspective that is an essential element in all modern, successful engineering projects. It will focus on the complex interface between living systems and the human environment. This course includes a basic introduction to cell structure and function, hierarchies and ecology. Special topics will include biomimicry and environmental impacts as they apply to engineering design.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours

BIOA 2000.03: Cell Biology.

An introduction to cell biology. Topics include cell metabolism, the structure and function of organelles of the eucaryotic cell, cell growth, cell movement, and the procaryotic cell. Specialized cell functions will also be discussed.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

BIOA 2001.03: Cell Biology Laboratory.

This course combines the lectures of BIOA 2000 with a laboratory section. Students will participate fully in BIOA 2000 and, as well, complete laboratory sessions to complement lecture material. Students may receive credit for either BIOA 2000 or BIOA 2001, but not both.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

BIOA 2002.03: Plant Physiology.

A study of the different functions of the plant, including growth, photosynthesis, mineral nutrition, water relations and translocation of solutes, and plant orientation, development, and reproduction.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

BIOA 2004.03: Structural Botany.

The basic morphology and anatomy of the seed plants are presented from a developmental perspective. The structural aspects of the various modes of plant reproduction are also included. Emphasis is placed on obtaining an understanding

of plant structure that will complement crop physiology, weed biology, and plant pathology.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

BIOA 2005.03: Principles of Plant Pathology (A).

This course deals with the principles of plant pathology and the control of diseases caused by bacteria, fungi, mycoplasma-like organisms, viruses, and nematodes. Labs deal with basic techniques used in plant pathology, such as fungal, bacterial, and nematode isolation, identification, and inoculation.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: BIOA 1003, MCRA 2000

BIOA 2006.03: Mammalian Physiology.

An introduction to the body systems and how they function. The student should develop a basic understanding of physiological processes and how they are regulated and integrated by the nervous and endocrine systems. Topics covered include: homeostasis; the nervous, muscular, endocrine, cardiovascular, respiratory, renal, and digestive systems; and an introduction to environmental physiology.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

CO-REQUISITE: CHMA3001

BIOA 2007.03: Mycology.

An introduction to the fungi, including members of the Kingdoms Eumycota and Chromista, and the protozoan pseudofungi. The labs in this course will focus on classification of the fungi, but lecture topics will also include fungal physiology, genetics, ecology, industrial mycology, food spoilage, and medical mycology. Students will be required to submit a microfungus collection and a mushroom collection.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours. Offered in alternate years; next offered in 2015/2016.

BIOA 2008.03: Plant Diversity.

This course emphasizes the biology, evolution, and diversification of the major phyla of the Kingdom Plantae. The lectures illustrate the fundamental reproductive unity underlying the diversity of all land plants, using examples from both fossil and living species. In addition to exploring the major plant groups and their subdivisions in the laboratory, students learn to use the appropriate resources to identify specific plants.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: Preparatory: BIOA 1003

BIOA 3000.03: General Entomology (A).

An introduction to the science of entomology from an agricultural perspective. Insect anatomy, physiology, and taxonomy are considered; also included are discussions on insect behaviour, reproduction, life cycles, and population ecology. Basics of monitoring techniques and population dynamics are illustrated. Students will be required to prepare and submit an insect collection.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: Preparatory: BIOA 1003

BIOA 3001.03: Ecology.

An introduction to the principles and general concepts of ecosystem structure and function is presented. The dynamics of populations and community interactions are considered in relation to various biotic and abiotic environmental influences. The laboratory reinforces topics covered in the lectures and readings by emphasizing the importance of field observation and interpretation.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: BIOA 1002, BIOA 1003

BIOA 3002.03: Weed Science (A).

This course deals with the principles of weed science. Included are discussions on weed recognition, and chemical and non-chemical approaches to controlling weeds in various agricultural crops and in lawns and non-crop areas. The selection, safe use, handling, and storage of herbicides are stressed, along with the environmental impact of the different methods of weed control.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: BIOA 1002, preparatory: BIOA 2002

BIOA 3003.03: Comparative Vertebrate Anatomy.

An introduction to comparative anatomy. Emphasis is placed on analyzing vertebrate structure. Comparisons of form and function within the Vertebrata are discussed with an evolutionary perspective. This is supplemented in the laboratory by detailed dissections of representative vertebrates.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours. Offered in alternate years; next offered in 2014/2015.

PREREQUISITE: BIOA 1003

BIOA 3004.03: Environmental Physiology (A).

A study of animals in relation to their environment. The influence of environmental factors on body processes and their relationship to productive efficiency and animal well-being are examined. Major topics include temperature regulation and body homeostasis, biological rhythms, photoperiodism, and environmental and hormonal interrelationships.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours. Offered in alternate years; next offered in 2014/2015.

PREREQUISITE: BIOA 2006 or BIOA 3005

BIOA 3005.03: Physiology of Aquatic Animals (A).

The form, function, physiological integration, and behaviour of major types of aquatic animals is considered. Emphasis is placed on Classes of organisms, using commercially important species as primary examples.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: BIOA 1003

BIOA 3006.03: Aquatic Ecology.

The biology of aquatic species in marine and freshwater environments is discussed, with emphasis on biological systems involving farmed species, and organism interdependencies and interactions are examined. An introduction to the principles of ecology at the community and ecosystem level of integration is included.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: BIOA 1003

BIOA 3008.03: Growth, Reproduction and Lactation (A).

A continuation of BIOA 2006, emphasizing physiological systems relevant to animal production. Major topics include growth and development as it applies to meat and brood animal production, and the physiology and management of reproduction and lactation in domestic species.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: BIOA 2006

BIOA 4000.03: Avian Biology (A).

This course is a study of topics in biology of special relevance to the commercial use of avian species. Physiological, biochemical, and genetic control and manipulation of such processes as reproduction, growth and development, and immunity are examined.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours. Offered in alternate years; next offered in 2015/2016.

PREREQUISITE: ANSC 2005, CHMA3001 (or CHMA 2005), GENE 2000

BIOA 4002.03: Conservation Biology.

This course has limited enrollment. This course will examine the ecological concepts underlying current issues in conservation biology. Topics covered include effects of agricultural habitat fragmentation on wildlife, conservation of biodiversity, stability and resilience of ecosystems, optimal design of nature reserves, and habitat heterogeneity. This is a discussion-style course concentrating on current published scientific papers chosen by the students. Students will also learn to read and critically evaluate scientific papers, and to apply this ability to writing literature reviews.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: 60 credit hours

BIOA 4003.03: Plant-Microbe Interactions.

This course is an advanced study of the interactions between plants and microorganisms, with emphasis on plant pathogenic micro-organisms but

including symbiotic and other microorganisms that can provide a benefit to the plant. Students will study the histology of the infection process in relation to plant disease and symbiosis, and the impact that infection has on the physiology of the host. Responses of the plant to infection will be studied, with emphasis on Systemic Acquired Resistance and Induced Systemic Resistance.

NOTE: Fall semester

FORMAT: Lecture 3 hours, tutorial 2 hours per week.

PREREQUISITE: BIOA 2005, 45 credit hours

BIOA 4004.03: Animal Adaptation and Stress.

This is an advanced-level course in the comparative physiology of animal adaptation and stress. The concepts of allostasis, homeostasis and the physiological stress response will be reviewed, and the role of endocrine regulation in animal adaptation under changing external (environmental) and internal (life-history) demands will be discussed. Special emphasis will be placed on mammalian and avian adaptation in response to changes in the internal, physical, and social environments. Species discussed may include livestock, companion and zoo animals, and wildlife.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours. Offered in alternate years; next offered in 2015/2016.

PREREQUISITE: At least third-year standing/preparatory: BIOA 3004

II. Technology Level Course Descriptions**BIOA 0101.02: Plant Pathology.**

This course deals with the diagnosis of plant diseases caused by fungi, bacteria, phytoplasmas, viruses, and nematodes. Students will develop skills to differentiate plant diseases caused by microbial pathogens from those caused by abiotic factors. Principles of plant disease management will be covered. Labs deal with basic techniques used in plant pathology, such as fungal, bacterial, and nematode isolation, identification, and inoculation.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

BIOA 0102.02: Plant Physiology and Stress Management.

This course is aimed at gaining an insight into various plant physiological, growth, and developmental processes and to develop a fundamental understanding and appreciation as to how various environmental factors influence growth, differentiation, and developmental processes in plants. The course also examines the impact of various abiotic stresses on plant growth and development, yield, and productivity, including acclimation and adaptation techniques. Plant diagnosis will be emphasized.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

BIOA 0103.02: Weed Science.

This course deals with the principles of weed science. Included are discussions on weed recognition, and chemical and non-chemical approaches to controlling weeds in various agricultural crops and in lawns and non-crop areas. Selection, safe use, handling, and storage of herbicides are stressed.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

BIOA 0200.02: Entomology.

An introduction to the study of the phylum Arthropoda, with particular reference to the class Hexapoda (Insecta), emphasizing insect pests of the northeast.

Anatomy, physiology, taxonomy, behaviour, and ecology of insects are considered during lectures and laboratory work. Discussions on the relationship of insects to humans, basics of insect control methods, and pesticide safety are included. Students will be required to prepare and submit an insect collection.

NOTE: Fall semester

FORMAT: Lecture 2 hours, lab 2 hours

Chemistry

Below are courses offered in Chemistry by the Faculty of Agriculture. Please see the Chemistry Section in the Faculty of Science for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

CHMA 0050.00: Preparatory Chemistry.

This non-credit course is designed for students who satisfy all other requirements for admission but lack the Grade 12 Chemistry course. The course will cover the basic material necessary for entrance into CHMA 1000, including review of the periodic table, nomenclature, chemical reactions, aqueous solutions, chemical bonding, and other topics as determined by a review of the class. CHMA 0050 is not intended to duplicate or replace Grade 12 Chemistry.

NOTE: Fall and Winter semesters

FORMAT: Lecture 3 hours, tutorial 1 hour

PREREQUISITE: Approval of the Registrar

CHMA 1000.03: General Chemistry I.

This course is designed to help students understand chemical equations, reactions, and calculations. The chemistry of aqueous media is highlighted (properties of water, ionization of weak electrolytes, buffers). In addition to the traditional classroom interaction, students will be exposed to problem-based learning and co-operative learning. Students will learn the proper use of various analytical equipment and apparatus. The laboratory work will focus on the development of practical lab skills applicable to the agricultural and environmental industries.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: Successful completion of academic Grade 12 Chemistry or equivalent.

CHMA 1001.03: General Chemistry II.

This second semester of General Chemistry will include a theoretical understanding of atomic and molecular structures. An understanding of physical equilibria will be extended to practical applications of chromatographic analyses.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: CHMA 1000

CHMA 2000.03: Organic Chemistry I.

This course provides an introduction to the structure and reactions of organic compounds. The course is approached from a mechanistic point of view and has particular emphasis on appropriate spectroscopy (IR and MS). The topics covered in this course include chemical bonding, isomerism, acid-base properties and the isolation and purification of organic compounds. The classes of organic compounds covered will include alkanes, alkenes, alkynes, simple aromatics, organohalides, alcohols, and related compounds. Laboratory work will include introductory techniques of organic chemistry and both HPLC and gas chromatography.

NOTE: Fall semester

FORMAT: Lecture 2 hours, tutorial 1 hour, lab 3 hours

PREREQUISITE: CHMA 1001

CHMA 2001.03: Organic Chemistry II.

This course builds on work begun in CHMA 2000. Functional groups included here will be carbonyls (aldehydes, ketones, acids, and their derivatives), more complex aromatics, simple organometallics, and bifunctional organic compounds. The emphasis on mechanistic chemistry will continue, as will the study of appropriate spectroscopy (MNR and UV-Vis). In addition, an introduction to organic syntheses and biomolecules will be undertaken.

NOTE: Winter semester

FORMAT: Lecture 3 hours. Offered in alternate years; next offered in 2015/2016.

PREREQUISITE: CHMA 2000

CHMA 2003.03: Food Chemistry I (A).

An introductory study of the chemistry of food and food components. The emphasis will be on water, fats, proteins, and carbohydrates (and related compounds) with an overview of vitamins, minerals, and additives. Methods of analysis will be discussed in detail and this will be augmented by hands-on laboratory experiences with these analytic procedures.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: CHMA 2000

EXCLUSION: This course may not be taken for credit by students who have credit for CHMA2004.

CHMA 2004.03: Introductory Food Chemistry (A).

An introductory study of the chemistry of food and food components. The emphasis will be on water, fats, proteins, and carbohydrates (and related compounds) with an overview of vitamins, minerals, and additives. Methods used for analysis of food components will be discussed in detail.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

EXCLUSION: This course may not be taken for by students who have credit for CHMA2003.

CHMA 3001.03: Biochemistry.

The major focus of this course will be on the biochemical pathways and activities that account for the assimilation, transformation, degradation, and synthesis of the major macromolecules in living cells. These molecules include proteins, lipids, carbohydrates, RNA and DNA. Catalytic and regulatory strategies used by living cells will also be discussed. The final topic will be to examine and understand how metabolism consists of highly interconnected biochemical pathways.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: CHMA 2000

CHMA 3003.03: Advanced Integrated Chemistry Laboratory.

The course will cover advanced laboratory topics in the fields of inorganic, general, and organic chemistry. Whenever possible these topics will be chosen from the fields of environmental science or agriculture. In particular, the use of spectroscopic techniques for the identification of chemical compounds will be applied, where appropriate.

NOTE: Fall semester

FORMAT: Lab 4 hours Offered in alternate years; next offered in 2015/2016.

PREREQUISITE: CHMA 2001

CHMA 3006.03: Mammalian Biochemistry.

A study of the application of basic biochemical principles to the molecular functions of the diverse mammalian organ systems. The subject matter is divided into three parts: Body Fluids and Their Constituents, which includes such subjects as blood coagulation, the complement system, the immune system, and their control; Specialized Tissues, such as connective tissue, nervous tissue, and muscle tissue; and Biochemistry of the Endocrine System, with the focus on the principles of endocrine biochemistry and the mechanisms of hormone action. The topics covered include general principles and mechanisms of hormone action, prostaglandins, the thyroid gland, and the gonads, as well as the hypothalamus, hypophysis, and adrenals.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: CHMA 2000

CHMA 3007.03: Food Chemistry II (A).

This course, which builds on CHMA 2003 (or CHMA 2004), will provide an in-depth study of minor food components including vitamins, colorants (natural and artificial), nutraceuticals, and textural agents. Beneficial and/or deleterious interactions between food components will be examined (Maillard, caramelization, rancidity, and enzymatic reactions). Recent advances in processing technology will be introduced.

NOTE: Winter semester– Note: This course may not be taken for credit by students who have credit for CHMA3008.

FORMAT: Lecture 3 hours, lab 3 hours. Offered in alternate years; next offered in 2015/2016.

PREREQUISITE: CHMA 2003 or CHMA 2004

CHMA 3008.03: Intermediate Food Chemistry (A).

This course, which builds on CHMA 2003 (or CHMA 2004), will provide an in-depth study of selected food components including vitamins, colorants (natural and artificial), nutraceuticals and textural agents. Beneficial and/or deleterious interactions between food components will be examined (Maillard, caramelization, rancidity, and enzymatic reactions). Recent advances in processing technology will be introduced as time permits.

NOTE: Winter semester

FORMAT: Lecture 3 hours. Offered in alternate years; next offered in 2015/2016.

PREREQUISITE: CHMA 2003 or CHMA 2004

EXCLUSION: This course may not be taken for credit by students who have credit for CHMA 3007.

CHMA 3009.03: Environmental Chemistry.

In this course students will undertake an in-depth study of the chemical processes involved in the pollution of the environment. Chemical pollution of the atmosphere, hydrosphere, and lithosphere will each be studied in depth. In each case, chemical solutions to these problems will be considered. Chemical processes such as dissolution, coordination, ion exchange, hydrolysis, ionization, and freezing point depression will be covered.

NOTE: Winter semester

FORMAT: Lecture 3 hours. Offered in alternate years; next offered in 2015/2016.

PREREQUISITE: CHMA 2000

CHMA 3010.03: Bio-Analytical Chemistry.

This course will equip the non-chemistry major with an understanding of HPLC (liquid chromatography), GC (gas chromatography), AAS (atomic absorption spectrophotometry), and UV-visible spectrophotometry. The course will use environmental, agricultural, and food samples in classroom examples and in student laboratories. Students will be exposed to proper sample preparation and analysis, data interpretation and proper laboratory techniques with each of these analytical instruments.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: CHMA 2000

EXCLUSION: This course may not be taken for credit by students who have credit for CHMA 2002.

CHMA 4001.03: Directed Studies in Chemistry.

Directed studies involve a suitable combination of directed reading, written assignments, individual study or laboratory research projects in the area of chemistry. Classes are organized and scheduled by appropriate faculty via a course coordinator. Students should approach potential instructors directly with their requests.

NOTE: Fall or Winter semester

PREREQUISITE: CHMA 2000 and 60 credit hours

CROSS-LISTING: Coordinator: J. Hoyle

Communications

I. Undergraduate Degree Level Course Descriptions

CMMT 3000.03: Communication Theory and Skills (H).

This course is designed to provide students with the opportunity to enhance their communication skills and knowledge. Since a key requirement of today's job market is the ability to communicate effectively, students will be exposed to the theory and the practice of communication. An important component of the course will be the emphasis on the practical application of communication knowledge.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: At least second-year standing

CMMT 3001.03: Teaching English as a Second Language.

In cooperation with the University of Cambridge Local Examinations Syndicate (UCLES), the International Language Institute (ILI) offers an intensive class leading to a Certificate in Teaching English to Speakers of Other Languages (CELTA). The syllabus covers six major areas: language awareness; the learner, the teacher, and the teaching/learning context; planning; classroom management and teaching skills; resources and materials; and professional development. Critical feedback is provided on teaching practice, written assignments, and evidence of professional development through the class.

NOTE: Fall, Winter or Spring semester.

FORMAT: Fall, Winter or Spring semester.

PREREQUISITE: Students must obtain a Letter of Permission from the Registrar's Office to take this class for credit. Students must then apply, register, and pay fees for this class at the International Language Institute (ILI).

II. Technology Level Course Descriptions

CMMT 0020.00: Career and Employment Skills.

This course is designed to provide an introduction to job searching and hiring strategies. Through class discussion students will explore the world of work today, the hiring process, and the development of a personal career plan. Assignments will include resumé and cover letter writing, a networking exercise, and interview preparation. Restricted to students in the Diploma in Business Management program.

NOTE: Winter semester— This is a Workplace Readiness course required for all options in the Diploma in Business Management program.

FORMAT: Lecture 3 hours for 4 weeks.

CMMT 0021.00: Introduction to Public Speaking.

The objective of this course is to enhance the student's ability to prepare and deliver different types of presentations: informative, persuasive, and impromptu. Topics covered will include assessing audience needs, developing a strong focus, outlining different styles of presentations, and writing effective introductions and conclusions. Students will learn how to evaluate a presentation and make recommendations on how to increase its effectiveness. Tips for presenting ideas visually will also be discussed.

NOTE: Winter semester— This is a Workplace Readiness course required for all options in the Diploma of Business Management program.

FORMAT: Lab 2 hours for 4 weeks.

CMMT 0030.00: English for Academic Purposes.

This course will focus on enhancing English language skills (reading, speaking, writing, listening), critical thinking, and presentation skills required to be successful in an English university setting. Students who successfully complete

CMMT 0030 will be considered to have met their English language requirement and are eligible to continue full-time studies at Faculty of Agriculture.

NOTE: Fall semester

FORMAT: 15 hours per week for 180 hours.

PREREQUISITE: NSAC/FAFU 2+2 program student who meets all of the NSAC B.Sc.(Agr.) admission requirements, has achieved a minimum score of 5.5 on the IELTS (530 TOEFL), and has been recommended by the FAFU Overseas Education College as a strong candidate

Computer Science

Below are courses offered in Computer Science by the Faculty of Agriculture. Please see the Computer Science Faculty Section for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

CSCA 1000.03: Computer Methods.

A course to develop problem-solving and decision-making abilities and computational skills using computer software. Problems of a scientific and managerial nature will be chosen from a variety of agricultural fields. The course will cover word processing, spreadsheets, databases, programming, statistics, communications, graphics, and process control. Industry-leading software will be used.

NOTE: Fall and Winter semesters

FORMAT: Lecture 3 hours, lab 2 hours.

CROSS-LISTING: CSCA 0200

CSCA 2000.03: Computer Science.

Introduction to problem-solving methods and algorithm development. Emphasis is on designing, coding, debugging, and documenting programs, using C.

NOTE: Fall and Winter semesters

FORMAT: Lecture 3 hours, lab 2 hours.

CSCA 3000.03: Data Structures and Numerical Methods.

This course introduces the student to systems analysis and software techniques. Topics covered include objects, stacks, queues, multiple linked lists, and searching and sorting algorithms and their implementation in the C programming language. The students use linear algebra and numerical methods in engineering examples while learning to implement properly structured solutions.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: CSCA 2000

II. Technology Level Course Description

CSCA 0200.02: Computer Methods.

A course to develop problem-solving and decision-making abilities and computational skills using computer software. Problems of a scientific and managerial nature will be chosen from a variety of agricultural fields. The course will cover word processing, spreadsheets, databases, programming, statistics, communications, graphics, and process control. Industry-leading software will be used.

NOTE: Fall and Winter semesters

FORMAT: Lecture 3 hours, lab 2 hours.

CROSS-LISTING: CSCA 1000

Economics

Below are courses offered in Economics by the Faculty of Agriculture. Please see the Economics Section in the Faculty of Science for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

ECO A 1000.03: Principles of Microeconomics (AH).

A course in comprehensive principles of microeconomic theory, covering the market system, producer and consumer theory, environmental and resource economics, and international trade policy. Emphasis in this course is on the application of economics to issues and problems facing many countries and their citizens today. The approach is practical and “real-world,” using microeconomic theory to develop an understanding of the issues and problems being discussed and the policy choices facing governments in dealing with these matters.

NOTE: Fall and Winter semesters; also offered as a web-based distance education course.

FORMAT: Lecture 3 hours.

ECO A 1001.03: Principles of Macroeconomics (H).

This course introduces the student to basic macroeconomic concepts and to both short-term and long-term macroeconomic analysis. The basic macroeconomic concepts include economy-wide output, price level and inflation, asset prices and interest rates, international exchange rates among currencies, and the international balance of payments. The introduction to short-term macroeconomic analysis, or business-cycle analysis, is based on John Maynard Keynes’ work on the 1929–33 Great Depression. The introduction to long-term macroeconomic analysis is based on Robert Solow’s work on economic growth. Throughout the course macroeconomics is related to the historical experience of farmers and to contemporary macroeconomic forces affecting the agri-food sector.

NOTE: Winter semester

FORMAT: Lecture 3 hours, tutorial 1 hour

PREREQUISITE: ECO A 1000

ECO A 1002.03: Introduction to Economic Reasoning (INFB) (H).

The macroeconomic aspect of this course is taught along with INFB International Food Policy and Environment as part of the International Food Business program in Module 1: Acquiring Knowledge of International Food Systems. Students will successfully complete a series of practical tasks/assignments while learning about the global food environment. Topics will include balance of trade, production possibilities, exchange rates, and monetary policy. The microeconomic aspect of the course will be taught along with MGTA1001 Introduction to International Business in Module 2: Analyzing Business Processes. Topics will include resource scarcity, supply and demand, and market structures and pricing.

NOTE: Fall Semester - Module #1 & #2 INFB

ECO A 2000.03: Intermediate Microeconomics (H).

A course in microeconomics at the intermediate level. Topics include the theory of the firm, consumer theory, markets and market structure, and externalities and public goods. All major concepts are presented graphically and some are studied using basic mathematics as well.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ECO A 1000

ECO A 2001.03: Intermediate Macroeconomics (H).

This course extends the Principles of Macroeconomics course to the intermediate level. Short-term, or business-cycle, macroeconomics is progressed from the introductory Keynesian income determination model to the IS-LM model, and then to the Aggregate Demand/Aggregate Supply model. The long-term macroeconomic content advances the introductory economic growth model in considering the relative importance of the factors determining the overall rate of

economic growth. Throughout the course macroeconomic theory is related to macroeconomic policy goals, stabilizing the economy in the short term and promoting improvement in economic well-being in the long term.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

PREREQUISITE: ECO A 1001

ECO A 2003.03: Agricultural Futures and Options (AH).

The course begins with an introduction to agricultural futures markets. This leads into a study of fundamental and technical analyses of futures markets. This part of the course concludes with a consideration of price risk management using futures markets. Following is an introduction to options markets and price risk management using options. The course concludes with a topic of importance when exporting or importing agricultural commodities internationally: managing exchange-rate risk using futures and options.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

PREREQUISITE: ECO A 1000

ECO A 2004.03: Issues in Environmental Economics (AH).

This course is designed as an introduction to environmental and resource economics issues and policy. Students will learn how economic analysis is applied to questions concerning use, management and conservation of natural resources, as well as market failures. Frameworks for measuring environmental costs and benefits and for exploring the efficiency of pollution control policies will also be developed. The impact of environmental and resource issues on the agri-food industry at all levels in the marketing chain will be examined. Applications include air and water pollution and global environmental problems, including climate change.

NOTE: Winter semester

FORMAT: Lecture 3 hours, seminar 1 hour per week.

PREREQUISITE: ECO A 1000

ECO A 3000.03: Mathematical Economics (H).

Introduction to the frequently used mathematical methods of economic analysis. The course provides the student with the basics required in more advanced economics courses. Areas of concentration include elements of mathematical economic models, linear models and matrix algebra, applications of calculus to economic problems, and optimization theory.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours, tutorial 1 hour.

PREREQUISITE: MTHA 1000, ECO A 2000

ECO A 3002.03: Agricultural and Food Policy (AH).

This course introduces students to the structure of the agri-food industry and the process of policy and implementation. A critical assessment of the institutions (organizations, programs, and policies) in agriculture is the main focus of the course. Through guest speakers, students’ presentations, interactive class discussions, and lectures, students will learn how policies are developed and who is involved in the policy development process. An historical appreciation for agricultural policy in Canada will be pursued with a critical assessment of these policies. In reviewing policy problems affecting the agri-food industry, students will examine possible solutions to these issues. Topics covered include: reasons for government intervention; historical development of agri-food policy in Canada; the policy process; players in agriculture and food policy; structure of provincial, federal, and cost-shared programs; consumers and food policy; resource and environmental policy; international agricultural and food policies; trade agreements; and agribusiness involvement in agriculture and food policy.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ECO A 1000 and at least second-year standing

ECO A 3003.03: Mathematical Programming (AH).

An introduction to the theory and application of mathematical programming in the agri-food industry. The role of matrix algebra in determining linear programming solution procedures is developed. The information requirements, organization, and skills of model building are also introduced. The course will make extensive use of computer algorithms that permit students to model real-world systems in the production, resource supply, service, and retail sectors of the agri-food industry.

NOTE: Winter semester

FORMAT: Lecture 4 hours, lab 1 hour per week.

PREREQUISITE: ECO A 3000

ECO A 3004.03: Agricultural Markets and Prices (AH).

An introduction to agricultural market and price analysis as a field of study within agricultural economics. An applied microeconomics approach is taken to studying agricultural supply and demand, price discovery, and market structure for crop and livestock products. In addition to cash (spot) markets, agricultural futures and options markets are studied, including managing agricultural commodity price risk by hedging.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: ECOA 2000

ECO A 3006.03: Statistics for Economics and Business (H).

This course is designed to train students in the application of statistical methods to business and economics problems. Emphasis will be given to the application of quantitative and qualitative methods to real-world problems in order to provide students with context in applications. Particular attention will be paid to both the art as well as the science of data analysis. Students will conduct analysis of data, using methods discussed in class, as a term project.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: STAA 2000

ECO A 3007.03: Environmental and Resource Economics (H).

This course is designed to give students a basic introduction to the area of Resource Economics and an understanding of how economists view environmental problems. Topics of study will include public versus private goods, externalities, market failure, and the role of property rights in the economic system. The Coase theorem will also be presented. Policy analysis contrasting market-based solutions for environmental problems with conventional solutions will be discussed. Specific topics will then be covered, including environmental policy surrounding water pollution, air pollution, and climate change. Issues related to nonrenewable and renewable economies and sustainable development will be discussed.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

PREREQUISITE: ECOA 2000

EXCLUSION: This course may not be taken for credit by students who have credit for ECOA 3001 or ECOA 4003.

ECO A 4000.03: Advanced Microeconomics (H).

This course is intended to give students an advanced treatment of Microeconomics. It is strongly recommended for those students wishing to undertake graduate work in economics, agricultural economics, or resource and environmental economics. Topics will include production economics, profit functions, cost functions, supply functions, and factor demand. An advanced treatment of demand theory will also be presented, including Hicksian and Marshallian demands, derived via Slutsky's equation. Both primal and dual approaches will be discussed.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ECOA 2000, ECOA 3000

ECO A 4004.03: Trade (AH).

This course will provide students with an understanding of the factors that influence the exchange of products, with particular emphasis on trade interventions and institutions. Students will be introduced to trade theory, which they will use to evaluate trade policy issues. Students will learn how various government policy instruments and institutions affect international and interregional trade. Also, the complex set of rules and regulations governing international trade, such as the WTO, will be analyzed. The consequences of, and linkages among, international trade, the environment, and economic development will also be pursued.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

PREREQUISITE: ECOA 2000 and third-year standing

ECO A 4005.03: Advanced Macroeconomics (H).

This course provides a concise, mathematical coverage of classic issues in macroeconomic theory. The course starts with the classical model of a closed economy. A reconsideration of the labour market leads to the Keynesian model. An alternative treatment of the capital market underlies Tobin's dynamic aggregative model. The role of inflation expectations is explored under the contrasting cases of economic agents having adaptive expectations and perfect

foresight. By integrating macroeconomic thinking and mathematical reasoning in the context of non-stochastic models, the course is also preparatory to graduate studies in economics.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: ECOA 1001, ECOA 3000

II. Technical Level Course Descriptions**ECO A 0100.02: Introductory Microeconomics.**

An introduction to the theory of the firm. The course examines the theory of demand and supply, distribution of income, forms of business organizations in Canada, and the levels of competition in the agricultural industry. Application of the various theories to explain the agricultural industry is stressed.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

ECO A 0202.02: Production Economics.

An introduction to the study of economic principles used to analyze production and resource use in agriculture. Areas of emphasis include economic examination of the factor/factor, factor/product, and product/product relationships of the farm production system. Practical examples and lab exercises are used to illustrate and reinforce the concepts presented in the classroom.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: ECOA 0100

Engineering

Below are courses offered in Engineering by the Faculty of Agriculture. Please see the Faculty of Engineering Section for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

ENGN 1001.03: Engineering Design I.

Students are introduced to the concept of Engineering Design and the design process. Procedures and conventions for the preparation of engineering drawings and technical reports are presented. Students develop skills in manual drawing and computer aided drafting.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

ENGN 2005.03: Dynamics.

The dynamics course represents the second course in the study of engineering mechanics. Topics include kinematics, kinetics, work and energy, and linear and angular impulse momenta of a single particle and of rigid bodies in planar motion. There will be some computer applications wherever appropriate.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: MTHA 1001, PHYS 1000 or PHYS 1002

ENGN 2014.03: Bioresource Processing.

This course deals with the technologies of converting biomass into upgraded fuels as well as direct combustion. Students are introduced to biomass conversion; physical conversion of biomass (drying, dewatering, densification); thermo-chemical conversion of biomass (torrefaction, pyrolysis, gasification, combustion); heat and power applications; biogas production (digester design and kinetic considerations); ethanol and bio-diesel conversion technologies; and environmental impacts.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

ENGN 2202.03: Fundamentals of Environmental Engineering

This course introduces Environmental Engineering by introducing principles, applications, and design concepts pertinent to water quality and pollution, drinking and waste water treatment, solid and hazardous waste management, and air pollution and control. The role of process engineering for the protection of the physical environment will be stressed. A quantitative technical approach will be used, as befitting an engineer in environmental infrastructure planning/designing.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: CHMA 1000 and CHMA 1001

ENGN 3000.03: Electric Circuits.

This course covers the fundamentals of electric circuit analysis using Kirchoff's current and voltage laws, Thevenin's, Norton's, superposition, and source transformation for DC and AC circuits. Circuit components include resistors, capacitors, inductors, voltage, and current sources. PSPICE simulation software, multimeters, and oscilloscope are used in lab exercises to familiarize students with circuits analysis.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: PHYS 1003

ENGN 3002.03: Thermo-fluids I.

Thermodynamics is a study of energy and energy transfers in the form of work and heat, and the effect these transfers have on the properties of selected substances. First and second law analyses are covered, including entropy, availability, and efficiencies.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: PHYS 1000 or PHYS 1002

ENGN 3004.03: Digital Circuits.

This course includes an introduction to Boolean algebra, encoders, decoders, shift registers, and asynchronous and synchronous counters, together with timing considerations. Design of asynchronous circuits, synchronous sequential circuits, and finite state machines is covered. Karnaugh mapping techniques and state tables and diagrams are taught. Programmable logic is introduced. Contemporary computer-aided design and analysis software is used throughout the course.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

ENGN 3006.03: Engineering II.

This course teaches the concept of stress, strain and deformation of a solid body subjected to static forces. Topics considered include: stresses and strains under axial, bending, torsional and combined loadings; transformation relations for stresses and strains; Mohr's circle for stress and strain; strain gauges; mechanical properties of materials; and failure theories.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: PHYS 1000 or PHYS 1002

CO-REQUISITE: MTHA 1001

ENGN 3008.03: Electrical Circuits II.

This course covers advanced circuit analysis techniques, starting with sinusoidal excitation. The concepts of phasors and complex impedance are fully developed. Mutual inductance and magnetically coupled coils are used to introduce transformer behaviour and performance. Real and reactive power flow is covered before the introduction of balanced three-phase circuits for power distribution. Symmetrical components are introduced as a means of dealing with unbalanced networks. The concepts of grounding and harmonics are also introduced.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

ENGN 3011.03: Thermo-fluids II.

This course builds on the introduction to fluid mechanics in ENGN 3002 to present engineering concepts of fluid mechanics and energy. The course completes fluid statics from ENGN 3002; covers dimensional analysis; emphasizes the notion of control volume needed to properly solve thermal fluid problems using the conservation laws presented as integral relations; treats flow in ducts, putting emphasis on head losses (friction and minor); and presents a practical theory of turbomachinery. The different concepts studied during the course are brought together at the end in a series of design examples and design problems.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: ENGN 2005 or permission of the instructor

ENGN 3016.03: Engineering Economy.

This course deals with the economics of decision-making. After introducing fundamental concepts and cash-flow diagrams, interest factors are dealt with in some detail. A variety of discounted cash-flow techniques are covered, including rate-of-return calculations. Inflation, accounting, tax, and risk are also among the topics considered.

NOTE: Winter semester

FORMAT: Lecture 2 hours, lab 3 hours

ENGN 3017.03: Engineering Design II.

This course provides a project-based exercise in the engineering design process. Students work on defined projects which apply knowledge and skills from their first three semesters. The projects encompass design method, conceptual design, design selection, detailed analysis, CAD and simulation tools, engineering drawings, safety, and preparation of professional technical reports. Discipline-specific projects are assigned. All projects involve evaluation/testing of student designs, depending on the discipline section, either through construction and testing of a physical prototype or development and testing of an engineering simulation model.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: ENGN 1001, ENGN 3006

English

Below are courses offered in English by the Faculty of Agriculture. Please see the English Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

EGLA 1000.03: Composition (H).

This course has two main objectives: to introduce what is involved in essay, literature review, and other university-level writing tasks, and to facilitate improvement of students' critical thinking, reading, and writing skills. With these aims in mind, students are engaged in reading, research, and the processes of writing through composing, revising, editing, and proofreading. The course employs an approach that involves writing across the disciplines.

NOTE: Fall semester

INSTRUCTOR(S): Stiles

FORMAT: Lecture 3 hours

EGLA 1001.03: The Novel (H).

In this course, four to six novels will be read, discussed, and analyzed. In the process, students will acquire a vocabulary for talking about literature, and will put to use critical reading and writing skills. They will also learn how the novel can be a window into the historical age in which it is written, illuminating issues such as colonialism, gender relations, culture, race, ethnicity, or the differences between rural and urban life. Novels selected will vary from year to year, but may include those written by Chinua Achebe, Emily Brontë, Kate Chopin, Joseph Conrad, Daniel Defoe, Charles Dickens, Antonine Maillet, Toni Morrison, Gabrielle Roy, Mary Shelley, Oscar Wilde, and others.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

EGLA 1002.03: Nature in Literature (H).

This course explores the ways in which nature is represented in literature through selected works by a number of authors of fiction, non fiction and poetry, including Margaret Atwood, Wendall Berry, John Clare, Dorothy Wordsworth, Henry David Thoreau, Nathaniel Hawthorne, and others.

NOTE: Fall semester

INSTRUCTOR(S): Stiles

FORMAT: Lecture 3 hours.

EGLA 1003.03: Business Writing (INFB) (H).

International business writing is an essential skill in today's business world. This course will provide opportunities to learn how and when to write effective proposals, letters, and memos. The work will be assigned as part of Modules 1 & 2 in the international Food Business program.

NOTE: Fall Semester - Module #1 & #2 INFB

EGLA 1005.03: Academic Writing – International Students (H).

The objective of this course is to develop the skills necessary to write papers and reports at a university level. The course is designed specifically for students whose first language is not English, and it will focus on the process of writing from the development of a thesis or objective to the editing of the final document. Some of the topics include: selecting different types and styles of papers and reports, researching and presenting appropriate academic documentation, organizing material, preparing the initial draft, and proofreading and editing. The course will also focus on enhancing the student's capacity to write in English.

NOTE: Fall semester – Students whose first language is English are not eligible to take this course.

FORMAT: Lecture 3 hours, tutorial 2 hours per week.

EGLA 3000.03: Literature of Atlantic Canada (H).

This course focuses on the prose and poetry of the Atlantic region of Canada, looking at the works in historical, geographical, and social context, and discussing the concept of regionalism in literature. Classes will include lectures, films, videos, presentations, and discussions.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

PREREQUISITE: ECLA 1000 or ECLA 1001 or ECLA 1002 or any other first-year English course

II. Technical Level Course Description

EGLA 0101.02: Writing for Business.

The objective of this course is to develop the reading and writing skills necessary to write at a technical level and to develop appropriate writing strategies for business documents. The course will focus on the process of writing from the development of a thesis, researching for information, and writing the initial draft through to proofreading and editing. Typical business documents to be discussed include: proposals, letters, e-mails/memos, and reports. Some of the topics include: tailoring writing to the audience, selecting templates for documents, researching and presenting documentation, using word processing packages to create professional documents, and proofreading and editing.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

Environmental Sciences

Below are courses offered in Environmental Sciences by the Faculty of Agriculture. Please see the Environmental Sciences Section in the Faculty of Science for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

ENVA 2000.03: Environmental Studies I (A).

This is the first of a two-semester course sequence that deals with environmental issues from both an agricultural and a socio-economic basis. The scientific principles of each issue will first be outlined and explained, and then the agricultural and socio-economic aspects of the issue will be examined. The topics to be emphasized in this course will include issues associated with population growth, the atmosphere, and the hydrosphere. Students will be expected to show their understanding of the interplay between agriculture and environmental issues by writing a major term paper.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

PREREQUISITE: 8 technical or degree course credits

EXCLUSION: Students can receive credit for either APSC 1012 or ENVA 2000, but not both.

ENVA 2001.03: Environmental Studies II (A).

This is the second of a two-semester course sequence that deals with environmental issues from both an agricultural and a socio-economic basis. All aspects of the issues will be integrated to provide an overall view of each issue. The topics to be emphasized in this course will include issues associated with biodiversity, the lithosphere, waste management, and legal aspects of the environment. Students will be expected to show their understanding of the interplay between agriculture and environmental issues by writing a major term paper.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: ENVA 2000

ENVA 2002.03: Composting and Compost Use (A) DE.

Composting and the utilization of organic matter produced on the farm provide the basis for soil fertility in organic systems; however, potential benefits derived from compost use are often limited by the supply and quality of composts produced on-farm. The objective of this web-based course is to teach composting primarily by providing students with the opportunity to make their own compost over a period of 13 to 15 weeks. Students learn through five stand-alone modules*: Composting of Organic Materials (how the underlying principles of composting are applied when combining various feedstock materials for composting); Composting Process (how to evaluate and manage an actively working pile and troubleshoot to maintain optimum conditions for composting); On-Farm Composting (efficient and low cost composting methods for agricultural composting at various scales); Compost Quality (how to evaluate the quality of the finished compost, as well as the quality requirements of various standards, markets, and end uses for compost); and Compost Utilization and Marketing (considerations and requirements for the optimal use of compost in organic greenhouse crop production and organic farming systems, as well as factors which are important in the marketing of compost).

NOTE: Fall semester – * Note that making compost and completing all five modules will be a requirement for students who are taking the course for credit. Students who are not taking the course for credit may also decide to make compost and complete all five modules; however, this is not a requirement for non-credit students. To provide maximum flexibility for non-credit students, the modules are offered as independent (stand-alone) units.

FORMAT: DE– only offered as a web-based distance education course.

ENVA 3000.03: Environmental Impact Assessment.

An introduction to the study and assessment of environmental toxicity and ecotoxicology as they are used to predict the environmental impact of agricultural,

industrial, and other xenobiotics and associated processes. The laboratory portion of the course will deal primarily with bioassay and assessment techniques.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: ENVA 2000, ENVA 2001

ENVA 3001.03: Environmental Sampling and Analysis.

This course will introduce students to the proper methods of sampling and experimental design for biological and chemical analyses, as well as for environmentally oriented surveys. Emphasis will be given to the actual collection of samples and their subsequent analysis.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: STAA 3000

ENVA 3002.03: Waste Management and Site Remediation (A).

This course will examine the following topics: pollution from wastes, waste disposal and treatment, the use of wastes, wastes as resources, recycling, composting, waste reduction, incineration, biomass from wastes, biogas production, site remediation, and bioremediation. Agricultural wastes will be emphasized throughout the course.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: ENVA 2001 or ENGN 2012

ENVA 3003.03: Environmental Studies Field Course.

This 12-day course is designed to provide students with an opportunity to pursue a holistic approach to solve real environmental problems. It will be held at (an) environmentally significant site(s). Students will be expected to pre-plan and to perform on-site analyses to identify any environmental problems. An interim report of findings will be required during the course. After completion of the field work, students are expected to write a report of their findings with appropriate recommendations regarding solutions to identified problems. Students should contact the course instructor prior to October 15 in the preceding Fall semester for scheduling information about the course. Expenses associated with the course are the responsibility of the student. The course is offered subject to enrollment.

NOTE: Summer session

FORMAT: 12-day course.

PREREQUISITE: 30 degree credits, including ENVA 2000 and ENVA 2001

ENVA 3004.03: Principles of Pest Management (A).

An investigation of the philosophy of pest management. Topics will include the study of different approaches to pest management and an assessment of the use of single versus integrated pest control options. Costs of pest control from economic, social, and environmental perspectives will be discussed.

NOTE: Fall semester

FORMAT: Lecture 3 hours, seminar 3 hours per week.

PREREQUISITE: BIOA 1003

ENVA 3021.03: Ecohydrology (A).

This course deals with the emerging green science and technology management tool of ecohydrology and the design of best management practices (BMPs) for water resource protection and use. Topics to be covered include: non-point source pollution, drainage and irrigation; soil erosion and deforestation; and the BMPs of buffer strips, nutrient entrapment, and runoff and wastewater management. Many topics for discussion deal with agricultural development in Canada and developing nations.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours

ENVA 4000.03: Pesticides in Agriculture (A).

A course dealing with various aspects of pesticides used in agriculture. The course will look at pesticides from their origin and development to their registration, sale, distribution, and use. Also included are discussions of safety and toxicology.

NOTE: Winter semester

FORMAT: Lecture 3 hours, discussion period 3 hours.

PREREQUISITE: Preparatories: BIOA 2005, BIOA 3000, BIOA 3002

ENVA 4002.03: Economic Entomology (A).

An introduction to the study of economic entomology from an agricultural perspective, covering principles of insect control (natural, mechanical, physical, cultural, biological, and legal), including chemical and biochemical control, and

insecticide development, formulation, and application. This course stresses the theory of integrated pest management (IPM).

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: BIOA 3000

ENVA 4003.03: Advanced Weed Science (A).

DEals with principles of weed science from an ecological perspective. Included are discussions on ecology and management of weeds in traditional agro-ecosystems as well as in low-input sustainable agricultural systems. The roles of biological, cultural, and chemical controls in these systems will be stressed.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: BIOA 3002

ENVA 4005.03: Geographic Information Systems (GIS) (A).

The objective of this course is to provide both a theoretical and a practical understanding of GIS concepts and GIS application skills as it relates to ESRI ArcGIS® software. Practical training and application skills will be acquired doing laboratory sessions, whereas GIS foundations and concepts will be provided during lectures. The application of GIS technologies will focus on data sets derived from environmental science, soil science, or agriculture generally. A component of this class will be the application of GIS technologies to a student-defined problem or issue.

NOTE: Fall semester – This course has limited enrollment.

FORMAT: Lecture 2 hours, lab 2 hours

PREREQUISITE: At least third-year standing

ENVA 4006.03: Air, Climate and Climate Change (A).

This course examines the composition of our atmosphere, how it functions to create weather and climate, and its role in agricultural production. A fundamental understanding of chemistry and physics of atmospheric processes will provide the basis for an examination of micro-, regional- and global-scale meteorological processes. The expression of these meteorological processes will be examined over time and space as a means of examining climate and climate change. The role of weather and climate in agricultural production will be discussed. The global debate surrounding anthropogenic greenhouse gas emissions and climate change will be considered from scientific, social and political perspectives. Agricultural adaptation to climate change, both regionally and globally, will be considered. The laboratory portion of the class will examine the tools for measuring the composition of the atmosphere, the physical state of the atmosphere, the transfer of heat and mass to and within the atmosphere, and the use of weather and climate data in agricultural decision-making.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: ENVA 2000

ENVA 4007.03: Directed Studies in Environmental Science.

Directed studies involve a suitable combination of directed reading, written assignments, individual study or laboratory research projects in the area of environmental sciences. Classes are organized and scheduled by appropriate faculty via a course coordinator. Students should approach potential instructors directly with their requests.

NOTE: Fall or Winter semester

FORMAT: as arranged.

PREREQUISITE: ENVA 2000, ENVA 2001, and 20 degree credits

ENVA 4008.03: Directed Studies in Pest Management (A).

Directed studies involve a suitable combination of directed reading, written assignments, individual study or laboratory research projects in the area of pest management. Classes are organized and scheduled by appropriate faculty via a course coordinator. Students should approach potential instructors directly with their requests.

NOTE: Fall or Winter semester - Extension Education

FORMAT: as arranged.

PREREQUISITE: One of BIOA 2005, BIOA 3000, BIOA 3002 (as per topic chosen) and 20 degree credits

Extension Education

I. Undergraduate Degree Level Course Description

EXTE 3001.03: Leadership Development and the Social Action Process (H).

Students will be looking at leadership development from a number of angles: current theories, leader identification, and leadership skills. The impact of leadership on the social action process will be analyzed in the context of rural communities. Analysis of the social action process will focus on participatory approaches to rural community development and extension. Students will have the opportunity to enhance personal leadership skills through discussion and practice.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

PREREQUISITE: At least third-year standing

Food Science

I. Undergraduate Degree Level Course Descriptions

FOOD 1000X/Y.03: Food Safety and Quality Assurance (INFB).

This course is part of Module 3 of the International Food Business program - Analyzing Food Chains. It provides students with an introduction to food safety and quality assurance issues and developments. Topics include quality assurance systems both public and private, legislation and traceability.

NOTE: Winter Semester - Module #3 INFB

FOOD 3000.03: Food Quality Assurance (A).

The various quality philosophies (QC, QA, TQM) will be studied with respect to their industrial application. The course will centre on the use of control charts to monitor processes and to evaluate the quality of both incoming raw materials and the finished product. Students will gain first-hand experience in the design and implementation of ISO 9000 and HACCP systems in the commercial food industry. The application of these principles to other manufacturing processes and/or data acquisition will be discussed. Consideration will also be given to recognizing the quality criteria required by some international customers.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: MTHA 1000

FOOD 3001.03: Functional Foods and Nutraceuticals (A).

Interest in functional foods and nutraceuticals is growing rapidly and it has emerged as a new frontier of the agri-food and nutrition industry worldwide. This course provides a basic scientific knowledge of bioactive plant compounds (phytochemicals) present in functional foods and nutraceuticals. Emphasis will be given to phytochemical biosynthesis, classification, distribution among food and medicinal crops, analysis, and current scientific knowledge on the potential health benefits of the bioactive phytochemicals. The course also introduces global marketing trends, government regulations, principles of designer food, and value-added food processing concepts in functional foods and nutraceuticals.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: CHMA 2000

FOOD 4000.03: Directed Studies in Food and Bioproduct Science (A).

Directed studies involve a suitable combination of directed reading, written assignments, individual study or laboratory research projects in the area of food and bioproduct science. Classes are organized and scheduled by appropriate faculty via a course coordinator. Students should approach potential instructors directly with their requests.

NOTE: Fall or Winter semester

FORMAT: as arranged.

PREREQUISITE: CHMA 2000 and 20 degree credits; students taking FOOD 4000 are strongly encouraged to take CHMA 2003 or CHMA 2004

II. Technical Level Course Description

FOOD 0020.00: Topics in Agriculture & Food Enterprise Management.

Students participate in an examination of the structure of agri-food industry and of the context in which individual enterprises operate. They are required to identify current issues facing the agri-food industry at all levels, and to examine their potential impact on sustainability and opportunities in the Atlantic Canadian industry.

NOTE: Winter semester— This is a Workplace Readiness course required in the Agriculture option of the Diploma in Business Management.

FORMAT: Lecture 1 hour for 12 weeks.

French

Below are courses offered in French by the Faculty of Agriculture. Please see the French Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

FRNA 1000.03: French Language I (H).

This course is designed to fill the needs of students who have studied French in high school, and is intended to review grammar and provide an opportunity to polish and refine language skills. Classes will emphasize basic grammatical structures, pronunciation, listening comprehension, and speaking skills. FRNA 1000 is designed to provide the student with opportunities to use the language and enhance written, spoken, and comprehension skills. This course is not intended as an introduction to the French language. Students whose first language is French or who are fluent in the French language are not eligible to take this course.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

PREREQUISITE: Grade 12 French or equivalent within the last five years

FRNA 1001.03: French Language II (H).

This course is designed to fill the needs of students who have already studied French, and is intended to review grammar and provide an opportunity to refine language skills. Classes will emphasize basic grammatical structures, pronunciation, listening comprehension, and speaking skills. FRNA 1001 is designed to provide the student with opportunities to actively use the language.

This course is intended not as an introduction to French language but as a review and continuation of the major aspects of FRNA 1000. It is expected that students have a basis grasp of French grammar and some vocabulary. Students whose first language is French or who are fluent in the French language are not eligible to take this course.

NOTE: Winter semester

FORMAT: Lecture 3 hours, tutorial 2 hours per week.

PREREQUISITE: FRNA 1000

Genetics

I. Undergraduate Degree Level Course Descriptions

GENE 2000.03: Genetics.

This course studies heredity and variation in plants and animals, including man, and the relationships of genetics to evolution and breeding practices.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

GENE 3000.03: An Introduction to Molecular Genetics.

The objective of this course is to provide students with a general foundation in molecular genetics and recombinant DNA technology. Replication, transcription, protein synthesis, recombinant DNA, and the regulation of gene expression in prokaryotes and eukaryotes will be studied in detail. Ethical and legal issues related to the production, testing, and ownership of genetically engineered organisms will be discussed. In the laboratory, students will be exposed to a range of molecular genetic techniques, including isolation and restriction site mapping of bacterial plasmids, bacterial transformation, isolation and restriction enzyme digestion of genomic DNA, and PCR amplification. Students completing this course will be able to read original research papers in the molecular genetic literature, and will be prepared for advanced training in molecular biology, plant breeding, or animal breeding.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: GENE 2000, preparatory: one course in biochemistry

GENE 3001.03: Population and Quantitative Genetics.

An introduction to population and quantitative genetics, with particular emphasis on the forces causing genetic change in populations. Applications from natural populations, conservation biology, and plant and animal breeding will be used to illustrate theories of evolution and modern breeding methods. Contemporary ideas about evolution at both the molecular and organismal levels will be explored. Laboratory sessions include discussion of concepts and use of computer simulations to model populations under natural and artificial selection.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours. Offered in alternate years; next offered in 2014/2015

PREREQUISITE: GENE 2000, STAA 2000

GENE 4000.03: Molecular Applications to Animal Production (A).

This upper-level course is designed for students interested in the molecular and cellular techniques that are being applied to animal production systems and research. Topics include molecular techniques used in research, DNA fingerprinting, marker-assisted selection, embryo IVF/sexing/nuclear transfer, recombinant protein production, the use of recombinant microbes in ruminants, and stem cell and transgenic animal production.

NOTE: Fall semester

FORMAT: Lecture 3 hours. Offered in alternate years; next offered in 2013/2014.

PREREQUISITE: CHMA 3001 (or CHMA 2005), GENE 3000

GENE 4003.03: Biotechnology.

Biotechnology includes the generation of new medicine, generation of biofuel, new chemicals and materials, removal of pollutants, and production of better and safer foods. The objective of this course is to provide students with general information on the theory and technologies that are currently used in biotechnology. Course topics will include gene identification, transformation and expression regulations, tissue culture and cell culture techniques, and other genomics-related agricultural applications. Nutraceutical and pharmaceutical applications will be addressed.

NOTE: Fall semester

FORMAT: Lecture 3 hours

PREREQUISITE: GENE 2000

CROSS-LISTING: AGRI 5750

GENE 4004.03: Laboratory Techniques in Genomics.

An intensive course that provides hands-on training in manipulations used routinely in molecular labs. An exercise for both hands and minds; students will work in pairs and should be prepared to spend four hours per laboratory session as well as two hours of instruction and preparation on the day immediately preceding lab class. Laboratory reports will account for the bulk of the mark, with a participation score and a final exam rounding out the grade.

NOTE: Winter semester

FORMAT: Lab 6 hours

PREREQUISITE: GENE 3000 or GENE 4000

Geography

Below are courses offered in Geography by the Faculty of Agriculture. Please see the Geography Section in the Faculty of Science for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

GEOA 1000.03: Introductory Human Geography (H).

This course is an introduction to the field of Human Geography. The objectives of the course are to present the spatial point of view on human/land interactions. Lectures, readings, and assignments consider geographical patterns, processes, and problems in rural and urban settings. Some emphasis will be given to the Canadian and Atlantic region contexts.

NOTE: Winter semester

FORMAT: Seminar 3 hours per week.

GEOA 3000.03: Rural Geography (H).

This course focuses on rural geographic problems in Canada and the Atlantic region. Discussion will include, for example, rural land use issues, settlement dynamics, rural resource problems, urban/rural interaction, agricultural change, rural well-being, and rural planning. The geographic perspective emphasizes spatial variability and human/land interactions.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: GEOA 1000

Geology

Below are courses offered in Geology by the Faculty of Agriculture. Please see the Geology Section in the Faculty of Science for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Description

GELA 2000.03: Introduction to Geology.

This course introduces the student to the basic concepts of Earth Science and Physical Geology. Geology, as a subject matter area in the Earth Sciences, is closely related to soil science. This course will examine the nature of Earth materials as well as Earth processes, both internal and surface. Minerals, rocks, earthquakes, streams, and groundwater are just some of the areas investigated in this course. Many geological processes are of importance to the Environmental Sciences because an understanding of Earth processes is fundamental for the understanding of human impacts on our landscape.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

History

Below are courses offered in History by the Faculty of Agriculture. Please see the History Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

HISA 1000.03: Introduction to Canadian History 1000–1867 (H).

This course introduces students to the theory and practice of history through a general historical survey of Canadian history for the period from approximately 1000 CE [Common Era] to about the mid- 19th century. Historical theories and methodologies will be introduced in this course. A social and/or cultural approach is emphasized, with focus on Aboriginal peoples and Contact; Acadia and New France; and British North America to Confederation.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

HISA 1001.03: Introduction to Canadian History 11867–Present (H).

This course will examine the problems of modernity, through an exploration of Canadian history from the mid- 19th century through to the present. Political, social, and cultural developments and transformations will be emphasized. In addition to the exploration of Canadian history from Confederation to the present, students will be introduced (or, in the case of those who have previously taken HISA 1000, reintroduced) to concepts, theories, and methodologies employed in historical study.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

HISA 3000.03: Rural History (H).

This course will introduce students to selected problems in the study of rural history. Problems to be considered in at least two time periods may include the following: the problem of change in rural society vis à vis industrialization; the intersection of national, ethnic, and other “identity” with rurality; the changing nature of work in rural societies; rural political movements; idealizations or distortions related to the concept of rural; agriculture and other “cultures” in the rural context of the past.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: HISA 1000 or HISA 1001

Horticulture

I. Undergraduate Degree Level Course Descriptions

HORT 2000.03: Vegetable Production (A).

Production technology for the major vegetables grown in the Atlantic region is studied in detail, including botanical and horticultural characteristics, soil and fertility requirements, cultivar selection, pest management, and harvest and storage requirements. Commercial vegetable enterprises are visited.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: Preparatory: AGRI 1000

CROSS-LISTING: HORT 0211

HORT 2001.03: Principles of Organic Horticulture (A) DE.

Study of the principles that form the basis for organic production systems. Special attention is given to soil fertility, organic soil amendments, compost and mulches, crop rotation, plant health, management of diseases and pests, companion planting, and produce storage/handling and marketing. Seminar topics will include making the transition to organic production, and definition and legislation of organic food in Canada.

NOTE: Fall semester

FORMAT: DE - only offered as a web-based distance education course.

PREREQUISITE: Preparatory: AGRI 1000

HORT 2003.03: The British Garden.

The history of British landscape development is studied, supported by visits to gardens that exemplify period design. Period garden features and the design philosophy that fostered the evolution of landscape development will be discussed. The maintenance and management of these landscapes will be examined. North American and British landscape maintenance standards and techniques will be compared. Plant identification will be a component of this course. This course involves self-directed study.

NOTE: Summer semester –The course is offered in England, subject to enrollment. Expenses associated with the course are the responsibility of the student.

FORMAT: 4 weeks intensive.

HORT 2004.03: Introduction to Viticulture (A).

Note: Students taking this course must be 19 years of age or older. This course on viticulture in the Atlantic region will initially examine the taxonomy, morphology, physiology, and biochemistry of grapevine growth and fruit maturation. Emphasis will be placed on the environmental regulation of grapevine growth, development, yield and composition, and management strategies to optimize grape production in cool-climate viticulture production areas. Included will be an examination of the importance of site selection, soil management, grapevine cultivars, rootstocks, clones, production systems, and vineyard establishment. Cultural management practices including pruning, training, canopy management, crop control, and mechanization will be discussed, and an overview of pest pressures and other environmental concerns including winter hardiness will be covered. Lastly, the harvesting and vinification of wine grapes will be examined with the inclusion of “hands-on” laboratory sessions at a commercial vineyard and winery. Successful completion of the course should prepare students for upper-division courses in viticulture and oenology.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: BIOA 1002

HORT 2005.03: Design & Construction of Turf Facilities.

Includes the interpretation and implementation of design and construction plans for various facilities such as golf courses and recreational fields. Topics include understanding the basic concepts involved in golf course construction, individual

components of a golf course, design and construction of sport turf facilities, and development and maintenance of high-end facilities, including those using synthetic turfgrass. Emphasis will be placed on the special considerations needed to “grow in” a new turf in each of these situations.

NOTE: Winter semester

FORMAT: Lecture 2 hours, lab 3 hours

HORT 2006.03: Tree Fruit Crops (A).

Tree fruit production with emphasis on resource conservation is investigated in relation to the region. Origins, history, biosystematics, adaptation, and culture of tree fruits, including organic systems, are studied. Propagation, pruning, training, harvesting, and marketing of these crops are covered in this course.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

CROSS-LISTING: HORT 0203

HORT 2007.03: Small Fruit Crops (A).

The course consists of the study of strawberry, blueberry, raspberry, cranberry, currant, gooseberry, kiwi, elderberry, Saskatoon berry, and grape production. Aspects of propagation through to harvesting and marketing of each crop is discussed. Some aspects of organic production of small fruits are included. Origins, adaptation, and distribution of each crop are examined. New small fruit crop development for nutraceuticals is covered.

NOTE: Fall semester – Note: Field trips to small fruit farms, small fruit crop nurseries, and research institutes are included during the term.

FORMAT: Lecture 3 hours, lab 2 hours.

CROSS-LISTING: HORT 0202

HORT 2009.03: Landscape Plant Nursery Management (A).

Nursery crops are those plant materials generally used for outdoor landscape plantings, including trees, shrubs, vines and other plants having persistent woody stems, and all herbaceous perennials. This course will examine the selection, propagation, growing, handling and marketing of these materials. The course uses an entrepreneurial approach with emphasis on the importance of new plant introductions, and plant and landscaping trends analysis. The course also examines the nursery industry from the standpoint of where it fits into the bigger picture, i.e., the overall “green” industry.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: AGRI 1000, preparatory: BIOA 2002

CROSS-LISTING: HORT 0200

HORT 2010.03: Greenhouse and Floriculture Crop Management (A).

Greenhouse and floriculture crop production is one of the most exacting specialties in the many areas of agriculture. It is the only type of crop production where almost complete control of plant growth is achieved with the modification of environmental conditions. This is obtained through atmosphere modification (increasing CO₂ levels); temperature control; control of light, nutrition, and water; the application of growth-modifying chemical regulators; and pest control. Greenhouse management can therefore be one of the most interesting and intriguing of the agricultural sciences. This course will examine the greenhouse, its environment, and the production of crops in this environment, plus outdoor cut-flower production.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: AGRI 1000, preparatory: BIOA 2002

CROSS-LISTING: HORT 0201

HORT 3000.03: Environmental Processes and Natural Landscape Functions.

The structure, functions, and dynamics of landscapes that are altered by human design are discussed. Key ecological processes and their disruption, landscape modification, and landscape planning and management will be examined. Students are expected to participate in field work, and to engage in self-directed study.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

HORT 3001.03: Landscape Project Management.

This is an advanced course in landscape design, estimating, and construction. Principles and processes for cost estimating will be studied, using actual landscape projects and considering local building codes and regulations. Computers will be utilized in the process.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: A previous course in landscape design and construction

HORT 3008.03: Horticultural Therapy (H).

An in-depth study of the application of horticultural activities as a treatment modality, e.g., working with youth and older adults, the rehabilitation of handicapped individuals, treatment of emotional problems and substance abuse, and others. Attention is given to understanding problems associated with client groups and specific horticultural activities used in therapeutic programs.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: Second-year standing

HORT 4000.03: Urban Tree Management.

This course focuses on the management of the urban forest. Tree inventory systems, planning the urban forest, rhizosphere management, site reclamation, the valuation of urban trees, and trees and the law will be included. Lab exercises will include tree assessment techniques, tree inventory exercises, use of tree inventory software, new techniques for hazard tree assessment, new techniques for managing pests and diseases in urban trees, and site assessment and remediation. Tree pruning exercises will emphasize preservation of tree structure, quality of cuts, and work efficiency and safety.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: HORT 0207 or a previous course in arboriculture, or permission of the instructor

II. Technology Level Course Descriptions

HORT 0100.02: Landscape Plants I.

Herbaceous and woody plants are studied with respect to their identification, landscape value, and use. Special groups of plants to be studied include plants with fall interest, shade-loving plants, groundcovers, and vines, as well as many other plants suited to Atlantic landscapes. The lab involves the study of plant families, plant morphology, use of plant keys, plant collecting, and preparation of herbarium specimens. A plant collection is required.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

HORT 0101.02: Landscape Plants II.

Herbaceous, woody, and aquatic plants are studied with respect to their identification, landscape value, and use. Special plant groups covered in the course include interior plants, culinary herbs, plants with special growth habits, native plants, and bog and marginal plants for aquatic gardens, in addition to many other plants for Atlantic landscapes. The recognition of deciduous woody plants by their winter wood characteristics is included.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

HORT 0102.02: Turfgrass Production and Management.

A study of cool-season turfgrasses, their characteristics, and proper usage. The establishment, maintenance, and renovation of turfgrass will be studied. Cultural topics covered will emphasize proper fertilizing, watering, and pest control.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

HORT 0103.02: Landscape Horticulture I.

An introduction to landscape horticulture. Plant/environment interaction and the fundamental principles governing plant growth are discussed, as well as the functional uses of ornamental plants in the contemporary landscape. Laboratory exercises will concentrate on the basic skills associated with the use of plants in the landscape.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

HORT 0200.02: Landscape Plant Nursery Management.

Nursery crops are those plant materials generally used for outdoor landscape plantings, including trees, shrubs, vines and other plants having persistent woody stems, and all herbaceous perennials. This course will examine the selection, propagation, growing, handling, and marketing of these materials. The course uses an entrepreneurial approach with emphasis on the importance of new plant

introductions, and plant and landscaping trends analysis. The course also examines the nursery industry from the standpoint of where it fits into the bigger picture, i.e., the overall “green” industry.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: PLSC 0100

CROSS-LISTING: HORT 2009

HORT 0201.02: Greenhouse and Floriculture Crop Management.

Greenhouse and floriculture crop production is one of the most exacting specialties in the many areas of agriculture. It is the only type of crop production where almost complete control of plant growth is achieved with the modification of environmental conditions. This is obtained through atmosphere modification (increasing CO₂ levels); temperature control; control of light, nutrition and water; the application of growth-modifying chemical regulators; and pest control. Greenhouse management can therefore be one of the most interesting and intriguing of the agricultural sciences. This course will examine the greenhouse, its environment, and the production of crops in this environment, plus outdoor cut-flower production.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: PLSC 0100

CROSS-LISTING: HORT 2010

HORT 0202.02: Small Fruit Crops.

The course consists of the study of strawberry, blueberry, raspberry, cranberry, currant, gooseberry, kiwi, elderberry, Saskatoon berry, and grape production. Aspects of propagation through to harvesting and marketing of each crop is discussed. Some aspects of organic production of small fruits are included. Origins, adaptation, and distribution of each crop are examined. New small fruit crop development for nutraceuticals is covered.

NOTE: Fall semester – Note Field trips to small fruit farms, small fruit crop nurseries, and research institutes are included during the term.

FORMAT: Lecture 3 hours, lab 2 hours.

CROSS-LISTING: HORT 2007

HORT 0203.02: Tree Fruit Crops.

Tree fruit production with emphasis on resource conservation is investigated in relation to the region. Origins, history, biosystematics, adaptation, and culture of tree fruits, including organic systems, are studied. Propagation, pruning, training, harvesting, and marketing of these crops are covered in this course.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

CROSS-LISTING: HORT 2006

HORT 0204.02: Landscape Plants III.

Herbaceous, woody, and aquatic plants are studied with respect to their identification, use, and value in landscape settings. Special plant groups included in the course include woodland plants, sensory plants, container plants, medicinal herbs, xeric plants, submerged and floating aquatic plants, and salt-tolerant plants, in addition to many other plants for Atlantic landscapes. The recognition of woody plants by their winter wood characteristics is included.

NOTE: Fall and Winter semesters

FORMAT: Lecture 2 hours

HORT 0205.02: Residential Landscape Design and Construction.

This course introduces a systematic process for developing residential landscape designs. Emphasis is placed upon maximizing the usefulness of the property and developing it in an environmentally sound and sustainable manner. Lab exercises will utilize the computer as a design tool as well as conventional graphic techniques.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: HORT 0100, HORT 0103, HORT 0209

HORT 0207.02: Arboriculture.

Emphasis is placed on arboriculture theory and practice. Tree problems arising from pest and disease injury, as well as environmental and non-parasitic injury of trees, will be addressed. The course will focus on the tree in an urban environment. Laboratory exercises concentrate on specific arboriculture skills and techniques.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: HORT 0103

HORT 0208.02: Landscape Maintenance.

Provides an overview of site management. Time studies, scheduling of horticultural work and management techniques are included. Plant healthcare strategies, including pesticides and their application, are discussed, and provincial pesticide applicator exams are written in preparation for licensing. A calendar of landscape maintenance tasks will be developed by the student.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: HORT 0102, HORT 0103

HORT 0209.02: Landscape Horticulture II.

A study of herbaceous plants and their uses in landscape. Special plant groups, gardening techniques, and styles will be examined. Both computer and conventional methods of drafting will be utilized in design.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: HORT 0100; Prerequisite/Corequisite: HORT 0103

HORT 0210.02: Landscape Installation.

This course provides theoretical and practical training in landscape construction and installation. Skills and standards identified by the Canadian Nursery and Landscape Association and tested through the Canadian Certified Horticultural Technician Program are considered minimum in levels of information presented in a modular format. Topics include plan reading, construction drawings, and site grading.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

CO-REQUISITE: Corequisite: ENGN 0101

HORT 0211.02: Vegetable Production.

Production technology for the major vegetables grown in the Atlantic region are studied in detail, including botanical and horticultural characteristics, soil and fertility requirements, cultivar selection, pest management, and harvest and storage requirements. Commercial vegetable enterprises are visited.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: Preparatory: PLSC 0100

CROSS-LISTING: HORT 2000

International Development

Below are courses offered in International Development by the Faculty of Agriculture. Please see the International Development Studies Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

IAGR 2002.03: International Rural Development (H).

This course explores the history, defining characteristics, and diversity of developing societies, with a focus on the people and issues of rural communities. Students will explore the main issues facing rural communities in developing regions, as well as the many cultural, social, political and economic factors that can impact the success of development projects and initiatives at the community level. Students will be expected to develop an understanding of a variety of perspectives on international community development and also to develop an appreciation for the opportunities and challenges of sustainable development in different societies and cultures.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

IAGR 2003.03: Food Security & Rural Development in Cuba (A, H).

The focus of the course is food production and food security in Cuba, with emphasis on animal production, urban gardens, herbal medicine, environmental protection, ecotourism, and rural development. Students will also learn about Cuba's history, politics, economy, and culture and how these socioeconomic factors influence food production and food security. Readings, discussions and self-directed study are required during the semester.

NOTE: Winter semester— One week of the course is spent in Cuba in conjunction with the University of Cienfuegos. The week consists of volunteer work projects and tours (augmented with lectures) of urban gardens, an experimental dairy cooperative, an alternative agro-ecological farm, an herbal medicine farm, and coastal and mountain ecosystems. Additional fees for travel, meals, and accommodation apply.

FORMAT: Lecture 3 hours, plus one week in Cuba.

IAGR 2004.03: Agri - Food Systems in India.

Examines the agri-food and environmental issues of tropical and dryland farming in southern India (Tamil Nadu). Students must attend pre-departure travel at the Agricultural Campus; submit a mini-research paper prior to departure; participate actively in the agri-food tours; and write a second paper after the trip. Travel costs, in addition to tuition, are associated with this study abroad course.

NOTE: Summer Semester

FORMAT: 2 week study tour in India in August plus 30 hour pre-departure independent research and pre-departure orientation. Final paper submitted after conclusion of the study trip.

IAGR 3000.03: Tropical Agriculture (A).

This course will introduce the student to food production, storage, and handling systems in tropical and subtropical countries. The sustainability of these systems and issues that limit the use of the environment for long-term food production will be identified. Farming systems and the role of national/international research centres are examined. The instruction will include resource people from several disciplines.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

IAGR 3001.03: Directed Studies in International Development (A).

Independent study of topics in international development at an advanced level, with a focus on agriculture and rural development. Topics are developed through literature review, assigned readings, and discussion, and may include independent research. Students are expected to present the final project at a public seminar.

Students are encouraged to use international travel or study opportunities as a focus, but this is not required. Topics must be supervised by a faculty member in the proposed area of interest, and approved by the Department Head of Business and Social Sciences. Students must apply to the Department Head at least six weeks before the semester start date. This course would normally be taken by undergraduate students in their final year.

NOTE: Fall, Winter or Summer

FORMAT: as arranged.

PREREQUISITE: 30 degree credits or final-year standing

IAGR 4000.03: Global Seminar on Rural Sustainability (A).

An international course which brings together students from around the world to investigate and discuss local and global issues. The course will consist of a number of case studies, and the students must choose four in which to participate. Students will work in groups to research the topic using e-mail and discussion forums, and present their findings to the class using electronic classroom technology. Together the students will participate in a truly global seminar course.

NOTE: Fall semester

FORMAT: Lecture 3 hours (either through virtual classroom or on campus).

International Food Business

I. Undergraduate Degree Level Course Descriptions

INFB 1000.03: International Food Policy & Environment (INFB).

This course is taught along with ECOA1002 Introduction to Economic Reasoning as part of the International Food Business program in Module 1: Acquiring Knowledge of International Food Systems. Students will successfully complete a series of practical tasks/assignments while learning about the global food environment. Topics will include study of emerging country markets, policy formulation, and multilateral agreements.

NOTE: Fall Semester - Module #1 INFB

INFB 1001.03: International Food Business Project I (INFB).

This course is part of an underlying theme of the first year of the International Food Business Program. It allows students to integrate the work of the entire first year into a series of assignments and tasks embedded in international consumer behaviour and entrepreneurship. Students will learn about consumer behaviour applied to a new food product from Iceland and be tasked with preparing a Webpage highlighting the opportunities in both Europe and North America for the product. This is a year-long project concluding in International Food Business Project II.

NOTE: Fall Semester - Module #1 & #2 INFB

INFB 1002.03: International Food Business Project II (INFB).

This course is part of an underlying theme of the first year of the International Food Business Program. It allows students to integrate the work of the entire first year into a series of assignments and tasks embedded in international consumer behaviour and entrepreneurship. Students will learn about consumer behaviour applied to a new food product from Iceland and be tasked with preparing a Webpage highlighting the opportunities in both Europe and North America for the product. This is a year-long project originating in International Food Business Project I.

NOTE: Winter Semester - Module #1 & #2 INFB

INFB 1003.03: Introductory Second Language.

This course will be offered in The Netherlands by CAH Dronten as part of the International Food Business program. It is designed for an initial competency in spoken and written language. Students are ineligible to take a language course in which they are already fluent.

NOTE: Winter semester

Internship

I. Technology Level Course Description

INTA 0100.00: Internship.

The student will be required to work under contract with an approved employer in their chosen field for a period of at least 12 weeks (480 hours). Contract details will be relevant to the student's area of study and will be negotiated between the student, the employer, and the course coordinator. Assessment will be based on this contract and will be carried out jointly by the employer and the course coordinator.

NOTE: Spring semester – 12 weeks.

FORMAT: 12 weeks.

PREREQUISITE: Successful completion of the first year in the Diploma in Business Management, plus Workplace Readiness courses

Management

Below are courses offered in Management by the Faculty of Agriculture. Please see the Faculty of Management Section for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

MGTA 1000.03: Small Business Entrepreneurship.

This course provides students with an overview of small business management theory and practice presented from an entrepreneurial perspective. Topic areas discussed include identifying and evaluating new business opportunities, financing the business, marketing management, human resources, and financial management. Upon successful completion of the course, students will understand the elements of business planning required for successful small businesses today.
NOTE: Fall and Winter semesters
FORMAT: Lecture 3 hours.
CROSS-LISTING: MGTA 0104

MGTA 1001.03: Introduction to International Business (INFB).

This course is taught along with ECOA1002 Introduction to Economic Reasoning as part of the International Food Business program in Module 2: Analyzing Business Processes. Students will successfully complete a series of practical tasks/assignments while learning about essential aspects of international management. Topics will include the business task environment, organizational behaviour and operational management.
NOTE: Fall Semester - Module #2 INFB

MGTA 1002.03: Food Supply Chain Management (INFB).

This course is part of Module 3 of the International Food Business program – Analyzing Food Chains. It provides students with an introduction to food supply chain management issues and developments. Topics include value chain development, consumer orientation, changing actors and factors, and logistics and distribution.
NOTE: Winter Semester - Module #3 INFB

MGTA 1003.03: International Business communications (INFB)

This course is part of Module 4 of the International Food Business program - Developing External Communications Strategies. It provides students with an introduction to global business communications issues and applications. Topics include information and communication, intercultural aspects of communication, and emerging international media and techniques.
NOTE: Winter Semester - Module #4 INFB

MGTA 2000.03: Human Resource Management.

An introduction to the human side of business organizations. The course focuses on the challenges of motivation, recruitment and selection, performance evaluation, compensation, and labour management relations.
NOTE: Fall and Winter semesters
FORMAT: Lecture 3 hours.
CROSS-LISTING: MGTA 0205

MGTA 2001.03: Introduction to Business Law.

An introduction to general principles of law relating to the management of a business. Major areas studied are torts and contracts. Specialized topics include forms of business organizations, sale of goods, conditional sales, real property, mortgages, insurance, and wills.
NOTE: Winter semester
FORMAT: Lecture 3 hours.
CROSS-LISTING: MGTA 0103

MGTA 2002.03: Marketing.

Designed to introduce basic marketing principles and their application to marketing problems. Topics such as promotion, pricing, distribution, and marketing research are examined. The case method of instruction is used extensively. Class participation is a vital component of this course.
NOTE: Fall semester
FORMAT: Lecture 3 hours
CROSS-LISTING: MGTA 0206

MGTA 2003.03: Financial Management (A).

Principles and methods of organizing and analyzing financial businesses are examined. Practical problems associated with financial analysis, planning, capital budgeting, resource use, and credit acquisition are included. The role of the financial manager is identified throughout.
NOTE: Fall semester
FORMAT: Lecture 2 hours, lab 3 hours
PREREQUISITE: Preparatory: MGTA 2004
CROSS-LISTING: MGTA 0204

MGTA 2004.03: Financial Accounting.

A study of the basic principles and procedures relevant to the accounting function of a business firm. Topics discussed include recording transactions, making adjusting entries, and preparing financial statements; accounting for a merchandising concern; computerized accounting software; accounting for cash, credit sales, and accounts receivable; inventories and cost of goods sold; and plant and equipment.
NOTE: Fall semester
FORMAT: Lecture 3 hours, lab 2 hours.

MGTA 2006.03: Advertising and Promotion.

Students examine the process of planning, implementing, and evaluating advertising and promotional strategies for small businesses. Topics include an evaluation of conventional advertising media and web-based advertising, the preparation of customer profiles and target marketing, the creation of advertising copy, and the evaluation and monitoring of the advertising program. Case studies and class projects are essential elements of the course.
NOTE: Winter semester
FORMAT: Lecture 3 hours.
PREREQUISITE: MGTA 2002
CROSS-LISTING: MGTA 0207

MGTA 2007.03: Retail Sales Management.

Students examine effective sales techniques for a retail business and learn to use records systems for tracking sales performance. They also explore strategies for integrating front-line sales techniques with the overall marketing and promotional strategy for the business. The course will enable the student to track and interpret sales performance for the business, and to work with sales managers or consultants in identifying ways to improve sales performance.
NOTE: Winter semester
FORMAT: Lecture 3 hours.
PREREQUISITE: MGTA 2002
CROSS-LISTING: MGTA 0208

MGTA 2008.03: Managing Retail Operations and Physical Resources.

This course is designed to train students in the daily office, sales, and inventory operations important in managing a small business. The course also covers the requirements for the siting and layout of a retail facility, and the factors important in designing a retail space. The maintenance, safety, and security requirements for the retail operation are also considered.
NOTE: Fall semester
FORMAT: Lecture 3 hours.
PREREQUISITE: MGTA 2004
CROSS-LISTING: MGTA 0202

MGTA 2009.03: Customer Relations Management.

The objective of this course is to provide students with a practical approach to the provision of exceptional customer service for a small business. Students are expected to identify the various factors that affect the provision of quality service and to identify ways to ensure client satisfaction. The course also provides training in point-of-sale techniques and complaint management.
NOTE: Fall semester
FORMAT: Lecture 3 hours.
CROSS-LISTING: MGTA 0203

MGTA 2010.03: Innovation Management (INFB).

This course is part of Module 5A of the International Food Business program which is taught in The Netherlands. It provides students with an introduction to innovation management from an international perspective. Topics include innovation management, managing technology and knowledge, and managing research and development projects. This course is taught in The Netherlands.

NOTE: Fall Semester - Module #5A INFB

MGTA 2011.03: International Marketing Research (INFB).

This course is part of Module 7A of the International Food Business program - Performing Market Research. It provides students with an introduction to marketing research in an international setting. Topics include the research process, primary and secondary data collection, and analyzing data. This course is taught in The Netherlands.

NOTE: Winter Semester - Module #7A INFB

MGTA 2012.03: Fundamentals of Management (INFB).

This course is covered in Module 8A of the International Food Business program in the third year of study - Performing as a Leader and Manager. It provides students with the basic management functions and their performance as a business leader. Topics include planning, organizing, leading and controlling. This course is taught in The Netherlands.

NOTE: Fall Semester - Module #8A INFB

MGTA 2013.03: Business Planning (INFB).

This course is part of Module 10A of the International Food Business program - Developing Business Plans. It provides students with an introduction to business planning from an international perspective. Topics include starting a new business, alternative start-up methods, managing growth, and business succession.

NOTE: Fall Semester - Module #10A INFB

MGTA 3000.03: Management Accounting.

This course introduces students to the use of accounting information in making effective management decisions. Topics include cost control and analysis, cost/volume/profit analysis, break-even analysis, differential analysis, and capital investment analysis.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: MGTA 2004

MGTA 3001.03: International Marketing.

This course provides an introduction to international marketing and the international trading system. Students will be exposed to the unique aspects of international market research, selection, entry, pricing, and communications that differentiate them from their domestic equivalents. In addition, the international trading system will be examined with an emphasis on institutions such as the WTO and the IMF and on international commodity agreements, which directly impact the movement of goods and services. Cases are used extensively in the course and class participation is vital.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: MGTA 2002

MGTA 3002.03: Consumer Behaviour.

The course introduces the student to the basics of consumer behaviour and then applies this knowledge to the food marketing system. Topics covered include external influences on consumer behaviour, motivation, perception, learning, and decision-making. Historical and recent trends in product marketing, pricing, and advertising also form part of the course. Cases are used extensively and class participation is vital.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: MGTA 2002

MGTA 3003.03: European Placement I (INFB).

Students will broaden their experience of European business management by participating in a planned learning experience in an approved business or entrepreneurial venture. Based on their area of interest students will find placements in suitable businesses or other organizations and submit a work plan to the course coordinator and the host organization. Students will be required to keep a journal of the placement experience and to submit a report upon completion of the placement. The host organizations will evaluate students on their development of critical skills and abilities. Placements may be volunteer or paid positions, and cover three months at the end of the second year in The Netherlands.

NOTE: Spring/Summer semester

MGTA 3004.03: European Placement II (INFB).

Students will broaden their experience of European business management by participating in a planned learning experience in an approved business or entrepreneurial venture. Based on their area of interest students will find placements in suitable businesses or other organizations and submit a work plan to the course coordinator and the host organization. Students will be required to keep a journal of the placement experience and to submit a report upon completion of the placement. The host organizations will evaluate students on their development of critical skills and abilities. Placements may be volunteer or paid positions, and cover three months at the end of the second year in The Netherlands.

NOTE: Spring/Summer semester

MGTA 3005.03: New Product Development (INFB).

This course is part of Module 5B of the International Food Business program which is taught in The Netherlands. It provides students with an introduction to new product development from an international perspective. Topics include new product development process, packaging, and managing the development team.

NOTE: Fall Semester - Module #5B INFB

MGTA 3006.03: Retail Management (INFB).

This course is part of Module 6B of the International Food Business program - marketing management which is taught in The Netherlands. It provides students with an introduction to retail management from an international perspective. Topics include: overview of strategic management, location and layout, merchandise management, and retail strategy.

NOTE: Fall Semester - Module #6B INFB

MGTA 3007.03: Quality Management (INFB).

This course is part of Module 8B of the International Food Business program - performing as a leader and manager which is taught in Canada. It provides students with an intermediate level of study in management from an international perspective. Topics include: organizational effectiveness, quality systems, and organizational leadership.

NOTE: Winter Semester - Module #8B INFB

MGTA 3008.03: Intermediate Marketing Research (INFB).

This course is part of Module 7B of the International Food Business program - performing marketing research which is taught in Canada. It provides students with an intermediate level research from an international perspective. Topics include: qualitative research methods, quantitative methods, presenting research results, and ethical issues in research.

NOTE: Winter Semester - Module #7B INFB

MGTA 4000.03: Strategic Management.

This is a capstone course that will integrate all the business disciplines (marketing, finance, accounting, etc.) and prepare the student to formulate and implement strategy in an agribusiness setting. Students will be expected to gain a full understanding of the complexity and interrelationships of modern managerial decision-making and apply this knowledge to real managerial problems. Lectures, case studies, projects, and guest speakers will be utilized.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

PREREQUISITE: Students will normally be Agricultural Business majors who have successfully completed the first three years of the program.

MGTA 4001.03: Advanced Entrepreneurship (A).

This course will apply the concepts of entrepreneurship to creating and managing a small business. Students will investigate opportunities for new agribusinesses and develop business plans that consider management structure, financing, production, marketing, and taxation. Lectures, case studies, guest speakers, and project assignments will be utilized.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: MGTA 2002, MGTA 2003, and at least third-year degree standing

MGTA 4002.03: North American Placement I (INFB).

Students will broaden their experience of North American business management by participating in a planned learning experience in an approved business or entrepreneurial venture. Based on their area of interest students will find placements in suitable businesses or other organizations and submit a work plan to the course coordinator and the host organization. Students will be required to keep

a journal of the placement experience and to submit a report upon completion of the placement. The host organizations will evaluate students on their development of critical skills and abilities. Placements may be volunteer or paid positions, and cover three months at the end of the third year in Canada.

NOTE: Spring/Summer semester

MGTA 4003.03: North American Placement II (INFB).

Students will broaden their experience of North American business management by participating in a planned learning experience in an approved business or entrepreneurial venture. Based on their area of interest students will find placements in suitable businesses or other organizations and submit a work plan to the course coordinator and the host organization. Students will be required to keep a journal of the placement experience and to submit a report upon completion of the placement. The host organizations will evaluate students on their development of critical skills and abilities. Placements may be volunteer or paid positions, and cover three months at the end of the third year in Canada.

NOTE: Spring/Summer semester

II. Technology Level Course Descriptions

MGTA 0020.00: Business Leadership, Ethics, and Professionalism.

Students explore the ethical and professional context in which individual enterprises operate, and develop effective strategies for professional participation and leadership in their industry. They also develop the team skills necessary for participation in seminars, conferences, and other special events. This module course requires the development and presentation of a proposal for a business plan, which will be completed in MGTA 0201.

NOTE: Fall semester – This is a Workplace Readiness course required for all options in the Diploma in Business Management

FORMAT: Lecture 2 hours

MGTA 0100.02: Accounting.

An introduction to accounting topics useful to managers. Topics include recording transactions, forms of business organization, cash and accrual bases of accounting, financial statements, internal control, payrolls, bank reconciliation, and types of accounting systems, with an introduction to microcomputer applications.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

MGTA 0101.02: Applied Accounting and Taxation.

The basic principles and procedures relevant to the accounting function of a business. Topics discussed include recording business transactions, year-end adjustments, and preparation of financial statements. Considerable time will be spent on Canadian income tax and a computerized accounting project.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: MGTA 0100

MGTA 0103.02: Business Law.

Introduces several legal topics relevant to the management of a business. Topics discussed are: legal structure in Canada, Law of Torts, contracts, sale of goods, consumer protection legislation, creditors, employment, forms of business organization, insurance, and real estate.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

CROSS-LISTING: MGTA 2001

MGTA 0104.02: Small Business Entrepreneurship.

This course provides students with an overview of small business management theory and practice presented from an entrepreneurial perspective. Topic areas discussed include identifying and evaluating new business opportunities, financing the business, marketing management, human resources, and financial management. Upon successful completion of the course, students will understand the elements of business planning required for successful small businesses today.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

CROSS-LISTING: MGTA 1000

MGTA 0201.02: Business Project.

An opportunity to examine, in detail, enterprise management topics. Projects are organized and carried out by the students under the supervision of various staff members. Projects started in MGTA 0020 will be completed in this course.

NOTE: Winter semester

FORMAT: Lab 5 hours

PREREQUISITE: MGTA 0020, MGTA 0204, and MGTA 0206

MGTA 0202.02: Managing Retail Operations and Physical Resources.

This course is designed to train students in the daily office, sales, and inventory operations important in managing a small business. The course also covers the requirements for the siting and layout of a retail facility, and the factors important in designing a retail space. The maintenance, safety, and security requirements for the retail operation are also considered.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

PREREQUISITE: MGTA 0100

CROSS-LISTING: MGTA 2008

MGTA 0203.02: Customer Relations Management.

The objective of this course is to provide students with a practical approach to the provision of exceptional customer service for a small business. Students are expected to identify the various factors that affect the provision of quality service and to identify ways to ensure client satisfaction. The course also provides training in point-of-sales techniques and complaint management.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

CROSS-LISTING: MGTA 2009

MGTA 0204.02: Financial Management (A).

Principles and methods of organizing and analyzing financial businesses are examined. Practical problems associated with financial analysis, planning, capital budgeting, resource use, and credit acquisition are included. The role of the financial manager is identified throughout.

NOTE: Fall semester

FORMAT: Lecture 2 hours, lab 3 hours

PREREQUISITE: Preparatory: MGTA 0100

CROSS-LISTING: MGTA 2003

MGTA 0205.02: Human Resource Management.

An introduction to the human side of business organizations. The course focuses on the challenges of motivation, recruitment and selection, performance evaluation, compensation, and labour management relations.

NOTE: Fall and Winter semester

FORMAT: Lecture 3 hours.

CROSS-LISTING: MGTA 2000

MGTA 0206.02: Marketing.

Designed to introduce basic marketing principles and their application to marketing problems. Topics such as promotion, pricing, distribution, and marketing research are examined. The case method of instruction is used extensively. Class participation is a vital component of this course.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

CROSS-LISTING: MGTA 2002

MGTA 0207.02: Advertising and Promotion.

Students examine the process of planning, implementing, and evaluating advertising and promotional strategies for small businesses. Topics include an evaluation of conventional advertising media and web-based advertising, the preparation of customer profiles and target marketing, the creation of advertising copy, and the evaluation and monitoring of the advertising program. Case studies and class projects are essential elements of the course.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: MGTA 0102 or MGTA 0206

CROSS-LISTING: MGTA 2006

MGTA 0208.02: Retail Sales Management.

Students examine effective sales techniques for a retail business and learn to use records systems for tracking sales performance. They also explore strategies for integrating front-line sales techniques with the overall marketing and promotional strategy for the business. The course will enable the student to track and interpret sales performance for the business, and to work with sales managers or consultants in identifying ways to improve sales performance.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: MGTA 0206

CROSS-LISTING: MGTA 2007

Mathematics

Below are courses offered in Mathematics by the Faculty of Agriculture. Please see the Mathematics Section in the Faculty of Science for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

MTHA 0050.02: Functions.

This is a one-semester non-credit course designed for those who do not have the requisite skills for the first-year mathematics courses but have shown sufficient basic mathematical ability to warrant a one semester course to make up for the deficiencies. This course will emphasize the study of the basic functions used in the sciences. Topics to be covered include linear, exponential, logarithmic, and trigonometric functions. Emphasis is placed on use of a graphing calculator. MTHA 0050 is not intended to duplicate or replace Grade 12 Pre-Calculus Mathematics.

NOTE: Fall semesters

FORMAT: Lecture 3 hours, tutorial 1 hour

PREREQUISITE: If required as a result of performance on a mathematics diagnostic test, or approval of the Registrar

MTHA 1000.03: Introductory Calculus I.

Topics will include functions and their inverses, limits, differentiation of polynomial, trigonometric, exponential and logarithmic functions, product and quotient rules, and implicit differentiation, with applications to curve sketching, maxima and minima problems, and velocity and acceleration problems. This course also includes an introduction to anti-derivatives and applications of the definite integral to a variety of problems. Students are required to confirm their eligibility for admission to this course by means of a mathematics diagnostic test, to be taken the day following registration. Students not admitted must take MTHA 0050.

NOTE: Fall and Winter semesters

FORMAT: Lecture 3 hours, tutorial 1 hour

PREREQUISITE: Grade 12 PreCalculus Mathematics or MTHA 0050

MTHA 1001.03: Introductory Calculus II.

A continuation of the study of calculus with topics including both the definite and indefinite integral: techniques of integration, with applications to areas, volumes, arc length, surface areas, elementary differential equations and their applications. The course may also include parametric equations and polar coordinates, and sequences and series and their applications.

NOTE: Fall and Winter semesters

FORMAT: Lecture 3 hours, tutorial 1 hour

PREREQUISITE: MTHA 1000

MTHA 1002.03: Business Math. (INFB)

This course will provide the mathematical skills needed to understand, analyse and solve the mathematical problems encountered in business, finance and investment decision making. Course topics will include arithmetic and algebraic operations, mathematics of marketing, mathematics of finance, probability and statistical applications. This course is taught in The Netherlands.

NOTE: Fall Semester

FORMAT: Lecture 3 hours, tutorial 1 hour

MTHA 2000.03: Multivariable Calculus.

This course covers functions of several variables: vectors, dot product, cross product, differentiation and integration of vector-valued functions, space curves, partial derivatives, optimization, multiple integrals and their applications, vector fields, line integrals, flux integrals, divergence and curl, Stokes Theorem, and the Divergence Theorem.

NOTE: Fall semester

FORMAT: Lecture 4 hours, lab 2 hours per week.

PREREQUISITE: MTHA 1001

MTHA 2001.03: Differential Equations.

This course introduces the basic theory of differential equations, considers various techniques for their solution, and looks at various applications. Topics include First Order Linear and Non-Linear differential equations; differential equations of higher order; Laplace Transforms; Series solutions; systems of equations; and Fourier Series. Topics from Linear Algebra are included as required to solve systems of differential equations, Linear Algebraic equations, matrices and vectors, eigenvalues and eigenvectors, and solutions to both homogeneous and nonhomogeneous systems.

NOTE: Winter semester

FORMAT: Lecture 4 hours, tutorial 2 hours per week.

PREREQUISITE: MTHA 1001

MTHA 3000.03: Applied Linear Algebra.

This course covers geometric vectors in three dimensions, dot product, lines and planes, complex numbers, systems of linear equations, matrix algebra, matrix inverse, determinants, Cramer's rule, introduction to vector spaces, linear independence and bases, rank, linear transformations, orthogonality and applications, Gram-Schmidt algorithm, eigenvalues and eigenvectors.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

MTHA 4000.03: Agricultural Modelling.

The aim of the course is to teach agricultural students when and how to attempt to express their ideas mathematically, and how to solve the resulting mathematical model and compare its predictions to experimental data. Topics include techniques of creating a model, techniques of solving models, testing and evaluating models, growth models, and a directed study project of an example of a model used in the agricultural sciences.

NOTE: Winter semester

FORMAT: Lecture 3 hours, tutorial 1 hour

PREREQUISITE: MTHA 1001 and at least third-year standing

II. Technology Level Course Descriptions

MTHA 0100.02: Business Math.

This course introduces the basic mathematical skills needed to understand, analyze, and solve mathematical problems encountered in business, finance, and investment decision-making. Students are expected to be able to understand and perform arithmetic and algebraic operations.

NOTE: Fall semester

FORMAT: Lecture 3 hours, tutorial 1 hour

Microbiology

Below are courses offered in Microbiology by the Faculty of Agriculture. Please see the Microbiology and Immunology Section in the Faculty of Science for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

MCRA 2000.03: Microbiology.

A general introduction to microbiology. Topics include history, morphology, structure, cultivation, reproduction, metabolism, genetics, classification, and control of microorganisms. The importance of microorganisms to soil productivity, foods, industry, veterinary science, public health, and sanitation is discussed. Students are required to have laboratory coats.

NOTE: Winter semester

FORMAT: Lecture 3 hours; Lab 3 hours

PREREQUISITE: Preparatories: BIOA 1002, BIOA 1003

MCRA 3000.03: Food Microbiology (A).

A study of microorganisms involved in the production and processing of food products. Topics will include the use of microorganisms for food production and processing, food spoilage and potential for food poisoning, and sanitation procedures, including government regulations and standards for the food industry. The use of conventional plating as well as rapid assay techniques will be discussed.

NOTE: Fall semester

FORMAT: Lecture 3 hours; Lab 3 hours

PREREQUISITE: MCRA 2000

MCRA 4000.03: Soil Microbiology (A).

A study of the biology of the various classes of microorganisms in soil, including bacteria, blue-green algae, fungi, algae, protozoa, and viruses. This course includes details of biochemical transformation of carbon, nitrogen, sulfur, and phosphorus, as well as pesticides and wastes in the environment.

NOTE: Fall semester

FORMAT: Lecture 3 hours; Lab 3 hours

PREREQUISITE: MCRA 2000, SOIL 2000

CROSS-LISTING: AGRI 5250

Nutrition

I. Undergraduate Degree Level Course Descriptions

NUTR 3000.03: Animal Nutrition (A).

A study of the principles of nutrition, including the digestion, absorption, and metabolism of nutrients by domestic animals. Functions of protein, lipids, carbohydrates, vitamins, and minerals are studied.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: CHMA 2000

NUTR 3001.03: Applied Animal Nutrition (A).

Classification and characteristics of feedstuff and regulations governing their use are described. Methodology for evaluating the relative merits of typical feedstuffs is discussed. The principles of nutrition are applied in the formulation of rations for monogastric, avian, and ruminant species.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: NUTR 3000

NUTR 3002.03: Fish Nutrition (A).

Nutrients required by finfish, shellfish, crustaceans, and molluscs are discussed in context with current and future sources of these nutrients. Digestive physiology and specific feeding problems of aquatic species are addressed. Diet formulations and feeding strategies for maintenance, growth, and reproductive performance of fish are covered.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

NUTR 4000.03: Ruminant Digestive Physiology and Metabolism.

This course is designed to provide an intensive study of food intake and digestion, and nutrient absorption and metabolism, in the ruminant animal. The course details current knowledge and focuses on aspects of future research interest. Students are expected to contribute to discussions and present reviews to the class on various aspects of the subject.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours. Offered in alternate years; next offered in 2015/2016.

PREREQUISITE: BIOA 2006, CHMA 3006, NUTR 3000

CROSS-LISTING: AGRI 5620

Physics

Below are courses offered in Physics by the Faculty of Agriculture. Please see the Physics Section in the Faculty of Science for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

PHYS 0050.00: Introductory Physics.

An introductory non-credit course for entering students who do not have the equivalent of NS Grade 12 Physics. Course topics include one-dimensional kinematics, vector theory, Newton's Laws, equilibrium, kinetic energy and work, and other topics as determined by a review of the class. PHYS 0050 is not intended to duplicate or replace Grade 12 Physics.

NOTE: Fall and Winter semesters

FORMAT: Lecture 3 hours, tutorial 1 hour

PREREQUISITE: Approval of the Registrar

PHYS 1000.03: Physics for the Life Sciences I.

In this course an understanding of physics is acquired by exploring the physical principles that underlie complex biological structures. The nature of materials and the forces that act on them is introduced through a series of topic examples taken from evolution, mammalian physiology, plant structure, and others.

NOTE: Fall and Winter semesters

FORMAT: Lecture 3 hours, lab/tutorial 1½ hours (alternating weekly).

PREREQUISITE: Grade 12 Physics or PHYS 0050, Prerequisite/Corequisite:

MTHA 1000

EXCLUSION: Students may take either PHYS1000 or PHYS1002, but not both, for credit.

PHYS 1001.03: Physics for the Life Sciences II.

In this course the physical principles underlying perception throughout the animal kingdom are introduced. The examples chosen emphasize adaptation and strategies (e.g., echolocation and noctuid moths) and represent a wide range of forms (e.g., eyes of the common scallop pecten, electric location by the fish *Gymnarchus niloticus*).

NOTE: Winter semester. Offered in alternate years. Next offered 2014-2015

FORMAT: Lecture 3 hours, lab/tutorial 1½ hours per week (alternating weekly).

PREREQUISITE: PHYS 1000 or PHYS 1002

PHYS 1002.03: Physics I.

Fundamental physical principles that are necessary for the understanding of the agricultural sciences form the core material of this course. Classical physics topics include vector analysis, dynamics, statics, fluid mechanics, acoustics, and heat. Concepts derived from modern physics are added in order to complete the classical theories. Weekly student laboratory sessions allow for direct investigation of the theories studied in the course. Students may take either PHYS1000 or PHYS1002, but not both, for credit.

NOTE: Fall and Winter semesters

FORMAT: Lecture 3 hours, lab 1½ hours, tutorial 1 hour.

PREREQUISITE: Grade 12 Physics or PHYS 0050, Prerequisite/Corequisite:

MTHA 1000

PHYS 1003.03: Physics II.

A continuation of PHYS 1002. The course mainly deals with electromagnetic theory, including such topics as electric charges, fields, potential, magnetic theory, induction, and Maxwell's Equations. Fundamental wave theory and optics are also studied, together with an introduction to nuclear physics. The laboratory provides an opportunity to investigate the theories in a hands-on environment.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: PHYS 1002

Philosophy

Below are courses offered in Philosophy by the Faculty of Agriculture. Please see the Philosophy Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

PHLA 3000.03: Environmental and Agricultural Ethics (H).

This course offers a general introduction to environmental ethics with emphasis on agricultural issues. Students will be introduced to modern ethical theory and to techniques of philosophical reasoning, and will be provided with a general context for overall discussion by examining the origins of the modern world view (the rise of modern science, market economics, and liberalism). Students will be evaluated on class participation and a series of short weekly essays based upon directed readings and field experience. Essay-style midterm and final exams are required.

NOTE: Winter semester

FORMAT: one 2-hour seminar per week.

PREREQUISITE: At least third-year standing

Psychology

Below are courses offered in Psychology by the Faculty of Agriculture. Please see the Psychology Section in the Faculty of Science for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

PSYC 1000.03: Introductory Psychology I (H).

This course will introduce students to the mental processes that underlie human behaviour. Topics covered include brain function, the nervous system, sensation, perception, states of consciousness, learning, memory and cognition. The course will be taught primarily through lecture and in-class demonstrations and activities.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

PSYC 1001.03: Introductory Psychology II (H).

This course will introduce students to important elements that describe, explain, predict, and influence human behaviour. Topics covered include human development, emotion, social influences, personality, health, psychological disorders, and therapy. The course will be taught primarily through lecture and in-class demonstrations and activities.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

Political Science

Below are courses offered in Political Science by the Faculty of Agriculture. Please see the Political Science Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

POLS 1000.03: Introduction to Political Science (H).

An introductory study of the ideologies of modern movements. Liberal democracy, conservatism, democratic socialism, fascism, and Marxist perspectives will be covered. Analysis of such central concepts as liberty, equality, power, authority, justice, law, constitutionalism, democracy, and authoritarianism will be presented and discussed. This course provides an overview of the various institutions and policies involved in governing. There will be a focus on rural social movements.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

POLS 1001.03: Structure and Function of Government (H).

Students will study the legislative, executive, and judicial aspects of the Canadian state, and their interactions. They will look at political processes and policy development. This course will provide students with the basic knowledge of how governments operate at all levels. It will offer insight into how and why political decisions are made about the issues that affect all Canadians: taxation, education, employment, health care, and the debt. There will be a focus on issues of interest to rural Canada.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

Plant Science

I. Undergraduate Degree Level Course Descriptions

PLSC 1000.03: Farm Woodlot Management (A).

This course will focus on the importance of privately owned woodlands to the landowner, the forest industry, and the agricultural sector. It will examine forest ecology, tree identification, forest measurement, aerial photo interpretation, and forest management practices including silviculture. The course will review Christmas tree and maple syrup production. The role of appropriate equipment and machinery in the woods will also be discussed. A field lab will be held weekly. Steel-toed boots and hard hats are required.

NOTE: Fall semester – This course has limited enrollment.

FORMAT: Lecture 3 hours, lab 3 hours.

PLSC 2000.03: Specialty Crops (A).

This course will examine opportunities for specialty crop production, using an entrepreneurial approach. A core group of specialty crops will be examined. Production requirements, production and marketing potential, end use, and value adding will be studied. Students will have optional crop choices to reflect individual interest. A major project is required.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PLSC 3000.03: Theory and Practice of Plant Propagation (A).

This course is intended to give students an advanced knowledge in the area of biology, physiology and practical aspects of plant propagation. It is strongly recommended for students wishing to undertake graduate work in plant sciences, biotechnology, environmental sciences, and ecology. It is also recommended for managers of greenhouses and nurseries. Topics will include biology of plant propagation, propagation environment, breeding systems, seed and vegetative propagation, cell and tissue micropropagation, and propagation of selected plant species for commercial production.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: BIOA 2002

PLSC 4000.03: Plant Breeding (A).

An introduction to the principles and practices of plant breeding, including the genetics of agriculturally important traits, germplasm conservation, breeding biotechnology, and the structure of the Canadian seed industry.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours. Offered in alternate years; next offered in 2015/2016.

PREREQUISITE: GENE 2000, STAA 2000, one crop production subject

PLSC 4002.03: Plant Ecophysiology (A).

This course is designed to stimulate interest, critical thinking, and investigative processes for the understanding of growth, development, distribution, acclimation, and adaptation of crop plants that are influenced by their physiological ecology; the interaction with the climatological, physical, chemical, and biological environments; and the ecophysiological responses that are modulated by input and crop management factors. This course will also enhance knowledge of crop stress diagnostics, physiological mechanisms of acclimation, and adaptation to various challenging abiotic and biotic stress factors. Agricultural practices and agroecosystem management will be related to the economic and environmental responsibilities. This course will use several "Participatory Learning" techniques.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: BIOA 2002, one crop production course

PLSC 4003.03: Problem Solving in Plant Science (A).

The objective of this course is to review and integrate material from prerequisite courses in crop production, environment, business, soils, climate, and basic sciences into a comprehensive understanding of crop management systems. Students will work with each other and the instructor to develop group and individual study plans and learning contracts to address individual needs to fill gaps in knowledge and skills in Plant Science. Activities and assignments will be tailored to the needs of the group and the individuals.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: Fourth-year standing in Plant Science major or minor

PLSC 4004.03: Root Physiology Underground Secrets (A).

The objective of this course is to give students a fundamental understanding of the mysteries of the hidden half of plants – roots. The architectural, physiological, metabolic and ecological significance of roots is often less understood, frequently forgotten or ignored. Students will study the intricacies of root architecture, growth, development, physiology and the role of roots in plant defence. Attention is given to the soil ecosystem and how roots respond to their environment. Students will also learn about root-derived secondary metabolites and their roles in plant and human health, and appreciate the emerging opportunities in "milking roots".

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours. Offered in alternate years; next offered in 2015/2016.

PREREQUISITE: BIOA 2002

II. Technology Level Course Descriptions

PLSC 0100.02: Utilization of Plant Resources.

Using an integrated systems approach, students are introduced to the principles and practices involved in the sustainable production of crop plants. Practical exercises will give the students an opportunity to gain knowledge and skills involved in economic and environmental growing of agronomic and horticultural crops.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PLSC 0200.02: Plant Propagation.

This course studies physiological and anatomical bases of plant propagation, and techniques of sexual and asexual propagation of agricultural and horticultural crops as well as landscape plant material and herbaceous perennials. Propagation structures, containers, media and sanitation, pedigreed seed production, and in-vitro techniques for micropropagation are also components of this course.

NOTE: Fall semester and complete the project in the Winter semester.

FORMAT: Lecture 3 hours, lab 3 hours.

PLSC 0201.02: Technology Project.

This project provides an opportunity for the student to study in detail a Plant Science topic of special interest. The topic may build on other aspects of the study program. The student pursues studies under a project supervisor. The project plan developed with the advisor must include the purpose of the study, the procedures and materials used, a time schedule for the work involved, the method in which the information will be collected, the way in which comparisons and conclusions will be developed, and the format for the final report. Both a written and an oral report will be required.

NOTE: Fall and Winter semesters – Students register in the

FORMAT: Lecture 2 hours

PLSC 0202.02: Plant Science Techniques.

This is a Spring semester course intended for students in the Plant Science Technology program following their first year of study. Students will be required to work under contract in an area of Plant Science with an approved employer for a period of at least 12 weeks (480 hours). Contract content will be relevant to the student's area of study and will be negotiated between the employer, the course coordinator, and the student. Assessment will be based on this contract and will be carried out jointly by the employer and the course coordinator.

NOTE: Spring semester

FORMAT: 12 weeks

PREREQUISITE: Completion of the first year of the Plant Science Technology program

Research Methods/Project Seminars

I. Undergraduate Degree Level Course Descriptions

RESM 4000.03: Bio-Environmental Systems Management Project-Seminar I (A).

Students will study an operation (information gathering) and review management of technological, human, financial, and environmental resources. A group report and individual oral and poster presentations are required.

NOTE: Winter semester

FORMAT: Seminar 3 hours per week.

PREREQUISITE: Integrated Environmental Management student in third year, or consent of the coordinator

RESM 4001.03: Bio-Environmental Systems Management Project-Seminar II (A).

This is a continuation of RESM 4000, with a study and examination of identified problems within the operation. Working with industry representatives, the course will identify alternatives to solve current problems. Written and oral reports are presented to class and industry.

NOTE: Fall semester

FORMAT: Lab 4 hours

PREREQUISITE: RESM 4000; Integrated Environmental Management student in final year or consent of the coordinator

RESM 4002.03: Animal Science Project-Seminar I (A).

In consultation with a faculty advisor, Animal Science majors select a research topic. This topic is investigated and presented orally and in a written report. Other topics of current interest are also presented and discussed in the weekly seminar period.

NOTE: Fall semester

FORMAT: Seminar 2 hours

PREREQUISITE: Animal Science major in third or fourth year of the program, or consent of the coordinator

RESM 4003.03: Animal Science Project-Seminar II (A).

The continuation and conclusion of the project selected in RESM 4002.

NOTE: Winter semester

FORMAT: Seminar 2 hours

PREREQUISITE: RESM 4002

RESM 4004.03: Research Methods for Economics and Business (A).

The lectures cover general methodological issues within business and social sciences research, as well as considering specific research techniques. Students undertaking fourth-year projects within the Department of Business and Social Sciences begin their projects, under faculty supervision, through this course's project development process. Other students may instead write one or more papers on research methodology.

NOTE: Fall semester

FORMAT: Lecture 2 hours, lab 2 hours

PREREQUISITE: At least third-year standing, including ECOA 1000

RESM 4005.03: Project-Seminar for Economics and Business (A).

Under the supervision of faculty, students complete the research projects begun in RESM 4004. Each student is required to submit the first draft for evaluation by faculty. The student presents a final report and participates in peer evaluation of the presentations of the other students.

NOTE: Winter semester

FORMAT: Seminar 2 hours

PREREQUISITE: RESM 4004

RESM 4006.03: Environmental Sciences Project-Seminar I (A).

A required course for all B.Sc.(Agr.) students registered in the Department of Environmental Sciences. Each student will choose a research project and faculty advisor in consultation with the course coordinator. Each student will present periodic oral and written reports on their subject of investigation. Other written and seminar topics may be assigned. Topics on communication skills and the presentation of scientific information in various formats will be discussed in the weekly seminar periods.

NOTE: Fall semester

FORMAT: Seminar 2 hours

PREREQUISITE: Students registered for their final year in the Department of Environmental Sciences, or consent of the coordinator

RESM 4007.03: Environmental Sciences Project-Seminar II (A).

A continuation of RESM 4006. Students will continue with their research projects. The course will culminate in the presentation of project results, in several formats. Other written and seminar topics may be assigned.

NOTE: Winter semester

FORMAT: Seminar 2 hours

PREREQUISITE: RESM 4006

RESM 4008.03: Plant Science Project-Seminar I (A).

Involves the selection of an appropriate project and the preparation of a research plan to investigate the chosen subject. Fundamentals of experimental design and data analysis are covered in lectures. Under the supervision of a faculty advisor, each student will select a topic, conduct a detailed literature review, and prepare an experimental plan for implementation in RESM 4009. The research project and faculty advisor are to be chosen in consultation with the course coordinator during Semester VI, and work initiated soon thereafter. This is a required course for all students in Year 3 of the Plant Science option.

NOTE: Winter semester

FORMAT: Lecture 2 hours

RESM 4009.03: Plant Science Project-Seminar II (A).

The continuation and conclusion of the subject selected in RESM 4008. This consists of both a written and an oral presentation of the project.

NOTE: Fall semester

FORMAT: Lecture 2 hours

PREREQUISITE: RESM 4008

RESM 4010.03: Aquaculture Project-Seminar I (A).

In consultation with a faculty advisor, each student will select a research topic. This topic is investigated and presented both orally and in a written report. Other topics of current interest are also presented and discussed in the weekly seminar period.

NOTE: Fall semester

FORMAT: Seminar 2 hours

PREREQUISITE: Aquaculture major in third or fourth year of the program, or consent of the coordinator

RESM 4011.03: Aquaculture Project-Seminar II (A).

The continuation and conclusion of the project selected in RESM4010.

NOTE: Winter semester

FORMAT: Seminar 2 hours

PREREQUISITE: RESM 4010

Rural Studies

I. Undergraduate Degree Level Course Descriptions

RURS 3000.03: Rural Community Economic Development (H).

This course examines the evolution of key paradigms, theories and principles in the field of rural community development studies, and explores the economic and social contexts in which rural community development has emerged. It also examines the community development process and the organizations, processes and strategies associated with rural community organization and development. A key aspect of the course will be an exploration of the defining characteristics of rural communities (e.g. co-operatives), as well as their diversity in current and historical social and economic contexts.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: At least third-year standing

Sociology

Below are courses offered in Sociology by the Faculty of Agriculture. Please see the Sociology and Social Anthropology Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

SOCI 1000.03: Introductory Sociology (H).

An introduction to the field of modern sociology. Themes addressed in the course are sociological theory and method, social process, social organization, social institutions, social differentiation, and social change. Discussion will include social issues, e.g., rural/urban conflict, an aging society, and family changes. Some emphasis will be given to rural social problems.

NOTE: Fall semester

INSTRUCTOR(S): Prof. Dukeshire

FORMAT: Lecture 3 hours per week.

SOCI 1001.03: Introductory Sociology II (H).

The study of social issues uses sociological theory and research to examine social dynamics and social consequences associated with various current concerns. The topics covered will vary from year to year, but may well include problems such as gender and race relations, child and spousal abuse, substance abuse, poverty, work and alienation, and environmental issues. There will be a focus on issues of interest to rural Canada.

NOTE: Winter semester

INSTRUCTOR(S): Prof. Dukeshire

FORMAT: Lecture 3 hours per week.

SOCI 3000.03: Rural Sociology (H).

This course provides a focus on rural sociological themes, particularly in the Canadian and Atlantic region context. Themes addressed include: the theory and nature of rural social change; rural communities and response to forces of change; problems and issues in rural society (e.g., crime, aging, health care); environmental issues and their links to society; and the social implications of economic and political change for rural Canada.

NOTE: Fall semester

INSTRUCTOR(S): I. Landry

FORMAT: Seminar 3 hours per week.

PREREQUISITE: SOCI 1000

Soils

I. Undergraduate Degree Level Course Descriptions

SOIL 2000.03: Introduction to Soil Science (A).

General principles of soil science relating to the origin, development, and classification of soils; and the biological, physical, and chemical properties of soils and their relation to proper soil and crop management, land use, and soil conservation.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: Corequisite: CHMA 1001

SOIL 3000.03: Soil Fertility and Nutrient Management (A).

The study of the soil chemical environment as it affects crop production. The course investigates the biogeochemical cycling of nitrogen, phosphorus, potassium, calcium, magnesium, sulphur, and micronutrients in crop production. It considers the use and management of supplemental nutrients in both conventional and certified organic production. Soil pH and other factors that influence soil fertility, directly or indirectly, are also discussed. Labs take the form of problem-solving tutorials on nutrient management.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: SOIL 2000; preparatory: BIOA 2002

SOIL 3001.03: Soil Conservation in Agriculture (A).

A study of the processes of soil degradation and its prevention or amelioration. A major part of the course concerns the erosion of agricultural soils and its control. Other topics include soil compaction and soil acidification, soil reclamation, use of soil in waste recycling, and the role of soil in water conservation. Lab periods may be used for field trips, tutorials, or seminars.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours. Offered in alternate years; next offered in 2014/2015.

PREREQUISITE: AGRI 1000

SOIL 4000.03: Environmental Soil Chemistry.

A study of chemical composition of soils (soil acidity, oxidation-reduction, ion exchange, adsorption-desorption reactions, clay mineralogy and organic matter transformations) in the context of environmental soil chemistry. Labs and seminar-discussions integrate basic soil chemical principles with problems in waste disposal, metal contamination, nutrient leaching, pesticide degradation, etc.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours. Offered in alternate years; next offered in 2015/2016.

PREREQUISITE: SOIL 2000

CROSS-LISTING: AGRI 5450

SOIL 4001.03: Directed Studies in Soil Science (A).

Directed studies involve a suitable combination of directed reading, written assignments, individual study or laboratory research projects in the area of soil science. Classes are organized and scheduled by appropriate faculty via a course coordinator. Students should approach potential instructors directly with their requests.

NOTE: Fall or Winter semester

FORMAT: as arranged.

PREREQUISITE: SOIL 2000 and 20 degree credits

II. Technology Level Course Descriptions

SOIL 0100.02: Principles of Soil Science.

Designed to form a basis for the understanding of soil productivity, the course investigates the physical, chemical, and biological properties of soil. Laboratory

exercises, using soils from the Atlantic region, illustrate the lecture material and introduce methods of soil analysis.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

SOIL 0200.02: Soil Management.

A study of the chemical, physical, and biological properties of soil as they relate to crop production. Soil fertility and fertilizer use, tillage and water management, and biological husbandry are discussed. Labs take the form of problem-solving tutorials in soil management.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: SOIL 0100

Spanish

Below are courses offered in Spanish by the Faculty of Agriculture. Please see the Spanish Section in the Faculty of Arts and Social Sciences for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

SPNA 1000.03: Basic Spanish I (H).

This course is designed to offer an initial competency in spoken and written Spanish. Comprehension, reading, writing, and conversation are encouraged throughout the course. An introduction to basic grammar is offered. Anglophone, francophone, and International students are encouraged to take this course. Students whose first language is Spanish will not be eligible.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

SPNA 1001.03: Basic Spanish II (H).

This course is designed for anglophone, francophone and International students. It is a continuation of SPNA 1000, with emphasis on comprehension, conversation, reading, and writing.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: SPNA 1000

Special Topics

I. Undergraduate Degree Level Course Descriptions

SPEC 2000.03: Topics in Economics and Business Management (A).

An opportunity for students throughout the University to study introductory topics defined by an individual student, a group of students, or faculty. The course is conducted by classes, tutorials, assigned readings, assignments and/or other appropriate activities. Topics must be supervised by a faculty member and approved by the department head.

NOTE: Fall, Winter or Summer semester

FORMAT: as arranged.

PREREQUISITE: 10 degree or diploma courses

SPEC 2001.03: Topics in International Development (A).

An opportunity for students to study introductory topics in international development, with a focus on agriculture and rural development. Topics may be defined by the individual student, a group of students, or faculty. The course is conducted by classes, tutorials, assignments, readings, and/or other appropriate activities. Students are encouraged to use international travel or study opportunities as a focus for the course, but this is not required. Topics must be supervised by a faculty member in the proposed area of interest, and approved by the Department Head of Business and Social Sciences. Students must apply to the Department Head at least six weeks before the semester start date.

NOTE: Fall, Winter or Summer semester

FORMAT: as arranged.

PREREQUISITE: Second-year standing

SPEC 4000.03: Special Topics in Animal Science or Aquaculture.

This is an opportunity to study a special topic in the area of animal science or aquaculture as defined by an individual student, group of students or faculty. The course is conducted by tutorials, assigned readings, assignments, field trips and/or other appropriate activities. The special topics would normally be supervised by a faculty or staff member associated with the Animal Science program or the Aquaculture program and approved by the department head.

NOTE: Fall or Winter semester

FORMAT: as arranged.

PREREQUISITE: Two years of full-time study at a post-secondary institution (normally 20 degree courses), and permission of the instructor

SPEC 4005.03: Special Topics in Agricultural Economics and Business I (A).

An opportunity to study a special topic in the area of agricultural economics and business as defined by an individual student, a group of students, or faculty. The course is conducted by tutorials, assigned readings, assignments, and/or other appropriate activities. Special topics must be supervised by a faculty member and approved by the department head.

NOTE: Fall, Winter or Summer semester

FORMAT: as arranged.

PREREQUISITE: 30 degree courses

SPEC 4006.03: Special Topics in Agricultural Economics and Business II (A).

A second special topics course provides additional opportunity for students to individualize their program with in-depth study of an approved topic. Although the second topic selected may be in a similar area of interest to that studied in SPEC 4005, it must be sufficiently distinct to warrant additional study. Special

topics must be supervised by a faculty member and approved by the department head.

NOTE: Fall, Winter or Summer semester

FORMAT: as arranged.

PREREQUISITE: 30 degree courses

SPEC 4007.03: Special Topics in Environmental Studies (A).

This is an opportunity to study a special topic in the area of agricultural, environmental or environmental horticultural studies as defined by an individual student, a group of students, or faculty. The course is conducted by tutorials, assigned readings, assignments, and/or other appropriate activities. Special topics would normally be supervised by a faculty member associated with either the Environmental Sciences or Environmental Landscape Horticulture program, and must be approved by the coordinator.

NOTE: Fall or Winter semester

FORMAT: as arranged.

PREREQUISITE: 20 degree, technology or technical courses, including ENVA 2000 and ENVA 2001, and permission of the coordinator

SPEC 4009.03: Special Topics in Rural Studies (H).

This is an opportunity to study a special topic in the area of rural studies as defined by an individual student, a group of students, or faculty. The course will consist of tutorials, assigned readings, writing assignments, and/or other appropriate activities. Special topics must be supervised by a Faculty member and approved by the Business and Social Sciences department head.

NOTE: Fall, Winter, or Summer semester

FORMAT: as arranged – Lecture 3 hours

PREREQUISITE: At least third-year standing

SPEC 4010.03: Special Topics in Plant Science I (A).

An opportunity to study a special topic in the area of plant science as defined by an individual student, a group of students, or faculty. The course is conducted by tutorials, assigned readings, assignments, and/or other appropriate activities. Special topics must be supervised by a faculty member and approved by the department head.

NOTE: Fall, Winter or Summer semester

FORMAT: as arranged.

PREREQUISITE: 20 degree courses or enrollment in the B.Tech (Env. Hort.) program

SPEC 4011.03: Special Topics in Plant Science II (A).

A second special topics course provides additional opportunity for students to individualize the program with in-depth study of an approved topic. Although the second topic selected may be in a similar area of interest to that studied in SPEC 4010, it must be sufficiently distinct to warrant additional study. Special topics must be supervised by a faculty member and approved by the department head.

NOTE: Fall, Winter or Summer semester

FORMAT: as arranged.

PREREQUISITE: 20 degree courses or enrollment in the B.Tech (Env. Hort.) program

SPEC 4012.03: Directed Studies in Agricultural Engineering I (A).

Independent studies are developed through literature review or laboratory or field research on topics pertinent to agricultural engineering. Topics must be supervised by a faculty member and approved by the department head.

NOTE: Fall or Winter semester

FORMAT: as arranged.

SPEC 4014.03: Directed Studies in Agricultural Engineering II (A).

Independent studies are developed through literature review or laboratory or field research on topics pertinent to agricultural engineering. Lectures may be required depending on the instructors' and students' needs. Topics must be supervised by a faculty member and approved by the department head.

NOTE: Fall or Winter semester

FORMAT: as arranged.

PREREQUISITE: 20 degree courses

Statistics

Below are courses offered in Statistics by the Faculty of Agriculture. Please see the Statistics Section in the Faculty of Science for courses offered on the Halifax campuses.

I. Undergraduate Degree Level Course Descriptions

STAA 2000.03: Introduction to Statistics.

Graphical presentation of data; descriptive statistics; normal, binomial, t and F distributions; sampling distributions and the central limit theorem; estimation and hypothesis testing of a single mean and the difference between two means; and introduction to correlation, regression and analysis of variance for simple experimental designs.

NOTE: Fall and Winter semesters

FORMAT: Lecture 3 hours, tutorial 1 hour, computer lab 1 hour per week.

STAA 2001.03: Probability and Statistics for Engineering.

This calculus-based first course in probability and statistics is designed to interact with the major disciplines within engineering. Topics include descriptive statistics, mathematics of probability, random variables and probability distributions, estimation, hypothesis testing, linear regression and correlation, and introduction to analysis of variance. Problem-solving skills in material related to engineering will be emphasized.

NOTE: Winter semester

FORMAT: Lecture 3 hours, tutorial 1 hour, lab 1 hour per week.

STAA 3000.03: Introduction to Planned Studies: Surveys and Experiments.

This course is a continuation of STAA 2000. Topics covered include sampling techniques, simple and multiple linear regression, analysis of variance for completely randomized and randomized block designs, nonparametric tests, and introduction to categorical data analysis.

NOTE: Winter semester

FORMAT: Lecture 3 hours, tutorial 1 hour, computer lab 1 hour per week

STAA 4000.03: Intermediate Statistical Methods.

Analysis of single-factor experiments, randomized blocks, latin squares, and factorial and two-level fractional factorial designs.

NOTE: Fall semester

FORMAT: Lecture 3 hours, computer lab 1 hour

Veterinary Technology

I. Technology Level Course Descriptions

VTEC 0034.02: Externship in Specialty Field.

This course is designed to encourage the student to pursue the practical application of special interests in Veterinary Technology that would not be addressed in the externships in general practice or at the Atlantic Veterinary College. The externship is customized to the venue and contracted in a manner similar to the general practice externship.

NOTE: Typical institutions that sponsor this optional externship are farm animal or equine veterinary practices, intensive care and emergency clinics, specialty veterinary clinics, zoos, humane societies, and research facilities.

VTEC 0111.02: Animal Medicine and Nursing I.

This is the first in a stream of medicine and nursing courses designed to enable the student to grasp cognitively the principles and practices of veterinary medical, surgical, and related topics. In conjunction with other courses in the Veterinary Technology Program and the related internship and externships, these courses equip the graduate to perform entry-level clinical tasks in the veterinary practice workplace. Topics include animal handling and restraint; drug routes; prescription, control and narcotic drugs; vaccines and vaccination; anaesthesiology; surgical preparation; radiography principles and processing; and clinical calculations.

NOTE: Fall semester

FORMAT: Lecture 3 hours.

VTEC 0112.02: Clinical Exercises I.

This is the first in a stream of clinical exercises courses designed to enable the student to practise medical, surgical, and related clinical skills. In conjunction with other courses in the Veterinary Technology Program and the related internship and externships, these courses equip the graduate to perform entry-level clinical tasks in the veterinary practice workplace. Animal care and maintenance duties are in addition to the scheduled hours in this course. Task areas included in this course are animal and facilities maintenance, drug administration, common clinical equipment, anaesthesiology, surgical preparation, and radiography.

NOTE: Fall semester

FORMAT: Lecture 1 hour, lab 4 hours

VTEC 0113.02: Veterinary Clinical Pathology I.

This is the first in a stream of theory and practical clinical pathology courses designed to enable the student to perform, and cognitively grasp the principles of, essential tasks in the in-house veterinary practice laboratory. In conjunction with other courses in the Clinical Pathology stream and the related internship and externships, these courses equip the graduate to perform entry-level laboratory diagnostic tasks in the veterinary practice workplace. Task areas and topics included in this course are microscopy, practical parasitology, urinalysis, the microhaematocrit, haemoglobin and the red blood cell, and initial blood film assessment.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

VTEC 0114.02: Fundamentals in Veterinary Technology I.

This is the first in a stream of courses designed to address discrete topics in veterinary technology. These topics may not warrant full course status; they may require attention at specific times in the syllabus; they may need to be addressed at several levels. Topics in this first fundamentals course are: orientation to the profession and to the program; first-aid training; WHMIS; workplace safety; and an introduction to zoonotic disease, animal husbandry, cleaning and disinfection, nutrition, animal behaviour, records in veterinary medicine, and veterinary medical terminology.

NOTE: Fall semester

FORMAT: Lecture 5 hours

VTEC 0115.02: Anatomy–Physiology–Pathophysiology I.

This is the first of two courses designed to enable the student to apply the principles of anatomy, physiology, and pathophysiology to animal nursing and medicine. Clinical applications are stressed, and progress through this course is coordinated with other courses in the semester. This course addresses the general topics of cell, tissue, organ, and system plus terms and processes in anatomy, physiology, and disease generally. It then deals with the anatomy, physiology, and typical disease processes in the major body systems. Systems in this course include musculoskeletal, cardiovascular, respiratory, and urinary/excretory.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

VTEC 0121.02: Animal Medicine and Nursing II.

This is the second in a stream of medicine and nursing courses designed to enable the student to grasp cognitively the principles and practices of veterinary medical, surgical, and related topics. In conjunction with other courses in the Veterinary Technology program and the related internship and externships, these courses equip the graduate to perform entry-level clinical tasks in the veterinary practice workplace. Topics included in this course are: anaesthesiology, surgical preparation and assisting, radiography exposure and positioning, clinical calculations, fluid therapy, blood sampling, common infectious diseases of companion animals, feeding in disease states, and introduction to dental disease and treatment.

NOTE: Winter semester

FORMAT: Lecture 3 hours.

PREREQUISITE: VTEC 0111, VTEC 0112

VTEC 0122.02: Clinical Exercises II.

This is the second in a stream of clinical exercises courses designed to enable the student to perform medical, surgical, and related clinical skills. In conjunction with other courses in the Veterinary Technology program and the related internship and externships, these courses equip the graduate to perform entry-level clinical tasks in the veterinary practice workplace. Animal care and maintenance duties are in addition to the scheduled hours in this course. Task areas included in this course are animal and facilities maintenance, drug administration, general nursing, anaesthesiology, surgical preparation, radiography, fluid therapy, sampling for the laboratory, and dental equipment and supplies.

NOTE: Winter semester

FORMAT: Lecture 1 hour, lab 4 hours

PREREQUISITE: VTEC 0111, VTEC 0112

VTEC 0123.02: Veterinary Clinical Pathology II.

This is the second in a stream of theory and practical clinical pathology courses designed to enable the student to perform, and cognitively grasp the principles of, essential tasks in the in-house veterinary practice laboratory. In conjunction with other courses in the Clinical Pathology stream and the related internship and externships, these courses equip the graduate to perform entry-level laboratory diagnostic tasks in the veterinary practice workplace. Task areas and topics included in this course are all prior topics, plus white blood cell development and assessment, total white blood cell counts, the differential count, toxic white cells, QBC/E evaluation, various blood film stains, Unopette/E counting systems, RBC indices, microscopic evaluation of urine, kit immunoassay tests, canine heartworm assays, Mycoplasma hemofelis, and clinical pathology case studies.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: VTEC 0113

VTEC 0124.02: Fundamentals in Veterinary Technology II.

This is the second in a stream of courses designed to address discrete topics in veterinary technology that do not warrant full-course status or that require attention during the semester to support other courses. Topics included in this course are: communications in the veterinary practice, veterinary medical records, credentialing and legislation in the veterinary professions, veterinary medical terminology, pharmacology, parasitology, computer applications in veterinary practice, and the economics of veterinary practice.

NOTE: Winter semester

FORMAT: Lecture 5 hours

PREREQUISITE: VTEC 0114

VTEC 0125.02: Anatomy–Physiology–Pathophysiology II.

This is the second of two courses designed to enable the student to apply the principles of anatomy, physiology, and pathophysiology to animal nursing and medicine. Clinical applications are stressed, and progress through this course is co-ordinated with other courses in the semester. This course addresses the anatomy, physiology, and typical disease processes in the remainder of the major body systems. Systems and topics in this course include: digestive, reproductive, nervous, and endocrine systems; organs of special sense; and skin. The principles of inheritance and genetics and embryology are dealt with using examples of common congenital diseases.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: VTEC 0115

VTEC 0131.02: Internship in Veterinary Technology.

This is a capstone course. In this course the learning objectives of all courses in the first two semesters are consolidated and re-tested. Students rotate through clinical, laboratory, and off-campus cooperating hospital experiences, with daily classroom sessions for discussion and testing. In clinical and diagnostic laboratory sessions, students hone skills learned in the first two semesters and acquire some new ones. Completion of this course is a prerequisite for registration in VTEC 0133 and for registration in all second-year courses (Semesters 4 and 5). The approximate division of elements of this course is: Clinical 64 hours (2 x 8 hr per week); Clinical Pathology 36 hours (3 x 3 hr per week); Cooperating Hospital 16 hours (1 x 4 hr per week); and Cognitive Classroom Sessions 16 hours (4 x 1 hr per week). Animal care and maintenance duties are in addition to scheduled hours in this course. Task areas included in this course are animal and facilities maintenance, drug administration, anaesthesiology, surgical preparation and assisting, radiography, clinical calculations, fluid therapy, blood sampling, feeding, and introduction to dental disease and treatment.

NOTE: Spring semester

FORMAT: 4 weeks.

VTEC 0132.02: Externship at the Atlantic Veterinary College.

This course is an off-campus externship delivered by the Atlantic Veterinary College (AVC). During these four weeks students are on duty with technical staff for approximately one-half of their time at the Veterinary Teaching Hospital (VTH). Evening and night shifts are a large part of the AVC Externship. Day shifts allow some opportunity for the student to choose specific areas of interest. In addition, there are structured learning exercises. There is a significant livestock and equine component to the AVC Externship. Students attend this externship in two or more sections. Attendance is required at all scheduled duty shifts and exercises. Completion of this course is a prerequisite for registration in VTEC 0133 and for registration in all second-year courses (Semesters 4 and 5).

NOTE: Spring semester. Note: Cost of transportation to AVC and room and board in Charlottetown are the responsibility of the student. Staff of the Veterinary Technology Program will assist the student where possible, but the responsibility for living arrangements is the student's.

FORMAT: 4 weeks.

VTEC 0133.02: Externship in General Veterinary Practice.

This course is an off-campus learning experience in a general veterinary practice. Students locate these externship practices from a list provided by the VT Program staff, but an unlisted practice contacted by a student may be approved. To be approved the practice must have a significant companion-animal (small-animal) clientele and employ at least one graduate AHT/VT. Students may apply to complete this externship in practices outside of the Atlantic Region. A contract between the student, the practice, and the University must be completed before this externship can begin. Weekly report forms and a final report are completed by practice personnel. Student assignments must be completed before a credit can be entered for this course.

NOTE: Spring semester

FORMAT: 6 weeks.

PREREQUISITE: VTEC 0131

VTEC 0211.02: Animal Medicine and Nursing III.

This is the third in a stream of medicine and nursing courses designed to enable the student to grasp cognitively the principles and practices of veterinary medical, surgical, and related topics. In conjunction with other courses in the Veterinary Technology Program and the related internship and externships, these courses equip the graduate to perform entry-level clinical tasks in the veterinary practice

workplace. Topics included in this course are anaesthesiology, pain management, surgical preparation and assisting, radiography, clinical calculations, fluid therapy, emergency procedures, blood sampling, non-infectious diseases of companion animals, feeding in disease states, and dental disease and treatment.

NOTE: Fall semester

FORMAT: Lecture 4 hours per week.

PREREQUISITE: VTEC 0131, VTEC 0132

VTEC 0212.02: Clinical Exercises III.

This is the third in a stream of clinical exercises courses designed to enable the student to perform medical, surgical, and related clinical skills. In conjunction with other courses in the Veterinary Technology program and the related internship and externships, these courses equip the graduate to perform entry-level clinical tasks in the veterinary practice workplace. Animal care and maintenance duties are in addition to the scheduled hours in this course. Task areas included in this course are animal and facilities maintenance, drug administration, general nursing, anaesthesiology, surgical preparation and assistance, radiography, fluid therapy, sampling for the laboratory, and dental procedures.

NOTE: Fall semester

FORMAT: Lecture 1 hour, lab 4 hours

PREREQUISITE: VTEC 0131, VTEC 0132

VTEC 0213.02: Veterinary Clinical Pathology III.

This is the third in a stream of theory and practical clinical pathology courses designed to enable the student to perform, and cognitively grasp the principles of, essential tasks in the in-house veterinary practice laboratory. In conjunction with other courses in the clinical pathology stream and the related internship and externships, these courses equip the graduate to perform entry-level laboratory diagnostic tasks in the veterinary practice workplace. Task areas and topics included in this course are all prior topics, plus theory of blood chemical tests, serum chemistry, large-animal parasites, haematology of alternate species, microbiology and antibiotic susceptibility testing, yeast and other fungi, advanced parasitology techniques, quality control in the laboratory, submissions to external laboratories, and clinical pathology case studies.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: VTEC 0131, VTEC 0132

VTEC 0214.02: Fundamentals in Veterinary Technology III.

This is the third in a stream of courses designed to address discrete topics in veterinary technology that do not warrant full-course status or that require attention during the semester to support other courses. Case reports from externships are delivered and discussed. Topics included in this course are veterinary medical terminology, pharmacology and dispensing, parasitology, clinical calculations, computer applications in veterinary practice, bookkeeping in the veterinary practice, and presentations to small groups.

NOTE: Fall semester

FORMAT: Lecture 5 hours

PREREQUISITE: VTEC 0131, VTEC 0132

VTEC 0215.02: Livestock and Equine Principles.

Through a mixture of classroom and field trip exercises, this course enables the Veterinary Technology student to recognize common equine and livestock breeds; describe livestock production cycles and methods; and use appropriate terminology. Common diseases of large animals as they relate to the veterinary technician are dealt with. Urgent and emergency clinical signs in large-animal species are stressed. Common clinical procedures in large-animal practice are outlined.

NOTE: Fall semester

FORMAT: Lecture 3 hours, lab 2 hours.

PREREQUISITE: VTEC 0131, VTEC 0132

VTEC 0221.02: Animal Medicine and Nursing IV.

This is the last and capstone course in a stream of medicine and nursing courses designed to enable the student to grasp cognitively the principles and practices of veterinary medical, surgical, and related topics. Upon completion of this course and the related course VTEC 0222, the graduate is able to perform entry-level clinical tasks in the veterinary practice workplace. Problem-oriented case studies are used as models. All task areas included in prior Animal Medicine and Nursing courses are revisited, and some are elaborated. Students are re-evaluated comprehensively.

NOTE: Winter semester

FORMAT: Lecture 4 hours per week.

PREREQUISITE: VTEC 0211, VTEC 0212

VTEC 0222.02: Clinical Exercises IV.

This is the last and capstone course in a stream of clinical exercises courses designed to enable the student to perform medical, surgical, and related clinical skills. Upon completion of this course and the related VTEC0221, the graduate is able to perform entry-level clinical tasks in the veterinary practice workplace. All task areas included in prior Clinical Exercises courses are reviewed, some are elaborated, and students are re-evaluated.

NOTE: Winter semester

FORMAT: Lecture 1 hour, lab 4 hours

PREREQUISITE: VTEC 0211, VTEC 0212

VTEC 0223.02: Veterinary Clinical Pathology IV.

This is the last and capstone course in a stream of theory and practical clinical pathology courses designed to enable the student to perform, and cognitively grasp the principles of, essential tasks in the in-house veterinary practice laboratory. Upon completion of this course the graduate is able to perform entry-level laboratory diagnostic tasks in the veterinary practice workplace. Students are re evaluated comprehensively. Task areas and topics included in this course are all prior topics, plus cytology of the reproductive tracts, soft tissues, and body fluids; transfusion medicine; bone marrow evaluation; semen evaluation; cerebrospinal fluid; blood dyscrasias; coagulation factor evaluations; quality control programs; trouble shooting problems in the laboratory; and clinical pathology case studies.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: VTEC 0213

VTEC 0224.02: Fundamentals in Veterinary Technology IV.

This is the last and capstone course in a stream of courses designed to address discrete topics in veterinary technology that do not warrant full-course status or that require attention during the semester to support other courses. All topics included in prior Fundamentals courses are reviewed and some are elaborated, and students are re evaluated comprehensively in all areas.

NOTE: Winter semester

FORMAT: Lecture 5 hours

VTEC 0225.02: Laboratory Animal and Alternative Pet Medicine.

This course enables the student to apply the principles of clinical nursing to alternate and exotic pets as well as to common laboratory animal species. It also enables the graduate to enter the research facility and, with supplemental training and experience, prepares the graduate for certification with the Canadian Association for Laboratory Animal Sciences. Topics include specialized animal sources, barriers and containment, bio-hazards, special requirements of various species, handling of and common techniques used on alternate and laboratory animal species, and the ethics of animal research and of wild animal species as pets.

NOTE: Winter semester

FORMAT: Lecture 3 hours, lab 3 hours.

PREREQUISITE: VTEC 0211, VTEC 0212, VTEC 0213, VTEC 0214

Faculty of Architecture and Planning

Address: Faculty of Architecture and Planning
Dalhousie University

I. Introduction

The Faculty of Architecture and Planning includes the School of Architecture and the School of Planning. The Faculty's degree programs are primarily for individuals who intend to become a professional architect or planner. The Faculty also offers several courses that are open to all students in the university, as well as undergraduate and graduate courses that may be taken with permission from the instructor. The professional Architecture program (BEDS/MArch) is described in the Architecture section of this calendar. The Bachelor of Community Design program is described in the Planning section of this calendar. Please see the Graduate Studies calendar for a description of all graduate Architecture and Planning programs.

School of Architecture

Address: School of Architecture
Dalhousie University
5410 Spring Garden Road
PO Box 15000
Halifax, NS B3H 4R2

Professors Emeriti

Baniassad, E., BArch (Illinois), MA, PhD (Manchester), FRAIC
Jackson, A., Dipl. Arch (Poly London), ARIBA
Wanzel, J.G., BArch, MArch (Toronto), MRAIC

Professors

Cavanagh, E., BSc, BArch (McGill), PhD (Lehigh)
Kroeker, R., BES (Manitoba), AADipl, ARCUK
MacKay-Lyons, B., BEDS, BArch (TUNS), MArchUD (UCLA), FRAIC, (Hon) FAIA, NSAA, AAPEI, OAA
Macy, C., BA (Arch) (California at Berkeley), MArch (MIT), Reg Arch (WA)
Mannell, S., BES, BArch (Waterloo), NSAA, OAA
Parcell, S., BArch (Toronto), MArch (Cranbrook), PhD (McGill)

Associate Professors

Bonnemaizon, S., BSc (Concordia), BArch (Pratt), MSc (Arch) (MIT), PhD (UBC)
Burnay, D., Dipl Arch (Technical University Lisbon), MSc (Arch) (University College London)
Lilley, B., BES (Manitoba), AA Dipl
Savage, N., BA (Alberta), BEDS, MArch (FP) (TUNS), NSAA

Assistant Professors

Mullin, R., BEDS, MArch (FP) (TUNS)
 Parsons, A., BSc (McGill), MES (Dalhousie), SMBT (MIT)
 Venart, C. A. S., Cert. Eng. (Mt. A), BFA (Toronto), MArch (SCI-Arc), AK NWF
 (prof. reg. Germany)

Professors of Practice

Fitzgerald, S., BSc (University College London), BID (Kwantlen), BEDS
 (TUNS), MArch (FP) (Dalhousie), NSAA, AAA, AANB, IDNS
 Sweetapple, T., BA (Dalhousie), BEDS, MArch (FP) (TUNS), NSAA, AANB,
 AIA.
 Verissimo, C., Dipl Arch (Technical University Lisbon), MArch II (Harvard).

Lecturer

Kelly, P., BSc (Dalhousie), MSc (TUNS)

Cross-Appointed Faculty

Palermo, F., BArch (Toronto), MArch UD (Harvard) - Planning

Adjuncts

Burns, C., BA (Bryn Mawr), BA, MArch (Yale)
 Butler, T., MEng (Leeds), MSt (Cambridge), MCIBSE, MICE, CEng, MBIFM
 Carter, B., Dipl Arch (Nottingham), MArch (Toronto); SUNY at Buffalo
 Henry, P., BEDS, BArch (TUNS), NSAA
 Kahn, A., BA (Bennington), MArch (Princeton); Columbia University
 Levitt, J., BA, BArch (Toronto)
 Sassenroth, P., Dipl Arch (Technical University Berlin); Fachhochschule Bielefeld
 Thün, G., BA (Western), BES, BArch (Waterloo), MUD (Toronto); University of
 Michigan

Instructor

Jannasch, E., BEDS (TUNS), MArch (FP) (Dalhousie)

I. Introduction

The School of Architecture, which is part of the Faculty of Architecture and Planning at Dalhousie University, was established in 1961 to serve the Atlantic region. While it continues to fulfill its original mandate, the School also contributes nationally and internationally to architecture through its dynamic faculty and committed student body. Its primary aim is to educate individuals who intend to become professional architects. The School's professional degree program includes the two-year Bachelor of Environmental Design Studies degree and the two-year Master of Architecture degree. Most of the program is conducted within the School of Architecture by full-time faculty members. It also includes two co-op work terms in which students gain practical experience in an architectural office. The curriculum enables architectural education and practice to develop in parallel.

Design

The central activity of the professional degree program is architectural design: the creative study of buildings and cities. In the School's design studios, students examine historical and contemporary buildings in Canada and abroad, and respond through the design of new architectural projects. From the core studies of the undergraduate program to the elective studies and design thesis of the graduate program, students learn to rely on their artistic skill, their knowledge of history and technology, their social and cultural awareness, and their critical imagination. Architecture is a multi-disciplinary profession, with alliances to the fine arts, the humanities and technologies, and many undergraduate disciplines provide an effective entry into architecture. Conversely, architectural studies provide an excellent foundation for careers in a variety of design-related fields.

Facilities

The School is housed in the original home of the Nova Scotia Technical College, built in 1909 and renamed the Ralph M. Medjuck Building in 2005. Corresponding to the School's emphasis on architectural design, one-third of the building is devoted to studio spaces that are open to students 24 hours a day. The building also has several computer labs with a wide array of equipment, a fully-equipped woodworking shop, an experimental construction lab, a digital modeling shop, photographic and GIS facilities, and a large exhibition hall. The University Library's architecture collection is located nearby and a student resource centre is housed within the Faculty.

Co-op Work Terms

The School's professional degree program includes two work terms that provide students with practical experience in building design and responsible professional practice. The School's Co-op Program has been operating since 1970, and the Faculty of Architecture and Planning's Co-op Office assists students in finding suitable work term placements. In recent years, Architecture students have been employed in every province and territory in Canada, and approximately one-third have chosen to work abroad - most recently, in Argentina, Austria, China, Egypt, England, Germany, Iran, Japan, Netherlands, Norway, Singapore, Switzerland, and the United States.

Accreditation

The School's professional degree program is fully accredited by the Canadian Architectural Certification Board (CACB). The entire six-year program consists of two years of general studies at a recognized university, followed by two years of undergraduate study at the School of Architecture (BEDS) and two years of graduate study at the School of Architecture (MArch).

In Canada, all provincial/territorial associations/institutes/orders recommend a degree from an accredited professional degree program as a prerequisite for licensure. The Canadian Architectural Certification Board, which is the sole agency authorized to accredit Canadian professional degree programs in architecture, recognizes two types of accredited degrees: the Bachelor of Architecture (BArch) and the Master of Architecture (MArch). A program may be granted a six-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established educational standards. Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Professional Registration

After receiving the professional degree, a graduate may fulfill additional requirements for professional registration, including a period of post-graduate practical experience and the completion of registration examinations. In Canada, these additional requirements are determined by provincial organizations that are empowered to register an individual for professional practice. An American citizen who graduates from the School's MArch program is qualified to become an architectural intern in the United States and to complete the examination for professional registration there. Applicants from other countries are advised to contact their national architectural organization about requirements for professional registration.

II. Courses Open to Non-Majors

The School of Architecture offers several courses that are open to all students in the university:

- ARCH 1000X/Y.06: Introduction to Architecture
- ARCH 1200X/Y.06: Science of the Built Environment
- ARCH 2000.03: Visual Thinking A
- ARCH 2001.03: Visual Thinking B
- ARCH 2025.03: Design Drawing

Please consult the university's academic timetable for available courses. Individuals who are not currently registered at Dalhousie University should refer to the university's regulations in this calendar for details on Special Student status.

III. Undergraduate Degree Program

Bachelor of Environmental Design Studies

BEDS is a two-year, full-time, pre-professional program for a student who has already completed at least two years of general studies in subjects other than architecture. It consists of four academic terms in residence and a four-month work term. The BEDS degree recognizes a student's successful completion of a minimum of four years of university study, including two at the School of Architecture.

The BEDS program consists primarily of required courses in Design, Humanities, Technology, Representation, and Professional Practice. These courses provide a base of academic knowledge and design skill from which a student may proceed to a graduate program. The BEDS program leads to the MArch program, as well as to the Faculty's other graduate programs in Environmental Design Studies and Planning. A BEDS graduate may also choose to continue into another related field in design, environmental studies, management, etc., at Dalhousie or elsewhere.

IV. Undergraduate Regulations

For academic regulations that apply to undergraduate students in the School of Architecture (including workload, course changes, withdrawal, transfer credits, part-time studies, duration of undergraduate studies, minimum degree requirements, assessment, incomplete course work, reassessment of a grade, and academic standing), please refer to the Academic Regulations section in this calendar and the Current Students section of the School of Architecture Website. Please note that some undergraduate regulations differ from their graduate counterparts.

V. Undergraduate Courses Offered

A. Professional Degree Program

The following chart illustrates the distribution of terms throughout the four years of the professional degree program in the School of Architecture. Following the two-year general studies prerequisite, the next two years are Bachelor of Environmental Design Studies and the final two years are Master of Architecture.

Fall	Winter	Summer
Year 3 - BEDS B1 (academic term)	B2 (academic term)	Year 4 - BEDS B3 (academic term)
B4 (work term)	B5 (academic term)	Year 5 - MArch M1 (academic term)
M2 (academic term)	M3 (work term)	M4 (work term)
Year 6 - MArch M5 (academic term)	M6 (academic term)	

B. Bachelor of Environmental Design Studies

Year 3 - Term B1 (Fall)

- ARCH 3001.06: Design
- ARCH 3104.03: Foundations in Architectural History and Theory
- ARCH 3207.03: Building Technology
- ARCH 3301.01: Professional Practice
- ARCH 3501.03: Representation

Year 3 - Term B2 (Winter)

- ARCH 3002.06: Design
- ARCH 3105.03: Architectural History and Theory - 20th Century
- ARCH 3208.03: Building Technology
- ARCH 3302.01: Professional Practice
- ARCH 3502.03: Representation

Year 4 - Term B3 (Summer)

- ARCH 4003.03: Design
- ARCH 4004.03: Free Lab
- ARCH 4110.03: Architectural History and Theory - 14th-18th Century
- ARCH 4211.03: Building Systems Integration
- ARCH 4303.01: Professional Practice
- ARCH 4501.03: Representation

Year 4 - Term B4 (Fall)

- ARCH 8892.03: Professional Practice (Co-op Work Term)

Year 4 - Term B5 (Winter)

- ARCH 4005.06: Design
- ARCH 4111.03: Architectural History and Theory - 19th Century
- ARCH 4212.03: Building Systems Integration
- ARCH 4304.01: Professional Practice
- ARCH 4502.03: Representation

VI. Undergraduate Course Descriptions

Course Numbers

The first digit of an ARCH course number indicates its level: introductory courses open to all university students (1 and 2); Year 3 - BEDS (3); Year 4 - BEDS (4); or Undergraduate Co-op Work Term (8). The second digit indicates the area of study: Design (0), Humanities (1), Technology (2), Professional Practice (3), or Representation (5). Courses in the BEDS program have various credit-hour extensions (01-06) that indicate the approximate course hours each week and the appropriate balance of subjects for professional accreditation. Courses may be

interchanged between academic terms, depending on the availability of instructors.

ARCH 1000X/Y.06: Introduction to Architecture.

This course introduces architectural theory and practice through enduring themes in the discipline. It emphasizes design as a method of study, considers the materiality of buildings, and interprets the built environment as an expression of culture.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/seminar/lab

ARCH 1200X/Y.06: Science of the Built Environment.

This course introduces a broad range of scientific principles that influence the construction and environment of buildings. It studies topics such as mechanics, ecology, light, heat, and sound. The course uses a "common-sense" approach involving graphic images, practical understanding, and problem-solving; a background in science or mathematics is not required.

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture

ARCH 2000.03: Visual Thinking A.

Architects, scientists, political activists, manufacturers, and others employ a variety of visual tools to study and engage with the world. Students in this course learn to evaluate maps, simple technical drawings, and other visual devices, and use them to analyze actual situations and to generate and present innovations. Hands-on work is emphasized, but no prior experience in drawing or design is needed. With its focus on conceptualizing the concrete, outer world, this course is a useful complement to ARCH 2001.03.

FORMAT: Lecture/seminar

PREREQUISITE: Completion of first year university or permission of instructor

ARCH 2001.03: Visual Thinking B.

As the world becomes more visually oriented, a critical appreciation of visual information becomes indispensable. Students use charts, diagrams and other means of externalizing, developing, and sharing ideas. In doing so, they learn to analyze the form of graphic information as well as the content. Hands-on work is emphasized, but no prior experience in drawing or design is needed. This course is a more abstract and reflective complement to ARCH 2000.03.

FORMAT: Lecture/seminar

PREREQUISITE: Completion of ARCH 2000.03 or permission of instructor

ARCH 2025.03: Design Drawing.

This course enables students to enhance their design literacy skills through attention to graphic design, layout, composition, and typography. Students will gain experience in a range of techniques in design drawing and portfolio presentation.

FORMAT: Lecture/lab

PREREQUISITE: ARCH 1000, PLAN 1002 or permission of instructor

CROSS-LISTING: PLAN 2025.03

ARCH 3001.06: Design.

This course studies basic principles of architecture through studio projects using drawings and models. Students design elementary building forms beginning with the pavilion, on various sites. Working with basic building elements of floor, wall and roof, students consider architectural composition and materials at the three scales of detail, building, and site. The course includes historical design studies to understand how other architects have responded to similar problems.

FORMAT: Lecture/studio

RESTRICTION: Year 3 BEDS students

ARCH 3002.06: Design.

This course studies principles of architecture by focusing on the design of the house. Building on topics from ARCH 3001, it considers issues of composition (structural, volumetric, and spatial), building program, interior environment, and relations to community context and ecological surroundings. The course includes historical design studies to understand how other architects have responded to these issues.

FORMAT: Lecture/studio

RESTRICTION: Year 3 BEDS students

ARCH 3104.03: Foundations in Architectural History and Theory.

This course introduces basic topics in architecture and interpretive methods in architectural research. It focuses on selected buildings and the role of the architect in the ancient and medieval eras. To develop research skills and architectural awareness, students interpret local buildings through direct experience and study distant and historical buildings through publications.

FORMAT: Lecture/seminar

RESTRICTION: Year 3 BEDS students

ARCH 3105.03: Architectural History and Theory - 20th Century.

This course is a survey of late modern architecture, focusing on Europe and North America. Buildings and urban projects are situated in their social and political contexts and the theoretical constructs that influenced their development. Students are exposed to extramural archives and resources to research local modern buildings and their architects.

FORMAT: Lecture/seminar

RESTRICTION: Year 3 BEDS students

ARCH 3207.03: Building Technology.

This course studies aspects of building technology that act as primary generators of architectural form: structure, material, light and sound. Construction process is examined in terms of materials, methods and sequences. Principles of building structure and methods of structural analysis are introduced. The physics and perception of light in built environments are studied. Quizzes and tests are complemented by studio exercises.

FORMAT: Lecture/studio

RESTRICTION: Year 3 BEDS Students

ARCH 3208.03: Building Technology.

This course studies aspects of building technology that mediate the relationship between interior and exterior environments. Building materials studies include structural and environmental properties, constructional implications, and principles of assembly and jointing. The principles of heat flow, air flow and moisture flow in building enclosures are presented. Students undertake a series of design exercises applying knowledge of topics studied in the course.

FORMAT: Lecture/studio

RESTRICTION: Year 3 BEDS students

ARCH 3301.01: Professional Practice.

This course introduces the role and place of the architect in society, with an emphasis on the development of the profession through history. It also studies representation methods employed by architects and their implications for design.

FORMAT: Lecture/seminar

RESTRICTION: Year 3 BEDS students

ARCH 3302.01: Professional Practice.

In this week-long module students learn about the architect in society; the political, social, economic and ethical environments in which architects practice; and an introduction to office organization and project management.

FORMAT: Lecture/seminar

RESTRICTION: Year 3 BEDS students

ARCH 3501.03: Representation.

This course studies fundamental concepts, techniques, and applications of architectural representation. Class work involves freehand drawing, orthographic drawing, model making, and photography. Drafting and modeling equipment are required.

FORMAT: Lecture/studio

RESTRICTION: Year 3 BEDS students

ARCH 3502.03: Representation.

This course builds on the principles of drawing, modeling, imaging, and composition studied in ARCH 3501. Topics include axonometric, perspective, tone, colour, and composition.

FORMAT: Lecture/studio

RESTRICTION: Year 3 BEDS students

ARCH 4003.03: Design.

This course studies principles of architecture through the design of a public building. Building on previous courses, it includes the organization of a public program and issues of context and interpretation. As an intensive studio it encourages students to focus on design intentions and to develop an awareness of design process.

FORMAT: Lecture/studio

RESTRICTION: Year 4 BEDS students

ARCH 4004.03: Free Lab.

To complement studio-based learning, this course is an experimental hands-on workshop in design led by an instructor. Investigations of a particular architectural topic may include design-and-build, documentary work, landscape installations, community design projects and interdisciplinary work. Projects may be done locally or involve travel to a distant site.

FORMAT: Lecture/studio

RESTRICTION: Year 4 BEDS students

ARCH 4005.06: Design.

This course studies advanced principles of architectural design through the design of a medium-sized institutional building. Elaborating on topics from the previous design courses, students organize a complex program on an urban site and develop a project that uses building technology strategically and engages relevant issues in architectural history and theory. Emphasis is also placed on fluency in architectural representation.

FORMAT: Lecture/studio

RESTRICTION: Year 4 BEDS students

ARCH 4110.03: Architectural History and Theory - 14th-18th Century.

This course studies significant buildings and the role of architecture from the Renaissance to the Enlightenment, mainly in Europe. It follows the transition from master builder to architect, and the humanist search for order and its manifestation in built form. Students analyze the design of significant buildings by studying historical documents and making interpretive drawings and models.

FORMAT: Lecture/seminar

RESTRICTION: Year 4 BEDS students

ARCH 4111.03: Architectural History and Theory - 19th Century.

This course studies impacts of industrialization on architecture and the city in nineteenth-century Europe and North America. It considers major urban transformations in their socio-political context. Students examine primary and secondary sources to develop skills in research and criticism.

FORMAT: Lecture/seminar

RESTRICTION: Year 4 BEDS students

ARCH 4211.03: Building Systems Integration.

This course studies the integration of building structural and enclosure systems in architectural design. Long span structural systems and lateral forces are examined, including their interaction with the enclosure system. Building enclosure studies include the performance of materials in assemblies, the performance of the building envelope, and the sequence of construction. The integration of structure and enclosure is examined through the construction detail. Students complete case studies and design projects integrating structure and enclosure in buildings.

FORMAT: Lecture/studio

RESTRICTION: Year 4 BEDS students

ARCH 4212.03: Building Systems Integration.

This course studies performance standards related to human activities in buildings, and the systems and configurations required to support those activities. Building systems are considered in relation to climate, urban situation, and the natural environment. Principles of systems thinking, as well as the use of physical and computational modeling methods, are applied to the comprehensive design of a building to achieve defined performance standards and to consider issues of sustainability with regard to energy balance, water conservation, and component materials.

FORMAT: Lecture/studio

RESTRICTION: Year 4 BEDS students

ARCH 4303.01: Professional Practice.

This course introduces contemporary office practices and project delivery including marketing, contracts, project phases and contract administration. The course also introduces issues related to the co-op work term, including job placement and the role of the student in a professional office.

FORMAT: Lecture/seminar

RESTRICTION: Year 4 BEDS students

ARCH 4304.01: Professional Practice.

In this week-long module students learn about the architect in society; professional ethics; models of practice; legal aspects of practice; authorities having jurisdiction over building; finance and costing techniques; and internship. FORMAT: Lecture/seminar
RESTRICTION: Year 4 BEDS students

ARCH 4501.03: Representation.

This course studies the expressive use of manual and digital media to present design work to various audiences, including the architectural community and the public. Topics include image editing, rendering, and the integration of text, image, and model. Design work may be presented in an exhibition installation, printed book, and/or online portfolio.
FORMAT: Lecture/studio
RESTRICTION: Year 4 BEDS students

ARCH 4502.03: Representation.

This course studies advanced strategies of representation. It promotes the fluent use of manual and digital media in design development, guided by architectural intentions and an understanding of architectural history, theory, and technology.
FORMAT: Lecture/studio
RESTRICTION: Year 4 BEDS students

ARCH 8892.03: Professional Practice (Co-op Work Term).

A student works in some aspect of the profession for a total of 500 hours to be accomplished in no less than 12 weeks, and completes a research report or assignment. Work placements are coordinated by the co-op coordinator for Architecture and must be approved by the School. In exceptional circumstances a student may apply to satisfy up to 500 hours of the time requirement through supervised research related to professional practice.
RESTRICTION: Year 4 BEDS students

VII. Graduate Degree Program

The Master of Architecture program description is included here in the undergraduate calendar to provide an overview of the entire professional degree program, which includes both the BEDS and MArch degrees.

Master of Architecture

Master of Architecture is a two-year, full-time program consisting of four academic terms in residence and an eight-month work term. It includes required courses that complete the core requirements for the School's professional degree program. Elective courses also enable a student to focus on a particular area of study such as housing, urban design, history and theory, building technology, environmental design, or computer applications. In the final year each student works on a design thesis, supervised by a faculty member.

For admission requirements, refer to the graduate calendar.

VIII. Graduate Courses Offered

A. Master of Architecture

Year 5 - Terms M1 and M2 (Summer and Fall)

- two core courses in Design (ARCH 50xx.06)
- two core courses in Humanities (ARCH 51xx.03)
- two core courses in Technology (ARCH 52xx.03)
- two graduate electives (ARCH 5xxx.03 or ARCH 6xxx.03)

Year 5 - Terms M3 and M4 (Winter and Summer)

- ARCH 5308.03: Professional Practice (Co-op Work Term)
- ARCH 5309.03: Professional Practice (Co-op Work Term)

Year 6 - Term M5 (Fall)

- ARCH 5216.06: Building Systems Integration for Design Thesis
- ARCH 9007.06: MArch Thesis Preparation
- one graduate elective (ARCH 5xxx.03 or ARCH 6xxx.03)

Year 6 - Term M6 (Winter)

- ARCH 5311.03: Professional Practice
- ARCH 9008.06: MArch Thesis
- one graduate elective (ARCH 5xxx.03 or ARCH 6xxx.03)

B. Graduate Courses

Core Courses - Design

- ARCH 5002.06: Urban Housing Studio
- ARCH 5003.06: Adaptive Reuse Studio
- ARCH 5004.06: Urban Systems Studio
- ARCH 5005.06: Material Detail Studio
- ARCH 5006.06: Light Frame Building Studio
- ARCH 5007.06: Landscape Studio
- ARCH 5009.06: Ephemeral Architecture Studio
- ARCH 5010.06: Public Architecture Studio
- ARCH 5011.06: Coastal Studio
- ARCH 5012.06: Urban Program Studio

Core Courses - Humanities

- ARCH 5102.03: Housing Theory
- ARCH 5103.03: Residential Real Estate Development
- ARCH 5104.03: Urban Systems
- ARCH 5105.03: History and Theory of Cities
- ARCH 5106.03: International Sustainable Development
- ARCH 5107.03: Theory and the Built Environment
- ARCH 5108.03: Architectural Theory of the Enlightenment
- ARCH 5109.03: Ephemeral Architecture
- ARCH 5110.03: Architectural Exhibitions
- ARCH 5112.03: Documentation and Conservation of the Modern Movement in Architecture
- ARCH 5113.03: Technology, Culture and Society
- ARCH 5198.03: Humanities Seminar

Core Courses - Technology

- ARCH 5202.03: From Timber to Lumber
- ARCH 5203.03: From Lumber to Structure
- ARCH 5204.03: Composite Materials
- ARCH 5207.03: Light and Material
- ARCH 5208.03: Acoustics
- ARCH 5209.03: Energy Efficient Design
- ARCH 5210.03: Life Cycle Analysis
- ARCH 5211.03: The Construction Detail
- ARCH 5212.03: From Principle to Detail
- ARCH 5213.03: Facades
- ARCH 5214.03: Tensile Architecture
- ARCH 5215.03: Fabrication
- ARCH 5217.03: Innovation in Computers and Building
- ARCH 5218.03: Site and Material Processes
- ARCH 5219.03: Technology of Heritage Conservation
- ARCH 5298.03: Technology Seminar

Electives

- ARCH 6001.03: Design Seminar
- ARCH 6002.03: Free Lab
- ARCH 6121.03: Architecture and Archaeoastronomy
- ARCH 6122.03: Humanities Seminar
- ARCH 6209.03: Material Investigation
- ARCH 6210.03: Material Investigation in Wood
- ARCH 6211.03: Technology Seminar
- ARCH 6215.03: Earth Construction
- ARCH 6216.03: Natural Finishes
- ARCH 6304.03: Entrepreneurship
- ARCH 6305.03: Permission to Build
- ARCH 6306.03: Professional Practice Seminar
- ARCH 6501.03: Graphic Design in Architecture
- ARCH 6502.03: Painting in Architecture
- ARCH 6503.03: Photography in Architecture
- ARCH 6504.03: Montage in Architecture
- ARCH 6505.03: Multimedia in Architecture
- ARCH 6506.03: Spatial Constructions in Digital Video
- ARCH 6507.03: Language as Representation
- ARCH 6508.03: Alternatives to Perspective
- ARCH 6509.03: Digital Form
- ARCH 6510.03: Architectural Documentation and Analysis
- ARCH 6511.03: Documentation of Historic Buildings
- ARCH 6512.03: Developments in Architectural Representation
- ARCH 6513.03: Representation Seminar

IX. Graduate Course Descriptions

ARCH 5002.06: Urban Housing Studio.

This studio explores the aesthetic, tectonic, social/cultural and economic challenges presented by contemporary high-density, mixed-use development. The relationships of architecture to urbanism, and building to city, will be explored through exemplary precedents and the design of housing and its associated commercial, institutional, and recreational components.

FORMAT: Studio

RESTRICTION: Graduate Students - Architecture

ARCH 5003.06: Adaptive Reuse Studio.

This studio studies architectural design through the adaptation of an existing building. It examines tensions between existing built facts (structure, enclosure, and circulation) and new ambitions (habitation, construction, and cultural representation). It also considers historical and urban contexts and the heritage value of existing buildings.

FORMAT: Studio

RESTRICTION: Graduate students - Architecture

ARCH 5004.06: Urban Systems Studio.

This studio examines the infrastructure of the metropolis and its influence on urban form and development. Topics may include systems for transportation, energy use, water distribution, civic institutions, spaces of social exchange, and ecology. Students develop urban infrastructure propositions with reference to innovative urban projects worldwide.

FORMAT: Studio

RESTRICTION: Graduate students - Architecture

ARCH 5005.06: Material Detail Studio.

This studio uses bricolage as a method to represent architectural ideas, observations, and intentions in a built artifact. Students interpret, modify, and project material details in architecture. The conceptual development of the work informs strategies for the development of an architectural design.

FORMAT: Studio

RESTRICTION: Graduate students - Architecture

ARCH 5006.06: Light Frame Building Studio.

This studio studies the material and constructional orders of light-weight framing and cladding systems. Through drawing, model, and full-scale construction, case studies of buildings by modern and contemporary designers inform design projects for a multiple residential or small institutional building.

FORMAT: Studio

RESTRICTION: Graduate students - Architecture

ARCH 5007.06: Landscape Studio.

This studio investigates architectural responses to landscape. It regards the land as a physical and cultural context requiring appropriate methods of visualization and representation. Referring to recent projects in land art, it considers how to engage local materials and interests while promoting the sustainable occupation of a particular site.

FORMAT: Studio

RESTRICTION: Graduate students - Architecture

ARCH 5009.06: Ephemeral Architecture Studio.

This studio examines temporal, fleeting and ephemeral architecture, in contrast to the permanent, monumental, and timeless architecture that has been stressed throughout history. Students address concepts of alterity, the carnivalesque, *l'informe*, and inversion by designing spaces and/or activities on the edges of the established order.

FORMAT: Studio

RESTRICTION: Graduate students - Architecture

ARCH 5010.06: Public Architecture Studio.

This studio examines the role of public architecture in manifesting cultural values through the design of a civic institution. It also considers public architecture as an expression of material culture that mediates between the scales of artifact and landscape.

FORMAT: Studio

RESTRICTION: Graduate students - Architecture

ARCH 5011.06: Coastal Studio.

This studio investigates building on the coast. It explores conjunctions of ecology, culture, and traditional technical knowledge. Through participatory design,

students work with a coastal community to develop innovative responses to situations with sensitive ecologies, extreme climate, and local cultural traditions.

FORMAT: Studio

RESTRICTION: Graduate students - Architecture

ARCH 5012.06: Urban Program Studio.

This studio focuses on a basic human need (eating, sleeping, etc.) and investigates the customs and institutions we have developed around it. Questioning local practices and considering distant references, each student formulates a program, defines a site in the city of Halifax, and designs a building with a critical and/or innovative intent.

FORMAT: Studio

RESTRICTION: Graduate students - Architecture

ARCH 5013.06: Design-Build Studio.

This field-based studio develops architectural abilities in the realization of building innovation. It emphasizes tools and processes that professionals need for detailed design development. It focuses on building prototypes of innovative structures such as wood lamella vaults, brick timbrel vaults, grid shells, and cable nets.

FORMAT: Studio

CO-REQUISITE: ARCH 5113

RESTRICTION: Graduate students - Architecture

ARCH 5102.03: Housing Theory.

This course introduces the history and theory of contemporary practice in housing design and production. The focus is on the quality of housing and the residential environment. A comparative analysis of significant past and current examples is used to provide insight into the way houses and neighbourhoods are designed. This understanding is placed in the context of differing economic, political and housing market situations.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 5103.03: Residential Real Estate Development.

This course introduces the basic issues, vocabulary, and conceptual approaches of residential real estate development. It also engages the range of design, development, financing, approval, and construction processes that are involved in the production of housing.

FORMAT: Seminar

RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 5104.03: Urban Systems.

This course examines the infrastructure of the metropolis and its influence on urban form and development. It considers transportation, energy use, water distribution, civic institutions, spaces of social exchange, and ecological systems. It emphasizes new concepts of what is "urban" and what is "natural," referring to innovative urban designs worldwide.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 5105.03: History and Theory of Cities.

This course examines selected major cities, their originating form, important buildings, and building types in their history. The primary aim is to explore the relationship between architecture and urbanism and the relationship between individual buildings and the city.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 5106.03: International Sustainable Development.

This course examines sustainable development in developed and developing countries. Local building practices and cultural appropriateness are studied through case studies. It considers how architects have handled materials and technology to engender patterns of living in a reflective and symbiotic manner.

FORMAT: Seminar

RESTRICTION: Graduate students - Architecture

ARCH 5107.03: Theory and the Built Environment.

This course is an overview of contemporary architectural theory, structured into three themes: architecture as a poetic act, moral act, and meaningful act. These

themes allow students to develop their research and design interests in the graduate program. In a major project, students translate theoretical concerns into an architectural installation.
 FORMAT: Lecture/seminar
 RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 5108.03: Architectural Theory of the Enlightenment.

This course focuses on the phenomenon of the Enlightenment and the search for origins. The terms "Classic" and "Romantic" are examined in depth, as are archaeology, the culture of ruins, historiography, association theory, and the Picturesque. Architectural theories are compared with selected works of architecture and architectural representation.
 FORMAT: Lecture/seminar
 RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 5109.03: Ephemeral Architecture.

This course explores ideas of "otherness" in the city, manifested as ephemeral or temporary constructions and as critical responses to established norms. Theories of alterity, the carnivalesque, *l'informe* and inversion are used to interpret spaces and activities in the city that are marginal, liminal, repressed, neglected, or abandoned.
 FORMAT: Lecture/seminar
 RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 5110.03: Architectural Exhibitions.

This course introduces students to contemporary discussions in the field of exhibit design for architecture, including the role of the viewer, the use of display techniques to frame objects, and the curatorial voice. Groups of students develop an exhibition on a subject of their choice.
 FORMAT: Seminar/studio
 RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 5112.03: Documentation and Conservation of the Modern Movement.

This course studies the documentation and conservation of buildings, sites and neighbourhoods of the Modern Movement. It examines international charters, protocols, and issues of identifications, evaluation and public awareness. Students undertake fieldwork and research on specific projects and contribute to a general register of modern works.
 FORMAT: Lecture/seminar
 RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 5113.03: Technology, Culture, and Society.

This course studies the technology of architecture in its broad cultural and social context. It explores the issue of technology in History, philosophy, sociology, and material culture, using contemporary and historical building as an example.
 FORMAT: Seminar
 RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 5198.03/5199.03: Humanities Seminar.

This course focuses on an advanced topic in architectural humanities. The topic changes from year to year. It may emphasize history, theory, criticism, urban studies, or architecture in development.
 FORMAT: Seminar
 RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 5202.03: From Timber to Lumber.

This course examines principles of forestry and ecology pertaining to woodlot management. It considers forest ecology, wood production, and the conversion of trees into building products such as dimensional lumber and engineered wood products.
 FORMAT: Lecture/seminar
 RESTRICTION: Graduate students - Architecture

ARCH 5203.03: From Lumber to Structure.

This course focuses on the structural analysis of wood framed buildings and structures. Structural principles in simple beam theory, column design, and lateral load design are studied in traditional and contemporary wood framed buildings.
 FORMAT: Lecture/seminar
 RESTRICTION: Graduate students - Architecture

ARCH 5204.03: Composite Materials.

This course surveys the history of materials, focusing on natural and synthetic polymers, resins, and composite material systems. It studies their origin, chemical content, and manufacturing processes. These materials and their related processes are used to fabricate functional objects, with attention to structure, assembly, and environmental impact.
 FORMAT: Seminar
 RESTRICTION: Graduate students - Architecture

ARCH 5207.03: Light and Material.

This course examines characteristics of daylight and artificial light. It analyzes and experiments with how light is produced, is transmitted, and interacts with various materials. By considering lighting options for a particular use, it regards light as an integral element in the design of interior and/or exterior space.
 FORMAT: Lecture/seminar
 RESTRICTION: Graduate students - Architecture

ARCH 5208.03: Acoustics.

This course studies principles of interior room acoustics and audio-visual design. To address acoustical requirements in various types of spaces, it considers sound projection and isolation, and the control of mechanical and environmental noise through building design and acoustical materials.
 FORMAT: Seminar
 RESTRICTION: Graduate students - Architecture

ARCH 5209.03: Energy Efficient Design.

This course focuses on sustainable building services. It studies building energy codes and rating systems - specifically LEED - in the Atlantic region. It also examines international strategies for low-energy building; passive systems in ventilation, heating, and cooling; renewable energy systems; and the integration of engineering systems into architectural design.
 FORMAT: Seminar
 RESTRICTION: Graduate students - Architecture

ARCH 5210.03: Life Cycle Analysis.

This course studies the range of environmental impacts associated with building materials and assemblies, from their raw state to the end of their useful life. It considers operating energy, embodied energy, and carbon sequestration, with particular attention to the structure and building envelope of wood framed heritage buildings.
 FORMAT: Lecture/seminar
 RESTRICTION: Graduate students - Architecture

ARCH 5211.03: The Construction Detail.

This course examines the construction detail and its dialectical relationship to the architectural whole. Case studies of details in major twentieth-century buildings inform detail practice, in which students investigate material options and construction details for a project of their own design.
 FORMAT: Seminar
 RESTRICTION: Graduate students - Architecture

ARCH 5212.03: From Principle to Detail.

This course advances the technological content of a concurrent design project or thesis. It focuses on the integration of building systems (e.g., structure, construction, environmental technology), beginning with an overview of principles, followed by a self-directed material exploration, and culminating in the production of a relevant building detail.
 FORMAT: Studio/seminar
 RESTRICTION: Graduate students - Architecture

ARCH 5213.03: Facades.

This course examines the various functions of a building facade: protection from weather, interior comfort, urban sign, and potential energy producer. It considers how a facade designed for a particular program can achieve high performance through attention to detail: building materials, manufacturing processes, and construction techniques.
 FORMAT: Seminar
 RESTRICTION: Graduate students - Architecture

ARCH 5214.03: Tensile Architecture.

This course studies the design and behaviour of tensile structures by building and testing models and mock-ups. It also explores the rhetorical potential of tensile structures by integrating technologies such as video, sound, light, sensors, and smart fabrics.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture

ARCH 5215.03: Fabrication.

This course studies the sequence of trades involved in building construction. It examines the material processes of various construction industries and considers their implications for design, with an emphasis on relations between convention and innovation.

FORMAT: Seminar

RESTRICTION: Graduate students - Architecture

ARCH 5216.06: Building Systems Integration for Design Thesis.

This course parallels MArch Thesis Preparation (ARCH 9007). Each student undertakes a technological study of his/her architectural design thesis through an ecological analysis of the site; a definition of performance criteria; an investigation of relevant building systems; and the design, construction, and testing of a significant material detail.

FORMAT: Lecture/seminar

PREREQUISITE: Completion of Year 5 MArch

RESTRICTION: MArch students

ARCH 5217.03: Innovation in Computers and Building.

This course surveys and undertakes research in computer-based architectural models and computer-assisted manufacture, logistics, and construction. After an initial survey of the state of the art, students work on a focused design or problem-solving exercise. Where possible, work will contribute to actual building projects, research, competitions, and/or publication.

FORMAT: Seminar/studio

RESTRICTION: Graduate students - Architecture

ARCH 5218.03: Site and Material Processes.

This course includes extensive field studies in Nova Scotia and the southeast United States. It introduces principles and practices of site dynamics such as ecology, and extends student understanding of building materials, manufacture, and innovative construction processes.

FORMAT: Seminar/studio

RESTRICTION: Graduate students - Architecture

ARCH 5219.03: Technology of Heritage Conservation.

This course studies issues of building technology in heritage conservation. Based on the Standards and Guidelines for the Heritage Conservation of Historic Places in Canada (2010), it considers building technology issues germane to different conservation interventions (preservation, restoration, and rehabilitation), the appropriate use of materials and details, and the integration of building systems technology.

FORMAT: Seminar

RESTRICTION: Graduate students - Architecture

ARCH 5298.03/5299.03: Technology Seminar.

This course focuses on an advanced topic in architectural technology. The topic changes from year to year. It may emphasize materials, environmental strategies, or building details.

FORMAT: Seminar

RESTRICTION: Graduate students - Architecture

ARCH 5308.03/5309.03: Professional Practice (Co-op Work Term).

A student works in the architectural profession for 1000 hours in no less than 24 weeks and completes a research report or assignment. Work placements must be approved by the School of Architecture. A student may apply to satisfy up to 500 hours through supervised research related to Professional Practice.

FORMAT: Work term

RESTRICTION: MArch students

ARCH 5310.00: Co-op Work Term Continuation.

A student who has already registered for ARCH 5308 and ARCH 5309 may continue the co-op work term for up to three additional terms. While registered in ARCH 5310, a student's university status changes to part-time.

FORMAT: Work term

PREREQUISITE: ARCH 5308.03, ARCH 5309.03

RESTRICTION: MArch students

ARCH 5311.03: Professional Practice.

This course studies principles of professional ethics, partnerships, corporate practices, professional responsibility, and legal aspects of architectural practice. It also considers issues in practice management (contracts, reference documents, finance, costing techniques, and contract administration) with an emphasis on codes.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture

ARCH 6001.03: Design Seminar.

This seminar focuses on an advanced topic in architectural design. The topic changes from year to year. It may emphasize urbanism, landscape, building, process, program, or habitation.

FORMAT: Seminar/studio

RESTRICTION: Graduate students - Architecture

ARCH 6002.03: Free Lab.

This course complements normal studio-based learning. It pursues an architectural topic through experimental hands-on work in a group format. Topics change from year to year and may include design-build work, documentaries, landscape installations, community design projects, and interdisciplinary work. Projects may be local or involve travel to a distant site.

FORMAT: Workshop/lab

RESTRICTION: Graduate students - Architecture

ARCH 6121.03: Architecture and Archaeoastronomy.

This course studies the significance of the night sky to various ancient and non-Western cultures, including the Egyptian, Celtic, Mesoamerican, Anasazi, and First Nations. It examines how celestial features and motions guided the design of buildings and influenced cultural practices, including the measurement of time.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 6122.03/6123.03/6124.03/6125.03: Humanities Seminar.

This course focuses on an advanced topic in architectural humanities. The topic changes from year to year. It may emphasize history, theory, criticism, urban studies, or architecture in development.

FORMAT: Seminar

RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 6209.03: Material Investigation.

This course uses a controlled workshop environment to examine characteristics of a material (e.g., metal, ceramic, glass) and methods for forming and finishing. Using principles of material science, it considers the harvesting or processing of raw material, the testing of structural capacity and environmental behaviour, and applications in design.

FORMAT: Workshop/seminar

RESTRICTION: Graduate students - Architecture

ARCH 6210.03: Material Investigation in Wood.

This course uses a controlled workshop environment to examine characteristics of wood and methods for forming and finishing. Using principles of material science, it considers the harvesting of raw material, the testing of structural capacity and environmental behaviour, and applications in design.

FORMAT: Workshop/seminar

RESTRICTION: Graduate students - Architecture

ARCH 6211.03/6212.03/6213.03/6214.03: Technology Seminar.

This course focuses on an advanced topic in architectural technology. The topic changes from year to year. It may emphasize materials, environmental strategies, or building details.

FORMAT: Seminar

RESTRICTION: Graduate students - Architecture

ARCH 6215.03: Earth Construction.

This course studies traditional and contemporary methods of earth construction (cob, rammed earth, wattle and daub, earth bag, and adobe) as sustainable, low-impact building systems. Based on the science of soils, it considers appropriate uses of earth technology in the construction of houses.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 6216.03: Natural Finishes.

This course examines the use of natural finishes (earth and lime plasters, paint, stone, and wood) for walls, floors, and ceilings in contemporary buildings. Natural, local, and reused materials are assessed in terms of installation, cost, durability, aesthetic characteristics, and environmental impact in comparison with industrialized products.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 6217.03: Product Development in Architecture.

This course explores the design of manufactured building components. Through field trips, factual study, and hands-on labs, students learn the essentials of conventional and emerging production processes. They apply this knowledge to designing and prototyping a component, typically selected in support of an outside research project or a thesis.

FORMAT: Seminar

RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 6304.03: Entrepreneurship.

Successful entrepreneurship requires an ability to identify opportunities, skill to calculate risks, and the knowledge and determination to promote, develop, and implement a project. This course uses a case study approach to examine entrepreneurship in the public, private, and not-for-profit sectors and to assess potential applications to architectural practice.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 6305.03: Permission to Build.

Obtaining a building permit is only the last hurdle to clear before a potential architectural project can be realized. This course examines the entire process, including the various authorities, agencies, and groups that are involved, along with municipal planning regulations, building codes, material specifications, and public presentations.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 6306.03: Professional Practice Seminar.

This course focuses on an advanced topic in architectural professional practice. The topic changes from year to year.

FORMAT: Seminar

RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 6501.03: Graphic Design in Architecture.

This course applies principles of information design and typography to architectural presentation. Using digital media, it experiments with various graphic design methods to organize text, images, and graphics in a clear, consistent way for particular presentation purposes.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture

ARCH 6502.03: Painting in Architecture.

This course examines how some architects have used painting in design development. Through studio work, students also consider how certain modes of painting may be integrated into the design process for their concurrent architectural studio project. Previous experience in any paint medium (e.g., watercolour, gouache, acrylic, oil) is required.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture

ARCH 6503.03: Photography in Architecture.

This course examines architectural photography from the late nineteenth century to the present. By analyzing and applying various photographic styles and techniques, students learn about photographic representation in architecture.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture

ARCH 6504.03: Montage in Architecture.

This course examines the history, concepts, and uses of montage in architectural representation. It also considers how digital photography and computer technology can generate various forms of montage for analyzing and developing architectural designs.

FORMAT: Seminar/studio

RESTRICTION: Graduate students - Architecture

ARCH 6505.03: Multimedia in Architecture.

This course examines the use of various technologies to visualize, develop, and display multimedia presentations of architecture that may include text, graphics, photographs, sound, voice, animation, and/or video. It also considers how architectural designs can be developed using multimedia. These topics may apply also to projects in urban planning.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture and Planning or permission of instructor

ARCH 6506.03: Spatial Constructions in Digital Video.

This course investigates how digital audio and video can represent physical and spatial qualities of existing architectural, urban, or rural conditions. It emphasizes the use of the video camera and digital software for recording, imaging, and editing.

FORMAT: Studio/seminar

PREREQUISITE: ARCH 6505

RESTRICTION: Graduate students - Architecture

ARCH 6507.03: Language as Representation.

This course examines the reciprocal role of language and visual perception in architecture. It considers architectural description and criticism according to linguistic or dialectical models such as the theory of language games, classical rhetoric, or religious apology.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture

ARCH 6508.03: Alternatives to Perspective.

This course examines the limitations of linear perspective as a definitive method for representing objects and spaces. It analyzes Renaissance premises of perspective and considers other periods and cultures for alternatives that might be applied in contemporary architectural representation.

FORMAT: Seminar

RESTRICTION: Graduate students - Architecture

ARCH 6509.03: Digital Form.

This course considers the influence of emerging representational technologies on the making of architectural form. By analyzing how the design process is affected by working only in a digital environment, students learn about the limitations and possibilities of digital form.

FORMAT: Lecture/studio

PREREQUISITE: ARCH 6505.03

RESTRICTION: Graduate students - Architecture

ARCH 6510.03: Architectural Documentation and Analysis.

This course investigates techniques for documenting and analyzing existing architectural or urban conditions. Various modes of representation (drawing, model, video, and photography) are used to interpret the complex experience of physical form.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture

ARCH 6511.03: Documentation and Reconstruction of Historic Buildings.

This course studies the use of drawings to document existing buildings, structures, and landscapes. It also studies drawings as a means of projection and examines their role in the reconstruction of past built works and projects.

FORMAT: Lecture/seminar

RESTRICTION: Graduate students - Architecture

ARCH 6512.03: Developments in Architectural Representation.

This course studies historical developments in the graphic language of architecture and its various modes of representation. By examining works by selected architects, students consider relationships between what is drawn and what is built.

FORMAT: Lecture/studio

RESTRICTION: Graduate students - Architecture

ARCH 6513.03: Representation Seminar.

This course focuses on an advanced topic in architectural representation. The topic changes from year to year. It may emphasize medium, relation to design, or history and theory.

FORMAT: Seminar/studio

RESTRICTION: Graduate students - Architecture

RESTRICTION: MEDS students.

ARCH 9007.06: MArch Thesis Preparation.

Within a seminar group, each student formulates a thesis question and explores it through design, analytical, and interpretive studies. The student is expected to develop and demonstrate expertise in the subject area. ARCH 9007 and ARCH 9008 must be completed in consecutive terms.

FORMAT: Seminar/studio

PREREQUISITE: Completion of Year 5 MArch

RESTRICTION: MArch students

ARCH 9008.06: MArch Thesis.

Each student proposes, develops, and completes an architectural design project that investigates the thesis question. The thesis concludes with a graphic/model presentation, an oral examination, and a formal thesis document that is submitted to the university. The entire thesis requires a minimum of two consecutive terms of residence.

FORMAT: Studio

PREREQUISITE: ARCH 9007

RESTRICTION: MArch students

ARCH 9009.00: MArch Thesis Continuation.

This continuation of ARCH 9008: MArch Thesis is for students who have not completed the thesis in the minimum two terms. The maximum duration of a thesis is five terms (including ARCH 9007).

FORMAT: Studio

PREREQUISITE: ARCH 9008

RESTRICTION: MArch students

Boxall, J., Major appointment as Map and Geospatial Information Librarian, Killam Library

Rainham, D., Environmental Science

Wright, T., Environmental Programs

I. Community Design

Community design studies the shape, patterns, processes, and issues in human and natural communities. It explores the world as a system of interconnected and embedded communities linked by cultural and natural processes. Courses examine interventions by which people can work towards creating and maintaining healthy and sustainable communities.

The study of community design at Dalhousie is distinguished by:

- **an emphasis on design.** The School recognizes the importance of visual and spatial information and analysis, and introduces design as a method of learning, analyzing, and addressing problems. Design is comprehensive, integrative, context-sensitive, and synthetic.
- **a focus on reasoned, creative, and practical outcomes.** Courses will attract students eager to make changes in the world they inhabit. They will develop the knowledge and skills to allow them to analyze community issues, and to propose and implement appropriate courses of action to achieve desired outcomes.

The School of Planning offers undergraduate education in community design. Various programs are possible: the Bachelor of Community Design (BCD) is a three year program; a Double Major in Community Design and Sustainability is a four year program.

Students with high academic standing may apply for the Bachelor of Community Design (Honours) program, with a Major in either Environmental Planning or Urban Design Studies (a four year program). The BCD Honours program is a first professional degree recognized by the Canadian Institute of Planners. Students

considering the BCD Honours program (either Environmental Planning or Urban Design Studies Major) have the option of doing a Minor in Environmental Studies, a Minor in Geography or a Double Major with Sustainability.

The Bachelor of Community Design is a three-year general program for students interested in understanding how communities work and the principles that planners and other design professionals use in creating communities. Students with a strong commitment to sustainability may take the four-year Double Major in Community Design and Sustainability. Students who meet the requirements for admission to the Honours program take specialized fourth year courses in either Environmental Planning or Urban Design Studies.

Students wishing to enter the program must have completed grade 12 with a 70% or greater average in five grade 12 subjects including English, Math, and one Science (Biology or Geology are recommended). Grade 12 Geography is recommended, and a background in art or design is an asset. Students who have successfully completed a full year of university or college level studies may apply to transfer to the Bachelor of Community Design and may be considered for advanced standing. (Those admitted as transfer students should consult the Undergraduate Coordinator in Planning for advice on course selection.)

All students admitted to the BCD must meet the Dalhousie requirement for a full course or equivalent in courses with a significant writing requirement, usually completed in the first year of university study. Students must complete at least a full course or equivalent in a science subject, and a full course or equivalent in an arts, humanities, or social sciences subject to graduate.

Students must complete at least 42 credit hours (seven full course equivalents) at the 2000 level or higher for the three year (90 credit hour) degree, or at least 72 credit hours (12 full course equivalents) at the 2000 level or above for a four year degree (120 credit hours).

Bachelor of Community Design (three year program)

The Bachelor of Community Design normally takes three years of full time study. It includes 15 full course equivalents, or 90 credit hours of course work. Core required courses for the program include PLAN 1001.03, 1002.03, 2001.03, 2002.03, 2005.03, 2006.03, 3001.03, 3002.03, 3005.03, 3006.03, 3025.03. In year one students take PLAN 1001.03, PLAN 1002.03, and GEOG/ERTH 1030.03. They also select either ARCH 1000.06 or ENVS 1000.06 or SUST 1000.06 (although they may take two). Students must complete six credit hours of an approved English writing requirement course (see below), six credit hours of science courses and six credit hours of courses from the humanities or social science disciplines.

Students will select six credit hours in one subject from the following courses approved for the Bachelor Community Design English writing requirement. Other writing requirement courses may be considered by the School of Planning on an individual basis:

CLAS 1010X/Y.06, CLAS 1100X/Y.06, ENGL 1000X/Y.06, ENGL 1010.03, ENGL 1020.03, ENGL 1040.03, ENGL 1100.03, ENGL 2100.03, ENGL 2110.03, HIST 1005.06, HSTC 1800.03, HSTC 1801.03, JOUR 1001X/Y.06, POLI 1103X/Y.06, PHIL 1010X/Y.06, SOSA 1050.06, SUST 1000.06, THEA 1000X/Y.06, THEA 1300X/Y.06

Program requirements are as follows:

Year 1

- PLAN 1001.03: Introduction to Community Design 1
- PLAN 1002.03: Introduction to Community Design 2
- GEOG/ERTH 1030.03: Physical Geography
- Select from among: ARCH 1000.06 or ENVS 1000.06 or SUST 1000.06
- Plus 2.5 more full courses (15 credit hours), normally including the six credit hours English writing requirement

The School of Planning recommends that students also consider taking at least one of ERTH 1080.03 or 1090.03, or GEOG 1035.03 in their first year.

Year 2

- PLAN 2001.03: Landscape Analysis
- PLAN 2002.03: Community Design Methods
- PLAN 2005.03: Community Design Context
- PLAN 2006.03: Space, Place and GIS
- Select one course (three credit hours) from among: *core electives list* (see below)
- Plus 15 more credit hours - electives of student's choice

Year 3

- PLAN 3001.03: Landscape Ecology
- PLAN 3002.03: Reading the City
- PLAN 3005.03: Cities and the Environment in History
- PLAN 3006.03: Reading the Landscape
- PLAN 3025.03: Representation in Design.
- Select three credit hours from among: *core electives list*
- Plus 12 more credit hours - electives of student's choice

Bachelor of Community Design, Double Major in Community Design and Sustainability (four year program)

For complete details about the College of Sustainability see [page 44](#). The Double Major in Community Design and Sustainability normally requires four years of full time study (120 credit hours). It includes 20 full course equivalents, or 120 credit hours of course work. Core courses required for the Community Design portion of the program include PLAN 1001.03, 1002.03, 2001.03, 2002.03, 2005.03, 2006.03, 3001.03, 3002.03, 3005.03, 3006.03, 3025.03; and GEOG 1030.03. Students also select 15 credit hours from the BCD core electives list.

Core courses required for the Sustainability portion of the program include SUST 1000.06, 1001.06, 2000.06, 2001.06, 3000.03, 3502.03, 3002.03, 4000.06. Students NOT enrolling in the BCD Honours program must also complete SUST 3002.03, SUST 4000.06 and one full credit (six credit hours) from the list of ESS electives.

Program requirements are as follows:

Year 1

- PLAN 1001.03: Introduction to Community Design 1
- PLAN 1002.03: Introduction to Community Design 2
- ERTH/GEOG 1030.03: Physical Geography
- SUST 1000.06: Introduction to Environment, Sustainability and Society 1
- SUST 1001.06: Introduction to Environment, Sustainability and Society 2
- Plus 1.5 credits or nine credit hours of electives

[Note: SUST 1000 and 1001 fulfil the first year writing requirement, the science requirement, and the social science requirement.]

Year 2

- PLAN 2001.03: Landscape Analysis
- PLAN 2002.03: Community Design Methods
- PLAN 2005.03: Community Design Context
- PLAN 2006.03: Space, Place and GIS
- SUST 2000.06: Humanity in the Natural World: An Introduction to Problem-based Learning
- SUST 2001.06: Environment, Sustainability and Governance: A Global Perspective
- Plus six credit hours of electives

Year 3

- PLAN 3001.03: Landscape Ecology
- PLAN 3002.03: Reading the City
- PLAN 3005.03: Cities and the Environment in History
- PLAN 3006.03: Reading the Landscape
- PLAN 3025.03: Representation in Design
- SUST 3000.03: Global Approaches to Environmental Decision Making
- SUST 3502.03: The Campus as a Living Laboratory
- Select three credit hours from among: BCD core elective list
- Plus six more credit hours - electives of student's choice or if Honours, from list of approved ESS electives

Year 4

- SUST 4000.06: Environment, Sustainability and Society: Capstone (not Honours)
- SUST 3002.03: Environment and Sustainability Internship (not Honours)
- Select six credit hours from BCD core electives list (above the 2000 level).
- Plus 15 credit hours (2.5 credits) in electives of student's choice

Bachelor of Community Design (Honours) (four year program)

The Bachelor of Community Design (Honours) normally takes four years of full-time study. Students complete the requirements for the general community design program and then complete a fourth year of specialized study. The program requires 20 full course equivalents, or 120 credit hours of course work.

The Honours programs provide opportunities for students who do well in their studies to deepen their understanding through additional course work, an internship work placement, and community-based research projects. Students participate in community design studios where learning involves working on community-centred projects. Thus students gain practical experience to bring to bear on their academic studies. The BCD Honours is a first professional degree in planning recognized by the Canadian Institute of Planners.

Students may apply for entry to the BCD Honours program once they have completed all first year requirements, including the English writing requirement, and the mandatory second year (2000 level) planning courses. Admission to the Honours degree requires the following:

- i. 3.0 or higher cumulative GPA, and
- ii. 3.0 or higher GPA calculated for mandatory planning and core elective courses completed at the time of application to the Honours program. (Where students have completed more than nine credit hours of core electives, the highest grades for the nine credit hours will be used in the calculation).

Once in the Honours program, students must maintain both a cumulative GPA of 3.0 or higher and a GPA of 3.0 higher for mandatory Planning courses and core electives. If a student falls below either of these minimum standards, the student cannot continue in the Honours program. A student may apply for re-entry to the Honours program once the minimum standard is restored.

Students have a choice of major within the Honours program.

During the Honours year, students require 30 credit hours, as follows.

Year 4 of Honours Major in Urban Design and Planning

- PLAN 4002.06: Urban Design Studio
- PLAN 4050.03: Thesis Proposal
- PLAN 4101.03: History and Theory of Urban Design
- PLAN 3035.03: Application of Planning Law
- PLAN 4100.03: Community Design Internship
- PLAN 4500.06: Thesis Project
- six credit hours from core elective list B (Urban Design Studies) or list C (electives for either major) at 2000 level or above

Year 4 of Honours Major in Environmental Planning

- PLAN 4001.06: Environmental Planning Studies
- PLAN 4050.03: Thesis Proposal
- PLAN 3035.03: Application of Planning Law
- PLAN 4100.03: Community Design Internship
- PLAN 4500.06: Thesis Project
- three credit hours from core electives list A (Environmental Planning) and six credit hours from core electives list A or list C (electives for either major) at 2000 level or above

Requirements for Graduation with Honours

In order to graduate with the Honours (Major) distinction in the BCD the student will have completed the course requirements identified above and will have a cumulative GPA of 3.0 or higher and a calculated GPA of 3.0 or higher for required Community Design courses and core electives.

BCD Honours Conversion

Students who complete the three-year BCD program and graduated with the degree may apply to convert their degree to Honours with an additional year of study to complete the requirements for the Honours degree.

Eligible students need to meet the following conditions:

- They completed the three-year BCD with a cumulative GPA of 3.0 or greater and a calculated GPA of 3.0 or higher for mandatory Community Design courses and core electives;
- They completed the BCD not more than 10 years prior to application for Honours Conversion.

Requirements for graduation

The Honours Conversion program normally involves one year of full time study while the student completes the requirements for the Honours Major. Thirty (30) credit hours of required courses are completed. Students must maintain a cumulative average of not less than 3.0 and a GPA of not less than 3.0 calculated for mandatory Community Design courses and core electives in the Honours year.

Conversion Year requirements for the Honours Major in Environmental Planning

- PLAN 4001.06: Environmental planning studio
- PLAN 4100.03: Community design internship
- PLAN 4050.03: Thesis proposal
- PLAN 4500.06: Thesis project
- PLAN 3035.03: Application of planning law
- three credit hours from core electives list A (Environmental Planning) and six credit hours from core electives list A or list C (electives for either major) at 2000 level or above

Conversion Year requirements for the Honours Major in Urban Design and Planning

- PLAN 4002.06: Urban design studio
- PLAN 4100.03: Community design internship
- PLAN 4101.03: History and theory of urban design
- PLAN 4050.03: Thesis proposal
- PLAN 4500.06: Thesis project
- PLAN 3035.03: Application of planning law
- six credit hours from core elective list B (Urban Design Studies) or list C (electives for either major) at 2000 level or above

Students who may have completed any required courses from the honours year as part of the 90 credit hours of the general BCD program will select alternative core elective credits from the lists to make up the credit hours to a total of 30.

Bachelor of Community Design (Honours) with a Minor in Environmental Studies

The Minor in Environmental Studies is a five credit (30 credit hour) Minor taken in conjunction with the Bachelor of Community Design Honours (It is not available within the three year BCD program). The Minor in Environmental Studies provides a student with an appreciation of the scientific, cultural, economic, historic, legal and social aspects of environmental issues. The student will have the opportunity to earn an additional credential on the degree to recognize the special concentration of courses in environmental studies. Approval for the program is required from the School of Planning and from the Coordinator of Environmental Programs. Students complete all requirements for their Honours Major in addition to these required courses for the minor. Students may count the course ENVS 1000 towards both the BCD requirements and towards the requirement for the Minor. Other courses cannot be counted towards both sets of requirements.

Required Courses

To earn the minor, students complete:

- ENVS 1000.06: Introduction to Environmental Studies (or DISP)
- PHIL 2480.03: Environmental Ethics
- ENVS 3200.03: Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II

Elective requirements

Two full credits (12 credit hours) of courses from the following list:

- BIOL 2605.03: Introduction to Marine Life of Nova Scotia
- BIOL 3601.03: Nature Conservation
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- ECON 2216.03: Economics of Global Warming
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ENVS 3000.03: Environmental Science Internship
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3301.03: Enterprise Sustainability

- ENVS 3220.03: International Environmental Law for Scientists
- ENVS 3400.03: Environment and Human Health
- ENVS 3500.03: Exploring Geographic Information Systems
- ENVS 4001.03: Environmental Impact Assessment
- ESMP 2330.03: Nature Imagined
- ESMP 3000.06: The Study of Nature in Early Modern Europe
- EARTH 3302.03: Quaternary Sedimentary Deposits
- EARTH/GEOG 3440: Geomorphology
- HIST 3370.03: North American Landscapes
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- OCEA 2001.03: The Blue Planet I
- OCEA 2002.03: The Blue Planet II
- OCEA 2800.03: Climate Change
- OCEA 3001.03: Introduction to Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- PHIL 2485.03: Technology and the Environment
- POLI 3385.03: Politics of the Environment
- POLI 3589.03: Politics of the Sea I
- SOSA 2100.06: Environment and Culture
- SOSA 3211.03: Continuity and Change in Rural Society
- SOSA 3220.03: Coastal Communities in the North Atlantic
- SOSA 4072.03: Naturalistic Approaches to the Social Sciences
- STAT 3345.03: Environmental Risk Assessment

Bachelor of Community Design (Honours, Major) with a Minor in Geography

The Minor in Geography is available to students registered in the BCD Honours Major 20 credit degree programs. Requirements are the completion of one compulsory credit at the 1000 level, a compulsory half credit at the 2000 level or higher. Students in community design cannot assign required, geography cross-listed planning courses to the minor degree, nor can they assign geography cross-listed planning courses used to meet BCD program elective requirements to the geography minor. EARTH/GEOG 1030 is required for both the BCD degree and the Minor in Geography. See [page 226](#) and [page 515](#) for details on the Minor in Geography requirements and course offerings.

Bachelor of Community Design Honours, Double Major in Community Design (Urban Design and Planning) and Sustainability

Students also have the option to earn a double major in Sustainability within the Honours program. Year 4 of the BCD Honours Double Major in Sustainability is the same as year 4 of the BCD Honours Major. Honours Double Major students are not required to take SUST 3002.03, SUST 4000.06 nor one full credit from the approved list of ESS electives.

Program core electives for the Bachelor of Community Design

Each program in Community Design requires that the student select a specified number of credit hours of core electives from the approved lists (see below, or contact the Undergraduate Coordinator for a more current list).

Students earning the three-year Bachelor of Community Design must select from among courses in any of the three categories (environmental planning, urban design studies, or open to both) for their “core electives”. In year three, students select courses at the 2000 level or above for their core electives.

Students earning the four-year Bachelor of Community Design Double Major in Community Design and Sustainability must select from among courses in any of the three categories (environmental planning, urban design studies, or open to both) for their BCD “core electives”. In year three and four, students are recommended to select courses at the 2000 level or above for their core electives.

In their Honours year, students earning the Bachelor of Community Design Honours, Major in Environmental Planning, must select “core electives” from among courses at the 2000 level or above in the categories “Environmental planning” (A) or “Electives for either option” (C).

In their Honours year, students earning the Bachelor of Community Design Honours, Major in Urban Design and Planning, must select “core electives” from among courses at the 2000 level or above in the categories “Urban design studies” (B) or “Electives for either option” (C).

In their Honours year, students earning the Bachelor of Community Design Honours, Double Major in Environmental Planning and Sustainability, must select “core electives” from among courses at the 2000 level or above in the categories “Environmental planning” (A) or “Electives for either option” (C).

In their Honours year, students earning the Bachelor of Community Design Honours, Double Major in Community Design (Urban Design and Planning) and Sustainability, must select “core electives” from among courses at the 2000 level or above in the categories “Urban design studies” (B) or “Electives for either option” (C).

Note: Students must check to ensure they meet the prerequisites for any courses they select. In some cases, courses may be full or unavailable. Some courses may require the instructor’s or department’s consent. Not all courses are offered every year.

Environmental planning option core electives (List A)

- ENVS 1000.06: Introduction to Environmental Studies
- ENVS 3200.03: Environmental Law
- ENVS 3210.03: Administrative Law for Environmental Scientists
- ENVS 3300.03: Contaminated Site Management
- ENVS 3400.03: Environmental and Ecosystem Health
- ENVS 3501.03: Environmental Problem Solving 1
- ENVS 3502.03: Environmental Problem Solving 2
- ENVS 4001.03: Environmental Impact Assessment
- BIOL 1010.03: Principles of Biology Part I
- BIOL 1011.03: Principles of Biology Part II
- BIOL 1020.03: Introductory Biology - DE
- BIOL 1021.03: Introductory Biology - DE
- OCEA/GEOG/PHYC 2800.03: Climate Change
- BIOL 2060.03: Introduction to Ecology
- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 3061.03: Communities and Ecosystems
- BIOL 3601.03: Nature Conservation
- BIOL 3623.03: Applied Coastal Ecology
- BIOL 3624.03: Urban Freshwater Systems
- EARTH 1080.03: Geology I
- EARTH 1090.03: Geology II
- EARTH 2410.03: Environmental and Resource Geology
- EARTH/GEOG 3440.03: Geomorphology
- PHIL 2480.03: Environmental Ethics
- HIST 3370.03: North American Landscapes
- POLI 3585.03: Politics of the Environment
- ENVE 3412.03: Energy and Environment
- ENVE 3432.03: Waste Management
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics

Urban Design Studies and Planning* core electives (List B)

- ARCH 1000.06: Introduction to Architecture
- ARCH 2000.03/2001.03: Visual Thinking
- HIST 1004.06: Introduction to European History
- HIST 1501.03: Comparative Global History
- HIST 1502.03: Origins of Modern Global Society
- HIST 2006.03: The Atlantic World 1450-1650: Colonization
- HIST 2007.03: The Atlantic World 1650-1800: European Empires in the Americas
- HIST 2212.03: Social History of Canada since 1870
- HIST 3223.03: The Caring Society? Welfare in Canada since 1900
- ECON 2200.03/2201.03: Intermediate Micro/Macro
- ECON 2218.03: The Canadian Economy in the New Millennium: Economic policy debates for the next decade.
- SLWK 2010.03: Introduction to Community Social Work
- SLWK 3011.03/3012.03: Perspectives on Social Welfare Policy
- SOSA 2040.06: Social Inequality
- SOSA 2300.06: Introduction to Social Problems
- SOSA 3031.03: Social Problems and Social Policy
- PLAN 4102.03: Urban Economics

Core electives that may count for either Major (List C)

- ARCH 1200.06: Science of the Built Environment
- GEOG 1035.03: Introduction to Human Geography
- HIST/GEOG 3210.03: Canadian Cultural Landscapes

- POLI 1020.03: Governments and Democracy
- POLI 1035.03: The Political Process in Canada
- POLI 1100.06X/Y.06: Intro to Government and Politics
- POLI 1103.06: Introduction to Government and Politics [wr]
- POLI 2230.03: Local Government
- POLI 3220.03: Intergovernmental Relations
- POLI 3231.03: Urban Governance in Canada
- POLI 3235.03: The Politics of Regionalism
- POLI 4228.03/5231.03: Pressure Politics in Canada
- POLI 4240.03: Policy Formulation in Canada
- POLI 4241.03: Introduction to Policy Analysis
- ECON 1101.03: Principles Micro
- ECON 1102.03: Principles Macro
- ECON 2334.03: Globalization and Economic Development
- ECON 2336.03: Regional Development
- HSTC 1200.06: Introduction to the History of Science
- HSTC 4000.06: Science and Nature in the Modern Period
- INTD 2001.03/ 2002.03: Introduction to Development
- INTD 3001.03/ 3002.03: Seminar in Development
- SOSA 2100.06: Environment and Culture
- SOSA 3220.03: Coastal Communities in the North Atlantic
- SOSA 3284.03: Living in Cities
- PHIL 2485.03: Technology and the Environment
- OCCU 2000.03: Occupation and Daily Life
- ENVS/ERTH/GEOG 3500.03/SCIE 3600.03: Exploring Geographic Information Systems
- PLAN 2025.03: Design Drawing
- PLAN 2010.03: Sustainable Community Design
- PLAN 3010.03: Urban Ecology
- PLAN 3015.03: Site Infrastructure
- PLAN 3020.03: Landscape Design
- PLAN 3040.03: Reading the Suburbs
- PLAN 3045.03: Community Design Practice
- PLAN 3050.03: Topics in Community Design (Other topics included under 3051, 3052, 3053)
- PLAN 3055.03: Computers in Community Design and Planning
- PLAN 3060.03: Statistics for Planners
- PLAN 3225.03: Plants in the Human Landscape
- PLAN 4105.03: Land Development Economics
- PLAN 4106.03: Transportation Planning
- PLAN 4107.03: Regional Planning
- PLAN 4108.03: History and Theory of Landscape Architecture
- PLAN 4111.03: Housing Theory
- PLAN 4150.03: Topics in Planning
- PLAN 4200.03: Independent Study
- ARCH and PLAN (any course for which the School and the course instructor has given permission for the BCD student to enroll)

II. Courses Offered

Not all courses are offered every term. Please consult the university timetable for current listings.

- PLAN 1001.03: Introduction to Community Design 1
- PLAN 1002.03: Introduction to Community Design 2
- PLAN 2001.03: Landscape Analysis
- PLAN 2002.03: Community Design Methods
- PLAN 2005.03: Community Design Context
- PLAN 2006.03: Space, Place and GIS
- PLAN 2010.03: Sustainable Community Design
- PLAN 2025.03: Design Drawing
- PLAN 3001.03: Landscape Ecology
- PLAN 3002.03: Reading the City
- PLAN 3005.03: Cities and the Environment in History
- PLAN 3006.03: Reading the Landscape
- PLAN 3010.03: Urban Ecology
- PLAN 3015.03: Site Infrastructure
- PLAN 3020.03: Landscape Design
- PLAN 3025.03: Representation in Design
- PLAN 3035.03: Application of Planning Law
- PLAN 3040.03: Reading the Suburbs
- PLAN 3045.03: Community Design Practice

- PLAN 3050.03: Topics in Community Design
- PLAN 3055.03: Computers in Community Design and Planning
- PLAN 3225.03: Plants in the Human Landscape
- PLAN 4001.06: Environmental Planning Studio
- PLAN 4002.06: Urban Design Studio
- PLAN 4050.03: Thesis Proposal
- PLAN 4100.03: Community Design Internship
- PLAN 4101.03: History and Theory of Urban Design
- PLAN 4102.03: Urban Economics
- PLAN 4105.03: Land Development Economics
- PLAN 4106.03: Transportation Planning
- PLAN 4107.03: Regional Planning
- PLAN 4108.03: History and Theory of Landscape Architecture
- PLAN 4111.03: Housing Theory
- PLAN 4150.03: Topics in planning
- This course provides opportunities to examine selected topical issues in planning in a seminar discussion. (Other topics included under 4151, 4152, 4153)
- PLAN 4200.03: Independent Study

III. Course Descriptions

Not all courses are offered every term. Please consult the university timetable for current listings. Instructors may change.

PLAN 1001.03: Introduction to Community Design 1.

This course introduces community design by exploring the characteristics of human and natural communities, the connections between them, and the types of interventions designers and planners can make to help people create good living environments. Community design involves applying scientific and creative approaches to helping communities accommodate human needs while respecting the environment.

FORMAT: Lecture 3 hours (plus tutorial)

PLAN 1002.03: Introduction to Community Design 2.

This course builds on the lessons from Introduction to Community Design 1 by exploring how designers affect the form, structure, and character of human settlements. It examines principles of design, and helps students understand strategies and develop techniques for documenting, testing, and communicating ideas. Students will work on a community design project.

PREREQUISITE: PLAN 1001.03

FORMAT: Lecture/lab 3 hours (plus tutorial)

PREREQUISITE: PLAN 1001.03

PLAN 2001.03: Landscape Analysis.

Designers and planners need to understand the influence of physical, biological, and cultural systems in landscape evolution, and the relevance of that information in analyzing land capability. Students develop inventory and analysis tools for understanding environmental processes and their implications for design and planning. There will be field trips and a lab component.

FORMAT: Lecture/lab 4 hours

PREREQUISITE: or Concurrent: GEOG/ERTH 1030.03

CROSS-LISTING: GEOG 2001.03

PLAN 2002.03: Community Design Methods.

This course explores the design theory, processes, principles, and methods that inform community design. Students will develop design literacy and skills, and engage in problem-solving exercises and projects.

FORMAT: Lecture/lab 5 hours

PREREQUISITE: PLAN 1002.03 or concurrent

PLAN 2005.03: Community Design Context.

Our communities are shaped by a wide range of factors as varied as the way we organize power within our government system, the significance of the profit motive in our economy, and our cultural desire to separate work and home. This course considers various governance, economic, social, demographic, and service issues that influence the shape and regulation of communities and landscapes in the contemporary context. It examines a range of scales, from international through national, provincial and local.

FORMAT: Lecture/seminar 3 hours

PREREQUISITE: PLAN 1001.03 or concurrent

PLAN 2006.03: Space, Place and Geographic Information Systems.

Planners use Geographical Information Systems (GIS) for data collection, coordination, and analysis. Properly interpreted, GIS data contribute to informed decision-making. This course explores the application of GIS in planning within a project-centred setting. Students learn to use GIS to address land use and site planning issues. The course also considers mapping standards used within the field of planning, and examines legal, privacy, and ethical implications of using GIS data in the public realm.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: PLAN/GEOG 2001

CROSS-LISTING: GEOG 2006.03

EXCLUSION: PLAN 3055.03

PLAN 2010.03: Sustainable Community Design.

Through case studies and collaborative design projects, this course explores how the form of communities can change in response to new environmental awareness, shifting economic conditions, emerging technologies, and a focus on sustainable local action.

FORMAT: Lecture 3 hours

PREREQUISITE: PLAN 1001.03 and PLAN 1002.03, or SUST 1000.06

PLAN 2025.03: Design Drawing.

This course allows students to enhance their design literacy skills through attention to graphic design, layout, composition, and typography. Students will become familiar with and gain experience in a range of drawing techniques to enhance their skills in design drawing and portfolio presentation.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: ARCH 1000.06 or PLAN 1002.03 or permission of instructor

CROSS-LISTING: ARCH 2025.03

PLAN 3001.03: Landscape Ecology.

Landscapes reflect the interaction of natural and cultural processes. This course introduces the principles of ecology to landscape analysis. It explores relationships between environmental components in the landscape to inform community design and land use planning applications.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: PLAN/GEOG 2001.03, PLAN 2006.03

CROSS-LISTING: GEOG 3001.03

PLAN 3002.03: Reading the City.

Any city reflects the history of its topography, cultural traditions, and design interventions. This course introduces the principles, theories, and methods of urban form analysis in the local urban context. Students explore the local urban environment to interpret what the city means, and how it comes to take the shape it does.

FORMAT: Lecture/lab 3 hours

CROSS-LISTING: PLAN 5012.03

PLAN 3005.03: Cities and the Environment in History.

The contemporary landscape reflects a long history of human activities on the land and design and planning interventions through time. Civilizations rise and fall, often because of their degradation of the ecosystems that support them. This course examines the relationship of cities with the environment to enhance our understanding of landscape change, urban form and patterns in human settlements through the ages.

FORMAT: Lecture 3 hours

CROSS-LISTING: PLAN 5005.03, GEOG 3005.03

PLAN 3006.03: Reading the Landscape.

Any landscape reflects its natural and cultural history. This course explores principles, theories, and methods of landscape interpretation. These approaches will be applied to community design problems in local landscapes.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: PLAN 3001.03, 3002.03

CROSS-LISTING: GEOG 3006.03

PLAN 3010.03: Urban Ecology.

More than three-quarters of Canadians, and more than half the world's population, live in urban settings. This course treats the urban system as habitat made by and for people, and takes an ecological approach to the flows of energy and materials which make urban life possible. Students study their own behaviour and surroundings, comparing their observations with data from Canada, North America, and the rest of the world. This leads to discussions about the health and sustainability of urban communities.

FORMAT: Lecture/seminar 3 hours

CROSS-LISTING: PLAN 6103.03

PLAN 3015.03: Site Infrastructure.

The course examines the role of infrastructure in community design and site planning. Students are introduced to principles of grading, access, service provision, and cost estimating. Key exercises allow students to apply theory to practical projects.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: PLAN 2001.03 or permission of the instructor

CROSS-LISTING: PLAN 5015.03

PLAN 3020.03: Landscape Design.

The course introduces principles and methods of site design. It pays special attention to social, natural, and technical components as factors in adapting sites for human use. Practical projects allow students to develop deeper insight into the challenges and opportunities of landscape design.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: At least one of PLAN 2002.03, PLAN 2025.03, or PLAN 3025.03

CROSS-LISTING: PLAN 5020.03

PLAN 3025.03: Representation in Design.

The course explores techniques of representation in community design work. It examines design drawing conventions such as orthography, paraline, and perspective projections. It helps students develop their awareness of design approaches and their skills in design presentation.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: PLAN 2002.03 or PLAN 2025.03 or ARCH 2025.03

CROSS-LISTING: PLAN 5025.03

PLAN 3031.03: Geology and Land use Planning - Exploring the Connections.

This lecture and seminar course explores the influence of geology in the evolution of human settlements; geological opportunities and constraints to land and community development; the sources and formats of geophysical information available and useful to planners and community designers and how to access and use the information.

FORMAT: Lecture/seminar/field trip 2 hours weekly plus one full day field trip.

PREREQUISITE: PLAN/GEOG 2001.03 or EARTH 1080.03 and 1090.03 or 10 credits

PLAN 3035.03: Application of Planning Law.

This course explores the application of planning law in the field of community design. The course introduces students to the legal processes and statutory requirements for land use planning in Canada, with particular reference to Nova Scotia.

FORMAT: Lecture/seminar 3 hours

PREREQUISITE: PLAN 2005.03 or permission of instructor

PLAN 3040.03: Reading the Suburbs.

An increasing proportion of Canadians live in the suburbs. This course explores issues related to planning and designing the suburbs, and develops techniques for analyzing and developing community form in the suburban environment.

FORMAT: Lecture 3 hours

PREREQUISITE: PLAN 2005.03

CROSS-LISTING: PLAN 5040.03

PLAN 3045.03: Community Design Practice.

Community-building constitutes an important component of the Canadian economy. This course explores the financial, regulatory, social, and ethical issues of development practice. Using a case study approach, it examines examples of community design projects and initiatives in Canadian communities. Students gain insight into the financing, planning, and building of projects from the perspective of the development industry.

FORMAT: Lecture 3 hours

PREREQUISITE: PLAN 3001.03 or concurrent

PLAN 3050.03: Topics in Community Design.

This courses provides opportunities to examine selected topical issues in community design.

FORMAT: Lecture/seminar 3 hours

PREREQUISITE: (to be announced for each topic)

CROSS-LISTING: PLAN 5050.03

PLAN 3051.03: Topics in Community Design 2.

This course provides opportunities to examine selected topical issues in community design.

FORMAT: Lecture/seminar 3 hours

CROSS-LISTING: PLAN 5051.03

PLAN 3052.03: Topics in Community Design 3.

This course provides opportunities to examine selected topical issues in community design.

FORMAT: Lecture/seminar 3 hours

CROSS-LISTING: PLAN 5052.03

PLAN 3053.03: Topics in Community Design 4.

This course provides opportunities to examine selected topical issues in community design.

FORMAT: Lecture/seminar 3 hours

CROSS-LISTING: PLAN 5053.03

PLAN 3056.03: Computers in Community Design.

This course explores the opportunities for using computers in community design and planning. Topics may include graphic presentation, business applications (e.g., spreadsheets, databases), computer assisted design, and three dimensional rendering as used in community design and planning.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: PLAN 2001.03 or permission of instructor

EXCLUSION: PLAN 3055.03

PLAN 3060.03: Quantitative Methods for Planners.

This course introduces students to quantitative methods, including the use of statistics in planning and community design. It familiarizes students with basic statistical analyses used in the field and helps them develop the ability to evaluate and interpret quantitative data presented by experts.

FORMAT: Lecture/lab

PREREQUISITE: Grade 12 Math

PLAN 3225.03: Plants in the Human Landscape.

The course covers use of plants for human recreation and aesthetics; in gardens, public parks, suburban and urban landscapes. Topics include: garden design, choice of plant materials, management and maintenance, edible landscaping, use of horticulture as therapy and plants and human health. Course will involve field trips and group projects. Students will be expected to complete a design project as part of the coursework.

FORMAT: Lecture/tutorial

PREREQUISITE: BIOL 1010.03 or BIOL 1020.03 (C- or better) and BIOC

1011.03 or BIOC 1021.03 (C- or better) or DISP or PLAN 2001.03

CROSS-LISTING: BIOL 3225.03, ENVS 3225.03

PLAN 4001.06: Environmental Planning Studio.

This course provides an applied context for analyzing landscape issues and exploring environmental planning options. Students provide a service to the community by working through projects where local community groups or agencies have identified real needs for information and advice.

FORMAT: Studio 6 hours (one term)

PREREQUISITE: admission to Honours or graduate program

PLAN 4002.06: Urban Design Studio.

This studio provides an applied project context for looking at issues related to the design of cities, especially their core areas. Students explore various urban design and planning options. Students provide a service to the local community by working through projects where local community groups or agencies have identified real needs for information and advice.

FORMAT: Studio 6 hours (one term)

PREREQUISITE: admission to Honours or graduate program

PLAN 4050.03: Thesis Proposal.

Students in the honours programs in Community Design develop a thesis proposal for their honours thesis. The course will review appropriate research methods and guide the students through background research, literature synthesis, methods development and proposal writing.

NOTE: Students must achieve a B or higher for admission from this course into PLAN 4500.06

FORMAT: Lecture/seminar 3 hours

PREREQUISITE: Admission to Honours programs in BCD

PLAN 4100.03: Community Design Internship.

Students locate a company or organization involved in some element of community design or planning and volunteer for eight hours a week in the office. An internship in a relevant workplace allows students to reflect on the knowledge they can bring to practice. Students will keep a work journal, prepare an internship report, and make a brief presentation on the placement at the end of term. Students will meet with the course coordinator for occasional seminars.

FORMAT: Independent study/seminar

PREREQUISITE: PLAN 4001.06 or 4002.06 (limited to Honours BCD students)

PLAN 4101.03: History and Theory of Urban Design.

The course introduces the history and theory of urban design as a distinct area of professional knowledge and skill within the spectrum of planning and design concerns and specialties.

FORMAT: Lecture/seminar

CROSS-LISTING: PLAN 6101.03

RESTRICTION: Honours or graduate students in the Faculty of Architecture and Planning, or permission of instructor

PLAN 4105.03: Land Development Economics.

This course applies basic techniques for analyzing the financial feasibility of land development projects. Case studies focus particular attention on methods of financing and organizing real-estate development within the planning framework.

FORMAT: Lecture/seminar

CROSS-LISTING: PLAN 6105.03

RESTRICTION: Honours or graduate students in the Faculty of Architecture and Planning, or permission of instructor

PLAN 4106.03: Transportation Planning.

The course considers transportation trends, the transport needs associated with different activities, and the impact of transport facilities on land development to offer a critical analysis of the interplay between land uses and transportation. Technology, the costs of supplying transport facilities and the demand outlook for different modes are examined. The emphasis is on urban transportation, mobility demands and the supply of efficient and environmentally sound transport facilities.

FORMAT: Lecture/seminar 3 hours

CROSS-LISTING: PLAN 6106.03

RESTRICTION: Honours or graduate students in the Faculty of Architecture and Planning, or permission of instructor

PLAN 4108.03: History and Theory of Landscape Architecture.

This lecture and seminar course deals with changing landscapes and perceptions of the natural world during the past 250 years. It discusses the effects of technology and resource use on the design of landscapes as small as a private garden and as large as a bio-region, and examines the changing role of landscape architects, their writings and their collaboration with architects.

FORMAT: Lecture/seminar

CROSS-LISTING: PLAN 6108.03

RESTRICTION: Honours or graduate students in the Faculty of Architecture and Planning, or permission of instructor

PLAN 4120.03: Citizen Engagement and Consultation.

This course examines the conceptual foundations and practice of citizen participation, especially in the context of planning and development decisions by municipal and provincial governments, and the techniques or methods that can be used to more effectively involve individual citizens and stakeholder groups in community decisions.

FORMAT: Lecture and seminar

PREREQUISITE: Honours students in the Faculty of Architecture and Planning, or permission of instructor.

CROSS-LISTING: PLAN 6120.03

PLAN 4125.03: Negotiation and Conflict Management.

This course explores the world of interpersonal communication, conflict and negotiation and the variety of approaches and range of skills needed to solve problems, reach agreements and maintain relationships. It will enable participants to understand the positive and negative dimensions of conflict, analyze the dynamics of formal and informal negotiations, and interact with others with greater awareness, intention and skill.

FORMAT: Lecture with experiential exercises

PREREQUISITE: Honours students in the Faculty of Architecture and Planning, or permission of instructor.

CROSS-LISTING: PLAN 6125.03

PLAN 4131.03: Planning of Coastal Communities and Regions.

Land use and community planning address coastal protection and land development with planning tools that are integral to coastal zone management. This course explores the theory and application of strategic, spatial and community planning for managing the challenges of environmental change and development pressures in coastal regions and communities.

FORMAT: Lecture/seminar/field trip 3 hours weekly plus one full day field trip.

PREREQUISITE: PLAN/GEOG 3001.03 or 12.5 credits (75 credit hours) and permission of the instructor

PLAN 4150.03: Topics in Planning.

This course provides opportunities to examine selected topical issues in planning in a seminar discussion.

FORMAT: Seminar

PREREQUISITE: PLAN 2006.03, or permission of instructor.

CROSS-LISTING: PLAN 6150.03

RESTRICTION: Restricted to honours or graduate students in the Faculty of Architecture and Planning.

PLAN 4151.03: Topics in Planning II.

This course provides opportunities to examine selected topical issues in planning in a seminar discussion.

FORMAT: Seminar

PREREQUISITE: Restricted to honours or graduate students in the Faculty of Architecture and Planning, or permission of instructor

CROSS-LISTING: PLAN 6151.03

PLAN 4152.03: Topics in Planning III.

This course provides opportunities to examine selected topical issues in planning in a seminar discussion.

FORMAT: Seminar

PREREQUISITE: Restricted to honours or graduate students in the Faculty of Architecture and Planning, or permission of instructor

CROSS-LISTING: PLAN 6152.03

PLAN 4153.03: Topics in Planning IV.

This course provides opportunities to examine selected topical issues in planning in a seminar discussion.

FORMAT: Seminar

PREREQUISITE: Restricted to honours or graduate students in the Faculty of Architecture and Planning, or permission of instructor

CROSS-LISTING: PLAN 6153.03

PLAN 4200.03: Independent Study.

A student in the honours major may undertake an independent reading or research project under faculty supervision. The student will prepare a proposal that must be signed by the project supervisor and the Director of the School. The proposal will set out a work plan and projected outcomes.

FORMAT: Directed study

PREREQUISITE: permission of instructor and School

PLAN 4500.06: Thesis Project.

Honours students in their final semester work on advanced design or research projects related to their Major concentration. Students will be organized into advanced teams working relatively independently on coordinated topics. The course uses a project management model which emulates professional practice. Each student prepares an individual thesis project report and presents it orally.

FORMAT: Studio 6 hours

PREREQUISITE: PLAN 4001.06 or 4002.06 (limited to students in the Major), and PLAN 4050.03 (with a minimum grade of B)

Provost of the College

Summerby-Murray, R., ATCL Dip (Trinity College, London), BA, MA
(Canterbury), PhD (Toronto)
Moore, C. L., BA, PhD (Cantab)

College of Arts and Science

Introduction

The College of Arts and Science, established in 1988, consists of the Faculty of Arts and Social Sciences and the Faculty of Science. The College of Arts and Science meets to discuss matters of concern common to its units, in particular those relating to academic programs and regulations. The Dean of Arts and Social Sciences and the Dean of Science alternate, year by year, as Provost of the College. The Provost chairs College meetings and prepares the agenda for those meetings. Administrative responsibility for what is decided in College meetings remains in the two Faculties. Undergraduate degrees are offered through fourteen Departments in the Faculty of Arts and Social Sciences, and ten Departments and three programs in the Faculty of Science. There are several interdisciplinary programs of instruction in the College, the responsibility for which is shared among members from different Departments.

The College of Arts and Science is responsible for the curriculum of Bachelor of Arts, Bachelor of Science, and Bachelor of Music degree programs, and for diploma programs in Meteorology and Costume Studies. The College is also responsible for the establishment of academic regulations governing students registered in its programs.

The College of Arts and Science consists of several groups: some 6,100 undergraduate students who typically spend three or four years in the College, nearly 450 full-time teaching and research faculty and staff as well as a number of part-time teachers and teaching assistants, and a support staff of administrative assistants and technicians. The student's academic role is to learn from teachers, from laboratory experience, from books, from other students, and from solitary contemplation. Students learn not only facts but concepts, and what is most important, they learn how to learn.

Through intellectual interaction with other members of the academic community, undergraduate students should gain the background knowledge, the ability and the appetite for independent discovery. Their acquisition of these components of liberal education is marked formally by the award of a Bachelor's degree. The academic faculty has two equally important roles: to teach the facts, concepts, and methods that the student must learn; and to contribute to the advancement of human knowledge through research and through scholarly or artistic activity.

The goal of the Bachelor's degree is to produce educated persons with competence in one or more subjects. Such competence includes not only factual knowledge but, more importantly, the ability to think critically, to interpret evidence, to raise significant questions, and to solve problems. A BA or a BSc degree often plays a second role as a prerequisite to a professional program of study.

BA and BSc degree programs in the College are of three types: the four year or 120 credit hour degree with Honours; the four year or 120 credit hour degree with a Major; and the three year or 90 credit hour degree with a minor.

The College is particularly proud of the Honours programs that it offers in most subjects to able and ambitious students. The BA or BSc with Honours is distinguished from the BA or BSc Major (120 credit hours) or the BA or BSc (90 credit hours) in that a higher standard of performance is expected, a greater degree of concentration of credit hours in one or two subjects is required, and at the conclusion of the program each student must receive a grade which is additional to those for the required 120 credit hours. Frequently, Honours students obtain this grade by successfully completing an original research project under the supervision of a faculty member. Completion of a BA or BSc with Honours is an excellent preparation for graduate study at major universities throughout the world. Dalhousie is distinguished among Canadian universities in offering BA programs with Honours in most subjects in which it also provides BSc Honours programs and in providing BA and BSc degree programs with Combined Honours in an Arts and a Science subject.

College of Arts and Science Degree Requirements

Following is a list of the faculty requirements needed to satisfy degree programs in the College of Arts and Science. Details of these requirements can be found on the pages following these lists. Departmental requirements can be found in the appropriate department/faculty listing in this calendar. Please note that students must satisfy both department and faculty requirements. Before registering for the second year, each student in the College of Arts and Science must declare a subject of concentration and obtain program advice from a faculty advisor in the appropriate department.

Requirements for degree programs other than College of Arts and Science can be found in the appropriate department/school/college/faculty listing.

I. General

The following information applies generally to all of the programs offered within the College of Arts and Science.

A. Subject Groupings

The various subjects in which instruction is offered are placed in one or more of the groups below. In the BA degree, each program must include six credit hours in subjects chosen from each of the three subject groups (1, 2, and 3 below), normally within the first 60 credit hours of any BA degree. In the BSc degree, each program must include six credit hours in subjects chosen from each of two subject groups (1 and 2).

1. Languages and Humanities

Arabic, Canadian studies, Chinese (Mandarin), classics, comparative religion, contemporary studies, creative writing, early modern studies, English, European studies, French, gender and women's studies, German, Greek, history, history of science and technology, Italian studies, King's Foundation Year, Latin, music, philosophy, religious studies, Russian, Spanish, theatre and the course "First Year Seminars: Arts and Social Sciences" (ASSC 1200.03).

2. Social Sciences

Canadian studies, contemporary studies, early modern studies, European studies, economics, gender and women's studies, history, history of science and technology, international development studies, King's Foundation Year, political science, psychology, sociology and social anthropology, and sustainability (for BSc only).

3. Life Sciences and Physical Sciences

Biochemistry and molecular biology, biology, chemistry, computer science, earth sciences, economics, engineering, environmental science, human physiology* (for BA only), informatics, marine biology, mathematics, microbiology and immunology, neuroscience, oceanography, physics, psychology, science, statistics, and sustainability (for BA only).

* Offered by the Faculty of Medicine. See section E, Electives, for limit on courses from other Faculties.

PLEASE NOTE:

- In cases where a subject is listed in more than one of the groupings, any credit taken in that subject may be used to satisfy only one of the grouping requirements. A second credit in the same subject cannot be used to satisfy another subject grouping requirement. The exceptions are the Dalhousie Integrated Science Program and King's Foundation Year Program. **King's Foundation Year Program** (KING 1000.24, 1100.18) satisfies the humanities-language and social science groupings and students must take one credit in a single life/physical sciences subject to complete the subject grouping requirements. The **Integrated Science Program** satisfies the life

sciences and physical sciences and social sciences subject groupings.

Integrated Science students are required to take another three credit hours of Languages and Humanities in addition to PHIL 1050.03 to satisfy the Languages and Humanities requirement.

- The subject groupings requirement should normally be completed in the first 60 credit hours.

B. Writing Course

One of the first 30 credit hours chosen should be selected from a list of courses in which written work is considered frequently and in detail. These writing courses are approved by the Writing Across the Curriculum committee and are listed below:

- CLAS 1000X/Y.06; 1010X/Y.06, 1100X/Y.06
- Integrated Science Program
- ENGL 1000X/Y.06
- Any **two** of ENGL 1010.03, 1020.03, 1040.03, 1045.03, 1050.03, 1100.03
- GERM 1020X/Y.06; GERM 1080.06
- HIST 1005X/Y.06; HIST 1867X/Y.06; HIST 1503.03; HIST 1006.03
- HSTC 1800.03/1801.03 (**both** must be successfully completed in order to satisfy the Writing Requirement)
- JOUR 1001X/Y.06 *
- King's Foundation Year
- OCEA 1000X/Y.06
- PHIL 1010X/Y.06
- POLI 1103X/Y.06
- RELS 1200X/Y.06
- RUSN 1020.03/1070.03 (**both** must be successfully completed in order to satisfy the Writing Requirement)
- RUSN 2051.03/2052.03 (**both** must be successfully completed in order to satisfy the Writing Requirement)
- SCIE 1111.03 (satisfies the requirement for BSc students only)
- SOSA 1050X/Y.06
- SUST 1000.06
- THEA 1000X/Y.06, 1300X/Y.06

* Offered by the School of Journalism. See section E, Electives, for limit on courses from other Faculties.

The Writing Course may also be used to satisfy one of the subject groupings.

Courses which satisfy the Writing Requirement are identified by the following symbol and notation in their formal description:

✍ Writing Requirement

C. Mathematics Requirement (Bachelor of Science)

In order to qualify for a BSc degree candidates are required to complete successfully at least six credit hours in mathematics or statistics other than MATH 1001.03, 1002.03, 1003.03, 1110.03, 1120.03, or 1115.03. A course taken to satisfy this requirement cannot also satisfy the requirement of a course from section 3, [page 125](#).

Students may also satisfy this requirement by completing the Integrated Science Program year or passing the test which is administered by the Department of Mathematics and Statistics. Such students must nevertheless complete 90 or 120 credit hours in order to graduate.

D. Language Course (Bachelor of Arts)

Students should consider becoming fluent in French. BA students are required to obtain six credit hours from the following language courses:

- ARBC 1020X/Y.06 (Arabic)
- CHIN 1030X/Y.06 (Mandarin)
- CLAS 1700X/Y.06 (Greek), 1800X/Y.06 (Latin); 1900X/Y.06 (Hebrew)
- FREN (any course taught in French)
- GERM 1001X/Y.06, 1010X/Y.06, 1060X/Y.06
- ITAL 1010X/Y.06, 1012X/Y.06
- RELS 2600.03/CLAS 2600.03 and RELS 1600.03/CLAS 1600.03 both must be completed
- RUSN 1000X/Y.06, RUSN 1002/RUSN 1003 (both must be successfully completed in order to satisfy the Language Requirement)
- SPAN 1020X/Y.06

For students with advanced language skills, upper-level language courses may be substituted. Consult the Registrar's Office if you require further information. A

course taken to satisfy this requirement cannot also satisfy the requirement of a course from section 1.

Students may satisfy this requirement by passing one of the tests administered by the language departments. Such students must nevertheless complete 90 or 120 credit hours in order to graduate.

BA students who choose to major in economics, philosophy, political science, psychology or sociology and social anthropology may substitute for a language course at least six credit hours in mathematics or statistics taught by the Department of Mathematics and Statistics, other than MATH 1001.03, 1002.03, 1003.03, 1110.03, 1120.03, or 1115.03, to meet this requirement; or they may meet it by passing the test administered by the Department of Mathematics and Statistics.

A course taken to satisfy this requirement cannot also satisfy the requirement of a course from section 3 [page 125](#).

E. Electives

Students may choose electives from any of the courses offered by teaching units within the College of Arts and Science, College of Sustainability, and the Faculty of Computer Science. In addition, without prior permission, electives are permitted as follows provided prerequisites are met and the consent of the instructor(s) is obtained when necessary:

Bachelor of Arts

- 12 credit hours from courses offered in other faculties OR
- 12 credit hours from courses offered in other faculties and 12 credit hours in Commerce OR
- 24 credit hours in Commerce

Please note that BA students registered for minors in Business, Law and Society, Health Studies, Community Design, Journalism or other minors approved for students within the College of Arts and Science are permitted to take the courses necessary to satisfy the requirements for the minor. In addition, 12 credit hours from courses offered in other faculties are permitted.

BA/BEng

Students may count as electives a total of 36 engineering credit hours. In addition 12 credit hours from courses offered in other faculties are permitted.

Bachelor of Science

- 12 credit hours from courses offered in other faculties OR
- 12 credit hours from courses offered in other faculties and 12 credit hours in Commerce OR
- 24 credit hours in Commerce OR
- 30 credit hours in Engineering or Food Science courses and 12 credit hours from courses offered in other faculties

Please note that BSc students registered for any approved minor (see pp. 132 - 143) are permitted to take the courses necessary to satisfy the requirements for the minor. In addition, 12 credit hours from courses offered in other faculties are permitted.

BSc/BEng

Students may count as electives a total of 36 engineering credit hours and in addition 12 credit hours from courses offered in other faculties.

Any additional elective credit hours outside the College of Arts and Science will require explicit permission, to be obtained by application to the appropriate Dean's Office. Permission to count a requested course for degree credit will only be granted to students who demonstrate clearly, in a written submission, how a desired course will enhance the objectives of the BA or BSc program in progress. In this regard, a written statement of support from an academic advisor in the department of concentration is desirable.

Students seeking to enrol in courses beyond the above provisions as a means of preparing to transfer to a program of study outside the College of Arts and Science will be given approval to do so by the appropriate dean's office if admission to the course(s) has been granted by the instructor(s) concerned. In such cases, however, it will be explicitly stated that the courses will not count for credit towards a BA or BSc degree.

F. Cross-listed Courses

Please note that cross-listed courses will count as one subject only for the purpose of satisfying degree requirements, e.g., ECON 2260.03 cross-listed with MATH 2060.03 may count either as a mathematics course or economics course but not both.

II. Programs

A. BA/BSc (120 Credit Hour) Programs

The 120 credit hour degree is the standard BA or BSc degree. There are a variety of programs within the 120 credit hour degree. Each is designed to develop some level of concentration of knowledge and expertise.

1. Major Programs

A major program focuses a student's studies, but not to the extent that an honours program does. Unlike the honours degree, the major degree may not be adequate for admission to graduate programs. Students interested in a major program are advised to seek detailed information from the department in which they wish to concentrate their studies.

1.a BA (120 Credit Hour)

- First Year
 - No more than 18 credit hour equivalents of the first 30 credit hours taken may be in a single subject
- 6 credit hours in a writing course (see [page 125](#))
- 6 credit hours in one or more language/humanities subjects (see section A1, [page 125](#))
- 6 credit hours in one or more social science subjects (see A2, [page 125](#))
- 6 credit hours in one or more life or physical science subjects (see A3, [page 125](#))
- 6 credit hours in a **single** language subject for (see D, [page 125](#))
- A minimum of 30, maximum of 54 credit hours in the major subject beyond the 1000 level, including 18 credit hours beyond the 2000 level.
- Within the last 90 credit hours, complete 6 credit hours in each of two subjects other than the major
- Total credit hours required above 1000 level - 72
- Total credit hours required for degree - 120
- Required GPA for graduation - 2.00
- Graduation with distinction - 3.70
- May be combined with minor(s)

Bachelor of Arts major subjects: classics, English, European studies, French, German, gender and women's studies, history, international development studies, music, philosophy, political science, religious studies, Russian studies, sociology and social anthropology, Spanish, theatre, or any of the BSc major subjects.

1.b BSc (120 Credit Hour)

- an approved writing course (see [page 125](#))
- 6 credit hours in one or more language/humanities subjects (see 1, [page 125](#))
- 6 credit hours in one or more social science subjects (see 2, [page 125](#))
- 6 credit hours in math (see [page 125](#))
- A minimum of 30, maximum of 60 credit hours in the major subject beyond the 1000 level, including 18 credit hours beyond the 2000 level.
- Total credit hours required above 1000 level - 72
- Total credit hours required for degree - 120
- Required GPA for graduation - 2.00
- Graduation with distinction - 3.70
- May be combined with minor(s)

Bachelor of Science major subjects: biochemistry and molecular biology, biology, chemistry, earth sciences, economics, environmental science, marine biology, mathematics, microbiology and immunology, neuroscience, ocean sciences, physics, psychology, or statistics.

1.c BSc Major (120 Credit Hour) Science Co-operative Education

Requirements are as for the major program with the addition of the following:

- A minimum of three co-op work terms

Co-operative Education in Science Programs

The aim of co-op degree programs is to enable students to combine their studies with work experience. The programs are thus year-round, including Summer

School, and will normally require from 48 to 52 months for completion. Co-op degree programs conform to the requirements for the major degree.

The following departments currently offer co-op programs: Biochemistry and Molecular Biology, Biology, Chemistry, Earth Sciences, Economics, Marine Biology, Mathematics and Statistics, Microbiology and Immunology, and Physics and Atmospheric Science. For details on these programs, consult the calendar entries for the departments and the Cooperative Education in Science section, [page 490](#).

2. Double Major programs

The double major program allows study in two disciplines of equal or comparable interest.

2.a BA Double Major (120 Credit Hour)

- First Year
No more than 18 credit hour equivalents of the first 30 credit hours taken may be in a single subject
- 6 credit hours in a writing course (see [page 125](#))
- 6 credit hours in one or more language/humanities subjects (see section A1, [page 125](#))
- 6 credit hours in one or more social science subjects (see A2, [page 125](#))
- 6 credit hours in one or more life or physical science subjects (see A3, [page 125](#))
- 6 credit hours in a **single** language subject for (see D, [page 125](#))
- A minimum of 60, maximum of 84 credit hours in the major subject beyond the 1000 level are to be in the two allied subjects, with no more than 48 credit hours and no fewer than 30 credit hours in either, including at least 12 credit hours beyond the 2000 level in each of the two major subjects. The major subject with the most advanced credits appears first on the record.
- Within the last 90 credit hours, complete six credit hours in a single subject other than the two major subjects.
- Total credit hours required above 1000 level - 72
- Total credit hours required for degree - 120
- Required GPA for graduation - 2.0
- Graduation with distinction - 3.70
- May be combined with minor(s)

Bachelor of Arts double major subjects: Choose both subjects from the Bachelor of Arts and Bachelor of Science major subjects, or Computer Science (as a second subject only); or combine one BA major subject with Environment, Sustainability and Society. In addition to the BA major subjects listed in section 1.a, Canadian studies, music and creative writing are also available as one of the subjects in a double major. European studies is not available in the double major program.

2.b BSc, Double Major (120 Credit Hour)

- an approved writing course (see [page 125](#))
- 6 credit hours in one or more language/humanities subjects (see 1, [page 125](#))
- 6 credit hours in one or more social science subjects (see 2, [page 125](#))
- 6 credit hours in math (see [page 125](#))
- Minimum of 60 and a maximum of 84 credit hours in the two major subjects beyond the 1000 level, with no more than 54 credit hours and no fewer than 30 credit hours in either, including at least 12 credit hours beyond the 2000 level in each of the two major subjects. The major subject with the most advanced credit hours appears first on the record.
- Total credit hours required above 1000 level - 72
- Total credit hours required for degree - 120
- Required GPA for graduation - 2.0
- Graduation with distinction - 3.70
- May be combined with minor(s)

BSc double major subjects: Choose both subjects from the Bachelor of Science major subjects listed in 1.b; or combine one of the BSc major subjects with computer science or Environment, Sustainability and Society; or, provided the larger number of major credit hours is in a science subject, one of the BA major subjects (except European studies) or Canadian studies, creative writing, or Music.

3. Honours Programs

Honours programs require a higher quality of work than is required by the other undergraduate programs of the college (such as the 90 credit hour degree and 120 credit hours major). Able and ambitious students are urged to enter these programs. There are two types of honours programs in the BA (concentrated and combined) and three types in the BSc (concentrated, combined, and

multidisciplinary). Applications for admission to honours programs must be made to the departments concerned on forms available in departments, at the Registrar's Office or online at <http://www.dal.ca/honours>.

Students should apply in their second year. If application is made later, it may be necessary to make up some work not previously taken.

For each individual student the entire honours program, including elective credit hours, is subject to supervision and approval by the department or departments concerned, or in the case of multidisciplinary honours, by an interdisciplinary committee.

NOTE: The last day to apply to an honours program is September 19.

3.a BA Concentrated Honours (120 Credit Hour)

- First Year
No more than 18 credit hour equivalents of the first 30 credit hours taken may be in a single subject
- 6 credit hours in a writing course (see [page 125](#))
- 6 credit hours in one or more language/humanities subjects (see section A1, [page 125](#))
- 6 credit hours in one or more social science subjects (see A2, [page 125](#))
- 6 credit hours in one or more life or physical science subjects (see A3, [page 125](#))
- 6 credit hours in a **single** language subject for (see D, [page 125](#))
- A minimum of 30, maximum of 54 credit hours in the major subject beyond the 1000 level, including 18 credit hours beyond the 2000 level.
- Within the last 90 credit hours, complete 6 credit hours in each of two subjects other than the major
- Total credit hours required above 1000 level - 72
- Total credit hours required for degree - 120
- Required GPA for graduation - 2.00
- Graduation with distinction - 3.70
- May be combined with minor(s)
- Honours Qualifying Examination: At the conclusion of an honours program a student's record must show a grade which is additional to the grades for the courses taken to obtain the required 120 credit hours. This grade may be obtained through a comprehensive examination, the presentation of a research paper (which may be an extension of one of the courses), or such other method as may be determined by the committee or department supervising the student's program. The method by which this additional grade is obtained is referred to as the Honours Qualifying Examination. Departments may elect to use a pass-fail grading system for this examination. Unless pass/fail grading is employed, the grade must be "B-" or better for honours, and "A-" or better for first class honours.
- Required standing for graduation:
Arts and Social Sciences subjects require a GPA of 2.70 (3.70 for first class) on courses in the honours subject.
Science subjects (see below) require a GPA of 3.00 (3.70 for first class) in the honours subject.
- May be combined with minor(s)

Note: If the student has a minor, courses in the honours subject and the minor are included in the GPA.

Bachelor of Arts concentrated honours subjects: classics, English, European studies, French, German, history, international development studies, music, philosophy, political science, religious studies, Russian studies, social anthropology, sociology, Spanish, and theatre or any of the BSc honours subjects.

3.b BSc Concentrated Honours (120 Credit Hour)

- an approved writing course (see [page 125](#))
- 6 credit hours in one or more language/humanities subjects (see 1, [page 125](#))
- 6 credit hours in one or more social science subjects (see 2, [page 125](#))
- 6 credit hours in math (see [page 125](#))
- Minimum of 54 credit hours with a grade of C or better, maximum of 66 credit hours beyond the 1000-level in the honours subject
- Total credit hours required for degree - 120
- Total credit hours required above 1000 level - 72
- Honours Qualifying Examination: At the conclusion of an honours program a student's record must show a grade which is additional to the grades for the courses taken to obtain the required 120 credit hours. This grade may be obtained through a comprehensive examination, the presentation of a research paper (which may be an extension of one of the courses), or such other method

as may be determined by the committee or department supervising the student's program. The method by which this additional grade is obtained is referred to as the Honours Qualifying Examination. Departments may elect to use a pass-fail grading system for this examination. Unless pass/fail grading is employed, the grade must be "B-" or better for honours, and "A-" or better for first class honours.

- Required standing for graduation:
GPA 3.00 (3.70 for first class) on courses in the honours subject.
- May be combined with minor(s)

Bachelor of Science concentrated honours subjects: biochemistry and molecular biology, biology, chemistry, earth sciences, economics, environmental science, marine biology, mathematics, microbiology and immunology, neuroscience, ocean sciences, physics, psychology and statistics.

3.c BA Combined Honours (120 Credit Hour)

- First Year
No more than 18 credit hour equivalents of the first 30 credit hours taken may be in a single subject
- 6 credit hours in a writing course (see [page 125](#))
- 6 credit hours in one or more language/humanities subjects (see section A1, [page 125](#))
- 6 credit hours in one or more social science subjects (see A2, [page 125](#))
- 6 credit hours in one or more life or physical science subjects (see A3, [page 125](#))
- 6 credit hours in a **single** language subject for (see D, [page 125](#))
- Total credit hours required for degree - 120
- Total credit hours required above 1000 level - 72
- Minimum of 66, maximum of 84 credit hours beyond the 1000 level in two allied subjects, not more than 48 credit hours nor fewer than 30 credit hours being in either of them. Grade must be "C" or better, otherwise, course will not count toward degree.
- Within the last 90 credit hours, 12 to 24 depending on the number selected in the honours subjects - elective credit hours.
- Honours Qualifying Examination: see concentrated honours program above for details.
- Required standing for graduation:
Arts and Social Sciences subjects require a GPA of 2.70 (3.70 for first class) on courses in the honours subjects.
Science subjects (see below) require a GPA of 3.00 (3.70 for first class) in courses in the honours subjects.
- May be combined with minor(s)

Note: If the student has a minor, courses in the honours subjects and the minor are included in the honours GPA.

Bachelor of Arts combined honours subjects: Canadian studies, classics, contemporary studies, creative writing, early modern studies, English, French, gender and women's studies, German, history, history of science and technology, international development studies, Italian studies, music, philosophy, political science, religious studies, Russian studies, social anthropology, sociology, Spanish, theatre and computer science, Environment, Sustainability, and Society or any of the BSc honours subjects.

3.d BSc Combined Honours (120 Credit Hour)

- an approved writing course (see [page 125](#))
- 6 credit hours in one or more language/humanities subjects (see 1, [page 125](#))
- 6 credit hours in one or more social science subjects (see 2, [page 125](#))
- 6 credit hours in math (see [page 125](#))
- Minimum of 66, maximum of 84 credit hours beyond the 1000 level in two subjects, not more than 54 credit hours nor fewer than 30 credit hours being in either. Grades in honours subject courses must be C or better.
- Total credit hours required above the 1000 level - 72
- Total credit hours required for degree - 120
- Honours Qualifying Examination: see concentrated honours program above for details.
- Required standing for graduation:
GPA of 3.00 (3.70 for first class) on courses in the honours subjects.
- May be combined with minor(s)

Bachelor of Science combined honours subjects: biochemistry and molecular biology, biology, chemistry, earth sciences, economics, environmental science,

marine biology, mathematics, microbiology and immunology, neuroscience, ocean sciences, physics, psychology and statistics. Choose both subjects from the BSc honours subjects listed above or combine one of the BSc honours subjects with one of the BA combined honours subjects or with Computer Science or Environment, Sustainability and Society provided the larger number of honours credit hours is in a science subject.

3.e BSc Multidisciplinary Honours (120 Credit Hour)

- an approved writing course (see [page 125](#))
- 6 credit hours in one or more language/humanities subjects (see 1, [page 125](#))
- 6 credit hours in one or more social science subjects (see 2, [page 125](#))
- 6 credit hours in math (see [page 125](#))
- A total of 72 credit hours beyond the 1000 level in three or more subjects. A minimum of 18 and a maximum of 30 in each of three subjects. Grades must be "C" or better.
- Total credit hours required for degree - 120
- 18 elective credit hours
- Honours Qualifying Examination: See Concentrated Honours program above for details.
- Required standing for graduation:
GPA of 3.00 (3.70 for First Class) on courses in the honours subjects.
- May be combined with minor(s)

Bachelor of Science multidisciplinary honours subjects - at least 54 credit hours of the 120 selected must be from the following subjects: biochemistry, biology, chemistry, computer science, earth sciences, economics, environmental science, mathematics, microbiology and immunology, neuroscience, physics, psychology and statistics.

3.f BSc Honours Science Co-op (120 Credit Hour)

Requirements are as for appropriate honours program (described above) with the addition of the following:

- A minimum of three co-op work terms

3.g Joint Honours: Dalhousie University - Mount Saint Vincent University

Special arrangements exist under which students may be permitted to pursue an honours program jointly at Dalhousie and Mount Saint Vincent universities. Interested applicants should consult the appropriate department of their own university at the beginning of the second year. Prospective joint honours students must be accepted by the honours departments concerned at both institutions. These departments supervise the entire program of study of accepted applicants. Students should be aware that not all courses available for credit at Mount Saint Vincent University can be given credit at Dalhousie and vice versa. In order for students to gain a joint honours degree they must satisfy all requirements of both institutions.

4. College of Sustainability Degree Programs

The College of Sustainability offers a Double Major and Combined Honours program with any subject in the College of Arts and Science. For complete details about the College, its programs, major/honours requirements and courses please see the College of Sustainability section on [page 44](#) of the Calendar.

5. Minor Programs

Minor programs comprise a minimum of 18 and a maximum of 27 credit hours in a defined subject area, above the 1000 level. Students minoring in a Faculty of Science subject may take up to 36 credit hours in the minor subject. Minors can be added to any 120 credit hour BA or BSc degree. If a minor is added to a double major or a combined honours program, students may find that they need to take more than 120 credit hours to complete all of their degree requirements. For BA students, when a minor subject is taken in conjunction with an honours program, grades in the minor subject must be "C" or better. Please note that a course cannot be used to satisfy both the major or honours subject requirement and the minor requirement.

Please refer to the list below for minor options.

5.a Minor Options - College of Arts and Science

The following minor options are available to students within the Faculty of Arts and Social Sciences and the Faculty of Science:

- Abrahamic Religions
- American Studies

- Ancient History
- Ancient Philosophy
- Applied Ethics
- Arabic Studies
- Biochemistry and Molecular Biology
- Bioethics
- Biology
- Business
- Canadian Studies
- Chemistry
- Chinese Studies
- Classical Literature
- Classics
- Classics: Medieval Philosophy
- Community Design
- Computer Science (BSc only)
- Contemporary Studies
- Early Modern Studies
- Earth Science
- Economics
- English
- Environment, Sustainability and Society
- Environmental Science
- Environmental Studies (only available in a 120 credit hour degree)
- Film Studies
- Food Science (BSc only)
- French
- Gender and Women's Studies
- Geography (only available in a 120 credit hour degree)
- German
- German Philosophy
- German Studies
- Health Studies
- Hispanic Cultures
- Hispanic Literature
- History
- History of Science and Technology
- International Development Studies
- Italian Studies
- Journalism
- Latin American Studies
- Law and Society
- Management
- Marine Biology
- Mathematics
- Medieval Studies
- Microbiology and Immunology
- Middle East Studies
- Music
- Musicology
- Neuroscience
- Ocean Sciences
- Philosophy
- Physics
- Political Science
- Popular Culture Studies
- Psychology
- Russian Studies
- Sociology and Social Anthropology
- Sociology and Social Anthropology of Critical Health Studies
- Sociology and Social Anthropology of Economy, Work and Development
- Sociology and Social Anthropology of Social Justice and Inequality
- Spanish Language
- Statistics
- Theatre

5.b Minor Requirements

Consult specific departmental pages for minor requirements or the list below.

Minor in Abrahamic Religions

Students declaring a Minor in the Abrahamic Religions will complete a minimum of 18 credit hours to a maximum of 27 credit hours, chosen from the lists below. At least three credit hours must be taken from each of the Judaism, Christianity

and Islam lists; RELS 3019 and 3382 may each be used to satisfy parts of this requirement.

Judaism courses

- RELS 2001.03: Judaism
- RELS 2220.03: Ancient Israel
- RELS 3018.03: Meetings between Hellenism and the East to Philo the Jew
- ARBC 3050.03: Arabic Philosophical Texts: Maimonides

Or

- RELS 4011.03: Jewish Philosophy: Maimonides
- RELS 4019.03: Philo Judaeus

Christianity courses

- RELS 2281.03: Christian Beginnings: The Orthodox and Oriental Churches
- RELS 2282.03: Christian Beginnings: Catholicism
- RELS 3009.03: Christianity in the Lands of Islam
- RELS 3381.03: Medieval Philosophy from Anselm to Augustine
- RELS 3411.03: St. Augustine's Confessions I
- RELS 3412.03: St. Augustine's Confessions II
- RELS 3431.03: St. Augustine's On the Trinity Part I
- RELS 3432.03: St. Augustine's On the Trinity Part II
- CLAS 3841.03: Latin Philosophical Texts: Aquinas Texts
- CLAS 3842.03: Latin Philosophical Texts: Anselm and Bonaventure Texts
- CLAS 4070.03: The Confessions in Latin
- CLAS 4400.06: Philosophy of the Church Fathers
- CLAS 4018.03: Christian Theology in Islamic Lands: John of Damascus

Islam courses

- RELS 2003.03: Islam
- RELS 2052.03: Cultural Introduction to the Arab World
- ARBC 3040.03: Arabic Philosophical Texts: al-Ghazali

Or

- RELS 4010.03: Islamic Philosophy: al-Ghazali
- RELS 3003.03: Islam and the Others
- RELS 3012.03: Sufism
- RELS 2503.03: Classical and Medieval History of Islamic Civilization
- RELS 3510.03: Sultans and Shahs: Polity and Religion in the Islamic Gunpowder Age.
- CLAS 3602.03: Classical and Medieval History of the Persianate World

Bridging courses

- RELS 2203.03: Philosophy and God
- RELS 3000.03: Topics in Religious Studies
- RELS 3019.03: Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- RELS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- RELS 3910.06: Neoplatonism: Plato and Neoplatonism
- RELS 4450.06: Medieval Interpreters of Aristotle
- CLAS 4500.06: Seminar on Neoplatonism

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Minor in American Studies

Requirements:

18 credit hours to be selected from the list below. Student minoring in American Studies must take at least three credit hours from each of the three participating departments: ENGL, HIST, POLI. Please note that not all courses are offered each year.

- ENGL 2003 American Literature
- ENGL 2070 African American Literature
- ENGL 3061 American Literature to 1865
- ENGL 3062 American Literature 1865 - 1914
- ENGL 3070 20th Century African American Novel
- ENGL 3220 American Literature of the Earlier Twentieth Century
- ENGL 3221 American Literature of the Later Twentieth Century
- ENGL 3245 Beat Generation
- ENGL 3820 Nabokov
- ENGL 4017 William Faulkner and Toni Morrison
- ENGL 4022 Ellison and Everett
- ENGL 4280 Hollywood Fiction
- ENGL 4281 Literature and Television
- ENGL 4400 Nature and American Culture

ENGL 4405 American Gothic
 ENGL 4406 New York in Fiction and Poetry
 ENGL 4456 American Literature of the Great Depression
 ENGL 4609 Moby Dick in Context
 ENGL 4803 Race and Gender in American Speculative Fiction

HIST 2331 Creation of the American Republic
 HIST 2332 The American Republic, 1840-1990
 HIST 2333 Political Reform in Twentieth Century America
 HIST 2335 Modern American Culture
 HIST 2336 The American Century
 HIST 2340 The Cold War
 HIST 3358 Slavery, Gender and Power: Women in Nineteenth Century America
 HIST 3361 The American Civil War and Reconstruction
 HIST 3365 The Vietnam War
 HIST 3368 America in the 1950s
 HIST 3369 America in the 1960s
 HIST 3370 North American Landscape
 HIST 3372 The Cuban Missile Crisis
 HIST 3373 Spying on the World: The CIA in American History
 HIST 3374 The Objectivity Question in American History
 HIST 3380 Slavery and Freedom in the Americas
 HIST 4360 Slavery and American Political Culture
 HIST 4988 The Historiography of American Foreign Relations, Post 1945

POLI 2300 Comparative Politics
 POLI 2540 Canadian-American Relations
 POLI 3304 Comparative Federalism
 POLI 3378 US Constitution, Government and Politics
 POLI 3431 Politics Through Film and Literature
 POLI 3440 The Politics of Fear
 POLI 3525 Comparative Foreign Policy Simulation
 POLI 3574 American Foreign Policy
 POLI 4242 Politics of Reason, Passion, Biology
 POLI 4512 The Politics of North America

Minor in Ancient History

Students must take 18 credit hours from the following list, including the listed language courses.

- CLAS 2021.03 Ancient Art and Architecture from the Pyramids to the Forum
- CLAS 2027.03 Magic, Religion & Philosophy
- CLAS 2209.03 The Roman World from Constantine to Theodosius
- CLAS 2214.03 The Roots of Greek Civilization
- CLAS 2215.03 The Classical Greek World
- CLAS 2216.03 Alexander the Great and the Hellenistic Kings
- CLAS 2220.03 Ancient Israel
- CLAS 2231.03 The Rise of Rome
- CLAS 2232.03 The Fall of Rome
- CLAS 2233.03 Roman Legions and the Barbarians
- CLAS 2234.03 Death, Sex, and Gold in the Ancient World
- CLAS 2281.03 Christian Beginnings: The Orthodox and Oriental Churches
- CLAS 2365.03 Plato and the Case of Socrates: Philosophy on Trial
- CLAS 3016.03 Meetings between Hellenism and the East to Philo the Jew
- CLAS 3017.03 Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- CLAS 3021.03 Ancient Art and Architecture from the Pyramids to the Forum
- CLAS 3205.03 Fall of the Roman Republic
- CLAS 3282.03 Christian Beginnings: Catholicism
- CLAS 3501.03 Herodotus: Father of History, Father of Lies
- CLAS 3502.03 Thucydides and the Greek World at War
- CLAS 3780.06 Greek Historians
- CLAS 3791.03 Greek Historians in Translation
- CLAS 3760.06 Reading and Research of Greek Texts (when appropriate)
- CLAS 3850.06 Reading and Research of Latin Texts (when appropriate)
- CLAS 4100.03 Reading and Research in Latin Texts (when appropriate)
- CLAS 4540.03 Ammianus Marcellinus and his World

Not more than six credit hours ancient language may be counted towards the Minor:

- CLAS 2710.06 Greek Prose
- CLAS 2700.06 Intermediate Greek
- CLAS 2810.06 Latin Prose

- CLAS 2800.06 A Study of Latin Prose and Poetry

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Minor in Ancient Philosophy

Students must take 18 credit hours from the following list, including the listed language courses.

The courses are to be chosen from the lists below and must include at least nine credit hours chosen from:

- CLAS 2365.03 Plato and the Case of Socrates: Philosophy on Trial
- CLAS 2365.03 Gods, Beasts and the Political Animal: Plato, Aristotle, and their Legacy
- CLAS 3400.06 The Dialogues of Plato
- CLAS 3500.06 Aristotle

Philosophy courses

- CLAS 2024.03 Philosophy and God
- CLAS 2027.03 Magic, Religion and Philosophy
- CLAS 2365.03 Plato and the Case of Socrates: Philosophy on Trial
- CLAS 2366.03 Gods, Beasts and the Political Animal: Plato, Aristotle, and their Legacy
- CLAS 3016.03 Meetings between Hellenism and the East to Philo the Jew
- CLAS 3017.03 Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- CLAS 3400.06 The Dialogues of Plato
- CLAS 3411.03 St. Augustine's Confessions I
- CLAS 3412.03 St. Augustine's Confessions II
- CLAS 3431.03 St. Augustine's On the Trinity Part I
- CLAS 3432.03 St. Augustine's On the Trinity Part II
- CLAS 3500.06 Aristotle
- CLAS 3900.06 The Philosophy of Aristotle
- CLAS 3910.06 Neoplatonism: Plato and Neoplatonism
- CLAS 4060.03 Boethius and Prosimetrum: Poetry and Prose in the Consolation of Philosophy
- CLAS 4019.03 Philo Judaeus
- CLAS 4400.06 Philosophy of the Church Fathers
- CLAS 4500.06 Seminar on Neoplatonism
- CLAS 4601.03 Hellenistic Philosophy - Stoics and Epicureans
- CLAS 4602.03 Hellenistic Philosophy - From Scepticism to Neoplatonism

Not more than six credit hours of a language course may be counted towards the Minor:

- CLAS 2710.06 Greek Prose

OR

- CLAS 2700.06 Intermediate Greek
- CLAS 2810.06 Latin Prose

OR

- CLAS 2800.06 A Study of Latin Prose and Poetry

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Minor in Applied Ethics

Requirements

At least 18 credit hours and no more than 27 credit hours in Philosophy beyond the 1000 level, including at least three credit hours beyond the 2000 level.

Select at least three credit hours from the following:

- PHIL 2130.03 Logic: Deduction
- PHIL 2085.03 Reasoning Skills
- PHIL 2090.03 How to Win an Argument
- PHIL 2660.03 Logic: Understanding Scientific Reasoning

Select:

- PHIL 3105.03 Ethics

Select at least nine credit hours from the following:

- PHIL 2805.03 Ethics & Health Care: Patient Care
- PHIL 2810.03 Ethics & Health Care: Social Policy
- PHIL 2081.03 Ethics in the World of Business
- PHIL 2480.03 Environmental Ethics
- PHIL 2485.03 Technology and the Environment
- PHIL 2490.03 Social, Ethics and Health Care

PHIL 4801.03 Topics in Ethics and Health Care
PHIL 4125.03 Topics in Ethics

Minor in Arabic Studies

Students must take 18 credit hours from the following list:

Required:

- ARBC 2020.06

And 12 credit hours selected from the following:

- ARBC 2100.03 Cultural Introduction to the Arab World
- ARBC 3030.03 Advanced Arabic I
- ARBC 3031.03 Advanced Arabic II
- ARBC 3040.03 Arabic Philosophical Texts: al-Ghazali or RELS 4010.03 Islamic Philosophy: al-Ghazali
- ARBC 3050.03 Arabic Philosophical Texts: Maimonides or RELS 4011.03 Jewish Philosophy: Maimonides
- ARBC 3100.03 Arabic Pre-Islamic Poetry
- CLAS 2281.03 Christian Beginnings: The Orthodox and Oriental Churches
- CLAS 3017.03 Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- CLAS 3382.03 Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- RELS 2003.03 Islam
- RELS 3003.03 Islam and the Others
- RELS 3009.03 Christianity in the Lands of Islam
- RELS 3012.03 Sufism
- RELS 4018.03 Christian Theology in Islamic Lands: John of Damascus

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Please note: Students wishing to take ARBC 1020X/Y.06 must take the Arabic Placement Test (APT). This test is administered by the instructor at the beginning of the regular academic session.

Minor in Biochemistry and Molecular Biology

A Minor in Biochemistry and Molecular Biology is available to non-Biochemistry students in a 120 credit hour degree program within the College of Arts and Science. The Minor is also available to students in some other Faculties (please consult the appropriate section for your Faculty in the Undergraduate calendar).

Departmental Requirements

- A minimum of 18 credit hours in Biochemistry (BIOC) courses at the 2000 level or higher

Please note that there are prerequisite requirements for entry into upper level Biochemistry (BIOC) courses. Some non-BIOC courses such as BIOL 2020.03, BIOL 2030.03, CHEM 2401.03 and CHEM 2402.03 are required for the Biochemistry and Molecular Biology degree programs. These non-BIOC courses cannot be counted as part of the 18 credits hours in BIOC required for a minor.

Minor in Bioethics

Requirements

At least 18 credit hours and no more than 27 credit hours in Philosophy beyond the 1000 level, including at least three credit hours beyond the 2000 level.

Select at least three credit hours from the following:

- PHIL 2130.03 Logic: Deduction
- PHIL 2085.03 Reasoning Skills
- PHIL 2090.03 How to Win an Argument
- PHIL 2660.03 Logic: Understanding Scientific Reasoning

Select:

- PHIL 3105.03 Ethics

Select at least nine credit hours from the following:

- PHIL 2805.03 Ethics & Health Care: Patient Care
- PHIL 2810.03 Ethics & Health Care: Social Policy
- PHIL 2720.03 Ethics and the Good Life
- PHIL 4801.03 Topics in Ethics and Health Care

Minor in Biology

A Minor in Biology is available to all students in a 120 credit hour degree program other than Biology or Marine Biology within the College of Arts and Science. The Minor is also available to students in some other Faculties (please consult the appropriate section for your Faculty in the Undergraduate calendar).

A BSc or BA (90 credit hour) degree program with a Minor in Biology is available to students in the Faculty of Science.

Departmental Requirements

- A minimum of 18 credit hours in Biology (BIOL) courses at the 2000 level or higher

Please note that upper level Biology (BIOL) courses have prerequisite requirements.

Minor in Business

The minor in business is available to students registered in the BA, BSc 120 credit hour major and honours programs. The requirements are as for the appropriate degree program with completion of the following credit hours:

- COMM 2202.03, COMM 2303.03, COMM 2401.03, COMM 3511.03
- six credit hours in commerce at or above the 2000 level

Additionally, students are responsible for completing the following required prerequisite courses:

- COMM 1010.03, COMM 1101.03, COMM 1502.03
- ECON 1101.03, ECON 1102.03
- For BA: MATH 1115.03
- For BSc: MATH 1000.03 or MATH 1010.03 or MATH 2030.03

Minor in Canadian Studies

1000 level

- Six credit hours in French (a course in an aboriginal language may be substituted, as a transfer credit).

Required:

- CANA 2000X/Y.06: The Idea of Canada: An Introduction
- A minimum of 15 and a maximum of 21 credit hours from the list of electives. CANA 3000.03 and CANA 4000.03 may count towards this requirement.

Minor in Chemistry

A Minor in Chemistry is available to non-Chemistry students in a 120 credit hour degree program within the College of Arts and Science. The Minor is also available to students in some other Faculties (please consult the appropriate section for your Faculty in the Undergraduate calendar).

A BSc or BA (90 credit hour) degree program with a Minor in Chemistry is available to students in the Faculty of Science.

Departmental Requirements

- A minimum of 18 credit hours in Chemistry (CHEM) courses at the 2000 level or higher, not including any course that cannot be used toward a Chemistry degree

Please note that entry into upper level Chemistry (CHEM) courses requires completion of six credit hours at the first year level (CHEM 1011.03/CHEM 1012.03)

Minor in Chinese Studies

A minimum of 18 credit hours in Chinese Studies above the 1000 level. Within those 18 credit hours, students must include CHIN 2030.06, and at least six credit hours above the 2000 level.

Note: Minor degree program is available until 2015/2016 academic year.

Minor in Classical Literature

Students must take 18 credit hours from the following list:

- CLAS 2100.06 Gods, Heroes, and Monsters: Ancient Mythology
- CLAS 2515.03 Myth into Film I: the Greek World
- CLAS 2700.06 Intermediate Greek
- CLAS 2710.06 Greek Prose
- CLAS 2800.06 A Study of Latin Prose and Poetry
- CLAS 2810.06 Latin Prose
- CLAS 3515.03 Greek Tragedy
- CLAS 3516.03 Ancient Comedy
- CLAS 3525.03 Ancient Greek Epic
- CLAS 3700.06 Advanced Greek
- CLAS 3760.06 Reading and Research of Greek Texts
- CLAS 3800.06 Roman Satire
- CLAS 3810.06 A Study of Virgil
- CLAS 3820.06 Advanced Latin Literature: Augustan Poetry and Prose
- CLAS 3850.06 Reading and Research of Latin Texts

- CLAS 4710.03 Special Topics
- CLAS 4820.03 Special Topics
- CLAS 4060.03 Boethius and Prosimetrum: Poetry and Prose in the Consolation of Philosophy
- CLAS 4070.03 The Confessions in Latin
- CLAS 4100.03 Reading and Research in Latin Texts
- CLAS 4540.03 Ammianus Marcellinus and his World
- CLAS 4580.03 Reading and Research

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Minor in Classics

Students declaring a Minor in Classics will complete 18 credit hours in Classics at the 2000 level or higher.

Minor in Classics: Medieval Philosophy

Students must take 18 credit hours from the following list, including the listed language courses. The courses are to be chosen from the lists below and must include at least 9 credit hours chosen from:

- CLAS 3381.03 Medieval Philosophy from Anselm to Augustine
- CLAS 3382.03 Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- CLAS 4550.06 Medieval Interpreters of Aristotle
- ARBC 3040.03 Arabic Philosophical Texts: al-Ghazali (or CLAS 4010.03 Islamic Philosophy: al-Ghazali)
- ARBC 3050.03 Arabic Philosophical Texts: Maimonides (or CLAS 4011.03 Jewish Philosophy: Maimonides)
- CLAS 4018.03 Christian Theology in Islamic Lands: John of Damascus

Philosophy courses

- CLAS 2024.03 Philosophy and God
- CLAS 2027.03 Magic, Religion and Philosophy
- CLAS 3016.03 Meetings between Hellenism and the East to Philo the Jew
- CLAS 3017.03 Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- CLAS 3381.03 Medieval Philosophy from Anselm to Augustine
- CLAS 3382.03 Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- CLAS 3411.03 St. Augustine's Confessions I
- CLAS 3412.03 St. Augustine's Confessions II
- CLAS 3431.03 St. Augustine's On the Trinity Part I
- CLAS 3432.03 St. Augustine's On the Trinity Part II
- CLAS 3841.03 Latin Philosophical Texts: Aquinas Texts
- CLAS 3842.03 Latin Philosophical Texts: Anselm and Bonaventure Texts
- CLAS 3910.06 Neoplatonism: Plato and Neoplatonism
- CLAS 4060.03 Boethius and Prosimetrum: Poetry and Prose in the Consolation of Philosophy
- CLAS 4070.03 The Confessions in Latin
- CLAS 4400.06 Philosophy of the Church Fathers
- CLAS 4450.06 Medieval Interpreters of Aristotle
- CLAS 4500.06 Seminar on Neoplatonism
- CLAS 4602.03 Hellenistic Philosophy - From Scepticism to Neoplatonism

Not more than six credit hours in a language course may be counted towards the Minor:

- ARBC 2020.06 Intermediate Arabic
- ARBC 3030.03 Advanced Arabic I
- ARBC 3031.03 Advanced Arabic II
- CLAS 2700.06 Intermediate Greek
- CLAS 2710.06 Greek Prose
- CLAS 2800.06 Latin Prose and Poetry
- CLAS 2810.06 Latin Prose
- CLAS 2900.06 Intermediate Hebrew

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Minor in Community Design

The minor in community design is available to students registered in the BA, BSc 120 credit hour major and honours programs. The requirements are as for the appropriate degree program with completion of the following courses:

- Required credit hours: PLAN 1001.03 and PLAN 1002.03
- Elective credit hours:
24 additional credit hours from among PLAN courses (with exception of

PLAN 4001, 4002, 4050, 4100 and 4500 which are restricted to Honours BCD students). Consult the university timetable and calendar for current PLAN offerings and prerequisites.

Note: Space in community design course is limited. Students in the minor are admitted to courses only when space permits following registration of the BCD students, not all courses are offered every year. Students should plan for at least four more semesters after completing PLAN 1001 and 1002 to complete the requirements.

Minor in Computer Science

The minor in computer science is available to students registered in the BSc 120 credit hour major and honours programs. The requirements are as for the appropriate program with the completion of the following courses:

- CSCI 1100.03
- CSCI 1101.03
- CSCI 2110.03
- CSCI 2132.03
- Two of CSCI 3110.03, CSCI 3120.03, CSCI 3130.03, CSCI 3136.03 and CSCI 3171.03
- three additional CSCI credit hours at or above the 3000 level
- nine additional CSCI credit hours at or above the 2000 level

The selection of CSCI courses for a minor in computer science excludes CSCI 2100.03 and CSCI 3101.03

Minor in Contemporary Studies

Requirements

Students seeking a minor in Contemporary Studies must complete 18 credit hours in CSP. Students are required to complete at least one of the three “core” courses in CTMP (CTMP 2000.06, CTMP 3000.06, CTMP 4000.06). Students must also complete at least six credit hours at the 3000 or 4000 level (CTMP 3000.06 or CTMP 4000.06 will also fulfill this requirement), and six other credit hours at the 2000 level or above.

Minor in Early Modern Studies

Requirements

Students seeking a minor in Early Modern Studies must complete 18 credit hours in EMSP. Students are required to complete at least one of the three “core” courses in EMSP (EMSP 2000.06, EMSP 3000.06, EMSP 4000.06). Students must also complete at least six credit hours at the 3000 or 4000 level (EMSP 3000.06 or EMSP 4000.06 will also fulfill this requirement).

Minor in Earth Science

A Minor in Earth Sciences is available to non-Earth Science students in a 120 credit hour degree program within the College of Arts and Science. The Minor is also available to students in some other Faculties (please consult the appropriate section for your Faculty in the Undergraduate calendar).

A BSc or BA (90 credit hour) degree program with a Minor in Earth Sciences is available to students in the Faculty of Science.

Departmental Requirements

- six credits hours in EARTH courses at the 1000 level, including EARTH 1080.03 (Geology I)
- A minimum of 18 credit hours in Earth Sciences (EARTH) courses at the 2000 level or higher, must include at least six credit hours at the 3000 level or higher

Minor in Economics

A Minor in Economics is available to non-Economics students in a 120 credit hour degree program within the College of Arts and Science. The Minor is also available to students in some other Faculties (please consult the appropriate section for your Faculty in the Undergraduate calendar).

A BSc or BA (90 credit hour) degree program with a Minor in Economics is available to students in the Faculty of Science.

Departmental Requirements

- ECON 1101.03/1102.03
- A minimum of 18 credit hours in Economics (ECON) courses at the 2000 level or higher

Minor in English

Any 24 credit hours in English at or above the 2000 level. At least three credit hours must be 3000 level or above.

Minor in Environment, Sustainability and Society

Please see Environment, Sustainability and Society of the Faculty of Arts and Social Sciences section in this Calendar.

Minor in Environmental Science

A Minor in Environmental Science is available to non-Environmental Science students in a 120 credit hour degree program within the College of Arts and Science. The Minor is also available to students in some other Faculties (please consult the appropriate section for your Faculty in the Undergraduate calendar).

Departmental Requirements

- A minimum of 18 credit hours in Environmental Science (ENVS) courses at the 2000 level or higher

Minor in Environmental Studies

BA students must take 12 credit hours of required courses and 18 elective credit hours from the list of approved courses below. Note: In planning their programs students must take into account the prerequisites which apply to many of the elective courses listed below. The following rules apply to the selection of courses for the Minor:

- A maximum of three credit hours in the Major subject (i.e., a course beyond those required for the Major) can count instead toward the Minor.
- At least six credit hours from the Approved Electives list must be in FASS courses and at least six credit hours must be from Science Approved Electives courses.
- In addition to ENVS 3200.03, at least nine credit hours must be at the 3000 level or above.

See page 185 for requirements.

BSc students must take 18 credit hours of required courses, plus 12 credit hours from the approved list of elective courses below. Note: In planning their programs students must take into account the prerequisites which apply to many of the elective courses listed below. The following rules apply to the selection of courses for the Minor:

- No course can fulfill a requirement of both the Major or Honours subject and the Minor.
- A maximum of three credit hours in the Major/Honours subject (i.e., a course beyond those required for the Major/Honours) can count toward the Minor.
- At least three credit hours beyond the required courses must be at the 3000 level or above.

Additions to the Electives list will be made as relevant courses become available.

Required Courses:

- ENVS 1000.06: Intro to Environmental Science OR Dalhousie Integrated Science Program, SCIE 1515.36, 1520.30, 1530.03, 1540.27
- PHIL 2480.03: Environmental Ethics
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3200.03: Introduction to Environmental Law

Electives (12 credit hours from the list)

- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction to the Marine Life of Nova Scotia
- BIOL 3063.03: Resource Ecology
- BIOL 3225.03: Plants in the Human Landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3xxx.03: Any ecology-related course at 3000-level or above
- BIOL 4065.03: Sustainability and Global Change
- BIOL 4104.03: Environmental Microbiology
- BIOL 4160.03: Political Ecology
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- CHEM 4595.03: Atmospheric Chemistry
- CTMP 3210.03: Intersecting Bodies, Selves and Environment
- CTMP 3220.03: The Aesthetics of Nature
- EARTH 2203.03: Sediments and Sedimentary Rocks
- EARTH 2410.03: Environmental and Resource Geology I
- EARTH 3302.03: Quaternary Sedimentary Environments
- EARTH 3400.03: Fundamentals of Hydrogeology
- EARTH 3402.03: Practical Hydrogeology
- EARTH 3410.03: Environmental Geology 2

- EARTH 3420.03: Geochemistry of Aquatic Environments
- EARTH 3440.03: Geomorphology
- EARTH 3500.03: Geoscience Information Management
- EARTH 4450.03: Introduction to Landscape Simulation
- EARTH 4502.03: Micropaleontology and Global Change
- EARTH 4520.03: GIS Applications to Environmental and Geological Sciences
- EARTH 4530.03: Environmental Remote Sensing
- ECON 2210.03: Emerging Giants: the Economic Rise of China and India
- ECON 2216.03: Economics of Global Warming
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ENVS 2100.03: Environmental Informatics
- ENVS 3000.03: Environmental Science Internship
- ENVS 4210.03: Administrative Environmental Law: Natural Justice and Unnatural Acts
- ENVS 3220.03: International Law for Environmental Scientists
- ENVS 3225.03: Plants in the Human Landscapes
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3301.03: Enterprise Sustainability
- ENVS 3400.03: Human Health and Sustainability
- ENVS 3500.03: Geoscience Information Management
- ENVS 3615.03: Methods in Ecology
- ENVS 3632.03: Applied Field Methods in Fish Ecology
- ENVS 3801.03: Directed Readings in Environmental Science
- ENVS 4001.03: Environmental Impact Assessment
- GEOG 2800.03: Climate Change
- HIST 3370.03: North American Landscapes
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- INTD 3304.03: Sustainable Development in Cuba
- MICI 4104.03: Environmental Microbiology
- OCEA 2000.06: The Blue Planet
- OCEA 2800.03: Climate Change
- OCEA 4110.03: Introduction to Geological Oceanography
- OCEA 4120.03: Introduction to Physical Oceanography
- OCEA 4130.03: Introduction to Chemical Oceanography
- OCEA 4140.03: Introduction to Biological Oceanography
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2485.03: Technology and the Environment
- PHYC 2310.03: Energy and the Environment
- PHYC 2451.03: Astronomy I: The Sky and Planets
- PHYC 2800.03: Climate Change
- PLAN 2001.03: Landscape Analysis
- PLAN 3001.03: Landscape Ecology
- PLAN 3002.03: Reading the City
- PLAN 3005.03: Cities and the Environment in History
- PLAN 3010.03: Urban Ecology
- PLAN 3020.03: Landscape Design
- PLAN 4106.03: Transportation Planning
- POLI 3380.03: Politics of Climate Change
- POLI 3385.03: Politics of the Environment
- POLI 3589.03: Politics of the Sea I
- POLI 3590.03: Politics of the Sea II
- SOSA 2100.06: Environment and Culture
- SOSA 3211.03: Continuity and Change in Rural Society
- SOSA 3220.03: Coastal Communities in the North Atlantic

Minor in Film Studies

From its inception, cinema has had a significant impact upon the way humans represent and understand the world around them. Whether created within an entertainment, experimental, documentary or scientific framework, moving images have altered modern perceptions of reality. The Film Studies Minor program - offered between Dalhousie, the Nova Scotia College of Art and Design, St. Mary's University, and the University of King's College - offers students an opportunity to become familiar with the history of film making, the language employed in the discourses of film, as well as the various methodologies and forms of categorization applied to related fields of study within film culture.

Courses within the core program survey the history of film from the late nineteenth century to the present day and introduce students to various aspects of film theory and criticism. Courses at the intermediate and advanced level provide opportunities to study specific genres, directors, national cinemas as well as interdisciplinary topics: narration and narrative in fiction and film, feminist film practices, music and film.

This is an inter-University program that allows students to obtain credit hours from any of the participating institutions.

Core Requirements

Students must complete one and a half credits of core courses, including:

- DAL THEA 2301.03: Film History I 0.5 credits or NSCAD AHIS 2800: Film History and Criticism 1890 - 1940 0.5 credits
- DAL THEA 3301.03: Film History II 0.5 credits or NSCAD AHIS 2810.03: Film History and Criticism 1940 - Present 0.5 credits
- DAL THEA 2311.03: Film Analysis 0.5 credits or SMU ENGL 2511: Reading Film 0.5 credits

* Students are strongly advised to take the core courses as soon as they declare their film minor.

Elective Requirements

Students must complete two and a half credits from the following list of courses, including at least one and a half credits at the 3000 level or above:

- DAL CHIN 3050.03/THEA 3350.03: Topics in Asian Cinema 0.5 credits
- DAL CTMP 3304.03/GWST 3304.03/JOUR 3304.03: Through Her Eyes: Women and the Documentary Tradition 0.5 credits
- DAL CTMP 3305.03: Modern Film and the Theory of the Gaze 0.5 credits
- DAL ENGL 2095.03: Narrative in the Cinema 0.5 credits
- DAL ENGL 3300.03: TV: Theory and Criticism 0.5 credits
- DAL ENGL 3314.03/THEA 3314.03: Shakespeare and his Contemporaries on Film 0.5 credits
- DAL FREN 2800.03: Cinema: The French Phenomenon I 0.5 credits
- DAL FREN 2801.03: Cinema: The French Phenomenon II 0.5 credits
- DAL GERM 2040.03: Monsters and Madness in 20th Century German Film 0.5 credits
- DAL GWST 3304.03/CTMP 3304.03/JOUR 3304.03: Through Her Eyes: Women and the Documentary Tradition 0.5 credits
- DAL GWST 3331.03/THEA 3331.03: Film Theory II: Desire in Cinema 0.5 credits
- DAL ITAL 2600.03/THEA 2314.03: Survey of Italian Cinema 0.5 credits
- DAL ITAL 3500.03: Topics in Italian Culture: Italian Neorealist Cinema 0.5 credits
- DAL ITAL 3600.03: Italian National Cinema: The New Wave 0.5 credits
- DAL JOUR 3304.03/CTMP 3304.03/ GWST 3304.03: Through Her Eyes: Women and the Documentary Tradition 0.5 credits
- DAL MUSC 2016.03: Topics in Music and Cinema 0.5 credits
- DAL MUSC 2017.03: Music and Cinema: Composer/Director Collaborations 0.5 credits
- DAL RUSN 2036.03/THEA 2336.03: Russian Film I 0.5 credits
- DAL RUSN 2037.03/THEA 2337.03: Russian Film II 0.5 credits
- DAL RUSN 2046.03/THEA 2346.03: East European Cinema: War, Love, and Revolutions 0.5 credits
- DAL THEA 3314.03/ENGL 3314.03: Shakespeare and his Contemporaries on Film 0.5 credits
- DAL THEA 2314.03/ITAL 2600.03: Survey of Italian Cinema 0.5 credits
- DAL THEA 2336.03/RUSN 2036.03: Russian Film I 0.5 credits
- DAL THEA 2337.03/RUSN 2037.03: Russian Film II 0.5 credits
- DAL THEA 2346.03/RUSN 2046.03: East European Cinema: War, Love, and Revolutions 0.5 credits
- DAL THEA 2360.03: Popular Cinema 0.5 credits
- DAL THEA 2911.03: Stars and Stardom on Stage and Screen
- DAL THEA 3313.03: Documentary, Experimental and Animated Film 0.5 credits
- DAL THEA 3330.03: Film Theory I 0.5 credits
- DAL THEA 3331.03/GWST 3331.03: Film Theory II: Desire in Cinema 0.5 credits
- DAL THEA 3350.03/CHIN 3050.03: Topics in Asian Cinema 0.5 credits
- DAL THEA 3351.03: The Cinema of David Lynch .05 credits
- DAL THEA 4390.03: Special Topics in Film studies 0.5 credits
- DAL THEA 4391.03: Special Topics in Popular Cinema 0.5 credits
- NSCAD AHIS 3822: Topics in Film History: Hitchcock's Films 0.5 credits

- NSCAD AHIS 3826: Topics in Film History: Film Noir and Neo-Noir 0.5 credits
- NSCAD AHIS 3832: Topics in Film History: Canadian Cinema 0.5 credits
- NSCAD AHIS 3835: Topics in Film History: Contemporary Cinemas of Globalization 0.5 credits
- NSCAD AHIS 3836: Topics in Film History: Subjectivities in Moving Pictures 0.5 credits
- NSCAD AHIS 3837: Topics in Film History: Out on Screen 0.5 credits
- NSCAD AHIS 3850: History and Criticism of Documentary Film 0.5 credits
- SMU ACST 3305: Moving Images of Atlantic Canada 0.5 credits
- SMU ENGL 3313: Narrative in Fiction and Film 1 credit
- SMU RELS 3356: Religions and Film 0.5 credits
- SMU ENGL 3511: Film and the City 0.5 credits
- SMU ENGL 2325: The Media in Everyday Life 0.5 credits
- SMU ENGL 3826: Contemporary Canadian Film and Television 0.5 credits
- SMU HIST 3450: Film and History 0.5 credits
- SMU SOSI 3346/CRIM 3303: Crime and the Media 0.5 credits
- SMU SOSI 4452: Atlantic Canadian Film and Television

Minor in Food Science

The Minor in Food Science is available to students registered in the BSc 120 Credit Hour Major and Honours programs.

Requirements

The requirements are as for the appropriate program with the completion of the following courses to fulfill the Food Science Minor:

- FOSC 1000.03: Concepts in Food Science
- 48 credit hours from the following list:
 - BIOE 3051.03: Principles of Food Engineering
 - BIOE 3241.03: Industrial Biotechnology
 - CPST 2000.03: Technical Communication
 - CPST 3030.03: Engineering in Society II
 - ENVE 3000.03: Fundamentals of Environmental Engineering
 - FOSC 2010.03: Food Commodities
 - FOSC 3010.03: Food Chemistry
 - FOSC 3020.03: Food Analysis
 - FOSC 3030.03: Food Quality Assurance
 - FOSC 3070.03: Food Processing
 - FOSC 3080.03: Food Microbiology
 - FOSC 4020.03: Chemistry - Fats, Oils, Lipids
 - FOSC 4030.03: Food Product Development
 - FOSC 4081.03: Brewing Science
 - FOSC 4091.03: Food Safety and Biotechnology
 - FOSC 4500.03: Seminar in Food Science
 - FOSC 4250.03: Food Product Development Project
 - HPRO 2250.03: Interdisciplinary Class in Human Nutrition
 - Other electives as approved by the Food Science Coordinator

Minor in French

Intended to allow for a level of specialization in French in addition to students' major degree program(s). Cannot be combined with a major or honours in French.

Requirements

- 18 credit hours above the 1000 level, including FREN 2045X/Y.06
- Among those 18 credit hours, six credit hours must be above the 2000 level
- Courses given in English and FREN 2005X/Y.06 are not admissible

French courses may also be counted towards the Certificate in Intercultural Communication. Students may, in addition or instead, be interested in the Minor in European Studies and/or Minor in Medieval Studies; each French course at the 2000 level and above may only count toward one major/minor/honours.

Minor in Gender and Women's Studies

The BA (90 credit hour) option permits a wide range of choice in course selection. A three year degree in Gender and Women's Studies can prepare a student for work in the occupational areas described above, or it can be used as a preparatory degree for professional programs such as Law and Social Work.

The minor may also be added within other 120 credit hour degree programs.

Departmental Requirements

- 18 credit hours beyond the 1000 level in Gender and Women's Studies
- At least three different disciplines shall be represented in a student's selection of cross-listed Gender and Women's Studies courses

Minor in Geography

The minor in Geography is available to students registered in the BA, BSc or BCD (120 credit hour) degree programs. To fulfill the requirements for a Minor in Geography, students must complete the following:

- GEOG 1030.03: Introduction to Physical Geography (cross-listing EARTH 1030.03)
- GEOG 1035.03: Introduction to Human Geography
- GEOG 2000.03: Cartography

Additional seven half credits from the following list: at least four of which must be at the 3000 level or higher.

NOTE: Students in the BCD program may not select PLAN cross-listed courses that are required courses for their degree program

- GEOG 2001.03: Landscape analysis (cross-listing: PLAN 2001.03)
- GEOG 2006.03: Space, Place, and Geographic Information Systems (cross-listing: PLAN 2006.03)
- GEOG 2070.03: Area Studies on Mexico and Central America (cross-listing HIST 2070.03)
- GEOG 2100X/Y.06: Environment and Culture (cross-listing: SOSA 2100.06)
- GEOG 2201.03: Introduction to Development (cross-listing: INTD 2001.03)
- GEOG 2202.03: Introduction to Development II (cross-listing INTD 2002.03)
- GEOG 2206.03: Africa: An Introduction (cross-listing INTD 2106.03)
- GEOG 2336.03: Regional Development (cross-listing ECON 2336.03)
- GEOG 2800.03: Climate Change (cross-listing PHYC 2800.03)
- GEOG 3001.03: Landscape Ecology (cross-listing PLAN 3001.03)
- GEOG 3002.03: Reading the City (cross-listing PLAN 3002.03)
- GEOG 3005.03: Cities and the Environment (cross-listing PLAN 3005.03)
- GEOG 3006.03: Reading the Landscape (cross-listing PLAN 3006.03)
- GEOG 3110.03: Migration and Development (cross-listing INTD 3110.03)
- GEOG 3114.03: Environment and Development (cross-listing INTD 3114.03)
- GEOG 3165.03: Peoples and Cultures of the World: Selected Area Studies (cross-listing SOSA 3165)
- GEOG 3210.03: Canadian Cultural Landscapes (cross-listing HIST 3210.03 and CANA 3020.03)
- GEOG 3220.03: Coastal Communities in the North Atlantic (cross-listing SOSA 3220.03)
- GEOG 3284.03: Living in cities (cross-listing SOSA 3284.03)
- GEOG 3370.03: North American Landscapes (cross-listing HIST 3370.03)
- GEOG 3400.03: Human Health and Sustainability (cross-listing ENVS 3400.03)
- GEOG 3440.03: Geomorphology (cross-listing EARTH 3440)
- GEOG 3500.03: Exploring Geographic Information Systems (cross-listing EARTH 3500, ENVS 3500, EARTH 5600)
- GEOG 3633.03: Spatial Information and GIS in Ecology (cross-listing ENVS 3633.03, BIOL 3633.03)
- GEOG 4440.03: Geomorphology and Landscape Evolution (cross-listing EARTH 4440.03)
- GEOG 4450.03: Introduction to Landscape Simulation (cross-listing EARTH 4450.03)
- GEOG 4520.03: GIS Applications to Environmental and Geological Sciences (cross-listing EARTH 4520.03)
- GEOG 4530.03: Environmental Remote Sensing (cross-listing EARTH 4530.03)

Minor in German

Students must complete 18 credit hours selected from courses taught in German beyond the 1000 level, at least six of which must be at the 3000 level or higher.

Minor in German Philosophy

Students must complete 18 credit hours beyond the 1000 level from the following list:

- GERM 2290.03
- GERM 2450.06
- GERM 2551.03
- GERM 2600.03
- GERM 2601.03
- GERM 2650.06
- GERM 3100.06
- GERM 3120.03
- GERM 3450.03
- GERM 3550.03
- GERM 4100.06

- GERM 4200.06
- GERM 4250.06
- PHIL 3635.03
- PHIL 4190.03
- PHIL 2650.06
- PHIL 3630.03
- PHIL 3635.03

Other courses may be possible with departmental approval.

Students must take nine credit hours from the German Department and nine credit hours from the Philosophy department.

Minor in German Studies

Students must complete 24 credit hours beyond the 1000 level. Required: GERM 2000.06

Minor in Health Studies

The minor in health studies is available to students registered in the BA or BSc 120 credit hour major and honours programs. The requirements are as for appropriate degree program including 24 credit hours as described in Health Studies. To count towards the minor, a minimum grade of B- is required.

Minor in Hispanic Cultures

Requirements

- SPAN 2100.03
- SPAN 2200.03

And any 12 credit hours from:

- SPAN 2040.03
- SPAN 2069.03
- SPAN 2070.03
- SPAN 2105.03
- SPAN 2109.03
- SPAN 2110.03
- SPAN 2130.03
- SPAN 2150.03
- SPAN 3095.03

Minor in Hispanic Literature

Requirements

- SPAN 2020X/Y.06
- SPAN 2090.03
- SPAN 2500.03
- SPAN 2510.03
- SPAN 3215.03 or SPAN 3510.03
- SPAN 3500.03 or SPAN 3525.03

Minor in History

- At least 18 and not more than 27 credit hours in History, beyond the 1000 level.
- At least 12 of these credit hours must be above the 2000 level.

Minor in History of Science and Technology

The Minor in HOST can be combined with any type of BA or BSc program (eg. Major, Double-Major, Honours) offered by the Faculties of Science or Arts and Social Sciences at Dalhousie. If you are a Dalhousie student and include a Minor in HOST in your studies, your degree is granted by Dalhousie University and the University of King's College or by Dalhousie in association with King's.

Including a Minor in HOST with your degree is an indication of a more limited specialization in this field than the Combined Honours. Although it does not have the same academic stature as the Combined Honours degree, it nevertheless will be a valuable enrichment to your transcript, and will indicate your willingness to diversify your studies and to tackle subject matter that crosses the "two cultures" divide between the sciences and the humanities.

The course requirements for the Minor in HOST are as follows:

1. Any one of the following courses:
 - HSTC 2000.06
 - HSTC 3000.06
 - HSTC 4000.06
 - HSTC 2200.06 (or cross listed as SCIE 2000, HIST 2074 and BIOL 3503)
2. Any other 12 credit hours selected from HSTC courses (or cross listed with HSTC courses) numbered 2000 or above.

Minor in International Development Studies

Advanced Courses Required:

- INTD 2001.03/2002.03
- INTD 3002.03 or 3003.03
- six credit hours of INTD and/or IDS approved courses at the 2000 level or above.
- three credit hours at the 3000 level or above.

In total, 18 credit hours in IDS are required

Minor in Italian Studies

18 credit hours in Italian Studies above the 1000 level, including:

- ITAL 2010.06 (Intermediate Italian)
- At least one of ITAL 3010.06, ITAL 3200.03, ITAL 3300.03, ITAL 3500.03, ITAL 3600.03, ITAL 3700.03, ITAL 4010.03, ITAL 4020.03, ITAL 4040.03.

Minor in Journalism Studies

Faculty of Arts

Dalhousie and King's students may take a Minor in Journalism Studies as part of a four-year major or honours Arts degree. The goal of the Minor in Journalism Studies is to introduce students to journalism and to basic journalistic methods and theory. Students who wish to take a Minor in Journalism Studies must meet the requirements for the major or honours program in their chosen discipline and successfully complete 24 credit hours in Journalism, including JOUR 1001.06 and JOUR 2000.03 and 15 credit hours in electives.

Core Requirements

- JOUR 1001.06 Foundations of Journalism
- JOUR 2000.03 Basic Reporting Techniques

Elective Requirements

Students must complete 15 credit hours in electives from the list below:

- JOUR 2004.03 Introduction to Radio
- JOUR 2400.03 Science and the Media
- JOUR 3003.03 Introduction to Video Reporting JOUR 3005.03 Broadcast Reporting JOUR 3122.03 Ethics of Journalism JOUR 3304.03 Through Her Eyes: Women and the Documentary Tradition JOUR 3333.03 News Media & the Courts in Canada JOUR 3440.03 Creative Non-fiction JOUR 3441.03 Advanced Creative Non-fiction JOUR 3540.03 Feature Writing JOUR 3542.03 Business Reporting for Journalists JOUR 3550.03 Copy Editing JOUR 3557.03 Intro to Online Journalism JOUR 3560.03 Great Journalists JOUR 3660.03 Photojournalism

Faculty of Science

Dalhousie and King's students may take a Minor in Journalism Studies as part of a four-year major or honours Science degree. The goal of the Minor in Journalism Studies is to introduce students to journalism and to basic journalistic methods and theory. Students who wish to take a Minor in Journalism Studies must meet the requirements for the major or honours program in their chosen discipline and successfully complete 24 credit hours in Journalism, including JOUR 1001.06, JOUR 2000.03 and JOUR 2400.03 and 12 credit hours in electives.

Core Requirements

- JOUR 1001.06 Foundations of Journalism
- JOUR 2000.03 Basic Reporting Techniques
- JOUR 2400.03 Science and the Media

Elective Requirements

Students must complete 12 credit hours in electives from the list below:

- JOUR 2004.03 Introduction to Radio
- JOUR 3003.03 Introduction to Video Reporting JOUR 3005.03 Broadcast Reporting JOUR 3122.03 Ethics of Journalism JOUR 3304.03 Through Her Eyes: Women and the Documentary Tradition JOUR 3333.03 News Media & the Courts in Canada JOUR 3440.03 Creative Non-fiction JOUR 3441.03 Advanced Creative Non-fiction JOUR 3540.03 Feature Writing JOUR 3542.03 Business Reporting for Journalists JOUR 3550.03 Copy Editing JOUR 3557.03 Intro to Online Journalism JOUR 3560.03 Great Journalists JOUR 3660.03 Photojournalism

Minor in Latin American Studies

Requirements

Students seeking a minor in Latin American Studies will be expected to complete SPAN 2020X/Y.06, plus six credit hours from list A and 12 credit hours from list B. At least three credit hours must be at the 3000 level or above.

List A: six credit hours/any two of the following:

- SPAN 2069.03
- SPAN 2070.03
- SPAN 2109.03
- SPAN 2110.03
- SPAN 2130.03
- SPAN 2200.03
- SPAN 2510.03
- SPAN 3510.03

List B: 12 credit hours from the following:

- HIST 2381.03
- HIST 2386.03
- HIST 3390.03
- HIST 4300.03
- INTD 3302.03
- INTD 3303.03
- INTD 3304.03
- INTD 3310.06
- INTD 3401.03
- POLI 3360.03
- SOSA 3168.03 (or Xlist code GWST 3168.03)

Minor in Law and Society

The minor in law and society is available to students registered in the BA and BSc 120 credit hour major and honours programs. The requirements are as for the appropriate degree program with completion of the following courses:

- LAWS 2500X/Y.06 (with a minimum grade of B-)
- The equivalent of 18 credit hours from the list of approved courses. See Law and Society (FASS) for further details. To count towards the minor, a minimum grade of B- is required.

Minor in Management

The minor in Management is available to students registered in all BA, BSc 120 credit hour Major and Honours programs. The requirements are as for the appropriate degree program, with the following credit hours:

- MGMT 1000.03 and MGMT 1001.03 (Managing Organizational Issues 1 and 2)
- ECON 1101.03 and ECON 1102.03 (Microeconomics and Macroeconomics)
- MGMT 1501.03 (Statistics for Managers)
- nine credit hours chosen from:
 - MGMT 2101.03 (Financial Accounting)
 - MGMT 2303.03 (People, Work and Organizations 1)
 - MGMT 2401.03 (Introduction to Marketing)
 - MGMT 2801.03 (Government Structure)
 - MGMT 2601.03 (Knowledge Management)
 - MGMT 2702.03 (Resource and Environmental Management)
- 12 credit hours above the 2000 level in MGMT.

Please note that some MGMT courses have additional prerequisite requirements.

Minor in Marine Biology

A Minor in Marine Biology is available to all students in a 120 credit hour degree program other than Marine Biology within the College of Arts and Science. The Minor is also available to students in some other Faculties (please consult the appropriate section for your Faculty in the Undergraduate calendar).

Departmental Requirements

- A minimum of 18 credit hours in Marine Biology (MARI) courses at the 2000 level or higher

Minor in Mathematics

A Minor in Mathematics is available to all students in a 120 credit hour degree program other than Mathematics within the College of Arts and Science. The Minor is also available to students in some other Faculties (please consult the appropriate section for your Faculty in the Undergraduate calendar).

A BSc (90 credit hour) degree program with a Minor in Mathematics is available to students in the Faculty of Science.

Departmental Requirements

- MATH 1000.03/MATH 1010.03 OR MATH 1500.06X/Y
- MATH 2001
- MATH 2030
- MATH 2120

- nine additional MATH credit hours at or above the 2000 level

Minor in Medieval Studies

Students seeking an interdisciplinary minor in Medieval Studies will be expected to take 24 credit hours beyond the 1000 level, including six credit hours in a language course at or above the 2000 level, with at least 12 credit hours at or above the 3000 level, and with courses taken from at least two of the participating departments or programs.

Requirements:

Language work - six credit hours in one of the following languages at or above the 2000 level: Arabic, Latin, Greek, French, German, Italian, or Spanish. Courses treating texts in translation do not count. For languages other than Latin and Greek, courses taught in English do not count.

And any 18 credit hours selected from the course list below; within these 18 credit hours, courses must be taken from at least two of the participating departments or programs.

- CLAS 2282.03 Catholicism
- CLAS 3019.03 Meetings between Hellenism, Judaism, Christianity and Islam until the Renaissance
- CLAS 3381.03 Medieval Philosophy from Augustine to Anselm
- CLAS 3382.03 Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- CLAS 3411.03 St. Augustine's *Confessions* Books 1-9
- CLAS 3412.03 St. Augustine's *Confessions* Books 10-13
- CLAS 3431.03 St. Augustine's *On the Trinity* Part 1
- CLAS 3432.03 St. Augustine's *On the Trinity* Part 2
- CLAS 3840X/Y.06 Latin Philosophical Texts
- CLAS 3841.03 Latin Philosophical Texts: Aquinas
- CLAS 3842.03 Latin Philosophical Texts: Anselm and Bonaventure
- CLAS 3910X/Y.06 Neoplatonism: Plato and Neoplatonism
- CLAS 4400X/Y.06 Philosophy of the Church Fathers
- CLAS 4450X/Y.06 Medieval Interpreters of Aristotle
- CLAS 4060.03 Boethius and Prosimetrum: Poetry and Prose in the Consolation of Philosophy
- ENGL 2018.03 Arthur
- ENGL 2020.03 Sampling Medieval Literature
- ENGL 3005.03 Canterbury Tales
- ENGL 3007.03 Old English
- ENGL 3203.03 History of the English Language
- ENGL 3008.03 Nordic Saga

Some 4000 level seminars may be counted where content is appropriate (eg Medieval Romance, Medieval Outlaws); check with advisor.

- FREN 3300.03 Medieval French Literature
- FREN 4001.03 Histoire du francais - Moyen Age/History of French - The Middle Ages

- MUSC 4358.03 Studies in Medieval Music (topics vary; check with advisor)
- MUSC 4359.03 Studies in Medieval Music (topics vary; check with advisor)
- RELS 4010.03 Islamic Philosophy: al-Ghazali

- RELS 4011.03 Jewish Philosophy: Maimonides

Minor in Microbiology and Immunology

A Minor in Microbiology and Immunology is available to non-Microbiology students in a 120 credit hour degree program within the College of Arts and Science. The Minor is also available to students in some other Faculties (please consult the appropriate section for your Faculty in the Undergraduate calendar).

Departmental Requirements

- MICI 2100.03
- A minimum of 15 additional credit hours in Microbiology (MICI) courses at the 2000 level or higher

Please note that there are prerequisite requirements for entry into upper level Microbiology (MICI) courses, including BIOL 2020 and BIOL 2030, CHEM 2401 and CHEM 2402 (or CHEM 2441).

Minor in Middle East Studies

Students minoring in Middle East Studies select 18 credit hours from the list below. Student are required to take one of the following: HIST 2502, HIST 2503, HIST 2504, RELS 2001 or RELS 2003. At least three credit hours must be at the 3000 or 4000 level. Please note that not all courses are offered each year.

Second Year

- ARBC 2020 X/Y: Intermediate Arabic
- ARBC 2100: A Cultural Introduction to the Arab World (HIST 2500, RELS 2053)
- CLAS 2100: Ancient Mythology
- CLAS 2216: Alexander the Great (HIST 2089)
- CLAS 2220: Ancient Israel (HIST 2520, RELS 2220)
- CLAS 2281: The Orthodox and Oriental Churches
- CLAS 2900 X/Y: Intermediate Hebrew
- HIST 2502: The Ottoman Empire
- HIST 2503: Classical and Medieval History of Islamic Civilization (RELS 2503)
- HIST 2504: History of the Modern Middle East
- HIST 2505: Modern History of Iraq
- RELS 2001: Judaism
- RELS 2003: Islam
- RELS 2008: Science and Medicine in Islamic Societies, 750-1500

Third Year

- ARBC 3030: Advanced Arabic
- ARBC 3031: Advanced Arabic II (Readings)
- ARBC 3040: Arabic Philosophical Texts (al-Ghazali)
- ARBC 3050: Arabic Philosophical Texts (Maimonides)
- ARBC 3100: Arabic Pre Islamic Poetry
- CLAS 3016: Meetings between Hellenism and the East to Philo the Jew (HIST 3016, RELS 3018)
- CLAS 3017: Meetings between Hellenism, Judaism, Christianity and Islam (HIST 3017, RELS 3019)
- CLAS 3021: Ancient Art and Architecture
- CLAS 3382: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- CLAS 3501: Herodotus
- CLAS 3502: Thucydides and the Greek World at War (HIST 3502)
- HIST 3509: Arab Caliphs, Turkish Commanders, Persian Viziers, 750-1200 (CLAS 3601)
- HIST 3510: Sultans and Shahs, 1500-1800 (RELS 3510)
- HIST 3511: Ancient and Medieval History of the Persianate World (CLAS 3602)

- HIST 3513: From Cairo to Capetown
- HIST 3515: Food for Thought
- RELS 3001: Islam and Others
- RELS 3009: Christianity in the Lands of Islam
- RELS 3012: Sufism

Fourth Year

- CLAS 4011: Jewish Philosophy: Maimonides (RELS 4011)
- CLAS 4018: John of Damascus (RELS 4018)
- CLAS 4019: Philo Judaeus
- CLAS 4110 X/Y: Rome and the East
- CLAS 4525 X/Y: The World of Herodotus

- HIST 4510: Topics in Middle Eastern and Islamic History
- HIST 4545: Scripture and Statecraft: History of Islamic Political Thought
- HIST 4550: Orientalism and Occidentalism
- HIST 4555: Arab Intellectuals and their Ideologies in the Modern Period
- RELS 4010: Islamic Philosophy: al-Ghazali

Minor in Music

Students must complete 18 credit hours in Music beyond the 1000 level. The following courses may not be used to count toward this degree: MUSC 2007.06, MUSC 2022.06, MUSC 2130.06, MUSC 3130.06.

Minor in Musicology

Students must complete 18 credit hours in Musicology courses as follows:

- MUSC 2352.03: Music History III
- six credit hours chosen from
 - MUSC 2016.03: Topics in Music and Cinema
 - MUSC 2018.03: Popular Music until 1960
 - MUSC 2019.03: The Rock 'n' Roll Era and Beyond
 - MUSC 2020.03: The History of Jazz
 - MUSC 2353.03: Music History IV: Focused Study
 - MUSC 3066.03: Women, Gender and Music
 - MUSC 3314.03: History of Opera
- nine credit hours chosen from 4000 level Musicology seminars as listed below:
 - MUSC 3066.03: Women, Gender and Music
 - MUSC 3314.03: History of Opera
 - MUSC 4353.03: Music since 1945
 - MUSC 4354.03: Popular Music Analysis
 - MUSC 4355.03: Narrative Strategies
 - MUSC 4356.03: Opera Studies
 - MUSC 4358.03/4359.03: Studies in Medieval Music
 - MUSC 4360.06: Advanced Seminar in Baroque Culture
 - MUSC 4361.03/4365.03: Topics in Musicology I
 - MUSC 4362.03: Topics in Canadian Music
 - MUSC 4363.03/4367.03: Topics in Musicology II
 - MUSC 4380.03/4381.03: Selected Composer Studies

Minor in Neuroscience

A Minor in Neuroscience is available to students in a 120 credit hour degree program other than Neuroscience or Psychology within the College of Arts and Science. The Minor is also available to students in some other Faculties (please consult the appropriate section for your Faculty in the Undergraduate calendar).

Departmental Requirements

- A minimum of 18 credit hours in Neuroscience (NESC) courses at the 2000 level or higher, excluding NESC 2007.03, which is available only to students in a Major/Honours program.

Minor in Ocean Sciences

A Minor in Ocean Sciences is available to students in a 120 credit hour degree program other than Ocean Sciences within the College of Arts and Science. The Minor is also available to students in some other Faculties (please consult the appropriate section for your Faculty in the Undergraduate calendar).

Departmental Requirements

- A minimum of 18 credit hours in Ocean Sciences (OCEA) courses at the 2000 level or higher.

Please note that there are prerequisite requirements for entry into upper level Ocean Sciences courses (see Department of Oceanography course listings).

Minor in Philosophy

Requirements

At least 18 credit hours and no more than 27 credit hours in Philosophy beyond the 1000 level, including at least three credit hours beyond the 2000 level. Select at least three credit hours from the following:

- PHIL 2130.03 Logic: Deduction
- PHIL 2085.03 Reasoning Skills
- PHIL 2090.03 How to Win an Argument
- PHIL 2660.03 Logic: Understanding Scientific Reasoning

Minor in Physics

A Minor in Physics is available to students in a 120 credit hour degree program other than Physics within the College of Arts and Science. The Minor is also available to students in some other Faculties (please consult the appropriate section for your Faculty in the Undergraduate calendar).

Departmental Requirements

- A minimum of 18 credit hours in Physics (PHYC) courses at the 2000 level or higher.

Please note that there are prerequisite requirements for entry into upper level Physics courses (see Department of Physics and Atmospheric Science course listings).

Minor in Political Science

A minimum of 18 credit hours in Political Science is required.

Minor in Popular Culture Studies

Students seeking a minor in Popular Culture Studies will be expected to take 21 credit hours beyond the 1000 level, with six credit hours at or above the 3000 level, and with no more than nine credit hours taken in a single department.

Appropriate courses can be chosen from the following list.

- 15 credit hours from:
 - CTMP 2336/CHIN 2052.03: East Meets West in Popular Culture
 - EMSP 2313: The Vampire
 - EMSP 2320: Witchcraft in Early Modern Europe
 - EMSP 2480: The Pirate and Piracy
 - ENGL 2006: Cultural Studies
 - ENGL 2080: Cartoons & Comics
 - ENGL 2095: Narrative in the Cinema
 - ENGL 2231: Foundations of Science Fiction
 - ENGL 2232: Contemporary Science Fiction
 - ENGL 2235: Tolkien: Fantasy & Medievalism
 - HSTC 2500: Science Fiction in Film
 - MUSC 2016: Topics in Music and Cinema
 - MUSC 2018: Popular Music Until 1960
 - MUSC 2019: The Rock'n'Roll Era and Beyond
 - MUSC 2020: The History of Jazz
 - THEA 2360: Popular Cinema
- six credit hours from:
 - CTMP 3322: Representations of the Holocaust: Remembrance
 - CTMP 3305: Modern Film and the Theory of the Gaze
 - ENGL 3300: TV: Theory & Criticism
 - ENGL 3301: Graphic Novels
 - FREN 3750: Littérature industrielle, roman populaire et roman de consommation. - Popular Literature and the Rise of Mass Culture
 - FREN 3730: La bande dessinée franco-belge - The Franco-Belgian Comic Strip
 - JOUR 3560: Great Journalists

 - THEA 2400X/Y: Cave to Café: Costume and Identity from Antiquity to 1700
 - THEA 2911: Stars and Stardom on Stage and Screen
 - THEA 3912: Gender Theory and Contemporary Performance
 - THEA 4391: Special Topics in Popular Cinema

Minor in Psychology

A Minor in Psychology is available to students in a 120 credit hour degree program other than Neuroscience or Psychology within the College of Arts and Science. The Minor is also available to students in some other Faculties (please consult the appropriate section for your Faculty in the Undergraduate calendar).

A BSc or BA (90 credit hour) degree program with a Minor in Psychology is available to students in the Faculty of Science.

Departmental Requirements

- A minimum of 18 credit hours in Psychology (PSYO) courses at the 2000 level or higher, other than PSYO 2000.03 and PSYO 2501.03, which are restricted to students in a Major/Honours program

Please note that entry into upper level Psychology (PSYO) courses requires completion of six credit hours with a minimum grade of B- at the first year level (PSYO 1011.03 or PSYO 1021.03) and (PSYO 1012.03 or PSYO 1022.03) or Integrated Science (SCIE 1515.36 or SCIE 1520.30 or SCIE 1530.27 or SCIE 1540.27) or equivalent.

Minor in Russian Studies

Students must complete 18 credit hours above the 1000 level.

Nine credit hours in Russian language, chosen from:

- RUSN 2002.03
- RUSN 2003.03

- RUSN 3002.03
- RUSN 3003.03
- RUSN 4000.06

AND

- RUSN 2022.03 or RUSN 2023.03
- RUSN 2051.03 or RUSN 2052.03

AND

three more credit hours in Russian film, literature, or history above the 1000 level chosen from:

- RUSN 2036.03
- RUSN 2037.03
- RUSN 2046.03
- RUSN 2061.03
- RUSN 2062.03
- RUSN 2070.03
- RUSN 2081.03
- RUSN 2151.03
- RUSN 2191.03
- RUSN 2270.03
- RUSN 2500.03
- RUSN 2750.03
- RUSN 2760.03
- RUSN 3090.03
- RUSN 3092.03
- RUSN 3099.03
- RUSN 3102.03
- RUSN 3103.03
- RUSN 3121.03
- RUSN 3122.03
- RUSN 3330.03
- RUSN 3520.03
- RUSN 3800.03
- RUSN 3820.03

Minor in Sociology and Social Anthropology

Department requirements

2000 level

- Either SOSA 2001.06 or 2002.06
- At least six additional 2000 level credit hours

3000 level

- six SOSA credit hours

In total, 18 to 27 SOSA credit hours beyond the 1000 level are required.

Minor in Sociology and Social Anthropology of Critical Health Studies

This minor requires 18 credit hours above the 1000 level from the list below.

PLEASE NOTE THAT ONLY SOME OF THESE COURSES WILL BE OFFERED IN ANY GIVEN YEAR. Students may pick any courses from the following list.

- SOSA 2001.06: Ethnography in Global Context OR SOSA 2002.06: The Sociological Perspective (only one of these two may be included in the minor)
- SOSA 2401.06: Food and Eating Across Cultures
- SOSA 2400.06: Health and Illness Across Cultures
- SOSA2502.03: Biomedicine and the Illness Experience
- SOSA2501.06: Sociology of Health and Illness
- SOSA 3135.03: The Social Organization of Health Care
- SOSA 3143.03: Health, Illness and the World System
- SOSA 3145.03: Gender and Health
- SOSA 3147.03: Social Gerontology
- SOSA 3148.03: Drugs, Health and Society
- SOSA 3149.03: Childhood in Cross Cultural Perspective
- SOSA 3150.03: Sociology and Anthropology of the Body
- SOSA 3245.03: Women and Aging
- SOSA 3250.03: Beyond Genes and Circuits: The Anthropology and Sociology of Technoscience

Minor in Sociology and Social Anthropology of Economy, Work and Development

This minor requires 18 credit hours above the 1000 level from the list below.

PLEASE NOTE THAT ONLY SOME OF THESE COURSES WILL BE OFFERED IN ANY GIVEN YEAR. Students may choose from the following courses:

- SOSA 2001.06: Ethnography in Global Context OR SOSA 2002.06: The Sociological Perspective (only one of these two may be included in the minor)
- SOSA 2111.03: Is there an Atlantic Canada?
- SOSA 2140.03: Going Global; Geography, Economy, and Work in the 21st Century
- SOSA 2141.03: Good Jobs, Bad Jobs
- SOSA 2270.03: Introduction to Popular Culture
- SOSA 2271.03: Popular Culture in a Global Context
- SOSA 2401.06: Food and Eating Across Cultures
- SOSA 3005.03: Knowledge, Work and Culture in the Contemporary World
- SOSA 3006.03: Comparative Perspectives on Gender and Work
- SOSA 3014.03: Rethinking Culture and Class
- SOSA 3060.03: Social Change and Development
- SOSA 3096.03: Introduction to Demography
- SOSA 3165.03: Peoples and Cultures of the World: Selected Area Studies
- SOSA 3168.03: Issues in Latin American Society
- SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America
- SOSA 3200.03: Environmental Anthropology SOSA 3211.03: Continuity and Change in Rural Societies SOSA 3214.03: Living in a Globalized World SOSA 3215.03: Migration and Identity SOSA 3284.03: Living in Cities SOSA 3310.03: Indian Society: Change and Continuity

Minor in Sociology and Social Anthropology of Social Justice and Inequality

This minor requires 18 credit hours above the 1000 level from the list below.

PLEASE NOTE THAT ONLY SOME OF THESE COURSES WILL BE OFFERED IN ANY GIVEN YEAR. Students may choose from the following courses:

- SOSA 2001.06: Ethnography in Global Context OR SOSA 2002.06: The Sociological Perspective (only one of these two may be included in the minor)
- SOSA 2041.03: Describing Social Inequality
- SOSA 2042.03: Explaining Social Inequality
- SOSA 2115.03: African Canadian Society, Culture and Resistance
- SOSA 2180.06: Crime and Criminal Justice
- SOSA 2181.03: Explaining Crime and Criminal Behavior
- SOSA 2182.03: Exploring Crime and Criminal Behavior
- SOSA 2190.06: Comparative Perspectives on Gender
- SOSA 2260.03: Society, Politics, and Culture
- SOSA 3002.03: Native Peoples of Canada
- SOSA 3006.03: Comparative Perspectives on Gender and Work
- SOSA 3015.03: Popular Memory SOSA 3100.03: Feminist Perspectives in Sociology and Anthropology
- SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America
- SOSA 3190.03: Social Movements
- SOSA 3206.03: Ethnicity, Race and Nationalism
- SOSA 3215.03: Migration and Identity
- SOSA 3225.03: Culture, Rights and Power SOSA 3275.03: Crime and Public Policy SOSA 3283.03: Globalized Security and Justice: the Challenge of Global Crime and Terrorism
- SOSA 3285.03: Sociology of Law
- SOSA 3295.03: Society and the Police

Minor in Spanish Language

Requirements

- SPAN 2020X/Y.06 and SPAN 2030.03 in the same year
- SPAN 3035.03
- SPAN 3036.03
- SPAN 3020.03 or SPAN 3025.03

Minor in Statistics

A Minor in Statistics is available to all students in a 120 credit hour degree program other than Statistics within the College of Arts and Science. The Minor is also available to students in some other Faculties (please consult the appropriate section for your Faculty in the Undergraduate calendar).

A BSc or BA (90 credit hour) degree program with a Minor in Statistics is available to students in the Faculty of Science.

Departmental Requirements

- A minimum of 18 credit hours in Statistics (STAT) courses at the 2000 level or higher
- Students in Major/Honours programs other than Mathematics may count MATH 2001 and MATH 2030 among the 18 credit hours

Minor in Theatre

18 credit hours at or above the 2000 level, to be selected from:

- THEA 2000X/Y.06: Theatre Performance
- THEA 2011.03: Classical Theatre
- THEA 2012.03: Early Modern Theatre
- THEA 2020.06: Jazz Dance I
- THEA 2214X/Y.06: Shakespeare
- THEA 2229.03: Tragedy
- THEA 2313.03: Shakespeare and his Contemporaries on Film
- THEA 2400X/Y.06: Cave to Cafe: Costume and Identity from Antiquity to 1700
- THEA 2411.03: Designers' Language
- THEA 2700X/Y.06: Scenography I
- THEA 2841.03: Speak with Confidence: Voice for Non-Majors
- THEA 2901.03: Production Dramaturgy
- THEA 2902.03: Play Analysis for Directing
- THEA 2911.03: Stars and Stardom in Stage and Screen
- THEA 3010X/Y.06: The History of Musical Theatre
- THEA 3015.03: Renaissance Drama
- THEA 3020.06: Jazz Dance II
- THEA 3200X/Y.06: The Director in the Theatre
- THEA 3401X/Y.06: Dress and Identity: King's Court to Mass Culture, 1700-Present
- THEA 3501.03: The Modern Theatre 1: Realism and Responses
- THEA 3502.03: The Modern Theatre 2: High Modernism
- THEA 3600X/Y.06: The Playwright in the Theatre
- THEA 3751X/Y.06: Modern German Drama
- THEA 3911.03: Gender in Theatre: A Cross-Cultural Survey
- THEA 3912.03: Gender Theory and Contemporary Performance
- THEA 3913.03: English Drama 1660-1800
- THEA 3914.03: Topics in Italian Drama and Spectacle

- THEA 4501.03: Canadian Theatre Since 1968: Interrogating Identities
- THEA 4700X/Y.06: Special Topics I
- THEA 4735X/Y.06: Advanced Seminar in Baroque Culture
- THEA 4900X/Y.06: Theory and Criticism of Drama and Theatre
- THEA 4921.03: Special Topics II
- THEA 4922.03: Topics in Theatre History
- THEA 4923.03: Topics in Dramatic Literature
- THEA 4931.03: Contemporary Theatre

B. BA (90 Credit Hour) Programs

1. With Minor

- First Year
No more than 18 credit hour equivalents of the first 30 credit hours taken may be in a single subject
- 6 credit hours in a writing course (see [page 125](#))
- 6 credit hours in one or more language/humanities subjects (see section A1, [page 125](#))
- 6 credit hours in one or more social science subjects (see A2, [page 125](#))
- 6 credit hours in one or more life or physical science subjects (see A3, [page 125](#))
- 6 credit hours in a **single** language subject for (see D, [page 125](#))
- A minimum of 18, maximum of 27 credit hours in the minor subject at the 2000 level or higher.
- Within the last 60 credit hours, complete 6 credit hours in each of two subjects other than the subject of the minor.
- Total credit hours required above 1000 level - 42
- Total credit hours required for degree - 90
- Required GPA for graduation - 2.00
- Graduation with distinction - 3.70

Bachelor of Arts minor subjects: any of the approved minors in either the Faculty of Arts and Social Sciences or the Faculty of Science. See section 5.a.

C. BSc (90 Credit Hour) Programs

1. With Minor

- an approved writing course (see [page 125](#))
- 6 credit hours in one or more language/humanities subjects (see 1, [page 125](#))

- 6 credit hours in one or more social science subjects (see 2, [page 125](#))
- 6 credit hours in math (see [page 125](#))
- Minimum of 18, maximum of 36 credit hours in the minor subject at the 2000 level or higher.
- Total credit hours required above 1000 level - 42
- Total credit hours required for degree - 90
- Required GPA for graduation - 2.00
- Graduation with distinction - 3.70

Bachelor of Science minor subjects: any of the approved minors in the Faculty of Science. See section 5.a.

2. Upgrading of a BA or BSc (90 Credit Hour) to a BA or BSc Major (120 Credit Hour)

A person who holds a Dalhousie BA or BSc (90 credit hour) degree may apply through the Registrar's Office for admission to a major program. On completion of the required work with proper standing, a conversion certificate will be awarded which has the effect of upgrading the degree to major status.

3. Upgrading of a BA or BSc (90 or 120 Credit Hour) to a BA or BSc Honours (120 Credit Hour)

A person who holds a Dalhousie BA or BSc (90 or 120 credit hour) degree may apply through the Registrar's Office with the appropriate department advisor(s) approval, to an Honours program. On completion of the required work with proper standing, a certificate will be awarded which has the effect of upgrading the degree to honours status.

D. Concurrent Programs

1. BSc/BEng

Students who meet the admission requirements for the Bachelor of Science program and the Bachelor of Engineering program are eligible to select this concurrent degree option. Students wishing specific advice should consult the Assistant Dean, Faculty of Science and the Associate Dean, Faculty of Engineering. Students accepted will normally complete the 90 credit hour BSc and the first two years of engineering studies leading to the Diploma in Engineering (DipEng) concurrently in a period of three calendar years. At the end of the three year period, both the degree and the diploma will be awarded to successful candidates. This opportunity should appeal to students with career objectives in multi-disciplinary fields such as biomedical engineering, environmental science, or materials science (among others). It is thus possible to complete the requirements for the Bachelor of Science and Bachelor of Engineering degrees concurrently in a time period of five years in total (or up to six years for co-op programs).

2. BA/BEng

Students wishing to do so may complete the 90 credit hour BA degree program and the first two years of engineering studies leading to the Diploma in Engineering (DipEng) concurrently in a period of three calendar years. At the end of the three year period, both the degree and the diploma will be awarded to successful candidates. It is thus possible to complete the requirements for the Bachelor of Engineering and the Bachelor of Arts degrees concurrently in a time period of five years in total (or up to six years for co-op programs).

Students who meet the admission requirements for the Bachelor of Arts and Bachelor of Engineering programs are eligible to select this concurrent degree option. Students wishing specific advice should consult the Associate Dean, Faculty of Engineering and the department for the BA subject of concentration.

Courses in the fourth and fifth years are those required to finish the Bachelor of Engineering degree.

E. Individual Programs

In cases where students feel their academic needs are not satisfied under the above requirements, individual programs may be submitted to the Student Affairs Committee of the Faculty of Arts and Social Sciences or to the curriculum committee of the Faculty of Science prior to or during the student's second academic year. The Dean shall act as advisor for such students.

F. Other Degree and Diploma Programs

1. Bachelor of Music

For the requirements of this degree, see the entry for the Department of Music.

2. Diploma in Costume Studies

Study for this credential is entirely within the Department of Theatre. See the entry for that department for detailed information.

3. Diploma in Meteorology

Details of the requirements for this diploma may be found in the entry of the Department of Physics and Atmospheric Science.

G. Certificate Programs

1. Certificate in Forensic Psychology

Note: This certificate is not available in the 2013/2014 academic year.

2. Certificate in Information Technology

All BSc students will be provided with a basic level of competency in the use of current IT tools. Finding, retrieving, and preparing electronic documents and communicating electronically become second-nature to all science students. In many programs students work frequently with symbolic calculation packages such as mathematics and MAPLE, statistical packages such as S-Plus, and numerical packages. Others develop proficiency in a scientific type-setting environment such as LaTeX or produce Web documents in HTML format. Databases, CAD, GIS, and spreadsheets; a variety of hardware and operating systems experience further round out the set of skills of many science graduates.

The Faculty of Science Certificate in IT provides a discipline-based program to students majoring in earth sciences, or physics. Certificate in IT will be awarded if you complete:

1. The (120 credit hour) major or honours program in one of the following: earth sciences, physics;
2. The courses identified by the major department which cover the following categories of IT.

Presentations

- Proficiency in developing online presentations, including object linking
- Ability to produce documents in HTML and/or XML format
- Creation of a personal website
- Data Collection
- Construct a relational database using multiple tables and data entry forms for textual, numeric, and graphical data
- Do the above with a spreadsheet
- Collect and process multivariate data sets, e.g., spatial coordinate data using GIS, and incorporate it into a database, CAD or GIS

Data Manipulation

- Editing, transformation, import-export to different data formats within and between spreadsheets, databases, and support programs

Data Processing

- Basic manipulation of multivariate data and analysis, e.g., GIS manipulation of spacial data sets
- Statistical evaluation of data sets using spreadsheet functions, stats programs, ex. SYSTAT, S-Plus
- Numeric modeling using spreadsheets, GIS etc.

Data Visualization

- Graphing in 2D and 3D, time series etc.
- Surface modeling
- Fundamentals of animation

General Issues

- Intellectual property in the digital world
- Ethics and privacy
- Security (viruses, firewalls, data encryption)

The IT skills will be covered within the regular discipline-based courses of the major. They are presently available for students registered in the major or honours programs of earth sciences, mathematics, physics or statistics. Consult each department's Web page for a listing of the appropriate courses which will meet the requirement of the IT Certificate.

3. Certificate in Actuarial and Financial Mathematics

For the requirements for this certification, see the Mathematics and Statistics departmental entry.

4. Certification in Applied and Computational Mathematics

For the requirements for this certification, see the Mathematics and Statistics departmental entry.

5. Certificate in Medicinal Chemistry

For the requirements for this certification, see the Chemistry departmental entry.

6. Certificate in Materials Science

For the requirements for this certificate, see the Chemistry departmental entry.

7. Certificate in Animal Behaviour

For the requirement for this certificate see the Psychology and Biology departmental entries.

8. Certificate in Environmental Impact Assessment (EIA)

For the requirement for this certificate, see the Biology departmental entry.

9. Certificate in Geographic Information Science

For the requirement for this certificate, see the Biology departmental entry.

10. Certificate in Intercultural Communication

The Certificate in Intercultural Communication is open to students from any Faculty at Dalhousie, and welcomes both Canadian and International students. It offers the globally-minded student an opportunity to combine academic and experiential learning in order to understand and communicate more effectively with people from cultures different from their own.

Contact Person: Dr. Jean-Jacques Defert

Location: McCain 3108

Contact information: 494-3354 jdefert@dal.ca

1. **Academic components** (graduate students may receive advance standing for these components)

- a) One full academic credit focusing on the understanding of culture, chosen from the list below.
- b) Foreign/second language at or beyond the 2000 level or equivalent
N.B. This requirement is satisfied:
 - i) by taking foreign/second language courses at Dalhousie at the second-year level
 - ii) if the student is a native speaker of a language other than English and studying at Dal
 - iii) by non-credit community-based learning of such languages as Mi'kmaq or American Sign Language

N.B. Approval of the advisor is required for those students wishing to satisfy this requirement by options (ii) or (iii) above.

2. **Extended experiential component**

- a) Minimum one semester work or study abroad (or at Dalhousie for international students)

OR

- b) Minimum (75 hours) volunteering or working in an intercultural context within Canada

N.B. Students may satisfy this requirement by a blending of work/study abroad for less than one full semester and a local volunteer or work placement.

Students wishing to satisfy this requirement by a volunteer or work placement, or a blend of study abroad and work/volunteer placement, need the approval of the advisor.

3. **Theoretical and practical understanding of issues in intercultural communication (one-half credit required: ASSC 3150.03).**

Courses satisfying the Academic credit for the Certificate in Intercultural Communication (six credit hours, required):

ENGL 2090.03: Literature, Migration, and Citizenship
ENGL 3070.03: 20th Century African-American Novel
ENGL 3086.03: Post-Colonial Literature

FREN 2021.03: Langue et culture/Language and Culture.
FREN 3125.03: The Francophone World

FREN 3150.03: Aspects de la francophonie
 FREN/INTD 3175.03/: Topical Issues in Francophonie/Thèmes de la francophonie.

GWST 1015.03: Gender and Diversity
 GWST 2053.03: Women and Islam

GERM 3400.03: Germany and Europe: The Cultural Union
 HIST 2384.03/SPAN 2109: Cuba from Colonial Times

I. Introduction

The Faculty of Arts and Social Sciences includes humanities, social sciences, languages, and performing arts. Within the Faculty's departments and interdisciplinary programs, you can get involved in music and theatre at a professional level. Or you can find out how to do social surveys or archival research. Try out your language-learning abilities in French, German, Spanish, Italian, Russian, Arabic, Mandarin, or maybe Hebrew, Latin, or Greek. Study abroad for a term or a year, and you will develop your skills in cross-cultural interaction. Sharpen your reasoning powers and writing skills by taking literature and philosophy courses that teach advanced levels of reading and analysis.

By exploring various academic disciplines, you'll find that your curiosity about the world and your hopes of a career can be fulfilled in many different ways. You may find that a particular discipline exactly suits your needs. Or you may want to design a course of studies that engages you in a wider variety of departments and programs. You may find everything you need within the disciplines grouped in this Faculty. Or perhaps you will seek out the programs that combine this Faculty's offerings with ones from other Faculties. Professors and administrators, advisors and instructors, will all help to guide you as you choose courses and programs. Our goal is to help you to see differently, and to see your way to a bright future!

II. Departments, Schools and Programs of the Faculty of Arts and Social Sciences

A. Departments and Programs

Arabic
Canadian Studies
Chinese (Mandarin)
Classics
Contemporary Studies
Costume Studies, Fountain School of Performing Arts
Creative Writing
Early Modern Studies
English
Environment, Sustainability, and Society
European Studies
Film Studies, Fountain School of Performing Arts
French
Gender and Women's Studies
German
History
History of Science and Technology
International Development Studies
Italian Studies
Linguistics (admission suspended)
Music, Fountain School of Performing Arts
Philosophy
Political Science
Religious Studies
Russian Studies
Sociology and Social Anthropology
Spanish and Latin American Studies
Theatre, Fountain School of Performing Arts

B. Interdisciplinary Minors based in the Faculty of Arts and Social Sciences.

Abrahamic Religions
American Studies
Environmental Studies
Film Studies
Health Studies
Latin American Studies
Law and Society
Medieval Studies
Middle East Studies
Popular Culture Studies

C. Minors based in other Faculties open to students registered in the Faculty of Arts and Social Sciences

Business
Cognitive Science (Philosophy)
Community Design
Food Science
Geography
Informatics
Journalism Studies

Courses in Arabic are administered by the Classics Department, [page 152](#).

A. Minor in Arabic Studies

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

ARBC 1020X/Y.06: Introduction to Arabic.

Introduction to Arabic is a course which focuses on the acquisition of the elementary foundation in Arabic language. It also offers basic information regarding the Arab world: ancient and modern culture and civilization, daily life, religions, literature, etc. The variety of Arabic offered by this course is *Modern Standard Arabic*, which represents the Arabic language nowadays used in all Arab countries in formal communication. Modern Standard Arabic is used in writing, but it is also a spoken language used in many formal situations. This course aims to cover: writing with Arabic characters, reading simple original texts in Arabic, the basic components of Arabic grammar and basic daily vocabulary. Some elements of spoken Arabic varieties (dialects) may be offered as well in the second term.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term. This course fulfils the BA language requirement.

FORMAT: Lecture

EXCLUSION: ASSC 1020X/Y.06

ARBC 2020X/Y.06: Intermediate Arabic.

This course aims at consolidating the grammar and vocabulary acquired at the first level (Introduction to Arabic), and to improve reading and correct use of the syntactical structures in both oral and written communication. The course will also provide the student with the foundation necessary for reading standard forms of Arabic prose (especially newspapers) and for using Modern Standard Arabic in conversation. Written and oral translations from Arabic into English and vice-versa will be frequently proposed to the students in order to attain this purpose.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: ARBC 1020.06, or permission of the instructor

EXCLUSION: ASSC 2020.06

ARBC 2100.03: A Cultural Introduction to the Arab World.

This course, offered in English, aims at providing students with the basic tools for approaching the Arab world from a cultural perspective. It offers an overview of the Arabic Islamic and Christian cultural heritage from the Classical ages through the modern and contemporary periods, with accent on literature, myths, mentalities, arts, etc.

FORMAT: Lecture/discussion

CROSS-LISTING: RELS 2052.03, HIST 2500.03

ARBC 3030.03: Advanced Arabic I.

This course is a continuation of Intermediate Arabic (ARBC 2020). The course is designed to: (1) consolidate the knowledge acquired in Modern Standard Arabic at the previous level(s); cursorily reading texts without vocalization, acquiring more complex notions of grammar and vocabulary, translating from Arabic into English; and (2) add new morphological forms (especially verbal and nominal derived forms, passive of verbs, irregular forms, etc.) and more complex

syntactical structures, extended vocabulary, developed conversation abilities, translation from English into Arabic and composition skills.

FORMAT: Lecture

PREREQUISITE: ARBC 2020 or permission of the instructor

ARBC 3031.03: Advanced Arabic II: Literary Readings.

This course is given in Arabic for native speakers of Arabic and non-native students with a high command of Modern Standard Arabic. It is primarily designed to develop, at a high level, the students' command of Modern Standard Arabic through the reading and discussion of selected texts of Classical and modern Arabic literature (poetry and prose). The texts offer access to the highest linguistic level in Arabic, to elaborated syntactic structures and semantic issues, as well as to a rich and nuanced vocabulary.

FORMAT: Lecture

PREREQUISITE: ARBC 3030 or permission of the instructor.

ARBC 3040.03: Arabic Philosophical Texts: al-Ghazali.

Abu Hamid al-Ghazali (1058-1111) is one of the greatest Muslim thinkers of all time. This course is an introduction to his thought, based on a selection of passages in the original Arabic for advanced students of Arabic.

FORMAT: Lecture/seminar

PREREQUISITE: ARBC 3030, and an introductory level course in Classics or Religious Studies, or permission of the instructor

ARBC 3050.03: Arabic Philosophical Texts: Maimonides.

Moses Maimonides (1135-1204) is one of the greatest Jewish thinkers of all time. Though he wrote some of his legal works in Hebrew, his major philosophical works were written in Arabic. This course is an introduction to his thought, based on a selection of passages from his *The Guide of the Perplexed* and other works in the original Arabic for advanced students of Arabic.

FORMAT: Lecture/seminar

PREREQUISITE: ARBC 3030, and introductory level course in Classics or

Religious Studies, or permission of the instructor

EXCLUSION: RELS 4011.03; CLAS 4011.03

ARBC 3100.03: Arabic Pre-Islamic Poetry.

This course offers an overview of the best pieces of the earliest poetry composed in Arabic language, in the Arabian Peninsula, within a period which preceded Islam. It focuses on the so-called "Suspended Poems" (Al-Mu'allaqat), considered as the master-pieces of seven (or ten, according to different sources) Arabian poets such as Imru' al-Qays, Tarafa, Antara, Zuhayr, etc.

NOTE: This course will be offered in English and is based on English translations of the poems. The course does not require previous notions or knowledge of the Arabic language. The required bibliography will be in English as well.

FORMAT: Lecture/seminar

CROSS-LISTING: CLAS 3100

RESTRICTION: Students must be beyond the first year of study.

Arts and Social Sciences

ASSC 1000.03: Introduction to Computing for Non-Majors.

This is a course of technical computer literacy. Students can expect to learn about computers in a general way and how computers affect the way we live and work. Students will be given an opportunity to become familiar with typical applications of software such as word processors, spreadsheets and database applications.

Other topics will include the use of the internet, creation of web pages, and simple programming concepts. No previous computer experience is required. This course is open to Arts and Social Sciences and Health Education students only.

NOTE: This course cannot be taken by BMgmt and BScRBM students. This course cannot be counted towards the Bachelor of Commerce or a Minor in Business

FORMAT: Lecture/lab

CROSS-LISTING: CSCI 1200.03

EXCLUSION: COMP 1000.03, MGMT 1601.03, LIBS 1601.03, COMM 1501.03

ASSC 1040.03: Culture, Society & International Students.

This course is designed for international students. It aims to discuss the basic elements of culture and society relative to the challenges of academic integration in a Canadian university. Students will reflect on various cultural contexts through a series of learning activities organized around two salient issues confronting international students: a.) the internationalization of Canadian education; and b.) the problems and prospects of immigrating to Canada. It will highlight cultural forms such as art, music & dance, literature, sports & film; and succinct discussions of major social institutions like the family, education, religion and state. This aims to enable students to examine critically the similarities and differences across societies and cultures where they face the challenges of social and academic adjustment to a successful learning experience.

FORMAT: Lecture/discussion & tutorial

ASSC 1050.03: Foundations for Learning.

This course introduces participants to university culture and helps them to enhance academic performance. Course experiences build a practical understanding of the learning process at the university level, enabling students to develop strategies to be more effective learners.

Topics include performance expectations, conventions of academic critical reading and writing, research methods, discipline-specific learning strategies, knowledge management, learning communities, self-evaluation methods, and effective use of university resources.

FORMAT: Lecture/seminar

PREREQUISITE: Faculty of Arts and Social Sciences students with 30 credit hours or less; and permission of Assistant Dean (Student Matters).

ASSC 1100.03: Interdisciplinary Issues in Career Development.

This course examines theoretical and practical issues in career development. Participating in the portfolio process, students will apply theoretical understandings to experientially based activities. Through assessing personal environmental factors that impact decision-making, students will create a purposeful context for viewing their careers. Class content will include principles, theories and practices relating to: the meaning and nature of work, self and identity, career choice and decision-making, issues and strategies in self-assessment, occupational research and the future of work. Special issues will also be considered, such as gender, culture, job loss and the management of a career portfolio. This is a half credit course that is taken as part of a regular degree program.

NOTE: A related course in occupations (OCCU 2000.03) is offered by the School of Occupational Therapy. See Occupational Therapy section and see Section 5 of the Degree Requirements section of this Calendar regarding Arts and Science electives.

FORMAT: Lecture/discussion/tutorial

EXCLUSION: MGMT 1000.03

ASSC 1200.03: First-Year Seminar: Arts & Social Sciences.

The First-Year Seminar is a 3-credit Humanities elective for first-year students, entering from high school. Topics vary; the seminar offers students a chance to explore a particular theme in a small-group format. The small class size provides students with opportunities to develop study, research and information literacy skills under a faculty mentor, and to develop project-based peer and group relationships. Registration is on a first-come, first-served basis and space is limited.

FORMAT: Seminar

ASSC 3100X/Y.06: Communication and Mentoring.

This course examines the fundamental principles of human communication, leadership, mentoring and group dynamics. Through the application of theory to practice, students will experientially reflect on their own communication, facilitation, leadership, coaching and mentoring skills. Opportunities for skill applications will occur in class as well as through a practicum component. This is a full credit course that is taken as part of a regular degree program.

NOTE: This is a limited enrolment course for which a signature is required. If you are interested in taking this course, please contact Services for Students, Killam Library, 6225 University Avenue, Halifax, Nova Scotia B3H 4H8. Phone: (902) 494-3077.

FORMAT: Lecture/discussion/ tutorial

EXCLUSION: MGMT 1002.03 plus MGMT 1003.03 if ASSC2100.03 plus ASSC 3100.06 are taken. LIBS 1002.03 plus LIBS 1003.03 if ASSC 2100.03 plus ASSC 3100.06 are taken

ASSC 3112.03: Writing Theory.

This course considers a range of approaches to writing. Students read widely in rhetoric and composition theory, participate in the ongoing conversation about writing, and heighten their understanding of the composition process. Writing intensive and writing centred, the course is ideal for anyone interested in writing and critical thinking.

FORMAT: Lecture/discussion

PREREQUISITE: Instructor's permission required

CROSS-LISTING: ENGL 3112.03

EXCLUSION: ASSC 3110.06XY/ENGL 3111.06XY

ASSC 3113.03: Writing Practice.

This course puts writing theory into practice. As part of their class work, students gain valuable experience working as writing tutors and/or assistant editors for an academic journal. The course is ideal preparation for careers in teaching or publishing, as well as for students going on to do graduate work.

PREREQUISITE: ASSC 3112.03 / ENGL 3112.03 or ENGL 2202.03 or instructor's permission

CROSS-LISTING: ENGL 3113.03

EXCLUSION: ASSC 3110.06X/Y / ENGL 3111.06X/Y

ASSC 3150.03: Intercultural Communication.

In this highly interactive class, students will study and apply key concepts of intercultural communication with the goal of developing an empathic understanding of other cultures and an ability to communicate effectively across cultures. Topics include: Awareness of one's own culture (values, norms) and of variations within it; verbal and nonverbal elements of communication, hierarchy ("power distance"), collectivism vs individualism, direct/indirect communication styles, conflict management styles.

FORMAT: Lecture, discussion

PREREQUISITE: Open to undergraduate students with at least 45 credit hours, or to any graduate student

ASSC 3311.03: Interdisciplinary Special Topics I.

This is an interdisciplinary course that investigates a subject in the arts or social science which does not emerge from a particular discipline. The topic will be announced in the year prior to the course being offered.

FORMAT: Lecture or seminar

PREREQUISITE: At least 2 courses at the 2000 level in an arts or social science subject

ASSC 3312.03: Interdisciplinary Special Topics II.

This is an interdisciplinary course that investigates a subject in the arts or social science which does not emerge from a particular discipline. The topic will be announced in the year prior to the course being offered.

FORMAT: Lecture or seminar

PREREQUISITE: At least 2 Classes at the 2000 level in an arts or social sciences subject

ASSC 4010X/Y.06: Teaching English as a Second Language.

Students must obtain a Letter of Permission from Dalhousie University to take this course. Students must then apply, register and pay fees for this course at the International Language Institute. In cooperation with the Royal Society of Arts (RSA), the University of Cambridge Local Examinations Syndicate (UCLES), and the International Language Institute (ILI), Dalhousie offers an intensive course leading to a Certificate of English Teaching to Adults (CELTA). The syllabus covers six major areas: (1) language awareness, (2) the learner, the teacher, and the teaching/learning context, (3) planning, (4) classroom management and teaching skills, (5) resources and materials, (6) professional development. The teacher-in-training conducts classes with actual adult learners. Critical feedback is provided on teaching practice, written assignments and evidence of professional development through the class.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms. A certificate (CELTA) will be awarded when both terms are completed successfully.

FORMAT: Lab/tutorial/teaching practice

PREREQUISITE: Must be in good standing as third or fourth year university student

ASSC 4020X/Y.06: Editing and Publishing.

This seminar will introduce students to theories and practices of editing and publishing in both print and digital media. As participants in this experiential-learning seminar, students will accumulate specific skills and develop a portfolio relevant to working in the field of academic publishing. By providing practical experience with print and web-based publishing projects, the seminar will allow students to work in collaboration with the professor on the production of edited texts.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: Seminar participants must have already completed 60 university credits or the equivalent of 10 full courses.

ASSC 4311.03: Interdisciplinary Special Topics III.

This is an interdisciplinary course that investigates a subject in the arts or social science which does not emerge from a particular discipline. The topic will be announced in the year prior to the course being offered.

FORMAT: Lecture or seminar

PREREQUISITE: At least 2 courses at the 2000 level in an arts or social sciences subject

The Canadian Studies Program

I. Introduction

Why Canadian Studies at Dalhousie? In this era of globalized exchange, and a growing sense of international citizenship and responsibilities, Canadian Studies programs are enjoying something of a renaissance. Knowing ourselves and understanding our place in the world as Canadians remains an urgent task for students and scholars alike.

Canadian Studies at Dalhousie University has always been based upon a very strong tradition of research and teaching in a wide range of Faculty of Arts and Social Science and Faculty of Science departments and in other associated faculties and professional schools such as Health Professions, Law, and the King's School of Journalism. The Dalhousie Canadian Studies Program, with its various options, allows students to deepen their understanding of Canada in an exciting and coherent interdisciplinary context. As a second field of study leading to a Minor, a Double Major or a Combined Honours BA or BSc, it provides the opportunity to enrich and enhance a student's work on Canadian topics beyond his or her primary departmental home. To this end, Canadian Studies provides both a

group of core courses that study Canada from an interdisciplinary perspective, and a long list of electives cross-listed in other departments throughout the University.

Former students of Canadian Studies have found that this interdisciplinary study has been of benefit to them in a wide range of activities and careers including journalism, public service, teaching at all levels, and graduate and professional studies.

II. Requirements

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section of this calendar

BA (15 credit) Minor in Canadian Studies

See requirements for minor in the College of Arts and Science section of this calendar ([page 128](#)).

Minor in Canadian Studies

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

BA or BSc (20 credit) Double Major in Canadian Studies

1000 level

One full credit course in French (a course in an aboriginal language may be substituted, as a transfer credit).

2000 - 4000 level

A minimum of five and a maximum of eight credits of Canadian Studies courses, for a total of a minimum of 10 and a maximum of 14 credits in the two major subjects.

Required:

- CANA 2000X/Y.06: The Idea of Canada: An Introduction.
- CANA 3000.03: Interdisciplinary Approaches to Canadian Themes
- CANA 4000.03: Canadian Studies Senior Seminar
- Further Canadian Studies electives as required. CANA 4001.03: Research Topics in Canadian Studies may count toward this requirement.

BA or BSc (20 credit) Combined Honours in Canadian Studies

1000 level

One full credit course in French (a course in an aboriginal language may be substituted, as a transfer credit).

2000 - 4000 level

A minimum of five and a maximum of eight credits of Canadian Studies courses, with a minimum of 11 and a maximum of 14 credits beyond the 1000-level in the two honours subjects.

Required:

- CANA 2000X/Y.06: The Idea of Canada: An Introduction.
- CANA 3000.03: Interdisciplinary Approaches to Canadian Themes
- CANA 4000.03: Canadian Studies Senior Seminar
- CANA 4001.03: Research Topics in Canadian Studies
- Further Canadian Studies electives as required.

III. Course Descriptions

NOTE: Not all courses are offered every year. Please consult the current timetable to determine this year's offerings.

CANA 1100X/Y.06: Halifax and the World.

Walking across the Dalhousie campus while drinking a coffee and talking on your phone connects you to people around the world and to the history and literature of Halifax, Canada and the World in ways that you probably never imagined: your coffee connects you to the peasant farmers in Ethiopia or Guatemala who grew the beans. Your phone call connects you to child soldiers in Africa who fight over coltan – one of the key minerals in cell phones. Your footsteps across campus place you on what was once Mi'kmaq territory and when you walk through Halifax you re-trace the footsteps of key characters in the history and literature of the city and the world. This half-credit summer course explores these and other similar connections as well as the ethical questions that they raise about our daily lives. The course will engage you in both hands-on action and academic research

to learn about and confront the many connections between our daily lives, our city and the rest of the world.

NOTE: To see the course outline, meet the professors and learn more about the course, see: www.dal.ca/ids

FORMAT: Lectures/seminars/site visits

CROSS-LISTING: INTD 1100.06

CANA 2000X/Y.06: The Idea of Canada: An Introduction.

This course employs an interdisciplinary approach to focus on selected themes in Canadian history and society. Beginning with the premise that a nation is fundamentally a “narration,” it asks: What sorts of stories do Canadians tell about themselves? Thus the course is centered on important texts - novels, poems, films, songs, and political documents - that relate formative events in Canadian history and that point to new, sometimes contested, directions for the future. Themes may include, but are not restricted to: First Nation’s history and culture;

multiculturalism; wilderness; the north; regional identity; and foreign policy

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion

CANA 3000.03: Interdisciplinary Approaches to Canadian Themes.

This multidisciplinary seminar provides students with the opportunity to consider the structure and content of Canadian society from a variety of academic viewpoints, including the philosophical, historical, political, sociological, geographical, legal and literary.

Professors discuss the study of Canada as seen from their different disciplinary perspectives, while the course co-ordinator leads a weekly tutorial.

FORMAT: Seminar

CANA 4000.03: Seminar in Canadian Studies.

The course will explore in depth a single Canadian issue, topic or theme that crosses disciplinary borders. Along with the instructor, cross-appointed faculty from different departments will share their views on the subject. Topics might include aboriginal issues, Canada as a maritime nation, or Canadian film.

NOTE: CANA 4000.03 is also open, as an elective course, to Faculty of Arts and Social Sciences students with an interest in Canadian Studies who may not complete the Canadian-content requirements for the Concentration, minor or joint degrees.

FORMAT: Seminar/tutorial

CANA 4001.03: Research Topics in Canadian Studies.

This course will provide students with an opportunity to develop, in close consultation with a faculty member, a topic in Canadian Studies usually growing out of the work done in the seminar CANA 4000.03. Research will culminate in the writing of a major research paper. There will be regular one-to-one meetings with the chosen faculty member and progress meetings of the whole group. It is mandatory for those completing a Combined Honours in Canadian Studies and is highly recommended for those seeking the Emphasis or Double Major in Canadian Studies.

FORMAT: Seminar/tutorial

PREREQUISITE: CANA 4000.03 or permission of the instructor

IV. Canadian Studies Electives

NOTE: Some courses may not be offered every year. Please consult the current timetable to determine if these courses are offered. More detailed information can be obtained from the Canadian Studies office.

In addition to the courses listed below, appropriate courses in other departments may be taken as Canadian Studies credits, with the permission of the instructor concerned and the coordinator.

CANA 1100X/Y.06: Halifax and the World.

Walking across the Dalhousie campus while drinking a coffee and talking on your phone connects you to people around the world and to the history and literature of Halifax, Canada and the World in ways that you probably never imagined: your coffee connects you to the peasant farmers in Ethiopia or Guatemala who grew the beans. Your phone call connects you to child soldiers in Africa who fight over coltan – one of the key minerals in cell phones. Your footsteps across campus place you on what was once Mi’kmaq territory and when you walk through

Halifax you re-trace the footsteps of key characters in the history and literature of the city and the world. This half-credit summer course explores these and other similar connections as well as the ethical questions that they raise about our daily lives. The course will engage you in both hands-on action and academic research to learn about and confront the many connections between our daily lives, our city and the rest of the world.

NOTE: To see the course outline, meet the professors and learn more about the course, see: www.dal.ca/ids

FORMAT: Lectures/seminars/site visits

CROSS-LISTING: INTD 1100.06

CANA 1101.03: Halifax in the World.

Walking across the Dalhousie campus while drinking a coffee and talking on your phone connects you to people around the world and to the history and literature of Halifax, Canada and the World in ways that you probably never imagined: your coffee connects you to the peasant farmers in Ethiopia or Guatemala who grew the beans. Your phone call connects you to child soldiers in Africa who fight over coltan – one of the key minerals in cell phones. Your footsteps across campus place you on what was once Mi’kmaq territory and when you walk through Halifax you re-trace the footsteps of key characters in the history and literature of the city and the world.

This half-credit summer course explores these and other similar connections as well as the ethical questions that they raise about our daily lives. CROSS-LISTING: INTD 1101.03

EXCLUSION: INTD 1100.06, CANA 1100.06

CANA 2004.03: Canadian Literature.

From early exploration narratives to contemporary fiction, this course will survey a wide range of key texts in the development of Canadian literature in English. It will consider the literary and historical contexts that inform our readings, and identify and interrogate the various myths, images, icons and institutions that structure our ideas of what it means to be Canadian.

FORMAT: Lecture

PREREQUISITE: ENGL 1000.06 or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03 or THEA 1000.06 or Kings FYP

CROSS-LISTING: ENGL 2004.03

EXCLUSION: ENGL 2207.03

CANA 2021.03: CANA 2022.03: Language and Culture.

Normally follows FREN 1045X/Y.06 or 1050X/Y.06, and is taken in the second year of study. This course provides the opportunity to practice and improve language skills (vocabulary and grammar) already acquired. Each year sections offer topics from the options listed below. Each section focuses upon a broad cultural topic via which language skills are developed. No prior knowledge of the topic is supposed. Various readings lead to discussions and oral presentations. Descriptions for sections offered in a specific year may be obtained in April from the Department. All courses and assignments are entirely in French. A maximum of two sections may be taken under the course designation of FREN 2021.03 and 2022.03.

Topic 01: Le Journalisme: I. Oore

Topic 02: La Société française à travers la littérature

Topic 03: La Civilisation francophone de l'Afrique occidentale et des Antilles

Topic 04: Etudes acadiennes

Topic 05: Monuments culturels de Paris

Topic 06: La France et ses photographes

Topic 07: Québécois et Québécoises célèbres:

Topic 08: Contes et légendes

Topic 09: Nature et culture: C. Elson

Topic 10: L'Art en France depuis la Révolution

Topic 11: Voyages culturels à travers la France

Topic 12: Le roman policier

Topic 13: Aspects du cinéma français et francophone: C. Elson

Topic 14: Faim et festin: I. Black

FORMAT: Lecture

PREREQUISITE: FREN 1045X/Y.06 or 1050X/Y.06, or 2000-level Placement

Test result, or instructor's permission

CROSS-LISTING: FREN 2021.03

CANA 2110X/Y.06: Exploring Canadian Society.

This is a course about the nature of Canadian society and how it came to be what it is. It explores the basis for several of the major agreements and conflicts among Canadians which have been central to our social and economic development since we became a nation. The themes for lectures will include: dilemmas in Canada's relationship with the United States; prospects for the future of English-French relations; centralization, disadvantage and the disunity; the role of the elites in social and economic development; understanding changes in the political power of Western Canada; aboriginal and nonaboriginal values versus claims and counter claims. These topics will be introduced in an approach which is designed to help students understand why sources of unity and disunity have been central to social life in Canada.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: SOSA 1100X/Y.06, SOSA 1050Z/Y.06, SOSA 1100X/Y.06

SOSA 1200X/Y. POLI 2210 recommended.

CROSS-LISTING: SOSA 2110.06

CANA 2111.03: Is there an Atlantic Canada?

This course will examine the historical and contemporary social issues related to the Maritimes and Atlantic Provinces. The course will critically question what is meant by "Atlantic Canada" and look at its social, demographic, economic, and cultural trends in relation to the rest of the country. Attention will be given to the role of Acadians, Mi'kmaq, and African Nova Scotians as well as dominant power holders in the construction of Atlantic Canada.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06, or 1200X/Y.06

CROSS-LISTING: SOSA 2111.03

CANA 2115.03: African Canadian Society, Culture, and Resistance.

There has been a presence of African peoples in Canada for over 400 years; however, the rich histories of African-Canadian people have been often ignored. This course examines African Canadian society and culture from the historical to contemporary period. Topics will include historical analyses, slavery, patterns of immigration and settlement, family, continental African and diasporic connections, identity, arts and culture, education, employment, justice and the law, the media, diasporic debates, Black struggles and resistance, and African Canadian achievements. The course will be taught from a critical race and gender perspective, and will include readings about the diverse Black communities across Canada. There has been a presence of African peoples in Canada for over 400 years; however, the rich histories of African-Canadian people have been often ignored. This course examines African Canadian society and culture from the historical to contemporary period. Topics will include historical analyses, slavery, patterns of immigration and settlement, family, continental African and diasporic connections, identity, arts and culture, education, employment, justice and the law, the media, diasporic debates, Black struggles and resistance, and African Canadian achievements. PREREQUISITE: One of SOSA 1000XY.06, SOSA 1050XY.06, or 1200XY.06

CROSS-LISTING: SOSA 2115.03

CANA 2203.03: Approches du texte littéraire/ Approaches to Literary Texts.

An introduction to the critical reading of a selection of literary texts (various genres and periods) with an emphasis on Québec literature. The close analysis of short texts will lead to discussions of the broader nature of recurring images and myths as well as central themes. Strongly recommended for French majors and Honours students.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 1045X/Y.06 or FREN 1050X/Y.06, or 2000-level

Placement Test result

CROSS-LISTING: FREN 2203.03

CANA 2207.03: Canada's Origins to 1763.

This course explores Canada's origins to 1763. It covers the history of First Nations peoples before and after the arrival of Europeans. It addresses themes such as the role of the physical environment; the fur, fish, and timber trades; and the imperial struggle for dominance in North America. While the lectures will narrate the major developments in the seventeenth and eighteenth centuries, the tutorials will focus on specific issues, such as the role of treaties in Canadian history. The course climaxes with the Conquest of Quebec and the end of the Seven Years War.

FORMAT: Lecture/tutorial

CROSS-LISTING: HIST 2207.03

CANA 2208.03: Patriots, Rebels, Refugees: Canada's roots in the Age of Revolution, 1763 to 1860.

As empires continued their international contest and Britain fought to maintain colonies within North America, old and new inhabitants of what would become Canada also wrestled with questions concerning who would exercise power within their communities and governing bodies. In the process they gave new and, at times, conflicting answers to old questions: what did it mean to be a patriot? who and what were they willing to defend? who and what were they prepared to resist? Immigrants, exiles and the refugees of European and North American wars shaped new homelands, even as the First Nations peoples became refugees within their own lands. In this course we explore the related questions of loyalty and conscience through the diaries and letters of men and women defining their place in a new order.

FORMAT: Lecture/tutorial

CROSS-LISTING: HIST 2208.03

CANA 2209.03: Making a Nation: Canada, 1860-1929.

This is the story of how British North America was transformed into a distinct nation-state for the twentieth century. We'll see how a young Canada grappled with geographical, political, and social challenges: acquiring enormous territories amid growing provincial differences; maintaining loyalties to Empire while developing a New World identity; reconciling new and diverse cultural communities; and mobilizing for war.

CROSS-LISTING: HIST 2209.03

CANA 2210.03: Many Canadas: Canada, 1930 to the present.

This course explores the remaking of Canada, including the shift from imperial to continental and nationalist politics, the rise and transformation of third-party political movements, and the emergence of new ideas about the rights and responsibilities of the liberal individual subject.

FORMAT: Lecture / tutorial

CROSS-LISTING: HIST 2210.03

CANA 2218.03: The Canadian Economy in the New Millennium: Economic Policy Debates.

Canada's economy today faces many problems: unemployment, productivity, income distribution, environmental protection, trade relations, federal-provincial fiscal relations, maintenance of social programs, etc. What are the most important economic policy issues that Canada now faces? What is the appropriate policy role for government?

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 1101.03, 1102.03

CROSS-LISTING: ECON 2218.03, INTD 3102.03

CANA 3008.03: Canadian Society and Politics.

This course about the nature of Canadian society has as its focus the study of structures and events which shape social and political organization in Canada. There is not only one way to understand Canadian society: generations of historians, political scientists and economists have provided valuable insights as to why Canadians have believed or acted or voted in one way or another. Sociology and Social Anthropology have helped to understand Canada in terms of contexts and conditions of life which have shaped the evolution of society as we know it. The course explores issues, events, discontents and groups which have produced the recurrent themes that underlie social life in Canada.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

RECOMMENDED: SOSA 2110 or another course on Canadian society and/or politics.

CROSS-LISTING: SOSA 3008.03

CANA 3009.03: Public Opinion in Canada.

This course will introduce students to the study of public opinion in Canada and impact on informed decision making. In particular, the focus will be upon ideas and issues which have been held by groups and been influenced by the media. The lectures would explore the basis of our knowledge about the formation and change of public opinion relative to other forms of collective behaviour. We will present and analyze data relating to the role of public opinion in explaining and predicting political events.

FORMAT: Lecture

PREREQUISITE: SOSA 1000X/Y.06, 1100X/Y.06, 1050X/Y.06 and 1200X/Y.06

CROSS-LISTING: SOSA 3009.03

CANA 3010.03: Seminar in Canadian Studies.

This multidisciplinary seminar provides students with the opportunity to consider the structure and content of Canadian society from a variety of academic viewpoints, including the philosophical, historical, political, sociological, geographical, legal and literary. Professors discuss the study of Canada seen from their different disciplinary perspectives, while the course coordinator leads a weekly tutorial.

FORMAT: Seminar

PREREQUISITE: CANA 2000 or other course approved with Canadian Studies, or Instructor/Coordinator approval

CANA 3020.03: Canadian Cultural Landscapes.

This course explores the stories behind Canada's distinct regional landscapes. It begins with the idea that each province has a certain identity within the national framework - a 'signature' landscape - and this identity can be traced to a particular historical relationship with a particular place or environment. By examining the origins of these different landscapes, we can better understand how different geographies shaped both local and national histories, and also the regional tensions and differences with national borders. At the same time, we can appreciate how nature has been understood, used and transformed since the fifteenth century.

FORMAT: Lecture/discussion

CROSS-LISTING: GEOG 3210.03, HIST 3210.03

CANA 3026.03: Le français québécois/ Quebec French.

Definition, origin and evolution of the French of Quebec. Study of its phonetic, lexical, morphosyntactic and semantic characteristics. Comparison with Canadian French outside of Quebec and with international French. Analysis of written and oral documents for the purpose of illustration. Approved with Linguistics.

FORMAT: Lecture

PREREQUISITE: FREN 2045X/Y.06 or instructor's permission

CROSS-LISTING: FREN 3026.03

CANA 3107X/Y.06: Experiential Learning: Canada.

Experiential learning is an opportunity for students to reflect on the global/local and theory/practice dynamics of the world around them. Other programs and departments use terms such as internship, volunteer or co-op placements. IDS has adopted the term experiential learning because it reflects the interplay between academic and practical skills development that this program offers. Experiential learning courses are available for both local/Canadian and international placements. The Canadian component of experiential learning focuses on the themes of community development and public engagement. The international component addresses questions of global citizenship. The Canadian component of experiential learning combines classroom learning with volunteer work experience in a community organization in Halifax or other parts of Canada. Students are required to volunteer for a minimum of 60 hours in each term, or approximately 3 hours/week. In addition to this work, students are required to complete a set of readings (to be developed in collaboration with the course instructor) and three academic assignments (a mid-term report, a reflective paper and an academic paper).

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar, discussion and applied work experience with an organization or community group within Canada.

PREREQUISITE: INTD 2001 and INTD 2002 or permission of instructor

CROSS-LISTING: INTD 3107.06

CANA 3108.03: Experiential Learning: Canada.

Experiential learning is an opportunity for you to begin to reflect on the global/local and theory/practice dynamics of the world around us. Other programs and departments use terms such as internship, volunteer or co-op placements. IDS has adopted the term experiential learning because it reflects the interplay between academic and practical skills development that this program offers. Experiential learning courses are available for both local/Canadian and international placements. The Canadian component of experiential learning focuses on the themes of community development and public engagement. The international component addresses questions of global citizenship. The Canadian component of experiential learning combines classroom learning with volunteer work experience in a community organization in Halifax or other parts of Canada. You are required to volunteer for a minimum of 35 hours for the term, or approximately 3 hours/week. In addition to this work, you are required to complete a set of readings (to be developed in collaboration with the course instructor) and three academic assignments (a mid-term report, a reflective paper and an academic paper).

FORMAT: Seminar

PREREQUISITE: INTD 2001.03 and INTD 2002 and INTD 3001 and INTD 3002

CROSS-LISTING: INTD 3108.03

CANA 3185.03: Issues in the Study of Indigenous Peoples of North America.

This seminar is concerned with the historical background of the Native-European situation in North America and with issues arising from this background. Students will research issues which are significant to themselves and important to Native groups. Topics covered may vary from year to year, but will normally include a combination of historical issues such as culture change and contemporary issues such as land claims, self-determination and government policy, and social conditions of Natives.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSS-LISTING: SOSA 3185.03

CANA 3220.03: Coastal Communities in the North Atlantic.

Coastal communities as a social/ecological type are examined as populations, and social structures (territorial, economic, occupational, political) as they have developed in response to particular ecological and social circumstances. Various perspectives which have been applied to coastal communities are examined with regard to the contribution they may make to understanding the dynamics of these communities. The focus is on North Atlantic communities.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSS-LISTING: ENVI 5180.03, GEOG 3220.03, SOSA 3220.03

CANA 3223.03: The Caring Society? - Welfare in Canada since 1900.

This course examines changes over the twentieth century in the ways Canadians have dealt with people's needs, their own or others', whether for income, housing, personal care, or other matters of survival and well-being. Both private and government forms of welfare provision will be studied, with the overall purpose of understanding why Canada came to have the kind of welfare state it does. Among the topics that may be covered are: changing views on the origins and prevention of dependency; definitions of need; religious and ethnic variations in welfare practices; connections between welfare and women's lives; charitable fund-raising; promoters and opponents of government social programs; financing the welfare state; gender, race, constitutional, and class issues in welfare.

FORMAT: Lecture/discussion or seminar

CROSS-LISTING: HIST 3223.03, HIST 5223.03

CANA 3231.03: Modern Canadian Literature.

The historical period covered in this course extends from the end of World War I through the decade following World War II, a period during which Canada witnessed the formation of a modern literature in English. Varied aesthetic

responses to ideas of the modern, the processes and technologies of modernization, and the conditions of social, cultural, economic, and political modernity will be addressed.

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP
CROSS-LISTING: ENGL 3231.03

CANA 3245.03: French Canada.

Given in English for English-speaking students, this course studies the development of French-Canadian nationalist politics in their social, cultural, philosophic and economic contexts. While the emphasis is on Quebec-Canada relations, French-Canadians in the Maritimes, Ontario and the West will also be studied.

FORMAT: Lecture/discussion

PREREQUISITE: One course in Canadian history, or instructor's consent

CROSS-LISTING: HIST 3245.03

EXCLUSION: HIST 2240.03

CANA 3270.03: Contemporary Canadian Literature.

In this course, a variety of late twentieth-century and recent Canadian fiction and poetry texts will be studied from such perspectives as the following: postcolonial, postmodern, multicultural. The politics of cultural expression will be emphasized, as well as the relationship between ethics and aesthetic approaches to literature.

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

CROSS-LISTING: ENGL 3270.03

EXCLUSION: ENGL 3233.03

CANA 3333.03: News Media and the Courts in Canada.

This course is an introduction to the justice system and the specific laws that govern how journalists do their jobs. The goal is to give students and working journalists an understanding of court structure, legal principles, and criminal and civil procedure. Bans on publication, contempt of court, libel law, media access to the courts, confidentiality of sources and other media-law issues will be examined. The format combines lectures with forum discussions featuring lawyers, prosecutors, judges and other players in the justice system.

PREREQUISITE: JOUR 1001.06 or CANA 2000.06 or permission of the instructor

CROSS-LISTING: JOUR 3333.03

CANA 3568.03: Canada and the World.

This course examines post-World War II Canadian Foreign Policy in two parts: (1) an analysis of 'landmark' policy issues; and (2) an investigation of the general factors that help to "explain" the form and content of Canadian foreign policy, with particular reference to the institutions and processes through which policy decisions are made. Issues discussed are likely to include: the "invention" of peacekeeping; the Mulroney government's involvement in the campaign to end apartheid in South Africa; the negotiation of the North American free trade; the politics of immigration and diasporas; and the place of the Arctic in Canada and international relations.

FORMAT: Seminar

PREREQUISITE: Class in international politics, Canadian politics, or Canadian history in the 20th century, or with the permission of the instructor.

CROSS-LISTING: POLI 3568.03

CANA 3900.03: CANA 3901.03: La littérature canadienne française/French-Canadian Literature.

In-depth study of a few major works of French-Canadian literature with emphasis on the period from 1945 to the present day. Approved with Canadian Studies.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2201.03/2202.03

CROSS-LISTING: CANA FREN.03/3901.03

CANA 3910.03: Études acadiennes/Acadian Studies.

Critical investigation into the historical, socio-cultural, linguistic and literary significance of past and present Acadian writing. Approved with Canadian Studies.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2201.03/2202.03

CROSS-LISTING: FREN 3910.03

CANA 4300.03: Canadian Healthcare Delivery System.

The course is designed to provide an overview of healthcare in Canada, and more specifically in Nova Scotia, where the health reform process will be addressed. Aimed specifically at supervisors, middle management, and administrators the existing trends in healthcare from a national and provincial perspective will be reviewed. The goal of this course is to provide the student with a snapshot view of the existing healthcare system, its past development, and future direction.

CROSS-LISTING: HESA 4000.03

CANA 4500.03: Canadian Theatre to 1968: Performing the Nation.

Early Canadian theatre offers a fascinating example of a colonized nation's struggle to find its own dramatic voice in the face of powerful outside influences. This seminar course will explore the development of theatre in Canada from its roots in First Nations ritual and performance, to its encounters with British and European models and its eventual search for an independent identity via the Little Theatre movement, the Workers' Theatre movement and the Dominion Drama Festival. The course will close with a consideration of the influential Massey Commission and the birth of the Stratford Festival, Canada's first 'world class' theatre. Over the course of the term, special attention will be paid to the development of diverse dramatic traditions in French and English Canada. Drama by representative playwrights will be studied alongside primary sources in Canadian theatre history to give students an integrated perspective on the complex artistic and political debates that helped to determine the character of performance in Canada.

FORMAT: Seminar /discussion

PREREQUISITE: Permission of the instructor

CROSS-LISTING: THEA 4500.03, ENGL 4500.03

CANA 4501.03: Canadian Theatre Since 1968: Interrogating Identities.

This seminar course will examine the ongoing emergence of uniquely Canadian forms of theatre in the years since the Massey Commission asserted the need to foster Canada's native talent. Topics to be considered will include: the controversial role of government subsidy and policy-making in Canadian culture; the differing models offered by the Stratford and Shaw Festivals, by the major regional theatres, and by 'alternate' and independent companies; the contrast between First Nations, English- and French-Canadian traditions; and the rise of the current 'Fringe' phenomenon. Drama by representative playwrights will be considered alongside post-colonial theory and primary sources in Canadian theatre history to help students consider what a genuinely 'Canadian' theatre might look like. Above all, the course offers an opportunity to consider the complex relationship between theatre and national identity: who are 'we,' and how might our theatre express or even shape 'us'?

FORMAT: Seminar/discussion

PREREQUISITE: Permission of the instructor

I. Introduction

A minor in Chinese Studies is an excellent interdisciplinary complement to a course of studies at Dalhousie or King's in any area of arts, social sciences, sciences, or other programs. Students will attain a solid foundation for further academic, professional, and/or personal explorations of this fascinating country, its history, its culture, and its complex relationship to other parts of Asia as well as to the West.

II. Minor Degree Program Requirements

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

III. Course Descriptions

CHIN 1030X/Y.06: Introduction to Chinese (Mandarin).

This course aims to provide basic competence in understanding and speaking Mandarin and reading Chinese characters. It is for students who have had no exposure to Mandarin or Cantonese. This course fulfills the BA language requirement.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture and lab

EXCLUSION: ASSC 2035.06X/Y; native speakers of Chinese (any dialect)

CHIN 2030X/Y.06: Intermediate Chinese (Mandarin).

For students with some background in Mandarin Chinese, this course is a continuation of CHIN 1030.06 Introduction to Mandarin. All four language skills—listening and speaking, reading and writing—will be further developed; as well, a broader range of Chinese cultural elements will be introduced.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

EXCLUSION: Native speakers of Chinese (any dialect)

CHIN 2050.03: Chinese Culture.

This course explores the historical and literary backgrounds to modern Chinese culture by looking into different cultural characteristics of Chinese values, customs, myths, fables, society and social roles, food, fashion, dance, language and religion. In order to understand what constitutes Chineseness and its transformation, the course also discusses the international contexts of Chinese diasporas (such as Chinese communities in North America, Taiwan, and Southeast Asia) and Western conceptualizations of Chinese culture in relation to other aspects of social life, i.e. economy and politics. No previous background in Chinese language or culture is required.

FORMAT: Lecture/discussion

PREREQUISITE: None

CHIN 2052.03: East Meets West in Popular Culture.

This course is devoted to examining intersections between “West” and “East” through the study of cross-cultural influences in popular literature, cinema, music, and comics in Europe, North America, and East Asia.

CROSS-LISTING: CTMP 2052.03

CHIN 2060.03: Chinese and Japanese Religions.

An introduction to the cultural, religious, and philosophical traditions of China and Japan. Topics to be covered include: Classical Confucianism, Neo-Confucianism, Philosophical and Religious Taoism, Shinto, Chinese and Japanese Buddhism. The course will also examine the interaction, competition, and overlap between these traditions.

FORMAT: Lecture/seminar

CROSS-LISTING: RELS 2012.03

CHIN 2070.03: Buddhism.

This course introduces the student to the Buddhist religious tradition, beginning with its origins and early developments in India and followed by a treatment of key themes of later world Buddhism such as meditation, devotion, monasticism, and ritual. The course thus exposes students to both Buddhism's early Indian doctrinal and institutional dimensions, and to aspects of Buddhism as practiced subsequently in China, Japan, and Tibet.

FORMAT: Lecture/seminar

CROSS-LISTING: RELS 2013.03

CHIN 2080.03: The East is Read: Early Modern Conceptions of Asian Thought.

This course will consider early modern European interpretations of key Asian texts. The reactions of Early Modern thinkers to the “Oriental World” as it is known, reflect the philosophical concerns of Europeans at different times in the Early Modern period. For example, Enlightenment thinkers sometimes used Asian ideas to criticize European traditions, whereas post-Enlightenment philosophers of history tended to depict the non-Western world as less free or progressive than Western European cultures. Not surprisingly, then, Early Modern conceptions of Asia were often crude or idealized. We will assess both the merits of early modern interpretations of Asian thought and what these interpretations reveal about the self-consciousness of European thinkers in the Early Modern period.

FORMAT: Seminar

CROSS-LISTING: EMPS 2450.03

CHIN 2290.03: Emerging Giants: The Economic Rise of China and India.

This course examines the economic history, current issues, and future trends of China and India, answering such questions as: What explains China's and India's growth? How is climate change affected by this growth? How are global labour markets affected? Must growth lead to rising inequality? Is democracy required for development?

FORMAT: Lecture

PREREQUISITE: A grade of C or better in ECON 1101.03 and ECON 1102.03

CROSS-LISTING: ECON 2213.03

CHIN 3030X/Y.06: Advanced Chinese (Mandarin).

For Students with intermediate-level background in Mandarin Chinese, this course is a continuation of CHIN 2030.06 Intermediate Chinese (Mandarin). The course aims to develop further the four language skills—listening, speaking, reading, and writing. It seeks to enlarge the students' vocabulary in commonly used characters and phrases and provide students with further understanding of Chinese grammar, abilities to read expository and narrative writings, speaking skills to cope with real life situations, writing skills of short essays, as well as further understanding of Chinese culture and society.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture and lab

EXCLUSION: Native speakers of Chinese (any dialect)

CHIN 3050.03: Topics in Asian Cinema.

Each year will focus on specific topics as explored in the cinema of various Asian countries. Particular attention will be paid to how Asian filmmakers employ different cinematic genres in their treatments of diverse aspects of Asian societies and cultures.

FORMAT: Film screening with lecture/discussion

CROSS-LISTING: THEA 3350.03

CHIN 3062.03: Modern Chinese Literature in Revolutionary Times.

A survey of representative works in modern Chinese literature, this course is designed to enhance students' understanding of modern Chinese society and culture through reading works by major Chinese authors from the Republican period, over three decades—1919 to 1949. It was a period of cultural clashes between traditional Chinese culture and Western influences, a time of wars, political and ideological struggles and changes. All readings are in English, as is the language of instruction. A background in Chinese language, culture, and/or literature is encouraged but not required.

FORMAT: Lecture and discussion

CHIN 3080.03: Literature of the Asian Diaspora.

Literature of the Asian Diaspora encompasses literature written in English by writers of Asian descent and heritage. Each year may have a specific focus, such as Asian Canadian and Asian American, Anglo-Asian, or Asian Australian literature. The course will concern itself with what constitutes Asian diasporic literature, its various historical and social contexts, as well as its narrative traditions and innovations.

FORMAT: Lecture/discussion

I. Introduction

Classics is the study of the ancient Greeks and Romans: their myths, mysteries, and, games, their epics, comedies, and tragedies, their languages, arts, and architectures, their religions, philosophies, and sciences. We examine how they constructed their relations to nature, literally created "history", and discovered how terrible the human is. We learn their magic, blessings, and curses, their politics and laws, their social structures, and ways of making war. We look at their sex lives, how they died, and what they used for money. Classics tells the story of the rise and fall of their empires, and of what has indelibly lasted after imperial military and political forces collapsed. We investigate how what the Greeks and Romans became depended on encounters with the peoples, cultures, philosophies, technologies of war and peace, politics and religions of Egypt and North Africa, of Judea, Lebanon, and Syria, of Arabia and Persia, and of Tuscany and the Eurasian North. And Classics looks at how, out of those same meetings, new religions and philosophies evolved, giving us the literatures, arts, and politics of Greek, Latin, and Arabic Christianities, of Hebrew, Greek, and Arabic Judaisms, and of Islam. We start from the remotest origins of human history, make a long stop at the "Classical" period, become what some regard as decadent, and go up to the end of the Middle Ages. We are at home in Athens and Rome, in Constantinople and Istanbul, in Carthage, Alexandria and Jerusalem, in Antioch, Damascus, and Baghdad, in Cordoba and Palermo, in Paris, Oxford, Fribourg, and Cologne, and we encamp at Hadrian's Wall, once the boundary of "civilization". Languages, chiefly Greek and Latin, are both our pleasure and our necessity, but Classics is much more than the study of languages, its study lays the foundation of self-knowledge.

Classics at Dalhousie offers the full range of electives and degree programs: minors, majors, and honours for Bachelor degrees, the Master of Arts, and the PhD. It has specialists in philosophy and religion, in languages and literature, and in history. Students of Classics must learn Greek and Latin, if they wish to take an honours degree or go on to graduate studies in the field. While we recommend that students begin Latin or Greek in their first year, it is quite feasible to start language studies subsequently.

II. Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section of this calendar.

A. BA (20 credit) Honours in Classics

For purposes of meeting grouping requirements, some Ancient and Medieval Philosophy courses may be counted either as Classics credits, or Philosophy credits.

Students must complete between 9 - 11 credits in Classics at the 2000 level or above. Among these credits, students must take the following:

- five credits in Greek and Latin (two in one; three in the other). Students may choose from: Greek: 1700/2710; 2700; 3700 or any other upper level course offered in Greek. Latin: 1800/2810; 2800; 3810 or any other upper level course offered in Latin.
- three credits at the 3000 level or higher
- completion of the Honours Examination (Classics 0400.00)

Candidates for Honours and Combined Honours degrees who anticipate continuing their studies at the Graduate level in Classics should consult the calendars of the Graduate Schools of their choice concerning requirements for entry into Graduate programs. It may be the case that additional preparation in the classical languages or in other aspects of ancient civilizations is required for entry into certain programs.

B. BA (20 credit) Combined Honours in Classics

Classics may be taken as part of a combined honours program with other disciplines. Students interested in such programs should consult with the undergraduate advisors of the respective departments.

Students must complete between five to eight courses in Classics at the 2000 level or higher. From these credits, students must take the following:

- three credits in Greek and/or Latin. Students may choose from:
- Greek: 1700/2710; 2700; 3700 or any other upper level course offered in Greek. Latin: 1800/2810; 2800; 3810 or any other upper level course offered in Latin.
- two credits at the 3000 level or higher
- completion of the Honours Examination (Classics 0400.00) if the major work is done in Classics

NOTE: Students are urged to apply for Honours as early as possible in their program (applications may be submitted after completion of one year of university). Please consult undergraduate advisor.

C. BA (20 credit) Major in Classics

Students must complete the faculty requirements for a major. These requirements include six to nine credits in Classics at or above the 2000 level; and three credits at the 3000 level or higher. Students are encouraged to take two language courses in Greek and/or Latin.

D. BA (20 credit) Double Major in Classics

Students must complete the faculty requirements for a double major. These include 10-14 credits in the Major subjects at the 2000 level or higher with no more than eight and no fewer than five in either. Students must include at least two credits at the 3000 level or higher in each subject.

E. BA (15 credit) Minor in Classics

See requirements for minor in the College of Arts and Science section of this calendar ([page 128](#)).

F. Minor in Classics

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

G. Minor in Ancient History

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

H. Minor in Classical Literature

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

I. Minor in Classics: Ancient Philosophy

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

J. Minor in Classics: Medieval Philosophy

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

III. Course Descriptions

NOTES:

1. Not all courses are offered every year. Please consult the current timetable or the Classics Department (494-3468) to determine this year's offerings.
2. The Introductory courses, and the more elementary courses in Ancient History and Religions, and Classical Philosophy listed below do not require knowledge of the ancient languages. However, students who plan to do advanced work in any of these areas are advised to begin study of the appropriate languages as early as possible.
3. The Department of Classics offers courses at three levels in Arabic. Descriptions for these courses can be found on [page 143](#) of the calendar.

CLAS 0400.00: Honours Examination.

Details available from the department.

PREREQUISITE: CLAS 2700X/Y.06 or CLAS 2800X/Y.06

CLAS 1010X/Y.06: Ancient History: God-Kings, Spartans and Caesars.

Consideration of the pre-classical Near Eastern civilizations (Mesopotamian, Egyptian, Hebrew etc.) in the first term is followed in the second by treatment of the civilizations of Greece and Rome. The course concludes with a consideration of the dissolution of Roman Imperial power and the development of the Christian and Islamic cultures. Particular attention will be paid to political, cultural and social history. As the course is intended as an introductory one, no special preparation is expected. There is no foreign language requirement. This course fulfills the first year writing requirement.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: ✍ Writing Requirement, Lecture plus tutorials

CLAS 1100X/Y.06: Gods, Heroes, and Monsters: Ancient Mythology.

An introductory survey of the traditional religious narratives of ancient civilizations including Mesopotamia, Egypt, Israel, Greece, and Rome. Of special interest: the function of myth in shaping and expressing a culture's understanding of the divine, the institutions of human community (religion, the family, government), and the natural world; the interrelationships of the myths of those civilizations; the reception of those traditions in the origins of Christian and Islamic culture. The traditional narratives and their broader cultural contexts will be approached through study of primary sources including epic, tragic, and didactic poetry, hymnography, historiography, philosophy, the visual arts, and architecture. This course fulfills the first year writing requirement.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: ✍ Writing requirement, lecture plus tutorials

CROSS-LISTING: RELS 1200X/Y.06

EXCLUSION: CLAS 2100X/Y.06

CLAS 1600.03: Sanskrit I.

This course provides students with all the basic tools required for the study of Sanskrit, with a particular emphasis on basic Sanskrit grammar. Students will learn the Devanagari script, several common nominal forms and the basics of the verbal system, as well as develop a competency in basic reading and recitation. CROSS-LISTING: RELS 1600.03

CLAS 1700X/Y.06: Introductory Ancient Greek.

Begin learning the language of ancient Greek poets and philosophers in this introduction to Ancient Greek, through the study of its basic grammar. The aim of the course is to bring the student by the end of the year to read basic passages of ancient Greek texts.

NOTE: Students contemplating honours or combined honours should register in 2710X/Y.06, not 1700X/Y.06.

Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

CLAS 1800X/Y.06: Introductory Latin.

Begin learning the language of the ancient Romans in this introduction to Latin, through the study of its basic grammar. The aim of the course is to enable students to read basic Latin texts. NOTE: Students beyond their first year of university study should register under the course code

2810X/Y.06, instead of 1800X/Y.06.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

EXCLUSION: CLAS 1801.03 and 1802.03

CLAS 1900X/Y.06: Introductory Classical Hebrew.

An introduction to Classical Hebrew through the study of its basic grammar. The aim of the course is to read texts in Hebrew.

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture

EXCLUSION: CLAS 1901.03 or 1902.03

CLAS 2024.03: Philosophy and God.

Does god exist? Can God be known? Have a nature? Do evil? Beginning by occupying the same ground as religion, philosophy has asked these questions. Starting with Pythagoras, Empedocles, Plato, Aristotle, Epicurus, and continuing with their pagan Jewish, Christian, and Islamic followers, we shall learn to state the answers of sages and mystics with historical accuracy and to judge their persuasive power.

FORMAT: Lecture/discussion

CROSS-LISTING: RELS 2203

CLAS 2025.03: Nature, the Human, Community and the Divine in the Pre-Modern West.

What is nature? What is the proper relationship between nature and the human being, political community, and divinity? This course will investigate ancient Greek, Roman, Jewish, Christian and Islamic answers to these questions through the study of literature, philosophy, art and architecture of the Pre-Modern West.

FORMAT: Lecture/team-taught

CROSS-LISTING: RELS 2025.03

CLAS 2026.03: Paganism.

"Pagan" originated as a derogatory Christian designation for ignorant conservative rustics who kept to the pre-Christian religions. We shall look at those religions in their origins, nature, and development in antiquity, their continuations in the Middle Ages and modernity, and their persistence and revival in the contemporary world.

FORMAT: Lecture/discussion

CROSS-LISTING: RELS 2026.03

CLAS 2027.03: Magic, Religion, and Philosophy.

Reading the Greek Magical Papyri, as well as curse tablets and binding spells from ancient sources, we will explore the intersections of, and relations between, magic, religion, and philosophy in antiquity. The focus will be on both the practical and theoretical aspects of magic in the Greek and Roman worlds.

FORMAT: Lecture

CROSS-LISTING: RELS 2027.03

CLAS 2100X/Y.06: Gods, Heroes, and Monsters: Ancient Mythology.

An introductory survey of the traditional religious narratives of ancient civilizations including Mesopotamia, Egypt, Israel, Greece, and Rome. Of special interest: the function of myth in shaping and expressing a culture's understanding of the divine, the institutions of human community (religion, the family, government), and the natural world; the interrelationships of the myths of those civilizations; the reception of those traditions in the origins of Christian and Islamic culture. The traditional narratives and their broader cultural contexts will be approached through study of primary sources including epic, tragic, and didactic poetry, hymnography, historiography, philosophy, the visual arts, and architecture.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: Students must be beyond the first year and have completed the writing requirement

EXCLUSION: CLAS 1100X/Y.06, RELS 1200X/Y.06

CLAS 2209.03: The Roman World from Constantine to Theodosius (312-395).

This course covers one of the most important periods of Roman history in which Christianity became the dominant religion in the empire and foreign peoples threatened the existence of the empire itself. The course is open to first-year students. There is no foreign language requirement.

FORMAT: Seminar

CROSS-LISTING: HIST 2017.03, RELS 2209.03

EXCLUSION: CLAS 2210X/Y.06, HIST 2004X/Y.06

CLAS 2214.03: The Roots of Greek Civilization: From Crete and Troy to the Rise of Athens.

A history of Archaic Greek culture from the Bronze Age palaces of Crete and Mycenae through the development of the Greek city-states. Topics to be discussed include prehistory, palaces and shipwrecks, art and archaeology, the world of Homeric poetry, archaic poetry and thought, colonization, and cultural interaction between the Greek world, the Near East, and Egypt. No knowledge of Greek is expected.

FORMAT: Lecture/discussion

PREREQUISITE: Students must be beyond the first year and have completed the writing requirement.

CROSS-LISTING: HIST 2088.03

CLAS 2215.03: The Classical Greek World: Athens, Sparta, and a Century of Conflict.

A history of Classical Greek culture from the rise of Athens and Sparta as the dominant Greek city-states to the fall of Athens in the Peloponnesian Wars and the death of Socrates. Topics to be discussed include the rise of democracy, the culture and society of the Athenian 'Golden Ages', drama, art and architecture, empire building, and the Greeks at war, first with the Persian Empire and then with each other. No knowledge of Greek is expected.

FORMAT: Lecture/discussion

PREREQUISITE: Students must be beyond the first year and have completed the writing requirement.

CROSS-LISTING: HIST 2016.03

CLAS 2216.03: Alexander the Great and the Hellenistic Kings: Transforming Ancient East and West.

A history of Late Classical and Hellenistic Greek culture from the end of the Peloponnesian Wars through the empire of Alexander the Great to the Hellenistic World. Topics to be discussed include relations between and among the Greek city-states and the Persian Empire, developments in art, religion, literature, and philosophy, the career and legacy of Alexander, and the new world order of kings and kingdoms he ushered in. No knowledge of Greek is expected.

FORMAT: Lecture/discussion

PREREQUISITE: Students must be beyond the first year and have completed the writing requirement.

CROSS-LISTING: HIST 2089.03

CLAS 2220.03: Ancient Israel.

Students will become familiar with the broad outlines of ancient Israelite history with specific attention to Israel's relationship to her immediate neighbours and the major imperial powers from the 2nd millennium BCE to first century CE. This will entail an initial survey of biblical texts in order to lay an adequate understanding of ancient Israel's self-conception, followed by a detailed survey of Israel's interaction with other nations, including early Mesopotamia, Egypt, Assyria, Babylon, Persia, the Seleucid empire, and Rome.

FORMAT: Lecture and seminar presentations

CROSS-LISTING: HIST 2520.03/RELS 2220.03

CLAS 2231.03: The Rise of Rome: Consuls, Classes, and World Conquest.

How did a little village conquer the world? This course follows Rome's gradual expansion across Latium, Italy, and finally the whole Mediterranean. Questionable myths, aggressive literature, fiery rhetoric, and political propaganda complement the archaeological record as we trace the development and decadence of Republican institutions and the Republic's descent into shattering civil war. Class tensions, continuous foreign conflict, and still famous figures like Brutus, Cato,

Cicero, and Caesar feature prominently in this vigorous study of a paradigmatic political and social problem: the destiny of Republican Rome. Students will be expected to familiarise themselves with both primary and secondary materials, but no knowledge of Latin is required. The material covered in this course is continued in CLAS 2232 / HIST 2091.

FORMAT: Lecture and Discussion

PREREQUISITE: Prior fulfillment of the writing requirement

CROSS-LISTING: HIST 2090.03

CLAS 2232.03: The Fall of Rome: Caesars, Saints, and Warlords.

Rome did not fall in a day, or even a century. If the period of Imperial power includes Rome's decadence, it also includes its greatest power and glory. In this chronological survey of the Roman Empire, we will trace the rise of autocracy, the causes of rare but ferocious civil wars, and the transformation of Roman political institutions from Augustus to Diocletian. A lively look at the growth of urban life in the West, at the limits of Roman identity throughout the empire, at the fearful economic and military crisis of the 3rd century, at the adoption of official Christianity, and at the challenges of foreign invasion will lead us to ponder whether the "Decline and Fall" model of Roman imperial history is still valid. Students will be expected to familiarise themselves with both primary and secondary materials, but no knowledge of Latin is required. This course is a continuation of the material covered in CLAS 2231 / HIST 2090 but that is not a prerequisite.

CROSS-LISTING: HIST 2091.03

CLAS 2233.03: Roman Legions and the Barbarians.

This course examines the origins, refinement, and eventual collapse of the Roman military machine. Grand strategy, field tactics, and the analysis of specific battles complement our study of the changing relationship between the army and Roman society and the former's role in building and breaking the political order from 500 BC to 500 AD.

FORMAT: Lecture

CROSS-LISTING: HIST 2023.03

CLAS 2234.03: Death, Sex, and Gold in the Ancient Roman World.

We will explore ancient Roman beliefs and practices concerning the afterlife, sexuality, the social duties of men and women, marriage, family life, and slavery. Gladiatorial games, funerals, brothels, temples, and markets are just some of the places at which Romans defined, defended, and denounced each others' identities as mortal, sexual, and economic players. A journey into often alien, always elusive, sometimes alluring aspects of the pre-Christian Mediterranean.

FORMAT: Lecture/tutorial

CROSS-LISTING: HIST 2092.03

CLAS 2281.03: Christian Beginnings: The Orthodox and Oriental Churches.

This course traces the development of Christianity from its origin as a Jewish sect to its status as the dominant religion within the Byzantine Empire. The Christian religion as patronized by the Eastern Roman Emperors identified itself with the persecuted Christian sect of the first three centuries through the cult of the martyrs, articulated in the increasing importance of relic, icon, and pilgrimage to holy place. The seven ecumenical councils (325-787) progressively defined the Orthodox faith and resulted in the rise of Oriental churches, rejecting aspects of the definitions. Through to our end-date of 843 (when the icon was finally accepted) themes will be treated by attention to historical events (including the rise of Islam), art, architecture, liturgy, and various genres of literature (including hagiography).

FORMAT: Lecture

CROSS-LISTING: RELS 2281.03

EXCLUSION: CLAS 3280X/Y.06

CLAS 2361.03: Ancient Philosophy: From Thales to Plato.

This course covers the period in Ancient Philosophy from Thales to Plato: Pre-Socratics, Sophists, Minor Socratics, and selected Platonic dialogues. The period from Aristotle to Plotinus is covered in CLAS 2362.03.

FORMAT: Lecture

CROSS-LISTING: PHIL 2361.03

CLAS 2362.03: Ancient Philosophy: From Aristotle to Plotinus.

This course covers the period in Ancient Philosophy from Aristotle to Plotinus: selected texts of Aristotle, Stoicism, Epicureanism, Pyrrhonian and Academic Scepticism, Middle Platonism, Neoplatonism.

FORMAT: Lecture

CROSS-LISTING: PHIL 2362.03

CLAS 2365.03: Plato and the Case of Socrates: Philosophy on Trial.

Socrates (469-399 BCE) never wrote a single word, but posed such threat to Athens that a jury put him to death for the alleged ethical corruption and impiety of his thought. This course will explore the revolutionary life and thought of Socrates, and consider whether the jury's decision against him was justified.

FORMAT: Lecture

CROSS-LISTING: RELS 2365, PHIL 2365

CLAS 2366.03: Gods, Beasts and The Political Animal: Plato, Aristotle, and their Legacy.

We will study some of the most important Platonic dialogues and Aristotelian treatises, to understand the supremely influential views of Plato and Aristotle on divinity, nature, the human, and political community. We will examine the rejection of Platonic-Aristotelian idealism by Stoic, Epicurean and Skeptical schools. Subjects treated include ethics, politics, metaphysics, logic, aesthetics, and psychology.

FORMAT: Lecture

CROSS-LISTING: RELS 2366, PHIL 2366

CLAS 2515.03: Myth into Film I: The Greek World.

An introduction to classical myth and culture through the medium of film. Cinema has always drawn on different historical periods, yet its connection with the ancient world remains one of the most significant. This course explores cinema's reconstruction and interpretation of the ancient world, using both ancient and modern sources.

FORMAT: Lecture & discussion

CLAS 2600.03: Sanskrit II.

This course develops further the basic grammar and vocabulary of Introductory Sanskrit I, emphasizing the basic past tense verbal systems, participial formations, and translation of simple Sanskrit texts.

PREREQUISITE: RELS 1600.03 or CLAS 1600.03

CROSS-LISTING: RELS 2600.03

CLAS 2700X/Y.06: Intermediate Greek.

A continuation of CLAS 1700.06 and the normal second-year course in Greek.

The work of the course is divided equally between formal grammar sessions and the reading of Greek texts from Xenophon, Lysias and Plato. In the grammar sessions a complete and systematic review of all Greek grammar is undertaken during which the student meets the more difficult forms and constructions which are omitted in CLAS 1700X/Y.06. The aim of the course is to prepare the student to read the philosophical and dramatic texts of the 5th century BC.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: CLAS 1700X/Y.06 or 2710X/Y.06

CLAS 2710X/Y.06: Greek Prose.

See description under CLAS 1700X/Y.06. Students beyond their first year of university study should register under this course code (2710X/Y), instead of 1700X/Y.06. For additional information, please consult the Classics undergraduate advisor.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

EXCLUSION: CLAS 1700X/Y.06

CLAS 2800X/Y.06: A Study of Latin Prose and Poetry.

CLAS 2800X/Y.06 is a continuation of CLAS 1800X/Y.06 or CLAS 2810X/Y.06. A study of the poetry and prose literature of Rome through a selection of texts. Particular attention is paid to improving the students' command of the grammar and syntax of the Latin language.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: CLAS 1800X/Y.06 or 2810X/Y.06

CLAS 2810X/Y.06: Introductory Latin (Honours).

See description under CLAS 1800X/Y.06. Students beyond their first year of university study should register under this course code (2810X/Y.06), instead of 1800X/Y.06. For additional information please consult the Classics undergraduate advisor.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

EXCLUSION: CLAS 1800X/Y.06

CLAS 2900X/Y.06: Intermediate Hebrew.

A continuation of grammar study and translation of selected texts from the Hebrew scriptures.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: CLAS 1901.03 and 1902.03 or equivalent

CLAS 3016.03: Meetings Between Hellenism and the East to Philo the Jew.

We consider the constitution of Hellenism in relation to Eastern cultures as this emerges in Homer and Herodotus, the emergence of philosophy and the polis. With Alexander and the Hellenistic empires we look at the results and limits of military conquest especially in what is now Afghanistan. The course concludes with the constitution of Jewish religion and culture and its meeting with Hellenism with Philo Judaeus in Alexandria. In order to integrate the presentation of text and art the lectures are all in Powerpoint.

FORMAT: Lecture and discussion

CROSS-LISTING: HIST 3016, RELS 3018

EXCLUSION: CLAS 2300, CLAS 3015, HIST 3015, RELS 2004

CLAS 3017.03: Meetings Between Hellenism, Judaism, Christianity and Islam until the Renaissance.

We consider the constitution of Christianity in relation to Hellenism and Judaism during the first six centuries of the Christian era. After treating the constitution of Islam, we consider its meetings with Christianity and Judaism especially in Spain and Norman Sicily. We conclude with medieval Jewish, Christian and Islamic philosophical theologians. Integrating the presentation of text and art the lectures are all in PowerPoint.

FORMAT: Lecture and discussion

EXCLUSION: CLAS 2300, CLAS 3015, HIST 3015, RELS 2004

CLAS 3021.03: Ancient Art and Architecture from the Pyramids to the Forum.

This course offers an introduction to the art and architecture of the ancient Near Eastern and Classical worlds, with an emphasis on understanding cultures through their artistic and material remains. Various types and forms of artistic expression will be considered as they develop and change over time and space in their social, political, intellectual, and religious contexts.

FORMAT: Lecture/discussion

EXCLUSION: CLAS 2021.03

CLAS 3205.03: Fall of the Roman Republic.

This course covers the end of republican Rome and its metamorphosis into the Augustan Principate. Literary texts, read in English translation, as well as art and architecture, are considered as elements of a study of Roman political, cultural, and religious history. There is no foreign language requirement.

FORMAT: Lecture/discussion

PREREQUISITE: CLAS 1010.03, CLAS 2231.03/HIST 2090.03, CLAS 2232.03/HIST 2091.03 or permission of Instructor.

CROSS-LISTING: HIST 3020.03

CLAS 3282.03: Christian Beginnings: Catholicism.

This course will consider the formation of Catholicism (Latin Christianity) up to the 12th century in relation to the Greco-Roman context and the barbarian invasions. Moving from North Africa to Western Europe, and using a combination of text, music and artistic, architectural, and archaeological evidence, it will examine the formation of doctrine and discipline in relation to schisms, heresies and Hellenic philosophy, the origin and developments of western monasticism, the papacy, church and state relations, and the construction of liturgy. A theme will be the interplay between the centrifugal and centripetal.

FORMAT: Lecture and discussion

CROSS-LISTING: RELS 3282.03

EXCLUSION: CLAS 3280X/Y.06, CLAS 2282.03, RELS 2282.03

CLAS 3283.03: Gods in the Flesh: Iamblichus and Anselm.

Presents two opposed arguments for the union of divinity with the sensuous and human ("incarnation") and looks at one instance of how they meet: Iamblichus, On the Mysteries, Anselm, Why the God-man, Bonaventure, The Journey of the Mind into God. We shall look at how these arguments bridge the pagan / Christian, philosophy / theology / religion, Orthodox / Catholic, and Greek / Latin divides.

FORMAT: Lecture and discussion

CROSS-LISTING: RELS 3283.03

CLAS 3381.03: Medieval Philosophy from Augustine to Anselm.

A study of texts, primarily within the Latin tradition from Augustine to Anselm, but including selected writings of the Pseudo-Dionysius. Three works will normally be read in their entirety: Boethius, *Consolation of Philosophy*; Dionysius, *Mystical Theology*; Anselm, *Proslogion*. The main interest is the use and transformation of the philosophy of Plato, Aristotle, the Stoics and the Neoplatonists in this development.

FORMAT: Lecture

CROSS-LISTING: RELS 3381.03, PHIL 2381.03

EXCLUSION: CLAS 3380X/Y.06, PHIL 2380X/Y.06

CLAS 3382.03: Medieval Philosophy from Arabic and Jewish thinkers to Aquinas.

A study of texts which reflect the transformation of the ancient philosophical tradition within the works of medieval Arabic and Jewish thinkers and of the Latin Christians to whom they mediated ancient philosophy. Selections from al-Farabi, Moses Maimonides, Averroes, and Aquinas, among others will be read. Bonaventure's *The Mind's Journey into God* will be read in its entirety.

FORMAT: Lecture

PREREQUISITE: CLAS 3381 or PHIL 2381 or permission of the instructor

CROSS-LISTING: RELS 3382.03, PHIL 2382.03

EXCLUSION: CLAS 3380X/Y.06, PHIL 2380X/Y.06

CLAS 3400X/Y.06: The Dialogues of Plato.

This seminar involves the detailed study of a group of dialogues. The choice of dialogues varies from year to year.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

CLAS 3401.03: Plato.

A careful reading of a selection of Platonic dialogues. The dialogues studied will vary from year to year.

FORMAT: Seminar

PREREQUISITE: CLAS/RELS/PHIL 2365 or CLAS/RELS/PHIL 2366 or

CLAS/PHIL 2361 or CLAS/RELS 3262 or permission from instructor.

CROSS-LISTING: CLAS 5613.03

EXCLUSION: CLAS 3400.03, CLAS 5603.03

CLAS 3411.03: Augustine's *Confessions* I: Books 1-9.

This course will examine the first nine books of Augustine's *Confessions*. These 'autobiographical' books contain Augustine's account of his intellectual progress, culminating in his encounter with Platonism in book 7, followed by an account of his conversion to Christianity and his life as a Christian in books 8 and 9.

FORMAT: Seminar

CROSS-LISTING: RELS 3411.03

EXCLUSION: CLAS/RELS 3410.06

CLAS 3412.03: Augustine's *Confessions* II: Books 10-13.

This course will examine the last four books of *Confessions*. Book 10 marks the transition from autobiography to Augustine's account of his present psychological life, undertaken in order to know himself as he is known by God. Books 11-13 are an exegesis of the beginning of the book of Genesis.

FORMAT: Seminar

CROSS-LISTING: RELS 3412.03

EXCLUSION: CLAS/RELS 3410.06

CLAS 3431.03: St. Augustine's *On the Trinity* Part 1.

A study of Books 1-7 of Augustine's *De Trinitate*, in which he establishes what is the orthodox teaching about God through scripture and a consideration of the categories of substance, relation and act.

FORMAT: Seminar

CROSS-LISTING: RELS 3431.03

CLAS 3432.03: St. Augustine's *On the Trinity* Part 2.

A study of Books 8-15 of Augustine's *De Trinitate*, in which he attempts to understand what has been shown in the first 7 books (the orthodox teaching about God through Scripture and a consideration of the categories of substance, relation and act) through the distinction of *scientia* and *sapientia*.

FORMAT: Seminar

CROSS-LISTING: RELS 3432.03

CLAS 3434.03: The Ancient Origins of Political Thought: From Homer to Aristotle

This course will study the very beginnings of political thought with Greek poets, historians and educators, culminating in a careful investigation of the political writings of Plato and Aristotle. We will investigate philosophical questions about the origin of the state, the purpose of political community, the different kinds of regimes or constitutions, the common good, individual freedoms, revolution, war, wealth, poverty, and slavery.

FORMAT: Lectures/tutorials

CROSS-LISTING: POLI 3434.03, PHIL 3434.03

CLAS 3500X/Y.06: Aristotle.

This seminar involves the detailed study of either Aristotle's *Metaphysics* or *De Anima* or *Physics* or ethical and political treatises. The choice of texts varies from year to year.

RECOMMENDED: CLAS 2361.03/2362.03

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/seminar

CLAS 3501.03: Herodotus: Father of History, Father of Lies.

This course explores the conflict between Persia and the Greeks as narrated by the 'father of history/father of lies' as a story of exotic cultures, dramatic and bizarre events, and the actions of kings, despots, demagogues, warriors (with texts in English translation).

FORMAT: Seminar

CLAS 3502.03: Thucydides and the Greek World at War.

This course explores the world of warring Greek city-states, alliances and empire-building, meddling superpowers, and rival politics and politicians in the Mediterranean in the 5th Century BC as recounted by Thucydides (in English translation)

FORMAT: Seminar

CROSS-LISTING: HIST 3502.03

CLAS 3503.03: Aristotle.

A careful reading of an Aristotelian treatise, or selections from several treatises. The treatise studied will vary from year to year.

FORMAT: Seminar

PREREQUISITE: CLAS/PHIL/RELS 2365 or CLAS/PHIL/RELS 2366 or

CLAS/PHIL 2361 or CLAS/PHIL 2362, or permission from instructor

CLAS 3515.03: Greek Tragedy.

Greek tragedy was a product of the democratic society of fifth century Athens and played a vital role in the life of the community. This course explores the nature and development of the tragic genre through a study of the plays of Aeschylus, Sophocles, and Euripides in translation. The tragedies are examined as literary texts and in terms of their mythical background and cultural context. Topics to be studied include the conventions of the genre; the nature of tragic heroism; aspects of staging and performance; ancient & modern theories of tragedy.

FORMAT: Lecture/discussion

PREREQUISITE: Students must be beyond first year.

EXCLUSION: CLAS 3510X/Y.06

CLAS 3516.03: Ancient Comedy.

Ancient Comedy ranges from the boisterous and bawdy plays of Old Comedy through the domestic and romantic 'tragicomedies' of Euripides to the boy-meets-girl stories of Greek and Roman New Comedy. This course examines the origins and development of the comic genre in the Greek and Roman world through a study of the plays of Aristophanes, Euripides, Menander, Plautus, and Terence in translation. It considers the nature of comedy and its function within society as well as the basic techniques and conventions of the genre itself. Topics to be studied include the 'comic hero'; comic stereotypes; types of humor; the relationship between actor & spectator.

FORMAT: Lecture/discussion

PREREQUISITE: Students must be beyond first year.

EXCLUSION: CLAS 3510X/Y.06

CLAS 3525.03: Ancient Greek Epic.

This course is designed to introduce students to the heroic epics of the Ancient Greek world. Texts are read in translation and will be selected from the works of Hesiod, Homer, and Apollonius of Rhodes. Topics to be discussed will include the cultural background of the Homeric world; the nature of oral poetry; oral vs. literate culture; conventions of the epic genre; the heroic code; the relationship between the human and divine world.

FORMAT: Lecture/seminar

PREREQUISITE: Students must be beyond first year.

CLAS 3601.03: Arab Caliphs, Turkish Commanders, and Persian Viziers: Islamic History, 750-1200.

Please see description for HIST 3509.03 in the History section of this calendar.

FORMAT: Lecture/discussion

PREREQUISITE: HIST 2502.03 or 2503.03 or permission of instructor

CROSS-LISTING: HIST 3509.03

CLAS 3602.03: Ancient and Medieval History of the Persianate World.

Please see description for HIST 3511.03 in the History section of this calendar.

FORMAT: Lecture/discussion

PREREQUISITE: HIST 2502.03 or 2503.03 or CLAS 1010X/Y.06 or permission of instructor

CROSS-LISTING: HIST 3511.03

CLAS 3661.03: Hellenistic Philosophy: Stoics and Epicureans.

A study of philosophy in the Hellenistic Age. We will investigate the development of Greek and Roman philosophy after Aristotle, focusing on Stoicism and Epicureanism. The course covers the logic, physics, and ethics of these philosophical schools, as well as their religious dimension.

FORMAT: Seminar

PREREQUISITE: CLAS 2361.03 and 2362.03 or permission of instructor

CROSS-LISTING: RELS 3661.03

CLAS 3662.03: Hellenistic Philosophy – From Scepticism to Neoplatonism.

A study of philosophy in the Hellenistic Age. We will investigate the development of Greek and Roman Philosophy, focusing on Pyrrhonian and Academic Scepticism, as well as Middle Platonism. The course covers the logic, physics, and ethics of these philosophical schools, as well as their religious dimension.

PREREQUISITE: CLAS 2361.03 and 2362.03 or permission from instructor

CROSS-LISTING: RELS 3662.03

EXCLUSION: CLAS 4602.03, RELS 4602.03

CLAS 3700X/Y.06: Advanced Greek.

This course, which reads both a prose and a poetic work, is the normal third year course in Greek.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: CLAS 2700X/Y.06

CLAS 3710X/Y.06: Greek Epic.

A study of the Greek epic poetry of Homer and Hesiod in the original language.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: CLAS 3700X/Y.06 or permission of the instructor

CLAS 3720X/Y.06: Greek Lyric.

A study of lyric poets such as Sappho, Archilochus, Simondides in the original language.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: CLAS 3700X/Y.06 or permission of the instructor

CLAS 3730X/Y.06: Greek Drama: Tragedy.

A study of the Greek tragedians, Aeschylus, Sophocles, and Euripides in the original language.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: CLAS 3700X/Y.06

CLAS 3731.03: Greek Drama: Tragedy I.

A study of the Greek tragedians, Aeschylus, Sophocles, and Euripides in English translation.

FORMAT: Seminar

EXCLUSION: CLAS 3730X/Y.06, CLAS 3515.03

CLAS 3732.03: Greek Drama: Tragedy II.

A study of the Greek tragedians, Aeschylus, Sophocles, and Euripides in English translation.

FORMAT: Seminar

EXCLUSION: CLAS 3730X/Y.06, CLAS 3515.03

CLAS 3750X/Y.06: Greek Authors.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: CLAS 3700X/Y.06

CROSS-LISTING: PHIL 3750X/Y.06

CLAS 3760X/Y.06: Reading and Research of Greek Texts.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: CLAS 3700X/Y.06

CLAS 3780X/Y.06: Greek Historians.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: CLAS 3700X/Y.06

CLAS 3800X/Y.06: Roman Satire.

This course covers the origins and development of Latin satire, the only literary genre native to the Romans. Authors to be studied will typically include Horace, Juvenal, Lucilius and Ennius.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

CLAS 3810X/Y.06: A Study of Vergil.

A study of the development and importance of Vergil's basic themes and ideas embodied in the Aeneid. In the first part of the course special attention is given to his early work the Bucolics, where his themes begin to appear, and their development is then followed through the relevant parts of the Georgics. The main part of the course is devoted to the reading and discussion of the chief themes of the Aeneid, especially as they illustrate Roman political, religious and social ideas which have greatly influenced our own beliefs and institutions.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: CLAS 2800X/Y.06

CLAS 3820X/Y.06: Advanced Latin Literature: Augustan Poetry and Prose.

A study of selected texts of poetry and prose with an emphasis on the Augustan period. Authors studied may include Virgil, Ovid and Livy, among others. The course is primarily intended to strengthen students' command of Latin language, but attention is given to literary and historical matters as well.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: CLAS 2800X/Y.06

CLAS 3840X/Y.06: Latin Philosophical Texts.

The purpose is to give students experience in reading philosophical Latin. The texts are normally chosen from medieval authors like Anselm, Aquinas, and Bonaventure.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: First-year Latin or its equivalent

CLAS 3841.03: Latin Philosophical Texts: Aquinas.

The purpose of this course is to give students experience in reading philosophical Latin. The texts will be chosen from the works of Aquinas.

FORMAT: Seminar

PREREQUISITE: First year Latin or its equivalent

EXCLUSION: CLAS 3840X/Y.06

CLAS 3842.03: Latin Philosophical Texts: Anselm and Bonaventure.

The purpose of this course is to give students experience in reading philosophical Latin. The texts will be chosen from the works of Anselm and Bonaventure.

FORMAT: Seminar

PREREQUISITE: First year Latin or its equivalent.

EXCLUSION: CLAS 3840X/Y.06

CLAS 3850X/Y.06: Reading and Research of Latin Texts.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: CLAS 2800.06

CLAS 3900X/Y.06: Philosophy of Aristotle.

The general scope of the Aristotelian Philosophy - the understanding of nature, the City, the aesthetic experience of humanity - is considered in relation to the argument of the Metaphysics or 'First Philosophy'.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

CLAS 3910X/Y.06: Neoplatonism: Plato and Neoplatonism.

The philosophy of Plotinus and later thinkers considered as the resume of Greek Philosophy; in particular the role of Plato and other older philosophers in the formation of Neoplatonism is a principal interest. Given alternately with CLAS 3900.06.

RECOMMENDED: CLAS 2361.03/2362.03

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

CLAS 4010.03: Islamic Philosophy: al-Ghazali.

Abu Hamid al-Ghazali (1058-1111) is one of the greatest Muslim thinkers of all time. This course is an introduction to his thought, focusing on al-Ghazali's "two-tier" approach to theology - exoteric theology for the masses and esoteric theology for the select few - and on his attitude to Islamic philosophy and Islamic mysticism (Sufism).

FORMAT: Seminar

CROSS-LISTING: RELS 4010.03, CLAS 5817

CLAS 4011.03: Jewish Philosophy: Maimonides.

Moses Maimonides (1135-1204) is one of the greatest Jewish thinkers of all time. This course is an introduction to his philosophical and legal writings, with special emphasis on his famous treatise The Guide of the Perplexed. Maimonides' stance on such issues as God's incorporeality, creation, and prophecy will be compared to that of other varieties of Judaism.

FORMAT: Seminar/lecture

PREREQUISITE: Students must have completed 5 full credits of university study and RELS 2001.03 or RELS 3382.03/CLAS 3382.03/PHIL 2382.03, or permission of the instructor

CROSS-LISTING: RELS 4011.03

CLAS 4018.03: Christian Theology in the Lands of Islam: John of Damascus.

John of Damascus (d. 749) is one of the greatest Christian theologians of the Patristic age. Though he wrote in Greek, he was a Christian Arab (his Arabic name is Mansur ibn Sarjun), who lived under Muslim rule and was employed as a public official in the Umayyad administration in Damascus. The course will focus on his theological works (especially his summa of Christian theology, entitled *On the Orthodox Faith*, and his three treatises in defence of the icons), their Christian sources, and their Islamic context.

PREREQUISITE: At least one of RELS 1002.03, RELS 2004.03, RELS 2281.03, RELS 2282.03 RELS 3009.03 Foundation Year Program or permission of instructor

CROSS-LISTING: RELS 4018.03

CLAS 4019.03: Philo Judaeus.

Reconciling Jewish Scripture and Plato, Philo culminates Second Temple Jewish thought and founds the Christian treatment of Scripture. He is the most influential Jewish theologian and presents the High Priest as priest of the cosmos so he is crucial both to understand our past to carry us into the future.

FORMAT: Seminar

PREREQUISITE: At least one course at the second year or above in CLAS or RELS

CROSS-LISTING: RELS 4019.03

CLAS 4100.03: Reading and Research in Latin Texts.

Advanced reading of a Latin author or genre with attention to secondary literature and the critical reception of the works in question.

FORMAT: Seminar

PREREQUISITE: CLAS 3810X/Y.06 or CLAS 3820X/Y.06, or permission of the instructor.

CLAS 4450X/Y.06: Medieval Interpreters of Aristotle.

The course considers Latin philosophical texts of the Middle Ages. Given alternately with CLAS 4500X/Y.06.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

CROSS-LISTING: RELS 4450.06

CLAS 4500X/Y.06: Seminar on Neoplatonism.

The course considers the origin and nature of Greek Neoplatonism. Given alternatively with CLAS 4450X/Y.06.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

CLAS 4530X/Y.06: Seminar on Ancient Religion: Classical Antiquity to the Rise of Christianity.

Selected topics from the transition from Classical to Christian culture are studied. Particular attention is paid to the connection between religious innovation and the effect of the new beliefs on literature, art and philosophy.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

CROSS-LISTING: CLAS 5530X/Y.06

CLAS 4540.03: Ammianus Marcellinus and his World.

This course approaches the history and culture of the fourth century AD through its most important historian, Ammianus Marcellinus. The course will focus on (but not be limited to) a careful study of Books 14-25 of the *Res Gestae*, which span the reign of Ammianus' hero, Julian the Apostate.

FORMAT: Seminar

PREREQUISITE: CLAS 3810X/Y.06 or CLAS 3820X/Y.06 or permission of instructor.

CROSS-LISTING: CLAS 5540.03

CLAS 5613.03: Plato.

A careful reading of a selection of Platonic dialogues. The dialogues studied will vary from year to year.

FORMAT: Seminar

CROSS-LISTING: CLAS 3401.03

EXCLUSION: CLAS 3400.03, CLAS 5603.03

CLAS 5817.03: Islamic Philosophy: al-Ghazali.

Abu Hamid al-Ghazali (1058-1111) is one of the greatest Muslim thinkers of all time. This course is an introduction to his thought, focusing on al-Ghazali's "two-tier" approach to theology – exoteric theology for the masses and esoteric theology for the select few – and on his attitude to Islamic philosophy and Islamic mysticism (Sufism).

FORMAT: Seminar

CROSS-LISTING: CLAS 4010.03, RELS 4010.03

I. The Contemporary Studies Program

The world is becoming more diverse and complex, and our assumptions about it are constantly challenged. The Contemporary Studies Program tries to make sense of today's world as a whole by considering the important writers, thinkers and artists of the 19th, 20th and 21st century, both on their own terms and in relation to some of the fundamental themes of our time. The three 'core' courses give students a framework for understanding political, scientific, and aesthetic phenomena in the twentieth century. The non-required courses focus on various aspects of these often contradictory contemporary phenomena.

II. Degree Options

A. Combined Honours

The Contemporary Studies Program (CSP) offers a Combined Honours BA program offered jointly by Dalhousie University and the University of King's College. The departmental offerings in the Contemporary Studies Program at Dalhousie include the other honours subject and a number of possible electives. The other honours subject must be selected from the following list of Dalhousie departments and programs: In Arts: Canadian Studies, Classics, Creative Writing, English, French, Gender and Women's Studies, German, History, International Development Studies, Italian, Music, Philosophy, Political Science, Religious Studies, Russian, Sociology and Social Anthropology, Spanish, and Theatre. In Science: Biochemistry, Biology, Chemistry, Computer Science, Earth Science, Economics, Environmental Science, Mathematics, Microbiology and Immunology, Neuroscience, Physics, Psychology, and Statistics. Contemporary Studies can also be taken in combination with Environment, Sustainability and Society and Bachelor of Journalism (Honours) at King's.

Electives may be taken in any of the above-mentioned departments and programs, as well as in the following subjects: Early Modern Studies, and History of Science and Technology. In addition, some professors in the Dalhousie Faculty of Arts and

Social Sciences are members of the Contemporary Studies teaching staff and offer courses at King's.

All students must meet the general requirements of the Faculty of Arts and Social Sciences as detailed in the Degree Requirements section of this calendar. Students who are eligible to take an honours degree are urged to apply to the Contemporary Studies Program. Because it is an honours program, the quality of work required is higher than that required in a 15 credit minor or 20 credit major program.

Applications for admission must be made to the Dalhousie department concerned and to the Contemporary Studies Office at King's on forms available from the Registrar at either Dalhousie or King's. Students normally enroll in CTMP 2000X/Y.06 (the first "core" course) in their second year, and register for the Combined Honours program in either second or third year. For each individual student the entire degree program, including elective courses, is subject to supervision and approval by the Dalhousie department concerned and by the Director of Contemporary Studies.

All Contemporary Studies Program students are encouraged to acquire competence in languages through appropriate courses which are relevant to their degree, interests, and future plans.

The joint Dalhousie/King's Contemporary Studies program is based on the general requirement that the 20 credits required to graduate include:

1. Completion of either the King's Foundation Year Program (either the three or the four course version) or at least two appropriate first year full courses at Dalhousie:
 - Classics: CLAS 1010X/Y.06, CLAS 1100X/Y.06, CLAS 1800X/Y.06, CLAS 1700X/Y.06
 - English: ENGL 1000X/Y.06;
 - History: HIST 1004X/Y.06, HIST 1501.03, HIST 1502.03, HIST 1701.03, HIST 1702.03
 - Music: MUSC 1000X/Y.06, MUSC 1350.03 and MUSC 1351.03;
 - Philosophy: PHIL 1000X/Y.06, PHIL 1010X/Y.06;
 - Political Science: POLI 1010.03, POLI 1015.03, POLI 1020.03, POLI 1025.03, POLI 1030.03, POLI 1035.03, POLI 1100X/Y.06, POLI 1103X/Y.06;
 - Religious Studies: RELS 1001.03, RELS 1002.03;
 - Sociology and Social Anthropology: SOSA 1000X/Y.06, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200X/Y.06;
 - Mathematics: MATH 1001.03 and MATH 1002.03.
2. A minimum of 11 and a maximum of 14 credits beyond the 1000-level in the two honours subjects, but not more than eight nor fewer than five credits being in either of them.
3. The three "core" courses in Contemporary Studies: CTMP 2000.06, CTMP 3000.06, CTMP 4000.06.
4. At the conclusion of an honours program a student's record must show a grade which is additional to the grades taken to complete the required 20 full courses. In a combined honours program, students may obtain this grade in either of the honours subjects. Students fulfilling this requirement in Contemporary Studies submit a research paper and defend it at an oral examination. They must enrol in the non-credit CTMP 0455.00, the Honours Thesis Seminar.

Please Note:

Students may take an Independent Readings course only when they reach their third or fourth year. There are three options for this course, but only one full course or the equivalent may be taken in a year. No more than two full courses of this type may be taken during a CTMP degree. The permission of a member of the teaching staff and the director is necessary in order to take these courses, and their availability is strictly limited.

B. Minor in Contemporary Studies

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

III. Courses offered at the University of King's College

All courses offered in Contemporary Studies require that students have completed at least one year of university study (minimum five full credits) prior to enrolment.

NOTE: Many of these courses are not offered every year. Please consult the current timetable at www.dal.ca/online to determine whether a particular course is offered in the current year.

CTMP 0455.00: Honours Thesis Seminar in Contemporary Studies.

Students intending to complete an honours thesis are required to register in the Honours Thesis Seminar. Seminars will be held four times during the year. Students will meet with the Director to discuss the expectations and requirements of the honours thesis in preparation for a thesis defence that takes place in March. Specific topics include: selecting a topic and supervisor, thesis format, discussion of thesis proposals and application to graduate school, and scholarships.

FORMAT: Seminar

PREREQUISITE: Approval of Director required.

CTMP 2000X/Y.06: Modern Social and Political Thought: From Humanism to Anti-humanism and Back Again.

This course will examine some of the greatest works of modern political theory, literature and philosophy. We will follow the movement in Western culture over the last 200 years from humanism to anti-humanism, and highlight the seemingly endless struggle to realize a positive vision of human freedom and equality.

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture/tutorial

CTMP 2011.03/CTMP 3011.03/CTMP 4011.03: The Lecture Series.

In some years a lecture series course is offered. Students are allowed to take up to three such courses, one for each year of upper-level study. Each course will consist of six bi-weekly evening lectures given by specialists from Atlantic Canada and beyond, and a weekly two-hour seminar. The lecturers will offer students reflections on a number of contemporary issues and themes. Each year a different theme will be explored.

FORMAT: Seminar/evening lectures

EXCLUSION: CTMP 2010.06, CTMP 3010.06, CTMP 4010.06

CTMP 2100.03: The Politics of Hope: From Romanticism to Anarchism and Beyond.

A look at the connection between revolutionary political thought and nihilism: the course focuses on the history of Romanticism and anarchism, from Fichte to some colourful literary characters (German and English) to the deadly serious Russian nihilists. Our central concern is the notion of an infinite, all-powerful human freedom.

FORMAT: Lecture/tutorial

CTMP 2101.03: Apocalypse: The Revolutionary Transformation of Politics and Culture.

This course highlights the movement from revolutionary nihilism to various forms of post-revolutionary unity and integration. Beginning with Nietzsche and Dostoyevsky, the course discusses how some of the greatest contemporary thinkers (German, French, British, American) have struggled to put modern evil in the context of a larger good.

FORMAT: Lecture/tutorial

CTMP 2115.03: The Idea of Race in Philosophy, Literature, and Art.

This course focuses on contemporary conceptions and representations of race, and on their relations to culture, history, ideology, science, and everyday lived experience. We will trace the development of the modern idea of race, in relation to European colonialism and to the development of science. We will examine contemporary debates on the concept of race in the works of philosophers, writers, artists, and social activists, considering the intersections of race, class, and gender.

FORMAT: Seminar

CTMP 2121.03: Structuralism and Poststructuralism.

We will begin by exploring the work of structuralist thinkers such as Ferdinand de Saussure, Claude Lévi-Strauss, Louis Althusser, and Jacques Lacan. Their work addresses the deep structures of signs, language, political economy, cultural production, and the psyche. Structuralism had some surprising effects, such as the French protests of May 1968, when the "students took to the streets." We will consider the way poststructuralist thinkers, such as Barthes, Foucault, Deleuze, and Derrida criticize and transform structuralist interpretations of subjectivity, language and the political.

FORMAT: Seminar

CTMP 2150.03: Society, Politics, and Literature.

The contemporary era has been one wholesale transformation in all aspects of existence, including politics, economics, social relations, gender roles and definitions of the self. During the nineteenth and twentieth centuries, the possibility of individual autonomy and freedom in the face of unprecedented social upheaval has been brought into question through the novel, a literary form which came to maturity in this time. The novels read in this course have been selected for their insights into the dilemmas of an age formed by political and economic revolutions where new collective forces have been brought into play.

FORMAT: Lecture/tutorial

CTMP 2203.03: Bio-Politics: Human Nature in Contemporary Thought.

To what extent do biology and culture determine what it is to be human? Drawing on theorists ranging from Foucault to Steven Pinker, this course will examine the recent political, moral and existential issues raised by attempts to answer that question. Topics will include: evolutionary psychology, genetic screening, race, bio-engineering, and the spectre of determinism.

FORMAT: Lectures/Student Workshops

CROSS-LISTING: HSTC 2206.03

CTMP 2205.03: Totalitarianism and Science.

The question of who has authority over funding, direction and priorities of modern science is a central political concern. This course considers the case of totalitarian states (USSR and Nazi Germany) and consists of two parts. Part I analyses the essential features of totalitarian regimes. Part II concentrates on the fortune of particular sciences (medicine, biology, physics) under them.

FORMAT: Lecture/tutorial

CROSS-LISTING: HSTC 2205.03

CTMP 2301.03: Pain.

What does pain mean? This course will investigate the uses of pain in the contemporary world, and in doing so, it will approach various sites where pain matters, examining different discursive practices which attempt to speak of pain - or alternatively, claim that pain is what cannot be spoken. We will discuss the experience of the body in pain and the relation of pain to knowledge. In the interest of interdisciplinarity, it is anticipated that guest lecturers in neurophysiology will participate, as well as those from, for example, Amnesty International. Topics to be addressed will include pain in a medical context; torture and the political uses of pain; the relation between pain and privation; the expressibility of pain. Ultimately, the aim of the course is towards the question of the uses of pain in legitimizing art: we will examine two archetypes of "the tortured artist", Sylvia Plath and Jackson Pollock, and will inquire into recent theories of the sublime in art which stress the conjunction of pleasure and pain in the most heightened and extreme aesthetic experiences.

FORMAT: Seminar

CTMP 2302.03: From Zanzotto and C  lan to Senghor, Soyinka and Paz: Fifteen Perspectives Upon Contemporary Culture.

Analysis and discussion of selected works of major poets, artists and film makers of the past fifty years from around the world, including Zanzotto, Tr  nstr  mer, Mi  sz, C  lan, Bonnefoy, Elytis, Senghor, Soyinka, Mahapatra, Ting, Paz, Juarroz, and C  saire. Written texts will provide the principal basis for debate, but artwork and film will be used to render more immediate and concrete the appreciation of divergent cultural, aesthetic and ethical models (North American and British work will not be directly considered).

FORMAT: Seminar

CTMP 2303.03: Narrative and Meta-Narrative.

This course will explore twentieth-century theories of the narrative and the increasingly broad claims made for the role of narrativity in politics, psychology and literature. Starting from Lyotard's characterization of the post-modern as an incredulity towards meta-narratives, the course will look at literary narratives (for example, Balzac, Borges, Thomas Pynchon and Alice Munroe) as well as theories of the narrative (Levi-Strauss, Freud, Lacan, Lyotard, and Roland Barthes). Topics to be considered include the constitution of social narratives, possible grounds for the interpretation of narrative, the relation of narrative to ideology and the explanatory power of meta-narratives.

FORMAT: Seminar

CTMP 2304.03: Semiotics.

Semiotics is a methodological discipline that studies signs, significations, and signifying systems. Because of its interest in the production of meaning, semiotics is widely applicable and has exercised a major influence on virtually every epistemological development in the second half of the twentieth century, from Lacanian psychoanalysis to deconstruction. Some of its fields of investigation include linguistics, culture, literature, mass media, theatre, and film. Through the reading of works by de Saussure, Peirce, Morris, Jakobson, Lévi-Strauss, Barthes, Eco, and other scholars, this course will introduce students to the essential terminology and typology of semiotics. Special attention will be paid to the practical use of semiotics as a critical and analytical tool, as well as to the variety of historical and cultural contexts in which semiotics appears.

FORMAT: Lecture/seminar

CTMP 2311.03: From Symbolism and Surrealism to the New Novel and Beyond.

This course will address questions of perception, image, and presence. We will analyze the interlocking perceptions of self and world, word and image, in the literature and art of modernity, from Rimbaud and Mallarmé, Gauguin and Van Gogh, through Surrealism and Cubism, to Camus and Sartre and beyond to the new novel and new wave film, Barthes, Bonnefoy, and contemporary French women writers.

FORMAT: Seminar/lecture/tutorial

EXCLUSION: Former CTMP 4310.06 and former CTMP 2310.06

CTMP 2313.03: The Vampire: Modernity and the Undead.

Since the emergence of vampire stories in the late sixteenth century, the vampire has served as a complex symbol for forces that defy or challenge modernity. This course will examine the figure of the vampire as it appears in folklore, philosophy, fiction, poetry, film, and television. Throughout the course we will consider the works in their historical and cultural context, considering what changing ideas of the vampire can tell us about early modern and contemporary views of death, morality, national identity, sexuality, and gender.

FORMAT: Lecture/seminar

CROSS-LISTING: EMSP 2313.03

CTMP 2322.03: The Experience of Others in Philosophy, History and Literature.

This course examines some of the contemporary theories that have addressed the issue of alterity and focuses on social mechanisms of marginalizing "the other". We will raise questions such as what it means to live with others and to act responsibly in relations with others. The readings include philosophy (Heidegger, Levinas, Kristeva) as well as literature, political theory, and film.

FORMAT: Seminar

CTMP 2325.03: From the Postmodern to the Extreme Contemporary: 25 years of French Culture in the World.

This course considers the negotiation with post-modernity occurring within French culture and seeks to define what some now call the Extreme-Contemporary. A range of texts in English translation will be considered, from philosophy to the novel, from film to poetry, from the visual arts to theatre and the chanson française.

FORMAT: Lecture/seminar

CTMP 2330.03: Reflections on Death.

The texts in this course consist of literary and philosophical reflections on death, the "permanent and irreversible cessation of life" (J.M. Fischer). With references to Plato and Hegel, we will consider the ways in which death has been understood as giving meaning and structure to life. The focus will be on contemporary confrontations with "pure negativity" and on different thinkers' attempts to articulate death as an ontological condition. We will also look at representations of death in contemporary art, literature, and film.

FORMAT: Lecture/seminar

CTMP 2335.03: The Artist and Society.

A preoccupation of 20th century cultural life has been the relation between the creative artist and society. To what extent should the artist engage in the social and political currents of her/his time, or retreat into solitude? What responsibility does the artist have to society, or society to the artist? This course will examine various philosophical and artistic treatments of these themes in various social contexts. First, we shall consider the question of the artist and society in terms of ancient, early modern, and 18th and 19th century aesthetic ideas. We then turn our

attention to a number of 20th century reflections on this theme in such milieus as pre-war Europe, the Weimar Republic, Nazi Germany, post-war Japan, contemporary Canada, and 1970s Britain. The work of such thinkers and artists as Plato, Rousseau, Kant, Wilde, Mann, Arendt, Mishima, Gould and the Sex Pistols will be considered mainly through written texts, but also in art forms such as music and film.

FORMAT: Seminar

CTMP 2336.03: East Meets West in Popular Culture.

This course is devoted to examining intersections between "West" and "East" through the study of cross-cultural influences in popular literature, cinema, music, and comics in Europe, North America, China, and Japan.

CROSS-LISTING: CHIN 2052.03

RESTRICTION: Restricted to students in their 2nd year and above.

CTMP 2340.03: Theories of the Avant-Grade.

This course investigates concepts of the Avant-Garde in early 20th century futurism, expressionism, dadaism, and surrealism. We will read representative texts, including prose, poetry, drama, and manifestos as well as examine selected works from the visual arts and film. Topics for discussion include the historical Avant-Garde, the reintegration of art and life, the relations of the Avant-Garde to romanticism and modernism, the institution of art, aesthetics, the autonomy of art, and political radicalism. We will also examine the implications of theories of the Avant-Garde for the debates about the relation between modernism and postmodernism. A key theoretical text in the course is Peter Burger's *Theory of the Avant-Garde* but we will also examine selected writings by Lukacs, Brecht, Benjamin, Kracauer, Poggioli, Adorno, Bataille, Habermas, Lyotard, and Agamben.

FORMAT: Lecture/seminar

CTMP 3000X/Y.06: Science and Culture.

In the twentieth century, "Science" and "Culture" are often presented as a dichotomy. In this course we shall be examining that dichotomy, attempting to explode it by showing that science itself has a "culture" and that science is very much embedded in culture. We shall investigate disputes within sociology and philosophies of scientific method, debates around the public role of science, and the recent criticism of science and its place in society by the powerful critiques of feminism and post-modernism. A strong emphasis will be placed on case studies and seminar presentation.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/tutorial

CTMP 3103.03: Critiques of Modernity.

What is the status of the modern world? It is a source of freedom and truth or rather of the deconstruction of religion, humanity and nature. The contemporary period has defined itself in many ways through the critique of modernity. These critiques have come from an array of perspectives: philosophic, aesthetic, religious, moral, political. This course will provide a survey of a number of such critiques seeking to grasp both points of commonality, disagreement and development.

FORMAT: Seminar

CROSS-LISTING: EMSP 3203.03

CTMP 3104.03: The Rise of Nietzscheanism.

This course will show the origins and growth of Nietzsche's fame and influence from the late nineteenth century to around the middle of the twentieth, and consider his impact on many different and conflicting trends of thought, including Nazism and avant-garde art, depth psychology, existentialist philosophy and anarchistic social theory.

FORMAT: Seminar

RESTRICTION: Restricted to students in their 2nd year and above.

CTMP 3105.03: The Nietzschean Legacy.

This course surveys the influence of Friedrich Nietzsche on Western thought and culture, from the middle of the twentieth century to the present day. We will see Nietzscheanism at work in many different schools of thought, from French existentialism and American liberalism to various forms of contemporary anti-humanism and post-humanism.

FORMAT: Seminar

RESTRICTION: Restricted to students in their 2nd year and above.

CTMP 3110.03: The Dialectic of Enlightenment I.

In the course of criticizing tradition and integrating the experience of the Renaissance and the Reformation, in responding to the beginnings of modern natural science and modern political institutions, early modern Europeans sought

in diverse - and often conflicting - ways to express the self-understanding of Enlightenment. By the end of the eighteenth century, science, morality and art were seen as different realms of activity in which questions of truth, justice and taste could be separately determined, that is, evaluated according to their own specific criteria of validity. This course will consider how these differences compelled European philosophers and theologians, artists and social theorists, to develop and expand their self-understanding to the point where enlightened reason could properly reflect the formal divisions of culture and make critical judgements in relation to them. Special attention will be paid to the relationship between faith and knowledge and the growing sense of conflict between religion and secular freedom.

FORMAT: Seminar

CROSS-LISTING: EMSP 3210.03

CTMP 3113.03: Kant and Radical Evil.

This course will examine the roots of the modern conception of radical evil in the late work of Immanuel Kant. Beginning with the traditional, pre-Kantian conception of evil as merely a negative phenomenon - as a lack or privation of being - we will trace the emergence of Kant's radical innovation, his positive conception of evil as the ineradicable "knot" at the very heart of human freedom. We will also consider at some length the subsequent career of Kant's doctrine in 19th and 20th Century thought.

FORMAT: Seminar

CROSS-LISTING: EMSP 3213.03

EXCLUSION: EMSP 3630.03

CTMP 3115.03: The Dialectic of Enlightenment II.

In enlightened European culture, religion, state and society as well as science, morality and art were gradually separated from one another under exclusively formal points of view, and subordinated to a critical reason that took on the role of a supreme judge. By the beginning of the nineteenth century, many Europeans began to question the self-understanding evoked by the principle of critical reason. This course will consider how enlightened freedom and reason moved European philosophers and theologians, artists and social theorists, to conceive of themselves historically, that is, to become conscious of the dissolution of tradition, and of the need to ground the divisions of culture in ideal forms of unity derived from the tradition. The course will pay particular attention to the relationship between religion and the demand that the unifying force in culture come from a dialectic residing in the principle of enlightened reason itself.

FORMAT: Seminar

CROSS-LISTING: EMSP 3220.03

CTMP 3116.03: Heidegger: Science, Poetry, Thought.

In this course, we shall examine the complex relations that obtain in Heidegger's early and later work between science, poetry and thought. From his early identification of phenomenology as "philosophical science" to his mature insistence on the irreducibility of philosophy to science (and his new emphasis on the essential kinship of philosophy and poetry), we shall trace the contours of this powerful and inescapable path of thinking.

FORMAT: Seminar

RESTRICTION: Restricted to students in their second year and above.

CTMP 3125.03: The Concept of Memory in Late-Modernity: Commemoration, Representation, Trauma.

This course will involve an examination of the relations between memory, theory, and representation in the context of proliferating 'cultures of memory'. Differing theoretical approaches to memory from the philosophy and psychoanalysis of the 19th and 20 centuries will be explored, alongside various genres & practices of memory (political, memorial, artistic, and critical).

FORMAT: Seminar

EXCLUSION: CTMP3410.03 for the 2008/09, 2009/10, 2010/11 academic years only and CTMP3415.03 for the 2011/12 academic year only

RESTRICTION: Restricted to students in their second year and above

CTMP 3130.03: The Thought of Michel Foucault.

Historian and philosopher Michel Foucault (1926-1984) was one of the most important and controversial thinkers of the twentieth century. He developed an anti-Hegelian historical method that was indebted both to Nietzsche's "genealogical" conception of history and to structuralist accounts of language and culture. With major works on madness, the human sciences, crime and punishment, and sexuality, Foucault has influenced a wide range of disciplines from history, philosophy, and literature, to sociology, political science, and law. His work has also profoundly shaped the fields of gender studies and queer theory. This course will examine the evolution of Foucault's approach to history, as well as his highly original ideas about the relationship between knowledge, power, and

the constitution of subjectivity. Considerable attention will be devoted to his work on the history of sexuality. While our focus will be on Foucault's own writings, we will also read texts by some of his interlocutors, both critical and sympathetic.

FORMAT: Seminar

CTMP 3135.03: Reconstructing Political Modernity.

This course will examine several interpretations of early modern philosophers by 20th century authors who are original political thinkers in their own right. These interpretations have involved as much reconstruction of early modern thought as faithful scholarly commentary. Indeed, they sometimes shed more light on the interpreter than the thinkers being interpreted. Thus, we shall critically analyze the radical transformations of early modern texts that were undertaken in order to make these works relevant to social and political questions centuries later.

FORMAT: Seminar

PREREQUISITE: One of: CTMP 2000.06, CTMP 2100.03, CTMP 2101.03, CTMP 3110.03, CTMP 3115.03, EMSP 2000.06, EMSP 2440.03, EMSP 3210.03, EMSP 3220.03, EMSP 3430.03, EMSP 4000.06, PHIL 2210.03, PHIL 2220.03, PHIL 2270.03, POLI 2400.03, POLI 2410.03, POLI 2420.03 or instructor's permission.

CROSS-LISTING: EMSP 3440.03

CTMP 3145.03: Leo Strauss and his Intellectual Context.

Leo Strauss was during his own lifetime a figure of controversy and has grown more so in the thirty years since his death. In recent newspaper and academic articles, Strauss has been seen through the influence of his students ("Straussians") to be the secret intellectual source of much of the Neo-Conservative movement and in particular the policies and doctrines of the Bush White House. This course will endeavour to understand Strauss's thought in terms of his own intellectual development and in the context of the issues that were particularly formative for his thinking. The course will include the influence of Husserl upon his thought, his reflections on Zionism and the Jewish intellectual tradition during the 1920s and 30s when he was still living in Germany, his critique of Carl Schmitt, his response to the thought of Martin Heidegger, his debate with Alexandre Kojève. In short, the purpose of this course is to locate Strauss's thought in its intellectual context and thereby gain distance on the demonizing and sanctifying rhetoric that characterizes the contemporary debate about "Straussianism".

FORMAT: Seminar

CTMP 3155.03: The Question of the Animal.

In this course, we will examine theories about animality and the ontological and ethical status of nonhuman animals in philosophical and literary writings from Heidegger and Levinas to Derrida and Deleuze. We will begin with Heidegger's reflections on animality and his attempt to establish an ontological distinction between humans and animals. Next, we will consider Levinas's concept of radical otherness and the ideas of "the open" and "the anthropological machine" in Agamben. Derrida's critique of both Heidegger and Levinas will provide the transition to a discussion of recent literary and philosophical attempts to think about animals in non-anthropocentric posthumanist ways. Additional readings will include selections from Deleuze and Guattari, Haraway, Cavell, and Cary Wolfe, as well as J.M. Coetzee's novel *The Lives of Animals*.

FORMAT: Seminar

EXCLUSION: CTMP 2011.03/3011.03/4011.03 and HSTC 2011.03/3011.03/4011.03 for 2013/14 academic year only.

CTMP 3190.03: The Thought of Simone Weil.

Simone Weil (1909-1943), a "genius" of the early 20th century, was a fellow student with Jean-Paul Sartre and Simone de Beauvoir. A political activist, she taught philosophy, then worked for a year on an industrial assembly-line. She wrote brilliantly on an extraordinary range of topics. She fled the Nazi occupation of France, but died in London aged 34. This course will read and discuss a selection of Weil's essays on history, politics, literature, religion, science and philosophy.

FORMAT: Seminar/tutorial

CTMP 3192.03: The Thought of Ludwig Wittgenstein.

Ludwig Wittgenstein (1889-1951) is one of the most renowned philosophers of the twentieth century. His extraordinary influence is the result of his teaching small groups of dedicated students. Published for the most part posthumously, his writings, too, have made him a philosopher's philosopher. Nevertheless, his influence has extended well beyond the questions about the foundations of logic and language which preoccupied him. This course will explore some of the broader implications of his work, touching on music, art and architecture, on anthropology and psychology, and on ethics and religion, as well as on his central contributions to the philosophy of language and mind.

FORMAT: Seminar/tutorial
EXCLUSION: CTMP 2190.03

CTMP 3201.03: Science and Religion: Contemporary Perspectives.

Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the rise of Darwinism in the early nineteenth century to the contemporary postmodern age. From an examination of nineteenth-century "Scriptural geology" and the religious impact of Darwin's *Origin of Species* (1859), this course moves on to such contemporary topics as the religious, interpretations of quantum mechanics, the Big Bang, the anthropic principle, medical science, bioethics, evolutionary psychology, chaos theory, aesthetics in nature, science fiction and extra-terrestrial life (including SETI). Case studies of "conflict" emanating from Darwinism, the Scopes Trial and the on-going Creation-Evolution debates are contrasted with examples of harmony and interdependence between science and religion in the careers nineteenth and twentieth century scientists, along with phenomena like the new Intelligent Design (ID) movement. The religious scope of the course in intentionally wide-ranging, and examinations of science-religion interaction within native American, African and the New Age spirituality are added to treatments of traditional eastern and western religion. Special features include a focus on primary texts, the use of film and guest lectures by scientists.

FORMAT: Seminar

CROSS-LISTING: HIST 3076.03, HSTC 3201.03, RELS 3201.03

CTMP 3210.03: Intersecting Bodies, Selves and Environments.

The traditional view of the relation between humans and nonhuman nature is regarded by many as dualistic insofar as it posits not only a distinction and separation between humans and nonhuman nature but regards humans as superior to nonhuman nature, on either religious, metaphysical, moral, or even evolutionary, grounds. In this course, we examine three different strategies for overcoming this view. We begin by examining phenomenological attempts to overcome dualistic accounts of the relations between perceiver and perceived, mind and body, and mind and world. In the next section, we discuss attempts by radical ecologists to establish a nondualist view of the relation between humans and nature. In the concluding section of the course, we examine some postmodern strategies for overcoming dualistic thinking about culture and nature.

FORMAT: Seminar

EXCLUSION: CTMP 3411.03 for the 2005/06, 2003/04, 2001/02 academic years only

CTMP 3215.03: Feminism and Science.

Science has been the subject of intense scrutiny by contemporary feminist theorists. The course will examine the various feminist critiques of natural science, as well as the positive proposals that feminism has brought to science and scientific culture. Questions that will be addressed include: Is the style of science gendered? Has feminism influenced the content of various sciences? How has science contributed to gendered constructions of nature? Is there such a thing as value-free scientific research? How do feminist theories of knowledge differ from traditional understandings of scientific knowledge and scientific objectivity? The readings for this course will include work by Donna Haraway, Sandra Harding, Evelyn Fox Keller, Helen Longino, and Hilary Rose.

FORMAT: Seminar

CROSS-LISTING: HSTC 3411.03, GWST 3215.03

CTMP 3220.03: The Aesthetics of Environments.

In this course, we consider recent approaches to the aesthetic appreciation of both natural and human environments. In the first part, we will examine the role of science, perception, imagination, emotion, and ethics in the aesthetic appreciation of nature. In the second part of the course, we will discuss contemporary approaches to the aesthetics of such human environments as the city, the theme park, the garden, the shopping centre, the home and the countryside.

FORMAT: Lecture/seminar

EXCLUSION: CTMP 3415.03 for the 2005/06 academic year only

CTMP 3250.03: Nature and History.

In the nineteenth and twentieth centuries, the study of the natural world and historical thought have been closely linked. Participants in the seminar will read texts which helped to define ideas of history in the era after the Enlightenment and consider how these ideas influenced, and were influenced by, developments in scientific thought. The seminar will consider how nature and history are related in idealism, historical materialism and the thinking of the evolutionists, and how this connection is rejected by Nietzsche, Freud and Foucault.

FORMAT: Seminar

CROSS-LISTING: HSTC 3150.03

EXCLUSION: CTMP 3150.03

CTMP 3302.03: Film Theory.

This course will provide an introduction to the field of film theory and criticism. Students will be provided with the tools to interpret films using the following critical and theoretical methodologies: Classical Film Theory, Auteur Theory, Genre Theory, Semiotics, Psychoanalysis, Feminist Theory, Reception Theory, Star Studies, Critical Race Theory and Queer Theory.

FORMAT: Film screening/seminar.

EXCLUSION: CTMP 3303.06

CTMP 3304.03: Through Her Eyes: Women and the Documentary Tradition.

This course will explore the rarely examined historical and contemporary involvement of women in the field of documentary filmmaking. Women documentary makers have produced extensive bodies of engaging work that challenge many societal assumptions about gender, class, race, the function of political power, sexuality and peace-war. They have worked at every level within the process: as directors, cinematographers, editors, sound recordists, producers, writers and fund-raisers. A variety of documentaries made by women from diverse backgrounds will be screened and analyzed along with a close reading of selected critical texts. Students will identify the similarities and differences in subjects, themes, style, aesthetics, and approached to creation, production and distribution.

FORMAT: Film Screening and Seminar

CROSS-LISTING: JOUR 3304.03, GWST 3304.03

CTMP 3305.03: Modern Film and the Theory of the Gaze.

This course will develop certain aspects of the theory of the gaze in relation to a selection of films which themselves embody or express a thinking about looking. We all like to look; and we are all given over to being seen, and both these modalities have received historically unprecedented elaboration in the moving pictures. The films and theories will raise issues about visual desire, horror, paranoia, surveillance and fascination.

FORMAT: Film Screening and Lecture/Discussion

CTMP 3311.03: Culture, Politics and the Post Colonial Condition.

The term 'postcolonial' marks the historical passage of European colonial domination and national independence movements, and describes the contemporary condition of domination and struggle both in the new nations that emerged in the second half of the twentieth century and in Western metropolitan centres with their new populations. A mode of theorizing the aftermath and persistence of colonialism, it recently has been criticized for perpetuating the Eurocentric culture it intends to contest. This course will examine recent configurations of postcolonialism as political and cultural practice, focusing on debates over globalization, multiculturalism and the role of the intellectual.

FORMAT: Seminar

CTMP 3321.03: Representations of the Holocaust: Bearing Witness.

At the time when the Holocaust recedes into history, the imperative to "never forget" acquires new urgency. In this course, we focus on various modes of talking about this traumatic historical event. Can horror be accommodated in language? Is there a privileged genre that would do justice to suffering? These and other questions will arise from the examination of eye-witness accounts by camp survivors, excerpts from Holocaust diaries written in the ghetto, perpetrator testimony, works by historians, and literary works. The course includes excerpts from films, documentaries, and other video-taped material. Guest speakers will be invited for lectures, recollection, and discussion.

FORMAT: Seminar

CTMP 3322.03: Representations of the Holocaust : Remembrance.

Representations of the Holocaust: Bearing Witness is not required.

Basic knowledge of Holocaust facts and some familiarity with Holocaust literature is recommended.

This course focuses on memoirs and literary accounts of the Holocaust written several decades after the war, as well as on contemporary debates about the nature of Holocaust memory. Of special interest is the struggle of survivors' children to reckon with the burden of their parents' past. We will evaluate the ideal of individual responsibility postulated by these texts and consider the way the Holocaust has been represented in literature, film, and museum exhibits. We look

at the current phenomenon of Holocaust denial, with emphasis on anti-Semitism and white supremacy movements in Canada. Finally, we consider the politics of Holocaust memory in comparative perspectives. The course includes excerpts from films, documentaries, and other video-taped material, and illustrated lectures on Holocaust art.

FORMAT: Seminar

CTMP 3340.03: Home and Homelessness.

This course takes the current social problem of homelessness as a starting place for an inquiry into the significance of figurations of home and homelessness in the contemporary world. Home is a place of comfort and belonging; it is a domestic setting, a language, a nationality and a series of identifications which 'place' and maintain individuals. Where I am at home, I feel coincident with myself. The notion of home is opposed to key diagnoses of the modern condition--as alienated, displaced, estranged and uncanny, for example. These diagnoses have been applied both to psychological conditions and to actual social phenomena of mass displacements, refugees, immigration and exile. The social imaginary of many historically displaced groups centres around the return to or establishment of a homeland.

This course will consider literary and artistic representations of 'home', the phenomenology of 'homeliness' and of its strange double, the uncanny (unheimlich), and the stakes that post-war philosophy has in the notions of rootedness, place and dwelling.

FORMAT: Seminar

CTMP 3345.03: The Theory of the Gift.

Is it possible to give, freely, without expectation of return? That is, can generosity ever really exist? Or are we trapped in restricted economies of exchange which find us always calculating some profit to ourselves, whether in this world or the next? The problem of the possibility of generosity and altruism is of central importance to current deliberations about ethics and economics. This seminar will read its way through the modern genealogy of the thinking of the gift, beginning with its foundation in anthropological studies of so-called 'primitive' economies. It is of some interest that the modern concern with the gift appears in the guise of anthropology rather than from its well-established place in the Christian theological tradition. This course will consider the debate over the gift among anthropologists such as Mary Douglas and Marshall Sahlins, in the extraordinary theses of Georges Bataille, and will place special emphasis on the importance of the gift in the work of Jacques Derrida.

FORMAT: Seminar

CTMP 3350.03: Rewriting Gender.

Recent literature by women, both fiction and critical theory, has widely adopted innovative strategies in order to advance feminist views. These explorations have allowed female authors to question the way in which women's subjectivity has been constructed through male-oriented processes of signification. The works of fiction covered in this course, by Angela Carter, Jeanette Winterson, Leslie Feinberg, Dionne Brand, and Marjane Satrapi and others, exemplify aesthetic subversions of phallogocentric discourses. Literary texts will be supplemented with theoretical works by leading feminist/post-structuralist thinkers such as Luce Irigaray, Judith Butler, and bell hooks. The course includes video-taped material and slide-shows of postmodern feminist art.

FORMAT: Lecture/seminar

CROSS-LISTING: GWST 3350.03

CTMP 3410.03: Studies in Contemporary Social and Political Thought in the 20th Century.

Topics vary each year.

NOTE: No more than two studies courses (one full credit) can be taken for credit towards the Contemporary Studies Program. Students can enrol only once in CTMP 3410.03.

FORMAT: Seminar

PREREQUISITE: Students must complete at least two years of university study (minimum 10 full credits) prior to enrollment.

CTMP 3411.03: Studies in Contemporary Science and Technology.

Topics vary each year.

NOTE: No more than two studies courses (one full credit) can be taken for credit towards the Contemporary Studies Program. Students can enrol only once in CTMP 3411.03.

FORMAT: Seminar

PREREQUISITE: Students must complete at least two years of university study (minimum 10 full credits) prior to enrollment.

CTMP 3415.03: Studies in Contemporary Aesthetic and Critical Theories.

Topics vary each year.

NOTE: No more than two studies courses (one full credit) can be taken for credit towards the Contemporary Studies Program. Students can enrol only once in CTMP 3415.03.

FORMAT: Seminar

PREREQUISITE: Students must complete at least two years of university study (minimum 10 full credits) prior to enrollment

CTMP 4000X/Y.06: The Deconstruction of the Tradition.

This course focuses on twentieth-century thinkers and writers who have questioned fundamental concepts of Western philosophy such as identity, selfhood, representation, truth, and origin. What they all have in common is abandoning totalizing models of thinking in favor of pluralistic discourses that can accommodate radical heterogeneity. The recurrent themes of the course are: relations between philosophy and literature, intersections between the philosophical domains of ethics and aesthetics, and viability of deconstruction for political and cultural praxis. The readings include theoretical texts (Benjamin, Heidegger, Derrida, Irigaray, bell hooks, Butler, Lyotard, Levinas, Agamben, Nancy) and some works of fiction (Kafka, Borges, Camus).

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/tutorial

CTMP 4105.03: European Nihilism.

In the latter half of the nineteenth-century a number of European thinkers and writers came to sense a profound loss of meaning and significance at work in their culture. The term that was coined to describe this experience was "nihilism." The purpose of this course is to explore the thought of those who gave expression to this new phenomenon. We will begin with the literary explorations of Dostoyevsky and Baudelaire, and then turn to the thought of Nietzsche as the most complete explication of European nihilism. The course will conclude by considering the twentieth-century's most important commentator on nihilism, Martin Heidegger. In particular, the course will consider Martin Heidegger's set of lectures from the late 1930s that were published as Nietzsche. This set of lectures as reflections on Nietzsche's account of European nihilism formed, according to Heidegger's own recounting, a crucial transition in his own thought, the famous "turn" from the "early" to the "late" Heidegger. This course will examine the lecture series in the context of Heidegger's other writings at this time and his much-debated involvement with Nazism to try to understand the exact nature and import of his "turn." In all of this the course will be exploring the connections between a deep cultural experience - that of European nihilism and its social and political implications.

FORMAT: Seminar

EXCLUSION: CTMP 4410 for the 2004/2005 academic year only

CTMP 4124.03: Walter Benjamin's Materials.

Following the diversity of Benjamin's own interests: "literature, philosophy, architecture, journalism, photography, the city, film, children's toys, fashion, rubbish," we will read his essays on culture and the media alongside writings by Baudelaire, some artworks, and selections from The Arcades Project, Benjamin's collection of quotations and observations about mall life and modernity in Paris.

FORMAT: Seminar

EXCLUSION: CTMP4415.03 in the 2009/10 academic year only.

RESTRICTION: Restricted to students in their 2nd year and above.

CTMP 4125.03: Hannah Arendt: Terror, Politics, Thought.

In this course we examine the trajectory of Hannah Arendt's long path of thinking: from her early political writings (on the state of Israel, on totalitarianism), to the more theoretically ambitious writings of the 1950's and 1960's (on action, power, and the creation of political spaces), to the late work on the life of the mind (on thinking, willing, and judging). We will attempt to understand how Arendt's overarching 'love of the world' informed her thought at every stage of its development, giving rise to a powerful critique of liberal democracy and preparing the groundwork for a new 'post-totalitarian' thinking of the political.

FORMAT: Lecture/seminar

CTMP 4126.03: Kafka, Scholem, Benjamin: On Law and Crisis in 20th Century Jewish Thought.

In this course, we will examine the illuminating disagreement between Gershom Scholem and Walter Benjamin - two of the giants of 20th Century Jewish thought

- on the meaning of the Law in Franz Kafka's stories. We will see how their respective interpretive strategies have dramatically informed the theoretical landscape of contemporary Jewish and non-Jewish thought.
FORMAT: Lecture/seminar

CTMP 4130.03: The Frankfurt School: Critical Theory from Horkheimer to Habermas.

This course will focus on some of the most important and influential aspects of the critique of society developed by critical theorists from the 1930s to the 1960s. Themes and topics will include the task and methods of critical theory, reason and freedom, the role of technology in monopoly capitalism, fascism, the decline of the individual, the critique of the culture industry, and psychoanalysis. We will read selections from the works of Max Horkheimer, Theodor W. Adorno, Erich Fromm, Walter Benjamin, Herbert Marcuse and Jürgen Habermas.

FORMAT: Seminar

EXCLUSION: CTMP 3410 for the 2005/2006 academic year only

CTMP 4140.03: Phenomenology and its Legacy: Back to the 'Things Themselves'.

This course examines some of the major figures in the phenomenological movement. We begin with an examination of Edmund Husserl's attempt to establish a "radical" science of phenomenology. The method of phenomenology, the intentionality of consciousness, perception, and the *Lebenswelt* are among the topics we will consider. We then turn to various reformulations and critiques of Husserl's conception of Phenomenology in selected works from Heidegger to Derrida. Topics and concepts for discussion will include Being-in-the-world, the nature of consciousness, the lived body, temporality, the priority of otherness and hermeneutics.

FORMAT: Seminar

CTMP 4150.03: Derrida and Deconstruction.

The course studies Derrida's thought intensively - from the development of deconstruction, through his innovative exploration of works of art and literature, to his politically inflected late writings on the gift, forgiveness, and hospitality.

FORMAT: Seminar

CTMP 4200.03: Philosophies of Technology I: From Techne to Technology.

What does it mean to live in a "technological society"? In a certain sense, technology forms the very ground of what it means to be "modern". We moderns are technological beings. This course will explore the history, structure and associated problems of our coming to be technological, beginning with technical arts and instrumental reasoning of Enlightenment and industrial ideology. Post-Enlightenment critiques polarizing around the place of "machine" and alienation in Karl Marx, and in the "question concerning technology" in Martin Heidegger will then be examined, leading up to the present state of technological discourse. In each case, we shall mark the importance of contextualising the debate by examining the actual historical evolution of technology. Weekly lectures will be devoted to presenting a social and historical background to the development of modern technologies. Student-led seminars will focus on the reading of primary texts in the field.

FORMAT: Seminar/lecture

CROSS-LISTING: HSTC 4200.03

CTMP 4201.03: Philosophies of Technology II: Questions Concerning Technology.

This topical seminar course will explore in detail the implications of powerful contemporary debates concerning the meaning and place of technology. What do we mean by technology? Can there be a philosophy of technology? What are the political and cultural ramifications of going technological? Topics will include: technological determinism in history, feminist critiques, technology and development, the meaning of expertise, technology, art and the "lifeworld", social-construction vs. actor-network theory, Donna Haraway's concept of cyborg culture and the "modern technological sublime". The course will be conducted in seminar format with particular emphasis placed on the elucidation of historical and contemporary case-studies. Whenever possible, guest lecturers from the "real world" of technology will be invited to participate in class.

FORMAT: Seminar/lecture

CROSS-LISTING: HSTC 4201.03

CTMP 4301.03: Freud, Lacan and the Critique of Psychoanalysis.

Is psychoanalysis a medical practice, a method of interpretation, or an account of the social symbolic? The modern skepticism about consciousness and conscious

life is most thoroughly voiced in psychoanalytic thought as first developed by Freud and pursued in the work of Jacques Lacan. This course will consider the question of the modern psyche, the nature of symbolic practices in art and literature, and the construction of libidinal economies in society. The central question of the course will concern the way in which the individual subject is incorporated in symbolic practices. The recent attacks on Freud and Freudian methodologies will also be considered.

FORMAT: Seminar

CTMP 4302.03: Recent French Feminist Theory.

This course will concentrate on some of feminism's most challenging voices, those that have emerged from France at the end of the last century Kristeva, Cixous and Irigaray. The course will attempt to illuminate the intellectual background against which these women write, particularly in the areas of linguistic and anthropological structuralism, and in psychoanalytic theory. The course will be organized in part by the historical evolution of feminist thought, in part by the consideration of central feminist concerns.

FORMAT: Lecture/tutorial

CROSS-LISTING: GWST 4402.03

EXCLUSION: Former CTMP 2030.06 and 4300.06

CTMP 4315.03: Psychoanalysis and Politics.

Freudian psychoanalysis and its Lacanian successor have added new dimensions to the analysis of contemporary political issues. In the mid-twentieth century Sigmund Freud's theory of the unconscious was drawn upon to supplement liberal and Marxist analyses of fascism. Lacanian psychoanalysis has recently been employed in the understanding of nationalism, ethnic conflict and religious fundamentalism through such categories as identification, recognition and trauma. The course will begin with some key texts by Freud and Lacan, and then move to a consideration of recent examples of the conjunction of psychoanalytic and political theory.

FORMAT: Seminar

CTMP 4330.03: Ethics after the Holocaust.

Shortly after World War II ended, thinkers such as Arendt, Adorno, and Buber reflected on the causes of the Jewish genocide and its impact on humanity. It has taken decades, however, for others (such as Fackenheim, Habermas or Derrida) to confront "Auschwitz." In this course, we will inquire into the challenges the Holocaust poses to philosophy, to ethics in particular. The thinkers discussed reflect on the collapse of traditional ethical systems in the wake of National Socialism. In various ways and in different religious and cultural contexts, they try to find an alternative moral foundation for life "after Auschwitz."

FORMAT: Seminar

CTMP 4410.03: Special Topics in Contemporary Social and Political Thought in the 20th Century.

The Special Topics courses focus on one author or one particular school of thought in an interdisciplinary context.

NOTE: No more than two special topics courses (one full credit) can be taken for credit towards the Contemporary Studies Program. Students can enrol only once in CTMP 4410.03.

FORMAT: Seminar

PREREQUISITE: Students must complete at least 2 years of university study (minimum 10 full credits) prior to enrollment.

CTMP 4411.03: Special Topics in Contemporary Science and Technology.

The Special Topics courses focus on one author or one particular school of thought in an interdisciplinary context. Topics vary each year.

NOTE: No more than two special topics courses (one full credit) can be taken for credit towards the Contemporary Studies Program. Students can enrol only once in CTMP 4411.03.

FORMAT: Seminar

PREREQUISITE: Students must complete at least 2 years of university study (minimum 10 full credits) prior to enrollment.

CTMP 4415.03: Special Topics in Contemporary Aesthetic and Critical Theories.

The Special Topics courses focus on one author or one particular school of thought in an interdisciplinary context. Topics vary each year.

NOTE: No more than two special topics courses (one full credit) can be taken for credit towards the Contemporary Studies Program. Students can enrol only once in CTMP 4415.03.

FORMAT: Seminar

PREREQUISITE: Students must complete at least 2 years of university study (minimum 6 full credits) prior to enrollment.

CTMP 4510.03/4511.03/4515X/Y.06: Independent Readings in Contemporary Studies.

In a reading course the student is assigned to a member of staff for regular meetings to discuss readings in a selected area. Papers and research projects are expected.

FORMAT: Individual instruction

PREREQUISITE: Honours registration in Contemporary Studies and permission of the instructor and director.

Please note: Students may take an Independent Reading course only when they reach their third or fourth year. Only one full course or the equivalent may be taken in a year. No more than two full courses of this type may be taken during the course of study.

I. Early Modern Studies Program

What is the meaning of modernity? What are its origins? Is modernity to be embraced as a source of freedom or rejected as destructive of both nature and humanity? These provocative and challenging questions are addressed in the Early Modern Studies Program (EMSP), which explores the nature of modernity through a study of its origins and development in European culture from the 16th to early 19th centuries, a time of spectacular upheaval.

The Early Modern Studies Program (EMSP) is offered jointly by Dalhousie University and the University of King's College. This program brings together established departmental offerings in the arts and social sciences at Dalhousie and joins these with Early Modern Studies courses - including a required 'core' course for each upper year of study - at King's. The King's portion of this intercampus degree program consists of interdisciplinary courses taught by specialists from a number of academic fields. The intention is to provide students with a many-sided yet unified introduction to the study of European culture from the sixteenth to the early nineteenth century.

The interdisciplinary offerings within the EMSP at King's count as one of two honours subjects or toward one of two minors. EMSP courses are designed so that important figures and developments of the period may be considered on their own terms and in relation to other important aspects of the period. This will often involve consideration of the differences between the Early Modern and other historical periods of the west, and the contrasts with non-European cultures in the Early Modern period. Emphasis will be placed in core courses and electives upon encounters between European and non-European peoples and cultures in the early modern period. The three core courses together with the honours seminar are intended to give students a framework for understanding philosophical, scientific, moral, social, institutional, and aesthetic phenomena in the Early Modern period. The non-required courses focus on diverse aspects of and explanations for the complex and interlocking developments in Early Modern culture. Many of them pursue at greater depth questions introduced in the core courses.

Aside from preparing undergraduates for future more specialized training at the graduate or professional level, the EMSP is intended to provide them with a broad overview of the Early Modern period. Students are encouraged to relate the various aspects of Early Modern thought and culture to one another and to develop independent insights into the nature of this historical period. It is also hoped that

EMSP students will take an active role in organizing certain events each year, including lectures, debates, and exhibitions.

II. Degree Programs

A. Combined Honours

The departmental offerings within EMSP at Dalhousie include the other honours subject and a number of possible electives. The other honours subject must be selected from the following list of Dalhousie departments and programs: Canadian Studies, Classics, Creative Writing, English, French, Gender and Women's Studies, German, History, International Development Studies, Italian Studies, Music, Philosophy, Political Science, Religious Studies, Russian Studies, Sociology and Social Anthropology, Spanish, Sustainability, Theatre or any of the BSc Honours subjects. Electives may be taken in any of the above-mentioned departments and programs as well as in the following: Contemporary Studies and History of Science and Technology. In addition, a number of courses in the Dalhousie Faculty of Arts and Social Sciences have been cross-listed with Early Modern Studies, and some Dalhousie faculty members participate in Early Modern Studies courses at King's.

Students who are eligible to take an honours degree should apply to the EMSP and the other department or program concerned as early as possible. All students must meet the requirements of the Faculty of Arts and Social Sciences as detailed in the Degree Requirements section of this calendar, [page 125](#). Because it is an honours program, the quality of work required in it is higher than that required in a 15 credit minor or 20 credit major program.

Applications for admission must be made to the Dalhousie department concerned and to the Early Modern Studies office at King's on forms available from the Registrar at either Dalhousie or King's. Students should apply to the program and seek advice on course selection before registering for the second year. If this is not done, it may be necessary to make up some work not previously taken. For each individual student, the entire degree program, including elective courses, is subject to supervision and approval by the Dalhousie department concerned and by a member of the Early Modern Studies teaching staff.

All EMSP students are encouraged to acquire competence in languages through appropriate courses which are relevant to their degree, interests, and future plans.

The joint Dalhousie/King's Early Modern Studies Program is based on the general requirement that the 20 full credits needed to graduate include:

1. Completion of **either** the King's Foundation Year Program (either the three or the four credit version) **or** at least two appropriate first year full credits at Dalhousie which involve the study of pre-nineteenth century ideas or institutions (that is, Classics, CLAS 1010X/Y.06, CLAS 1100X/Y.06, CLAS 1700.06, CLAS 1800.06; English, ENGL 1000X/Y.06; History, HIST 1701.03, HIST 1702.03; Music, MUSC 1000X/Y.06, MUSC 1350.03, MUSC 1351.03; Philosophy, PHIL 1000X/Y.06, PHIL 1010X/Y.06; Political Science, POLI 1010.03, POLI 1015.03, POLI 1020.03, POLI 1025.03, POLI 1030.03, POLI 1035.03, POLI 1100X/Y.06, POLI 1103X/Y.06; Religious Studies, RELS 1001.03/1002.03; Sociology and Social Anthropology, SOSA 1000X/Y.06, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200X/Y.06; Mathematics, MATH 1001.03 and MATH 1002.03).
2. A minimum of 11 and a maximum of 14 credits beyond the 1000 level in the two honours subjects, but not more than eight nor fewer than five full credits being in either of them.
3. The three 'core' courses in Early Modern Studies: EMSP 2000.06, EMSP 3000.06, EMSP 4000.06.
4. An honours qualifying examination (see Degree Requirement: BA, BSc Combined Honours (4 year)). Early Modern Studies students may choose to acquire this additional grade in either honours subject. In the Early Modern Studies Program, completion of the Honours Seminar (EMSP 4500.06) fulfills the requirement of the honours qualifying examination; or, with the approval of the director, an honours thesis (in conjunction with EMSP 4550.06) may also serve to fulfill the requirement of the honours qualifying examination.

Students will be eligible to take an 'Independent Reading' course only when they reach their third or fourth year. There will be six options for this course, but only one full credit or the equivalent may be taken in a year. No more than two full credits of this type may be taken during an EMSP degree. The permission of a member of the teaching staff and the Director of the program is necessary in order to take one of these courses, and their availability is strictly limited.

A course offered by the EMSP that is also cross-listed to another program or department must be taken as an EMSP course if it is to count towards the fulfillment of the normal requirements of no fewer than four credits in each of the two honours subjects in a combined honours degree in EMSP (see section 2 above).

B. Minor in Early Modern Studies

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

III. Courses Offered at the University of King's College

All courses in the Early Modern Studies Program require students to have completed at least one year of university study (maximum five credits) prior to enrolment.

Note: Not all courses are offered every year. Please consult the current timetable.

EMSP 2000X/Y.06: Structures of the Modern Self.

Central to what distinguishes modernity from the ages preceding it was the development of a new conception of the self. This course traces the history of the modern self in its cultural expressions from its beginnings in the Renaissance. The developing and often diverse explorations of the self in the Early Modern period will be considered through an examination of the philosophic and literary texts as well as other aesthetic phenomena. To help provide a sense of what the modern self implies, continual reference will be made to its relation to social and economic developments, to a changing perception of gender, to the encounter of Europe to the non-European world, and to institutional authority, particularly governmental and ecclesial.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lectures/tutorials

PREREQUISITE: Either King's Foundation Year Programme or two first-year credits at Dalhousie which involve the study of pre-19th century ideas or institutions

EMSP 2011.03/EMSP 3011.03/EMSP 4011.03: The Lecture Series.

In some years a lecture series course is offered. Students are allowed to take up to three such courses, one for each year of upper-level study. Each course will consist of six bi-weekly evening lectures given by specialists from Atlantic Canada and beyond and a weekly two-hour seminar. The lecturers will offer students reflections on a number of contemporary issues and themes. Each year a different theme will be explored.

FORMAT: Seminar/evening lectures

EXCLUSION: CTMP 2010.06, CTMP 3010.06, CTMP 4010.06

EMSP 2210.03: Deconstruction in the Renaissance: Montaigne's Essays and their legacy.

In this course, we will read selections from Montaigne's Essays at length. We will consider his relationship to the Ancients, Renaissance humanism, skepticism and how his thinking evolves throughout the long apprenticeship of the Essays. We will also look at some of the history of Montaigne's reception by readers such as Shakespeare.

FORMAT: Seminar

EMSP 2220.03: The Voice of Satire: Rabelais, Cervantes, Voltaire, Satire..

This course will cover several examples of Early Modern Satire, ranging from Cervantes' Don Quixote, to Rabelais' Gargantua and Pantagruel, to scathing works of 18th century British satire, as exemplified by Pope and Swift. We will consider novels, poems, theatre, journalism and visual media such as caricatures.

FORMAT: Seminar

EMSP 2230.03: Picture and Poetry in Early Modern Culture.

Early modern artists and thinkers were fond of the Latin phrase, *ut pictura poesis*, which means, "as in painting, so in poetry." Ben Jonson for example argued that "poetry and picture are arts of a like nature, and both are busy about imitation." The objective here will be to test the validity of such claims with reference to early modern visual art and literature. Are poets and painters engaged in the same field of representation? Do they adopt parallel strategies of representation? Do they interpret and organize social energies in similar ways?

FORMAT: Seminar

EMSP 2240.03: Themes in Early Modern Science, Metaphysics and Epistemology.

This course covers the period from Descartes through Kant and is structured around a study of themes in science, epistemology and metaphysics as they evolved in this period. Although the themes to be covered may vary somewhat, on the philosophical side the main ones will be a selection from the following: theories of representation, theories of perception, theories of concepts and abstract ideas, theories of knowledge and the issue of scepticism (proofs of God and of the external world), metaphysics and ontology, causality, and doctrines of logic and method. What makes the Early Modern period so intellectually fascinating is that philosophy and science, empirical studies and a priori studies, are interwoven. We shall look at some parts of the tapestries that resulted, especially in the area of cognitive science, especially in Descartes, but also including physics and mathematics, and the contributions of other philosophers of the period.

The course starts from the premise that the ideas of these philosophers are to be taken seriously as contenders for philosophical truth. Accordingly we will use the methods of analytic philosophy, both conceptual analysis and argument reconstruction, to bring these theories into the most favourable light, then use whatever methods are available to us to critically assess them. The amount of reading material will not be large but what there is will be the subject of close study. Written assignments, papers, class participation and term tests will be the method of evaluation.

FORMAT: Seminar

EMSP 2250.03: The Myth of Modernity in Goethe's Faust.

The Faust myth can be described as the myth of modernity itself: The ideas of human self-realization and progress are under debate in the story of the German scholar Dr. Faustus who in his pact with the devil transgresses the boundaries that nature, religion and society imposed on mankind. Unquestionably the most famous representation of this modern myth is Goethe's *Faust*. Written over a period of sixty years (1772–1832), Goethe's *opus magnum* broadens the focus of the original myth to portray the central ambiguities and controversies presented by the modern age. His Faust is the story of modern man at large, successful, egotistical, torn, alienated, driven, in search of truth and totality, a man who in the course of his life becomes spectacularly guilty, and in the end is spectacularly (and controversially) redeemed. Faust's journey through the world traces major developments of the Western world from the sixteenth to the early nineteenth century, developments that still shape today's world.

FORMAT: Seminar

EMSP 2260.03: The Philosophes, the *Encyclopédie* and Enlightenment Movement.

This course explores the range, depth and commitment of the work of several leading figures of the eighteenth-century intellectual movement that came to be known as *Les Lumières* in France, the *Enlightenment* in Scotland, *Aufklärung* in Germany, and *Illuminismo* in Italy. The course takes a primary interest in the French *philosophes*, writers, and thinkers who contributed directly to the *Encyclopédie*, but some consideration will also be given to the movement in these other European countries. Course readings will include a nucleus of articles from the *Encyclopédie*, *ou Dictionnaire Raisonné des Sciences, des Arts et des Metiers*, whose publication was overseen by Denis Diderot and Jean le Rond d'Alembert from 1751-1772, augmented by a host of other works of major philosophical, scientific, aesthetic, cultural, and historical importance.

FORMAT: Seminar

PREREQUISITE: Students must complete 30 credit-hours before registering in this class

EMSP 2270.03: Endless Romance.

The great medieval genre of romance both endured and metamorphosed in the Early Modern period. This course will consider the important transformation of romance in the period by concentrating on two main texts, Spenser's *The Fairy Queen*, and Cervantes' *Don Quixote*. The course will begin by looking at a few paradigmatic late medieval romances of the fifteenth century, including portions of Sir Thomas Malory's *Le Morte D'Arthur*, and the Spanish romance by Martorel, *Tirant lo blanc*. The main texts will then be considered as examples of the extraordinary reception of the genre, as continuation, elaboration and allegorization in the case of Spenser, and as the foundation of the novel in the case of Cervantes. Central themes such as quest, errancy, and desire will be considered; there will be a limited number of readings on the theory of romance (Frye, Bakhtin, Parker). In conclusion, we will briefly consider much later manifestations of romance, in the work of the romantic poets.

FORMAT: Seminar

EMSP 2280.03: Friedrich Schiller's Historical Drama.

Friedrich Schiller's five historical dramas range over Early Modern Europe from the Hundred Years War to the Thirty Years War, and find settings in medieval Switzerland and France, as well as Counter-Reformation Spain and Elizabethan England. These five plays will be analyzed according to lyrical, theatrical, historical and aesthetic criteria.

FORMAT: Seminar

CROSS-LISTING: GERM 2280.03

EMSP 2290.03: German Romanticism: From Goethe to Hegel.

Romanticism begins by overthrowing conventional literary rules and attitudes. It demands scepticism towards received religious doctrine and practice. Genuine feeling and political liberation are enhanced by attention to classical antiquity and modern folktale. Apparently a reaction against the modern, from Goethe to Hegel, Romanticism manages to eclipse almost everything else.

FORMAT: Seminar

CROSS-LISTING: GERM 2290.03

EMSP 2310.03: Women and Gender in Early Modern Science.

This course will explore the roles of women, and questions about women's nature, in the development of Early Modern science. The course will consider several interrelated aspects of scientific culture in the sixteenth, seventeenth, and eighteenth centuries: first, we will look at the place of women in the scientific institutions of the time. Although women were, for the most part, excluded from universities and scientific academies, some women were able to do scientific work through their participation in salons and craft guilds. The second part of the course will look at the contributions of some particular women to the fields of physics, astronomy, botany, and medicine. We will then examine how science interpreted sex and gender. We will pay special attention to the biological sciences and their treatments of sex differences, conception, and generation. We will consider how these biological theories were influenced by, and at the same time used to uphold, various political and social structures. Finally, the course will explore the ways in which gender and nature were portrayed in the broader cultural context. We will, for example, discuss the ways in which women were depicted as scientists and as symbols of science in art and literature.

FORMAT: Lecture/seminar

CROSS-LISTING: GWST 2310.03, HSTC 2310.03

EMSP 2313.03: The Vampire: Modernity and the Undead.

Since the emergence of vampire stories in the late sixteenth century, the vampire has served as a complex symbol for forces that defy or challenge modernity. This course will examine the figure of the vampire as it appear in folklore, philosophy, fiction, poetry, film, and television. Throughout the course we will consider the works in their historical and cultural context, considering what changing ideas of the vampire can tell us about early modern and contemporary views of death, morality, national identity, sexuality, and gender.

FORMAT: Seminar

CROSS-LISTING: CTMP 2313.03

EMSP 2320.03: Witchcraft in Early Modern Europe.

The period of European history from 1500 to 1800 saw the rise of modern science and philosophy. It was also a period in which thousands of witch trials and executions were carried out. This course will seek to understand how these seemingly contradictory developments could have occurred simultaneously. The course will examine changing conceptions of the witch and witchcraft in their historical, intellectual, cultural, religious, and political contexts. Questions that will be addressed include: How did the Renaissance interest in magic influence the Early Modern understanding of witchcraft? What impact did concerns about popular religion have on the witch trials? What constituted evidence that someone was a witch? What did Early Modern scientists think about witchcraft? The course will pay special attention to Early Modern notions of gender and sexuality and their influence on the witch hunts and witch trials.

FORMAT: Lecture/tutorials

CROSS-LISTING: GWST 2320.03, RELS 2420.03

EMSP 2330.03: Nature Imagined: Literature and Science in Early Modern Europe.

The Scientific Revolution of the sixteenth, seventeenth, and eighteenth centuries brought about massive changes in the scientific world view. These changes also had a great influence on the literature of the period. Some writers were entranced by the new natural science, and sought to disseminate its principles and lionize its

most significant figures. Other writers were harshly critical of the emerging notions of scientific progress and domination of nature. This course will examine the ways in which science was portrayed in Early Modern poetry, prose, and drama, in an attempt to understand how the new science, and new conceptions of nature, were understood and received in the broader philosophical and cultural context.

FORMAT: Lecture/seminar

EXCLUSION: EMSP 2340.03 and HSTC 2340.03

EMSP 2340.03: The Origins of Science Fiction in Early Modern Europe.

In 1500, literate Europeans lived in a bounded, geocentric universe. By 1800, the sun had replaced the earth at the centre of a limited planetary system situated in infinite space. These changes prompted Early Modern philosophers, scientists and writers to consider the possibility that the universe might contain a plurality of worlds. This course will explore the ways in which the "plurality" theme was developed in some of the earliest works of science fiction. We will consider this theme as it appears in stories of intergalactic voyages, utopian societies, and encounters with extraterrestrial beings, paying special attention to the ways in which Early Modern writers used these tales to speculate on philosophical, political, and scientific issues.

FORMAT: Lecture/seminar

CROSS-LISTING: HSTC 2340.03

EXCLUSION: EMSP 2330.03

EMSP 2350.03: The Body in Early Modern Europe.

This course will explore how the emergence of the modern self intersected with changing conceptions of the body. We will explore such topics as the rise of Renaissance anatomy; Early Modern perceptions of gender, race, and sexual difference; new explanations of madness and melancholy; monstrous and demonic bodies; representations of the diseased body; and the emergence of the modern ideal of the disciplined body.

FORMAT: Lecture/tutorial

EMSP 2360.03: Magic, Heresy and Hermeticism: Occult Mentalities in the Scientific Revolution.

The "Scientific Revolution" is ordinarily construed as the triumph of reason over superstition, of science over sorcery. This course argues that the rhetoric of "Enlightenment" conceals a deep continuity between modern science and the occult traditions of the Middle Ages and the Renaissance. The prototype of the experimental scientist is the Faustian magus. We investigate the role of Hermeticism, magic, and the occult in the scientific revolution and the persistence of these esoteric currents in later movements, from German Naturphilosophie to Jungian psychology.

FORMAT: Lecture/tutorial

CROSS-LISTING: HSTC 2120.03, HIST 2990.03

EMSP 2410.03: Imagining the Other: The Portrayal of the Non-European World in Early Modern Culture.

Europeans' encounter with non-European cultures in the early modern period shaped national economies, political power, and European self-understanding. Confrontation with non-European societies reinforced hegemonic, reflective, and self-critical aspects of European culture. The course analyzes how writers and artists implicitly engaged in clarifying and criticizing European identity as they came to terms with non-Europeans. The texts and images derive from Portuguese, Italian, Spanish, English, French, and Dutch sources from the late middle ages to the end of the eighteenth century. The contexts include Southeast Asia, India, Africa, North and South America, Polynesia, and purely imaginary settings.

FORMAT: Colloquium

EMSP 2420.03: Virtue, Vice, and the Commercial Society in Early Modern Literature.

An important development in Early Modern Europe is the emergence of the commercial society in the seventeenth and eighteenth centuries. The increasing power of the state, the rising middle class, and growing trade within and without Europe were accompanied by significant changes in religious, social, and political thought. The course will consider literary works by authors who grappled with the moral implications of the growth of commercial society in Europe, particularly in England at the beginning of the eighteenth century. The purpose of the course is to explore these complex changes in morality and society through the close examination of texts by authors such as Daniel Defoe, Bernard Mandeville, and Jonathan Swift. These authors sought to understand and to some extent criticize the notion of a society chiefly devoted to the acquisition of economic wealth. Furthermore, they employed literary genres such as travel literature and satire to

explore the changing conceptions of virtue and vice in Europe, thus presenting often ambiguous treatments of commercial society. The theoretical justifications of commercial society in the thought of Hobbes and Locke will first be considered to provide a framework for discussion. As well, reference will be made throughout to other philosophical and artistic works of the period. Comparisons between the texts will be emphasized in written assignments and seminar presentations.
 FORMAT: Lecture/seminar

EMSP 2430.03: The Pursuit of Happiness in Early Modern Culture.

A central preoccupation in early modern European culture, particularly in the eighteenth century, was that of the attainment of happiness in one's private life and in society in general. Happiness was seen as the highest good by some thinkers - as arguably reflected, on a political level, in the American constitution - while others argued against the identification of happiness with goodness. This course will examine various literary and philosophical texts in which the pursuit of happiness in its diverse senses is an important theme. Depictions of the happy life as well as philosophical and literary critiques of the primacy given to happiness will be discussed.

FORMAT: Lecture/seminar

EMSP 2440.03: Providence, Progress, Degeneration: Early Modern Ideas of Historical Transformation.

Against the background of works of both Renaissance historians and seventeenth-century state-of-nature theorists, eighteenth-century authors developed new theories of multi-staged historical existence. Readings may include selections from authors such as Vico, Rousseau, Voltaire, Smith, Gibbon, Lessing, Kant, and Herder.

FORMAT: Lecture/seminar

EMSP 2450.03: The East is Read: Early Modern Conceptions of Asian Thought.

This course will consider Early Modern European interpretations of key Asian texts. The reactions of Early Modern thinkers to the "Oriental World," as it was known, reflect the philosophical concerns of Europeans at different times in the Early Modern period. For example, Enlightenment thinkers sometimes used Asian ideas to criticize European traditions, whereas post-Enlightenment philosophers of history tended to depict the non-Western world as less free or progressive than Western European cultures. Not surprisingly, then, Early Modern conceptions of Asia were often crude or idealized. We will assess both the merits of early modern interpretations of Asian thought and what these interpretations reveal about the self-consciousness of European thinkers in the Early Modern period.

FORMAT: Seminar

CROSS-LISTING: CHIN 2080.03

EMSP 2460.03: Images of Modernity in Cinema: Early Modern Stories on Film.

This course is intended to introduce students to the history and culture of European and Asian societies from the sixteenth to early nineteenth centuries through the study of film. The motion pictures to be screened dramatize such events, themes, and/or stories as the Protestant Reformation, Shakespearean drama, the decline of chivalry in France and Japan, French Absolutism, the wild child phenomenon, and cross-cultural encounters in the Americas and South Pacific. Each week will include both a film screening and relevant lecture and discussion. The films may include such titles as *A Man for All Seasons* (1966), *Henry V* (1989), *Amadeus* (1988), *The New World* (2005), *Seven Samurai* (1954), *Cyrano de Bergerac* (1990), *Aguires: The Wrath of God* (1972), *Black Robe* (1991), *The Wild Child* (1970), *The Bounty* (1984), and *Ridicule* (1996). Selected primary and secondary documents will be assigned to supplement the films. No prior knowledge of early modern history and culture is assumed.

FORMAT: Lecture/discussion/film screening

EMSP 2470.03: Visions of Renaissance Political Thought in Film.

Renaissance political thought has been successfully adapted to films set in various imagined contexts. This course will examine the creative intersections between the political ideas in Renaissance texts and film adaptations in such settings as Renaissance England, feudal Japan, and modern-day Britain and the United States. The films may include such titles as *The Godfather I and II*, *Edward II*, *Richard III*, *Ran*, *Throne of Blood* and *The Revengers Tragedy*.

FORMAT: Film Screening and Lecture/Discussion

EMSP 2480.03: The Pirate and Piracy.

This course will examine early modern historical, philosophical, and literary accounts of pirates and piracy. It will also trace ancient and medieval precursors to these early modern treatments as well as consider later representations—literary and cinematic—of early modern piracy and implications for contemporary piracy.

FORMAT: Lecture/discussion

CROSS-LISTING: HIST 2750.03

EMSP 3000X/Y.06: The Study of Nature in Early Modern Europe.

This course provides an overview of the major changes and continuities of representation of the natural world in the sixteenth, seventeenth and eighteenth centuries. It seeks to recover the Early Modern understanding that the study of nature is incomprehensible if isolated from new techniques and technologies and from the philosophical and artistic disciplines. Because developments in the study of nature in this period are relative to institutional place and national location, the principal elements of the social, economic, political and cultural contexts within which scientists and philosophers of nature worked will be considered. As well, the aesthetic representations of nature and its study will be a theme throughout the course.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lectures/tutorials

EMSP 3203.03: Critiques of Modernity.

What is the status of the modern world? Is it a source of freedom and truth or rather the deconstruction of religion, humanity and nature. The contemporary period has defined itself in many ways through the critique of modernity. These critiques have come from an array of perspectives: philosophic, aesthetic, religious, moral, political. This course will provide a survey of a number of such critiques seeking to grasp both points of commonality, disagreement and development.

FORMAT: Seminar

CROSS-LISTING: CTMP 3103.03

EMSP 3210.03: The Dialectic of Enlightenment I.

In the course of criticizing tradition and integrating the experience of Renaissance and the Reformation, in responding to the beginnings of modern natural science and modern political institutions, Early Modern Europeans sought in diverse – and often conflicting – ways to express the self-understanding of Enlightenment. By the end of the eighteenth century, science, morality, and art were seen as different realms of activity in which questions of truth, justice, and taste could be separately determined, that is, evaluated according to their specific criteria of validity. This course will consider how these differences compelled European philosophers and theologians, artists and social theorists, to develop and expand their self-understanding to the point where enlightened reason could properly reflect the formal divisions of culture and make critical judgements in relation to them. Special attention will be paid to the relationship between faith and knowledge and the growing sense of conflict between religion and secular freedom.

FORMAT: Seminar

CROSS-LISTING: CTMP 3110.03

EMSP 3213.03: Kant and Radical Evil.

This course will examine the roots of the modern conception of radical evil in the late work of Immanuel Kant. Beginning with the traditional, pre-Kantian conception of evil as a merely negative phenomenon - as a lack or privation of being - we will trace the emergence of Kant's radical innovation, his positive conception of evil as the ineradicable "knot" at the very heart of human freedom. We will also consider at some length the subsequent career of Kant's doctrine in 19th and 20th Century thought.

FORMAT: Seminar

CROSS-LISTING: CTMP 3113.03

EXCLUSION: EMSP 3630.03

EMSP 3220.03: The Dialectic of Enlightenment II.

In enlightened European culture, religion, state, and society as well as science, morality, and art were gradually separated from one another under exclusively formal points of view, and subordinated to a critical reason that took on the role of a supreme judge. By the beginning of the nineteenth century, many Europeans began to question the self-understanding evoked by the principle of critical reason. This course will consider how enlightened freedom and reason moved European philosophers and theologians, artists and social theorists, to conceive of themselves historically, that is, to become conscious of the dissolution of tradition, and of the need to ground the divisions of culture in ideal forms of unity derived from the tradition. The course will pay particular attention to the relationship

between religion and the demand that the unifying force in culture come from a dialectic residing in the principle of enlightened reason itself.

FORMAT: Seminar

CROSS-LISTING: CTMP 3115.03

EMSP 3230.03: Impersonations: Theatre, Performance and Identity in Early Modern England.

In his celebrated "Oration on the Dignity of Man," Pico della Mirandola glorified man's ability to "transform himself into what he most wills, taking like a chameleon the colour of all those things to which he is most nigh." For Pico as for many Early Modern thinkers, human subjects were distinguished less by preordained identities than by an actor-like ability to fashion and perform new selves. In Early Modern England, the burgeoning commercial theatre became a focal point for cultural debates about the social and ethical ramifications of this performative construction of the self. This course will explore these debates both as they relate to the growth of the professional theatre and in terms of their wider implications for Early Modern English society. We will begin by looking at the roles traditionally played by performance in the affirmation of identities both aristocratic and plebeian. We will then go on to examine a number of plays from the main genres performed in English public theatres between 1590 and 1640. By reading these plays alongside primary sources from conduct manuals to statutes for theatre governance, and from playwrights' celebrations of their art to Puritans' attacks on the theatre's degeneracy, we will consider the huge range of cultural responses to the relationship between performance and identity in a rapidly shifting social order. Special attention will be paid to the interrogations of class, gender, sexuality, and morality implied in these works, and to their far-reaching effect on English society before and after the closure of the public theatres in 1642.

FORMAT: Seminar

EMSP 3240.03: Opera and the Idea of Enlightenment.

This course explores opera's emergence and development as a dominant Western art form during and after the Early Modern period. Through close analysis of key works, we will strive to understand how opera's fusion of music, drama, poetry and visual spectacle reflected-and helped to shape-changing ideals of enlightenment.

FORMAT: Screenings/Lecture/Discussion

EMSP 3250.03: Atheism in Early Modern Europe.

Although atheism continues to be a source of controversy and debate, one of the most significant features of the modern world is the extent to which religious unbelief has become accepted as a morally and intellectually defensible position. This course will seek to understand the rise of modern atheism by examining its origins in the Early Modern world.

FORMAT: Lecture/tutorial

CROSS-LISTING: RELS 3250.03

EMSP 3310.03: Hidden Worlds: Microscopy in Early Modern Europe.

Microscopes were introduced into Europe at the beginning of the seventeenth century. In the words of Robert Hooke, the microscope opened up a "new visible World" to the understanding -- a strange new landscape populated by vast numbers of new creatures. This course will explore the influence the microscope, and the micro - world that it opened up, in the development of Early Modern science. In the first part of the course, we will take a close look at early microscope technology and its evolution in the seventeenth, eighteenth, and early nineteenth centuries. The second part of the course will explore the role of the microscope in the evolution of Early Modern science. We will, for example, consider the role of microscopy in the emergence of the new mechanical philosophy and the new experimental science. We will also discuss the histories of some scientific theories (for example, of contagion and generation) that made particular use of observations made with microscopes. Finally, the microscope's revelation of "new worlds" raised conceptual difficulties that puzzled scientists and philosophers alike. In the final part of the course we will consider the challenges that new kinds of experience raised for Early Modern philosophy, as well as the possible influence of philosophical debates on the acceptance of the new technology.

FORMAT: Seminar

CROSS-LISTING: HSTC 3310.03

EMSP 3321.03: In Search of the Philosopher's Stone: The History of European Alchemy.

This course traces the development of alchemical theories and practices in the Medieval Latin West up to the emergence of early modern chemistry. It employs a multi-disciplinary approach which treats the scientific, technological, esoteric and

iconographic dimensions of alchemy as interdependent. The entire development of European alchemy is covered from the transmission of the Greek and Islamic alchemical traditions in the 12th century up to Newton, whose alchemical theories represent a point of transition to early modern chemistry in one direction, and to a more spiritualised occult philosophy in the other.

This course is independent of HSTC 3120.03. All students interested in the intersections of science, magic and mysticism are welcome.

FORMAT: Lecture/seminar

CROSS-LISTING: HIST 3990.03, HSTC 3121.03

EMSP 3330.03: Science and Religion: Historical Perspectives.

Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the dawn of civilization to the end of the eighteenth century, with a special focus on the Early Modern period. From an examination of the biblical view of nature and ancient Babylonian astrology and divination, this course moves through a treatment of the centrality of theology to Medieval science on to natural theology and the "Watchmaker" Design Argument of the seventeenth and eighteenth centuries. Models of conflict, harmony and complementarity offered to characterize relations between science and religion are explored through case studies such as Galileo's controversy with the Church and instances where religious belief inspired scientists like Boyle and Newton. Claims that certain confessional traditions (notably Protestantism and its dissenting offshoots) facilitated the rise of modern science are also appraised. Science-religion relations are examined both from the standpoint of mainstream religion and with respect to religious heterodoxy, prophecy, alchemy, magic, and witchcraft. This course employs examples from eastern and Islamic cultures in addition to the Judeo-Christian tradition. Special features include a focus on primary texts and guest lectures by scientists.

FORMAT: Seminar

CROSS-LISTING: HSTC 3200.03, HIST 3075.03

EMSP 3340.03: Knowledge is Power: Francis Bacon and the Birth of Modernity.

Modern western culture draws close connections between three facets of human experience: a) our knowledge of nature; b) our visions of what it is to be human; and c) power, or the political, social, and technological means by which we relate the first two: nature and human nature. The Renaissance period (roughly 1400-1630) was highly influential in laying the foundations for such modern connections, even as it seems to us to be a period rather different from our own. We will examine those connections in an exploration primarily of the work of Francis Bacon (1561 - 1626).

FORMAT: Seminar/lecture

CROSS-LISTING: HSTC 3205.03

EMSP 3420.03: Religious Warfare and Political Theology in the Early Modern Period.

The sixteenth and seventeenth centuries in Europe witnessed tremendous upheavals in society, in part caused by religiously based strife. Many thinkers responded to these events by formulating "political theologies", i.e., interpretations of religious teachings especially as contained in scripture with a view to assessing the political consequences of religion and to harmonizing religious interpretations with a particular conception of political life. We shall examine various Continental European and British texts of the Early Modern period which are both timely and thoughtful reflections on Christian teachings as they relate to and sometimes conflict with the philosophical underpinnings of the modern state and religious freedom.

FORMAT: Seminar

CROSS-LISTING: RELS 3010.03

EMSP 3430.03: Theories of Punishment: Retribution and Social Control in Early Modern Thought.

Among the distinctive characteristics of Early Modern thought are new conceptions of retribution and social control. In this course, we shall examine a number of texts which reflect the diversity of philosophical and theological approaches to law and punishment, both human and divine. We begin with a consideration of pre-modern and/or non-Western approaches to these issues. We then explore the various Early Modern reactions to and departures from these approaches, including the writings of Protestant thinkers and political philosophers before, during, and after the Enlightenment. Finally, we shall consider Foucault's "normalization thesis" to see if it illuminates our understanding of Early Modern thought on punishment.

FORMAT: Seminar

EMSP 3440.03: Reconstructing Political Modernity.

This course will examine several interpretations of Early Modern philosophers by twentieth-century authors who are original political thinkers in their own right. These interpretations have involved as much reconstruction of Early Modern thought as faithful scholarly commentary. Indeed, they sometimes shed more light on the interpreter than the thinkers being interpreted. Thus, we shall critically analyze the radical transformations of Early Modern texts that were undertaken in order to make these works relevant to social and political questions centuries later.

FORMAT: Seminar

PREREQUISITE: One of: CTMP 2000.06, CTMP 2100.03, CTMP 2101.03, CTMP 3110.03, CTMP 3115.03, EMSP 2000.06, EMSP 2440.03, EMSP 3210.03, EMSP 3220.03, EMSP 3420.03, EMSP 3430.03, EMSP 4000.06, PHIL 2210.03, PHIL 2220.03, PHIL 2270.03, POLI 2400.03, POLI 2410.03, POLI 2420.03, or instructor's permission.

CROSS-LISTING: CTMP 3135.03

EMSP 3450.03: Common Tragedy: Catastrophe, Loss and Ambition in Early Modern Europe.

Modern consciousness can be defined by new visions of death, loss and ambition. As modernity emerges and "matures", so do writings on catastrophe. Writings from the catastrophic fourteenth - century, the seventeenth - century plague, and the 1755 Lisbon earthquake provide insight into shifts and continuities between late medieval and modern senses of the self.

FORMAT: Lecture

EXCLUSION: EMSP 3630.03 for the 2006/07 academic year only

EMSP 3510X/Y.03/3511.03/3515X/Y.06/4510.03/4511.03/ 4515X/Y.06: Independent Readings in Early Modern Studies.

In a reading course the student is assigned to a member of staff for regular meetings to discuss readings in a selected area. Papers and research projects are expected. Only one full credit or the equivalent may be taken in a year. No more than two full credits of this type may be taken during the course of study.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Individual instruction

PREREQUISITE: Honours registration in Early Modern Studies, permission of the instructor and the Director of the Programme. Restricted to students in 3rd year and above.

EMSP 3610.03: Studies in Early Modern Subjectivities.

In this course, students will explore a focused topic in an interdisciplinary context. Topics vary each year. Some of the topics are "Empirical Selves and Transcendental Selves in German Idealism", "Freedom and Necessity in Enlightenment Debates about the Self", "Self Portrait in Literature and the Visual Arts", and "Reformation and Subjectivity in Early Modern Thought".

NOTE: Not more than one of each course number can be taken for credit towards the Early Modern Studies Program.

FORMAT: Lecture/discussion

EMSP 3620.03: Studies in Early Modern Natural Philosophy.

In this course, students will explore a focused topic in an interdisciplinary context. Topics vary each year. Some of the topics are "Teleology", "Exploration and Early Modern Natural Philosophy", and "Mathematics and Metaphysics in the Seventeenth Century".

NOTE: Not more than one of each course number can be taken for credit towards the Early Modern Studies Program.

FORMAT: Lecture/discussion

EMSP 3630.03: Studies in Early Modern Social and Political Thought.

In this course, students will explore a focused topic in an interdisciplinary context. Topics vary each year. Some of the topics are "States of Nature in Early Modern Political Thought", "The Seventeenth-Century Discovery of Sovereignty", "The Concept of the State", and "Apocalyptic Thought in the Early Modern Period".

NOTE: Not more than one of each course number can be taken for credit towards the Early Modern Studies Program.

FORMAT: Lecture/discussion

EMSP 3640.03: Studies in Early Modern Aesthetics.

In this course, students will explore a focused topic in an interdisciplinary context. Topics vary each year. Some of the topics are "The Quarrel of the Ancients and Moderns", "The Status of the Artist in Society", and "Storm and Stress".

NOTE: Not more than one of each course number can be taken for credit towards the Early Modern Studies Program.

FORMAT: Lecture/discussion

EMSP 4000X/Y.06: Conceptions of State, Society, and Revolution in the Early Modern Period.

This course involves close examination of political works by important and influential writers from the sixteenth to early nineteenth centuries. These writers reflected on historical changes and events in their day - including the disunity of Italy, the Protestant Reformation, the English civil war, the Glorious Revolution, the rise of bourgeois society, the French Revolution, and the Napoleonic wars - and sometimes formulated complex and sophisticated accounts of human society, sometimes to provide for social and political stability, sometimes to promote freedom and justice. We shall trace the development of their ideas, from philosophical and literary investigations into human nature and contractual theories of society to considerations on political life in relation to philosophy of history. Assigned texts will include works by such authors as Machiavelli, Shakespeare, Hobbes, Milton, Locke, Swift, Montesquieu, Rousseau, Lessing, Goethe, Kant, Burke, Wellstonecraft, Schiller, and Hegel.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

EMSP 4300.03: Nature and Romanticism.

Kant's "Copernican Revolution" in philosophy, ironically, marked a resurrection of a full-blown "idealist" philosophy of nature. This course will investigate the attempts of Kant's followers to construct a natural philosophy and its engagement with the rival mechanical world picture. It explores the implications of this endeavour for the growth of romanticism, vitalism and our modern picture of "nature". It begins with an examination of the ambiguous heritage presented by Kant's writings on nature and proceeds through the attempts to develop a complete program of idealist Naturphilosophie and its spread throughout European thought by the medium of romanticist art and natural philosophy.

FORMAT: Lecture/tutorial

CROSS-LISTING: HSTC 4300.03

EMSP 4310.03: Newton and Newtonianism.

This seminar involves a close study of the work of Isaac Newton, along with that of his supporters and detractors. Beginning with an overview of pre-Newtonian science, topics range from Newton's rejection of Cartesianism through his contributions to mathematics, physics, astronomy and optics, along with his inductive scientific method, laws of motion, and calculus priority dispute with Leibniz. Also considered are lesser-known aspects of his career, such as his secretive pursuit of alchemy, his heretical theology, his attempts to unravel the Apocalypse, his role in British statecraft, and his autocratic rule of the Royal Society. A taxonomy of the forms of Newtonianism that emerged after Newton's death also allows an exploration of iconographical and apologetic uses of Newton, and his differing legacies in the Britain and France. This seminar concentrates on primary readings, including Newton's *Principia* (1687), *Opticks* (1740), alchemical treatises and unpublished theological papers, as well as the Leibniz-Clarke correspondence (1717), anti-Newtoniana and eighteenth-century popularizations of Newtonianism such as Voltaire's *Philosophical letters* (1733) and Maclaurin's *Account of Newton's discoveries* (1748). Attention is paid to the social, cultural, and political aspects of Newtonianism and no prior knowledge of science is required.

FORMAT: Seminar

CROSS-LISTING: HSTC 4400.03

EMSP 4500X/Y.06: Honours Seminar in Early Modern Studies: The Development of Aesthetic Theory in the Early Modern Period.

While the arts have been a topic of theoretical concern since antiquity, it is only in the Early Modern period that aesthetics emerged as an independent field of inquiry. This seminar will consider how the various understandings of the arts with which the Early Modern period began developed into the independent field of aesthetics. Throughout the course, art and literature of the period will be studied in conjunction with theoretical texts.

This course may be designated as fulfilling the honours qualifying examination requirements for an EMSP Combined Honours BA (see section 6 of Degree

Program above). Students are also welcome to take this course as an elective with the permission of the instructor.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: Honours registration in Early Modern Studies or permission of the instructor. Restricted to students in 3rd year and above.

EMSP 4550X/Y.06: Honours Thesis in Early Modern Studies: Reading and Research.

In this course the student is assigned to a member of staff for regular meetings to discuss readings and present research for the purpose of completing an honours thesis in Early Modern Studies.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Individual instruction

PREREQUISITE: Honours registration in Early Modern Studies, permission of the instructor, and the Director of the Program

EMSP 4610.03: Special Topics in Early Modern Subjectivities.

The Special Topics courses focus on one author or one particular school of thought in an interdisciplinary context. Topics vary each year. Some of the topics are "Montaigne", "Interiority in Shakespeare", and "Jansenism and the Self".

NOTE: Not more than one of each course number can be taken for credit towards the Early Modern Studies Program.

FORMAT: Seminar

EMSP 4620.03: Special Topics in Early Modern Natural Philosophy.

The Special Topics courses focus on one author or one particular school of thought in an interdisciplinary context. Topics vary each year. Some of the topics are "Leibniz", "Goethe's Natural Science", and "Experimentalism".

NOTE: Not more than one of each course number can be taken for credit towards the Early Modern Studies Program.

FORMAT: Seminar

EMSP 4630.03: Special Topics in Early Modern Social and Political Thought.

This Special Topics courses focus on one author or one particular school of thought in an interdisciplinary context. Topics vary each year. Some of the topics are "Hobbes", "Machiavelli and Reason of State Theories", and "Milton and Early Modern Political Theory".

NOTE: Not more than one of each course number can be taken for credit towards the Early Modern Studies Program.

FORMAT: Seminar

EMSP 4640.03: Special Topics in Early Modern Aesthetics.

The Special Topics courses focus on one author or one particular school of thought in an interdisciplinary context. Topics vary each year. Some of the topics are "Sterne and British Empiricism", "Romanticism as a European Phenomenon", and "Hegel's Aesthetics".

NOTE: Not more than one of each course number can be taken for credit towards the Early Modern Studies Program.

I. Introduction

The study of English includes both analysis of texts and awareness of contexts. The texts proposed for analysis in various English courses will range from the traditional to the contemporary; English is a discipline which can and does adjust to include writings by Tomson Highway, Toni Morrison, and Chinua Achebe alongside works by Chaucer, Shakespeare, Milton, Austen, and the rest. The wide range of human experience represented in these texts can provide the student with what Kenneth Burke has called “equipment for living.” In more practical terms, the discipline of English fosters the development of various human skills: it requires the student to think, and to use language with clarity, judgment, and imagination.

But individual works of literature are also related in various ways to their social, cultural, and political contexts. For this reason, curiosity about a particular text often leads to enquiries that touch upon history, philosophy, politics, religion, biography, and the fine arts as well. The written text turns out to be a link between an individual sensibility and the rest of the world. The value of English studies therefore, though difficult to measure, can be discovered both in the large semiologies of the cultures to which we belong, and in the smallest nuances of the language we use.

The calendar descriptions below describe all English courses. Not all are offered in any given year. **Students should consult the English Department website for updated information about which courses are offered this year, and to get detailed descriptions of courses (with booklists).** There is a variety of first-year (1000-level) English courses to suit all inclinations and needs, and all sections with a number ending in -0 can be used to fulfill the University Writing Requirement. Once the first year is complete, students may register in any course at the 2000 or 3000 level, but should ensure that they have the necessary prerequisites (most courses require a full credit in English at the 1000 level, or else Theatre 1000 or King’s Foundation Year, but a few are open to anyone with a Writing Requirement course in any discipline). The wide-ranging 2000 level courses are well suited to those concentrating in English, or studying it as a complement to their main area, or taking it as an elective. The smaller and more historically-focused 3000 courses are also open to both majors and non-majors. More intensive seminars at the 4000 level are mainly intended for students in their third and fourth years of an English Majors or Honours program. Two of the half-credit surveys (2001, 2002, 2003, 2004, 2005, 2006) and one of the half-credit theory courses (3000, 3001, 3002) are required of all English 15 credit minor, 20 credit Majors, and 20 Credit Honours students. All of these courses are described in detail at <http://www.dal.ca/english>.

II. Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, [page 125](#) of this calendar.

A. BA with Honours in English

Students must meet the faculty requirements for honours, which include nine to 11 credits (one credit = six credit hours) in English above the 1000 level; within these nine to 11 credits, students must take the following:

1. at least one of 3000.03, 3001.03 or 3002.03
2. at least two (one full credit) of the six 2000-level surveys (ENGL 2001.03, 2002.03, 2003.03, 2004.03, 2005.03, 2006.03)
3. at least one full credit in each of the following two groups
 - a) Old English, Middle English, Renaissance (ENGL 2018.03, 2020.03, 2214.06, 3005.03, 3007.06, 3008.03, 3010.03, 3011.03, 3015.03)
 - b) Restoration, Eighteenth-Century, Romantic, Victorian, American (pre 1914) (ENGL 3017.03, 3019.03, 3020.03, 3022.03, 3025.06, 3029.03, 3031.03, 3032.03, 3040.03, 3061.03, 3062.03)
4. 4990.00 English Honours Capstone (non-credit course)
5. five half credits at the 4000 level

To be considered for the Honours program, students must attain a 3.3 avg. GPA in upper-level English courses, and apply to the English Department Chair.

B. BA with Combined Honours

Students must meet the faculty requirements for combined honours degrees, which include at least five and no more than eight credits in English above the

1000 level (at least 11 to a maximum of 14 in both subjects. Among the English courses, students must take:

1. at least one of 3000.03, 3001.03 or 3002.03
2. at least one (half credit) of the six 2000 level surveys (ENGL 2001.03, 2002.03, 2003.03, 2004.03, 2005.03, 2006.03)
3. at least three credit hours (or one half credit) in each of the following two groups
 - a) Old English, Middle English, Renaissance (ENGL 2018.03, 2020.03, 2214.06, 3005.03, 3007.06, 3008.03, 3010.03, 3011.03, 3015.03)
 - b) Restoration, Eighteenth-Century, Romantic, Victorian, American (pre 1914) (ENGL 3017.03, 3019.03, 3020.03, 3022.03, 3025.06, 3029.03, 3031.03, 3032.03, 3040.03, 3061.03, 3062.03)
4. 4990.00 English Honours Capstone (for students weighting their programs towards English)
5. nine credit hours (or three half credits) at the 4000 level

To be considered for the Honours program, students must attain a 3.3 average GPA in upper-level English courses, and apply to the English Department Chair.

C. BA (20 credit) Major in English

Students must meet the faculty requirements, which include six to nine credits in English above the 1000 level, including three credits above the 2000 level; within these six to nine credits, they must take the following:

1. at least one of 3000.03, 3001.03 or 3002.03
2. at least two (full credit) of the six 2000 level surveys (ENGL 2001.03, 2002.03, 2003.03, 2004.03, 2005.03, 2006.03)
3. at least one full credit in each of the following two groups:
 - a) Old English, Middle English, Renaissance (ENGL 2018.03, 2020.03, 2214.06, 3005.03, 3007.06, 3008.03, 3010.03, 3011.03, 3015.03)
 - b) Restoration, Eighteenth-Century, Romantic, Victorian, American (pre 1914) (ENGL 3017.03, 3019.03, 3020.03, 3022.03, 3025.06, 3029.03, 3031.03, 3032.03, 3040.03, 3061.03, 3062.03)
4. One half credit at the 4000 level

D. Double Major

Students must meet the requirements for the double major, which include 10 - 14 credits in the Major subjects above the 1000 level (no more than eight and no fewer than five in either). Students must take at least two credits above the 2000 level in each subject. Among their English courses, students must take:

1. at least one of 3000.03, 3001.03 or 3002.03
2. at least one (half credit) of the six 2000 level surveys (ENGL 2001.03, 2002.03, 2003.03, 2004.03, 2005.03, 2006.03)
3. at least three credit hours (or one half credit) in each of the following two groups
 - a) Old English, Middle English, Renaissance (ENGL 2018.03, 2020.03, 2214.06, 3005.03, 3007.06, 3008.03, 3010.03, 3011.03, 3015.03)
 - b) Restoration, Eighteenth-Century, Romantic, Victorian, American (pre 1914) (ENGL 3017.03, 3019.03, 3020.03, 3022.03, 3025.06, 3029.03, 3031.03, 3032.03, 3040.03, 3061.03, 3062.03)
4. three credit hours (or one half credit) at the 4000 level

E. BA (15 credit) Minor in English

See requirements for minor in the College of Arts and Science section of this calendar ([page 128](#)).

F. Minor in English

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

G. Emphasis in Canadian Studies

English students interested in obtaining an emphasis in Canadian Studies along with their major in English should consult the Canadian Studies calendar entry for information on requirements and for a list of English courses approved with Canadian Studies.

H. Creative Writing Program

The Creative Writing program in the Faculty of Arts and Social Sciences is not restricted to FASS students, and allows any Dalhousie student interested in writing fiction, poetry, dramatic narrative (playwriting), and narrative non-fiction to take four full credits in creative writing above the first-year level, thus combining these courses with his or her major or honours area of study. Therefore, the program

would fulfill a BA (20 credit) Double Major program with creative writing as the secondary area, or a BA (20 credit) Combined Honours program with creative writing as a secondary area.

• Program Requirements

- CRWR 2000.06 (The Creative Process)
- 12 credit hours from:
 - CRWR 3000.03 (Poetry)—20 students (cap)
 - CRWR 3001.03 (Fiction)—20 students (cap)
 - ENGL 3098.03 (Creative Writing: Poetry I)—24 students (cap)
 - ENGL 3099.03 (Creative Writing: Fiction I)—24 students (cap)
 - Theatre 3600.06 (Playwriting)—15 students (cap)
 - Journalism 3440.03X/3441.03Y (Narrative Non-Fiction at University of King's College)—25 students (cap)
- six credit hours from:
 - CRWR 4000.06 (Advanced Poetry)—20 students (cap)
 - CRWR 4001.06 (Advanced Fiction)—20 students (cap)
 - CRWR 4002.06 (Advanced Playwriting)—15 students (cap)
 - CRWR 4003.06 (Advanced Narrative Non-Fiction)—25 students (cap)
- six additional credit hours at or above the 2000 level.

Note: If you are taking the Creative Writing Program, CRWR 2000 is a prerequisite for any of the third year seminars. Also, if you are taking the program, ENGL 3098.03 is a prerequisite for CRWR 3000.03 and ENGL 3099.03 is a prerequisite for CRWR 3001.03.

Students interested in Creative Writing but not completing the program may enter individual third year CRWR seminars with the instructor's permission.

III. Course Descriptions

ENGL 1010.03, 1020.03, 3000.03, 3001.03, 3002.03, and 4990.00 are offered every year, as are most of the six 2000 level surveys (ENGL 2001-2006). Other courses may not be offered every year. **Please consult the department's website to determine this year's course offerings.**

English Courses at the 1000 level

The study of English at the 1000 level is an occasion to read, discuss, and write about works of literature, as well as other forms of verbal and visual culture. All English courses at the 1000 level emphasize the variety and excitement of thinking in the verbal arts, and they all deploy techniques for analyzing and writing about texts.

In addition to these general goals, any full-credit course, or any two half-credit courses in English at the 1000 level with a number ending in -0 will fulfill the College of Arts and Sciences requirement for a Writing Course. The same course or courses will fulfill the College of Arts and Sciences Languages and Humanities requirement, as well as serving as the pre-requisite for upper-level courses in English (where these are required).

In addition to fulfilling the above mentioned requirements, students are free to take more courses in English at the 1000 level.

It is important to remember when you are choosing more than one 1000 level course how they relate to one another. English 1010.03 and English 1020.03 are complementary single term, half-credit courses, between them covering the genres of prose, poetry, and drama that the full-credit course English 1000.06 covers in fall and winter term. Each section of these three courses has a different instructor and a different variety of older and contemporary literary texts. English 1011.03 will be taught together with 1010.03, and English 1021.03 together with 1020.03: these smaller sections will be offered for those who want to take the subject matter of 1010 or 1020, but without taking them as Writing Requirement courses. Because of the overlap of subject matter (the study of genres), you cannot take 1000 and any of the set 1010, 1011, 1020, or 1021 in order to count more than one credit towards a degree.

English 1040.03 (Reading Popular Culture) and English 1050.03 (Pulp Fiction) differ from the genre courses just discussed in terms of their subject matter and critical approach. They also have non-writing requirement versions (English 1041 and English 1051), and they can be taken by themselves or together with English 1000 or English 1010, 1011, 1020, 1021.

In addition to these courses focusing on the analysis of literary texts, the English Department offers English 1100.03, Writing for University Students. This course prepares students to write analytic and research papers. The focus of this course is on the principles and practice of composition and not on the analysis of works of

literature. In combination with any of the other 1000 level half-credit courses in English with a number ending in -0 (that is, 1010, 1020, 1040, or 1050), it fulfills the Writing Requirement.

As an aid to choosing courses at the 1000 level, students should consult the detailed description of each course available on the English Department's web site. Some examples of patterns of course choice that would allow fulfillment of the Writing Requirement and the humanities distribution requirement, and would allow all three half-credit courses to be counted for credit, would include 1010, 1020, and 1041; or 1100, 1020, and 1011; or 1050, 1100, 1021; and so on.

ENGL 1000X/Y.06: Introduction to Literature.

This course has two broad but connected objectives: (a) to introduce students to the advanced study of literature in English; (b) further to develop students' literacy skills so that they will be more critical and responsive readers and more exact and imaginative writers. The texts to be studied will differ from section to section, but all sections will explore a variety of authors, genres, national literatures, and time periods. Students can expect to read writers from William Shakespeare to William Gibson, from George Eliot to George Eliot Clarke, and from Jane Austen to Jack Kerouac. Practice in writing is carried on throughout the year in regular essays. For a more complete description of all sections and of texts, students should consult the Departmental website.

ENGL 1000.06 will satisfy the University Writing Requirement and serve as prerequisite for entry into most upper-level courses.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion. ✍ Writing Requirement.

EXCLUSION: ENGL 1010.03, ENGL 1020.03

ENGL 1010.03: Prose and Fiction: Writing Requirement.

This course shares with its complement, ENGL 1020.03, two broad but connected objectives: (a) to introduce students to the advanced study of literature; (b) to develop students' literacy skills further so that they will be more critical and responsive readers and more exact and imaginative writers. Terminology and concepts central to literary studies will be introduced. The course will consider the effect of genre, and it will focus on non-fictional prose (such as essays and autobiography) and fiction (such as short stories and novels). Both recent and early examples of various genres will be explored. Please consult the full description of each section on the departmental website to find the one best suited to your interests. Explicit instruction in clear and forceful writing is an important component of this course.

NOTE: Any two of ENGL 1010.03, ENGL 1020.03, ENGL 1040.03, ENGL 1050.03, or ENGL 1100.03 will satisfy the University Writing Requirement and serve as prerequisite for entry into most upper-level English courses.

FORMAT: Lecture/tutorial. ✍ Writing Requirement.

EXCLUSION: ENGL 1000, ENGL 1011

ENGL 1011.03: Prose and Fiction: non-Writing Requirement.

This course shares with its complement, ENGL 1021.03, two broad but connected objectives: (a) to introduce students to the advanced study of literature; (b) to develop students' literacy skills further so that they will be more critical and responsive readers and more exact and imaginative writers. Terminology and concepts central to literary studies will be introduced. The course will consider the effect of genre, and it will focus on non-fictional prose (such as essays and autobiography) and fiction (such as short stories and novels). Both recent and early examples of various genres will be explored. Please consult the full description of each section on the departmental website to find the one best suited to your interests. This is the non-Writing Requirement version of the course. For the WR version see ENGL 1010.

FORMAT: Lecture/discussion

EXCLUSION: ENGL 1000, ENGL 1010

ENGL 1020.03: Poetry and Drama: Writing Requirement.

This course shares with its complement, ENGL 1010.03, two broad but connected objectives: (a) to introduce students to the advanced study of literature; (b) to develop students' literacy skills further so that they will be more critical and responsive readers and more exact and imaginative writers. Terminology and concepts central to literary studies will be introduced. The course will consider the effect of genre, and focus on drama and various forms of poetry. Both recent and early examples of various genres will be explored. Please consult the full description of each section on the departmental website to find the one best suited

to your interests. Explicit instruction in clear and forceful writing is an important component of this course.

FORMAT: Lecture/discussion. ✍ Writing Requirement.

PREREQUISITE: Any two of ENGL 1010.03, ENGL 1020.03, ENGL 1040.03, ENGL 1050.03, or ENGL 1100.03 will satisfy the University Writing Requirement and serve as prerequisite for entry into most upper-level English courses.

EXCLUSION: ENGL 1000, ENGL 1021

ENGL 1021.03: Poetry and Drama: non-Writing Requirement.

This course shares with its complement, ENGL 1011.03, two broad but connected objectives: (a) to introduce students to the advanced study of literature; (b) to develop students' literacy skills further so that they will be more critical and responsive readers and more exact and imaginative writers. Terminology and concepts central to literary studies will be introduced. The course will consider the effect of genre, and focus on drama and various forms of poetry. Both recent and early examples of various genres will be explored. Please consult the full description of each section on the departmental website to find the one best suited to your interests. This is the non-Writing Requirement version of the course. For the WR version see ENGL 1020.

FORMAT: Lecture/discussion

EXCLUSION: ENGL 1000, ENGL 1020

ENGL 1040.03: Reading Popular Culture: Writing Requirement.

This course introduces students to methods of analyzing forms of cultural expression. It engages students in the serious study of diverse creative media including film, television, literature, video games, electronic texts, jokes, advertising, graffiti, cartoons, song lyrics and consumer goods. Explicit instruction in clear and forceful writing is an important component of this course. For the non-WR version, see ENGL 1041.

FORMAT: Lecture/discussion/✍ Writing Requirement

EXCLUSION: ENGL 1041.03

ENGL 1041.03: Reading Popular Culture: non-Writing Requirement.

This course introduces students to methods of analyzing forms of cultural expression. It engages students in the serious study of diverse creative media including film, television, literature, video games, electronic, texts, jokes, advertising, graffiti, cartoons, song lyrics and consumer goods. This is the non-Writing Requirement version of the course: For the WR version, see ENGL 1040.

FORMAT: Lecture/discussion

EXCLUSION: ENGL 1040.03

ENGL 1050.03: Pulp Fiction: Writing Requirement.

This course provides an entry point to the discussion of literature through 'pulp' genres such as romance, mystery/crime, the Western, sci-fi/fantasy, horror, sports literature, and comic books. It is available in Writing-Requirement and non-Writing Requirement versions. Explicit instruction in clear and forceful writing is an important component of this course. For the non-Writing Requirement version, see ENGL 1051.

FORMAT: Lecture/discussion. ✍ Writing Requirement

EXCLUSION: ENGL 1051.03

ENGL 1051.03: Pulp Fiction: non-Writing Requirement.

This course provides an entry point to the discussion of literature through 'pulp' genres such as romance, mystery/crime, the Western, sci-fi/fantasy, horror, sports literature, and comic books. This is the non-Writing requirement version of the course. For the WR version see ENGL 1050.

FORMAT: Lecture/discussion.

EXCLUSION: ENGL 1050.03

ENGL 1100.03: Writing for University.

An introduction to rhetoric and composition, this course is designed to prepare students to write analytic and research papers. Grammatical and rhetorical terms are addressed, and the course includes a number of assignments to hone writing skills from outline to revision.

FORMAT: Lecture/discussion. ✍ Writing Requirement

English Courses at the 2000 level.

Courses at the 2000 level are open to any student above the first year, with the necessary prerequisites. They include writing-intensive surveys of historical

periods, national literatures, and major fields intended as an entrance into the discipline of literary studies, as well as a colorful selection of genre-, author- and topic-oriented courses. Any two of the six half-credit surveys (2001, 2002, 2003, 2004, 2005, 2006) will fulfill the 2000-level requirements for the English minor, major, or honours programs. The following courses will accept any university Writing Requirement credit as a prerequisite: ENGL 2018, 2030, 2040, 2060, 2080, 2088, 2090, 2095, 2110, 2202, 2218, 2221, 2231, 2232, 2233, 2236. As these courses are not offered every year, **students are strongly encouraged to consult the detailed description of this year's courses available on the English Department's web site.**

ENGL 2001.03: British Literature to 1800.

This course traces the course of British Literature from its beginnings to the year 1800. Starting with Old English works such as *Beowulf* in their historical contexts, we will move on to Middle English, Renaissance, Restoration, and eighteenth-century literature, looking at writers such as Chaucer, Shakespeare, Donne, Milton, Behn, Swift, and Pope. This course puts special emphasis on developing skills in critical thinking, literary historical research, and scholarly argumentation.

FORMAT: Lecture/discussion with tutorials

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or King's FYP

EXCLUSION: ENGL 2205.06

ENGL 2002.03: British Literature after 1800.

This course studies many of the traditions and influential writers in British Literature from 1800 to the present. Studying these writers will orient students to British literary history and introduce them to key issues and concepts. This course will also emphasize developing skills in critical thinking, scholarly argumentation, and documentation.

FORMAT: Lecture/discussion with tutorials

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or King's FYP

EXCLUSION: ENGL 2205.06

ENGL 2003.03: American Literature.

This course is an introduction to some of the traditions and influential texts of American literature, from its colonial beginnings to the present, providing historical orientation and demonstrating the diversity of American literature. The course will also emphasize developing skills in critical thinking, scholarly argumentation, and documentation.

FORMAT: Lecture/discussion with tutorials

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or King's FYP

ENGL 2004.03: Canadian Literature.

From early exploration narratives to contemporary fiction, this course will survey a wide range of key texts in the development of Canadian literature in English. It will consider the literary and historical contexts that inform our readings, and identify and interrogate the various myths, images, icons and institutions that structure our ideas of what it means to be Canadian. This course will also emphasize developing skills in critical thinking, scholarly argumentation, and documentation.

FORMAT: Lecture/discussion with tutorials

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or King's FYP

CROSS-LISTING: CANA 2004.03

EXCLUSION: ENGL 2207.06

ENGL 2005.03: World Literature.

This course will introduce students to some of the most influential writers from around the globe, with a focus on contemporary literature written in English or studied in translation. These writers raise pressing questions about the meaning of justice, the power of nations, and the value of human imagination in our global world. This course will also emphasize developing skills in critical thinking, scholarly argumentation, and documentation.

FORMAT: Lecture/discussion with tutorials

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or King's FYP

EXCLUSION: ENGL 2212.03, ENGL 2213.03

ENGL 2006.03: Cultural Studies.

This course surveys notions of "culture" from both historical and theoretical perspectives and introduces students to the critical study of the multiple forms and uses of popular culture. This course will also emphasize developing skills in critical thinking, scholarly argumentation, and documentation.

FORMAT: Lecture/discussion with tutorials
 PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or King's FYP
 EXCLUSION: ENGL 2240.06

ENGL 2018.03: Arthur.

This course will explore the many stories of King Arthur and his Round Table including some of Sir Thomas Malory's *Morte D'Arthur*; earlier texts will be read in translation.

FORMAT: Lecture/discussion

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Science Writing Requirement.

EXCLUSION: ENGL 3018.03

ENGL 2020.03: Sampling Medieval Literature.

A properly medieval title for this course would be "Florilegium." It considers works important to the medieval literary scene in England, whether written initially in Old English, Middle English, Anglo-Norman French, Welsh, Norse, or Latin; almost all will be read in translation. The works read may include sagas, riddles, lyrics, the Breton lais of Marie de France, romances, chronicles, plays, saints' lives, comic tales, beast fables.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3218.06

ENGL 2028.03: Short Poems in English.

Forms and themes in the short poem are studied by means of critical reading of poems written in English. Topics may include the following: the self in the short poem, other persons, public events, love, nature, the city, the machine, wit, myth, traditional forms, free verse, the hokku, lyric as song, spoken poetry, poetry in print, concrete poetry, and possibly other topics to suit the course.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 2029.03: Framed Narratives.

This course studies framed narratives - stories within stories - focusing on the dramatic relationship between the frame and the stories within it, and what this form tells us about the nature of storytelling itself.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 2030.03: Literature, Health and Healing.

This course explores selected literary texts dealing with various issues of health and healing. The texts include works by writers in different historical periods and cultural contexts. Topics addressed vary, depending upon the instructor, but possible subjects for investigation might include narratives, poems and essays on aging, death or dying; the experience of illness; trauma and recovery; representations of the body; mental illness or neurological disorders; addiction; pregnancy, birth and the ethical dilemmas associated with abortion; the history of disease; chronic pain or disability; and indigenous healing practices.

FORMAT: Lecture/discussion

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

ENGL 2034.03: The Short Story.

This course will examine the form and evolution of the short story.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 2040.03: Mystery and Detective Fiction.

In this course, we will study the development of mystery and detective fiction, from Victorian classics by Charles Dickens, Wilkie Collins, and Arthur Conan Doyle to contemporary classics by Agatha Christie and Raymond Chandler and recent works by authors such as Sue Grafton, Sara Paretsky, and Ian Rankin.

FORMAT: Lecture/discussion

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

ENGL 2050.03: Literature and Propaganda.

This course explores the relation of literary art to propaganda through the study of selected writings in different genres. Among the terms and concepts that may be considered are didacticism, rhetoric, ideology, pornography, and censorship.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 2060.03: Sports Literature.

While material may range from Homer and Pindar to contemporary works, this course will typically focus on a specific sport, period, or subject (e.g., race, the lesbian/gay athlete) or genre. Students will explore the unique features of writing that deals with athletic or sporting activities and recognize how the literature of sport is connected to the broader literary canon. Commercialism, nationalism, authenticity, and aesthetics are possible topics. Consult the current course description.

FORMAT: Lecture/discussion

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

ENGL 2070.03: African American Literature.

An introduction to some major modes of writing in the African American community. Subjects of enquiry may include the "escaped-slave" narratives of the nineteenth century, or works produced by members of the Harlem Renaissance, or poetry and fiction by contemporary African American women writers.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 2080.03: Cartoons and Comics.

A study of cartoons and comics from the eighteenth century to the present, addressing such issues as the history and formal conventions of the genre as well as its various cultural roles, from the political to the popular and from consumer culture to cultural capital.

FORMAT: Lecture

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

ENGL 2085.03: Video Games: Story, World and Play.

This course introduces students to the critical study of video games and gaming culture, with a particular emphasis on how video games combine interactive gameplay, worldmaking, and storytelling.

FORMAT: Lecture/discussion

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

ENGL 2088.03: Images and Texts.

This course will examine the rich interrelations of art and literature, from visual and verbal treatments of the same theme (jealousy, for example), to similarities in style (such as impressionism or Dadaism), to specific topics such as humour or scandal.

FORMAT: Lecture

PREREQUISITE: Any course or combination of courses that satisfies the college of Arts and Sciences Writing Requirement

ENGL 2090.03: Literature, Multiculturalism, and Identity.

Literature provides a powerful means of developing the cross-cultural understanding essential for living and working in increasingly multicultural societies and differing global contexts. This course examines literature (chiefly novels) that explore the complexities of identities shaped by globalization and multicultural contexts. Topics might include the shifting boundaries of "home"; generational conflicts and connections; cross-cultural romantic relationships; challenges in adapting to a foreign language and/or customs; global cultural networks; and emerging forms of cosmopolitan identity or "fusion" cultures.

FORMAT: Lecture

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement.

ENGL 2095.03: Narrative in the Cinema.

This course will provide a brief introduction to the study of film narrative. Through an examination of select films from throughout the history of the medium, this course will consider various forms and conventions of cinematic

fiction-making. Although social, political, psychological, and other non-formal aspects of film will be discussed, the course will be primarily concerned with the aesthetics and visual styles at work in the films under consideration.
 FORMAT: Lecture/discussion/screening
 PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

ENGL 2110.03: Introduction to Professional Writing.

In this introduction to professional writing, students learn to analyze rhetorical situations, adapt to generic conventions, and adopt the languages of distinct discourse communities. They learn how to determine what constitutes "good writing" and to improve the structure and style of their prose to fit a given professional context. This course gives students the opportunity to research and produce specialized forms of writing. Examples might include case studies, white papers, press releases, business plans, web sites, and user manuals.

FORMAT: Lecture/discussion

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Science Writing Requirement.

EXCLUSION: COMM 1701.03, 1702.03, 2701.03

ENGL 2202.03: Academic Writing.

Focusing on academic discourse, this course is designed for students interested in university writing as an object of study and practice. Students will enhance their understanding of the conventions of scholarly writing, develop their command of English grammar, and hone their skills in the art of using language to persuade.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or King's FYP

EXCLUSION: ENGL 2200.06

ENGL 2214X/Y.06: Shakespeare.

An introduction to Shakespeare's career as a playwright, through discussion and interpretation of a dozen or more of his plays.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

CROSS-LISTING: THEA 2214.06

ENGL 2218.03: Gothic Fiction.

This course examines a selection of gothic fiction from Horace Walpole onwards. Attention is paid to the Romantic novelists (Radcliffe, Lewis, Brontë and Maturin) as well as their Victorian and twentieth-century successors (e.g. Bram Stoker and Patrick McCabe). Among the many subjects that may be considered are Jekyll/Hyde schizophrenic doubles, the popularity of vampirism, and urban fascination with the "serial" killer (e.g. the Ripper murders).

FORMAT: Lecture/discussion

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

EXCLUSION: ENGL 2216.06, ENGL 3216.06

ENGL 2222.03: Fictions of Self Discovery.

A study of literary works (chiefly novels, but also possibly including short stories or short story collections) that portray the crises and conflicts involved in coming of age, finding a vocation, and the search for identity. Works from the nineteenth century to the present may be included, by authors writing in English in a variety of national traditions and global contexts. Typical themes include childhood experience and education, familial and romantic relationships, identity formation (cultural, gender, sexual), occupational issues and challenges.

FORMAT: Lecture/discussion

PREREQUISITE: Any class or combination of classes that satisfies the College of Arts and Sciences Writing Requirement.

ENGL 2229.03: Tragedy.

This course studies a representative selection of texts from various historical periods in order to arrive at an understanding of the meaning of tragedy. Various definitions of tragedy will be examined along with such possible questions as how has tragedy changed over time, and what is tragicomedy.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, or THEA 1000.06; or the King's FYP

CROSS-LISTING: THEA 2229.03

EXCLUSION: ENGL 2226.06

ENGL 2230.03: Satire.

A survey of traditional satire from early invective to contemporary caricature. This course chiefly examines conventional forms of verse and prose satires but attention is also paid to the visual and dramatic. Students are introduced to a wide range of specific modes (e.g., the character sketch, mock encomium, travesty, parody, lampoon) and satire's many uses within various national contexts (e.g., Roman, English, American, Canadian).

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 2227.06

ENGL 2231.03: Foundations of Science Fiction.

Various origins have been offered for science fiction: from classical Greek texts, to *Gulliver's Travels*, to *Frankenstein*, to twentieth-century pulp publications. This course will read science fiction from these various origins through to the so-called Golden Age of Science Fiction in the 1950s. Authors could include Mary Shelley, H.G. Wells, and Hugo Gernsback.

FORMAT: Lecture

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

EXCLUSION: ENGL 2233.06

ENGL 2232.03: Contemporary Science Fiction.

This course will study science fiction from the Golden Age of the 1940s and 50s to the most recent developments. Such schools and areas as the New Wave, cyberpunk, and postcolonial SF are among the topics that could be explored, as are developments in film, television, and new media.

FORMAT: Lecture

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

EXCLUSION: ENGL 2233.06

ENGL 2235.03: Tolkien: Fantasy and Medievalism.

This course will examine the fantasy writings of J. R. R. Tolkien. Topics could include the development of high fantasy, the question of escapism, alternate worlds, heroes and anti-heroes, Norse and medieval mythology, language-creation, Tolkien's medieval scholarship, the Inklings, Tolkien and Christianity, and Tolkien's work in the context of twentieth-century wars and politics.

FORMAT: Lecture

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

ENGL 2236.03: Fantasy after Tolkien.

This course will examine writings in the fantasy genre of the later twentieth century. Authors could include Ursula LeGuin, Guy Gavriel Kay, Charles de Lint, Susan Cooper, R. Scott Bakker, J. K. Rowling, and Philip Pullman.

FORMAT: Lecture

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

ENGL 2237.03: Outlaw Tales.

This course will study the romantic outlaw of fiction, poetry and film. Texts may range from sagas to Robin Hood ballads to highwayman tales to modern Westerns. Topics include images and tropes for the outlaw; the question of why the figure of the outlaw is appealing to law-abiding readers; the way the literary and romantic outlaw compares with the real-life outlaws of the time; or the role of the exile as a commentator on 'legal' society.

FORMAT: Lecture/discussion

PREREQUISITE: Any class or combination of classes that satisfies the College of Arts and Science Writing Requirement

ENGL 2313.03: Shakespeare and his Contemporaries on Film.

This course will study the adaptation of Shakespeare and his contemporaries to the medium of cinema, focusing on the differences between theatre and cinema, the process of textual adaptation, the updating of classic stories to modern settings, and the close analysis of the performer's choices.

FORMAT: Lecture/seminar

PREREQUISITE: Experience in Shakespeare at any level OR experience in Film Studies at any level.

CROSS-LISTING: THEA 2313.03

English Courses at the 3000 Level

Courses at the 3000 level are usually smaller than 2000-level courses, and are likewise open to **any** student above the first year, with the necessary prerequisites. They include a group of literary methods courses as well as a sequence of courses covering the chronological sweep of English literary history. Any one of the three methods courses offered each year (3000.03, 3001.03, 3002.03) will fulfill the requirement for the English minor, major, or honours programs. Most 3000-level courses require a first-year English credit as prerequisite, but ENGL 3112.03, ENGL 3203.03, and 3310.03 will accept any university Writing Requirement credit. As these courses are not offered every year, **students should consult the English department website for detailed descriptions of this year's courses.**

ENGL 3000.03: Close Reading.

This half-credit course is intended to give students the tools and vocabulary for the close reading of literary texts, both prose and poetry.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 3001.03: History of Literary Criticism.

A survey of major statements in literary theory from Antiquity to the twentieth century. Topics to be considered may include the value of literature, the relation of fiction to reality, the nature of creativity, the function of genres and conventions, and the role of the critic.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3244.06

ENGL 3002.03: Contemporary Critical Theory.

A survey of major issues and schools in recent literary theory. This course will debate the merits of various critical approaches to literature, including formalism, Marxism, feminism, psychoanalysis, structuralism, deconstruction, new historicism, and cultural studies.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3244.06

ENGL 3005.03: Canterbury Tales.

An introduction to the study of Middle English literature in Middle English by way of Geoffrey Chaucer's collection of tales told by a mixed crowd of people on pilgrimage, from idealistic knight and pious nun to bawdy wife and drunken cook.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3219.06

ENGL 3007X/Y.06: Old English.

An introduction to the Old English language and literature in Old English from the seventh to the eleventh centuries. Literary works will include the heroic, the sacred, the bawdy, and the historical; the question of who got to enjoy this literature will lead to such topics as orality and literacy, manuscript production and circulation, palaeography, and multilingual culture.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 4253.06

ENGL 3008.03: Introduction to Nordic Saga.

Students in this course will study classic Icelandic sagas in modern English translation. They will also explore the mythology, fantasy, and history which inform these heroic medieval tales.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 4360.03

ENGL 3010.03: Renaissance Poetry and Culture I: More to Jonson.

This course explores the flourishing of English literary culture from the Tudor humanists (such as Sir Thomas More) and courtly makers (Sir Thomas Wyatt) to

the Elizabethan sonnet writers (Sir Philip Sidney) and plain style poets (Ben Jonson). Shakespeare's poetry, Spenser's *Faerie Queene*, and selected works by women authors (including Queen Elizabeth herself) will be represented in the syllabus.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3224.06

ENGL 3011.03: Renaissance Poetry and Culture II: Donne to Milton.

This course offers students the chance to interpret poems by one of the most enigmatic English writers (John Donne) and to argue about the view of human nature encoded in one of the most contested English texts (*Paradise Lost*). In addition, there will be opportunities to study devotional poetry (George Herbert), life-writing (Sir Thomas Browne), women's writing (Lady Mary Wroth), political writing (Andrew Marvell), or even prison writing (by Suckling or Bunyan, for example).

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3224.06

ENGL 3015.03: Renaissance Drama.

This course will explore the richness and strangeness of some of the playwrights too often obscured by Shakespeare's shadow. Between the opening of the first professional playhouse in London (1576) and the closing of the theatres by Parliament (1641), the Globe was only one of many venues catering to an avid theatre-going public, and the first English play by a woman was circulated in manuscript. Playwrights to be studied include Christopher Marlowe, Ben Jonson, Thomas Middleton, John Webster, Elizabeth Cary, and John Ford.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03 or THEA 1000.06; or the King's FYP

CROSS-LISTING: THEA 3015.03

ENGL 3017.03: English Poetry and Prose, 1660-1740.

The poetry and prose from the Restoration and early eighteenth-century contain much in the way of sex and jokes. The course studies works by authors such as Dryden, Rochester, Behn, Finch, Swift, and Pope. Students are introduced to popular forms (heroic couplet, satire, conversational poems, essay, epistle, political allegory) and to the many changes that shaped the literature of the period, notably the decline of the court, the emergence of modern capitalism, and the rise of professional authorship.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3225.06

ENGL 3019.03: Poetry and Prose, 1740-1789.

A survey of poetry and prose from the mid- to late-eighteenth century. This course studies the works of Samuel Johnson and his circle, the poets of sensibility, the Bluestockings, and sundry other authors. It covers a wide range of genres and movements (odes, imitation, poems, aesthetic treatises, fables) in light of contemporary social and political events, from the growth of democracy at home to historic revolutions abroad.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3225.06

ENGL 3020.03: English Drama, 1660-1800.

A survey of plays produced during the Restoration and eighteenth century. Concentrating on the London scene from the first appearance of actresses on the stage to the burning of the Haymarket theatre in 1789, this course introduces students to the period's various dramatic forms, the literary influences and controversies, and the many women and men who penned for the stage.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03 or THEA 1000.06; or the King's FYP

CROSS-LISTING: THEA 3913.03

EXCLUSION: ENGL 3225.06

ENGL 3022.03: English Fiction to 1820.

A survey of the rise of the English novel from Behn to Austen. This course will consider works by several early novelists, some well-known and some not so well-known, and introduce students to a wide range of early prose narratives, such as amatory fiction, the fictional memoir, the roman à clef, the epistolary novel, and various comic and sentimental works.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 2208.06

ENGL 3026.03: Romantic Ear I: Radicals and Visionaries.

Focusing primarily on the late 18th century, this class will explore the interaction between imaginative writing and pressing political debates over rights—for men, for women, and for the enslaved. Authors may include William Blake, Anna Letitia Barbauld, Samuel Taylor Coleridge, Olaudah Equiano, Keats, Mary Robinson, and the Shelleys.

EXCLUSION: ENGL 2205.06, ENGL 3025.06

ENGL 3027.03: Romantic Era II: The Satanic and the Sublime.

Focusing primarily on the early 19th century, this class will explore the interactions and reactions of reform and conservatism, evil and the sublime, tradition and modernity, across genres. Authors may include Jane Austen, William Blake, Byron, Samuel Taylor Coleridge, Felicia Hemans, John Keats, Letitia Landon, the Shelleys, and the Wordsworths.

FORMAT: Lecture/discussion

EXCLUSION: ENGL 3025.06

ENGL 3029.03: Victorian Poetry.

This course explores Victorian poetry in the context of the cultural, social, political, artistic and religious transformations that occurred between the 1830s and 1900. Authors studied will include Tennyson, Robert and Elizabeth Barrett Browning, Matthew Arnold, and the Pre-Raphaelite poets. Specific emphases will vary, but recurrent themes will include the poet's role in an increasingly technological and scientific culture, the challenges faced by women poets, experimentation with new poetic forms like the dramatic monologue, and the crisis of faith caused by new modes of intellectual inquiry.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 3031.03: The Nineteenth-Century British Novel from Austen to Dickens.

In this course we will study British novels from the first half of the nineteenth century. Specific reading will vary from year to year but will usually include works by Jane Austen, Walter Scott, Charles Dickens, W. M. Thackeray, and the Brontës. We will examine these authors' experimentation and innovation with both the form and the subject matter of fiction as they transformed the novel from a generic upstart into the century's dominant literary form.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 2208.06

ENGL 3032.03: The Nineteenth-Century British Novel from Dickens to Hardy.

In this course we will study British novels of the second half of the nineteenth century. Specific reading will vary from year to year but will usually include works by Charles Dickens, George Eliot, Anthony Trollope, Wilkie Collins, and Thomas Hardy, all writers who drew on the now-established tradition and prominence of the British novel and found their own ways to extend and challenge its conventions.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 2208.06

ENGL 3040.03: Irish Literature. 1700-1900: Satire, Sentiment, and the Gothic.

This course will survey Irish writing in English from 1700 to 1900 and emphasize three literary modes significant to this body of work—satire, sentiment, and the

gothic—across the genres of poetry, drama, and prose fiction. Possible authors include Swift, the Sheridans, Moore, Mangan, LeFanu, the Wildes, and Stoker.

FORMAT: Lecture/discussion

PREREQUISITE: English 1000.06; or any two of English 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or Theatre 1000.06; or the King's FYP

ENGL 3061.03: American Literature to 1865.

A survey of the major writers of the United States up to the end of the Civil War. This period includes the earliest practitioners of the modern short story, radically inventive poets, early "nature writers," experimental novelists, and various forms of autobiography.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 3062.03: American Literature, 1865-1914.

A survey of the major writers of the United States from the Civil War to the beginning of the First World War, with an emphasis on the realist novel. Major figures include Mark Twain, Henry James, Edith Wharton, Stephen Crane.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 3070.03: Twentieth-Century African American Novel.

While it is obvious that several of the novelists on this reading list might well appear in other courses, it is a worthwhile exercise for students to engage in a conversation about these and other texts by African American novelists in the context of African American novelists. That context will be the focus of this course. Such a comparatively restricted focus brings with it such questions as does it matter that these novels were written by African Americans? What do we gain/lose by considering these texts in this specific national and ethno-cultural context? Are the texts representative, and if so, of what and in what ways? Do these texts reinforce or complicate (or both) notions such as the African American experience?

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 3086.03: Post-Colonial Literatures.

This course will allow you to read literature from the former British colonies, as well as some of the influential theorists who are helping to shape the evolving field of postcolonial studies. Our purpose will be to gain familiarity with a selection of the seminal texts, arguments, and debates that characterize this diverse and vibrant area of research and study.

FORMAT: Lecture

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3085.06

ENGL 3087.03: Literature of the Asian Diaspora.

Literature of the Asian Diaspora encompasses literature written in English by writers of Asian descent and heritage. Each year may have a specific focus, such as Asian Canadian and Asian American, Anglo-Asian, or Asian Australian literature. The course will concern itself with what constitutes Asian diasporic literature, its various historical and social contexts, as well as its narrative traditions and innovations.

CROSS-LISTING: CHIN 3080.03

ENGL 3098.03: Creative Writing: Poetry I.

This course is for students interested in writing poetry. Various skills will be developed through the sharing of individual and collaborative expression and the understanding of the movement from first draft to finished version of the poem.

FORMAT: Writing Workshop

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or CRWR 2000.06; or King's FYP

ENGL 3099.03: Creative Writing: Fiction I.

This course is for students interested in writing short fiction and novels. It will include the study of literature as a basis for learning skills necessary for the craft. Some aspects of the course will involve theory but the primary focus will be on the process of writing – everything from the basics of getting started to the process

of publishing. Students will be expected to participate fully in the course through reading, writing, and discussion.

FORMAT: Writing Workshop

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or CRWR 2000.06; or King's FYP

ENGL 3112.03: Writing Theory.

This course considers a range of approaches to writing. Students read widely in rhetoric and composition theory, participate in the ongoing conversation about writing, and heighten their understanding of the composition process. Writing intensive and writing centered, the course is ideal for anyone interested in writing and critical thinking.

FORMAT: Lecture/discussion

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

CROSS-LISTING: ASSC 3112.03

EXCLUSION: ASSC 3110.06X/Y / ENGL 3111.06X/Y

ENGL 3113.03: Writing Practice.

This course puts writing theory into practice. As part of their course work, students gain valuable experience working as writing tutors and/or assistant editors for an academic journal. The course is ideal preparation for careers in teaching or publishing, as well as for students going on to do graduate work. PREREQUISITE: ENGL 3112.03 / ASSC 3112.03 or ENGL 2202.03 or instructor's permission

CROSS-LISTING: ASSC 3113.03

EXCLUSION: ASSC 3110.06X/Y / ENGL 3111.06X/Y

ENGL 3203.03: History of the English Language.

This course introduces students to the study of the history of English, tracing the story from the origins of the language in proto-Germanic to its current abundance of varieties around the globe. Most emphasis will be placed on the development of English in our earlier literature from Old

English to Early Modern English, and then its current manifestations in Canada.

FORMAT: lecture/discussion

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

EXCLUSION: ENGL 3202.03

ENGL 3220.03: American Literature of the Earlier Twentieth Century.

An introduction to American literature from the beginning of the twentieth century until the end of the second world war.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3213.06

ENGL 3221.03: American Literature of the Later Twentieth Century.

An introduction to American literature from the middle of the twentieth century until the end.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3213.06

ENGL 3231.03: Modern Canadian Literature.

The historical period covered in this course extends from the end of World War I through the decade following World War II, a period during which Canada witnessed the formation of a modern literature in English. Varied aesthetic responses to ideas of the modern, the processes and technologies of modernization, and the conditions of social, cultural, economic, and political modernity will be addressed.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

CROSS-LISTING: CANA 3231.03

ENGL 3234.03: British Literature of the Earlier Twentieth Century.

An introduction to British literature from the beginning of the twentieth century roughly to the end of the second world war.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3212.06

ENGL 3235.03: British Literature of the Later Twentieth Century.

An introduction to British literature from the middle of the twentieth century until the end.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3212.06

ENGL 3238.03: Fiction of the Earlier Twentieth Century.

A selection of fiction from the beginning of the twentieth century to approximately the end of the second world war. Texts will be subject to the instructor's preferences.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3209.06

ENGL 3239.03: Fiction of the Later Twentieth Century.

An introduction to fiction in English from the middle of the twentieth century to the end. Texts will be subject to the instructor's preferences.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

EXCLUSION: ENGL 3209.06

ENGL 3240.03: Drama of the Earlier Twentieth Century.

An introduction to major developments in drama from Ibsen to Brecht. The course will explore the diversity of dramatic styles and theatrical movements, as playwrights respond to and react against the nineteenth century's traditions and their own changing times. In addition to Ibsen and Brecht, authors may include Strindberg, Chekhov, Shaw, Synge, Pirandello, and O'Neill.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 3241.03: Drama of the Later Twentieth Century.

This course focuses on a selection of plays ranging from Absurdist works to present-day texts, including scripts by Canadian dramatists. The focus will be the growth of contemporary theatrical movements, such as the kitchen-sink drama of the 1950s and the "In-Yer-Face" theatre of the 1990s. Playwrights may include Beckett, Ionesco, Osborne, Albee, Stoppard, Churchill, Kane, and Tremblay.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 3242.03: Poetry of the Earlier Twentieth Century.

An introduction to poetry in English from the beginning to the middle of the twentieth century.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 3243.03: Poetry of the Later Twentieth Century.

An introduction to poetry in English from the middle of the twentieth century to the end.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 3245.03: The Beat Generation.

This course will examine the writing of the Beat Generation. Authors to be considered could include Jack Kerouac, Allen Ginsberg, William S. Burroughs, and Denise Levertov, among others.

FORMAT: Lecture and Discussion

PREREQUISITE: ENGL 1000X/Y.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000X/Y.06; or the King's FYP

ENGL 3250.03: Contemporary Women Poets.

During the last few decades, an extraordinary number of powerful new women poets have appeared on the literary scene. This course focuses on selected works written by these poets, and explores the ways in which monolithic ideas of "woman" have been challenged by individual poets who are positioned differently by race, sexual orientation, and national identity.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

CROSS-LISTING: GWST 3050.03

EXCLUSION: ENGL 3050.06

ENGL 3270.03: Contemporary Canadian Literature.

In this course, a variety of late twentieth-century and recent Canadian fiction and poetry texts will be studied from such perspectives as the following: postcolonial, postmodern, multicultural. The politics of cultural expression will be emphasized, as well as the relationship between ethics and aesthetic approaches to literature.

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03,

1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

CROSS-LISTING: CANA 3270.03

EXCLUSION: ENGL 3233.03

ENGL 3300.03: TV: Theory and Criticism.

This course considers television as a uniquely powerful source of cultural production, presenting students with some of the theoretical questions it raises and some of the critical methods that have been developed for engaging it. The course will explore the way TV mediates cultural attempts to understand the contemporary world.

FORMAT: Lecture

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03, 1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 3301.03: Graphic Novels.

This course explores the history and development of graphic novels from the early twentieth century to the present. It examines the history and formal conventions of various genres, and it is particularly concerned with the cultural status of graphic novels and the relationship between verbal and visual forms.

PREREQUISITE: ENGL 1000.06; or any two of ENGL 1010.03, 1020.03,

1040.03, 1050.03, 1100.03; or THEA 1000.06; or the King's FYP

ENGL 3310.03: Writing in a Digital Age.

ENGL 3310 focuses on the analysis and production of electronic texts. Students publish their work electronically and explore emerging theories about hypertext writing and the role of visual rhetoric. Objects of study will encompass a variety of electronic genres, but will focus mainly on sites on the World Wide Web.

FORMAT: Lecture/discussion

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

ENGL 3314.03: Shakespeare and his Contemporaries on Film.

This course will study the adaptation of Shakespeare and his contemporaries to the medium of cinema, focusing on the differences between theatre and cinema, the process of textual adaptation, the updating of courseic stories to modern settings, and the close analysis of the performer's choices.

FORMAT: Lecture/seminar

PREREQUISITE: Experience in Shakespeare at any level OR experience in Film Studies at any level.

CROSS-LISTING: THEA 3314.03

EXCLUSION: THEA 2313.03, ENGL 2313.03

ENGL 3501.03: The Modern Theatre 1: Realism and Responses.

From the 1870s until the coming of the First World War, the theatre underwent a series of radical transformations. This course explores the key theatrical movements of this period, including realism, naturalism, symbolism, and expressionism, and compares the theories behind them to the plays, stagecraft, and performance techniques they produced.

FORMAT: Lecture/seminar/discussion 3 hours

PREREQUISITE: THEA 2011.03 and THEA 2012.03 or Permission of the Instructor

CROSS-LISTING: THEA 3501.03

EXCLUSION: THEA 3500 X/Y.06

ENGL 3502.03: The Modern Theatre 2: High Modernism.

From the close of WW1 to the 1960s, theatrical modernists sought new artistic forms for a rapidly changing world. This course introduces students to major forms of theatrical modernism from Dada and Theatre of Cruelty through Epic Theatre and Biomechanics to absurdism, and considers their legacy for the contemporary stage.

FORMAT: Lecture and seminar

PREREQUISITE: THEA 3501.03 or Permission of the Instructor

CROSS-LISTING: THEA 3502.03

EXCLUSION: THEA 3500 X/Y.06

ENGL 3731.03: Greek Drama: Tragedy I.

A study of the Greek tragedians, Aeschylus, Sophocles, and Euripides in English translation.

FORMAT: Seminar

EXCLUSION: CLAS 3515.03, CLAS 3730X/Y.06

ENGL 3732.03: Greek Drama: Tragedy II.

A study of the Greek tragedians, Aeschylus, Sophocles, and Euripides in English translation.

FORMAT: Seminar

EXCLUSION: CLAS 3515.03, CLAS 3730X/Y.06

ENGL 3820.03: Nabokov.

A close study of selected works by consummate twentieth century prose stylist Vladimir Nabokov - novelist, poet, critic and translator, author of notorious *Lolita*.

FORMAT: Lecture/discussion

CROSS-LISTING: RUSN 3820.03

ENGL 3841.03: Dante II. *Purgatory and Paradise*.

The course will provide a reading of the Purgatory and Paradise, the pilgrim's climb of the holy mountain and his ascent to the heavens up to the vision of God. This course places Dante's *Divine Comedy* within a critical context and furthers the study of Dante's oeuvre on the backdrop of the European Middle Ages. Each course will involve reading from the text, commentary and discussion of the readings assigned. The course is taught in English. Italian minors and majors students will be required to read the texts in Italian.

FORMAT: Lecture

PREREQUISITE: Any 2000 humanities course or instructor's permission

CROSS-LISTING: Comparative Religions 4041, ITAL 4041.03

ENGL 3916.06: Introduction to Applied Linguistics and Language Teaching.

For description of this cross-listed course, see Calendar under FREN 4016.

FORMAT: Lecture

CROSS-LISTING: FREN 4016.06

English Courses at the 4000 Level

Courses at the 4000 level are small seminars intended for third and fourth-year English majors or honours students, offering intensive, research-oriented study of special topics, particular authors or periods, national traditions, literary or cultural forms and theories. Reflecting the specialties of their instructors, their subjects change every year. **Students should consult the detailed description of this year's seminars available on the English department website, and meet with an English department advisor before enrolling in one of these seminars.**

Studies In Major Authors—4011–4099**Studies in Genre—4200–4299****Studies in National Literatures—4400–4499****Studies in Literary History—4600–4699****Studies in Culture and Theory—4800–4899****ENGL 4990.00: English Honours Capstone.**

This course is intended to be the culmination of an honours degree, to teach practices and hone skills to carry forward into academic and non-academic professional realms. Emphasis will be on effective communication, both oral and written, of the student's own research, and on constructive responses, both critical and editorial, to the research of others. The course fulfills the requirement of the College of Arts and Science at Dalhousie for an honours qualifying examination,

with an importance equivalent to an honours thesis. It is graded pass/fail, carries no credit hours, but is a required distinguishing component of the honours degree.
 FORMAT: Seminar
 RESTRICTION: Admission by signature; for honours students in English

Students should consult the department website for a complete list of seminar offerings.

of class time will be devoted to the workshop critique of peer writing. Sustained student work on one large manuscript project will be encouraged.

FORMAT: Workshop (i.e., the primary texts will be student-generated and critiqued by students and professor)

PREREQUISITE: Equivalent of two full credits from: CRWR 3000, CRWR 3001, THEA 3600, JOUR 3440 and 3441

IV. Creative Writing Course Descriptions

CRWR 2000X/Y.06: The Creative Process.

This is a large interdisciplinary course that focuses on creativity in a wide variety of artistic and other areas of thought and expression, such as writing, painting, music, acting/directing, dancing, mathematics, medicine, and advertising.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: Any course or combination of courses that satisfies the College of Arts and Sciences Writing Requirement

CRWR 3000.03: Creative Writing: Poetry II.

Building on the work done in English 3098.03, this seminar will involve students in the writing and assessment of poetry, their own as well as that of their peers. The process of writing poetry from the first draft to the final version will be stressed, with attention given to the developing relationship between form and content.

FORMAT: Workshop

PREREQUISITE: ENGL 3098.03

CRWR 3001.03: Creative Writing: Fiction II.

Following the emphasis on short story writing in English 3099.03, this course will deal with novel writing, with attention to such matters as dramatic elements, story/plot, character development, setting, point of view, revision, and publishing.

FORMAT: Workshop

PREREQUISITE: ENGL 3099.03

CRWR 4000X/Y.06: Creative Writing Poetry.

Students will meet in group session during the fall term to workshop their material that will lead to the production of a full manuscript of poetry. In the winter term students will meet on an individual basis with the professor to discuss and facilitate the completion of this project.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Workshop

PREREQUISITE: CRWR 2000X/Y.06, ENGL 3098.03, CRWR 3000.03

CRWR 4001X/Y.06: Creative Writing Fiction.

Students will meet in group session during the fall term to workshop their material that will lead to the production of a full manuscript of fiction (short stories or novel). In the winter term students will meet on an individual basis with the professor to discuss and facilitate the completion of this project.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Workshop

PREREQUISITE: CRWR 2000X/Y.06, ENGL 3099.03, CRWR 3001.03

CRWR 4003X/Y.06: Advanced Narrative Non-Fiction Workshop.

Senior Creative-Writing and/or Journalism students will write and critique narrative non-fiction, a genre which enjoys a rich history and contemporary popularity. Writing techniques from various genres (e.g., character development, metaphor, dialogue) will inform this fusion of fact and fiction, research and experience, the personal and the public etc.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Workshop (i.e., the primary texts will be student-generated and critiqued by students and professor)

PREREQUISITE: Equivalent of two full credits from: CRWR 3000, CRWR 3001, THEA 3600, JOUR 3440 and 3441 and/or permission of the instructor

CRWR 4004.06: Advanced Creative Writing Workshop.

Senior creative-writing students will write and critique a variety of genres, including fiction, poetry, narrative non-fiction and/or drama. A significant portion

Environmental Studies

BA with Minor in Environmental Studies

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

Required Courses:

- ENVS 1000X/Y.06: Introduction to Environmental Studies
- PHIL 2480.03: Environmental Ethics
- ENVS 3200.03: Introduction to Environmental Law

BA Approved Electives in Environmental Studies:

Additions to the following lists will be made, as relevant courses become available.

Faculty of Science:

- BIOL 2060.03: Introductory Ecology
- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction to Marine Life in Nova Scotia
- BIOL 3060.03: Environmental Ecology
- BIOL 3061.03: Communities and Ecosystems
- BIOL 3225.03: Plants in the human landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3615.03: Methods in Ecology
- BIOL 4065.03: Sustainability and Global Change
- CHEM 2505.03: Environmental Chemistry
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- EARTH 2410.03: Environmental and Resource Geology I
- EARTH 3500.03: Geoscience Information Management
- GEOG 2800.03: Climate Change
- OCEA 2000.06: The Blue Planet
- OCEA 2800.03: Climate Change
- PHYC 2451.03: Astronomy I: The Sky and Planets
- PHYC 2800.03: Climate Change
- ENVS 2001.03: Analytical Environmental Science and Social Responsibility
- ENVS 3000.03: Environmental Science Internship
- ENVS 3210.03: Environmental Law II: Natural Justice and Unnatural Acts
- ENVS 3220.03: International Environmental Law for Scientists
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3400.03: Human Health and Sustainability
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory

Faculty of Arts and Social Sciences (FASS):

- CTMP 3000.06: Science and Culture
- CTMP 3150.03: Nature and History
- CTMP 3210.03: Intersecting Bodies, Selves and Environments
- CTMP 3411.03: Studies in Contemporary Science and Technology
- EMSP 2310.03: Women and Gender in Early Modern Science
- EMSP 2330.03: Nature Imagined

I. Degree Programs

The College of Sustainability offers a BA Double Major and Combined Honours with any major/honours subject in the Faculty of Arts and Social Sciences or the Faculty of Science. For complete details about the College, its programs and courses please see the College of Sustainability section on [page 44](#) of the Calendar.

A. BA, Double Major/Combined Honours, Environment, Sustainability and Society

i. Environment, Sustainability and Society as Subject A

Subject A: Environment, Sustainability and Society

- SUST 1000.06 (one full credit in fall term)
- SUST 1001.06 (one full credit in winter term)
- SUST 2000.06 (one full credit in fall term)
- SUST 2001.06 (one full credit in winter term)
- SUST 3000.03
- SUST 3502.03
- SUST 4000X/Y.06

For Double Major:

- three full credits from the approved list of ESS Electives (at least two credits outside subject B)

For Combined Honours:

- two full credits from the approved list of ESS Electives (at least one credit outside Subject B)
- SUST 4900X/Y.06
- Cumulative GPA in Honours subject courses above 1000 level of 3.3, with no individual grade less than C

Subject B: Any Major/Honours subject in the Faculty of Arts and Social Sciences or the Faculty of Science

Please see subject B calendar entry and Academic Advisor for details.

ii. Environment, Sustainability and Society as Subject B

Subject A: Any Major/Honours subject in the Faculty of Arts and Social Sciences or the Faculty of Science

Please see subject A calendar entry and Academic Advisor for details.

Additional requirements for Combined Honours: Must comply with Honours requirements for Subject A.

Subject B: Environment, Sustainability and Society

- SUST 1000.06 (one full credit in fall term)
- SUST 1001.06 (one full credit in winter term)
- SUST 2000.06 or SUST 2001.06
- one additional full credit in SUST at the 2000 level or above
- three full credits from the approved list (at least two credits outside Subject A)
- at least two full credits must be at the 3000 level or above

 Schwarz, H. G. - German
 Stone, Marjorie - English
 Tetreault, Ronald - English
 White, Jerry - English/Theatre
 Wright, Julia - English
 Zaiotti, Ruben - Political Science

I. Introduction

The European Studies program at Dalhousie is designed to guide students to a multidisciplinary understanding of contemporary Europe. It is not housed in any one department but is a combined effort of most departments in the Faculty of Arts and Social Sciences and the University of King's College. It encourages students to develop a broad perspective on Europe as seen through history and politics, literature and ideas, and the fine arts, with special emphasis placed on acquisition of language skills. There is an Honours program and a 20 credit Major. Because it is already a multidisciplinary program, European Studies cannot be combined with other subjects to form a combined honours degree.

II. Degree Programs

A. BA Honours in European Studies

Students must meet the faculty requirements for honours.

Year I

A student would normally take ten half-credit courses in the first year, meeting the distribution requirements of the BA. These courses include:

- a writing requirement course
- HIST 1004X/Y.06 (European History), or an equivalent course in a later year
- a language other than English
- a social sciences course
- a natural science course

Notes: Completion of the King's College Foundation Year Program satisfies the first-year requirements for European Studies, with the exception of the language course and the natural sciences course.

Some students may wish to take another "second language" course in the first year, and postpone one of the other courses until a later year.

Years II to IV

The program consists of 30 further half-credit courses including the second year core course and an Honours project. The general requirements for the program are:

- Courses in two contemporary European languages other than English are required. One of these languages is studied up to 3000/4000 level (normally two half credits each year). The minimum requirement for the other language is two half credits at the first year level, though students are strongly encouraged to take advanced courses in both languages.
- Students take 22-26 half-credit courses with significant European content. As this is a multidisciplinary program, no more than 10 half-credit courses above the 1000 level may be taken from one department. No fewer than 12 half-credit courses must be taken from two other departments. These may include courses from a language department to fulfill the language requirement, or one of the King's Honours programs. At least six half-credit courses must be at the 3000 level or above, taken in at least two different departments. Courses taken during a study abroad year will need to be counted in the above mix.
- EURO 2101.03, EURO 2102.03
- Students should seek advice from the European Studies Coordinator, who will strive to ensure that courses are included from each of the following areas:
 - 1) History and Politics:
Approved ES courses in the departments of History, Political Science, Sociology and Social Anthropology, Economics, Commerce
 - 2) Literature and Ideas:
Approved ES courses in the departments of Classics, English, French, German, Italian, Philosophy, Religious Studies, Russian Studies, Spanish
 - 3) Fine Arts:
Approved ES courses in the departments of Music, Theatre, and the Program in Film Studies

Approved ES courses in Contemporary Studies, Early Modern History, and Gender and Women's Studies may fit one or more of these groupings. Please consult a European Studies advisor.

In conjunction with the Honours project a fourth year multidisciplinary seminar is required.

- A term of study in the honours program at a European university, normally in a second-language environment. A summer work term in Europe is encouraged.

B. BA (20 credit) Major

Year I

A student would normally take ten half-credit courses in the first year, meeting the distribution requirements of the BA. These courses include:

1. a writing requirement course
2. HIST 1004X/Y.06 (European History), or an equivalent course in a later year
3. a language other than English
4. a social sciences course
5. a natural science course

Note: Completion of the King's College Foundation Year Program satisfies the first-year requirements for the European Studies 20 credit Major, with the exception of the language course and the natural science course.

Year II to IV

- After the first year, students take a minimum of 18 half-credit courses from the approved list of courses with significant European content.
- No more than eight of these may be taken in any one department, and at least ten must be taken in two other departments.
- At least six half-credit courses should be at the 3000 level or above, taken from at least two different departments.
- The 4000 level multidisciplinary seminar and the second year core course are also required.

Students should aim, with help from the European Studies Coordinator, for a balance in their courses to reflect the three general areas outlined above.

III. Course Descriptions

EURO 2101.03: Europe: Ideas, Culture and Society to 1900.

A multidisciplinary introduction to European Studies emphasizing the period to 1900. Classes look at the interconnecting themes among literature, the arts, philosophy and society in Europe.

FORMAT: Lecture/discussion

PREREQUISITE: Completion of at least two first-year courses from FASS departments, or the King's Foundation Year Program.

EURO 2102.03: Europe: Ideas, Culture and Society from 1900 to the present.

A multidisciplinary introduction to European Studies beginning in the 20th century. Classes look at the interconnecting themes among literature, the arts, philosophy and society in contemporary Europe.

FORMAT: Lecture/discussion

PREREQUISITE: Completion of at least two first-year courses from FASS departments, or the King's Foundation Year Program. Completion of EURO 2101.03 will ideally precede registration for this course.

EURO 3999.03: Independent Study.

Individually directed research and writing, supervised by a faculty member. This course is taught only by special arrangement between individual students and individual instructors. Signature required.

FORMAT: Independent study with a professor

PREREQUISITE: Restricted to 3rd year European Studies Advanced Majors and Honours students

EURO 4510.06: European Studies Seminar.

Discussion of readings and presentations on European Studies topics. The topics for the seminar vary each year. The course emphasizes a broad multidisciplinary perspective on European Studies.

FORMAT: Restricted to 4th year European Studies Honours and Advanced Major students

EURO 4512.03: European Studies Seminar.

Discussion of readings and presentations on European Studies topics. The topics for the seminar vary each year. The course emphasizes a broad multidisciplinary perspective on European studies.

FORMAT: Seminar

PREREQUISITE: Restricted to 4th year European Studies Honours and Advanced Major students

EXCLUSION: EURO 4510.06X/Y

EURO 4800.06: Honours Essay in European Studies.

EURO 4801.03: Honours Essay in European Studies.

RESTRICTION: Honours Student in their final year of study

EURO 4802.03: Honours Essay in European Studies.

RESTRICTION: Honours Student in final year of study

European Studies Approved Courses

Note: Students should note that some courses may have prerequisites or other departmental restrictions, and some courses may not be offered in every year.

Other courses, not on this list, may be appropriate. Please consult an ES Advisor.

Wahlstrom, L., BMus (Brandon), Lic Piano (McGill)

I. Introduction

As of July 1, 2014, the new Fountain School of Performing Arts brings together the former departments of Music and Theatre as a single academic unit. Areas of study include Acting, Film Studies, Composition, Costume Studies, Music Performance, Musicology, Music and Theatre, Technical Theatre and Stage Design, and Theatre Studies. The Fountain School of Performing Arts supports a wide variety of cross-disciplinary initiatives including a high-profile visiting arts program and active outreach and mentoring programming.

For more information on academic programs, see the following Calendar sections:

I. Introduction

The Fountain School of Performing Arts provides a wide variety of programs for those whose demonstrated talent and specific pre-university training qualify them for specialization in Music studies. Certain courses and ensembles are available to the non-specialist student who wishes to increase both musical awareness as a listener and involvement as a performer.

The Bachelor of Music Program offers intensive professional music training which prepares students for careers or further study in many areas, including performance, composition, theory, musicology, music criticism or music education. It also offers excellent preparation for professional studies in other areas, such as law or journalism.

The 20 Credit BA in Music, the Honours BA in Music, and the BA or BSc Combined Honours with Music programs provide a strong foundation for various professions where a working knowledge of music is desirable, such as librarianship, media programming and production, music industry commercial studio and electroacoustic work, arts management, recreational and therapeutic work, to name only a few. You can complete a minor in Music or a minor in Musicology to enhance your degree.

Elective courses for non-majors are available, some of which require no musical background or training.

A. Elective Courses for Non-Majors

- MUSC 1020.03: Listening to Classical Music
- MUSC 1021.03: Listening Beyond the Classics
- MUSC 1003.03: Preparatory Theory and Aural Skills I
- MUSC 1004.03: Preparatory Theory and Aural Skills II
- MUSC 2007X/Y.06: The Guitar: History and Techniques
- MUSC 2008X/Y.06: Modern Guitar
- MUSC 2016.03: Topics in Music and Cinema
- MUSC 2018.03: Popular Music Until 1960
- MUSC 2019.03: The Rock 'n' Roll Era and Beyond
- MUSC 2020.03: The History of Jazz
- MUSC 2022.03: The Art and Science of Drumming
- MUSC 2600X/Y.06: Recording Studio Techniques
- MUSC 3060.03: Introduction to Music and Sound Technology
- MUSC 3061.03: Electroacoustic Music
- MUSC 3314.03: History of Opera
- MUSC 4353.03: Music since 1945
- MUSC 4354.03: Popular Music Analysis
- MUSC 4355.03: Narrative Strategies in 19th-Century Music (cross-listed with GWST 4355.03)
- MUSC 4356.03: Opera Studies
- MUSC 4358/4359: Studies in Medieval Music
- MUSC 4360.06: Advanced Seminar in Baroque Culture
- MUSC 4361.03/4365.03: Topics in Musicology I
- MUSC 4362.03: Topics in Canadian Music
- MUSC 4363.03/4367.03: Topics in Musicology II
- MUSC 4380.03/4381.03: Selected Composer Studies

Other courses in Music may be taken by special permission. Applied study (individual studio instruction) may be taken subject to an audition and available space.

B. Admission Procedures for all Music Programs

All Music programs require that candidates (including transfer students) apply to both the university and the Fountain School of Performing Arts and audition for Applied Study. See the website at <http://dal.ca/music> for the full application process. Re-audition and testing may be required if enrolment is deferred, if a program is interrupted for a year or more, or if an applied study course is not successfully completed in one academic year.

C. Ensemble Participation

All students (preparatory year, majors, non-majors and elective students) enrolled in an applied study course (instrument or voice) must participate in ensembles, normally in a minimum of two per year. All wind, brass, percussion and strings students will participate, as appropriate and as needed, in Wind Ensemble, Chamber Orchestra, Symphony Orchestra, Jazz Ensemble, and chamber ensembles.

All voice, piano, organ and guitar students will normally participate in the Dalhousie University Chorus, and in other ensembles as appropriate to the idiom. Exceptions may be made for BMus Performance students in their fourth year of applied study. Voice students in the BMus Performance concentration may, for pedagogical reasons, with the agreement of the Voice Area, substitute choral participation with the performance of a significant solo or chamber composition for voice.

The Fountain School of Performing Arts will monitor the number and types of ensembles for each student. Note that most ensembles require auditions.

The Ensemble requirement is specific to each year of Applied Study and appears on the student's transcript. Students will be given a Pass/Fail grade each year and must complete all required levels with a grade of Pass in order to graduate. The ensemble requirement is non-credit and will not count toward course load, but there is NO TUITION FEE for the Ensemble requirement.

Students must attend regularly and punctually the rehearsals and performances of their required ensembles.

Students should note that ensemble participation typically requires regularly occurring rehearsals and scheduled performances. Since rehearsals and concerts are often in the evening, students are advised not to undertake evening commitments that could conflict with these program and course requirements.

Membership in the various ensembles is open to the university and the community by audition. Please contact the director of each ensemble (listed below) or the School for further details.

Dalhousie University Chorus (M. Martell)
 Dalhousie Wind Ensemble (N. Beeler)
 Dalhousie Chamber Orchestra (P. Djokic)
 Dalhousie Jazz Ensemble (C. Mitchell)
 Dalhousie Percussion Ensemble (D. Gray)
 Dalhousie Opera Workshop (G. Servant, M. Swanston)
 Small Ensembles (staff coaches)
 Collaborative Piano (staff coaches)
 Dalhousie Symphony Orchestra (P. Allen)
 Voice Chamber Ensemble (M. Swanston)

II. Degree Programs

A. Preparatory Courses

These courses are for those prospective Music-degree program students who demonstrate outstanding potential at their audition, but who require further training before entering first year Music study at the university level.

Students admitted to this level are considered to be in a BA undeclared program and may take a maximum of five full credits.

Curriculum

- MUSC 1003.03: Preparatory Theory and Aural Skills I
- MUSC 1004.03: Preparatory Theory and Aural Skills II
- MUSC 1071X/Y.03: Preparatory Keyboard Skills

- MUSC 1100X/Y.06: Preparatory Applied Study
- Required Writing Course (see Degree Requirements, [page 125](#) for a list of writing courses)
- Arts and Social Sciences or Science elective, one full-credit
- MUSC 0022X/Y.00: Ensemble (Prep)

Special Notes:

1. Preparatory Music courses MUSC 1003.03, MUSC 1004.03, MUSC 1071X/Y.03 and MUSC 1100X/Y.06, although credit courses, cannot be counted toward a Music degree program; however, they may be counted as electives in other BA or BSc degree programs.
2. Students may be asked to re-test in music theory, aural skills and keyboard skills in order to enter first year courses.
3. The Fountain School of Performing Arts may count the final grade in MUSC 1100X/Y.06 as sufficient proof of readiness to enter one of the School's degree programs, or may require a separate audition or re-audition.

Standards for Preparatory Courses

Minimum grades for advancement to first year Music degree studies (see Special Notes #2 and #3 above):

MUSC 1003.03	C+
MUSC 1004.03	B-
MUSC 1071X/Y.03	B-
MUSC 1100X/Y.06	B-

B. Bachelor of Music (BMus)

The BMus is a four year program with 16 out of 20 credits in Music. Upon successful completion of the second year, students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC courses) may continue with studies in the BMus general degree or may apply for one of three concentrations, Composition, Musicology or Performance: additional requirements for acceptance to the areas of concentration are listed below, including applicable standards. Please also see section 6. Standards for overall BMus grade and other requirements. Students wishing to pursue one of the three concentrations must apply by March 1 of the second year of study.

1. Common Curriculum

First Year

- MUSC 1000-level Applied Study (MUSC 1101X/Y.06 to MUSC 1121X/Y.06)
- MUSC 1201.03: Music Theory I
- MUSC 1222.03: Music Theory II
- MUSC 1270X/Y.03: Aural Skills I
- MUSC 1271X/Y.03: Keyboard Skills I
- MUSC 1352.03: Music History I
- MUSC 1353.03: Music History II
- Arts and Social Sciences or Science elective, one full credit (Writing Course elective)
- MUSC 0122X/Y.00: Ensemble I

Second Year

- MUSC 2000-level Applied Study (MUSC 2101X/Y.06 to MUSC 2121X/Y.06)
- MUSC 2221.03: Music Theory III
- MUSC 2222.03: Music Theory IV
- MUSC 2270X/Y.03: Aural Skills II
- MUSC 2271X/Y.03: Keyboard Skills II
- MUSC 2352.03: Music History III
- MUSC 2353.03: Music History IV: Focused Study *
- Arts and Social Sciences or Science electives, two half credits
- MUSC 0222X/Y.00: Ensemble II

* Voice students intending to pursue a Concentration in Performance must take MUSC 2175.03 (Lyric Diction for Singers) either in the second or third year of study, depending on the cycle of courses. If they take MUSC 2175.03 in the second year, MUSC 2353.03 (Music History IV) is deferred to year three or four, not omitted.

* Students intending to pursue a Concentration in Composition may take MUSC 2210.03 (Introduction to Composition) in the Fall semester of their second year. Students taking this option will: 1. Defer their Fall half credit Arts and Social Sciences or Sciences elective to the Winter term of the same year; 2. Not take MUSC 2353.03 (Music History IV) in the Winter term of their second year. Students accepted into Composition will be exempt from 2353.03. Students who

are not accepted into Composition will take MUSC 2353.03 (Music History IV) in either their third or fourth year.

2. BMus General Degree

Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC courses) may proceed to a BMus general degree program in their third year. This program choice allows for the greatest flexibility within the BMus program offerings. It will prepare students well for advanced degrees in Music including the Bachelor of Education, as well as for a wide range of careers in music.

Students must submit a proposal for their intended graduation project (4599.03 or 4000-level musicology seminar) by March 1 of the third year of study, according to the Fountain School of Performing Arts guidelines. Students must achieve a minimum grade of 2.7 (B-) in this credit.

Third Year

- MUSC 3000-level Applied Study (MUSC 3101X/Y.06 to MUSC 3121X/Y.06)
- MUSC 3283.03: Modal Counterpoint OR MUSC 3284.03: Tonal Counterpoint
- MUSC 3221.03: Form and Analysis: The Second Viennese School to the Present Day
- One half-credit in music history beyond the 2000-level chosen from: MUSC 4283.03, MUSC 4285.03, MUSC 4353.03, MUSC 4354.03, MUSC 4355.03, MUSC 4356.03, MUSC 4361/4365.03, MUSC 4362.03, MUSC 4363/4367.03, MUSC 4380/4381.03, MUSC 4358/4359.03
- 1.5 credits of Music electives
- Arts and Social Sciences or Science elective, one full credit
- MUSC 0322X/Y.00: Ensemble III

Fourth Year

- MUSC 4000-level Applied Study (MUSC 4101X/Y.06 to MUSC 4121X/Y.06)
- MUSC 3282.03: Orchestration
- MUSC 4599.03: Graduation Project or 4000-level Musicology seminar (see 4. Concentration in Musicology for the list of seminars)
- two credits of Music electives
- Arts and Social Sciences or Science elective, one full credit
- MUSC 0422X/Y.00: Ensemble IV

NOTE: Those students who are interested in pursuing a career in classroom teaching of music must complete an undergraduate degree in Music and then complete a Bachelor of Education (BEd) degree at another institution. Students are advised to consult provincial regulations for teacher certification and entrance requirements for their institution of choice, and to meet with the Undergraduate Advisor, in order to ensure optimal course selection within the BMus General degree program.

3. Concentration in Composition

Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC courses), along with a minimum overall average GPA of 3.3 (B+) in their Music Theory and Composition courses (MUSC 1201, 1202, 2201 and 2210) may submit a portfolio of original music (normally prepared in the MUSC 2210 Introduction to Composition) by March 1 of the second year to apply for admission to this concentration. Students selected for this concentration will demonstrate outstanding abilities and potential as composers. See the Fountain School of Performing Arts for further details concerning admission procedures.

Students who are accepted in this concentration must achieve a minimum grade of 3.3 (B+) in Composition I (MUSC 3210.03) in order to remain in the concentration. Students must achieve a minimum grade of 2.7 (B-) in both MUSC 4210.03 and in MUSC 4299.03.

Third Year

- MUSC 3000-level Applied Study (MUSC 3101X/Y.06 to MUSC 3121X/Y.06)
- MUSC 3210X/Y.06: Composition I
- MUSC 3221.03: Form and Analysis: the Second Viennese School to the Present Day
- MUSC 3283.03: Modal Counterpoint or MUSC 3284.03 Tonal Counterpoint
- MUSC 3282.03: Orchestration
- MUSC 4280.03: Contemporary Techniques
- Arts and Social Sciences or Science elective, one full credit.
- MUSC 0322X/Y.00: Ensemble III

Fourth Year

- MUSC 4210X/Y.06: Composition II

- MUSC 4353.03: Music Since 1945 or MUSC 4362.03: Topics in Canadian Music (replacing MUSC 2353.03 Music History IV)
- MUSC 3660.03: Introduction to Music and Sound Technology
- MUSC 3661.03: Electroacoustic Music
- MUSC 4299X/Y.03: Area Graduation Requirement (Composition)
- Arts and Social Sciences or Science elective, one full credit.
- Music elective, one credit

4. Concentration in Musicology

Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000-level MUSC courses) must submit two writing samples by March 1 of the second year to apply for admission to this concentration.

Students selected for this concentration will demonstrate outstanding abilities and potential as musicologists. See the Fountain School of Performing Arts for further details concerning admission procedures.

Students who are accepted in this concentration must achieve a minimum grade of 2.7 (B-) in the graduation requirement MUSC 4399.03.

Third Year

- MUSC 3000-level Applied Study (MUSC 3101X/Y.06 to MUSC 3121X/Y.06)
- MUSC 3221.03: Form and Analysis: The Second Viennese School to the Present Day
- MUSC 3283.03: Modal Counterpoint or 3284.03: Tonal Counterpoint
- MUSC 4353.03: Music since 1945
- MUSC 0322X/Y.00: Ensemble III

Fourth Year

- MUSC 4000-level Applied Study (MUSC 4101X/Y.06 to MUSC 4121X/Y.06)
- MUSC 4399X/Y.03: Graduation Requirement (Thesis)
- MUSC 0422X/Y.00: Ensemble IV

Also in the third and fourth years (6 credits)

- two credits of Music electives (any choice, but students are strongly encouraged to take MUSC 3282.03 Orchestration)
- The equivalent of two full credits to be chosen from Musicology electives as listed below:
 - MUSC 3066.03: Women, Gender and Music
 - MUSC 3314.03: History of Opera
 - MUSC 4353.03: Music since 1945
 - MUSC 4354.03: Popular Music Analysis
 - MUSC 4355.03: Narrative Strategies
 - MUSC 4356.03: Opera Studies
 - MUSC 4358.03/4359.03: Studies in Medieval Music
 - MUSC 4360.06: Advance Seminar in Baroque Culture
 - MUSC 4361.03/4365.03: Topics in Musicology I
 - MUSC 4362.03: Topics in Canadian Music
 - MUSC 4363.03/4367.03: Topics in Musicology II
 - MUSC 4380.03/4381.03: Selected Composer Studies
- one credit of any introductory language course (X/Y.06). In a case where a student already has a second language, he or she can be directed towards a third language OR to a full credit of literature courses in the second language (e.g., FREN 2021.03: Langue et culture together with FREN 2201.03: Introduction à la littérature for a French-speaking student).
- One of: HIST 1004X/Y.06: Introduction to European History or HIST 1862X/Y.06: North American Experiences

5. Concentration in Performance

Students in good standing (minimum overall average GPA of 2.7 [B-] in 1000 and 2000 level MUSC courses), along with a minimum grade of 3.3 (B+) in their 1000 and 2000 level Applied Study may audition at the end of second year to apply for admission to this concentration.

Students selected for this concentration will demonstrate outstanding abilities and potential as performers. See the Fountain School of Performing Arts for further details concerning admission procedures.

Students who are accepted in this concentration must achieve a minimum grade of 3.3 (B+) in third year Performance Concentration Applied Study (MUSC 3701.06 to 3721.06) and in the Third Year performance recital (MUSC 3199.03) in order to remain in the concentration. Students must achieve a minimum grade of 2.7 [B-] in their fourth year Performance Concentration Applied Study (MUSC 4701.06 to 4721.06) and in their Fourth Year performance recital (4199.03).

Third Year

- MUSC-3000 level Performance Concentration Applied Study (MUSC 3701X/Y.06 to MUSC 3721X/Y.06)
- MUSC 3199X/Y.03: Half-Recital (Year III Performance)
- MUSC 3221.03: Form and Analysis: The Second Viennese School to the Present Day
- MUSC 3283.03: Modal Counterpoint or 3284.03: Tonal Counterpoint
- MUSC 0322X/Y.00: Ensemble III
- one half-credit in music history beyond the 2000-level chosen from: MUSC 4283.03, MUSC 4285.03, MUSC 4353.03, MUSC 4354.03, MUSC 4355.03, MUSC 4356.03, MUSC 4358/4359.03, MUSC 4361/4365.03, MUSC 4362.03, MUSC 4363/4367.03, MUSC 4380/4381.03

Fourth Year

- MUSC 4000-level Performance Concentration Applied Study (MUSC 4701X/Y.06 to MUSC 4721X/Y.06)
- MUSC 4199X/Y.03: Area Graduation Requirement (Performance: Recital)
- MUSC 0422X/Y.00: Ensemble IV

Although not required, students in Performance are encouraged to take MUSC 3282.03, Orchestration, as one of their Music electives.

Also in the third and fourth years, according to idiom:

Voice (5.5 credits):

- MUSC 3176.03: Principles of Vocal Pedagogy
- MUSC 3177.03: Vocal Literature
- MUSC 3314.03: History of Opera
- 1.5 Music elective, any choice
- MUSC 2175.03 Lyric Diction for Singers, taken in year two or three, depending on cycle with Pedagogy/Literature
- two full credits Arts and Social Sciences or Science electives (at least one Arts and Social Sciences or Science elective taken over the four year program must be an Introductory Language course: either Italian, German or French)

Piano (5.5 credits):

- 3.5 full credit Music electives, any choice; however, if offered, students should take:
 - MUSC 3353.03: Chamber Music Literature
- two full credits Arts and Social Sciences or Science electives

Strings (5.5 credits):

- 3.5 credits Music electives, any choice; however, if offered, students should take:
 - MUSC 3160.03: Conducting
 - MUSC 3353.03: Chamber Music Literature
- two full credits Arts and Social Sciences or Science electives

Guitar (5.5 credits):

- MUSC 3308.06: Modern Guitar
- MUSC 4170.03: Improvisation Techniques and Practices
- two full credits Music electives, any choice
- two full credits Arts and Social Sciences or Science electives

Saxophone (5.5 credits):

- MUSC 4170X/Y.03: Improvisation Techniques and Practices
- MUSC 2020.03: The History of Jazz
- 2.5 credits Music electives, any choice
- two full credits Arts and Social Sciences or Science electives

Wind and brass instruments, percussion (5.5 credits):

- 3.5 Music electives, any choice
- two full credits Arts and Social Sciences or Science electives

6. BMus Standards

Students may not enrol in the Bachelor of Music Graduation Requirement courses (MUSC 4199- MUSC 4599) until the fourth year of the Program.

Students must achieve an average minimum overall GPA of 2.7 (B-) in MUSC courses beyond the 1000 level in order to graduate with a BMus degree. Students must achieve a minimum grade of C in 1000 level applied study in order to advance to 2000 level Applied Study. Grades in MUSC courses beyond the 1000 level must be "C" or better in order to count toward the BMus degree.

See also the sections above for specific standards regarding concentrations.

C. BA with Combined Honours in Music and Theatre

The Fountain School of Performing Arts offers a highly specialized four-year BA with a Combined Honours in Music and Theatre which blends the principal courses of the Bachelor of Music in Voice with Theatre courses in Acting and Movement. A maximum of five students will be selected for entrance into the program each year. The graduate of this program will advance toward a professional career in the performing arts equipped with a foundation in music and theatre.

Students must successfully complete the audition/entrance tests for the first year of the Music Program. Students must also audition for, and be accepted into, the Acting Program. The prerequisite for audition is the successful completion of THEA 1800X/Y.06.

To qualify for graduation a student must participate by having a significant role in at least one staged musical production (either an integral part of Dal Theatre Productions or the Opera Workshop).

In addition to the School requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, [page 125](#) of this calendar.

NOTE: Students having to withdraw from this Program through failure to achieve the required standards in Theatre courses must re-audition if desiring a degree program in Music. Students having to withdraw from this Program through failure to achieve the required standards in Music courses must re-apply if desiring a degree program in Theatre.

First year

- MUSC 1101X/Y.06: Voice I
- MUSC 1201.03: Music Theory I
- MUSC 1222.03: Music Theory II
- MUSC 1270X/Y.03: Aural Skills I
- MUSC 1271X/Y.03: Keyboard Skills I
- THEA 1000X/Y.06: Introduction to Theatre [Writing Requirement]
- THEA 1800X/Y.06: Introduction to Acting and Performance
- MUSC 0122X/Y.00: Ensemble I: (normally Dalhousie University Chorus/Opera Workshop)

Second year

- MUSC 2101X/Y.06: Voice II
- MUSC 2221.03: Music Theory III
- MUSC 2222.03: Music Theory IV
- MUSC 2270X/Y.03: Aural Skills II
- MUSC 2271X/Y.03: Keyboard Skills II
- THEA 2800X/Y.06: Acting II
- THEA 2820X/Y.06: Dance & Movement II
- MUSC 0222X/Y.00: Ensemble II: (normally Dalhousie University Chorus/Opera Workshop)

Third year

- MUSC 3101X/Y.06: Voice III
- THEA 2012.03: Early Modern Theatre
- THEA 3800X/Y.06: Acting III
- THEA 3820X/Y.06: Dance & Movement III
- Arts and Social Science: One of 1000-level Life or Physical Science, Social Science, or Language Course Requirement (see Degree Requirements, p. 40 of this Calendar)
- MUSC 0322X/Y.00: Ensemble III: (normally Dalhousie University Chorus/Opera Workshop)
- MUSC 3314.03: History of Opera

Fourth year

- MUSC 4101X/Y.06: Voice IV
- THEA 4800X/Y.06: Acting IV
- THEA 4840X/Y.06: Advanced Performance Techniques
- Arts and Social Science: Two remaining 1000-level Life or Physical Science, Social Science, or Language Course Requirement (see Degree Requirements, p. 40 of this Calendar)
- MUSC 0422X/Y.00: Ensemble IV: (normally Dalhousie University Chorus/Opera Workshop)

Honours Music and Theatre students will be awarded the 21st credit for their satisfactory participation in a Dal Theatre or Opera Workshop production.

D. BA (20 credit) Honours in Music

In addition to the School requirements listed below, students must satisfy the requirements outlined in the College of Arts and Science Degree Requirements section beginning on [page 125](#) of this calendar. Students must successfully complete an audition/entrance tests.

School Requirements

First year (5.0 credits):

- MUSC 1000-level Applied Study (MUSC 1101X/Y.06 to 1121X/Y.06)
- MUSC 1201.03: Music Theory I
- MUSC 1222.03: Music Theory II
- MUSC 1270X/Y.03: Aural Skills I
- MUSC 1271X/Y.03: Keyboard Skills I
- One full credit Arts and Social Sciences Writing Course
- One full credit Arts and Social Sciences or Science elective
- MUSC 0122X/Y.00: Ensemble I

Second year (5.0 credits):

- MUSC 2000-level Applied Study (MUSC 2101X/Y.06 to 2121X/Y.06)
- MUSC 2270X/Y.03: Aural Skills II
- MUSC 2271X/Y.03: Keyboard Skills II
- MUSC 2221.03: Music Theory III
- MUSC 2222.03: Music Theory IV
- two full credits Arts and Sciences or Science electives (see Degree Requirements for the College of Arts and Science)
- MUSC 0222X/Y.00: Ensemble II

Additional School Requirements

- MUSC 1352.03: Music History I (recommended during 2nd year)
- MUSC 1353.03: Music History II
- MUSC 2352.03: Music History III
- MUSC 4399.03: Graduation Requirement (Thesis)
- five to seven full credits Music electives, at least three above the 2000 level

E. Bachelor of Arts (Combined Honours Program) Bachelor of Science (Combined Honours Program)

Students may enroll in either of these combined honours programs with the joint approval of the Fountain School of Performing Arts and the department of the allied subject (in compliance with the Combined Honours requirements detailed in the Degree Requirements section, [page 125](#) of this calendar). Students must successfully complete an audition/entrance tests.

School Requirements

1000-level

- MUSC 1000-level Applied Study (MUSC 1101X/Y.06 to MUSC 1121X/Y.06)
- MUSC 1201.03: Music Theory I
- MUSC 1222.03: Music Theory II
- MUSC 1270X/Y.03: Aural Skills I
- MUSC 1271X/Y.03: Keyboard Skills I
- MUSC 1352.03: Music History I
- MUSC 0122X/Y.00: Ensemble I

Additional School Requirements:

At least four credits in Music above the 1000 level, at least two of which must be at the 3000 or 4000 level. Among these, one half-credit additional course in Musicology must be completed (chosen from MUSC 2352.03, 2353.03, 4353.03).

NOTE: Students considering Honours programs must meet with an academic advisor in the Fountain School of Performing Arts as soon as possible in their program, and no later than their second year of studies. For Combined Honours programs, students must consult with Advisors in BOTH departments for application procedures and deadlines. Students may apply for most honours programs before registering for the second year. Application forms are available from departments, at the Registrar's Office, or at <http://www.dal.ca/registrar>.

F. BA (20 credit) Major in Music

In addition to the School requirements listed below, students must satisfy the requirements outlined in the College of Arts and Science Degree Requirements

section, beginning on [page 125](#) of this calendar. Students must successfully complete an audition/entrance tests.

School Requirements

First year (5.0 credits):

- MUSC 1000-level Applied Study (MUSC 1101X/Y.06 to 1121X/Y.06)
- MUSC 1201.03: Music Theory I
- MUSC 1222.03: Music Theory II
- MUSC 1270X/Y.03: Aural Skills I
- MUSC 1271X/Y.03: Keyboard Skills I
- One full credit Arts and Social Sciences Writing Course
- One full credit Arts and Social Sciences or Science elective
- MUSC 0122X/Y.00: Ensemble I

Second year (5.0 credits):

- MUSC 2000-level Applied Study (MUSC 2101X/Y.06 to 2121X/Y.06)
- MUSC 2270X/Y.03: Aural Skills II
- MUSC 2271X/Y.03: Keyboard Skills II
- MUSC 2221.03: Music Theory III
- MUSC 2222.03: Music Theory IV
- 2 full credits Arts and Social Sciences or Science electives
- 0222X/Y.00: Ensemble II

Additional School Requirements:

- MUSC 1352.03: Music History I (recommended during second year)
- MUSC 1353.03: Music History II
- MUSC 2352.03: Music History III
- three to 5.5 full credit Music electives, at least three above the 2000 level.

G. BA or BSc (20 credit) Double Major

In addition to the Fountain School of Performing Arts requirements below, students must satisfy the requirements outlined in the College of Arts and Science Degree Requirements section, beginning on [page 125](#) of this calendar. The major subject with the most advanced credits appears first on the record.

School Requirements

- Music as First Subject:** Students must satisfy the School requirements as listed for the 20 credit BA with Major in Music (section F. above), including 1000 and 2000 level applied study. Students must successfully complete an audition/entrance tests. Please consult with the School for details.
- Music as Second Subject:** Students must complete one year of applied study (subject to audition) and four full Music credits above the 1000-level, including two full credits beyond the 2000-level. The following courses may not be used to count toward this degree: MUSC 2007.06, MUSC 2022.06, MUSC 2130.06, MUSC 3130.06.

H. Minor Programs in Music and Musicology

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

I. Cooperative Degree Programs with the University of King's College

The following degree programs are offered in cooperation with the University of King's College: Bachelor of Music with King's Foundation Year (FYP), Bachelor of Journalism with Music History Option; and Bachelor of Arts combined honours in Contemporary Studies. Students may also pursue a BA (20 credit) and an honours BA through the University of King's College. Please consult the University of King's College (Office of the Registrar) for further information including curriculum and registration details.

III. Course Descriptions

NOTE: Not all courses are offered every year. Please consult the current timetable to determine current offerings.

MUSC 0022X/Y.00: Ensemble (Prep).

A non-credit co-requisite for students in Preparatory Applied Study, MUSC 1100X/Y.06 (voice or instrument). The number and type of ensemble(s) are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regularly occurring rehearsals and scheduled performances.

Please see the department for specific guidelines and schedules. Refer to page 187 for further details and a list of ensembles.

MUSC 0122X/Y.00: Ensemble I.

A non-credit co-requisite for students in First Year (1000-level) Applied Study (voice or instrument). The number and type of ensemble(s) are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regularly occurring rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to page 187 for further details and a list of ensembles.

MUSC 0222X/Y.00: Ensemble II.

A non-credit co-requisite for students in Second Year (2000-level) Applied Study (voice or instrument). The number and type of ensemble(s) are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regularly occurring rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to page 187 for further details and a list of ensembles.

MUSC 0322X/Y.00: Ensemble III.

A non-credit co-requisite for students in Third Year (3000-level) Applied Study (voice or instrument). The number and type of ensemble(s) are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regularly occurring rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to page 187 for further details and a list of ensembles.

MUSC 0422X/Y.00: Ensemble IV.

A non-credit co-requisite for students in Fourth Year (4000-level) Applied Study (voice or instrument). The number and type of ensemble(s) are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regularly occurring rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to page 187 for further details and a list of ensembles.

MUSC 0522X/Y.00: Ensemble (Advanced).

A non-credit co-requisite for students in Advanced Applied Study, MUSC 4150X/Y.06 (voice or instrument). The number and type of ensemble(s) are selected in accordance with instrument/program requirements and with the guidance and approval of the applied studies instructor. Ensemble participation typically requires regularly occurring rehearsals and scheduled performances. Please see the department for specific guidelines and schedules. Refer to page 187 for further details and a list of ensembles.

MUSC 1003.03: Preparatory Aural and Theory Skills I.

An introduction to University-level music theory and aural perception for prospective music majors recommended by audition to preparatory level courses in music; also open to non-majors. A knowledge of music reading and rudiments is presumed. This course will place heavy emphasis on learning and drilling the basic concepts of musical structures, from rudiments through to basic harmony. Guided progressive exercise will provide training in sight-singing and dictation. FORMAT: Lecture 3 hours

PREREQUISITE: Permission of instructor

EXCLUSION: MUSC 1001.03, MUSC 1002.03, MUSC 1070.03

MUSC 1004.03: Preparatory Aural and Theory Skills II.

A continuation of MUSC 1003.03 for prospective music majors recommended by audition to preparatory level courses in music; also open to non-majors. This course will place heavy emphasis on learning and drilling the basic concepts of musical structures, elementary modulation, comparison of tonality, atonality, modality and chromatic tonality, elementary diatonic harmony and four-part writing. Guided progressive exercise will provide training in sight-singing and dictation. FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 1003.03 or permission of the instructor

EXCLUSION: MUSC 1102.03, MUSC 1070.03

MUSC 1020.03: Listening to Classical Music.

Designed for the interested listener who desires to acquire an informed response to musical experiences. Knowledge of musical notation and terminology is not a prerequisite. The course is a survey of musical styles from the pre-modern era

through baroque and classical styles and into the late nineteenth century. We will consider: music and image; music and the related arts; the art and psychology of listening. This course is for non-music majors and cannot be counted as a credit toward a degree in Music.

FORMAT: Lecture 3 hours

EXCLUSION: MUSC 1000.06

MUSC 1021.03: Listening Beyond the Classics.

Designed for the interested listener who desires to acquire an informed response to musical experiences. Knowledge of musical notation and terminology is not a prerequisite. The course is a survey of musical styles from the late nineteenth century to the present day. We will consider: music and image; music and the related arts; the art and psychology of listening. This course is for non-music majors and cannot be counted as a credit toward a degree in Music.

FORMAT: Lecture 3 hours

EXCLUSION: MUSC 1000.06

MUSC 1071X/Y.03: Preparatory Keyboard Skills.

An introduction to keyboard proficiency for Music degree program students, to prepare the student for successful training in keyboard harmony.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab 2 hours

PREREQUISITE: Permission of the instructor, on the basis of the results of the Entrance Keyboard Proficiency Test

MUSC 1081.03: Voice Clinic for the Theatre.

A course in the principles of singing as applied to classical actor training. Exercises and repertoire appropriate to this training will be prepared by the students for class performance. No prior instruction in music or singing is presumed.

FORMAT: A twice weekly ensemble class: 1.5 hours plus individual tutorials

EXCLUSION: This class is offered exclusively to students in the third year of the Acting Program

MUSC 1100X/Y.06: Preparatory Applied Study.

For students in the Preparatory Year. By special recommendation some music majors may be advised by the Auditioning Committee to begin individual lessons at a level prerequisite to first year Applied Study courses.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

CO-REQUISITE: MUSC 0022.00X/Y: Ensemble (Prep)

MUSC 1000 level Applied Study.

Individual studio instruction. May be taken as elective course subject to audition and available space. Please note that all applied study courses require an audition. Please contact the Fountain School of Performing Arts for audition dates or visit website <http://dal.ca/music>. Auxiliary fees apply. Co-requisite ensemble participation is required. Students must achieve a minimum grade of C in first year applied study in order to advance to second year applied study.

- MUSC 1101X/Y.06: Voice I
- MUSC 1102X/Y.06: Guitar I
- MUSC 1103X/Y.06: Piano I
- MUSC 1104X/Y.06: Organ I
- MUSC 1105X/Y.06: Violin I
- MUSC 1106X/Y.06: Viola I
- MUSC 1107X/Y.06: Cello I
- MUSC 1108X/Y.06: Double Bass I
- MUSC 1109X/Y.06: Flute I
- MUSC 1110X/Y.06: Oboe I
- MUSC 1111X/Y.06: Clarinet I
- MUSC 1112X/Y.06: Bassoon I
- MUSC 1113X/Y.06: Saxophone I
- MUSC 1114X/Y.06: French Horn I
- MUSC 1115X/Y.06: Trumpet I
- MUSC 1116X/Y.06: Trombone I
- MUSC 1117X/Y.06: Tuba I
- MUSC 1118X/Y.06: Percussion I

NOTE: Students taking any of the above courses must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

MUSC 1201.03: Music Theory I.

In order to fully understand the principles and origins of common-practice tonal music, as studied in MUSC 1222, this course proposes a survey of both pre- and post-tonal music, showing how they relate to each other. The focus will be on

melody (modes, phrase structure, cadences and motivic manipulation of the Middle Ages, Renaissance and early 20th century) and counterpoint (exercises in two-part species counterpoint and analysis of short 20th century contrapuntal pieces).

SIGNATURE REQUIRED

FORMAT: Lecture 3 hours

PREREQUISITE: Permission of the instructor, based on placement testing, or MUSC 1001.03/MUSC 1002.03

CO-REQUISITE: MUSC 1270X/Y.03, 1271X/Y.03

MUSC 1222.03: Music Theory II.

An introduction to diatonic and chromatic harmony, developing skills in part-writing and harmonic analysis.

FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 1201.03 or permission of the instructor

EXCLUSION: MUSC 1202.03

CO-REQUISITE: MUSC 1270X/Y.03, MUSC 1271X/Y.03

MUSC 1270X/Y.03: Aural Skills I.

A course designed to correlate with MUSC 1201.03 and MUSC 1222.03. Melodic, harmonic, rhythmic, textural and stylistic factors are visualized, performed and dictated systematically. Lab work in ear-training and sight-singing is done three times per week. Each student is a member of a small working section.

SIGNATURE REQUIRED

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lab 3 hours

PREREQUISITE: Permission of the instructor based on placement testing or MUSC 1001.03/1002.03 or equivalent

CO-REQUISITE: MUSC 1201.03, 1222.03, and 1271X/Y.03

MUSC 1271X/Y.03: Keyboard Skills I.

The development of basic skills in sight reading, score reading and harmonized accompaniment at the keyboard, for Music degree program students.

SIGNATURE REQUIRED

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lab 2 hours

PREREQUISITE: Permission of instructor based on placement testing, or MUSC 1071.03

CO-REQUISITE: MUSC 1201.03, 1222.03, and 1270X/Y.03

MUSC 1352.03: Music History I.

An introduction to thinking and writing about music. This course will use well-known works to develop an understanding of musical styles and functions, and it will explore such topics as melody, harmony, rhythm, texture and timbre. One of the goals of the course is to acquire university-level research, writing, critical listening and analytical skills. The ability to read musical notation is required.

NOTE: SIGNATURE REQUIRED

FORMAT: Lecture 3 hours

MUSC 1353.03: Music History II.

A survey of Western European art music from antiquity to 1750. The work required will include critical listening, writing, score study and historical research.

FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 1352.03 or permission of instructor

EXCLUSION: MUSC 1350.03 and MUSC 1351.03

MUSC 2007X/Y.06: The Guitar: History and Techniques.

This course will introduce students to the various styles of guitar playing from classical to jazz to folk. The history of the instrument (including lute and other related plucked instruments) and an examination of the key styles and performers will be covered. Practical instruction will be provided in this course, so a guitar will be necessary. Practical instruction will attempt to accommodate the various skill levels of the students enrolled.

SPECIAL NOTE: This course is for non-music majors and cannot be counted toward a music degree.

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lab and lecture 3 hours

MUSC 2008X/Y.06: Modern Guitar.

A course for students with a serious interest in preparing for studio guitar playing. The course includes jazz, folk, rock and accompanying idioms. Students will receive instruction and participate in ensemble playing in improvisation, score reading, chording, and arranging.

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively. Music majors must register in MUSC 3308X/Y.06

FORMAT: Lab/lecture/3 hours

PREREQUISITE: MUSC 2007.06 or permission of instructor

EXCLUSION: MUSC 3308.03

MUSC 2016.03: Topics in Music and Cinema.

This course investigates various engagements of music and cinema. Topics vary from year to year and may include: diegetic/non-diegetic music, musical narrativity in film, representation, manipulation, cinema and opera, music or sound as special effect, film-scoring and the use of notable songs/tunes.

FORMAT: Lab (Screening)/lecture 4 hours

EXCLUSION: MUSC 2015X/Y.06

MUSC 2018.03: Popular Music Until 1960.

This course focuses on the origins and development of popular music in the twentieth century, tracing a history of rock'n'roll from its roots in minstrelsy and music hall styles of the nineteenth century until the end of rock'n'roll era in the 1950s. While no previous background in music is required, students will be expected to listen closely to selected music and to contribute to class discussions. Students will gain greater knowledge of history, as it affects and is affected by musical activities, and they will appreciate the motives behind the debates that have always surrounded popular music. Above all, students will learn to understand the history of rock'n'roll in terms of changes in both musical techniques and social values, and to recognize music as a site of celebration and struggle.

FORMAT: Lecture/discussion/3 hours

MUSC 2019.03: The Rock'n'Roll Era and Beyond.

This course focuses on the many different kinds of popular music that have proliferated since the 1950s. While no previous background in music is required, students will be expected to listen closely to selected music and to contribute to class discussions. Students will gain greater knowledge of history, as it affects and is affected by musical activities, and they will appreciate the motives behind the debates that have always surrounded popular music. Above all, students will learn to understand the history of rock'n'roll in terms of changes in both musical techniques and social values, and to recognize music as a site of celebration and struggle.

FORMAT: Lecture/discussion/3 hours

MUSC 2020.03: The History of Jazz.

This course is a survey of the origins and development of jazz, concentrating on the historical and social contexts of music and musicians. We will discuss many of the kinds of music that have been called jazz, and we will analyze their roles in twentieth century culture. Knowledge of musical notation and terminology is not required.

FORMAT: Lecture/discussion/3 hours

EXCLUSION: MUSC 2013X/Y.06, MUSC 3313X/Y.06

MUSC 2022X/Y.06: The Art and Science of Drumming.

This course will introduce students to the art and science of music using hand drums. The history of the instrument as well as cultural context and rhythmic structure will be discussed for various styles of drumming. A significant portion of the class will be practical, where students will be taught the rudiments of reading music and playing hand drums. This means that it will be necessary for each student to bring an approved hand drum to each class.

NOTE: This course is for non-music majors only and cannot be counted as a credit in a Music degree program.

FORMAT: Lab/lecture/3 hours

MUSC 2000 level Applied Study.

Individual studio instruction. May be taken as elective course subject to audition and available space. Please note that all applied study courses require an audition. Please contact the Fountain School of Performing Arts for audition dates or visit website <http://dal.ca/music>. Auxiliary fees apply. Co-requisite ensemble participation is required.

- MUSC 2101X/Y.06: Voice II
- MUSC 2102X/Y.06: Guitar II

- MUSC 2103X/Y.06: Piano II
- MUSC 2104X/Y.06: Organ II
- MUSC 2105X/Y.06: Violin II
- MUSC 2106X/Y.06: Viola II
- MUSC 2107X/Y.06: Cello II
- MUSC 2108X/Y.06: Double Bass II
- MUSC 2109X/Y.06: Flute II
- MUSC 2110X/Y.06: Oboe II
- MUSC 2111X/Y.06: Clarinet II
- MUSC 2112X/Y.06: Bassoon II
- MUSC 2113X/Y.06: Saxophone II
- MUSC 2114X/Y.06: French Horn II
- MUSC 2115X/Y.06: Trumpet II
- MUSC 2116X/Y.06: Trombone II
- MUSC 2117X/Y.06: Tuba II
- MUSC 2118X/Y.06: Percussion II

NOTE: Students taking any of the above courses must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

MUSC 2130.06: Jazz Dance I (Spring Session Only).

This course is a practical exploration into the Luigi Jazz Dance technique, incorporating the use of space, rhythm, and correct body alignment. Emphasis is on the development of personal expression through the medium of dance. Students are expected to develop an awareness of dance terminology and vocabulary.

FORMAT: Lab/demonstration/lecture

CROSS-LISTING: THEA 2020.06: Jazz Dance I (spring session only)

MUSC 2164.03: Special Topics: Applied Study.

A course for music students to pursue applied study in a secondary idiom as a special topic. Enrollment in this course is at the discretion of the Fountain School of Performing Arts through approval of the committee on studies and an audition. This course involves an auxiliary fee.

NOTE: SIGNATURE REQUIRED

FORMAT: Individual studio instruction

MUSC 2175X/Y.03: Lyric Diction for Singers.

An introduction to lyric diction and the expression of text in concert and operatic repertoire. A study of the International Phonetic Alphabet and its application to the lyric pronunciation of the four most commonly used languages in Classical singing: Italian, German, English and French. This course cannot satisfy a language requirement in a program.

NOTE: SIGNATURE REQUIRED

Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab

EXCLUSION: MUSC 3175.03

MUSC 2210.03: Introduction to Composition.

An introductory composition course in which students will write short pieces for a solo instrument or a small chamber ensemble. Each piece will be written using a different approach, including for example traditional tonality, modes, intervallic organization and 12-tone techniques.

FORMAT: Lecture/tutorial

PREREQUISITE: MUSC 1222.03 OR permission of instructor

MUSC 2221.03: Music Theory III.

A continuation of Music Theory II, developing further skills in chromatic harmony through part-writing and harmonic analysis.

FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 1222.03 or permission of the instructor

EXCLUSION: MUSC 2201.03

CO-REQUISITE: MUSC 2270X/Y.03, MUSC 2271X/Y.03

MUSC 2222.03: Music Theory IV.

Formal and harmonic analysis of selected 18th- and 19th-century compositions in various styles and idiom.

FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 2221.03 or permission of the instructor

EXCLUSION: MUSC 3281.03

CO-REQUISITE: MUSC 2270X/Y.03, MUSC 2271X/Y.03

MUSC 2270X/Y.03: Aural Skills II.

This course provides further practice in melodic and harmonic dictation and sight-singing; it correlates with MUSC 2221.03 and 2222.03. A special component deals with solmization skills in sight reading.

SIGNATURE REQUIRED

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab 2 hours

PREREQUISITE: MUSC 1201.03, 1222.03, 1270X/Y.03, 1271X/Y.03

CO-REQUISITE: MUSC 2221.03, 2222.03, 2271X/Y.03

MUSC 2271X/Y.03: Keyboard Skills II.

A continuation of MUSC 1271X/Y.03 for Music degree program students.

SIGNATURE REQUIRED

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab 2 hours

PREREQUISITE: MUSC 1201.03, 1222.03, 1270X/Y.03, 1271X/Y.03

CO-REQUISITE: MUSC 2221.03, 2222.03, 2270X/Y.03

MUSC 2352.03: Music History III.

A survey of Western European art music from 1750 to the present. The work required will include critical listening, writing, score study and historical research.

FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 1352.03 and/or permission of the instructor

EXCLUSION: MUSC 2350.03 and MUSC 2351.03

MUSC 2353.03: Music History IV: Focused Study.

This course provides the opportunity for the advanced study of selected topics in music history. Its specific focus changes each year according to the instructor, but it always develops concepts and methods introduced in Music History I-III, and it challenges students with more in-depth analysis of a genre, composer, period or style. Thus, topics covered will include: the medieval lyric; the works of Beethoven; music in the 1960s; cool jazz.

FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 1353.03 and MUSC 2352.03 and/or permission of instructor

MUSC 2600X/Y.06: Recording Studio Techniques.

Techniques for creating and recording music in the contemporary recording studio. The course will lay a foundation for contemporary musicians and sound artists to understand and work in the recording studio, both as an "instrument" in its own right, and as an extension of their own instrumental techniques. In addition to technical topics (microphone usage, console and recorder operations, etc.) there is a further emphasis on production techniques: approaches to performing and directing in the studio; proper conduct on both sides of the glass; planning, budgeting and running a session; creative use of technical resources.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab and lecture/3 hours

PREREQUISITE: Interview with the instructor

MUSC 3000 level Applied Study.

Individual studio instruction. May be taken as elective course subject to audition and available space. Please note that all applied study courses require an audition. Please contact the Fountain School of Performing Arts for audition dates or visit website <http://dal.ca/music>. Auxiliary fees apply. Co-requisite ensemble participation is required.

- MUSC 3101X/Y.06: Voice III
- MUSC 3102X/Y.06: Guitar III
- MUSC 3103X/Y.06: Piano III
- MUSC 3104X/Y.06: Organ III
- MUSC 3105X/Y.06: Violin III
- MUSC 3106X/Y.06: Viola III

- MUSC 3718X/Y.06: Percussion III (Performance)

MUSC 3060.03/3660.03: Introduction to Music and Sound Technology.

An introduction to the technologies in common use in music creation, performance and teaching, with particular attention to the way these technologies shape artistic and pedagogical processes. Topics include basic electroacoustic theory, sound recording and editing, sound synthesis, MIDI, and personal computer music applications.

NOTE: Music majors must register in MUSC 3660.03

FORMAT: Lecture and lab 3 hours

PREREQUISITE: Permission of the instructor

MUSC 3061.03/3661.03: Electroacoustic Music.

An introduction to techniques and strategies for the creation and performance of electroacoustic and experimental music. The emphasis is on individual student creative works, with collective critiques. Students are encouraged to explore historic, contemporary, cross-disciplinary and experimental strategies in the creation and performance of their work.

NOTE: Music majors must register in MUSC 3661.03

FORMAT: Lab and seminar, 3 hours

PREREQUISITE: MUSC 3060.03, 3660.03, or its equivalent; permission of the instructor

MUSC 3066.03: Women, Gender and Music.

The course explores the variety of ways in which gender shapes musical discourse. The role of gender in music will be examined through three broad topics: the history of female contributions to music as musicians, composers, patrons and listeners; musical constructions of gender, race, class and sexuality; and feminist criticism in recent musical discourse. Music students will be directed to more technical literature for their assignments and research paper, and will be required to engage in more technical descriptions of the music for all written work.

FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 2222.03, 1352.03, 1353.03, 2352.03

CROSS-LISTING: GWST 2066.03

MUSC 3130.06: Jazz Dance II (Spring Session Only).

This course is the continued practical exploration into the Luigi Jazz Dance Technique at the intermediate level. Emphasis is on the development of personal expression through the medium of dance. Students must have a basic foundation in dance technique.

FORMAT: Lab/demonstration/lecture

PREREQUISITE: MUSC 2130.06 or permission of instructor (interview)

CROSS-LISTING: THEA 3020.06: Jazz Dance II (spring session only)

MUSC 3160.03: Conducting.

A practical introduction to the basic techniques of conducting.

SIGNATURE REQUIRED

FORMAT: Lab 2 hours

PREREQUISITE: MUSC 2270.03 and MUSC 2222.03 and/or permission of the instructor

MUSC 3161.03: Choral Techniques.

Study of the distinctive features of conducting choral ensembles with emphasis on rehearsal technique, score preparation, interpretation and group methods of building vocal tone. Practical experience will be gained in university and community settings.

SIGNATURE REQUIRED

FORMAT: Lecture/lab 3 hours

PREREQUISITE: MUSC 2270.03 and MUSC 2222.03 and/or permission of the instructor

MUSC 3176.03: Principles of Vocal Pedagogy.

An introduction to the classic pedagogies of the Italian, German, French and English schools of singing. Spectograph analysis of vowel formant series and fiberoptic video analysis of laryngeal function will be studied as well. Students will apply the techniques studied through a supervised practicum.

SIGNATURE REQUIRED

FORMAT: Lecture/tutorial 3 hours

PREREQUISITE: MUSC 2101.03 and permission of the instructor

CO-REQUISITE: MUSC 3101.03/3701.03 or 4101.03/4701.03

MUSC 3177.03: Vocal Literature.

An introductory survey of Classical song literature from the Renaissance to the modern day covering the historical context, style and vocal performance practice through listening, assigned readings and score study.

FORMAT: Lecture 3 hours

PREREQUISITE: Permission of the instructor

MUSC 3199X/Y.03: Half - Recital.

Required for all third-year Bachelor of Music students in the Performance concentration. May also be available to exceptional students in the fourth year of other 20-credit Music degree programs, by audition. Students must have completed all 2000-level theory courses as per Calendar guidelines. Students not in BMus Performance concentration must have a co-requisite of a minimum 4000-level applied study course. Please note that additional fees will apply for students not in BMus Performance concentration. This performance is a solo recital only. Recital repertoire should consist of 30 to 45 minutes of music. See the Fountain School of Performing Arts for further details including audition procedures and deadlines. Exclusions: students in 15-credit degree programs are not eligible.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Performance

PREREQUISITE: Audition and permission of department

MUSC 3210X/Y.06: Composition I.

Open only to students accepted into the BMus Concentration in Composition.

Techniques and approaches of today's music studied through writing of musical works for diverse instruments and ensembles, and through analysis of important works of repertoire. Emphasis will be given to creativity and to practical aspects of musical composition: effectiveness of orchestration, playability, quality of score, and preparation of parts.

SIGNATURE REQUIRED

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Individual lessons and group courses with other Composition students

MUSC 3221.03: Form and Analysis: the Second Viennese School to the Present Day.

Analysis of selected 20th- and 21st-century compositions.

SIGNATURE REQUIRED

FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 2222.03, MUSC 2352.03 or permission of the Department

EXCLUSION: MUSC 4281.03

MUSC 3282.03: Orchestration.

A survey of the development of the orchestra and the orchestral instruments with an introduction to acoustics. Technique in the deployment of instrumental combinations is emphasized through practical exercises in scoring for small chamber ensembles and a medium-sized orchestra common in the 20th century.

SIGNATURE REQUIRED

FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 2222.03

MUSC 3283.03: Modal Counterpoint.

Polyphonic techniques of the Renaissance period studied through written exercises in species and free counterpoint, as well as through analysis of works by Lasso, Palestrina, Victoria and others.

SIGNATURE REQUIRED

FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 2222.03

EXCLUSION: MUSC 3280.03

MUSC 3284.03: Tonal Counterpoint.

A study of tonal counterpoint in the baroque style. A particular emphasis will be made on the instrumental music of its most representative master, J.S. Bach, through analysis of works and writing of stylistic exercises.

SIGNATURE REQUIRED

FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 2222.03

EXCLUSION: MUSC 3280.03

MUSC 3308X/Y.06: Modern Guitar (Advanced Fretboard and Harmony).

For music majors only, this course aims to give the committed guitarist a thorough grounding in fretboard harmony, progressing from the simplest structures to the most complex, and to provide resources and practical exercises for applying this content within various musical idioms.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab/lecture/3 hours

PREREQUISITE: MUSC 1102, MUSC 2102

EXCLUSION: MUSC 2008

MUSC 3314.03: History of Opera.

Consideration of the history of Opera from its origin to the present day. Concepts to be examined include: "high" and "low" styles; national styles; gender and race; and function in contemporary Western society.

FORMAT: Lecture

PREREQUISITE: MUSC 1353.03 and MUSC 2352.03, or permission of the instructor

EXCLUSION: MUSC 2011.06 and MUSC 3311.06

MUSC 3353.03: Chamber Music Literature.

A study in depth of chamber music from the Eighteenth century to contemporary schools.

FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 2352.03 or permission of the instructor

MUSC 3355.03: The Piano and its Literature.

A study in depth of the evolution of the piano and its repertoire from the Eighteenth century to the contemporary.

FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 2352.03 or permission of the department

MUSC 3480X/Y.03: Band Instruments.

A practical introduction to the principal band instruments. Group instruction is offered in flute, oboe or bassoon, saxophone, trumpet or French horn, trombone and tuba, and percussion.

SIGNATURE REQUIRED

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab 2 hours

PREREQUISITE: Permission of the Department, and an interview with the Class Coordinator

MUSC 4000 level Applied Study.

Individual studio instruction. May be taken as elective course subject to audition and available space. Please note that all applied study courses require an audition.

Please contact the Fountain School of Performing Arts for audition dates or visit website <http://dal.ca/music>. Auxiliary fees apply. Co-requisite ensemble participation is required.

- MUSC 4710X/Y.06: Oboe IV (Performance)
- MUSC 4711X/Y.06: Clarinet IV (Performance)
- MUSC 4712X/Y.06: Bassoon IV (Performance)
- MUSC 4713X/Y.06: Saxophone IV (Performance)
- MUSC 4714X/Y.06: French Horn IV (Performance)
- MUSC 4715X/Y.06: Trumpet IV (Performance)
- MUSC 4716X/Y.06: Trombone IV (Performance)
- MUSC 4717X/Y.06: Tuba IV (Performance)
- MUSC 4718X/Y.06: Percussion IV (Performance)

MUSC 4150X/Y.06: Advanced Applied Study.

By special permission of the Fountain School of Performing Arts, a student may enroll in an advanced year of applied study, subject to enrolment quotas and budget. Individual studio instruction. Auxiliary fees apply. Co-requisite ensemble participation is required.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: MUSC 41XX or 47XX and permission of the instructor, subject to budget and current studio capacity

MUSC 4170X/Y.03: Improvisation Techniques and Practices.

A studio course in the techniques and performance skills of improvisation as related to the jazz idiom, and other contemporary and non-Western music; students will perform as soloists and in small ensembles.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Studio class 3 hours

PREREQUISITE: 3000-level applied study course, and the approval of the instructor

MUSC 4190X/Y.06: Symphony Apprenticeship.

A student in the Bachelor of Music Performance Concentration who has demonstrated exceptional aptitude and ability in his/her orchestral instrument, appropriate to the standards for employment by Symphony Nova Scotia, will serve apprenticeship in the Symphony, supervised by his/her Applied Study Instructor. Preference will normally be given to a fourth-year student. Normally the majority or all of the 34-38 services will be played during the First Term. Qualification for this credit will be subject to the needs of the Symphony, nomination by the Fountain School of Performing Arts, and a successful audition for the Symphony Artistic Director and relevant Symphony Section Principals. The student will be hired by the Symphony at the current per-service rate, and must be a Member in Good Standing of the Atlantic Federation of Musicians. The student will be graded by his/her supervising Instructor on personal observation and on receipt of a signed evaluation from the Artistic Director of the Symphony. Normally there shall be only one such apprenticeship per season, and it is not renewable.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Placement in Symphony Nova Scotia, 34-38 Services

PREREQUISITE: Nomination by the Fountain School of Performing Arts; audition with Symphony Artistic Director and relevant Symphony Section Principals

RESTRICTION: Normally limited to a student in the fourth year of the BMus Program Performance Concentration

MUSC 4199X/Y.03: Area Graduation Requirement (Performance: Recital).

Required of and restricted to all students in the Performance concentration of the Bachelor of Music program. The recital repertoire should consist of 55 to 75 minutes of music.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: Permission of the department

MUSC 4210X/Y.06: Composition II.

Open only to students accepted into the BMus Concentration in Composition. Techniques and approaches of today's music studied through writing of musical works for diverse instruments and ensembles, and through analysis of important works of repertoire. Emphasis will be given to creativity and to practical aspects of musical composition: effectiveness of orchestration, playability, quality of score, and preparation of parts.

SIGNATURE REQUIRED

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Individual lessons and group courses with other Composition students

PREREQUISITE: MUSC 3210X/Y.06 and permission of the instructor

MUSC 4280.03: Contemporary Techniques.

Some of today's main compositional techniques will be studied in this course. These may include advanced modal and 12-tone writing, interval and texture-oriented procedures, as well as aleatoric strategies. Special attention will be given to problems of notation and instrumentation raised by the afore-mentioned approaches.

SIGNATURE REQUIRED

FORMAT: Lecture 3 hours

PREREQUISITE: MUSC 2222.03, 3283.03 or 3284.03

MUSC 4283.03: Early Music Analysis.

A seminar exploring the various approaches to early music analysis, covering chant, early polyphony and music by significant figures before 1600 including Machaut, DuFay and Josquin.

FORMAT: Seminar 3 hours

PREREQUISITE: MUSC 3281.03 or permission of the Instructor

MUSC 4299X/Y.03: Area Graduation Requirement (Composition Recital).

A jury-based assessment of the final requirements for the BMus, Composition Program.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: Permission of the composition instructor

MUSC 4353.03: Music Since 1945.

This course examines themes in Music since 1945. Topics to be considered include compositional techniques, music and cultural theory, and avant garde and mainstream musics.

FORMAT: Seminar 3 hours

PREREQUISITE: MUSC 2352, 2353 or permission of instructor

CROSS-LISTING: MUSC 5353

MUSC 4354.03: Popular Music Analysis.

In this course for music majors, we examine various methods and techniques for studying popular music. We consider the central debates of this relatively new field of scholarly inquiry, and we assess the contributions of popular music scholarship to the larger fields of music study.

FORMAT: Seminar 3 hours

PREREQUISITE: MUSC 2352.03, 2353.03 or permission of the instructor

CROSS-LISTING: MUSC 5354

MUSC 4355.03: Narrative Strategies in Nineteenth-Century Music: Gender, Identity, and Social Politics.

An interdisciplinary survey of nineteenth-century instrumental music, focusing on the narrative potential of nineteenth-century musical conventions and their relationship to other aspects of nineteenth-century Western culture. Representative musical works will be studied within the context of broader social and cultural issues, including gender, race, class, sexuality, nationality, ethnicity, and identity.

FORMAT: Seminar 3 hours

PREREQUISITE: Permission of the instructor

CROSS-LISTING: GWST 4355.03, MUSC 5355.03

MUSC 4356.03: Opera Studies.

An examination of current critical issues in opera studies. Specific topics may vary from year to year; examples include 'Opera and Politics' and 'Operas of Mozart on Stage and Screen', 'Women in Opera,' 'Opera on Film.'

FORMAT: Seminar 3 hours

PREREQUISITE: MUSC 2352: Open to non-majors by permission of instructor

CROSS-LISTING: MUSC 5356.03

MUSC 4358.03/4359.03: Studies in Medieval Music.

An advanced seminar and intensive study of medieval music. Specific topics will change from year to year, including the musical output and reception of Hildegard of Bingen, and the poetry, music and manuscripts of Guillaume de Machaut.

FORMAT: Seminar 3 hours

PREREQUISITE: MUSC 2353 or permission of the instructor

MUSC 4360X/Y.06: Advanced Seminar in Baroque Culture.

This course offers its students a survey of key aspects of seventeenth and eighteenth-century European history and society along with a first-hand view of some of the most important aspects of baroque style and material culture. It takes place in the town of Cesky Krumlov in the Czech Republic. The course introduces students to the socio-political conditions that led to the birth of Baroque civilization before entering into an exploration of the court life of seventeenth and eighteenth-century Europe. It then examines the cultural and artistic forms most characteristic of this period, with particular emphasis on opera history and on the role of the 'theatrical' in the Baroque arts. As the course proceeds, students will have an opportunity to consider the connections between course material and the evidence of Baroque culture to be found in the Castle Theatre's scenographic machinery, its stock of original scenery and props, and its collection of historical costumes, as well as to witness an experimental Baroque opera performance. Finally, the course will include visits to Prague and other sites of interest to add to students' understanding of the Baroque and its legacy to subsequent periods.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab

PREREQUISITE: Permission of the Fountain School of Performing Arts and/or the Department of History.

CROSS-LISTING: HIST 4162.06, THEA 4735.06

RESTRICTION: 3rd and 4th year students only.

MUSC 4361.03/4365.03: Topics in Musicology I.

These are intensive studies of selected topics announced annually. Students should check the online university timetable or contact the department for details.

FORMAT: Seminar 3 hours

PREREQUISITE: MUSC 2353

CROSS-LISTING: MUSC 5361

MUSC 4362.03: Topics in Canadian Music.

This course focuses on one or more of the following topics: Canadian composers, performers and musical institutions. The perspective may be analytical, aesthetic and/or historical.

FORMAT: Seminar 3 hours

PREREQUISITE: Permission of instructor

CROSS-LISTING: CANA 4362.03

EXCLUSION: MUSC 3362.03

MUSC 4363.03/4367.03: Topics in Musicology II.

These are intensive studies of selected topics announced annually. Students should check the online university timetable or contact department for details.

FORMAT: Seminar 3 hours

PREREQUISITE: MUSC 2353

CROSS-LISTING: MUSC 5363

MUSC 4364.03/4366.03: Topics in Music.

These are intensive studies of selected topics announced annually.

SIGNATURE REQUIRED

FORMAT: Seminar 3 hours

PREREQUISITE: MUSC 1352.03, 1353.03, 2352.03

MUSC 4368.03/4369.03: Special Studies.

Individually directed research and writing under the supervision of an appropriate member of the Department.

SIGNATURE REQUIRED

PREREQUISITE: MUSC 2352.03

MUSC 4380.03: and MUSC 4381.03: Selected Composer Studies.

An intensive study of a single composer, focusing on works and cultural context.

FORMAT: Lecture/discussions 3 hours

PREREQUISITE: MUSC 2352, MUSC 2353

MUSC 4399X/Y.03: Graduation Requirement (Thesis).

Students must receive Fountain School of Performing Arts approval to fulfil this graduation requirement. Students must submit the required Thesis Form by March 1 of the third year of study, along with any other requirements specific to their degree program. Please see the School for guidelines and deadlines.

NOTE: SIGNATURE REQUIRED.

Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: Permission of the Fountain School of Performing Arts

MUSC 4599X/Y.03: Graduation Project.

Students in the BMus General degree program must receive the Fountain School of Performing Arts approval to fulfil this graduation requirement. Project proposals must be submitted by students no later than March 1 of the third year of study. For more details on project options and application requirements, please consult the School.

NOTE: SIGNATURE REQUIRED.

Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: Permission of the department

I. Introduction

The Fountain School of Performing Arts offers many ways to study the theatre or some aspect of it in tandem with other disciplines offered by the university.

1. You can undertake programs that lead to a university degree: an Honours or Combined Honours BA (four years) or a BA with Major (four years)
2. You can enroll in a Diploma program in Costume Studies (two years) which combines academic study and research skills with creative design interpretation and applied skills;
3. You can complete a Minor in Theatre to enhance your degree.
4. You can select certain theatre courses to reinforce and complement your studies in other disciplines offered by the university;

The degree programs involve a curriculum of Theatre courses and a selection of other courses in different disciplines. The University has Academic Regulations which specify how these programs must be arranged. These regulations are all listed earlier in this Calendar, and prospective students should refer to them to become aware of the opportunities offered. There are a surprising number of different ways to arrange one's studies; recommended here are the paths you can follow if Theatre is your primary interest.

Facilities

The Fountain School of Performing Arts is located in the Dalhousie Arts Centre. The Theatre wing is a self-sufficient unit involving one proscenium theatre, two studios, and supporting workshops. Teaching spaces for costume studies are currently located off-campus. The main Departmental office is in Room 5-32 of the Arts Centre.

Because of the work involved, some theatre courses have a limited enrolment. All students wishing to take any practical course in Theatre should, therefore, first consult with the department.

PLEASE NOTE: Theatre by its nature requires evening work. Students, especially in Acting, Technical Theatre and Stage Design, and Costume courses, are advised not to undertake other evening commitments.

II. Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, [page 125](#) of this calendar.

A. BA Honours in Theatre

1. Theatre Studies

This degree is designed for students who wish to follow a program of theatre studies that keeps the whole of theatre in perspective, is academically oriented, and serves as a strong foundation for graduate degrees in Theatre and Drama, or as a good preparation for a variety of professional and education degrees. Honours students must maintain an average of at least B+ in all of their advanced Theatre courses.

Year 1

- THEA 1000X/Y.06
- one other full course in THEA at 1000-level
- three courses in other subjects

Year 2

- THEA 2011.03
- THEA 2012.03
- THEA 2901.03
- THEA 2902.03
- three full courses in other subjects

Years 3 and 4

- THEA 3200X/Y.06
- THEA 3501.03
- THEA 3502.03
- THEA 3600X/Y.06
- THEA 4500.03
- THEA 4501.03
- three full advanced electives in THEA
- one full advanced course in dramatic literature from another department (ENGL, CLAS, RUSS, SPAN, FREN, GERM, etc.)
- two full courses in other subjects, including THEA

An additional credit (the Honours Qualifying Project) consists of fulfilling the function of a dramaturge or assistant director on one of Dal Theatre productions.

NOTE: Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.

2. Acting

The main objective of the Acting Program is to satisfy the needs of those students who have decided to pursue a career as performers in the professional theatre. The program is progressive in nature, culminating in a company of student actors who perform in three shows in the Dal Theatre season in their fourth year, plus a course

project. Third year students in the Acting Program will participate in the third show of the Dal Theatre season. Auditions are held at the end of the first year for admission into the upper years of study. In addition to meeting degree requirements, students must achieve a B in all Acting Program courses, and must also be recommended by the Acting Faculty in order to advance to the next year's course of study. The program provides these students with professional training and the benefits of a liberal-arts education at a major Canadian university. Honours students must maintain an average of at least B+ in all of their advanced Theatre courses.

Year 1

- THEA 1000X/Y.06
- THEA 1800X/Y.06
- three full courses in other subjects

Year 2

- THEA 2011.03
- THEA 2012.03
- THEA 2800X/Y.06
- THEA 2810X/Y.06
- THEA 2820X/Y.06
- one full elective in other subject

Year 3

- THEA 3800X/Y.06
- THEA 3810X/Y.06
- THEA 3820X/Y.06
- MUSC 1081.03
- 1.5 courses in other subjects

Year 4

- THEA 4800X/Y.06
- THEA 4840X/Y.06
- THEA 3501.03
- THEA 3502.03
- two courses in other subjects (one of these can be in THEA)

Honours Acting students will qualify for Honours with the satisfactory completion of a professional portfolio.

NOTE: Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.

3. Technical Theatre and Stage Design

This degree is designed for students wishing to pursue careers in technical theatre and stage design. This section encompasses all areas of specialization that work together in the production of live performance. Set design, scenic carpentry, scenic painting, lighting, sound, props and stage management are taught through lectures and hands-on labs. Students in the first year of the program are required to work on one Dal Theatre production, and those in second and third years work on four Dal Theatre productions each year. All students must maintain at least a B-average in all Technical Theatre and Stage Design courses to move on to the next year, and Honours students must maintain an average of at least B+ in all their advanced Theatre courses.

Year 1

- THEA 1000X/Y.06
- THEA 1050X/Y.06
- three full courses in other subjects

Year 2

- THEA 2011.03
- THEA 2012.03
- THEA 2060X/Y.06
- THEA 2070X/Y.06
- THEA 2700X/Y.06
- one full elective in other subject

Year 3

- THEA 3060X/Y.06
- THEA 3070X/Y.06
- THEA 3710X/Y.06
- two courses in other subjects

Year 4

- THEA 3501.03
- THEA 3502.03
- two full advanced level electives in theatre
- two full courses in other subjects, including up to one in theatre.

The Honours Qualifying Project in Technical Theatre and Stage Design will be awarded upon successful completion of a departmentally approved project.

NOTE: Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.

NOTE: Interested students studying Technical Theatre and Stage Design may find occasional, paid employment with Neptune Theatre, the Rebecca Cohn Auditorium, IATSE Local 680 (International Alliance of Theatrical Stage Employees), and various other local and national, professional institutions with which the Fountain School of Performing Arts has a close connection.

4. Costume Studies

This program combines the academic study and research skills necessary to the understanding of costume in its broadest context with the creative interpretation of design and the applied skills of the costumer whose goal is to work in the theatre, film, museums, or historical animation. Some courses in Costume Studies are open to general BA students. See individual course listings. Honours students must maintain an average of at least B+ in all of their advanced theatre courses.

Year 1

- THEA 1000X/Y.06
- THEA 1450X/Y.06
- TEXTL 3320 (NSCAD)
- TEXTL 2100 (NSCAD)
- two full courses in other subjects

Year 2

- THEA 2011.03
- THEA 2012.03
- THEA 2400X/Y.06
- THEA 2406X/Y.06
- THEA 2411.03
- THEA 2451.03
- one full course in other subjects

Year 3

- THEA 3401X/Y.06
- THEA 3451X/Y.06
- THEA 3454.03
- THEA 3455.03
- two full courses on other subjects

Year 4

- THEA 3501.03
- THEA 3502.03
- THEA 4406X/Y.06
- THEA 4450.03
- THEA 4452.03
- two full courses in another subjects

Upon acceptance into their program, students should contact the undergraduate advisor in the Fountain School of Performing Arts for information on registering for required courses that take place at NSCAD University.

Honours students in Costume Studies will be awarded the Honours Qualifying Project upon successful completion of a 25-page research paper on an aspect of theatrical costume or historical dress.

NOTE: Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.

B. BA Combined Honours

Dalhousie and University of King's College students can also combine their Theatre degrees with a number of other disciplines at the two institutions. For more specific instructions on how to set up a Combined Honours degree in Theatre and another subject, please consult the relevant departments'

Undergraduate Advisors. In principle, a student who wishes to graduate with this degree must complete at least THEA 2011.03, 2012.03, 3501.03, and 3502.03, and must fulfil at least the minimal requirements for a three year BA. They must have, in the two subjects combined, the required distribution of courses.

1. Music and Theatre

The Fountain School of Performing Arts offers a highly specialized four year BA with a Combined Honours in Music and Theatre which blends the principal courses of the Bachelor of Music Minor in Voice with Theatre courses in Acting and Movement. Students must audition for both the Music and Theatre Departments: a maximum of five students will be selected for entrance into the program each year. The graduate of this program will advance toward a professional career in the performing arts equipped with a foundation in music and theatre.

Please refer to "[BA with Combined Honours in Music and Theatre](#)" on [page 195](#) for requirements.

C. BA (20 credit) Major in Theatre

A student may take a 20 credit Major program in Theatre (in Theatre Studies, Acting, Scenography and Technical Scenography or Costume Studies), following consultation with the Departmental Undergraduate Advisor. As in the case of a BA with Combined Honours, it is also possible to set up a Double Major in Theatre and another subject. In this case, a student must complete at least THEA 2011.03, 2012.03, 3501.03, and 3502.03 and fulfil at least the minimal requirements for a three year BA. They must have the required distribution of courses in the two majoring subjects as outlined in the Degree Requirements section of this Calendar.

D. BA (15 credit) Minor in Theatre

This degree is designed for students who want to take a number of courses in Theatre, would like to acquire a broad and varied knowledge of its various aspects, or are not interested in specializing. Students are advised to take THEA 1000X/Y and one other full credit in THEA at the 1000 level, although these do not count toward the minor.

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

E. Minor in Theatre

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

F. Costume Studies, Diploma in two years

After successful completion of this program, students may upgrade their DCS to a BA in Theatre (Costume Studies). Students pursuing the Diploma in Costume Studies are required to combine the courses in the following manner:

Year 1

- THEA 1450X/Y.06
- THEA 2400X/Y.06
- THEA 2406X/Y.06
- THEA 2411.03
- THEA 2451.03
- TEXTL 3320 (NSCAD)
- TEXTL 2100 (NSCAD)

Year 2

- THEA 3401X/Y.06
- THEA 3451X/Y.06
- THEA 3454.03
- THEA 3455.03
- THEA 4406X/Y.06
- THEA 4450.03
- THEA 4452.03

III. Course Descriptions

NOTE: Not all courses are offered every year. Please consult the current timetable to determine if these courses are offered in the current year.

THEA 1000X/Y.06: Introduction to Theatre.

The purpose of this course is twofold: first, to introduce students to the study of theatre through analysis of a range of plays related to the DalTheatre season; and second, to instruct students in the methodology of writing in the humanities. Students will learn about the theatrical production process and practice skills of

script and performance analysis. Students will address specific problems within their papers and discuss questions on an individual basis in writing tutorials. This course fulfills the writing requirement of Dalhousie University and is a prerequisite for all Theatre majors.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Writing Requirement. Lecture/tutorial 3 hours

THEA 1050X/Y.06: Introduction to Theatre Organization and Stagecraft.

This course takes the student behind the scenes to understand how a play is brought to life. Scenography is discussed and explored. Students are introduced to stage design and scenic carpentry, props, sound, lighting, stage management and costume. Methods and procedures for theatre productions make up the substance of this course. Students are expected to work with power tools and are required to work on one DalTheatre production, which will include evening and weekend work outside of class time. Some supplementary equipment is required for this course.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture 2 hours, lab 4 hours

THEA 1300X/Y.06: Introduction to Film.

This course is a general introduction to film studies. It examines film genres and history, the component elements of film, the diversity of cinema industries and institutions, and the medium's impact on society. It also instructs students in the methodology of writing in the humanities and fulfils the writing requirement of Dalhousie University.

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Writing Requirement. Lecture/tutorial 3 hours

THEA 1450X/Y.06: Introduction to Costume Studies.

This course serves as an introduction to costume in its broadest context, enabling students to acquire a basic understanding of creating costume for the stage. Both modern and historical costume creation techniques are explored and mastered by students in preparation for more advanced study of costume in subsequent years of the Costume Studies Program. This course includes a theatre component. This course is a prerequisite for all other Costume Studies courses.

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture/lab 4.5 hours

THEA 1800X/Y.06: Introduction to Acting and Performance.

This course is designed to provide the beginning acting student with an understanding of what it is to act, and to introduce some basic performance techniques. The approach will be practical, focusing on three major aspects of the craft: Space, Character, and Action. Each unit will be comprised of exercises and scene study, with scripts ranging from classical to contemporary. Exercises and exploration in class, which require commitment, concentration, and full-bodied participation, and which are centred on group work and ensemble play, will strengthen communication and teamwork, and will develop improvisational skills. Students will challenge themselves physically, vocally, and imaginatively, while working with others to create a dynamic environment.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms. THEA 1800X/Y.06 is the pre-requisite for an audition for the Acting Program.

FORMAT: Lecture/lab 3 hours

THEA 2000X/Y.06: Theatre Performance.

This course is designed to provide experience in performance outside the Acting Program. Through practical theatre exercises and performance assignments, students experience and discuss elements which contribute to theatre performance. This course will not serve as a prerequisite to the Acting Program, but is suitable for students having completed THEA 1800, or any student interested in cultivating self-confidence, communication, and performance skills.

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture/lab 3 hours

RESTRICTION: Students cannot register for THEA 1800 and THEA 2000 at the same time.

THEA 2011.03: Classical Theatre.

This course gives students an opportunity to study the dramatic literature, staging practices, and theoretical foundations of the early history of theatre. Specific topics covered include ancient Greek, Roman, and medieval European performance, as well as classical Indian and Japanese theatres. Although there is no formal prerequisite for the course, students should normally be in their second year of study. A background in theatre, history, and/or dramatic literature will be an advantage.

FORMAT: Lecture/seminar 3 hours

THEA 2012.03: Early Modern Theatre.

This course is in a sense the sequel to THEA 2011.03, though that course is not a prerequisite. It aims to study the development of dramatic literature, staging practices, and criticism from the theatres of the Italian Renaissance and of Shakespeare to European Romanticism, as well as early modern Asian theatres. There is no formal prerequisite, but students should normally be in at least the second year of study. A background in history, theatre and/or dramatic literature will be an advantage.

FORMAT: Lecture/seminar 3 hours

THEA 2020.06: Jazz Dance I (Spring Session Only).

This course is a practical exploration into the Luigi Jazz Dance technique, incorporating the use of space, rhythm, and correct body alignment. Emphasis is on the development of personal expression through the medium of dance. Students are expected to develop an awareness of dance terminology and vocabulary.

FORMAT: Lab/demonstration/lecture

CROSS-LISTING: MUSC 2130.06

THEA 2060X/Y.06: Technical Theatre I.

This course builds on the fundamentals acquired in THEA 1050 and is a supplement to Performance Technology I. Lectures and labs include theory development in the areas of props, lighting, sound, set design, scenic construction, and stage management.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 6 hours

PREREQUISITE: THEA 1050X/Y.06

CO-REQUISITE: THEA 2070X/Y.06

THEA 2070X/Y.06: Performance Technology I.

This course is concerned with the more complex problems of the preparation of theatre production. A greater focus will be given to applying learned knowledge in a practical setting, with mandatory crew requirements in at least four Dalhousie Theatre productions. These productions will require work outside of class time on evenings and weekends. This course is the practical application of THEA 2060X/Y.06.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab 6 hours

PREREQUISITE: THEA 1050X/Y.06

CO-REQUISITE: THEA 2060X/Y.06

THEA 2214X/Y.06: Shakespeare.

An introduction to Shakespeare's career as a playwright, through discussion and interpretation of a dozen or more of his plays.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000X/Y.06; or any two of ENGL 1010.03, 1020.03, 1040.03, or THEA 1000X/Y.06; or the King's Foundation Year Program

CROSS-LISTING: ENGL 2214.06

THEA 2229.03: Tragedy.

This course studies a representative selection of texts from various historical periods in order to arrive at an understanding of the meaning of tragedy. Various definitions of tragedy will be examined along with such possible questions as: how has tragedy changed over time, and what is tragicomedy.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000X/Y.06; or any two of ENGL 1010.03, 1020.03, 1040.03, or THEA 1000X/Y.06; or the King's Foundation Year Program

CROSS-LISTING: ENGL 2229.03

EXCLUSION: ENGL 2226.06

THEA 2301.03: Film History I.

This course surveys the history of film from its invention in the 1890s to the 1950s. Students will learn about the aesthetic, social and technological changes that affected the development of cinema. The course includes the study of silent film and the Classical Hollywood cinema, as well as artistic movements such as Expressionism and Soviet Montage.

FORMAT: Lecture/discussion

EXCLUSION: THEA 2300X/Y.06 and NSCAD AHIS 2800.03

THEA 2311.03: Film Analysis.

This course introduces students to the close textual analysis of narrative films. To this end, a few films will be studied in depth. Their formal properties, such as mise-en-scène, sound, cinematography, and editing, will be analyzed and situated in social and historical context. Through screenings, readings, lectures, discussions and exercises, students will develop their technical vocabulary and skills in film interpretation.

FORMAT: Lecture/discussions

THEA 2314.03: Survey of Italian Cinema.

Course to be held in English; with part of the course work in Italian for Italian majors. Survey of the Italian Cinema from the origins onwards. Focus: the 'golden age' of Italian silent movies; visual culture under fascism; Italian neo-realism; the impact of television.

FORMAT: Lecture

CROSS-LISTING: ITAL 2600.03

THEA 2336.03: Russian Film I.

This course surveys Russian film from the Silent Era to "Thaw" (1900-1960s). Its goal is to develop students' knowledge of cinema in its historical and cultural context through critical watching, reading, thinking, and writing. The course will concentrate on the development of main genres and styles in Russian and official Soviet Cinema, major directors and styles. Full versions of films will be screened each Monday night. Later in the week they will be followed by a lecture, discussion, and viewing additional short clips.

FORMAT: Lecture/discussion

CROSS-LISTING: RUSN 2036

THEA 2337.03: Russian Film II.

This course will provide an overview of the most significant trends and periods in the development of Russian cinema since the 1960s until the latest blockbusters. The course will concentrate on the development of main genres and styles, major directors and productions, issues of race, gender, war and violence in Soviet, post-Soviet and new Russian cinema.

FORMAT: Lecture/discussion

CROSS-LISTING: RUSN 2037.03

THEA 2346.03: East European Cinema: War, Love, and Revolutions.

This course brings post-Berlin Wall European film into the fray of current debates on cultural identity, transnational cinema, and postcolonialism. Despite the state control, the filmmakers of communist Europe were often more bold, honest and provocative than their profit-driven Hollywood counterparts. By drawing on political, cultural, and philosophical discourses, the course will offer pointed analyses of most significant East European films that touch upon issues of ethnicity, gender, and overcoming censorship.

FORMAT: Lecture/discussion 3 hours

CROSS-LISTING: RUSN 2046.03

THEA 2350.03: Studies in Film Directors.

This course offers students the opportunity to study in detail the work of an individual film director. Aesthetic, political, philosophical and/or ethical issues related to the director's work will be studied via close analysis of his/her most significant films. The identity of the director to be studied will be posted on the Academic timetable.

FORMAT: Lecture/discussion

THEA 2360.03: Popular Cinema.

This course helps students develop their critical understanding of popular cinema. It introduces different approaches to the analysis of popular film, and considers principles of production, distribution, exhibition and reception in major industries such as Hollywood and popular Hindi and Hong Kong cinemas. Throughout, it addresses the implications of the concept of "popular cinema."

FORMAT: Lecture/discussion

EXCLUSION: THEA 2320.06

THEA 2370.03: Animated Film.

This course is an overview of different forms of animated film and key topics and debates in the field of animation studies. Emphasis is on Canadian, US American and Japanese animation, but examples will be drawn from a variety of regions, and will range from old to new and popular to experimental. The course will focus on cultural approaches, theoretical questions posed by specific types of animation, and historical developments.

FORMAT: Lecture, discussion, screening

THEA 2400X/Y.06: Cave to Café: Costume and Identity from Antiquity to 1700.

An introduction to the study of human social behaviour and its relationship to the development of body coverings, this survey course begins with the earliest Mediterranean cultures, Ancient Egypt, Greece and Rome, and continues through to the end of the seventeenth century. This course may be taken by general BA students, and is also part of the Costume Studies Program.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: General BA students must have completed the writing requirement.

For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06

For Diploma in Costume Studies: See Costume Studies course combinations.

THEA 2406X/Y.06: The Aesthetics of Contemporary Dress.

By examining the aesthetics of contemporary dress, this course will enable the student to understand established systems used to create clothing, utilizing body image as principle means. Through the study and application of systematic principles, the student will gain a better understanding of people's need to define body image in terms of ornamental self-expression and social identification. This course is also part of the Costume Studies Program.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 4.5 hours

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06

For Diploma in Costume Studies: See Costume Studies course combinations.

RESTRICTION: Costume Studies degree or diploma students only

THEA 2411.03: Designers' Language.

This course explores components of costume design, offering a discourse on design language, color theory, structure, and decoration as they relate to costumes for the theatre. Through lecture and practical application, the student will learn how to design costumes, choose fabrics, interpret scripts and develop characters, leading to a better understanding of theatrical characterization. This course may be taken by general BA students, and is also a part of the Costume Studies Program.

FORMAT: Lecture/demonstration 3 hours

PREREQUISITE: General BA students must have completed the writing requirement.

For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06

For Diploma in Costume Studies: See Costume Studies course combinations.

THEA 2451.03: Costume in Performance I.

In this year the student will apply the knowledge from THEA 1450X/Y to research, illustrate and create modern and historical costume designs for the stage. In addition, students work on productions in order to understand the integral role played by costume in staging a play, in an actor's character development, and in body image and representation.

This course is part of the Costume Studies Program.

FORMAT: Lecture 3 hours

PREREQUISITE: For BA in THEA (Costume Studies) Students: THEA 1000.06, THEA 1450.06

CO-REQUISITE: For Diploma in Costume Studies Students: THEA 1450.06, THEA 2400.06, THEA 2406.06, THEA

2411.03, TEXTL 2000 (NSCAD), TEXTL 2100 (NSCAD)

RESTRICTION: Limited to BA in Theatre (Costume Studies) and Diploma in Costume Studies students

THEA 2700X/Y.06: Stage Design I.

This course is designed to acquaint the student with the language, techniques and conventions involved in the field of stage design. In the first semester, students will develop basic abilities in visual composition, watermedia and drafting. In the second half, model building, text analysis, research and three-dimensional space development will be taught. Assignments will emphasize practical skills and will culminate in a full design process.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 6 hours

PREREQUISITE: THEA 1050X/Y.06 or permission of the instructor

THEA 2800X/Y.06/THEA 2810X/Y.06/THEA 2820X/Y.06: The Discovery Year.

The second year of the Acting Program introduces students to the fundamental principles of acting through the study of Shakespearean text, voice and movement. Emphasis is placed on the discipline and dedication that is the basis for a career in the professional theatre. In addition to meeting degree requirements, students must achieve a B in all Acting Program courses, and must also be recommended by the Acting Faculty in order to advance to the next year's class of study.

NOTE: Students taking these courses must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

THEA 2800X/Y.06: Acting II.

The second year of the Acting Program introduces students to classical theatre performance approaches through the exploration of the texts of William Shakespeare. Using his sonnets, soliloquies and scenes, students will discover performance clues within the author's text and explore characterization, dramatic situations and action, and the interpretation of dramatic text. Emphasis is placed on the need for clarity in expressing and communicating these works and on the dedication to craft and discipline necessary to do so.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 6 hours

PREREQUISITE: THEA 1800X/Y.06 and audition

CO-REQUISITE: THEA 2820X/Y.06, THEA 2810X/Y.06

THEA 2810X/Y.06: Voice and Speech II.

This course focuses on developing the speaking voice. It is an introduction to mind/body/voice awareness, the anatomical and physiological aspects of phonation, and the care of the voice. This introduction includes exploration and drilling of the primary breathing and phonating muscles with the object of releasing the voice and developing an open, flexible sound. Focusing of the mind, alignment of the spine, releasing of unnecessary and habitual tensions, exploration of resonating cavities, pitch, volume/power, and articulation, as well as exploration of a variety of text will all be investigated.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: THEA 1800X/Y.06 and audition

CO-REQUISITE: THEA 2800X/Y.06, THEA 2820X/Y.06

THEA 2820X/Y.06: Dance and Movement II.

The course is designed to develop and enhance the acting student's practical knowledge of movement through the discipline of jazz dance. This is manifest through a practical exploration of the Luigi jazz dance technique, incorporating the use of space, rhythm, and correct body alignment. Students are expected to develop a working vocabulary of dance terminology.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab/demonstration/lecture 3 hours

PREREQUISITE: THEA 1800X/Y.06 and audition

CO-REQUISITE: THEA 2800X/Y.06, THEA 2810X/Y.06

THEA 2841.03: Speak With Confidence: Voice for Non-Majors.

This course is designed to enable the student to use the speaking voice effectively, to communicate freely and easily, with clarity and conviction, thereby strengthening his or her presentation skills. This course will be practical in nature. Exercises and explorations will initially be centred on group dynamics and will require commitment, concentration and full-bodied participation. Many aspects of voice use will be covered, including release of the body, alignment of the spine, breathing, resonance, pitch, volume and power, articulation, working with an intention, and care of the voice. The focus of the course will be on self-discovery as well as awareness of others. Students will also have the opportunity to make

individual presentations and receive feedback accordingly. Guest speakers/artists may be invited to visit the classroom.

FORMAT: Lecture/lab 3 hours

EXCLUSION: All advanced Acting courses

THEA 2901.03: Production Dramaturgy.

This course introduces students to the dramaturgical work of dramaturges and directors in the theatre. Students will learn skills including the presenting of research, the preparation of playtexts, the adapting of playtexts for new theatrical contexts, and the creation of theatrical seasons and programs.

FORMAT: Lecture/discussion

PREREQUISITE: THEA 1000.06 or permission of the instructor

EXCLUSION: THEA 2900.06

THEA 2902.03: Play Analysis for Directing.

This course introduces students to the director's process in analyzing a dramatic script for performance. Working with plays from a range of periods and genres, students will explore key theoretical approaches to directorial analysis, will learn the director's core vocabulary, and will apply these discoveries to practical scene work.

FORMAT: Lecture/seminar 3 hours

PREREQUISITE: THEA 1000.06 or Permission of the Instructor

EXCLUSION: THEA 2900.06

THEA 2911.03: Stars and Stardom on Stage and Screen.

What makes a 'star' actor? How do stars' gifts and idiosyncrasies interact with the possibilities of their media and with market forces to create celebrity? This course explores stage and screen stardom as historical, aesthetic, and economic phenomena that illuminate shifting constructions of beauty, class, gender, sexuality, race, and ethnicity.

FORMAT: Lecture/discussion 3 hours

THEA 3015.03: Renaissance Drama.

This course will explore the richness and strangeness of some of the playwrights too often obscured by Shakespeare's shadow. Between the opening of the first professional playhouse in London (1576) and the closing of the theatres by Parliament (1641), the Globe was only one of many venues catering to an avid theatre-going public, and the first English play by a woman was circulated in manuscript. Playwrights to be studied include Christopher Marlowe, Ben Jonson, Thomas Middleton, John Webster, Elizabeth Cary and John Ford.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000X/Y.06; or any two of ENGL 1010.03, 1020.03, 1040.03, or THEA 1000X/Y.06; or the King's Foundation Year Program

CROSS-LISTING: ENGL 3015.03

THEA 3020.06: Jazz Dance II. (Spring Session only).

The course is the continued practical exploration into the Luigi Jazz Dance Technique at the intermediate level. Emphasis is on the development of personal expression through the medium of dance. Students must have a basic foundation in dance technique.

FORMAT: Lab/demonstration/lecture

PREREQUISITE: THEA 2020 or approval of instructor (interview)

CROSS-LISTING: MUSC 3130.06 (spring session only)

THEA 3060X/Y.06: Technical Scenography II.

This course is designed to supplement Performance Technology II and is a continuation of THEA 2060X/Y.06 covering the topics in greater detail.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 6 hours

PREREQUISITE: THEA 2060X/Y.06, THEA 2070X/Y.06

CO-REQUISITE: THEA 3070X/Y.06

THEA 3070X/Y.06: Performance Technology II.

This is an advanced course in production technology. Students work intensively in the areas of: scenic carpentry, scenic painting, props, lighting and sound, and stage management. Students are required to work on four (4) Dalhousie Theatre productions. These productions will require work outside of class time, on evenings and weekends.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab 6 hours

PREREQUISITE: THEA 2060X/Y.06, THEA 2070X/Y.06

CO-REQUISITE: THEA 3060X/Y.06

THEA 3200X/Y.06: The Director in the Theatre.

This course explores in theoretical and practical terms the various functions of the director in creating a theatrical event. Topics include the historical role of the director, conceptualizing scripts, working with a dramaturg, relationships with actors, and the script development process. Laboratory exploration of practical problems related to the above topics will form an integral part of the course.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: THEA 2901.03, THEA 2902.03, and permission of instructor

THEA 3301.03: Film History II.

This course surveys the history of film from the 1950s until the present day. Students will learn about the aesthetic, social and technological changes that affected the development of cinema. The course includes the study of radical 1960s movements such as the French New Wave, and the birth of auteurist cinema in the European and Hollywood film industries. It also introduces students to the concept of national cinema with a study of global film industries, and concludes with a study of the digital revolution in contemporary cinema.

FORMAT: Lecture/discussion

PREREQUISITE: Recommended THEA 2301.03

EXCLUSION: THEA 2300X/Y.06 and NSCAD AHIS 2810.03

THEA 3313.03: Documentary, Experimental and Animated Film.

This course introduces students to the historical, social, ethical and aesthetic dimensions of documentary, experimental and animated cinema. The course is taught through lectures, discussions, film screenings and readings.

FORMAT: Lecture/discussion

PREREQUISITE: THEA 2311.03 or permission of the instructor

EXCLUSION: THEA 2312.03 and NSCAD AHIS 3850.03

THEA 3314.03: Shakespeare and his Contemporaries on Film.

This course will study the adaptation of Shakespeare and his contemporaries to the medium of cinema, focusing on the differences between theatre and cinema, the process of textual adaptation, the updating of classic stories to modern settings, and the close analysis of the performer's choices.

FORMAT: Lecture/seminar

PREREQUISITE: Experience in Shakespeare at any level OR experience in Film Studies at any level.

CROSS-LISTING: ENGL 3314.03

EXCLUSION: THEA 2313.03, ENGL 2313.03

THEA 3320.03: Italian National Cinema.

The focus of the course: the New Wave of Italian cinemas, which has received international recognition since the 1960s. Its aim to investigate Italian film production within the social and cultural climate of contemporary Italy.

FORMAT: Lecture/seminar

PREREQUISITE: ITAL 2010

CROSS-LISTING: ITAL 3600

THEA 3330.03: Film Theory I.

This course will survey and discuss the major cinematic theories of the twentieth century: from formalism and realism to Lacanian psychoanalysis and post-structuralism, from film semiotics and feminist theory to postmodern debates and approaches which sought to define new terminology and new methodologies for the study of the moving images.

FORMAT: ﻿Lecture/Discussion

PREREQUISITE: Previous Film Studies course or permission of the instructor

THEA 3331.03: Film Theory II: Desire in Cinema.

This course focuses on theories of gender, sexuality and desire in the cinema. It addresses debates around the representation of gender, sexuality and desire on screen, as well as theories of spectatorial desire.

FORMAT: ﻿Lecture/discussion

PREREQUISITE: Previous Film Studies course or permission of the instructor

CROSS-LISTING: GWST 3331.03

THEA 3350.03: Topics in Asian Cinema.

Each year will focus on specific topics as explored in the cinema of various Asian countries. Particular attention will be paid to how Asian filmmakers employ different cinematic genres in their treatments of diverse aspects of Asian societies and cultures.

FORMAT: Film screening with lecture/discussion

CROSS-LISTING: CHIN 3050.03

THEA 3351.03: The Cinema of David Lynch.

David Lynch is one of the most fascinating filmmakers alive today. His work includes relatively mainstream and popular successes, such as *The Elephant Man* and the TV series *Twin Peaks*, along with more difficult cult films such as *Eraserhead*, *Lost Highway* and *Mulholland Drive*. In this course, students will engage in close analysis of Lynch's works, his source material, and his inspirations.

FORMAT: Lecture/discussion

PREREQUISITE: Any of the core courses in the Film Studies Minor (THEA 2301, 2311, 3301, 3313) or permission of the instructor.

EXCLUSION: THEA 3311 X/Y.06

THEA 3371.03: Experimental Film.

This is a survey of experimental cinema. The films studied attempt to revise the basic grammar of film; they do not assume that film is about narrative or even representation, but that it is a fundamentally visual art, often closer to painting or printmaking than to the novel or the theatre. The course will cover films from a range of time periods and regions, and examine a variety of experimental movements.

FORMAT: Lecture, discussion, screening

PREREQUISITE: THEA 2311

THEA 3401X/Y.06: Dress and Identity: King's Court to Mass Culture, 1700-Present.

This is a survey course which will trace the development of dress through the eighteenth, nineteenth, and twentieth centuries, showing its evolution from the period when the fashion aesthetic was determined by the Courts, to the time of the rise of the common man as the arbiter of taste. Concentration in this course will be placed on dress worn in England and France, but students may explore costume from other countries as individual topics of research. Emphasis will be placed on the social and cultural aspects of dress history, using slides of representative works of art, films, and artifacts as visual documentation for each period.

NOTE: Students registering in this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture 3 hours

PREREQUISITE: General BA students must have completed the writing requirement. For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, 1450X/Y.06, 2011.03, 2012.03, 2400X/Y.06, 2406X/Y.06, 2411.03, 2451X/Y.03.

For Diploma in Costume Studies, see Costume Studies course combinations in calendar.

EXCLUSION: THEA 4400X/Y.06

THEA 3451X/Y.06: Costume in Performance II.

In this course students will demonstrate their fluency in costume creation with design interpretations for theatrical production. Students will examine problems related to costume as an expression and extension of theatrical character development. The Theatre Department productions provide a venue for students to develop interpersonal and technical skills. Students work as an integral part of a team. This course is part of the Costume Studies Program.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 8 hours

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, 1450X/Y.06, 2011.03, 2012.03, 2400X/Y.06, 2406X/Y.06, 2411.03, 2451X/Y.03.

For Diploma in Costume Studies: See Costume Studies course combinations.

EXCLUSION: THEA 3540.06

RESTRICTION: Costume Studies degree or diploma students only.

THEA 3454.03: Body-Shaping Through Historical Tailoring II.

This course introduces the student to the process of tailoring as it originated in the Renaissance, and its development down to the twentieth century. Emphasis is placed on the purpose of underpaddings, understructures and the techniques of fixing them in place. This course is part of the Costume Studies Program.

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06, THEA 2011.03, THEA 2012.03, THEA 2400X/Y.06, THEA 2406X/Y.06, THEA 2411.03, 2451X/Y.03

For Diploma in Costume Studies: See Costume Studies class combinations.

RESTRICTION: Costume Studies degree or diploma students only.

THEA 3455.03: Body-Shaping Through Historical Tailoring I.

The "Systems" of Pattern Drafting from the early nineteenth century to the twentieth century. Utilizing traditional tailoring techniques, the process of creating professional tailored garments is studied in detail. This course is part of the Costume Studies Program.

FORMAT: Lecture/lab 4.5 hours

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, 1450X/Y.06, 2011.03, 2012.03, 2400X/Y.06, 2406X/Y.06, 2411.03, 2451X/Y.03.

For Diploma in Costume Studies: See Costume Studies course combinations.

RESTRICTION: Costume Studies degree or diploma students only.

THEA 3500X/Y.06: The Modern Theatre.

From the rise of realism in the 1870s to the emergence of postmodern performance one hundred years later, modernist theatre was characterized by successive bursts of creative energy and experiment. This course gives an opportunity to study these developments in detail and to examine several important theatrical theories and their application.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/seminar 3 hours

PREREQUISITE: THEA 2011.03 and THEA 2012.03 or permission of the instructor

THEA 3501.03: The Modern Theatre 1: Realism and Responses.

From the 1870s until the coming of the First World War, the theatre underwent a series of radical transformations. This course explores the key theatrical movements of this period, including realism, naturalism, symbolism, and expressionism, and compares the theories behind them to the plays, stagecraft, and performance techniques they produced.

FORMAT: Lecture/seminar/discussion 3 hours

PREREQUISITE: THEA 2011.03 and THEA 2012.03 or permission of the instructor

CROSS-LISTING: ENGL 3501.03

EXCLUSION: THEA 3500 X/Y.06

THEA 3502.03: The Modern Theatre 2: High Modernism.

From the close of WW1 to the 1960s, theatrical modernists sought new artistic forms for a rapidly changing world. This course introduces students to major forms of theatrical modernism from Dada and Theatre of Cruelty through Epic Theatre and Biomechanics to Absurdism, and considers their legacy for the contemporary stage.

FORMAT: Lecture and seminar

PREREQUISITE: THEA 3501.03 or Permission of the Instructor

CROSS-LISTING: ENGL 3502.03

EXCLUSION: THEA 3500 X/Y.06

THEA 3600X/Y.06: The Playwright in the Theatre.

This course studies the play as a vehicle for performance rather than as a literary work. Through weekly writing exercises dealing with specific dramaturgical problems, the craft of play-writing is explored. With this background, the class then writes plays which are revised, critiqued, and given a public presentation.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: THEA 2901.03 and THEA 2902.03, or permission of the instructor

THEA 3710X/Y.06: Stage Design II.

This course builds on the knowledge gained in the previous course in the field, THEA 2700X/Y.06, as far as visual knowledge is concerned, and from technical knowledge acquired in THEA 2060X/Y.06 and THEA 2070X/Y.06.

The goal of this course is to expose, explore and develop methods of visual communication within the process of stage design. Students are given a schedule that will foster quick solutions, creating an environment conducive to the project or play assigned. Students will then begin to learn how to find and apply research as it relates to a design. The second portion of the course will provide students with experience in drafting and model building that will culminate in several portfolio-quality design projects.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 6 hours

PREREQUISITE: THEA 2060X/Y.06, 2070X/Y.06, 2011.03, 2012.03, 2700X/Y.06

THEA 3751X/Y.06: Modern German Drama.

An historical study of modern German Drama from the 1770s to the twentieth century. Works by J.M.R. Lenz, J.W.V. Goethe, H.V. Kleist, G. Büchner, G. Hauptmann, E. Toller, B. Brecht and B. Strauß will be discussed. The notion of Freedom (Freiheit) and its apparent impossibility in the nineteenth and twentieth century is central. The texts are read in English translation with the German originals as backup.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

CROSS-LISTING: GERM 3050X/Y.06

THEA 3800X/Y.06/THEA 3810X/Y.06/THEA 3820.06/ MUSC 1081.03: The Transformation Year.

The third year of the Acting Program is structured to build on the knowledge acquired in the previous two years. Students learn how to integrate what they have discovered as they gain further understanding of skills, techniques and creative expression. Third-year students perform in one show of the DalTheatre season and may be invited to perform in others, depending upon the needs of the plays chosen and the student's readiness for the performance situation as assessed by the faculty.

In addition to meeting degree requirements, students must achieve a B in all Acting Program courses, and must also be recommended by the Acting Faculty in order to advance to the next year's class of study.

NOTE: Credit can only be given for X/Y courses if completed in consecutive terms and partial credit cannot be given for a single term.

THEA 3800X/Y.06: Acting III.

This course aims to strengthen the actor's instrument and creative response, while further developing acting technique through practical experience in Mask, Mime and Period Study. "Actioning" is expanded upon to include Script Analysis, with materials being drawn from classical and contemporary texts, ensuring that the 'inner' work of characterization feeds the 'outer' work, and vice versa.

NOTE: Students taking these courses must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture/lab 4 hours

PREREQUISITE: THEA 2800X/Y.06, THEA 2820.X/Y.06, THEA 2810X/Y.06 and permission of the Acting Faculty.

CO-REQUISITE: THEA 3810X/Y.06, THEA 3820X/Y.06, MUSC 1081.03

THEA 3810X/Y.06: Voice and Speech III.

This course is a continuation of 2810X/Y.06. Emphasis is on freeing the voice by combining newly developed skills that constitute "good use": releasing the mind and body; aligning the spine, and accessing primary breathing muscles. Attention is paid to vocal support, clarity of the sound, flexibility and range, and the power behind the sound. A voice warm up is designed and instructed by each student. Ways of accessing oral, nasal and pharyngeal cavities are explored. Phonetics, speech and accents/dialects are introduced. Much of the work involves application to a variety of texts.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: THEA 2800X/Y.06, THEA 2810X/Y.06, THEA 2820X/Y.06, and permission of the Acting Faculty

CO-REQUISITE: THEA 3800X/Y.06, 3820X/Y.06, MUSC 1081.03

THEA 3820X/Y.06: Dance and Movement III.

The course is designed to develop and enhance the acting student's practical knowledge of movement through the discipline of Jazz Dance. This is manifest through the continued practical exploration of the Luigi Jazz Dance Technique. Emphasized are the performer's building blocks: a strong body alignment, a healthy stretching regimen, and an expanding skill repertoire. Explorations commence into dance choreography and performance.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab/demonstration/lecture 3 hours

PREREQUISITE: THEA 2800X/Y.06, 2810X/Y.06, and THEA 2820X/Y.06, and permission of the Acting Faculty

CO-REQUISITE: THEA 3800X/Y.06, 3810X/Y.06, MUSC 1081.03

THEA 3911.03: Gender in Theatre: A Cross-Cultural Survey.

This seminar course examines the roles gender has played in the shaping of world theatre alongside the roles the theatre has played in the shaping of various cultural conceptions of gender. By exploring plays and performances from Europe, North America, China, Japan, India, Iran and/or other traditions, we will strive to understand the ways in which various forms of representation reflect their cultures' governing images of masculinity and femininity. In the process, we will interrogate the historical and cultural variability of the notion of "gender" itself. The main objective of the seminar will be to ask how gender determines performers' choices in various cultures, and to see how gender itself can actually be shaped by performance.

FORMAT: Lecture/seminar, 3 hours

CROSS-LISTING: GWST 3911.03

THEA 3912.03: Gender Theory and Contemporary Performance.

This seminar course offers students an opportunity to encounter some of the most provocative and challenging gender theory of recent years in relation to contemporary theatre, film and performance art. Students will read considerations of the relationship between gender, performance and identity by such authors as Jacques Lacan, Michel Foucault, Hélène Cixous, Luce Irigaray, Julia Kristeva, Judith Butler, Peggy Phelan and Camille Paglia, among others. Alongside these works, we will examine contemporary performances from the popular to the oppositional. Through this intertextual exploration of theory and performance, we will aim to expand our understanding of the ways in which gender roles are created, maintained, questioned and changed in contemporary culture(s).

FORMAT: Lecture/seminar, 3 hours plus bi-weekly screenings

CROSS-LISTING: GWST 3912.03

THEA 3913.03: English Drama 1660-1800.

A survey of plays produced during the Restoration and eighteenth century. Concentrating on the London scene from the first appearance of actresses on the stage to the burning of the Haymarket theatre in 1789, this course introduces students to the period's various dramatic forms, the literary influences and controversies, and the many women and men who penned for the stage.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000X/Y.06; or any two of ENGL 1010.03, 1020.03,

1040.03, or THEA 1000X/Y.06; or the King's Foundation Year Program

CROSS-LISTING: ENGL 3020.03

EXCLUSION: ENGL 3225.06

THEA 3914.03: Topics in Italian Drama and Spectacle.

This course focuses on Italian drama and performance. The topic will vary from year to year and may include topics such as Italian Renaissance theatre, the Commedia dell'arte, Pirandello's productions and contemporary Italian spectacle. The course will examine the selected topic while placing Italian theatre into a broader European context; students will acquire reading strategies for drama and spectacle and learn to consider the works from a theoretical perspective. The course is held in English but Italian majors will be required to read the texts in the original.

FORMAT: Lecture

CROSS-LISTING: ITAL 3700.03

THEA 4390.03: Special Topics in Film Studies.

This is an advanced seminar in film studies which examines one topic in depth from formal, political, and historical perspectives. Topics may include but are not limited to: animated film; political cinema; montage; screen acting; film adaptation; the work of a particular director; or a film movement. The topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable.

FORMAT: Seminar

PREREQUISITE: THEA 2311.03 and one other film course (3000-level or above recommended)

THEA 4391.03: Special Topics in Popular Cinema.

This advanced seminar addresses an issue in popular cinema. Topics may include but are not limited to: critical perspectives on a particular set of films; the relation between "independent" cinema and "mainstream" cinema; or the social and aesthetic impact of new technologies in popular cinema. The topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable.

FORMAT: Seminar

PREREQUISITE: THEA 2311.03 (+ THEA 2360.03 or THEA 2320.06 are recommended)

THEA 4406X/Y.06: The Aesthetics of Historical Dress.

This course examines the aesthetics of historical dress, tracing the evolution of changing silhouettes and historical pattern design throughout the eighteenth and/or nineteenth centuries. The student will learn to carry out material-culture and textual analyses as historical source material with a view to re-creating character and dress of the eighteenth and/or nineteenth centuries. This course stresses research and academic skills, along with applied skills. Primary research forms a significant component of this course. This course is part of the Costume Studies Program.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion/lab

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, 1450X/Y.06, 2011.03, 2012.03, 2400X/Y.06, 2406X/Y.06, 2411.03, 2451X/Y.03, 3401X/Y.06, 3451X/Y.06, 3454.03, 3455.03

For Diploma in Costume Studies, see Costume Studies course combinations in calendar.

EXCLUSION: THEA 3405X/Y.06

RESTRICTION: Costume Studies degree or diploma students only.

THEA 4450.03: Costume Technology.

This course extends the expertise in costume creation developed in THEA 1450X/Y.06, THEA 2451.03 and THEA 3451.06 to examine techniques of fine finish as students prepare their costume 'masterpiece.' This course is part of the Costume Studies Program.

FORMAT: Lecture/lab 4.5 hours

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, 1450X/Y.06, 2011.03, 2012.03, 2400X/Y.06, 2406X/Y.06, 2411.03, 2451X/Y.03, 3401X/Y.06, 3451X/Y.06, 3454.03, 3455.03

For Diploma in Costume Studies, see Costume Studies course combinations in calendar.

RESTRICTION: Costume Studies degree or diploma students only.

THEA 4452.03: The Sculpture of Dress.

Based less in abstract principles and more in creativity, this course examines sculptural forms in a human context to facilitate modern and historical costume design. The student works directly on the human body or mannequin to gain proficiency in modelling textiles to shape costume. This course is part of the Costume Studies Program.

FORMAT: Lecture/demonstration/lab 4.5 hours

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, 1450X/Y.06, 2011.03, 2012.03, 2400X/Y.06, 2406X/Y.06, 2411.03, 2451X/Y.03, 3401X/Y.06, 3451X/Y.06, 3454.03, 3455.03

For Diploma in Costume Studies, see Costume Studies course combinations in calendar.

RESTRICTION: Costume Studies degree or diploma students only.

THEA 4500.03: Canadian Theatre to 1968: Performing the Nation.

Early Canadian theatre offers a fascinating example of a colonized nation's struggle to find its own dramatic voice in the face of powerful outside influences. This seminar course will explore the development of theatre in Canada from its roots in First Nations ritual and performance, to its encounters with British and European models and its eventual search for an independent identity via the Little Theatre movement, the Workers' Theatre movement and the Dominion Drama Festival. The course will close with a consideration of the influential Massey Commission and the birth of the Stratford Festival, Canada's first 'world class' theatre. Over the course of the term, special attention will be paid to the development of diverse dramatic traditions in French and English Canada. Drama by representative playwrights will be studied alongside primary sources in Canadian theatre history to give students an integrated perspective on the complex artistic and political debates that helped to determine the character of performance in Canada.

FORMAT: Seminar/discussion

PREREQUISITE: Permission of the instructor

CROSS-LISTING: ENGL 4500.03, CANA 4500.03

THEA 4501.03: Canadian Theatre Since 1968: Interrogating Identities.

This seminar course will examine the ongoing emergence of uniquely Canadian forms of theatre in the years since the Massey Commission asserted the need to foster Canada's native talent. Topics to be considered will include: the controversial role of government subsidy and policy-making in Canadian culture; the differing models offered by the Stratford and Shaw Festivals, by the major regional theatres, and by 'alternate' and independent companies; the contrast

between First Nations, English- and French-Canadian traditions; and the rise of the current 'Fringe' phenomenon. Drama by representative playwrights will be considered alongside post-colonial theory and primary sources in Canadian theatre history to help students consider what a genuinely 'Canadian' theatre might look like. Above all, the course offers an opportunity to consider the complex relationship between theatre and national identity: who are 'we,' and how might our theatre express or even shape 'us'?

FORMAT: Seminar/discussion

PREREQUISITE: Permission of the instructor

CROSS-LISTING: ENGL 4501.03, CANA 4501.03

THEA 4700X/Y.06: Special Topics I.

In this full year seminar course, students focus on a particular topic in dramatic literature, film studies, theatre history, dramatic theory, or a related interdisciplinary subject in order to investigate it in great detail. The topic is assigned by the Department at the end of the preceding year and is then posted by the Department and in the University's timetable.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar 3 hours

THEA 4735.06: Advanced Seminar in Baroque Culture.

This course offers its students a survey of key aspects of seventeenth and eighteenth-century European history and society along with a first-hand view of some of the most important aspects of baroque style and material culture. It takes place in the town of Cesky Krumlov in the Czech Republic. The course introduces students to the socio-political conditions that led to the birth of Baroque civilization before entering into an exploration of the court life of seventeenth and eighteenth-century Europe. It then examines the cultural and artistic forms most characteristic of this period, with particular emphasis on theatre history and on the role of the 'theatrical' in the Baroque arts. As the course proceeds, students will have an opportunity to consider the connections between course material and the evidence of Baroque culture to be found in the Castle Theatre's scenographic machinery, its stock of original scenery and props, and its collection of historical costumes, as well as to witness an experimental Baroque opera performance. Finally, the course will include visits to Prague and other sites of interest to add to students' understanding of the Baroque and its legacy to subsequent periods.

FORMAT: Lecture/lab

PREREQUISITE: Permission of the School of Performing Arts and/or History Department.

CROSS-LISTING: HIST 4162.06, MUSC 4360.06

RESTRICTION: 3rd and 4th year students only.

THEA 4800X/Y.06/4840X/Y.06: The Interpretation and Performance Year.

In the final year of the Acting Program, students' studies are geared toward performance and entering the world of professional acting. The company of fourth year Acting Program students will be cast in three DalTheatre season shows. courses are devoted to preparing the student actor for transition into the profession.

NOTE: Credit can only be given for these courses if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

I. Introduction

The Department of French offers students not only the opportunity to develop fluency in courses backed up by computer-aided language learning facilities, but also the possibility of studying the literature and culture of France, French Canada and the other countries and regions of the French-speaking world, as well as the linguistic structure and development of French.

Courses are available for beginners and for those with a background in the language who wish to improve and maintain any or all of the following skills: speaking, listening, reading, and writing. Other courses are specially designed for students who are interested in translation, or other areas of language study. The role of French in Canada and in the Maritimes is stressed in courses in Acadian and Québec literature and civilization. The literature of France and French-

speaking nations is brought to life in courses organized around a theme, a genre, or an historical period.

The Department of French urges students to practise the language as much as possible. The French Club organizes activities including films, French meals, parties and plays in which all students may participate. Participation in immersion programs and individual student travel and study are encouraged. Please consult the Department for information and see below: Studies in a Francophone Environment.

A BA degree in French with Honours, or with Honours in French and another allied subject, may lead the student to a career in education, translation or interpreting, or may provide the background for careers in many fields, including radio, television, law, social work, public relations, business, diplomacy, journalism and library science. Students considering French as a minor in a BA degree are invited to discuss the matter at any time (the earlier the better) with a departmental advisor. The focus is on the particular needs and aspirations of the individual. An Honours degree is normally required for access to graduate studies: MA and PhD degrees may be pursued in the Department (see the Calendar for Faculty of Graduate Studies).

The French Department offers a number of academic awards to students, including the Ruth Murray Scholarship, the French Department Scholarship, the Marcelle Cendres Sandhu Memorial Prize, the Sabah Metlej French Scholarship, the Prof. and Mrs. Robert Lloyd McIntosh Prize, the Prix de l'Alliance française, and Embassy and Consular book prizes. Graduating Honours and Majors students may apply to the French Embassy for an eight month internship to tutor in France.

Students may, with the approval of the Department of French, take up to one year of study at a University in a francophone environment and receive credit at Dalhousie. Bursaries may be available for students selected to participate in the Dalhousie Studies in a Francophone Environment Programs.

The language requirement exemption test in French is given in the April examination period. Students should register at the Registrar's Office before mid January by completing an *Application for Exemption from the Language Requirement*. A copy of the form must be provided to the French Department. Please note that passing the language requirement exemption test does not give a course credit.

II. Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, [page 125](#) of this calendar.

Requirements for the four degree programs are set out in the following sections. Electives from other departments, when chosen with care, can enrich and enhance the major courses. Departmental Advisors can provide information on recommended electives. All Majors and Honours Students must consult with the Undergraduate Advisor.

Students interested in a degree in European Studies should consult the **European Studies** section of this calendar.

Students interested in an emphasis or a combined degree in Canadian Studies should consult the **Canadian Studies** section of this calendar.

A. BA with Honours in French

This program offers systematic, comprehensive and individualized study of French language, literature, linguistics and other program elements both inside and outside the classroom. It is, therefore, an option which should be considered seriously by any student who, with career or personal objectives in mind, wishes to obtain a strong background in French and by those who plan to teach or earn a graduate degree in French.

Honours students are strongly encouraged to enrich their learning experience by spending at least one term in a French-speaking area. Please consult the department for information on our Dijon program.

Potential Honours applicants should consult the Department's Undergraduate Advisor, preferably during their second year of study, regarding the application procedure and relevant deadlines.

1. Concentrated Honours

Departmental Requirements

2000 level

- FREN 2020.03
- FREN 2045.06
- FREN 2201.03
- FREN 2202.03

3000 level

- FREN 3021.03 or 3022.03
- FREN 3045.06
- one full credit in literature and/or culture

4000 level

- FREN 4017.03 and 4046.03
- two 4000 level full credits
- At least one other full credit, 2000 to 4000 level, for a total of nine French credits
- FREN 4933.00 (Honours Seminar)

Second year (i.e., 2000 level) courses taken during the student's first year at Dalhousie may count towards major or honours, with the approval of the department.

An additional grade is required: either an Honours Essay or an Oral Presentation (see document entitled "French Honours Qualifying Examination" available from the Honours Advisor or the departmental secretary).

2. Combined Honours

From 11 - 14 credits in French and another subject; not fewer than five nor more than eight may be chosen in French. Minimum requirements for the Combined Honours program are as follows: 2045.06, 2201.03, 2202.03, 3045.06, 4017.03 and 4046.03 plus a minimum of one full credit in language, literature, culture or linguistics at the 3000 or 4000 level. When French is the primary subject, FREN 4933 (Honours Seminar) and an additional credit are required: either an Honours Essay or an Oral Presentation (see document entitled "French Honours Qualifying Examination" available from the Undergraduate Advisor or the departmental secretary).

3. Honours Conversion

The Honours Conversion is an option for continued study open to anyone who has previously completed a BA (15 credit) program at Dalhousie. Normally, it consists of five full credits of course work plus one additional credit: either an honours essay or an oral interview based on course work and /or a specific topic. Requirements for the Honours Conversion are similar to those for the concentrated Honours Program, but will vary according to individual circumstances.

20 credit degrees may also be converted to Honours degrees; please consult the departmental Undergraduate Advisor.

B. BA (20 credit) Major in French

Students must take a minimum of seven and a maximum of nine credits in French.

Departmental requirements

2000 level

- FREN 2045.06
- FREN 2201.03
- FREN 2202.03

3000 level

- FREN 3045.06
- Two other 3000 level full credits in French

4000 level

- FREN 4017.03 and 4046.03
- One other 4000 level full credit in French

PLEASE NOTE: Students with proper standing wishing to change to an Honours Program may do so, in which case they should also take FREN 2020.03 and FREN 3021.03 or FREN 3022.03 (required for Honours), and consult the Chair or the Undergraduate Advisor.

C. BA (20 credit) Double Major in French

Students must take FREN 2045.06, 2201.03, 2202.03, 3045.06 plus one full credit at the 3000 level; at least five credits in French are required.

D. BA (15 credit) Minor in French

Students should consult the Chair or a Department Advisor about the choice of courses.

Students are urged to take more than the minimum number of courses required, and, indeed, to do a four year degree (20 credit Major or 20 credit Honours) if a high level of proficiency in French is sought.

Departmental Requirements

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

Courses other than those required may be chosen freely in consultation with the Major Advisor, according to the student's desire to obtain a general knowledge of the field, or a greater concentration in specific areas such as Literature, Linguistics, French-Canadian Studies, etc.

Students wishing to change to an Honours Program may do so during the second or third year of studies, given sufficient standing, in which case they should consult the Chair or the Undergraduate Advisor.

III. Minor in French

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

IV. Studies in a Francophone Environment

A. Year-Abroad Program in Dijon, France

Students at all levels of proficiency in French have the opportunity of spending a full regular session at the CIEF (Centre International d'Études Françaises) on the Université de Bourgogne campus in Dijon, which is located about 300 km southeast of Paris.

Students will register for courses via letter of permission and will receive grades on a Pass/Fail basis. The courses will be noted on the student's academic record as transfer credits.

Upon arrival at the CIEF, students are placed in the appropriate proficiency level, which correspond to first, second or third year transfer credits at Dalhousie. Five full credits are awarded for the program.

In addition to compulsory language courses, the CIEF offers courses in French literature, civilization, history, art history, cinema, music, theatre, philosophy, French for commerce, and more. Students who opt for electives in areas such as history, theatre, philosophy and political science may be eligible for transfer credits in the other subject areas.

Study Work International Fund (SWIF) funding up to \$2,000 may be available through the International Centre.

An information session is held in November of each year, with applications due early in the new year. For information, consult the website at www.dal.ca/dijon or contact french@dal.ca or 494-2430.

V. Course Descriptions

PLACEMENT TEST: All students taking their first French course at Dalhousie are required to take the French Placement Test prior to selecting their first French course. The test is available on the World Wide Web at www.dal.ca/frenchtest.

Some courses are offered in English, including FREN 1004X/Y.06 which satisfies the Bachelor of Arts Language requirement. Other courses taught in English, that do not satisfy this degree requirement, are FREN 1070.03, FREN 2060.03, FREN 2275.03, FREN 2666.03, FREN 2800.03, FREN 2801.03, FREN 3125.03, FREN 3175.03, FREN 4016.06.

NOTE: Not all courses are offered every year. Please consult the current timetable to determine this year's course offerings.

FREN 1004X/Y.06: Pratique de la lecture/French for Reading.

This course develops the ability to read contemporary French prose with ease and accuracy. Emphasis is on the acquisition of skills that facilitate reading. Classroom work involves a grammar review, study and discussion of a wide

variety of readings, reading comprehension, as well as correction of prepared translations and sight translations (from French to English only). FREN 1004.06 is given in English and is not, by itself, suitable for students who plan to major in French. It may, however, be taken by those with no prior training in French or as an additional first-year option for those taking FREN 1005X/Y.06 or FREN 1045X/Y.06. This course also satisfies the Bachelor of Arts Language Requirement.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: Online French Placement Test (www.dal.ca/frenchtest)

EXCLUSION: FREN 1060.06

FREN 1005X/Y.06: Français fondamental/Basic French.

For students with little or no previous background in French, for example students with grade 8-11 core French (online Placement Test required: www.dal.ca/frenchtest). This course presents the basic components of French grammar with an emphasis on simple sentence types, and develops all four language skills: speaking & writing, and listening & reading comprehension. It also provides an introduction to Francophone culture worldwide. This course is normally followed by FREN 1045X/Y.06 (for students who have achieved a final grade of B or above), or FREN 2005 for students who do not wish to major in French. This course satisfies the Bachelor of Arts Language Requirement.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: Online Placement Test required: www.dal.ca/frenchtest

EXCLUSION: FREN 1000X/Y.06, 1006X/Y.06, 1050X/Y.06

FREN 1045X/Y.06: Français intermédiaire/Intermediate French.

For students with some background in French, for example grade 11-12 core French (online Placement Test required: www.dal.ca/frenchtest), or follows FREN 1005 (for students who have achieved a final grade of B or above) or FREN 2005. Focusing on the study of more advanced grammatical structures with an introduction to grammatical analysis, this course also aims to further develop the four language skills: listening, reading, writing and speaking. Selected readings will lead to the application of structures being studied and to vocabulary enrichment. Weekly tutorials are an integral part of this course. A final grade of B or above in this course leads to all second-year French courses. This course satisfies the Bachelor of Arts Language Requirement and is normally followed by FREN 2045 or FREN 2021 and FREN 2022.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/tutorial

PREREQUISITE: FREN 1005X/Y.06 (final grade B or above), FREN 2005X/Y.06 or equivalent (Online Placement Test required: www.dal.ca/frenchtest)

EXCLUSION: FREN 1050X/Y.06

FREN 1050X/Y.06: Français pour anciens étudiants des programmes d'immersion/French for Former Immersion Students.

For students who have completed French Immersion to Grade 12 (online Placement Test required: www.dal.ca/frenchtest). Focusing on the study of more advanced grammatical structures including grammatical analysis, this course also aims to further develop the four language skills: listening, reading, writing and speaking. Selected readings will lead to the application of the structures being studied and to vocabulary enrichment. This course will enable immersion graduates to build on their strengths while working to eliminate ingrained errors. A final grade of B or above, in this course normally leads to all second-year French courses. This course satisfies the Bachelor of Arts Language Requirement and is normally followed by FREN 2045 or FREN 2021 and 2022.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: Online Placement Test required: www.dal.ca/frenchtest

EXCLUSION: FREN 1005X/Y.06, FREN 1045X/Y.06

FREN 1070.03: Introduction to Linguistics.

Taught in English, the course focuses on core theories and methods of linguistics and its principal subfields: phonology, morphology, syntax, semantics, pragmatics and sociolinguistics.

FORMAT: Lecture

PREREQUISITE: None

FREN 1994.03: Independent Study.

This class is normally restricted to students preparing to study abroad in the winter term.

Note: Most courses above this level are given entirely in French. Exceptions: FREN 2060.03, FREN 2275.03, FREN 2666.03, FREN 2800.03, FREN 2801.03, FREN 3125.03, FREN 3175.03, FREN 4016.06 (These courses do not satisfy the French degree program requirements or the Faculty of Arts Language requirement.)

FREN 2002.03: Le français oral/Spoken French.

In this course, students will develop their ability to express themselves orally in French. The course will emphasize the use of idiomatic and socio-culturally appropriate vocabulary and structures for a variety of communication purposes. Audio-visual and electronic resources, as well as interactive technology, may be integrated into course material.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 1045X/Y.06, or 1050X/Y.06 FREN 2005X/Y.06 or 2000-level Placement Test result, or instructor's permission

FREN 2005.06: Français pratique pour non-spécialistes/Practical French for Non-Majors.

This course follows French 1005 and is designed for students who do not wish to major in French but who would like to maintain and improve their general knowledge of French language and Francophone culture. Along with further training in basic grammatical structures, the course focuses on the practical and accurate use of French to further develop communication skills. Based on authentic audiovisual and multimedia material (films, commercials, documentaries, etc.), activities will aim at vocabulary enrichment, oral comprehension and expression development and will focus mainly on contemporary and daily life topics in a Canadian context. Successful completion of this course (final grade of B or above) leads to second year courses such as FREN 2002 or FREN 2021/2022 for Non-Majors, or to FREN 1045 for students who subsequently decide to major in French. This course does not count towards a Major or Certificate of Proficiency in French.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 1005.03 (final grade of B or above) or instructor's permission

FREN 2020.03: Introduction à la linguistique/ Introduction to Linguistics.

Linguistics is the science of language. This course is designed to serve as an introduction to basic concepts in linguistics. The various subfields of linguistics will be introduced with a focus on the core areas of linguistics: phonetics, phonology, morphology, syntax, and semantics. Students will learn about the structure of language at different levels of organization: phonemes, syllables, words, phrases, and sentences.

FORMAT: Lecture

PREREQUISITE: FREN 1045X/Y.06 or 1050X/Y.06, or 2000-level Placement Test result or instructor's permission

EXCLUSION: FREN 3020.06

FREN 2021.03: FREN 2022.03: Langue et culture/ Language and Culture.

Normally follows FREN 1045X/Y.06 or 1050X/Y.06, and is taken in the second year of study. This course provides the opportunity to practise and improve language skills (vocabulary and grammar) already acquired. Each year sections offer topics from the options listed below. Each section focuses upon a broad cultural topic via which language skills are developed. No prior knowledge of the topic is supposed. Various readings lead to discussions and oral presentations. Descriptions for sections offered in a specific year may be obtained in April from the Department. All classes and assignments are entirely in French. A maximum of two sections may be taken under the class designation of FREN 2021.03 and 2022.02. Approved in part with Canadian Studies (topics 7 and 15) and IDS (topic 3).

Topic 01: Le journalisme: I. Oore

Topic 02: La société française à travers la littérature

Topic 03: La civilisation francophone de l'Afrique occidentale et des Antilles

Topic 04: Etudes acadiennes

Topic 05: Monuments culturels de Paris

Topic 06: La France et ses photographes

Topic 07: Québécois et Québécoises célèbres

Topic 08: Contes et légendes

Topic 09: Nature et culture: C. Elson

Topic 10: L'Art en France depuis la Révolution

Topic 11: Voyages culturels à travers la France

Topic 12: Le roman policier: V. Frigerio

Topic 13: Aspects du cinéma français et francophone: C. Elson

Topic 14: Faim et festin: I. Black

Topic 15: Communication et compétence interculturelle

FORMAT: Lecture

PREREQUISITE: FREN 1045X/Y.06 or 1050X/Y.06, or 2000-level Placement

Test result, or instructor's permission

CROSS-LISTING: CANA 2021.03

FREN 2022.03: Langue et culture/Language and Culture.

Normally follows FREN 1045X/Y.06 or 1050X/Y.06. This course provides the opportunity to practise and improve language skills (vocabulary and grammar) already acquired. Each year sections offer topics from the options listed under FREN 2021.03. Each section focuses upon a broad cultural topic via which language skills are developed. No prior knowledge of the topic is supposed. Various readings lead to discussions and oral presentations. Descriptions for sections offered in a specific year may be obtained in April from the Department. All courses and assignments are entirely in French. A maximum of two sections may be taken under the course designation of FREN 2021.03 and 2022.03. For possible topics, see FREN 2021.03. Approved in part with Canadian Studies (topic 7) and IDS (topic 3).

FORMAT: Lecture

PREREQUISITE: FREN 1045X/Y.06 or 1050X/Y.06, FREN 2005X/Y.06 or

2000-level Placement Test result, or instructor's permission

CROSS-LISTING: CANA 2022.03

NOTE: The cross-listing with Canadian Studies depends on the topic of the course. Please check with your instructor to see if course is cross-listed for the current year.

FREN 2025.03: Morphologie/Morphology.

The course builds upon elements of morphology introduced in FREN 2020 (Introduction to Linguistics). It focuses on the place of morphology in the general linguistic theory and on formal modeling of morphological phenomena in several languages, in particular French.

FORMAT: Lecture, 3 hours

PREREQUISITE: FREN 2020/FREN3020 or equivalent

FREN 2032.03: Phonologie/Phonology.

Using varied texts and recordings, this course studies the basic sounds (phonemes) of French, and the essential non-phonemic features of the language (rhythm, stress, intonation, etc.). It helps students master French phonemes, understand the role of non-phonemic features in oral communication and use the latter to develop self-expression and audio comprehension.

FORMAT: Varied participatory activities, short lectures, language lab

PREREQUISITE: FREN 1045X/Y.06 or 1050X/Y.06, or 2000-level Placement

Test result, or instructor's permission

FREN 2045X/Y.06: Grammaire intensive/Intensive Grammar.

This course develops a more advanced knowledge of French. A detailed study of grammar through an in-depth analysis of all components of simple, complex and marked sentences leading to paragraph and text analysis. Emphasis is placed on the correspondence between grammatical content and meaning. Various grammar, writing and translation exercises will aim at developing the ability to communicate in clear, accurate written French. This class normally follows FREN 1045/1050, and is normally followed by FREN 3045.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/tutorial

PREREQUISITE: FREN 1045X/Y.06 (final grade of B or above), FREN 1050X/Y.06 (final grade of B or above), or 2000-level Placement Test result

EXCLUSION: FREN 1040X/Y.06

FREN 2070.03: Le français des affaires I/French for Business I.

This course aims to introduce the basic elements of business and administrative French. While developing oral, reading and writing skills through the use of authentic economic and business documents, students will master vocabulary specific to the workplace. This course is normally followed by FREN 3070 (French for Business II)

FORMAT: Lecture/discussion

PREREQUISITE: Fren 1045/50 or 2000-level placement test or instructor's permission

EXCLUSION: FREN 3030X/Y
RESTRICTION: Must be taken before FREN 3070

FREN 2201.03: FREN 2202.03: Introduction à la littérature/ Introduction to French Literature.

A survey of literature in French from the Middle Ages to the 20th Century, presenting selected works of prose, poetry and theatre from France, and possibly also from Québec, Acadia and other francophone areas. Introduction to general notions of literary history and to the basic techniques involved in reading literary texts. Attention is paid to the development of both oral and written expression of ideas. FREN 2201.03 and FREN 2202.03 may be taken consecutively. Classes involve group discussions and lectures.

FORMAT: Lecture

PREREQUISITE: FREN 1045X/Y.06 or FREN 1050X/Y.06, or 2000-level Placement Test result.

FREN 2275.03: French Literature in Translation: The Novel/Littérature française le cas du roman en traduction anglaise.

Given in English, this course will study key fictional works representative of different historical periods and the changing form of the novel. Approximately seven to eight works from a selection of the following authors will be studied: Chretien de Troyes, Marguerite de Navarre, Madame de Lafayette, Rousseau, Laclos, Balzac, Flaubert, Stendhal, Proust, Colette, De Beauvoir, Duras. The selection of authors and works may vary from year to year, but the "survey" nature of the course will be maintained. The language of the course will be English. This course does not satisfy the French degree program requirements. French Majors and Honours students may take this course as an elective.

FORMAT: Lecture/seminar

FREN 2666.03: The End of the World, from 'Apocalypse' to 'Zombies'

Given in English, this course is an introduction to the 'End of the World' (the end of Mankind / of the Earth / of the whole Universe) as a topic or as an archetype in a selection of narratives ranging from religious and prophetic writings to modern 'apocalyptic and post-apocalyptic fiction'. The survey will be both chronological (from prebiblical writings to 21st c. cinema) and thematic (destruction and renewals, chronologies and predictions, war and famine, death and the undead).

FORMAT: Lecture

FREN 2800.03: Cinema: The French Phenomenon I. From the Lumière Brothers to the New Wave.

Given in English, with no knowledge of French required, this course traces the history of French film from its beginnings, through its "classic" period, to the movements and authors of the 1950's and 60's New Wave in French cinema. The social and broad cultural dimensions of the French and Francophone film world will be explored, as will its rich and changing aesthetic and theoretical implications. Lectures will blend with open discussion periods based on selected readings and viewings. Directors and scriptwriters whose work will be discussed include Renoir, Prévert, Bresson, Resnais, Duras, Godard, Robbe-Grillet, Varda, Bunuel, Truffaut, Malle, Rohmer, Chabrol. Actors as varied in technique as Arletty, Gabin, Belmondo, etc. will draw attention.

NOTE: Film Studies minor specialists should consult program requirements. This course does not satisfy the French degree program requirements. French Majors and Honours students may take this course as an elective.

FORMAT: Lecture/discussion/movie-viewing

FREN 2801.03: Cinema: The French Phenomenon II. From the New Wave to the New Millennium.

Given in English, with no knowledge of French required, this course traces the history of French film from the author-based cinema of the New Wave period (1950's and 60's France) right up to contemporary developments in France and the contemporary Francophone world at large: Québec, the Maghreb, West Africa, Acadia, Belgium, the Antilles, etc. As with FREN 2800.03, this course will consider the social and broad cultural dimensions of the French and Francophone film world and its rich and changing aesthetic and theoretical implications. Lectures will blend with open discussion periods based on selected readings and viewings. Directors and scriptwriters whose work will be discussed include Godard, Robbe-Grillet, Varda, Truffaut, Malle, Rohmer, Chabrol, Besson, Tavernier, Jutra, Chiasson, Perreault, Arcand, etc. Actors as varied in technique as Deneuve, Depardieu, Dauteuil, etc. will draw attention. Consideration will be given to the documentary tradition, particularly its manifestations in French Canada.

NOTE: Film Studies minor specialists should consult program requirements. This course does not satisfy the French degree program requirements. French Majors and Honours students may take this course as an elective.

FORMAT: Lecture/discussion/movie-viewing

FREN 2994.03: Independent Study.

This course is normally given in preparation for students studying abroad in the Winter term.

FREN 3000.03: Cours supérieur de français oral/ Advanced Oral French Workshop.

Class discussions and oral presentations based on themes of contemporary concern. This course is intended to build vocabulary, perfect facility of expression (fluency) and style. Reading and research are necessary for the oral presentations.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2002.03 or instructor's permission

FREN 3021.03: Syntaxe/Syntax.

Syntax is a linguistic discipline focusing on sentence structures i.e., on how words are organized linearly and hierarchically together in order to form larger units: phrases, sentences. Some theoretical frameworks have been defined which propose sets of principles/(meta) rules aiming at describing syntactic features that are both common to all languages and specific to individual ones. This course will concentrate on the description of French syntax (general/specific features) through one (or more) of these frameworks.

FORMAT: Lecture

PREREQUISITE: FREN 2020.03

EXCLUSION: FREN 3020.06

FREN 3022.03: Sémantique/Semantics.

This course builds upon the elements of semantics introduced in FREN 2020.02. It focuses on the acquisition of fundamental semantic concepts (semanteme, semantic predicate/object, semantic decomposition, semantic & lexical relations) and their application to semantic descriptions of fragments of particular languages, in our case of French.

FORMAT: Lecture

PREREQUISITE: FREN 2020.03

EXCLUSION: FREN 3020.06

FREN 3025.03: Les Parlers acadiens: Introduction linguistique/Linguistic Introduction to Acadian Dialectology.

An examination of the phonetic, morphosyntactic and lexical systems of various Acadian speech communities, with emphasis on the Acadian dialects of Nova Scotia. Comparisons will be made between these dialects and both standard French and Québécois. Recorded and written materials are used. Approved with Canadian Studies and Linguistics.

FORMAT: Lecture

PREREQUISITE: FREN 2045X/Y.06 or instructor's permission

FREN 3026.03: Le français québécois/Québec French.

Definition, origin and evolution of the French of Québec. Study of its phonetic, lexical, morphosyntactic and semantic characteristics. Comparison with Canadian French outside of Québec and with international French. Analysis of written and oral documents for the purpose of illustration.

FORMAT: Lecture

PREREQUISITE: FREN 2045X/Y.06 or instructor's permission

CROSS-LISTING: CANA 3026.03

FREN 3045X/Y.06: Expression écrite /Written Expression.

This course normally follows FREN 2045. It introduces the students to different types of texts and their communicative functions. Students learn how to analyze texts and how to produce them in similar written communicative situations. Grammar is hence taught in the natural context provided by the texts. Students work with a corpus of authentic documents and with electronic tools. While students' common grammar and stylistic weaknesses are addressed, attention is also given to students' individual writing problems. Self-correction strategies are put in place to help them overcome these. This course is normally followed by FREN 4017 and 4046.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: FREN 2045X/Y.06 or equivalent or instructor's permission

FREN 3070.03: Le français des affaires II/French for Business II.

This course is a continuation of FREN 2070 and will focus on the development of reading, writing and oral skills in the following areas: commercial correspondence and writing; management, banking, financial and economic terminologies; specificities of business word processing in French.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2070 or instructor's permission

EXCLUSION: FREN 3030X/Y

RESTRICTION: May not be taken before FREN 2070

FREN 3101.03: Culture et civilisation françaises/ French culture and civilization.

This course aims to provide, through lectures, readings, discussions and presentations, an overview of French culture and civilization, which will focus on contemporary France while taking a historical perspective.

PREREQUISITE: 2000-level French course

EXCLUSION: FREN 3100X/Y.06

FREN 3125.03: The French-Speaking World/Le monde francophone.

Given in English, with no prior knowledge of French required, this course provides an introduction to the French-speaking world from a political, cultural, social and economic perspective. Study of the organization known as la Francophonie, with an emphasis on its evolution and mandate, as well as on the bilateral and multilateral cooperation between its member countries. The course is designed for students who are not specializing in French. The course format will consist of lectures and in-class discussion of print and audio-visual materials. Student assessment will be based on oral presentations, assignments, exams and written papers. This course does not satisfy the French degree program requirements. French majors and Honours students may take this course as an elective.

FORMAT: Lecture

CROSS-LISTING: INTD 3125.03

FREN 3150.03: Aspects de la francophonie/Aspects of the Francophone World.

Taught in French, this course provides an introduction to the study of the francophone world: political, economic, linguistic, literary and cultural aspects. From year to year the course may emphasize different regions: Western Countries, Sub-Saharan Africa, Pacific Islands, West Indies, Northern Africa.

FORMAT: Lecture

PREREQUISITE: 2000-level French course or instructor's permission

CROSS-LISTING: INTD 3150.03

FREN 3175.03: Topical Issues in Francophonie/ Thèmes de la francophonie.

Given in English, this course builds on the overview provided by FREN 3125, and involves an in-depth study of a selection of topics that are of relevance to the francophone world, including: the relationship between French and native languages; linguistic and cultural policies; languages in the educational system; economic development issues; North-South relations, etc. Approved with IDS. The course is taught in English and does not satisfy the French degree program requirements.

FORMAT: Lecture

PREREQUISITE: FREN/INTD 3125.03 or FREN/INTD 3150.03, or instructor's permission

FREN 3203.03: Approches du texte littéraire/ Approaches to Literary Texts.

An introduction to the critical reading of a selection of literary texts (various genres and periods) with an emphasis on Québec literature. The close analysis of short texts will lead to discussions of the broader nature of recurring images and myths as well as central themes. Strongly recommended for French majors and Honours students. Approved with Canadian Studies.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2045X/Y.06

CROSS-LISTING: CANA 2203.03

EXCLUSION: FREN 2203.03

FREN 3225.03: L'épistolaire/Letter Writing in French Literature.

Letter writing as a literary genre: correspondences and epistolary novels. The theoretical part deals with the birth of the epistolary novel, the various letter writing styles and types of letters. It explores the borders between letter writing and diary as well as the interaction between public and private spheres. Texts studied are epistolary novels and correspondences from the 18th century (beginning of the separation between private and public spheres), as well as extracts from 17th and 19th centuries correspondences.

FORMAT: Lecture and seminar

PREREQUISITE: FREN 2201.03/2202.03

FREN 3250.03: Écrivaines françaises/French Women writers.

This course will explore the condition of women as expressed in a selection of texts by French women writers. The choice of writers may vary from year to year, and the course may be organized around a theme or a particular time period.

Students taking this course as a Gender and Women's Studies course may write their essays and exams in English.

FORMAT: Lecture/discussion

PREREQUISITE: Recommended: FREN 2201.03/2202.03

CROSS-LISTING: GWST 3250.03

FREN 3260.03: Contes et légendes du monde francophone/Tales and Legends of the Francophone World.

Students in this course will become acquainted with a variety of French folk tales, fairy tales, legends, and "literary" short stories. Distinguishing between these sub-genres will be part of the focus of the course. The stories themselves will be drawn from a variety of periods and areas of the French-speaking world. They may include, among other sources of stories, fairy tales published by Perrault and by women writers of the 17th century, folk tales of the oral tradition collected in various parts of the francophone world, short stories by such modern writers as Balzac, Sand, Flaubert, Maupassant, Diop, Tournier, to mention only a few possibilities.

In addition to exams and traditional assignments requiring analysis, students will explore the oral tradition by learning to tell stories orally. Students will also write original stories and work on editing them and "publishing" them within the course.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2201.03/2202.03

FREN 3300.03: La littérature médiévale/ Medieval French Literature.

Textual analyses of selected works representing the major literary genres (epic, romance, theatre, poetry) from the chansons de geste to François Villon (most texts in modern French translations). The discussion of the origins and the development of a national French literature provides an introduction to critical approaches to literary texts.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2201.03/2202.03

FREN 3400.03: La littérature du seizième siècle/16th Century French Literature.

This course explores the awakening, flourishing and decline of the Renaissance period in literature and language through the works of Marot, Rabelais, Du Bellay, Ronsard, Montaigne and the poets of the baroque. The 16th century's concern with the French language provides a solid introduction to the study of the development of modern French.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2201.03/2202.03

FREN 3500.03: La littérature du dix-septième siècle/ 17th Century French Literature.

This course offers an introduction to seventeenth century French literature with a primary focus on representative works by three major dramatists: Corneille, Molière and Racine. It explores their vision of humanity and the world and assesses their contribution to French literature and the history of ideas.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2201.03/2202.03

FREN 3600.03: La littérature du dix-huitième siècle/ 18th Century French Literature.

An introduction to the literature of the 18th century which includes works by such authors as Voltaire, Rousseau, Diderot and Marivaux. Each year the readings and class discussions will be centred on a different theme (for example: the hero, women, love, wealth and power).

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2201.03/2202.03

FREN 3700.03: La littérature du dix-neuvième siècle/ 19th Century French Literature.

An introduction to the main literary movements of the 19th Century:

Romanticism, Realism, Symbolism. Focus is on representative authors and/or texts belonging to one or more of these trends.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2201.03/2202.03

FREN 3730.03: La bande dessinée franco-belge - The Franco-Belgian Comic Strip.

This course offers an analysis of the development of Franco-Belgian comics (bandes dessinées) from the post-war period to the present time, focusing on a number of major authors, magazines and publishers. Several theoretical approaches will be used including semiotics, sociocriticism and cultural studies.

FORMAT: Lecture/seminar

PREREQUISITE: FREN 2201.03, FREN 2202.03

FREN 3750.03: Littérature industrielle, roman populaire et roman de consommation/Popular Literature and the Rise of Mass Culture.

The second half of the XIXth century witnesses the development and increasing popularization of the novel as the pre-eminent form of literary expression, concurrently with a dramatic increase and diversification of the reading public. This course will explore the evolution of the novel during this period, with a particular emphasis on the appearance of serialized novels in magazines and newspapers (le feuilleton) and on the development of "genre" fiction and the concept of "popular" literature. Books or excerpts from several representative writers of the time (Alexandre Dumas père, Eugène Sue, Balzac, Frédéric Soulié, Paul Féval, Jules Verne) will be analysed and discussed, in the light of theoretical works on the development of modern mass culture (Umberto Eco, René Guise, Daniel Couégnas, Lise Queffélec).

FORMAT: Lecture/seminar

PREREQUISITE: FREN 2201.03/2202.03

FREN 3800.03: Théâtre et poésie du vingtième siècle/ French Theatre and Poetry of the 20th Century.

This course offers study of modern poetry from Dada and Surrealism to the work of contemporary poets such as Yves Bonnefoy, Jacques Dupin and Michel Deguy; and of modern theatre from Jarry to Beckett, Ionesco and beyond.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2201.03/2202.03

FREN 3810.03: Prose et théorie littéraire du 20e siècle/ 20th Century Prose and Literary Theory.

Analysis of a broad selection of short prose by major novelists of the 20th century from Gide, Proust and Aragon, but with emphasis upon the more recent work of Beckett, Sarraute, Simon, Duras, Le Clézio and Cixous. Parallel discussion will be centred upon the literary theory of critics such as Bachelard, Poulet, Starobinski, Barthes and Derrida.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2201.03/2202.03

FREN 3811.03: Introduction à la littérature francophone de l'Afrique subsaharienne et des Caraïbes/Introduction to African and Caribbean Francophone Literature.

This course focuses on the evolution of African and Caribbean literature from its origins to the present day. It prepares students for upper level courses in African and Caribbean literature, for example FREN 4811 (Francophone Poetry).

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2201/2202 or permission of instructor

FREN 3900.03: FREN 3901.03: La littérature canadienne-française/French-Canadian Literature.

In-depth study of a few major works of French-Canadian literature with emphasis on the period from 1945 to the present day. Approved with Canadian Studies.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2201.03/2202.03

CROSS-LISTING: CANA 3900.03/3901.03

FREN 3910.03: Études acadiennes/Acadian Studies.

Critical investigation into the historical, socio-cultural, linguistic and literary significance of past and present Acadian writing. Approved with Canadian Studies.

FORMAT: Lecture/discussion

PREREQUISITE: FREN 2201.03/2202.03

CROSS-LISTING: CANA 3910.03

FREN 3994.03: Independent Study.

This course is generally given in preparation for students studying abroad in the Winter term.

FREN 4001.03: Histoire du français - Moyen Âge/ History of French - The Middle Ages.

Advanced research into selected topics in Old and Middle French - manuscript studies such as paleography, historical phonetics, morphology and syntax, and the cultural-literary context of linguistic development.

FORMAT: Seminar

PREREQUISITE: 3000-level French course

FREN 4002.03: Histoire du français - époque moderne/History of French - The Modern Period.

Advanced research into selected topics - the emergence of a national language, the problem of orthography, usage and the development of normative grammars, the evolution of vocabulary, epochal phenomena (Rhétoriciens, the Baroque, Préciosité, the Revolution, scientific French, argot), etc.

FORMAT: Seminar

PREREQUISITE: 3000-level French course

FREN 4011.03: Lexicologie/Lexicology.

How can French vocabulary be studied and structured? What is its formation (derivation, composition, metaphor, borrowing, abbreviation, etc.), its meaning, its development? Class reports, discussions and lexical assignments are important components of this course.

FORMAT: Seminar

PREREQUISITE: FREN 3020.06 or FREN 2020.03 and 3021.03 or 3022.03, or instructor's permission

FREN 4013.03: Pragmatique/Pragmatics.

Introduction to the study of linguistic pragmatics: definitions, principles and methods. Analysis of the conditions of language use, with particular emphasis on the description of speech acts. Elements of literary pragmatics. Application exercises.

FORMAT: Lecture

PREREQUISITE: FREN 3020.06 or 2020.03 and 3021.03 or 3022.03, or instructor's permission

FREN 4014.03: Langue et société/ Language and Society.

A linguistic introduction to the analysis of the relationship between language and society. Typology of sociolinguistic situations. The phenomena of language contact, linguistic variation, norms. The relationship between groups in multi-lingual situations. Principal theoretical tendencies. Practical applications.

FORMAT: Lecture

PREREQUISITE: FREN 3020.06 or 2020.03 and 3021.03 or 3022.03 or instructor's permission

FREN 4016.06: Introduction to Applied Linguistics and Language Teaching.

Taught in English, this course provides students with a theoretical and practical introduction to issues in language teaching. It includes a survey of language teaching methods which focuses both on their theoretical underpinnings and their methodology. It will include some classic methods as Grammar-Translation as well as some fascinating but lesser known methods (Audio-lingual method, Silent Way, Suggestopedia, Community Language Learning). Significant class time will be devoted to current trends and conflicting views (for example, various

definitions of “communicative” approach, the proficiency movement). Class time will be devoted not only to learning about these approaches, but to experiencing them via peer micro-teaching.

N.B. This course is open to senior students (or graduate students) in all language departments. French majors or honours students may not count this course towards the minimum number of credits required for their French degree, but may take it as a supplementary elective course.

NOTE: All students enrolled in the course must do a practicum of two hours per week. Normally, this will be done as volunteer tutoring for Dalhousie ESL students.

FORMAT: Lecture

CROSS-LISTING: ENGL 3916.06

FREN 4017.03: Traduction générale/General Translation.

This course normally follows FREN 3045. Students taking this course will be familiarized with essential notions of translation theory, and will be introduced to professional translation practice. Emphasis will be placed on the translation of relatively short texts in a wide variety of subjects and fields, from English into French and from French into English. Assessment will be carried out through weekly assignments, as well as in-class exams.

FORMAT: Lecture

PREREQUISITE: FREN 3045.06 or instructor's permission

EXCLUSION: FREN 4015.06

FREN 4018.03: Outils et ressources électroniques d'aide à la rédaction, la traduction et la révision en français/Electronic tools and resources for French.

The aim of this course is to provide the student with a wide range of electronic tools and resources useful to text writing, translation and editing activities in French. The student will learn how to use these electronic tools and resources, and in particular, some of the techniques associated with them. Tools demonstrated will include grammar checkers, machine (aided) translators, concordancers and speech synthesizers/recognizers. Resources presented will consist of on-line terminology banks, dictionaries, thesauri and grammars, etc.

FORMAT: Lecture/lab

PREREQUISITE: FREN 3045X/Y.06 or equivalent or instructor's permission

FREN 4046.03: Composition avancée/Advanced Composition.

This course normally follows FREN 3045. Students in this course will hone their writing skills by learning principles of good writing and putting them into practice via writing, editing and revising texts of various kinds. They will learn the conventions that characterize good academic writing in French. They will also create some professional documents, including a French curriculum vitae and job application letter. Students may also do some less formal writing, including descriptions or narratives.

FORMAT: Lecture

PREREQUISITE: FREN 3045.06 or instructor's permission

EXCLUSION: FREN 4045.06

FREN 4300.03: Le roman courtois/Courtly Novels.

A close literary analysis of medieval French Arthurian romances. Texts in bilingual (Old French/French) editions.

FORMAT: Seminar

PREREQUISITE: 3000-level French literature course

FREN 4301.03: La poésie courtoise/Courtly Poetry.

A stylistic and socio-cultural study of French courtly love poetry from the 9th to the 15th centuries. Early texts in modern French translations.

FORMAT: Seminar

PREREQUISITE: 3000-level French literature course

FREN 4401.03: La pensée philosophique, politique et morale de la renaissance/Philosophical, Political and Moral Thought of the Renaissance.

An in-depth study of major currents of Renaissance thought: humanism, scientific awakening, the beginning of 'littérature engagée,' and the emergence of the moralistes and philosophes.

FORMAT: Seminar

PREREQUISITE: 3000-level French literature course

FREN 4500.03: L'aventure intellectuelle du grand siècle/The Intellectual Adventure of 17th-Century France.

This course examines, at an advanced level, a major writer, movement, genre or theme in 17th-century French literature. As the focus of the course may vary frequently, please consult the professor for detailed information on the topic and format.

FORMAT: Seminar

PREREQUISITE: 3000-level French literature course

FREN 4550.03: La femme de lettres au Grand Siècle/ Literary Women of French Classicism.

In this course, we will explore: aspects of the intellectual and social context particularly relevant to a study of literary women in seventeenth-century France (for example: social structures and norms, la préciosité, the salons, the libertinage of Ninon de Lenclos, women's contributions as patrons of the arts); a representative selection of works, from several literary genres, written by seventeenth-century women (for example: novels by Mme de La Fayette and/or Mlle de Scudéry, Mme de Sévigné's letters, Mme d'Aulnoy's contes, Mme de Sablé's maxims); examples of literature written by men which counters the ambient misogyny of the period (for example: Molière's *L'École des femmes* and La Bruyère's *Caractères*).

FORMAT: Lecture/discussion/group activities

PREREQUISITE: 3000-level French literature course or instructor's permission

CROSS-LISTING: GWST 4550.03

FREN 4600.03: Le siècle des lumières: forme et philosophie/The Enlightenment: Form and Philosophy.

An in-depth study of the French Enlightenment which treats some of the longer works by major authors and introduces the student to secondary authors whose works are also of significant literary, philosophical or historical value. The study is unified by an examination of recurring philosophical ideas and literary themes important to understanding the development of new genres and styles. Please consult the professor for information on the theme treated and the works to be studied in any given semester.

FORMAT: Seminar

PREREQUISITE: 3000-level French literature course

FREN 4700.03: La révolution romantique/The Romantic Revolution.

Romanticism is viewed primarily as a rebellious and creative force which greatly contributed to the reshaping of traditional society. The origins, main themes and trends of the movement are studied with an attempt to show Romanticism as a European movement, the impact of which was felt in fields beyond the boundaries of literature. Classes are conducted as seminars. The choice of texts depends largely on the students' previous experience: they include works by Mme de Staël, Chateaubriand, Lamartine, Hugo, Vigny, G. Sand and others.

FORMAT: Seminar

PREREQUISITE: 3000-level French literature course

FREN 4701.03: Le roman du dix-neuvième siècle/ The Nineteenth-Century Novel.

Intensive study of the work of a major novelist of the 19th century: e.g. Stendhal, Flaubert, Balzac, Zola, Sand; a study of his/her place in the development of the novel and of his/her contribution to the genre.

FORMAT: Seminar

PREREQUISITE: 3000-level French literature course

FREN 4710.03: Du symbolisme au surréalisme/ From Symbolism to Surrealism.

Analysis of the evolution of French literature from the various symbolist manners of Verlaine, Rimbaud, Mallarmé, Lautréamont and Laforgue, through the period of Jarry and Dada, to the aspirations and paradoxes of Surrealism viewed, principally, through the work of Breton, Eluard, Aragon and Desnos.

FORMAT: Seminar

PREREQUISITE: 3000-level French literature course

FREN 4801.03: Le Nouveau Roman/Anti-novels of the 20th Century.

In this course we are mainly interested in fictional techniques: how the author creates his illusion. Each of the works selected for detailed study is important due to the author's rejection of conventional ideas regarding the form of the novel.

FORMAT: Seminar

PREREQUISITE: 3000-level French literature course

FREN 4811.03: La poésie francophone de Perse et Char à Senghor et Césaire/Francophone Poetry from Perse and Char to Senghor and Césaire.

Discussion of the works of five or six major francophone poets of the modern period, chosen from: Perse, Reverdy, Claudel, Char, Frénaud, Senghor, Tchicaya, Césaire, Glissant, Miron and others.

FORMAT: Seminar

PREREQUISITE: 3000-level French literature course

FREN 4902.03: FREN 4903.03: Écrivains québécois contemporains/Contemporary Québec Writers.

In depth study of one or more contemporary Québec writers. Approved with Canadian Studies.

FORMAT: Seminar

PREREQUISITE: 3000-level French literature course

FREN 4904.03: Écrivaines québécoises/ Québec Women Writers.

This course will explore the condition of women as revealed in texts by Québec women writers. In any given year different writers and time periods will be covered, and a variety of genres may be included. Approved with Canadian Studies.

FORMAT: Lectures/discussion

PREREQUISITE: 3000-level French literature course, preferably French Canadian

CROSS-LISTING: GWST 4250.03

FREN 4933X/Y.00: Séminaire "de spécialisation"/ Honours Seminar, Honours Essay.

The honours seminar is a compulsory preliminary to the honours essay or oral presentation and is given as a fall term course for honours students in their graduating year writing their Honours Essay in French. The seminar prepares students to write the honours essay, beginning with a detailed outline of the work. It provides instruction, advice, and guidance on all the essential steps for producing the honours essay, from selecting and researching a topic, through planning and drafting the text, to matters of form and style. Students continue the work begun in the seminar by working individually with a supervisor during the winter term.

FORMAT: Seminar

PREREQUISITE: Only open to students in graduating year of French Honours program.

FREN 4994.03: FREN 4995.03, FREN 4996.03/FREN 4997.03, FREN 4998.03/FREN 4999.03: Recherches indépendantes/Independent Research.

May only be taken with the approval of the Chair or the Undergraduate Advisor.

FORMAT: Independent study/seminar

PREREQUISITE: 3000-level French literature or linguistics course

I. Introduction

Gender and Women's Studies is a dynamic and rapidly expanding interdisciplinary area of study. An alternative to the traditional curriculum, Gender and Women's Studies provides students with the opportunity to examine history, social structures, the sciences, language, literature, and culture from critical and illuminating perspectives.

At Dalhousie, students can currently enter the following programs in Gender and Women's Studies: a Minor, a Major, a Double Major, or a Combined Honours program. These programs include courses in the disciplines of Economics, English, History, Music, Philosophy, Political Science, Sociology and Social

Anthropology, and Theatre, and in interdisciplinary and professional fields, including Contemporary Studies, International Development, Law, and Nursing.

Students in the Dalhousie Gender and Women's Studies programs develop a critical understanding of gender as a category of analysis in scholarly enquiry, social dynamics, cultural expression, and belief systems. They also investigate the ways in which gender intersects with other variables such as race, class, and cultural difference. They study women's contributions to civilization in many fields of knowledge, and examine the social and ideological forces that have made these contributions "invisible" in the past. Through exposure to a large and growing body of research in a number of disciplines and fields, Gender and Women's Studies Majors gain a grounding in the methodologies and concepts shaping the organization and dissemination of knowledge.

Our courses also provide students with opportunities of uniting theory with social and cultural practice, addressing contemporary issues that individuals and institutions are grappling within today's changing world order. They provide a context in which women can find strength and insight through exchanging experiences and ideas with other women, and a context in which women and men together can further human understanding and equality through exploring and respecting differences.

Do men take Gender and Women's Studies courses? Yes. Gender has operated as a fundamental category in the organization of knowledge, social systems, forms of representation and modes of production and consumption. The critical examination of gender is relevant to both men and women.

II. Degree Programs

Gender and Women's Studies programs provide preparation for careers in a variety of fields, as well as for professional schools or graduate programs. For example, graduates can work as consultants, policy analysts, and officers in government and para-governmental organizations, in business and industry, and in educational institutions. The fields they enter include employment equity, public administration, international development, health care, work place conditions, personnel relations, publishing and editorial work, and public relations.

For students interested in a preparatory degree, Gender and Women's Studies programs provide appropriate preparation for professional schools and programs in the fields of education, social work, counselling, journalism, the health professions, and certain areas of law. They also provide suitable preparation for graduate programs in Women's Studies, Gender Studies, Interdisciplinary Studies, Cultural Studies, and studies in Social Justice. Students interested in proceeding to graduate work should enter a four-year degree program.

Students may enter Gender and Women's Studies programs in the first, second, or third year of study. In many cases, students in second or third years may already have acquired some Gender and Women's Studies credits through taking courses in the traditional disciplines or in other interdisciplinary programs that are cross-listed with Gender and Women's Studies core courses.

Students can currently enter four programs in Gender and Women's Studies: a BA with Combined Honours, a 20 credit BA with Major in Gender and Women's Studies, a 20 credit BA with Double Major in Gender and Women's Studies with a traditional discipline or with another interdisciplinary program such as International Development Studies, Sustainability, Canadian Studies, or Contemporary Studies; and a 15 credit BA with Minor in Gender and Women's Studies.

NOTE: In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, [page 125](#) of this calendar.

A. Minor in Gender and Women's Studies

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

B. BA (20 credit) Major in Gender and Women's Studies

Four year, 20 credit program

This program provides a more comprehensive grounding in Gender and Women's Studies than the BA (15 credit) minor in Gender and Women's Studies. Students interested in applying to graduate programs should enter a four year degree program.

Departmental Requirements

- At least six and no more than nine credits beyond the 1000 level in Gender and Women's Studies of which at least three must be beyond the 2000 level
- At least three different disciplines shall be represented in a student's selection of cross-listed Gender and Women's Studies courses

C. BA (20 credit) Double Major

Four year, 20 credit program

Students can combine Gender and Women's Studies courses with courses either in a traditional discipline or with another interdisciplinary program such as International Development Studies, Canadian Studies, or Contemporary Studies.

Departmental Requirements

- At least 10 and no more than 14 credits beyond the 1000 level in two allied subjects, one of which is Gender and Women's Studies, with no more than eight and no fewer than five in either
- At least two credits in each of the two subjects chosen shall be beyond the 2000 level
- At least three different disciplines shall be represented in a student's selection of cross-listed Gender and Women's Studies courses.

D. BA with Combined Honours

Four year, 20 credit program

Students can enter a BA with Combined Honours program in Gender and Women's Studies and a range of other subjects including Biology, Classics, Contemporary Studies, English, Environment, French, History, International Development Studies, Philosophy, Political Science, Psychology, Sociology, Social Anthropology, Sustainability, and Theatre. Students interested in any of these combinations or any other that involves Gender and Women's Studies and another subject should consult with the Departments concerned.

General Degree Requirements

Please read the detailed description of BA with Combined Honours Program in the Degree Requirements section of this calendar. A minimum of 11 and maximum of 14 credits is required in the honours subjects beyond the 1000 level, with no fewer than five and no more than eight credits in each subject.

PLEASE NOTE: Where a course selected from the Gender and Women's Studies "list" in the BA with Combined Honours program is cross-listed with a course in the allied subject, the course may not be double counted (ie. it may be counted on one or other list, but not on both). Where a course selected for the Gender and Women's Studies "list" in the BA with Combined Honours program is cross-listed with a course in the allied subject, this should not result in a student exceeding the maximum allowed in either of the allied subjects and may be counted for one subject or the other.

Departmental Requirements

In addition to meeting the Degree Requirements set out by the Faculty, Gender and Women's Studies students must meet the following requirements:

1. At least three Gender and Women's Studies courses must be taken beyond the 2000 level.
2. At least three different disciplines must be represented in a student's selection of Gender and Women's Studies courses (in disciplines other than the allied subject).
3. The following courses are required:
 - a) At least one full credit from the following: GWST 2066.03, 2300.03, 2301.03, 2500.03, 2800.06 (Normally this requirement should be met in the second year of the program.)
 - b) At least one full credit 4000 level Gender and Women's Studies course, either Directed Readings, Special Topics, or cross-listed courses (Normally this requirement should be met in the fourth year of the program.)
 - c) To meet the Honours Examination requirement when Gender and Women's Studies is the major subject, students will prepare a research paper under the supervision of a Gender and Women's Studies faculty member and will take GWST 4900X/Y.03.

III. Course Descriptions

NOTE: Some courses may not be offered every year. Please consult the current timetable to determine if these courses are offered. More detailed information can be obtained from the Gender and Women's Studies office.

In addition to the courses listed below, appropriate courses in other departments (for example, Special Topics courses on women and/or gender issues) may be taken as Gender and Women Studies credits, with the permission of the Instructor concerned and the Coordinator. Students may also select Gender and Women's Studies courses at Saint Mary's or Mount Saint Vincent Universities, subject to the rules and regulations of the College of Arts and Science at Dalhousie regarding transfer credits and in consultation with the Gender and Women's Studies Coordinator.

GWST 1010.03: Introduction to Gender and Women's Studies.

Gender and Women's Studies is an interdisciplinary field aimed at developing a critical understanding of gender as a category of analysis in scholarly enquiry and social dynamics. Paying close attention to the experiences and perspectives of women, students have the opportunity to examine history, social structures, the sciences, language, literature, culture from the illuminating perspective of gender. In all these areas, Gender and Women's Studies investigates how gender intersects with other variables such as race, class, and cultural difference. This introductory course provides an overview of some of the central topics of Gender and Women's Studies, such as the sex/gender distinction, understanding sexualities, the social construction of motherhood, changing definitions of manliness and womanliness, and the place of sex and gender in the legal system.

FORMAT: Lecture/discussion

GWST 1015.03: Gender and Diversity.

This course continues from "Introduction to Gender and Women's Studies" to focus particularly on the many ways that gender as a social system interacts with other systems of power and inequality. We all make sense of our lives through multiple identities that combine in shifting ways to define our opportunities for action and the limits we face. Identities based on gender, race, ethnicity, age, class, sexuality, disability, nation, or religion are blended in varied ways for individuals, but they are not just individual self-perceptions. They are also elements of larger social systems. Topics may include the multiple identities of the body; race, gender, and violence; diversity and work; contemporary transformations of the family; and gender and globalization.

FORMAT: Lecture/discussion

GWST 2000.03: Directed Readings in Gender and Women's Studies.

Readings and research in Gender and Women's Studies on selected topics. In exceptional circumstances, and with the permission of both the Gender and Women's Studies Coordinator and the Instructor concerned, students may arrange to take appropriate courses for credit in Gender and Women's Studies that are not otherwise available as one term courses in Gender and Women's Studies. To find out how to register in one of these courses, please see <http://www.dal.ca/gwst>

FORMAT: Variable

PREREQUISITE: Variable

GWST 2066.03: Women, Gender and Music.

This course explores the variety of ways in which gender shapes musical discourse. The role of gender in music will be examined through three broad topics: the history of female contributions to music as musicians, composers, patrons and listeners; musical constructions of gender, race, class and sexuality; and feminist criticism in recent musical discourse. No formal training in music is required.

FORMAT: Lecture/discussion

CROSS-LISTING: MUSC 3066.03

GWST 2217.03: Women and the Economy.

This course will provide a broad and relatively non-technical analysis of women's economic experiences. For example, we will study questions such as: Are there feminists who are economists? Have economic conditions improved for women in Canada over the past 30 years? How do economic outcomes for women in Canada compare with those in other affluent countries? Is there a glass ceiling for women in the workplace? Is there gender discrimination in the Canadian labour market? Who does the unpaid work? What are the economic consequences of divorce? Are women more likely than men to be poor? Are there inequalities within families?

FORMAT: Lecture

PREREQUISITE: ECON 1101.03/1102.03 with a grade of C- or better

CROSS-LISTING: ECON 2217.03

GWST 2300.03: Making Gender: Women and Men, Sex and Gender in Pre-Modern Europe.

This course examines the diverse and fascinating ways western cultures have shaped what it meant to be a woman or a man. Beginning in the time of the Roman Empire and continuing to the age of the French Revolution, the course examines such topics as eunuchs, fasting saints, female 'popes', changing notions of the physical differences between the sexes, and early struggles for women's rights.

FORMAT: Lecture/tutorial

CROSS-LISTING: HIST 2614.03

GWST 2301.03: Making Gender: Male and Female from the American Revolution to the Present.

This course examines the diverse and fascinating ways western cultures have shaped the meanings of gender. The history of women informs us about the once little-known history of femininity. And, as a result, historical changes in definitions of masculinity become visible. The meanings of gender are explored in this course through topics such as: the doctrine of separate spheres, respectability, the family wage, the homosexual, imperialism, citizenship, welfare dependency, and infertility.

FORMAT: Lecture/tutorial

CROSS-LISTING: HIST 2615.03

GWST 2310.03: Women and Gender in Early Modern Science.

This course will explore the roles of women, and questions about women's nature, in the development of early modern science. The course will consider several interrelated aspects of scientific culture in the sixteenth, seventeenth, and eighteenth centuries: first, we will look at the place of women in the scientific institutions of the time. Although women were, for the most part, excluded from universities and scientific academies, some women were able to do scientific work through their participation in salons and craft guilds. The second part of the course will look at the contributions of some particular women to the fields of physics, astronomy, botany, and medicine. We will then examine how science interpreted sex and gender. We will pay special attention to the biological sciences and their treatments of sex differences, conception, and generation. We will consider how these biological theories were influenced by, and at the same time used to uphold, various political and social structures. Finally, the course will explore the ways in which gender and nature were portrayed in the broader cultural context. We will, for example, discuss the ways in which women were depicted as scientists and as symbols of science in art and literature.

CROSS-LISTING: EMSP 2310.03, HSTC 2310.03

GWST 2320.03: Witchcraft in Early Modern Europe.

The period of European history from 1500 to 1800 saw the rise of modern science and philosophy. It was also a period in which thousands of witch trials and executions were carried out. This course will seek to understand how these seemingly contradictory developments could have occurred simultaneously. The course will examine changing conceptions of the witch and witchcraft in their historical, intellectual, cultural, religious and political contexts. The course will pay special attention to early modern notions of gender and sexuality and their influence on the witch hunts and witch trials.

FORMAT: Lecture/seminar

CROSS-LISTING: EMSP 2320.03, RELS 2420.03

GWST 2412.03: Human Sexuality.

This course is concerned with biological, cultural, ethical, historical, psychological, religious and semantic aspects of human sexuality. Four themes are threaded throughout the course - diversity in gender roles and in sexual attitudes, behaviours and customs; critical thinking; making responsible decisions; sexual health. The course is designed to support positive integration of sexuality into the lives of individuals and to foster the prevention of sexuality-related problems, at all stages of life.

FORMAT: Lecture/discussion 3 hours

CROSS-LISTING: HPRO 4412.03

GWST 2500.03: Philosophical Issues of Feminism.

An exploration and examination of some of the concepts, issues, and arguments underlying feminist claims and perspectives. Such topics as pornography, rape, mothering, the nature of gender, and feminism's responses to racism will be considered.

FORMAT: Lecture/discussion

CROSS-LISTING: PHIL 2160.03

GWST 2800X/Y.06: Comparative Perspectives on Gender.

This course examines gender in a global perspective. Drawing upon historical and current anthropological and sociological theory the course provides a theoretically based understanding of how gender differences are culturally produced, as well as socially, economically, politically, and spatially organized. The course begins by examining the extent to which gender experiences in society are taken for granted, perceived to be based in nature rather than culture. Topics in the first half of the course include evolutionary and materialist perspectives, feminism, and equality, the domestic sphere and the division of labour, masculinities, sexuality and the state. Readings are broad and include ethnographic accounts of the various ways that gender is experienced around the world. The second half of the course examines power relations and political discourse, work and parenthood, the politics of reproduction, gender and violence, development and the global economy, and gender and belief systems. By examining some of the contemporary struggles of both women and men cross-culturally, the course is designed to help students understand the undeniable breadth of gendered experiences and issues therein.

NOTE: Students taking this class must register in X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06, 1200X/Y.06; or Gender and Women's Studies class

CROSS-LISTING: SOSA 2190X/Y.06

GWST 3000.03/3001.03/3002X/Y.06: Directed Readings in Gender and Women's Studies.

Readings and research in Gender and Women's Studies on selected topics. Students may take appropriate courses in other Departments under these numbers, with the permission of the instructor and the Gender and Women's Studies Coordinator, or they may construct their own reading list and research project in consultation with an appropriate faculty member and the Coordinator. To find out how to register in one of these courses, please see <http://www.dal.ca/gwst>

NOTE: Students taking GWST 3002X/Y.06 must register in X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Variable

PREREQUISITE: Variable

GWST 3006.03: Comparative Perspectives on Gender and Work.

This course will use comparative perspectives to explore a range of topics relating to the gendering of work: wage-work, household-based labour, the informal sector, masculinity and femininity in the work place, occupational segregation, employment policies directed at changing the status quo (such as affirmative action, pay equity), and unionization. The context will be the changing global political economy and its consequences for the strategies of different groups (such as nation states, but also trade unions, feminist groups and employer groups).

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSS-LISTING: SOSA 3006.03

EXCLUSION: SOSA 2140.03, SOSA 2141.03

GWST 3050.03: Contemporary Women Poets.

Reading women's poetry in local and global contexts, this course will address the emergent practices of contemporary poetics in Canada and the United States. The majority of our readings will consist of book-length works of poetry—that is, longer texts that transgress the limits of the lyric and collections of shorter poems linked by various formal, narrative, and thematic continuities. These texts represent some of the key innovations and formations of women's poetics and poetics from the end of the twentieth to the beginning of the twenty-first centuries.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000.06

CROSS-LISTING: ENGL 3250.03

GWST 3150.03: Sociology and Anthropology of the Body.

This course will consist of a micro-sociological examination of the human body as a socio-cultural construction. Topics include: bodily self image, cultural definitions of physical attractiveness, stigmatization, proxemic behaviour, non-verbal communications, body hygiene and pollution taboos, and cultural aspects

of human reproduction and sexuality. Special attention will be paid to class, gender and ethnicity and their relationship to body politics.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSS-LISTING: SOSA 3150

GWST 3168.03: Issues in Latin American Society.

This course introduces students to case studies on contemporary Latin America. The goal of the course is to familiarize students with key social and cultural issues in the region. The focus of the course will change from year to year, and may include a particular country or region, or a theme or topic. Students should contact the Gender and Women's Studies department/co-ordinator for details on the specific theme of the course in a given year. This course will only be offered as a Gender and Women's Studies course in years when the topic is gender-related.

FORMAT: Lecture

CROSS-LISTING: SOSA 3168.03

GWST 3215.03: Feminism and Science.

Science has been the subject of intense scrutiny by contemporary feminist theorists. The course will examine the various feminist critiques of natural science, as well as the positive proposals that feminism has brought to science and scientific culture. Questions that will be addressed include: Is the style of science gendered? Has feminism influenced the content of various sciences? How has science contributed to gendered constructions of nature? Is there such a thing as value-free scientific research? How do feminist theories of knowledge differ from traditional understandings of scientific knowledge and scientific objectivity? The readings for this course will include work by Donna Haraway, Sandra Harding, Evelyn Fox Keller, Helen Longino, and Hilary Rose.

FORMAT: Seminar

PREREQUISITE: Second year and above.

CROSS-LISTING: CTMP 3215.03, HSTC 3411.03

GWST 3300.03: Family and Community in North America 1600-1900.

The family in North American society from, when the family was a model for social relations to the time when it was idealized as a private refuge. Among the topics considered are the role of the family in rural and urban communities; the demographic transition from high fertility and mortality; the reduction of the family's economic and educational autonomy; the role of ideology in shaping sex roles and child rearing; and the relations of family and community according to ethnic group, class and economic setting.

RECOMMENDED: A course in the Sociology or Social Anthropology of the family.

FORMAT: Lecture/discussion

CROSS-LISTING: HIST 3350.03

GWST 3304.03: Through her Eyes: Women and the Documentary Tradition.

This course will explore the rarely examined historical and contemporary involvement of women in the field of documentary filmmaking. Women documentary makers have produced extensive bodies of engaging work that challenge many societal assumptions about gender, class, race, the function of political power, sexuality and peace-war. They have worked at every level within the process: as directors, cinematographers, editors, sound recordists, producers, writers and fund-raisers. A variety of documentaries made by women from diverse backgrounds will be screened and analyzed along with a close reading of selected critical texts. Students will identify the similarities and differences in subjects, themes, style, aesthetics, and approached to creation, production and distribution.

FORMAT: Film Screening and Seminar

CROSS-LISTING: CTMP 3304.03

GWST 3331.03: Film Theory II: Desire in Cinema.

This course focuses on theories of gender, sexuality and desire in the cinema. It addresses debates around the representation of gender, sexuality and desire on screen, as well as theorizations of spectatorial desire.

FORMAT: Lecture/discussion

PREREQUISITE: One of the Film Studies courses (or other exposure to the discipline)

CROSS-LISTING: THEA 3331.03

GWST 3350.03: Rewriting Gender.

Against a widespread view that postmodernism is inimical to feminism, the readings in this course demonstrate that recent literature by women, both fiction and critical theory, has widely adopted postmodern strategies in order to advance feminist views. The postmodern canon has allowed female authors to question the way in which woman's subjectivity has always been constructed through male-oriented processes of signification. The works of fiction covered in this course, by Kathy Acker, Angela Carter, Marianna Hauser, Octavia Butler, and others, exemplify aesthetic subversions of phallogocentric discourses. Literary texts will be supplemented with theoretical works by leading feminist/post-structuralist thinkers such as Judith Butler, Drucilla Cornell, Diane Elam, and Gayatri Spivak. The course includes video-taped material and slide-shows of postmodern feminist art.

FORMAT: Seminar

CROSS-LISTING: CTMP 3350.03

GWST 3358.03: Slavery, Gender, and Power: Women in Nineteenth Century America.

This course studies the tangled histories of slavery and gender in nineteenth century America. Principal topics include the lives of female slaves, the cult of domesticity, the rise of early feminism, the role of women in the destruction of slavery, and the tension between gender and race.

FORMAT: Seminar

CROSS-LISTING: HIST 3358.03

GWST 3426.03: Sex and the State.

This course will consider the role of the state and other institutions in the social, moral and legal production and regulation of sex and gender, particularly in Western countries. It will begin with a brief historical overview of the role of religious prescriptions in the social and legal regulation of sex, and in the refinement of laws and policies that have been implicated in sex- and gender-based discrimination. We will also address a range of contemporary topics such as the decriminalization of homosexuality; hate crimes against sexual minorities; the politics of relationship recognition; state response to HIV/AIDS; gender-related refugee claims; and developments in the regulation of reproductive technologies.

FORMAT: Seminar

PREREQUISITE: POLI 1010, 1015, 1030, 1035, 1050, 1055, 1100, 1103, 2210, 2230 2350, 2410, 2420, 2430, 2440, 2450, or permission from the instructor

CROSS-LISTING: POLI 3426.03

GWST 3500.03: Contemporary Feminist Theories.

Contemporary feminism is not a single theory but comprises multiple theoretical perspectives, reflecting both a diversity in women's experience of subordination and a diversity of interests and approaches. This course aims to present some of the richness and variety in feminist theory while offering students the opportunity for sustained critical engagement with influential feminist thinkers.

FORMAT: Seminar

PREREQUISITE: At least two previous classes in Gender and Women's Studies, or at least two previous classes in Philosophy, or permission of the instructor.

CROSS-LISTING: PHIL 3170.03, PHIL 5170.03, GWST 5170.03

GWST 3600.03: Sexualization of Western Political Thought.

Representations of women and constructs of femininity are a significant part of mainstream western political thought. This course explores these topics in the work of leading western philosophers, such as Aristotle, Aquinas, Hobbes, Locke and Rousseau, with attention to understanding the relation of ideas of sexual difference to general systems of thought. The course also considers how conceptions of gender difference and equality shape contemporary political, legal and philosophical discourses and practices, including in feminist critical theory and international human rights scholarship and activism. We will consider the arguments and strategies used by men and women in the past century to address systemic discrimination and advance gender equality.

FORMAT: Seminar

PREREQUISITE: POLI 1010, 1015, 1030, 1035, 1050, 1055, 1100, 1103, GWST 1010, 1015, 2000, 2053, 2066, 2200, 2217, 2300, 2301, 2310, 2320, 2500, 2800, permission from the instructor.

CROSS-LISTING: POLI 3427.03

GWST 3800.03: Gender and Health.

This course aims to reflect upon and challenge our taken-for-granted assumptions about the gendered dimensions of health and healthcare. Rather than take the categories of 'women's health' and 'men's health' as its foundation, the course revolves around two main questions: (1) how does the field of health and

healthcare define and enforce the very categories of 'women' and 'men'?; (2) how does gender, thus defined and enforced, affect the health, healthcare, and health work of those defined as men, women, or other? We will consider these questions by examining particular health topics that have a strongly gendered component, such as sexual health, reproductive health, and disability. Throughout the course, we will explore the theoretical perspectives used in the field; the two-sex model and challenges to it; the gendering of particular health problems and health professions; the medicalization of womanhood and, more recently, manhood; and the relationships between gender and other forms of social classification (e.g. race, class, sexual orientation).

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSS-LISTING: SOSA 3145.03

GWST 3810.03: Women and Aging.

As women grow older the experience of aging is generally more difficult for them than for men. Somewhere in the forties, anxieties about the aging process exacerbate the difficulties facing women in modern society. Disempowering older women is usually accomplished in small increments. "Old woman" is a pejorative label; the older a woman becomes, the less credibility she generally has; this is especially true for women of color, poor women, lesbians, and women who are physically challenged. While aging is a biological phenomenon, ageism is socially constructed. Specifically, under patriarchy, older women are seen as a burden, desexualized and segregated by both men and younger women. They are usually not taken very seriously, nor seen as a threat. This course will explore the issues related to social, psychological, political and economic factors that are major determinants to the well-being of aging women based upon race, gender, sexual orientation, disabilities and class inequities.

FORMAT: Lecture/discussion/seminar

PREREQUISITE: SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, or 2 credits in Women's Studies

CROSS-LISTING: SOSA 3245.03, NURS 4370/5850.03

GWST 3911.03: Gender in Theatre: A Cross-Cultural Survey.

This seminar course examines the roles gender has played in the shaping of world theatre alongside the roles the theatre has played in the shaping of various cultural conceptions of gender. By exploring plays and performances from Europe, North America, China, Japan, India, Iran and/or other traditions, we will strive to understand the ways in which various forms of representation reflect their cultures' governing images of masculinity and femininity. In the process, we will interrogate the historical and cultural variability of the notion of 'gender' itself. The main objective of the seminar will be to ask how gender determines performers' choices in various cultures, and to see how gender itself can actually be shaped by performance.

FORMAT: Lecture/seminar; 3 hours

PREREQUISITE: None, although a background in Gender and Women's Studies, Theatre or Dramatic Literature will be an asset.

CROSS-LISTING: THEA 3911.03

GWST 3912.03: Gender Theory and Contemporary Performance.

This seminar course offers students an opportunity to encounter some of the most provocative and challenging gender theory of recent years in relation to contemporary theatre, film and performance art. Students will read considerations of the relationship between gender, performance and identity by such authors as Jacques Lacan, Michel Foucault, Hélène Cixous, Luce Irigaray, Julia Kristeva, Judith Butler, Peggy Phelan and Camille Paglia, among others. Alongside these works, we will examine contemporary performances, from the popular to the oppositional. Through this intertextual exploration of theory and performance, we will aim to expand our understanding of the ways in which gender roles are created, maintained, questioned and changed in contemporary culture(s).

FORMAT: Lecture/seminar (3 hours plus bi-weekly screenings)

CROSS-LISTING: THEA 3912.03

GWST 4000.03: 4100.03/4200X/Y.06: Directed Readings in Gender and Women's Studies.

Advanced readings and research in Gender and Women's Studies on selected topics. Students may take appropriate courses in other Departments under these numbers, with the permission of the Instructor and the Gender and Women's Studies Coordinator, or they may construct their own reading list and research project in consultation with an appropriate faculty member, and the Coordinator. To find out how to register in one of these courses, please see genderandwomenstudies.artsandsocialsciences.dal.ca/

NOTE: Students taking GWST 4200X/Y.06 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Variable

PREREQUISITE: Variable

RESTRICTION: Restricted to senior students

GWST 4116.03: Contemporary Issues in Gender and Development.

The course critically examines how development processes affect women and men and gender relations. Many development projects and policies have had a negative impact on women. The course provides a theoretical and conceptual grounding in gender/women and/in development, explores the gendered impact of policies and processes and examines issues such as governance, HIV/AIDS, and conflict.

FORMAT: Seminar

PREREQUISITE: INTD 2001.03

CROSS-LISTING: INTD 3116.03

GWST 4150.03: Special Topics in Gender and Women's Studies I.

In this seminar course, students will explore some of the current research on a focused topic in Gender and Women's Studies or gender theory. Topics may be drawn from such areas as queer theory, gender and embodiment, contemporary theory of sexuality, representations of gender, women and eating disorders, postcolonial feminist theory, and so on. The course will be directed to majors and honours students in Gender and Women's Studies, but will be open to qualified students from other disciplines.

FORMAT: Seminar

PREREQUISITE: One full credit in Gender and Women's Studies or permission of instructor

GWST 4151.03: Special Topics in Gender and Women's Studies 2.

In this seminar course, students will explore some of the current research on a focused topic in women's studies or gender theory. Topics may be drawing from such areas as queer theory, gender and embodiment, contemporary theory of sexuality, representations of gender, women and eating disorders, postcolonial feminist theory, and so on. The course will be directed to majors and honours students in Gender and Women's studies but will be open to qualified students from other disciplines.

FORMAT: Seminar

PREREQUISITE: One full credit in Gender and Women's Studies or permission of instructor

GWST 4200X/Y.06: Directed Readings in Gender and Women's Studies.

Readings and research in Gender and Women's Studies on selected topics. Students may take appropriate courses in other Departments under these numbers, with the permission of the instructor and the Gender and Women's Studies Coordinator, or they may construct their own reading list and research project in consultation with an appropriate faculty member and the Coordinator.

NOTE: Students must register in X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Variable

PREREQUISITE: Variable

GWST 4300.03: Introduction to Women and the Law.

The course begins with a focus on feminist legal theory, and the integration of feminism with issues of race, class, sexual orientation, and disability. The second major focus is on equality rights in Canada, from the early cases to current concepts of equality under the Charter. The course then considers the impact of feminist legal theories on particular areas of the law. This is followed by student class presentations on major paper topics.

FORMAT: Seminar

PREREQUISITE: This class is open to all 2nd and 3rd year Law students and all students eligible to take classes from the classes listed as Gender and Women's Studies core classes. However, this is a seminar class and is limited to a total of 18 students from Law and Gender and Women's Studies combined. Therefore, available spaces may be limited.

CROSS-LISTING: LAWS 2152.03

GWST 4315.03: Women's Suffrage From The French Revolution To World War I.

The question of women's participation in representative government first emerged during the French Revolution but by 1914, only two European countries had granted women the right to vote. This seminar explores the suffrage movement in the nineteenth century and the obstacles in the process of women's enfranchisement.

FORMAT: Seminar

PREREQUISITE: A modern European history course above the introductory level

CROSS-LISTING: HIST 4613.03

GWST 4330.03: Topics in the History of Sexuality.

This seminar is intended for senior undergraduates. The specific content of the course varies from year to year, with a general focus on comparative, historiographic and theoretical issues relating to the history of sexuality. Topics may include: the rise and fall of schools of sexology as embodied by Ellis, Freud and Kinsey; sexual violence and harassment; the commodification of sexuality; the history of the body; sexuality and colonialism; gay and lesbian subcultures; and the intersection of class, race and gender in sexual experiences, discourses and communities.

FORMAT: Seminar

PREREQUISITE: HIST 2614.03, GWST 2300.03, HIST 2615.03, GWST

2301.03, HIST 3350.03, GWST 3300.03, HIST 3013.03 or GWST 3013.03

CROSS-LISTING: HIST 4614.03

GWST 4355.03: Narrative Strategies in Nineteenth-Century Music: Gender, Identity, and Social Politics.

An interdisciplinary survey of nineteenth-century instrumental music, focusing on the narrative potential of nineteenth-century musical conventions and their relationship to other aspects of nineteenth-century Western culture. Representative musical works will be studied within the context of broader social and cultural issues, including gender, race, class, sexuality, nationality, ethnicity, and identity.

FORMAT: Seminar

PREREQUISITE: Permission of the instructor

CROSS-LISTING: MUSC 4355.03

GWST 4402.03: Recent French Feminist Theory.

This course will concentrate on some of feminism's most challenging voices, those that have emerged from France in the past 50 years: Beauvoir, Kristeva, Cixous and Irigaray. The course will attempt to illuminate the intellectual background against which these women write, particularly in the areas of linguistic and anthropological structuralism, and in psychoanalytic theory. The course will be organized in part by the historical evolution of feminist thought, in part by the consideration of central feminist concerns.

FORMAT: Lecture/tutorial

CROSS-LISTING: CTMP 4302.03

EXCLUSION: CTMP 2030.06 and 4300.06

GWST 4427.03: Queer Theory.

This course provides an overview of the general questions and debates -- and the philosophical, political and cultural contexts--of the interdisciplinary field that is now known as 'Queer Theory.' It will profile a wide selection of foundational writings by leading scholars and contributors to GLBT thought and activism. Examining topics such as difference, identity, discrimination, and equality, we will address its articulations critical race theory, feminist philosophy, and critical analyses of political economy. We will also address the significance of queer theory to GLBT equality activism, attending to the relationship between political thought and legislative practice in addressing institutionalized heteronormativity and the public expressions of homophobia, transphobia, sexism, and racism and their impact on social policy.

CROSS-LISTING: POLI 4427.03

GWST 4500.03: Topics in Feminist Philosophy.

In this course, we shall explore some of the current research in a focused area of feminist philosophy. Previous topics have included feminist ethics, feminist epistemology, postmodern feminism, the feminist sexuality debates, and ecofeminism.

FORMAT: Seminar

PREREQUISITE: ﻿Strong background in philosophy or feminist theory (normally including at least one class in feminist philosophy or permission of the instructor).

CROSS-LISTING: ﻿PHIL 4500.03, PHIL 5500.03, GWST 5500.03

GWST 4900X/Y.03: Honours Thesis.

Students writing an honours thesis in Gender and Women's Studies as the primary subject of a Combined Honours program must enroll in this course. The course meets five times over the course of the academic year in which the student writes her thesis. The grade for the honours thesis is assigned under this course number.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar and supervised thesis writing

PREREQUISITE: Admission to the honours program

IV. Related Courses

These courses are subject to change; consult the program office for offerings.

Courses Offered at Mount Saint Vincent University and Saint Mary's University

Courses offered within the Women's Studies programs at these universities are available to Gender and Women's Studies majors at Dalhousie. Courses offered are subject to change.

Please consult:

1. Women's Studies, Mount Saint Vincent (902) 457-6547;
or
2. Women's Studies, Saint Mary's University (902) 420-5842.

These courses must be taken on a letter of permission (see the Dalhousie Gender and Women's Studies Program Coordinator).

Geography

Note: There is no Geography program at Dalhousie, however several courses taught in various departments are commonly recognized as Geography courses. Only courses which are cross-listed in Science departments may be used to meet the life or physical science subject requirement for the BA degree.

I. Minor in Geography

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

II. Course Descriptions

GEOG 1030.03: Introduction to Physical Geography.

This non-lab science course examines the nature of weather and climate, earth's surface features and processes, and internal processes that contribute to landform development. An integral component of the course is an exploration of the representation and interpretation of physical geographic data through the examination of a variety of maps.

NOTE: There are no pre-requisites for this course and students may take this class in addition to any other first year Earth Sciences class.

FORMAT: Lecture-class 3 hours each week, and 1 hour tutorial weekly. Some classes may include map work

CROSS-LISTING: EARTH 1030.03

GEOG 1035.03: Introduction to Human Geography.

Human geography examines the ways that people perceive, use, and alter the landscapes they occupy. Two themes run throughout the class. One theme deals with the aspects of culture that characterize different social groups. These are matters of material culture as well as group behaviour, and belief systems. The second theme has to do with the systems of production, livelihood, spatial organization, and administration that societies erect. Interwoven with these themes is the interaction of human societies with each other and their environments. The class introduces the principal tools of human geographers: maps, demography, and analysis of cultural patterns.

NOTE: This class cannot be used to meet the life or physical science subject requirement for the BA degree.

FORMAT: Lecture 3 hours

GEOG 1060.03: Earthquakes, Volcanoes and Natural Disasters.

Earthquakes, meteorite impacts, rapid climate change, volcanic eruptions, hurricanes, landslides, solar flares, and floods are natural disasters that affect our economy, public policy, and safety. Where, why and how frequently do natural disasters occur? Are predictions possible? Are media portrayals of risk and damage realistic? This course, aimed at the nonspecialist, investigates these intriguing questions. Excerpts of "disaster films", in conjunction with lectures and discussions are used to identify the causes, consequences and sometimes erroneous perceptions of natural hazards. Examples from Atlantic Canada and contemporary disasters are used to assess local risk and real-time events worldwide.

FORMAT: Lecture 3 hours

CROSS-LISTING: EARTH 1060.03

GEOG 2000.03: Cartography.

Maps, which are visual representations of our world, are essential aids to disciplines that span archaeology to zoology. Navigation is the art and science of finding one's way through both natural and built landscapes. This class primarily uses hands-on assignments to investigate how maps are constructed and interpreted (including concepts of spatial reference systems, scale, projections, symbols, and design), how maps can distort perceptions, and can influence one's decisions. Students also study navigation by compass, global positioning systems (GPS), and dead-reckoning.

FORMAT: Lecture 3 hours plus occasional field trips as appropriate

PREREQUISITE: EARTH/GEOG 1030, or EARTH 1080

GEOG 2001.03: Landscape Analysis.

Designers and planners need to understand the influence of physical, biological, and cultural systems in landscape evolution, and the relevance of that information in analyzing land capability. Students develop inventory and analysis tools for understanding environmental processes and their implications for design and planning. There will be field trips and a lab component.

FORMAT: Lecture/lab 3 or 4 hours

PREREQUISITE: ERTH 1030.03

CROSS-LISTING: PLAN 2001.03

GEOG 2006.03: Space, Place and Geographic Information Systems.

Planners use Geographical Information systems (GIS) for data collection, coordination, and analysis. Properly interpreted, GIS data contribute to informed decision-making. This course explores the application of GIS in planning within a project-centred setting. Students learn to use GIS to address and use and site planning issues. The course also considers mapping standards used within the field of planning, and examines legal, privacy, and ethical implications of using GIS data in the public realm.

FORMAT: Lectures/labs. Three hours weekly

PREREQUISITE: PLAN/GEOG 2001

CROSS-LISTING: PLAN 2006.03

GEOG 2070.03: Area Studies on Mexico and Central America.

Following an examination of the indigenous heritage, and the colonial legacy of the conquistadors, the class deals principally with the contemporary period, examining the Mexican Revolution and its aftermath, the Somoza dynasty, Nicaragua under the Sandinistas, the U.S. role in the region, the human rights situation in Central America, and probable developments in the region. The class is designed to provide an understanding of the contemporary reality of this volatile region, in many ways a microcosm of the crucial situation of Latin America as a whole.

FORMAT: Lecture/discussion 2 hours/conducted in English

PREREQUISITE: No prerequisites. Open to students in all departments. No knowledge of Spanish necessary

CROSS-LISTING: HIST 2383.03

GEOG 2100X/Y.06: Environment and Culture.

Concern about the environment is a widespread phenomenon as virtually everyone is confronted by environmental issues -- be they global warming, the depletion of the ozone layer or the continuing problems of water pollution and solid waste disposal. Furthermore, we are becoming increasingly aware of that environmental issues often have global implications. The efforts of cities in Canada to deal with environmental pollution, for example, may lead to conflicts with rural regions. Similarly, rural regions, in their use of various chemical agents, may find themselves affecting the lives of city dwellers. This class will explore key relationships between human culture and the physical environment. Topics to be examined include: historical, social, and legal aspects of contemporary environmentalism, food and agriculture, environmental ethics, health, traditional ecological knowledge, sustainable forestry, waste management, public participation and environmental movements.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200 X/Y.06

CROSS-LISTING: SOSA 2100.06

GEOG 2201.03: Introduction to Development I.

Poverty, inequality and injustice are widespread throughout the contemporary developing world. This course will examine how this situation came to be. It begins by analyzing the different meanings of the term "development" and then examines the major approaches that have shaped practical development initiatives on the ground in the Global South over the past 60 years. The course also examines the legacies of history for contemporary development efforts in the Global South through specific case studies.

FORMAT: Lectures/ tutorial

PREREQUISITE: Completion of five full credits at the 1000 level or permission of the instructor

CROSS-LISTING: INTD 2001.03

GEOG 2202.03: Introduction to Development II.

This course builds upon the core concepts and approaches studied in INTD 2001 (i.e. different theoretical approaches to development and the historical creation of underdevelopment). The course examines key contemporary issues in the field of development and analyses the connections between them: debt, global trade rules, foreign aid, hunger and malnutrition, rural and urban livelihoods, population growth. The course also examines the principle actors involved in development and the strategies they have used to promote and resist development, including: governments, non-governmental organizations (NGOs), the World Bank and IMF, and popular social movements in the Global South and North.

FORMAT: Lectures/tutorial

PREREQUISITE: Completion of five credits at the 1000 level or permission of the instructor

CROSS-LISTING: INTD 2002.03

GEOG 2206.03: Africa: An Introduction.

This course will focus on contemporary Africa. Stereotypical portrayals of Africa will be examined and critiqued with the goal of emphasizing the immensity, diversity and complexity of the continent in order to better understand the opportunities and challenges of African development in the twenty-first century.

FORMAT: Lecture/tutorials

CROSS-LISTING: INTD 2106.03

GEOG 2336.03: Regional Development.

Most countries have richer and poorer regions. Economic development issues, policies, and theories facing more industrialized nations are analyzed with particular focus on Canada (especially the Atlantic region), the European Economic Community, U.S.A., Japan, and Australia. Approved with Canadian Studies. In addition to the prerequisites, the student is advised to take one class in Political Science and one class in Canadian History before taking ECON 3336.

FORMAT: Seminar 2.5 hours/tutorials

PREREQUISITE: ECON 1101.03 and 1102.03

CROSS-LISTING: ECON 2336.03

GEOG 2800.03: Climate Change.

Most models of the atmosphere predict that increasing concentrations of greenhouse gases will continue to warm the surface of the earth and the oceans in the twenty-first century. The magnitude of the warming and its consequences are still very controversial. This class will discuss, mainly from a nonmathematical viewpoint, the reasons for the greenhouse effect, the current warming in the context of the historical record of climate change, and sources of natural climate variability such as the El Nino Southern Oscillation. It will also review arguments that attribute the warming that has occurred in the Twentieth century to natural variability, and those that attribute the warming to increased human emission of greenhouse gases.

FORMAT: 3 hours

CROSS-LISTING: PHYC 2800.03

EXCLUSION: ECON2850.06, PHYC2850.06

GEOG 3001.03: Landscape Ecology.

Landscapes reflect the interaction of natural and cultural processes. This course introduces the principles of ecology to landscape analysis. It explores relationships between environmental components in the landscape to inform community design and land use planning applications.

FORMAT: Lecture/lab 3 or 4 hours

PREREQUISITE: PLAN 2001.03 or GEOG 2001.03 or permission of the instructor

CROSS-LISTING: PLAN 3001.03

GEOG 3002.03: Reading the City.

Any city reflects the history of its topography, cultural traditions, and design interventions. This course introduces the principles, theories, and methods of urban form analysis in the local urban context. Students explore the local urban environment to interpret what the city means, and how it comes to take the shape it does.

FORMAT: Lecture/lab 3 or 4 hours

CROSS-LISTING: PLAN 3002.03

GEOG 3005.03: Cities and the Environment.

The contemporary landscape reflects a long history of human activities on the land and design and planning interventions through time. Civilizations rise and fall, often because of their degradation of the ecosystems that support them. This course examines the relationship of cities with the environment to enhance our

understanding of landscape change, urban form and patterns in human settlements through the ages.

FORMAT: Lecture/seminar 3 hours
CROSS-LISTING: PLAN 3005.03

GEOG 3006.03: Reading the Landscape.

Any landscape reflects its natural and cultural history. This course explores principles, theories, and methods of landscape interpretation. These approaches will be applied to community design problems in local landscapes.

FORMAT: Lecture/lab 3 or 4 hours
PREREQUISITE: PLAN 3001.03, 3002.03, or GEOG 3001.03, 3002.03
CROSS-LISTING: PLAN 3006.03

GEOG 3110.03: Migration and Development.

The purpose of this course is to explore and better understand the connections between migration and development in contemporary societies. Classes will introduce or further explore one main theme or issue, such as development-induced displacement, labour migration, and HIV/AIDS and migration. Each class will centre on one or more discussion questions, exchange insights from relevant experiences of class participants or focus on a case study

FORMAT: Lecture/seminar
CROSS-LISTING: INTD 3110.03

GEOG 3114.03: Environment and Development.

This course will examine the interconnections between the natural environment and different forms of social and economic development with a specific focus on developing countries. Various perspectives will be used to analyze the links between environmental issues and poverty, inequality, wealth, economic globalization and the ways in which different cultures understand and interact with the environment.

FORMAT: Lecture/seminar
CROSS-LISTING: INTD 3114.03

GEOG 3165.03: Peoples and Cultures of the World: Selected Area Studies.

This class examines a specific geographic and/or culture area. The class begins with background material on geography and history. Its focus is on the people themselves, their social organization and political, economic, and cultural systems. How they relate to globalization and development will also be examined. Consult the Department to find which region is to be covered in a particular year. Approved with International Development Studies.

FORMAT: Lecture
PREREQUISITE: SOSA 1000X/Y.06; 1050X/Y.06; 1100X/Y.06; 1200X/Y.06
CROSS-LISTING: SOSA 3165.03
EXCLUSION: SOSA 2370.03

GEOG 3210.03: Canadian Cultural Landscapes.

This course explores the origins of one "signature" landscape in each province. Contact with different geographies shaped distinctive regional histories; but at the same time, the story of each place is tied to the national narrative. These landscapes also illuminate how nature has been understood, used, and transformed since the fifteenth century.

FORMAT: Lecture and discussion
CROSS-LISTING: HIST 3210.03, CANA 3020.03

GEOG 3220.03: Coastal Communities in the North Atlantic.

Coastal communities as a social/ecological type are examined as populations, and social structures (territorial, economic, occupational, political) as they have developed in response to particular ecological and social circumstances. Various perspectives which have been applied to coastal communities are examined with regard to the contribution they may make to understanding the dynamics of these communities. The focus is on North Atlantic communities.

FORMAT: Lecture
PREREQUISITE: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06
CROSS-LISTING: SOSA 3220.03

GEOG 3284.03: Living in Cities.

2008 marked the first time in history that more of the global population lived in cities than in rural areas. What perspectives to anthropology and sociology offer on cities and their inhabitants? This course explores the social dynamics that constitute 'the city' and surveys how social scientists have studied and engaged with cities and city-dwellers. It approached 'the city' both as a whole and through

its constituent parts: people and places. Examples may be drawn from cities large and small, near and far - including Halifax.

FORMAT: Lecture and seminar
PREREQUISITE: One of SOSA 1000.06, SOSA 1050.06, SOSA 1100.06 SOSA 1200.06 FYP or PLAN 2005.06
CROSS-LISTING: SOSA 3284.03

GEOG 3370.03: North American Landscapes.

Landscapes are the product of human culture ordering nature for economic, social, political, religious, recreational, and artistic purposes. Landscape history analyzes and interprets the use and design of such features as fields and woodlands, roads and waterways, settlements and buildings, towns and suburbs, and parks and cities. This class examines the use and meaning of the spatial environment among the various societies in North America from the sixteenth to the twentieth centuries. Among the topics are the meaning of area resources for indigenous peoples, the occupation and settlement of colonial populations, transportation and continental expansion, town planning, the politics of water and land in the West, preservation movements, scenic tourism, and the literary and artistic stylization of landscapes. The class welcomes non-history students with an interdisciplinary interest in issues regarding planning and design, cultural ecology, and the governance of resources.

FORMAT: Lecture/discussion 3 hours
CROSS-LISTING: HIST 3370.03

GEOG 3400.03: Human Health and Sustainability.

This course examines the relationships between the health of populations and health determinants in the context of environmental sustainability. Weekly laboratory exercises will teach students how geomatics (GIS, GPS, and remote sensing technologies) and epidemiological tools can be used to assess the links between the health of human populations and the health of the environment, and how to use these tools for environmental health research.

FORMAT: Lecture 3.0 hours, Lab 1.5 hours
PREREQUISITE: Must be a third year student or have permission of instructor
CROSS-LISTING: ENVS 3400.03

GEOG 3440.03: Geomorphology.

Geomorphology is the quantitative study of Earth's surface processes and landforms applies to geology, civil engineering, hydrogeology, and environmental management. We investigate slope stability, weathering and soils, sediment production, wind-driven and coastal environments, tectonic landforms, and river, glacial and permafrost processes.

FORMAT: Lecture 3 hours, lab 3 hours including mandatory field trips
PREREQUISITE: EARTH 1080 and one other 1st year EARTH course; 1090 recommended; or SCIE 1502.21, or 1503.21, or SCIE 1504.27, or SCIE 1510.33 or permission of the instructor AND completion or concurrent enrollment of a 1000-level mathematics class, a 1000-level physics class, and a 1000-level chemistry class.

CROSS-LISTING: EARTH 3440.03

GEOG 3500.03: Exploring Geographic Information Systems.

Geographic Information Systems (GIS), as a tool for the management of georeferenced data, have become indispensable for disciplines where location of objects and pattern of processes is important. GIS plays a significant role a wide range of applications, from modeling, to analysis and predictions, to decision making. The class is aimed at a broad base of potential users and draws on examples of the role of GIS in global climate change, mineral exploration, preservation of biodiversity, coastal zone management, resource depletion, and many other present and future environmental issues. The course material will be of interest to those studying geoscience, environmental science, ecology, marine biology, oceanography, epidemiology, urban and rural planning, civil engineering, and any other field involving spatial data.

Laboratory exercises emphasize the principles of raster and vector GIS, and the integration of databases and GPS (global positioning systems) data into GIS. Exercises draw on the diversity of GIS applications in a number of application areas.

FORMAT: Lecture 3 hours, lab 3 hours
PREREQUISITE: Two years of university study or equivalent or instructor's permission
CROSS-LISTING: EARTH 3500, EARTH 5600, ENVS 3500
EXCLUSION: Credit will only be given for one of GEOG 3500, SCIE 3600, EARTH 3500, EARTH 5600, ENVS 3500

GEOG 3633.03: Spatial Information and GIS in Ecology.

A hands-on approach to understanding and using spatial information, this class introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address and applied problem in ecology.

NOTE: Offered in the summer through DEASIDE, an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITE: BIOL 2060.03

CROSS-LISTING: ENVS 3633.03, BIOL 3633.03

GEOG 4440.03: Geomorphology and Landscape Evolution.

Ripple-to mountain range-scale landforms evolve under predictable internal and external forces that are modulated by the physical and chemical properties of the rock. The purpose of this course is to provide a thorough examination of the development of landscapes by tectonics and surficial processes involving weathering, mass wasting, streams, and glaciers. The concepts of equilibria, climate and vegetation change, and rock character are recurring themes throughout the course. Dating and thermochronology methods are discussed in the context of rates of landscape change. Early classic viewpoints of landform development are contrasted with the latest numerical simulations of landscape evolution. The labs are mostly field-oriented with emphasis on Quaternary stratigraphy, describing and interpreting soils, local geomorphology, and geomorphometrics.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: EARTH 1080 and one other 1st year EARTH course; 1090 recommended. Must be a 4th year Science student familiar with excel, or with instructor's permission

CROSS-LISTING: EARTH 4440.03

GEOG 4450.03: Introduction to Landscape Simulation.

We examine different approaches to numerical modelling of earth-surface processes such as erosion and landslides, melting permafrost, and braided rivers. Using class and/or individual projects as examples, the selection of variables, sensitivity testing, and methods for testing models against nature are discussed. We use Matlab; programming experience is useful but not essential.

FORMAT: Lecture 3 hours, lab

PREREQUISITE: EARTH 3440.03, MATH 1010 or 1400, PHYC 1280.03/1290.03X/Y and three courses at the 3000-level in the physical sciences (chemistry, earth science, physics) or with consent of instructor

CROSS-LISTING: EARTH 4450

GEOG 4520.03: GIS Applications to Environmental and Geological Sciences.

Note: This class is not offered every year. Please consult department in the spring for further information.

Geographic information systems (GIS) provide a rich set of new tools to the geologist and environmental scientist, not only to solve conventional problems, but also to explore questions not readily answered by other means. This class builds on the fundamentals of GIS taught in EARTH 3500.03 to explore analytical tools that aid in decision-making processes encountered in mineral exploration, hydrogeology, site selection, environmental assessment, and global change analysis. The class concentrates on case studies and problem solving, including those requiring multi-criteria and multi-objective decision making processes.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: GEOG 3500.03, ENVS 3500, EARTH 3500.03; EARTH 5600, or SCIE 3600.03; STAT 1060.03

CROSS-LISTING: EARTH 4520.03

GEOG 4530.03: Environmental Remote Sensing.

The goal of this class is to introduce students to the role of remote sensing as a technique provide environmental and geologic information. Particular emphasis will be placed on examining the potential and limitations of remote sensing methods and data in this context. The lectures discuss the fundamentals of remote sensing with an emphasis on multi-spectral satellite systems. In the lab, students use computerized techniques of digital image enhancement and thematic information extraction to process images derived from optical, radar, and hyperspectral remote-sensing systems. The integration of remote-sensing

information with GIS (Geographic Information Systems) is stressed in both the labs and lectures.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: EARTH 3500.03, ENVS 3500.03, or EARTH 5600.03 or SCIE 3600.03 or GEOG 3500.03

I. Introduction

German, the most widely used language in Europe, is spoken by approximately 100 million people as their native tongue in Austria, Germany, Switzerland, Italy, Belgium, and some parts of Eastern Europe. The cultural, economic, and scientific role of the German-speaking countries makes the knowledge of German indispensable to the study of most academic disciplines. The number of publications in the German language is second only to the number published in English.

The departmental program "German Studies" is the investigation of German culture and its place in the formation of the modern world. The program concentrates on significant aspects of the cultural tradition of the German-speaking countries. From Luther to Nietzsche, Freud, and Marx, German writers have moved people and nations to change the class of the world. The literary and intellectual development of Germany culminated around 1800 in the epoch of Classicism. The authors of this epoch (Lessing, Herder, Hegel, Goethe, Schiller) founded their writings on a thorough knowledge of the cultural tradition of Europe, especially Greek culture. As scientists, historians, and politicians they

described problems and questions of a universal nature in their works. They became the first historians of literature and created the discipline of aesthetics. The universality of the authors of German classicism explains their present-day relevance and makes the study of German important and attractive.

Major or honours students may, with the approval of the Department of German, take up to one year (five full credits) at a university in a German-speaking country and receive credit at Dalhousie. The Department has exchange arrangements with the universities of Heidelberg and Freiburg. In addition there is a "visiting scholars" program which brings distinguished scholars from Germany to Dalhousie.

For students of **German for Business**, the Department offers access to one of the most prestigious MBA programs in International Industrial Management in Germany at the FH-Esslingen in co-operation with Daimler and Bosch.

For advanced **Engineering students**, the Department offers access to the MSc in Automotive Engineering and the MSc in Information Technology and Automation Systems at the same Graduate School.

II. Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, [page 125](#) of this calendar.

The following programs are normally followed, other possibilities do exist. Students considering a degree in German are advised to consult with the undergraduate advisor of the Department.

Applications for Honours Programs should be discussed with a departmental advisor at an early stage. Later applications can also be accommodated.

A. BA with Honours in German

Beyond Beginner-level German, the Honours program requires nine additional credits in German Language, Literature and Thought at or above the 2000 level, including at least two courses in German Literature or Thought at the 3000 level or higher. It is recommended that at least four courses be completed in the last two years of the program. At the end of the program, students take an oral Honours Exam.

Honours students are strongly advised to complete some coursework in Germany, e.g., through the Canadian Year in Freiburg Program. Consult with the undergraduate advisor.

B. BA with Combined Honours

To take an Honours degree combining German with another subject, a student must consult with the academic advisors of both departments to arrange the specifics of the program. In general, a combination of 11 - 14 intermediate and advanced credits in the two subjects is required. If students intend to take the German Honours exam, they need a minimum of six credits in German, including courses in Literature and Thought; if the Honours thesis or exam is completed in the other department, a minimum of five intermediate and advanced credits in German is required.

C. BA (20 credit) Major in German

For a BA with Major in German, at least six (and up to nine) credits beyond the 1000 level must be completed; at least three of these credits must be at the 3000 level or higher. Two credits must be in courses dealing with literature or thought.

D. BA (20 credit) Double Major in German

A BA with a Double Major in German and another subject requires a combination of 10 - 14 intermediate and advanced credits in the two subjects. Of these five to nine can be in German, and at least two must be at the 3000 level or higher. Two credits must be in courses dealing with literature or thought.

E. BA (15 credit) Minor in German

See requirements for minor in the College of Arts and Science section of this calendar ([page 128](#)).

F. Minor in German

See requirements for minor in the College of Arts and Science section of this calendar ([page 128](#)).

G. Minor in German Studies

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

H. Minor in German Philosophy

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

III. Course Descriptions

NOTE: Not all courses are offered every year. Please consult the current timetable to determine this year's course offerings.

PLEASE NOTE:

- GERMAN 1001X/Y.06 is to be taken by students with no previous knowledge of German.
- GERM 1010X/Y.06 is to be taken by students with no previous knowledge of German.
- GERM 1060X/Y.06 is to be taken by students with no previous knowledge of German.
- Students who have completed high school German will normally take GERM 2000X/Y.06.
- GERM 1010X/Y.06/1060X/Y.06: Intensified German

All students with previous knowledge of German should see the Undergraduate Advisor.

Intermediate Courses

Intermediate courses are based on GERM 1010X/Y.06, 1060X/Y.06, high school German Grade 10, 11, 12 or an equivalent basic knowledge. A combination of GERM 2000X/Y.06 and GERM 2020X/Y.06 serves as an accelerated Intermediate German course and is designed for students who want to make rapid progress in the language.

Unless noted otherwise, all upper year courses are taught in German with German texts.

GERM 1001X/Y.06: German: A Practical Course for Beginners.

This course provides the linguistic and cultural background needed to interact successfully with German speakers. The course replaces traditional grammar instruction with practical exercises reflecting the basics of communication in domestic and academic life as well as in business and tourism. This course combines a predominantly oral method based on conversation and discussion with written work. For a more traditional approach, see GERM 1010X/Y.06 or GERM 1060X/Y.06.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Classroom instruction/language lab and oral classes

GERM 1010X/Y.06: German for Beginners.

GERM 1010X/Y.06 is a seminar course for beginners only, and no previous knowledge is required. Its equivalent is two years of German in high school with a final mark of 75% or better. The course emphasizes the spoken language, and provides the student with a thorough knowledge of basic grammar. Conversational tutorials are a required part of the course.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

GERM 1020X/Y.06: German Fiction in Novel and Film.

This course satisfies the university's guidelines for the Writing Requirement. It examines the conceptual transition from the printed word to the screen; classic German novels and short stories are to be read and compared with their film versions. Works by Kleist, Fontane, Kafka, Thomas Mann, Heinrich Mann, Böll and Handke will be included on the reading list. All texts will be read in English translation. Some of the best known and most innovative cinematic works will be shown and discussed. Directors will include Fassbinder, Herzog, Schlöndorff, Wenders, von Trotta and Visconti. All German language films will either be "dubbed" into English or provided with English subtitles.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: ✍ Writing Requirement, Seminar

GERM 1021X/Y.06: German Fiction in Novel & Film.

Students enrolled in GERM 1021 attend lectures along with those in GERM 1020. However, as they do not need a writing course, they are not required to complete all 8 assignments. Instead, they attend a separate tutorial and submit fewer, more detailed and fully researched essays.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

EXCLUSION: GERM 1020X/Y.06

GERM 1060X/Y.06: German for Reading.

In this course, students acquire a solid foundation for comprehending and translating texts in the humanities and sciences. No previous knowledge of German is required. The course is taught in English. For purposes of admission to advanced courses in German it is equivalent to GERM 1010X/Y.06. This course satisfies the Bachelor of Arts Language Requirement. The combination of GERM 1010X/Y.06 and 1010X/Y.06 is recommended for students who desire rapid progress in the German language.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

EXCLUSION: GERM 1060.06

GERM 1080X/Y.06: German Folk and Fairy Tales.

Beginning with the great Germanic epic of the Nibelungen, and finishing with the famous collection of fairy tales by the Brothers Grimm, this course aims to familiarize students with the most significant Germanic myths and tales. Their origins and aspects of their historical, political, social and literary importance will be discussed, through readings presenting a wide variety of critical approaches.

The course encourages an interest in narrative style - in the epic, the legend and the fairy tale as literary forms. The history and essential qualities of these forms will be investigated; students will develop a greater awareness of the role and influence which the imagery of these forms has had (and continues to have) in the visual arts and music, in advertising and film, in poetry and theatre. The readings for this course are in English.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Writing Requirement, Seminar

EXCLUSION: GERM 2010.03, GERM 2011.03

GERM 2000X/Y.06: Intermediate German.

The main aim of this course is to develop a certain degree of speaking fluency as well as to improve reading and writing skills. Small conversation classes once a week as an aid to speaking fluency are offered.

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Seminar

PREREQUISITE: GERM 1010X/Y.06 or 1060X/Y.06 or equivalent

GERM 2020X/Y.06: Exercises in Translation and Composition.

English and German texts from various periods and of different types will be translated. These translations lead to the discussion of specific difficulties of grammar and construction. Students must prepare translations or compositions for each class.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: GERM 1010X/Y.06 or equivalent

GERM 2021.03: Translation & Composition I.

English and German texts from various periods and of different types will be translated. These translations lead to the discussion of specific difficulties of grammar and construction, word choice and style. Students must prepare translations or compositions for each class.

FORMAT: Seminar

PREREQUISITE: GERM 1010X/Y.06 or equivalent

EXCLUSION: GERM 2020X/Y.06

GERM 2022.03: Translation & Composition II.

As in Translation and Composition I, English and German texts from various periods and of different types will be read and translated. Students will develop their reading comprehension and translation skills and hone their ability in written expression in German. Students must prepare translations or compositions for

each class. GERM2022 builds on the skills acquired in Translation and Composition I, although it may be taken on its own by students with strong language ability.
 FORMAT: Seminar
 PREREQUISITE: GERM1010X/Y.06 or equivalent
 EXCLUSION: GERM 2020X/Y.06

GERM 2040.03: Monsters and Madness: 20th Century German Film.

This course provides an introduction to German culture through the medium of film. Both the classical early period and the contemporary German film will be discussed. No knowledge of the German language is necessary; all films are subtitled and all discussion is in English.
 FORMAT: Seminar

GERM 2050.03: German Reading I.

This is a seminar specifically intended for students who do not fit into our normal program offerings. Please consult departmental advisor.

GERM 2051.03: German Reading II.

This is a seminar specifically intended for students who do not fit into our normal program offerings. Please consult departmental advisor.

GERM 2060.03: German for Business, Economics and Tourism I.

This course introduces students to the specialized vocabulary used in business and economics. It also aims to familiarize the students with all aspects of the German economy and business world.
 FORMAT: Seminar
 PREREQUISITE: Any of GERM 1010X/Y.06, 1060X/Y.06 or equivalent

GERM 2061.03: German for Business, Economics and Tourism II.

This course introduces students to the specialized vocabulary used in business and economics. It also aims to familiarize the students with all aspects of the German economy and business world.
 FORMAT: Seminar
 PREREQUISITE: GERM 1010X/Y.06, 1060X/Y.06 or equivalent

GERM 2090.03: Tanks and Texts: Soldiers' Perspectives on the Two World Wars in German.

This course examines the two World Wars from a German perspective. Emphasis is put on autobiographical accounts of soldiers' experiences. Language of instruction and readings will be English. The films are subtitled.
 FORMAT: Lecture/seminar

GERM 2150X/Y.06: Goethe's Faust.

A close reading of Goethe's *Faust*, comparing the German original and an English translation, will give rise to questions about translation techniques, the theory of drama and the reshaping of a legend. While Goethe's masterpiece stands at the centre, other German versions of the Faust legend will also be discussed in detail. Assignments will involve research into later echoes of the Faust legend as well. The language of instruction is English but the texts are in German.
 NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
 FORMAT: Lecture/discussion
 PREREQUISITE: GERM 1010X/Y.06 or a reading knowledge of German

GERM 2200X/Y.06: Introduction to German Literature.

A study of texts representing major periods of German Literature from the 18th to the 20th century. Special emphasis is on the interaction between literature, society and other forms of art. The course also serves as an introduction to literary criticism. The language of instruction is German and English, as needed; the texts are in German.
 NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
 FORMAT: Seminar/tutorial
 PREREQUISITE: GERM 2000X/Y.06 or equivalent or a reading knowledge of German

GERM 2280.3: Friedrich Schiller's Historical Drama.

Friedrich Schiller's five historical dramas range over Early Modern Europe from the Hundred Years War, and find settings in medieval Switzerland and France, as

well as Counter-Reformation Spain and Elizabethan England. These five plays will be analyzed according to lyrical, theatrical, historical and aesthetic criteria.
 FORMAT: Lecture/discussions
 CROSS-LISTING: EMSP 2280

GERM 2290.3: German Romanticism: from Goethe to Hegel.

Genuine feeling and political liberation are enhanced by attention to classical antiquity and modern folktale. Apparently a reaction against the modern, from Goethe to Hegel, Romanticism manages to eclipse almost everything else and define some six decades of German philosophy and literature in the writings of Herder, Goethe, Schiller, Novalis, A.W. and Friedrich Schlegel, Eichendorff, Hölderlin, Schelling, Hegel, Büchner.
 FORMAT: Lecture/discussions
 CROSS-LISTING: EMSP 2290

GERM 2400X/Y.06: German Art and Literature.

This course gives an introduction to modern German Art and Literature. Special emphasis is on the interaction between art and literature, particularly the themes and styles shared by visual and literary expression during the various epochs of modernity. The language of instruction is German and English, as needed. The texts are in German.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: GERM 2000X/Y.06 or equivalent

GERM 2450X/Y.06: Kant and the History of German Idealism.

A study of Kant's relation to modern Rationalism and Empiricism, and an inquiry into the principles of Idealism. This course is taught in English and uses English translations.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

GERM 2550.03: In Pursuit of Freedom from Luther to Nietzsche I.

This is a study of major thinkers, with emphasis on Luther, Leibniz, Herder, Hamann, Kant and Schiller. This course is taught in English using English translations.

FORMAT: Seminar

PREREQUISITE: A general introduction to literature, culture or philosophy

EXCLUSION: GERM 2300X/Y.06

GERM 2551.03: In Pursuit of Freedom from Luther to Nietzsche II.

This is a study of major thinkers, with emphasis on Hegel, Schopenhauer and Nietzsche. This course is taught in English using English translations.

FORMAT: Seminar

PREREQUISITE: A general introduction to literature, culture or philosophy

EXCLUSION: GERM 2300X/Y.06

GERM 2600.03: 'Freiheit'. Freedom in German Literature and Thought I.

In contrast to other European literatures of the 18th century with their utilitarian and moralistic aims, the German Sturm und Drang movement puts the individual into the centre. A secular society demands a new conception of man ("Mensch") liberated from God and the gods. As a consequence, the traditional view of man inherited from Aristotelian poetics is replaced by characters who shape their own destiny. A new myth of a defiant Prometheus is created by Goethe. German idealism formulates a new theory of freedom which was summed up by Kant in the categorical imperative. Goethe's *Iphigenie* illustrates the humanism of the epoch. The ultimate freedom, however, can only be achieved in the artistic realm. Again, Goethe provides the model in his *Divan*.

Texts by J.M.R. Lenz, Goethe, Schiller, Winckelmann, Kant, and others will be read. Translations will be offered. Language of instruction: English. This course should appeal to students interested in the history of ideas.

FORMAT: Lecture

GERM 2601.03: 'Freiheit'. Freedom in German Literature and Thought II. 19th and 20th century.

Goethe's *Divan* opens our discussion, Goethe follows the Persian poet Hafiz to the Orient. There he finds freedom of the imagination which enables him to ignore the reality of the Napoleonic wars. Goethe's avoidance of reality became the role model for the Symbolist movement. The German Romantics placed a writer's imaginative capacity ("Fantasie") and subjectivity ("Witz" and "Ironie") higher than any concerns about objective reality. New forces, like chance ("Zufall"), counter man's perceived freedom, as is shown in the works of Henrich von Kleist. The dependence on circumstances, social structures and natural laws becomes the great topic of Realism and Naturalism. The human being without hope, faith or the chance of salvation is manifested in Büchner's works. Finally, the existential crisis of modern man finds its most representative expression in the works of Franz Kafka.

Texts by Goethe, Gautier, Kleist, Büchner, Kafka and others will be read in the original. English translations will be provided. Language of instruction: English. This course should appeal to students interested in the history of ideas. Attendance of Part I is not a prerequisite.

FORMAT: Lecture

GERM 2650X/Y.06: Modern German Philosophy.

This course provides a survey of the German philosophical tradition from the enlightenment to the present. Students will gain a broad overview of the German intellectual history through focused readings of the theoretical texts. This course is taught in English using English translations.

FORMAT: Lecture/tutorial

CROSS-LISTING: PHIL 2650.06

GERM 2651.03: Modern German Philosophy I.

This course looks at the history of German philosophy from the Enlightenment to the End of German Idealism. Part one examines the early history of German philosophy, focusing on German Idealism. Students will gain a broad overview of German intellectual history through focused readings of key texts. The goal is to understand how the ideas formed in this tradition contribute to both the core philosophic disciplines (such as metaphysics, epistemology and moral philosophy) as well as other fields (like history, aesthetics, psychology, and political thought). Our focus will be on the construction of the free autonomous subject—the basis for our understanding of democratic institutions.

FORMAT: Lecture/seminar

CROSS-LISTING: PHIL 2651.03

EXCLUSION: GERM/PHIL 2650X/Y.06

GERM 2652.03: Modern German Philosophy II.

This course looks at the history of German philosophy from German Idealism until today. In particular, the focus will be on the radical philosophical movements of the 19th and 20th centuries. Students will gain a broad overview of German intellectual history through focused readings of key texts. The goal is to understand how the ideas formed in this tradition contribute to both the core philosophic disciplines (such as metaphysics, epistemology and moral philosophy) as well as other fields (like history, aesthetics, psychology, and political thought). The focus will be on how critiques of the free autonomous individual—constructed in the context of German Idealism—effect the political institutions of the 19th and 20th centuries.

FORMAT: Lecture/seminar

CROSS-LISTING: PHIL 2562.03

EXCLUSION: GERM/PHIL 2650X/Y.06

CO-REQUISITE: PHIL 2652.03

GERM 3000X/Y.06: Advanced German.

Translations, readings, essays and discussions will promote fluency in the language on the advanced level.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: GERM 2000X/Y.06 or equivalent

GERM 3001.03: Advanced Spoken German I.

This course aims to develop the oral proficiency and fluency of advanced students. We will improve pronunciation, practise discussion skills and idiomatic expression, build vocabulary, memorize set phrases and practise listening comprehension. Audio-visual materials will be used. Students' active participation is essential in this course (Non-native speakers only).

FORMAT: Seminar

PREREQUISITE: GERM 2000X/Y.06 or equivalent

GERM 3002.03: Advanced Spoken German II.

This course builds on German 3001. In this half of the course, we will continue to work on improving pronunciation and intonation, to expand vocabulary and practise sentence and conversational structures. We will especially focus on increasing fluency and confidence in conversational interaction. Students' active participation is essential in this course (Non-native speakers only).

FORMAT: Seminar

PREREQUISITE: GERM 2000X/Y.06 or equivalent

GERM 3010.03: Advanced Translation I: German - English.

German texts of various kinds are used to deal with techniques and problems of translating from German into English. The course includes discussion of translation theories, elements of style and questions of ambiguity and textual redundancy.

FORMAT: Seminar

PREREQUISITE: GERM 2000X/Y.06 or equivalent

GERM 3011.03: Advanced Translation II: English - German.

English texts of various kinds are used to deal with the techniques and problems of translating from English into German. The course includes discussion of translation theories, elements of style and questions of ambiguity and textual redundancy.

FORMAT: Seminar

PREREQUISITE: GERM 2000X/Y.06 or equivalent

GERM 3050X/Y.06: German Reading.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

GERM 3051.03: German Reading III.

This is a seminar at the advanced level which offers readings outside our normal program offerings. Please consult departmental advisor.

FORMAT: Seminar

PREREQUISITE: Any 2000-level course

GERM 3052.03: German Reading IV.

This is a seminar at the advanced level which offers readings outside our normal program offerings. Please consult departmental advisor.

FORMAT: Seminar

PREREQUISITE: Any 2000-level course

GERM 3100X/Y.06: German Literature and Thought from Reformation to Enlightenment.

A study of German literature between the 16th and 18th centuries as a direct reflection of the important religious, social and philosophical developments after the Reformation and during Absolutism.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar. Held together with GERM 5500X/Y.06

PREREQUISITE: GERM 2200X/Y.06, GERM 2400X/Y.06 or other German literature course at the 2000-level

GERM 3120.03: Origins of Comparative Religion from Hegel to Nietzsche.

Comparative Religion was an invention of lecturers at the University of Berlin from 1810. Religious doctrines and cults were assessed according to the Christology of German Idealism. The beginning is Hegel's 1827 Lectures on Religion; the criticisms of Schopenhauer, D.F. Strauss, Feuerbach and Kierkegaard shall lead us to Nietzsche's "Anti-Christ."

FORMAT: Lecture/seminar/tutorial

CROSS-LISTING: RELS 3120.03

GERM 3150X/Y.06: Goethe and the Enlightenment.

A study of German literature and thought of the time which preceded and witnessed the great revolutions of the 18th century.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar. Held together with GERM 5520X/Y.06

PREREQUISITE: GERM 2200X/Y.06, GERM 2400X/Y.06 or other German literature course at the 2000-level

GERM 3200X/Y.06: Goethe and Romanticism.

A study of Goethe, Novalis and F. Schlegel.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar. Held together with GERM 5570X/Y.06

PREREQUISITE: GERM 2200X/Y.06, GERM 2400X/Y.06 or other German literature course at the 2000-level

GERM 3240X/Y.06: Literature of the 19th Century.

A discussion of essential literary texts which throw a critical light on the growing forces of materialism and positivism.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar. Held together with GERM 5610X/Y.06

PREREQUISITE: GERM 2200.06, GERM 2400X/Y.06 or other German literature course at the 2000-level

GERM 3250X/Y.06: Modern German Literature.

Modern authors as witnesses of the philosophical and social changes of our century: a study of selected prose texts of Hugo von Hofmannsthal, Franz Kafka, Arthur Schnitzler and Thomas Mann. The language of instruction is English and German, as needed; the texts are in German.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar. Held together with GERM 5620X/Y.06

PREREQUISITE: GERM 2200X/Y.06, GERM 2400X/Y.06 or other German literature course at the 2000-level

GERM 3300X/Y.06: History of German Poetry.

The poems we shall read represent the stations of the modern mind. We shall begin with the 17th Century; we shall end with the 20th century.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: GERM 2200X/Y.06 or GERM 2400X/Y.06 or another literature course

GERM 3400X/Y.06: Germany and Europe: The Cultural Union.

Modern German literature is shaped by the orient (*Les mille et une nuits 1704-1717*), by Winckelmann's discovery of Greek sculpture and the reception of Shakespeare and Milton in the mid 18th century. The Sturm and Drang movement used the works of Shakespeare as its inspiration to create a radical anti-Aristotelian concept of drama and of man. Writers of this period created an "open form" of drama which foreshadowed the plays of Büchner and Brecht. The new concept of man spread throughout Europe, becoming the basis for European Romanticism. German Romanticism, however, is quite different from its European counterparts; its influence is felt by European Symbolists like Baudelaire and Mallarmé. This course aims to study the interconnectedness of the European national arts and literatures. A reading knowledge of German, French and English is required.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: GERM 2200X/Y.06, 2400X/Y.06 or other German literature course at the 2000 level

GERM 3450.03: Confronting Fascism.

This course focuses on German writers, artists, filmmakers, and intellectuals whose work impacted and was impacted by the rise of fascism in the 20th century.

FORMAT: Lecture/tutorial

CROSS-LISTING: POLI 3449.03 and HIST 3059.03

GERM 3550.03: Germany and the Environment.

In this course we will study the ever-changing ideas of nature and the environment in German culture from the 18th century to today. The seminar will be conducted in English. All readings will be in English.

GERM 3650X/Y.06: History and Theory of the German Novel.

Representative works from the Baroque Age to the 20th Century are studied and the principles of the genre discussed. The language of instruction is English and German, as needed; the texts are in German.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar. Held together with GERM 5660X/Y.06

PREREQUISITE: GERM 2200X/Y.06 or GERM 2400X/Y.06 and another literature course

GERM 3750X/Y.06: Modern German Drama.

An historical study of modern German Drama from the 1770s to the twentieth century. Works by J.M.R. Lenz, J.W.v. Goethe, H.V. Kleist, G. Büchner, G. Hauptmann, E. Toller, B. Brecht and B. Strauß will be discussed. The notion of Freedom (Freiheit) and its apparent impossibility in the nineteenth and twentieth century is central. The texts are read in English translation with the German originals as back-up.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

CROSS-LISTING: THEA 3751X/Y.06

GERM 3850.03: The End of the World: The Apocalypse in German Thought.

The war, death and destruction that define European history in the 20th century can only begin to explain the obsession with the apocalypse in contemporary German thought. In this seminar we will study the secular appropriation of apocalyptic imagery from the Judeo-Christian tradition.

FORMAT: Lecture/discussion

CROSS-LISTING: RELS 3202.03

RESTRICTION: Restricted to students in 2nd year or above.

GERM 4100X/Y.06: Aesthetic Theory.

An historical study of the development of aesthetic theory. Hegel's "Ästhetik", Heidegger's "Ursprung des Kunstwerkes" and Gadamer's "Aktualität des Schönen" will be studied.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar. Held together with GERM 5630X/Y.06

PREREQUISITE: GERM 2200X/Y.06 or GERM 2400X/Y.06 and another literature course

GERM 4200X/Y.06: Seminar on Hegel's Phenomenology of Spirit.

The Phenomenology of Spirit, published in 1807, was Hegel's first major work. He intended to write an introduction to philosophy by demonstrating the necessity of the advance from the most immediate form of knowledge to absolute knowledge. To achieve this he had to write the Phenomenology as an introduction to his own philosophy.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: GERM 2200X/Y.06, GERM 2400X/Y.06 or other German literature course at the 2000-level

GERM 4250X/Y.06: Studies in German Idealism.

This seminar is specifically intended for students in the 20-credit major and 20-credit honours degree programs. The specific content of the seminar varies from year to year, but is always related to some aspect of Idealism.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

GERM 4500.03: Special Topics Class I.

This is an intensive research seminar dealing with selected topics to be announced.

GERM 4501.03: Special Topics Class II.

This is an intensive research seminar dealing with selected topics to be announced.

GERM 4600X/Y.06: Special Topics Class.

This is an intensive research seminar dealing with selected topics to be announced.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

I. Minor in Health Studies

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

II. Curriculum

A. Required Courses

Students must complete four full-credit or eight half-credit courses (24 credit hours) above the 1000 level from the list of approved elective courses noted below. A minimum of “B-” in these approved elective courses above the 1000 level earns credit toward the Minor.

B. Elective Requirements

Four full courses or equivalent from the approved list below, all above the 1000 level, and two full courses above the 2000 level. These four courses (or equivalents) must include courses from at least two of the following disciplines: Humanities, Social Sciences, Physical/Life Sciences, Engineering, Health Professions. Not all of these courses are offered every year. Some courses require prerequisites.

- ENGL 2030.03: Literature, Health and Healing
- HIST 3108.03: Topics in the Social and Cultural History of England: Madness and Marginality
- INTD 3115.03: Global Health: Challenges of Global Health Equity in the 21st Century
- PHIL 2805.03: Ethics and Health Care: Patient Care
- PHIL 2810.03: Ethics and Health Care: Social Policy
- PHIL 4801.03: Topics in Ethics and Health Care
- POLI 4602.03: The Politics of Health Care in Canada
- SOSA 2400.06: Health and Illness Across Cultures
- SOSA 2501.06: Sociology of Health and Illness
- SOSA 2502.03: Biomedicine and the Illness Experience
- SOSA 2503.03: Health and Society
- SOSA 2993.03: Health and Illness Through Cultural Time
- SOSA 2996.03: Health and Illness through Culture and Space
- SOSA 3135.03: The Social Organization of Health Care
- SOSA 3141.03: Sociology of Mental Disorders
- SOSA 3143.03: Health, Illness and the World
- SOSA 3145.03: Gender and Health (cross-listed with GWST 3145.03)
- SOSA 3147.03: Social Gerontology
- SOSA 3148.03: The Sociology of Addiction
- SOSA 3150.03: Sociology and Anthropology of the Body (cross-listed with GWST 3150.03)
- SOSA 3231.03: Psychological Anthropology
- SOSA 3245.03: Women and Aging, (cross-listed with GWST 3810.03)
- SOSA 4006.03: Issues in Health and Illness

Faculty of Science

I. Introduction

Just as people need to know who they are and how they arrived where they are, groups, courses, states and nations need a sense of their own past as part of their culture.

The academic study of history, therefore, is concerned to discover as much as possible of the reality of the past and to interpret human behaviour in its changes through time. It is a unique subject, scientific in the way it uses evidence, but still an art because the reconstruction of the past requires a disciplined imagination and an effective rhetoric for the communication of meaning.

The contemporary world is one of intensive specialization, in which the varieties of human knowledge have increased well beyond the capacity of any individual to command them all. These developments have reinforced the role of history as the foundation of a person's education, because history can never draw frontiers around itself to exclude any branch of human knowledge, although individual historians will want to select that portion of it especially relevant for them. History's field of study will always be the entirety of the human experience.

The subject of history does not have a monolithic body of knowledge. Historical understanding is a matter of interpretation, of offering explanations for events and movements which are subject to constant revision by scholars. Arguments, scepticism and controversy are thus the very stuff of history. The history student does not merely acquire a particular mass of information, but learns to think independently.

Especially in the 3000 and 4000 level courses, students gain more than sophistication about substantive areas of history. They also develop transferable skills for oral and written communication, for presentations of findings to groups, for group and independent research, for computer literacy in the human sciences, for research skills in primary and secondary materials, and for the application of foreign languages.

A degree in history provides an appropriate background for students planning to enter professional careers in fields such as law, education and journalism, as well as those interested in pursuing graduate study in history or related social science and humanities disciplines.

II. Degree Programs

All BA programs are governed by the general requirements of the College of Arts and Science for degrees, as set out in the University Calendar. See the Degree Requirements section for complete details, particularly with respect to Distribution Requirements, the Writing Course, the Language Course, and Arts and Science Electives. Before registering for the second year, each student in the College of Arts and Science must declare a subject of concentration. Once a student has declared History as the subject of concentration, then the following degree programs apply.

Courses in the History Department are grouped numerically in several geographical, chronological, subject and other areas: for example, Canadian, American, British, African, Medieval and Early Modern European, Modern European, Science and Technology, etc. Students are strongly encouraged to select a distribution of courses from different areas in order to experience the variety and richness of history.

Students who wish to build up a greater specialization in history than the minimum requirements outlined below may do so by taking courses of an historical nature given by the Departments of Classics, Economics, Music, Philosophy, Political Science, Spanish and Latin American Studies, Theatre, etc.

History students interested in obtaining an Emphasis in Canadian Studies along with their Major or Minor in History should consult the Canadian Studies calendar entry for information on requirements and for a list of History courses approved with Canadian Studies.

Students who wish to concentrate in a particular area of history should acquire the appropriate language skills, especially if they intend to pursue graduate study in it.

The following outline presents the MINIMUM departmental requirements for each program and should be read in conjunction with the general requirements of the Faculty.

Students planning to take a minimum of five full credits in History (above the 1000 level) are required to choose at least one half credit course above the 1000 level in each of four categories (A, B, C and D). See history.dal.ca for course selection.

(Note: This requirement applies to students who start their BA degree in Fall 2014 and after.)

A. BA (20 credit) Honours in History

The Honours degree is intended for students who plan to proceed to graduate work and for others who wish to enjoy the experience of an intensive research project, the Honours essay. Students must complete the requirements for the BA with major in History and fulfil the following additional requirements:

- Honours students must take at least nine but not more than 11 full credits in History beyond the 1000 level.
- Honours students must take HIST 4990X/Y.06, (the Honours essay), HIST 4986.06, (The Varieties of History) and at least one half-credit 4000-level seminar in History.
- Applicants normally should have achieved an existing Grade Point Average of at least 3.3 in their History courses above the 1000 level to be considered for admission.
- A grade of B- or better is required on nine full History credits
- A grade of B- or better is required on the honours thesis

NOTE: Applications for Honours in History are not considered by the Department until the winter term of the student's third year. Please enquire at the Department for the relevant deadline.

B. BA (20 credit) Combined Honours including History

Besides the general requirements for all BA programs, students must meet the Faculty degree requirements for Combined Honours (20 credit). Students must take 11-14 full credits in two subjects beyond the 1000-level, with no more than eight nor fewer than five credits in either of them. Students must complete two full credits at the 3000/4000 level in both Honours subjects. A grade of B- or better is required in at least four full History credits.

C. BA (20 credit) Major in History

The 20 credit Major requires more advanced training in History than does the three year degree. Besides the general degree requirements for all BA degrees, students majoring in History are required to take at least six but not more than nine full History credits beyond the 1000 level.

- At least three of these History credits must be above the 2000 level.
- Within the last 15 full credits, students must take at least one credit in each of two subjects other than History.
- BA Majors in History must take at least one half-credit 4000 level seminar in History.

D. BA (20 credit) Double Major including History

Besides the general requirements for all BA programs, students must meet the Faculty degree requirements for the BA with Double Major, which include 10 - 14 full credits in the major subjects beyond the 1000 level, with no more than eight nor fewer than five in either subject. Students must complete at least two full credits above the 2000 level in each major subject. Within the last 15 full credits, students must complete one full credit in a single subject other than the two major subjects. If History is the primary subject for the Double Major, students are required to take at least one half-credit 4000 level seminar in History.

E. BA (15 credit) Minor in History

See requirements for minor in the College of Arts and Science section of this calendar ([page 128](#)).

F. Minor in History

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

III. Types of Courses

1000 level courses take broad geographic perspectives over long periods of history to provide a background to many subsequent History courses. 2000 level courses typically deal with countries and transnational regions over at least a couple of centuries. 1000 level courses typically use textbooks for readings and assume no prior university-equivalent preparation; second-year courses typically assign academic books and articles and assume that students have the skills typically developed in the first year of university study. At the 1000 and 2000 levels, courses are lecture format, three hours per week, with tutorials featured in some courses. 2000 level courses begin more specialized study of an area of History as a major or minor.

3000 and 4000 level courses provide opportunities for the intensive pursuit of interests developed in previous courses. The relatively small size of 3000 level courses (usually 30 students) allows intensive discussion of demanding primary

materials and secondary publications, as well as students' presentation of their independent work. 4000 level courses are taught in a seminar format to cultivate students' independent research skills; undergraduate enrolments are limited to 15 or less; some are cross-listed as graduate courses. These courses are particularly recommended for Honours students and prospective Honours students.

IV. Course Descriptions

NOTE: Not every course is offered every year. Please consult the current timetable to determine which courses are offered this year.

HIST 1004X/Y.06: Introduction to European History.

This course will introduce students to the major themes and events in European history, from the end of the Roman Empire to the fall of Communism in 1990. Since the course will be taught by two course directors (one in each term), the exact period, the topics presented and the approach will vary from one year to another.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

EXCLUSION: HIST 1001.03, 1002.03, 1003.03, 1005.06

HIST 1005X/Y.06: Introduction to European History.

This course will introduce students to the major themes and events in European history, from the end of the Roman Empire to the fall of Communism in 1990. Since the course will be taught by two course directors (one in each term), the exact period, topics presented and approach will vary from one year to another. History 1005 is formally designated as a writing course. Students complete a writing assignment once per month and also participate in weekly small-group discussion sessions, designed to complement lectures.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: ✍ Writing requirement. Lecture/discussion

EXCLUSION: HIST 1004.06X/Y. 1001.03, 1002.03, 1003.03

HIST 1006.03: The Idea of the Past and the Making of the Present.

This course examines the influence of 'the past' at various moments in history. We will explore how the human past has been used historically in order to shape contemporary action. The course surveys the history of 'history', in a sense, considering how notions of the past informed ideas and arguments about the way things should be in the present. It encourages students to think critically about the uses and abuses of historical arguments while providing a general introduction to key events and themes in history. It will also provide students opportunities to develop their writing skills.

FORMAT: Writing Requirement. Lecture/discussion

EXCLUSION: HIST 1004.06, HIST 1005.06

HIST 1501.03: The Black Death, Silk, and the Mongols - Shock: Culture, and Awe in Medieval Eurasia (12-15th centuries): comparative Global History.

Global history — the study of change over long spans of time and large areas — allows us to examine questions not easily recognized in history conducted on smaller scales. The world order familiar to us — dominated by “the West” and organized by capitalist relations — contains elements both ancient and new. By comparing different cultural zones in historical periods before Europe's global dominance in the nineteenth century, this course will explore the diverse ways different cultures met the challenges of survival, and how patterns of connection and domination were made and unmade. Select themes — including trade, transportation, ecology, and state formation — will be used to highlight pre-modern patterns of connection across the globe.

FORMAT: Lecture

EXCLUSION: HIST 1500.06

HIST 1502.03: Origins of Modern Global Society.

The contemporary world is both intricately connected and intensely confusing. To make some sense of the global stage on which we now live, historians have recently redoubled their efforts to explore the development of these connections, especially since the eighteenth century. This course follows some of these explorations, attempting to understand the nature and impact of Europe's economic expansion, and how diverse cultures around the world experienced modern social and economic forces. Understanding the complex flows of such things as nationalist ideas, labour migrations, disease epidemics, and imperial control helps reveal the ties which bind us together.

FORMAT: Lecture/tutorial 3 hours

EXCLUSION: HIST 1500.06

HIST 1503.03: Black Death, Silk, and the Mongols: Shock, Culture and Awe in Medieval Eurasia (12th-15th c.) - Black Death, Silk, and the Mongols: Writing Requirement Course

Global history — the study of change over long spans of time and large areas — allows us to examine questions not easily recognized in history conducted on smaller scales. The world order familiar to us — dominated by “the West” and organized by capitalist relations — contains elements both ancient and new. By comparing different cultural zones in historical periods before Europe's global dominance in the nineteenth century, this course will explore the diverse ways different cultures met the challenges of survival, and how patterns of connection and domination were made and unmade. Select themes — including trade, transportation, ecology, and state formation — will be used to highlight pre-modern patterns of connection across the globe.

FORMAT: Writing Requirement. Lecture/tutorial

HIST 1504.03: Origins of Modern Global Society.

This course is a parallel course to HIST 1502, a first-year introduction to the Origins of Modern Global Society and satisfies one half of the writing requirement component for all Dalhousie undergraduate students (students will need an additional half credit in another approved course to satisfy fully the writing requirement.).

The course introduces students to the major events and developments in modern global history and how they shaped twentieth century societies, especially in the non-Western world. The focus will be on colonial encounters and the subsequent developments.

FORMAT: Lecture/tutorial

HIST 1701.03: History of the Americas: From Pre-Contact to the Revolutionary Era.

The course explores the history of the Americas from Pre-Columbian times to the early nineteenth century. The course considers indigenous people before 1492, conquest and colonialism, as well as slavery, religion, gender, warfare and revolution. This course provides a background for understanding contemporary Canada, the United States, and Latin America.

FORMAT: Lecture

EXCLUSION: HIST 1862X/Y.06, HIST 1867X/Y.06

HIST 1702.03: History of the Americas: from the Revolutionary Era to the Present.

This course explores the history of the Americas from the early nineteenth century to the present. It traces the rise of new nation-states as they evolved from colonies to global powers, amid continental expansion and settlement, political experiments, waves of immigration, and international conflicts. We will encounter people, places and events that have shaped contemporary Canada, Latin America, and the United States. In the process, we will see some of the different ways historians have put together stories of the past. Themes vary from year to year; please see the timetable for specifics.

FORMAT: Lecture

EXCLUSION: HIST 1862X/Y.06, HIST 1867X/Y.06

HIST 2001.03: Early Medieval Europe.

An investigation of the period between the fourth and the twelfth centuries. Major themes of lectures and tutorials include the mingling and exchange of Roman traditions with the Barbarian cultures in the fifth and sixth centuries, the creation of the successor states of Europe following the disintegration of the Carolingian Empire, the development of monasticism, church-state relations, the Gregorian Reform and the Investiture Contest, the rise of papal government, the twelfth-century Renaissance, peasant life and popular culture. Original sources in translation are used to familiarise students with the medieval world view.

RECOMMENDED: HIST 1004X/Y.06

FORMAT: Lecture/tutorial

HIST 2002.03: Later Medieval Europe.

A study of the period beginning with the crusades, and ending with the emergence of the early modern European states. After a preliminary introduction to the nature of medieval society at the end of the twelfth century attention is turned to a variety of themes: political, social, cultural, economic and religious. Topics examined include church-state relations, heresy, peasant life and peasant rebellions, chivalry, political thought, varieties of medieval law, literature, and the concept of decline,

or the "autumn" of the Middle Ages. Students make use of original sources in translation.

RECOMMENDED: HIST 1004X/Y.06 and/or 2001.03
FORMAT: Lecture/tutorial

HIST 2003.03: The Fall of the Roman Republic.

See course description for CLAS 2205.03 in the Classics section of this calendar.

HIST 2006.03: The Atlantic World, 1450-1650: European Colonization of the Americas.

The commercial and colonial expansion of Europe into the Americas. Topics of particular interest are the relations of Europeans and indigenous peoples, the ecological consequences of colonization, the use of unfree labour, the role of technology, the establishment of settler colonies, the effect of overseas communication on European culture, and the role of colonial expansion in the development of the world economy.

RECOMMENDED: HIST 1004X/Y.06, 1501.03, 1701.03, 1702.03
FORMAT: Lecture/discussion

HIST 2007.03: The Atlantic World, 1650-1800: European Empires in the Americas.

The development of the European colonial societies after their initial settlement and the establishment of their staple economies in the sixteenth and seventeenth centuries. The topics of chief interest are the predominance of colonial trade in Europe's large-scale commerce, the role of the colonies in European conflicts, the renewal of exploration, the development of the colonies' internal economies, and their revolts against European rule.

RECOMMENDED: HIST 1004X/Y.06, 1501.03, 1701.03, 1702.03, 2006.03
FORMAT: Lecture/discussion

HIST 2012.03: Eighteenth-Century Europe: Politics, Society and Culture.

The course explores the major political, social, intellectual and artistic developments of eighteenth-century continental Europe. Topics of special interest include: the emergence of the great powers; property, the underprivileged and reform; literacy and education; art and culture; religious observance and beliefs; the Enlightenment; and the crisis of the old order leading to the French Revolution.

FORMAT: Lecture/discussion
PREREQUISITE: HIST 1004X/Y.06

HIST 2015.03: War and Society in Early Modern Europe, 1550-1750.

The course deals with the presence of war in European societies, and how states and societies adapted and transformed under the impetus of the desire to achieve victory against an adversary. Among specific topics the course will deal with the transformation of tactics and technology on land and sea; the creation of modern tax systems; problems of supply and recruitment; ideologies of the military function; the creation of standing armies; the impact of hostilities on society.

FORMAT: Lecture/tutorial

HIST 2016.03: The Classical Greek World: Athens, Sparta and a Century of Conflict.

See course description for CLAS 2215.03 in Classics section of this calendar.

HIST 2017.03: The Roman World from Constantine to Theodosius (A.D. 313-395).

See course description for CLAS 2209.03 in the Classics section of this calendar.

HIST 2018.03: The Transformation of the Roman World (A.D. 395-565).

See course description for CLAS 2211.03 in the Classics section of this calendar.

HIST 2019X/Y.06: Early Modern Europe, 1450-1650.

A detailed and comprehensive survey of the principal topics in European history from the Italian Renaissance and the Christian Reformations, to the end of the great conflicts in the mid-seventeenth century. The course will proceed in roughly chronological progression, to examine in turn Italy, Spain and Portugal, France, the Netherlands, Germany and the Empire, the Christian kingdoms of eastern and northern Europe, and the European territories of the Turkish Ottoman Empire.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/tutorial

HIST 2021.03: Soviet Russia.

Survey of Soviet Russia from 1917 to the present. Topics discussed will include the Revolution of 1917, the Civil War and War Communism, NEP, Collectivization, the Great Purges, WWII, and the Post-Stalin era.

FORMAT: Lecture/tutorial

CROSS-LISTING: RUSN 2023.03

EXCLUSION: HIST 2020X/Y.06, RUSN 2021X/Y.06

HIST 2022.03: Imperial Russia.

Chronologically covers the imperial period of Russian history, from Peter the Great to the Revolution of 1917.

FORMAT: Lecture/discussion

CROSS-LISTING: RUSN 2022.03

EXCLUSION: HIST 2020X/Y.06, RUSN 2021X/Y.06

HIST 2023.03: Roman Legions and the Barbarians.

See course description for CLAS 2233.03 in the Classics section of this calendar.

FORMAT: Lecture

CROSS-LISTING: CLAS 2233.03

HIST 2032.03: Twentieth Century Germany.

Across two catastrophic world wars and a revolution, as empire, quasi-socialist republic, Cold War outpost, and the showplace for the end of Communism, Germany's history has embodied to an unparalleled extent the "age of extremes" in the twentieth century. The course explores the historical dimensions of these events and their resonance today.

FORMAT: Lecture

EXCLUSION: HIST 2030.06X/Y

HIST 2041.03: France from the Revolution to the Great War.

The course examines the long nineteenth century in France and its interpretations. The themes include: the legacy of the French Revolution, social structure and divisions, religion, education, crime and punishment, gender issues, intellectual and artistic developments. No French required.

FORMAT: Lecture/discussion

PREREQUISITE: RECOMMENDED: HIST 1004X/Y.06

EXCLUSION: HIST 2040X/Y.06

HIST 2055.03: War and Society since 1945.

This course examines the role of war, the development of military forces, and the changes in the international balance of power since 1945. Topics of discussion will include the Cold War; decolonization; "superpowers", military alliances, and the "Third World"; nuclear weapons and deterrence theory; terrorism, guerrilla warfare, and counter-insurgency; developments in conventional forces; war in Algeria, Indo-China, Korea and the Middle East.

FORMAT: Lecture

HIST 2060X/Y.06: The Civilization of Baroque Italy.

A descriptive introductory survey of Italy from the late Renaissance to the French Revolution. Lectures and tutorials will feature a broad array of original sources in translation and numerous images. Taught in English.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/tutorial

CROSS-LISTING: ITAL 2101X/Y.06

EXCLUSION: HIST 2061.03

HIST 2061.03: Civilization of Baroque Italy.

This is a scaled-down version of 2060X/Y.06, and studies Italy at the time of its greatest influence on Western civilization. The course examines Italy's politics, its vibrant urban and rural societies, the place of Catholicism in its cultural and intellectual life, and the innovative early modern economy, all before the great crisis of the 1620s. Open to first-year students.

FORMAT: Lecture/tutorial

CROSS-LISTING: ITAL 2061.03

EXCLUSION: HIST 2060.06

HIST 2065.03: Evolving Spain: History, Culture, Society.

Please see the description for SPAN 2100 in the Spanish and Latin American Studies section of the Calendar

HIST 2074X/Y.06: Introduction to the History of Science.

See course description for HSTC 1200X/Y.06 in the History of Science section of this calendar.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

HIST 2081X/Y.06: Twentieth-Century Europe in Literature, Art and Film.

A survey of contemporary European history that employs representative works of literature, art, architecture and film as well as traditional published records and monographic accounts to introduce students to major events of the twentieth century: the two world wars, the Russian Revolution, the political systems of Italian Fascism, German Nazism and Soviet Communism, the Holocaust and others.

RECOMMENDED: HIST 1004.X/Y.06

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion

EXCLUSION: HIST 2082.03

RESTRICTION: Restricted to students in their second year or higher.

HIST 2088.03: The Roots of Greek Civilization: From Crete and Troy to the Rise of Athens.

See course description for CLAS 2214.03 in the Classics section of this calendar.

HIST 2089.03: Alexander the Great and the Hellenistic Kings: Transforming the Ancient East and West.

See course description for CLAS 2216.03 in the Classics section of this calendar.

HIST 2090.03: The Rise of Rome: Consuls, Classes, and World Conquest.

See course description for CLAS 2231.03 in the Classics section of this calendar.

HIST 2091.03: The Fall of Rome: Caesars, Saints, and Warlords.

See course description for CLAS 2232.03 in the Classics section of this calendar.

HIST 2092.03: Death, Sex, and Gold in the Ancient Roman World.

See the description for CLAS 2234.03 in the Classics section of the calendar.

HIST 2101.03: Medieval England.

This course examines some of the major social, political, economic and cultural themes in English history from the reign of Alfred the Great to the Wars of the Roses. Major topics of study include the development and maturation of the English church, the impact of the Norman Conquest on Anglo-Saxon government and society, the development of the common law system, English monasticism, constitutional struggles in the later medieval period and war with France and Scotland. In an effort to understand and appreciate more fully the culture of medieval England, detailed consideration is given to contemporary sources, in translation.

RECOMMENDED: HIST 1004X/Y.06

FORMAT: Lecture/tutorial

EXCLUSION: HIST 2100X/Y.06

HIST 2106.03: Tudor and Stuart England, 1485-1688.

A survey of the major events, personalities, and developments in sixteenth and seventeenth century English history. Topics to be covered include the religious reformation, the achievements of the Elizabethan age, colonial expansion, the civil war, and the "Glorious Revolution."

FORMAT: Lecture

EXCLUSION: HIST 2100X/Y.06, 2104.03, 2105.03

HIST 2111.03: Modern Britain to 1884.

A survey of the development of British society from the reign of George III to the late Victorian era. This course will examine the emergence of class society, movements of popular protests, political reform, the growth of empire, and cultural change.

FORMAT: Lecture/tutorial

EXCLUSION: HIST 2100X/Y.06

HIST 2112.03: Modern Britain from 1880 to 1980.

This course will examine the development of British society from 1884 to the present day, touching upon the experience of Britain in two world wars, the growth of the welfare state, the decline of Britain's empire and economy, the upheavals of the 1960's and 1970's and the emergence of Thatcher.

RECOMMENDED: HIST 2111.03

FORMAT: Lecture/tutorial

EXCLUSION: HIST 2100X/Y.06

HIST 2153.03: Scotland from the Earliest Times to the Reformation.

This course examines the factors that contributed to the making of Scotland as a British and European nation, from c. 100 to the sixteenth-century Reformation. Lectures examine a series of themes arranged in roughly chronological fashion, including the peoples who populated the region of North Britain around the year 1000, the coming of the Normans, urban life, relations between core and peripheral regions in the kingdom, the Scottish manifestation of the European witch-hunt, the "problem" of the Highlands, and pre-Reformation religious, social and political life. Emphasis is laid on the distinct social and cultural developments of the northern kingdom in contrast to its larger neighbour, England. In an attempt to appreciate more fully the civilization of this long period the reading of contemporary documents (in translation) constitutes an integral aspect of the course.

FORMAT: Lecture/tutorial

EXCLUSION: HIST 2151.03 and 2152.03

HIST 2207.03: Aboriginals and Empires: Canada's Origins to 1763.

This course explores Canada's origins to 1763. It covers the history of First Nations peoples before and after the arrival of Europeans. It addresses themes such as the role of the physical environment; the fur, fish, and timber trades; and the imperial struggle for dominance in North America. While the lectures will narrate the major developments in the seventeenth and eighteenth centuries, the tutorials will focus on specific issues, such as the role of treaties in Canadian history. The course climaxes with the Conquest of Quebec and the end of the Seven Years War.

FORMAT: Lecture / tutorial

CROSS-LISTING: CANA 2207.03

HIST 2208.03: Patriots, Rebels, Refugees: Canada's Roots in the Age of Revolution, 1763 to 1860.

As empires continued their international contest and Britain fought to maintain colonies within North America, old and new inhabitants of what would become Canada also wrestled with questions concerning who would exercise power within their communities and governing bodies. In the process they gave new and, at times, conflicting answers to old questions: What did it mean to be a patriot? Who and what were they willing to defend? Who and what were they prepared to resist? Immigrants, exiles and the refugees of European and North American wars shaped new homelands, even as the First Nations peoples became refugees within their own lands. In this course we explore the related questions of loyalty and conscience through the diaries and letters of men and women defining their place in a new order.

FORMAT: Lecture/tutorial

CROSS-LISTING: CANA 2208.03

HIST 2209.03: Making a Nation: Canada, 1860-1929.

This is the story of how British North America was transformed into a distinct nation-state for the twentieth century. We'll see how a young Canada grappled with geographical, political, and social challenges: acquiring enormous territories amid growing provincial differences; maintaining loyalties to Empire while developing a New World identity; reconciling new and diverse cultural communities; and mobilizing for war.

CROSS-LISTING: CANA 2209.03

HIST 2210.03: Many Canadas: Canada, 1930 to the present.

This course explores the remaking of Canada, including the shift from imperial to continental and nationalist politics, the rise and transformation of third-party political movements, and the emergence of new ideas about the rights and responsibilities of the liberal individual subject.

FORMAT: Lecture / tutorial

CROSS-LISTING: CANA 2210.03

HIST 2211.03: Social History of Canada before 1870.

This course examines the social history of pre-Confederation Canada through such topics as social control, violence and protest, women and domestic life, regionalism and marginal peoples, and the transformation of the economy.

CROSS-LISTING: CANA 2211.03

EXCLUSION: HIST 2210.03

HIST 2212.03: Social History of Canada since 1870.

This course examines the social history of Canada since Confederation through such topics as the impact of industrialization, social classes, conflict, the role of women, the state and social development, and relationships among the wide variety of social groups in Canada.

FORMAT: Lecture/tutorial

CROSS-LISTING: CANA 2212.03

EXCLUSION: HIST 2210.03

HIST 2221.03: Rough Justice - Order, Disorder and Canadian Popular Culture to the 1890s.

This course investigates the character of popular culture, investigating forms of community control and ideas of order among different classes and cultures, beginning with aboriginal societies at the time of contact, through the revolutionary era, to the Victorian period and the first decades of Canada's nationhood. The sexual tensions of frontier towns, drunken revelry and riot, the smallpox, religious and revolutionary passions, and other sources of disorder (and the evolution of the means of making order) feature in this exploration of Canadian history's most dramatic passages.

FORMAT: Lecture/tutorial

EXCLUSION: HIST 3241.03, 3242.03, 3280.03, 3281.03

HIST 2222.03: Rough Justice - Order, Disorder and Canadian Popular Culture, 1890s to the Present.

This course continues the themes explored in History 2221, setting out the context within which legislation related to popular culture and leisure pastimes evolved from the 1890s into the present. Included are the regulation of alcohol, drug and tobacco consumption, sexual mores, pulp fiction and comics, sporting cultures, gambling, organized crime, and the use and abuse of animals in our redefinition of appropriate forms of recreation. Approved with Canadian Studies.

FORMAT: Lecture/tutorial

EXCLUSION: HIST 3241.03, 3242.03, 3280.03, 3281.03

HIST 2231.03: The Making of Modern Canada: Canadian Political History, 1896 to the Present.

This course surveys the major political developments in Canadian history since 1896. Topics to be examined include: regionalism and the emergence of third-party movements; French-English relations; federal-provincial relations; and the transformation of the liberal state in the post-1945 era.

FORMAT: Lecture/discussion

CROSS-LISTING: CANA 2231.03

EXCLUSION: HIST 2230X/Y.06

HIST 2235.03: History of Canadian Culture.

This course explores the history of Canadian culture since the mid-nineteenth century, including art, architecture, music, literature, sport, and mass media. Themes include creating a "national" culture amid regional differences, and the relationship between popular culture (heavily influenced by the United States) and "high" culture cultivated by the state.

FORMAT: Lecture/discussion

CROSS-LISTING: CANA 2235.03

HIST 2250.03: History of the Canadian West.

The prairie west is one of the most beautiful places in Canada, but also one of the most overwhelming in its expanse and bewildering in its complexity. Our simple image of the prairie – golden wheatfields and enormous skies – hides a dramatic history of exploration and discovery, war and protest, and struggles to mature as a region within Canada. This course will ask: What makes the prairie west different? How has it shaped modern Canada?

FORMAT: Lecture/tutorial

CROSS-LISTING: CANA 2250.03

HIST 2261.03: True Believers 1914 to Present - The Left and the Right in Canadian Politics.

The course will study the ideas and practices of Canadian political movements of the Left and the Right. We will attempt to understand why such movements have arisen and declined, and what significance they have had for Canadian politics and society. Topics will include: the Progressive movement; the CCF and NDP; Communism and Fascism; Social Credit; the radical right and the New Left; the Reform Party.

FORMAT: Lecture/tutorial

HIST 2271.03: Atlantic Canada to Confederation: The Northeast in the Age of Empire, 1450-1867.

A survey of the history of Atlantic Canada (the Maritimes and Newfoundland) from the origins of human habitation to the early 1860s. Emphasis is placed on the pattern of change and conflict which, over time, forged a series of "limited identities" that gradually became elements of an emerging regional personality.

FORMAT: Lecture/discussion

CROSS-LISTING: CANA 2271.03

EXCLUSION: HIST 2270X/Y.06

HIST 2272.03: Atlantic Canada since Confederation: Regionalism, Identity, and Development, 1867-2000 .

A survey of the history of Atlantic Canada (the Maritimes and Newfoundland) from the 1860s to the present. Emphasis is placed on how episodes such as the "age of sail", industrialization, class and gender conflict, war, the struggle for human rights and a chronic effort to play "catch-up" with the rest of the nation have defined this region's identity.

FORMAT: Lecture/discussion

CROSS-LISTING: CANA 2272.03

EXCLUSION: HIST 2270X/Y.06

HIST 2325.03: Application of Finite Element Method in Static & Dynamic Systems.

This course studies the political history of American slavery, from the formation of the United States to the American Civil War. Lectures cover the growth of American slavery, antislavery politics and abolitionism, the sectional crisis of 1850s, and the complex relationship between slavery and American democracy.

FORMAT: Lecture

HIST 2331.03: Creation of an American Republic: The United States, 1580-1865.

This course studies the first example of a major theme of modern history: how colonial societies become nations. When British colonization of the Americas began in the late sixteenth century, no one involved in the process intended or expected the result to be an independent republic on the other side of the Atlantic. Yet during the following two centuries of colonial history many of the crucial and distinctive features of what became the United States took shape: aggressive displacement of indigenous peoples, thoroughgoing privatization of economic resources, racial slavery, ethnic diversity, popular sovereignty, and religious pluralism. The republican revolution of 1776-1783 institutionalized these features in the new United States of America. But migration and growth, new technologies, ongoing conflict with First Nations and European states, and a new middle class culture of commerce, industry and reform increasingly strained the Union. By the mid-nineteenth century the United States faced the fate of so many post-colonial nations: irreconcilable sectional divisions.

FORMAT: Lecture

EXCLUSION: HIST 2330X/Y.06

HIST 2333.03: The Politics of Reform in Twentieth-Century America.

This course traces the domestic political history of the United States from the turn of the century to the Reagan era. Particular emphasis is placed on broad trends of change in those years: specifically, the growth of modern reform movements on American political culture. Some of the reform movements examined in the course are Populism, Progressivism, the New Deal, the civil rights movement, the women's movement, and the new student movement.

RECOMMENDED: A survey course in U.S. history

FORMAT: Lecture

EXCLUSION: HIST 2330X/Y.06

HIST 2335.03: Modern American Culture.

American culture is so ubiquitous today that it seems almost timeless. But it has a long and tumultuous history, one that both reflects and challenges the modern history of the United States. Ranging from high culture to mass culture, this course focuses on how major changes in American history have affected American literature, American cinema, and the everyday lives of American people. Documentary and feature films supplement the lectures.

RECOMMENDED: HIST 1300X/Y.06

FORMAT: Lecture/tutorial

HIST 2340.03: Cold War [Hi]stories.

The course is designed to introduce students to the [Hi]stories of the Cold War. The Cold War - or the period of intense conflict between the United States and the Soviet Union - manifested, some argue, in the post World War Two era and continued unabated until approximately 1989 or 1991.

FORMAT: Lecture

EXCLUSION: HIST 2336.03

HIST 2350.03: Lyes and the Lying Liars Who Tell Them; A Slightly unbalanced look at American History.

A fair and balanced look at the Right, which was published in 2004. Unlike Franken, however, who concentrates his attack on Republicans this course takes aim at a much more insidious beast, American Historians. By concentrating on questions of historiography and methodology this course is designed to introduce students to some of the most egregious problems in American history. The goal is to encourage students to think critically about how and why US history is written the way it is.

HIST 2381.03: Latin America.

This survey course offers an introduction to Latin America's history, peoples, and politics from pre-colonial times to the present day. The course builds a foundational understanding of Latin America and its past, focusing on a broad range of Latin American countries. We will pay particular attention to issues of race, class, faith, and gender.

FORMAT: Lecture

EXCLUSION: HIST 2386.03, HIST 2387.03

HIST 2382.03: Central America to 1979.

See course description for SPAN 2069.03 in the Spanish section of this calendar.

HIST 2383.03: Area Studies on Mexico and Central America.

See course description for SPAN 2070.03 in the Spanish section of this calendar.

HIST 2384.03: Cuba from Colonial Times.

See course description for SPAN 2109.03 in the Spanish section of this calendar.

HIST 2385.03: The Cuban Cultural Revolution.

See course description for SPAN 2110.03 in the Spanish section of this calendar.

HIST 2386.03: Colonial Latin America.

This lecture course offers an introduction to Latin America's colonial period. Stretching from pre-colonial times to independence, this course examines the peoples, politics, and cultures that comprised Latin America between the fourteenth and early nineteenth centuries. It pays particular attention to issues of race, gender, class, and faith.

FORMAT: Lecture

EXCLUSION: HIST 2381.03

HIST 2387.03: Latin America Since Independence.

This lecture course introduces Latin America's postcolonial history. Moving from the independence period in the early nineteenth century through until the present day, this course considers the peoples, politics, and cultures that came to define contemporary Latin America. This course pays particular attention to issues of race, class, and gender.

FORMAT: Lecture

EXCLUSION: HIST 2381.03

HIST 2388.03: Latin American Dictators: From Fact to Fiction.

See course description for SPAN 2130.03 in the Spanish section of this calendar.

HIST 2392.03: Introduction to Caribbean History (1450 to the Present).

This course provides a survey introduction to the history of the Caribbean basin with special emphasis on Cuba, Jamaica, and Saint-Domingue/Haiti. It covers the period from the mid fifteenth century to the present day. Themes covered include: European conquest, the emergence of plantation economies, African slavery, revolutionary movements, abolition and emancipation, multi-ethnic and interracial relations, relations with the US, nationalism, race, religion, and music.

FORMAT: Lecture

PREREQUISITE: none; but HIST 1501.03 and HIST 1502.03 are recommended

EXCLUSION: HIST 3392.03

HIST 2425.03: Africa Before 1900.

Modern historians of Africa continually battle popular misconceptions and myths about the African past. This course explores both the patterns of change within the continent and the means by which our knowledge of these has developed. Themes of particular interest include: dynamics along the desert-Sudan frontier, the Atlantic and Oriental slave trades, Indian Ocean connections, the spread of Islam, and the early stages of colonial rule.

FORMAT: Lecture/tutorial

EXCLUSION: HIST 2410.03 and 2421.03

HIST 2426.03: Africa Since 1900.

This course examines the nature of African states, societies and economies from the colonial period to the present, seeking the historical context for contemporary African dynamics. Some questions of interest include: How have development projects changed Africa? What are the myths and realities of neo-colonialism? How have Africa's political traditions supported quests for national stability? How have all these affected men's and women's lives?

FORMAT: Lecture/tutorial

EXCLUSION: HIST 2422.03

HIST 2502.03: The Ottoman Empire and Its Legacy in the Middle East, 1299-1923.

This course offers a survey of Ottoman history. It pays particular attention to the last two centuries of Ottoman rule and examines movements of reform, nationalism and resistance to European imperialism. Ottomanism, Pan-Islamism, Arabism and the emergence of Zionism are some of the issues covered. The course ends with World War One and the dissolution of the Ottoman Empire, two events considered the prelude to the making of the modern Middle East.

FORMAT: Lecture/discussion

HIST 2503.03: Medieval Islamic Civilization.

This course will introduce students to the Perso- Levantine world at the time of Muhammad's prophecy in the 7th century, and how the Arabian Peninsula was impacted by the creation and emergence of an Islamic society in Medina and Mecca. With the displacing of Byzantine control in the Holy Land and the collapse of the Sasanian Empire in Persia, the Arab-centric society of Mecca and Medina had become an empire of unprecedented size and ethnic complexity. The course will examine the respective Umayyad and Abbasid dynasties, as well as the slave states of the Saljuqs and Mamluks. The final portion of the course will focus on the gunpowder empires of the Ottomans, Safavids, and Mughals. The central theme of this course will be an examination of the Islamic community, or umma, from its earliest days and how it interacted over the next thousand years with different surrounding traditions and cultures in the Mediterranean, the Iranian Plateau, the Caucasus, the Steppe, India, and Southeast Asia. Another important theme will be the study of how various Islamic societies understood and resolved the age-old dynamic between tribal nomadism and hierarchical urbanism.

FORMAT: Lecture

CROSS-LISTING: RELS 2503.03

EXCLUSION: First-year students and HIST 2501.03

HIST 2504.03: A History of the Modern Middle East.

This course will focus on contemporary history of the Middle East from World War One onwards. It will pay particular attention to the Mandate period of the 1920s and 1930s, and the subsequent creation of the state of Israel in 1947. Other topics will be covered: Arab Nationalism, the Ba'ath parties, the rise of political Islam, and the Arab-Israeli wars.

FORMAT: Lecture/discussion

HIST 2505.03: Turbans and Berets: A Modern History of Iraq.

This course is a survey of the history of Iraq from late Ottoman history until the present. It discusses monarchical rule, the rise of the Baath, the regime of Saddam Hussein, the Gulf Wars and the American invasion of Iraq and its aftermath. It pays particular attention to the role of the different ethnic and religious groups in Iraqi politics and cultural life.

FORMAT: Lecture/discussion

HIST 2510.03: Modern History of South Asia.

This course will examine the region of South Asia from the mid-19th century - the height of the British Raj - to the present. Areas of concentration will include resistance to British rule, rise of the Congress Party, the 1947 Partition, and subsequent decolonization. The respective histories of modern India, Pakistan, and Bangladesh will be examined against the backdrop of nationalism, communalism, and regional conflict.

FORMAT: Lecture

HIST 2520.03: Ancient Israel.

See course description for CLAS 2220.03 in the Classics section of this calendar.

HIST 2614.03: Making Gender: Women and Men, Sex and Gender in Pre-Modern Europe.

This course examines the diverse and fascinating ways western cultures have shaped what it meant to be a woman or a man. Beginning in the time of the Roman Empire and continuing to the age of the French Revolution, the course examines such topics as eunuchs, fasting saints, female 'popes', changing notions of the physical differences between the sexes, and early struggles for women's rights.

FORMAT: Lecture/tutorial

CROSS-LISTING: GWST 2300.03

HIST 2615.03: Making Gender - Male and Female from the American Revolution to the present.

This course examines the diverse and fascinating ways western cultures have shaped the meanings of gender. The history of women informs us about the once little-known history of femininity. And, as a result, historical changes in definitions of masculinity become visible. The meanings of gender are explored in this course through topics such as: the doctrine of separate spheres, the family wage, the homosexual, imperialism, citizenship, welfare dependency, and infertility.

FORMAT: Lecture/tutorial

CROSS-LISTING: GWST 2301.03

HIST 2711.03: Struggles that Shaped the Modern World: 1600-1900.

European expansion from the 16th century reshaped the global economy, obliging many established societies to confront new challenges. Throughout Asia, the New World and Africa, old conflicts between and within states now had to confront the additional challenge of increasingly powerful European intruders. These encounters, featuring a complex mixture of military, cultural, technological, political and economic interactions, shaped the modern world as diverse groups struggled to pursue their interests through resistance, accommodation, coercion, cooperation and alliance. This course will explore the ways in which select societies navigated these encounters to better understand the intricate patterns of linkage and division that mark our world in modern times.

FORMAT: Lecture

HIST 2712.03: Freedom Fighters or Terrorists? Revolution, Nationalism and Anti-Imperialism in the 20th Century.

After World War II, African and Asian nationalists pressed home their claims for independence from colonial rule. During the Cold War, movements for social reform in the so-called Third World combined with these nationalist traditions to create many enduring sites of conflict. This course explores the strategies, successes and failures of these movements of opposition, assessing their impact in shaping the 20th century.

FORMAT: Lecture

HIST 2750.03: The Pirate and Piracy.

See course description for EMSP 2480.03 in the Early Modern Studies section of this calendar.

FORMAT: Lecture/discussion

CROSS-LISTING: EMSP 2480.03

RESTRICTION: Restricted to students in their 2nd year and above

HIST 2900.03: Introduction to the History of Art and Visual Culture.

Why have all human beings, at all times and in all places made pictures? This course will explore broad themes in global art production, such as sex, death, religion, race, knowledge, power and entertainment. Students will be encouraged to consider cross-cultural perspectives and trans-historical connections in their study of visual culture. They will also be introduced to the fundamentals of traditional art history through the chronology of western art production and stylistic movements. Students will develop the skills to describe, analyze and think critically about the visually saturated world in which they live.

HIST 2985.03: Totalitarianism and Science.

See course description for HSTC 2205.03 in the History of Science and Technology section of this calendar.

FORMAT: Lecture/tutorial

CROSS-LISTING: HSTC 2205.03

HIST 2990.03: Magic, Heresy and Hermeticism: Occult Mentalities in the Scientific Revolution.

See course description for EMSP 2360.03 in the Early Modern Studies section of this calendar.

FORMAT: Lecture/tutorial

CROSS-LISTING: HSTC 2120.03, EMSP 2360.03

HIST 3000.03: Topics in Early Modern European History.

Topics to be studied and researched will vary from year to year. In some years, the geographical focus may be Britain, while in others it will be western Europe more generally. Topics may include the religious reformations; print culture; political protest; and popular culture.

FORMAT: Lecture/discussion

PREREQUISITE: A course in European or British History

HIST 3002.03: The Medieval Church.

This course ranges far and wide over the history of the church in medieval Europe, adopting a thematic rather than a strictly chronological approach. Subjects of study include monasticism, heresy, education and the universities, town and cathedral, lay-clerical conflict, and "popular" concepts of religion. Each year several topics are examined in detail, with the help of original documents in translation, and using recent periodical literature and/or monographs. Students prepare two versions of a well-researched paper, and class discussions are used to explore related materials and readings in greater depth. Some prior knowledge of medieval European history is essential.

FORMAT: Lecture/discussion

PREREQUISITE: HIST 1004.06 or HIST 1005.06 or HIST 2001.03 or HIST 2002.03 or HIST 2101.03

CROSS-LISTING: RELS 3008.03

EXCLUSION: HIST 3021.03 and 3022.03

HIST 3003.03: Britain and the Celtic Realms 1066-1400.

This course examines the social, political and cultural history of the Gaelic speaking peoples of the British Isles from c. 400 to the mid-eleventh century, with particular emphasis on the interaction between the peoples of Wales, Scotland, and Ireland on the one hand, and the culture of the English kingdom on the other. The course examines such fundamental Celtic institutions as the family, kinship, the law, and the church down to the end of the first millennium, with a special focus on the various sources, written and unwritten, that inform the early history of the Gaelic speaking peoples and their lands. Classes are conducted in the form of lecture/tutorials, that is, a single lecture once a week is followed by a tutorial in which readings relating to the lecture topic are discussed. In an attempt to appreciate more fully the civilization of the period, the reading of contemporary works (in translation) constitutes an integral part of the course.

FORMAT: Lecture/tutorial

PREREQUISITE: A 1000- or 2000-level course in medieval history

CROSS-LISTING: HIST 5703.03

HIST 3006.03: Renaissance and Reformation Europe, 1348-1559.

A survey of the major themes, subjects, and personalities in western European history from the Italian Renaissance to the beginnings of the Protestant Reformation in the sixteenth century. Topics to be covered include the rise of

Italian city-states, Italian humanism, the arts, the emergence of centralized monarchies in northern Europe, religious sentiment, and the reform movement. Although most areas of western Europe will be dealt with, the focus will be on Italy, France, and Germany.

FORMAT: Lecture/discussion

PREREQUISITE: Any first- or second-year European history course

EXCLUSION: HIST 2005.03, 2019.03

HIST 3007.03: The European Enlightenment.

This course examines eighteenth-century European Enlightenment and the continuing controversies over its interpretations and its legacies. Class discussions focus on Enlightenment debates on religion, gender, science, non-European people, society and government, and the possible impact of the Enlightenment on the French Revolution.

FORMAT: Seminar

PREREQUISITE: One European history course

EXCLUSION: HIST 3012.03

HIST 3016.03: Meetings between Hellenism and the East to Philo the Jew.

See course description for CLAS 3016.03 in the classics section of this Calendar.

CROSS-LISTING: CLAS 3016.03, RELS 3018.03

HIST 3017.03: Meetings between Hellenism, Judaism, Christianity and Islam until the Renaissance.

See course description for CLAS 3017.03 in the classics section of this Calendar.

CROSS-LISTING: CLAS 3017.03, RELS 3019.03

HIST 3020.03: Fall of the Roman Republic.

See course description for CLAS 3205.03 in the Classics section of this calendar.

HIST 3030.03: Russian Intellectual History.

This course will examine intellectual developments in modern Russia, from Peter the Great to the late 20th century. Among the possible topics we will cover are: Russian thought and the West, the Russian intelligentsia and its relationship with the people and the state, Russian Orientalism, the roles of literature, arts, and media in Russian politics and society, the nature of dissent and revolutionary movements, as well as the functions of historical memory in Russian thought and culture. Throughout the course we will approach Russia as a multinational country that developed in constant and close interaction with the outside world.

FORMAT: Lecture/discussion

PREREQUISITE: Some Russian history required; Recommended are HIST 2021.03 or HIST 2022.03.

CROSS-LISTING: RUSN 3091.03

HIST 3040X/Y.06: Culture and Behaviour in France, 1550-1750.

This course, exploring the characteristics and complexities of elite and popular culture in Early Modern France, focuses primarily on the techniques of historical research. Heavy emphasis is placed on archival sources (translated and transcribed) relating to diverse facets of social, cultural and religious history, and on historical logic. The course also welcomes students from other branches of behaviour studies. No French required.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion

PREREQUISITE: FYP or some background in early modern or medieval history

HIST 3043.03: Napoleon Bonaparte.

The course examines Napoleonic historiography and focuses on selected representations of Napoleon that originated both during his life and after his death, and gained ascendancy at different points in time. The themes draw from a large repository of images and associations, and include: Napoleon as conqueror, as proto-fascist dictator, as the Little Corporal of the people, as heir of the French Revolution, as state builder, and as European visionary and unifier. The course offers an opportunity to develop analytical and critical skills, by discussing historiographical issues, such as the dynamic nature of historical representations the impact of circumstances in shaping historical representations, and the role of methods employed to examine the past in creating these representations.

FORMAT: Lecture/discussion

PREREQUISITE: One European history course

RECOMMENDED: HIST 3045.03

HIST 3045.03: The French Revolution and Its Interpretations.

The seminar examines the French Revolution, its origins and its interpretations, as well as the legacy of the French Revolution for modern political culture. Each time the seminar is offered it may focus on a specific theme related to the French Revolution.

FORMAT: Seminar

PREREQUISITE: One European history course

CROSS-LISTING: HIST 4045.03, HIST 5045.03

HIST 3049.03: The First World War.

Selected topics on the origins, course and consequences of the First World War, including strategic and political decision-making, the Western Front, Gallipoli and the Middle East, economic mobilization and the home fronts, the Eastern Front, the war at sea, and the peace treaties.

FORMAT: Lecture

HIST 3050.03: Europe and World War Two.

Selected topics on the origins, conflict and aftermath of the Second World War as this involved Europe, including Nazi foreign and occupation policies, strategic and political decision-making by the Allied and Axis powers, national resistance movements, and the wartime origins of the Cold War.

RECOMMENDED: HIST 2032.03, 2062.03, 2081X/Y.06, 2021.03, 2040X/Y.06, 2112.03

FORMAT: Lecture/discussion

PREREQUISITE: One 2000 level course in European or modern British history

HIST 3051X/Y.06: Fascist and National Socialist Movements in Europe, 1900-1945.

Fascism remains one of the most misunderstood and intriguing curiosities of modern history. At the height of its popularity and influence in the period between the World Wars, virtually every European country had one or more groups that were considered fascist or thought of themselves as such: in Germany and Italy, of course, but also in France, Spain, Hungary, Romania, and elsewhere. This course, structured as lecture/discussion, offers students the opportunity to explore the ideals, experiences, aspirations and political realities of this simultaneously threatening and fascinating historical problem.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion

PREREQUISITE: One European history course or permission of instructor

HIST 3056.03: The Holocaust: The Destruction of the Jews of Europe, 1933-1945.

The destruction of most of European Jewry by Nazism and its helpers during the Second World War is studied in the context of centuries-old religious anti-Semitism, nineteenth-century Jewish emancipation and the emergence of racist ideology, the political and social situation of Jews in eastern and western Europe after World War I, "legal" and bureaucratic persecution of German Jews culminating in mass killing at Auschwitz and other death camps, and the response of bystander nations to the perpetration of genocide.

RECOMMENDED: HIST 2032.03, 2062.03, 2081X/Y.06, 2021.03, 2040X/Y.06, 2112.03

FORMAT: Seminar

PREREQUISITE: One 2000-level course in European History

EXCLUSION: HIST 3055.06

HIST 3059.03: Confronting Fascism.

See course description for GERM 3450.03 in the German section of this calendar.

FORMAT: Lecture/tutorial

CROSS-LISTING: POLI 3449.03, GERM 3450.03

HIST 3060X/Y.06: Civilization of Baroque Italy/The Origins of Modern Italy.

A descriptive introductory survey of Italy from the late Renaissance to the French Revolution. Lectures and tutorials will feature a broad array of original sources in translation and numerous images. Taught in English.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/seminar

CROSS-LISTING: ITAL 3060X/Y.06

HIST 3073.03: History of Marine Sciences.

See course description for MARI 4664.03 in the Marine Biology section of this calendar.

HIST 3075.03: Science and Religion: Historical Perspectives.

See course description for HSTC 3200.03 in the History of Science and Technology section of this calendar.

HIST 3076.03: Science and Religion: Contemporary Perspectives.

See course description for HSTC 3201.03 in the History of Science and Technology section of the calendar.

CROSS-LISTING: CTMP 3201.03, HSTC 3201.03, RELS 3201.03

HIST 3076.03: Science and Religion: Contemporary Perspectives.

See course description for HSTC 3201.03 in the History of Science and Technology section of the calendar.

CROSS-LISTING: CTMP 3201.03, HSTC 3201.03, RELS 3201.03

HIST 3085.03: The Many Faces of Frederic Chopin: Problems in Modern Biography.

The seminar examines the process of creating biographical representations in history by focusing on Frederic Chopin (1810–1849) and the appropriations of his life, personality and music, that occurred both during his lifetime and after his death. By analyzing how Chopin's images were construed—and the manner in which he fashioned himself—the course explores broader themes, such as biography in historical writing, the nineteenth-century paradigm of biography writing, politics of biography, biography and the construction of the subject, biography as a control of cultural memory and the limits of biographical knowledge.

FORMAT: Seminar

PREREQUISITE: One European history course, permission of instructor

HIST 3090.03: Russian Society.

Basic institutions of 20th century Russian society are considered in their historical context, with special attention to the former role of the Party, official culture and literature, the workings of the economy, and social stratification.

RECOMMENDED: RUSN 1000.06, 2000.06

FORMAT: Seminar

PREREQUISITE: Some Russian history. Recommended HIST 2021.03 and HIST 2022.03

CROSS-LISTING: HIST 5090.03, RUSN 3090.03

HIST 3092.03: Russian Topics.

Topics to be studied and researched will vary from year to year. They may include the sources of Bolshevism/Leninism, the doctrine of peaceful coexistence, the position of national minorities, the role of literature (official and samizdat) and the press, the Cult of Personality, Khrushchev's "Thaw", Brezhnev, Gorbachev, and Yeltsin.

RECOMMENDED: HIST 2020X/Y.06 or 2021.03/2022.03 or RUSN 2022.03/2023.03

FORMAT: Lecture/discussion

CROSS-LISTING: RUSN 3092.03

HIST 3094.03: Vladimir Lenin and Leon Trotsky: Their Life and Works.

This course examines the intellectual and political biographies of V.I. Lenin and L.D. Trotsky, the main architects of the 1917 Revolution in Russia. Among the questions to be considered are Trotsky's relationships to Lenin and Stalin, their roles in the Revolution and Civil War, their analyses of the New Economic Policy, Trotsky's leadership of the Left Opposition, and their place in the history of Marxist theory and practice. The course will look at secondary literature on Lenin and Trotsky as well as selections from their writings.

FORMAT: Seminar

CROSS-LISTING: RUSN 3094.03

HIST 3096.03: The History of Ideas in Russia - From Official Nationality to Solzhenitsyn's Neo-Slavophilism.

This course examines some of the main currents in Russian intellectual history from the middle of the nineteenth century through the 1990s. Topics include

classical Slavophilism and early Westernism, Populism and Nihilism, Anarchism, Marxism, Leninism, Socialist Realism, anti-Stalinism, Glasnost, neo-Westernism (Sakharov), and neo-Slavophilism (Solzhenitsyn).

RECOMMENDED: HIST 2020X/Y.06 or 2021.03/2022.03 or RUSN 2022.03/2023.03

FORMAT: Lecture/discussion

CROSS-LISTING: RUSN 3096.03

HIST 3102.03: Seminar in Tudor History, 1485-1603.

This course examines in depth the major events, personalities, and developments of sixteenth-century England. Topics include the dissolution of the monasteries, formation of the state, the reformations in religion and their broader effects, royal propaganda, political culture, and the achievements of the Elizabethan age. Class discussions will rely on detailed readings of primary sources and historiographical debates. Students will be expected to produce a major, well-researched essay. Some prior knowledge of early modern English history is essential.

FORMAT: Seminar

PREREQUISITE: One previous British history course

EXCLUSION: HIST 2104.03

HIST 3103.03: Seminar in Stuart History, 1603-1688.

This course examines in depth the principal events of seventeenth-century English history. Topics include: the fear of Catholicism at home and abroad; the causes and course of the civil war, including the growth of radical political thought; the Cromwellian regime; the importance of Parliament; the Restoration; and the Revolution of 1688. Class discussions will rely on detailed readings of primary sources and historiographical debates. Students will be expected to produce a major, well-researched essay. Some prior knowledge of early modern English history is essential.

FORMAT: Seminar

PREREQUISITE: One previous British history course

EXCLUSION: HIST 2105.03

HIST 3105.03: The English Civil War.

An advanced course on one of the most tumultuous and eventful periods in British history, leading up to and including civil war and revolution 1642 to 1660. Select primary sources will be used in addition to secondary works. Topics to be studied include the social structure of early Stuart England; the Church and its critics; foreign policy; radical politics; religious sectarianism; and the impact of the war and its aftermath on the populace.

FORMAT: Lecture/discussion

CROSS-LISTING: HIST 5105.03

HIST 3107.03: The English Family and Household.

A number of commentators believe that "the family" is in crisis, its stability threatened by declining marriage rates, rising levels of divorce and single parenthood, and the emergence of alternative family forms. But what does the phrase "the family" actually mean? This course ponders the origins of the modern Western family by tracing the history of household organization, family and sexual relations in England between 1500 and 1800. Historians' attempts to define the family and to identify shifts in patterns of family life over time have often sparked controversy, as those who advocate grand explanatory narratives of change have had their views challenged by others who emphasize continuity and complexity. This course will analyze and assess these ongoing debates while encouraging students to make their own contributions through a careful reading of diaries, autobiographical writings, published court records, plays and other primary source materials.

RECOMMENDED: HIST 2104.03, 2105.03

FORMAT: Seminar

PREREQUISITE: Any second-year course in British or European history

HIST 3108.03: Topics in the Social and Cultural History of England, c. 1500-1850: Madness and Marginality.

"Marginality" is a sociological term that describes the situation of groups of people who are excluded or persecuted by the dominant culture. This course will examine such groups as witches, prostitutes, vagrants, and those deemed mentally ill. It will study the processes and politics of exclusion and regulation. It will ask how and why groups become labeled as beyond the boundaries of acceptable society and how such labeling affects practice and experience.

FORMAT: Seminar

PREREQUISITE: One previous history course

HIST 3109.03: Topics in the Social and Cultural History of England, c. 1500-1850: Everyday Life.

Aspects of daily life are often assumed to be “outside” of History, either unchanging or altered simply by natural forces of progress. This course will challenge such assumptions and look at the historically contingent practices surrounding such things as death, manners, sport, festivity, medicine, and education as experienced in early modern England. The course will address how and why such daily practices change, and the effects of such changes on the larger society.

FORMAT: Seminar

PREREQUISITE: One previous history course

HIST 3113.03: Britain in the Age of the First World War.

This course examines in depth major themes in British history from 1906 to the early 1920s, including the origins of the First World War, the experience and impact of war, wartime politics and strategy, the decline of the Liberal party and the rise of Labour, and post-war reconstruction.

FORMAT: Lecture/discussion

PREREQUISITE: One of the following: HIST 2032.03, 2111.03; 2112.03; 3112.03; 3314.03; 3116.03; 2030X/Y.06; 2081X/Y.06.

HIST 3114.03: Britain in the Age of the Second World War.

This course examines in depth major themes in British history from the early 1930s to the early post-war years, including the Great Depression, Appeasement and the outbreak of the Second World War, the experience and impact of war, wartime politics and strategy, the welfare state, the post-war Labour government and the transition to peace.

FORMAT: Lecture/discussion

PREREQUISITE: One of the following: HIST 2032.03, 2111.03; 2112.03; 3112.03; 3113.03; 3116.03; 2030X/Y.06; 2081X/Y.06

HIST 3210.03: Canadian Cultural Landscapes.

This course explores the origins of one “signature” landscape in each province. Contact with different geographies shaped distinctive regional histories; but at the same time, the story of each place is tied to the national narrative. These landscapes also illuminate how nature has been understood, used, and transformed since the fifteenth century.

FORMAT: Lecture and Discussion

CROSS-LISTING: CANA 3020.03, GEOG 3210.03

HIST 3220.03: Youth Culture in Canada, 1950s to 1970s.

The 1950s and 1960s were decades of often startling social change throughout North America in general and Canada in particular. This course will attempt to understand these changes and their impact on our society. The primary focus of the investigation is the popular youth culture of the time, the culture of “sex, drugs and rock n’ roll.” The course will look at economic and social factors underlying youth culture, at some of the major thinkers who influenced it (such as Marshall McLuhan and Herbert Marcuse), and the responses of authority to youth culture.

RECOMMENDED: HIST 2222.03

FORMAT: Lecture/tutorial

PREREQUISITE: One previous history course

HIST 3222.03: Topics in Canadian Social History, Nineteenth and Twentieth Centuries.

This seminar will explore major themes in Canadian social development. The topics discussed will vary from year to year but will emphasize such themes as: changing values in Canadian society; the nature of popular cultures; the relationship of order and disorder; the family; gender relations; and social classes. Approved with Canadian Studies.

FORMAT: Lecture/discussion or seminar

PREREQUISITE: A course in Canadian History

CROSS-LISTING: HIST 5222.03

HIST 3223.03: The Caring Society? - Welfare in Canada since 1900.

This course examines changes over the twentieth century in the ways Canadians have dealt with people's needs, their own or others', whether for income, housing, personal care, or other matters of survival and well-being. Both private and government forms of welfare provision will be studied, with the overall purpose of understanding why Canada came to have the kind of welfare state it does. Among

the topics that may be covered are: changing views on the origins and prevention of dependency; definitions of need; religious and ethnic variations in welfare practices; connections between welfare and women's lives; charitable fund-raising; promoters and opponents of government social programs; financing the welfare state; gender, race, constitutional, and class issues in welfare.

FORMAT: Lecture/discussion or seminar

PREREQUISITE: A 1000- or 2000-level course in Canadian history

CROSS-LISTING: CANA 3223.03, HIST 5223.03

HIST 3226.03: Law and Justice in Canadian Society, to 1890.

Discussion begins with an exploration of concepts of law and justice among Native Peoples prior to and during the occupation of the continent by the French and British. The course pursues crime and the criminal law as they relate to broader changes within the society and economy of New France, British North America, and Canada. We analyze shifting patterns and perceptions of crime and punishment; the social, economic, political, and ideological significance of the criminal law; the influence of Britain, France and the United States on legal developments. Approved with Canadian Studies.

RECOMMENDED: One previous history course

FORMAT: Lecture/discussion

EXCLUSION: HIST 3225.03

HIST 3227.03: Criminal Law, Crime and Punishment in Canadian Society, 1890 to the present.

Continuing the approach and themes of HIST 3226.03, this course studies crime, punishment, and the criminal law as they reflect social, economic, political, and ideological developments. As appropriate, these are placed within their international context, and in particular linked to the American system of law and justice. We pay attention to the impact of technological change on crime, detection of crime, enforcement mechanisms, and alternative means and methods of punishment. Approved with Canadian Studies.

RECOMMENDED: One previous history course

FORMAT: Lecture/discussion

EXCLUSION: HIST 3225.03

HIST 3245.03: French Canada.

Given in English for English-speaking students, this course studies the development of French-Canadian nationalist politics in their social, cultural, philosophic and economic contexts. While the emphasis is on Quebec-Canada relations, French-Canadians in the Maritimes, Ontario and the West will also be studied.

FORMAT: Lecture/discussion

PREREQUISITE: One course in Canadian history, or instructor's consent

CROSS-LISTING: CANA 3245.03

EXCLUSION: HIST 2240.03

HIST 3260.03: History of the Canadian West.

This course takes a thematic approach within a chronological framework, exploring social, economic and political topics in the development of Western Canada. Among the themes considered are Native economies, political dissent, labour radicalism, ethnic relations, and federal-provincial relations. Approved with Canadian Studies.

FORMAT: Seminar or lecture/discussion

PREREQUISITE: A course in Canadian history

EXCLUSION: HIST 2250.03

HIST 3272.03: Themes in the History of Atlantic Canada

This class provides students an opportunity to broaden their knowledge of historical trends in the region through archival research based on specific selected themes, which vary from year to year.

FORMAT: Seminar

PREREQUISITE: One class in Canadian History

HIST 3273.03: Nova Scotia: Pre-Confederation.

An exploration of character and circumstances in the history of provincial society, from the era of European “invasion” to the debate over entry into British American union. Approved with Canadian Studies.

FORMAT: Seminar

PREREQUISITE: One Canadian History course or instructor's consent

EXCLUSION: HIST 3270X/Y.06

HIST 3274.03: Nova Scotia: Post-Confederation.

This course surveys the history of Nova Scotia from the 1860s to the present. Topics include the debate over Confederation, the nature of Victorian society, the world wars, economic upheavals of the 1920s and 1930s, aboriginal and black communities, heritage and tourism, and Nova Scotia's political and intellectual relationship with the rest of Canada.

FORMAT: Seminar or lecture/discussion

PREREQUISITE: One Canadian History course or instructor's consent

EXCLUSION: HIST 3270X/Y.06

HIST 3282.03: Public History.

This course explores major issues and debates in the practice of history outside the academy. Against such theoretical concepts as the usable past and the challenge to the national narrative, we will examine critically the presentation and politics of history in the arts, media, historic places, memorials and state policy.

FORMAT: Lecture/discussion

PREREQUISITE: One second-year course in history

EXCLUSION: HIST 3222.02 in 2005-2006

HIST 3293X/Y.06: The Political Economy of the Car: Fordism and Post-Fordism in International Perspective.

This course examines the emergence and transformation of the global economic system known as Fordism, beginning with Henry Ford's revolutionary marriage of mass production with mass consumption in 1914. Topics to be explored include: technological change in the workplace; the relationship between industrial unionism and radical political movements; the gender, racial and religious politics of Fordism; and the growth of mass culture in the era of mechanical reproduction.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: At least one previous History credit; second-year standing or better

EXCLUSION: HIST 3292.03

HIST 3300.03: Topics in the History of the Americas, 1450-1870.

This course examines aspects of the historical development of the Americas from the beginnings of European imperialism in the fifteenth century to the emergence of nation states in the nineteenth century. It explores topics such as relationships between Aboriginal and European peoples; religion and socio-economic development; popular culture and gender; imperialism and the slave trade; the development of slavery; the rise of revolutionary ideologies; the American and Haitian Revolution; and the impact of civil wars.

FORMAT: Lecture/discussion

PREREQUISITE: Any one of HIST 2331.03, HIST 2006.03, HIST 2007.03, or permission of instructor

HIST 3333.03: The American Archives.

This course is designed to introduce students to the use of American historical archives. It will be taught only as a summer course and students will spend one week working at the Kennedy archives in Boston or the National Archives in Washington DC. During the course students will be researching a paper they have already completed on America in the Sixties. It is expected that by the end of the course students will be able to send their papers to an undergraduate journal for publication.

The archives can only accommodate a maximum of 12 students at a time. Students will need to have registered for this course, purchased their tickets, and secured accommodation by April 20th. Check with instructor for a confirmation about the location to be visited this year.

FORMAT: Seminar

PREREQUISITE: Students must have written a third year history paper on some aspect of America in the Sixties.

HIST 3350.03: Family and Community in North America, 1600-1900.

The family in North American society, from when the family was a model for social relations to the time when it was idealized as a private refuge. Among the topics considered are the role of the family in rural and urban communities, the demographic transition from high fertility and mortality, the reduction of the family's economic and educational autonomy, the role of ideology in shaping sex roles and child rearing, and the relations of family and community according to ethnic group, class and economic setting.

RECOMMENDED: A course in the sociology or social anthropology of the family

FORMAT: Lecture/discussion

CROSS-LISTING: GWST 3300.03

HIST 3358.03: Slavery, Gender, and Power: Women in Nineteenth Century America.

This course studies the tangled histories of slavery and gender in nineteenth century America. Principal topics include the lives of female slaves, the cult of domesticity, the rise of early feminism, the role of women in the destruction of slavery, and the tension between gender and race.

FORMAT: Seminar

CROSS-LISTING: GWST 3358.03

HIST 3360.03: Enslavement and Emancipation: African-Americans in the U.S. South to 1900.

This course examines slavery as a system of racial subordination and economic exploitation. Attention is given to the social, familial, and cultural life of the slaves, the role of slavery in shaping southern nationalism and national racial beliefs, and to reconstruction after the Civil War.

RECOMMENDED: HIST 2332.03

FORMAT: Seminar

PREREQUISITE: One second-year United States history course

HIST 3361.03: The American Civil War and Reconstruction.

The Civil War, occasioned by the formation of the Southern Confederacy and the Union government's refusal to recognize the existence of a separate southern nation, was a pivotal moment in the history of the United States. This course will examine the causes of the war, the forces behind slave emancipation, the military fortunes of the two combatants, and the efforts undertaken by the victorious society to alter the polity of the defeated South.

RECOMMENDED: HIST 2332.03

FORMAT: Seminar

HIST 3365.03: Vietnam War [Hi]stories.

This course is designed to introduce students to the impact of American involvement in the war in Vietnam. It will cover the major issues of the war including the political and social conditions in Vietnam; the reasons for American involvement; the development of United States policy toward Indo-China; the military conflict itself, and the legacy of the war. Rather than concentrating on the events as they unfolded, however, this course will focus on questions of interpretation and methodology. Toward this end, classes are designed to introduce students to both the historiography of the period under question and to some of the theories historians have used to think about and/or interpret the American experience in Vietnam.

CROSS-LIST: 5365.03

FORMAT: Lecture/discussion

PREREQUISITE: Any 1000 or 2000 level North American history course

HIST 3367.03: The History of Modern Intelligence in War and Diplomacy.

Intelligence, or accurate up-to-date information about unfolding world events, is crucial to the successful conduct of foreign policy. Nations survive or prosper based on their ability to gather, evaluate, understand and use information about the world. This course is designed to introduce students to the study of intelligence and how various intelligence systems function. The goal of the course is to enhance students' understanding of national intelligence communities in Britain, Canada, Russia and the United States. By examining the history of four different intelligence communities, we will begin to think critically about how intelligence fits into the policy process and how it is managed and controlled by the various governments.

FORMAT: Lecture/seminar

HIST 3369.03: America in the 1960s.

The "long sixties" – a period from the mid-fifties through the early seventies – was an extraordinary time in American history when a number of different groups attempted to transform American society. In many ways they were successful, and we are still living with the legacy of the sixties today. This course is designed to introduce students to the numerous issues, conflicts, and problems that confronted Americans in the 1960s. The course will focus on the various movements of social reform that characterized this period. We will also discuss the rise of the "new left" and the "new right" and what these ideological movements meant for American political culture. The overall goal of the course is to encourage students

to think about how individuals adjust their values to fit a particular political and cultural climate. Why do some people conform to political and social values, while others do not? Students will come at these questions from a variety of perspectives. Art, film, fiction, and music will be used throughout the course.

FORMAT: Lecture/discussion

PREREQUISITE: HIST 2340.03 or HIST 3367.03 or HIST 3372.03 or instructor's permission

HIST 3370.03: North American Landscapes.

This course is an introduction to the history of landscapes in North America from the fifteenth century to the present day. Each week we will explore how nature has been understood, used, and transformed in a variety of different places across the continent, and how the history of these landscapes tie into the larger histories of Canada and the United States.

FORMAT: Lecture/seminar

CROSS-LISTING: HIST 5370.03

HIST 3372.03: The Cuban Missile Crisis.

This course is designed to introduce students to the history of the Cuban Missile Crisis. In the class students will examine both Russian and American primary and secondary sources. The goal is to provide students with the necessary skills to think critically about how scholars historicize the past.

FORMAT: Lecture/seminar

HIST 3373.03: Spying on the World: The CIA in American History.

This course is designed to introduce students to the History of the Central Intelligence Agency. Over its history the CIA developed into one of the most infamous government agencies in American history. During the course students will examine topics such as the history of US Propaganda, political warfare, covert operations, spying, counter-intelligence and cryptography.

FORMAT: Lecture

HIST 3374.03: The Objectivity Question in American History.

This course is designed to introduce students to the historiographical trends in American history by examining some of the major historical topics of the last century including the Civil War, World War One, Progressivism, World War Two, the Holocaust, The Cold War and The Vietnam War. The course examines whether American historians have been successful in their quest for objectivity.

FORMAT: Lecture/discussion

PREREQUISITE: A second year history course

HIST 3374.03: The Objectivity Question in American History.

This course is designed to introduce students to the historiographical trends in American history by examining some of the major historical topics of the last century including the Civil War, World War One, Progressivism, World War Two, the Holocaust, The Cold War and The Vietnam War. The course examines whether American historians have been successful in their quest for objectivity.

FORMAT: Lecture/discussion

PREREQUISITE: A second year history course

HIST 3380.03: Slavery and Freedom in the Americas.

This course will take a broad perspective on slavery by examining some of the defining features of forced labor throughout the Americas over the course of four centuries (with occasional examples from elsewhere in the world). To complicate the overly simplistic slave-free dichotomy and develop a more nuanced understanding of the denial of freedom, we will investigate not only chattel slavery but other systems of free and unfree labor that existed in the Americas, such as the encomienda, convict labor, debt bondage, serfdom, pauper apprenticeship, poorhouse and prison work, indentured servitude and wage labor. We will consider definitions and justifications of slavery (including racist ideology) that have been used by past and present theorists. To better understand the extent to which the working environment shaped the lives of the enslaved, we will compare the living and working conditions of laborers in a range of historical settings. We will conclude with a survey of the rise of free labor ideology, the impact of emancipation in the Americas and a glance at forced and free labor systems in the new millennium.

FORMAT: Seminar

HIST 3390.03: Latin America: Revolution and Repression.

This course explores the experiences of revolution and repression in post-colonial Latin America. Focusing on twentieth-century Chile, Guatemala, and Mexico, we will explore the making and unmaking of revolutionary political projects, paying particular attention to matters of race, class, and gender.

FORMAT: Lecture/discussion

PREREQUISITE: Any second-year history course or permission of the instructor

EXCLUSION: HIST 3391.03, HIST 3392.03

HIST 3393.03: Indigenous Movements in Latin America.

This course considers the historical experiences of Latin American indigenous peoples. We explore four periods in postcolonial Latin American indigenous history: the early republican era (1800s-1910); the rise of pro-indigenous policies and activism (1920s-1930s); the submersion of indigenous issues to a class-based agenda (1940s-1970s); and the return of indigenous movements (1973-present).

FORMAT: Lecture/discussion

HIST 3394.03: Slavery, War and Piracy in the Early Caribbean.

The Caribbean was a world of rapid riches, constant brutality and death and it was the central interest of European powers as they expanded to the Americas. This course will explore the politics, economies, societies, and cultures on the islands within the Caribbean Sea and the mainland territories bordering on it during the early modern era. It will conclude by examining how this world was changed by the dismantling of the slave system and the age of revolutions. The course will demonstrate exactly why this region became the most important, economically, within the Americas and why European powers were so intent on defending it.

FORMAT: Seminar/lecture

HIST 3430.03: The Making of Colonial Africa, c. 1850 - 1930.

European colonial rulers and business interests laid out the framework of the sub-Saharan African colonial order from about 1850 to the 1920s, seeking ways to exploit African labour and natural resources. But imperial plans were limited and sometimes frustrated by African interests, and by historical dynamics within Africa, such as the rise of new merchants and Islamic revolution. This course assesses how the realities of Africa intersected with European imperial ambitions to profoundly change African society during this early colonial period.

FORMAT: Lecture/discussion

CROSS-LISTING: HIST 5430.03

HIST 3431.03: Struggles in The City: Labour, Migration and Urban Life in Colonial Africa.

There were many important urban centres in pre-colonial Africa; however, colonialism and industrialization changed both the pace and nature of urbanization. Old cities grew and new cities and mining settlements were established. Africans came to labour in these colonial cities for a host of reasons - some were forced off their homesteads when settlers and colonial governments appropriated vast tracts of land, others needed to enter the cash economy to pay colonial taxes; women and men sought new opportunities and adventure. This movement to the cities transformed the lives of millions of Africans. This course will focus on the lives of these urban dwellers, the development of urban cultures, the gendered character of urbanization, the creation of new social, political, economic and criminal networks, conflict and cooperation amongst urbanites, and the nature of colonial oppression and control in the cities.

FORMAT: Lecture/discussion

CROSS-LISTING: HIST 5431.03

HIST 3435.03: The Rise and Fall of African Slavery.

Many African societies, like pre-industrial societies elsewhere, used slaves as well as other forms of labour for a variety of purposes. The rise of external slave trades after 1700 — notably across the Atlantic and Sahara — transformed many African societies into specialized slave exporters. As external slave trades declined in the 19th century, many African economies used extensive internal slave labour to produce exports, a pattern colonial governments were slow to change in the 20th century. This course examines these changes in African slavery, and how they affected such issues as gender relations and class structure.

FORMAT: Lecture/discussion

HIST 3451.03: Southern Africa to 1860.

Examines the history of Southern Africa before the coming of the mineral revolution. The course focuses on South Africa, but with a regional perspective. Themes include the nature of Khoi and San societies, the expansion of Bantu-speakers, Dutch settlement and administration of the Cape area, the rise of the Zulu, Shaka's empire and the mfecane, the British takeover from the Dutch, the impact of the humanitarian movement and the Great Trek, African states and kingdoms in the nineteenth century, and the formation of the Boer Republics. FORMAT: Lecture/discussion

HIST 3452.03: South Africa since 1860.

The course examines not only the changes in race relations and politics, but also the effects of mining and other industries on rural and urban societies after the discoveries of diamonds and gold. Themes will include a regional perspective on British policies and the "imperial factor", the growth of Afrikaner and African nationalism, the Boer War and unification, the development of apartheid and South Africa's relations with the wider world.

RECOMMENDED: HIST 3451.03

FORMAT: Lecture/discussion

CROSS-LISTING: HIST 5452.03

HIST 3470.03: Wars and Revolutions in Nineteenth-Century Africa.

Africa in the nineteenth century was profoundly reshaped by a complex set of events. Muhammed Ali undertook to modernize Egypt. New Islamic states founded in the west developed plantation economies of unrivaled size. On the Atlantic coast, merchant princes made their fortunes supplying tropical goods for Europe's Industrial Revolution. In Central Africa the search for slaves and ivory both wreaked havoc and stimulated new states. In the south, the rise of Zulu power generated waves of conquest and consolidation. This course assesses the extent to which Africa was reshaped in the revolutionary century before colonial partition.

FORMAT: Lecture/discussion

PREREQUISITE: Any 2000-level African history course or permission of the instructor

HIST 3471.03: Wars and Revolutions in Twentieth-Century Africa.

Africa as portrayed in the Western media is a continent plagued by bloody conflicts. All too often these conflicts have not been carefully explained, rather they have been written off as "tribal" squabbles or incomprehensible episodes of barbarism. This course will examine several types of conflicts throughout the twentieth-century and will seek answers to such questions as: What initiated these conflicts? What were the combatants fighting for? How did these conflicts influence wider social, economic and political developments? In what ways did colonial policies and the colonial legacy influence African conflicts? What role has the international community played in African conflicts? What roles have African elites or local communities played in these conflicts? Grappling with these questions will allow us to move beyond simplistic explanations to acquire a better understanding of the wars and revolutions that have so marked twentieth-century Africa.

FORMAT: Lecture/discussion

CROSS-LISTING: HIST 5471.03

HIST 3500.03: Topics in Global History.

This is a special course dedicated to those topics that comprise multi-regional, global themes in the early modern and modern eras. Topics will vary, but possible course themes include: History of Slavery from a Global Perspective, Rise of Early Modern world-systems, and Colonialism and Ideology in Asia and Africa.

FORMAT: Lecture

PREREQUISITE: Instructor permission

HIST 3502.03: Thucydides and the Greek World at War.

See course description for CLAS 3502.03 in the Classics section of this calendar.

FORMAT: Seminar

CROSS-LISTING: CLAS 3502.03

HIST 3509.03: Arab Caliphs, Turkish Commanders, and Persian Viziers: Islamic History, 750-1200.

The focus of this course will be the different manifestations of Islamic civilization as it reached its zenith under a series of caliphates and sultanates across Spain, North Africa, the Levant, Iran, Central Asia, and South Asia between 750 and 1400. Emphasis will be placed on the role of heterodoxy and the emergence of numerous Islamic communities and movements (shi'ites, Sufis) as the 'Abbasid

empire (750-1258) struggled to maintain political and doctrinal unity. There will also be a discussion of the Turkic migrations and the corresponding rise in Turkic Islamic sultanates such as the Saljuqs and the Ghaznavids in the East, and how such developments were mirrored by the establishment of a number of Crusader states in the Holy Land. Lastly, we will examine the invasions by the Mongol khans and their devastating effect on the central Islamic world. This course will also discuss the incorporation of Hellenistic culture during the Abbasid period and the rise of Mutazilite ('rationalist') thought, notably in physical sciences, political studies, and philosophy, and how such syncretism was also reflected in terms of mysticism, art, architecture, and literature in the East as Islamic culture interacted with Zoroastrian, Buddhist and Hindu culture in Iran, Central Asia, and India.

FORMAT: Lecture/discussion

PREREQUISITE: HIST 2501.03 or HIST 2503.03 or CLAS 1010.06

CROSS-LISTING: CLAS 3601.03

HIST 3510.03: Sultans and Shahs: Politics and Religion in the Islamic Gunpowder Age (1500 - 1800).

Until the devastating Mongol invasions of the 13th century, the principal centers of Islamic power, culture, and thought had been based in Cairo and Baghdad. This course will examine the post-Mongol Islamic world, and how politics and religion were irrevocably changed with the annihilation of the Sunni Abbasid caliphate. Religious heterodoxy, combined with the power vacuum left by Chingiz Khan and his descendants, allowed for the emergence of a number of unique Turkmen states in Western Asia, the most famous being the Ottoman Turks of Anatolia. By 1500, innovations in military technology and the paper-making industry allowed for the emergence of centralized and bureaucratically-sophisticated 'gunpowder' empires in western and south Asia. This course will discuss the three most significant of these: the Ottoman Turks (based in Istanbul), the Safavid Persians (based in Isfahan), and the Mughal Indians (based in Delhi). Areas of focus will include: issues of political legitimacy, use of military 'slave' corps, orthodox and popular religious movements, tensions between nomadic and sedentary segments of society, innovations in cultural expression (poetry, art, architecture), scientific and philosophical development, and the penetration and impact of the Portuguese, English, Dutch, and French 'world economies' into Asia and the Indian Ocean. This course will also examine different debates regarding the 'decline of the East', and introduce the theoretical implications of how the Islamic world is approached by contemporary scholarship.

FORMAT: Lecture/discussion

PREREQUISITE: HIST 2501.03 or HIST 2502.03 or HIST 2503.03 or HIST 2504.03 or CLAS 1010.06

CROSS-LISTING: COMR 3510.03, HIST 5503.03, RELS 3510.03

HIST 3511.03: Ancient and Medieval History of the Persianate World.

This course is dedicated to studying those periods from antiquity to the medieval age where parts of Asia were influenced and defined by the Persian language and culture (i.e. Iran, the Caucasus, the Steppe, Mesopotamia, Central Asia, Anatolia, South Asia). This course will begin with examining the Aryan invasions of the 2nd Millennium B.C.E., and the eventual establishment of the Median and Achaemenid empires in the 7th – 6th centuries B.C.E. The Persian Wars between the Persians and the Greeks, culminating with Alexander the Great's invasion and the establishment of a Perso-Hellenistic state in the 4th century B.C.E. will be studied along with various issues associated with ancient Iran and Central Asia (Zoroastrianism, Manicheanism, Nestorian Christianity, Buddhism) during the Achaemenid, Seleucid, Parthian, and Sasanian periods. This course will also examine the impact of the Arab Muslim invasions on Iran and Central Asia in the 7th, 8th, and 9th centuries, and the contribution of Persian civilization to the growth and success of Islam during the Abbasid period (750-1258). Strong emphasis will be placed on examining various aspects of Persianate culture, namely poetry, literature, art, architecture, philosophy, and mysticism in the medieval period.

FORMAT: Lecture/discussion

PREREQUISITE: HIST 2501.03 or HIST 2503.03 or CLAS 1010.06

CROSS-LISTING: CLAS 3602.03

HIST 3512.03: Modern History of Iran.

This course will examine Iran from the 19th to the 21st centuries. It will begin with an examination of the Qajar dynasty and its responses to the imperial ambitions of Russia and England in the late 19th and early 20th centuries. In terms of Iranian domestic politics, we will look at the Constitutional Revolution of 1906, the rise and establishment of the Pahlavi regime, and the course of Iranian politics in an era of burgeoning nationalism as seen in the Mosaddegh period and the subsequent CIA-orchestrated coup d'etat in 1953. Particular focus will be placed on Reza Shah's monarchy, and the implications of the Revolution in 1979, not only in Iran, but throughout Afghanistan, Pakistan, and the Gulf Region. This

course will continue with the impact of the Islamic Republic of Iran in terms of the Iranian culture, religion and politics.

FORMAT: Lecture/discussion

PREREQUISITE: HIST 2502.03 or HIST 2503.03 or HIST 2504.03

EXCLUSION: First-year students.

HIST 3513.03: From Cairo to Cape Town: Religious Revival, Identity and Colonialism in Muslim Africa.

This course aims at introducing students to a number of themes and issues related to the history of Islam in nineteenth and twentieth century Africa.

FORMAT: Lecture/discussion

EXCLUSION: HIST 3551.03 in 2006-07

HIST 3515.03: Food for Thought: History and the Culinary Cultures of the Islamic World.

The symbol and meaning of food transcend pleasure and necessity. This course explores aspects of Islamic history through the lens of the culinary cultures in Muslim societies. It treats food as an essential factor in creating and shaping identities, social space and political discourses.

FORMAT: Lecture/discussion

HIST 3551.03: Topics in Modern History.

This course will explore major themes in the history of the 19th and 20th centuries. Topics discussed will vary from year to year, but the course will involve an in-depth examination of a selected subject in modern history, and may include an historiographical, comparative, or interdisciplinary dimension.

FORMAT: Lecture/tutorial or seminar

HIST 3750.03: Social History of Seafaring: Maritime Culture in the Age of Sail.

An examination of our maritime heritage. Within the context of these overlapping periods - the age of discovery, the age of sail, and the age of steam - the focus is on the development of merchant and naval fleets; the roles of the state, capital, and labour; and the features of seafaring culture. Special emphasis is given to the shipping industries and maritime traditions of this region. Approved with Canadian Studies.

FORMAT: Lecture/discussion

PREREQUISITE: One course in history or permission of the instructor

HIST 3920.03: Flesh and Bones in the British Atlantic.

What is a healthy body? How should we keep sickness at bay? How should we treat a sick body? In the early modern world, people grappled with the same basic questions about health and sickness that we do today. Obesity scares, health fads, quack doctors and alternative medicines are not recent phenomena. They have a long history. In this course we will explore the fascinating ways in which the inhabitants of the early modern British Atlantic understood both their own body and the diseased and healthy bodies they encountered. We will examine the ways in which people in the early modern era interpreted bodily differences and created bodily norms.

FORMAT: Lecture and discussion

HIST 3990.03: In Search of the Philosopher's Stone: The History of European Alchemy.

See course description for EMSP 3321.03 in the Early Modern Studies section of this calendar.

FORMAT: Lecture/seminar

CROSS-LISTING: HSTC 3121.03, EMSP 3321.03

HIST 4001.03: Directed Readings.

This is a course of individual instruction. Students may only register for this course with the written permission of a Faculty member and the Undergraduate Coordinator.

HIST 4003.03: Medieval Civilization.

Each year several topics are chosen, broad enough to be used as central themes in the context of which medieval civilization may be closely examined; for instance, monasticism, universities, peasants and popular culture. Such topics are studied in some depth, where possible using original sources in translation, and recent periodical literature and/or monographs. Students master the basic work in certain areas, but are also encouraged to develop particular topics more thoroughly. Class discussions are used to unravel contentious or difficult aspects. Students are required to contribute to such discussions and to write one major research paper. Some prior knowledge of medieval European history is essential.

FORMAT: Seminar

PREREQUISITE: HIST 1004X/Y.06 or HIST 1005X/Y.06 or HIST 2001.03 or 2002.03 or 3002.03 or 2101.03 or permission of the instructor

CROSS-LISTING: HIST 5701.03

HIST 4004.03: Crime and Society in Post-Conquest England.

This course explores the development of the criminal law in England between 1066 and 1500. After some introductory lectures on the legacy of Anglo-Saxon legal notions and the creation of the royal system of justice known as the "eyre," attention is given to a study of the development of a more sophisticated hierarchy of courts: the local tribunals presided over by justices of the peace and sheriffs, itinerant sessions headed by the justices of assize, and the central court of the King's Bench. The origins and elaboration of particular offences, including treason, felony (murder, rape, arson, burglary, and larceny), and trespass are examined. Emphasis is placed on the social aspects of crime in medieval England, and extensive use is made of recent periodical literature dealing with crime and its effect in this period. Students are required to contribute to weekly discussions of these materials and to write one major research paper. Some prior knowledge of English history is essential.

FORMAT: Seminar

PREREQUISITE: HIST 2100.06 or 2101.03 or HIST 3003.03 or permission of the instructor

CROSS-LISTING: HIST 5704.03

EXCLUSION: HIST 3004.03, 3009.03

HIST 4045.03: The French Revolution.

The seminar examines the French Revolution, its origins and its interpretations, as well as the legacy of the French Revolution for modern political culture. Each time the seminar is offered it may focus on a specific theme related to the French Revolution.

FORMAT: Seminar

PREREQUISITE: One European history course

CROSS-LISTING: HIST 3045.03

HIST 4061.03: Prelates, Peasants and Primates: From Italian History to the Behavioral Sciences.

Prelates Peasants and Primates is a directed readings course with an interest in the social sciences as they apply to historical societies. Weekly readings of classic historical scholarship will be complemented by articles and chapters of books drawn from works of sociology, evolutionary psychology, primate ethology, social psychology, and anthropology.

FORMAT: Lecture/tutorial

PREREQUISITE: Early modern Europe course

CROSS-LISTING: HIST 5061.03

HIST 4090.03: Soviet History Seminar.

This is an advanced seminar on the history of Soviet Russia from 1917 to 1991. We will explore the origins, mechanisms, costs, and outcome of perhaps the most ambitious and tragic historic experiment at creating a modern yet equitable society in a country far from conducive to such an undertaking.

FORMAT: Lecture

CROSS-LISTING: RUSN 4090.03

HIST 4104.03: Punishment, Crime, and the Courts in Early Modern England, c. 1550-1850.

This course explores the nature and development of the English criminal justice system during the period in which it first began to be exported to other areas, and at home had to deal with the turmoil wrought by reformation, war, and industrialization. This course will examine the uses of the law – did it act in the interests of particular people or groups, and if so, how? Historians have argued that the law had both coercive and symbolic purposes – that it served to enforce and legitimize social and economic structures. We will examine these arguments and their implications. Classes will progress thematically rather than chronologically; some will be devoted to a particular type of punishment, some to the different groups of people involved in the legal process, and others to historical debates.

FORMAT: Seminar

PREREQUISITE: Any course in pre-20th-century British History

CROSS-LISTING: HIST 5104.03

HIST 4105.03: The English Civil War: Society, Religion, and Politics, 1603 - 1660.

An advanced course on one of the most tumultuous and eventful periods in British history, that leading up to and including civil war and revolution 1642 to 1660. Select primary sources will be used in addition to secondary works. Topics to be

studied include the social structure of early Stuart England; the Church and its critics; foreign policy; radical politics; the military course of the war; religious sectarianism; and the impact of the war and its aftermath on the populace.

FORMAT: Seminar

PREREQUISITE: Any course in medieval or early modern British history

CROSS-LISTING: HIST 5105.03

HIST 4106.03: Topics in Early Modern English History.

Topics to be studied will vary from year to year, and may include the religious reformations, print culture, political protest, and state formation. The course will offer students the opportunity to examine in depth key features of English history in the sixteenth and early seventeenth centuries.

FORMAT: Seminar

PREREQUISITE: HIST 2106.03

CROSS-LISTING: HIST 5106.03

HIST 4110X/Y.06: Rome and the East.

See course description for CLAS 4535.06 in the Classics section of this calendar.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

HIST 4117.03: Winston Churchill.

This course is not designed to examine every aspect of Winston Churchill's life; rather, it focuses on major events in British and world history in which Churchill was a leading actor. Subjects for discussion may include: social reform and the welfare state; the return to the gold standard; Ireland; India, empire and decolonization; appeasement; grand strategy in the two world wars; the Anglo-American "Special Relationship"; and the Cold War. This course will also examine the historiography of these subjects and the impact of Churchill's own extensive writings in shaping the historical records.

FORMAT: Seminar

PREREQUISITE: HIST 3050.03 or permission of the instructor

HIST 4162X/Y.06: Advanced Seminar in Baroque Culture.

Taught at the State Castle, Cesky Krumlov in the Czech Republic, this course offers upper-level students in History, Theatre and related disciplines the opportunity to study European Baroque culture while surrounded by its material traces. Topics covered include: seventeenth- and eighteenth-century theatre and opera; historical costume; Baroque court life; and/or the history of Central Europe.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/tutorial

CROSS-LISTING: THEA 4735.06

EXCLUSION: THEA 4733.03, HIST 4160.03

HIST 4222.03: Topics in Canadian Social History, Nineteenth and Twentieth Centuries.

This seminar is an opportunity to explore in depth a specific theme or issue in Canadian history. The exact topic will vary from year to year, but will focus on some aspect of social, political or cultural history. The subject may be regional or national in scope. Past examples include cowboys in the North American west, native-newcomer relations, and the social history of health. Weekly discussions and a research paper emphasize historiographical debates as well as its significance to the story of Canada. Approved with Canadian Studies.

FORMAT: Seminar

PREREQUISITE: A Canadian History course at the 3000 level or permission of the instructor

CROSS-LISTING: HIST 5222.03

HIST 4250.03: Popular Culture in the Atlantic World, 1650-1850.

This course examines the history of popular culture in the Atlantic world. It focuses on using primary sources, such as diaries and journals, to explore the culture and customs in pre-industrial communities. We will discuss topics such as family relationships, popular ideologies, religious practices, economic culture, the role of gender, and attitudes towards sex. In addition to participating in weekly seminar discussions, students will present drafts of their research papers in class, and a revised version of the paper will be submitted at the end of term.

FORMAT: Seminar

PREREQUISITE: A History course at the 3000 level or permission of the instructor

CROSS-LISTING: HIST 5250.03

EXCLUSION: HIST 4222.03 (Fall 2004 and Fall 2005)

HIST 4255.03: Justice, Freedom, and the State in Twentieth Century Canada.

Debates about justice and freedom took tangible shape in 20th century Canada as new agencies were created at all levels of government. People who promoted the expansion of government claimed to be building a better Canada, where the challenges of enhancing both freedom and equality would be met by the building of democratic society. In this course, we consider whether or to what extent that was, in fact, what happened.

FORMAT: Seminar

CROSS-LISTING: HIST 5255.03

HIST 4260.03: Cowboys in North American History and Culture.

The cowboy is one of North America's most influential icons. This course examines the history of the ranching industry, and its role in such larger issues as land-use conflicts, models of masculinity, and race relations. We will then explore the representation of the cowboy in political and popular imagery, as in national identities, the arts and media, rodeos and exhibition, in Canada and the United States.

FORMAT: Seminar

PREREQUISITE: One full credit in Canadian or American history.

EXCLUSION: HIST 4222.03 in 2007-08

HIST 4300.03: Topics in Latin American History.

This seminar course involves a close examination of a select theme in Latin American history. The specific theme varies from year to year, and themes may be regional or continental. Possible topics include race and nation, gender and sexuality, or political radicalism. The bulk of the work involves preparation of a significant research paper and discussion of weekly readings.

FORMAT: Seminar

PREREQUISITE: Any Latin American history course

HIST 4360.03: Slavery and American Political Culture.

This course studies the relationship between slavery and American political culture from the Revolution until the Civil War. Major themes will include the expansion of American slavery, the political ideology of slaveholders, racism in American life, and the antislavery arguments of abolitionists and runaway slaves.

FORMAT: Seminar

HIST 4370.03: The American Revolution.

This course examines the American Revolution and the larger revolutionary era in the Atlantic World. It situates this critically important event in American history within the broader context of the Atlantic World. We will explore the origins of the Revolution and discuss its immediate impact on the British Empire and the colonies which became the new United States. We will examine the military conflict that led to American independence as well as the major ideological and social shifts that were part of the Revolution. We will try to determine the motivations of the various colonies in joining the Revolution and we will ask why some colonies in the British Empire chose not to revolt. We will conclude with the creation of the Constitution. We will explore the meaning of the revolution and American independence for various groups of people in the colonies, including colonial elites, women, Native Americans and African-Americans. We will also examine the Loyalists and the Loyalist diaspora. Throughout the course we will try to determine how revolutionary or radical this event was.

FORMAT: Seminar

HIST 4400.03: Topics in African History.

This course will undertake a careful, in depth examination of a select theme in African history. The theme will vary from year to year, but the aim will be to probe the deep complexities of Africa's past that recent scholarship is bringing to light. Themes may be regional or continental, and could include such topics as witchcraft, resistance, urban history, religious change, migration, or nationalism. The core of the work will be a significant research paper and seminar presentations. Classes will also involve the reading, presentation, and discussion of selected readings.

FORMAT: Seminar

PREREQUISITE: At least one third-year African history course or permission of the instructor

CROSS-LISTING: HIST 5400.03

HIST 4401.03: State Violence, Communal Conflict and Criminality in Modern South Africa.

South Africa is plagued by one of the world's highest rates of violent crime and social conflict. Despite the unprecedented level of public concern with violence,

little attention is paid to the historical origins of this phenomenon. This course explores the changing patterns of crime and violence since the 1890s.

FORMAT: Seminar

CROSS-LISTING: HIST 5401.03

HIST 4404.03: Crime and Punishment in Modern Africa.

This course will explore the extent to which state legitimacy and power can illuminate the trajectories of crime, policing and punishment from early colonial era in Africa to the present day.

FORMAT: Seminar

HIST 4475.03: African Intellectuals and the Modern Experience.

African thinkers have long pondered the challenges of the modern era, and have established lines of thought with which African intellectuals now address Africa's profound problems. But this engagement with the modern world has moved through different phases, just as the social location of the African intelligentsia has changed over time. This course will explore this intellectual history by setting specific writers in context, and then examining their original writings to ponder such questions as: What were the roots of "African Christianity"? How did African intellectuals respond to "scientific" racism? What was the appeal of Pan-Africanism? What was Negritude? How socialist was African socialism? How do postmodern insights about the invention of identity affect the idea of being "African"?

FORMAT: Seminar

CROSS-LISTING: HIST 5475.03

EXCLUSION: HIST 3475.03

HIST 4500.03: Topics in Modern History.

This seminar is intended specifically for students in the 20-credit Major and Honours degree programs in History. The specific content of the seminar varies from year to year, but generally involves examination of a subject in history in some depth, and may include an historiographical, comparative, or interdisciplinary dimension.

FORMAT: Seminar

PREREQUISITE: Permission of the instructor

CROSS-LISTING: HIST 5500.03

HIST 4510.03: Topics in Islamic and Middle East History.

This is a special course dedicated to a topic dealing with the Islamic world/Middle East from the medieval era to the present. Topics will vary, but possible course themes include: political thought in Islam, slavery in Islamic civilization, Nationalism and Ethnicity in the Middle East, and Women in the Islamic world.

FORMAT: Seminar

HIST 4545.03: Scripture and Statecraft: History of Islamic Political Thought.

This course is dedicated to understanding how Arab-centric tribal relations and networks initially defined Islamic politics in 7th-century Arabia, and how these definitions were later influenced by external 'imperial' and 'kingly' traditions (from Byzantines, Iranians, Indians). Muslim concepts of authority, however, were and still are defined by prophetic genealogies and charisma, and parts of this course will examine the shi'ite doctrine of imamate and the growth of millenarian thought. This course will also focus on the changes in political philosophy as a result of the violent arrival of the Mongols, and how traditional sunni notions of authority and state were displaced by the rise of Shi'ism and Sufism. Discussions will also focus on Muhammad ibn 'Abd al-Wahhab and Jamal al-Din al-Afghani and the extent to which Islamic political thought retooled and reappraised in the wake of European hegemonic imperialism. The remainder of the course will examine the rise of Islamism, its radicalization following World War Two, and the implications of Islamism and its opponents against the backdrop of the Islamic Revolution in Iran and other religio-political movements in the Middle East, Africa, and South Asia.

FORMAT: Seminar

PREREQUISITE: Any 3000-level course in Middle East history or permission of the instructor

CROSS-LISTING: HIST 5545.03

HIST 4550.03: Orientalism and Occidentalism.

This seminar is intended for senior undergraduate and graduate students interested in discussing how scholarship has historically approached non-Western and non-Christian areas of the globe. Dating back to Herodotus, Plato, and Isocrates, the description of "the Other" has been a consistent theme in European literary and

academic traditions. Whether or not it was the apologetic theological rivalry between Islam and Christianity in the Middle Ages, or the Humanist mania for non-European languages and ethnography, Occidental scholarship has historically been attracted to understanding and depicting the non-Occident. This course will examine the different European intellectual traditions of early modern Europe and how they laid the foundation for subsequent 19th and early 20th century characterizations of the Islamic world. Concurrently, however, there is evidence that a discourse of "Occidentalism" emerged among Muslim scholars and literati, and the ensuing dialectic between West and East framed the introduction of a number of political and religious ideologies to the Middle East, Iran, Central Asia, and India. There will be readings and discussions of a number of different scholars and theorists - Foucault, Chakrabarty, Said - who have commented on these discourses. Equal attention will be given to those Muslim scholars - Shayyagan, Soroush, al-Ahmad - who have written and commented on these dynamics between Western and Islamic civilization.

FORMAT: Seminar

PREREQUISITE: Any 2000 or 3000-level course in Middle East history or permission of the instructor

HIST 4555.03: A Dream Palace or a Bitter Reality: Arab Intellectuals and Their Ideologies in the Modern Period.

From Ottoman reforms to European colonialism, from the creation of the state of Israel to the invasion of Iraq, Arab intellectuals have been constantly evaluating the weight of the past, the burdens of the present and the prospects of the future. This course examines the ideas and ideologies of Arab intellectuals of Muslim, Christian and Jewish background and those who reside in the Arab world as well as those who have made their careers in the West.

FORMAT: Seminar

PREREQUISITE: Any 2000 or 3000 level course in Middle East history or permission of the instructor.

HIST 4600.03: Topics in Late Nineteenth- and Twentieth-Century American and British History.

This course will, depending upon the staffing in any particular year, examine a selection of themes in late 19th and 20th century British and American history, including, for instance, labour/labour history, political history (including state formation), cultural history, and history of race and national identity. Depending upon staffing, this course may concentrate upon the history of one country or may offer a comparative aspect. It will be intended for graduate or senior undergraduate students with some background in either British, American or Canadian history. Evaluation will be through research papers and, possibly, a final exam.

FORMAT: Seminar

PREREQUISITE: 3000-level course in modern British, American or Canadian history

CROSS-LISTING: HIST 5600.03

HIST 4613.03: Women's Suffrage from the French Revolution to World War I.

The question of women's participation in representative government first emerged during the French Revolution but by 1914, only two European countries had granted women the right to vote. This seminar explores the suffrage movement in the nineteenth century and the obstacles in the process of women's enfranchisement.

FORMAT: Seminar

PREREQUISITE: A modern European history course above the introductory level.

CROSS-LISTING: GWST 4315.03

HIST 4614.03: Topics in the History of Sexuality.

This seminar is intended for senior undergraduates. The specific content of the course varies from year to year, with a general focus on comparative, historiographic, and theoretical issues relating to the history of sexuality. Topics may include: the rise and fall of schools of sexology as embodied by Ellis, Freud, and Kinsey; sexual violence and harassment; the commodification of sexuality; the history of the body; sexuality and colonialism; gay and lesbian subcultures; and the intersection of class, race, and gender in sexual experiences, discourses, and communities.

FORMAT: Seminar

PREREQUISITE: HIST 2614.03 or GWST 2300.03 or HIST 2615.03 or GWST 2301.03 or HIST 3358.03 or GWST 3358.03 or GWST 2500.03 or GWST 2800.03 or HIST 3013.03 or GWST 3013 or permission of the instructor

CROSS-LISTING: GWST 4330.03

HIST 4639.03: Britain, Appeasement, and the Origins of the Second World War.

This course examines Britain's response to the rise of expansionist regimes in Germany, Italy, and Japan during the 1930s. Topics of discussion will include: the historical "roots" of appeasement; Neville Chamberlain and the Munich Conference; the Foreign Office; the Treasury; the armed services and British rearmament; the press and public opinion.

FORMAT: Seminar

PREREQUISITE: One previous British history course

HIST 4980.03: Reading and Writing "Postmodern" "History".

According to a number of post-modern theorists we have now reached the "end of history." History, they argue, as it is now taught at Dalhousie University, and many other universities around the world, is a dead or dying field of study of study. Taking this assumption as a starting point this course is designed to explore what alternative accounts of the "before now" could look like. The course itself consists of three parts. The first part will concentrate on some of the key ideas behind "postmodern" theory. In the second part we will examine various historical studies written by both modern and postmodern historians in order to understand the differences between the two interpretive approaches. In the third part of the course you will have the opportunity to write and present your own papers on the before now. You will do so by participating in an act of intellectual disobedience whereby you will reject many of the current rules of writing history in order to create your own "uncompromising, emancipatory message."

FORMAT: Seminar

PREREQUISITE: Fourth year history course

HIST 4986X/Y.06: The Varieties of History.

This course, reserved for fourth-year Honours students in History, is a seminar that examines questions concerning the nature and value of historical enquiry that have occupied thinkers since ancient times. Through a series of wide-ranging readings it explores the meaning of history in the context of European and non-European societies and the paradigms by which, through the ages, scholars have approached the study of the past.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: Concurrent enrolment in HIST 4990X/Y, or instructor's permission

HIST 4987.03: The Historiography of American Foreign Relations, 1776-1945.

This course is designed to introduce students to the history of American foreign policy from the Revolutionary War until World War Two. However, special emphasis will be given to events in contemporary American history, focusing on questions of interpretation and methodology. Toward this end, the seminars are designed to introduce students to both the historiography of the event under question and to some of the "theories" historians have used to interpret American foreign policy. The goal of the course is to provide students with the necessary tools to think critically about various forces at work in the development and execution of contemporary US policy.

FORMAT: Seminar

PREREQUISITE: A third-year 20th Century American History course

HIST 4988.03: The Historiography of American Foreign Relations Post-1945.

This course is designed to introduce students to the history of American foreign policy from the Origins of the Cold War to the demise of the Soviet Union. Rather than concentrating solely on the events as they unfolded, however, this course will focus on questions of interpretation and methodology. Toward this end, the seminars are designed to introduce students to both the historiography of the event under question and to some of the "theories" historians have used to interpret American foreign policy. The goal of the course is to provide students with the necessary tools to think critically about various forces at work in the development and execution of contemporary United States policy.

FORMAT: Seminar

PREREQUISITE: A third-year 20th Century American History course.

HIST 4990X/Y.06: Honours Essay in History.

All History Honours students and those in combined Honours programs in which History is their principal subject must write a substantial essay on a topic to be

chosen in consultation with the undergraduate coordinator and an individual faculty supervisor.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Honours Essay

PREREQUISITE: Admission to History Honours Programme

I. History of Science and Technology Program

The natural and human sciences play a central role in shaping fundamental aspects of our contemporary intellectual and material culture - how we live and the ways we think and talk about how we live. And this has been true, in varying ways, for a very long time. The History of Science and Technology (HOST) Program explores that long history and as such contributes to student's understanding of their contemporary world through understanding this vital aspect of our intellectual past. Our program is truly interdisciplinary in that we encourage students to cut across the sciences and the humanities by drawing on historical, philosophical and sociological disciplines. HOST courses are open to any student registered either at Dalhousie University or the University of King's College. We also welcome visiting students (attending on a Letter of Permission) from other universities.

Our three "core" courses (mandatory for the Combined Honours degree) cover in depth the key ideas, questions, figures and developments in the history of science for the historical periods of ancient and medieval, the early modern and the modern, respectively, always with an eye to how the study of nature has been situation within broader historical contexts. Our numerous electives branch out in a myriad of questions and topics throughout these periods, such as the relationship between science and religion, the representations of science in the media, and the role of technologies in shaping human experience.

HOST will be of interest to many kinds of students. In particular, students with interests and strengths in both the sciences and the humanities are especially at home. If you are a science student, gaining historical perspective will help you step back from your studies as well as encourage you to think critically. If you are an arts student, you will gain a humanities-based conceptual literacy about science that will become a vital aspect of your arts degree. Whatever stripe of student you are, learning about the history of science and technology will prove invaluable for helping you gain an informed, balanced and critical appreciation of science and its place in our past, our present, and maybe even our future.

II. Degree Options

Students registered in the BA or BSc degree at either King's or Dalhousie have two options for pursuing a degree in the HOST program: (a) as a Combined Honours degree; and (b) as a Minor. Students in the BJH program may pursue the Combined Honours or take electives in HOST.

A. Combined Honours

The Combined Honours BA or BSc degree in HOST is offered jointly by Dalhousie University and the University of King's College. Pursuing an honours degree requires of students a higher quality of work than is required by the other undergraduate programs (such as the 20 credit Major). Able and ambitious students are urged to take the Combined Honours in HOST, particularly if you want to leave open the possibility of doing graduate work in the future; adjudicating bodies in graduate schools (for both scholarships and program admission) tend to look more favourably on students with Honours-level degrees. In some cases the Honours degree is a requirement. In any case, choosing the Combined Honours degree is a positive statement concerning your seriousness and abilities as a student.

The Dalhousie departmental offerings within the History of Science and Technology Program include the other honours subject, a number of possible electives, and certain cross-listed courses. The other honours subject must be selected from the following list of Dalhousie departments and Programs: Classics, Creative Writing, English, French, Gender and Women's Studies, German, History, International Development Studies, Music, Philosophy, Political Science, Religious Studies, Russian Studies, Sociology, Social Anthropology, Spanish and Latin American Studies, Theatre, Biochemistry, Biology, Chemistry, Computing Science, Earth Sciences, Economics, Marine Biology, Mathematics, Microbiology and Immunology, Neuroscience, Physics, Psychology, and Statistics. Electives may be taken in any of the above-mentioned departments and programs as well as in the following: Canadian Studies, Contemporary Studies, Early Modern Studies, Music, and Oceanography.

Students who are eligible to take an honours degree should apply to the History of Science and Technology Office and the other department or program concerned as early as possible, normally before registering for the second year. All students must meet the degree requirements for the College of Arts and Sciences as detailed in the Degree Requirements section of this calendar, [page 125](#). Because it is an honours program, the quality of work required in the program is higher than that required in a 15 credit or 20 credit major program.

Applications for admission must be made to the Dalhousie department concerned and to the History of Science and Technology Office at King's on forms available from the Registrar at Dalhousie or King's. Students should apply to the program and seek advice on course selection before registering for the second year. If this is not done, it may be necessary to make up some work not previously taken. For each individual student, the entire degree program, including elective courses, is subject to supervision and approval by the Dalhousie department concerned and by a member of the History of Science and Technology teaching staff.

All History of Science and Technology students are encouraged to acquire (through appropriate courses) competence in languages which are relevant to their degree, interest and future plans.

The joint Dalhousie/King's History of Science and Technology Combined Honours Program is based on the general requirement that the full credits needed to graduate include:

1. In the case of a Combined Honours BSc degree, a minimum of 11 and a maximum of 14 credits beyond the 1000 level in the two honours subjects, but not more than nine and no fewer than five full credits being in either of them. The larger number of honours credits must be in the science subject. In the case of a Combined Honours BA degree, a minimum of 11 and a maximum of 14 full credits beyond the 1000 level in the two honours subjects, with no more than eight and no fewer than five credits in either.
2. Two to four - depending on the number selected in the Honours subject - elective credits.
3. The three "core" courses in History of Science and Technology: HSTC 2000.06, HSTC 3000.06, HSTC 4000.06.
4. One credit in a writing course (See Writing Course, [page 125](#) in the Degree Requirements section of this calendar).
5. One credit in a **single** language/humanities subject (Degree Requirements section 1, [page 125](#)).
6. One credit in a **single** social science subject (See Degree Requirements section 2, [page 125](#)).
7. One credit in a **single** life or physical science subject (See Degree Requirements section 3, [page 125](#)).
8. One credit in a **single** language for Bachelor of Arts (see Degree Requirements, [page 125](#)).

9. One credit in math for a Bachelor of Science (See Degree Requirements, [page 125](#))
10. No more than three full credit equivalents of the first five credits taken may be in a single subject.
11. An honours qualifying examination (see Degree Requirement: BA, BSc Combined Honours (4 Year)). History of Science and Technology students may choose to acquire this additional grade in either honours subject. In the History of Science and Technology Program, completion of the Honours Seminar (HSTC 4500.06) fulfils the requirement of the honours qualifying examination; or, with the approval of the director, an honours thesis (HSTC 4550.06) may also serve to fulfil the requirement of the honours qualifying examination. **For a Combined Honours BSc, the larger number of credits must be in a science subject.**

Students will be eligible to take an "Independent Reading" course only when they reach their third or fourth year. There will be six options for this course, but only one full credit or the equivalent may be taken in a year. No more than two full credits of this type may be taken during the course of study. The permission of a member of the teaching staff and the Director of the Program is necessary in order to take one of these courses, and their availability is strictly limited.

B. Minor

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

III. Courses offered at the University of King's College

All courses in the History of Science and Technology, excluding HSTC 1200, require students to have completed at least one year of university study (maximum five credits) prior to enrolment.

Note: Many of the following courses are not offered every year. Please consult the current timetable.

HSTC 1200X/Y.06: Introduction to the History of Science.

This course is a broad introductory survey of the central developments in the history of science, open to first and higher level students whatever their fields, and may be an introduction to further study in the history of science. It examines the most revolutionary figures from the Greeks to the modern period. The work of each of these had such a profound influence upon their own era and upon subsequent times that students in the humanities will find this course clarifies the nature of science and its cultural importance. Students in the sciences will recognize that their contributions have been permanently woven into the fabric we call science. In uncovering the sources and character of each of these transformations in the theory and practice of science, the course will challenge conventional views about the nature and place of science. This course may be taken as an arts or science credit.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms. Students who are registered as combined honours with History of Science and Technology are not permitted to take this course.

FORMAT: Lecture/tutorial

CROSS-LISTING: HIST 2074X/Y.06, HSTC 2200X/Y.06, BIOL 3503X/Y.06, SCIE 2000X/Y.06

EXCLUSION: HSTC 2201.03, BIOL 3502.03, HIST 3072.03, HIST 3074X/Y.06, SCIE 4000.03

HSTC 1800.03: Technology and Engineering: from the Stone Age to the Industrial Age.

Through case studies from the history of major engineering disciplines, this course examines the reciprocal influences of technology and engineering practice and social, political, and economic institutions from ancient times to the first industrial revolution.

FORMAT: Writing Requirement. Lecture/tutorial

HSTC 1801.03: Technology and Engineering: from the Industrial Age to the Cybernetic Age.

Through case studies this course examines the influence of the development of technology on our social political and economic institutions in the past 200 years and how this has shaped the roles and responsibilities of modern engineers.

FORMAT: Writing Requirement. Lecture/tutorial

HSTC 2000X/Y.06: Ancient and Medieval Science.

This course treats the study of nature in the ancient and medieval West by a combination of both thematic and chronological approaches. It considers the most general views of nature and science as well as specific developments within these general understandings. For the purposes of the course, the ancient and medieval West is divided into four time periods: the ancient, the Hellenic, the Hellenistic and Roman, and finally the medieval. Through the reading of selected works, developments in respect to the following are treated: I. Concepts of nature, II. Mathematics and Astronomy, III. Material and Elemental theories, IV. Biology and the Soul, V. The meaning of "techné".

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture/seminar

HSTC 2011.03/HSTC 3011.03/HSTC 4011.03: The Lecture Series.

In some years a lecture series course is offered. Students are allowed to take up to three such courses, one for each year of upper-level study. Each course will consist of six bi-weekly evening lectures given by specialists from Atlantic Canada and beyond, and a weekly two-hour seminar. The lecturers will offer students reflections on a number of contemporary issues and themes. Each year a different theme will be explored.

FORMAT: Seminar/evening lectures

HSTC 2105.03: The Life, Science and Philosophy of Albert Einstein.

In 1999, *Time Magazine* named Albert Einstein "Person of the Century" for the impact his scientific work had not only on physics, but also on culture in general. In this course, we will explore how Einstein's proof of the existence of atoms, his belief in light particles (the photons), and his application of the famous principle of relativity revolutionized both modern physics and philosophy. We will also pay attention to the main events of Einstein's life (his divorce, the rise of Nazism in Germany, etc., Einstein's pacifism and Zionism, his attitude toward religion and his personal relationships with other scientists (Poincaré, Bohr, etc.) in order to better understand the personal, social and cultural contexts in which these revolutionary theories were developed.

NO prior knowledge of physics, mathematics, or philosophy is expected. This course is for everyone with interest in science, but is not a science course (mathematics will be kept at a minimum).

FORMAT: Lecture/discussion

HSTC 2120.03: Magic, Heresy and Hermeticism: Occult Mentalities in the Scientific Revolution.

The 'scientific revolution' is ordinarily construed as the triumph of reason over superstition, of science over sorcery. This course argues that the rhetoric of 'enlightenment' conceals a deep continuity between Modern science and the occult traditions of the Middle Ages and the Renaissance. The prototype of the experimental scientist is the Faustian magus. We investigate the role of Hermeticism, magic and the occult in the scientific revolution and the persistence of these esoteric currents in later movements, from German *Naturphilosophie* to Jungian psychology.

FORMAT: Lecture/tutorial

CROSS-LISTING: HIST 2990.03, EMSP 2360.03

HSTC 2200X/Y.06: Introduction to the History of Science.

This course is a broad introductory survey of the central developments in the history of science, open to first and higher level students whatever their fields, and may be an introduction to further study in the history of science. It examines the most revolutionary figures from the Greeks to the modern period. The work of each of these had such a profound influence upon their own era and upon subsequent times that students in the humanities will find this course clarifies the nature of science and its cultural importance. Students in the sciences will recognize that their contributions have been permanently woven into the fabric we call science. In uncovering the sources and character of each of these transformations in the theory and practice of science, the course will challenge conventional views about the nature and place of science. This course may be taken as an arts or science credit.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms. Students who are registered as combined honours with History of Science and Technology are not permitted to take this course.

FORMAT: Lecture/tutorial

CROSS-LISTING: HIST 2074X/Y.06, HSTC 1200X/Y.06, BIOL 3503X/Y.06, SCIE 2000X/Y.06
EXCLUSION: HSTC 2201.03, BIOL 3502.03, HIST 3072.03, HIST 3074X/Y.06, SCIE 4000.03

HSTC 2202.03: The Beginnings of Western Medicine: the Birth of the Body.

This course will look at how the body was viewed in ancient scientific theory and practice. Western medicine as a rationalized scientific practice finds its origins in the ancient Greek philosophical and medical texts attributed to "Hippocrates". Through a close reading of selected ancient medical texts, this course will explore ideas of how the human body is constituted, how it relates to the Cosmos as a whole, what the role of the physician was seen to be, and how illness and healing were seen as changes in the balance of the components of the body.
FORMAT: Lecture/seminar

HSTC 2204.03: The Darwinian Revolution.

Arguably, the Darwinian Revolution marks the greatest revolution in our conception of nature and our place within it, deeply challenging received views on chance, teleology, history, the soul and nature. This course opens up the historical and philosophical background to the Darwinian revolution, the main episodes of that revolution and the consequences for contemporary moral, scientific and social theory. Emphasis will be placed on reading contemporary primary texts.
FORMAT: Lecture/seminar

HSTC 2205.03: Totalitarianism and Science.

The question of who has authority over funding, direction and priorities of modern science is a central political concern. This course considers the case of totalitarian states (USSR and Nazi Germany) and consists of two parts. Part I analyses the essential features of totalitarian regimes. Part II concentrates on the fortune of particular sciences (medicine, biology, physics) under them.
FORMAT: Lecture/tutorial
CROSS-LISTING: HIST 2985.03, CTMP 2205.03

HSTC 2206.03: Bio-Politics: Human Nature in Contemporary Thought.

To what extent do biology and culture determine what it is to be human? Drawing on theorists ranging from Foucault to Steven Pinker, this course will examine the recent political, moral and existential issues raised by attempts to answer that question. Topics will include socio-biology, evolutionary psychology, the construction of human kinds and the problem of free will.
FORMAT: Lecture
CROSS-LISTING: CTMP 2203.03

HSTC 2208.03: Science and Medicine in Islamic Societies, 700–1500.

Through a combination of primary and secondary source readings, this course explores some of the major trends and debates within science and medicine in Islam from the seventh century till the early modern period. A special emphasis is placed on situating these developments within the larger political, social and institutional structure of Islamic societies.
FORMAT: Seminar
CROSS-LISTING: RELS 2208.03

HSTC 2310.03: Women and Gender in Early Modern Science.

This course will explore the roles of women, and questions about women's nature, in the development of Early Modern science. The course will consider several interrelated aspects of scientific culture in the sixteenth, seventeenth, and eighteenth centuries: first, we will look at the place of women in the scientific institutions of the time. Although women were, for the most part, excluded from universities and scientific academies, some women were able to do scientific work through their participation in salons and craft guilds. The second part of the course will look at the contributions of some particular women to the fields of physics, astronomy, botany, and medicine. We will then examine how science interpreted sex and gender. We will pay special attention to the biological sciences and their treatments of sex differences, conception, and generation. We will consider how these biological theories were influenced by, and at the same time used to uphold, various political and social structures. Finally, the course will explore the ways in which gender and nature were portrayed in the broader cultural context. We will, for example, discuss the ways in which women were depicted as scientists and as symbols of science in art and literature.
FORMAT: Lecture/seminar
CROSS-LISTING: EMSP 2310.03, GWST 2310.03

HSTC 2340.03: The Origins of Science Fiction in Early Modern Europe.

In 1500, literate Europeans lived in a bounded, geocentric universe. By 1800, the sun had replaced the earth at the centre of a limited planetary system situated in infinite space. These changes prompted early modern philosophers, scientists and writers to consider the possibility that the universe might contain a plurality of worlds. This course will explore the ways in which the "plurality" theme was developed in some of the earliest works of science fiction. We will consider this theme as it appears in stories of intergalactic voyages, utopian societies, and encounters with extraterrestrial beings, paying special attention to the ways in which early modern writers used these tales to speculate on philosophical, political, and scientific issues.
FORMAT: Seminar
CROSS-LISTING: EMSP 2340.03
EXCLUSION: EMSP 2330.03

HSTC 2400.03: Science and the Media.

From the first Babylonian astronomical records on cuneiform to the public understanding of science on television, the various media have long been crucial to the success and spread of science. This course provides a history of science in the media from the ancient and medieval use of geometrical diagrams, astronomical figures and anatomical illustration through early modern printed texts, popular broadsheets and color botanical plates all the way to the ubiquity of science in literature, cinema and on the Internet. This expanding presence of science in the media is examined against the backdrop of three revolutions: literary and artistic (ancient and medieval worlds), mechanical (early modern period) and electronic (contemporary age). Specific themes considered include the increasing accuracy of scientific illustration, the rise of scientific journals, public scientific demonstrations, science in poetry and prose fiction, science and art, radio and television documentaries, the advertising and marketing of science, scientific apocalypses and techno-utopias, bioethics, Soviet era technological iconography, environmentalism and science-religion relations in the journalistic press, science fiction from H.G. Wells' *War of the Worlds* to *Star Wars* and *Jurassic Park*, and science in computing and cyberspace.
FORMAT: Lecture/seminar
CROSS-LISTING: JOUR 2400.03

HSTC 2500.03: Science Fiction in Film.

This course studies portrayals of science and technology in science fiction film. Themes examined include the "mad" scientist; science as malevolent versus science as salvation; the survival of humanness in a technological world and the contrary trend of dehumanisation in the face of advancing technology; scientific utopias and dystopias; science fiction as self-fulfilling prophecy; voyages into space and inner space; time travel; computers and artificial intelligence; nuclear holocaust and environmental apocalypses; alien life; genetic engineering; imagined technocracies; and science fiction as a vehicle for social and political commentary. Films screened will include classics of science fiction such as *Metropolis* (1927), *The Time Machine* (1960), *Solaris* (1972), *Bladerunner* (1982) and *The Matrix* (1999). These feature films will be supplemented with footage from civil defence films, government celebrations of science and technology along with science documentaries. Films will be accompanied in class by discussion and criticism and students will also read scholarly treatments of cinematic science fiction. Evaluation will be based on participation, written work and a final examination.
FORMAT: Film screening/Discussion

HSTC 3000X/Y.06: The Scientific Revolution.

This course examines the origins and meanings of the "Scientific Revolution", the term now used to describe the spectacular changes in world view in the 16th to 18th centuries when the sciences both reinterpreted and broke away from the received ancient and medieval world views. Surveying traditional and revisionist historiography, this course will explore the new conceptions of mechanism, the body, matter and motion that emerged in this period, along with the new methods of experiment and mathematical reasoning; the discoveries in astronomy, biology and physics; and the rise of public and commercial science in the 18th century. The result of individual innovation, internal reform, the impact of other fields of thought and the appropriation of non-Western ideas and technologies, these shifts in outlook will be examined against the backdrop of the broader transformations that took place in culture, society, politics, religion and philosophy. Emphasis will be placed on reading the primary texts of notable figures such as Copernicus, Galileo, Descartes and Newton, as well as the activities of men and women who existed on the peripheries of science, either by virtue of marginalization or by belonging to anti-science oppositional cultures.
NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
FORMAT: Lecture/seminar

HSTC 3011.03: The Lecture Series.

In some years a lecture series course is offered. Students are allowed to take up to three such courses, one for each year of upper-level study. Each course will consist of thirteen bi-weekly evening lectures given by specialists from Atlantic Canada and beyond. The lecturers will offer students reflections on a number of contemporary issues and themes. Each year a different theme will be explored.
FORMAT: Seminar/evening lectures

HSTC 3120.03: Distilling Nature's Secrets: The Ancient Alchemists.

This course explores the scientific and esoteric currents which contributed to the rise of alchemy in the late Ancient World. This 'sacred science' of transmutation was a cultural synthesis of Greek natural philosophy, late pagan mysticism, and Near Eastern metallurgic technologies. The physical processes enacted in the alchemical laboratory -where metals were decomposed, purified and transformed - were experienced inwardly by the alchemist himself as a spiritual drama of death and resurrection, analogous to the rites of initiation in the mystery cults. Alchemy was thus a form of ritual technology, aimed simultaneously at the purification of self and cosmos. The texts studied in the course range from technical manuals preserved on papyrus, to the highly esoteric and visionary works of the Hermetic philosopher Zosimos (circa 300CE). The relation between these technical and occult dimensions will be of central concern.

FORMAT: Lecture/seminar

HSTC 3121.03: In Search of the Philosopher's Stone: The History of European Alchemy.

This course traces the development of alchemical theories and practices in the Medieval Latin West up to the emergence of early modern chemistry. It employs a multi-disciplinary approach which treats the scientific, technological, esoteric and iconographic dimensions of alchemy as interdependent. The entire development of European alchemy is covered from the transmission of the Greek and Islamic alchemical traditions in the 12th century up to Newton, whose alchemical theories represent a point of transition to early modern chemistry in one direction, and to a more spiritualised occult philosophy in the other.

This course is independent of HSTC 3120.03. All students interested in the intersections of science, magic and mysticism are welcome.

FORMAT: Lecture/seminar

CROSS-LISTING: HIST 3990.03, EMSP 3321.03

HSTC 3130.03: The Origins of Chemistry: From Alchemy to Chemical Bonds.

This course explores the scientific and social development of modern chemistry from the work of 17th-century alchemists to the chemical revolution of Lavoisier and Dalton, the beginnings of organic chemistry and biochemistry, the development of the periodic table, and the modern understanding of atomic structure and chemical bonds.

Notes: There is no science pre-requisite for the course.

FORMAT: Lecture/seminar

HSTC 3150.03: Nature and History.

In the nineteenth and twentieth centuries, the study of the natural world and historical thought have been closely linked. Participants in the seminar will read texts which helped to define ideas of history in the era after the Enlightenment and consider how these ideas influenced, and were influenced by, developments in scientific thought. The seminar will consider how nature and history are related in idealism, historical materialism and the thinking of the evolutionists, and how this connection is rejected by Nietzsche, Freud and Foucault.

FORMAT: Seminar

CROSS-LISTING: CTMP 3250.03

HSTC 3200.03: Science and Religion: Historical Perspectives.

Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the dawn of civilization to the end of the eighteenth century, with a special focus on the early modern period. From an examination of the biblical view of nature, ancient Babylonian astrology and divination and Plato's *Timaeus*, this course moves through a treatment of the centrality of theology to Medieval science on to natural theology and the "Watchmaker" Design Argument of the seventeenth and eighteenth centuries. Models of conflict, harmony and complementarity offered to characterize relations between science and religion are explored through case studies such as Galileo's controversy with the Church and instances where religious belief inspired scientists like Boyle and Newton. Claims that certain confessional traditions (notably Protestantism and its dissenting offshoots)

facilitated the rise of modern science are also appraised. Science-religion relations are examined both from the standpoint of mainstream religion and with respect to religious heterodoxy, prophecy, alchemy, magic and witchcraft. This course employs examples from Islamic cultures in addition to the Judeo-Christian tradition. Special features include a focus on primary texts and guest lectures by scientists.

FORMAT: Lecture/seminar

CROSS-LISTING: EMSP 3330.03, HIST 3075.03, RELS 3200.03

HSTC 3201.03: Science and Religion: Contemporary Perspectives.

Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the rise of Darwinism in the early nineteenth century to the contemporary postmodern age. From an examination of nineteenth-century "Scriptural geology" and the religious impact of Darwin's *Origin of Species* (1859), this course moves on to such contemporary topics as the religious interpretations of quantum mechanics, the Big Bang, the anthropic principle, medical science, bioethics, evolutionary psychology, chaos theory, aesthetics in nature, science fiction and extra-terrestrial life (including SETI). Case studies of "conflict" emanating from Darwinism, the Scopes Trial and the on-going Creation-Evolution debates are contrasted with examples of harmony and interdependence between science and religion in the careers of 19th and 20th century scientists, along with phenomena like the new Intelligent Design (ID) movement. The religious scope of the course in intentionally wide-ranging, and examinations of science-religion interaction within native American, African and the New Age spirituality are added to treatments of traditional eastern and western religion. Special features include a focus on primary texts, the use of film and guest lectures by scientists.

FORMAT: Lecture/seminar

CROSS-LISTING: CTMP 3201.03, RELS 3201.03, HIST 3076.03

HSTC 3205.03: Knowledge is Power: Francis Bacon and the Birth of Modernity.

Francis Bacon (1561-1626) helped shape our modern assumptions that natural knowledge (science) will lead to both human flourishing and political power. By reading some of his works in their late Renaissance context we will reflect on the birth of those assumptions, thus gaining a new perspective on their modern form.

FORMAT: Seminar/lecture

CROSS-LISTING: EMSP 3340.03

HSTC 3212.03: The Biosphere: Global Perspectives in Science and Philosophy.

Intended for both science and humanities students interested in ecology, this course will focus on the historical, philosophical and methodological aspects of central concept of "biosphere" in order to provide a picture of the history and actual state of affairs in the study of global ecology. We will address both purely scientific and philosophical topics such as the holism vs. reductionism debate; the compatibility of the global approaches with the most influential version of contemporary Darwinism (STE); pre-Socratic precedents for the notion of biosphere; modelling nature in the modern global ecology and many others.

FORMAT: Lecture/tutorial

HSTC 3250.03: Going Wild: Exploring the Animal Nature of Humans.

The major concentration of this course is the question of how and to what extent evolutionary sciences can explain the brilliance and insanity of the "moral animals" including the current course of the Western civilization. We will discuss the evolutionary foundations of romantic (!) love, suicide, sports, diets, and sexual self-identification.

FORMAT: Seminar

EXCLUSION: HSTC 3615.03

HSTC 3310.03: Hidden Worlds: Microscopy in Early Modern Europe.

Microscopes were introduced into Europe at the beginning of the seventeenth century. In the words of Robert Hooke, the microscope opened up a "new visible World" to the understanding -- a strange new landscape populated by vast numbers of new creatures. This course will explore the influence the microscope, and the micro world that it opened up, in the development of early modern science. In the first part of the course, we will take a close look at early microscope technology and its evolution in the seventeenth, eighteenth, and early nineteenth centuries. The second part of the course will explore the role of the microscope in the evolution of early modern science. We will, for example, consider the role of microscopy in the emergence of the new mechanical

philosophy and the new experimental science. We will also discuss the histories of some scientific theories (for example, of contagion and generation) that made particular use of observations made with microscopes. Finally, the microscope's revelation of "new worlds" raised conceptual difficulties that puzzled scientists and philosophers alike. In the final part of the course we will consider the challenges that new kinds of experience raised for early modern philosophy, as well as the possible influence of philosophical debates on the acceptance of the new technology.

FORMAT: Lecture/seminar

CROSS-LISTING: EMSP 3310.03

HSTC 3331.03: History of the Marine Sciences.

Oceanography did not take definable form until late in the 19th century. Its roots lie not in the Challenger Expedition of the 1870s, the popular stereotype, but partly in ancient cosmologies and geography. In this course, the history of marine sciences, including oceanography, is traced from the ancients to the 20th century. The cosmologies of the ancient world, voyages of discovery from the 15th through the 18th centuries, the scientific revolution of the 17th century, the development of biology, physics, chemistry and geology in the late 18th and 19th centuries, all contributed to a gradual enlargement and transformation of human interest in the oceans.

Since the late 19th Century, biological, physical, chemical and geological aspects of the marine sciences have grown nearly independently. The scientific, institutional, and social setting in which these nearly autonomous sub-disciplines developed is emphasized.

FORMAT: Lecture 3 hours

CROSS-LISTING: HIST 3073.03, BIOL 4664.03, MARI 4664.03, OCEA 4331.03/5331.03, SCIE 4001.03

RESTRICTION: Restricted to 3rd year students and above.

HSTC 3411.03: Feminism and Science.

Science has been the subject of intense scrutiny by contemporary feminist theorists. The course will examine the various feminist critiques of natural science, as well as the positive proposals that feminism has brought to science and scientific culture. Questions that will be addressed include: Is the style of science gendered? Has feminism influenced the content of various sciences? How has science contributed to gendered constructions of nature? Is there such a thing as value-free scientific research? How do feminist theories of knowledge differ from traditional understandings of scientific knowledge and scientific objectivity? The readings for this course will include work by Donna Haraway, Sandra Harding, Evelyn Fox Keller, Helen Longino, and Hilary Rose.

FORMAT: Seminar

CROSS-LISTING: GWST 3215.03, CTMP 3215.03

HSTC 3412.03: Hypatia's Daughters: Women in Science.

From Hypatia to Hildegard von Bingen, from Mary Somerville to Marie Curie, this course surveys the scientific contributions made throughout history by some of the most important women scientists and natural philosophers while examining how their respective social contexts shaped their philosophical and scientific practice.

NOTE: This course complements but is distinct from EMSP 2310: Women and Gender in Early Modern Science, which focuses on the work of early modern women scientists, and from GWST 3215: *Feminism and Science*, which focuses on questions from feminist epistemology which will only be indirectly discussed in this course.

FORMAT: Lecture/tutorial

CROSS-LISTING: GWST 3412.03

HSTC 3430.03: Experiments in the Mind: Thought Experiments in Physics.

Einstein's elevator, Schrodinger's cat, Maxwell's demon; the history of physics is full of these instructive fictions that are thought experiments. This course examines the historical contexts of many thought experiments in order to understand the different roles they have played in the conceptual development of physics from Antiquity to the present.

FORMAT: Lecture/discussion/seminar

HSTC 3501.03: The Nature of Time I.

This course will consider views of time beginning with Mesopotamian notions of narrative, Egyptian conceptions, and the encounter between linear and circular time in Judaic thought. The vision of Greece will be brought out through epic narration, in Pre-Socratic thought, in Greek historical texts. The course will treat some central texts, in Plato on the concept of time in the soul, in Aristotle, where

time becomes the measure of motion, in the willed totality in Stoic and Epicurean thought, in Plotinus, where time is grounded in a pretemporal duration. The course will then take up the relation of this duration and time to revelation, creation and conversion in Medieval Christian, Islamic and Jewish thought.

FORMAT: Seminar

HSTC 3502.03: The Nature of Time II.

This course will consider time as it is viewed in periods of the west from the Renaissance to the present. The early modern conceptions of time and fortune will be considered along with Renaissance notions of the temporality of the human and the heavens. The revolution in the philosophy of nature meant a change in the techniques of measurement, and in the very notions of time, culminating in the conceptions of Descartes, Newton and Leibniz. Time became a different kind of social reality through the enlightenment, a middle ground of progress between the human and the natural, a ground disclosed most fully in the thought of Kant and Hegel. The nineteenth century gives to time, not a mediating role but an otherness: in Darwin, Marx, Nietzsche. Is it an overriding direction, as disclosed in the second law of thermodynamics, or is it the illusion bound up with indifferent necessity? Does relativity leave us with a coherent concept or is time left a presentation of the phenomenon, a way of being, as for Husserl, Merleau-Ponty and Heidegger? The course will end in considerations of time and chaos theory, of the first three minutes and of the last.

FORMAT: Seminar

HSTC 3610.03: Studies in Ancient and Medieval Science.

Topics vary each year. Some of the topics are "Causation", "History of dissection", "Mesopotamian science", "Sciences and cultures in antiquity", "The mangle of praxis", "Ptolemy", "Ancient Method", "Embryology", "Posterior analytics", etc. For descriptions of the current year's studies topics, please contact the History of Science and Technology Program.

NOTE: Not more than two studies courses (one full credit) and no more than one of each course number, can be taken for credit towards the History of Science and Technology Program.

FORMAT: Lecture/discussion

CROSS-LISTING: RELS 3610.03 (for the 2010/2011 academic year only)

HSTC 3611.03: Studies in Early Modern Science (1500-1800).

Topics vary each year. Some of the topics are: "Science and Society", "Popularization of Science", "Science and Religion", "Technology and Scientific instruments", etc. For descriptions of the current year's studies topics, please contact the History of Science and Technology Program.

NOTE: Not more than two studies courses (one full credit) and no more than one of each course number, can be taken for credit towards the History of Science and Technology Program.

FORMAT: Lecture/discussion

HSTC 3615.03: Studies in Science and Nature in the Modern Period.

Topics vary each year. Some of the topics are: "The Century of the Gene", "Cybernetics", "Nazi Science", "The Political Economy of Science, etc. For descriptions of the current year's Studies topics, please contact the History of Science and Technology Program.

NOTE: Not more than two studies courses (one full credit) and no more than one of each course number, can be taken for credit towards the History of Science and Technology Program.

FORMAT: Lecture/discussion

HSTC 4000X/Y.06: Science and Nature in the Modern Period.

This course examines the history and culture of science in the post-Newtonian period and the attempts to come to terms with contemporary science and its notions of "scientific method" and natural law, the rise of globalized "technoscience" and a scientific way of life. The course will examine the themes of the "historicisation" of nature culminating in the Darwinian revolution, the rise of "big" science, probabilistic accounts of the world, the triumph of the "new physics" of quantum mechanics and relativity theory and the construction of notions of gender and human nature in modern biology and psychology. These issues will be examined in the broader cultural and philosophical transformations of the modern period.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/seminar

HSTC 4011.03: The Lecture Series.

In some years a lecture series course is offered. Students are allowed to take up to three such courses, one for each year of upper-level study. Each course will consist of thirteen bi-weekly evening lectures given by specialists from Atlantic Canada and beyond. The lecturers will offer students reflections on a number of contemporary issues and themes. Each year a different theme will be explored. FORMAT: Seminar/evening lectures

HSTC 4102.03: Topics in Ancient Natural Philosophy.

Through the close reading of one selected ancient work, this course seeks to explore fundamental problems in ancient natural philosophy, such as: How did the ancients see the validity of their approaches to the natural world? What sorts of phenomena were seen as “natural” in antiquity? What are the limitations to textual evidence for ancient science? How did theories about the natural world inform how the ancients saw their place in the Cosmos? How did ancient social values affect views of nature? FORMAT: Seminar

HSTC 4120.03: Artefacts: The Material Culture of Science and Technology.

The history of science and technology is not just about ideas, it is also about things. Through the creation of their own exhibit, students will learn how to ‘read’ artefacts, discuss the current material culture literature, study artefact conservation, and explore the challenges faced by today’s science museums. FORMAT: Seminar

HSTC 4200.03: Philosophies of Technology I. From Techne to Technology.

This half-year course will explore the history, structure and associated problems of our coming to be technological, beginning with an elaboration of the concept of “techne” in the ancients and its modification in the technical arts and instrumental reasoning of the Enlightenment and of 19th-century industrial ideology. Post-Enlightenment critiques polarized around the place of the machine and alienation in Karl Marx and the “question concerning technology” in Martin Heidegger will then be examined, leading up to an examination of the present state of technological discourse. In each case, we shall mark the importance of contextualising the debate by exploring the actual historical evolution of technology. Lectures will be devoted to presenting a social and historical background to the development of modern technologies whilst seminars will focus on the reading of primary texts in the field. FORMAT: Seminar

CROSS-LISTING: CTMP 4200.03

HSTC 4201.03: Philosophies of Technology II: The Questions Concerning Technology.

This half-year seminar will explore in detail the implications of powerful contemporary debates concerning the meaning and place of technology. What do we mean by technology? Can there be a philosophy of technology? What are the political and cultural ramifications of going technological? Topics will include: technological determinism in history, feminist critiques, technology and development, the meaning of expertise, technology, art and the “lifeworld”, “social construction” versus “actor-network” theory, Donna Haraway’s concept of cyborg culture and the “modern technological sublime”. The course will be conducted in seminar format with particular emphasis placed on the elucidation of historical and contemporary case-studies. Whenever possible, guest lecturers from the “real world” of technology will be invited to participate in the class. FORMAT: Seminar

CROSS-LISTING: CTMP 4201.03

HSTC 4300.03: Nature and Romanticism.

Kant’s “Copernican Revolution” in philosophy, ironically, marked a resurrection of a full-blown “idealist” philosophy of nature. This course will investigate the attempts of Kant’s followers to construct a natural philosophy and its engagement with the rival mechanical world picture. It explores the implications of this endeavour for the growth of romanticism, vitalism and our modern picture of “nature”. It begins with an examination of the ambiguous heritage presented by Kant’s writings on nature and proceeds through the attempts to develop a complete program of idealist Naturphilosophie and its spread throughout European thought by the medium of romanticist art and natural philosophy. FORMAT: Lecture/tutorial

CROSS-LISTING: HIST 5004.03, EMSP 4300.03

HSTC 4400.03: Newton and Newtonianism.

This seminar involves a close study of the work of Isaac Newton, along with that of his supporters and detractors. Beginning with an overview of pre-Newtonian science, topics range from Newton’s rejection of Cartesianism through his contributions to mathematics, physics, astronomy and optics, along with his inductive scientific method, laws of motion and calculus priority dispute with Leibniz. Also considered are lesser-known aspects of his career, such as his secretive pursuit of alchemy, his heretical theology, his attempts to unravel the Apocalypse, his role in British statecraft and his autocratic rule of the Royal Society. A taxonomy of the forms of Newtonianism that emerged after Newton’s death also allows an exploration of iconographical and apologetic uses of Newton, and his differing legacies in the Britain and France. This seminar concentrates on primary readings, including Newton’s *Principia* (1687), *Opticks* (1704), alchemical treatises and unpublished theological papers, as well as the Leibniz-Clarke correspondence (1717), anti-Newtoniana and eighteenth-century popularizations of Newtonianism such as Voltaire’s *Philosophical letters* (1733) and Maclaurin’s *Account of Newton’s discoveries* (1748). Attention is paid to the social, cultural and political aspects of Newtonianism and no prior knowledge of science is required. FORMAT: Seminar

CROSS-LISTING: EMSP 4310.03

HSTC 4500X/Y.06: Honours Seminar in the History of Science and Technology.

This honours seminar is specifically intended for students in the Combined Honours Degree in History of Science and Technology and will meet the requirements of the 21st credit.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

HSTC 4510.03: Independent Readings in History of Science and Technology.

Independent reading courses will be offered annually. The student is assigned to a member of the staff for regular meetings to discuss readings in a selected area. Papers and research projects are expected.

FORMAT: Individual instruction

PREREQUISITE: Honours registration in History of Science and Technology, permission of instructor and Director of program. Students must complete 60 credit hours before registering in this course.

HSTC 4511.03: Independent Readings in History of Science and Technology.

Independent reading courses will be offered annually. The student is assigned to a member of the staff for regular meetings to discuss readings in a selected area. Papers and research projects are expected.

FORMAT: Individual instruction

PREREQUISITE: Honours registration in the History of Science and Technology Programme, permission of the instructor and the Director of the program. Students must complete 60 credit hours before registering in this course.

HSTC 4515.06: Independent Readings in History of Science and Technology.

Independent reading courses will be offered annually. The student is assigned to a member of the staff for regular meetings to discuss readings in a selected area. Papers and research projects are expected.

PREREQUISITE: Honours registration in the History of Science and Technology Programme, permission of the instructor and the Director of the program. Students must complete 60 credit hours before registering in this course.

HSTC 4550X/Y.06: Honours Thesis in the History of Science and Technology.

In this course the student is assigned to a member of staff for regular meetings to discuss readings and present research for the purpose of completing an honours thesis in the History of Science and Technology. Successful completion of HSTC 4550X/Y.06 gives students both their 20th and 21st credit.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: Honours registration in the History of Science and Technology, permission of the instructor and the Director of the program.

I. Introduction

International Development Studies is an interdisciplinary program involving the study of poverty, inequality, social change and justice in a global context. The IDS program is structured around two broad axes: development theory/practice, and the global/local. Areas of teaching expertise among the core faculty in IDS include development theory, gender, culture, human security, rural development, migration, health, Indigenous peoples, participatory development and global citizenship. Additional areas of expertise are drawn from over 40 cross-appointed and adjunct faculty members who teach IDS approved courses and/or supervise our honours thesis and graduate students.

The department's areas of expertise include many of the key regions of the developing world, particularly Africa, Asia, Latin America and the Caribbean. We take a broad view of development - including development issues within Canada as well as the developing world.

We offer a diverse set of opportunities for students to participate in experiential learning in both Canadian and international contexts. Experiential learning enables students to focus on skills development in a range of areas: language development, research, writing, managerial, etc. Through our experiential learning opportunities, students can volunteer or intern in Halifax, East Africa, Cuba, and many other locations. Students are encouraged to draw upon international development experiences from over twenty overseas linkage programs through Dalhousie and more than 50 local Halifax community organizations. Halifax is the main Maritime regional centre for official and non-governmental organizations active in international development, thereby offering opportunities for students to become engaged locally in development. Students normally participate in experiential learning programs (whether locally or abroad) in their third year of study.

The IDS program offers a study abroad option in Cuba (Winter) with FLACSO (Facultad Latino Americana de Ciencias Sociales Program Cuba) and the University of Havana as well as a summer program in Cuba.

As an interdisciplinary program, IDS recommends students consider combined degree programs. Students are therefore encouraged to enter the combined honours, double major or minor programs, which provide opportunities that further integrate their IDS studies with those of an approved arts or science field, e.g., IDS and History, IDS and Biology. Double majors and combined honours degrees provide additional opportunities for students to pursue graduate studies in more than one area.

Students with backgrounds in sciences are also welcome in this program as topics in international development cut across all disciplines from anthropology to zoology.

The interdisciplinary nature of the program requires that students take a number of credits outside the IDS department as IDS approved courses in other departments. The first year of study at Dalhousie is dedicated to completing first year requirements. IDS students are encouraged to take a broad range of disciplines in their first year to prepare them for the interdisciplinary format of the program. First year students are encouraged to participate in a range of IDS non-class offerings including the Global Development Seminar Series and numerous student-led organizations related to International Development. Other events and activities are advertised on the IDS website and information can be obtained from the IDS office.

Students are encouraged to acquire competence in a relevant language in addition to English (e.g., Arabic, French, Spanish) and Economics. Research design and basic statistics courses (e.g., POLI 3492/3493 or SOSA 3402/3403) may also be useful skills to acquire throughout the IDS degree.

II. Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements for College of Arts and Science.

The IDS Department offers the following undergraduate degree options:

IDS as the second subject of study

1. Minor in IDS (three IDS credits required)
2. Double Major with IDS as the second subject (five IDS credits required)
3. Combined Honours with IDS as the second subject (six IDS credits required)

IDS as the primary subject of study

4. BA (15 credit) Minor in IDS (three IDS credits required)
5. BA (20 credit) Double Major in IDS as the primary subject (five IDS credits required)
6. BA (20 credit) Major in IDS (six IDS credits required)
7. a) BA (20 credit) Combined Honours in IDS + a second subject: Thesis stream (seven IDS credits required)
b) BA (20 credit) Combined Honours in IDS + a second subject: Coursework stream (seven IDS credits required)
8. a) BA (20 credit) Concentrated Honours in IDS: Thesis stream - (nine IDS credits required)
b) BA (20 credit) Concentrated Honours in IDS: Coursework stream - (nine IDS credits required)

First Year Recommended Courses

To enter any of the IDS undergraduate degree programs, students must have completed five full credits (30 credit hours) and are strongly recommended to fulfill the first year requirements outlined in the Degree Requirement section of this calendar. Students who intend to pursue degrees in IDS are encouraged, but not required, to take first year courses that will both fulfill their first year requirements and contribute to their broad understanding of international development issues. Students are highly encouraged to take INTD 1100.06/CANA 1100.06 (Halifax and the World), which can be used to satisfy either the first year social science or humanities requirement. Students who are considering a double major or combined honours program in IDS and another discipline are also encouraged to take any pre-requisite courses for upper level courses in the other discipline. The following courses provide background to key issues or basic skills related to International Development Studies, but are not pre-requisites for upper level IDS courses:

Social Science Requirement: INTD 1100/CANA 1100, ECON 1101/1102; GWST 1010/1015; HIST 1501/1502, HIST 1701/1702; POLI 1010, POLI 1015, POLI 1020, POLI 1025, POLI 1030, POLI 1035, POLI 1100; SOSA 1000, SOSA 1050, SOSA 1100, SOSA 1200; King's FYP.

Humanities Requirement: INTD 1100/CANA 1100, HIST 1501/1502, HIST 1701/1702; GWST 1010/1015; RELS 1001/1002; PHIL 1000; ENGL 1000, ENGL 1040, ENGL 1041; RUSN 1020/1070; King's FYP.

Physical Science Requirement: SUST 1000, SUST 1001; ECON 1101/1102; ENV5 1000; EARTH 1060; PSYCH 1021, 1022.

Language Requirement: French, Spanish, Arabic, Chinese, Italian, Russian, etc.

Writing Requirement: HIST 1005; POLI 1103; SOSA 1050; SUST 1000; PHIL 1010; ENGL 1010, ENGL 1020, ENGL 1040, ENGL 1045, ENGL 1050, ENGL 1100; King's FYP.

Degree options for IDS as the second subject of study

1. Minor in IDS

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

2. Double Major - IDS as the second subject

Advanced Courses Required:

- INTD 2001.03/2002.03
- INTD 3002.03 or 3003.03
- One half credit INTD course with theory content at the 3000 or 4000 level: that is, any INTD course at the 3000 or 4000 level, excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4012.
- One full credit of INTD and/or IDS approved courses at the 2000 level or above (See list of IDS approved courses in Section IV).
- Two half credits of INTD and/or IDS approved courses at the 3000 level or above.

In total, a minimum of five and a maximum of seven full credits in IDS are required; more credits are required in the first subject.

3. Combined Honours with IDS as the second subject

Advanced Courses Required:

- INTD 2001.03/2002.03
- INTD 3002.03 or INTD 3003.03
- One half credit INTD course with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4012.
- Two full credits of INTD and/or IDS approved courses at the 2000 level or above. At least one full credit of IDS approved courses must be taken from a single department other than IDS (see list of IDS approved courses in Section IV).
- Four half credits of INTD and/or IDS approved courses at the 3000 level or above.

In total, six full credits in IDS are required.

Degree options for IDS as the primary subject of study

4. BA (15 credit) Minor in IDS

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

5. BA (20 credit) Double Major in IDS and a second subject

Advanced Courses Required:

- INTD 2001.03/2002.03
- INTD 3002.03 or 3003.03
- One half credit INTD course with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3007, INTD 3109 and INTD 4012.
- Two full credits of INTD and/or IDS approved courses at the 2000 level or above. At least one full credit of IDS approved courses must be taken from a single department other than IDS (see list of IDS approved courses in Section IV).
- Two full credits of INTD and/or IDS approved courses at the 3000 level or above.

In total, a minimum of five and a maximum of eight full credits in IDS are required. A minimum of 10 and a maximum of 14 credits at the 2000 level or above are required in the two major fields.

6. BA (20 credit) Major in International Development Studies

Advanced Courses Required:

- INTD 2001.03/2002.03
- INTD 3002.03 or INTD 3003.03

- One half credit INTD course with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4012.
- Two full credits of IDS and/or IDS-approved courses at the 2000-level or above. At least one credit of IDS-approved courses must be taken from a single department other than IDS. (See list of IDS approved courses in Section IV).
- Four half credits of IDS and/or IDS-approved courses at the 3000 level or above.

In total, a minimum of six and a maximum of nine full credits in IDS are required.

IDS Honours Program

The IDS Honours program is designed for students with a demonstrated aptitude for advanced study in the field.

- Admission to the IDS Honours program is based on academic performance and, in the case of the thesis stream, a thesis proposal. Applicants normally should have achieved an overall Grade Point Average (GPA) of at least 3.30 (B+) or better and a minimum B+/A- in all IDS and IDS-approved courses to be considered for admission. In the case of a combined degree, these same requirements must be met in the second major subject
- The deadline for Honours Applications is January 31 of a student's third year of study. Consult the IDS Department website (www.dal.ca/ids) for information on how to apply to the honours program.

The available options within IDS Honours Program are:

7.a BA (20 credit) Combined Honours in IDS and a second subject: Thesis stream

Advanced Courses Required:

- INTD 2001.03/2002.03
- INTD 3002.03 or INTD 3003.03
- INTD 4012 (Honours Thesis Course).
- At least one half credit INTD course with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4012.
- One half credit of 4000-level INTD seminar course.
- Three full credits of INTD and/or IDS courses at the 2000 level or above. Students must take at least one full credit of IDS approved courses from at least two different departments.
- Two half credits of INTD and/or IDS approved courses at the 3000 level or above.

In total, a minimum of seven and a maximum of eight full credits in IDS are required.

7.b BA (20 credit) Combined Honours in IDS and a second subject: Coursework stream

Advanced Courses Required:

- INTD 2001.03/2002.03
- INTD 3002.03 or INTD 3003.03
- One half credit INTD course with theory content at the 3000 or 4000 level; that is, any INTD courses at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4012.
- Two half credits of 4000-level INTD seminar courses.
- Three full credits of INTD and/or IDS courses at the 2000 level or above. Students must take at least one full credit of IDS approved courses from at least two different departments.
- Two half credits of INTD and/or IDS approved courses at the 3000 level or above.

In total, a minimum of seven and a maximum of eight full credits in IDS are required.

8.a BA with Concentrated Honours in International Development Studies - Thesis stream

Advanced Courses Required:

- INTD 2001.03 / INTD 2002.03
- INTD 3002.03 or INTD 3003.03.
- INTD 4012 (IDS Honours Thesis course).
- One half credit INTD course with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4012.

- One half credit of 4000-level INTD seminar courses.
- Three full credits of INTD and/or IDS-approved courses at the 2000 level or above. Students must take at least one full credit of IDS approved courses from at least two different departments.
- Six half credits of INTD and/or IDS approved courses at the 3000 level or above. (See list of IDS-approved courses in Section IV).

In total, a minimum of 9 and a maximum of 11 IDS credits are required.

8.b BA with Concentrated Honours in International Development Studies - Coursework stream

Advanced Courses Required:

- INTD 2001.03 / INTD 2002.03
- INTD 3002.03 or INTD 3003.03.
- One half credit INTD course with theory content at the 3000 or 4000 level; that is, any INTD course at the 3000 or 4000 level excluding INTD 3002, INTD 3003, INTD 3107, INTD 3109 and INTD 4012.
- Two half credit 4000 level INTD seminar courses.
- Three full credits of INTD and/or IDS-approved courses at the 2000 level or above. Students must take at least one full credit of IDS approved courses from at least two different departments.
- Six half credits of INTD and/or IDS approved courses at the 3000 level or above. (See list of IDS-approved courses in Section IV).

In total, a minimum of 9 and a maximum of 11 IDS credits are required.

Conversions

Students who have completed a 15 credit degree can upgrade to a 20 credit major or double major degree. Students who have completed a Major in IDS can upgrade to an honours degree (pending acceptance to the IDS honours program). The requirements for conversions are as follows:

BA Major Conversion in International Development Studies

Dalhousie graduates who wish to upgrade their qualifications from a 15 credit Minor to a 20 credit Major degree may enter this program. Students must complete the full set of 20 credit Major requirements, usually by taking five additional full credits.

BA Honours Conversion in International Development Studies

Dalhousie graduates who wish to upgrade their qualifications from a 15 credit minor or a 20 credit major or double major degree to a 20 credit Honours degree may enter this program if they meet the conditions for admission to the Honours program. Students must complete the full set of Honours requirements. Students interested in this program should consult the Undergraduate Advisor.

III. Course Descriptions

A. Core Courses

INTD 2001.03: Introduction to Development I.

Poverty, inequality and injustice are widespread throughout the contemporary developing world. This course will examine how this situation came to be. It begins by analyzing the different meanings of the term "development" and then examines the major approaches that have shaped practical development initiatives on the ground in the Global South over the past 60 years. The course also examines the legacies of history for contemporary development efforts in the Global South through specific case studies.

FORMAT: Lectures/tutorial

PREREQUISITE: Completion of five full credits at the 1000 level or instructor's permission

CROSS-LISTING: GEOG 2201.03

INTD 2002.03: Introduction to Development II.

This course builds upon the core concepts and approaches studied in INTD 2001 (i.e. different theoretical approaches to development and the historical creation of underdevelopment). The course examines key contemporary issues in the field of development and analyses the connections between them: debt, global trade rules, foreign aid, hunger and malnutrition, rural and urban livelihoods, population growth. The course also examines the principle actors involved in development and the strategies they have used to promote and resist development, including:

governments, non-governmental organizations (NGOs), the World Bank and IMF, and popular social movements in the Global South and North.

FORMAT: Lectures/tutorial

PREREQUISITE: Completion of five credits at the 1000 level or instructor's permission

CROSS-LISTING: GEOG 2202.03

INTD 3002.03: Development Practice.

This course is designed for third year undergraduate students who are interested in a career in international development. The course will introduce students to the internal dynamics of development organizations (both governmental and non-governmental), development planning, methodologies of development practice in the field, ethical issues related to development work, fundraising, project proposal writing and project evaluation. The major assignment will involve the preparation of a development project proposal. Because this is a course in development practice, it will involve both seminar discussions and practical 'hands-on' activities. Different sections of the course may include different thematic emphasis – e.g. rural development, gender and development and community development.

FORMAT: Lecture/seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 3003.03: Development and Activism: Methods of Organization, Manifestation and Dissent.

There are three parts to this course. In Manifestation we explore theories of activism to understand how motivated individuals managed to change their societies. In Organization we wrestle with the legalities of forming a civil-society organization. In Dissent we take our skills to the streets by organizing lawful protests.

FORMAT: Lecture/tutorial

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 4012.03: Honours Thesis Seminar.

The honours thesis course is open to only those students who have been accepted into the thesis stream of the IDS honours program. This course will support students through the writing of their honours theses, from proposals to completion. Issues of research design, method, and ethics will be addressed, and work in progress will be presented.

FORMAT: Seminar

PREREQUISITE: Admission to IDS Honors Program (Thesis Stream)

B. Additional IDS Courses

INTD 1100X/Y.06: Halifax and the World.

This course offers an introduction to both International Development Studies and Canadian Studies by exploring the connections between important global issues and your daily life as a student in Halifax. As you walk across the Dalhousie campus and go about daily life in Halifax, your actions connect you to people around the globe and to the history of the city and world as well as to the many works of literature, art and music that depict these connections.

FORMAT: Lecture, discussion, tutorial and experiential learning outside the classroom

CROSS-LISTING: CANA 1100.06

EXCLUSION: INTD 1101.03/CANA 1101.03

INTD 2045.03: Indian Society: Change and Continuity.

The objective of this half-credit course is to introduce students to the society and culture of India from an interdisciplinary perspective. India presents a society of enormous complexity and an unbroken living civilization of great antiquity. The focus of the course will be on selected, significant aspects of Indian society with particular emphasis on issues of current relevance. Topics discussed include: a historical background, social structure, political and social constraints to economic development, health issues, major religions and philosophy, development and foreign policy since independence, science and technology, disaster relief and development, and literature. This course counts as a half-credit in Sociology and Social Anthropology towards the IDS established discipline requirement.

FORMAT: Lecture

CROSS-LISTING: SOSA 2045.03

EXCLUSION: INTD 3045.03

INTD 2106.03: Africa: An Introduction.

This course will focus on contemporary Africa. Stereotypical portrayals of Africa will be examined and critiqued with the goal of emphasizing the immensity, diversity and complexity of the continent in order to better understand the opportunities and challenges of African development in the twenty-first century.

FORMAT: Lecture/tutorials

CROSS-LISTING: GEOG 2206.03

INTD 2201X/Y.06: 3201X/Y.06: International Development Studies through Canada World Youth.

This course is intended for Canada World Youth participants who wish to use the Canada World Youth experience as a basis for further study- leading to an academic credit. Canada World Youth registrants will receive detailed written course guidelines and a reading package. CWY participants are required to keep a journal of their observations and to write a research report drawing upon their experiences on the CWY project both in Canada and overseas. Upon return to Canada, they should communicate with the International Development Studies Office at Dalhousie and should extra guidelines be sought, they inform the Course Instructor at that point. Normally, within 60 days of their return, they should submit their reports (in accordance with detailed guidelines provided by the Instructor) for evaluation. All CWY course participants are encouraged to present talks to local high schools, youth groups, and appropriate community-university organizations. The degree of analysis will be more demanding the higher the level of course taken. In each case, papers may be written in English or French.

RECOMMENDED: INTD 2001.03/2002.03

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Consult the Department for more information

RESTRICTION: Can only be taken once in a student's programme.

INTD 3000.03: Seminar in Development Studies.

This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 3001.03: Contemporary Debates in Development Theory.

This seminar course examines key contemporary theoretical debates in International Development Studies and their relevance to the real world of development practice.

FORMAT: Seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 3010.03: Seminar in Development Studies.

This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 3012.03: Sustainability, Development, Economy.

This course offers an introduction to principles of sustainability and equitable distribution of benefits oriented towards issues of economy. The course adopts an interdisciplinary framework of inquiry to explore challenges of appropriate scale (relative to biocapacity), efficient allocation, and inter and intra-generational equity. In addition, the course will consider how these issues apply to managing real world issues in environmental management, and will explore tools to quantify and interpret scale, efficiency, and distributive justice. This course is designed as a one-term introduction to the intersection of sustainability, economic issues and social justice for undergraduate students who have little or no prior exposure to economics, but who have completed one or more courses in international development, ESS, environmental science, or related programs.

FORMAT: Online delivery

PREREQUISITE: INTD 2001/2002 or SUST 2000 or permission of instructor

INTD 3101.03/3102.03/3202X/Y.06: Special Topics in International Development Studies.

A course on a particular aspect of international development taught by special arrangement between individual IDS major or honours students and individual instructors associated with the program. Available in summers as well as regular sessions.

NOTE: Students taking INTD 3202X/Y.06 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Individual tutorial

PREREQUISITE: INTD 2001.03 and 2002.03 or instructor's permission

INTD 3104.03: Seminar in Development Studies.

This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 3106.03: Seminar in Development Studies.

This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 3107X/Y.06: Experiential Learning: Canada.

Experiential learning is an opportunity for students to reflect on the global/local and theory/practice dynamics of the world around them. Other programs and departments use terms such as internship, volunteer or co-op placements. IDS has adopted the term experiential learning because it reflects the interplay between academic and practical skills development that this program offers. Experiential learning courses are available for both local/Canadian and international placements. The Canadian component of experiential learning focuses on the themes of community development and public engagement. The international component addresses questions of global citizenship. The Canadian component of experiential learning combines classroom learning with volunteer work experience in a community organization in Halifax or other parts of Canada. Students are required to volunteer for a minimum of 60 hours in each term, or approximately 3 hours/week. In addition to this work, students are required to complete a set of readings (to be developed in collaboration with the course instructor) and three academic assignments (a mid-term report, a reflective paper and an academic paper).

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar, discussion and applied work experience with an organization or community group within Canada.

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

CROSS-LISTING: CANA 3107.06

INTD 3109.03: Experiential Learning: Abroad.

The experiential learning abroad course is open to International Development Studies students who wish to obtain academic credit for an overseas placement, volunteer experience or internship. Students who have already secured a place in an overseas experiential learning program can register for this half credit. Special permission to register for this course is required and an application for this course must be completed prior to registration. Students are required to complete course readings and to write several reports reflecting on the relevant literature and the practical work experience. One half credit is completed over the course of a full academic year.

FORMAT: Seminar

PREREQUISITE: This course is open to non-IDS students with the permission of the instructor.

INTD 3110.03: Migration and Development.

The purpose of this course is to explore and better understand the connections between migration and development in contemporary societies. Classes will introduce or further explore one main theme or issue, such as development-induced displacement, labour migration, and HIV/AIDS and migration. Each class will centre on one or more discussion questions, exchange insights from relevant experiences of class participants or focus on a case study

FORMAT: Lecture/seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission.

INTD 3111.03: Popular Culture and Development.

Development does not occur in a vacuum; it is informed by a particular cultural understanding and carried out by a specific mode of politics. Similarly, culture too, unlike the common belief, is not an autonomous realm, but consistently shapes and is shaped by other societal dimensions. This course will seek to understand the connections between culture and development by specifically exploring the dynamics of popular culture and its linkages with capitalist forms of development mainly in the South.

FORMAT: Seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 3114.03: Environment and Development.

This seminar investigates the intersections between environmental science and development studies. Our primary focus will be to understand how the non-human environment impacts and constrains development interventions, both in the past and the present. The course is organized into three distinct sections. The first focuses on informal lectures mixed in with discussion and interactive forums, including debates and small group exercises. The second component of the course revolves around student presentations, while the final component consists of a simulated negotiation.

FORMAT: Lecture/seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 3115.03: Global Health: Challenges of Global Health Equity in the 21st Century.

By examining global inequities that lead to health injustices, this course explores why healthcare is abundant for some and nonexistent for others. It identifies why some are born to live well, and other are doomed to die quick. It asks, "what are we going to do about it?"

FORMAT: Lecture

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 3116.03: Contemporary Issues in Gender and Development.

The course critically examines how development processes affect women and men and gender relations. Many development projects and policies have had a negative impact on women. The course provides a theoretical and conceptual grounding in gender/women and/in development, explores the gendered impact of policies and processes and examines issues such as governance, HIV/AIDS, and conflict.

FORMAT: Seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

CROSS-LISTING: GWST 4116.03

EXCLUSION: GWST 4211.03

INTD 3125.03: The French-Speaking World.

Introduction to the French-speaking world from a political, cultural, social and economic perspective. Study of the organization known as la Francophonie, with an emphasis on its evolution and mandate, as well as on the bilateral and multilateral cooperation between its member countries. The course is designed for students who are not specializing in French. The course format will consist of lectures and in-class discussion of print and audio-visual materials. Student assessment will be based on oral presentations, assignments, exams and written papers. The language of the course will be English.

CROSS-LISTING: FREN 3125.03

INTD 3150.03: Aspects de la francophonie/Aspects of the Francophone World.

Taught in French.

Introduction to the study of the francophone world: political, economic, linguistic, literary and cultural aspects. From year to year the course might emphasize different regions: Western Countries, Sub-Saharan Africa, Pacific Islands, West Indies, Northern Africa.

FORMAT: Lecture

PREREQUISITE: 2000-level course or consent of instructor

CROSS-LISTING: FREN 3150.03

INTD 3401.03: Seminar in Development Studies.

This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 3406.03: Seminar in Development Studies.

This seminar course consists of an intensive examination of a selected issue within International Development Studies. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 3408.03: The Cuban Development Model.

This course examines the evolution of the Cuban development model, from the Conquest and colonization by the Spanish to the reforms of the early 21st Century. The objective is to develop an understanding of the various development strategies employed by Cuba, particularly since the revolution of 1959. When asked about the Cuban development model, most people nowadays would say "tourism". Thirty years ago it was sugar—as it had been from the beginning of the 16th Century. In fact Cuba obtains most of its hard currency from medical-related services—mainly from the exportation of medical services, but also from the sale of sophisticated biotechnological products. Cuba's approach has evolved dramatically in the last two decades, and particular attention will be paid to this period.

FORMAT: Lecture and discussion

PREREQUISITE: INTD 2001.03 and INTD 2002.03

CROSS-LISTING: SPAN 3408.03

C. The Cuba Semester Program - Offered in the Winter Semester only in Cuba

INTD 3301.03: Spanish Language and Grammar: The Cuban Dialect.

NOTE: INTD 3301 - 3306 are offered as part of the Cuba Semester program. Only students enrolled in this program may take these courses.

Spanish Language and Grammar: The Cuban Dialect (prerequisite for the remaining courses).

INTD 3302.03: Social Development in Cuba.

This course examines the situation of women, the family and children in Cuba, and the educational system in theory and in practice.

INTD 3303.03: The Political Economy of Cuba.

Analysis and debate of the forms of politics practiced in the Cuban revolution, as well as State institutions, during the various stages of the revolutionary process. Study of the evolution of the Cuban economy and all its principle strategies, including the economic crisis and Cuba's reinsertion in the international economic arena.

INTD 3304.03: Sustainable Development in Cuba.

The course examines Cuba's experience with sustainable development, including recently introduced agricultural cooperatives and communal environmental education.

INTD 3306.06: Field Research Practicum.

This course involves four weeks of field research under the supervision of a Cuban professor, culminating in the production of a major research paper.

Research will be undertaken in one of the following three areas:

- *the environment and sustainable development;
- *women, family and childhood in the community;
- *community work and social participation.

FORMAT: Fourteen weeks - University of Havana

PREREQUISITE: Students must be, at least, functional in Spanish (SPAN 1020.06 and SPAN 2020.06).

CROSS-LISTING: SPAN 3301.03, 3302.03, 3303.03, 3304.03, 3306.06

RESTRICTION: Open to students enrolled in 3rd or 4th year of the IDS or Spanish program or comparable programs at other universities

INTD 3310.06: Cuban Culture and Society.

Through seminars, lectures and other activities, students will be introduced to Cuban society and culture. This course consists of briefing and debriefing sessions in Halifax with two weeks spent in Cuba. In Cuba, there will be daily lectures in English at the University of Havana and field visits to sites in and around Havana with opportunities to meet and interact with the local population. Participants will be required to keep a journal, and prepare and present a research paper on an approved topic related to Cuban development. This course counts as a credit in IDS, or Spanish towards the IDS established discipline requirement.

FORMAT: Six weeks summer intercession with two weeks in Havana

PREREQUISITE: INTD 2001.03 and 2002.03 or instructor's permission

CROSS-LISTING: SPAN 3310.06

INTD 4001.03: 4002.03/4003.06: Special Topics in International Development Studies.

INTD 4004.03: Topics in Cuban Development.

This course will undertake a careful, in depth examination of a select theme in Cuban development. The theme will vary from year to year. These may include such topics as: Issues of Gender & Society, Economic Relations & International Policy, Sustainable Development & Social Participation in Rural Communities & Agricultural cooperatives, Family, Poverty, Social Development and Community Programs, Social Class Dynamics and Economic Strategies. The course will be taught in Spanish. Classes will involve the reading, presentation, and discussion of selected readings.

FORMAT: Seminar

PREREQUISITE: Minimum of 2 years of Spanish and/or equivalent and at least one third year IDS course or instructor's permission

CROSS-LISTING: SPAN 4004.03

INTD 4006.03: Global Poverty and Human Rights: From Development to Global Citizenship.

This course explores contemporary debates from an interdisciplinary cadre of scholars in order to understand why our political and financial systems acquiesce to world poverty. The course will run as a seminar course that will require students to contribute as active participants by generating critical debate out of the assigned readings.

FORMAT: Seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 4011.03: Advanced Seminar in Development Theory.

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 4013.03: Environmental Conflict and Security.

This seminar seeks to unravel the origins of conflict in the Global South. It emphasizes the ecological dimension of conflict, by investigation the intersections between natural resources and political upheaval. We will trace the origins of a diverse set of conflicts evaluating the role the non-human environment plays in triggering upheaval, as well as possible steps to alleviate ongoing conflicts and prevent new ones.

FORMAT: Seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

INTD 4022.03: Advanced Seminar in Development Theory.

INTD 4100.06: Special Topics in IDS.

INTD 4211.03: Gender and Development: Theory, Concepts and Methods.

The primary aim of this course is to provide a broad foundation to some of the theoretical perspectives which have informed current thinking in gender and development. The course introduces students to key concepts in the analysis.

FORMAT: Seminar

PREREQUISITE: INTD 2001.03 and INTD 2002.03 or instructor's permission

CROSS-LISTING: GWST 4211.03

IV. IDS Approved Courses from Other Departments

NOTE: Some courses are not offered every year so please consult the current timetable, in addition to the calendar, when registering.

1. Arabic

- ARBC 2100.03: A Cultural Introduction to the Arab World.

2. Contemporary Studies

- CTMP 2115.03: Conception of Race in Philosophy, Literature and Art
- CTMP 2321.03: The Question of the Other I
- CTMP 2322.03: The Question of the Other II

- CTMP 3103.03: Critiques of Modernity
- CTMP 3130.03: The Thought of Michel Foucault
- CTMP 3311.03: Culture, Politics and the Post Colonial Condition
- CTMP 4125.03: Hannah Arendt: Terror, Politics, Thought.

3. Biology

The importance of an understanding of biology for informed contribution to sustainable development cannot be over-emphasized.

- BIOL 3065.03: Conservation Biology
- BIOL 3226.03: Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 4065.03: Sustainability and Global Change
- BIOL 4160.03: Political Ecology

4. Earth Sciences

Geology lies behind many of the environmental problems facing humanity today - while energy and mineral resources provide an underpinning of many of the development plans of Third World nations.

5. Economics

A grasp of economic frameworks whereby societies allocate resources (human resources and capital) is a prerequisite for understanding development plans and national prospects, development projects and foreign aid, and the constraints and possibilities for sustainable development.

- ECON 2213.03: Emerging Gants: The Economic rise of China and India
- ECON 2216.03: Economics of Global Warming
- ECON 2334.03: Globalization and Economic Development: Current Debates
- ECON 3310.03: Economic Growth in Historical Perspective
- ECON 3317.03: Poverty and Inequality
- ECON 3330.03: International Trade
- ECON 3331.03: International Finance
- ECON 3332.03: Resource Economics
- ECON 3333.03: Theories of Economic Development
- ECON 3335.03: Environmental Economics

6. English, French and Spanish

Language skills are obviously important for effective communication for those wishing to pursue international development studies; but through the study of languages and literature, important insights about culture and development experience are also to be gleaned. The IDS program encourages students minimally to study one additional (relevant) language to English.

English

- ENGL 2205.03: World Literature
- ENGL 2090.03: Literature, Migration, and Citizenship
- ENGL 3086.03: Post-Colonial Literatures
- ENGL 3087.03/CHIN 3080.03: Literature of the Asian Diaspora: Language and Identity in Asian North American Literature.

French

- FREN 3125.03: Le Monde francophone/The French-Speaking World
- FREN 3150.03: Aspects de la francophonie/Aspects of the Francophone World
- FREN 3175.03: Topical Issues in Francophone/Thèmes de la francophonie

Please note: Some courses in the French Department's Senegal Semester Abroad Program are likely to be eligible for IDS credit. Consult the undergraduate advisor to determine eligibility.

Spanish

- SPAN 2069.03: Central America to 1979
- SPAN 2070.03: Area Studies on Mexico and Central America
- SPAN 2109.03: Cuba from Colonial Times to 1961
- SPAN 2110.03: The Cuban Cultural Revolution
- SPAN 2130.03: Latin American Dictators in the Novel
- SPAN 2200.03: Latin American Civilization
- SPAN 3070.03: Contemporary Latin American History
- SPAN 3301.03/3302.03/3303.03/3304.03/3306.06: The Cuba Program at FLACSO (Facultad Latino Americana de Ciencias Sociales Programma Cuba), The University of Havana
- SPAN 3310.06: Cuban Culture & Society
- SPAN 3340.06: Mexican Culture

7. Environmental Studies

Most environmental scientists have primary expertise in a particular discipline and work cooperatively with specialists from other disciplines to solve environmental problems. Dalhousie now offers a minor in both environmental studies and science. However, current programs that also provide courses emphasizing environmental subjects include Earth Sciences (geology and hydrogeology), marine biology and POLI 3585.03.

- ENVS 3220.03: International Environmental Law for Scientists
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory.
- ENVS 4001.03: Environmental Impact Assessment
- EARTH 2410.03: Environmental and Resource Geology
- EARTH 3410.03: Enhanced Environmental Geology
- GEOG 2070.03: Area Studies on Mexico and Central America
- GEOG 2201.03: Intro to Development Studies
- GEOG 2201.03: Intro to Development Studies II
- GEOG 2206.03: Africa: An Introduction
- GEOG 2500.03: Climate Change
- GEOG 3165.03: Peoples and Cultures of the World: Selected Area Studies
- PHIL 2480.03: Environmental Ethics
- PHIL 2485.03: Technology and the Environment
- POLI 3537X/Y.06: Management and Conservation of Marine Resources
- POLI 3585.03: Politics of the Environment
- POLI 3589.03: Politics of the Sea

8. Gender and Women's Studies

It is important to recognize the implications of gender issues and to be sensitive to how these are viewed in different cultural circumstances. Hence, students are strongly encouraged to participate in at least one of the following GWST courses.

- GWST 2053.03: Women and Islam
- GWST 2400X/Y.06: Work and Occupations in a Changing World
- GWST 2800X/Y.06: Comparative Perspectives on Gender
- GWST 3006.03: Comparative Perspectives on Gender and Work
- GWST 3016.03: Women and Religion
- GWST 3168.03: Issues in Latin American Society
- GWST 3310.03: Gender and Development in Africa
- GWST 3426.03: Sex and the State
- GWST 3602.03: Sexualization of Western Political Thought
- GWST 4116.03: Contemporary Issues in Gender and Development
- GWST 4211.03: Gender and Development: Theory, Concepts and Methods
- GWST 4320.03: Empowerment, Gender, and Development

9. History

Just as people need to know who they are and how they arrived there, groups, races, courses, states and nations need a sense of their own past as part of their culture and to guide their future development choices.

- HIST 2006.03: The Atlantic World, 1450-1650: European Colonization of the Americas
- HIST 2007.03: The Atlantic World, 1650-1800: European Empires in the Americas
- HIST 2020X/Y.06: Imperial and Soviet Russia
- HIST 2021.03: Soviet Russia
- HIST 2388.03: Latin American Dictators in the Novel
- HIST 2381.03: Latin America
- HIST 2382.03: Central America to 1979
- HIST 2383.03: Area Studies on Mexico and Central America
- HIST 2384.03: Cuba from Colonial Times
- HIST 2385.03: The Cuban Cultural Revolution
- HIST 2386.03: Colonial Latin America
- HIST 2387.03: Latin America since Independence
- HIST 2392.03: Introduction to Caribbean History (1450 to present)
- HIST 2425.03: Africa Before 1900
- HIST 2426.03: Africa Since 1900
- HIST 2502.03: The Ottoman Empire and Its Legacy in the Middle East, 1750-1923.
- HIST 2503.03: Classical and Medieval History of Islamic Civilization
- HIST 2504.03: Modern History of Turkey, Iran, Israel, and the Arab-Speaking lands (nineteenth-twentieth centuries)
- HIST 2505.03: Turbans and Berets: A Modern History of Iraq
- HIST 2510.03: Modern History of South Asia

- HIST 2711.03: Struggles that Shaped the Modern World: 1600 - 1900
- HIST 2712.03: Freedom Fighters or Terrorists?
- HIST 3090.03: Russian Society
- HIST 3092.03: Russian Topics
- HIST 3390.03: Latin America: Revolution and Repression.

10. Philosophy

Issues in International Development are fundamentally concerned with principles of ethics and justice. Philosophy provides students with the necessary foundation to think about these principles and apply them to international issues in an informed way.

- PHIL 2081.03: Ethics in the World of Business
- PHIL 2160.03: Philosophical Issues of Feminism

- PHIL 3470.03: Human Rights: Philosophical Issues
- PHIL 3476.03: Liberalism and Global Justice
- PHIL 4700.03: Philosophy of Race

11. Political Science

Political Science is critical for individuals who want to know more about the values, laws, institutions and policy mechanisms that govern their lives in society, and, as well, the differences between their systems of government and those in other countries.

13. Russian

Russia and the Soviet Union have been important players on the world stage for many centuries. The history and current situation of this region has had profound importance for the development of both Europe and Asia, as well as the developing regions. The study of this region is increasingly important to development theory, practice and planning.

I. Introduction

Learning to read and speak Italian offers access to an important world culture. While modern Italy began to emerge in its present-day form in the 19th century, the civilizations that preceded it have exerted a strong influence on the culture of the West. Whether in religion, art, music, or science, Italy's past offers many keys to the present. Through its tradition of global exploration and entrepreneurial endeavors, Italy has played a significant role in world history. Today, it is one of the world's wealthiest democratic nations, and a leader in a variety of fields, including film, design, cuisine, and intellectual life. Courses in Italian literature and culture, building on courses in Italian language, will open up to the student this wide and fascinating array of topics.

II. Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, [page 125](#) of this calendar.

A. BA (20 credit) Double Major

A minimum of five full credits (24 credit hours) and a maximum of eight in Italian studies above the 1000 level, combined with one of the Major subjects in the BA program. Within those five credits, students must include ITAL 2010.06 and ITAL 3010.06, and at least one other full credit above the 2000 level.

B. BA (20 credit) Combined Honours

A minimum of five full credits (30 credit hours) in Italian studies above the 1000 level is required for the Combined Honours program, along with one of the Combined Honours subjects in the BA program. Within those five credits, students must include ITAL 2010.06 and ITAL 3010.06, at least one other full credit above the 2000 level and at least one half credit at the 4000 level.

NOTE: Italian studies can only be the second subject for the Double Major or Combined Honours. It cannot be the primary subject for these programs.

C. Minor in Italian Studies

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

III. Course Descriptions

ITAL 1010X/Y.06: Italian for Beginners.

Introduction to the basic structures of Italian, combined with practical vocabulary for oral and written communication. This course aims to develop all language skills (listening, speaking, reading, writing), by integrating grammar study, oral and written exercises, and situational contexts. The course also includes an introduction to Italian culture. This course fulfills the BA language requirement.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab/tutorial

ITAL 2010X/Y.06: Intermediate Italian.

This course is open to students with a sound knowledge of the basics of the Italian language (verb tenses, sentence structure, high frequency vocabulary) and is designed to build on that knowledge. The objective of the course is fourfold: 1) to develop awareness of finer points of usage in writing Italian; 2) to provide practice in listening comprehension of material ranging from texts read aloud to spontaneous dialogue; 3) to provide the practice required for the consolidation and development of speaking skills; 4) to provide the practice required for the consolidation and development of reading skills.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion

PREREQUISITE: ITAL 1010X/Y.06

ITAL 2061.03: Civilization of Baroque Italy.

This is a scaled-down version of 2060X/Y.06, and studies Italy at the time of its greatest influence on Western civilization. The course examines Italy's politics, its vibrant urban and rural societies, the place of Catholicism in its cultural and intellectual life, and the innovative early modern economy, all before the great crisis of the 1620s. Open to first-year students.

FORMAT: Lecture/tutorial

CROSS-LISTING: HIST 2061.03

EXCLUSION: HIST 2060.06

ITAL 2101X/Y.06: The Origins of Modern Italy.

An introductory survey of Italian history from the late Renaissance to the French Revolution, and Italy's passage from the Western world's pilot economy and culture, to a place on the margins of Europe. Specifically, the course deals with the ecology and the economy, the influence of the Church and the Inquisition, the impact of piracy, banditry, epidemics and the Thirty Years War, the decline of the Spanish Empire, and the evolution from a Baroque sensitivity to the Enlightenment. Open to first-year students. Taught in English.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/tutorial

CROSS-LISTING: HIST 2063X/Y.06

EXCLUSION: HIST 2061.03

ITAL 2200.03: Modern Italian Culture.

This course will focus on the transformation of modern Italian culture from the early twentieth century to the present, with discussion of major historical and social events of the period. Topics may include fascism, futurism, neo-realism, the rise of media culture, Italian cinema, and Italy's political role in the European Union.

FORMAT: Lecture

ITAL 2201.03: Survey of Italian Literature I: from the Origins to 1600.

This course will provide a survey of Italian Literature from the Middle-Ages to 1600. Literature covered may include works of writers such as Dante Alighieri, Francesco Petrarca, Giovanni Boccaccio, Catherine of Siena, Niccolò Machiavelli, Benvenuto Cellini and Veronica Franco. This course will be given in English; readings for Italian major students will be in Italian.

FORMAT: Lecture

EXCLUSION: ITAL 2210

ITAL 2202.03: Survey of Italian Literature II: 1600 to Present.

This course will provide a survey of Italian Literature from 1600 to present. Literature covered may include works by Ugo Foscolo, Giacomo Leopardi, Sibilla Aleramo, the Futurists, Luigi Pirandello, Italo Svevo, Italo Calvino, Natalia Ginzburg, and Dacia Maraini. This course will be given in English; readings for Italian major students will be in Italian.

FORMAT: Lecture

EXCLUSION: ITAL 2210

ITAL 2210.03: Introduction to Italian Literature.

This course will focus on selected topics in Italian literature and criticism. The course will be given in English and readings for Italian minor and major students will be in Italian.

FORMAT: Lecture

ITAL 2600.03: Survey of Italian Cinema.

Class to be held in English; with part of the course work in Italian for Italian majors. Survey of the Italian Cinema from the origins onwards: Focus: the 'golden age' of Italian silent movies; visual culture under fascism; Italian neo-realism; the impact of television.

FORMAT: Lecture

CROSS-LISTING: THEA 2314.03

ITAL 3010X/Y.06: Advanced Italian.

This course will focus on spoken and written Italian. Cultural aspects of Italy's past and contemporary history will be the subjects of oral discussion and written composition. Topics such as fine arts, theatre, cinema, music, culinary history, and fashion will be the basis for language practice. The goal of the course is to provide students with conversational and writing skills. Attention will be given to finer points of grammar, particularly Italian morphology and syntax. Students will engage in small group work and individual reporting. The material for the course will be drawn from both specialized workbooks and news/articles from authentic Italian newspapers and websites. Some class time will be devoted to impromptu discussions allowing students to test their thinking and communication skills.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion

PREREQUISITE: ITAL 2010X/Y.06 or permission of instructor

ITAL 3300.03: Twentieth Century Italian Literature.

This course examines Italian literature in the twentieth century, with references to contemporary Italy's social history and culture. Students will acquire first-hand knowledge of the work of key writers of the Novecento, such as for example Sibilla Aleramo, Luigi Pirandello, Italo Svevo, Natalia Ginzburg, Primo Levi, Elsa Morante, Italo Calvino, Dacia Maraini, or others. The course goals are multi-folded: while strengthening their communicative skills in Italian, students will forge their own tools for critical and argumentative thinking, and use them to engage in a productive reading of the literary texts under consideration. All coursework will be done in Italian.

FORMAT: Lecture

PREREQUISITE: ITAL 2010XY or permission of instructor

ITAL 3500.03: Topics in Italian Culture.

This course will discuss and critically assess selected topics of Italian culture. The subjects will vary from year to year, and may range from Italy's fine arts tradition to the history of its *commedia dell'arte*, from its political and literary movements to its world-renowned filmmaking practice, from the changing role of women in Italian society to its religious evolution, from its history of migration and exploration to its "Made in Italy" international appeal and marketing. Topics may be added and perspectives changed as the contemporary Italian and European context evolve. The course will be conducted in a seminar setting where students may report on the specific issue and subject researched. Students will take part in reading and critical evaluation of peer work and individually propose an oral presentation on a selected theme that elicits their interest.

FORMAT: Lecture/discussion

PREREQUISITE: ITAL 2010X/Y.06 or permission of instructor

ITAL 3600.03: Italian National Cinema.

The focus of the course: the Italian cineastes, who received international recognition since the 1960s. Its aim to investigate Italian film production within the social and cultural climate of contemporary Italy.

FORMAT: Lecture/seminar

CROSS-LISTING: THEA 3320

ITAL 3700.03: Topics in Italian Drama and Spectacle.

This course focuses on Italian drama and performance. The topic will vary from year to year and may include topics such as Italian Renaissance theatre, the Commedia dell'arte, Pirandello's productions and contemporary Italian spectacle. The course will examine the selected topic while placing Italian theatre into a broader European context; students will acquire reading strategies for drama and spectacle and learn to consider the works from a theoretical perspective. The class is held in English but Italian majors will be required to read the texts in the original.

FORMAT: Lecture

CROSS-LISTING: THEA 3914.03

ITAL 4010.03: Advanced Composition.

This course addresses issues of syntax and grammar, register and style, and advanced vocabulary for both creative and academic writing. It will have both a theoretical and a practical component and will be writing intensive. Students will exercise advanced reading skills, advanced grammar skills (using sophisticated Italian syntax and morphology), and advanced composition skills (from structuring a creative piece of work to essay composition and completion). Compositions will address Italian literary and cinematic works. Students will work both in groups and individually. The course will be given in a workshop format, and student participation is essential to its success. It is recommended that students read Italian as much as possible (texts from mass media, popular fiction as well as academic material). Work in class and at home will include summaries, synopses, bullet-point schemes, writing and re-writing, peer reviewing, and related research.

FORMAT: Lecture/discussion

PREREQUISITE: ITAL 3010X/Y.06 or permission if instructor

ITAL 4040.03: Dante's Inferno.

From Dante's spiritual crisis to his descent into the pit of Hell and encounter with Satan. A journey of self-discovery, the Comedy is one of the world's literature absolute masterworks and a summa of the medieval culture. This course offers a general knowledge of its first section, Inferno, and provides an introduction to medieval culture and history. Each class will involve reading from the text, commentary and discussion of the readings assigned. The course is taught in English. Italian minors and majors students will be required to read the texts in Italian.

FORMAT: Lecture

PREREQUISITE: Any 2000 humanities course or instructor's permission

CROSS-LISTING: CLAS 4460

ITAL 4060.03: Topics in the Civilization of Baroque Italy.

This course emphasizes the methods and sources historians employ to study Italian history, circa 1570-1740. Topics to be explored include Baroque Italian princely courts, Roman Catholicism, social interaction, social status and display, deviance and punishment, books and learned culture, standards of living, historical ecology and geography. There will be substantial use of translated and transcribed archival sources. A reading knowledge of French is recommended.

FORMAT: Seminar/tutorial

CROSS-LISTING: HIST 4060.03

ITAL 4998.03: Independent Study.

Individually directed research and writing under the supervision of a member of department.

FORMAT: Seminar

ITAL 4999.03: Independent Study.

Individually directed research and writing under the supervision of a member of department.

I. Minor in Journalism Studies

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

II. Curriculum

A. Core Requirements

Students must complete one and a half full credits of core courses:

JOUR 1001X/Y.06: Foundations of Journalism.

This course gives students both a theoretical and practical introduction to journalism. In one part, students will learn how to read, listen and watch the news knowledgeably and critically. They will look at the history of journalism as it has developed in newspapers, radio, television and internet and examine how the structure of the media influence journalistic principles and practices. The other part of this course teaches students how to write imaginative and interesting prose using correct English and effective storytelling methods. Students will be required to write nearly every day and will have their work assessed by professional journalists.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

JOUR 2000.03: Basic Reporting Techniques.

Successful reporters need critical thinking as much as technical skills. This course builds on JOUR 1001 as it examines how reporters find news, select sources, cut through spin, verify information and avoid errors. Students will be introduced to techniques at the leading edge of the craft.

PREREQUISITE: JOUR 1001.06

B. Elective Requirements

Students must complete 15 credit hours in electives from the list below:

JOUR 2004.03: Introduction to Radio.

This course will introduce students to broadcast news writing and reporting, emphasizing skills particular to radio such as writing for the ear and to deadline, interviewing for tape and on-air performance. Students will visit a radio news operation and examine policy, broadcast standards and ethical issues.

PREREQUISITE: JOUR 1001.06

RESTRICTION: This course is not available to students in the BJ(H) program.

JOUR 2400.03: Science and the Media.

From the first Babylonian astronomical records on cuneiform to the public understanding of science on television, the various media have long been crucial to the success and spread of science. This course provides a history of science in the media from the ancient and medieval use of geometrical diagrams, astronomical figures and anatomical illustration through early modern printed texts, popular broadsheets and color botanical plates all the way to the ubiquity of science in literature, cinema and on the Internet. This expanding presence of science in the media is examined against the backdrop of three revolutions: literary and artistic (ancient and medieval worlds), mechanical (early modern period) and electronic (contemporary age). Specific themes considered include the increasing accuracy of scientific illustration, the rise of scientific journals, public scientific demonstrations, science in poetry and prose fiction, science and art, radio and television documentaries, the advertising and marketing of science, scientific apocalypses and techno-utopias, bioethics, Soviet era technological iconography, environmentalism and science-religion relations in the journalistic press, science fiction from H.G. Wells' *War of the Worlds* to *Star Wars* and *Jurassic Park*, and science in computing and cyberspace.

FORMAT: Lecture/seminar

CROSS-LISTING: HIST 2400.03

JOUR 3002.03: Introduction to Radio.

This course will introduce students to broadcast news writing and reporting, emphasizing skills particular to radio such as writing for the ear and to deadline, interviewing for tape and on-air performance. Students will visit a radio news operation and examine policy, broadcast standards and ethical issues.

PREREQUISITE: JOUR 1001.06

JOUR 3005.03: Broadcast Reporting.

This course will introduce students to best practices in video and audio in news reporting. It will build on text-based courses to emphasize skills needed in radio, television, and online journalism. These include conversational scriptwriting, writing for sound and pictures, interviewing and on-air performance. Students will research, pitch and produce basic radio and television news stories, in teams and on their own.

PREREQUISITE: JOUR 2000.03 or JOUR 2001.06 or permission from instructor.

JOUR 3122.03: Ethics of Journalism.

This course will discuss the power - and responsibility - of the mass media in shaping public opinion and public policy. Students will consider the various and conflicting roles of media in contemporary society.

PREREQUISITE: JOUR 1001.06 or permission of the Instructor

JOUR 3304.03: Through her Eyes: Women and the Documentary Tradition.

This course will explore the rarely examined historical and contemporary involvement of women in the field of documentary filmmaking. Women documentary makers have produced extensive bodies of engaging work that challenge many societal assumptions about gender, class, race, the function of political power, sexuality and peace-war. They have worked at every level within the process: as directors, cinematographers, editors, sound recordists, producers, writers and fund-raisers. A variety of documentaries made by women from diverse backgrounds will be screened and analyzed along with a close reading of selected critical texts. Students will identify the similarities and differences in subjects, themes, style, aesthetics, and approached to creation, production and distribution.

FORMAT: Film Screening and Seminar

CROSS-LISTING: CTMP 3304.03

JOUR 3333.03: News Media and the Courts in Canada.

This course is an introduction to the justice system and the specific laws that govern how journalists do their jobs. The goal is to give students and working journalists an understanding of court structure, legal principles, and criminal and civil procedure. Bans on publication, contempt of court, libel law, media access to the courts, confidentiality of sources and other media-law issues will be examined. The format combines lectures with forum discussions featuring lawyers, prosecutors, judges and other players in the justice system.

PREREQUISITE: JOUR 1001.06 or CANA 2000.06 or permission of the instructor

CROSS-LISTING: CANA 3333.03

JOUR 3440.03: Creative Nonfiction.

Narrative nonfiction writing includes literary journalism, memoir and essay. In this introductory course, students will learn about the historic development of this genre as well as read and discuss some of the best examples of historical and contemporary narrative nonfiction. The goal is to make students better informed readers as well as to provide them with the tools to produce this kind of writing themselves.

PREREQUISITE: JOUR 1001.06 or permission of the instructor

JOUR 3441.03: Advanced Creative Nonfiction.

This is a how-to course that focuses on writing - and rewriting - a major piece of narrative nonfiction.

PREREQUISITE: JOUR 3440.03

RESTRICTION: This course is not available to BJ(H) students

JOUR 3540.03: Feature Writing.

This course will introduce students to the more creative writing aspects of journalism - the writing of stories behind the breaking news of the day, or the small human dramas that make up the world around us. Students will study feature writing styles and techniques, and experiment with several feature formats, from color stories and personality profiles to substantial background articles. Students will produce a major, term-end feature story and several smaller assignments.

PREREQUISITE: JOUR 2000.03 or JOUR 2001.06 or permission of the Instructor.

JOUR 3542.03: Business Reporting for Journalists.

Budgets, stock markets, statistics, polls, securities, mergers and takeovers. This course will give students a working knowledge of how business functions. It will provide students with the tools to analyze and present complex economic situations in clear language.

JOUR 3550.03: Copy Editing.

In this course, students will focus on the skills copy editors need to perform the most basic and essential of their tasks - handling stories. Students will edit, on paper and on screen, real stories selected for their potential as well as their problems. They will work on them for tightness, polish, accuracy and style. The goal is to help students develop the copy editor's "double vision" - the ability to see the story as a whole, and line by line, as a collection of parts, to see both the forest and the trees. This course is not only for students who want to become copy editors, but also for students who want to become better editors of their own writing.

PREREQUISITE: JOUR 2000.03 or JOUR 2001.06

JOUR 3557.03: Introduction to Online Journalism.

The Internet is still in its infancy as a journalistic medium, which creates opportunities for innovation as well as challenges for finding the best and most appropriate ways to communicate information. Students in this course will not only learn about the recent evolution of the Internet as a journalistic medium but will also explore for themselves ways of using the Internet to tell journalistic stories.

PREREQUISITE: JOUR 1001.06 or permission of the Instructor

JOUR 3560.03: Great Journalists.

This course provides an introduction to some of the greatest journalists of all time. Students will discover the beautiful work these journalists created, and learn how and why they did it.

This course also focuses on improving students' writing. By carefully considering great journalists' work, students learn techniques that make them better writers.

Amazing characters students will meet include James Cameron, the only journalist to have a ringside seat at three atomic bomb blasts. Students get to know Ida B. Wells, who founded a newspaper exposing lynchings and racism when most media were ignoring the truth. Students will consider the work of Joan Didion, Martha Gellhorn, Peter Gzowski, Seymour Hersh, and many more.

By the end of the course students will have a strong understanding of journalism's honourable legacy. They will know the brilliant qualities of great journalists, how hard they work, and how they changed the world.

FORMAT: Writing Requirement (Dal)

JOUR 3660.03: Photojournalism.

This course will explore visual perception as applied to photojournalism. Students will be taught to "see" photos and explore ideas visually, especially as applied to the essence of news photography. Students will also examine the beginnings of news photography and modern developments in the business. Students must have their own digital cameras to take this course.

JOUR 3670.03: Opinion Writing.

Do you aim to influence people with your perceptions, insights and ideas? If so, you need to know the difference between a rant and proving your point. You need to consider the tone and flow of what you write. Writing Opinion teaches these practices and more.

Law and Society

Contact Person: Dr. Margaret Denike
 Location: Department of Political Science
 Faculty of Arts and Social Sciences
 PO Box 15000
 Halifax, NS B3H 4R2

 Email: m.denike@dal.ca

Please refer to the Dentistry, Law, Medicine, Graduate Studies Calendar for detailed information on Law programs at the undergraduate and graduate levels.

I. Minor in Law and Society

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

A. Required Courses

- LAWS 2500.06: Introduction of Law passed with a minimum of B-

LAWS 2500X/Y.06: Introduction to Law.

This course, offered by the Law School exclusively to undergraduates, is designed to introduce students to the workings of the Canadian legal system, and to the basics of several fundamental areas of law. The focus of the course will be the decisions which have been made by courts in Canada. There will be discussion of what the law should be, which will occur in a context of understanding how courts reason, and the principles that they bring to bear in reaching their decisions. The course will look in particular at introductory case law concerning tort law (wrongs by one person against another), personal property, criminal law, and the law as it relates to Aboriginal peoples.

Enrolment is limited to students in their second year of undergraduate studies and beyond.

INSTRUCTOR(S): S. Coughlan, D. Darling

FORMAT: Lecture/discussion 3 hours

B. Elective Requirements

Three full courses (18 credit hours) or equivalent from the approved list below, including at least one half-course (three credit hours) from your choice of three different disciplines (e.g., history, philosophy, political science, sociology, contemporary studies, or international development studies). To count towards the Minor, courses must be passed with a minimum of B-.

- CTMP 3321: Representations of the Holocaust I
- CTMP 3322: Representations of the Holocaust II
- CTMP 4125: Hanna Hrendt: Terror, Politics, Thought
- HIST 2006.03: The Atlantic World 1450-1650
- HIST 2007.03: The Atlantic World 1650-1800

Note: New admissions to the Linguistics Program at Dalhousie have been suspended. This information is for current Linguistics students only.

I. Halifax Interuniversity Program in Linguistics

Halifax area universities offer a joint program in linguistics. Students enrolled in this program take courses from Dalhousie and Saint Mary's University to fulfil the requirements for the degree (A letter of permission to do so should be secured from the Registrar's Office at Dalhousie prior to enrolling in such courses. See Academic Regulations 7.6, [page 34](#)).

An undergraduate degree in linguistics gives students opportunities to study the formal, functional and systemic nature of language and languages. This is achieved through the study of linguistic theory and through training in methods of linguistic analysis.

Linguistics degrees have many practical applications. Linguistics is directly concerned with the question "what does it mean to know a language?" Linguistics provides the groundwork for teaching languages: linguists write the descriptions language teachers use and linguistics provides methods for understanding language learning processes and disorders. Linguistics also provides relevant background for research into sign languages and the development of computer languages. It forms the basis for understanding bilingualism, for language planning in multilingual countries, for developing programs for increasing literacy, and for enhancing the efficiency of translation services. Linguistics informs literary and cultural studies, and is central in the developing cognitive sciences. It is, of course, also a discipline in its own right which may be studied for its own sake.

The study of language as both a cognitive and social phenomenon entails cognate relationships with an extremely wide array of disciplines. Some of these are suggested by the interdisciplinary nature of the program. Faculty from Social Anthropology, English, French, Gender and Women's Studies, Political Science, Philosophy, Psychology, Russian, and Sociology are participants. Many students will elect to combine linguistics majors with majors in the other areas in which cross-listed and recommended courses are offered.

"Core" courses are offered by the Linguistics Program through Modern Languages Departments at Saint Mary's and the Department of French at Dalhousie.

Some of the courses include: The English Language, Philosophy of Language, Psycholinguistics, Neurolinguistics.

II. Degree Programs

Although the Linguistics program is offered jointly by several universities, the degree is granted by the student's home University. Students must meet the general requirements set by the University in which they are registered.

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, [page 125](#) of this calendar.

Core Program Requirements

- A two semester (full credit equivalent) Introduction to Linguistics, which can be taken at any of the three institutions:
 - SMU LIN 1200.0 Introduction to Linguistic Analysis
 - DAL FREN 3020.06 Linguistics or FREN 2020.03 (Introduction to Linguistics) plus FREN 3021.03 (Syntax) or FREN 3022.03 Sémantique (taught in French)
- Two to four of the following half-credit courses (or equivalent), depending on the specific degree:
 - SMU LIN 2310.1(2) Phonology
 - SMU LIN 2320.1(2) Morphology
 - SMU LIN 2330.1(2) Syntax
 - SMU LIN 2340.1(2) Semantics

A. BA with Honours in Linguistics

An honours degree is strongly recommended for students who plan to do graduate work in linguistics. Students must have a GPA of 3.0 or better for admission to the honours program, and must maintain a GPA of 3.0 or better in courses contributing to their honours degree in linguistics.

All Dalhousie honours programs must include Honours Qualifying Examination; in Linguistics, this usually takes the form of a research paper. Consult the program coordinator.

Program Requirements

A minimum of 10 credits. These must include:

- A two semester (full credit equivalent) Introduction to Linguistics, listed under Core Program Requirements (above);
- All four of the half-credit courses (or equivalent), listed under Core Program Requirements (above);
- One credit selected with the advice of the program coordinator. In addition to regularly scheduled courses, special topics / directed readings, computer language courses and / or intermediate level formal logic courses may be recommended here;
- The equivalent of a one-credit second (or foreign) language course at the intermediate level; and,
- Five credits selected from the list of linguistics courses offered at Dalhousie, and neighboring universities (see the list of options below).

B. Combined Honours in Linguistics

Combined honours programs with Linguistics may be arranged with other departments.

C. BA (20 credit) Major in Linguistics

Students who may not be eligible for the Honours Program are encouraged to enter the 20 credit Major degree program. Consult the program coordinator.

Program Requirements

- A minimum of six full credits, at least three credits of which must be at the 3000 level or above. These must include:
- A two semester (full credit equivalent) Introduction to Linguistics, listed under Core Program Requirements (above);
- Two of the half-credit courses (or equivalent), listed under Core Program Requirements (above);
- The equivalent of one full credit selected with the advice of the program coordinator. This requirement may be met by regularly scheduled courses listed or cross-listed as linguistic courses, by special topics / directed readings courses in linguistics, by second year (intermediate) courses in a language other than the student's first language or in formal logic, or by a computer language course; and,
- Three full credits selected from the list of options below.

D. BA (20 credit) Double Major in Linguistics

Program Requirements

A minimum of four full credits, as outlined below. At least two of the four credits must be at or above the 3000 level. These must include:

- A two semester (full credit equivalent) Introduction to Linguistics, listed under Core Program Requirements (above);
- Two of the half-credit courses (or equivalent), listed under Core Program Requirements (above);
- The equivalent of one full credit selected with the advice of the program coordinator. This requirement may be met by regularly scheduled courses listed or cross-listed as linguistic courses, by special topics / directed readings courses in linguistics, by second year (intermediate) courses in a language other than the student's first language or in formal logic, or by a computer language course; and,
- One full credit selected from the list of options below.

E. BA (15 credit) Concentration in Linguistics

Program requirements

A minimum of four full credits, as outlined below. At least two of the four credits must be at or above the 3000 level.

- A two semester (full credit equivalent) Introduction to Linguistics, listed under Core Program Requirements (above);
- Two of the half-credit courses (or equivalent), listed under Core Program Requirements (above);
- The equivalent of one full credit selected with the advice of the program coordinator. This requirement may be met by regularly scheduled courses listed or cross-listed as linguistic courses, by special topics/directed readings courses in linguistics, by second year (intermediate) courses in a language other than the student's first language or in formal logic, or by a computer language course; and,
- One full credit selected from the list of options below.

III. Options

Students should plan their programs with attention to the prerequisites for the courses listed below. Some of the courses are offered infrequently. Please consult the relevant university's calendar for course descriptions, prerequisites and this year's current offerings.

A. Courses Offered at Dalhousie University

Contemporary Studies

- CTMP 2304.03: Semiotics
- CTMP 4115.06: Language and Politics: The Linguistic Turn in Contemporary Political Thought

English

- ENGL 2201.06: The English Language
- ENGL 3007.06: Old English

French

Unless specifically indicated otherwise, all courses are taught in French.

- FREN 3025.03: Linguistics: Introduction to Acadian Dialectology
- FREN 3026.03: Quebec French
- FREN 4001.03: History of French: The Middle Ages
- FREN 4001.03: History of French: The Modern Period
- FREN 4011.03: Lexicology
- FREN 4012.03: Aspects of French Structure
- FREN 4013.03: Pragmatics
- FREN 4014.03: Language and Society
- FREN 4015.06: Advanced Translation into English
- FREN 4016.06: Introduction to Applied Linguistics and Language Teaching (taught in English)
- FREN 4017.03: General Translation
- FREN 4018.03: Electronic Tools and Resources for French (taught in English)

Philosophy

- PHIL 3300.03: Philosophy of Language
- PHIL 4510.03: Topics in the Philosophy of Language

Psychology

- PSYO 3052.03: Sensory Neuroscience II: Hearing and Speech
- PSYO 3093.03: Language & Literacy
- PSYO3190.03: Psycholinguistics
- PSYO 3790.03: Neurolinguistics

Russian

- RUSN 4000.06: The Structure of Contemporary Standard Russian

Sociology

- SOSA 3081.03: Sociolinguistics

Spanish

- SPAN 3090: Phonetics
- SPAN 3095: Evolution of Spanish

B. Courses offered at Saint Mary's University (SMU)

Anthropology

- SMU ANT 1290.1(2): Introduction to Human Communication
- SMU ANT 2391.1(2): Introduction to Linguistic Anthropology
- SMU ANT 2392.1(2): Language, Culture and Society
- SMU ANT 3395.1(2): Language Use and Issues in Northern Canada
- SMU ANT 4491.1(2): Ethnography of Communication
- SMU ANT 4492.1(2): Anthropological Analysis of Linguistic Communities

English

- SMU EGL 2311.1(2): Modern English Language
- SMU EGL 3312.1 (2): Modern English Language in Canada
- SMU EGL 3402.0: History of the English Language
- SMU EGL 2308.1(2): English Prose Style from 1500
- SMU EGL 4490.0: Discourse Analysis

French

- SMU FRE 3321.1(2): French Phonetics
- SMU FRE 3341.1(2): Linguistic Study of French
- SMU FRE 3305.1(2): Acadian Language and Culture
- SMU FRE 4440.1(2): Canadian French: Sociolinguistic Perspectives

Linguistics

- SMU LIN 4410.1(2): Directed Readings in Linguistics I
- SMU LIN 4411.1(2): Directed Reading in Linguistics II
- SMU LIN 3431.1(2): Special Topics in Linguistics I
- SMU LIN 4432.1(2): Special Topics in Linguistics II
- SMU LIN 3341.1(2): Advanced Morphology
- SMU LIN 3342.1(2): Comparative Linguistics

Philosophy

- SMU PHI 402.1(2): Philosophy of Language: Meaning
- SMU PHI 403.1(2): Philosophy of Language: Speech Acts

Sociology

- SMU SOC 3338.1(2): Language Change and Social Change
- SMU SOC 3366.1(2): Field Methods in Linguistics I
- SMU SOC 3367.1(2): Field Methods in Linguistics II *
- SMU SOC 4417.0: Seminar on Endangered Languages

Women's Studies

- SMU WMS/EGL 2326.1(2): Language and Gender
- SMU WMS/EGL 3427.1(2): Language, Gender and Power

THEA 4800X/Y.06: Acting IV.

The culminating course of the Acting Program focuses on the rehearsal and performance of three DalTheatre shows and a Class Project. This course provides students with the opportunity to earn their Honours credit by preparing professional portfolios and audition pieces under the tutelage of the Acting Program faculty. The class project is directed by an Acting Program faculty member and all written requirements for both the Dal Theatre season and the class project assessed by the Acting Program faculty. In its twofold function, this course is a bridge to the Acting profession.

NOTE: Students taking 4800X/Y.06 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture/lab 6 hours per week as well as up to 30 hours per week rehearsals week-nights and Saturdays
 PREREQUISITE: THEA 3800X/Y.06, 3810X/Y.06, 3820X/Y.06, MUSC 1081.03 and permission of the Acting Faculty
 CO-REQUISITE: THEA 4840X/Y.06

THEA 4840X/Y.06: Advanced Performance Techniques.

This fourth-year Acting course is intended to provide production-related and movement instruction that will assist students with developing skills and techniques which can be applied in the DalTheatre season as well as in the professional theatre world. Production related instruction may vary from year to year, depending on the specific needs of each DalTheatre season.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab/lecture 3 hours

PREREQUISITE: THEA 3800X/Y.06, 3810X/Y.06, 3820X/Y.06, MUSC 1081.03 and permission of the Acting Faculty

CO-REQUISITE: THEA 4800X/Y.06

THEA 4900X/Y.06: Theory and Criticism of Drama and Theatre.

This is a writing intensive course that tackles the problems of evaluating theatre. It investigates critical strategies of the past and judges today's theatre criticism. Students will practice the craft of criticism and debate the role of theatre theory for contemporary audiences.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/seminar 3 hours

THEA 4921.03: Special Topics II.

In this seminar course, students focus on a particular topic in dramatic literature, film studies, theatre history, dramatic theory, or a related interdisciplinary subject, and investigate it in great detail. The topic is assigned by the School of Performing Arts at the end of the preceding academic year and is then posted at the School and in the Faculty's timetable.

FORMAT: Seminar 3 hours

THEA 4922.03: Topics in Theatre History.

In this seminar course, students focus on a particular topic in the field of theatre history and investigate it in great detail. The topic is assigned by the School of Performing Arts at the end of the preceding academic year and it is then posted at the School and in the Faculty's timetable.

FORMAT: Lecture/seminar/discussion

PREREQUISITE: Permission of the instructor

THEA 4923.03: Topics in Dramatic Literature.

In this seminar course, students focus on a particular topic in the field of dramatic literature and investigate it in a great detail. The topic is assigned by the Department at the end of the preceding academic year and it is then posted at the Department and in the Faculty's timetable.

FORMAT: Lecture/seminar/discussion

PREREQUISITE: Permission of the instructor

THEA 4931.03: Contemporary Theatre.

This course will deal with the most recent developments in theatre, especially with those post-1970's trends that exercise a broad international influence. Each year, our investigation will begin with a brief look at postmodern theatre and cover topics such as performance art, physical theatre, and postdramatic theatre. The main focus of the course, however, will be dictated by what is currently happening on major stages across the world and may significantly change from one year to another. In the interest of a comprehensive and inclusive approach to the subject, both commercial and experimental theatres will be studied, and we will also examine some relevant works of criticism and theory. Since much of the material required for this course is not yet removed enough from our time to be accessible in scholarly literature, students should be prepared for alternative methods of research.

FORMAT: Lecture/seminar, 3 hours

Philosophy

I. Beginning in Philosophy

There are many different ways of beginning in philosophy. The Dalhousie Philosophy Department offers three sorts of courses for beginners: (1) general survey introductions, which will give you a taste of a variety of questions and answers; (2) introductions to special areas; (3) logic, which is the study of the theory and techniques of good reasoning. Students wishing to major in philosophy are encouraged to begin with Introduction to Philosophy (either PHIL 1000.06, or PHIL 1010.06) in which a wide range of philosophical issues are discussed. But any student in any year may begin philosophy with a course that has no prerequisites. These include the 1000 level courses and many of the courses at the 2000 level. Although any of the 2000 level non-prerequisite courses provide the student with a good introduction to philosophical thinking, by far the best introduction is provided by the full year introduction (PHIL 1000 or 1010). Some 2000 level courses have prerequisites which can be met either by a philosophy course or a course in another relevant discipline. The King's College Foundation Year satisfies the requirement of a previous philosophy course. Courses at the 3000 level and beyond usually have further requirements. See the course descriptions below.

II. Degree Programs

All students planning to take a degree in philosophy are encouraged to talk to an undergraduate advisor; those planning to do an honours degree must consult with the honours advisor. Students who intend to specialize in philosophy should take an honours degree, the normal preparation for graduate study in philosophy.

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, [page 125](#) of this calendar.

Note: In the statement of program requirements and prerequisites, "credit" means one full credit (six credit hours).

Not all courses are offered every year. Please consult the current timetable to determine if these courses are offered.

Detailed descriptions are available from the department website at philosophy.dal.ca and from the departmental office.

A. BA with Honours in Philosophy

See BA Concentrated Honours under Degree Requirements.

Students interested in Honours Programs are encouraged to apply by the middle of their third year. Please contact Honours Advisor. The Honours application form is available online at <http://www.registrar.dal.ca/forms>.

Departmental Requirements

At least 10 credits in Philosophy of which at least nine and no more than 11 are beyond the 1000 level

Select at least six credit hours from the following:

Philosophy (logic): 2130.03, 2660.03, 3140.03

Select at least six credit hours from the following:

Philosophy (history): 2350.03, 2610.03, 2620.03, 3110.03, 3635.03, 3640.03, 3650.03

- At least four credits at or above the 3000 level including a half-credit in epistemology (3051.03) and a half credit in ethics (3105.03) and at least one credit at the 4000 level
- Honours Thesis

Honours Philosophy with Emphasis on Cognitive Science

Cognitive Science is the study of intelligence and cognition in human beings and machines (computers). The goal is to come to a fuller understanding of human learning and intelligence and to develop devices that extend human abilities. Students may choose to do an Honours BA with an emphasis on cognitive science. The requirements for this degree are the same as above, except that three philosophy credits and two non-philosophy credits must be in cognitive science related courses. Those who complete the requirements will have the words "With Emphasis on Cognitive Science" on their transcript upon graduation. Contact the Philosophy Department for details.

B. BA with Combined Honours

See BA Combined Honours under Degree requirements.

Departmental Requirements

At least five and no more than eight credits in Philosophy beyond the 1000 level, including two credits beyond the 2000 level. Since the requirements for the combined honours degree vary (depending on the program with which philosophy is combined) students must see an honours advisor. An honours thesis (or qualifying exam) in one of the two combined subjects is required.

Select at least three credit hours from the following:

Philosophy (logic): 2130.03, 2660.03

Select at least three credit hours from the following:

Philosophy (history): 2350.03, 2610.03, 2620.03, 3110.03, 3115.03, 3630.03, 3635.03, 3640.03, 3650.03

At least two credits at or above the 3000 level including a half credit in epistemology (3051.03) and a half credit in ethics (3105.03)

C. BA (20 credit) Major in Philosophy

See BA Major (20 credit) under Degree Requirements.

Departmental Requirements

At least six and no more than nine credits in Philosophy beyond the 1000 level, including three credits beyond the 2000 level

Select at least three credit hours from the following:

Philosophy (logic): 2130.03, 2660.03,

Select at least six credit hours from the following:

Philosophy (history): 2350.03, 2610.03, 2620.03, 3110.03, 3115.03, 3630.03, 3635.03, 3640.03, 3650.03

At least three credits at or above the 3000 level including a half credit in epistemology (3051.03) and a half credit in ethics (3105.03 or 3100.06)

D. BA (20 credit) Double Major

See BA (20 credit) Double Major under Degree requirements.

Departmental Requirements

At least five and no more than eight credits in Philosophy beyond the 1000 level, including two credits beyond the 2000 level

Select at least three credit hours from the following:

Philosophy (logic): 2130.03, 2660.03

Select at least six credit hours from the following:

Philosophy (history): 2350.03, 2610.03, 2620.03, 3110.03, 3115.03, 3630.03, 3635.03, 3640.03, 3650.03

At least two credits at or above the 3000 level including at least a half credit in epistemology (3051.03) or a half credit in ethics (3105.03)

E. BA (15 credit) Minor in Philosophy

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

F. Minor in Philosophy

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

G. Minor in Applied Ethics

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

H. Minor in Bioethics

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

III. Course Descriptions

NOTE: Many courses are listed as being exclusionary to one another. This means that students may not take both courses so designated.

PHIL 1000X/Y.06: Introduction to Philosophy.

An introduction to a variety of philosophical problems, such as the relation of mind to body, freedom of the will, the foundation of morality, the existence of God, the nature of personal identity, and the possibility of knowledge based on reason and experience. Sections differ somewhat in approach and requirements.

Consult the department to find out which ones especially suit you. This course does not satisfy the Faculty Writing Requirement.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion

EXCLUSION: PHIL 1010X/Y.06, PHIL 2040.03 and PHIL 2050.03

PHIL 1010X/Y.06: Introduction to Philosophy.

See description for PHIL 1000X/Y.06. This course does satisfy the Faculty Writing Requirement. Since PHIL 1010X/Y.06 consists of sections taught by different instructors, statements about its objectives and approach must be confined to generalizations. Detailed syllabi of all sections are available on our Web site at www.philosophy.dal.ca.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: ~~W~~riting Requirement, lecture /discussion

EXCLUSION: PHIL 1000.06, PHIL 2040.03 and PHIL 2050.03

PHIL 1050.03: Ethics in Science.

An introduction to ethical questions that arise in the practice of science. The course will explore a variety of ethical questions associated with the study and practice of science. Students will learn about the nature of philosophical approaches to ethics and how to employ these insights to the tasks of recognizing and reflecting on ethical issues that arise when engaged in scientific research and practice. One section of this course is offered as part of the Dalhousie Integrated Science Program, that relate to the specific scientific topics studied within that program where it serves as one-half of the writing requirement for first year students and is available to DISP students only.

FORMAT: Lecture/discussion

EXCLUSION: PHIL 2660.03

PHIL 2020.03: Legal Thinking.

Should the state prevent people from ending their lives to escape the pain of terminal disease? Shall we leave people free to make up their own minds regarding abortion? Should the law be used to control pornography? Is affirmative action demanded by (or inconsistent with) equality under the law? Legislation enacted in these and other controversial areas will dramatically affect how we live. It thus demands our critical attention. This course examines the role of practical reason in resolving such legal controversies. No previous study of philosophy is presupposed.

FORMAT: Lecture/discussion

PHIL 2040.03: 2050.03: Introduction to Philosophy I and II.

See description for PHIL 1000X/Y.06. A student may take either half-year course, but not both. Neither course satisfies the faculty writing requirement.

FORMAT: Lecture/discussion

EXCLUSION: PHIL 1000X/Y.06 and PHIL 1010X/Y.06

PHIL 2081.03: Ethics in the World of Business.

Business practices are sometimes in accord with moral principles, sometimes at odds with them. By considering cases that illustrate business practices and dilemmas this course studies the application of ethical principles to the world of business in national and international contexts.

FORMAT: Lecture/discussion

PHIL 2085.03: Reasoning Skills.

Thinking clearly and effectively is something that people can learn to do. Understanding some basic concepts as well as mastering certain practical techniques can help in this. In this course you will learn about classifying concepts and how to define them; about the nature of arguments and the way to bring their structure to the surface by diagramming techniques; about some of the classic fallacies people commit in their reasoning; about some of the basic concepts and procedures of logic. This course does not satisfy the logic requirement for the major or honours in Philosophy.

FORMAT: Lecture

EXCLUSION: PHIL 2090.03

PHIL 2090.03: How to Win an Argument.

This course is devoted to developing the practical skills involved in evaluating reasoning and producing convincing arguments. Note: this course does not count towards satisfying the logic requirement for the major or honours program.

EXCLUSION: PHIL 1080.03

PHIL 2130.03: Logic: Deduction.

A systematic introduction to the operations of formal deductive logic, with considerable attention devoted to the relation between artificial and natural language and to the philosophical problems that arise from the study of reasoning. No previous study of logic is presupposed.

FORMAT: Lecture/discussion

PHIL 2160.03: Philosophical Issues of Feminism.

An exploration and examination of some of the concepts, issues, and arguments underlying feminist claims and perspectives. Such topics as pornography, rape, mothering, the nature of gender, and feminism's responses to racism will be considered.

FORMAT: Lecture/discussion

CROSS-LISTING: GWST 2500.03

PHIL 2165.03: Philosophy and the Black Experience.

This is an introduction to Africana philosophy, that is, philosophy by and about people of African descent. It will begin with a brief look at philosophical thought in precolonial Africa and then turn to consider philosophical thought produced in the wake of slavery and colonization.

FORMAT: Lecture

PREREQUISITE: Successful completion of a 1st year writing requirement course

PHIL 2170.03: Philosophy of Sex and Love.

Philosophers have long been interested in the nature of intimate human relations. This course offers an examination of key concepts and questions related to love and sexual desire. Topics will include the nature of desire, of romantic love, and of sexual orientation. We will take up questions in sexual ethics and politics, and look at selected concepts such as trust and betrayal, sexual objectification, and perversion.

FORMAT: Lecture/discussion

PHIL 2205.03: Philosophy of Religion.

Monotheistic religions (such as Judaism, Christianity, and Islam) assert the existence of a single God. This course addresses philosophical problems posed by traditional monotheism. Why care whether monotheism is true? Why care whether belief in God is rational? Does the rationality of belief in God depend on the evidence for and against God's existence? What is the best evidence for and against? What bearing does God have on human morality?

FORMAT: Lecture/discussion

CROSS-LISTING: RELS 2205.03

PHIL 2210.03: Crisis and Consent: Foundations of Political Thought: 1651-1778.

See course description for POLI 2410.03, in the Political Science section of this Calendar.

FORMAT: Lecture/tutorial

PREREQUISITE: An introductory course in Philosophy or Political Science

CROSS-LISTING: POLI 2410.03

EXCLUSION: POLI 2400X/Y.06

PHIL 2220.03: Revolution and Rationality: Foundations of Political Thought: 1789-1900.

See course description for POLI 2420.03, in the Political Science section of this Calendar.

FORMAT: Lecture/tutorial

PREREQUISITE: An introductory course in Philosophy or Political Science

CROSS-LISTING: POLI 2420.03

EXCLUSION: POLI 2270X/Y.06, POLI 2400X/Y.06

PHIL 2260.03: Philosophy of Art.

Examines questions such as: What is art? What is its place in human life? Can judgments of artistic value be rational and objective? Can fear of fictional objects be real fear? Can music be a language?

FORMAT: Lecture/discussion

PHIL 2350.03: History of Philosophy: Ancient.

The beginnings of Western philosophy are studied in the writings of the pre-Socratics, Plato, and Aristotle.

FORMAT: Lecture/discussion

PHIL 2361.03: Ancient Philosophy: from Thales to Plato.

See course descriptions for CLAS 2361.03 in the Classics section of this calendar.

PHIL 2362.03: Ancient Philosophy: from Aristotle to Plotinus.

See course description for CLAS 2362.03 in the Classics section of this calendar.

PHIL 2365.03: Plato and the Case of Socrates: Philosophy on Trial.

Socrates (469-399 BCE) never wrote a single word, but posed such threat to Athens that a jury put him to death for the alleged ethical corruption and impiety of his thought. This course will explore the revolutionary life and thought of Socrates, and consider whether the jury's decision against him was justified.

FORMAT: Lecture

CROSS-LISTING: RELS 2365, CLAS 2365

PHIL 2380X/Y.06: Medieval Philosophy.

See course description for CLAS 3380.06, in the Classics section of this calendar.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PHIL 2381.03: Medieval Philosophy from Augustine to Anselm.

A study of texts, primarily within the Latin tradition from Augustine to Anselm, but including selected writings of the Pseudo-Dionysius. Three works will normally be read in their entirety: Boethius, *Consolation of Philosophy*; Dionysius, *Mystical Theology*; Anselm, *Proslogion*. The main interest is the use and transformation of the philosophy of Plato, Aristotle, the Stoics and the Neoplatonists in this development.

FORMAT: Lecture

CROSS-LISTING: CLAS 3381.03

EXCLUSION: CLAS 3380X/Y.06; PHIL 2380X/Y.06

PHIL 2382.03: : Medieval Philosophy from Arabic and Jewish thinkers to Aquinas.

A study of texts which reflect the transformation of the ancient philosophical tradition within the works of medieval Arabic and Jewish thinkers and of the Latin Christians to whom they mediated ancient philosophy. Selections from al-Farabi, Moses Maimonides, Averroes, and Aquinas, among others will be read. Bonaventure's *The Mind's Journey into God* will be read in its entirety.

PREREQUISITE: CLAS 3381 or PHIL 2381 or permission of the instructor

CROSS-LISTING: CLAS 3382.03

EXCLUSION: CLAS 3380X/Y.06, PHIL 2380X/Y.06

PHIL 2450.03: Democracy, Difference and Citizenship: A Survey of Political Philosophy.

This is a survey course in Political Philosophy. This course will give engaged participants a foundation for thinking critically about what these key political concepts mean and why people have long thought these ideals behind these concepts are important. This course aims to show students an analytic and normative survey of the topics; it is not intended either as a historical survey or as an intervention in political science (though it would certainly complement such things).

FORMAT: Lecture

PREREQUISITE: Successful completion of a 1st year writing requirement course

CROSS-LISTING: POLI 2450.03

PHIL 2475.03: Justice in Global Perspective.

In this course, we will explore answers to the central question in philosophical ethics "How should we live our lives and interact with others?" in the context of the international community or "Global Village" in which we now live. The course will involve close concentration on analyses of liberal and non-liberal theorists from around the world on the subjects of: moral rights, the nature of justice, social welfare, human diversity and equality, and the nature of social responsibility. Specific topics may include: the impact of globalization on understanding of moral rights (human rights, labour rights, language rights, etc.), third world responses to western conceptualizations of rights, new conceptions of justice and social transformation including conceptions of restorative justice, conceptualizations of race and ethnicity and sources of personal and communal identity, the nature and importance of autonomy, the importance of different cultural constructions of gender and the problem of sexual violence in a global perspective, and frameworks for understanding shared agency and shared responsibility for poverty and environmental degradation.

FORMAT: Lecture/discussion

PHIL 2480.03: Environmental Ethics.

This course examines humanity's relation to nature from a philosophical perspective. Of particular importance will be the moral or ethical obligations which humanity may have towards the natural environment. Attention will be given to the historical sources of the attitudes and values which have given rise to current ecological problems in the environment, as well as to the question of how to remediate our relationship to nature. We will read from environmental holists, biocentrists, ecofeminists, deep ecologists, and others, and discuss issues concerning animal rights, environmental justice, and activism.

FORMAT: Lecture/discussion

PHIL 2485.03: Technology and the Environment.

What is technology and what role does it play in current environmental problems? Can technologies help us find solutions to environmental crises, or are those problems themselves a direct result of seeing the world from a technological point of view? In this course, we will assess the environmental impact of particular technologies (e.g., fossil fuel technologies, pharmaceutical and information technologies) and discuss sustainable alternatives and appropriate technologies in developing as well as developed nations.

FORMAT: Lecture/discussion

CROSS-LISTING: INTD 2485.03

PHIL 2490.03: Social, Ethical and Professional Issues in Computer Science.

Computers can enable people to do things that our present laws and policies were not formulated to cover (hacking, sharing files on the internet, and companies sharing data). In such cases, people need to be able to decide for themselves the best course of action, and defend such decisions. This course aims at developing the ethical reasoning skills and sensitivities that computer professionals will need to make good decisions and to justify them. The course includes a general introduction to ethical theories and their use in making and justifying decisions. We then consider various issues and case studies, illustrating the kinds of problems that can arise from the use and misuse of computers and technology: the responsibilities of computing professionals; ethics on the internet (hacking, computer crime, netiquette); privacy and information; intellectual property; social and political issues (digital divide, computers and work, the internet as a democratic technology).

FORMAT: Lecture/discussion

PREREQUISITE: No previous knowledge of computing or of philosophy is assumed. Some familiarity with computers is an advantage.

CROSS-LISTING: CSCI 3101.03

EXCLUSION: COMP 3090.03

PHIL 2560.03: Minds and Machines: Introduction to Cognitive Science.

Could we build a robot (or program a computer) that has a mind? What is the relationship between the mind, brain, body and the world? How can technology assist cognition? In what ways are human cognitive systems similar to and different from animal cognitive systems? The course takes a philosophical approach, introducing assumptions and issues arising in research at the intersections of artificial intelligence, robotics, neuroscience, psychology, linguistics, animal cognition, evolutionary biology, and philosophy. This is a useful complement to a major in any Cognitive Science discipline, as well as a fascinating investigation of cognition for anyone who has wondered about what the human mind is and how it works.

FORMAT: Lecture/discussion

EXCLUSION: PHIL 3460

PHIL 2610.03: History of Philosophy: The Rationalists.

The philosophy of Descartes, Spinoza, and Leibniz.

FORMAT: Lecture/discussion

PREREQUISITE: One previous credit in philosophy or permission of the instructor

PHIL 2620.03: History of Philosophy: The Empiricists.

The philosophy of Locke, Berkeley, and Hume, with an introduction to Kant.

FORMAT: Lecture/discussion

PREREQUISITE: One previous credit in philosophy or permission of the instructor

PHIL 2650X/Y.06: Modern German Philosophy.

This course provides a survey of the German philosophical tradition from the enlightenment to the present. Students will gain a broad overview of the German intellectual history through focused readings of the theoretical texts.

FORMAT: Lecture/tutorial

CROSS-LISTING: GERM 2650.06

PHIL 2651.03: Modern German Philosophy I.

This course looks at the history of German philosophy from the Enlightenment to the End of German Idealism. Part one examines the early history of German philosophy, focusing on German Idealism. Students will gain a broad overview of German intellectual history.

FORMAT: Lecture/seminar

CROSS-LISTING: GERM 2651.03

EXCLUSION: GERM/PHIL 2650X/Y.06

PHIL 2652.03: Modern German Philosophy II.

This course looks at the history of German philosophy from German Idealism until today. In particular, the focus will be on the radical philosophical movements of the 19th and 20th centuries. Students will gain a broad overview of German intellectual history.

FORMAT: Lecture/seminar

CROSS-LISTING: GERM 2652.03

EXCLUSION: GERM/PHIL 2650X/Y.06

CO-REQUISITE: GERM 2652.03

PHIL 2660.03: Logic: Understanding Scientific Reasoning.

The course is a general philosophical introduction to methods of evaluating hypotheses, experimental tests, and reasoning in science with applications to everyday reasoning as well. The course is divided into discussion of three kinds of evaluation: theoretical hypotheses, statistical and causal hypotheses, and decisions. No background in science or philosophy is presupposed for this course.

FORMAT: Lecture/discussion

EXCLUSION: PHIL 1050.03

PHIL 2680.03: Ethics in Science.

An introduction to ethical questions that arise in the practice of science. The class will explore a variety of ethical questions associated with the study and practice of science. Students will learn about the nature of philosophical approaches to ethics and how to employ these insights to the tasks of recognizing and reflecting on ethical issues that arise when engaged in scientific research and practice.

FORMAT: Lecture

EXCLUSION: PHIL 1050.03

PHIL 2710.03: Existentialism.

The existentialists focus on what is individual and unique about human lives. They emphasize the sense in which we choose projects and lives and even deaths for ourselves and find self-deception in our ways of avoiding choices. Some existentialists argue that whatever meaning our lives have must be invented. Some contend that life is absurd. This course is an introduction to the themes of existentialism through the study of the philosophy and fiction of Dostoevsky, Ortega y Gasset, Sartre, Camus, and Simone De Beauvoir.

FORMAT: Lecture/discussion

PHIL 2720.03: The Good Life: Well-Being, Meaning & Happiness.

This course is a survey of various ethical views in the history of Western Philosophy, concentrating on the issues facing people who are concerned with what human beings should aim for and do if they are to lead lives that are fulfilling.

FORMAT: Lecture/discussion

PHIL 2805.03: Ethics & Health Care: Patient Care.

How much information must health professionals provide to patients? Can they violate a patient's expressed wishes if they judge a patient to be not fully competent? Should doctors be permitted to end the life of patients when the patient requests assisted suicide? In this course we will explore questions of this nature through a combination of lecture and discussions. Students are encouraged to take this course in conjunction with PHIL 2810.03.

FORMAT: Lecture/discussion

PHIL 2810.03: Ethics & Health Care: Social Policy.

Should the state regulate access to abortion? Should it permit all innovations in assisted reproduction? What are the key ethical questions regarding embryonic stem cell research, cloning, and genetic manipulation? What principles should govern the use of human and animal subjects in medical research? What criteria should we use to determine a fair allocation of healthcare resources in light of the fact that demand inevitably exceeds supply? In this course we will explore questions of this nature through a combination of lecture and discussions. Students are encouraged to take this course in conjunction with PHIL 2805.03.

FORMAT: Lecture/discussion

PHIL 3051.03: Epistemology.

A study of fundamental issues in the contemporary theory of knowledge. The course examines skepticism and investigates the nature of knowledge, belief, meaning, evidence, and truth. Questions are raised about perception and memory and their relation to knowledge.

FORMAT: Lecture/discussion

PREREQUISITE: Two of PHIL 2610.03, PHIL 2620.03, 2130.03 or permission of the instructor

CROSS-LISTING: PHIL 5051.03

PHIL 3105.03: Ethics.

A systematic study of the foundation of morality, including readings from Kant, Foundation of the Metaphysics of Morals and Hume, A Treatise of Human Nature.

FORMAT: Lecture/discussion

PREREQUISITE: Two previous credits in philosophy or permission of the instructor

CROSS-LISTING: PHIL 5105.03

PHIL 3110.03: History of Ethics: Plato to Epicurus.

In this course we will carefully read a number of seminal works in the history of Western Moral Philosophy covering Plato, Aristotle, Stoicism and Epicureanism.

FORMAT: Seminar with class discussion

PREREQUISITE: Two previous credits in philosophy

CROSS-LISTING: PHIL 5110.03

PHIL 3115.03: History of Ethics: Kant's Moral Theory.

In this course we will look closely at one of the most seminal thinkers in the history of Western Moral Philosophy. The course will explore Kant's own writing, some of his most important predecessors, and contemporary commentators. The course will aim to develop a plausible understanding of Kantian ethics - including both its normative and meta-ethical commitments. A primary concern will be the relevance of Kant's views for contemporary moral reflection.

FORMAT: Seminar with class discussion

PREREQUISITE: Two previous credits in philosophy

CROSS-LISTING: PHIL 5111.03

PHIL 3140.03: Logic: Logical Theory I.

An introduction to non-classical logics from a formal perspective.

FORMAT: Lecture/discussion

PREREQUISITE: PHIL 2130.03

CROSS-LISTING: PHIL 5140.03

PHIL 3170.03: Contemporary Feminist Theories.

Contemporary feminism is not a single theory but comprises multiple theoretical perspectives, reflecting both a diversity in women's experience of subordination and a diversity of interests and approaches. This course aims to present some of the richness and variety in feminist theory while offering students the opportunity for sustained critical engagement with influential feminist thinkers.

FORMAT: Seminar

PREREQUISITE: One previous credit in philosophy or in Gender and Women's Studies or permission of the instructor.

CROSS-LISTING: GWST 3500.03/5170.03, PHIL 5170

PHIL 3211.03: Philosophy of Law.

Is coercion central to law? How are law and morality related? What justification can be given for punishment? What is the appropriate scope of individual liberty? These and other issues relating to the analysis and evaluation of law will be considered. The course will examine the competing claims of the Positivist, Realist, and Natural Law accounts of law before turning to some normative issues concerning the justification of legal practice.

FORMAT: Lecture/discussion

PREREQUISITE: Two previous credits in philosophy, permission of the instructor

CROSS-LISTING: PHIL 5211.03

PHIL 3300.03: Philosophy of Language.

What does it mean to say that the elements of language have meaning?

FORMAT: Lecture/discussion

PREREQUISITE: Two previous credits in philosophy including one half credit in logic class, half- or full-year

CROSS-LISTING: PHIL 5300.03

PHIL 3361.03: Ethics, Justice, and Economics.

Assumptions of Neoclassical economic theory are critically examined, with a focus on the ethical and distributional consequences of using markets as an allocation mechanism. We discuss the major conceptions of economic justice, including utilitarianism and social choice theory, Rawlsian egalitarianism, Nozickian libertarianism, Sen's capabilities approach, and equality of opportunity.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 2200.03, ECON 2201.03

CROSS-LISTING: ECON 3360.03, PHIL 5361.03

PHIL 3420.03: Philosophy of Biology.

This course provides an up-to-date systematic examination of central issues in the philosophy of biology. Topics typically include: How far can the Darwinian paradigm be taken to explain adaptive complexity? Is the new emphasis on developmental theory likely to revolutionize evolutionary theory? What are the most fundamental units of selection? Can the concept of biological function be understood without attributing purpose to nature? Why is the concept of species so elusive? Is there a human nature? Is genuine altruism possible given the forces of selection? Is there progress in evolution? How should clashes between faith and reason over the nature of our evolution be resolved?

FORMAT: Lecture/discussion

PREREQUISITE: One previous credit in philosophy or biology

CROSS-LISTING: BIOL 3580.03, PHIL 5420.03

PHIL 3434.03: The Ancient Origins of Political Thought: From Homer to Aristotle

This class will study the very beginnings of political thought with Greek poets, historians and educators, culminating in a careful investigation of the political writings of Plato and Aristotle. We will investigate philosophical questions about the origin of the state, the purpose of political community, the different kinds of regimes or constitutions, the common good, individual freedoms, revolution, war, wealth, poverty, and slavery.

FORMAT: Lectures/tutorials

CROSS-LISTING: POLI 3434.03, CLAS 3434.03

PHIL 3445.03: Philosophy of Mind: The Mind-Body Problem.

This course will critically examine philosophical and scientific articles, and possibly short works of fiction, which explore various theories, problems and arguments regarding the status of minds in the physical world and the relationships between mind, body and world. We will explore and discuss controversies regarding the thesis that the mind is (nothing but?) the brain, and issues such as the theoretical foundations of artificial intelligence, the problem of subjectivity and consciousness, "naturalized" intentionality (how thoughts—if they are physical things or processes—can have the property of being about other things), and animal cognition.

FORMAT: Lecture/discussion

PREREQUISITE: Two previous credits in philosophy

CROSS-LISTING: PHIL 5445.03

EXCLUSION: PHIL 3440.03

CO-REQUISITE: none

PHIL 3450.03: Philosophy of Emotions.

We will concentrate on the resurgence of philosophical interest in the emotions over the last twenty years. Although it is obvious that much human action is emotionally driven, traditionally many philosophers have expressed skepticism about the value of emotions to rational and ethical conduct. Recently, philosophers such as Martha Nussbaum, Amelie Rorty and Ronald De Sousa have argued powerfully that rationality requires emotions. Other philosophers have argued that we need a renewed assessment of the epistemic importance of emotion in revealing power and value. Topics will include emotional rationality; emotion and value; first person authority; cognitive, social constructivist and psycho-evolutionary approaches; emotion and feminist epistemology; emotion, power and racial construction.

FORMAT: Lecture/discussion

PREREQUISITE: At least one previous credit in philosophy including one half credit above the 1000 level.

CROSS-LISTING: PHIL 5450

PHIL 3470.03: Human Rights: Philosophical Issues.

See course description for POLI 3403.03 in the Political Science section of this calendar.

PHIL 3475.03: Democratic Theory.

See course description for POLI 3475.03 in the Political Science section of this calendar.

PHIL 3476.03: Liberalism and Global Justice.

This is a course in normative political theory. We will critically examine some recent normative political theory, and then examine the prospects and perils of attempts by recent liberal theory to articulate a principled vision of global justice. We will consider Rawls' original bounded theory of justice and examine some challenges it faces from both cosmopolitan theories of justice and proponents of nationalism. Next we'll consider rival political conceptions of liberal international justice, and Rawls' response in the form of his recent *The Law of Peoples*. Concluding, we will examine specific issues of applied political justice (namely, human rights and immigration) as well as issues of economic and social justice and poverty.

FORMAT: Lecture/discussion

PREREQUISITE: 2 courses in Philosophy or Political Science or permission of the instructor

CROSS-LISTING: POLI 3476.03, POLI 5476.03, INTD 'Approved List,' PHIL 5476.03

PHIL 3520.03: Philosophy of Social Science.

Can people from different cultures understand each other? What is to be a member of a culture? Are societies best thought of as collections of individuals, or are individuals constituted by societies? In what sense are the social sciences "sciences"? Are societies describable by explanatory laws? What counts as an explanation of human behaviour? This course explores these and related questions through a reading of classic and contemporary philosophers and social theorists.

PREREQUISITE: two full credits in philosophy

CROSS-LISTING: POLI 3496.03, PHIL 5520.03

PHIL 3530.03: Freedom, Action, and Responsibility.

An investigation of the nature of action seeking criteria for individuating, describing, and explaining actions. Topics may include the roles of volitions, intentions, motives, and reasons in actions; responsibility for actions and the concept of free actions.

FORMAT: Lecture/discussion

PREREQUISITE: Two previous credits in philosophy

CROSS-LISTING: PHIL 5530.03

PHIL 3630.03: History of Philosophy: Kant.

Special attention will be paid to Kant's metaphysics.

FORMAT: Lecture/discussion

PREREQUISITE: PHIL 2610.03 or PHIL 2620.03 or permission of the instructor

CROSS-LISTING: PHIL 5630.03

PHIL 3635.03: History of Philosophy: 19th-Century Philosophy.

This course will study major figures in 19th-century philosophy between Kant and Russell: Fichte, Hegel, Schopenhauer, Marx, Kierkegaard, Mill, Nietzsche, James and Bradley. Attention will also be paid to some important figures in related arts and sciences (e.g., Beethoven, Wagner, Ibsen, Feuerbach, Darwin, Freud, Wollstonecraft, Frege). We shall trace the main lines of development in epistemology and metaphysics as well as in ethics and political philosophy.

FORMAT: Lecture/discussion

PREREQUISITE: PHIL 2610.03 or 2620.03

CROSS-LISTING: PHIL 5635.03

PHIL 3640.03: History of Philosophy: Twentieth-Century Philosophy.

The Twentieth Century has been a period of revolutionary change in Anglophone philosophy. This course surveys the most influential figures, including Moore, Austin, Ayer, Wittgenstein, and Quine.

FORMAT: Lecture/discussion

PREREQUISITE: One previous credit in the history of philosophy or permission of the instructor

CROSS-LISTING: PHIL 5640.03

PHIL 3660.03: Post-Modern Philosophy.

Modern Philosophy is a philosophical perspective in which individuals and their conscious thoughts are paramount. Post-modern philosophy rejects this

perspective, replacing it with one in which language and society are paramount. We shall study this perspective in the writings of post-Wittgenstein philosophers like Rorty in the English-speaking world as well as those like Derrida, Irigaray, and Habermas on the Continent. (This course is designed to complement PHIL 3650.03 and 3640.03 but can be taken independently).

FORMAT: Lecture/discussion

PREREQUISITE: Two previous credits in philosophy (including, ideally, PHIL 2610 or PHIL 2620)

CROSS-LISTING: PHIL 5660.03

PHIL 3670.03: Philosophy of Science.

This course offers an advanced survey of issues in the philosophy of science. Topics typically include: the demarcation between science and pseudo-science; scientific method and explanation; metaphysical assumptions of science and the role of values in scientific method and practice. Particular attention will be paid to key episodes in 20th Century philosophy of science. No scientific background is presupposed

FORMAT: Lecture/discussion

PREREQUISITE: At least two previous credits in philosophy, including one half- or full-year logic course such as PHIL 2660.03 or permission of instructor

CROSS-LISTING: PHIL 5670.03

PHIL 3851.03: Metaphysics.

A study of topics such as the nature of substance and change, body and mind, cause and effect, and the concept of existence.

FORMAT: Lecture/discussion

PREREQUISITE: Two previous credits in philosophy including PHIL 1000.06 or PHIL 1010.06 or PHIL 2610.03 or PHIL 2620.03

CROSS-LISTING: PHIL 5851.03

NOTE:

Courses at the 4000 level are intended for advanced undergraduates with a strong background in philosophy. It is assumed that normally a student will have already taken relevant courses at the 3000-level. Courses with titles beginning "Topics in..." have no description, since the selection of topics and instructor is determined after the time of calendar preparation. These are seminar courses. Interested students should consult the department for up-to-date information.

PHIL 4055.03: Topics in Epistemology.

In this seminar course, students focus on a particular topic in epistemology and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

FORMAT: Seminar

PREREQUISITE: At least two previous credits in philosophy or permission of the instructor

CROSS-LISTING: PHIL 5055.03

PHIL 4070.03: Topics in Philosophy of Psychology.

FORMAT: Seminar

PREREQUISITE: At least two previous credits in philosophy or permission of the instructor

CROSS-LISTING: PHIL 5070.03

PHIL 4115.03: Topics in Ethics I.

In this seminar course, students focus on a particular topic in ethical theory and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

FORMAT: Seminar

PREREQUISITE: At least two previous credits in philosophy or permission of the instructor

CROSS-LISTING: PHIL 5115.03

PHIL 4120.03: Theory of Rational Decision.

A study of foundational problems in contemporary theory of rational decision and its philosophical applications, drawing on work by philosophers, psychologists, economists and mathematicians.

FORMAT: Seminar

PREREQUISITE: At least two previous credits in philosophy or permission of the instructor

CROSS-LISTING: PHIL 5120.03

PHIL 4125.03: Topics in Ethics II.

CROSS-LISTING: PHIL 5125.03

PHIL 4150.03: Contemporary Metaethics.

This seminar course surveys contemporary work in metaethics - the branch of moral philosophy concerned with the metaphysical, epistemological, semantic and psychological commitments of the moral discourse and practice.

FORMAT: Seminar

PREREQUISITE: 2 courses in Philosophy

CROSS-LISTING: PHIL 5150.03

PHIL 4190.03: Topics in the History of Philosophy I: Wittgenstein.

In this seminar course, students focus on a particular topic in the History of Philosophy and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

FORMAT: Seminar

PREREQUISITE: At least two previous credits in philosophy or permission of the instructor

CROSS-LISTING: PHIL 5190.03

PHIL 4191.03: Topics in the History of Philosophy II.

In this seminar course, students focus on a particular topic in Modern Philosophy (e.g., the work of Descartes or Spinoza) and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

FORMAT: Seminar

PREREQUISITE: At least two previous credits in philosophy or permission of the instructor

CROSS-LISTING: PHIL 5191.03

PHIL 4192.03: Topics in the History of Philosophy III.

In this seminar course, students focus on a particular topic in Modern Philosophy (e.g., the work of Locke or Hume) and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

FORMAT: Seminar

PREREQUISITE: At least two previous credits in philosophy or permission of the instructor

CROSS-LISTING: PHIL 5192.03

PHIL 4200.03: Topics in Normative Theory.

In this seminar course, students focus on a particular topic in Normative Theory and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

FORMAT: Seminar

PREREQUISITE: At least two previous credits in philosophy or permission of the instructor

CROSS-LISTING: PHIL 5200.03

PHIL 4220.03: Contemporary Philosophical Issues.

Intensive study of a few topics which are currently being debated and may fall outside of or cut across standard classification of areas of interest. Examples are: evolution and value, philosophical accounts of "race" and culture, artificial intelligence, probability, theories of causation, supervenience.

FORMAT: Seminar

PREREQUISITE: At least two previous credits in philosophy or permission of the instructor

CROSS-LISTING: PHIL 5220.03

PHIL 4470.03: Contemporary Liberalism and Democracy.

Liberalism takes a variety of forms and includes many topics including the rule of law, limited government, the free exchange of goods, entitlement to property, the self, and individual rights. Its philosophical and political assumptions provide the intellectual context within which its account of the individual, its vision of the community and its preferred allocation of resources will be assessed.

FORMAT: Seminar

PREREQUISITE: Two full credits in philosophy or political science or permission of the instructor

CROSS-LISTING: POLI 4479.03/5479.03, ECON 4446.03/5446.03, PHIL 5470.03

PHIL 4500.03: Topics in Feminist Philosophy.

In this course, we shall explore some of the current research in a focused area of feminist philosophy. Previous topics have included feminist ethics, feminist epistemology, post modern feminism, the feminist sexuality debates and ecofeminism.

FORMAT: Seminar

PREREQUISITE: Strong background in philosophy or feminist theory (normally including at least one previous course in feminist philosophy or instructor's consent)

CROSS-LISTING: GWST 4500.03/5500.03, PHIL 5500.03

PHIL 4510.03: Topics in the Philosophy of Language.

In this seminar course, students focus on a particular topic in the Philosophy of Language and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

FORMAT: Seminar

PREREQUISITE: At least two previous credits in philosophy or permission of the instructor

CROSS-LISTING: PHIL 5510.03

PHIL 4680.03: Topics in the Philosophy of Science.

In this seminar course, students focus on a particular topic in the Philosophy of Science and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

FORMAT: Seminar

PREREQUISITE: At least two previous credits in philosophy or permission of the instructor

CROSS-LISTING: PHIL 5680.03

PHIL 4700.03: Philosophy of Race.

This course explores the metaphysics and ethics of race. Topics covered include: what "race" means; how old the concept is; whether races exist; what kinds of thing races are; whether it is valuable to acknowledge one's racial identity; and what counts as racism.

PREREQUISITE: At least two previous credits in Philosophy or permission of instructor

CROSS-LISTING: PHIL 5700.03

PHIL 4801.03: Topics in Ethics and Health Care.

In this seminar course, students focus on a particular topic in Ethics and Health Care and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

FORMAT: Seminar

PREREQUISITE: PHIL 2800.06 or 2805.03 AND 2810.03 or permission of the instructor

CROSS-LISTING: PHIL 5801.03, BIOT 5801.03

PHIL 4855.03: Topics in Metaphysics.

In this seminar course, students focus on a particular topic in Metaphysics and investigate it in detail. When the course is offered, the topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable on the Web.

FORMAT: Seminar

PREREQUISITE: At least two previous credits in philosophy or permission of the instructor

CROSS-LISTING: PHIL 5855.03

PHIL 4940.03/4960.03/4980.03/4970X/Y.06/4990X/Y.06: Directed Reading.

Consult department for details. In special cases, courses to suit individual interests can be developed jointly by a student and an instructor.

NOTE: Students taking PHIL 4970X/Y.06 OR 4990X/Y.06 must register in both X and Y in consecutive terms; credit will only be given if both are completed consecutively.

FORMAT: Individual instruction

PREREQUISITE: At least two previous credits in philosophy or permission of the instructor

RESTRICTION: Students may only register for this class with the written permission of the faculty member

Dean

Summerby-Murray, R., ATCL Dip (Trinity College, London), BA, MA (Canterbury), PhD (Toronto)

Chair of Department

Finbow, R., (Room 301B, 494-6606, email: finbow@dal.ca)

Undergraduate Advisor

Denike, M., (Room 362, 494-6298, email: m.denike@dal.ca)
Hayden, A., (Room 352, 494-6602, email: anders.hayden@dal.ca)

Professors Emeriti

Boardman, R., BSc, PhD, DSc (London), FRHistS (McCulloch Professor in Political Science)
Cameron, D. M., BA (Queen's), MA, MPhil, PhD (Toronto)
Eayrs, J. G., BA (Toronto), AM, PhD (Col), FRSC, OC
Stairs, D. W., BA (Dal), MA (Oxon), PhD (Toronto) FRSC, OC
Winham, G. R., BA (Bowdoin), Dip. in Int. Law (Manc), PhD (NorthCar), FRSC

Professors

Black, D. R., BA (Trent), MA, PhD (Dalhousie)
Fierlbeck, K., BA (Alberta), MA (York), PhD (Cantab)
Finbow, R. G., BA (Dalhousie), MA (York), MSc, PhD (London)
Harvey, F., BA, MA, PhD (McGill)
Laursen, F., Cand. Scient. pol (Aarhus Univ.), PhD, (Penn) (Canada Research Chair in European Union Studies)

Associate Professors

Arthur, P., BA (Ghana), MSc (LSE), MA (WLU), PhD (Queen's)
Bow, B., BA (UBC), MA (York), PhD (Cornell)
Carbert, L., BA (Alberta), MA, PhD (York)
Denike, M., BA (Simon Fraser), MA (UBC), LLM (Queens), PhD (York)
Good, K., BA, MA (Man), PhD (Toronto)
Turnbull, L., BA (Acadia), MA, PhD (Dalhousie)

Assistant Professors

Hayden, A., BA (McGill), MES (York), PhD (Boston College)
Zaiotti, R., BA (Bologna), MA (Oxford), PhD (Toronto)

I. What is Political Science?

Politics has been described as "Who Gets What, When, How, Why" in society. The study of politics, or Political Science, is one of the oldest academic disciplines known to humankind. In Ancient Greece political philosophers concerned themselves with creating a good society, and balancing justice with order. Today Political Scientists still study these matters, but the discipline has grown to encompass many aspects of government, such as parliaments, electoral processes and constitutions; or external relations, including issues of war, peace and poverty.

Political Science is important to society because, in an age of complex government, an educated citizenry is the best safeguard for democracy. Political Science is valuable for individuals who want to know more about the values, laws, institutions and policy mechanisms that govern their lives in society, and as well, the differences between their system of government and those in other countries. Beyond this, Political Science is an especially useful preparation for students who wish to pursue careers in teaching, law, public service or business.

Dalhousie University's approach to Political Science is a blend of traditional and modern analysis. The Department offers work in classical political philosophers;

and most courses emphasize government structure and policy making, including domestic public administration and foreign policy. Other courses deal with political behaviour such as public opinion or interest group activity. Courses in modern research methods, including quantitative analysis, are also offered.

The admission requirements for Political Science are listed under the Faculty of Arts and Social Sciences. There are no additional requirements for Political Science beyond those of the Faculty.

Students taking an Honours Degree in Political Science or majoring in Political Science are encouraged to seek advice from Professor Margaret Denike, the Undergraduate Advisor, in developing a program of studies. Professor Frank Harvey is the Coordinator of Graduate Studies.

For General Interest

Students who have not yet decided on a major, or are looking for an elective in Political Science, should take one of the Introductory courses. These may be taken over a single term or over the full year.

PLEASE NOTE: Students who complete the King's Foundation Year program with a grade of "B-" or higher will not be required to complete an Introductory course in Political Science.

Students should take no more than the equivalent of one full credit in 1st year Political Science courses.

II. Degree Programs

Students concentrating in Political Science may take a 15 credit minor program, 20 credit major, or 20 credit honours program. The degree requirements are spelled out in University and Faculty regulations, and in departmental regulations outlined below. The specific courses to be taken in each individual program are chosen in consultation with the undergraduate advisor.

A student's program may consist of a general selection of courses from the Department's offerings or may emphasize one of the sub-fields of Political Science, as set out below.

Students are encouraged to develop distinctive programs tailored to their own particular interests and circumstances. They should, however, seek advice early in their program to ensure that they are consistent with University regulations.

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, page 125 of this calendar.

In addition to introductory courses, Political Science courses are divided into four subfields:

- Canadian Government and Politics
- Comparative Government and Politics
- Political Theory and Methodology
- International Politics and Foreign Policy

Full course descriptions appear in Section III

Introductory

- POLI 1050.03: Ideas, Politics, People
- POLI 1055.03: Governments and Democracy
- POLI 1100 X/Y.06: Political Worlds: An Introduction to Government and Politics
- POLI 1103 X/Y.06: Intro to Government and Politics

Canadian Government and Politics

- POLI 2210.03: Unity and Diversity: The Dynamics of Canadian Federalism
- POLI 2220.03: Political Power and Partisan Politics: The Structures of Canadian Parliamentary Government
- POLI 2230.03: Local Government
- POLI 3206.03: Constitutional Issues in Canadian Politics
- POLI 3208.03: Canadian Provincial Policies
- POLI 3220.03: Intergovernmental Relations
- POLI 3224.03: Canadian Political Parties
- POLI 3231.03 The Politics and Governance of Canadian Cities
- POLI 3233.03 Politics and the Economy of Canada
- POLI 3235.03 The Politics of Regionalism
- POLI 3405.03 Canadian Political Thought
- POLI 4204X/Y.06: Advanced Seminar in Canadian Politics
- POLI 4207.03: Canadian Politics: Themes and Theories

- POLI 4228.03: Pressure Politics in Canada: Opportunities and Obstacles
- POLI 4240.03: Policy Formulation in Canada
- POLI 4241.03: Introduction to Policy Analysis
- POLI 4242.03: Politics of Reason, Passion, and Biology
- POLI 4250.03: Canadian Public Administration
- POLI 4260.03: The Politics of Health Care

Comparative Government and Politics

- POLI 2300X/Y.06: Comparative Politics
- POLI 2350.03: Governance and Globalization
- POLI 3304.03: Comparative Federalism
- POLI 3311.03: Sport and Politics
- POLI 3315.03: African Politics
- POLI 3320.03: European Politics
- POLI 3321.03: Politics of the European Union
- POLI 3360.03: Politics in Latin America
- POLI 3378.03: U.S. Constitution, Government, and Politics
- POLI 3385.03: Politics of the Environment
- POLI 4302.03: Comparative Development Administration
- POLI 4303.03: Human Rights: Political Issues
- POLI 4322.03: The EU as a Global Actor
- POLI 4340.03: Approaches to Development
- POLI 4355.03: Comparative Perspectives on the Development State
- POLI 4380.03: Politics of Climate Change

Political Theory and Methodology

- POLI 2410.03: Crisis and Consent: Foundations of Political Thought: 1651-1778
- POLI 2420.03: Revolution and Rationality: Foundations of Political Thought, 1789-1900
- POLI 2450.03: Democracy, Difference and Citizenship: A Survey of Political Philosophy
- POLI 3401.03: Contemporary Political Thought
- POLI 3405.03: Canadian Political Thought
- POLI 3426.03: Sex and the State
- POLI 3427.03: The Sexualization of Western Political Thought
- POLI 3431.03: Politics Through Film and Literature
- POLI 3434.03: The Ancient Origins of Political Thought: From Homer to Aristotle
- POLI 3440.03: The Politics of Fear
- POLI 3450.03: Storm and Stress: Romanticism and the Backlash Against Enlightenment Political Thought
- POLI 3475.03: Democratic Theory
- POLI 3492.03: Political Inquiry I
- POLI 3493.03: Political Inquiry II
- POLI 4403.03: Human Rights: Philosophical Issues
- POLI 4479.03: Liberalism
- POLI 4481.03: Theories of Violence, Persecution, Genocide

International Politics and Foreign Policy

- POLI 2520.03: World Politics
- POLI 2530.03: Foreign Policy in Theory and Practice
- POLI 2540.03: Canadian American Relations
- POLI 3505.03: Human Rights: Foundations
- POLI 3520.03: Building Democracy and Peace
- POLI 3525.03: Comparative Foreign Policy Simulation
- POLI 3531.03: The United Nations in World Politics
- POLI 3535.03: The New International Division of Labour
- POLI 3540.03: Foreign Policy in the Third World
- POLI 3544.03: Political Economy of Southern Africa
- POLI 3550.03: Japanese Foreign Policy
- POLI 3560.03: Human Development/Security at the Start of the Twenty-first Century
- POLI 3565.03: Contemporary Security Studies
- POLI 3567.03: International Organization
- POLI 3568.03: Canada and the World
- POLI 3574.03: American Foreign Policy
- POLI 3577.03: Civil-Military Relations in Contemporary Western Society
- POLI 3581.03: Diplomacy and Negotiation
- POLI 3589.03: Politics of the Sea I
- POLI 3591.03: Pirates, Profiteers and Protectors of the Sea
- POLI 3596.03: Explaining Global Conflict and Violence
- POLI 4340.03: Approaches to Development

- POLI 4512.03: The Politics of North America
- POLI 4569.03: Canadian Foreign Policy
- POLI 4575.03: Nuclear Weapons and Arms Control in World Politics
- POLI 4581.03: International Diplomacy: Institutions and Practices
- POLI 4587.03: International Political Economy
- POLI 4590.03: Politics of the Sea II
- POLI 4636.03 Nationalism and Statecraft
- POLI 4810.03 Special Topics in Political Science
- POLI 4820.03 Special Topics in Political Science

Reading Courses (with permission of individual instructor)

- POLI 3601X/Y.06: Readings in Political Science
- POLI 3602.03: Readings in Political Science
- POLI 3603.03: Readings in Political Science
- POLI 4810.03: Special Topics in Political Science
- POLI 4820.03: Special Topics in Political Science

Special Topics (offered occasionally)

- POLI 2810.03: Special Topics in Political Science
- POLI 2820.03: Special Topics in Political Science
- POLI 3810.03: Special Topics
- POLI 3820.03: Special Topics

A. Honours Program

An honours program normally consists of a first year course, or two half-credit courses, and not less than nine or more than eleven additional courses, or equivalent in half-credit courses, in Political Science. Although nine to 11 courses, or their equivalent, represents the range allowed under the general university regulations, the Department recommends quite strongly that the normal honours program consist of nine courses, or equivalent, past the first-year course, including the honours essay. The intent of this recommendation is to encourage our honours students to take supporting course work in related disciplines.

Any exception to the requirements stipulated below can only be obtained through written petition to the Undergraduate Committee, which reserves the authority to determine admission into the Honours program in these cases.

Students seeking entry to the Honours Program are advised to see the Honours Advisor in the spring term of their third year, when all grades from their third year are in.

Core Courses

For purposes of the honours program the Department has designated a number of second year courses as honours core courses. These core courses represent the political science sub-fields of Canadian government and politics, comparative government and politics, political theory and methodology, and international politics and foreign policy. The core courses by area are as follows:

- POLI 2210.03 and POLI 2220.03
- POLI 2300X/Y.06
- POLI 2410.03 and POLI 2420.03
- POLI 2520.03 and POLI 2530.03

Departmental Requirements

2000 level

- Three core courses, or equivalent in half-credit courses, which must include 2410.03 and 2420.03
- Two additional Political Science credits at or above the 2000 level
- Two Political Science credits at advanced level (third and fourth year), not including those listed below.

3000 level

- POLI 3492.03 (or equivalent)
- POLI 3493.03
- These courses (2410, 2420, 3492, 3493) should be completed by the end of the student's third year in order to be considered for admission to the Honours program.

4000 level

- POLI 4600X/Y.06

Overall, these requirements leave a minimum of two optional credits, which may be taken at the second, third, or fourth year levels.

To gain admittance into the Honours program, students must have:

1. B average in their last ten credits
2. B+ average in a group of four Political Science courses, or equivalent, which must include:
 - Two core courses, or equivalent (which must include POLI 2410.03 and POLI 2420.03)
 - POLI 3492.03 and 3493.03
 - One full credit, or equivalent, at the 3000 level in Political Science

Students should complete the Honours Application Form (available from the Registrar) and submit it to the Political Science Honours coordinator at the end of their third year.

In their fourth year, honours students are encouraged to take the senior 4000 level courses in addition to POLI 4204/4207. Permission of the instructor is required.

This provides fourth year honours students with the opportunity to work with graduate students at an advanced level.

The honours essay is counted as one credit. It is prepared during the fourth year under the supervision of a faculty member. The essay shows the student's ability to develop a systematic argument with reference to pertinent literature and other such data or analytical materials as may be appropriate. The credit number for the honours essay is POLI 4600.06. Arrangements are made for honours students in the last year to meet their supervisor with some regularity to discuss and ultimately present the work represented in their essay. Honours students will also be expected to participate in the Honours Seminar, which will count toward the "21st" grade required by the University.

B. Combined Honours

PLEASE NOTE: Be sure to read the Faculty of Arts and Social Sciences requirements for the Combined Honours Program listed in the Degree Requirements section of this Calendar.

Several of the more common combined honours programs are: Political Science and Philosophy; Political Science and History; Political Science and Economics; Political Science and Sociology; Political Science and Computer Science and Political Science and International Development Studies. Students interested in taking any of these combined honours programs or in discussing other possible programs should consult initially with the Honours Supervisor.

To obtain a Combined Honours, with an emphasis upon Political Science, students must have

- Two core courses in Political Science, which must include POLI 2410.03 and POLI 2420.03 (NOTE: The prerequisite for these courses is an introductory course in Political Science);
- A methods course in one of the two fields (e.g., POLI 3492.03 (or equivalent) and 3493.03)
- At least two full credits at an advanced level in Political Science (in addition to 3492.03 and 3493.03); and
- POLI 4600X/Y.06

To gain admittance into the Combined Honours program, with an emphasis upon Political Science, students must have a B+ average in a group of three Political Science courses comprised of two core courses (including POLI 2410.03 and POLI 2420.03) and 3492.03 and 3493.03.

Students who take a combined Honours, with an emphasis on a subject OTHER than Political Science, must take a minimum of

- One core course in Political Science (note that the prerequisite for core courses is an introductory course in Political Science);
- POLI 3492.03 (or an equivalent quantitative methods course (approved by the Department)) and POLI 3493.03;
- One full credit in Political Science beyond the 2000 level; and
- Two other full-credits Political Science courses beyond the 1000-level.

To gain admittance into the Combined Honours program, with an emphasis upon a subject OTHER than Political Science, students must have a B+ average in a group of two Political Science courses, including a core course.

C. BA (20 credit) Major in Political Science

The Major program offers the opportunity for students to design a more focused study within a specific subfield of Political Science. The Major program is a 20 credit course: students must have a minimum of six and a maximum of nine Political Science courses in total above the 1000 level; three of these courses must be beyond the 2000 level.

Departmental Requirements

1000 level

- One full credit (or two half credits) from the following: POLI 1010.03, 1020.03, 1025.03, 1050.03, 1055.03, 1100X/Y.06, 1103X/Y.06

2000 level

- Two full credits in different core course fields. The core course areas are as follows:
 - POLI 2210.03 and POLI 2220.03
 - POLI 2300X/Y.06
 - POLI 2410.03 and POLI 2420.03
 - POLI 2520.03 and POLI 2530.03

Students must complete a full credit in two of these areas, for a total of two full credits.

3000 level

- Three full credits. Note: one half credit must be either POLI 3492.03 (or equivalent) or POLI 3493.03.
- One additional full credit in Political Science above the 1000 level

Other required courses

A writing course or King's Foundation Year Program.

D. BA (20 credit) Double Major in Political Science Departmental Requirements

1000 level

- One full credit (or two half credits) from the following: POLI 1010.03, 1020.03, 1025.03, 1050.03, 1055.03, 1100X/Y.06, 1103X/Y.06

2000 level

- Two full credits in different core course fields. The core course areas are as follows:
 - POLI 2210.03 and POLI 2220.03
 - POLI 2300X/Y.06
 - POLI 2410.03 and POLI 2420.03
 - POLI 2520.03 and POLI 2530.03

Students must complete a full credit in two of these areas, for a total of two full credits.

3000 level

- Two full credits. Note: one half credit must be either POLI 3492.03 (or equivalent) or POLI 3493.03.

Other political science

- One additional full credit in Political Science above 1000 level

Other required courses

- A writing course or King's Foundation Year Program

Equivalents

- Courses equivalent to POLI 3492 are STAT 1060, SOSA 3403 and CTMP 3000

E. BA (15 credit) Minor in Political Science

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

F. Minors Program

Minor in Political Science

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

Summer School Courses

The Department normally offers several second year or third year courses in the summer sessions. For details, see the University summer school calendar.

III. Course Descriptions

The first digit of each course number indicates year, or level, of course. Except for 1000 level courses, the second digit denotes the sub-field within which the courses is listed.

Not all courses are offered every year. For final listings check with the Department office or the current timetable.

POLI 1050.03: Ideas, Politics, and People.

This course is an introduction to major political concepts, ideas, and disputes. It provides a foundation for all further courses in political science. By reference to current political issues, we explore the ideologies of nationalism, liberalism, socialism, conservatism, fascism, feminism, and other political ideas. A unit on political economy elucidates what these ideologies mean in practice. Another unit on political culture examines how these ideologies work out differently in individual nation-states. POLI 1055.03 follows sequentially.

FORMAT: Lecture

EXCLUSION: POLI 1100X/Y.06, 1103X/Y.06, 1015.03, 1035.03, 1025.03

POLI 1055.03: Governments and Democracy.

What do governments do? And how is democratic government distinct and valuable? In this course, we study how the institutions of government - legislatures, constitutions, federalism, judiciary, electoral system - operate. A unit on political violence and democratization includes material on development and modernization theory. All this material leads to a final question: Is global governance the next stage in the development of democracy? This course follows sequentially from POLI 1050.03

FORMAT: Lecture

EXCLUSION: POLI 1100X/Y.06, 1103X/Y.06, 1010.03, 1030.03, 1020.03

POLI 1100X/Y.06: Political Worlds: An Introduction to Government and Politics.

In this team-taught introductory course, you will be exposed to the diverse worlds of political life through the research and teaching interests of a diverse range of professors in the Political Science department. They will introduce you to a range of key issues and approaches that animate both their own research and contemporary politics in various parts of the world. Topics addressed will include: the nature and limits of democracy; the relationship between economic wealth and political power; the quest for human rights; the nature of diplomacy and international organization; the challenge of defining and promoting international security; the challenges of global inequality and development; forms of political participation; the politics of environmental sustainability; and the relationship between politics and sports.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

EXCLUSION: POLI 1010.03, POLI 1015.03, POLI 1020.03, POLI 1025.03, POLI 1030.03, POLI 1035.03, POLI 1103X/Y.06

POLI 1103X/Y.06: Introduction to Government and Politics.

The approach and format in POLI 1103.06 is similar to that in POLI 1100.06 above. This course is also designed, however, to serve as the Department's designated Writing Course.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: ~~W~~ Writing Requirement, lecture

EXCLUSION: POLI 1010.03, POLI 1015.03, POLI 1020.03, POLI 1025.03, POLI 1030.03, POLI 1035.03, POLI 1100X/Y.06

POLI 2210.03: Unity and Diversity: The Dynamics of Canadian Federalism.

Along with parliamentary government and the Charter of Rights and Freedoms, federalism is one of the three constitutional pillars of governance in Canada. Federalism has been central to Canada's political, economic, social and cultural development. The course examines federalism through three related conceptual angles: First, and most fundamentally, the course explores how federalism shapes the practice of democracy in Canada. Second, it examines how federalism either facilitates or hinders the recognition, accommodation and inclusion of a variety of territorial and non-territorial interests and identities. Third, it investigates how federalism influences the development and implementation of public policy. The course provides an overview of the institutional structures and evolution of Canadian federalism as well as the relationship between these structures and Canadian society. It engages with contemporary debates about the performance of Canada's federal institutions and explores possible reform options. Issues covered in the course include, for instance, the role of Quebec nationalism in the federation's evolution, the relationship between the Charter of Rights and Freedoms and federalism, debates concerning fiscal "imbalances" in the federation, the place of emerging "orders of government" (including

municipalities and of Aboriginal governments) in the federation, and debates concerning the causes and consequences of centralization and decentralization in the Canadian federation.

FORMAT: Lecture/discussion

PREREQUISITE: An introductory course in Political Science

EXCLUSION: POLI 2200X/Y.06

POLI 2220.03: Political Power and Partisan Politics: The Structures of Canadian Parliamentary Government.

Canadian government is dominated by prime ministers and premiers. Why this concentration of power at both the federal and provincial levels of government? Are Members of Parliament who are not in the Cabinet really “nobodies” as one recent PM characterized them? Are Cabinets themselves becoming no more than “focus groups”? Do unelected partisan aides and public service advisors have more influence than the vast majority of elected representatives? Are political parties irrelevant as vehicles for citizen engagement? Are interest groups or social movements any more relevant? Do elections matter? Are the media merely the political instruments of the business elites? These are among the issues that are examined in this course in an attempt to understand the most critical factors that shape the structuring of power in contemporary Canadian government.

FORMAT: Lecture/discussion

PREREQUISITE: An introductory course in Political Science

EXCLUSION: POLI 2200X/Y.06

POLI 2300X/Y.06: Comparative Politics.

This course introduces students to the methodology and scope of comparative politics, including analysis of political institutions and behaviour. General overviews and selected case studies are provided for liberal democracies, post-communist, newly industrializing and least developed countries. Topics include theories of the state, political culture and socialization, electoral and party systems, interest groups, ethnic and regional cleavages, gender politics, policy outcomes and system performance, political participation and leadership and contemporary challenges and changes. Group presentations are used for student exploration of these themes.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion

PREREQUISITE: Introductory political science course or instructors' permission

POLI 2350.03: Governance and Globalization.

This seminar course provides students with an opportunity for critical evaluation of the reshaping of political processes and institutions that are occurring as the result of globalization. The course will explore the concept of governance in the context of changing dynamics related to the trans-nationalisation of production and increased capital mobility as well as the rise in numbers and influence of NGOs and new social movements. Hence, “new” forms of governance emerging out of decentralization and/or disinvestment of state authority and supra-national arrangements that are broadly captured within the concept of “global governance” will be explored along with traditional concepts of governance that centre on the actors, structures and environments of governmental policy-making. A range of issues will be examined – governance of economies, environment, communications, human rights, health, conflict and complex emergencies – within the context of debates involving the “internationalization” of the state; the role of identities – e.g. nationalist, ethnic, gender, cosmopolitan; the growing relevance of regions and the nature of and prospects for democracy and citizenship.

FORMAT: Seminar

PREREQUISITE: An introductory course in Political Science

EXCLUSION: POLI 3350.03

POLI 2410.03: Crisis and Consent: Foundations of Political Thought: 1651-1778.

This course covers some of the most important early modern theorists (Hobbes, Locke, Hume, Smith, Rousseau, and Montesquieu). It looks at the development of natural rights, democracy, capitalism, and citizenship.

FORMAT: Lecture/tutorial

PREREQUISITE: An introductory course in Political Science or Philosophy

CROSS-LISTING: PHIL 2210.03

EXCLUSION: POLI 2400X/Y.06

POLI 2420.03: Revolution and Rationality: Foundations of Political Thought, 1789-1900.

This course focuses upon late-eighteenth and nineteenth-century thought (Burke, Paine, Tocqueville, Mill, Hegel, Marx, Nietzsche), and investigates human rights,

democracy, utilitarianism, individualism, socialism, and the roots of postmodern thought. POLI 2410 is not a formal prerequisite for POLI 2420, although students will find POLI 2410 a very useful introduction to POLI 2420.

FORMAT: Lecture/tutorial

PREREQUISITE: An introductory course in Political Science or Philosophy

CROSS-LISTING: PHIL 2220.03

EXCLUSION: POLI 2400X/Y.06

POLI 2450.03: Democracy, Difference and Citizenship: A Survey of Political Philosophy.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: An introductory course in Political Science or Philosophy

CROSS-LISTING: PHIL 2450.03

POLI 2520.03: World Politics.

Why do states fight wars? Commit genocide? Sign treaties? Acquire and sell ballistic missile and nuclear technologies? Join economic and military alliances? Enforce and/or dismantle sanctions against states like Iraq, Iran or North Korea? Why can't we enforce international law as effectively as we enforce domestic law? Can we identify (and enforce) an objective set of universal moral values to guide relations between states and peoples? Is the U.N. a useful institution or is it destined to fail? Should NATO have intervened in conflicts in Bosnia, Kosovo, Rwanda or Afghanistan? What were the factors that led to the US-UK invasion of Iraq in 2003, and what does this tell us about US foreign policy and the origins of major conflict? These are some of the questions the course is designed to answer. Major frameworks will guide discussion.

FORMAT: Lecture/discussion

PREREQUISITE: An introductory course in Political Science is recommended.

EXCLUSION: POLI 2500X/Y.06

POLI 2530.03: Foreign Policy in Theory and Practice.

Foreign Policy is concerned with the way that individual states decide on their priorities and strategies in relation to the rest of the world. This course begins with a brief review of International Relations theories and their application to foreign policy. The main part of the course explores theories about what drives foreign policy decision-making: political systems, bureaucracy, culture, psychology, and leadership. The last part of the course looks at the instruments of foreign policy, with particular attention to the military, trade and investment, and foreign aid. All parts of the course feature a mix of abstract theory and specific, real-world examples.

FORMAT: Lecture/discussion

PREREQUISITE: An introductory course in Political Science

EXCLUSION: POLI 2500X/Y.06

POLI 2540.03: Canadian-American Relations.

Canada's relationship with the United States affects almost every aspect of our political, economic, social and cultural life. The U.S. outranks Canada on all the dimensions of power and influence by factors of 10 or 12 to one, and in some fields (e.g., military capacity) by considerably more. Well over 40% of Canada's economic production goes into exports, and of that well over 80% goes to the United States. Canadians cannot go to the movies, watch television, listen to popular music, consume fast food, or do errands at the local shopping centre without exposing themselves to what a prominent American political scientist has described as his country's 'soft power'. This course will consider how Canadians are affected by these and other influences from south of the border, how they have debated them among themselves, and what public policies have been established in response to the concerns they have generated.

FORMAT: Lecture/discussion

PREREQUISITE: An introductory course in Political Science

EXCLUSION: POLI 2510X/Y.06, 2512X/Y.06

POLI 2810.03/2820.03: Special Topics in Political Science.

An examination of selected issues in Political Science. This course explores (e.g. when a visiting scholar is on campus) a special topic that is not a regular offering of the department. It is taught as a lecture or seminar course, not as an independent studies course. Since the topics covered in these courses differ from year to year, students should seek further information from the Political Science Department before registering.

FORMAT: Lecture/seminar

PREREQUISITE: Instructor's Permission

POLI 3206.03: Constitutional Issues in Canadian Politics.

These are political issues that possess an important constitutional dimension. They include judicial review and the role of the Supreme Court of Canada, constitutional amendment, the representation formula, the Charter of Rights and Freedoms, language rights and the Crown.

FORMAT: Seminar

PREREQUISITE: POLI 2210.03 and 2220.03

POLI 3208.03: Canadian Provincial Policies.

An analysis of the dynamics and structures of provincial governments. Political parties, voting behaviour, legislatures, electoral systems, bureaucracies and policy formulation constitute the core of this course. Attention is also paid to interprovincial and intergovernmental relations.

FORMAT: Seminar

PREREQUISITE: POLI 2210.03 and POLI 2220.03 or instructor's permission

POLI 3220.03: Intergovernmental Relations.

This course will examine the territorial division of political and administrative power and the nature of relations between governments which result from such a division of power, including federal-provincial-municipal or "tri-level" relations. Specific topics will include the role of the courts in constitutional interpretations, the instruments of "fiscal federalism" (including equalization payments, conditional grants, tax sharing arrangements and shared cost programs), administrative relationships and the concept of "executive federalism".

These themes will be pursued further by each student through the preparation of a research paper. This paper will deal with a policy area selected by the student (transportation, education, health, etc.) and will provide an opportunity for a more intensive examination of the impact of intergovernmental relations, on public policy and vice versa. For additional information about course requirements, please consult the instructor.

FORMAT: Lecture/discussion

PREREQUISITE: POLI 2210.03 and 2220.03 or instructor's permission

POLI 3224.03: Canadian Political Parties.

The Canadian party system, viewed as an integral part of the entire political system, presents a number of interesting questions for exploration, such as lower voter turnout, electoral reform, the role of party leaders, and the manner in which parties contribute to Canadian democracy. The particular themes emphasized will vary from year to year. Approved with Canadian Studies.

FORMAT: Lecture/discussion

PREREQUISITE: POLI 2210.03 and 2220.03 or instructor's permission.

POLI 3232.03: Local Government In Canada.

Most Canadians live in cities, yet local government is the weakest unit in our federal system. What accounts for this? After all, local government has often been described as the foundation of democracy. In Canada, local governments have many unique characteristics, from their constitutional status to the council system and a tradition of non-partisan government. We will explore the character of local government and the issues related to local governance, including regional and metropolitan restructuring and citizen participation, municipal finance, provincial-local relations, and the role of the federal government.

FORMAT: Lecture/discussion

PREREQUISITE: An introductory course in Political Science

EXCLUSION: POLI 2230 and POLI 3231

CO-REQUISITE: POLI 2220 or POLI 2210

POLI 3233.03: Politics and the Economy in Canada.

This seminar course, for graduates and senior undergraduates, will explore the relationship between politics and economic life in Canada. Canada's economic development, the role of the state, imperial and continental relationships, the debate over free trade, economic nationalism, and Canada's place in a global economy will be analyzed. Students will consider staples, liberal Keynesian and neo-classical, socialist and feminist perspectives. Other topics include women, trade unions, native and immigrant communities, and the impact of economic forces on national unity. Students will debate controversial themes on each topic. Student essays will explore a range of contemporary issues including the debt crisis, the federal-provincial fiscal relations, the economic consequences of Quebec separation, regional development programs, and policies for industrial development, human resources, technological change, poverty and inequality, etc.

FORMAT: Seminar

PREREQUISITE: Open to undergraduates who have completed courses in Canadian politics or economic history, or by permission of the instructor.

POLI 3235.03: The Politics of Regionalism.

The course surveys the interaction between politics and economics in Canada with emphasis on the question of regional development. It will canvass competing explanations for differences in economic development among Canada's regions with special emphasis on Maritime economic problems, highlighting both the political sources of regional disparities and continuing efforts to rectify them. Distinctive Western, Quebec and Ontario concerns will also be covered. Seminars for senior undergraduates will feature student presentations and research projects. Approved with Canadian Studies.

FORMAT: Seminar

PREREQUISITE: Open to senior undergraduates who have completed courses on Canadian politics, or permission of the instructor.

POLI 3304.03: Comparative Federalism.

A seminar course which examines the theory and practice of federalism within a comparative framework. The actual federations discussed depend in part on student interest but usually includes both established federal nations and those moving in that direction.

FORMAT: Seminar

PREREQUISITE: POLI 2210.03/2220.03 or POLI 2300X/Y.06 or (POLI 2520.03 and 2530.03) or instructor's permission

CROSS-LISTING: PUAD 6755.03

POLI 3311.03: Sport and Politics.

This course examines the role of sport in domestic, transnational and international politics. It addresses the gap in much of mainstream political science concerning the pervasive influence of popular cultural trends and practices on political life. Some topics include: the role of sport in political socialization and the creation of national identity; the politics of the Olympic Games; sport and globalization; and sport and the politics of gender and wealth accumulation.

FORMAT: Seminar

PREREQUISITE: POLI 2300.06 or POLI 2520.03/2530.03 or permission of instructor

POLI 3315.03: African Politics.

The diversity of states, politics, economy and society in post-colonial sub-Saharan Africa is examined in this seminar. Topics include theoretical approaches, economic frameworks, governmental regimes, structural adjustments, civil society, and intra-regional political economies, and selected aspects of policy such as economic reform, political liberalization, women and development, drought and ecology, AIDS and health.

FORMAT: Seminar

PREREQUISITE: POLI 2300X/Y.06 or equivalent or instructor's permission

POLI 3320.03: European Politics.

This course looks at the political systems of selected countries in Europe, including Germany, Britain, Spain, Ireland and Switzerland. Topics include political parties and elections, federalism, ethnicity and regional nationalisms, immigration politics, and changing state-economy relations.

FORMAT: Seminar

PREREQUISITE: POLI 2300X or POLI 2300Y and POLI 2520 and POLI 2535 or instructor's permission.

EXCLUSION: POLI 3325X/Y.06

POLI 3321.03: Politics of the European Union.

Europe is a complex polity. Almost all countries are members of the European Union (EU), which has common government institutions and policy-making processes. The course examines these important developments in the context of theories of integration. Among topics discussed are the common currency, agricultural politics, the common foreign and security policy, social policy issues, and the significance of institutions such as the European Parliament. The role of the EU in the global economy, and expansion into central and Eastern Europe, are also discussed.

FORMAT: Seminar

PREREQUISITE: POLI 2300X or POLI 2300Y and POLI 2520 and POLI 2530 or instructor's permission.

EXCLUSION: POLI 3325X/Y.06

POLI 3360.03: Politics in Latin America.

This seminar for advanced undergraduates examines one of the world's most dynamic, diverse and rapidly changing regions. It surveys Latin America's search for democracy from colonial to contemporary times. Students examine differing perspectives on the nature of democracy and explore Latin American political history and development, including the indigenous foundations, the colonial impositions, and more recent foreign intervention. The course examines political structures and values, the authoritarian presidency, military politicization, party

competition and electoral politics. The course also examines state-society relations, the immense inequality, the changing role of women and the remobilization of indigenous peoples and the impact of liberalization and reactions to it from civil society. The course concludes by examining prospects for consolidation of democracy and liberalization in the contemporary era of globalization, the significance of the revitalization of the political left, and the implications for scholarly interpretations.

FORMAT: Seminar

PREREQUISITE: POLI 2300.03 or POLI 2350.03 or POLI 2520.03 or INTD 2001.03 or INTD 2002.03 or SPAN 2109.03 or SPAN 2110.03 or SOSA 3168.03 or HIST 2384.03 or HIST 2385.03 or HIST 2386.03 or HIST 2387.03 or HIST 3390.03 or by permission of the instructor

POLI 3378.03: U.S. Constitution, Government, and Politics.

The purpose of this seminar course is to gain a thorough and critical understanding of the American political process. To this end, a series of topics are examined, beginning with the framing of the constitution and concluding with questions about political culture. There is considerable emphasis on formal and informal political institutions, especially political parties and elections.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: POLI 2210.03/2220.03 or POLI 2300X/Y.06 or instructor's consent

POLI 3385.03: Politics of the Environment.

This course examines competing perspectives on the political, social, and economic forces driving environmental degradation, as well as differing visions of the types of political change required for ecological sustainability. Topics include: competing perspectives on ideas of limits to growth and sustainable development; the links between poverty, North-South inequality, and environmental degradation; population growth; the promise and limits of technological solutions; consumerism and ecological degradation; market-based environmentalism; ecological modernization; and ecological critiques of capitalism.

FORMAT: Lecture/seminar

PREREQUISITE: Any Political Science course or permission of the instructor.

EXCLUSION: POLI 3585.03

POLI 3401.03: Contemporary Political Thought.

This course provides an overview of general themes and current debates within contemporary western social and political thought. The course will profile the work of selected authors (such as Michel Foucault, Noam Chomsky, Judith Butler, Carole Pateman, and Charles Mills) on topics such as power, justice, community, citizenship, property, entitlement, identity, and difference. We will also discuss the impact of theoretical developments, such as post-colonialism, feminism, postmodernism, and critical race studies on social, political, and legal reform.

FORMAT: Lecture/seminar

PREREQUISITE: POLI 2410 or POLI 2420 or PHIL 2210 or PHIL 2220, or instructor's permission

POLI 3405.03: Canadian Political Thought.

This course addresses philosophical issues that play a major role in contemporary Canadian politics. These include minority rights and multiculturalism; nationalism, federalism, and self-determination; and citizenship and the politics of identity. Approved with Canadian Studies.

FORMAT: Seminar

PREREQUISITE: POLI 2210.03/2220.03 or POLI 2410.03/2420.03

EXCLUSION: POLI 3205.03

POLI 3426.03: Sex and the State.

This course will consider the role of the state and other institutions in the social, moral and legal production and regulation of sex and gender, particularly in Western countries. It will begin with a brief historical overview of the role of religious prescriptions in the social and legal regulation of sex, and in the refinement of laws and policies that have been implicated in sex- and gender-based discrimination. We will also address a range of contemporary topics such as the decriminalization of homosexuality; hate crimes against sexual minorities; the politics of relationship recognition; state response to HIV/AIDS; gender-related refugee claims; and developments in the regulation of reproductive technologies.

FORMAT: Seminar

PREREQUISITE: POLI 1010 or 1015 or 1030 or 1035 or 1050 or 1055 or 1100 or 1103 or 2210 or 2230 or 2350 or 2410 or 2420 or 2430 or 2440 or 2450, or permission from the instructor

CROSS-LISTING: GWST 3426.03

POLI 3427.03: The Sexualization of Western Political Thought.

Representations of women and constructs of femininity are a significant part of mainstream western political thought. Drawing on contemporary critical analyses, this course examines the roles of such representations in the work of leading philosophers, with attention to understanding the relation between ideas of sexual difference and their general systems of thought. We will also discuss the work of contemporary feminist political theorists on a range of social and legal issues, through a review of recent developments in theories of knowledge, embodiment, equality, and rights.

FORMAT: Lecture/seminar

PREREQUISITE: POLI 1010.03 OR 1015.03 OR 1030.03 OR 1035.03 OR 1050.03 OR 1055.03 OR 1100.06 OR 1103.06 OR GWST 1010.03 OR 1015.03 OR 2000.03 OR 2053.03 OR 2066.03 OR 2200.06 OR 2217.03 OR 2300.03 OR 2301.03 OR 2310.03 OR 2320.03 OR 2500.03 OR 2800.06 OR permission from the instructor.

CROSS-LISTING: GWST 3600.03

POLI 3431.03: Politics Through Film and Literature.

Film and literature often capture the depth and texture of politics in a way that the social scientific method cannot. This course uses contemporary novels and films to analyze the Enlightenment, Orientalism, the frontier, and the political economy of community.

FORMAT: Seminar

PREREQUISITE: POLI 2410.03/2420.03 or instructor's permission

POLI 3434.03: The Ancient Origins of Political Thought: From Homer to Aristotle

This course will study the very beginnings of political thought with Greek poets, historians and educators, culminating in a careful investigation of the political writings of Plato and Aristotle. We will investigate philosophical questions about the origin of the state, the purpose of political community, the different kinds of regimes or constitutions, the common good, individual freedoms, revolution, war, wealth, poverty, and slavery.

FORMAT: Lectures/tutorials

CROSS-LISTING: CLAS 3434.03, PHIL 3434.03

POLI 3440.03: The Politics of Fear.

This course will consider the instrumentality of fear and terror in public policy, and its role in fostering public opinion and managing social groups and populations. Drawing on interdisciplinary and theoretical analyses of sex and race discrimination, it will consider various ways in which sexual and racial politics are implicated in the production and proliferation of "terror" in contemporary western societies, in practices perpetrated or sanctioned by both state and non-state actors. It will look at the recent discourses of terrorism and its representation in the media: philosophical considerations of anti-immigrant fear-mongering; and political analyses of the economy of "security" industries. It will also address the role of both state and corporate interest in disaster relief, epidemics, and other social crises.

FORMAT: Seminar/lecture

PREREQUISITE: POLI 1010 or POLI 1015 OR POLI 1030 OR POLI 1035 OR POLI 1050 OR POLI 1055 OR POLI 1100 OR POLI 1103 AND the completion of 70 credit hours, OR by permission of the instructor.

POLI 3449.03: Confronting Fascism.

This course focuses on German writers, artists, filmmakers, and intellectuals whose work impacted and was impacted by the rise of fascism in the 20th century.

FORMAT: Lecture/tutorial

CROSS-LISTING: GERM 3450.03

POLI 3450.03: Storm and Stress: Romanticism and the Backlash Against Enlightenment Political Thought.

Romanticism is generally seen as a cultural movement, with its expression in literature, music, painting, and philosophy. Yet its effect upon politics have been profound. Nonetheless, there has been little extensive political analysis of the Romantic movement and its effects. This course examines the development of Romanticism, especially in its opposition to rationalism, positivism, and classicism, from the late eighteenth century to the present. It examines the thesis that the early 21st century is experiencing a significant period of neo-romanticism, with its own set of reactions against rationalism and realism. What is the political manifestation of this neoromanticism, and what are the implications for contemporary politics?

FORMAT: Seminar/lecture

PREREQUISITE: POLI 2410.03, POLI 2420.03 or instructor's permission

POLI 3475.03: Democratic Theory.

Democracy is an essential component of legitimacy for all western states: few would be inclined to assert their “undemocratic” nature. But what are the essential characteristics of democracy; and to what extent must modern democratic theory remain grounded in nineteenth-century western liberal thought? While this course has a predominantly theoretical orientation, it will include an examination of the relations between democratic theory and economic production/redistribution; as well as an investigation into how democratic theory can be developed in non-Western political contexts.

FORMAT: Seminar

PREREQUISITE: Any political or moral philosophy course or instructor's consent

CROSS-LISTING: PHIL 3475

POLI 3492.03: Political Inquiry I.

This course is an introduction to empirical research methods in political science and the social sciences more generally. It covers a range of issues that are relevant to both qualitative and quantitative empirical research, but the emphasis is on quantitative strategies (i.e., statistical analysis). Key issues include specification of hypotheses, measurement of variables, case selection, choosing and evaluating research designs, and drawing sound inferences from research findings. The “quantitative” component of the course de-emphasizes statistical theory and math, and focuses instead on the generation and interpretation of statistical results, using the SPSS statistical software. The course is built around a series of small homework assignments, lab sessions, a formal “data analysis paper,” and a midterm and final exam.

FORMAT: Lecture

PREREQUISITE: Introductory Political Science course or instructor's permission.

CO-REQUISITE: POLI 3493.03 (political science honours students only)

POLI 3493.03: Political Inquiry II.

This course introduces the theory and practice of qualitative research methods to study political phenomena. Themes addressed in the course include the theoretical and conceptual implications of choosing a particular methodology; the philosophical assumptions behind social science research; the various qualitative research methods available to political scientists, including interviewing, participant observation, case studies, comparative analysis, and the use of documentary/primary sources; the evaluation of academic texts in political science, focusing on the logic of their argument, their methodologies, and the relationship between the evidence presented and their argument; and the ethical issues involved in conducting qualitative research.

FORMAT: Lecture/discussion

PREREQUISITE: Introductory Political Science course or instructor's permission.

EXCLUSION: POLI 2494X/Y.06

CO-REQUISITE: POLI 3492.03 (political science honours students only)

POLI 3505.03: Human Rights: Foundations.

This course examines the formation of international human rights institutions, mechanisms, practices, and related jurisprudence. It provides an overview of the development of international humanitarian law and policy; the treaty system and monitoring bodies; and international criminal court and criminal tribunals. Through analyses of reporting systems under a selection of treaties, we will address how both states and non-government organizations have engaged human rights treaty committees on different conventions and areas of law (e.g., civil and political rights; the rights women, children, migrants, torture victims, etc.), and we will consider their applications within domestic law and policy. We will also look at the formation of international criminal law institutions, and, through a sample of case studies, we will consider their approaches to state and individual responsibility and accountability for persecution, genocide and crimes against humanity.

FORMAT: Seminar/lecture

PREREQUISITE: POLI 1010 or 1015 or 1030 or 1035 or 1050 or 1055 or 1100 or 1103 OR permission from the instructor.

EXCLUSION: POLI 3303.03

POLI 3520.03: Building Democracy and Peace.

Many people have long argued that there is an intimate relationship between democracy and peace. Thus, they claim, democracies are much more inclined to peace - both internal and external than other political systems. It is clear that democracy allows the representation of a large number of interest in a society, and this can lead to peaceful resolution of or accommodation of - disputes. There have been many studies about established democracies in this regard, but less research into societies in transition--i.e., countries which are democratizing. Since countries in transition present the vast majority of countries in the world, it would seem timely to study this phenomenon. Democratization involves a multitude of steps and must therefore incorporate a great variety of actors,

particularly in post-conflict societies. The role of three (overlapping) elements in post-conflict societies in the process of democratizing appear to be the key. These elements are civil society, the institutional environment and refugees. This third or fourth year level course will examine these key actors/elements and processes.

FORMAT: Lecture

POLI 3525.03: Comparative Foreign Policy Simulation.

This course is designed for advanced (i.e., 3rd/4th year) undergraduate and graduate students in Political Science. Once students become familiar with basic concepts, theories and decision-making frameworks developed within the sub-field of comparative foreign policy (part 1), they will be expected to apply what they have learned through participation in an interactive computer simulation involving other university teams throughout North and South America and eastern and western Europe. As they attempt to implement policy initiatives and work in teams to resolve international disputes, students will confront foreign policy issues in a context that provides an authenticity of experience. The objective is to enable students to create and test organizational skills, understand the interdependence of international issues, appreciate cultural differences and approaches to world problems, and use computers for multinational communications.

FORMAT: Seminar

PREREQUISITE: POLI 2520.03/2530.03

POLI 3531.03: The United Nations in World Politics.

The evolution of the United Nations from its early concentration on problems of collective security, through the period of preventive diplomacy and anti-colonialism, to its present role as a forum for the aspirations and demands of the Less Developed Countries is reviewed. The more distant future, and the continuing relevance of the United Nations in world politics, and how its role and objectives should be determined, are considered.

FORMAT: Seminar

PREREQUISITE: Course in international politics or instructor's permission

POLI 3532.03: Model UN.

The primary goal of this course is to help students understand the operation of the UN system through preparation for Model UN meetings. The course is designed for students who are participating in Model UN meetings and aims to help students prepare effectively for those meetings. Through their preparatory research for the meetings, students will learn the politics of UN voting practices of various countries and the relationships between domestic politics, international politics and UN voting records. This course will also enable students to understand the internal dynamics of the UN General Assembly and committee systems, how UN meetings operate, and the professional skills involved in drafting and negotiating the text of resolutions. The course will also provide students with the opportunity to learn about the political issues that influence the positions at the UN of various countries (assigned by the Model UN Assembly to individual students), and about committee issues under debate at the UN (assigned by the Model UN Assembly to individual students).

PREREQUISITE: POLI 2520.03 or permission of instructor

POLI 3535.03: The New International Division of Labour.

This seminar provides an overview of the global political economy in the current post-Bretton Woods and -Cold War period. It treats the New International Division of Labour/Power from several theoretical and political perspectives, from comparative foreign policy to feminism. Issues addressed include the Newly Industrializing Countries, the Middle Powers and the Fourth World; new functionalism; popular participation; and alternative futures.

FORMAT: Seminar

PREREQUISITE: POLI 2520 or POLI 2530 or instructor's permission

POLI 3540.03: Foreign Policy in the Third World.

This seminar offers a comparative perspective on the political economy of foreign policy in Africa, Asia, the Middle East, and South America at the end of the twentieth century. Its focus is how state and non-state actors in the South relate to the New International Divisions of Labour and Power given the demise of both Bretton Woods and Cold War global regimes. In addition to selective case studies of both large and small states - from Brazil, India, Indonesia, and Nigeria to Botswana, Jamaica, Kuwait, and Singapore - it treats formal and informal external relations, from regional intergovernmental institutions to non-governmental coalitions. It also examines new forms of regional conflict and cooperation, including guerrilla struggles and civil societies. It emphasizes the incidence and impact of structural adjustment programs and conditionalities along with the emergence of “new” issues such as debt, democracy, ecology, gender,

refugees, and technology. A range of alternative approaches is identified and evaluated appropriate to the contemporary period of revisionism.

FORMAT: Seminar

PREREQUISITE: POLI 2520 or POLI 2530 or instructor's permission

POLI 3544.03: Political Economy of Southern Africa.

An introduction to the comparative politics, economic structures and international relations of Southern Africa, which provides a study of regional political economy with both empirical and theoretical significance. As well as country comparisons, the course will look at the region as a political unit, exploring the opportunities for and constraints against formal regional cooperation on economy or security as well as informal processes that constitute the basis of "new" regionalism forces.

FORMAT: Seminar

PREREQUISITE: POLI 2300X/Y.06 or equivalent or instructor's permission

POLI 3560.03: Issues in Global Security and Development.

This senior undergraduate/graduate seminar is designed to present current definitions of and debates about human development/human security at the turn of the century. These have both analytic and policy relevance for a wide range of actors in contemporary global politics: not just states/international organizations but also civil societies & private companies, think tanks and partnerships. It is offered in summer school to attract a diverse, interdisciplinary range of registrants and to coincide with the annual weekend workshop of the "new regionalisms" network which treats an issue of relevance to global development each year, such as new regionalisms in August 2000 and globalizations in 2001.

FORMAT: Seminar

PREREQUISITE: Offered as a summer course only. Consult instructor.

CROSS-LISTING: POLI 5560.03

POLI 3565.03: Contemporary Security Studies.

The course examines developments in the theory and practice of international security since the end of the Cold War. The first part reviews the concept of security and the main theoretical approaches that inform the contemporary security debate. The second part analyzes some of the key contemporary issues in world politics and their relation with international security. Topics include: Military Security, Terrorism, Human Security, Environmental Security, Migration, Health and Security.

FORMAT: Lecture and seminar

PREREQUISITE: POLI 2520.03 and POLI 2530.03

POLI 3567.03: International Organization.

This course will investigate the process of international organization through analysis of the role of international organizations, institutions and regimes. For the purposes of the course, international organizations as well as less formal institutional arrangements. The course will focus on the contemporary debate between rationalist and constructivist theoretical approaches to analyzing international organization. These perspectives will be employed to study the role of international organizations in areas such as international security and international political economy. Topics to be covered include democracy and international organizations, culture and international organizations, bargaining in international organizations, political and economic integration, NGOs and global civil society, and the future of global governance.

FORMAT: Seminar/lecture

PREREQUISITE: POLI 2520.03, POLI 2530.03 or instructors permission.

POLI 3568.03: Canada and the World.

This course examines post-World War II Canadian Foreign Policy in two parts: (1) an analysis of 'landmark' policy issues; and (2) an investigation of the general factors that help to "explain" the form and content of Canadian foreign policy, with particular reference to the institutions and processes through which policy decisions are made. Issues discussed are likely to include: the "invention" of peacekeeping; the Mulroney government's involvement in the campaign to end apartheid in South Africa; the negotiation of the North American free trade; the politics of immigration and diasporas; and the place of the Arctic in Canada and international relations.

FORMAT: Seminar

PREREQUISITE: POLI 2210 or POLI 2220 or POLI 2520 or POLI 2530 or HIST 2212 or HIST 2235 or HIST 2661 or permission of instructor

CROSS-LISTING: CANA 3568.03

POLI 3574.03: American Foreign Policy.

This course is a general introduction to American foreign policy, with special attention to the theoretical and policy debates of the post-Cold War period. The course begins with relatively brief introductions to the history of US foreign policy and the institutions of foreign policy-making, but most of the readings and

lectures are concerned with broad theoretical debates about what does, and/or what should, drive US foreign policy decisions. In later weeks, some of these theoretical lenses are applied to some specific (recent) foreign policy decisions, including the signing and "unsigned" of the Kyoto Accord, the extension of Permanent Normal Trade Relations status to China, and/or the war in Iraq.

FORMAT: Lecture

PREREQUISITE: POLI 2520.03 or POLI 2530.03, or instructor's permission.

POLI 3576.03: Defence Policy in Canada.

This seminar examines the substance, processes, recurring themes, and major international and domestic determinants of post-World War II Canadian defence policies. It explores several major policy "milestones" (e.g. Canadian Forces' role in the Persian Gulf conflict), and various persistent themes (the "Commitment-capability gap"; efforts to "democratize" defence policy reviews) and current issues (e.g. the implications of recent human rights challenges to traditional military professionalism; Canada's role in the Afghanistan conflict) of Canadian defence. Approved with Canadian Studies.

FORMAT: Lecture

EXCLUSION: POLI 3571.06

RESTRICTION: Course in international relations, or foreign policy, or postwar

Canadian history, or instructor's permission. Restricted to students in their third year or beyond. Course in international relations, or foreign policy, or postwar Canadian history, or instructor's permission. Restricted to students in their third year or beyond.

POLI 3577.03: Civil-Military Relations in Contemporary Western Society.

The course will examine the trilateral relationship between society, government, and the military in the post-Cold War era. The context includes: changing societal values and the domestic pressures they produce; and the implications of a constantly changing strategic environment. Different perspectives will be examined to assess the implications for civil-military relations of the above-noted changes: legal/constitutional (Charter challenges); military/professional (operational requirements); and political (constituency and special interest demands).

FORMAT: Seminar

PREREQUISITE: POLI 2520.03/2530.03 or instructor's permission

POLI 3581.03: Diplomacy and Negotiation.

This course looks at the way states decide which diplomatic strategies to pursue, and why these succeed or fail. Among the themes considered are the evolution of diplomacy as an international institution, national power and bargaining leverage, and the effects of domestic politics, psychology, and culture on international negotiation. Specific historical cases which may be reviewed in any given year include: the Peloponnesian War, the Munich Crisis, the Cuban Missile Crisis, the negotiation of the Canada-US Free Trade Agreement and NAFTA, and the Kyoto Protocol. Students participate in a negotiation-simulation exercise and write a paper on a particular historical case.

FORMAT: Seminar

PREREQUISITE: Course in international politics (POLI 2520 or POLI 2530) or instructor's permission

POLI 3589.03: Politics of the Sea I.

The major issues involved in the Law of the Sea, the differing interests of different countries, the developing legal framework, and the political process of the on-going negotiations are covered.

FORMAT: Seminar

PREREQUISITE: Preference is given to graduate students, although mature students from other relevant disciplines are welcome.

POLI 3591.03: Pirates, Profiteers and Protectors of the Sea.

While the world is focused on the terrorist threat on land, piracy and other criminal activities are spreading rapidly on the seas. Youths in small boats with simple weapons are embarrassing the most powerful navies in the world, hijacking merchant ships off the coast of Somalia and getting multi-million dollar ransoms for their hostages. Meanwhile, illegal immigration and smuggling are also increasing dramatically. Natural disasters are also on the rise. Is Canada ready for these challenges? Are our maritime forces properly structured for the new security era or should they be changed radically? Tens of billions will be spent soon on new ships to either perpetuate the status quo or launch in a new direction. This course shows the full range of policy and capability options available and explains the logic behind the choices that need to be made. What would you recommend?

FORMAT: Lecture/seminar

PREREQUISITE: POLI 2520.03 or permission of instructor

POLI 3596.03: Explaining Global Conflict and Violence.

During a 13-week period in 1994 more than 800,000 people were killed in Rwanda -- that number exceeds the combined total of Canadian and American military casualties in both World War I and II. Between 1990-95, 250,000 people died in the Balkans -- the equivalent of one US Oklahoma bombing disaster (168 casualties) every day for four years. Large-scale violence associated with inter-state and intra-state conflict and war continues to have undeniable relevance for all of humanity. Given the rise of ethnic conflicts in Europe and proliferation of advanced weapons technology world wide, providing answers to pressing questions about the onset and escalation of war is becoming more, not less, imperative in the aftermath of the Cold War. Unfortunately, notwithstanding years of inquiry into the nature and origins of war, it remains unclear whether we've produced any definitive knowledge. This seminar is designed, in part, to provide students with a comprehensive (and critical) review of answers to questions about the onset, escalation and de-escalation of violent conflict.

FORMAT: Seminar

PREREQUISITE: POLI 2520.03/2530.03 or instructor's permission

POLI 3601X/Y.06: Readings in Political Science.

A full-year reading course, taught only by special arrangement between individual students and individual instructors. SIGNATURE REQUIRED.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

CROSS-LISTING: POLI 5601.06

POLI 3602.03: Readings in Political Science.

A one-term reading course, taught only by special arrangement between individual students and individual instructors. SIGNATURE REQUIRED.

CROSS-LISTING: POLI 5602.03

POLI 3603.03: Readings in Political Science.

A one-term reading course, taught only by special arrangement between individual students and individual instructors. SIGNATURE REQUIRED.

CROSS-LISTING: POLI 5603.03

POLI 3810.03/3820.03: Special Topics.

An examination of selected issues in Political Science. This course explores (e.g., when a visiting scholar is on campus) a special topic that is not a regular offering of the department. It is taught as a lecture or seminar course, not as an independent studies course. Since the topics covered in these courses differ from year to year, students should seek further information from the Political Science Department before registering. The subject matter in this course will be explored in greater depth than a course offered under POLI 2810.03/2820.03

SIGNATURE REQUIRED

POLI 4204X/Y.06: Advanced Seminar in Canadian Politics.

This senior seminar will take an in-depth and critical look at the major issues and institutions in Canadian politics and government. Topics include: the concentration of power; parliamentary governance: constitutional politics; party and electoral systems; and, the role of the mass media and pressure groups. SIGNATURE REQUIRED.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

CROSS-LISTING: POLI 5204X/Y.06

RESTRICTION: Restricted to Students in their fourth year.

POLI 4207.03: Canadian Politics: Themes and Theories.

This senior seminar will take an in-depth and critical look at the major issues and institutions in Canadian politics and government. Topics include: the concentration of power; parliamentary governance: constitutional politics; party and electoral systems; and, the role of the mass media and pressure groups.

FORMAT: Seminar

PREREQUISITE: Instructor's permission

CROSS-LISTING: POLI 5207.03

EXCLUSION: POLI 4204.03

POLI 4228.03: Pressure Politics in Canada: Opportunities and Obstacles.

The goal of this seminar is to explore the opportunities for and obstacles to advocacy politics in Canada. We analyze the strategies that pressure groups use to engage the most important loci of power in the Canadian political system; parliament, the public service and the courts.

FORMAT: Seminar, 3 hours

CROSS-LISTING: POLI 5228.03, PUAD 6505.03

EXCLUSION: POLI 3228.03

POLI 4232.03: Urban Governance in Canada.

The objective of this course is to provide students with the empirical, analytical, theoretical, and methodological tools to understand and explain the politics and policy activities of Canada's urban and suburban municipalities within their socioeconomic, institutional, and Constitutional contexts. A major concern is to evaluate how effectively and equitably city governments in Canada have responded to contemporary urban challenges. The course adopts a critical perspective on urban governance and engages with contemporary debates concerning municipal governance reform and the evolving nature of urban governance within Canadian federalism.

FORMAT: seminar

PREREQUISITE: POLI 3220.03 or POLI 3232.03

EXCLUSION: POLI 3231/5231

POLI 4234.03: Canadian Urban Politics in Comparative Perspective.

This course examines the politics and governance of Canadian cities from a comparative perspective. More specifically, the course uses comparative method in three ways: it asks what one can learn from comparing Canadian cities with each other (subnational comparisons), what cross-national comparisons of Canadian cities can teach as well as compares Canadian cities implicitly with other cities by applying theories of urban politics and development that have been developed elsewhere to Canadian cities. The objective of this course is to provide advanced political science students with the theoretical, empirical and methodological tools to understand and explain the political development of Canadian cities.

FORMAT: Seminar

PREREQUISITE: POLI 3220.03 or POLI 3232.03

CROSS-LISTING: POLI 5234.03

POLI 4240.03: Policy Formulation in Canada.

This course provides a general introduction to the field of policy management, for graduate and honours undergraduate students. Using British 'best practice' ideas of professional policy making and Canadian statements of generic policy competencies, it seeks to improve the policy capacity of participants. It does this first by increasing their knowledge of public policy structures, processes, and outputs, and secondly, by giving them knowledge that they can use in policy advocacy both inside and outside government. The first section of the course examines policy definitions and professional policy making approaches in the 21st century. The second section considers the role of the state in the 21st century, and the policy competencies that analysts must have is that role is to be carried out effectively. Section three explores vertical, horizontal and external policy relationships, both as determinants of policy and as practical matters of management. Section four explores, and helps participants to gain proficiency in, the most recent processes of strategic policy design and implementation. This blend of theory and practice will increase the policy knowledge of all participants, and equip those who are in professional programs, including the various public services, to contribute more effectively policy processes in the future.

SIGNATURE REQUIRED.

FORMAT: Seminar

PREREQUISITE: Open to Honours students in their fourth year and to graduate students.

CROSS-LISTING: POLI 5240.03, PUAD 5120.03

POLI 4241.03: Introduction to Policy Analysis.

This course examines four aspects of policy analysis: (1) The role of the analyst in modern government; (2) The analyst's working environment; (3) Techniques used in carrying out research and preparing position papers; (4) and the analyst's responsibilities to government and to the public in determining what information should reach decision-makers. Approved with Canadian Studies.

SIGNATURE REQUIRED.

FORMAT: Seminar

PREREQUISITE: POLI 4240.03 or instructor's permission

CROSS-LISTING: POLI 5241.03, PUAD 5121.03

POLI 4242.03: Politics of Reason, Passion, and Biology.

Does reason or passion drive politicians and citizens to act as they do? Or does the dichotomy between the mind and the heart disguise a more fundamental biological basis to political behavior? Do these approaches leave any room for citizens to exercise their own judgment, or is autonomy lost altogether? Normative questions of justice, equality, and freedom are deeply embedded within each approach and must be confronted as they apply in practice. Although this material is inherently global and comparative, we principally want to investigate how it applies to Canada.

FORMAT: Seminar

POLI 4250.03: Canadian Public Administration.

This course examines the organization and management of the executive-bureaucratic structures of government for the formulation and management of public policy and public services. It considers the design and operation of the cabinet system and ministerial portfolios; relations between ministers and the career public service; policy and budgetary processes; and, the structural designs of departments, agencies, crown corporations and regulatory commissions. A major focus will be the effects of the new public management on public administration, as governments in Canada, as elsewhere, seek to cope with budgetary restraints, increased demands for quality services and public participation, and greater effectiveness in securing results. Approved with Canadian Studies.

FORMAT: Lecture/discussion

PREREQUISITE: POLI 2210.03.03/2220.03 or instructor's permission.

CROSS-LISTING: POLI 5250.03

EXCLUSION: POLI 3250.03, POLI 3251.03

POLI 4260.03: The Politics of Health Care.

Because of its nature as both a public institution and a political icon, the Canadian healthcare system is an inherently political institution which cannot be understood without a clear comprehension of both its composition and its relationship to the broader political landscape in Canada. This course will provide a survey of the political and theoretical debates within the area of healthcare in Canada, including investigations of federalism, funding, and governance.

FORMAT: Seminar

PREREQUISITE: Introductory political science course or instructor's permission

CROSS-LISTING: POLI 5260.03

EXCLUSION: POLI 3260.03

POLI 4302.03: Comparative Development Administration.

This course examines analytical, normative and political issues of public administration in developing countries. It considers the scope of development administration as a sub-field of public administration; public sector organization and management including public services, public enterprises, decentralization and rural development, financial systems, human resource management, aspects of state economic management (with the use of case studies) and institutional aspects of aid administration (with CIDA and World Bank cases).

FORMAT: Seminar

PREREQUISITE: POLI 2300.06 or equivalent or instructor's permission

CROSS-LISTING: POLI 5302.03, PUAD 6780.03

EXCLUSION: POLI 3302.03

POLI 4303.03: Human Rights: Political Issues.

This course will introduce students to the evolving place of human rights in politics, both comparative and international. We begin by examining the historic emergence of human rights as an issue in world politics, principally since the Second World War, and their conceptual foundations. We then focus on a number of specific topics and controversies concerning human rights in world politics, including: the sources of and struggle to end human rights-abusive regimes; the multilateral politics of human rights; human rights in national foreign policies; the rights of indigenous peoples; genocide, humanitarian intervention; and the responsibility to protect; and the relationship between globalization and human rights, and the 'Global War on Terrorism' and human rights. Finally we look at the role of human rights in domestic politics, focusing on the issues of women's rights and sexual orientation.

FORMAT: Seminar

PREREQUISITE: POLI 2300X/Y.06, POLI 2520.03/ POLI 2530.03 or POLI 3505.03 or equivalent, or instructor's consent

CROSS-LISTING: POLI 5303.03

EXCLUSION: POLI 3303.03

POLI 4322.03: The EU as a Global Actor.

The aim is to enable the student to analyze and understand the international roles played by the EU in both economic and political areas. Why has the EU been better able to speak with one voice in economic areas than political areas? To what extent can the member states control the foreign policies of the EU? The introductory part will include an overview of the EU governance systems in the area of external economic relations (first pillar) and the Common Foreign and Security Policy (the second pillar) and analyses of the main achievements in both areas. Specific topics to be selected for analyses during the second part will include the EU and the WTO, the EU and the US, the EU and the East Asia, and the EU and developing countries. Finally, in the third part of the course students study recent efforts to develop a European Security and Defence Policy.

FORMAT: Seminar

PREREQUISITE: POLI 2520.03 or 2530.03 or appropriate History course.

CROSS-LISTING: POLI 5322.03

EXCLUSION: POLI 3322.03

POLI 4340.03: Approaches to Development.

A survey of theories of and policies about dependence, underdevelopment and peripheral social formations. Particular emphasis on modernization, materialist, and alternative modes of analysis, and on orthodox and radical strategies of development. Topics treated include social contradictions (e.g. class, race and ethnicity), debt, structural adjustment, human development, human security, gender, technology, civil society, informal sectors, democratization and ecology.

FORMAT: Seminar, 3 hours

PREREQUISITE: By permission of instructor

EXCLUSION: POLI 3340.03

POLI 4355.03: Comparative Perspectives on the Development State.

This course examines development in a broad regional comparative context to determine whether endogenous or exogenous conditions account for the success with which the North/Southeast Asian economies have been transformed vis-a-vis Latin America and Africa. The course compares the "development state" model across the developing world, by briefly focusing on three distinct cases - South Africa, Malaysia and Brazil - as "upwardly mobile" late industrialisers.

FORMAT: Seminar

PREREQUISITE: Poli 2300.06 or Poli 2520.03 and Poli 2530.03, or equivalent, or instructor's permission.

CROSS-LISTING: POLI 5355.03

EXCLUSION: POLI 3355.03

POLI 4380.03: Politics of Climate Change.

This course examines the interactions between politics and a changing climate.

Core questions include: What lies behind political disagreements over how to respond to climate change? What does climate change mean for various political, social, and economic projects? Topics include: the role of science and economics in climate politics; the new "climate capitalism"; non-capitalist alternatives that question growth and consumerism while emphasizing "climate justice"; Canada's particular difficulties in addressing climate change; climate politics at the personal level; international climate negotiations; and climate as a security issue.

FORMAT: Primarily seminar with some lecture time.

PREREQUISITE: POLI 3385 Politics of the Environment or permission of the instructor.

EXCLUSION: POLI 3380 Politics of Climate Change

POLI 4403.03: Human Rights: Philosophical Issues.

An examination of the historical and conceptual development of human rights, this course looks specifically at normative and political issues involved in the emergence of human rights from the 13th century to present. It covers the shift from natural law to natural right, the emergence of states, rights to sovereign governance, and the development of specific classes of rights (including freedom of conscience, property rights, women's rights, cultural rights, animal rights, and socioeconomic rights).

FORMAT: Seminar

PREREQUISITE: POLI 2410.03 or POLI 2420.03 or POLI 3505.03, or permission of instructor

CROSS-LISTING: PHIL 3470.03, POLI 5403.03

EXCLUSION: POLI 3403.03

POLI 4427.03: Queer Theory.

This course provides an overview of the general questions and debates -- and the philosophical, political and cultural contexts--of the interdisciplinary field that is now known as 'Queer Theory.' It will profile a wide selection of foundational writings by leading scholars and contributors to GLBT thought and activism.

Examining topics such as difference, identity, discrimination, and equality, we will address its articulations critical race theory, feminist philosophy, and critical analyses of political economy. We will also address the significance of queer theory to GLBT equality activism, attending to the relationship between political thought and legislative practice in addressing institutionalized heteronormativity and the public expressions of homophobia, transphobia, sexism, and racism and their impact on social policy.
CROSS-LISTING: GWST 4427.03

POLI 4440.03: The Politics of Affect: Theories of Emotion and Political Life.

This course draws on recent developments in the burgeoning of field of affect studies to address the relation of both conscious and non-conscious emotive experience to public and political life. Drawing on the insights and scholarship from different disciplines, we will examine the social, political and cultural theories of affect, emotion, and aesthetics to explore their role in political decision-making and public responses. Topics will include the affective logic of public threat, the cultural politics of emotion such as fear and shame; sensorial responses to moralistic rhetoric; visceral responses to social groups and/or cultural practices. We will also look at how sensibility, feeling, and affect have operated in social and political movements, including a consideration of emotions such as fear, disgust, and distain, and compassion in social conflict, and in the formative approaches to retribution and reconciliation.

FORMAT: Seminar

PREREQUISITE: POLI 1010 or 1015 or 1030 or 1035 or 1050 or 1055 or 1100 or 1103 AND the completion of 70 credit hours, OR by permission of the instructor

hours in Arts and Science, OR permission by the instructor.

2350 or 2410 or 2420 or 2430 or 2440 or 2450 OR permission from the instructor.

CROSS-LISTING: POLI 5440.03

POLI 4479.03: Liberalism.

Liberalism takes a variety of forms and includes many topics including the rule of law, limited government, the free exchange of goods, entitlement to property, the self, and individual rights. Its philosophical and political assumptions provide the intellectual context within which its account of the individual, its vision of the community and its preferred allocation of resources will be assessed.

SIGNATURE REQUIRED.

FORMAT: Seminar

PREREQUISITE: Normally, courses in philosophy or political science or economics: consult instructor.

CROSS-LISTING: PHIL 4470.03/5470.03, ECON 4446.03/5446.03, POLI 5479.03

POLI 4481.03: Theories of Violence, Persecution, Genocide.

This course will provide an overview of contemporary theoretical approaches to systemic violence, particularly against racial, ethnic, and sexuality minorities. Through a selection of historical and contemporary case studies, it will assess different accounts and explanatory frameworks for understanding the instigation and exacerbation of persecution and genocide. Attending to the role of the state and state policies in the history of violence, it will examine the discourses and practices that have both fuelled and justified the colonization of native peoples, enslavement of racial groups, the holocaust, and ethnic cleansing in the 20th century genocides. We will also consider the recent attempts of the international community to prevent, deter, and curb genocidal outbreaks, and the theoretical assumptions about human behaviour that underpin them.

FORMAT: Seminar

PREREQUISITE: Any second year Political Science course, or instructor's permission

CROSS-LISTING: POLI 5481.03

POLI 4512.03: The Politics of North America.

North America has become increasingly integrated over the last thirty years--economically, demographically, and even politically. This course will review the history of regional integration in North America, and consider a number of contemporary policy controversies. It bridges sub-disciplinary boundaries by looking at both domestic policy-making (Comparative Politics) and at bargaining between the three countries (International Relations).

FORMAT: Seminar

PREREQUISITE: Any previous political science course

POLI 4521.03: Theories of International Relations I: Security Studies.

4521 and 4522 are independent courses that are conceptually closely related. This relationship is partially based on the more general division within IR between "Security Studies" and International Political Economy (IPE). POLI 5421 sets things up by reviewing the broadest theoretical debates within the field, with an emphasis on questions of power and order, and looks at theoretical work which focuses on political/military issues like deterrence, balancing, and the meaning of "national security." POLI 4522 begins with theoretical debates over cooperation and institutions, and is empirically anchored in various aspects of IPE, including trade, finance, and development.

FORMAT: Seminar

PREREQUISITE: Instructor's permission

CROSS-LISTING: POLI 5421.03

EXCLUSION: POLI 4520.06

POLI 4522.03: Theories of International Relations II: International Political Economy.

4521 and 4522 are independent courses that are conceptually closely related. POLI 5421 sets things up by reviewing the broadest theoretical debates within the field, with an emphasis on questions of power and order, and looks at theoretical work which focuses on political/military issues like deterrence, balancing, and the meaning of "national security." POLI 4522 begins with theoretical debates over cooperation and institutions, and is empirically anchored in various aspects of IPE, including trade, finance, and development.

FORMAT: Seminar

PREREQUISITE: Instructor's permission

CROSS-LISTING: POLI 5422.03

EXCLUSION: POLI 4520.06

POLI 4523.03: International Relations Theory 1: Order, Conflict and Change

Explores classic and contemporary debates in International Relations theory, with particular attention to the nature of international order, the bases for war and peace, and the question of transformational change.

FORMAT: Seminar

EXCLUSION: POLI 5523

POLI 4524.03: Theories of International Relations 2: Cooperation, Institutions and Development.

Explores classic and contemporary debates in International Relations theory, with particular attention to the bases for international cooperation, the role of law and institutions, and the foundations of political economy.

FORMAT: Seminar

EXCLUSION: POLI 5524

POLI 4569.03: Canadian Foreign Policy.

This advanced seminar course is concerned with the 'structure-agent' problem as it applies to Canadian foreign policy. In other words, what are the structures (both material and normative) that shape and constrain the pursuit of Canadian foreign policy; what room for maneuver and initiative is there; and who are the key actors, or the 'agents' who shape and implement Canada's global role? The course discusses these questions through four sections: theoretical and analytical approaches to the study of Canadian foreign policy; the external context; the domestic; and key themes and issues in Canadian foreign policy.

FORMAT: Seminar

PREREQUISITE: Course in international relations, Canadian politics, or Canadian history, or with instructor's permission.

CROSS-LISTING: POLI 5569.03

EXCLUSION: POLI 3569.03, POLI 3570.06 or POLI 5570.06

POLI 4575.03: Nuclear Weapons and Arms Control in World Politics.

The seminar examines the technological, doctrinal, and political aspects of the nuclear weapons "problem" and the arms control "solution". It also assesses the fate of contemporary nuclear arms control efforts.

FORMAT: Seminar

PREREQUISITE: Course in international relations or defence policy, or with instructor's permission.

CROSS-LISTING: POLI 5575.03

EXCLUSION: POLI 3575.03

POLI 4581.03: International Diplomacy: Institutions and Practices.

This course considers the historical evolution of international diplomacy. Among the themes reviewed are the emergence of national states, sovereignty norms, human rights and norms governing military intervention, the growth of international law and institutions, and the prospects for global governance. The course features extensive student participation, an emphasis on writing, and a negotiation simulation.

FORMAT: Seminar

PREREQUISITE: POLI 2520.03, POLI 2530.03 or other international relations course

CROSS-LISTING: POLI 5581.03

POLI 4587.03: International Political Economy.

This course is composed of two overlapping constituent themes. The first theme is that of competing explanations of international political economic behaviour - behaviour affected by that diffuse political authority characteristic of the international system, the second, that of examining the basic issues in international political economy - the fundamental questions as to why international trade, international finance, unequal economic development, international organization, and the multinational enterprise. The first theme functions to create the over-all framework of analysis by which competing approaches to international political economy can be evaluated. The second theme will integrate these approaches with issue areas within the fields of international trade, international finance, and what might be termed "international production" (within which fields issues such as economic development, the multinational enterprise, and the global "division of labour" constitute the major foci). The course sessions will roughly be constituted by 50 percent lecture and 50 percent organized student contributions for seminar discussion and debate.

FORMAT: Seminar

PREREQUISITE: POLI 2520.03 or equivalent. Students should feel comfortable with economic theory as well, otherwise by instructor's permission

EXCLUSION: POLI 3587.03

POLI 4590.03: Politics of the Sea II.

This course will examine environmental, political and economic forces which affect contemporary ocean governance and management. Contemporary issues will be used to explore the geo-political ocean on a sectoral basis (transportation, fisheries and resources, military, etc.), as well as analyzing the evolution of national oceans policies and institutions.

FORMAT: Lecture/seminar

CROSS-LISTING: POLI 5595.03, MARA 5589.03

EXCLUSION: POLI 3590.03

RESTRICTION: to 4th year Political Science Honours students

POLI 4600X/Y.06: Honours Essay.

Political Science undergraduates in the Honours program are required to attend the Honours seminar as scheduled. This seminar is designed as a research seminar for Honours students.

NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

RESTRICTION: Restricted to Political Science Honours students in their final year.

POLI 4636.03: Nationalism and Statecraft.

An examination of the sources, ingredients and consequences of contemporary nationalism, with particular reference to its implications for the conduct of international politics. In the early sessions of the course, pertinent literature from the pre-World War II period will be evaluated for its relevance to our understanding of current circumstances, in which the apparent revival of nationalist impulses has coincided with intensifying manifestations of functional interdependence.

SIGNATURE REQUIRED.

FORMAT: Seminar

CROSS-LISTING: POLI 5636.03

RESTRICTION: Restricted to students in their fourth year

POLI 4810.03: Special Topics in Political Science.

An examination of selected issues in Political Science. This course explores (e.g., when a visiting scholar is on campus) a special topic that is not a regular offering of the department. It is taught as a lecture or seminar course, not as an independent studies course. Since the topics covered in these courses differ from year to year, students should seek further information from the Political Science Department

before registering. The subject matter in this course will be explored in greater depth than a course offered under 3810.03/3820.03

I. Introduction

Religion is a phenomenon virtually universal in human society and history. Understanding religion involves grasping simultaneously both the meaning of faith in the lives of participants, and the critical analysis of outside observers. Both the student wishing enhanced understanding of religion as an historical, and social and human fact, and the student who wishes to wrestle with problems arising in academic reflection concerning the relation between the personal and the objective, can find material to engage them in the programs and courses described below.

II. Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, [page 125](#) of this calendar.

A. BA (20 credit) Major in Religious Studies

Departmental Requirements

1. At least one full course [two half courses] (six credit hours) selected from RELS 1001.03, RELS 1002.03, or RELS 1200.06. This requirement may be relaxed at the discretion of the Department. The King's Foundation Year Program satisfies it. Students must complete a minimum of six full courses [12 half courses] (36 credit hours) or a maximum of nine full courses [18 half courses] (54 credit hours) in Religious Studies beyond the 1000 level. They must include:
2. At least two full courses [four half courses] (12 credit hours) selected from RELS 2001.03, 2003.03, 2011.03, 2012.03, 2013.03, 2025.03, 2026.03, 2027.03, 2052.03, 2203.03, 2220.03, 2281.03, 2282.03.
3. RELS 3000.03 Seminar in Religious Studies. This requirement may be relaxed at the discretion of the Department.

- At least two full courses [four half courses] (12 credit hours) in RELS at the 3000-level or higher. Of these 12 credit hours, nine must be chosen from the following: RELS 3001.03, 3009.03, 3012.03, 3018.03, 3019.03, 3100.03, 3101.03, 3111.03, 3112.03, 3113.03, 3282.03, 3283.03, 3381.03, 3382.03, 3411.03, 3412.03, 3432.03, 3661.03, 3662.03, 3910.06, 4010.03, 4011.03, 4018.03, 4019.03, 4450.06.

B. BA (20 credit) Double Major in Religious Studies

Students must complete the Faculty requirements for a double major. These include 10 to 14 full credits (60 - 84 credit hours) in the Major subjects at the 2000 level or higher, with no more than eight credits (48 credit hours) and no fewer than five credits (30 credit hours) in each subject. Religious Studies requires:

- At least one full course [two half courses] (six credit hours) selected from RELS 1001.03, RELS 1002.03, or RELS 1200.06. This requirement may be relaxed at the discretion of the Department. The King's Foundation Year Program satisfies it.
- At least two full courses [four half courses] (12 credit hours) selected from RELS 2001.03, 2003.03, 2011.03, 2012.03, 2013.03, 2025.03, 2026.03, 2027.03, 2052.03, 2203.03, 2220.03, 2281.03, 2282.03.
- RELS 3000.03 Seminar in Religious Studies. This requirement may be relaxed at the discretion of the Department.
- At least one and a half full courses [three half courses] (nine credit hours) in RELS at the 3000-level or higher. Of these nine credit hours, six must be chosen from the following: RELS 3001.03, 3009.03, 3012.03, 3018.03, 3019.03, 3100.03, 3101.03, 3111.03, 3112.03, 3113.03, 3120.03, 3282.03, 3283.03, 3381.03, 3382.03, 3411.03, 3412.03, 3432.03, 3661.03, 3662.03, 3910.06, 4010.03, 4011.03, 4018.03, 4019.03, 4450.06.

C. BSc (20 credit) Double Major, Second Subject in Religious Studies

Students must complete the Faculty requirements for a double major. Religious Studies can only be the second subject, with no fewer than five credits (30 credit hours) and no more than nine credits above the 1000 level. Two of these credits (12 credit hours) must be at the 3000 level or higher. Religious Studies requires:

- At least one full course or two half courses (six credit hours) selected from RELS 1001.03, RELS 1002.03, or RELS 1200.06. This requirement may be relaxed at the discretion of the Department. The King's Foundation Year Program satisfies it.
- At least two full courses [four half courses] (12 credit hours) selected from RELS 2001.03, 2003.03, 2011.03, 2012.03, 2013.03, 2025.03, 2026.03, 2027.03, 2052.03, 2203.03, 2220.03, 2281.03, 2282.03.
- RELS 3000.03 Seminar in Religious Studies. This requirement may be relaxed at the discretion of the Department.
- At least one and a half full courses [three half courses] (nine credit hours) in RELS at the 3000-level or higher. Of these nine credit hours, six must be chosen from the following: RELS 3001.03, 3009.03, 3012.03, 3018.03, 3019.03, 3100.03, 3101.03, 3111.03, 3112.03, 3113.03, 3282.03, 3283.03, 3381.03, 3382.03, 3411.03, 3412.03, 3432.03, 3661.03, 3662.03, 3910.06, 4010.03, 4011.03, 4018.03, 4019.03, 4450.06.

D. BA (20 credit) Combined Honours in Religious Studies

Students must complete the Faculty requirements for the combined honours degree. At least five credits (30 credit hours) and no more than eight credits (48 credit hours) must be in Religious Studies above the 1000 level. At least 11 credits (66 credit hours) and no more 14 (84 credit hours) are to be in both subjects.

The Religious Studies requirements are:

- At least one full course [two half courses] (six credit hours) selected from RELS 1001.03, RELS 1002.03, or RELS 1200.06. This requirement may be relaxed at the discretion of the Department. The King's Foundation Year Program satisfies it.
- At least two full courses [four half courses] (12 credit hours) selected from RELS 2001.03, 2003.03, 2011.03, 2012.03, 2013.03, 2025.03, 2026.03, 2027.03, 2052.03, 2203.03, 2220.03, 2281.03, 2282.03.
- RELS 3000.03 Seminar in Religious Studies. This requirement may be relaxed at the discretion of the Department.
- At least two full courses [four half courses] (12 credit hours) in RELS at the 3000-level or higher. Of these 12 credit hours, nine must be chosen from the following: RELS 3001.03, 3009.03, 3012.03, 3018.03, 3019.03, 3100.03, 3101.03, 3111.03, 3112.03, 3113.03, 3120.03, 3282.03, 3283.03, 3381.03,

3382.03, 3411.03, 3412.03, 3442.03, 3661.03, 3662.03, 3910.06, 4010.03, 4011.03, 4018.03, 4019.03, 4450.06

- Outside Religious Studies one full course [two half courses] will be required from the following list: ARBC 1020.06 (Arabic), CHIN 1030.06 (Mandarin), CLAS 1600.03 (Sanskrit I), CLAS 1700.06 (Greek), CLAS 1800.06 (Latin), CLAS 1900.06 (Classical Hebrew), CLAS 2600.03 (Sanskrit II). Students may substitute a more advanced course in these languages for this requirement.
- Completion of the Religious Studies Honours Examination (RELS 0400.00) if the first subject is Religious Studies.

E. BSc (20 credit) Combined Honours, Second Subject in Religious Studies

Students must complete the Faculty requirements for the combined honours degree. Religious Studies can be the second subject only. At least five full courses [10 half courses] (30 credit hours) and no more than seven full courses [14 half courses] (42 credit hours), must be in Religious Studies above the 1000 level. At least 11 full courses (66 credit hours), to a maximum of 14 (84 credit hours) are to be in both subjects.

The Religious Studies requirements are:

- At least one full course [two half courses] (six credit hours) selected from RELS 1001.03, RELS 1002.03, or RELS 1200.06. This requirement may be relaxed at the discretion of the Department. The King's Foundation Year Program satisfies it.
- At least two full courses [four half courses] (12 credit hours) selected from RELS 2001.03, 2003.03, 2011.03, 2012.03, 2013.03, 2025.03, 2026.03, 2027.03, 2052.03, 2203.03, 2220.03, 2281.03, 2282.03.
- RELS 3000.03 Seminar in Religious Studies. This requirement may be relaxed at the discretion of the Department.
- At least two full courses [four half courses] (12 credit hours) in RELS at the 3000-level or higher. Of these 12 credit hours, nine must be chosen from the following: RELS 3001.03, 3009.03, 3012.03, 3018.03, 3019.03, RELS 3100.03, 3101.03, 3111.03, 3112.03, 3113.03, 3120.03, 3282.03, 3283.03, 3381.03, 3382.03, 3411.03, 3412.03, 3442.03, 3661.03, 3662.03, 3910.06, 4010.03, 4011.03, 4018.03, 4019.03, 4450.06.
- Outside Religious Studies one full course [two half courses] will be required from the following list: ARBC 1020.06 (Arabic), CHIN 1030.06 (Mandarin), CLAS 1700.06 (Greek), CLAS 1800.06 (Latin), CLAS 1600.03 (Sanskrit I), CLAS 1900.06 (Classical Hebrew), CLAS 2600.03 (Sanskrit II). Students may substitute a more advanced course in these languages for this requirement.

F. Minor in Abrahamic Religions

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

G. Minor in Middle East Studies

See Minors in the College of Arts and Science section of this calendar ([page 128](#)).

III. Course Descriptions

First year students are not admitted to courses beyond the 1000 level without the consent of the instructor. Courses at the 2000 level do not have prerequisites; in general, they are available only to students in their second year or above. Prerequisites for courses at the 3000 and 4000 levels are listed with each individual course below; in general, they are available only to students in their third year or above in the University.

NOTE: Not all courses are offered every year. Please consult the current timetable for this year's offerings.

RELS 0400X/Y.00: Religious Studies Honours Examination.

Details available from the department.

FORMAT: Examination administered by Religious Studies (Dept. of Classics)

PREREQUISITE: Students must be declared as BA Combined Honours Religious Studies, first subject Religious Studies

RELS 1001.03: Religions of the East.

This course serves as an introduction to the history, beliefs, and practices of Hinduism, Jainism, Sikhism, Buddhism, Daoism, Shinto, and Confucianism.

FORMAT: Lecture

EXCLUSION: RELS 1000.06

RELS 1002.03: Judaism, Christianity, and Islam: The Abrahamic Religions.

This course serves as a comparative and thematic introduction to the history, beliefs, and practices of Judaism, Christianity, and Islam.

FORMAT: Lecture

EXCLUSION: RELS 1000.06

RELS 1200X/Y.06: Gods, Heroes, and Monsters: Ancient Mythology.

An introductory survey of the traditional religious narratives of ancient civilizations including Mesopotamia, Egypt, Israel, Greece, and Rome. Of special interest: the function of myth in shaping and expressing a culture's understanding of the divine, the institutions of human community (religion, the family, government), and the natural world; the interrelationships of the myths of those civilizations; the reception of those traditions in the origins of Christian and Islamic culture. The traditional narratives and their broader cultural contexts will be approached through study of primary sources including epic, tragic, and didactic poetry, hymnography, historiography, philosophy, the visual arts, and architecture. This course fulfills the first year writing requirement.

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Writing Requirement. Lecture

CROSS-LISTING: CLAS 1100X/Y.06

EXCLUSION: CLAS 2100X/Y.06

RELS 1600.03: Introductory Sanskrit I.

This course provides students with all the basic tools required for the study of Sanskrit, with a particular emphasis on basic Sanskrit grammar. Students will learn the Devanagari script, several common nominal forms and the basics of the verbal system, as well as develop a competency in basic reading and recitation.

CROSS-LISTING: CLAS 1600.03

RELS 2001.03: Judaism.

An introduction to Jewish beliefs, practices history, and writings from the Hellenistic period to the present. Topics to be covered include: the Torah, the Talmud, the development of the Rabbinic tradition, Jewish philosophy and mysticism.

FORMAT: Lecture/seminar

RELS 2003.03: Islam.

An introduction to Muslim beliefs, practices, history and writings from the 7th century to the present. Topics to be covered include: the life and mission of Muhammad, the Qur'an, the Islamic legal, philosophical, and mystical tradition, the development of the Hadith, and the rise of political Islam in the twentieth century.

FORMAT: Lecture/seminar

RELS 2011.03: Hinduism.

A basic introduction to Hinduism, including Vedic religion, classical Brahmanical religion, the caste system, bhakti (devotional) traditions and the rise of epic literature, philosophical traditions and the Upanishads, the theistic traditions of the gods Vishnu and Shiva, and of the goddess Devi.

FORMAT: Lecture/seminar

RELS 2012.03: Chinese and Japanese Religions.

An introduction to the cultural, religious, and philosophical traditions of China and Japan. Topics to be covered include: Classical Confucianism, Neo-Confucianism, Philosophical and Religious Daoism, Shinto, Chinese and Japanese Buddhism. The course will also examine the interaction, competition, and overlap between these traditions.

FORMAT: Lecture/seminar

CROSS-LISTING: CHIN 2060.03

RELS 2013.03: Buddhism.

This course introduces the student to the Buddhist religious tradition, beginning with its origins and early developments in India and followed by a treatment of key themes of later world Buddhism such as meditation, devotion, monasticism, and ritual. The course thus exposes students to both Buddhism's early Indian doctrinal and institutional dimensions, and to aspects of Buddhism as practiced subsequently in China, Japan, and Tibet.

FORMAT: Lecture/seminar

CROSS-LISTING: CHIN 2070.03

RELS 2025.03: Nature, the Human, Community and the Divine in the Pre-Modern West.

What is nature? What is the proper relationship between nature and the human being, political community, and divinity? This course will investigate ancient Greek, Roman, Jewish, Christian and Islamic answers, to this question through the study of literature, philosophy, art and architecture of the Pre-Modern West.

FORMAT: Lecture/team-taught

CROSS-LISTING: CLAS 2025.03

RELS 2026.03: Paganism.

"Pagan" originated as a derogatory Christian designation for ignorant conservative rustics who kept to the pre-Christian religions. We shall look at those religions in their origins, nature, and development in antiquity, their continuations in the Middle Ages and modernity, and their persistence and revival in the contemporary world.

FORMAT: Lecture/discussion

CROSS-LISTING: CLAS 2026.03

RELS 2027.03: Magic, Religion and Philosophy.

Reading the Greek Magical Papyri, as well as curse tablets and binding spells for ancient sources, we will explore the intersections of, and relations between, magic, religion, and philosophy in antiquity. The focus will be on both the practical and theoretical aspects of magic in the Greek and Roman worlds.

CROSS-LISTING: CLAS 2027.03

RELS 2052.03: A Cultural Introduction to the Arab World.

This course provides students with the basic tools for approaching the Arab world from a cultural perspective. The main topics are: 1) the guide marks of Arabic history; 2) a civilization "of the Word": the Arabic language, the Koran, the Tradition of the Prophet Mohammed, and the sciences related to the Islamic Law (shari'a); 3) the Arabic legacy in sciences, philosophy, literature, architecture, calligraphy, decoration, etc; 4) multi-cultural Al-Andalus and the ideal of 'convivencia'; 5) present nostalgia for the past; 6) tradition, modernity and effects of 'Globalization' in the contemporary Arabic "high culture" and "pop culture": in literature, music, arts, cinema, life style, education system, media, etc. Some lectures will be accompanied by audio-visual presentations including documentary films. The course does not require background in Arabic.

FORMAT: Lecture/discussion

CROSS-LISTING: ARBC 2100.03, HIST 2500.03

RELS 2203.03: Philosophy and God.

Does God exist? Can God be known? Have a nature? Do evil? Beginning by occupying the same ground as religion, philosophy has asked these questions. Starting with Pythagoras, Empedocles, Plato, Aristotle, Epicurus, and continuing with their pagan, Jewish, Christian, and Islamic followers, we shall learn to state the answers of sages and mystics with historical accuracy and to judge their persuasive power.

FORMAT: Lecture/discussion

CROSS-LISTING: CLAS 2024

RELS 2205.03: Philosophy of Religion.

Monotheistic religions (such as Judaism, Christianity, and Islam) assert the existence of a single God. This course addresses philosophical problems posed by traditional monotheism. Why care whether monotheism is true? Why care whether belief in God is rational? Does the rationality of belief in God depend on the evidence for and against God's existence? What is the best evidence for and against? What bearing does God have on human morality?

CROSS-LISTING: PHIL 2205.03

EXCLUSION: PHIL 2200X/Y.06

RELS 2208.03: Science and Medicine in Islamic Societies, 700 - 1500.

Through a combination of primary and secondary source readings, this course explores some of the major trends and debates within science and medicine in Islam from the seventh century till the early modern period. A special emphasis is placed on situating these developments within the larger political, social and institutional structure of Islamic societies.

FORMAT: Seminar

CROSS-LISTING: HSTC 2208.03

EXCLUSION: HSTC 3610.03 and RELS 3610.03 for the 2010/11 academic year only

RESTRICTION: Restricted to students in their second year and above

RELS 2209.03: The Roman World from Constantine to Theodosius (312-395).

This course covers one of the most important periods of Roman history in which Christianity became the dominant religion in the empire and foreign peoples threatened the existence of the empire itself. The course is open to first-year students. There is no foreign language requirement.

FORMAT: Seminar

CROSS-LISTING: HIST 2017.03, CLAS 2209.03

EXCLUSION: CLAS 2210X/Y.06, HIST 2004X/Y.06

RELS 2220.03: Ancient Israel in Her Near Eastern Context.

Students will become familiar with the broad outlines of ancient Israelite history with specific attention to Israel's relationship to her immediate neighbours and the major imperial powers from the 2nd millennium BCE to first century CE. This will entail an initial survey of biblical texts in order to lay an adequate understanding of ancient Israel's self-conception, followed by a detailed survey of Israel's interaction with other nations, including early Mesopotamia, Egypt, Assyria, Babylon, Persia, the Seleucid empire, and Rome.

FORMAT: Lecture and seminar presentations

CROSS-LISTING: CLAS 2220.03/HIST 2520.03

RELS 2281.03: Christian Beginnings: The Orthodox and Oriental Churches.

This course traces the development of Christianity from its origin as a Jewish sect to its status as the dominant religion within the Byzantine Empire. The Christian religion as patronized by the Eastern Roman Emperors identified itself with the persecuted Christian sect of the first three centuries through the cult of the martyrs, articulated in the increasing importance of relic, icon, and pilgrimage to holy place. The seven ecumenical councils (325-787) progressively defined the Orthodox faith and resulted in the rise of Oriental churches, rejecting aspects of the definitions. Through to our end-date of 843 (when the icon was finally accepted) themes will be treated by attention to historical events (including the rise of Islam), art, architecture, liturgy, and various genres of literature (including hagiography).

FORMAT: Lecture

CROSS-LISTING: CLAS 2281.03

EXCLUSION: CLAS 3280X/Y.06

RELS 2365.03: Plato and the Case of Socrates: Philosophy on Trial.

Socrates (469-399 BCE) never wrote a single word, but posed such threat to Athens that a jury put him to death for the alleged ethical corruption and impiety of his thought. This course will explore the revolutionary life and thought of Socrates, and consider whether the jury's decision against him was justified.

FORMAT: Lecture

CROSS-LISTING: CLAS 2365, PHIL 2365

RELS 2420.03: Witchcraft in Early Modern Europe.

The period of European history from 1500 to 1800 saw the rise of modern science and philosophy. It was also a period in which thousands of witch trials and executions were carried out. This course will seek to understand how these seemingly contradictory developments could have occurred simultaneously. The course will examine changing conceptions of the witch and witchcraft in their historical, intellectual, cultural, religious, and political contexts. Questions that will be addressed include: How did the Renaissance interest in magic influence the Early Modern understanding of witchcraft? What impact did concerns about popular religion have on the witch trials? What constituted evidence that someone was a witch? What did Early Modern scientists think about witchcraft? The course will pay special attention to Early Modern notions of gender and sexuality and their influence on the witch hunts and witch trials.

FORMAT: Lecture/tutorials

CROSS-LISTING: GWST 2320.03, EMSP 2320.03

RELS 2503.03: Medieval Islamic Civilization.

This course will introduce students to the Perso-Levantine world at the time of Muhammad's prophecy in the 7th century, and how the Arabian Peninsula was impacted by the creation and emergence of an Islamic society in Medina and Mecca. With the displacing of Byzantine control in the Holy Land and the collapse of the Sasanian Empire in Persia, the Arab-centric society of Mecca and Medina had become an empire of unprecedented size and ethnic complexity. The course will examine the respective Umayyad and "abbasid" Dynasties, as well as the Ottomans, safavids, and Mughals. The central theme of this course will be an examination of the Islamic surrounding traditions and cultures in the

Mediterranean, the Iranian Plateau, the Caucasus, the Steppe, India, and Southeast Asia. Another important theme will be the study of how various Islamic societies understood and resolved the age-old dynamic between tribal nomadism and hierarchical urbanism.

FORMAT: Lecture

CROSS-LISTING: HIST 2503.03

EXCLUSION: first year students and HIST 2501.03

RELS 2600.03: Introductory Sanskrit II.

This course develops further the basic grammar and vocabulary of Introductory Sanskrit I, emphasizing the basic past tense verbal systems, participial formations, and translation of simple Sanskrit texts.

PREREQUISITE: RELS 1600.03 or CLAS 1600.03

CROSS-LISTING: CLAS 2600.03

RELS 3000.03: Topics in Religious Studies.

This course treats a range of theoretical and methodological issues in the study of religion and serves to introduce students to key problems in scholarship on both Western and Eastern traditions. A variety of themes will be explored such as the relationship between philosophy and religion, the functions of doctrine and ritual, the nature of holiness and the nature of scripture. Beyond a basic understanding of these and other themes, however, the course will engage students with the various - often conflicting - ways in which these themes have been treated in Religious Studies scholarship. The course is a core requirement for all students majoring in Religious Studies.

FORMAT: Seminar

RESTRICTION: Students must be in their third year of study, or beyond

RELS 3001.03: Islam and the Others.

During its history, Islam has encountered numerous "others": Christians, Jews, Zoroastrians, Hindus, and most recently the "West." Muslim countries have had non-Muslim minorities, and conversely there have been Muslim minorities in non-Muslim countries. This course deals with Islamic perceptions of, and relations with, these "others" throughout history.

FORMAT: Lecture

RELS 3008.03: The Medieval Church.

This course does not attempt to provide a chronological survey of the development of the Western church, but is an advanced seminar dealing with topics which have no strict chronological limits. Subjects of study include monasticism, heresy, education and the universities, town and cathedral, lay-clerical conflict, and "popular" concepts of religion. Each year one or more topics are examined in detail, with the help of original documents in translation, and using recent periodical literature and/or monographs. Students prepare and present one or two well-researched papers, and class discussions are used to explore related materials and readings in greater depth. Some prior knowledge of medieval European history is essential.

RECOMMENDED: HIST 1001.03

FORMAT: Lecture/discussion

PREREQUISITE: HIST 2001.03 or HIST 2002.03 or HIST 2120.03

CROSS-LISTING: HIST 3002.03

EXCLUSION: Former HIST 3021.03 and 3022.03 students

RELS 3009.03: Christianity in the Lands of Islam.

After the Islamic conquest of the Middle East in the seventh century, approximately half of the world's Christians found themselves under Islamic rule. The course tells the story of these Christians, their religious practices, their literatures, written in Greek, Arabic, Syriac, and Coptic, and their complex relations with the Muslims from the seventh century until today.

FORMAT: Lecture

PREREQUISITE: Students must be in their third year of study, or beyond

RELS 3012.03: Mystics of the Middle East.

The course is designed as an introduction to mystical dimensions of Islamic thought and practice in their historical development and in relation to Jewish and Christian mysticism in the Middle East. Topics to be covered include: the beginnings of the Sufi tradition in relation to other varieties of Middle Eastern mysticism, orthodoxy and heresy in early Sufism, stations and states on the Sufi path, Sufism and philosophy in interaction, Sufi orders, Sufi poetry as vehicle of mystical experience.

PREREQUISITE: RELS 1002.03 or RELS 2003.03 or permission of the instructor.

RELS 3018.03: Meetings Between Hellenism and the East to Philo the Jew.

We consider the constitution of Hellenism in relation to Eastern cultures as this emerges in Homer and Herodotus, the emergence of philosophy and the polis. With Alexander and the Hellenistic empires we look at the results and limits of military conquest especially in what is now Afghanistan. The course concludes with the constitution of Jewish religion and culture and its meeting with Hellenism with Philo Judaeus in Alexandria. In order to integrate the presentation of text and art the lectures are all in PowerPoint.

FORMAT: Lecture and discussion

CROSS-LISTING: CLAS 3016.03, HIST 3016.03

RELS 3019.03: Meetings between Hellenism, Judaism, Christianity and Islam until the Renaissance.

We consider the constitution of Christianity in relation to Hellenism and Judaism during the first six centuries of the Christian era. After treating the constitution of Islam, we consider its meetings with Christianity and Judaism especially in Spain and Norman Sicily. We conclude with medieval Jewish, Christian and Islamic philosophical theologians. Integrating the presentation of text and art the lectures are all in PowerPoint.

FORMAT: Lecture and discussion

CROSS-LISTING: CLAS 3017.03, HIST 3017.03

RELS 3100.03: Readings in Western Religions.

This course will focus on a single body of literature from the Jewish, Christian, or Islamic religious traditions such as the Gospels, Midrashic collections, or Tafsir. The course will examine the interpretation of the literature in its original context, in traditional commentaries, and in the modern academy.

FORMAT: Lecture/seminar

PREREQUISITE: A 2000 level course or permission of instructor

EXCLUSION: RELS 3002.03

RELS 3101.03: The Self and the World in Indian Story.

Through a close reading of narrative and other forms of story literature, this course explores the twin themes, fundamental to all South Asian religions, of renouncing and embracing the world. Reading materials will draw from Hindu, Indian Buddhist, Jain and Sikh narrative literature, and will reflect a range of religious attitudes towards engaged worldly life within the family and society, and the pursuit of personal liberation through asceticism, renunciation and monasticism.

PREREQUISITE: A 2000 level RELS course or permission of the instructor

EXCLUSION: RELS 3002.03

RELS 3111.03: Vishnu and Krishna the Dark Lord: Popular Hindu Religion.

This course focuses on the god Vishnu and his various manifestations, particularly Krishna, the "Dark Lord." Through an examination of traditional Sanskrit sources and popular regional traditions across India, the course treats the theological, mythic and cultic expressions of one of Hinduism's most beloved figures.

FORMAT: Lecture with tutorial meetings

PREREQUISITE: RELS 2011 or permission of instructor

RELS 3112.03: Buddhism in India and Tibet.

This course engages the student with the Mahayana and Vajrayana traditions of Buddhism as lived and practiced initially in India and subsequently in the Tibetan cultural region. Emphasis will be placed on the philosophical schools called Madhyamaka and Yogacara, and particularly on the tantric ritual and meditation practices of Tibetan Buddhism.

FORMAT: Lecture with tutorial meetings

PREREQUISITE: RELS 2013, or permission of instructor

RELS 3113.03: The Mahabharata: India's Great Epic of Strife and Salvation.

Barring perhaps the Ramayana, the Mahabharata or "Great [Epic] of India" is the most widely known and retold narrative in all South Asian tradition, and is one of the most important literary works of human civilization. The Sanskrit Mahabharata is enormous, complex, endlessly fascinating, and has remained for 2000 years the principal venue for the Hindu tradition's reflection on the dark and elusive dimensions of war, violence, civil and divine law, human destiny and freedom. This course will lead students into the colourful world of India's great Sanskrit epic, provide them with the tools for mastering the narrative itself and the scholarly issues arising from its study, and provide them a taste of the Sanskrit language in which the poem is written.

FORMAT: Lecture and tutorials

PREREQUISITE: RELS 2011, RELS 3101, RELS 3111 or permission of the instructor

RELS 3200.03: Science and Religion: Historical Perspectives.

Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the dawn of civilization to the end of the eighteenth century, with a special focus on the early modern period. From an examination of the biblical view of nature, ancient Babylonian astrology and divination and Plato's Timeaus, this course moves through a treatment of the centrality of theology to Medieval science on to natural theology and the "Watchmaker" Design Argument of the seventeenth and eighteenth centuries. Models of conflict, harmony and complementarity offered to characterize relations between science and religion are explored through case studies such as Galileo's controversy with the Church and instances where religious belief inspired scientists like Boyle and Newton. Claims that certain confessional traditions (notably Protestantism and its dissenting offshoots) facilitated the rise of modern science are also appraised. Science-religion relations are examined both from the standpoint of mainstream religion and with respect to religious heterodoxy, prophecy, alchemy, magic and witchcraft. This course employs examples from Islamic cultures in addition to the Judeo-Christian tradition. Special features include a focus on primary texts and guest lectures by scientists.

FORMAT: Lecture/discussion

CROSS-LISTING: HSTC 3200.03, EMSP 3330.03, HIST 3075.03

RELS 3201.03: Science and Religion: Contemporary Perspectives.

Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the dawn of civilization to the end of the eighteenth century, with a special focus on the early modern period. From an examination of the biblical view of nature, ancient Babylonian astrology and divination and Plato's Timeaus, this course moves through a treatment of the centrality of theology to Medieval science on to natural theology and the "Watchmaker" Design Argument of the seventeenth and eighteenth centuries. RELS 3250.03: Atheism in Early Modern Europe.

Although atheism continues to be a source of controversy and debate, one of the most significant features of the modern world is the extent to which religious unbelief has become accepted as a morally and intellectually defensible position. This course will seek to understand the rise of modern atheism by examining its origins in the Early Modern world.

FORMAT: Lecture/tutorial

CROSS-LISTING: EMSP 3250.03

RELS 3282.03: Christian Beginnings: Catholicism.

This course will consider the formation of Catholicism (Latin Christianity) up to the 12th century in relation to the Greco-Roman context and the barbarian invasions. Moving from North Africa to Western Europe, and using a combination of text, music and artistic, architectural, and archaeological evidence, it will examine the formation of doctrine and discipline in relation to schisms, heresies and Hellenic philosophy, the origin and developments of western monasticism, the papacy, church and state relations, and the construction of liturgy. A theme will be the interplay between the centrifugal and centripetal.

FORMAT: Lecture and discussion

CROSS-LISTING: CLAS 3282.03

EXCLUSION: CLAS 3280X/Y.06

RELS 3283.03: Gods in the Flesh: Iamblichus and Anselm.

This course presents two opposed arguments for the union of divinity with the sensuous and human ("incarnation") and looks at one instance of how they meet: Iamblichus, *On the Mysteries*, Anselm, *Why the God-man*, Bonaventure, *The Journey of the Mind into God*. We shall look at how these arguments bridge the pagan / Christian, philosophy/ theology/ religion, Orthodox / Catholic, and Greek / Latin divides.

FORMAT: Lecture and discussion
CROSS-LISTING: CLAS 3283.03

RELS 3381.03: Medieval Philosophy from Augustine to Anselm.

A study of texts, primarily within the Latin tradition from Augustine to Anselm, but including selected writings of the Pseudo-Dionysius. Three works will normally be read in their entirety: Boethius, *Consolation of Philosophy*; Dionysius, *Mystical Theology*; Anselm, *Proslogion*. The main interest is the use and transformation of the philosophy of Plato, Aristotle, the Stoics and the Neoplatonists in this development.

FORMAT: Lecture
CROSS-LISTING: CLAS 3381, PHIL 2381

RELS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas.

A study of texts which reflect the transformation of the ancient philosophical tradition within the works of medieval Arabic and Jewish thinkers and of the Latin Christians to whom they mediated ancient philosophy. Selections from al-Farabi, Moses Maimonides, Averroes, and Aquinas, among others will be read. Bonaventure *The Minds Journey into God* will be read in its entirety.

CROSS-LISTING: CLAS 3382, PHIL 2382

RELS 3411.03: Augustine's *Confessions* I: Books 1-9.

This course will examine the first nine books of Augustine's *Confessions*. These 'autobiographical' books contain Augustine's account of his intellectual progress, culminating in his encounter with Platonism in book 7, followed by an account of his conversion to Christianity and his life as a Christian in books 8 and 9.

FORMAT: Seminar
CROSS-LISTING: CLAS 3411.03
EXCLUSION: CLAS/RELS 3410.03

RELS 3412.03: Augustine's *Confessions* II: Books 10-13.
