While the world is focused on the terrorist threat on land, piracy and other criminal activities are spreading rapidly on the seas. Youths in small boats with simple weapons are embarrassing the most powerful navies in the world, hijacking merchant ships off the coast of Somalia and getting multi-million dollar ransoms for their hostages. Meanwhile, illegal immigration and smuggling are also increasing dramatically. Natural disasters are also on the rise. Is Canada ready for these challenges? Are our maritime forces properly structured for the new security era or should they be changed radically? Tens of billions will be spent soon on new ships to either

perpetuate the status quo or launch in a new direction. This course shows the full range of policy and capability options available and explains the logic behind the choices that need to be made. What would you recommend?

FORMAT: Lecture| Seminar

PREREQUISITE: POLI 2520.03 recommended

POLI 3596 Explaining Global Conflict and Violence

CREDIT HOURS: 3

During a 13-week period in 1994 more than 800,000 people were killed in Rwanda -- that number exceeds the combined total of Canadian and American military casualties in both World War I and II. Between 1990-95, 250,000 people died in the Balkans -- the equivalent of one US Oklahoma bombing disaster (168 casualties) every day for four years. Large-scale violence associated with inter-state and intra-state conflict and war continues to have undeniable relevance for all of humanity. Given the rise of ethnic conflicts in Europe and proliferation of advanced weapons technology world wide, providing answers to pressing questions about the onset and escalation of war is becoming more, not less, imperative in the aftermath of the Cold War. Unfortunately, notwithstanding years of inquiry into the nature and origins of war, it remains unclear whether we've produced any definitive knowledge. This seminar is designed, in part, to provide students with a comprehensive (and critical) review of answers to questions about the onset, escalation and de-escalation of violent conflict.

POLI 4228 Pressure Politics in Canada: Opportunities and Obstacles

CREDIT HOURS: 3

The goal of this seminar is to explore the opportunities for and obstacles to advocacy politics in Canada. We analyze the strategies that pressure groups use to engage the most important loci of power in the Canadian political system; parliament, the public service and the courts.

FORMAT: Seminar

CROSS-LISTING: POLI 5228.03, PUAD 6505.03

EXCLUSIONS: POLI 3228.03

POLI 4232 Urban Governance in Canada

CREDIT HOURS: 3

The objective of this course is to provide students with the empirical, analytical, theoretical, and methodological tools to understand and explain the politics and policy activities of Canada's urban and suburban municipalities within their socioeconomic, institutional, and Constitutional contexts. A major concern is to evaluate how effectively and equitably city governments in Canada have responded to contemporary urban challenges. The course adopts a critical perspective on urban governance and engages with contemporary debates concerning municipal governance reform and the evolving nature of urban governance within Canadian federalism.

FORMAT: Seminar

PREREQUISITE: POLI 3220.03 or POLI 3232.03 or permission of instructor

EXCLUSIONS: POLI 3231/5231

POLI 4234 Canadian Urban Politics in Comparative Perspective

CREDIT HOURS: 3

This course examines the politics and governance of Canadian cities from a comparative perspective. More specifically, the course uses comparative method in three ways: it asks what one can learn from comparing Canadian cities with each other (subnational comparisons), what cross-national comparisons of Canadian cities can teach as well as compares Canadian cities implicitly with other cities by applying theories of urban politics and development that have been developed elsewhere to Canadian cities. The objective of this course is to provide advanced political science students with the theoretical, empirical and methodological tools to understand and explain the political development of Canadian cities.

FORMAT: Seminar

PREREQUISITE: POLI 3220.03 or POLI 3232.03 or permission of instructor

CROSS-LISTING: POLI 5234.03

POLI 4240 Policy Formulation in Canada

CREDIT HOURS: 3

This course provides a general introduction to the field of policy management, for graduate and honours undergraduate students. Using British 'best practice' ideas of professional policy making and Canadian statements of generic policy competencies, it seeks to improve the policy capacity of participants. It does this first by increasing their knowledge of public policy structures, processes, and outputs, and secondly, by giving them knowledge that they can use in policy advocacy both inside and outside government. The first section of the course examines policy definitions and professional policy making approaches in the 21st century. The second section considers the role of the state in the 21st century, and the policy competencies that analysts must have is that role is to be carried out effectively. Section three explores vertical, horizontal and external policy relationships, both as determinants of policy and as practical matters of management. Section four explores, and helps participants to gain proficiency in, the most recent processes of strategic policy design and implementation. This blend of theory and practice will increase the policy knowledge of all participants, and equip those who are in professional programs, including the various public services, to contribute more effectively policy processes in the future. SIGNATURE REQUIRED.

FORMAT: Seminar

PREREQUISITE: Open to Honours students only. Permission of instructor

CROSS-LISTING: POLI 5240.03, PUAD 5120.03

POLI 4241 Introduction to Policy Analysis

CREDIT HOURS: 3

This course examines four aspects of policy analysis: (1) The role of the analyst in modern government; (2) The analyst's working environment; (3) Techniques used in carrying out research and preparing position papers; (4) and the analyst's responsibilities to government and to the public in determining what information should reach decision-makers. Approved with Canadian Studies. SIGNATURE REQUIRED.

FORMAT: Seminar

PREREQUISITE: POLI 4240.03 or permission of the instructor.

CROSS-LISTING: POLI 5241.03, PUAD 5121.03

POLI 4242 Political Behaviour: Reason, Passion, Biology

CREDIT HOURS: 3

Does reason or passion drive politicians and citizens to act as they do? Or does the dichotomy between the mind and the heart disguise a more fundamental biological basis to political behavior? Do these approaches leave any room for citizens to exercise their own judgment, or is autonomy lost altogether? Normative questions of justice, equality, and freedom are deeply embedded within each approach and must be confronted as they apply in practice. Although this material is inherently global and comparative, we principally want to investigate how it applies to Canada.

FORMAT: Seminar

POLI 4250 Canadian Public Administration

CREDIT HOURS: 3

This course examines the organization and management of the executive-bureaucratic structures of government for the formulation and management of public policy and public services. It considers the design and operation of the cabinet system and ministerial portfolios; relations between ministers and the career public service; policy and budgetary processes; and, the structural designs of departments, agencies, crown corporations and regulatory commissions. A major focus will be the effects of the new public management on public administration, as governments in Canada, as elsewhere, seek to cope with budgetary restraints, increased demands for quality services and public participation, and greater effectiveness in securing results. Approved with Canadian Studies.

FORMAT: Lecture| Discussion

PREREQUISITE: POLI 2210.03.03/2220.03 or permission of the instructor.

CROSS-LISTING: POLI 5250.03

EXCLUSIONS: POLI 3250.03, POLI 3251.03

POLI 4260 The Politics of Health Care

CREDIT HOURS: 3

Because of its nature as both a public institution and a political icon, the Canadian healthcare system is an inherently political institution which cannot be understood without a clear comprehension of both its composition and its relationship to the broader political landscape in Canada. This course will provide a survey of the political and theoretical debates within the area of healthcare in Canada, including investigations of federalism, funding, and governance.

FORMAT: Seminar

PREREQUISITE: 60 credit hours of previous coursework

CROSS-LISTING: POLI 5260.03

EXCLUSIONS: POLI 3260.03

POLI 4302 Comparative Development Administration

CREDIT HOURS: 3

This course examines analytical, normative and political issues of public administration in developing countries. It considers the scope of development administration as a sub-field of public administration; public sector organization and management including public services, public enterprises, decentralization and rural development, financial systems, human resource management, aspects of state economic management (with the use of case studies) and institutional aspects of aid administration (with CIDA and World Bank cases).

FORMAT: Seminar

PREREQUISITE: POLI 2300.06 or permission of the instructor.

CROSS-LISTING: POLI 5302.03, PUAD 6780.03

EXCLUSIONS: POLI 3302.03

POLI 4303 Human Rights: Political Issues

CREDIT HOURS: 3

This course will introduce students to the evolving place of human rights in politics, both comparative and international. We begin by examining the historic emergence of human rights as an issue in world politics, principally since the Second World War, and their conceptual foundations. We then focus on a number of specific topics and controversies concerning human rights in world politics, including: the sources of and struggle to end human rights-abusive regimes; the multilateral politics of human rights; human rights in national foreign policies; the rights of indigenous peoples; genocide, humanitarian intervention; and the responsibility to protect; and the relationship between globalization and human rights, and the 'Global War on Terrorism' and human rights. Finally we look at the role of human rights in domestic politics, focusing on the issues of women's rights and sexual orientation.

FORMAT: Seminar

PREREQUISITE: POLI 2300X/Y.06 , POLI 2520.03/ POLI 2530.03 or POLI 3505.03 or permission of the instructor.

CROSS-LISTING: POLI 5303.03

EXCLUSIONS: POLI 3303.03

POLI 4322 The EU as a Global Actor

CREDIT HOURS: 3

The aim is to enable the student to analyze and understand the international roles played by the EU in both economic and political areas. Why has the EU been better able to speak with one voice in economic areas than political areas? To what extent can the member states control the foreign policies of the EU? The introductory part will include an overview of the EU governance systems in the area of external economic relations (first pillar) and the Common Foreign and Security Policy (the second pillar) and analyses of the main achievements in both areas. Specific topics to be selected for analyses during the second part will include the EU and the WTO, the EU and the US, the EU and the East Asia, and the EU and developing countries. Finally, in the third part of the course students study recent efforts to develop a European Security and Defence Policy.

FORMAT: Seminar

PREREQUISITE: POLI 2520.03 or 2530.03 or permission of instructor

CROSS-LISTING: POLI 5322.03

EXCLUSIONS: POLI 3322.03

POLI 4340 Approaches to Development

CREDIT HOURS: 3

A survey of theories of and policies about dependence, underdevelopment and peripheral social formations. Particular emphasis on modernization, materialist, and alternative modes of analysis, and on orthodox and radical strategies of development. Topics treated include social contradictions (e.g. class, race and ethnicity), debt, structural adjustment, human development, human security, gender, technology, civil society, informal sectors, democratization and ecology.

FORMAT: Seminar

PREREQUISITE: By permission of the instructor.

EXCLUSIONS: POLI 3340.03

POLI 4355 Comparative Perspectives on the Development State

CREDIT HOURS: 3

This course examines development in a broad regional comparative context to determine whether endogenous or exogenous conditions account for the success with which the North/Southeast Asian economies have been transformed vis-a-vis Latin America and Africa. The course compares the "development state" model across the developing world, by briefly focusing on three distinct cases - South Africa, Malaysia and Brazil - as "upwardly mobile" late industrialisers.

FORMAT: Seminar

PREREQUISITE: POLI 2300.06 or POLI 2520.03 and POLI 2530.03 or permission of the instructor.

CROSS-LISTING: POLI 5355.03

EXCLUSIONS: POLI 3355.03

POLI 4380 Politics of Climate Change

CREDIT HOURS: 3

This course examines the interactions between politics and a changing climate. Core questions include: What lies behind political disagreements over how to respond to climate change? What does climate change mean for various political, social, and economic projects? Topics include: the role of science and economics in climate politics; the new "climate capitalism"; non-capitalist alternatives that question growth and consumerism while emphasizing "climate justice"; Canada's particular difficulties in addressing climate change; climate politics at the personal level; international climate negotiations; and the politics of geo-engineering.

FORMAT: Lecture| Seminar

PREREQUISITE: POLI 3385 or permission of the instructor.

EXCLUSIONS: POLI 3380 Politics of Climate Change

POLI 4403 Human Rights: Philosophical Issues

CREDIT HOURS: 3

An examination of the historical and conceptual development of human rights, this course looks specifically at normative and political issues involved in the emergence of human rights from the 13th century to present. It covers the shift from natural law to natural right, the emergence of states, rights to sovereign governance, and the development of specific classes of rights (including freedom of conscience, property rights, women's rights, cultural rights, animal rights, and socioeconomic rights).

FORMAT: Seminar

PREREQUISITE: POLI 2410.03 or POLI 2420.03 or POLI 3505.03, or permission of the instructor.

CROSS-LISTING: PHIL 3470.03, POLI 5403.03

EXCLUSIONS: POLI 3403.03

POLI 4427 Queer Theory

CREDIT HOURS: 3

This course provides an overview of the general questions and debates -- and the philosophical, political and cultural contexts—of the interdisciplinary field that is now known as ‘Queer Theory.’ It will profile a wide selection of foundational writings by leading scholars and contributors to GLBT thought and activism. Examining topics such as difference, identity, discrimination, and equality, we will address its articulations critical race theory, feminist philosophy, and critical analyses of political economy. We will also address the significance of queer theory to GLBT equality activism, attending to the relationship between political thought and legislative practice in addressing institutionalized heteronormativity and the public expressions of homophobia, transphobia, sexism, and racism and their impact on social policy.

CROSS-LISTING: GWST 4427.03

POLI 4440 The Politics of Affect: Theories of Emotion and Political Life

CREDIT HOURS: 3

This course draws on recent developments in the burgeoning of field of affect studies to address the relation of both conscious and non-conscious emotive experience to public and political life. Drawing on the insights and scholarship from different disciplines, we will examine the social, political and cultural theories of affect, emotion, and aesthetics to explore their role in political decision-making and public responses. Topics will include the affective logic of public threat, the cultural politics of emotion such as fear and shame; sensorial responses to moralistic rhetoric; visceral responses to social groups and/or cultural practices. We will also look at how sensibility, feeling, and affect have operated in social and political movements, including a consideration of emotions such as fear, disgust, and distain, and compassion in social conflict, and in the formative approaches to retribution and reconciliation.

FORMAT: Seminar

PREREQUISITE: 1000-level course in Political Science and 60 credit hours, or permission of instructor

CROSS-LISTING: POLI 5440.03

ASSESSMENT METHOD: Two essays, one test, participation

POLI 4479 Liberalism

CREDIT HOURS: 3

Liberalism takes a variety of forms and includes many topics including the rule of law, limited government, the free exchange of goods, entitlement to property, the self, and individual rights. Its philosophical and political assumptions provide the intellectual context within which its account of the individual, its vision of the community and its preferred allocation of resources will be assessed. SIGNATURE REQUIRED.

FORMAT: Seminar

PREREQUISITE: Normally, courses in philosophy or political science or economics: consult instructor.

CROSS-LISTING: PHIL 4470.03/5470.03, ECON 4446.03/5446.03, POLI 5479.03

POLI 4481 Theories of Violence, Persecution, Genocide

CREDIT HOURS: 3

This course will provide an overview of contemporary theoretical approaches to systemic violence, particularly against racial, ethnic, and sexuality minorities. Through a selection of historical and contemporary case studies, it will assess different accounts and explanatory frameworks for understanding the instigation and exacerbation of persecution and genocide. Attending to the role of the state and state policies in the history of violence, it will examine the discourses and practices that have both fuelled and justified the colonization of native peoples, enslavement of racial groups, the holocaust, and ethnic cleansing in the 20th century genocides. We will also consider the recent attempts of the international community to prevent, deter, and curb genocidal outbreaks, and the theoretical assumptions about human behaviour that underpin them.

FORMAT: Seminar

PREREQUISITE: 2000-level course in Political Science or permission of the instructor

CROSS-LISTING: POLI 5481.03

POLI 4512 The Politics of North America

CREDIT HOURS: 3

North America has become increasingly integrated over the last thirty years--economically, demographically, and even politically. This course will review the history of regional integration in North America, and consider a number of contemporary policy controversies. It bridges sub-disciplinary boundaries by looking at both domestic policy-making (Comparative Politics) and at bargaining between the three countries (International Relations).

FORMAT: Seminar

PREREQUISITE: 2000 or 3000-level course in International Relations or permission of instructor

POLI 4521 Theories of International Relations I: Security Studies

CREDIT HOURS: 3

4521 and 4522 are independent courses that are conceptually closely related. This relationship is partially based on the more general division within IR between “Security Studies” and International Political Economy (IPE). POLI 5421 sets things up by reviewing the broadest theoretical debates within the field, with an emphasis on questions of power and order, and looks at theoretical work which focuses on political/military issues like deterrence, balancing, and the meaning of “national security.” POLI 4522 begins with theoretical debates over cooperation and institutions, and is empirically anchored in various aspects of IPE, including trade, finance, and development.

FORMAT: Seminar

PREREQUISITE: Permission of the instructor.

CROSS-LISTING: POLI 5421.03

EXCLUSIONS: POLI 4520.06

POLI 4522 Theories of International Relations II: International Political Economy

CREDIT HOURS: 3

Explores classic and contemporary debates in International Relations theory, with particular attention to the bases for international cooperation, the role of law and institutions, and the foundations of political economy.

FORMAT: Seminar

PREREQUISITE: Permission of instructor

EXCLUSIONS: POLI 5524

POLI 4569 Canadian Foreign Policy

CREDIT HOURS: 3

This advanced seminar course is concerned with the 'structure-agent' problem as it applies to Canadian foreign policy. In other words, what are the structures (both material and normative) that shape and constrain the pursuit of Canadian foreign policy; what room for maneuver and initiative is there; and who are the key actors, or the 'agents' who shape and implement Canada's global role? The course discusses these questions through four sections: theoretical and analytical approaches to the study of Canadian foreign policy; the external context; the domestic; and key themes and issues in Canadian foreign policy.

FORMAT: Seminar

PREREQUISITE: POLI 2210 or POLI 2220 or POLI 2520 or POLI 2530 or POLI 3568 or POLI 3569 or POLI 3570 OR Permission of instructor

POLI 4581 International Diplomacy: Institutions and Practices

CREDIT HOURS: 3

This course considers the historical evolution of international diplomacy. Among the themes reviewed are the emergence of national states, sovereignty norms, human rights and norms governing military intervention, the growth of international law and institutions, and the prospects for global governance. The course features extensive student participation, an emphasis on writing, and a negotiation simulation.

FORMAT: Seminar

PREREQUISITE: POLI 2520.03, POLI 2530.03 or other international relations course

CROSS-LISTING: POLI 5581.03

POLI 4587 International Political Economy

CREDIT HOURS: 3

This course is composed of two overlapping constituent themes. The first theme is that of competing explanations of international political economic behaviour - behaviour affected by that diffuse political authority characteristic of the international system, the second, that of examining the basic issues in international political economy - the fundamental questions as to why international trade, international finance, unequal economic development, international organization, and the multinational enterprise. The first theme functions to create the over-all framework of analysis by which competing approaches to international political economy can be evaluated. The second theme will integrate these approaches with issue areas within the fields of international trade, international finance, and what might be termed "international production" (within which fields issues such as economic development, the multinational enterprise, and the global "division of labour" constitute the major foci). The course sessions will roughly be constituted by 50 percent lecture and 50 percent organized student contributions for seminar discussion and debate.

FORMAT: Seminar

PREREQUISITE: POLI 2520.03 or POLI 2530.03. Students should feel comfortable with economic theory as well, otherwise by permission of the instructor.

EXCLUSIONS: POLI 3587.03

POLI 4590 Politics of the Sea II

CREDIT HOURS: 3

This course will examine environmental, political and economic forces which affect contemporary ocean governance and management. Contemporary issues will be used to explore the geo-political ocean on a sectoral basis (transportation, fisheries and resources, military, etc.), as well as analyzing the evolution of national oceans policies and institutions.

FORMAT: Lecture| Seminar

CROSS-LISTING: POLI 5595.03, MARA 5589.03

RESTRICTIONS: to 4th year Political Science Honours students
EXCLUSIONS: POLI 3590.03

POLI 4600X/Y Honours Essay

CREDIT HOURS: 6

Political Science undergraduates in the Honours program are required to attend the Honours seminar as scheduled. This seminar is designed as a research seminar for Honours students.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

RESTRICTIONS: Restricted to Political Science Honours students in their final year.

POLI 4636 Nationalism and Statecraft

CREDIT HOURS: 3

An examination of the sources, ingredients and consequences of contemporary nationalism, with particular reference to its implications for the conduct of international politics. In the early sessions of the course, pertinent literature from the pre-World War II period will be evaluated for its relevance to our understanding of current circumstances, in which the apparent revival of nationalist impulses has coincided with intensifying manifestations of functional interdependence. SIGNATURE REQUIRED.

FORMAT: Seminar

PREREQUISITE: 3000-level course in International Relations or permission of instructor

CROSS-LISTING: POLI 5636.03

RESTRICTIONS: Restricted to students in their fourth year

POLI 4810 Special Topics in Political Science

CREDIT HOURS: 3

An examination of selected issues in Political Science. This course explores (e.g., when a visiting scholar is on campus) a special topic that is not a regular offering of the department. It is taught as a lecture or seminar course, not as an independent studies course. Since the topics covered in these courses differ from year to year, students should seek further information from the Political Science Department before registering. Note

Courses in Religious Studies are administered by the Classics Department.

Introduction

Religion is a phenomenon virtually universal in human society and history. Understanding religion involves grasping simultaneously both the meaning of faith in the lives of participants, and the critical analysis of outside observers. Both the student wishing enhanced understanding of religion as an historical, and social and human fact, and the student who wishes to wrestle with problems arising in academic reflection concerning the relation between the personal and the objective, can find material to engage them in the programs and courses described below.

Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section.

Staff

Dean

Summerby-Murray, R., ATCL Dip (Trinity College, London), BA, MA (Canterbury), PhD (Toronto)

Chair

Hankey, W. J. (902 494-3468)

Undergraduate Advisor

Treiger, A. (902 494-3493)

Professor Emeritus

Ravindra, R., BSc, MTech (IIT), MA (Dalhousie), MSc, PhD (Toronto), Adjunct Professor of Physics

Associate Professor

Austin, C., BA, MA (Concordia), PhD (McMaster)

Treiger, A., BA, MA (Jerusalem), MPhil, PhD (Yale)

BA (120 credit hour) Major in Religious Studies

Departmental Requirements

Students must complete a minimum of 36 credit hours or a maximum of 54 credit hours in Religious Studies beyond the 1000 level including 18 credit hours beyond the 2000 level. They must include:

1. At least six credit hours selected from RELS 1001.03, RELS 1002.03, or RELS 1200.06. This requirement may be relaxed at the discretion of the Department. The King's Foundation Year Program satisfies it.
2. At least 12 credit hours selected from RELS 2001.03, RELS 2003.03, RELS 2011.03, RELS 2012.03, RELS 2013.03, RELS 2025.03, RELS 2026.03, RELS 2027.03, RELS 2052.03, RELS 2203.03, RELS 2220.03, RELS 2281.03.
3. At least 15 credit hours in RELS at the 3000 level or higher. Of these 15 credit hours, 12 must be chosen from the following: RELS 3000.03, RELS 3009.03, RELS 3012.03, RELS 3018.03, RELS 3019.03, RELS 3100.03, RELS 3101.03, RELS 3111.03, RELS 3112.03, RELS 3113.03, RELS 3282.03, RELS 3283.03, RELS 3381.03, RELS 3382.03, RELS 3411.03, RELS 3412.03, RELS 3432.03, RELS 3661.03, RELS 3662.03, RELS 3910.06, RELS 4010.03, RELS 4011.03, RELS 4018.03, RELS 4019.03, RELS 4450.06.

BA (120 credit hour) Double Major in Religious Studies

Students must complete the Faculty requirements for a double major. These include 60 to 84 credit hours in the Major subjects at the 2000 level or higher, with no more than 48 credit hours and no fewer than 30 credit hours in each subject, including at least 12 credit hours beyond the 2000 level in each of the two major subjects.

Religious Studies requires:

1. At least six credit hours selected from RELS 1001.03, RELS 1002.03, or RELS 1200.06. This requirement may be relaxed at the discretion of the Department. The King's Foundation Year Program satisfies it.
2. At least 12 credit hours selected from RELS 2001.03, RELS 2003.03, RELS 2011.03, RELS 2012.03, RELS 2013.03, RELS 2025.03, RELS 2026.03, RELS 2027.03, RELS 2052.03, RELS 2203.03, RELS 2220.03, RELS 2281.03.

- At least 12 credit hours in RELS at the 3000-level or higher. Of these 12 credit hours, nine must be chosen from the following: RELS 3000.03, RELS 3009.03, RELS 3012.03, RELS 3018.03, RELS 3019.03, RELS 3100.03, RELS 3101.03, RELS 3111.03, RELS 3112.03, RELS 3113.03, RELS 3120.03, RELS 3282.03, RELS 3283.03, RELS 3381.03, RELS 3382.03, RELS 3411.03, RELS 3412.03, RELS 3432.03, RELS 3661.03, RELS 3662.03, RELS 3910.06, RELS 4010.03, RELS 4011.03, RELS 4018.03, RELS 4019.03, RELS 4450.06

BSc (120 credit hour) Double Major, Second Subject in Religious Studies

Students must complete the Faculty requirements for a double major. Religious Studies can only be the second subject, with no fewer than 30 credit hours and no more than 54 credit hours above the 1000 level. 12 credit hours must be at the 3000 level or higher. Religious Studies requires:

- At least six credit hours selected from RELS 1001.03, RELS 1002.03, or RELS 1200.06. This requirement may be relaxed at the discretion of the Department. The King's Foundation Year Program satisfies it.
- At least 12 credit hours selected from RELS 2001.03, RELS 2003.03, RELS 2011.03, RELS 2012.03, RELS 2013.03, RELS 2025.03, RELS 2026.03, RELS 2027.03, RELS 2052.03, RELS 2203.03, RELS 2220.03, RELS 2281.03.
- At least 12 credit hours in RELS at the 3000-level or higher. Of these 12 credit hours, nine must be chosen from the following: RELS 3000.03, RELS 3009.03, RELS 3012.03, RELS 3018.03, RELS 3019.03, RELS 3100.03, RELS 3101.03, RELS 3111.03, RELS 3112.03, RELS 3113.03, RELS 3282.03, RELS 3283.03, RELS 3381.03, RELS 3382.03, RELS 3411.03, RELS 3412.03, RELS 3432.03, RELS 3661.03, RELS 3662.03, RELS 3910.06, RELS 4010.03, RELS 4011.03, RELS 4018.03, RELS 4019.03, RELS 4450.06

BA (120 credit hour) Combined Honours in Religious Studies

Students must complete the Faculty requirements for the combined honours degree. At least 30 credit hours and no more than 48 credit hours must be in Religious Studies above the 1000 level. At least 66 credit hours and no more than 84 credit hours are to be in both subjects beyond the 1000 level.

The Religious Studies requirements are:

- At least six credit hours selected from RELS 1001.03, RELS 1002.03, or RELS 1200.06. This requirement may be relaxed at the discretion of the Department. The King's Foundation Year Program satisfies it.
- At least 12 credit hours selected from RELS 2001.03, RELS 2003.03, RELS 2011.03, RELS 2012.03, RELS 2013.03, RELS 2025.03, RELS 2026.03, RELS 2027.03, RELS 2052.03, RELS 2203.03, RELS 2220.03, RELS 2281.03
- At least 15 credit hours in RELS at the 3000-level or higher. Of these 15 credit hours, 12 must be chosen from the following: RELS 3000.03, RELS 3001.03, RELS 3009.03, RELS 3012.03, RELS 3018.03, RELS 3019.03, RELS 3100.03, RELS 3101.03, RELS 3111.03, RELS 3112.03, RELS 3113.03, RELS 3120.03, RELS 3282.03, RELS 3283.03, RELS 3381.03, RELS 3382.03, RELS 3411.03, RELS 3412.03, RELS 3661.03, RELS 3662.03, RELS 3910.06, RELS 4010.03, RELS 4011.03, RELS 4018.03, RELS 4019.03, RELS 4450.06
- Outside Religious Studies six credit hours will be required from the following list: ARBC 1020.06 (Arabic), CHIN 1030.06 (Mandarin), CLAS 1600.03 (Sanskrit I), CLAS 1800.06 (Latin), CLAS 1900.06 (Classical Hebrew), CLAS 2600.03 (Sanskrit II). Students may substitute a more advanced course in these languages for this requirement.
- Completion of the Religious Studies Honours Examination (RELS 0400.00) if the first subject is Religious Studies.

BSc (120 credit hour) Combined Honours, Second Subject in Religious Studies

Students must complete the Faculty requirements for the combined honours degree. Religious Studies can be the second subject only. At least 30 credit hours and no more than 42 credit hours, must be in Religious Studies above the 1000 level. At least 66 credit hours, to a maximum of 84 credit hours are to be in both subjects.

The Religious Studies requirements are:

- At least six credit hours selected from RELS 1001.03, RELS 1002.03, or RELS 1200.06. This requirement may be relaxed at the discretion of the Department. The King's Foundation Year Program satisfies it.
- At least 12 credit hours selected from RELS 2001.03, RELS 2003.03, RELS 2011.03, RELS 2012.03, RELS 2013.03, RELS 2025.03, RELS 2026.03, RELS 2027.03, RELS 2052.03, RELS 2203.03, RELS 2220.03, RELS 2281.03.
- At least 15 credit hours in RELS at the 3000-level or higher. Of these 15 credit hours, 12 must be chosen from the following: RELS 3000.03, RELS 3001.03, RELS 3009.03, RELS 3012.03, RELS 3018.03, RELS 3019.03, RELS 3100.03, RELS 3101.03, RELS 3111.03, RELS 3112.03, RELS 3113.03, RELS 3120.03, RELS 3282.03, RELS 3283.03, RELS 3381.03, RELS 3382.03, RELS 3661.03, RELS 3662.03, RELS 3910.06, RELS 4010.03, RELS 4011.03, RELS 4018.03, RELS 4019.03, RELS 4450.06.
- Outside Religious Studies six credit hours will be required from the following list: ARBC 1020.06 (Arabic), CHIN 1030.06 (Mandarin), CLAS 1800.06 (Latin), CLAS 1600.03 (Sanskrit I), CLAS 1900.06 (Classical Hebrew), CLAS 2600.03 (Sanskrit II). Students may substitute a more advanced course in these languages for this requirement.

Minor in Abrahamic Religions

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

Students declaring a Minor in the Abrahamic Religions will complete a minimum of 18 credit hours at the 2000 level or above to a maximum of 27 credit hours, chosen from the lists below. At least three credit hours must be taken from each of the Judaism, Christianity and Islam lists; RELS 3019 and RELS 3382 may each be used to satisfy parts of this requirement.

Judaism courses

- RELS 2001.03: Judaism
- RELS 2220.03: Ancient Israel
- RELS 3018.03: Meetings between Hellenism and the East to Philo the Jew
- ARBC 3050.03: Arabic Philosophical Texts: Maimonides or RELS 4011.03: Jewish Philosophy: Maimonides
- RELS 4019.03: Philo Judaeus

Christianity courses

- RELS 2281.03: Christian Beginnings: The Orthodox and Oriental Churches
- RELS 2282.03: Christian Beginnings: Catholicism
- RELS 3009.03: Christianity in the Lands of Islam
- RELS 3381.03: Medieval Philosophy from Anselm to Augustine
- RELS 3411.03: St. Augustine's Confessions I
- RELS 3412.03: St. Augustine's Confessions II
- RELS 3431.03: St. Augustine's On the Trinity Part I
- RELS 3432.03: St. Augustine's On the Trinity Part II
- CLAS 3841.03: Latin Philosophical Texts: Aquinas Texts
- CLAS 3842.03: Latin Philosophical Texts: Anselm and Bonaventure Texts
- CLAS 4070.03: The Confessions in Latin
- CLAS 4400.06: Philosophy of the Church Fathers
- CLAS 4018.03: Christian Theology in Islamic Lands: John of Damascus

Islam courses

- RELS 2003.03: Islam
- RELS 2052.03: Cultural Introduction to the Arab World
- ARBC 3040.03: Arabic Philosophical Texts: al-Ghazali

Or

- RELS 4010.03: Islamic Philosophy: al-Ghazali
- RELS 3003.03: Islam and the Others
- RELS 3012.03: Mystics of the Middle East
- RELS 2503.03: Classical and Medieval History of Islamic Civilization
- RELS 3510.03: Sultans and Shahs: Polity and Religion in the Islamic Gunpowder Age.
- CLAS 3602.03: Classical and Medieval History of the Persianate World

Bridging courses

- RELS 2203.03: Philosophy and God
- RELS 3000.03: Topics in Religious Studies
- RELS 3019.03: Meetings between Hellenism, Judaism, Christianity, and Islam until the Renaissance
- RELS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- RELS 3910.06: Neoplatonism: Plato and Neoplatonism
- RELS 4450.06: Medieval Interpreters of Aristotle
- CLAS 4500.06: Seminar on Neoplatonism

Note: Not all courses are offered each year. Please consult with the timetable for courses offered.

Minor in Middle East Studies

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

Students minoring in Middle East Studies select a minimum of 18 to a maximum of 27 credit hours from the list below. Student are required to take one of the following:

- HIST 2502.03: The Ottoman Empire
- HIST 2503.03/RELS 2503.03: Classical and Medieval History of Islamic Civilization
- HIST 2504.03: History of Modern Middle East
- RELS 2001.03: Judaism
- RELS 2003.03: Islam

At least three credit hours must be at the 3000 or 4000 level. Please note that not all courses are offered each year.

Second Year

- ARBC 2020X/Y.06: Intermediate Arabic
- ARBC 2100.03/HIST 2500.03/HIST 2500.03/RELS 2052.03: A Cultural Introduction to the Arab World
- RELS 2053.03/GWST 2053.03: Women and Islam
- CLAS 2100X/Y.06: Ancient Mythology
- CLAS 2216.03/HIST 2089.03: Alexander the Great
- CLAS 2220.03/HIST 2520.03/RELS 2220.03: Ancient Israel
- CLAS 2281.03/RELS 2281.03: The Orthodox and Oriental Churches
- CLAS 2900X/Y.06: Intermediate Hebrew
- HIST 2502.03: The Ottoman Empire
- HIST 2503.03/RELS 2503.03: Classical and Medieval History of Islamic Civilization
- HIST 2504.03: History of the Modern Middle East
- HIST 2505.03: Modern History of Iraq
- RELS 2001.03: Judaism
- RELS 2003.03: Islam

Third Year

- ARBC 3030.03: Advanced Arabic
- ARBC 3031.03: Advanced Arabic II (Readings)
- ARBC 3040.03: Arabic Philosophical Texts (al-Ghazali)
- ARBC 3050.03: Arabic Philosophical Texts (Maimonides)
- ARBC 3100.03: Arabic Pre Islamic Poetry
- CLAS 3016.03/HIST 3016.03/RELS 3018.03: Meetings between Hellenism and the East to Philo the Jew
- CLAS 3017.03/HIST 3017.03/RELS 3019.03: Meetings between Hellenism, Judaism, Christianity and Islam
- CLAS 3021.03: Ancient Art and Architecture
- CLAS 3382.03: Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas
- CLAS 3501.03: Herodotus
- CLAS 3502.03/HIST 3502.03: Thucydides and the Greek World at War
- HIST 3509.03/CLAS 3601.03: Arab Caliphs, Turkish Commanders, Persian Viziers, 750-1200
- HIST 3510.03/RELS 3510.03: Sultans and Shahs, 1500-1800
- HIST 3511.03/CLAS 3602.03: Ancient and Medieval History of the Persianate World
- HIST 3512.03: Modern History of Iran
- HIST 3513.03: From Cairo to Capetown
- HIST 3515.03: Food for Thought
- RELS 3001.03: Islam and Others
- RELS 3009.03: Christianity in the Lands of Islam
- RELS 3012.03: Mystics of the Middle East

Fourth Year

- CLAS 4011.03/RELS 4011.03: Jewish Philosophy: Maimonides
- CLAS 4018.03/RELS 4018.03: John of Damascus
- CLAS 4019.03/RELS 4019.03: Philo Judaeus
- CLAS 4525X/Y.06/HIST 4525X/Y.06: The World of Herodotus
- HIST 4510.03: Topics in Middle Eastern and Islamic History
- HIST 4545.03: Scripture and Statecraft: History of Islamic Political Thought
- HIST 4550.03: Orientalism and Occidentalism
- HIST 4555.03: Arab Intellectuals and their Ideologies in the Modern Period
- RELS 4010.03/CLAS 4010.03: Islamic Philosophy: al-Ghazali

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

First year students are not admitted to courses beyond the 1000 level without the consent of the instructor. Courses at the 2000 level do not have prerequisites; in general, they are available only to students in their second year or above. Prerequisites for courses at the 3000 and 4000 levels are listed with each individual course below; in general, they are available only to students in their third year or above in the University.

Course Descriptions

RELS 0400X/Y Religious Studies Honours Examination

CREDIT HOURS: 0

Details available from the department.

PREREQUISITE: Students must be declared as BA Combined Honours Religious Studies, first subject Religious Studies

RELS 1001 Religions of the East

CREDIT HOURS: 3

This course serves as an introduction to the history, beliefs, and practices of Hinduism, Jainism, Sikhism, Buddhism, Daoism, Shinto, and Confucianism.

FORMAT: Lecture

EXCLUSIONS: RELS 1000.06

RELS 1002 Judaism, Christianity, and Islam: The Abrahamic Religions

CREDIT HOURS: 3

This course serves as a comparative and thematic introduction to the history, beliefs, and practices of Judaism, Christianity, and Islam.

FORMAT: Lecture

EXCLUSIONS: RELS 1000.06

RELS 1200X/Y Gods, Heroes, and Monsters: Ancient Mythology

CREDIT HOURS: 6

An introductory survey of the traditional religious narratives of ancient civilizations including Mesopotamia, Egypt, Israel, Greece, and Rome. Of special interest: the function of myth in shaping and expressing a culture's understanding of the divine, the institutions of human community (religion, the family, government), and the natural world; the interrelationships of the myths of those civilizations; the reception of those traditions in the origins of Christian and Islamic culture. The traditional narratives and their broader cultural contexts will be approached through study of primary sources including epic, tragic, and didactic poetry, hymnography, historiography, philosophy, the visual arts, and architecture. This course fulfills the first year writing requirement.

NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture

CROSS-LISTING: CLAS 1100X/Y.06

EXCLUSIONS: CLAS 2100X/Y.06

RELS 1600 Introductory Sanskrit I

CREDIT HOURS: 3

This course provides students with all the basic tools required for the study of Sanskrit, with a particular emphasis on basic Sanskrit grammar. Students will learn the Devanagari script, several common nominal forms and the basics of the verbal system, as well as develop a competency in basic reading and recitation.

CROSS-LISTING: CLAS 1600.03

RELS 2001 Judaism

CREDIT HOURS: 3

An introduction to Jewish beliefs, practices history, and writings from the Hellenistic period to the present. Topics to be covered include: the Torah, the Talmud, the development of the Rabbinic tradition, Jewish philosophy and mysticism.

FORMAT: Lecture| Seminar

RELS 2003 Islam

CREDIT HOURS: 3

An introduction to Muslim beliefs, practices, history and writings from the 7th century to the present. Topics to be covered include: the life and mission of Muhammad, the Qur'an, the Islamic legal, philosophical, and mystical tradition, the development of the Hadith, and the rise of political Islam in the twentieth century.

FORMAT: Lecture| Seminar

RELS 2011 Hinduism

CREDIT HOURS: 3

A basic introduction to Hinduism, including Vedic religion, classical Brahmanical religion, the caste system, bhakti (devotional) traditions and the rise of epic literature,

philosophical traditions and the Upanishads, the theistic traditions of the gods Vishnu and Shiva, and of the goddess Devi.
FORMAT: Lecture| Seminar

RELS 2012 Chinese and Japanese Religions

CREDIT HOURS: 3

An introduction to the cultural, religious, and philosophical traditions of China and Japan. Topics to be covered include: Classical Confucianism, Neo-Confucianism, Philosophical and Religious Daoism, Shinto, Chinese and Japanese Buddhism. The course will also examine the interaction, competition, and overlap between these traditions.

FORMAT: Lecture| Seminar

CROSS-LISTING: CHIN 2060.03

RELS 2013 Buddhism

CREDIT HOURS: 3

This course introduces the student to the Buddhist religious tradition, beginning with its origins and early developments in India and followed by a treatment of key themes of later world Buddhism such as meditation, devotion, monasticism, and ritual. The course thus exposes students to both Buddhism's early Indian doctrinal and institutional dimensions, and to aspects of Buddhism as practiced subsequently in China, Japan, and Tibet.

FORMAT: Lecture| Seminar

CROSS-LISTING: CHIN 2070.03

RELS 2025 Nature, the Human, Community and the Divine in the Pre-Modern West

CREDIT HOURS: 3

What is nature? What is the proper relationship between nature and the human being, political community, and divinity? This course will investigate ancient Greek, Roman, Jewish, Christian and Islamic answers, to this question through the study of literature, philosophy, art and architecture of the Pre-Modern West.

FORMAT: Lecture

CROSS-LISTING: CLAS 2025.03

RELS 2026 Paganism

CREDIT HOURS: 3

"Pagan" originated as a derogatory Christian designation for ignorant conservative rustics who kept to the preChristian religions. We shall look at those religions in their origins, nature, and development in antiquity, their continuations in the Middle Ages and modernity, and their persistence and revival in the contemporary world.

FORMAT: Lecture| Discussion

CROSS-LISTING: CLAS 2026.03

RELS 2027 Magic, Religion and Philosophy

CREDIT HOURS: 3

Reading the Greek Magical Papyri, as well as curse tablets and binding spells for ancient sources, we will explore the intersections of, and relations between, magic, religion, and philosophy in antiquity. The focus will be on both the practical and theoretical aspects of magic in the Greek and Roman worlds.

CROSS-LISTING: CLAS 2027.03

RELS 2052 A Cultural Introduction to the Arab World

CREDIT HOURS: 3

This course provides students with the basic tools for approaching the Arab world from a cultural perspective. The main topics are: 1) the guide marks of Arabic history; 2) a civilization "of the Word": the Arabic language, the Koran, the Tradition of the Prophet Mohammed, and the sciences related to the Islamic Law (shari'a); 3) the Arabic legacy in sciences, philosophy, literature, architecture, calligraphy, decoration, etc; 4) multi-cultural Al-Andalus and the ideal of 'convivencia'; 5) present nostalgia for the past; 6) tradition, modernity and effects of 'Globalization' in the contemporary Arabic "high culture" and "pop culture": in literature, music, arts, cinema, life style, education system, media, etc. Some lectures will be accompanied by audio-visual presentations including documentary films. The course does not require background in Arabic.

FORMAT: Lecture| Discussion

CROSS-LISTING: ARBC 2100.03, HIST 2500.03

RELS 2203 Philosophy and God

CREDIT HOURS: 3

Does God exist? Can God be known? Have a nature? Do evil? Beginning by occupying the same ground as religion, philosophy has asked these questions. Starting with Pythagoras, Empedocles, Plato, Aristotle, Epicurus, and continuing with their pagan, Jewish, Christian, and Islamic followers, we shall learn to state the answers of sages and mystics with historical accuracy and to judge their persuasive power.

FORMAT: Lecture| Discussion

CROSS-LISTING: CLAS 2024

RELS 2205 Philosophy of Religion

CREDIT HOURS: 3

Monotheistic religions (such as Judaism, Christianity, and Islam) assert the existence of a single God. This course addresses philosophical problems posed by traditional monotheism. Why care whether monotheism is true? Why care whether belief in God is rational? Does the rationality of belief in God depend on the evidence for and against God's existence? What is the best evidence for and against? What bearing does God have on human morality?

CROSS-LISTING: PHIL 2205.03

EXCLUSIONS: PHIL 2200X/Y.06

RELS 2208 Science and Medicine in Islamic Societies, 700 - 1500

CREDIT HOURS: 3

Through a combination of primary and secondary source readings, this course explores some of the major trends and debates within science and medicine in Islam from the seventh century till the early modern period. A special emphasis is placed on situating these developments within the larger political, social and institutional structure of Islamic societies.

FORMAT: Seminar

CROSS-LISTING: HSTC 2208.03

RESTRICTIONS: Restricted to students in their second year and above
EXCLUSIONS: HSTC 3610.03 and RELS 3610.03 for the 2010/11 academic year only

RELS 2209 The Roman World from Constantine to Theodosius (312-395)

CREDIT HOURS: 3

This course covers one of the most important periods of Roman history in which Christianity became the dominant religion in the empire and foreign peoples threatened the existence of the empire itself. The course is open to first-year students. There is no foreign language requirement.

FORMAT: Seminar

CROSS-LISTING: HIST 2017.03, CLAS 2209.03

EXCLUSIONS: CLAS 2210X/Y.06, HIST 2004X/Y.06

RELS 2220 Ancient Israel in Her Near Eastern Context

CREDIT HOURS: 3

Students will become familiar with the broad outlines of ancient Israelite history with specific attention to Israel's relationship to her immediate neighbours and the major imperial powers from the 2nd millennium BCE to first century CE. This will entail an initial survey of biblical texts in order to lay an adequate understanding of ancient Israel's self-conception, followed by a detailed survey of Israel's interaction with other nations, including early Mesopotamia, Egypt, Assyria, Babylon, Persia, the Seleucid empire, and Rome.

FORMAT: Lecture| Seminar

CROSS-LISTING: CLAS 2220.03/HIST 2520.03

RELS 2281 Christian Beginnings: The Orthodox and Oriental Churches

CREDIT HOURS: 3

This course traces the development of Christianity from its origin as a Jewish sect to its status as the dominant religion within the Byzantine Empire. The Christian religion as patronized by the Eastern Roman Emperors identified itself with the persecuted Christian sect of the first three centuries through the cult of the martyrs, articulated in the increasing importance of relic, icon, and pilgrimage to holy place. The seven ecumenical councils (325-787) progressively defined the Orthodox faith and resulted in the rise of Oriental churches, rejecting aspects of the definitions. Through to our end-date of 843 (when the icon was finally accepted) themes will be treated by attention to historical events (including the rise of Islam), art, architecture, liturgy, and various genres of literature (including hagiography).

FORMAT: Lecture

CROSS-LISTING: CLAS 2281.03

EXCLUSIONS: CLAS 3280X/Y.06

RELS 2362 Ancient Philosophy: From Aristotle to Plotinus

CREDIT HOURS: 3

This course covers the period in Ancient Philosophy from Aristotle to Plotinus: selected texts of Aristotle, Stoicism, Epicureanism, Pyrrhonian and Academic Scepticism, Middle Platonism, Neoplatonism.

FORMAT: Lecture

CROSS-LISTING: PHIL 2362.03, CLAS 2362.03

RELS 2365 Plato and the Case of Socrates: Philosophy on Trial

CREDIT HOURS: 3

Socrates (469-399 BCE) never wrote a single word, but posed such threat to Athens that a jury put him to death for the alleged ethical corruption and impiety of his thought. This course will explore the revolutionary life and thought of Socrates, and consider whether the jury's decision against him was justified.

FORMAT: Lecture

CROSS-LISTING: CLAS 2365, PHIL 2365

RELS 2420 Witchcraft in Early Modern Europe

CREDIT HOURS: 3

The period of European history from 1500 to 1800 saw the rise of modern science and philosophy. It was also a period in which thousands of witch trials and executions were carried out. This course will seek to understand how these seemingly contradictory developments could have occurred simultaneously. The course will examine changing conceptions of the witch and witchcraft in their historical, intellectual, cultural, religious, and political contexts. Questions that will be addressed include: How did the Renaissance interest in magic influence the Early Modern understanding of witchcraft? What impact did concerns about popular religion have on the witch trials? What constituted evidence that someone was a witch? What did Early Modern scientists think about witchcraft? The course will pay special attention to Early Modern notions of gender and sexuality and their influence on the witch hunts and witch trials.

FORMAT: Lecture| Tutorial

CROSS-LISTING: GWST 2320.03, EMSP 2320.03

RELS 2503 Medieval Islamic Civilization

CREDIT HOURS: 3

This course will introduce students to the Perso-Levantine world at the time of Muhammad's prophecy in the 7th century, and how the Arabian Peninsula was impacted by the creation and emergence of an Islamic society in Medina and Mecca. With the displacing of Byzantine control in the Holy Land and the collapse of the Sasanian Empire in Persia, the Arab-centric society of Mecca and Medina had become an empire of unprecedented size and ethnic complexity. The course will examine the respective Umayyad and "abbasid Dynasties", as well as the Ottomans, safavids, and Mughals. The central theme of this course will be an examination of the Islamic surrounding traditions and cultures in the Mediterranean, the Iranian Plateau, the Caucasus, the Steppe, India, and Southeast Asia. Another important theme will be the study of how various Islamic societies understood and resolved the age-old dynamic between tribal nomadism and hierarchical urbanism.

FORMAT: Lecture

CROSS-LISTING: HIST 2503.03

EXCLUSIONS: first year students and HIST 2501.03

RELS 2600 Introductory Sanskrit II

CREDIT HOURS: 3

This course develops further the basic grammar and vocabulary of Introductory Sanskrit I, emphasizing the basic past tense verbal systems, participial formations, and translation of simple Sanskrit texts.

PREREQUISITE: RELS 1600.03 or CLAS 1600.03

RELS 3000 Topics in Religious Studies

CREDIT HOURS: 3

This course treats a range of theoretical and methodological issues in the study of religion and serves to introduce students to key problems in scholarship on both Western and Eastern traditions. A variety of themes will be explored such as the relationship between philosophy and religion, the functions of doctrine and ritual, the nature of holiness and the nature of scripture. Beyond a basic understanding of these and other themes, however, the course will engage students with the various - often conflicting - ways in which these themes have been treated in Religious Studies scholarship. The course is a core requirement for all students majoring in Religious Studies.

FORMAT: Seminar

RESTRICTIONS: Students must be in their third year of study, or beyond

RELS 3001 Islam and the Others

CREDIT HOURS: 3

During its history, Islam has encountered numerous “others”: Christians, Jews, Zoroastrians, Hindus, and most recently the “West.” Muslim countries have had non-Muslim minorities, and conversely there have been Muslim minorities in non-Muslim countries. This course deals with Islamic perceptions of, and relations with, these “others” throughout history.

FORMAT: Lecture

RELS 3008 The Medieval Church

CREDIT HOURS: 3

This course does not attempt to provide a chronological survey of the development of the Western church, but is an advanced seminar dealing with topics which have no strict chronological limits. Subjects of study include monasticism, heresy, education and the universities, town and cathedral, lay-clerical conflict, and “popular” concepts of religion. Each year one or more topics are examined in detail, with the help of original documents in translation, and using recent periodical literature and/or monographs. Students prepare and present one or two well-researched papers, and class discussions are used to explore related materials and readings in greater depth. Some prior knowledge of medieval European history is essential. RECOMMENDED: HIST 1001.03

FORMAT: Lecture| Discussion

PREREQUISITE: HIST 2001.03 or HIST 2002.03 or HIST 2120.03

CROSS-LISTING: HIST 3002.03

EXCLUSIONS: Former HIST 3021.03 and 3022.03 students

RELS 3009 Christianity in the Lands of Islam

CREDIT HOURS: 3

After the Islamic conquest of the Middle East in the seventh century, approximately half of the world’s Christians found themselves under Islamic rule. The course tells the story of these Christians, their religious practices, their literatures, written in Greek, Arabic, Syriac, and Coptic, and their complex relations with the Muslims from the seventh century until today.

FORMAT: Lecture

PREREQUISITE: Students must be in their third year of study, or beyond

RELS 3012 Mystics of the Middle East

CREDIT HOURS: 3

The course is designed as an introduction to mystical dimensions of Islamic thought and practice in their historical development and in relation to Jewish and Christian mysticism in the Middle East. Topics to be covered include: the beginnings of the Sufi tradition in relation to other varieties of Middle Eastern mysticism, orthodoxy and heresy in early Sufism, stations and states on the Sufi path, Sufism and philosophy in interaction, Sufi orders, Sufi poetry as vehicle of mystical experience.

PREREQUISITE: RELS 1002.03 or RELS 2003.03 or permission of the instructor.

RELS 3018 Meetings Between Hellenism and the East to Philo the Jew

CREDIT HOURS: 3

We consider the constitution of Hellenism in relation to Eastern cultures as this emerges in Homer and Herodotus, the emergence of philosophy and the polis. With Alexander and the Hellenistic empires we look at the results and limits of military conquest especially in what is now Afghanistan. The course concludes with the constitution of Jewish religion and culture and its meeting with Hellenism with Philo Judaeus in Alexandria. In order to integrate the presentation of text and art the lectures are all in PowerPoint.

FORMAT: Lecture| Discussion

CROSS-LISTING: CLAS 3016.03, HIST 3016.03

RELS 3019 Meetings between Hellenism, Judaism, Christianity and Islam until the Renaissance

CREDIT HOURS: 3

We consider the constitution of Christianity in relation to Hellenism and Judaism during the first six centuries of the Christian era. After treating the constitution of Islam, we consider its meetings with Christianity and Judaism especially in Spain and Norman Sicily. We conclude with medieval Jewish, Christian and Islamic philosophical theologians. Integrating the presentation of text and art the lectures are all in PowerPoint.

FORMAT: Lecture| Discussion

CROSS-LISTING: CLAS 3017.03, HIST 3017.03

RELS 3100 Readings in Western Religions

CREDIT HOURS: 3

This course will focus on a single body of literature from the Jewish, Christian, or Islamic religious traditions such as the Gospels, Midrashic collections, or Tafsir. The course will examine the interpretation of the literature in its original context, in traditional commentaries, and in the modern academy.

FORMAT: Lecture| Seminar

PREREQUISITE: A 2000 level course or permission of instructor

EXCLUSIONS: RELS 3002.03

RELS 3101 The Self and the World in Indian Story

CREDIT HOURS: 3

Through a close reading of narrative and other forms of story literature, this course explores the twin themes, fundamental to all South Asian religions, of renouncing and embracing the world. Reading materials will draw from Hindu, Indian Buddhist, Jain and Sikh narrative literature, and will reflect a range of religious attitudes towards engaged worldly life within the family and society, and the pursuit of personal liberation through asceticism, renunciation and monasticism.

PREREQUISITE: A 2000 level RELS course or permission of the instructor

EXCLUSIONS: RELS 3002.03

RELS 3111 Vishnu and Krishna the Dark Lord: Popular Hindu Religion

CREDIT HOURS: 3

This course focuses on the god Vishnu and his various manifestations, particularly Krishna, the "Dark Lord." Through an examination of traditional Sanskrit sources and popular regional traditions across India, the course treats the theological, mythic and cultic expressions of one of Hinduism's most beloved figures.

FORMAT: Lecture| Tutorial

PREREQUISITE: RELS 2011 or permission of instructor

RELS 3112 Buddhism in India and Tibet

CREDIT HOURS: 3

This course engages the student with the Mahayana and Vajrayana traditions of Buddhism as lived and practiced initially in India and subsequently in the Tibetan cultural region. Emphasis will be placed on the philosophical schools called Madhyamaka and Yogacara, and particularly on the tantric ritual and meditation practices of Tibetan Buddhism.

FORMAT: Lecture| Tutorial

PREREQUISITE: RELS 2013, or permission of instructor

RELS 3113 The Mahabharata: India's Great Epic of Strife and Salvation

CREDIT HOURS: 3

Barring perhaps the Ramayana, the Mahabharata or "Great [Epic] of India" is the most widely known and retold narrative in all South Asian tradition, and is one of the most important literary works of human civilization. The Sanskrit Mahabharata is enormous, complex, endlessly fascinating, and has remained for 2000 years the principal venue for the Hindu tradition's reflection on the dark and elusive dimensions of war, violence, civil and divine law, human destiny and freedom. This course will lead students into the colourful world of India's great Sanskrit epic, provide them with the tools for mastering the narrative itself and the scholarly issues arising from its study, and provide them a taste of the Sanskrit language in which the poem is written.

FORMAT: Lecture| Tutorial

PREREQUISITE: RELS 2011 or RELS 3101 or RELS 3111 or permission of the instructor

ASSESSMENT METHOD: 3 Short Reading Tests on Mahabharata Content: 30%Take-Home Exam on Theory and Scholarship: 35%Sanskrit Component: 35%

RELS 3114 Special Topics in Eastern Religions

CREDIT HOURS: 3

This course treats a variety of special themes in Asian religious traditions. Topics may include ritual, scripture and its interpretation, gender and social expressions of faith, religion and modernity, and the relationship between political and religious authority in India, Southeast Asia, Tibet, China, Korea and Japan.

FORMAT: Lecture| Seminar

LECTURE HOURS PER WEEK: 3

RELS 3200 Science and Religion: Historical Perspectives

CREDIT HOURS: 3

Beginning with an overview of the history and methodology of the study of science and religion, encounters between science and religion are traced from the dawn of civilization to the end of the eighteenth century, with a special focus on the early modern period. From an examination of the biblical view of nature, ancient Babylonian astrology and divination and Plato's Timeaus, this course moves through a treatment of the centrality of theology to Medieval science on to natural theology and the "Watchmaker" Design Argument of the seventeenth and eighteenth centuries. Models of conflict, harmony and complementarity offered to characterize relations between science and religion are explored through case studies such as Galileo's controversy with the Church and instances where religious belief inspired scientists like Boyle and Newton. Claims that certain confessional traditions (notably Protestantism and its dissenting offshoots) facilitated the rise of modern science are also appraised. Science-religion relations are examined both from the standpoint of mainstream religion and with respect to religious heterodoxy, prophecy, alchemy, magic and witchcraft. This course employs examples from Islamic cultures in addition to the Judeo-Christian tradition. Special features include a focus on primary texts and guest lectures by scientists.

FORMAT: Lecture| Discussion

CROSS-LISTING: HSTC 3200.03, EMSP 3330.03, HIST 3075.03

RELS 3201 Science and Religion: Contemporary Perspectives

CREDIT HOURS: 3

RELS 3250 Atheism in Early Modern Europe

CREDIT HOURS: 3

Although atheism continues to be a source of controversy and debate, one of the most significant features of the modern world is the extent to which religious unbelief has become accepted as a morally and intellectually defensible position. This course will seek to understand the rise of modern atheism by examining its origins in the

Early Modern world.
FORMAT: Lecture| Tutorial
CROSS-LISTING: EMSP 3250.03

RELS 3282 Christian Beginnings: Catholicism

CREDIT HOURS: 3

This course will consider the formation of Catholicism (Latin Christianity) up to the 12th century in relation to the Greco-Roman context and the barbarian invasions. Moving from North Africa to Western Europe, and using a combination of text, music and artistic, architectural, and archaeological evidence, it will examine the formation of doctrine and discipline in relation to schisms, heresies and Hellenic philosophy, the origin and developments of western monasticism, the papacy, church and state relations, and the construction of liturgy. A theme will be the interplay between the centrifugal and centripetal.

FORMAT: Lecture| Discussion

EXCLUSIONS: CLAS 3280X/Y.06

RELS 3283 Gods in the Flesh: Iamblichus and Anselm

CREDIT HOURS: 3

This course presents two opposed arguments for the union of divinity with the sensuous and human ("incarnation") and looks at one instance of how they meet: Iamblichus, *On the Mysteries*, Anselm's *Why the God-man*, Bonaventure, *The Journey of the Mind into God*. We shall look at how these arguments bridge the pagan / Christian, philosophy/ theology/ religion, Orthodox / Catholic, and Greek / Latin divides.

FORMAT: Lecture| Discussion
CROSS-LISTING: CLAS 3283.03
ASSESSMENT METHOD: Two take home examinations worth 30% and 70% respectively.

RELS 3381 Medieval Philosophy from Augustine to Anselm

CREDIT HOURS: 3

A study of texts, primarily within the Latin tradition from Augustine to Anselm, but including selected writings of the Pseudo-Dionysius. Three works will normally be read in their entirety: Boethius, *Consolation of Philosophy*; Dionysius, *Mystical Theology*; Anselm, *Proslogion*. The main interest is the use and transformation of the philosophy of Plato, Aristotle, the Stoics and the Neoplatonists in this development.

FORMAT: Lecture
CROSS-LISTING: CLAS 3381, PHIL 2381

RELS 3382 Medieval Philosophy from Arabic and Jewish Thinkers to Aquinas

CREDIT HOURS: 3

A study of texts which reflect the transformation of the ancient philosophical tradition within the works of medieval Arabic and Jewish thinkers and of the Latin Christians to whom they mediated ancient philosophy. Selections from al-Farabi, Moses Maimonides, Averroes, and Aquinas, among others will be read. Bonaventure's *The Mind's Journey into God* will be read in its entirety.

CROSS-LISTING: CLAS 3382, PHIL 2382

RELS 3413 Augustine's Confessions

CREDIT HOURS: 3

A study of the 13 books of Augustine's Confessions.

FORMAT: Seminar
LECTURE HOURS PER WEEK: 3
CROSS-LISTING: CLAS 3413.03
EXCLUSIONS: CLAS 3410.06; CLAS 3411.03; CLAS 3412.03; RELS 3410.06; RELS 3411.03; RELS 3412.03

RELS 3432 St. Augustine's On the Trinity Part 2

CREDIT HOURS: 3

A study of Books 8-15 of Augustine's *De Trinitate*, in which he attempts to understand what has been shown in the first 7 books (the orthodox teaching about God through Scripture and a consideration of the categories of substance, relation and act) through the distinction of *scientia* and *sapientia*.

FORMAT: Seminar
CROSS-LISTING: CLAS 3432.03

RELS 3510 Sultans and Shahs: Polity and Religion in the Islamic Gunpowder Age (1500-1800)

CREDIT HOURS: 3

Until the devastating Mongol invasions of the 13th century, the principal centers of Islamic power, culture, and thought had been based in Cairo and Baghdad. This course will examine the post-Mongol Islamic world, and how politics and religion were irrevocably changed with the annihilation of the Sunni 'Abbasid caliphate. Religious heterodoxy, combined with the power vacuum left by Chingiz Khan and his descendants, allowed for the emergence of a number of unique Turkmen states in Western Asia, the most famous being the Ottoman Turks of Anatolia. By 1500, innovations in military technology and the paper-making industry allowed for the emergence of centralized and bureaucratically-sophisticated 'gunpowder' empires in western and south Asia. This course will discuss the three most significant of these: the Ottoman Turks (based in Istanbul), the Safavid Persians (based in Isfahan), and the Mughal Indians (based in Delhi). Areas of focus will include: issues of political legitimacy, use of military 'slave' corps, orthodox and popular religious movements, tensions between nomadic and sedentary segments of society, innovations in cultural expression (poetry, art, architecture), scientific and philosophical development, and the penetration and impact of the Portuguese, English, Dutch, and French 'world economies' into Asia and the Indian Ocean. This course will also examine different debates regarding the 'decline of the East', and introduce the theoretical implications of how the Islamic world is approached by contemporary scholarship.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Discussion
PREREQUISITE: HIST 2501.03 or 2502.03 or 2503.03

RELS 3850 The End of the World: The Apocalypse in German Thought

CREDIT HOURS: 3

The war, death and destruction that define European history in the 20th century can only begin to explain the obsession with the apocalypse in contemporary German thought. In this seminar we will study the secular appropriation of apocalyptic imagery from the Judeo-Christian tradition.

FORMAT: Lecture| Discussion

CROSS-LISTING: GERM 3850.03

RESTRICTIONS: Restricted to students in second year or above

RELS 3910X/Y Neoplatonism: Plato and Neoplatonism

CREDIT HOURS: 6

The philosophy of Plotinus and later thinkers considered as the resume of Greek Philosophy; in particular the role of Plato and other older philosophers in the formation of Neoplatonism is a principal interest.

CROSS-LISTING: CLAS 3910.06

RELS 4010 Islamic Philosophy: al-Ghazali

CREDIT HOURS: 3

Abu Hamid al-Ghazali (1058-1111) is one of the greatest Muslim thinkers of all time. This course is an introduction to his thought, focusing on al-Ghazali's "two-tier" approach to theology – exoteric theology for the masses and esoteric theology for the select few – and on his attitude to Islamic philosophy and Islamic mysticism (Sufism).

FORMAT: Seminar

CROSS-LISTING: CLAS 4010.03, CLAS 5817

RELS 4011 Jewish Philosophy: Maimonides

CREDIT HOURS: 3

Moses Maimonides (1135-1204) is one of the greatest Jewish thinkers of all time. This course is an introduction to his philosophical and legal writings, with special emphasis on his famous treatise *The Guide of the Perplexed*. Maimonides' stance on such issues as God's incorporeality, creation, and prophecy will be compared to that of other varieties of Judaism.

FORMAT: Lecture| Seminar

PREREQUISITE: Students must have completed 5 full credits of university study and RELS 2001.03 or RELS 3382.03/CLAS 3382.03/PHIL 2382.03, or permission of the instructor

CROSS-LISTING: CLAS 4011.03

RELS 4018 Christian Theology in Islamic Lands: John of Damascus

CREDIT HOURS: 3

John of Damascus (d. 749) is one of the greatest Christian theologians of the Patristic age. Though he wrote in Greek, he was probably a Christian Arab (his Arabic name is Mansur ibn Sarjun), who lived under Muslim rule and was employed as a public official in the Umayyad administration in Damascus. The course will focus on his theological works (especially his summa of Christian theology, entitled *On the Orthodox Faith*, and his three treatises in defence of the icons), their Christian sources, and their Islamic context.

FORMAT: Seminar

PREREQUISITE: At least one of: RELS 1002.03, RELS 2003.03, RELS 2281.03, RELS 2282.03, RELS 3009.03, foundation year program, or permission of the instructor

CROSS-LISTING: CLAS 4018.03

RELS 4019 Philo Judaeus: Philosophical Religion: Plato and Yoses

CREDIT HOURS: 3

Reconciling Jewish Scripture and Plato, Philo culminates Second Temple Jewish thought and founds the Christian treatment of Scripture. He is the most influential Jewish theologian and presents the High Priest as priest of the cosmos so he is crucial both to understand our past and to carry us into the future.

FORMAT: Seminar

PREREQUISITE: At least one course at the second year or above in CLAS or RELS

CROSS-LISTING: CLAS 4019.03

Introduction

The Russian Studies Department offers courses in Russian language, literature, culture and history. Since Russia plays a crucial role in today's world and makes important contributions in a wide variety of scientific, technical, and humanistic fields, knowledge of its linguistic and cultural backgrounds can prove advantageous in many areas of study. Recent radical shifts in the country have significantly widened opportunities for using Russian in business, law, science, and government.

In the language courses emphasis is placed on gaining a thorough grasp of Russian grammar combined with practical competence in speaking, listening, reading, and writing. Sections are small and intensive. Classroom work is supplemented by computerized audio-visual materials. Study of Russian literature begins with a general survey intended for first or second year students, followed by monograph, period, and genre courses. Literature courses are generally offered in both English and Russian in order to give as many students as possible from other disciplines the opportunity to become acquainted with this important part of Russian life.

Courses in Russian culture and civilization are intended to introduce students to art, architecture, music, religion, and other areas of Russian life which are necessary to understand the language and literature. Films, guest speakers, and evenings of Russian poetry are scheduled periodically. The Dalhousie Association of Russian Students organizes a variety of events throughout the year.

Major or honours students may, with the approval of the Russian Studies Department, take up to one semester (15 credit hours) of work at a university in Russia and receive credit at Dalhousie. Qualified students are urged to participate in the Intensive Russian Program, founded by Dalhousie, which enables Canadian students to study for a semester at St. Petersburg State University.

Degree Programs

Courses in the Russian Studies Department are open to students either (1) as electives in any degree program; (2) as constituents of a major or honours degree in Russian; or (3) with courses in another discipline forming part of a combined honours degree or double major; or (4) as a minor.

All Bachelor degree programs are governed by the general Requirements for Degrees set out in the University Calendar, in addition to the departmental requirements stated below. See Degree Requirements section.

2000 level

- RUSN 2002.03 and RUSN 2003.03 (or RUSN 2001X/Y.06)
- RUSN 2051.03 or RUSN 2052.03
- 21 other credit hours at or above the 2000 level and not including those listed below.

3000 level

- RUSN 3002.03 and RUSN 3003.03
- Six other credit hours at the 3000 level or higher

4000 level

- RUSN 4000X/Y.06

Other required courses

- Three credit hours in Russian History (normally RUSN 2022.03 or RUSN 2023.03). This requirement is included in the number of credit hours noted above.
- Honours Thesis

Russian Studies as second subject:

- A minimum of 30 credit hours with at least 12 of those credit hours being language courses on the 2000 level or above (normally RUSN 2002.03/RUSN 2003.03/RUSN 3002.03/RUSN 3003.03, or RUSN 4000X/Y.06)

BA (120 credit hour) Major in Russian Studies

Departmental requirements

1000 level

- RUSN 1000X/Y.06
- RUSN 1020.03
- RUSN 1070.03

2000 level

- RUSN 2002.03 and RUSN 2003.03 (or RUSN 2001X/Y.06)
- RUSN 2051.03 and RUSN 2052.03
- 12 other credit hours at or above the 2000 level not including those listed below

3000 level

- RUSN 3002.03 and RUSN 3003.03
- 12 other credit hours at or above the 3000 level

4000 level

- RUSN 4000X/Y.06

Other required courses

- Six credit hours in Russian History (normally RUSN 2022.03 and RUSN 2023.03).

BA (120 credit hour) Double Major in Russian Studies

Russian Studies as first major:

1000 level

- RUSN 1000X/Y.06
- RUSN 1020.03
- RUSN 1070.03

2000 level

- RUSN 2002.03 and RUSN 2003.03 (or RUSN 2001X/Y.06)
- RUSN 2051.03 or RUSN 2052.03

- Nine other credit hours at or above the 2000 level not including those listed below

3000 level

- RUSN 3002.03
- RUSN 3003.03
- Six other credit hours at or above the 3000 level

4000 level

- RUSN 4000X/Y.06

Other required courses

- Three credit hours in Russian History (normally RUSN 2022.03 or RUSN 2023.03).

Russian Studies as second major:

- A minimum of 30 credit hours with at least 12 of those credit hours being language courses on the 2000 level or above (normally RUSN 2002.03/RUSN 2003.03/RUSN 3002.03/RUSN 3003.03 or RUSN 4000X/Y.06).
- At least 12 of the 30 credit hours must be at the 3000 level or above.

BA (90 credit hour) Minor in Russian Studies

See Minor in Russian Studies section.

Russian Program Abroad

Director

Leving, Y. (902 494-3473)

Russian Program Abroad in Saint Petersburg

Introduction

The Russian Program Abroad (the oldest of its kind in Canada), is an inter-disciplinary course of instruction which allows students to undertake intensive study of the Russian language both here and in Russia at St. Petersburg University during winter or summer semesters. This program is offered at the third-year level of language study for students who have successfully (mark of "B") completed one year of Russian or its equivalent. Students at Dalhousie must enrol in a third-year fall preparatory session prior to going to Russia.

If students from elsewhere wish to join the third-year program only in Russia, they may do so after successful completion of application requirements.

Courses at Dalhousie

(September to December, January to April)

Students are required to take:

- RUSN 3002.03: Grammar;
- RUSN 3029.03: Conversation;
- RUSN 3090.03: Russian Society Today;
- two additional A-term courses in Russian history and Russian literature, language.

Courses at St. Petersburg State University

(January to May, June to July)

- RUSN 3011.03: Grammar I;
- RUSN 3012.03: Grammar II;
- RUSN 3031.03: Conversation;
- RUSN 3032.03: Translation;
- RUSN 3035.03: Literature - Reading and Analysis

Russian Program in Tallinn

This program allows students to undertake intensive study of the Russian language during a summer term at the Tallinn University of Estonia.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

RUSN 1000X/Y Elementary Russian

CREDIT HOURS: 6

For students who have little or no previous knowledge of the Russian language. Equal emphasis is placed on developing oral, listening, and reading skills with a sound grammatical basis. May be offered in a traditional classroom setting or online.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

EXCLUSIONS: RUSN 1002.03, RUSN 1003.03

RUSN 1002 Elementary Russian I

CREDIT HOURS: 3

For students who have little or no previous knowledge of the Russian language. Equal emphasis is placed on developing oral, listening, and reading skills with a sound grammatical basis. May be offered in a traditional classroom setting or online.

EXCLUSIONS: RUSN 1000X/Y.06

RUSN 1003 Elementary Russian II

CREDIT HOURS: 3

For students who have little or no previous knowledge of the Russian language. Equal emphasis is placed on developing oral, listening, and reading skills with a sound grammatical basis. May be offered in a traditional classroom setting or online.

FORMAT: Lecture

PREREQUISITE: RUSN 1002.03

EXCLUSIONS: RUSN 1000X/Y.06

RUSN 1020 Russian Culture and Civilization under the Tsars

CREDIT HOURS: 3

Conducted in English. The course traces developments in the Russian arts: painting, sculpture, theatre and music.

RUSN 1070 Modern Russian Culture and Civilization

CREDIT HOURS: 3

Conducted in English. The cultural history of 20th century Russia.

RUSN 2001X/Y Intensive Second Year Russian

CREDIT HOURS: 6

The material covered in RUSN 2002 and RUSN 2003 presented in a single semester.

PREREQUISITE: C+ or higher in RUSN 1000X/Y.06 or permission of instructor

EXCLUSIONS: RUSN 2002.03, 2003.03

RUSN 2002 Intermediate Russian I

CREDIT HOURS: 3

A continuation of RUSN 1000X/Y.06. Oral and reading skills and a further knowledge of grammar are developed through study and discussion of Russian texts.

PREREQUISITE: C+ in Russian 1000X/Y.06 or permission of instructor

EXCLUSIONS: RUSN 2001X/Y.06

RUSN 2003 Intermediate Russian II

CREDIT HOURS: 3

A continuation of RUSN 2002.03.

PREREQUISITE: RUSN 2002.03 or equivalent

EXCLUSIONS: RUSN 2001X/Y.06

RUSN 2021X/Y Imperial and Soviet Russia

CREDIT HOURS: 6

See course description for HIST 2020X/Y.06 in the History section of this calendar.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

RUSN 2022 Imperial Russia

CREDIT HOURS: 3

Equivalent to the first half of HIST 2020.06. Chronologically covers the imperial period of Russian history, from Peter the Great to the Revolution of 1917.

FORMAT: Lecture| Discussion

EXCLUSIONS: May not be taken by students who have completed HIST 2020X/Y.06, RUSN 2021X/Y.06

RUSN 2023 Soviet Russia

CREDIT HOURS: 3

Equivalent to the second half of HIST 2020X/Y.06. Chronologically covers the Soviet period of Russian history, from 1917 to Gorbachev.

FORMAT: Lecture| Discussion

EXCLUSIONS: May not be taken by students who have completed HIST 2020.06 or RUSN 2021X/Y.06

RUSN 2029 Conversation

CREDIT HOURS: 3

Development of conversation skills and vocabulary building

PREREQUISITE: Student must be enrolled in the 2nd year grammar course or must have permission of instructor.

RUSN 2034 History of Russian Natural Science

CREDIT HOURS: 3

Conducted in English. An overview of the history of Russian natural science from the foundation of the Russian Academy of Sciences during the reign of Peter the Great to modern times.

FORMAT: Lecture| Discussion

RUSN 2036 Russian Film I

CREDIT HOURS: 3

This course surveys Russian film from the Silent Era to "Thaw" (1900-1960s). Its goal is to develop students' knowledge of cinema in its historical and cultural context through critical watching, reading, thinking, and writing. The course will concentrate on the development of main genres and styles in Russian and official Soviet cinema, major directors and styles. Full versions of films will be screened each Monday night. Later in the week they will be followed by a lecture, discussion, and viewing additional short clips.

FORMAT: Lecture| Discussion

CROSS-LISTING: THEA 2336.03

RUSN 2037 Russian Film II

CREDIT HOURS: 3

This course will provide an overview of the most significant trends and periods in the development of Russian cinema since the 1960s until the latest blockbusters. The course will concentrate on the development of main genres and styles, major directors and productions, issues of race, gender, war and violence in Soviet, post-Soviet and new Russian cinema.

FORMAT: Lecture| Discussion

CROSS-LISTING: THEA 2337

RUSN 2043 How iRead the Eye-Books: Film Adaptations of World Literature I

CREDIT HOURS: 3

In this course, we will be reading and watching the world adaptations of international literary classics and popular contemporary works. From analyzing the art of comic

strips and Superman sagas to e-books designed for iPads and Android mobile devices, during the semester students will learn to appreciate both the text and its visual renderings using theoretical frameworks of adaptation and textual fidelity, as well as will have an opportunity to practice their skills in the art of film-making and constructing an iBook.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

CROSS-LISTING: THEA 2043.03, ENGL 2043.03

EXCLUSIONS: RUSN 2045.06, ENGL 2045.06, THEA 2347.06

RUSN 2044 How iRead the Eye-Books: Film Adaptations of World Literature II

CREDIT HOURS: 3

In this course, we will be reading and watching the world adaptations of international literary classics and popular contemporary works. From analyzing the art of comic strips and Superman sagas to e-books designed for iPads and Android mobile devices, during the semester students will learn to appreciate both the text and its visual renderings using theoretical frameworks of adaptation and textual fidelity, as well as will have an opportunity to practice their skills in the art of film-making and constructing an iBook.

FORMAT: Lecture| Discussion

CROSS-LISTING: THEA 2044.03, ENGL 2044.03

EXCLUSIONS: RUSN 2045X, THEA 2347X, ENGL 2045X

RUSN 2045X/Y How iRead the Eye-Books: Film Adaptations of World Literature

CREDIT HOURS: 6

In this course we will be reading and watching the world adaptations of international literary classics and popular contemporary works. From analyzing the art of comic strips and Superman sagas to e-books designed for iPads and Android mobile devices, during the semester students will learn to appreciate both the text and its visual renderings using theoretical frameworks of adaptation and textual fidelity, as well as will have an opportunity to practice their skills in the art of film-making and constructing an iBook.

PREREQUISITE: None

CROSS-LISTING: ENGL 2045X/Y.06, THEA 2347X/Y.06

RUSN 2046 East European Cinema: War, Love, and Revolutions

CREDIT HOURS: 3

This course brings post-Berlin Wall European film into the fray of current debates on cultural identity, transnational cinema, and postcolonialism. Despite the state control, the filmmakers of communist Europe were often more bold, honest and provocative than their profit-driven Hollywood counterparts. By drawing on political, cultural, and philosophical discourses, the course will offer pointed analyses of most significant East European films that touch upon issues of ethnicity, gender, and overcoming censorship.

FORMAT: Lecture| Discussion

CROSS-LISTING: THEA 2346.03

RUSN 2051 Survey of Russian Literature

CREDIT HOURS: 3

Conducted in English with section in Russian for majors. Required for majors and honours candidates. An overview of Russian literature from its beginnings through Tolstoy.

FORMAT: Lecture| Discussion

EXCLUSIONS: RUSN 2050.06

RUSN 2052 Survey of Russian Literature

CREDIT HOURS: 3

Conducted in English with section in Russian for majors. Required for majors and honours candidates. An overview of Russian literature from Chekhov to the present.

FORMAT: Lecture| Discussion

EXCLUSIONS: RUSN 2050.06

RUSN 2061 Russian Modernism

CREDIT HOURS: 3

Conducted in English. A study of trends in literature and the arts at the turn of the century. Known as "The Silver Age", this is one of the most innovative and dynamic periods in Russian culture.

FORMAT: Lecture| Discussion

EXCLUSIONS: RUSN 2340.03

RUSN 2062 Literature of Revolution - The 1920s in Russian Literature

CREDIT HOURS: 3

Conducted in English. A study of experiment and submission during one of the most exciting, diverse, and frustrating periods in Russian letters. "Socialist realism" was not yet official doctrine; innovation in literature was tolerated. Writers openly pondered the role of the individual and culture in the new collective society.

FORMAT: Lecture| Discussion

EXCLUSIONS: RUSN 3250.03

RUSN 2070 Russian Literature and Culture since Stalin's Death

CREDIT HOURS: 3

Conducted in English. The literary and cultural history of Russia after Stalin's death in 1953. Among the major issues considered are the significance of Stalin's death, the "Thaw" and de-Stalinization, samizdat and literature since glasnost.

FORMAT: Lecture| Discussion

RUSN 2081 Contemporary Russian Culture - The Seven Deadly Sins

CREDIT HOURS: 3

Conducted in English. The fall of the Soviet Union has allowed a deluge of once 'sinful' excesses, all of which define Russia's accelerated processes of multiculturalism. This course investigates such 'sins' in the following order: pride, covetousness, lust, anger, gluttony, envy and sloth.

RUSN 2151 Introduction to Russian Folklore

CREDIT HOURS: 3

Conducted in English. A broad survey of traditional Russian popular beliefs and practices: proverbs, riddles, and counting rhymes; the rites and rituals of the Russian agricultural year; fairy tales and epic poems (byline); reconstruction of the Slavic pantheon and its evolution.

RUSN 2191 Survey of Russian Theatre

CREDIT HOURS: 3

Conducted in English with a section in Russian for majors. An overview of Russian writing for the theatre, with emphasis on the nineteenth and twentieth centuries.

FORMAT: Lecture| Discussion

RUSN 2270 The Russian “Heroine”

CREDIT HOURS: 3

Conducted in English. The strong spiritual and moral force which Russian women have exerted on their society is richly reflected in literature. The course focuses on the portrayal of several literary heroines and discusses their impact on both the literary imagination and society.

FORMAT: Lecture| Discussion

RUSN 2500 Tolstoy

CREDIT HOURS: 3

Conducted in English. An introduction to the work of this enigmatic spiritual giant of Russian literature. Reading includes War and Peace, Anna Karenina, and Resurrection.

FORMAT: Lecture| Discussion

RUSN 2550 Russian and Eastern European Science Fiction

CREDIT HOURS: 3

This course will provide an introduction to science fiction in the Russian and Eastern European context. Emphasis on the origins from fantastic elements of Russian literature, utopian, socialist, and dystopian impulses, as well as the post-Soviet experience as apocalypse. Authors will include: Gogol, Zamyatin, Capek, Bulgakov, the Strugatskys, Lem, Pelevin.

FORMAT: Lecture| Discussion

RUSN 2750 Dostoevsky and the Russian Idea

CREDIT HOURS: 3

Conducted in English. Dostoevsky's novels are of the highest importance in understanding the fate of Russia and the thoughts of other great Russian authors and thinkers. *Crime and Punishment* and *The Brothers Karamazov* are taken as the basis for discussion. The works of I. Turgenev and Lev Tolstoy are discussed together with the ideas of such great Russian philosophers as V. Solovyev and N. Berdyaev.

FORMAT: Lecture| Discussion

RUSN 2760 Dostoevsky and Western Literature

CREDIT HOURS: 3

Conducted in English. With all his love for Russia, Dostoevsky treasured the West and its literature. It is impossible to understand Dostoevsky and his main novels, including *The Idiot* and *The Devils* without Hamlet by Shakespeare, Don Quixote by Cervantes, Faust by Goethe, some plays by F. Schiller, etc. The course traces the influence of Western ideas on Dostoevsky and his influence on such Western thinkers as Nietzsche and Freud.

FORMAT: Lecture| Discussion

RUSN 3002 Advanced Russian I

CREDIT HOURS: 3

Conducted in Russian. Following a thorough review, this course concentrates on expanding all aspects of the student's knowledge of Russian grammar. Texts are read extensively and intensively. Discussion and compositions are based on the assigned readings.

FORMAT: Lecture| Discussion

PREREQUISITE: RUSN 2001.03 or (2002.03 and 2003.03) or equivalent

EXCLUSIONS: RUSN 3000X/Y.06

RUSN 3003 Advanced Russian II

CREDIT HOURS: 3

A continuation of RUSN 3002.03.

FORMAT: Lecture| Discussion

PREREQUISITE: RUSN 3002.03 or equivalent

EXCLUSIONS: RUSN 3000X/Y.06

RUSN 3011 Grammar I

CREDIT HOURS: 3

This course is offered in Russian only as part of the Intensive Russian Program in Russia. Intensive study of the finer points of Russian grammar. Topics include verbs of motion, aspect, impersonal constructions, government and agreement, and other themes.

EXCLUSIONS: RUSN 3010.06

RUSN 3012 Grammar II

CREDIT HOURS: 3

This course is offered in Russian only as part of the Intensive Russian Program in Russia. Continuation of RUSN 3011.03

EXCLUSIONS: RUSN 3010.06

RUSN 3029 Conversation

CREDIT HOURS: 3

Development of conversational skills and vocabulary building.

PREREQUISITE: Student must be enrolled in the 3rd year grammar course or must have permission of instructor.

EXCLUSIONS: RUSN 3010.06

RUSN 3031 Conversation

CREDIT HOURS: 3

This course is offered in Russian only as part of the Intensive Russian Program in Russia. Systematic development of conversational ability on everyday themes: transport, city services, theatre, sport, shopping, the library, the educational system, the structure of the government, etc.

RUSN 3032 Translation

CREDIT HOURS: 3

This course is offered in Russian only as part of the Intensive Russian Program in Russia. Work on translation of literary, business and journalistic texts.

RUSN 3035 Literature: Reading and Analysis

CREDIT HOURS: 3

This course is offered in Russian only as part of the Intensive Russian Program in Russia. Reading and analysis of literary texts.

RUSN 3060 Special Topics

CREDIT HOURS: 3

The subject of this course -- generally devoted to contemporary Russia and the former Soviet Union -- varies from year to year, depending on shifts in current events in the region or the presence of visiting scholars with particular areas of expertise. Since the topics covered in this course may differ from year to year, students should seek further information from the Department of Russian Studies.

FORMAT: Lecture| Discussion

LECTURE HOURS PER WEEK: 3

RUSN 3090 Russian Society Today

CREDIT HOURS: 3

Basic institutions of Russian society are considered in their historical context, with special attention to the role of official culture and literature, the workings of the economy, and social stratification. RECOMMENDED: RUSN 1000.06, 2nd year Russian (This course is part of the Fall Intensive Russian Program.)

FORMAT: Seminar

CROSS-LISTING: HIST 3090.03/5090.03

RUSN 3091 Russian Intellectual History

CREDIT HOURS: 3

This course will examine intellectual developments in modern Russia, from Peter the Great to the late 20th century. Among the possible topics we will cover are: Russian thought and the West, the Russian intelligentsia and its relationship with the people and the state, Russian Orientalism, the roles of literature, arts, and media in Russian politics and society, the nature of dissent and revolutionary movements, as well as the functions of historical memory in Russian thought and culture.

Throughout the course we will approach Russia as a multinational country that developed in constant and close interaction with the outside world.

FORMAT: Lecture| Discussion

PREREQUISITE: Some Russian history required; Recommended are HIST 2021.03 or HIST 2022.03.

CROSS-LISTING: HIST 3030.03

RUSN 3092 Russian Topics

CREDIT HOURS: 3

Topics to be studied and researched will vary from year to year. They may include the sources of Bolshevism/Leninism, the doctrine of peaceful coexistence, the position of national minorities, the role of literature (official and samizdat) and the press, the Cult of Personality, Khrushchev's "Thaw", Brezhnev, Gorbachev, and Yeltsin. RECOMMENDED: HIST 2020.06 or RUSN 2022.03/2023.03

FORMAT: Seminar

PREREQUISITE: One 2000-level course in history

CROSS-LISTING: HIST 3092.03

RUSN 3096 The History of Ideas in Russia: From Official Nationality to Solzhenitsyn's Neo-Slavophilism

CREDIT HOURS: 3

This course examines some of the main currents in Russian intellectual history from the middle of the nineteenth century through the 1990s. Topics include classical Slavophilism and early Westernism, Populism and Nihilism, Anarchism, Marxism, Leninism, Socialist Realism, anti-Stalinism, Glasnost, neo-Westernism (Sakharov), and neo-Slavophilism (Solzhenitsyn). RECOMMENDED: HIST 2020.03 or RUSN 2022.03/2023.03

FORMAT: Lecture| Discussion

CROSS-LISTING: HIST 3096.03

RUSN 3099 Solzhenitsyn Seminar

CREDIT HOURS: 3

Alexander I. Solzhenitsyn is one of the most controversial and influential Russian writers of the twentieth century. His life spanned the entire Soviet period and even now his creative oeuvre continues unabated. Solzhenitsyn's books are an unique blend of literary imagination, philosophical reflections, memoirs and witness-bearing, historical conscience and chronicle. This seminar will study several of his more important historical works; these may include *One Day in the Life of Ivan Denisovich*, *Cancer Ward*, *First Circle*, *Lenin in Zurich*, *Gulag Archipelago*, *August 1914* and subsequent volumes of the cycle.

FORMAT: Seminar

CROSS-LISTING: HIST 3099.03

RUSN 3102 Black Identity in Pushkin (Russian)

CREDIT HOURS: 3

Conducted in Russian. A close study of the poetry and prose of the father of Russian literature, Aleksandr Sergeevich Pushkin, needs to be grounded in the centrality of his Black Identity for his life and *oeuvre*. Pushkin's unfinished work *Arap Petra Velikogo* serves as the window illuminating his artistic genius and struggle for a mode

of expression for his own identity. The silences which shroud Pushkin's blackness are probed to reveal their ideological, historical, legal and human significance, which are then critically assessed. The major narrative and lyric poems, *Eugene Onegin*, the *Little Tragedies*, *Boris Godunov*, the *Tales of Belkin*, the *Queen of Spades*, as well as Pushkin's letters and critical works are revisited in this new light. Students will explore such themes as marginalization, liberty, prescience, aesthetic innovation, and the poet as political symbol and creator of a new literary language. Restoring Pushkin's identity to its proper place is a condition -- *sine qua non*-- for understanding the true meaning of his work for modern literature and its ongoing influence on world culture.

FORMAT: Lecture| Discussion

PREREQUISITE: RUSN 2003.03

EXCLUSIONS: RUSN 2100.03

RUSN 3103 Black Identity in Pushkin (English)

CREDIT HOURS: 3

Conducted in English. A close study of the poetry and prose of the father of Russian literature, Aleksandr Sergeevich Pushkin, needs to be grounded in the centrality of his Black Identity for his life and *oeuvre*. Pushkin's unfinished work *Arap Petra Velikogo* serves as the window illuminating his artistic genius and struggle for a mode of expression for his own identity. The silences which shroud Pushkin's blackness are probed to reveal their ideological, historical, legal and human significance, which are then critically assessed. The major narrative and lyric poems, *Eugene Onegin*, the *Little Tragedies*, *Boris Godunov*, the *Tales of Belkin*, the *Queen of Spades*, as well as Pushkin's letters and critical works are revisited in this new light. Students will explore such themes as marginalization, liberty, prescience, aesthetic innovation, and the poet as political symbol and creator of a new literary language. Restoring Pushkin's identity to its proper place is a condition -- *sine qua non* -- for understanding the true meaning of his work for modern literature and its ongoing influence on world culture.

FORMAT: Seminar

RUSN 3121 19th Century Russian Prose and Poetry

CREDIT HOURS: 3

Conducted in Russian. Students read, translate, and critically interpret representative works of the nineteenth century. Original texts are supplied with vocabularies and grammatical notes.

FORMAT: Lecture| Discussion

PREREQUISITE: Two years of Russian

EXCLUSIONS: RUSN 3120.03

RUSN 3122 20th Century Russian Prose and Poetry

CREDIT HOURS: 3

Conducted in Russian. Students read, translate, and critically interpret representative works of the twentieth century. Original texts are supplied with vocabularies and grammatical notes.

FORMAT: Lecture| Discussion

PREREQUISITE: Two years of Russian

EXCLUSIONS: RUSN 3120.03

RUSN 3330 Masterpieces of Russian Short Fiction

CREDIT HOURS: 3

In-depth analysis of selected masterpieces of Russian nineteenth and twentieth century short fiction, including works by Pushkin, Lermontov, Gogol, Tolstoy, Sologub, Chekhov, Bunin, Nabokov, Krzhizhanovskiy, Bulgakov, Babel, Zoshchenko, Kharmis, Eppel, Dovlatov, Pelevin, and Sorokin.

FORMAT: Lecture| Discussion

RUSN 3520 Chekhov and Turgenev

CREDIT HOURS: 3

Conducted in English. Close analysis and discussion of the major works of Turgenev, sensitive portrayal of socio-political and psychological issues of the second half of the nineteenth century in Russia, and Chekhov, unequalled short-story writer and radical innovator in modern theatre.

FORMAT: Lecture| Discussion

RUSN 3800 Gogol and His Tradition

CREDIT HOURS: 3

Author of "Overcoat," "Nose," *Taras Bulba*, *Dead Souls*, Gogol has been proclaimed "a pathological liar and honest anatomist of the soul, jejune jokester and tragic poet, realist and fantasist". An in-depth study of this major writer.

FORMAT: Lecture| Discussion

RUSN 3820 Nabokov

CREDIT HOURS: 3

A close study of selected works by consummate twentieth century prose stylist Vladimir Nabokov -- novelist, poet, critic and translator, author of the notorious *Lolita*.

FORMAT: Lecture| Discussion

CROSS-LISTING: ENGL 3820.03

RUSN 4000X/Y The Structure of Contemporary Standard Russian

CREDIT HOURS: 6

This course is offered in Russian. Required for honours candidates. Systematic study of the structure of Russian: analysis of special problems in phonology, morphology, syntax, and stylistics. Tailored to the individual needs of the student, with emphasis on practical applications of linguistic insights.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Discussion

PREREQUISITE: RUSN 3002.03 and 3003.03 or permission of the instructor

RUSN 4090 Soviet History Seminar

CREDIT HOURS: 3

This is an advanced seminar on the history of Soviet Russia from 1917 to 1991. We will explore the origins, mechanisms, costs, and outcome of perhaps the most ambitious and tragic historic experiment at creating a modern yet equitable society in a country far from conducive to such an undertaking.

FORMAT: Lecture

CROSS-LISTING: HIST 4090.03
ASSESSMENT METHOD: 4090.03

RUSN 4100 Artistic Petersburg

CREDIT HOURS: 3

St. Petersburg is one of Russia's most vibrant cities, credited as its key link to the West and modernism. It embodies political, social, and artistic history of Russia of the past three hundred years and gave birth to Russia's greatest writers, painters, and musicians. In this course we will be reading works by Dostoevsky, Bely, Blok, Akhmatova and Nabokov while visiting the homes where they were born and raised; we will be studying particular paintings by visiting museums of fine arts and getting first-hand knowledge about Russia's musical scene by attending the world-class operas and stage adaptations. Whenever possible we will arrange the "behind the scene" meetings with Russian artists to foster authentic dialogue and experience Russian culture as it is possible only in St. Petersburg.

FORMAT: Lecture| Discussion

LECTURE HOURS PER WEEK: 3

PREREQUISITE: At least 1 year of Russian language studies

RUSN 4302 Russian Poetry

CREDIT HOURS: 3

Conducted in Russian. A combination of an introduction to the theory of poetry with close analysis of masterpieces of nineteenth and twentieth century Russian poetry chosen to fit the interests of the individual student.

FORMAT: Lecture| Discussion

PREREQUISITE: Permission of the instructor

RUSN 4950 Special Topics

CREDIT HOURS: 3

Conducted in Russian. Offers the student an opportunity to work with an advisor in researching subjects which are not regularly taught in the Department. Recent topics have included Old Church Slavonic, the historical phonology and morphology of Russian, and Russian symbolism. Students who wish to register for a specific program should consult the chair of the Department.

NOTE: Course Details listed here also apply to RUSN 4960/RUSN 4990.

NOTES: Students taking 4990 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

Introduction

Social Anthropology and Sociology are related and overlapping disciplines. Although in some universities they are found in separate departments, this Department and many of its courses blur the distinction between them and emphasize the areas of overlap. The Department is committed to a program which stresses the areas of convergence between the two disciplines.

Sociology and Social Anthropology provide an academic training which is rigorous and cosmopolitan. Students develop research skills along with a general intellectual preparation which stands them in good stead for graduate work in the disciplines or for a broad range of professions such as law, medicine, social work or journalism.

Sociology

From its inception in the nineteenth century, sociology has been concerned with understanding the growth and evolution of modern societies. Classical sociologists attempted to identify universal laws of human behaviour which would help them to understand the nature of social change and of social order, the role of the individual vis-a-vis the broader society, and the production and reproduction of social inequalities. While contemporary sociologists have abandoned the search for universal laws, the discipline continues to study the social context of human action, and has contributed substantially to knowledge and understanding of our own world.

Social Anthropology

Anthropology is composed of four subfields, social/cultural, archaeological, biological, and linguistic. The strength of our program is the minor upon Social Anthropology, the area most complementary to Sociology. Social Anthropology, with its emphases on global context, continuity and change, questions of human and group identity, and views on human nature, may focus on local cultures or entire civilizations. For example, some Social Anthropologists study historical and contemporary conditions of indigenous groups, tribal or peasant societies, others conduct their research within industrial societies. Our program provides the opportunity for students to become conversant with the comparative cultural implications of modern societies such as different forms of family and kinship practices, changing gender relations, the organization of work, law and social injustice, medicine and health, religion, and political economy. How do people in different places and times react, resist, and adapt to change?

Degree Programs

The Department's BA degree program is offered as a 90 credit hour minor or a 120 credit hour major in Sociology and Social Anthropology. The BA honours degree is offered through more specialized programs of study in Sociology or in Social Anthropology. Dalhousie graduates wishing to upgrade from a 90 credit hour minor may complete an additional 30 credit hours to be awarded the Major Conversion or the Honours Conversion. An honours degree is normally the required preparation for graduate study.

All Bachelors degree programs are governed by the general Requirements for Degrees set out in the University Calendar, in addition to the departmental requirements stated below. See Degree Requirements for complete details.

NOTE:

1. **No more than six credit hours may be obtained for introductory courses from SOSA 1000.06, SOSA 1050.06, SOSA 1100.06, SOSA 1200.06, or both SOSA 1002.03 and SOSA 1003.03.**
2. For purposes of gaining entry to 2000 and 3000 level SOSA courses, King's Foundation Year satisfies the introductory course prerequisite.
3. If they so elect, King's Foundation Year students may also obtain credit for one introductory course from SOSA 1000.06, SOSA 1050.06, SOSA 1100.06, or SOSA 1200.06 or both SOSA 1002.03 and SOSA 1003.03.
4. Students may obtain credit for both SOSA 2001.06 and SOSA 2002.06, and those proposing to apply to the honours program are particularly encouraged to acquire a foundation in both disciplines.

Whelan, E., BA (Winnipeg), MA (Queen's), PhD (Carleton)
Yoshida, Y., BA (Tsuda College), MA, PhD (McGill)

Assistant Professors

Eramian, L., BA (Hons), MA (Western), PhD (York)
Foster, K., BA (Hons) (Dalhousie), MA (Waterloo), PhD (Carleton)
Gambold, L., BA (Illinois), MA, PhD (UCLA)
Guy, J.-S., BA, MA (Laval), PhD (UQAM)
Hetherington, K., BA (Concordia), MA (Dalhousie), PhD California (Davis)
Martin, F., BA (Queen's), MA, PhD (Melbourne)

Adjunct Professors

Davis, A., BA (SMU), MA (Manitoba), PhD (Toronto)
Gamberg, H. V., BA (Brandeis), MA, PhD (Princeton)
Hethrington, K., BA (Concordia), MA (Dalhousie)
Kearney, J., BSc (Acadia), MES (Dalhousie), PhD (Laval)
Khasnabish, A., BA, MA, PhD (McMaster)
Looker, D., BA (Carleton), MA (Waterloo), PhD (McMaster)
Phyne, J., BA (Memorial), MA, PhD (McMaster)
Thompson, S., BA, BEd, MA (Dalhousie), PhD (Cambridge)

Concentrated Honours BA Program

The Department's honours programs are designed for students with an interest in, and demonstrated aptitude for, advanced study in either Sociology or Social Anthropology. Admission to these programs is based solely on academic performance. More specifically, the Department requires a grade average of B+ (3.30) or higher on courses above 1000 in SOSA and the minor (or second major) subject. In addition, a minimum cumulative GPA of 2.70 is required. Potential applicants should consult with one of the Department's Undergraduate Advisors, preferably during their second year of study, and should plan to take the 3000 level courses required for honours during their third year. The Advisor will assist the student to design a program of study with a minor in Social Anthropology or Sociology meeting the general Faculty requirements and the specific requirements for each program as set out below. It is important that students have a strong foundation before undertaking the honours thesis, therefore SOSA 2001 or SOSA 2002, and two of the required 3000 level courses are pre-requisites to the departmental Honours Seminars (SOSA 4000 X/Y or SOSA 4500 X/Y). Students who, after their third year, have not taken the pre-requisite courses may still do honours, but should plan to do so part-time over two years. The honours thesis paper is produced for the course SOSA 4500X/Y.06 (Sociology) or SOSA 4000.06 (Social Anthropology). This fulfills the College of Arts and Science Honours Qualifying Examination requirement. Students with the honours concentration in Sociology may not declare Social Anthropology as their secondary subject; students with the honours concentration Social Anthropology may not declare Sociology as their secondary subject.

Departmental Requirements

Courses required in Concentrated Honours in Social Anthropology:

1000 level

- One of: SOSA 1000.06, SOSA 1050.06, SOSA 1100.06, SOSA 1200.06, both SOSA 1002.03 and SOSA 1003.03 or King's Foundation Year Program

2000 level

- SOSA 2001.06 or SOSA 2002.06
- At least six additional 2000 level credit hours

3000 level

- SOSA 3400.03
- SOSA 3402.03
- SOSA 3403.03

4000 level

- SOSA 4000.06
- SOSA 4003.03
- One of: SOSA 4001.03, SOSA 4002.03, SOSA 4004.03, SOSA 4005.03, SOSA 4006.03

In total a minimum of 54 and a maximum of 66 SOSA credit hours beyond the 1000 level are required.

Courses required in Concentrated Honours in Sociology:

1000 level

- One of: SOSA 1000.06, SOSA 1050.06, SOSA 1100.06, SOSA 1200.06, both SOSA 1002.03 and SOSA 1003.03 or King's Foundation Year Program

2000 level

- SOSA 2001.06 or SOSA 2002.06
- At least six additional 2000 level credit hours

3000 level

- SOSA 3401.03
- SOSA 3402.03
- SOSA 3403.03
- SOSA 3405.03

4000 level

- SOSA 4001.03 or SOSA 4003.03
- SOSA 4500X/Y.06
- In addition, one of: SOSA 4001.03, SOSA 4002.03, SOSA 4003.03, SOSA 4004.03, SOSA 4005.03, SOSA 4006.03

In total a minimum of 54 and a maximum of 66 SOSA credit hours beyond the 1000 level are required.

NOTE: Students considering graduate work in Sociology are strongly advised to take SOSA 4002.03: Quantitative Analysis for the Social Sciences II, since intermediate statistical competence is often required as a component of graduate social science programs.

Combined Honours in Sociology or Social Anthropology and another field

The Department's honours programs are designed for students with an interest in, and demonstrated aptitude for, advanced study in either Sociology or Social Anthropology. Admission to these programs is based solely on academic performance. More specifically, the Department requires a grade average of B+ (3.30) or higher on courses above 1000 in SOSA and the minor (or second major) subject. In addition, a minimum cumulative GPA of 2.70 is required. Potential applicants should consult with one of the Department's Undergraduate Advisors, preferably during their second year of study, and should plan to take the 3000 level courses required for honours during their third year. The Advisor will assist the student to design a program of study with a minor in Social Anthropology or Sociology meeting the general Faculty requirements and the specific requirements for each program as set out below. It is important that students have a strong foundation before undertaking the honours thesis, therefore SOSA 2001 or SOSA 2002, and two of the required 3000 level courses are pre-requisites to the departmental Honours Seminars (SOSA 4000 X/Y or SOSA 4500 X/Y). Students who, after their third year, have not taken the pre-requisite courses may still do honours, but should plan to do so part-time over two years. The honours thesis paper is produced for the course SOSA 4500X/Y.06 (Sociology) or SOSA 4000.06 (Social Anthropology). This fulfills the College of Arts and Science Honours Qualifying Examination requirement. Students with the honours concentration in Sociology may not declare Social Anthropology as their secondary subject; students with the honours concentration Social Anthropology may not declare Sociology as their secondary subject.

Departmental Requirements

Courses required in Concentrated Honours in Social Anthropology:

1000 level

- One of: SOSA 1000.06, SOSA 1050.06, SOSA 1100.06, SOSA 1200.06, both SOSA 1002.03 and SOSA 1003.03 or King's Foundation Year Program

2000 level

- SOSA 2001.06 or SOSA 2002.06
- At least six additional 2000 level credit hours

3000 level

- SOSA 3400.03
- SOSA 3402.03
- SOSA 3403.03

4000 level

- SOSA 4000.06
- SOSA 4003.03
- One of: SOSA 4001.03, SOSA 4002.03, SOSA 4004.03, SOSA 4005.03, SOSA 4006.03

In total a minimum of 54 and a maximum of 66 SOSA credit hours beyond the 1000 level are required.

Courses required in Concentrated Honours in Sociology:

1000 level

- One of: SOSA 1000.06, SOSA 1050.06, SOSA 1100.06, SOSA 1200.06, both SOSA 1002.03 and SOSA 1003.03 or King's Foundation Year Program

2000 level

- SOSA 2001.06 or SOSA 2002.06

- At least six additional 2000 level credit hours

3000 level

- SOSA 3401.03
- SOSA 3402.03
- SOSA 3403.03
- SOSA 3405.03

4000 level

- SOSA 4001.03 or SOSA 4003.03
- SOSA 4500X/Y.06
- In addition, one of: SOSA 4001.03, SOSA 4002.03, SOSA 4003.03, SOSA 4004.03, SOSA 4005.03, SOSA 4006.03

In total a minimum of 54 and a maximum of 66 SOSA credit hours beyond the 1000 level are required.

NOTE: Students considering graduate work in Sociology are strongly advised to take SOSA 4002.03: Quantitative Analysis for the Social Sciences II, since intermediate statistical competence is often required as a component of graduate social science programs.

Honours Conversion in Sociology or Social Anthropology

This program permits Dalhousie graduates to undertake an additional 30 credit hours upgrading their qualifications from the 90 credit hour BA to Honours. Students must meet the usual conditions for admission to honours, and complete the full set of Honours requirements in either Sociology or Social Anthropology. Interested students should consult an Undergraduate Advisor. Students with a 120 credit hours major may also upgrade to honours.

BA (120 credit hour) Major in Sociology and Social Anthropology

Departmental requirements

1000 level

- One of: SOSA 1000.06, SOSA 1050.06, SOSA 1100.06, SOSA 1200.06, both SOSA 1002.03 and SOSA 1003.03 or King's Foundation Year Program

2000 level

- Either SOSA 2001.06 or SOSA 2002.06
- At least six additional 2000 level credit hours

3000/4000 level

- Total of 18 SOSA credit hours, including at least three credit hours at the 4000 level

In total a minimum of 36 and a maximum of 54 SOSA credit hours beyond the 1000 level are required.

BA (120 credit hour) Double Major in Sociology and Social Anthropology

Students must obtain at least 60 and no more than 84 credit hours beyond the 1000 level in two allied subjects, with no fewer than 30 and no more than 48 credit hours in either.

Departmental requirements

1000 level

- One of: SOSA 1000.06, SOSA 1050.06, SOSA 1100.06, SOSA 1200.06, both SOSA 1002.03 and SOSA 1003.03 or King's Foundation Year Program

2000 level

- Either SOSA 2001.06 or SOSA 2002.06
- At least six additional 2000 level credit hours

3000/4000 level

- 12 SOSA credit hours at the 3000 level or above

BA (120 credit hour) Major in Sociology and Social Anthropology Conversion

This program permits Dalhousie graduates to undertake an additional year of study upgrading their qualifications from the 90 credit hour BA to the 120 credit hour BA. Students must meet the full set of Major requirements.

BA (90 credit hour) Minor in Sociology and Social Anthropology

See the Minor in Sociology and Social Anthropology section of this Calendar

Minor in Sociology and Social Anthropology of Critical Health Studies

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

This minor requires a minimum of 18 to a maximum of 27 credit hours above the 1000 level from the list below.

- SOSA 2001.06: Ethnography in Global Context OR SOSA 2002.06: The Sociological Perspective (only one of these two may be included in the minor)
- SOSA 2401.06: Food and Eating Across Cultures
- SOSA 2400.06: Health and Illness Across Cultures
- SOSA 2502.03: Biomedicine and the Illness Experience
- SOSA 2501.06: Sociology of Health and Illness
- SOSA 2503.03: Health and Society
- SOSA 3135.03: The Social Organization of Health Care
- SOSA 3143.03: Health, Illness and the World System
- SOSA 3145.03: Gender and Health
- SOSA 3147.03: Social Gerontology
- SOSA 3148.03: Drugs, Health and Society
- SOSA 3149.03: Childhood in Cross Cultural Perspective
- SOSA 3150.03: Sociology and Anthropology of the Body
- SOSA 3245.03: Women and Aging
- SOSA 3250.03: Beyond Genes and Circuits: The Anthropology and Sociology of Technoscience

Minor in Sociology and Social Anthropology of Social Justice and Inequality

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

This minor requires a minimum of 18 to a maximum of 27 credit hours above the 1000 level from the list below.

- SOSA 2001.06: Ethnography in Global Context OR SOSA 2002.06: The Sociological Perspective (only one of these two may be included in the minor)
- SOSA 2040.06: Social Inequality
- SOSA 2041.03: Describing Social Inequality
- SOSA 2042.03: Explaining Social Inequality
- SOSA 2115.03: African Canadian Society, Culture and Resistance
- SOSA 2180.06: Crime and Criminal Justice
- SOSA 2181.03: Explaining Crime and Criminal Behavior
- SOSA 2182.03: Exploring Crime and Criminal Behavior
- SOSA 2190.06: Comparative Perspectives on Gender
- SOSA 2260.03: Society, Politics, and Culture
- SOSA 3002.03: Native Peoples of Canada
- SOSA 3006.03: Comparative Perspectives on Gender and Work
- SOSA 3015.03: Popular Memory
- SOSA 3100.03: Feminist Perspectives in Sociology and Anthropology
- SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America
- SOSA 3190.03: Social Movements
- SOSA 3206.03: Ethnicity, Race and Nationalism
- SOSA 3215.03: Migration and Identity
- SOSA 3225.03: Culture, Rights and Power
- SOSA 3275.03: Crime and Public Policy
- SOSA 3283.03: Globalized Security and Justice: the Challenge of Global Crime and Terrorism
- SOSA 3285.03: Sociology of Law
- SOSA 3295.03: Society and the Police

Minor in Sociology and Social Anthropology of Economy, Work and Development

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

This minor requires a minimum of 18 to a maximum of 27 credit hours above the 1000 level from the list below.

- SOSA 2001.06: Ethnography in Global Context OR SOSA 2002.06: The Sociological Perspective (only one of these two may be included in the minor)
- SOSA 2111.03: Is there an Atlantic Canada?
- SOSA 2140.03: Going Global; Geography, Economy, and Work in the 21st Century
- SOSA 2141.03: Good Jobs, Bad Jobs
- SOSA 2270.03: Introduction to Popular Culture
- SOSA 2271.03: Popular Culture in a Global Context
- SOSA 2401.06: Food and Eating Across Cultures
- SOSA 3005.03: Knowledge, Work and Culture in the Contemporary World
- SOSA 3006.03: Comparative Perspectives on Gender and Work
- SOSA 3014.03: Rethinking Culture and Class
- SOSA 3060.03: Social Change and Development
- SOSA 3096.03: Introduction to Demography
- SOSA 3165.03: Peoples and Cultures of the World: Selected Area Studies
- SOSA 3168.03: Issues in Latin American Society
- SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America
- SOSA 3200.03: Environmental Anthropology
- SOSA 3211.03: Continuity and Change in Rural Societies
- SOSA 3214.03: Living in a Globalized World
- SOSA 3215.03: Migration and Identity
- SOSA 3284.03: Living in Cities
- SOSA 3310.03: Indian Society: Change and Continuity

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Some courses listed may not be offered in a given academic year. Consult the timetable for details. Where prerequisites apply, students requesting exceptions must obtain permission directly from the instructor involved.

Note:

1. Enrolment in 4000 level courses is restricted to Honours and Major students in their fourth year of study.
2. No more than six credit hours may be obtained for introductory courses from SOSA 1000.06, SOSA 1050.06, SOSA 1100.06, SOSA 1200.06 or both SOSA 1002.03 and SOSA 1003.03.
3. King's Foundation Year Program satisfies the introductory course prerequisite.

Course Descriptions

SOSA 1002 People and Culture

CREDIT HOURS: 3

The course is an introduction to both anthropology and sociology. It presents to the students the research field that both scientific disciplines share in common: how humans organize themselves in groups, be it tribes or states, and how group organization affect individual lives. For this purpose, the course proceeds to explain and apply a series of fundamental concepts like culture, socialization, institutions, stratification, and so forth. Students also explore the various dimensions of social life, either in Canada or abroad: from politics to religion, from economy to sexuality.

FORMAT: Lecture

EXCLUSIONS: SOSA 1000X/Y.06, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200X/Y.06

SOSA 1003 People and Society

CREDIT HOURS: 3

This course builds on the material developed in SOSA 1002 though the latter is not a requirement for students. By making use of the basic concepts in anthropology and sociology, students examine specific empirical cases relevant for the scientific study and understanding of human activities in the world today. Topics may include: control and deviance, gender and health, racial and ethnic inequality, self and identity, work and organization, globalization, and so on.

FORMAT: Lecture

EXCLUSIONS: SOSA 1000X/Y.06, SOSA 1050X/Y, SOSA 1100X/Y.06, SOSA 1200X/Y.06

SOSA 1050X/Y Explorations in Culture and Society

CREDIT HOURS: 6

What are culture and society? How do we study and understand them? In beginning to answer these questions, the course introduces students to the key concepts, perspectives and methods of sociology and social anthropology. Taking examples from Canada and around the globe, we will look at such topics as beliefs, values, power, social structure, economy and more. This course fulfills the first-year writing requirement. It also satisfies the prerequisite for enrolment in upper level courses in sociology and social anthropology.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

EXCLUSIONS: SOSA 1000X/Y.06, 1002.03 and 1003.03, 1100X/Y.06, or 1200X/Y.06.

SOSA 1100X/Y Introduction to Anthropology

CREDIT HOURS: 6

Social anthropologists study cultural diversity in western and non-western societies. Often living among the people they study, anthropologists attempt to understand the structures that shape and constrain peoples' lives, and the ways in which people make sense of their changing circumstances. Classic studies focused on rural people in the developing world (hunter-gatherers, pastoralists, peasants). Contemporary studies are just as likely to focus on development, migration, artists, boardroom rituals or street gangs. Theories and methods from anthropology can be applied to a wide range of academic and practical settings including development, politics, economics, health, law, art, and human rights.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

EXCLUSIONS: SOSA 1000X/Y.06, 1002.03 and 1003.03, 1050X/Y.06 and 1200X/Y.06

SOSA 1200X/Y Introduction to Sociology

CREDIT HOURS: 6

This course introduces students to basic sociological concepts, the logic of social inquiry, and major theoretical and methodological issues in the field. Substantive course contents may include the study of culture, socialization, deviance, social organizations, institutions, social roles, and demography. Emphasis is on the study of modern industrial societies with special attention given to Canadian society.

NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture

EXCLUSIONS: SOSA 1000X/Y.06, 1002.03 and 1003.03, 1050X/Y.06 and 1100X/Y.06

SOSA 2001X/Y Ethnography in a Global Context

CREDIT HOURS: 6

Ethnography describes how people conduct their lives in a particular time and place. This course examines the challenge, complexity, strengths, and limitations of ethnographic knowledge and writing in Social Anthropology. Students will learn about a number of different ethnographic settings which may vary from year to year. A

selection of ethnographies, films, autobiographical writing, and critical commentaries will be used to reveal how social anthropologists generate ethnographic knowledge about past and present societies, and why research priorities shift. Approved with International Development Studies.

NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP, or permission from the instructor if only 3 credit hours completed.

SOSA 2002X/Y The Sociological Perspective: Thinking and Doing Sociology

CREDIT HOURS: 6

Sociologists are interested in understanding the social world. They do not rely on preconceived ideas alone to enrich this understanding, but see the need to conduct studies, carry out investigations, make observations, analyze findings, formulate ideas, and construct theories and interpretations about what they find. This course looks at the ways sociologists go about their work. What are some of the dominant ways of thinking current in sociology today? What are the relationships between such ways of thinking and what are seen as questions to investigate? How do sociologists do their research? What are social surveys, interviews, theories, sociological ideas? What is distinctive about a sociological way of looking at a problem?

NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP, , or permission from the instructor if only 3 credit hours are completed.

SOSA 2004 Current Controversies

CREDIT HOURS: 3

This course will examine current social problems, puzzles and controversies. It will introduce perspectives to explore and understand social fads, critical events, and social debates. Readings and assignments will look at issues like the rise of social networking media, environmental disasters, and contemporary controversies, such as, austerity measures, same-sex-marriage, immigration, and abortion, among others.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06, 1200X/Y.06, or FYP

SOSA 2041 Describing Social Inequality

CREDIT HOURS: 3

This course examines inequality in practice. The focus will be on applying understandings of inequality to empirically describe cases of injustices in order to look at measures, practices, and policies regarding inequality. The evidence used to describe inequality will be critically examined through theoretical considerations. Possible topics to be covered in readings and assignments include economic, social, cultural, political and health inequalities among other contemporary issues of social justice.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

EXCLUSIONS: SOSA 2040X/Y.06

SOSA 2042 Explaining Social Inequality

CREDIT HOURS: 3

This course examines various perspectives on inequality. It will examine how various forms of social inequality emerge and persist. The focus will be on the unequal distribution of wealth and sources of social power. Readings and assignments will focus on theories and explanations of inequality as well as historical and contemporary cases, including class, ethnicity, race, nation, region, gender, orientation and other manifestations of inequality.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

EXCLUSIONS: SOSA 2040X/Y.06

SOSA 2045 Indian Society: Change and Continuity

CREDIT HOURS: 3

The objective of this half-credit course is to introduce students to the society and culture of India from an interdisciplinary perspective. India presents a society of enormous complexity and an unbroken living civilization of great antiquity. The focus of the course will be on selected, significant aspects of Indian society with particular emphasis on issues of current relevance. Topics discussed include: a historical background, social structure, political and social constraints to economic development, health issues, major religions and philosophy, development and foreign policy since independence, science and technology, disaster relief and development, and literature. This course counts as a half-credit in Sociology and Social Anthropology towards the IDS established discipline requirement.

FORMAT: Lecture

CROSS-LISTING: INTD 2045.03

EXCLUSIONS: INTD 3045.03

SOSA 2051 Chinese Culture

CREDIT HOURS: 3

This course introduces students to the Chinese cultural heritage. It offers an overview of traditional and modern Chinese culture through the lenses of history, sociology, religion, philosophy, literature, art and film. The class offers students an opportunity not only to familiarize themselves with the historical legacies of China, but also to examine modern issues facing Chinese society in the contexts of international relations, society, economics, gender, ethnicity and politics. Nor previous knowledge of Chinese culture or the Chinese language is required.

FORMAT: Lecture| Discussion

PREREQUISITE: None

CROSS-LISTING: CHIN 2050.03

SOSA 2090X/Y Youth and Society

CREDIT HOURS: 6

Events of enormous future consequences occur in the period between childhood and adulthood. Competing sociological and anthropological arguments try to explain the nature of the relationships between youth and society. This course critically examines the arguments, with special focus on assessing the empirical evidence that might be used to support or refute them. That is, the context of youth will be used to illuminate the connections between argument and evidence, theory and data.

Although the emphasis is on youth in Canadian society, a comparative perspective will be employed.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 2101 Environment and Culture

CREDIT HOURS: 3

Concern about the environment is an increasingly widespread phenomenon as more people and confront their relationship to a changing ecology. Environmental issues like pollution, global warming, or resource depletion, have global as well as personal implications. The efforts of cities to deal with environmental pollution, for example, may lead to conflicts with rural regions, and changes in consumption patterns in one country may have consequences for the environment of other countries. This course will explore key relationships between human culture and the physical environment. Topics to be examined may include: environmental knowledge, food and agriculture, environmental ethics, health, resource management and conservation.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

EXCLUSIONS: SOSA 2100.06

SOSA 2102 Political Ecology

CREDIT HOURS: 3

Environmental issues, like all things involving human societies, are always political issues. Whether we are talking about who gets to use a resource, or who has to clean up afterwards, environmental actions always have consequences for other aspects of people's lives, and therefore the possibility for disagreement. The course will examine those phenomena where traditionally political questions about the distribution of resources or power within a society overlap with environmental questions, and where struggles over environmental protection or regulation intersect with struggles to control group life. Topics covered may include competition over resources, the politics of environmental regulation, the social and historical conditions that give rise to environmental disagreements, or the ways that different plans for mitigating climate change affect global power dynamics.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

EXCLUSIONS: SOSA 2100.06

SOSA 2111 Is there an Atlantic Canada?

CREDIT HOURS: 3

This course will examine the historical and contemporary social issues related to the Maritimes and Atlantic Provinces. The course will critically question what is meant by "Atlantic Canada" and look at its social, demographic, economic, and cultural trends in relation to the rest of the country. Attention will be given to the role of Acadians, Mi'kmaq, and African Nova Scotians as well as dominant powerholders in the construction of Atlantic Canada.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

CROSS-LISTING: CANA 2111.03

SOSA 2115 African Canadian Society, Culture, and Resistance

CREDIT HOURS: 3

There has been a presence of African peoples in Canada for over 400 years; however, the rich histories of African-Canadian people have been often ignored. This course examines African Canadian society and culture from the historical to contemporary period. Topics will include historical analyses, slavery, patterns of immigration and settlement, family, continental African and diasporic connections, identity, arts and culture, education, employment, justice and the law, the media, diasporic debates, Black struggles and resistance, and African Canadian achievements. The course will be taught from a critical race and gender perspective, and will include readings about the diverse Black communities across Canada. There has been a presence of African peoples in Canada for over 400 years; however, the rich histories of African-Canadian people have been often ignored. This course examines African Canadian society and culture from the historical to contemporary period. Topics will include historical analyses, slavery, patterns of immigration and settlement, family, continental African and diasporic connections, identity, arts and culture, education, employment, justice and the law, the media, diasporic debates, Black struggles and resistance, and African Canadian achievements. The course will be taught from a critical race and gender perspective, and will include readings about the diverse Black communities across Canada.

FORMAT: Lecture

CROSS-LISTING: CANA 2115.03

SOSA 2140 Going Global; Geography, Economy, and Work in the 21st Century

CREDIT HOURS: 3

This course will explore the economic, industrial and organizational transformations which have affected world economies since the 1980s. The spatial reorganization of the international division of labour has led to "world cities", and rural concentration and depopulation, as well as exploitative economic enclaves as endpoints in global commodity chains. The emergence of an increasingly integrated international economic order are associated, in the advanced economies, with a shift from manufacturing, for which automobile production has been the standard example, to a service-dominated economy, ranging from financial services, internet development and movie and music creation, to fast food chains and mass tourism. This industrial transformation has been accompanied by shifts in organizational structures, whether the emphasis has been on increased operational flexibility, or downsizing, one is continuously faced with the impact of new information technologies on the workplace. Does the electronic storage and transmission of information create acceptable efficiencies, or do they represent new methods for controlling and exploiting an increasingly vulnerable workforce, particularly lower-class women and/or immigrants? This course will employ the relevant portions of a standard Canadian sociological text to evaluate main tendencies, while selected anthropological case studies from different places will help understand the specific dynamics of a new, world economy.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 2141 Why Work?

CREDIT HOURS: 3

Work, as the journalist Studs Terkel once wrote, is a source of "daily meaning as well as daily bread." It comes in many forms. There are careers, "callings," or just-for-now jobs, which can be paid or unpaid, permanent or temporary, prestigious or menial, dangerous or boring. For some of us, work is an opportunity to "Do What You Love"; for others, the best part of work is the pay cheque. How we go about making a living is in some ways a personal choice, but it's also a social and political matter. In this course, students will learn how we make sense of work in all its forms. Topics covered may include: internships and precarious work, (de)industrialization, unions, generations and work, gender and work, labour market trends, professions, leisure, and the future of work.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 2181 Explaining Crime and Criminal Behavior

CREDIT HOURS: 3

What is crime, why do rates of crime vary, why do people commit crimes and how do social, cultural, psychological and biological theories and research findings explain crime as social and behavioral phenomena? Criminology is an interdisciplinary attempt to answer these questions through the social scientific study and analysis of crime and criminal behavior. This course introduces students to a broad variety of critical thinking, disciplinary theories, research studies and social policies, in order to help you understand and explain crime and show how these understandings inform the policies and politics designed to manage and prevent crime. This course provides a general but primarily sociological understanding of crime.

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

EXCLUSIONS: SOSA 2180X/Y.06

SOSA 2182 Exploring Crime and Criminal Behavior

CREDIT HOURS: 3

Though this is a stand-alone course it builds on the exploration of theories of crime addressed in 2181.03 and applies them to various “types” of crime and criminal behavior in Canada and elsewhere. This course pulls together various sources of knowledge to provide description and analysis of various patterns and types of crime and explores how this knowledge is being applied in specific policies and practices aimed at managing and preventing crimes: typically by the criminal justice system. The course content covers Violent crimes such as murder, sexual assault, domestic violence, robbery and gang violence; Property crimes such as burglary and motor vehicle theft; Organized crime, White Collar and Corporate crime and new forms of Global crime such as narco trafficking; human and arms smuggling and money laundering.

NOTES: Approved with Law and Society Minor.

PREREQUISITE: One of SOSA 1000 X/Y.06, (1002.03 and 1003.03), 1050 X/Y.06, 1100 X/Y.06 or 1200 X/Y.06 or SOSA 2181.03, FYP

EXCLUSIONS: SOSA 2180X/Y.06

SOSA 2190X/Y Comparative Perspectives on Gender

CREDIT HOURS: 6

Applying theoretical perspectives drawn from anthropology and sociology, this course considers the underlying conditions for and consequences of gender inequalities in different historical & cultural contexts. The course begins with an overview of the study of gender relations in anthropology and sociology. Themes around which the course will be organized include the relationship between gender and the following: culture and difference; sexuality and reproduction; labour; gender politics, power relations and political discourse; and gender in the global political economy. Approved with International Development Studies.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 or 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP or 3 credit of GWST at any level.

CROSS-LISTING: GWST 2800X/Y.06

SOSA 2221X/Y Society and the Self

CREDIT HOURS: 6

Groups influence individuals and individuals react to these influences. This is the field of Social Psychology. The processes involved in such person-group relationships are explored in a number of different settings, such as the family, mental hospitals, and universities. The course will focus on a critical review of research and theorizing.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

EXCLUSIONS: SOSA 2220.03

SOSA 2260X/Y Society, Politics, and Culture

CREDIT HOURS: 3

You may not think of yourself as political but power is a process of everyday life. Although it is often assumed to be located in economic and political institutions, it is also important to consider that “the personal is political” and this too contributes to the negotiation of power. This course will explore how social processes affect and are shaped by material, institutional, and normative pressures. Contemporary examples of the intersection of these social forces will show how sociology and social anthropology can be used to identify otherwise hidden relationships.

FORMAT: Lecture

SOSA 2270 Introduction to Popular Culture

CREDIT HOURS: 3

In this course, we will examine and discuss the various approaches and theories of popular culture in anthropology and sociology. Popular culture has been defined in multiple ways and attached to multiple objects and activities in society. We will consider how human beings take part in popular culture on one hand and how popular culture affects the rest of their lives on the other hand. Related themes include consumption, media, technology, communication, identity, ideology, stratification.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 2271 Popular Culture in a Global Context

CREDIT HOURS: 3

The course explores many different theories and manifestations of popular culture in a wide range of contexts. Popular culture as it intersects with films, television, Internet, magazines, comics, cartoons, fashion, sports, music, etc., provides a rich platform for consideration of how popular culture influences individuals in their lives while simultaneously being shaped by those same individuals and their cultural contexts. We will also explore how individuals take on different roles in the production and consumption of popular culture.

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 2291X/Y Goblins, Ghosts, Gods, Gurus

CREDIT HOURS: 6

Societies and groups within societies differ in terms of what their members believe, how people view the world and their place within it, the sources of knowledge, attitudes toward the supernatural and the sacred, the status and authority of different sources of knowledge and what it all means. What makes religion different from

science? What makes them similar? What is commonsense? What are magic and witchcraft? What are the relations between belief and actions? What is the status of religious authority and power? What are altered states of consciousness? What are religious groups all about? Why do people belong to them, join them, leave them? What is involved in conversion and commitment? This course considers such questions drawing on a wide variety of societies, cultures, and groups, western and non-western.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

CROSS-LISTING: RELS 2291.06

SOSA 2300X/Y Introduction to Social Problems

CREDIT HOURS: 6

The study of social problems uses sociological theory and research to examine the social dynamics and consequences of a variety of contemporary issues. Though the course content will vary year by year, students can expect to deal with social problems such as poverty, drug abuse, gender and race relations, work and alienation, and environmental issues.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 2400X/Y Health and Illness Across Cultures

CREDIT HOURS: 6

Every culture has its own concepts of health and nutrition, its own treatments and practices. The strengths and weaknesses of our own system grow clearer when medical anthropologists compare it with that of other societies. This course's specific topics vary from year to year but always include: native theories of the etiology of illness, transcultural versus culture-specific disease syndromes, pregnancy and childbirth in other cultures and our own; senescence and death viewed cross-culturally, the conflict between traditional medical systems and the Western physician and hospital, patients' expectations and the medical subculture, the physician as secular priest, and food and nutrition across cultures. Approved with International Development Studies.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

EXCLUSIONS: SOSA 2933.03, SOSA 2966.03

SOSA 2401X/Y Food and Eating Across Cultures

CREDIT HOURS: 6

Our bodies determine nutrition, our environments limit what may be available, and our cultures decide what is to be considered "food." This course is an introduction to the anthropology and sociology of food. Topics include evolution and human nutrition, social change and food, famine and the world food system, food in contemporary film, food taboos, age and gender differences in food prescriptions and proscriptions, dieting and obesity, cannibalism, the symbolic meaning of eating and food, and vegans vs. carnivores. Approved with International Development Studies.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 2402 Food Through Time and Space

CREDIT HOURS: 3

We will examine the concept of "food" through time and space so as to understand nutritional science/health, belief/ritual systems, oral/textual histories, ancient productive systems, flora and fauna domestication techniques and their ongoing relevance to food entitlements in the contemporary world. Special emphasis will be on non-Europeans societies, communal tenure systems and a glance at the European commons and their productive systems.

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

EXCLUSIONS: SOSA 2401X/Y

SOSA 2403 Food Activism

CREDIT HOURS: 3

In this course we will explore food movements and alternative food practices, especially in relation to the modern food system. We will discuss the key characteristics and critiques of the food system and focus on case studies of cultural practices and food activism from around the world which challenge or provide alternatives to the current food system.

FORMAT: Lecture

EXCLUSIONS: SOSA 2401X/Y.06

SOSA 2502 Biomedicine and the Illness Experience

CREDIT HOURS: 3

This course provides an introduction to the sociology of medicine, patienthood, and practitioner-patient relationships. The course is organized into two sections. The first section analyses the theory and practice of medicine, our society's dominant system for addressing health problems. In the second section, we examine illness and the experience of receiving medical care. We will cover such topics as: the biomedical model; medical school; the experience of chronic illness; medical science and technology; models of the doctor-patient relationship; and mental illness.

FORMAT: Lecture

EXCLUSIONS: SOSA 2501X/Y.06, SOSA 2500.03

SOSA 2503 Health and Society

CREDIT HOURS: 3

This course examines the social foundations of health and illness, community responses to health problems, and the structure of health care in Canada and internationally. Topics to be covered include: morality and health, social inequality and the political economy of health and health care, the multinational pharmaceutical industry, environmental health, and the development of and 'crisis' in the Canadian Medicare system.

EXCLUSIONS: SOSA 2501.03

SOSA 2933 Health and Culture

CREDIT HOURS: 3

This course explores health and illness aetiology through culture and time with a focus on ancient and pre-capitalist societies in South Asia, Latin America, Africa, Middle East and Aboriginal gifting economies. Topics may vary from year to year but we will invariably explore global sensibilities of feeling healthy and “well” through an exploration of case studies highlighting ancient science and medicine, health taxonomies, oral history, ethnography, literature, poetry, music, oral genres, pregnancy; birth and rearing of children; senescence and death. The weaknesses and strengths of Canada’s increasingly privatized selective healthcare system become clear when compared it with the achievements made in societies that provide/d healthcare as a basic right.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

EXCLUSIONS: SOSA 2400X/Y.06

SOSA 2966 Health and Illness through Culture and Space

CREDIT HOURS: 3

Every culture has its own concepts of health and nutrition, its own treatments and practices. This course explores health aetiologies through contemporary culture and space. Topics may vary from year to year but we invariably will learn about contemporary cultures around the world in relation to sensibilities of what it means to feel healthy and “well” in the content of rapid economic and social change. We will explore religion, culture and efficacy; cultures of colours, smells; tastes and health and wellness (proxemics; kinetics-how wellness, health and illness are embodied through time, space and culture); narratives of health (poetry, music, oral genres); pregnancy; birth and rearing of children; senescence and death; the content of public health systems and the extent to which they incorporate these practices and beliefs. The weaknesses and strengths of our own system become clear when medical anthropologists compare it with the science and health systems of other societies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

EXCLUSIONS: SOSA 2400X/Y.06

SOSA 3002 Native Peoples of Canada

CREDIT HOURS: 3

This course uses an ecological perspective to describe the cultures and peoples occupying Canada at the time Europeans came to this continent. As time permits, some ethnohistory and the situation of contemporary Native peoples is also discussed. Films will be used to supplement lectures and readings. Approved with Canadian Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

EXCLUSIONS: SOSA 2350.03

SOSA 3005 Knowledge, Work and Culture in the Contemporary World

CREDIT HOURS: 3

Since the publication of Daniel Bell's book, *The Coming of Postindustrial Society*, studies of the economic structure of the advanced societies have addressed the question of the extent to which we are living through a transition to a new, knowledge-driven economy which may be qualitatively distinguished from the system of industrial capitalism which has characterized North America and western Europe for most of this century. Whether one uses terms like “postindustrialism”, “postmaterialism” or “postmodernism”, debates have centered on the question of fundamental alterations in the economic, cultural and political organization of technologically advanced societies. Are we witnessing the creation of an “information economy”, are we observing the emergence of a new “knowledge class”, which rules by virtue of its educational skills and credentials, is there a new underclass being excluded from paid employment of any form, and is government being privatized to facilitate new forms of global economic integration? Are new types of social movements arising in response to basic changes in our society? This course will address the above questions, with particular emphasis being devoted to discuss issues in contemporary political economy.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3006 Comparative Perspectives on Gender and Work

CREDIT HOURS: 3

This course will use comparative perspectives to explore a range of topics relating to the gendering of work- wage-work, household-based labour, the informal sector, masculinity and femininity in the work place, occupational segregation, employment policies directed at changing the status quo (such as affirmative action, pay equity), and unionization. The context will be the changing global political economy and its consequences for the strategies of different groups (such as nation states, but also trade unions, feminist groups and employer groups). Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

CROSS-LISTING: GWST 3006.03

SOSA 3008 Canadian Society and Politics

CREDIT HOURS: 3

This course about the nature of Canadian society has as its focus the study of structures and events which shape social and political organization in Canada. There is not only one way to understand Canadian society: generations of historians, political scientists and economists have provided valuable insights as to why Canadians have believed or acted or voted in one way or another. Sociology and Social Anthropology have helped to understand Canada in terms of contexts and conditions of life which have shaped the evolution of society as we know it. The course explores issues, events, discontents and groups which have produced the recurrent themes that underlie social life in Canada.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP RECOMMENDED: SOSA 2110 or another course on Canadian society and/or politics.

CROSS-LISTING: CANA 3008.03

SOSA 3009 Public Opinion in Canada

CREDIT HOURS: 3

This course will introduce students to the study of public opinion in Canada and impact on informed decision making. In particular, the focus will be upon ideas and issues which have been held by groups and been influenced by the media. The lectures would explore the basis of our knowledge about the formation and change of public opinion relative to other forms of collective behaviour. We will present and analyze data relating to the role of public opinion in explaining and predicting political events.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3013 Religion in Contemporary Society

CREDIT HOURS: 3

Religion is alive and well in society today; some religious organizations are in decline but others appear to be flourishing. How can these tendencies be accounted for? Do we live in a secular age or is that just a flip expression? What does religion mean to people in contemporary society? Is there a search going on for spiritual growth, spiritual awareness, spiritual expression? If so, what forms does this search take? What can we learn by thinking about religion sociologically? What are the trends in religion telling us about the character of late twentieth century society?

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP, RELS 1000.06, or permission of the instructor

CROSS-LISTING: RELS 3013.03

SOSA 3014 Rethinking Culture and Class

CREDIT HOURS: 3

Critical cultural studies has become a vigorous focus of interdisciplinary scholarship drawing on the fields of history, anthropology, sociology, geography, and literary criticism. Researchers in all of these areas are reconsidering the significance of symbolic aspects of social life and how the collective experiencing of cultural forms is related to changes in capitalism and modernity. For example, what is the significance of popular music in different class, gender, and ethnic contexts? How do commitments to kin and community relate to expressions of culture and class consciousness? Are boundaries between work and leisure mutable in terms of class, gender and ethnic processes? Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, KING 1000X/Y.06, or KING 1100X/Y.06

SOSA 3015 Popular Memory

CREDIT HOURS: 3

This course considers history-writing as a social and cultural process operating at personal, group and national levels. It examines theoretical, methodological and political questions raised in work on popular memory. Readings and films address the problems of: official history, public history (museums, national monuments), "history from below," and oral history. Cases will be taken from across the globe. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3031 Social Problems and Social Policy

CREDIT HOURS: 3

This course focuses on the nature of social problems and social policy in advanced industrial societies. It adopts a social movement perspective, exploring the processes whereby agitation on behalf of undesirable but remedial social conditions leads to changes in social policy. Among the areas treated in depth are crime prevention, the quality of work life, race relations, deviance, and poverty and inequality.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3060 Social Change and Development

CREDIT HOURS: 3

This course considers theories of social change and development; approaches to the analysis of rural and urban livelihoods at the micro level; and the examination of community, class, patronage and gender relations in both their economic and cultural aspects. The constructive uses of social analysis in the support and design of development initiatives are also discussed. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; or INTD 2001.03 or INTD 2002.03, FYP

SOSA 3071 Human Nature and Anthropology/Sociology

CREDIT HOURS: 3

Do social anthropology and sociology suffer from "biophobia"? Can evolutionists explain why we feel sexual jealousy or why we tend to follow a dominant leader in times of stress? Can the theories that explain why we have finger prints and flat nails account for why we are cultural animals? This course reviews theory and data on the evolution of human mind and culture in order to construct a theory of human nature and to argue that ethnographers vastly exaggerate the extent to which human societies differ from one another. Its perspective and contents include much of what some have categorized as "Human Sociobiology", "Biosociology", "Darwinian Anthropology," "Darwinian Psychology", and "Darwinian Medicine".

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; or an introductory course in either Psychology or Biology, FYP

SOSA 3085 Self and Society

CREDIT HOURS: 3

This course explores the relationship between the self and the larger social context. It considers the dynamic interplay of personal experiences, interpersonal relations, group affiliation, and larger socio-cultural conditions. It examines how such interactions and institutions shape our conceptions of who we should be, who we are, or who we might become. In addition the relationship between changes in society and changes in the self are explored. The course may consider these questions cross-culturally.

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3091 The Sociology of Culture

CREDIT HOURS: 3

Does culture permeate all aspects of social life or are there specialized social domains which are "cultural"? What is the connection between societies and "cultures" and the "culture" of music or art? This course explores the question of how one can sociologically study culture. The course reviews classical and contemporary theoretical approaches to the social production, distribution and reception of culture. Broad themes include the discussion of cultural consumption, cultural identity, cultural change, and notions of cultural resistance. Specific "cultural objects" of study may include fashion, sport, class, and social problems. The course concludes with analysis of the intersection of the fields of sociology and cultural studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3096 Introduction to Demography

CREDIT HOURS: 3

This course will explore the demographic techniques and theory used to describe the dynamics of population structure. Various demographic sources ranging from census to church records will be examined. Basic techniques for determining rates and measures of fertility, mortality, morbidity, and growth. Students will be expected to complete a project using primary sources.

FORMAT: Seminar| Discussion

CROSS-LISTING: SOSA 5096.03

EXCLUSIONS: SOSA 3095X/Y.06

SOSA 3100 Feminist Perspectives in Sociology and Anthropology

CREDIT HOURS: 3

This course will begin with an overview discussing what is feminism? There is no way to come to a definitive answer to this question, therefore the first month of classes will focus on readings and discussion of feminism from an historical perspective. We will investigate the three historical waves of feminism and the diversity of feminism found in the social sciences. After this brief introduction we will concentrate on gender and sex, clearly dominant themes found in feminist works. We will approach this by critically exploring socio cultural constructions of sex and gender, which in turn will shed critical light on feminist perspectives about the relationship between these two concepts.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, or KING 1000X/Y.06 or KING 1100X/Y.06

SOSA 3105 Media and Society

CREDIT HOURS: 3

This course provides an introductory overview to the theoretical and practical issues that concern media and society. It examines contemporary theories of mass communications and popular culture and engages the political economy of media, their impact on audiences, and the role they play in the political process.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3116 Issues in Social Research

CREDIT HOURS: 3

This course consists of the intensive examination of a selected area in social research. Since the specific topic which will receive special attention will differ from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3120 Social Conflict

CREDIT HOURS: 3

This course introduces students to the various analytical perspectives sociologists have employed to understand the patterning and consequences of conflict in society. In this regard particular attention is devoted to the functional, coercion, and Marxian theories of conflict. This course is also concerned with conflict in contemporary society, with special reference to patterns of conflict and change in Canada.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3135 The Social Organization of Health Care

CREDIT HOURS: 3

The social organization of medicine and the politics of health are examined. Particular attention is paid to environmental and occupational health issues in light of technological and social change. Epidemiological patterns of morbidity and mortality are assessed. Students are responsible for seminar presentations in areas of interest.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3143 Health, Illness and the World System

CREDIT HOURS: 3

Placing the political economic bases of health and illness in ethnographic context, this course is concerned with the ways that afflictions of poverty become naturalized as biomedical experiences. Core questions pursued are as follows: 1) how is relative health affected by the world market pressures in diverse global contexts? 2) how do afflictions of poverty become naturalized as biomedical experiences? 3) how do patients and communities activate alternative health infrastructures as they resist their marginalization in neo-liberal political agendas? 4) what kinds of illnesses are characteristic of capitalism and wage labour migration (e.g. HIV/AIDS; SARS)? 5) how have market pressures and profit seeking retarded the progress of scientific inquiry into modern illness? We will elucidate these questions by looking at case studies from Canada, South Africa, Sri Lanka, Spain and Brazil.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3145 Gender and Health

CREDIT HOURS: 3

This course aims to reflect upon and challenge our taken-for-granted assumptions about the gendered dimensions of health and healthcare. Rather than take the categories of 'women's health' and 'men's health' as its foundation, the course revolves around two main questions: (1) how does the field of health and healthcare define and enforce the very categories of 'women' and 'men'? (2) how does gender, thus defined and enforced, affect the health, healthcare, and health work of those defined as men, women, or other? We will consider these questions by examining particular health topics that have a strongly gendered component, such as sexual health, reproductive health, and disability. Throughout the course, we will explore the theoretical perspectives used in the field; the two-sex model and challenges to it; the gendering of particular health problems and health professions; the medicalization of womanhood and, more recently, manhood; and the relationships between gender and other forms of social classification (e.g. race, class, sexual orientation). It is recommended that students take SOSA 2501 or SOSA 2400 prior to taking this course.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3147 Aging Cross Culturally

CREDIT HOURS: 3

In this online course we will explore the array of beliefs and practices of aging and the life course cross culturally. We will explore the enormous diversity in the aging experience around the world as well as the universals of human aging. Case studies will be examined to provide salient evidence of concepts examined in the course. This course will be useful for students in the social and science and humanities as well as health professionals, nursing, gerontologists, to provide adequate knowledge and skills for culturally appropriate geriatric care. This is an online course using Dalhousie's Blackboard Learning System. You are required to have daily access to a computer with high-speed internet access.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, or KING 1000X/Y.06 or KING 1100X/Y.06

CROSS-LISTING: HLTH 4900.03

SOSA 3148 The Sociology of Addiction: Drugs, Health and Society

CREDIT HOURS: 3

This course explores how the meaning and significance of various drug-taking practices and addictive experiences are shaped by the social, cultural, political and economic contexts in which they take place. It also examines how perceptions of different drugs and addictions have changed over time, and how complex and competing political, cultural and economic forces shape drug law and policy. The general aim of the course is to de-individualize and de-pathologize drug use and addiction, to better understand and address their health consequences.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3149 Childhood in Cross Cultural Perspective

CREDIT HOURS: 3

This course explores childhood as an important reflection of socialization and thus a nexus of cultural and social values, ideas, and histories. In examining pregnancy, birth, infant development and socialization patterns, we ask: What is universal, what is near universal, and what is indisputably variable? The course tries to maintain a balance among three perspectives: those of the infant; those of the parents; and relevant cultural and historical factors that shape both of these. The course also seeks to maintain a balance between the biological, cultural and social nature of human behavior. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3150 Sociology and Anthropology of the Body

CREDIT HOURS: 3

This course will consist of a micro-sociological examination of the human body as a socio-cultural construction. Topics include: bodily self image, cultural definitions of physical attractiveness, stigmatization, proxemic behaviour, non-verbal communications, body hygiene and pollution taboos, and cultural aspects of human reproduction and sexuality. Special attention will be paid to class, gender and ethnicity and their relationship to body politics.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

CROSS-LISTING: GWST 3150.03

SOSA 3165 Peoples and Cultures of the World: Selected Area Studies

CREDIT HOURS: 3

This course examines a specific geographic and/or culture area. The course begins with background material on geography and history. Its focus is on the people themselves, their social organization and political, economic, and cultural systems. How they relate to globalization and development will also be examined. Consult the Department to find which region is to be covered in a particular year. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

CROSS-LISTING: GEOG 3165.03

SOSA 3168 Issues in Latin American Society

CREDIT HOURS: 3

This course introduces students to case studies on contemporary Latin America. the goal of the course is to familiarize students with key social and cultural issues in the region. The focus of the course will change from year to year, and may include a particular country or region, or a theme or topic. Students should contact the department for details on the specific theme of the course in a given year. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3175 Sociology of Education

CREDIT HOURS: 3

This course is intended to develop students' knowledge about the relationships between schooling and other aspects of society. We will achieve this, in part, by examining the theoretical perspectives and practical implications of knowledge in and outside of schooling as a basis for the development of autonomous and creative individuals. Topics may include: social stratification, cultural demands and constraints, relations between family, community and educational attainment, and the changing social conditions that have had an impact on educational institutions.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3180 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3181 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3182 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3183 Special Topics

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3184 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3185 Issues in the Study of Indigenous Peoples of North America

CREDIT HOURS: 3

This seminar is concerned with the historical background of the Native-European situation in North America and with issues arising from this background. Students will research issues which are significant to themselves and important to Native groups. Topics covered may vary from year to year, but will normally include a combination of historical issues such as culture change and contemporary issues such as land claims, self-determination and government policy, and social conditions of Natives.

Approved with International Development Studies and Law and Society minor.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

CROSS-LISTING: CANA 3185.03

SOSA 3186X/Y Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

Women and men's bodies in colonial settings have been the first point of contact between colonizer and colonized. This course examines how colonized bodies negotiate the intersections between culture, gender, race, sex, class, sexuality, identity, and power, and seeks to understand how these bodies reaffirm and empower themselves in a postcolonial setting. We will address the different kinds of colonialism (internal, settler, direct rule) and tackle such issues as the disciplining of the colonized body through universalized gender norms, and notions of beauty within a colonial setting. Moreover, we will pose certain critical questions: 'How were/are property rights vested in the colonial and post colonial body?' 'How was the Atlantic shaped by the circuit of slavery?' 'And what are its legacies today?' 'How has the critical study of power and the body moved beyond Michel Foucault?' We will explore the multidimensionality of the body. Thus, we will pay attention to the body as source and site of oppression and misery, and the body as a source and site of pleasure, and joy.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3187 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3188 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

We will examine the content of imperial medicine through time and space. This will include assessing the invention and contemporary reproduction of "The Tropics" as a way for imperial forces to designate "the foreign" to the normalized "Europe" and contemporary Euro-settler states. We will also examine the manner in which this imperial imagination has historically and in the present been used to racialize etiologies and explanations about "underdevelopment" and susceptibility of disease while undermining indigenous etiologies and practices. Case studies of malaria, smallpox, tuberculosis, sleeping sickness, and malnutrition as students will undertake projects that critically assess the content of the pseudo-scientific selective healthcare/emergent diseases approach as it was or is activated through time and space.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000 X/Y.06., or (1002.03, 1003.03), or 1050 X/Y.06, 1100 X/Y.06 or 1200 X/Y.06, FYP

SOSA 3189 Special Topics in Sociology and Social Anthropology

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

SOSA 3190 Social Movements

CREDIT HOURS: 3

The general topic of unstructured group activity encompasses phenomena traditionally classified as collective behaviour incidents, as well as reformist and revolutionary social movements. Although there is considerable overlap, the collective behaviour literature tends to focus on relatively brief and spontaneous activities, such as panics, disasters, and crazes, while work on social movements examines relatively more organized and enduring group activities which still fall outside the realm of normal institutions. This course investigates problems emerging from both areas of concern. Emphasis is given to relevant Canadian materials.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3200 Environment and Society

CREDIT HOURS: 3

Humans are aware as never before of their impacts on the environment, and their dependence on the other things and beings with which they coexist. In this course we explore the ways that Social Scientists are rethinking the relationship between humans and the non-humans, whether they are carbon atoms, computers, amphibians, mushrooms or ecosystems.

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3206 Ethnicity, Nationalism and Race

CREDIT HOURS: 3

This course looks at the social construction and present relevance of the categories “ethnicity”, “nation”, and “race”. The current prevalence of identity politics and ethnic nationalism suggest the extent to which these categories are both profoundly political and deeply personal. By looking at case studies from Canada and around the world we examine these ideas and their implications. Topics will vary from year to year, but may include Quebec nationalism, multiculturalism, “ethnic” warfare in Rwanda or Bosnia, and race politics. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3211 Continuity and Change in Rural Societies

CREDIT HOURS: 3

The majority of the world's population, even today, lives in rural settings and depends upon primary production as the principal source of livelihood. This does not mean, however, that rural life has remained static and unchanging over the centuries. All rural societies, even those remote from centres of world power, have long been caught up in the world economic system and involved, in particular ways, with capitalist relations of production. This course examines continuity and change in a range of rural contexts across several continents including North America, and encourages students to consider the notion of “development” from alternative perspectives.

Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; or INTD 2000X/Y.06, FYP

SOSA 3214 Living in a Globalized World

CREDIT HOURS: 3

This course examines various definitions and approaches to globalization as a multidimensional process. Students will discuss topics such as: global culture (identity, migration, hybridity, homogenization, heterogenization), global risks (pollution, health, food, unemployment, poverty), global regulations and norms (international organizations, international regimes, global forums), global technology (computer networks, cyberspace, information age, global media), and global international order (global terrorism, war, security). Students will also explore political movements that demand globalization be made a more equitable process. Finally, while learning more about the complex reality of today's world, students will engage in critical reflections and debates about some of the most fundamental concepts in social sciences like society, culture, nation, state, territory, space and democracy.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3215 Migration and Identity

CREDIT HOURS: 3

This course explores the inter-relating of migration and identity under conditions that are now described as globalization. Migrants become immigrants in particular places. Most depart as citizens of one country seeking temporary refuge, employment, or new citizenship at their destination. As they travel, migrants negotiate the multiple (sometimes competing) demands of kin, employers, and policies set by more than one state. Because commitments and obligations they experience straddle the borders they have crossed, migrants lives are transnational. their ideas of “home” and identity are also reworked as they travel and can be conflicted as their circumstances change. Some writers have concluded contemporary migration is both turbulent and chaotic compared with historical examples. This course begins with review of some historical migration examples and critically reviews how these differ from current globalization flows. However, the main focus is on particular instances of migration as described in ethnographic and sociological case studies. Some key concepts to be discusses in the course are diaspora, transnationalism, and ethnoscape. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, or KING 1000X/Y.06 or KING 1100X/Y.06

SOSA 3220 Coastal Communities in the North Atlantic

CREDIT HOURS: 3

Coastal communities as a social/ecological type are examined as populations, and social structures (territorial, economic, occupational, political) as they have developed in response to particular ecological and social circumstances. Various perspectives which have been applied to coastal communities are examined with regard to the contribution they may make to understanding the dynamics of these communities. The focus is on North Atlantic communities.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

CROSS-LISTING: ENVI 5180.03, GEOG 3220.03, CANA 3220.03

SOSA 3225 Culture, Rights and Power

CREDIT HOURS: 3

The course examines the interrelation of culture, rights and power cross-culturally. It thus considers how the idea and exercise of rights can vary across cultures. It also addresses the ways in which rights and relations of power make themselves felt in people's everyday lives. Finally, it considers the variety of experiences and

understandings of these issues across societies and social groups. Examples may be drawn from social and cultural groups within or outside of Canada. Approved with International Development Studies and Law and Society minor.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3228 Belief Systems: Symbol, Myth, and Meaning

CREDIT HOURS: 3

Emphasis will be placed upon how belief systems and their symbolic representations give meaning to the universe and one's place in it. Topics may include the nature of ritual, the structure of myth, religion and symbols, religion and healing, magic, sorcery, and witchcraft, and how all these phenomena relate to cultural and social change. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100x/y, or 1200X/Y.06 or (1002.03 and 1003.03), or KING 1000X/Y.06 or KING 1100X/Y.06

SOSA 3245 Women and Aging

CREDIT HOURS: 3

As women grow older, the experience of aging is difficult. This course will explore the issues related to socio-economic factors that are major determinants of the well-being of aging women. Topics will include: aging as a process; menopause; violence against older women; older women and housing; self-image and sexuality; health and the aging woman; and older women and poverty.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06 or two classes in Gender and Women's Studies, FYP

CROSS-LISTING: GWST 3810.03, NURS 4370.03

SOSA 3250 Beyond Genes and Circuits: The Anthropology and Sociology of Technoscience

CREDIT HOURS: 3

This course uses the tools of the social sciences to understand the cultural and institutional practices of science and technology. Technology and science both drive and are driven by socioeconomic and cultural change. Little in our lives is unaffected by "technoscience": the toys children play with, the scale of habitus and identity, the substances we eat, entertainment sports, the distribution of our friendships and the sources of our information, the illnesses we get and the treatments they receive, how we make love and how we make war.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP, or permission of the instructor.

SOSA 3275 Crime and Public Policy

CREDIT HOURS: 3

This course deals with the dynamics of change in the criminal justice system that reflect three major factors namely social movements (e.g. the victims movement, the women's movement), social forces (e.g. aging, multiculturalism), and internal processes (e.g. professionalism, rationalization). The course focuses on how outside pressures modify, and are channelled by, the criminal justice system. Approved with Law and Society minor.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3281 Youth Crime

CREDIT HOURS: 3

This course deals with criminal offenses committed by young persons. Etiologies drawn from various disciplines are examined and evaluated. A secondary focus concerns the criminal justice system as it applies to young offenders. Approved with Law and Society minor.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3283 Globalized Security and Justice: the Challenge of Global Crime and Terrorism

CREDIT HOURS: 3

Since the terrorist attacks of 9/11, the relationship between global processes and the issues of crime and terrorism have become more explicit. As new or enhanced global economic, political, cultural and environmental processes facilitate profound social and cultural change, new pressures and opportunities for both traditional and new kinds of crime and various forms of political and religious violence are being created. This course examines how globalization influences the various global and local conditions that create these new kinds of crime and terrorism by exploring various theoretical explanations, and more empirically based case studies of different global crimes and terrorism movements. In addition we will explore how global organized crime and terrorism challenges the ability of western societies and states to ensure political order and security and examine how they are reconfiguring both the rhetoric and reality of state governance and justice.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06, 1200X/Y.06, FYP

SOSA 3284 Living in Cities

CREDIT HOURS: 3

2008 marked the first time in history that more of the global population lived in cities than in rural areas. What perspectives to anthropology and sociology offer on cities and their inhabitants? This course explores the social dynamics that constitute 'the city' and surveys how social scientists have studied and engaged with cities and city-dwellers. It approaches 'the city' both as a whole and through its constituent parts: people and places. Examples may be drawn from cities large and small, near and far - including Halifax.

FORMAT: Lecture| Seminar

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP or PLAN 2005.03

CROSS-LISTING: GEOG 3284.03

SOSA 3285 Sociology of Law

CREDIT HOURS: 3

This course is a sociological examination of law both as a mechanism of social regulation and as a field of knowledge. It explores classical and contemporary theoretical contributions to Sociology of Law. Some specific issues to be analyzed include law and social control, law and social change, social reality of the law, the profession and practice of law, violence against women, and the influence of race, gender and social status in the outcome of legal decisions.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3295 Society and the Police

CREDIT HOURS: 3

The police play an increasingly powerful role in the maintenance of social order in contemporary Canadian society. This course introduces students to sociological theory and research on: (a) the role of police in social development and social control; (b) the historical and political development of public policing; (c) the nature and structure of police work; (d) control and accountability and (e) selected issues in policing such as, policing the family, minorities and the police, community based policing and police discretion. Approved with Law and Society minor.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP

SOSA 3310 Indian Society: Change and Continuity

CREDIT HOURS: 3

The objective of this course is to introduce students to the society and culture of India from an interdisciplinary perspective. India presents a society of enormous complexity and an unbroken living civilization. Approved with International Development Studies.

FORMAT: Lecture| Seminar

PREREQUISITE: Second-year Arts and/or Science course

SOSA 3400 History of Anthropological Theory

CREDIT HOURS: 3

This course considers the foundations and development of social anthropology. Major theoretical schools and the work of prominent anthropologists in those schools are considered, including Cultural Evolution, Historical Particularism, Functionalism, Culture and Personality, Structuralism, Symbolism, Cultural Materialism, and the directions in which contemporary sociocultural anthropology point.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; and SOSA 2001X/Y.06 or 2002X/Y.06, FYP

SOSA 3401 History of Sociological Thought

CREDIT HOURS: 3

Towards the middle of the nineteenth century a novel way of thinking about human existence began to emerge. Primacy was given to the understanding that humans are social beings, their lives and thoughts bounded and patterned by their social environments. This approach formed the basis for a new discipline of analysis eventually named Sociology. This course considers some of the main ideas of the earlier contributors to the new way of thinking: Comte, Marx, Durkheim, Weber, Simmel, Mead, Mannheim and, more recently, Parsons and Schutz. Modern sociology rests largely on the intellectual legacy of these thinkers. They raise questions and formulate answers to them which remain relevant to the sociological enterprise today.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; and SOSA 2001x/Y.06 or 2002X/Y.06, FYP

SOSA 3402 Figuring Out Society

CREDIT HOURS: 3

This course provides an introduction to issues of research design, including the relationship of theory to the choice of methodology. Students are exposed to basic tools and procedures which will help them to analyze the numerical tables and graphs they may come across in sociological or anthropological journals. Other relevant issues will be included, such as, whether it is possible to achieve scientific objectivity when studying human behaviour. It is assumed students enrolled in this course possess basic computer skills.

FORMAT: Lecture| Lab

SOSA 3403 Qualitative and Field Methods

CREDIT HOURS: 3

Research is a craft requiring many skills. This course focuses on skills complementary to those discussed in SOSA 3402.03 (Figuring out Society). Topics may include: theory and the choice of method; applied social science; field work; ethnography; use of interpreters; interviewing; life histories; note taking; analysis of texts; feminist methodologies.

FORMAT: Lecture| Lab

PREREQUISITE: One of SOSA 1000X/Y.06, 1002.03, 1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; and SOSA 2001X/Y.06 or 2002X/Y.06, FYP

SOSA 3405 Contemporary Social Theory

CREDIT HOURS: 3

A variety of approaches constitute theory in contemporary sociology. Among them are those called interactionist, ethnomethodological, structuralist, critical, feminist, rational choice, and post-modernist. This course considers the contributions of these approaches to the enterprise of modern sociology. What are the main premises of particular sociological theories? What are their implications for the study and understanding of the social world? What are the issues that evoke debate between different schools of theory?

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, (1002.03 and 1003.03), 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP; and SOSA 2001X/Y.06 or 2002X/Y.06

SOSA 4000X/Y Honours Seminar in Social Anthropology

CREDIT HOURS: 6

This seminar provides an opportunity for students to engage in sustained investigative scholarship through independent research initiative. The first term concentrates on locating the student's work within a broader set of theoretical and methodological debates in the discipline, while the second term is devoted to students' research and writing activities in preparing the thesis required for honours graduation. In the second term, class time is used for students to make "in progress" reports and presentations about their chosen topics. The course carries two separate grades, one for the course and the other for the thesis, appearing on the transcript as "honours qualifying examination" (a University requirement for all honours students SOSA 8880.00).

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: Honours registration in Social Anthropology and SOSA 2001 (recommended) or SOSA 2002, and two of SOSA 3400, SOSA 3402 and 3403. or permission of the instructor

SOSA 4001 Quantitative Analysis for the Social Sciences I

CREDIT HOURS: 3

This course will introduce quantitative analysis. It will engage issues of research design, the relationship between samples and populations, statistics and inference, as well as basic tests of statistical significance. The course will also introduce tabular, graphical, and bi-variate linear analysis, using computer software. It will encourage secondary data analysis of available datasets, evaluation of surveys, and develop skills through a series of class projects.

FORMAT: Seminar

PREREQUISITE: SOSA 3402.03 and fourth year Major or Honours standing in Sociology and/or Social Anthropology

CROSS-LISTING: SOSA 5001.03

SOSA 4002 Quantitative Analysis for the Social Sciences II

CREDIT HOURS: 3

This course will focus on the use of quantitative methods in social science research. It will introduce students to regression techniques and concentrate on the assumptions motivating quantitative analysis. The course will also look at regression diagnostics and critically weigh options available to researchers when "normal" assumptions are broken. The course will be split into lectures and computer labs using statistical software. The labs will apply methods covered in class and explore potential secondary data resources. The course will develop these skills through a series of class projects.

FORMAT: Seminar

PREREQUISITE: SOSA 3402.03, SOSA 4001.03 and fourth year Major or Honours standing in Sociology and/or Social Anthropology

CROSS-LISTING: SOSA 5002.03

SOSA 4003 Contemporary Perspectives in Ethnography

CREDIT HOURS: 3

Ethnographies and critical writings which grapple with questions of theory and interpretation in a range of contexts - near and far, familiar and strange, local and global - will be examined in this course. Approved with International Development Studies.

FORMAT: Seminar

PREREQUISITE: One of SOSA 1000X/Y.06, 1002.03 and 1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP; SOSA 2001X/Y.06 or 2002X/Y.06; and fourth year Honours standing in Sociology and/or Social Anthropology

CROSS-LISTING: SOSA 5003.03

SOSA 4004 Issues in Economy, Work and Development

CREDIT HOURS: 3

Commencing from a review of the multiple meanings of neoliberalism, this course will examine changing relationships to employment and 'home' under conditions of economic insecurity. Such conditions have long been prevalent in what is termed the 'global south' but are now more obviously present in class-divided northern economies, Canada included. How do people, men and women, young and old, react to increasingly precarious conditions of employment and uncertain futures? Is employment-related mobility becoming an accepted pattern of living, even in stable communities where people had previously relied on secure livelihoods shared between generations? How does migration and immigration shape new understandings of community? Have people's sense of themselves and others, their subjectivities, been reshaped through new political and economic realities? In addition to some key theoretical readings, we will explore these issues through a close reading of several critical ethnographies.

FORMAT: Seminar

PREREQUISITE: One of SOSA 1000X/Y.06, 1002.03 and 1003.03, 1050X/Y.06, 1100X/Y.06 or FYP, 1200X/Y.06 and fourth year Honours standing in Sociology and/or Social Anthropology

SOSA 4005 Issues in Social Justice and Inequality

CREDIT HOURS: 3

Each year, this "issues" course focuses on a different specific topic within the general area. In past years topics have addressed the social and moral problems of social inequalities of various kinds viewed in a context of global changes. Sample topics include but are not restricted to: gender, minority and class inequalities; struggles over rights; social movements; social scenarios surrounding citizenship, migration and immigration; multiculturalism; and border and security studies. Consult Department for specific topic.

FORMAT: Seminar

PREREQUISITE: One of SOSA 1000X/Y.06, 1002.03 and 1003.03, 1050X/Y.06, 1100X/Y.06 or FYP, 1200X/Y.06 and fourth year Honours standing in Sociology and/or Social Anthropology

SOSA 4006 Issues in Critical Health Studies

CREDIT HOURS: 3

Each year, this "issues" course focuses on a different specific topic within the general area. In past years topics have addressed how health is socially and culturally constructed, the differential social and cultural affects of health knowledges and power relationships, and how various perspectives on health are challenged from within and beyond the health professions. Consult Department for the specific topic.

FORMAT: Seminar

PREREQUISITE: One of SOSA 1000X/Y.06, 1002.03 and 1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP and fourth year Honours standing in Sociology and/or Social Anthropology

SOSA 4012 Issues in Sociology and Social Anthropology

CREDIT HOURS: 3

Since the terrorist attacks of 9/11, the relationship between global processes and the issues of crime and terrorism have become more explicit. As new or enhanced global economic, political, cultural and environmental processes facilitate profound social change, new pressures and opportunities for both traditional and new kinds of crime and various forms of political and religious violence are being created. This course examines how globalization influences the various global and local social conditions that create crime and terrorism by exploring specific kinds of global crime and terrorism. In addition we will explore how global organized crime and terrorism challenges the ability of western societies and states to enforce political order and in their "search for security" how modern states/societies are reconfiguring the rhetoric and reality of government, governance and justice. Finally we will explore the challenging issue of how we should personally and societally respond to issues of global security and justice in the future?

NOTE: Course Details listed here also apply to SOSA 4013.

FORMAT: Seminar

PREREQUISITE: One of SOSA 1000X/Y.06, 1002.03 and 1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP and fourth year Major or Honours standing in Sociology and Social Anthropology

SOSA 4013 Issues in Sociology and Social Anthropology

CREDIT HOURS: 3

See SOSA 4012.

SOSA 4014 Special Topics

CREDIT HOURS: 3

Emotion is a central aspect of human experience. For this reason and because emotion is embodied experience seeming to bypass rational thought at times, it is a powerful force in social life. To what degree can we think of emotions as universals tied to our human biology? To what degree are they culturally shaped? And how do people and institutions use (or even manipulate) emotions to accomplish particular ends? Our aim in this class is to explore anthropological and sociological approaches to emotion as we try to answer these questions. In the first portion of the course we will consider how emotion and appropriate emotional reactions vary (or not) across cultures. By looking at cross-cultural examples, we will begin to interrogate some of the things we take for granted about emotions, what they are and what they do. In the second half of the class, we return our attention to emotion in our own society. We will ask questions about how cultural and social processes shape emotion, and its expression. Structurally, there are two main aspects to the course. We will be working through the common set of assigned readings. At the same time, students will be building and discussing their Emotion Portfolios in which each student will focus on a single emotion in various contexts throughout the term. Students will bring in the material they are working on from their portfolios, enriching the class considerably.

FORMAT: Lecture| Seminar

PREREQUISITE: SOSA 1000X/Y.06, 1002.03 and 1003.03, or SOSA 1050X/Y.06, or SOSA 1100X/Y.06 or SOSA 1200X/Y.06, FYP AND SOSA 2001 or 2002

SOSA 4015 Special Topics

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture| Seminar

PREREQUISITE: SOSA 1000X/Y.06, 1002.03 and 1003.03, or SOSA 1050, or SOSA 1100X/Y.06 or SOSA 1200X/Y.06, FYP AND SOSA 2001 or 2002

SOSA 4016 Special Topics

CREDIT HOURS: 3

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture| Seminar

PREREQUISITE: SOSA 1000X/Y.06, 1002.03 and 1003.03, or SOSA 1050, or SOSA 1100X/Y.06 or SOSA 1200X/Y.06, FYP AND SOSA 2001 or 2002

SOSA 4017 Special Topics

CREDIT HOURS: 3

How do anthropological and sociological perspectives build understanding of how people live in the wake of violence? What does it mean to inhabit a "post-conflict" society, and in what ways does the violent past shape life in the present? In this course we will investigate these and other questions as we consider how people live beyond violence. Topics include the politics of commemoration and victimhood, selfhood and social relationships, experiences of displacement and humanitarian aid, gendered violence, and perpetrator experiences of violence and genocide.

FORMAT: Seminar

PREREQUISITE: SOSA 1000X/Y.06, SOSA 1002.03 AND SOSA 1003.03, or SOSA 1050 or SOSA 1100X/Y.06 or SOSA 1200X/Y.06, FYP and SOSA 2001 or SOSA 2002

SOSA 4205 Moral Panics as a Social Phenomenon

CREDIT HOURS: 3

If we relied solely on news reports emanating from the mass media, we might well form the impression that every few years a particular form of allegedly immoral and/or unlawful behavior becomes so widespread as to endanger the very foundation of society. Where such socially shared fears and concerns are exaggerated—i.e., all out of proportion to the actual threat when judged from a rational or empirical perspective — social scientists refer to them as “moral panics.” This course will apply sociological analysis to documented case studies of such panics, both past and present. Examples would include public anxiety about communist infiltration of the U.S. government in the 1950s or, more recently, popularized scares over child sexual abuse, satanism, or serial killing. Particular attention will be paid to the social processes that generate, sustain, and erode adherence to such beliefs.

FORMAT: Seminar

PREREQUISITE: One of SOSA 1000X/Y.06, 1002.03, 1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, FYP and fourth year Major or Honours standing in Sociology and/or Social Anthropology.

SOSA 4211 Embodying the Body : The Human Body for Anatomists and Humanists

CREDIT HOURS: 3

This course explores form and function of the human body and how these relate to broader issues associated with what it means to be human. The course begins with an anatomical exploration of the body, then expands into contemporary issues about the body and embodiment, including gender identity, beauty, etc. (This course does not fulfill the 4000 level elective requirement for Sociology and Social Anthropology honours students.)

FORMAT: Lecture| Lab

PREREQUISITE: SOSA 2501X/Y or SOSA 3150, permission of the instructor required

CROSS-LISTING: ANAT 5555

SOSA 4500X/Y Honours Seminar in Sociology

CREDIT HOURS: 6

This seminar provides an opportunity for students to engage in sustained investigative scholarship through independent research initiative. The first term concentrates on locating the student's work within a broader set of theoretical and methodological debates in the discipline, while the second term is devoted to students' research and writing activities in preparing the thesis required for honours graduation. In the second term, class time is used for students to make “in progress” reports and presentations about their chosen topics. The course carries two separate grades, one for the course and the other for the thesis, appearing on the transcript as “honours qualifying examination” (a University requirement for all honours students SOSA 8880.00).

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: Honours registration in Sociology and SOSA 2002 (recommended) or SOSA 2001 and two of SOSA 3401, SOSA 3402, SOSA 3403 and SOSA 3405, or permission of the instructor

SOSA 4510 Readings in Sociology/Social Anthropology

CREDIT HOURS: 3

In a reading course the student is assigned to a member of staff for regular meetings to discuss readings in a selected area. Papers and research projects are expected.

NOTE: Course Details listed here also apply to SOSA 4520.

PREREQUISITE: Honours registration in Sociology or Social Anthropology, permission of the instructor and permission of the Undergraduate Coordinator

SOSA 4520 Readings in Sociology/Social Anthropology

CREDIT HOURS: 3

See SOSA 4510.

Spanish and Latin American Studies

Location:

Introduction

Spanish opens the doors for you into exciting and diverse cultures in more than 20 countries - it is the first language of over 400 million people, and the second most widely spoken language in the world (after Chinese).

The Spanish-speaking world is home to fascinating people, traditions and institutions, and the Department of Spanish and Latin American Studies is your gateway into this vibrant world.

We warmly welcome students interested in starting Spanish as well as those who already have some experience with the language. Our degree options for the study of the language, literatures and cultures of the Spanish-speaking world are highly practical choices, and also complement studies in such diverse disciplines as political science, sociology and social anthropology, literature, linguistics, history, international development studies, intercultural communication, economics, commerce, and many others.

Fluency in Spanish will be useful to all students seeking careers in the foreign service and NGOs, in business and banking, as entrepreneurs, interpreters, translators, teachers, professors, editors, journalists, and many others. Our language courses emphasize skills acquisition and communicative competence; once you have mastered the fundamentals, a whole world of diverse interests is open for you to engage with: history, politics, social issues, international development, literature, film, art, business and many others.

Diplomas of Spanish as a foreign Language (DELEs)

The Diploma of Spanish as a Foreign Language (DELE) is the official accreditation of the degree of fluency of the Spanish language, issued and recognized by the Spanish Ministry of Education, Culture and Sport.

The Instituto Cervantes is in charge of organizing the exams, while the University of Salamanca is in charge of the preparation, correction and final evaluation of all the tests. The exam tests your ability to read, write, speak and understand Spanish. There are six levels of DELEs offered that match the divisions determined by the Common European Framework of Reference for Languages:

Diploma de Español A1

Beginner level: You can understand and use daily expressions frequently used in any part of the Spanish-speaking world, aimed at satisfying immediate needs-asking and giving basic personal information about yourself and daily life, and interacting on a basic level with speakers, whenever they are speaking slowly and clearly and are willing to cooperate.

Diploma de Español A2

Elementary level: You are capable of understanding daily phrases and expressions frequently used related to areas of experience that are particularly relevant to you-basic information about yourself and your family, shopping, places of interest, occupations, etc.

Diploma de Español B1

Pre-intermediate/threshold level: You have sufficient knowledge of the language to allow control in situations which require a basic use of the language.

Diploma de Español B2

Intermediate level: You have the necessary knowledge of the language to allow communication in everyday situations which do not require specialized terms.

Diploma de Español C1

Upper intermediate/proficiency level: You have the ability to cope in common situations of daily life which require a specialized use of the language.

Diploma de Español C2

Mastery/advanced level: You are able to communicate in all situations requiring advanced use of the language and knowledge of cultural background.

The exams are offered in November and May in more than 50 countries around the world. The Department of Spanish and Latin American Studies organizes the examinations at Dalhousie every spring.

For more information about the format of the exam, dates and application deadlines, contact the Spanish Department DELE coordinator.

BA (120 credit hour) Major in Spanish

In addition to the general degree requirements, students need a minimum of 36 credit hours, a maximum of 54 credit hours in Spanish. At least 18 of these credit hours MUST be at the 3000 level.

Requirements:

- SPAN 2020X/Y.06 or equivalent
- SPAN 2090.03 (this does not constitute your literature requirement)
- SPAN 3020.03 or SPAN 3025.03
- SPAN 3035.03
- SPAN 3036.03
- Six credit hours in Spanish and Spanish-American Literature
- Six credit hours of Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2109, SPAN 2100, SPAN 2110, SPAN 2105, SPAN 2150, SPAN 2200, SPAN 2130)
- An additional six credit hours of Spanish at the 3000 or 4000 level

BA (120 credit hour) Double Major in Spanish

In addition to the general degree requirements, students need a combination of 60 credit hours, with a minimum of 30 credit hours in Spanish.

Requirements:

- SPAN 2020X/Y.06 or equivalent
- SPAN 2090.03 (this does not constitute your literature requirement)
- SPAN 3020.03 or SPAN 3025.03
- SPAN 3035.03
- SPAN 3036.03
- Three credit hours in Spanish or Spanish-American Literature
- Three credit hours in Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2109, SPAN 2100, SPAN 2110, SPAN 2105, SPAN 2150, SPAN 2200, SPAN 2130)
- An additional six credit hours in Spanish at the 3000 or 4000 level.

BA with Honours in Spanish

Potential Honours applicants are encouraged to consult the Department's Undergraduate Advisor during their second year of study. Deadline for application should be three semesters before your graduation. (A minimum of 54 credit hours in Spanish.)

Requirements:

- SPAN 2020X/Y.06 or equivalent
- SPAN 2090.03 (this does not constitute your literature requirement)
- SPAN 3020.03 or SPAN 3025.03
- SPAN 3035.03
- SPAN 3036.03
- Six credit hours in Spanish and/or Spanish-American Literature
- Six credit hours of Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2109, SPAN 2100, SPAN 2110, SPAN 2105, SPAN 2150, SPAN 2200, SPAN 2130)
- 21 additional credit hours of Spanish. At least six credit hours at the 3000 or 4000 level
- SPAN 4980.03 Student must complete an Honours Thesis in Spanish.

BA with Combined Honours

(A combination of 66 credit hours):

- If Spanish is your primary major, a minimum 36 credit hours in Spanish and an honour's thesis completed in the Spanish and Latin American Studies Department.
- If Spanish is your secondary major, a minimum of 30 credit hours in Spanish.

Requirements (if Spanish is your primary major):

- SPAN 2020X/Y.06 or equivalent
- SPAN 2090.03 (this does not constitute your literature requirement)
- SPAN 3020.03 or SPAN 3025.03 half credit
- SPAN 3035.03
- SPAN 3036.03
- Six credit hours in Spanish and Spanish-American Literature
- Six credit hours of Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2109, SPAN 2100, SPAN 2110, SPAN 2105, SPAN 2150, SPAN 2200, SPAN 2130)
- Three credit hours in Spanish at the 3000 or 4000 level
- SPAN 4980.03 Student must complete an Honours Thesis in Spanish.

Requirements (if Spanish is your secondary major):

- SPAN 2020X/Y.06 or equivalent
- SPAN 2090.03 (this does not constitute your literature requirement)
- SPAN 3020.03 or SPAN 3025.03
- SPAN 3035.03
- SPAN 3036.03
- Three credit hours in Spanish or Spanish-American Literature
- Three credit hours in Spanish Civilization, Spanish-American Civilization or Hispanic Culture (this includes SPAN 2040, SPAN 2069, SPAN 2070, SPAN 2109, SPAN 2100, SPAN 2110, SPAN 2105, SPAN 2150, SPAN 2200, SPAN 2130)
- An additional six credit hours of Spanish at the 3000 or 4000 level

BA (90 credit hour) Minor in Spanish

See the Minor in Spanish section of this Calendar

Minor in Spanish

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

A BA (90 credit hour) degree program with a minor in Spanish is also available.

Requirements:

- SPAN 2020X/Y.06: Intermediate Spanish or equivalent
- SPAN 3035.03: Advanced Spanish I
- SPAN 3036.03: Advanced Spanish II
- SPAN 3020.03: Translation or SPAN 3025.03: Traducción: Ingles-Espanol
- either SPAN 2005 taken in the same year as SPAN 2020X/Y.06 or SPAN 3005.03

Minor in Hispanic Cultures

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

Requirements

Students must complete between 18 and 27 credit hours including:

- SPAN 2100.03
- SPAN 2200.03

And any 12 credit hours from:

- SPAN 2040.03
- SPAN 2069.03
- SPAN 2070.03
- SPAN 2105.03
- SPAN 2109.03
- SPAN 2110.03
- SPAN 2130.03
- SPAN 2150.03
- SPAN 3095.03

Minor in Hispanic Literature

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

Requirements

A minimum 21 to a maximum 27 credit hours in Spanish. Must include:

- SPAN 2020X/Y.06 Intermediate Spanish or equivalent
- SPAN 2090.03: Introduction to Hispanic Literary Study
- SPAN 3505.03: Introduction to Spanish Literature
- SPAN 3515.03: Introduction to Latin American Literature
- SPAN 3215.03: Seminario de literatura latinoamericana or SPAN 3510.03: Literatura hispanoamericana contemporanea
- SPAN 3500.03: Literatura espanola contemporanea or SPAN 3525.03: Historia e historias: la literatura como alternativa

Minor in Latin American Studies

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

Requirements

Students seeking a minor in Latin American Studies must complete a minimum of 24 to a maximum of 27 credit hours and is expected to complete SPAN 2020X/Y.06, plus 6 credit hours from list A and 12 credit hours from list B. At least 3 credit hours must be at the 3000 level or above.

List A: six credit hours/any two of the following:

- SPAN 2069.03: Mexico and Central America to 1979. From Conquest to Revolution
- SPAN 2070.03: Mexico and Central America: From Revolution to Drug Wars

- SPAN 2109.03: Cuba from Colonial Times to 1961
- SPAN 2110.03: Cuba in Revolution, 1961-the Present
- SPAN 2130.03: Latin American dictators: From Fact to Fiction
- SPAN 2200.03: Latin American Culture: From the Maya to the 21st Century
- SPAN 3515.03: Intro to Latin American Literature
- SPAN 3510.03: Literatura hispanoamericana contemporanea
- SPAN 3408.03: The Cuban Development Model

List B: 12 credit hours from the following:

- HIST 2381.03: Latin America
- HIST 2386.03: Colonial Latin America
- HIST 3390.03: Latin America: Revolution and Repression
- HIST 4300.03: Topics in Latin American History
- INTD 3302.03: Social Development in Cuba
- INTD 3303.03: The Political Economy of Cuba
- INTD 3304.03: Sustainable Development in Cuba
- INTD 3310.06: Cuban Culture and Society
- INTD 3401.03: Seminar in Development Studies
- POLI 3360.03: Politics in Latin America
- SOSA 3168.03/GWST 3168.03: Issues in Latin American Society

Programs and Courses Abroad

The Salamanca Program at the Universidad de Salamanca

The Salamanca Program is a special inter-disciplinary program of instruction designed to allow Dalhousie students to undertake both an intensive study of the Spanish language and courses in Spanish culture. Students must have completed SPAN 2020X/Y.06 with at least a standing of B-. The program takes place during the fall, winter, spring or summer term, and is offered at the Universidad de Salamanca in Salamanca, Spain. Dalhousie University will grant 18 credit hours to those students who successfully complete their courses in Spain. Enquires and applications should be addressed to the coordinator of the Program. Students will register via Letter of Permission and will receive grades on a Pass/Fail basis. The courses will be noted on the student's academic record as a transfer credit.

Students must take the equivalent of three full courses.

Compulsory courses:

- Lengua española (nine credit hours)

Students will then select ONE course from each of the following three Options.

Option 1

- Conversación y redacción (three credit hours)
- La mujer en la historia de España (three credit hours)
- Historia de la España contemporánea (three credit hours)

Option 2

- Cultura española (three credit hours)
- Literatura española e hispanoamericana (three credit hours)
- El mundo árabe en el mundo hispánico (three credit hours)
- Destrezas orales y escritas (three credit hours)

Option 3

- Historia del arte español (three credit hours)
- Español de los negocios (three credit hours)
- Cine español e hispanoamericano (three credit hours)

The Cuba Program at FLACSO/Havana

This program is given by FLACSO/Havana and generally takes place in the winter term. All course work is conducted in the Spanish language. Students must have completed SPAN 2020X/Y.06 with at least a standing of B-. See course descriptions for INTD 3301.03, INTD 3302.03, INTD 3303.03, INTD 3304.03, and INTD 3306.06 in the International Development Studies Section of this Calendar. Students are able to receive either INTD or SPAN credits. For more information, please contact the Department of International Development Studies.

The Mexico Program at the University of Campeche

This program, designed for students with a minimum of two years' university-level Spanish, is located at the Universidad Autónoma de Campeche, in the southwest of the Yucatán peninsula, in Mexico. Students must have completed SPAN 2020X/Y.06 with at least a standing of B-. It started in the Fall of 1998, and is administered by the university's Centro de Español y Maya. Students can be located with Mexican families if they desire. They are also encouraged to travel and see the superb Maya architectural sites in the Yucatán region. The city of Campeche, situated on the Caribbean coast, has a population of approximately 190,000. It was founded in 1540. The cities of Halifax and Campeche twinned in 1998, and there have been several educational, political, and commercial exchanges. This program is offered in the fall semester only.

Students will register for courses via Letter of Permission and will receive grades on a Pass/Fail basis. The courses will be noted on the student's academic record as a transfer credit.

Courses taken at the University of Campeche are:

- Gramática Intensiva (six credit hours)
- Vocabulario Intensivo (six credit hours)
- Historia Mexicana (six credit hours)

The Peru Program at the Pontificia Universidad Católica del Perú

This program takes place during four weeks in July in Lima, at the Pontificia Universidad Católica del Perú (PUCP). Founded in 1917, today it is among the thirty most important universities in Latin America and occupies the first position in Peru. Students will study Spanish and Peruvian culture courses. The program offers four visits to the main cultural attractions in Lima to provide the subject of discussion in the language course. Students will have a PUCP buddy service to help them adapt to the academic and social life at PUCP as well as to the city of Lima and enrich the learning experience of the Spanish language. Students will stay at Peruvian families' homes where they will find every amenity they need and receive breakfast and dinner. All classwork is conducted in Spanish.

Students must have completed SPAN 2020X/Y.06 with at least a standing of B-.

Dalhousie University grants 9 or 12 credit hours to those students who successfully complete their classes in Peru. Students will register via Letter of Permission and grades will be entered on a Pass/Fail basis. Courses will appear on the student's academic record as transfer credits.

Students will register for the following courses for a total of 9 or 12 credit hours:

- Advanced Spanish (three credit hours)
- Peruvian Culture (three or six credit hours)
- Practical Experience (three credit hours)

SPAN 3310.06: Cuban Culture and Society

See course description for INTD 3310.06 in the International Development Studies section of this calendar.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Courses Offered on Campus

PLEASE NOTE:

If you have taken two or more years of Spanish in High School or have studied it previously in another institution, you need to take the **Spanish Placement Test (SPT)**.

The **Spanish Placement Test** is a one and a half hour standardized multiple-choice test that is designed to assess your current level in Spanish and place you in the course better suited to your needs. Students who wish to register for a language course before taking this test may do so, but care should be taken in choosing it. Please read the course descriptions below carefully and try not to underestimate your knowledge.

This test is administered online. Please contact our Academic Advisor (spanish.advising@dal.ca) to register for the test. Scores from this test are normally available within a day, and are considered valid for up to a year from the date it was taken.

Students who are taking or have taken any language course at Dalhousie do NOT need to take this test.

Not all courses are offered every year. Please consult the current timetable.

Course Descriptions

SPAN 1015 Spanish on the Go

CREDIT HOURS: 3

SPAN 1015 is a hands-on, practical approach to learning Spanish. Students will gain a working knowledge of Spanish by engaging in communicative activities, role play, and task-based activities. The objective of this class is to facilitate students' functional ability in Spanish and to enable them to participate in various everyday activities when they are in a Spanish-speaking context.

EXCLUSIONS: SPAN 1020X/Y.06, SPAN 2020X/Y.06

SPAN 1020X/Y Beginning Spanish

CREDIT HOURS: 6

In SPAN 1020 students will acquire a general knowledge of Spanish by engaging in communicative and task based activities that focus on developing speaking, listening, reading and writing skills. This course follows the A1/A2 levels of the Common European Framework of Reference for Languages (CEFR). Students will gain competence in grammatical structures, vocabulary, pronunciation and cultural awareness.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

SPAN 1025 Advanced Beginning Spanish

CREDIT HOURS: 3

Students with prior knowledge of Spanish will join SPAN 1020 X/Y.06 at midyear for the winter semester only. This course follows the A2 level of the Common European Framework of Reference for Languages (CEFR). Students will gain competence in grammatical structures, vocabulary, pronunciation, and cultural awareness.

PREREQUISITE: Knowledge of Spanish to the equivalent of first half of SPAN 1020X/Y.06

EXCLUSIONS: SPAN 1020X/Y.06

SPAN 1200X/Y Spanish for Reading

CREDIT HOURS: 6

For students who wish to acquire reading knowledge of Spanish for general academic purposes. Overview of fundamentals of Spanish grammar and vocabulary, with emphasis on reading for comprehension of texts in the arts, humanities and social sciences. This course does not satisfy the Bachelor of Arts Language Requirement (see SPAN 1020).

NOTES: Credit can be given for this course only if X and Y are completed in consecutive terms; partial credit cannot be given for a single term.

PREREQUISITE: None. Open to students in all departments. No prior knowledge of Spanish is necessary

SPAN 2005 Español Práctico - Nivel Intermedio

CREDIT HOURS: 3

The objective of this course is to continue developing the four language skills in a practical setting. This course is required for the Minor in Spanish Language and should be taken in the same academic year as SPAN 2020XY.06. Students planning to take any of our programs abroad or the Diploma of Spanish as a Foreign Language (DELE) (B1 level) will find the course particularly useful.

LECTURE HOURS PER WEEK: 3

COREQUISITE: SPAN 2020XY.06 (B1 level)

PREREQUISITE: Span 1020XY.06 (A2 level), equivalent or instructor's permission

RESTRICTIONS: May not be taken after SPAN 2020XY.06 or any Spanish 3000 level language course

SPAN 2020X/Y Intermediate Spanish

CREDIT HOURS: 6

In SPAN 2020 students will acquire an intermediate knowledge of Spanish equivalent of a B1 level, by adopting an action oriented approach and engaging in communicative and task based activities. This course follows the system for learning, teaching and assessing languages established by the Common European Framework of Reference for Languages (CEFR) that defines the competencies the students need to master in the following categories: Comprehension (Listening and Reading) and Expression (Interaction, Oral and Writing).

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: SPAN 1020X/Y.06 or SPAN 1025.03

SPAN 2025 Advanced Intermediate Spanish

CREDIT HOURS: 3

Students whose level of Spanish is higher than the first semester of Span 2020 but lower than Span 3035 will join the Span 2020 course for the second semester. Students will acquire an intermediate knowledge of Spanish equivalent of a B1.2 level, by adopting an action oriented approach and engaging in communicative and task based activities. This course follows the system for learning, teaching and assessing languages established by the Common European Framework of Reference for Languages (CEFR) that defines the competencies the students need to master in the following categories: Comprehension (Listening and Reading) and Expression (Interaction, Oral and Writing).

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Knowledge of Spanish equivalent to the first half of SPAN 2020X/Y (B1.1 level. Students should contact the department Academic Advisor to register for the Online Placement Test.

EXCLUSIONS: SPAN 2020X/Y.06

SPAN 2040 Spanish for Business

CREDIT HOURS: 3

Spanish for business and international trade. Introduction to the Spanish of international business and to the social cultural norms of negotiation in Spanish-speaking countries.

FORMAT: Lecture| Discussion

PREREQUISITE: SPAN 2020X/Y.06

SPAN 2069 Mexico and Central America to 1979: From Conquest to Revolution

CREDIT HOURS: 3

Events in Central America are frequently covered in our media, causing people to believe that "the unrest" there is recent. This course seeks to examine the historical roots of the conflict from the colonial period until the 1970s. The aim of the course is to provide students with a background knowledge of this area, so that they can better understand current developments there.

FORMAT: Lecture| Discussion

PREREQUISITE: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary

CROSS-LISTING: HIST 2382.03

SPAN 2070 Mexico and Central America since: From Revolution to Drug Wars

CREDIT HOURS: 3

Following an examination of the indigenous heritage, and the colonial legacy of the conquistadors, the course deals principally with the contemporary period, examining the Mexican Revolution and its aftermath, Nicaragua under the Sandinistas, the impact of NAFTA, the "democracy" of Mexico, gang wars and narcotics, the U.S. role in the region, the human rights situation in Central America, and probable developments in the region. The course is designed to provide an understanding of the contemporary reality of this volatile region.

FORMAT: Lecture| Discussion

PREREQUISITE: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary

CROSS-LISTING: HIST 2383.03

SPAN 2090 Introduction to Hispanic Literary Study

CREDIT HOURS: 3

This course will introduce students to literary analysis and critical writing in Spanish. Readings will include works from a variety of periods, genres and regions.

NOTES: Does not fulfill the literature requirement for any Spanish degree programs.

FORMAT: Lecture

PREREQUISITE: SPAN 2020X/Y.06

SPAN 2100 Evolving Spain: History, Culture, Society

CREDIT HOURS: 3

This course provides an overview of the major sociopolitical and cultural elements, from the Middle Ages to the present, that formed contemporary Spain.

FORMAT: Lecture| Discussion

PREREQUISITE: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary.

CROSS-LISTING: HIST 2065.03

SPAN 2105 Catalan Language and Culture

CREDIT HOURS: 3

Introduction to Catalan, the Romance language spoken by some 8 million people in northeastern Spain-Barcelona and Catalonia - southern France, the Balearic Islands and Sardinia. Elementary Catalan language and an introduction to Catalan culture.

FORMAT: Lecture| Discussion

PREREQUISITE: Two years' study of any Romance language, or permission of instructor

SPAN 2109 Cuba from Colonial Times to 1961

CREDIT HOURS: 3

While many people are aware of the impact of the Cuban Revolution of 1959, few are aware of the kind of society that existed in Cuba beforehand. This course seeks to

examine the historical roots of the country from the colonial period until the 1960's, with particular attention being paid to socio-cultural aspects. The objective is to provide students with a background knowledge of this country and its current reality.

FORMAT: Lecture| Discussion

PREREQUISITE: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary

CROSS-LISTING: HIST 2384.03

SPAN 2110 Cuba in Revolution, 1961- the Present

CREDIT HOURS: 3

Cuba, the only Communist society in the Western Hemisphere, has undergone a dramatic political and economic transformation. The Revolution has also brought about changes in education, the arts, the role of women, race relations, and athletics. The course focuses on the problems and achievements of the Revolution, the peculiarities of Communism in a Caribbean society, and its effect on literature and the arts. Particular attention is spent on the post-1990 period.

FORMAT: Lecture| Discussion

PREREQUISITE: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary

CROSS-LISTING: HIST 2385.03

SPAN 2130 Latin American dictators: From Fact to Fiction

CREDIT HOURS: 3

The history of Latin America since Independence has been characterized by the rise to power of countless dictators. Some of the best Latin American novels portray these almost mythical figures who to this day wield absolute power in many countries. The course examines the literature and history of this phenomenon with particular attention to the twentieth century, and attempts to discover its roots in militarism, underdevelopment, and imperialism.

FORMAT: Lecture| Discussion

PREREQUISITE: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary

CROSS-LISTING: HIST 2388.03

SPAN 2150 Hispanic Identities Through Film

CREDIT HOURS: 3

This course focuses on the concept of Hispanic identity, through the study of contemporary and historical sociocultural and geopolitical issues, as manifested in cinema from around the Spanish-speaking world.

FORMAT: Lecture| Discussion

PREREQUISITE: SPAN 2020X/Y.06 or equivalent

SPAN 2200 Latin American Culture: From the Maya to the 21st Century

CREDIT HOURS: 3

The aim of this course is to provide basic understanding of this varied and historic area. This course examines the development of Latin America from pre-Columbian times to the present. It also examines the way in which the reality of Latin America has shaped a continental cultural identity.

FORMAT: Lecture| Discussion

PREREQUISITE: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary.

SPAN 3005 Espanol Practico - Nivel avanzado

CREDIT HOURS: 3

The objective of this course is to continue developing the four language skills in a practical setting. This course could be taken as part of the Minor in Spanish Language as well as a 3000 level elective for other Spanish degrees. It should be taken in the same academic year as Span 3035/3036. This course will be particularly useful to students planning to write the Diploma of Spanish as a Foreign Language (DELE)(B2 level)

FORMAT: Lecture

PREREQUISITE: SPAN 2020X/Y.06 (B1 Level) or equivalent or instructor's permission

SPAN 3020 Translation

CREDIT HOURS: 3

Exercises in translation, from Spanish to English. This course assists students to understand the basic strategies of translation.

FORMAT: Lecture| Discussion

PREREQUISITE: SPAN 2020X/Y.06, or equivalent

SPAN 3025 Traducción: Inglés-Español

CREDIT HOURS: 3

The objective of this course is to develop basic translation skills through the practice of translating English texts into Spanish. The approach would be methodological and practical: theoretical issues will be discussed to solve translation problems. After establishing the fundamental concepts, the course will progress to examine a series of important aspects of translation; cultural trans-position, phonic, graphic and prosodic problems, grammatical and lexical issues, language variety in texts, etc. Each aspect outlined will have a practical component in which students are given a concrete translation task to solve. Group and class discussions will follow. The aim of the course is to provide students with a general view of the mechanics of translation to then encourage the creative aspects of the process.

FORMAT: Lecture| Discussion

PREREQUISITE: SPAN 3035.03 or equivalent

SPAN 3035 Advanced Spanish I

CREDIT HOURS: 3

The objective of this course is to reinforce and expand students' skills in listening, speaking, reading, writing, integrated with an advanced grammar review and extended vocabulary.

FORMAT: Lecture

PREREQUISITE: SPAN 2020X/Y.06, or equivalent

EXCLUSIONS: SPAN 3010.03, SPAN 3015.03, SPAN 3030.03, SPAN 3060.03

SPAN 3036 Advanced Spanish II

CREDIT HOURS: 3

A continuation of SPAN 3035. The objective of this course is to reinforce and further students' skills in listening, speaking, reading, writing, integrated with an

advanced grammar review and extended vocabulary.

FORMAT: Lecture

PREREQUISITE: SPAN 3035.03. or equivalent

EXCLUSIONS: SPAN 3010.03, SPAN 3015.03, SPAN 3030.03, SPAN 3060.03

SPAN 3090 Spanish Phonetics and Pronunciation

CREDIT HOURS: 3

This course seeks to introduce students to the analysis of the sound system of Spanish. Students will learn to identify and adjust non-native patterns of pronunciation through contrastive analysis, transcriptions and pronunciation practice. Students will master basic concepts and techniques of phonetic analysis and the general phonological characterization of Spanish dialects. The course will focus on the attributes of Spanish sounds, differences between the English and the Spanish sound systems, and the main differences among varieties of Spanish.

FORMAT: Lecture| Discussion

PREREQUISITE: SPAN 2020X/Y.06 or equivalent

SPAN 3095 Evolution of Spanish

CREDIT HOURS: 3

This course offers a panoramic study of the evolution of spoken Latin into modern Spanish (no prior knowledge of Latin required). Topics covered will include: the major historical events that influenced the evolution of Spanish; phonological change; morphological and syntactic change; lexical borrowings from other languages; and semantic change.

FORMAT: Lecture| Discussion

PREREQUISITE: SPAN 2020 X/Y.06 or equivalent

SPAN 3190 Conversation & Expression

CREDIT HOURS: 3

This course is conducted in Spanish and engages students in conversation in a variety of formats toward the goal of further developing oral proficiency. We will aim to improve oral expression, conversation, and listening comprehension. Short essays or videos on topics of current interest are prepared outside of class and serve as the basis for general class discussions. Although the course deals mainly with conversation, many of the exercises will be directed toward oral practice of verb structure and tenses learned in the previous courses. Activities include improvisations and focus on small group and pair work as well as individual presentations. Students will strengthen oral skills and build vocabulary through practice in different types of discourse, including narration, description, critical commentary, debate, roll play, listening to music, reading newspapers and watching the news.

FORMAT: Seminar| Discussion

PREREQUISITE: SPAN 3035.03

SPAN 3215 Seminario de literatura latinoamericana

CREDIT HOURS: 3

This course studies the work of Latin American women writers. It seeks to introduce students to critical approaches and recurring themes in Latin American women's literature. Representative works are studied within their historical and cultural context. Readings include novels, short stories, plays and caricatures.

FORMAT: Lecture| Discussion

PREREQUISITE: SPAN 2090.03

SPAN 3310 Cuban Culture and Society

CREDIT HOURS: 6

See course description for INTD 3310.06 in the International Development Studies section of this calendar.

SPAN 3408 The Cuban Development Model

CREDIT HOURS: 3

This course examines the evolution of the Cuban development model, from the Conquest and colonization by the Spanish to the reforms of the early 21st Century. The objective is to develop an understanding of the various development strategies employed by Cuba, particularly since the revolution of 1959. When asked about the Cuban development model, most people nowadays would say "tourism". Thirty years ago it was sugar--as it had been from the beginning if the 16th Century. In fact Cuba obtains most of its hard currency from medical-related services--mainly from the exportation of medical services, but also from the sale of sophisticated biotechnological products. Cuba's approach has evolved dramatically in the last two decades, and particular attention will be paid to this period.

FORMAT: Lecture| Discussion

PREREQUISITE: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary.

CROSS-LISTING: INTD 3408.03

ASSESSMENT METHOD: Two papers (20% each) and One final paper (60%)

SPAN 3500 Literatura española contemporánea

CREDIT HOURS: 3

This course is a survey of the most important authors of Spanish contemporary literature. Students will study internationally well known writers such Rosa Montero, Arturo Pérez-Reverte, Manuel Vázquez Montalbán, and others. Areas of special focus may include the writings of Antonio Muñoz Molina and Eduardo Mendoza, both of whom are considered representative of the Spanish transition period. The aim of this course is to introduce students to a specific area of Spanish literature focusing on the historic context in which the novels are written.

FORMAT: Lecture| Discussion

PREREQUISITE: SPAN 2090.03

SPAN 3505 Introduction to Spanish Literature

CREDIT HOURS: 3

This course is an introduction to Spanish literature presenting selected works of prose, poetry and theater from Spain. This is a survey of literature from the Middle Ages to the 20th century. Entirely conducted in Spanish, normally taken in the second or third year of study, the everyday work in this class involves group discussion and lectures. The aim of this course is to introduce students to general notions of literary history and to the basic concepts involved in reading literary texts with particular emphasis on the development of both oral and written linguistic expression.

FORMAT: Lecture| Discussion

PREREQUISITE: SPAN 2090.03

EXCLUSIONS: SPAN 2500.03

SPAN 3510 Literatura hispanoamericana contemporánea

CREDIT HOURS: 3

This is a panoramic course that studies Latin American literature from the "boom" to the present. It is divided into five sections, each of which will focus on a literary genre: short stories, essays, journalism, theatre and novels.

FORMAT: Lecture| Discussion

PREREQUISITE: SPAN 2090.03

SPAN 3515 Introducción a la literatura latinoamericana (Intro to Latin American Literature)

CREDIT HOURS: 3

This is a panoramic course that serves as an introduction to Latin American literature. It is based on a selection of prose and poetry from the most representative periods and authors, spanning from pre-Columbian times to the twentieth century.

FORMAT: Lecture| Discussion

PREREQUISITE: SPAN 2090.03

EXCLUSIONS: SPAN 2510.03

SPAN 3520 Topics in Culture & Identity in the Spanish-Speaking World

CREDIT HOURS: 3

A broad outline of the interaction between culture and identity in the Hispanic world. Focus will be on the end of the 19th and the 20th centuries, and the connection between artists and identity in relation to political, culture and social forces. Selected works of artistic expression (art, literature, music, etc.) become the point of departure for understanding the Spanish-speaking world. Specific topics may vary.

FORMAT: Lecture| Discussion

PREREQUISITE: SPAN 2020X/Y.06 and SPAN 2090.03

SPAN 3525 Historia e historias: la literatura como alternativa

CREDIT HOURS: 3

This course is designed for advanced students who have taken the available courses at the 2000 level or equivalent. During this course students will explore the relationship between science and literature, especially subversive representations of History in fictional texts during the 20th century. Lectures will be organized on a chronological basis and will cover different Spanish-speaking cultural areas. The aim of this course is to introduce students to a specific area of Hispanic literature focusing on the historic facts included in novels and essays.

FORMAT: Lecture| Discussion

PREREQUISITE: SPAN 2090.03

SPAN 3905 Estudios hispánicos avanzados

CREDIT HOURS: 6

This course offers the student an opportunity to study aspects of Hispanic culture not already included in other language offerings or in literature courses more narrowly defined by period, genre, etc. It takes advantage of special research interest of staff or the unique expertise of visiting faculty to provide instruction not regularly available here.

FORMAT: Lecture

PREREQUISITE: SPAN 2020X/Y.06

SPAN 3920 Experiential Learning

CREDIT HOURS: 3

Experiential learning combines formal learning with practical experience using the Spanish language; students are required to volunteer/intern for a minimum of 60 hours over the term, or approximately 4-5 hours per week. Students will also compile a portfolio under the supervision of the course instructor, to include relevant readings and assignments (these may include reading responses, reports, presentations, essays).

FORMAT: Discussion

PREREQUISITE: SPAN 2020X/Y.06

SPAN 3970X/Y Lecturas dirigidas de literatura Hispanoamericana

CREDIT HOURS: 3

PREREQUISITE: SPAN 2090.03

SPAN 3975X/Y Estudios hispánicos dirigidos

CREDIT HOURS: 3

SPAN 3980X/Y Lecturas para especialistas

CREDIT HOURS: 3

SPAN 4980X/Y Honours Reading Class

CREDIT HOURS: 3

PREREQUISITE: Only open to students in graduating year of Spanish Honours program.

SPAN 4985X/Y Independent Advanced Hispanic Studies

CREDIT HOURS: 3

PREREQUISITE: Only open to students in graduating year of Spanish Honours program.

Theatre - Fountain School of Performing Arts

Location:

Building/Room: Dalhousie Arts Centre

Halifax, NS B3H 4R2
Telephone: (902) 494-3772
Fax: (902) 494-2801
Website: dal.ca/performingarts
Email Address: fspa@dal.ca

Introduction

The Fountain School of Performing Arts offers many ways to study the theatre or some aspect of it in tandem with other disciplines offered by the university.

1. You can undertake programs that lead to a university degree: an Honours or Combined Honours BA (120 credit hours) or a BA with Major (120 credit hours)
2. You can enroll in a Diploma program in Costume Studies (two years) which combines academic study and research skills with creative design interpretation and applied skills;
3. You can complete a Minor in Theatre to enhance your degree.
4. You can select certain theatre courses to reinforce and complement your studies in other disciplines offered by the university;

The degree programs involve a curriculum of Theatre courses and a selection of other courses in different disciplines. The University has Academic Regulations which specify how these programs must be arranged. These regulations are all listed earlier in this Calendar, and prospective students should refer to them to become aware of the opportunities offered. There are a surprising number of different ways to arrange one's studies; recommended here are the paths you can follow if Theatre is your primary interest.

Facilities

The Fountain School of Performing Arts is located in the Dalhousie Arts Centre. Theatre facilities include one proscenium theatre, two studios, and supporting workshops. Teaching spaces for costume studies are currently located off-campus. The School office is in Room 514 of the Arts Centre.

Because of the work involved, some theatre courses have a limited enrolment. All students wishing to take any practical course in Theatre should, therefore, first consult with the Fountain School.

PLEASE NOTE: Theatre by its nature requires evening work. Students, especially in Acting, Technical Theatre and Stage Design, and Costume courses, are advised not to undertake other evening commitments.

Degree Programs

In addition to the Fountain School requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section of this calendar.

BA Honours in Theatre Theatre Studies

This degree is designed for students who wish to follow a program of theatre studies that keeps the whole of theatre in perspective, is academically oriented, and serves as a strong foundation for graduate degrees in Theatre and Drama, or as a good preparation for a variety of professional and education degrees. Honours students must maintain an average of at least B+ in all of their advanced Theatre courses.

Year 1

- THEA 1000X/Y.06
- six additional credit hours in THEA at 1000-level
- three courses in other subjects

Year 2

- THEA 2011.03
- THEA 2012.03
- THEA 2901.03
- THEA 2902.03
- 18 credit hours in other subjects

Years 3 and 4

- THEA 3200X/Y.06
- THEA 3501.03
- THEA 3502.03
- THEA 3600X/Y.06
- THEA 4500.03
- THEA 4501.03
- 18 credit hours in advanced electives in THEA
- six credit hours in advanced course in dramatic literature from another department (ENGL, CLAS, RUSS, SPAN, FREN, GERM, etc.)
- 12 credit hours in other subjects, including THEA

An additional six credit hours (the Honours Qualifying Project) consists of fulfilling the function of a dramaturge or assistant director on one of Fountain School stage productions.

NOTE: Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.

Acting

The main objective of the Acting Program is to satisfy the needs of those students who have decided to pursue a career as performers in the professional theatre. The program is progressive in nature, culminating in a company of student actors who perform in three theatrical productions in the Fountain School season in their fourth year, plus a course project. Third year students in the Acting Program will participate in the third play of the Fountain School season. Auditions are held at the end of the first year for admission into the upper years of study. In addition to meeting degree requirements, students must achieve a B in all Acting Program courses, and must also be recommended by the Acting Faculty in order to advance to the next year's course of study. The program provides these students with professional training and the benefits of a liberal-arts education at a major Canadian university. Honours students must maintain an average of at least B+ in all of their advanced Theatre courses.

Year 1

- THEA 1000X/Y.06
- THEA 1800X/Y.06
- 18 credit hours in other subjects

The second year of the Acting Program introduces students to the fundamental principles of acting through the study of Shakespearean text, voice, and movement. Emphasis is placed on the discipline and dedication that is the basis for a career in the professional theatre.

Year 2

- THEA 2011.03
- THEA 2012.03
- THEA 2800X/Y.06
- THEA 2810X/Y.06
- THEA 2820X/Y.06
- six credit hours in other subject

The third year of the Acting Program is structured to build on the knowledge acquired in the previous two years. Students learn how to integrate what they have discovered as they gain further understanding of skills, techniques and creative expression. Third-year students perform in one play of the Fountain School season and may be invited to perform in others, depending upon the needs of the plays chosen and the student's readiness for the performance situation as assessed by the Acting Faculty.

Year 3

- THEA 3800X/Y.06
- THEA 3810X/Y.06
- THEA 3820X/Y.06
- MUSC 1081.03
- nine credit hours in other subjects

In the final year of the Acting Program, students' studies are geared toward performance and entering the world of professional acting. The company of fourth year Acting Program students will be cast in three plays within the Fountain School season. Courses are devoted to preparing the student actor for transition into the profession.

Year 4

- THEA 4800X/Y.06
- THEA 4840X/Y.06
- THEA 3501.03
- THEA 3502.03
- 12 credit hours in other subjects (one of these can be in THEA)

Honours Acting students will qualify for Honours with the satisfactory completion of a professional portfolio.

NOTE: Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.

Technical Theatre and Stage Design

This degree is designed for students wishing to pursue careers in technical theatre and stage design. This section encompasses all areas of specialization that work together in the production of live performance. Set design, scenic carpentry, scenic painting, lighting, sound, props and stage management are taught through lectures and hands-on labs. Students in the first year of the program are required to work on one Fountain School stage production, and those in second and third years work on four Fountain School stage productions each year. All students must maintain at least a B- average in all Technical Theatre and Stage Design courses to move on to the next year, and Honours students must maintain an average of at least B+ in all their advanced Theatre courses.

Year 1

- THEA 1000X/Y.06
- THEA 1050X/Y.06
- 18 credit hours in other subjects

Year 2

- THEA 2011.03
- THEA 2012.03
- THEA 2060X/Y.06
- THEA 2070X/Y.06
- THEA 2700X/Y.06
- six credit hours in other subject

Year 3

- THEA 3060X/Y.06
- THEA 3070X/Y.06
- THEA 3710X/Y.06
- 12 credit hours in other subjects

Year 4

- THEA 3501.03
- THEA 3502.03
- 12 credit hours in advanced level electives in theatre

- 12 credit hours in other subjects, including up to one in theatre.

The Honours Qualifying Project in Technical Theatre and Stage Design will be awarded upon successful completion of a departmentally approved project.

NOTE: Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.

NOTE: Interested students studying Technical Theatre and Stage Design may find occasional, paid employment with Neptune Theatre, the Rebecca Cohn Auditorium, IATSE Local 680 (International Alliance of Theatrical Stage Employees), and various other local and national, professional institutions with which the Fountain School of Performing Arts has a close connection.

Costume Studies

This program combines the academic study and research skills necessary to the understanding of costume in its broadest context with the creative interpretation of design and the applied skills of the costumer whose goal is to work in the theatre, film, museums, or historical animation. Some courses in Costume Studies are open to general BA students; see individual course listings. Honours students must maintain an average of at least B+ in all of their advanced theatre courses.

Year 1

- THEA 1000X/Y.06
- THEA 1450X/Y.06
- TEXTL 3320 (NSCAD)
- TEXTL 2100 (NSCAD)
- 12 credit hours in other subjects

Year 2

- THEA 2011.03
- THEA 2012.03
- THEA 2400X/Y.06
- THEA 2406X/Y.06
- THEA 2411.03
- THEA 2451.03
- six credit hours in other subjects

Year 3

- THEA 3401X/Y.06
- THEA 3451X/Y.06
- THEA 3454.03
- THEA 3455.03
- 12 credit hours in other subjects

Year 4

- THEA 3501.03
- THEA 3502.03
- THEA 4406X/Y.06
- THEA 4450.03
- THEA 4452.03
- 12 credit hours in another subjects

Upon acceptance into their program, students should contact the undergraduate advisor in the Fountain School of Performing Arts for information on registering for required courses that take place at NSCAD University.

Honours students in Costume Studies will be awarded the Honours Qualifying Project upon successful completion of a 25-page research paper on an aspect of theatrical costume or historical dress.

NOTE: Applications for Honours in Theatre are not considered by the Fountain School of Performing Arts until the winter term of the student's third year. Please enquire at the School for the relevant deadline.

BA Combined Honours

Dalhousie and University of King's College students can also combine their Theatre degrees with a number of other disciplines at the two institutions. For more specific instructions on how to set up a Combined Honours degree in Theatre and another subject, please consult the relevant departments' Undergraduate Advisors. In principle, a student who wishes to graduate with this degree must complete at least THEA 2011.03, THEA 2012.03, THEA 3501.03, and THEA 3502.03, and must fulfil at least the minimal requirements for a three year BA. They must have, in the two subjects combined, the required distribution of courses.

Music and Theatre

The Fountain School of Performing Arts offers a highly specialized 120 credit hour BA with a Combined Honours in Music and Theatre which blends the principal courses of the Bachelor of Music in Voice with Theatre courses in Acting and Movement. Students must audition for both the Music and Theatre programs. A maximum of five students will be selected for entrance into the program each year. The graduate of this program will advance toward a professional career in the performing arts equipped with a foundation in music and theatre.

Please refer to BA with Combined Honours in Music and Theatre section for requirements.

BA (120 credit hour) Major in Theatre

A student may take a 120 credit hour Major program in Theatre (in Theatre Studies, Acting, Scenography and Technical Scenography or Costume Studies), following consultation with the appropriate Associate Director. As in the case of a BA with Combined Honours, it is also possible to set up a Double Major in Theatre and another subject. In this case, a student must complete at least THEA 2011.03, THEA 2012.03, THEA 3501.03, and THEA 3502.03 and fulfil at least the minimal requirements for a three year BA. They must have the required distribution of courses in the two majoring subjects as outlined in the Degree Requirements section of this Calendar.

BA (90 credit hour) Minor in Theatre

This degree is designed for students who want to take a number of courses in Theatre, would like to acquire a broad and varied knowledge of its various aspects, or are not interested in specializing. Students are advised to take THEA 1000X/Y and six additional credit hours in THEA at the 1000 level, although these do not count toward the minor.

See the Minor in Theatre section of this Calendar.

Costume Studies, Diploma in two years

After successful completion of this program, students may upgrade their DCS to a BA in Theatre (Costume Studies). Students pursuing the Diploma in Costume Studies are required to combine the courses in the following manner:

Year 1

- THEA 1450X/Y.06
- THEA 2400X/Y.06
- THEA 2406X/Y.06
- THEA 2411.03
- THEA 2451.03
- TEXTL 3320 (NSCAD)
- TEXTL 2100 (NSCAD)

Year 2

- THEA 3401X/Y.06
- THEA 3451X/Y.06
- THEA 3454.03
- THEA 3455.03
- THEA 4406X/Y.06

- THEA 4450.03
- THEA 4452.03

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

THEA 1000X/Y Introduction to Theatre

CREDIT HOURS: 6

The purpose of this course is twofold: first, to introduce students to the study of theatre through analysis of a range of plays related to the Fountain School; and second, to instruct students in the methodology of writing in the humanities. Students will learn about the theatrical production process and practice skills of script and performance analysis. Students will address specific problems within their papers and discuss questions on an individual basis in writing tutorials. This course fulfills the writing requirement of Dalhousie University and is a prerequisite for all Theatre majors.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Tutorial

THEA 1050X/Y Introduction to Theatre Organization and Stagecraft

CREDIT HOURS: 6

This course takes the student behind the scenes to understand how a play is brought to life. Scenography is discussed and explored. Students are introduced to stage design and scenic carpentry, props, sound, lighting, stage management and costume. Methods and procedures for theatre productions make up the substance of this course. Students are expected to work with power tools and are required to work on one Fountain School production, which will include evening and weekend work outside of class time. Some supplementary equipment is required for this course.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 4

THEA 1300X/Y Introduction to Film

CREDIT HOURS: 6

This course is a general introduction to film studies. It examines film genres and history, the component elements of film, the diversity of cinema industries and institutions, and the medium's impact on society. It also instructs students in the methodology of writing in the humanities and fulfils the writing requirement of Dalhousie University.

NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture| Tutorial

THEA 1450X/Y Introduction to Costume Studies

CREDIT HOURS: 6

This course serves as an introduction to costume in its broadest context, enabling students to acquire a basic understanding of creating costume for the stage. Both modern and historical costume creation techniques are explored and mastered by students in preparation for more advanced study of costume in subsequent years of the Costume Studies Program. This course includes a theatre component. This course is a prerequisite for all other Costume Studies courses.

NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture| Lab

THEA 1800X/Y Introduction to Acting and Performance

CREDIT HOURS: 6

This course is designed to provide the beginning acting student with an understanding of what it is to act, and to introduce some basic performance techniques. The approach will be practical, focusing on three major aspects of the craft: Space, Character, and Action. Each unit will be comprised of exercises and scene study, with scripts drawn from classical and contemporary plays. Exercises and explorations in class, requiring full-bodied participation and commitment, are centred on group work and ensemble play, which will strengthen communication and teamwork, as well as develop improvisational skills. Students will challenge themselves physically, vocally and imaginatively, while working with others to create an ensemble and a trusting, dynamic environment.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. THEA 1800X/Y.06 is the pre-requisite for an audition for the Acting Program.

FORMAT: Lecture| Lab

RESTRICTIONS: Students cannot register THEA 1800 and THEA 2000 at the same time.

THEA 2000X/Y Theatre Performance

CREDIT HOURS: 6

This course is designed to provide experience in performance outside the Acting Program. Through practical theatre exercises and performance assignments, students experience and discuss elements which contribute to theatre performance. This course will not serve as a prerequisite to the Acting Program, but is suitable for students having completed THEA 1800, or any student interested in cultivating self-confidence, communication, and performance skills.

NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture| Lab

RESTRICTIONS: Students cannot register for THEA 1800 and THEA 2000 at the same time.

THEA 2011 Classical Theatre

CREDIT HOURS: 3

This course gives students an opportunity to study the dramatic literature, staging practices, and theoretical foundations of the early history of theatre. Specific topics covered include ancient Greek, Roman, and medieval European performance, as well as classical Asian theatres. Although there is no formal prerequisite for the course, students should normally be in their second year of study. A background in theatre, history, and/or dramatic literature will be an advantage.

FORMAT: Lecture| Seminar

THEA 2012 Early Modern Theatre

CREDIT HOURS: 3

This course is in a sense the sequel to THEA 2011.03, though that course is not a prerequisite. It aims to study the development of dramatic literature, staging practices, and criticism from the Renaissance, Neoclassical, and Romantic eras of theatre. There is no formal prerequisite, but students should normally be in at least the second year of study. A background in history, theatre and/or dramatic literature will be an advantage.

FORMAT: Lecture| Seminar

THEA 2020X/Y Jazz Dance I (Spring Session Only)

CREDIT HOURS: 6

This course is a practical exploration into the Luigi Jazz Dance technique, incorporating the use of space, rhythm, and correct body alignment. Emphasis is on the development of personal expression through the medium of dance. Students are expected to develop an awareness of dance terminology and vocabulary.

FORMAT: Lecture| Lab

CROSS-LISTING: MUSC 2130.06

THEA 2043 How iRead the Eye-Books: Film Adaptations of World Literature I

CREDIT HOURS: 3

In this course, we will be reading and watching the world adaptations of international literary classics and popular contemporary works. From analyzing the art of comic strips and Superman sagas to e-books designed for iPads and Android mobile devices, during the semester students will learn to appreciate both the text and its visual renderings using theoretical frameworks of adaptation and textual fidelity, as well as will have an opportunity to practice their skills in the art of film-making and constructing an iBook.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

CROSS-LISTING: RUSN 2043.03, ENGL 2043.03

EXCLUSIONS: RUSN 2045.06, ENGL 2045.06, THEA 2347.06

THEA 2044 How iRead the Eye-Books: Film Adaptations of World Literature II

CREDIT HOURS: 3

In this course, we will be reading and watching the world adaptations of international literary classics and popular contemporary works. From analyzing the art of comic strips and Superman sagas to e-books designed for iPads and Android mobile devices, during the semester students will learn to appreciate both the text and its visual renderings using theoretical frameworks of adaptation and textual fidelity, as well as will have an opportunity to practice their skills in the art of film-making and constructing an iBook.

FORMAT: Lecture| Discussion

CROSS-LISTING: ENGL 2044.03, THEA 2044.03

EXCLUSIONS: RUSN 2045X, THEA 2347X, ENGL 2045X

THEA 2060X/Y Technical Theatre I

CREDIT HOURS: 6

This course builds on the fundamentals acquired in THEA 1050 and is a supplement to Performance Technology I. Lectures and labs include theory development in the areas of props, lighting, sound, set design, scenic construction, and stage management.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

COREQUISITE: THEA 2070X/Y.06

PREREQUISITE: THEA 1050X/Y.06

THEA 2070X/Y Performance Technology I

CREDIT HOURS: 6

This course is concerned with the more complex problems of the preparation of theatre production. A greater focus will be given to applying learned knowledge in a practical setting, with mandatory crew requirements in at least four Fountain School Stage productions. These productions will require work outside of class time on evenings and weekends. This course is the practical application of THEA 2060X/Y.06.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab

LAB HOURS PER WEEK: 6

COREQUISITE: THEA 2060X/Y.06

PREREQUISITE: THEA 1050X/Y.06

THEA 2214X/Y Shakespeare

CREDIT HOURS: 6

An introduction to Shakespeare's career as a playwright, through discussion and interpretation of a dozen or more of his plays.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Discussion

PREREQUISITE: ENGL 1000X/Y.06; or any two of ENGL 1010.03, ENGL 1020.03 or ENGL 1040.03; or THEA 1000X/Y.06; or the King's Foundation Year Program

CROSS-LISTING: ENGL 2214.06

THEA 2229 Tragedy

CREDIT HOURS: 3

This course studies a representative selection of texts from various historical periods in order to arrive at an understanding of the meaning of tragedy. Various definitions of tragedy will be examined along with such possible questions as: how has tragedy changed over time, and what is tragicomedy.

FORMAT: Lecture| Discussion

PREREQUISITE: ENGL 1000X/Y.06; or any two of ENGL 1010.03, ENGL 1020.03, or ENGL 1040.03; or THEA 1000X/Y.06; or the King's Foundation Year Program

CROSS-LISTING: ENGL 2229.03

EXCLUSIONS: ENGL 2226.06

THEA 2301 Film History I

CREDIT HOURS: 3

This course surveys the history of film from its invention in the 1890s to the 1950s. Students will learn about the aesthetic, social and technological changes that affected the development of cinema. The course includes the study of silent film and the Classical Hollywood cinema, as well artistic movements such as Expressionism and Soviet Montage.

FORMAT: Lecture| Discussion

EXCLUSIONS: THEA 2300X/Y.06 and NSCAD AHIS 2800.03

THEA 2311 Film Analysis

CREDIT HOURS: 3

This course introduces students to the close textual analysis of narrative films. To this end, a few films will be studied in depth. Their formal properties, such as mise-en-scène, sound, cinematography, and editing, will be analyzed and situated in social and historical context. Through screenings, readings, lectures, discussions and exercises, students will develop their technical vocabulary and skills in film interpretation.

FORMAT: Lecture| Discussion

THEA 2314 Survey of Italian Cinema

CREDIT HOURS: 3

Course to be held in English; with part of the course work in Italian for Italian majors. Survey of the Italian Cinema from the origins onwards. Focus: the 'golden age' of Italian silent movies; visual culture under fascism; Italian neo-realism; the impact of television.

FORMAT: Lecture

CROSS-LISTING: ITAL 2600.03

THEA 2336 Russian Film I

CREDIT HOURS: 3

This course surveys Russian film from the Silent Era to "Thaw" (1900-1960s). Its goal is to develop students' knowledge of cinema in its historical and cultural context through critical watching, reading, thinking, and writing. The course will concentrate on the development of main genres and styles in Russian and official Soviet Cinema, major directors and styles. Full versions of films will be screened each Monday night. Later in the week they will be followed by a lecture, discussion, and viewing additional short clips.

FORMAT: Lecture| Discussion

CROSS-LISTING: RUSN 2036

THEA 2337 Russian Film II

CREDIT HOURS: 3

This course will provide an overview of the most significant trends and periods in the development of Russian cinema since the 1960s until the latest blockbusters. The course will concentrate on the development of main genres and styles, major directors and productions, issues of race, gender, war and violence in Soviet, post-Soviet and new Russian cinema.

FORMAT: Lecture| Discussion

CROSS-LISTING: RUSN 2037.03

THEA 2340 Monsters and Madness: 20th Century German Film

CREDIT HOURS: 3

This course provides an introduction to German film of the early 20th century. We will focus on one of the most influential period of cinema history, German Expressionism, and continue to early sound film, Nazi-Propaganda and Postwar film. No knowledge of the German language is necessary. All films are subtitled.

CROSS-LISTING: GERM 2040.03

THEA 2346 East European Cinema: War, Love, and Revolutions

CREDIT HOURS: 3

This course brings post-Berlin Wall European film into the fray of current debates on cultural identity, transnational cinema, and postcolonialism. Despite the state control, the filmmakers of communist Europe were often more bold, honest and provocative than their profit-driven Hollywood counterparts. By drawing on political, cultural, and philosophical discourses, the course will offer pointed analyses of most significant East European films that touch upon issues of ethnicity, gender, and overcoming censorship.

FORMAT: Lecture| Discussion

CROSS-LISTING: RUSN 2046.03

THEA 2347X/Y How iRead the Eye-Books: Film Adaptations of World Literature

CREDIT HOURS: 6

In this course we will be reading and watching the world adaptations of international literary classics and popular contemporary works. From analyzing the art of comic strips and Superman sagas to e-books designed for iPads and Android mobile devices, during the semester students will learn to appreciate both the text and its visual renderings using theoretical frameworks of adaptation and textual fidelity, as well as will have an opportunity to practice their skills in the art of film-making and constructing an iBook.

FORMAT: Lecture| Discussion

PREREQUISITE: None

CROSS-LISTING: ENGL 2045X/Y.06, RUSN 2045X/Y.06

THEA 2350 Studies in Film Directors

CREDIT HOURS: 3

This course offers students the opportunity to study in detail the work of an individual film director. Aesthetic, political, philosophical and/or ethical issues related to the director's work will be studied via close analysis of his/her most significant films. The identity of the director to be studied will be posted on the Academic timetable.

FORMAT: Lecture| Discussion

THEA 2360 Popular Cinema

CREDIT HOURS: 3

This course helps students develop their critical understanding of popular cinema. It introduces different approaches to the analysis of popular film, and considers principles of production, distribution, exhibition and reception in major industries such as Hollywood and popular Hindi and Hong Kong cinemas. Throughout, it addresses the implications of the concept of "popular cinema."

FORMAT: Lecture| Discussion

EXCLUSIONS: THEA 2320.06

THEA 2370 Animated Film

CREDIT HOURS: 3

This course is an overview of different forms of animated film and key topics and debates in the field of animation studies. Emphasis is on Canadian, US American and Japanese animation, but examples will be drawn from a variety of regions, and will range from old to new and popular to experimental. The course will focus on cultural approaches, theoretical questions posed by specific types of animation, and historical developments.

FORMAT: Lecture| Discussion

THEA 2400X/Y Cave to Café: Costume and Identity from Antiquity to 1700

CREDIT HOURS: 6

An introduction to the study of human social behaviour and its relationship to the development of body coverings, this survey course begins with the earliest Mediterranean cultures, Ancient Egypt, Greece and Rome, and continues through to the end of the seventeenth century. This course may be taken by general BA students, and is also part of the Costume Studies Program.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.

FORMAT: Lecture| Discussion

PREREQUISITE: General BA students must have completed the writing requirement. For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06. For Diploma in Costume Studies: See Costume Studies course combinations.

THEA 2406X/Y The Aesthetics of Contemporary Dress

CREDIT HOURS: 6

By examining the aesthetics of contemporary dress, this course will enable the student to understand established systems used to create clothing, utilizing body image as principle means. Through the study and application of systematic principles, the student will gain a better understanding of people's need to define body image in terms of ornamental self-expression and social identification. This course is part of the Costume Studies Program.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

COREQUISITE: THEA 2411 and THEA 2451

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06. For Diploma in Costume Studies: See Costume Studies course combinations <http://www.dal.ca/faculty/arts/school-of-performing-arts/programs/theatre-programs/costume-studies.html>

RESTRICTIONS: Costume Studies degree or diploma students only

THEA 2411 Designers' Language

CREDIT HOURS: 3

This course explores components of costume design, offering a discourse on design language, color theory, structure, and decoration as they relate to costumes for the theatre. Through lecture and practical application, the student will learn how to design costumes, choose fabrics, interpret scripts and develop characters, leading to a better understanding of theatrical characterization. This course may be taken by general BA students, and is also a part of the Costume Studies Program.

FORMAT: Lecture

COREQUISITE: THEA 2406 and THEA 2451

PREREQUISITE: General BA students must have completed the writing requirement. For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06. For Diploma in Costume Studies: See Costume Studies course combinations <http://www.dal.ca/faculty/arts/school-of-performing-arts/programs/theatre-programs/costume-studies.html>

THEA 2451X/Y Costume in Performance I

CREDIT HOURS: 3

In this year the student will apply the knowledge from THEA 1450X/Y to research, illustrate and create modern and historical costume designs for the stage. In addition, students work on productions in order to understand the integral role played by costume in staging a play, in an actor's character development, and in body image and representation. This course is part of the Costume Studies Program.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

COREQUISITE: THEA 2411 and 2406; For Diploma in Costume Studies Students: THEA 1450.06, THEA 2400.06, THEA 2406.06, THEA2411.03, TEXTL 2000 (NSCAD), TEXTL 2100 (NSCAD)

PREREQUISITE: For BA in THEA (Costume Studies) Students: THEA 1000.06, THEA 1450.06

RESTRICTIONS: Limited to BA in Theatre (Costume Studies) and Diploma in Costume Studies students

THEA 2700X/Y Stage Design I

CREDIT HOURS: 6

This course is designed to acquaint the student with the language, techniques and conventions involved in the field of stage design. In the first semester, students will develop basic abilities in visual composition, watermedia and drafting. In the second half, model building, text analysis, research and three-dimensional space development will be taught. Assignments will emphasize practical skills and will culminate in a full design process.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

PREREQUISITE: THEA 1050X/Y.06 or permission of the instructor

THEA 2800X/Y Acting II

CREDIT HOURS: 6

The second year of the Acting Program introduces students to classical theatre performance approaches through the exploration of the texts of William Shakespeare. Using his sonnets, soliloquies and scenes, students will discover performance clues within the author's text and explore characterization, dramatic situations and action, and the interpretation of dramatic text. Emphasis is placed on the need for clarity in expressing and communicating these works and on the dedication to craft and discipline necessary to do so.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

COREQUISITE: THEA 2820X/Y.06, THEA 2810X/Y.06

PREREQUISITE: THEA 1800X/Y.06 and audition

THEA 2810X/Y Voice and Speech II

CREDIT HOURS: 6

This course focuses on developing the speaking voice. It is an introduction to mind/body/voice awareness, the anatomical and physiological aspects of phonation, and the care of the voice. This introduction includes exploration and drilling of the primary breathing and phonating muscles with the object of releasing the voice and developing an open, flexible sound. Focusing of the mind, alignment of the spine, releasing of unnecessary and habitual tensions, exploration of resonating cavities, pitch, volume/power, and articulation, as well as exploration of a variety of text will all be investigated.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

COREQUISITE: THEA 2800X/Y.06, THEA 2820X/Y.06

PREREQUISITE: THEA 1800X/Y.06 and audition

THEA 2820X/Y Dance and Movement II

CREDIT HOURS: 6

The course is designed to develop and enhance the acting student's practical knowledge of movement through the discipline of jazz dance. This is manifest through a practical exploration of the Luigi jazz dance technique, incorporating the use of space, rhythm, and correct body alignment. Students are expected to develop a working vocabulary of dance terminology.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

COREQUISITE: THEA 2800X/Y.06, THEA 2810X/Y.06

PREREQUISITE: THEA 1800X/Y.06 and audition

THEA 2841 Speak With Confidence: Voice for Non-Majors

CREDIT HOURS: 3

This course is designed to enable the student to use the speaking voice effectively, to communicate freely and easily, with clarity and conviction, thereby strengthening his or her presentation skills. This course will be practical in nature. Exercises and explorations will initially be centred on group dynamics and will require commitment, concentration and full-bodied participation. Many aspects of voice use will be covered, including release of the body, alignment of the spine, breathing, resonance, pitch, volume and power, articulation, working with an intention, and care of the voice. The focus of the course will be on self-discovery as well as awareness of others. Students will also have the opportunity to make individual presentations and receive feedback accordingly. Guest speakers/artists may be invited to visit the classroom.

FORMAT: Lecture| Lab

EXCLUSIONS: All advanced Acting courses

THEA 2901 Production Dramaturgy

CREDIT HOURS: 3

This course introduces students to the dramaturgical work of dramaturges and directors in the theatre. Students will learn skills including the presenting of research, the preparation of playtexts, the adapting of playtexts for new theatrical contexts, and the creation of theatrical seasons and programs.

FORMAT: Lecture| Discussion

PREREQUISITE: THEA 1000.06 or permission of the instructor

EXCLUSIONS: THEA 2900.06

THEA 2902 Play Analysis for Directing

CREDIT HOURS: 3

This course introduces students to the director's process in analyzing a dramatic script for performance. Working with plays from a range of periods and genres, students will explore key theoretical approaches to directorial analysis, will learn the director's core vocabulary, and will apply these discoveries to practical scene work.

FORMAT: Lecture| Seminar

PREREQUISITE: THEA 1000.06 or permission of the instructor

EXCLUSIONS: THEA 2900.06

THEA 2911 Stars and Stardom on Stage and Screen

CREDIT HOURS: 3

What makes a 'star' actor? How do stars' gifts and idiosyncrasies interact with the possibilities of their media and with market forces to create celebrity? This course explores stage and screen stardom as historical, aesthetic, and economic phenomena that illuminate shifting constructions of beauty, class, gender, sexuality, race, and ethnicity.

FORMAT: Lecture| Discussion

THEA 3015 Renaissance Drama

CREDIT HOURS: 3

This course will explore the richness and strangeness of some of the playwrights too often obscured by Shakespeare's shadow. Between the opening of the first professional playhouse in London (1576) and the closing of the theatres by Parliament (1641), the Globe was only one of many venues catering to an avid theatre-going public, and the first English play by a woman was circulated in manuscript. Playwrights to be studied include Christopher Marlowe, Ben Jonson, Thomas Middleton, John Webster, Elizabeth Cary and John Ford.

FORMAT: Lecture| Discussion

PREREQUISITE: ENGL 1000X/Y.06; or any two of ENGL 1010.03, ENGL 1020.03, or ENGL 1040.03; or THEA 1000X/Y.06; or the King's Foundation Year Program

CROSS-LISTING: ENGL 3015.03

THEA 3020X/Y Jazz Dance II. (Spring Session only)

CREDIT HOURS: 6

The course is the continued practical exploration into the Luigi Jazz Dance Technique at the intermediate level. Emphasis is on the development of personal expression through the medium of dance. Students must have a basic foundation in dance technique.

FORMAT: Lecture| Lab

PREREQUISITE: THEA 2020 or approval of instructor (interview)

CROSS-LISTING: MUSC 3130.06 (spring session only)

THEA 3060X/Y Technical Scenography II

CREDIT HOURS: 6

This course is designed to supplement Performance Technology II and is a continuation of THEA 2060X/Y.06 covering the topics in greater detail.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

COREQUISITE: THEA 3070X/Y.06

PREREQUISITE: THEA 2060X/Y.06, THEA 2070X/Y.06

THEA 3070X/Y Performance Technology II

CREDIT HOURS: 6

This is an advanced course in production technology. Students work intensively in the areas of: scenic carpentry, scenic painting, props, lighting and sound, and stage management. Students are required to work on four (4) Fountain School stage productions. These productions will require work outside of class time, on evenings and weekends.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.

FORMAT: Lab

LAB HOURS PER WEEK: 6

COREQUISITE: THEA 3060X/Y.06

PREREQUISITE: THEA 2060X/Y.06, THEA 2070X/Y.06

THEA 3200X/Y The Director in the Theatre

CREDIT HOURS: 6

This course explores in theoretical and practical terms the various functions of the director in creating a theatrical event. Topics include the historical role of the director, conceptualizing scripts, working with a dramaturge, relationships with actors, and the script development process. Laboratory exploration of practical problems related to the above topics will form an integral part of the course.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

PREREQUISITE: THEA 2901.03, THEA 2902.03, and permission of instructor

THEA 3301 Film History II

CREDIT HOURS: 3

This course surveys the history of film from the 1950s until the present day. Students will learn about the aesthetic, social and technological changes that affected the development of cinema. The course includes the study of radical 1960s movements such as the French New Wave, and the birth of auteurist cinema in the European and Hollywood film industries. It also introduces students to the concept of national cinema with a study of global film industries, and concludes with a study of the digital revolution in contemporary cinema.

FORMAT: Lecture| Discussion

PREREQUISITE: Recommended THEA 2301.03

EXCLUSIONS: THEA 2300X/Y.06 and NSCAD AHIS 2810.03

THEA 3313 Documentary, Experimental and Animated Film

CREDIT HOURS: 3

This course introduces students to the historical, social, ethical and aesthetic dimensions of documentary, experimental and animated cinema. The course is taught through lectures, discussions, film screenings and readings.

FORMAT: Lecture| Discussion

PREREQUISITE: THEA 2311.03 or permission of the instructor

EXCLUSIONS: THEA 2312.03 and NSCAD AHIS 3850.03

THEA 3314 Shakespeare and his Contemporaries on Film

CREDIT HOURS: 3

This course will study the adaptation of Shakespeare and his contemporaries to the medium of cinema, focusing on the differences between theatre and cinema, the process of textual adaptation, the updating of classic stories to modern settings, and the close analysis of the performer's choices.

FORMAT: Lecture| Seminar

PREREQUISITE: Experience in Shakespeare at any level OR experience in Film Studies at any level.

CROSS-LISTING: ENGL 3314.03

EXCLUSIONS: THEA 2313.03, ENGL 2313.03

THEA 3320 Italian National Cinema

CREDIT HOURS: 3

The focus of the course: the New Wave of Italian cinemas, which has received international recognition since the 1960s. Its aim: to investigate Italian film production within the social and cultural climate of contemporary Italy.

FORMAT: Lecture| Seminar

PREREQUISITE: ITAL 2010.03

CROSS-LISTING: ITAL 3600.03

THEA 3330 Film Theory I

CREDIT HOURS: 3

This course will survey and discuss the major cinematic theories of the twentieth century: from formalism and realism to Lacanian psychoanalysis and post-structuralism, from film semiotics and feminist theory to postmodern debates and approaches which sought to define new terminology and new methodologies for the study of the moving images.

FORMAT: Lecture| Discussion

PREREQUISITE: Previous Film Studies course or permission of the instructor

EXCLUSIONS: CTMP 3302.03

THEA 3331 Film Theory II: Desire in Cinema

CREDIT HOURS: 3

This course focuses on theories of gender, sexuality and desire in the cinema. It addresses debates around the representation of gender, sexuality and desire on screen, as well as theories of spectatorial desire.

FORMAT: Lecture| Discussion

PREREQUISITE: Previous Film Studies course or permission of the instructor

CROSS-LISTING: GWST 3331.03

THEA 3350 Topics in Asian Cinema

CREDIT HOURS: 3

Each year will focus on specific topics as explored in the cinema of various Asian countries. Particular attention will be paid to how Asian filmmakers employ different cinematic genres in their treatments of diverse aspects of Asian societies and cultures.

FORMAT: Lecture| Discussion

CROSS-LISTING: CHIN 3050.03

THEA 3351 The Cinema of David Lynch

CREDIT HOURS: 3

David Lynch is one of the most fascinating filmmakers alive today. His work includes relatively mainstream and popular successes, such as *The Elephant Man* and the TV series *Twin Peaks*, along with more difficult cult films such as *Eraserhead*, *Lost Highway* and *Mulholland Drive*. In this course, students will engage in close analysis of Lynch's works, his source material, and his inspirations.

FORMAT: Lecture| Discussion

PREREQUISITE: Any of the core courses in the Film Studies Minor (THEA 2301.03, THEA 2311.03, THEA 3301.03, THEA 3313.03) or permission of the instructor.

EXCLUSIONS: THEA 3311 X/Y.06

THEA 3371 Experimental Film

CREDIT HOURS: 3

This is a survey of experimental cinema. The films studied attempt to revise the basic grammar of film; they do not assume that film is about narrative or even representation, but that it is a fundamentally visual art, often closer to painting or printmaking than to the novel or the theatre. The course will cover films from a range of time periods and regions, and examine a variety of experimental movements.

FORMAT: Lecture| Discussion

PREREQUISITE: THEA 2311.03

THEA 3401X/Y Dress and Identity: King's Court to Mass Culture, 1700-Present

CREDIT HOURS: 6

This is a survey course which will trace the development of dress through the eighteenth, nineteenth, and twentieth centuries, showing its evolution from the period when the fashion aesthetic was determined by the Courts, to the time of the rise of the common man as the arbiter of taste. Concentration in this course will be placed on dress worn in England and France, but students may explore costume from other countries as individual topics of research. Emphasis will be placed on the social and cultural aspects of dress history, using slides of representative works of art, films, and artifacts as visual documentation for each period. NOTE: Students registering in this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

COREQUISITE: THEA 3451, THEA 3454, THEA 3455

PREREQUISITE: General BA students must have completed the writing requirement. For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06, THEA 2011.03, THEA 2012.03, THEA 2400X/Y.06, THEA 2406X/Y.06, THEA 2411.03, THEA 2451X/Y.03.

For Diploma in Costume Studies, see Costume Studies course combinations in calendar.

EXCLUSIONS: THEA 4400X/Y.06

THEA 3451X/Y Costume in Performance II

CREDIT HOURS: 6

In this course students will demonstrate their fluency in costume creation with design interpretations for theatrical production. Students will examine problems related to costume as an expression and extension of theatrical character development. Fountain School productions provide a venue for students to develop interpersonal and technical skills. Students work as an integral part of a team. This course is part of the Costume Studies Program.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

THEA 3454 Body-Shaping Through Historical Tailoring II

CREDIT HOURS: 3

This course introduces the student to the process of tailoring as it originated in the Renaissance, and its development down to the twentieth century. Emphasis is placed on the purpose of underpaddings, understructures and the techniques of fixing them in place. This course is part of the Costume Studies Program.

COREQUISITE: THEA 3401, THEA 3451, THEA 3455

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06, THEA 2011.03, THEA 2012.03, THEA 2400X/Y.06, THEA 2406X/Y.06, THEA 2411.03, 2451X/Y.03. For Diploma in Costume Studies: See Costume Studies class combinations.

RESTRICTIONS: Costume Studies degree or diploma students only.

THEA 3455 Body-Shaping Through Historical Tailoring I

CREDIT HOURS: 3

The “Systems” of Pattern Drafting from the early nineteenth century to the twentieth century. Utilizing traditional tailoring techniques, the process of creating professional tailored garments is studied in detail. This course is part of the Costume Studies Program.

FORMAT: Lecture| Lab

COREQUISITE: THEA 3401, THEA 3451, THEA 3454

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06, THEA 2011.03, THEA 2012.03, THEA 2400X/Y.06, THEA 2406X/Y.06, THEA 2411.03, THEA 2451X/Y.03. For Diploma in Costume Studies: See Costume Studies course combinations.

RESTRICTIONS: Costume Studies degree or diploma students only.

THEA 3501 The Modern Theatre 1: Realism and Responses

CREDIT HOURS: 3

From the 1870s until the coming of the First World War, the theatre underwent a series of radical transformations. This course explores the key theatrical movements of this period, including realism, naturalism, symbolism, and expressionism, and compares the theories behind them to the plays, stagecraft, and performance techniques they produced.

FORMAT: Lecture| Seminar| Discussion

PREREQUISITE: THEA 2011.03 and THEA 2012.03 or permission of the instructor

CROSS-LISTING: ENGL 3501.03

EXCLUSIONS: THEA 3500 X/Y.06

THEA 3502 The Modern Theatre 2: High Modernism

CREDIT HOURS: 3

From the close of WW1 to the 1960s, theatrical modernists sought new artistic forms for a rapidly changing world. This course introduces students to major forms of theatrical modernism from Dada and Theatre of Cruelty through Epic Theatre and Biomechanics to Absurdism, and considers their legacy for the contemporary stage.

FORMAT: Lecture| Seminar

PREREQUISITE: THEA 3501.03 or Permission of the Instructor

CROSS-LISTING: ENGL 3502.03

EXCLUSIONS: THEA 3500 X/Y.06

THEA 3600X/Y The Playwright in the Theatre

CREDIT HOURS: 6

This course studies the play as a vehicle for performance rather than as a literary work. Through weekly writing exercises dealing with specific dramaturgical problems, the craft of play-writing is explored. With this background, the class then writes plays which are revised, critiqued, and given a public presentation.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

PREREQUISITE: THEA 2901.03 and THEA 2902.03, or permission of the instructor

THEA 3710X/Y Stage Design II

CREDIT HOURS: 6

This course builds on the knowledge gained in the previous course in the field, THEA 2700X/Y.06, as far as visual knowledge is concerned, and from technical knowledge acquired in THEA 2060X/Y.06 and THEA 2070X/Y.06. The goal of this course is to expose, explore and develop methods of visual communication within the process of stage design. Students are given a schedule that will foster quick solutions, creating an environment conducive to the project or play assigned. Students will then begin to learn how to find and apply research as it relates to a design. The second portion of the course will provide students with experience in drafting and model building that will culminate in several portfolio-quality design projects.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

PREREQUISITE: THEA 2060X/Y.06, THEA 2070X/Y.06, THEA 2011.03, 2012.03, THEA 2700X/Y.06

THEA 3731 Greek Drama: Tragedy I

CREDIT HOURS: 3

A study of the Greek tragedians Aeschylus, Sophocles, and Euripides, in English translation.
CROSS-LISTING: CLAS 3731
EXCLUSIONS: CLAS 3730, CLAS 3515

THEA 3751X/Y Modern German Drama

CREDIT HOURS: 6

An historical study of modern German Drama from the 1770s to the twentieth century. Works by J.M.R. Lenz, J.W.V. Goethe, H.V. Kleist, G. Büchner, G. Hauptmann, E. Toller, B. Brecht and B. Strauß will be discussed. The notion of Freedom (Freiheit) and its apparent impossibility in the nineteenth and twentieth century is central. The texts are read in English translation with the German originals as backup.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

THEA 3800X/Y Acting III

CREDIT HOURS: 6

This course aims to strengthen the actor's instrument and creative response, while further developing acting technique through practical experience in Mask, Mime and Period Study. "Actioning" is expanded upon to include Script Analysis, with materials being drawn from classical and contemporary texts, ensuring that the 'inner' work of characterization feeds the 'outer' work, and vice versa.

NOTES: Students taking these courses must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture| Lab

COREQUISITE: THEA 3810X/Y.06, THEA 3820X/Y.06, MUSC 1081.03

PREREQUISITE: THEA 2800X/Y.06, THEA 2820.X/Y.06, THEA 2810X/Y.06 and permission of the Acting Faculty.

THEA 3810X/Y Voice and Speech III

CREDIT HOURS: 6

This course is a continuation of 2810X/Y.06. Emphasis is on freeing the voice by combining newly developed skills that constitute "good use": releasing the mind and body; aligning the spine, and accessing primary breathing muscles. Attention is paid to vocal support, clarity of the sound, flexibility and range, and the power behind the sound. A voice warm up is designed and instructed by each student. Ways of accessing oral, nasal and pharyngeal cavities are explored. Phonetics, speech and accents/dialects are introduced. Much of the work involves application to a variety of texts.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

COREQUISITE: THEA 3800X/Y.06, THEA 3820X/Y.06, MUSC 1081.03

PREREQUISITE: THEA 2800X/Y.06, THEA 2810X/Y.06, THEA 2820X/Y.06, and permission of the Acting Faculty

THEA 3820X/Y Dance and Movement III

CREDIT HOURS: 6

The course is designed to develop and enhance the acting student's practical knowledge of movement through the discipline of Jazz Dance. This is manifest through the continued practical exploration of the Luigi Jazz Dance Technique. Emphasized are the performer's building blocks: a strong body alignment, a healthy stretching regimen, and an expanding skill repertoire. Explorations commence into dance choreography and performance.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

COREQUISITE: THEA 3800X/Y.06, THEA 3810X/Y.06, MUSC 1081.03

PREREQUISITE: THEA 2800X/Y.06, THEA 2810X/Y.06, and THEA 2820X/Y.06, and permission of the Acting Faculty

THEA 3911 Gender in Theatre: A Cross-Cultural Survey

CREDIT HOURS: 3

This course examines the roles gender has played in the shaping of world theatre alongside the roles the theatre has played in the shaping of various cultural conceptions of gender. By exploring plays and performances from Europe, North America, China, Japan, India, Iran and/or other traditions, we will strive to understand the ways in which various forms of representation reflect their cultures' governing images of masculinity and femininity. In the process, we will interrogate the historical and cultural variability of the notion of "gender" itself. The main objective of the course will be to ask how gender determines performers' choices in various cultures, and to see how gender itself can actually be shaped by performance.

FORMAT: Lecture| Discussion

CROSS-LISTING: GWST 3911.03

THEA 3912 Gender Theory and Contemporary Performance

CREDIT HOURS: 3

This course offers students an opportunity to encounter some of the most provocative and challenging gender theory of recent years in relation to contemporary theatre, film and performance art. Students will read considerations of the relationship between gender, performance and identity by such authors as Hélène Cixous, Luce Irigaray, Julia Kristeva, Judith Butler, Judith Halberstam, Peggy Phelan and Camille Paglia, among others. Alongside these works, we will examine contemporary performances from the popular to the oppositional. Through this intertextual exploration of theory and performance, we will aim to expand our understanding of the ways in which gender roles are created, maintained, questioned and changed in contemporary culture(s).

FORMAT: Lecture| Discussion

CROSS-LISTING: GWST 3912.03

THEA 3913 English Drama 1660-1800

CREDIT HOURS: 3

A survey of plays produced during the Restoration and eighteenth century. Concentrating on the London scene from the first appearance of actresses on the stage to the burning of the Haymarket theatre in 1789, this course introduces students to the period's various dramatic forms, the literary influences and controversies, and the many women and men who penned for the stage.

FORMAT: Lecture| Discussion

PREREQUISITE: ENGL 1000X/Y.06; or any two of ENGL 1010.03, ENGL 1020.03, ENGL 1040.03, or THEA 1000X/Y.06; or the King's Foundation Year Program

CROSS-LISTING: ENGL 3020.03

EXCLUSIONS: ENGL 3225.06

THEA 3914 Topics in Italian Drama and Spectacle

CREDIT HOURS: 3

This course focuses on Italian drama and performance. The topic will vary from year to year and may include topics such as Italian Renaissance theatre, the Commedia dell'arte, Pirandello's productions and contemporary Italian spectacle. The course will examine the selected topic while placing Italian theatre into a broader European context; students will acquire reading strategies for drama and spectacle and learn to consider the works from a theoretical perspective. The course is held in English but Italian majors will be required to read the texts in the original.

FORMAT: Lecture

CROSS-LISTING: ITAL 3700.03

THEA 4101 Short Apprenticeship

CREDIT HOURS: 3

Students gain practical, workplace experience with an organization appropriate to their course of study. The Short Apprenticeship will represent approximately 50 – 60 hours of work on an approved project with a sponsoring organization. Positions will in general be paid, but this is not guaranteed.

PREREQUISITE: Permission of the Fountain School

RESTRICTIONS: Students must have completed two years of study in a Minor/Major/Double Major/Honours/Combined Honours Bachelor of Arts program in Theatre or the Minor in Film Studies. Applications for apprenticeships will be evaluated by a FSPA committee, which will have final decision about which apprenticeships can be sponsored by the School.

ASSESSMENT METHOD: 70% Grade assigned by instructor of record in consultation with workplace supervisor(s). 30% Reflection Paper on experience (graded by faculty member)

THEA 4390 Special Topics in Film Studies

CREDIT HOURS: 3

This is an advanced seminar in film studies which examines one topic in depth from formal, political, and historical perspectives. Topics may include but are not limited to: animated film; political cinema; montage; screen acting; film adaptation; the work of a particular director; or a film movement. The topic is assigned by the Fountain School at the end of the preceding academic year and is then posted at the Fountain School and in the University's timetable.

FORMAT: Seminar

PREREQUISITE: THEA 2311.03 and one other film course (3000-level or above recommended)

THEA 4391 Special Topics in Popular Cinema

CREDIT HOURS: 3

This advanced seminar addresses an issue in popular cinema. Topics may include but are not limited to: critical perspectives on a particular set of films; the relation between "independent" cinema and "mainstream" cinema; or the social and aesthetic impact of new technologies in popular cinema. The topic is assigned by the Fountain School at the end of the preceding academic year and is then posted at the Fountain School and in the University's timetable.

FORMAT: Seminar

PREREQUISITE: THEA 2311.03 (+ THEA 2360.03 or THEA 2320.06 are recommended)

THEA 4406X/Y The Aesthetics of Historical Dress

CREDIT HOURS: 6

This course examines the aesthetics of historical dress, tracing the evolution of changing silhouettes and historical pattern design throughout the eighteenth and/or nineteenth centuries. The student will learn to carry out material-culture and textual analyses as historical source material with a view to re-creating character and dress of the eighteenth and/or nineteenth centuries. This course stresses research and academic skills, along with applied skills. Primary research forms a significant component of this course. This course is part of the Costume Studies Program.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.

FORMAT: Lecture| Lab| Discussion

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06, THEA 2011.03, THEA 2012.03, THEA 2400X/Y.06, THEA 2406X/Y.06, THEA 2411.03, THEA 2451X/Y.03, THEA 3401X/Y.06, THEA 3451X/Y.06, THEA 3454.03, THEA 3455.03 For Diploma in Costume Studies, see Costume Studies course combinations in calendar <http://www.dal.ca/faculty/arts/school-of-performing-arts/programs/theatre-programs/costume-studies.html>

RESTRICTIONS: Costume Studies degree or diploma students only.

EXCLUSIONS: THEA 3405X/Y.06

THEA 4450 Costume Technology

CREDIT HOURS: 3

This course extends the expertise in costume creation developed in THEA 1450X/Y.06, THEA 2451.03 and THEA 3451.06 to examine techniques of fine finish as students prepare their costume 'masterpiece.' This course is part of the Costume Studies Program.

FORMAT: Lecture| Lab

COREQUISITE: THEA 4452

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06, THEA 2011.03, THEA 2012.03, THEA 2400X/Y.06, THEA 2406X/Y.06, THEA 2411.03, THEA 2451X/Y.03, THEA 3401X/Y.06, THEA 3451X/Y.06, THEA 3454.03, THEA 3455.03

For Diploma in Costume Studies, see Costume Studies course combinations in calendar <http://www.dal.ca/faculty/arts/school-of-performing-arts/programs/theatre-programs/costume-studies.html>

RESTRICTIONS: Costume Studies degree or diploma students only.

THEA 4452 The Sculpture of Dress

CREDIT HOURS: 3

Based less in abstract principles and more in creativity, this course examines sculptural forms in a human context to facilitate modern and historical costume design. The student works directly on the human body or mannequin to gain proficiency in modelling textiles to shape costume. This course is part of the Costume Studies Program.

FORMAT: Lecture| Lab

COREQUISITE: THEA 4450

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06, THEA 2011.03, THEA 2012.03, THEA 2400X/Y.06, THEA 2406X/Y.06, THEA 2411.03, THEA 2451X/Y.03, THEA 3401X/Y.06, THEA 3451X/Y.06, THEA 3454.03, THEA 3455.03

For Diploma in Costume Studies, see Costume Studies course combinations in calendar <http://www.dal.ca/faculty/arts/school-of-performing-arts/programs/theatre-programs/costume-studies.html>

RESTRICTIONS: Costume Studies degree or diploma students only.

THEA 4500 Canadian Theatre to 1968: Performing the Nation

CREDIT HOURS: 3

Early Canadian theatre offers a fascinating example of a colonial nation's struggle to find its own dramatic voice in the face of powerful outside influences. This seminar course will explore the development of theatre in Canada from its roots in First Nations ritual and performance, to its encounters with British and European models and its eventual search for an independent identity via the Little Theatre movement, the Workers' Theatre movement and the Dominion Drama Festival. The course will close with a consideration of the influential Massey Commission and the birth of the Stratford Festival, Canada's first 'world class' theatre. Over the course of the term, special attention will be paid to the development of diverse dramatic traditions in French and English Canada. Drama by representative playwrights will be studied alongside primary sources in Canadian theatre history to give students an integrated perspective on the complex artistic and political debates that helped to determine the character of performance in Canada.

FORMAT: Seminar| Discussion

PREREQUISITE: Permission of the instructor

CROSS-LISTING: ENGL 4500.03, CANA 4500.03

THEA 4501 Canadian Theatre Since 1968: Interrogating Identities

CREDIT HOURS: 3

This seminar course will examine the ongoing emergence of uniquely Canadian forms of theatre in the years since the Massey Commission asserted the need to foster Canada's native talent. Topics to be considered will include: the controversial role of government subsidy and policy-making in Canadian culture; the differing models offered by the Stratford and Shaw Festivals, by the major regional theatres, and by 'alternate' and independent companies; the contrast between First Nations, English- and French-Canadian traditions; and the rise of the current 'Fringe' phenomenon. Drama by representative playwrights will be considered alongside post-colonial theory and primary sources in Canadian theatre history to help students consider what a genuinely 'Canadian' theatre might look like. Above all, the course offers an opportunity to consider the complex relationship between theatre and national identity: who are 'we,' and how might our theatre express or even shape 'us'?

FORMAT: Seminar| Discussion

PREREQUISITE: Permission of the instructor

CROSS-LISTING: ENGL 4501.03, CANA 4501.03

THEA 4700X/Y Special Topics I

CREDIT HOURS: 6

In this full year seminar course, students focus on a particular topic in dramatic literature, film studies, theatre history, dramatic theory, or a related interdisciplinary subject in order to investigate it in great detail. The topic is assigned by the Fountain School at the end of the preceding year and is then posted by the Department and in the University's timetable.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. Partial credit cannot be given for a single term.

FORMAT: Seminar

THEA 4735X/Y Advanced Seminar in Baroque Culture

CREDIT HOURS: 6

This course offers its students a survey of key aspects of seventeenth and eighteenth-century European history and society along with a first-hand view of some of the most important aspects of baroque style and material culture. It takes place in the town of Cesky Krumlov in the Czech Republic. The course introduces students to the socio-political conditions that led to the birth of Baroque civilization before entering into an exploration of the court life of seventeenth and eighteenth-century Europe. It then examines the cultural and artistic forms most characteristic of this period, with particular emphasis on theatre history and on the role of the 'theatrical' in the Baroque arts. As the course proceeds, students will have an opportunity to consider the connections between course material and the evidence of Baroque culture to be found in the Castle Theatre's scenographic machinery, its stock of original scenery and props, and its collection of historical costumes, as well as to witness an experimental Baroque opera performance. Finally, the course will include visits to Prague and other sites of interest to add to students' understanding of the Baroque and its legacy to subsequent periods.

FORMAT: Lecture| Lab

PREREQUISITE: Permission of the Fountain School of Performing Arts and/or History Department.

CROSS-LISTING: HIST 4162.06, MUSC 4360.06

RESTRICTIONS: 3rd and 4th year students only.

THEA 4800X/Y Acting IV

CREDIT HOURS: 6

The culminating course of the Acting Program focuses on the rehearsal and performance of three Fountain School theatre productions and a Class Project. This course provides students with the opportunity to earn their Honours credit by preparing professional portfolios and audition pieces under the tutelage of the Acting Program faculty. The class project is directed by an Acting Program faculty member and all written requirements for both the Fountain School theatre season and the class project assessed by the Acting Program faculty. In its twofold function, this course is a bridge to the Acting profession.

NOTES: Students taking 4800X/Y.06 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture| Lab

COREQUISITE: THEA 4840X/Y.06

PREREQUISITE: THEA 3800X/Y.06, 3810X/Y.06, THEA 3820X/Y.06, MUSC 1081.03 and permission of the Acting Faculty

THEA 4840X/Y Advanced Performance Techniques

CREDIT HOURS: 6

This fourth-year Acting course is intended to provide production-related and movement instruction that will assist students with developing skills and techniques which can be applied in the Fountain School theatre season as well as in the professional theatre world. Production related instruction may vary from year to year, depending on the specific needs of each Fountain School theatre season.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

COREQUISITE: THEA 4800X/Y.06

PREREQUISITE: THEA 3800X/Y.06, THEA 3810X/Y.06, THEA 3820X/Y.06, MUSC 1081.03 and permission of the Acting Faculty

THEA 4900X/Y Theory and Criticism of Drama and Theatre

CREDIT HOURS: 6

This is a writing intensive course that tackles the problems of evaluating theatre. It investigates critical strategies of the past and judges today's theatre criticism. Students will practice the craft of criticism and debate the role of theatre theory for contemporary audiences.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Seminar

THEA 4921 Special Topics II

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in dramatic literature, film studies, theatre history, dramatic theory, or a related interdisciplinary subject, and investigate it in great detail. The topic is assigned by the Fountain School of Performing Arts at the end of the preceding academic year and is then posted at the School and in the Faculty's timetable.

FORMAT: Seminar

THEA 4922 Topics in Theatre History

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in the field of theatre history and investigate it in great detail. The topic is assigned by the Fountain School of Performing Arts at the end of the preceding academic year and it is then posted at the School and in the Faculty's timetable.

FORMAT: Lecture| Seminar| Discussion

PREREQUISITE: Permission of the instructor

THEA 4923 Topics in Dramatic Literature

CREDIT HOURS: 3

In this seminar course, students focus on a particular topic in the field of dramatic literature and investigate it in a great detail. The topic is assigned by the Fountain School at the end of the preceding academic year and it is then posted at the School and in the Faculty's timetable.

FORMAT: Lecture| Seminar| Discussion

PREREQUISITE: Permission of the instructor

THEA 4931X/Y Contemporary Theatre

CREDIT HOURS: 3

This course will deal with the most recent developments in theatre, especially with those post-1970's trends that exercise a broad international influence. Each year, our investigation will begin with a brief look at postmodern theatre and cover topics such as performance art, physical theatre, and postdramatic theatre. The main focus of the course, however, will be dictated by what is currently happening on major stages across the world and may significantly change from one year to another. In the interest of a comprehensive and inclusive approach to the subject, both commercial and experimental theatres will be studied, and we will also examine some relevant works of criticism and theory. Since much of the material required for this course is not yet removed enough from our time to be accessible in scholarly literature, students should be prepared for alternative methods of research.

FORMAT: Lecture| Seminar

Faculty of Computer Science

Location:

Building/Room: Goldberg Computer Science Building

Street Address 1: 6050 University Avenue

Street Address 2:

P.O. Box: 15000

Halifax, NS B3H 4R2

Website: www.cs.dal.ca

Email Address: undergrad@cs.dal.ca

Introduction

Computer Science is a fundamental multi-disciplinary, high-technology discipline. Computer Science forms an integral and indispensable part of higher education. The Faculty of Computer Science provides high-quality education to our students in all areas of Computer Science and Informatics and conducts excellent research in specific areas of Computer Science, emphasizing major research programs with the support and participation of Industry and Government. Our modern award-winning Computer Science building and state-of-the-art equipment permit Computer Science to conduct primary research in Algorithms, Bioinformatics, Data Mining, Health Informatics, Human Computer Interaction, Information Retrieval, Network Centered Computing, Privacy and Security and Visualization.

The Faculty of Computer Science was formed on April 1, 1997, following the amalgamation of the Technical University of Nova Scotia (TUNS) and Dalhousie University. Its members came from the School of Computer Science at TUNS and the Computing Science Division of the Department of Mathematics, Statistics, and Computing Science at Dalhousie.

Significant growth has occurred in our formative early years. Our graduate and undergraduate programs include imaginative multi-disciplinary programs such as Electronic Commerce, Health Informatics, and Bioinformatics. The most up-to-date information on ongoing programs, ongoing curriculum revision, and general information about the Faculty can be found on our website: <http://www.cs.dal.ca>.

Academic Regulations

In addition to the regulations below, please see the Academic Regulations section.

Workload

A normal course load is five courses during each study term.

Course Selection

The content of every course that students take to meet degree requirements must represent new material: students may not take courses whose content is largely repetitive of, or more elementary than, a course taken earlier on the same topic, without permission of the Faculty.

Of the 120 credit hours required to complete any CS undergraduate degree, at least 60 must be taken from Dalhousie University.

Computer courses in other departments

Computer courses offered by other departments (e.g., COMM 1502.03, MGMT 1601.03) cannot be taken for credit in the Faculty's degree programs without explicit permission of the Faculty of Computer Science.

Grades

1. Course instructors will describe methods of student evaluation during the first week of each course.
2. Supplementary examinations are not given in Computer Science courses.
3. A grade of at least C is required for a course to satisfy a prerequisite condition for a CSCI/INFX course.
4. A grade of at least C is required in all Computer Science CSCI/INFX core courses to graduate with any Computer Science degree.

Dismissal

A student who meets the conditions for dismissal as outlined in Section 20, Academic Dismissal, of the Academic Regulations will be dismissed from the program. A student who fails more than one co-op work term will be dismissed from the co-op program.

An application for readmission to the program may be considered two terms after dismissal. A student who has been dismissed and who has been required to withdraw from the university for one term or more may be readmitted to a program in the Faculty of Computer Science only once. A readmitted student is considered to be on probation.

Bachelor of Computer Science

The following regulations apply to students starting the program in September 2010 or after.

Faculty Requirements

1000 Level

- CSCI 1100.03: Computer Science I

CSCI 1101.03: Computer Science II

2000 Level

- CSCI 2100.03: Communication Skills: Oral and Written

CSCI 2110.03: Computer Science III

CSCI 2112.03: Discrete Structures I

CSCI 2121.03: Computer Organization with Assembly Language

CSCI 2132.03: Software Development

CSCI 2141.03: Introduction to Database Systems

3000 Level

- CSCI 3101.03: Social, Ethical and Professional Issues in Computer Science

CSCI 3110.03: Design and Analysis of Algorithms I

CSCI 3120.03: Operating Systems

CSCI 3130.03: Introduction to Software Engineering

CSCI 3136.03: Principles of Programming Languages

CSCI 3171.03: Network Computing

Other Required Courses:

- MATH 1000.03: Differential and Integral Calculus I

MATH 1010.03: Differential and Integral Calculus II or CSCI 2113.03 Discrete Structures II
MATH 2030.03: Matrix Theory and Linear Algebra I
STAT 2060.03: Introduction to Probability and Statistics I
six credit hours of a science course with a lab from a list provided by the Faculty of Computer Science
six credit hours to satisfy the writing requirement
three credit hours in humanities or social science at or above the 1000 level
six credit hours in business, science, or engineering at or above the 1000 level
three credit hours in business, science or engineering at or above the 2000 level
six credit hours of electives of computer science at or above the 3000 level
nine credit hours of electives of computer science at or above the 4000 level
six free credit hours of electives at or above the 1000 level
21 free credit hours of electives at or above the 2000 level

Bachelor of Computer Science Honours

The purpose of the Honours program is to provide a more challenging degree program that prepares students for graduate school.

To enter the Honours program a student must consult with the Honours Student Advisor and obtain the approval of the Faculty of Computer Science.

Each computer science course at or above the 3000 level must be passed with a grade of at least 2.0 (C). The cumulative GPA across all courses must be at least 3.0 (B).

The Honours program may be combined with co-op education.

Faculty Requirements

In addition to the normal requirements of the Bachelor of Computer Science degree, course selection must include six courses chosen as follows:

- 15 credit hours of computer science at or above the 4000 level chosen in consultation with the thesis supervisor to ensure that the student has the appropriate background
- CSCI 8873.03 (i.e., successfully complete and present an Honours Thesis)

Students who meet these requirements and who obtain a GPA of 3.7 (A-) or higher in all computer science courses will receive the degree Bachelor of Computer Science with First Class Honours.

Minors for the Bachelor of Computer Science

Students in the Bachelor of Computer Science program may add a Minor in many subjects from the Faculties of Arts and Social Sciences, Management, Science and the College of Sustainability. Available minors are listed in the College of Arts and Sciences section.

The minor requirements are in addition to the normal Bachelor of Computer Science requirements. Students wishing to pursue a minor should consult the relevant department and a Faculty of Computer Science academic advisor.

Co-operative Education Programs

All programs in Computer Science have a Co-operative Education option. This requires the completion of three Co-op work terms.

The Co-op office receives requests from employers for Co-op placements and advertises these to qualifying students. Students apply for these positions and are interviewed by the employer.

Students interested in the Co-op program should apply to register for CSCI 8890.00 in their second year.

Specializations

The following specializations have been approved for the following Bachelor of Computer Science programs: BCSC, BCSC Co-op, BCSC with Honours, BCSC Honours with Co-op, BCSC Honours Conversion, BCSC Honours Conversion with Co-op:

- Graphics, Gaming, and Media
- Artificial Intelligence and Intelligent Systems
- Communication Technologies and Cyber Security
- Data Science

The specializations have the following requirements:

Graphics, Gaming, and Media specialization requires a student to take three compulsory and two electives from a list of elective courses. Required courses are:

- CSCI 3161: Introduction to Computer Graphics with Animation
- CSCI 3162: Digital Media
- CSCI 4168: Game Design and Development

Elective courses are:

- CSCI 3154: AI and Games
- CSCI 4160: Computer Graphics
- CSCI 4166: Visualization
- CSCI 4167: Advanced Computer Animation

Artificial Intelligence and Intelligent Systems specialization requires a student to take two compulsory and two electives at the fourth year level from a list of elective courses. Required courses are:

- CSCI 3151: Web Intelligence
- CSCI 3154: AI with Gaming Applications

Elective courses are:

- CSCI 4141: Information Retrieval
- CSCI 4144: Data Mining and Data Warehousing
- CSCI 4152: Natural Language Processing
- CSCI 4155: Machine Learning with Robots

Communication Technologies and Cyber Security specialization requires a student to take two required courses and three electives from a set of elective courses. Required courses are:

- CSCI 3120: Operating Systems
- CSCI 3171: Network Computing

Elective courses are:

- CSCI 3172: Web-Centric Computing
- CSCI 4116: Cryptography
- CSCI 4169: Usable Privacy and Security
- CSCI 4171: Networks and Communications
- CSCI 4174: Network Security
- CSCI 4176: Mobile Computing

Data Science specialization requires a student to take three compulsory courses and three electives from a list of elective courses. Required courses are:

- CSCI 4146 The Process of Data Science
- CSCI 4145 Cloud Computing
- One of CSCI 3151 Web Intelligence or CSCI 4125 High Performance Computing

Elective courses are:

- Either CSCI 3151 Web Intelligence or CSCI 4125 High Performance Computing, not taken as a required course
- CSCI 3154 Introduction to Artificial Intelligence with Gaming Applications
- CSCI 4141 Information Retrieval
- CSCI 4144 Introduction to Data Mining and Data Warehousing
- CSCI 4152 Natural Language Processing
- CSCI 4155 Machine Learning with Robotics
- CSCI 4166 Visualization
- STAT 2080 Statistical methods for Data Analysis and Inference
- STAT 3340 Regression and Analysis of Variance

Degree Requirements and Specialization Requirements

Note that to obtain a degree, the degree requirements must be satisfied. To obtain a specialization certificate, requirements for the specialization, in addition to the degree requirements, must be satisfied. Students need to contact the Undergraduate Administrator to request a certificate and a note on their transcript.

Additional information on the specializations is available at <http://www.cs.dal.ca/undergraduate/specializations>.

Entry Points to Bachelor of Computer Science

There are multiple entry points into the Bachelor of Computer Science program.

First-Year Entry-Students are advised to apply directly to the Faculty of Computer Science but may take their courses within the BSc first year and transfer to Computer Science at the beginning of their second year.

Students who wish to transfer to the Bachelor of Computer Science program from other disciplines may be able to do so, but will have to make up any required courses that are missing.

See also the Academic Regulations section for the Faculty of Computer Science.

Accreditation and the Profession

Of particular importance to the Faculty is the accreditation of the undergraduate program by the Computer Science Accreditation Council (CSAC), which is responsible for accreditation of computer science programs in Canada. Accreditation provides our graduates with an accelerated path towards achieving the professional designation of Information Systems Professional of Canada (I.S.P.).

The Bachelor of Computer Science, Bachelor of Computer Science with Co-op, Bachelor of Computer Science with Honours, and Bachelor of Computer science with Honours and Co-op are accredited by CSAC.

The co-operative program offers work terms to our students, thus providing an additional link between the Faculty and the Profession.

Bachelor of Science and Bachelor of Arts with Computer Science Bachelor of Science Major in Computer Science

The Faculty of Computer Science offers a Bachelor of Science degree with a Major in Computer Science. The program of studies is similar to the Bachelor of Computer Science, but with more flexibility in selection of elective courses. The program may be of benefit for students who want to use it as a basis to enter other professional programs such as Education, Medicine, or Law. However, unlike the Bachelor of Computer Science degree, it does not meet CSAC accreditation requirements. Students interested in this degree option will find further information on the Faculty website at <http://www.cs.dal.ca> and should consult with a Faculty advisor.

Double Majors and Combined Honours

The following degree programs are available to students interested in interdisciplinary studies where the larger number of majors credits is Computer Science: Bachelor of Science (120 credit hours) with Double Major, Bachelor of Science (120 credit hours) with Combined Honours, Bachelor of Arts (120 credit hours) Double Major and Bachelor of Arts (120 credit hours) Combined Honours.

Combined Honours

Students interested in taking honours in Computer Science and another subject as a combined program should consult the honours advisor through whom a suitable course of study can be arranged.

A combined honours program may well be an appropriate choice for many students. If a student is contemplating graduate work, it should be borne in mind that the work in either subject of a combined honours program may be insufficient for entry to a regular graduate program, and that a qualifying year may be necessary.

Students who wish to arrange interdisciplinary programs (with fields such as Mathematics, Physics, Psychology, and others) are invited to discuss their interests with the appropriate department and the Undergraduate Chair of the Faculty of Computer Science.

Minor in Computer Science for Non-Computer Science Major BSc

The Minor in Computer Science is available to non-CS students registered in a 120 credit hour major and honours programs. Please see Minor in Computer Science.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

General Interest Courses

The Faculty offers six courses that should be of interest to students whose major field of study while at Dalhousie will not be Computer Science.

CSCI 1106.03
CSCI 1107.03
CSCI 1200.03
INFX 1606.03
INFX 1615.03
INFX 1616.03

Course Descriptions

CSCI 1100 Computer Science I

CREDIT HOURS: 3

This course provides a general introduction to computer science and the hardware and software of computers. The main focus is on programming skills and how to apply these skills in solving a variety of problems. Algorithmic concepts are stressed.

PREREQUISITE: Nova Scotia PreCalculus or Calculus Math or equivalent

EXCLUSIONS: CSCI 1202.03

CSCI 1101 Computer Science II

CREDIT HOURS: 3

This course is a continuation of CSCI 1100.03. It focuses on programming and linear data structures.

PREREQUISITE: CSCI 1100.03 or INFX 1600.03 or INFX 1604.03

CSCI 1106 Animated Computing

CREDIT HOURS: 3

This course is a hands-on introduction to two areas of computing: robotics and game design. Students will learn how to program simple robots and will use empirical methods to investigate various aspects of robotics, such as sensors and actuators, uncertainty, knowledge representation, and failure detection and recovery. Students will also learn how to design and develop simple games and will investigate aspects of game design, such as event driven frameworks and collision detection. Students will use empirical methods to investigate the player-centric aspects of game design. Students work in groups to complete small robotics and game design projects.

CSCI 1107 Social Computing

CREDIT HOURS: 3

A hands-on course on technologies and the underlying infrastructure for social computing, including digital collaboration media, social networks and visualization, and their social impact. Students will use various applications, such as Twitter, YouTube, and wikis to examine their functionalities, and explore infrastructure technologies including databases, computer networks and Web-servers that facilitate their execution.

CSCI 1200 Introduction to Computing for Non-Majors

CREDIT HOURS: 3

This is a course of technical computer literacy. Students can expect to learn about computers in a general way and how computers affect the way we live and work. Students will be given an opportunity to become familiar with typical applications of software such as word processors, spreadsheets and database applications. Other topics will include the use of the internet, creation of web pages, and simple programming concepts. No previous computer experience is required. This course is open to Arts and Social Sciences and Health Education students only.

NOTES: This course cannot be counted towards the Bachelor of Commerce or a Minor in Business.

CROSS-LISTING: ASSC 1000.03

CSCI 2100 Communication Skills: Oral and Written

CREDIT HOURS: 3

This course is designed to help students become more successful communicators by examining the communication process from both a theoretical and practical viewpoint. Students learn to formulate communication goals, to examine their audience and to deliver accurate, effective messages. Written assignments and oral presentations allow for the development of these skills through practice. Students ultimately learn to communicate effectively and with confidence in a variety of settings.

PREREQUISITE: It is recommended that students have completed their Writing Requirement.

CROSS-LISTING: ENGL 2100.03

EXCLUSIONS: COMM 2701.03, COMM 1701.03, COMM 1702.03, MGMT 3602.03

CSCI 2110 Computer Science III

CREDIT HOURS: 3

This course provides a comprehensive introduction to data structures and algorithms, including their design, analysis, and implementation. In discussing design and analysis there is a strong emphasis on abstraction. In discussing implementation, general approaches that are applicable in a wide range of procedural programming language are emphasized, in addition to a focus on the details of implementations. Topics include an introduction to asymptotic analysis and a review of basic data structures (stacks, queues, lists, vectors), trees, priority queues, dictionaries, hashing, search trees, sorting (MergeSort, QuickSort, RadixSort) and sets, and graphs (traversals, spanning trees, shortest paths).

PREREQUISITE: CSCI 1101.03

CSCI 2112 Discrete Structures I

CREDIT HOURS: 3

See the course description for MATH 2112.03 in the Mathematics section of this calendar.

CROSS-LISTING: MATH 2112.03

CSCI 2113 Discrete Structures II

CREDIT HOURS: 3

See the course description for MATH 2113.03 in the Mathematics section of this calendar.

PREREQUISITE: See Mathematics section

CROSS-LISTING: MATH 2113.03

CSCI 2121 Computer Organization with Assembly Language

CREDIT HOURS: 3

This course deals with the fundamentals of computer organization; assembly language is used as an aid to studying computer organization. Topics include digital logic, ALU and CPU design, object code, microprogramming, CISC, RISC, and parallel computers.

COREQUISITE: CSCI 2112.03 and CSCI 2132.03

PREREQUISITE: CSCI 1101.03

CSCI 2132 Software Development

CREDIT HOURS: 3

This course presents techniques for programming and software development in a procedural language. It reviews the basics of procedural programming and introduces students to source code management, testing strategies, debugging, and basic scripting techniques.

PREREQUISITE: CSCI 1101.03 or suitable prior programming experience

CSCI 2141 Introduction to Database Systems

CREDIT HOURS: 3

This course introduces students to the concepts of database management systems and database design. Topics include: Database (DB) components, DB design using entity-relationship (relational and object oriented), SQL, and transactional properties and techniques to support them. The concepts will be reinforced using one or more Database Management Systems.

PREREQUISITE: CSCI 1100.03

CROSS-LISTING: INFX 2640.03

EXCLUSIONS: CSCI 2140.03

CSCI 3101 Social, Ethical and Professional Issues in Computer Science

CREDIT HOURS: 3

Computers can enable people to do things that our present laws and policies were not formulated to cover (hacking, sharing files on the internet, and companies sharing data). In such cases, people need to be able to decide for themselves the best course of action, and defend such decisions. This course aims at developing the ethical reasoning skills and sensitivities that computer professionals will need to make good decisions and to justify them. The course includes a general introduction to ethical theories and their use in making and justifying decisions. We then consider various issues and case studies, illustrating the kinds of problems that can arise from the use and misuse of computers and technology: the responsibilities of computing professionals; ethics on the internet (hacking, computer crime, netiquette); privacy and information; intellectual property; social and political issues (digital divide, computers and work, the internet as a democratic technology).

CROSS-LISTING: PHIL 2490.03

CSCI 3110 Design and Analysis of Algorithms I

CREDIT HOURS: 3

This course covers techniques for the design and analysis of efficient algorithms and data structures. Topics include asymptotic analysis, divide and conquer algorithms,

greedy algorithms, dynamic programming, data structure design, optimization algorithms, and amortized analysis. The techniques are applied to problems such as sorting, searching, identifying graph structure, and manipulating sets.
PREREQUISITE: CSCI 2110.03 and CSCI 2112.03

CSCI 3120 Operating Systems

CREDIT HOURS: 3

This course includes a review of I/O and interrupt structures. Topics covered include dynamic procedure activation, system structure and evaluation, memory management, process management, process scheduling, recovery procedures, concurrency, deadlocks, resource allocation, protection, and operating systems implementation.

PREREQUISITE: CSCI 2110.03, CSCI 2121.03, and CSCI 2132.03

CSCI 3121 Computer Systems Architecture

CREDIT HOURS: 3

The primary objective of this course is to give a comprehensive understanding of the structure and function of a computer system from an architecture and integration viewpoint. It focuses on two broad architectural perspectives: the internal perspective, which entails the architecture and design integration of the data path logic, control path logic, memory and I/O; and the external perspective, which provides consumer views and system selection aspects. Examples of real machines are used in the course.

PREREQUISITE: CSCI 2121.03

EXCLUSIONS: ECED 3403.03

CSCI 3130 Introduction to Software Engineering

CREDIT HOURS: 3

The course examines the process of software development, from initial planning through implementation and maintenance. A brief survey of available tools and techniques will be presented covering the topics of analysis, planning, estimating, project management, design, testing, and evaluation. Particular emphasis will be given to organizing and planning, team participation and management, top-down design and structure charts, system and information flow diagrams, walk-throughs and peer review, and testing and quality control.

PREREQUISITE: CSCI 2110.03, CSCI 2132.03, or INFX 3600.03

CROSS-LISTING: INFX 3630.03

CSCI 3132 Object Orientation and Generic Programming

CREDIT HOURS: 3

This course deals with the fundamental concepts of object-oriented programming: behaviour, inheritance, encapsulation and polymorphism. There is a discussion of the history of object-oriented programming, and introduction to some currently used object-oriented programming languages.

PREREQUISITE: CSCI 2110.03 and CSCI 2132.03

CSCI 3136 Principles of Programming Languages

CREDIT HOURS: 3

This course provides a comparative study of advanced programming language features. Topics include statement types, data types, variable binding and parameter passing mechanisms. Formal methods for syntactic and semantic description of programming languages are examined.

PREREQUISITE: CSCI 2110.03, CSCI 2112.03, and CSCI 2132.03

CSCI 3151 Web Intelligence

CREDIT HOURS: 3

The Web and on-line digital libraries constitute the largest repository of interconnected knowledge in text form mankind ever created. Search engines have made this knowledge accessible to the lay person. Social networks further enhance the exchange of knowledge among individual Web users. Mining the Web and associated digital libraries is the next challenge that promises to change the nature of scientific discovery, and to dramatically impact the way business is conducted. This course will introduce the core Artificial Intelligence concepts and algorithms in the context of Web and text mining: machine learning, natural language processing, semantic web, social networks and web usage mining.

PREREQUISITE: CSCI 2112.03, CSCI 2141.03, STAT 2060.03, and MATH 2030.03

CSCI 3154 Introduction to Artificial Intelligence with Gaming Application

CREDIT HOURS: 3

This course covers the breadth of Artificial Intelligence techniques and as such is divided into roughly two parts: Symbolic AI and Machine Learning. Throughout the course the problem of decision making for Non-Play Characters in computer games will form the case study and application examples used to illustrate the AI techniques studies. Symbolic AI will cover First-order Logic, Forward/Backward chaining, Rule-based systems and Fuzzy Logic. The relative trade offs in the application of such architectures to NPC decision making will be developed. The role of Planning systems in Goal orientated decision making will also be introduced, where this also makes use of search based problem solving and the A* algorithm. Search and its utility in evaluation of next moved in turn-wise games will also be specifically investigated as well it introduction to Bayesian Decision making will be made, where this leads to causal reasoning and adaptation. The second half of the course will introduce Machine Learning from the basic design decisions of Representation, Credit assignment and Cost Function. Two paradigms will be investigated in particular - Gradient decent Neural Networks and Evolutionary computation - where these illustrate the relative trade offs implicit in the three ML design decisions. Case studies and laboratories illustrating these properties include learning to play checkers, recognizing Poker hands, learning NPC behaviors through evolution.

PREREQUISITE: CSCI 2110.03, CSCI 2112.03, and CSCI 2132.03

EXCLUSIONS: CSCI 4154.03

CSCI 3160 Designing User Interfaces

CREDIT HOURS: 3

This course deals with concepts and techniques underlying the design of interactive systems. Both human factors and the technical methods of user interface design are covered. Students will learn how to apply various techniques through the design, creation, and testing of a prototype system.

COREQUISITE: CSCI 2140.03 or CSCI 2141.03

PREREQUISITE: CSCI 2132.03 or INFX 1616.03 or INFX 2690.03

CSCI 3161 Introduction to Computer Graphics and Animation

CREDIT HOURS: 3

The course provides students with a practical foundation in high-level computer animation programming. Through the development of a significant project using industry standard graphics libraries, students will learn proven techniques that have become common currency in the field of computer animation.
PREREQUISITE: CSCI 2110.03, CSCI 2132.03 and MATH 2030.03

CSCI 3162 Digital Media

CREDIT HOURS: 3

This course covers technical aspects of digital media, including images, video, and sound. Topics covered include digital representation, processing, compression, and multimedia generation.

PREREQUISITE: MATH 1000.03, MATH 2030.03, CSCI 2110.03

EXCLUSIONS: CSCI 4165.03

CSCI 3171 Network Computing

CREDIT HOURS: 3

This course gives students a foundation in computer networks. It presents a top-down view of the layered architectural elements of communication systems, focusing on the Internet and TCP/IP. Topics include client/server systems, packet switching, protocol stacks, queuing theory, application protocols, socket programming, remote service calls, reliable transport, UDP, TCP, and security.

PREREQUISITE: CSCI 2110.03, CSCI 2132.03 and STAT 2060.03

CSCI 3172 Web-Centric Computing

CREDIT HOURS: 3

This course provides a solid grasp of core WWW technologies and a conceptual framework for understanding the development of the WWW and working with future web technologies. The course explores interactive and non-interactive web applications built using various technologies and architectural models. We explore the significance of web design and programming concepts in terms of accessibility issues both from the perspective of web robots and end-users. Web caching, proxy techniques, and security issues are also discussed.

COREQUISITE: CSCI 3171.03 may be taken as a co-requisite

PREREQUISITE: (CSCI 2140.03 or CSCI 2141.03) and CSCI 3171, or INFX 2691.03 and INFX 2601.03

CSCI 3190 Community Outreach

CREDIT HOURS: 3

This is a project-oriented course where the result of the project is a real-world implementation that meets the requirements of a community group such as a charity, non-profit organization, or educational institution. Students work in teams on the entire application development life cycle from requirements analysis through to maintenance. Lectures cover a range of topics such as practical application of requirements analysis, systems design, and database design methodological skills developed in prerequisite courses or from prior equivalent experience. This course cannot be counted towards a Bachelor of Informatics degree.

PREREQUISITE: CSCI 2100.03, CSCI 2132.03, and (CSCI 2140.03 or CSCI 2141.03)

CSCI 3191 Community Outreach II

CREDIT HOURS: 3

CSCI 3191 is a continuation of CSCI 3190, allowing students to undertake projects lasting two terms or to work on a second, more advanced project. When CSCI 3190 and CSCI 3191 are offered concurrently, they are jointly scheduled, and project teams are drawn from both courses, with more responsibility given to students enrolled in CSCI 3191 (e.g., team leadership). This course cannot be counted towards a Bachelor of Informatics degree.

PREREQUISITE: CSCI 3190.03 or permission of the instructor

CSCI 4112 Theory of Computation

CREDIT HOURS: 3

This is a course on formal languages and computational models. Topics covered include finite automata, pushdown automata, Turing machines, undecidability and recursive and recursively enumerable functions. Some applications to computer science are also discussed such as compiler design and text processing.

PREREQUISITE: CSCI 2112.03 and CSCI 3136.03

CROSS-LISTING: MATH 4660.03

CSCI 4113 Design and Analysis of Algorithms II

CREDIT HOURS: 3

This course covers advanced techniques for the design and analysis of efficient algorithms. Problems are taken from a wide range of areas including combinatorics, numerical computation, graph algorithms, string matching, approximation algorithms, computational geometry, and NP-Completeness.

PREREQUISITE: CSCI 3110.03

CROSS-LISTING: MATH 4130.03

CSCI 4115 Topics in Graph Theory

CREDIT HOURS: 3

See the course description for MATH 4330 in the Mathematics section of this calendar.

PREREQUISITE: See Mathematics section

CROSS-LISTING: MATH 4330.03

CSCI 4116 Cryptography

CREDIT HOURS: 3

See the course description for MATH 4116 in the Mathematics section of this calendar.

PREREQUISITE: See Mathematics section

CROSS-LISTING: MATH 4116.03

CSCI 4117 Advanced Data Structures

CREDIT HOURS: 3

Data structures play a central role in many modern applications, and are essential building blocks of efficient algorithms. This course covers classical results and recent advancements on data structures. Topics covered include the $O(\lg n)$ barrier in sorting and searching, online optimization of search structures, fast text retrieval, space

efficient data structures for large data sets, and persistent data structures.

PREREQUISITE: CSCI 3110.03

CSCI 4125 High Performance Computing

CREDIT HOURS: 3

This course explores the design, implementation, and evaluation of computer programs for applications in which performance is a central issue. In the sequential computing setting, it explores topics such as profiling, cache effects, I/O performance, floating-point issues, compiler directives and performance tuning. In the parallel computing setting it introduces techniques for the design, implementation and evaluation of programs for both Shared-Memory Multiprocessors (SMPs) and Distributed Memory Multiprocessors (clusters). It is recommended that students take CSCI 3121 prior to taking this course.

PREREQUISITE: CSCI 3120.03

CSCI 4126 Ubiquitous Computing

CREDIT HOURS: 3

Ubiquitous Computing moves computing off the desktop and into the fabric of our everyday lives. This course explores both systems and human-centric advances in Ubiquitous Computing, including sensing, middleware, locative applications, smart environments, ambient displays, and tangible interaction. Students will design and implement a Ubiquitous computing application prototype.

PREREQUISITE: CSCI 3160.03 and CSCI 3171.03

CSCI 4140 Advanced Database Systems

CREDIT HOURS: 3

This course covers advanced Database (DB) topics including, but not limited to: DB design, normalization query processing and optimization, transaction processing, concurrency control and recovery, and distributed databases. Additional topics may include object-oriented databases, multi-databases, data integration and data warehousing.

PREREQUISITE: CSCI 2141.03

EXCLUSIONS: CSCI 3140.03

CSCI 4141 Information Retrieval

CREDIT HOURS: 3

This course examines information retrieval within the context of full text databases. Topics include the major models of information retrieval, evaluation, searching and clustering, and hypertext.

PREREQUISITE: CSCI 2110.03 and (CSCI 2140.03 or CSCI 2141.03)

CSCI 4144 Introduction to Data Mining and Data Warehousing

CREDIT HOURS: 3

This course reviews main concepts in data mining and data warehouses including objectives, architectures, algorithms, implementations, and applications. The topics covered include operational information process, decision-oriented information process, data warehousing and On-Line Analytical Process (OLAP), characterization mining, association rule mining, classification and predication and clustering. Selected system tools for data mining and data warehousing are introduced.

PREREQUISITE: CSCI 2141.03 or CSCI 3140.03

CSCI 4145 Cloud Computing

CREDIT HOURS: 3

Cloud computing provides users with the ability to access and use computational, storage, and interconnect resources as services offered by cloud providers. This course provides the students with the theoretical foundations of the cloud computing as well as with hands-on experience in using various cloud technologies. Topics covered are related to the types of cloud services, cloud infrastructure, distributed storage models, and programming models offered as general services and also developed for Big Data. Topics will also include underlying technologies, such as virtualization.

PREREQUISITE: CSCI 2141.03, CSCI 3120.03, and CSCI 3171.03

CSCI 4146 The Process of Data Science

CREDIT HOURS: 3

The advent of low-cost storage and processing power coupled with ever increasing amounts of "born digital" data has created the new field of data science. The ability to achieve a specific goal or answer a business question by crunching through very large and complex databases is becoming a competitive advantage for businesses and leads to new discoveries in science and medicine. This course is an overview of the different processes that make up a data science project. While other fields concentrate on finding previously unknown knowledge or searching for a specific pattern, data science focuses on answering deep questions and making the conclusions accessible to the rest of the organization. This course requires the implementation of software and experimental design in order to complete the assignments.

PREREQUISITE: CSCI 2141.03, STAT 2060.03, CSCI 3130.03 and (CSCI 3151.03 or CSCI 3154.03)

CSCI 4152 Natural Language Processing

CREDIT HOURS: 3

This course presents strategies and techniques for natural language understanding by machines. The course will cover a selection of topics taken from the following three areas: parsing techniques used to represent sentence structure and discover ambiguities, the representation of word meanings and how sentence meaning can be derived from word meanings, and the application of context and world knowledge to the interpretation of language.

PREREQUISITE: CSCI 3110.03

CSCI 4155 Machine Learning

CREDIT HOURS: 3

This course focuses on the theory of learning machines, which are important techniques underlying data mining and many AI applications. The topics include supervised learning, in particular maximum likelihood estimation in stochastic model and probabilistic reasoning, ubiquitous learning machines such as support vector machines and deep neural networks; unsupervised learning which includes generative models, expectation maximization, and Boltzmann machines; and reinforcement learning including Markov decision processes and temporal difference learning. The course includes an introduction to a high level modeling language such as MATLAB or Python and refresher on probability theory and matrix algebra.

PREREQUISITE: MATH 2030.03 and STAT 2060.03

EXCLUSIONS: CSCI 4150.03

CSCI 4160 Topics in Computer Graphics

CREDIT HOURS: 3

This course presents the theory and mathematical algorithms required to develop and build a graphics package. Emphasis is on either two or three dimensions and the transformations and manipulations necessary to lead to animation. The design platform and language are left as a student choice to ensure immediate familiarity and future development advantages.

PREREQUISITE: CSCI 3161

CSCI 4163 Human-Computer Interaction

CREDIT HOURS: 3

Human-computer interaction deals with human-computer communication and how to facilitate it. This course begins with a discussion of information processing characteristics important to human-computer interaction and formal models of human-computer interaction. Subsequent topics include dialogue techniques, response times and display rates, information presentation, interaction devices, computer training, help systems, computer supported co-operative work, information search and visualization, hypermedia, and the world wide web.

PREREQUISITE: CSCI 3160.03

CSCI 4166 Visualization

CREDIT HOURS: 3

This course focuses on graphical techniques for data visualization that assist in the extraction of meaning from datasets. This involves the design and development of efficient tools for the exploration of large and often complex information domains. Applications of visualization are broad, including computer science, geography, the social sciences, mathematics, science and medicine, as well as architecture and design. The course will cover all aspects of visualization including fundamental concepts, algorithms, data structures and the role of human perception.

PREREQUISITE: CSCI 3161.03 or CSCI 4160.03

CSCI 4167 Topics in Computer Animation

CREDIT HOURS: 3

The course introduces students to fundamental and advanced techniques and algorithms in Computer Animation. Topics include interpolation based and kinematic techniques, physically based modelling, motion capture, and character animation.

PREREQUISITE: CSCI 3161.03

CSCI 4168 Game Design and Development

CREDIT HOURS: 3

This course covers the fundamentals of digital game design with an emphasis on team-based development. In this course students will produce a significant game using techniques and principles derived from established state-of-the-art industry practices. Topics include an examination of game design theories, programming architectures, audio-visual design and game production.

PREREQUISITE: CSCI 2110.03 and CSCI 3130.03

CSCI 4169 Usable Security

CREDIT HOURS: 3

Human factors play an important role in the effectiveness of security and privacy solutions, and it is important for security and privacy experts to have an understanding of how people will interact with the systems they develop. This course is designed to introduce students to a variety of usability and user interface problems related to privacy and security, and to give them experience in designing studies aimed at helping to evaluate usability issues in security and privacy systems. Topics include human threat identification, security warning design, location privacy, privacy policies, web browser privacy and security, phishing, passwords, and secure communication.

PREREQUISITE: CSCI 3160.03

CSCI 4171 Networks and Communication

CREDIT HOURS: 3

The primary objective of this course is to give the student a comprehensive understanding and specialized knowledge in the field of computer networks and communications. The course teaches through a systems approach to networks by examining the hardware and protocol components that comprise a network. The course also examines the interactions and interdependencies between protocols. Topics covered in this course include network principles and concepts, transmission principles, network architecture, routers and routing protocols, direct link networks, wireless networks, internetworking, and emerging network technologies.

PREREQUISITE: CSCI 2121.03 and CSCI 3171.03

CSCI 4174 Network Security

CREDIT HOURS: 3

Security stands out as a critical issue in the design and deployment of information systems in general, and networks in particular. This course will deal with the design of secure information systems with emphasis on secure networking and secure information transfer. It will also include topical and emerging areas in security such as the establishment of an organization-wide security plan and bio-metric identification systems.

PREREQUISITE: CSCI 3171.03

CSCI 4176 Mobile Computing

CREDIT HOURS: 3

This course covers the principles of mobile computing and the concepts and techniques underlying the design and development of mobile computing applications. Mobile computing is discussed from technological, application, and user perspectives. Topics include mobile and wireless communication technologies, development environments, application design for resource limited and failure-prone environments, user interface issues in the mobile computing setting, and the future of mobile computing.

PREREQUISITE: CSCI 2121.03 and CSCI 3171.03

CSCI 4180 Introduction to Computational Biology and Bioinformatics

CREDIT HOURS: 3

This course introduces biology-related applications of computer science. No background in biology is assumed. The topics covered include the following: introductory molecular biology and evolution, genomics, similarity and homology, multiple sequence alignments, phylogenetics, structural bioinformatics and gene expression. The

emphasis is on the applications of computer science to biology.
PREREQUISITE: CSCI 2132 and STAT 2060

CSCI 4181 Bioinformatics Algorithms

CREDIT HOURS: 3

The discipline of bioinformatics applies sophisticated computational and statistical techniques to problems in the biological domain. This course will focus on a few biosequence-related challenges in depth, examining the complexity and efficiency of different approaches, the relationship between statistical optimality and biological reality, and the consistency (or lack thereof) among methods.

PREREQUISITE: CSCI 3110 or permission by instructor

CSCI 4190 Special Topics in Computer Science

CREDIT HOURS: 3

This course examines topics determined by the interests of the students and the instructor.

PREREQUISITE: Permission of the instructor

CSCI 4191 Application Development Project

CREDIT HOURS: 3

This is a project-oriented course for students to participate in distributed software development projects, such as the Undergraduate Capstone Open Source Project (www.ucosp.ca) initiative. Students work as part of a development team on new or existing projects for real-world applications. In this course students learn how to work in large development teams, which may be geographically distributed. Students implement portions of a large software project and give a public presentation on their work. Students work under supervision of a faculty member. A specific development project must be approved by the undergraduate chair in consultation with the instructor.

PREREQUISITE: (CSCI 3120.03, CSCI 3130.03 and CSCI 3171.03) or INFX 4600.03

CSCI 4192 Directed Studies

CREDIT HOURS: 3

This course is a study of specific academic subject area not covered in another course offered at Dalhousie University, under close supervision of a faculty member. It typically consists of predetermined readings, discussions with the instructor, and a term paper summarizing the studied material. A specific directed studies course must be approved by the undergraduate chair in consultation with the instructor.

PREREQUISITE: CSCI 3110.03, CSCI 3120.03, CSCI 3130.03, CSCI 3136.03, CSCI 3171.03

CSCI 8873 Honours Seminar

CREDIT HOURS: 3

This is a course through which students complete their Honours Thesis requirements. Honours students in Computer Science must register for this course or CSCI 8871/72. In this course, students complete their thesis research, write their honours theses, and give public presentations of their work. In a normal course sequence, the student should have taken CSCI 4192 under the direction of their thesis supervisor. During this course, the student should have acquired the necessary background knowledge for their thesis research and formulated a research plan for their thesis work. Deviations from this sequence are possible.

PREREQUISITE: Permission of the Honours Coordinator

CSCI 8890 Co-op Seminar

CREDIT HOURS: 0

Students in the Bachelor of Computer Science Co-operative Education Program must register for this course, which orients students to the co-op system. Pass/fail grading applies to this course.

PREREQUISITE: Permission of the Faculty of Computer Science

CSCI 8891 Co-op Work Term I

CREDIT HOURS: 0

This course is the first work term for students in the Bachelor of Computer Science Co-operative Education Program. Pass/fail grading applies to this course.

PREREQUISITE: CSCI 8890.00

CSCI 8892 Co-op Work Term 2

CREDIT HOURS: 0

This course is the second work term for students in the Bachelor of Computer Science Co-operative Education Program. Pass/fail grading applies to this course.

PREREQUISITE: CSCI 8891.00

CSCI 8893 Co-op Work Term 3

CREDIT HOURS: 0

This course is the third work term for students in the Bachelor of Computer Science Co-operative Education Program. Pass/fail grading applies to this course.

PREREQUISITE: CSCI 8892.00

Informatics

Introduction

Informatics is the multidisciplinary study of how people transform technology, and how technology transforms us. It lies at the intersection of people, technology and information systems and focuses on the expanding relationship between information systems and the daily lives of people, both at home and at work. Informatics helps develop new uses for information technology in order to design solutions that reflect the way people create, use and find information, and it takes into account the social, cultural and organizational settings in which those solutions will be used.

Informatics professionals have very diverse jobs. Some typical activities include:

- assess information needs of organizations
- manage information projects
- solve organizational information flow problems
- make software packages talk to each other
- model the information flows among a group of people
- design innovative user interfaces
- track health care resources
- design professional websites
- improve health care information systems
- develop business solutions

Bachelor of Informatics

Program Structure

There is a choice of majors: Environment, Sustainability and Society, Specialization of your own design and Software Systems. Students should consult with the Faculty of Computer Science for details on other options that are being developed.

Elective courses are any courses of your own choosing, although no more than 24 credit hours may be at the 1000 level. The electives allow you to explore possible specializations and to follow personal interests.

A **minor in Management** is available to students registered in the BInf program. For further information, please see the Management section. Note: This increases the program requirements by one course.

The co-operative education program is a mandatory component of the Bachelor of Informatics. Students are required to complete three co-op work terms as part of their bachelor degree.

The co-op office receives requests from employers for co-op placements and advertises these to qualifying students. Students apply for these positions and are interviewed by the employer.

Co-op work terms are scheduled after terms 5, 6 and 7.

The normal academic sequence of terms follows:

Yr/Term	Fall	Winter	Summer
Year 1	AT1	AT2	FREE
Year 2	AT3	AT4	WT1
Year 3	AT5	WT2	AT6
Year 4	WT3	AT7	AT8

AT = Academic study term

WT = Co-op work term

General Requirements

- STAT 1060.03 Introduction to Statistics
- CSCI 1100.03 Computer Science I
- CSCI 1101.03 Computer Science II
- INFX 1606.03: Introduction to Website Creation
- INFX 1615.03: Concepts of Computing
- INFX 1616.03: Applications of Computing
- CSCI 2100.03: Communication Skills
- CSCI 2112.03: Discrete Structures I
- CSCI 2141.03: Introduction to Database Systems
- CSCI 3130.03: Introduction to Software Engineering
- INFX 2601.03: Introduction to Information Security
- INFX 2670.03: Introduction to Server Side Scripting

- INFX 2690.03: Integrated Studies 1
- INFX 2691.03: Integrated Studies 2
- HAHP 3100.03: Research Methods (or equivalent)
- CSCI 3160.03: User Interface Design
- CSCI 3172.03: Web-Centric Computing
- INFX 3601.03: Project 4
- INFX 4600.03: Project 5
- INFX 4601.03: Project 6
- 36 credit hours specified by the major
- 12 credit hours of free electives at or above the 1000 level
- nine credit hours of free electives at or above the 2000 level
- Completion of three co-op work terms

* Neither CSCI 3190.03 nor CSCI 3191.03 can be counted towards a Bachelor of Informatics degree.

Major in Software Systems

The Major in Software Systems follows the general Bachelor of Informatics requirements and must include the following courses:

- CSCI 2110.03: Computer Science III
- CSCI 2132.03: Software Development
- CSCI 3132.03: Object Orientation and Generic Programming
- CSCI 4140.03: Advanced Database Systems
- CSCI 3171.03: Network Computing
- 18 credit hours of CSCI courses at or above the 3000 level

Major in Environment, Sustainability and Society

The College of Sustainability offers a Major in Environment, Sustainability and Society in the BInf program. For complete details about the College, its programs and courses please see the College of Sustainability section.

The Major in Environment, Sustainability and Society follows the general Bachelor of Informatics requirements and must include the following courses:

- SUST 1000.06 (six credit hours in fall term)
- SUST 1001.06 (six credit hours in winter term)
- SUST 2000.06 or SUST 2001.06
- 18 credit hours from the approved list (at least 12 credit hours above 2000 level)

Specialization of Your Own Design

The Specialization of your own design follows the general Bachelor of Informatics requirements and must include the following:

- It is your responsibility to develop and submit to the Faculty a written proposal for these 14 courses.
- The 14 courses must be chosen from at least two disciplines other than Computer Science. Two of the disciplines must account for at least four courses each and at least 10 courses together.
- Your proposal must be developed in consultation with one undergraduate adviser from each of the disciplines.
- Your proposal must include career goals, a list of courses, a timeline, and a coherent justification for the proposal. It must be approved by the Faculty.
- At least 30 credit hours must be at the 2000 level or higher.
- At least 18 credit hours must be at the 3000 level or higher.

Entry Points to Bachelor of Informatics

There are multiple entry points in to the Bachelor of Informatics program.

- First-Year Entry-Students are advised to apply directly to the Faculty of Computer Science.
- Students who wish to transfer in to the Bachelor of Informatics program from other disciplines may be able to do so, but will have to make up any required courses that are missing.

See also the Academic Regulation section for the Faculty of Computer Science.

Minor in Informatics for Non-Computer Science Majors

See Minors section.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

INFX 1606 Introduction to Web site creation

CREDIT HOURS: 3

This course introduces students to key web concepts and skills for creating and maintaining websites. This course is intended for students with no formal computer training. Topics include introduction to the Web, hypertext markup languages such as HTML, style sheets, client side programming, multimedia foundations, dynamic content and website organization and maintenance.

CROSS-LISTING: CSCI 1206.03

EXCLUSIONS: INFX 1600.18

INFX 1615 Concepts of Computing

CREDIT HOURS: 3

This course introduces some key concepts in computing and places them in context with a survey of applications. The skills developed in this course include research, redaction, problem solving and abstraction. The themes covered are the following: Data and storage, operating systems, networking and the Internet, database systems, artificial intelligence and computer graphics. This course is eligible to partially cover the writing requirement for students in the Bachelor of Computer Science, the Bachelor of Informatics and Bachelor of Science, Computer Science.

INFX 1616 Applications of Computing

CREDIT HOURS: 3

This course covers professional aspects of the computing industry. The main themes are: project management, software engineering and computer languages. It explores how technological advances impact the workplace for non-technical people. It also includes a module on proofreading and editing. This course is eligible to partially cover the writing requirement for students in the Bachelor of Computer Science, the Bachelor of Informatics and Bachelor of Science, Computer Science.

INFX 2601 Introduction to Information Security

CREDIT HOURS: 3

Information security is becoming increasingly important in today's networked world, and is impacting every aspect of our lives including finance, healthcare, government, education, arts and entertainment. The objective of this course is to teach the basic principles of information security from the perspective of providing security awareness and its best practices for the real world. Topics include motivation for security, tools and techniques used by adversaries to gather information and launch attacks, Internet security, firewalls, basics of encryption and authentication, virus protection, secure credit card and bank transactions, wireless security, computer forensics, identity theft and protection, anti-phishing and biometric security.

CROSS-LISTING: CSCI 2201.03

INFX 2640 Introduction to Database Systems

CREDIT HOURS: 3

This course introduces students to the concepts of database management systems and database design. Topics include: Database (DB) components, DB design using entity-relationship (relational and object oriented), SQL, and transactional properties and techniques to support them. The concepts will be reinforced using one or more Database Management Systems.

PREREQUISITE: CSCI 1100.03

EXCLUSIONS: CSCI 2141.03

INFX 2670 Introduction to Server Side Scripting

CREDIT HOURS: 3

A server side scripting language is used to create web pages with dynamic content. The course provides the technology necessary for connecting client web pages to web servers and processing and storing information obtained using forms during web sessions.

COREQUISITE: INFX 2640.03 or CSCI 2141.03

PREREQUISITE: CSCI 1100.03 and INFX 1606.03
CROSS-LISTING: CSCI 2170.03

INFX 2690 Managing Software Development Projects

CREDIT HOURS: 3

Students work in project teams to solve a practical informatics problem. Team members are drawn from all years of study. The project gives students an opportunity to develop their technical and professional skills.

PREREQUISITE: First year writing requirement

INFX 2691 Introductory Community Outreach Project

CREDIT HOURS: 3

This course is a continuation of INFX 2690.03

PREREQUISITE: INFX 2690.03, INFX 1606.03, CSCI 1100.03

INFX 3600 Intermediate Community Outreach Project I

CREDIT HOURS: 3

This course is a continuation of INFX 2691.03 with the development of leadership skills.

PREREQUISITE: INFX 2640.03, INFX 2670.03, INFX 2691.03

INFX 3601 Intermediate Community Outreach Project II

CREDIT HOURS: 3

This course is a continuation of INFX 3600.03

PREREQUISITE: INFX 3600.03

INFX 3630 Introduction to Software Engineering

CREDIT HOURS: 3

See the course description for CSCI 3130.03 in the Computer Science section of this calendar.

PREREQUISITE: CSCI 2110.03, CSCI 2132.03, or INFX 3600.03

CROSS-LISTING: CSCI 3130.03

INFX 4600 Senior Community Outreach Project I

CREDIT HOURS: 3

Continuation of INFX 3601.03

PREREQUISITE: CSCI 3130.03, INFX 2690.03, and (INFX 3601.03 or CSCI 3191.03)

INFX 4601 Senior Community Outreach Project II

CREDIT HOURS: 3

Continuation of INFX 4600.03

PREREQUISITE: INFX 4600.03

Engineering as a Profession

Engineering is an important profession. Virtually all aspects of modern life are involved with this fascinating discipline. Engineering education at Dalhousie is demanding, because the engineering profession is demanding. Society expects its technical problem solvers to offer answers to some of the most difficult questions around, questions related to the environment, productivity, information technology, communications, transportation, and more. In general, the engineering enterprise contributes not only to human welfare, but also to the sustainable development of our resources. Engineering education provides great rewards for the engineer of the future. Specifically, there is the personal satisfaction of following a career where one's personal expertise can benefit fellow humans and contribute to the making of a better world.

The Faculty of Engineering at Dalhousie University prepares its students with the problem-solving skills needed for lifelong exploration in a field that answers some of today's most pressing concerns. The Faculty of Engineering has an excellent tradition of providing engineering education for students in the Atlantic Provinces that started in 1907 with the founding of the Nova Scotia Technical College. Our graduates occupy many important positions throughout Canada and in many other countries.

The Faculty of Engineering offers undergraduate curricula leading to the degree of Bachelor of Engineering in the following disciplines:

- Chemical Engineering
- Civil Engineering
- Electrical Engineering
- Environmental Engineering
- Industrial Engineering
- Materials Engineering
- Mechanical Engineering
- Mineral Resource Engineering

The Faculty also offers a Bachelor of Applied Science in Food Science (admission suspended, pending review), and post-graduate studies at the master's and doctoral level.

For students who are eligible, the Faculty of Engineering offers a Bachelor of Engineering Co-operative Education program that integrates academic study with university approved industrial experience. Graduation from this program requires satisfactory performance in both areas. The schedule of study and work terms varies according to the discipline, details of which are outlined in Section E of the Engineering curricula in this calendar.

The co-operative education system requires students to alternate periods of study with periods of university approved, full-time, paid employment. The period of employment is called a work term and is normally four months (16 weeks) in length. Some programs combine two or more four month work terms. Work terms have academic requirements that must be completed in addition to the requirements of the employer.

The co-op degree program covers almost five calendar years, comprising eight or nine terms (depending on the area of specialization) each consisting of about four months' duration of university work on campus which are pursued alternately with four-month terms of supervised training in the practical experiences fundamental to the development of the graduate engineer. In a typical program of study, the total time spent in academic study is the same as that encountered in the usual course of four academic years.

Graduation from the University is the beginning of a lifelong learning experience. After completion of formal studies leading to the Bachelor of Engineering degree, and being admitted as an Engineer in Training (EIT) by an Association of Professional Engineers in Canada, four years of suitable experience are required as a condition of admission to the profession of Engineering.

The practice of engineering is regulated, by statute, in all Canadian provinces and territories. To become a Professional Engineer you must satisfy the requirements of the licensing bodies. These requirements include a degree from an accredited program, successful completion of a professional practice (law and ethics) examination, and suitable experience. Accreditation of the degree programs by the CEAB is the mechanism by which graduates qualify for registration as Professional Engineers without the need to undertake additional examinations in specific technical subject areas. The BEng programs described in this calendar have been specifically designed to satisfy the criteria of the Profession and are evaluated regularly by the Canadian Engineering Accreditation Board (CEAB) of Engineers Canada. The Faculty will not graduate any student who does not meet these requirements because this would jeopardize accreditation for the program. The department responsible for the appropriate program will use these requirements in determining the suitability of student elective course selections. The baccalaureate programs in all disciplines are accredited by the Canadian Engineering Accreditation Board.

Degree Programs

Undergraduate

Engineering

Bachelor of Engineering

Students who have successfully completed the academic study program in any of the disciplines will be granted the degree of Bachelor of Engineering.

Bachelor of Engineering with Distinction

Students who have successfully completed the requirements for the degree of Bachelor of Engineering, and have obtained a Cumulative Grade Point average of at least 3.7, will be granted the degree of Bachelor of Engineering with Distinction.

Bachelor of Engineering with Sexton Distinction

Dr. F.H. Sexton was the President of the Nova Scotia Technical College since its establishment in 1909 until his retirement in 1947. To honour his contributions, the Faculty of Engineering awards the designation of Sexton Distinction to each undergraduate student who has taken a full course load and obtained a cumulative Grade Point Average of at least 3.85 or higher with no failed marks during their program beginning in Academic Term 5.

Co-operative Program Designation

Students who have successfully completed the requirements for the degree of Bachelor of Engineering and who, in addition, have successfully completed three four-month work terms, each of a minimum of 14 weeks, with a minimum of 35 hours per week, or equivalent as determined by the Department and the Co-op office, will receive the "Co-operative Education" designation on their degree.

Diploma of Engineering

Students who have successfully completed the academic study program in the first four terms in any of the disciplines will be granted the Diploma of Engineering.

Combined Bachelor of Science/Diploma of Engineering

Students may register in a combined Bachelor of Science/Bachelor of Engineering program. Those who successfully complete the requirements as outlined in the Concurrent Programs sections will be awarded the Diploma in Engineering and the 90 credit hour Bachelor of Science Degree.

Combined Bachelor of Arts/Diploma of Engineering

Students may register in a combined Bachelor of Arts/Bachelor of Engineering program. Those who successfully complete the requirements as outlined in the Concurrent Programs sections will be awarded the Diploma in Engineering and the 90 credit hour Bachelor of Arts Degree.

Food Science

Bachelor of Applied Science

This is a standard 120 credit hour curriculum. Consult the Food Science section.

Graduate

Master of Applied Science

Students who have successfully completed the course requirements for the degree and who have submitted and defended orally an acceptable thesis, will be awarded the degree of Master of Applied Science.

Master of Engineering

Students who have successfully completed the course requirements for the degree and submitted an acceptable project report, will be awarded the degree of Master of Engineering.

Master of Engineering (Internetworking)

This is a 10 month plus internship/project interdisciplinary Master's Degree program focused on the theory and technology of the Internet. This program has been designed to prepare individuals to play an active role in the rapidly expanding field of Internetworking. Students who complete the prescribed ten courses and a project course will be awarded the MEng (Internetworking).

Master of Science

Students who have successfully completed the course requirements for the degree in Engineering Mathematics or Food Science and who have submitted and defended orally an acceptable thesis or project report, shall be awarded the degree of Master of Science.

Doctor of Philosophy

Students who have successfully completed the course requirements for the PhD degree, passed their comprehensive examination, and submitted and defended orally a satisfactory thesis, will be awarded the degree of Doctor of Philosophy.

Staff

Dean

Leon, L. J., BSc, MSc, PhD (Dalhousie), PEng

Associate Dean, Undergraduate Studies and Associated Universities

Cyrus, J. P., BSc (Eng) (UWI), MASc, PhD (TUNS), PEng

Assistant Dean, Planning

Bauer, R. J., BSc (Waterloo), PhD (Toronto), PEng

Assistant Dean, Co-op

Jarjoura, G., BEng (TUNS), MSc, PhD (Dalhousie), PEng

Engineering (Year I & II) The Associated University Program

Students who have completed the degree requirements for a Diploma of Engineering or a Certificate of Applied Science from one of the Associated Universities are admissible to the Upper Division in the Faculty of Engineering. Admission to specific programs is competitive and is based on the students' academic standing. The Associated Universities are:

Acadia University

Wolfville, Nova Scotia
A. Mitchell, Director
The Ivan Curry School of Engineering

Cape Breton University

Sydney, Nova Scotia
E. MacLellan, Director
Diploma in Engineering Program

St. Francis Xavier University

Antigonish, Nova Scotia
F. Comeau, Chairman
Department of Engineering

Saint Mary's University

Halifax, Nova Scotia
A. Merabet, Director
Division of Engineering

University of Prince Edward Island

Charlottetown, Prince Edward Island
S. Champion, Chairman
Engineering Department

Each of the Associated Universities establishes its own entrance requirements. Dalhousie University recognizes all of the Associated Universities and ensures proper standards of achievement by means of the Associated Universities Directors of Engineering Committee. The program at each Associated University contains courses fulfilling the minimum entrance requirements established by the Senate of Dalhousie University. Students who complete the applied science or engineering program at an Associated University may receive a Certificate or Diploma and are normally admitted to the programs in Chemical, Civil, Electrical, Environmental, Industrial, Materials, Mechanical, or Mineral Resource at Dalhousie without examination. Students should ensure that their course selection at the Associated Universities include the discipline specific courses relevant to their program of choice. Not all Associated Universities offer all discipline specific courses, and students should contact the office of the Associate Dean, Faculty of Engineering at the Sexton location, for details. Students who have completed equivalent university studies elsewhere may also be admitted subject to Dalhousie University Regulations.

Please refer to the Graduate and Professional Calendar for details of graduate programs offered by the Faculty of Engineering.

Academic Regulations

Students are reminded that the academic regulations stated in the calendar are abridged for reference. In addition to the Academic Regulations section of this calendar and the regulations stated below, the current Faculty of Engineering Working Rules also apply to all students.

Courses on Letters of Permission

The academic program for a student will normally contain a maximum of two courses on a letter of permission.

Course Grades

A student must achieve a grade of D or greater in each course of the curriculum and satisfy the regulations set out herein in order to graduate. Where Faculty regulations permit, a student who achieves a grade of FM in a required course may write a supplementary examination to attempt to raise the grade to D or greater. If the grade is not raised to at least D by means of a supplementary examination or if a supplementary examination is not permitted, the student must repeat the course. See also Supplementals.

A student is permitted to repeat a failed mandatory course only once. In the case of a failed elective course, a student may choose either to repeat the course or to substitute another elective course in lieu of the failed course. In the case of a substituted course only one such substitution is allowed. A student will be academically dismissed if the grade achieved in the repeated mandatory course or the repeated elective course or the substituted course is less than D.

Readmission After Academic Dismissal

A student who has been academically dismissed only once from their program may apply to be readmitted to the same program after a minimum of eight months from the time of dismissal, or, such a student may apply to be admitted to a different engineering program starting immediately. Readmission may be granted by the Faculty on the recommendation of the Department concerned. A department may readmit a student who has been academically dismissed, subject to special academic conditions set by the department, which are based on an evaluation of the student's academic record. See also Academic Dismissal.

Scholarships

Only those students who are registered for a full load of courses as measured by the curriculum of the program concerned will be eligible for scholarships and awards in the Faculty of Engineering.

Supplementary Examinations

Supplementary examinations may be offered to students in order (1) to raise a course grade to at least D, (2) to raise a term GPA to at least C. In the case of raising the term GPA, the supplementary examination will be offered in a course with a grade lower than C. A student who is on Academic Dismissal is not eligible to write a supplementary examination.

Only one supplementary examination will be permitted per session. It must be written on the first scheduled date for writing supplementaries for that student's particular course and cannot be postponed or carried forward to a later session.

Supplementary examinations will normally be held in late August prior to the fall term, early January in the winter term and early May in the summer term.

Supplementary examinations will not necessarily be available for all courses. In addition, the minimum reported final mark required to write a supplementary

examination is FM. The Faculty will determine the courses in which supplementary examinations are not available and a list of those courses will be published early in the term.

The course mark resulting from a supplementary examination will replace the original course mark for all purposes.

When a supplementary examination is offered, the mark obtained on the supplementary examination will normally replace the final examination mark in calculating the course grade.

Repeating Students

If changes are made in the curriculum, repeating students will be required to satisfy the new curriculum.

Auditing a Course

See definition of “audit student”.

Students who are registered for a degree in the Faculty must have the approval of the Faculty to audit a course. Such approval can be obtained by submitting a written request to the Dean, who will refer the matter to the Faculty for a decision.

Students who are not registering for a degree in the Faculty must obtain the approval of the Department to audit a course.

Medical Notes for Final Examinations

Students who miss final examinations for medical reasons must submit medical notes to the Undergraduate Studies Office for consideration by the Associate Dean of Engineering. The medical note is verified and the professor advised if they may submit the grade of ILL before arrangements for special examinations or rewrites may be made. Meanwhile, the student will be given the grade earned in the course, minus the value of the missed examination. A detailed description of the content of the medical note is described in Article 16.8 Special Arrangements for Examinations, Tests and Assignments (see Academic Regulations section of this calendar).

Fees

Information pertaining to fees and expenses is given in the “Fees” section.

Financial Assistance

Information pertaining to Financial Assistance is given in the “Awards and Financial Aid” section.

Bachelor of Engineering Introduction

The engineering program is designed for students who have completed senior matriculation (Nova Scotia Grade XII) including mathematics, physics, and chemistry, and rank well in their course. Students may be admitted with advanced placement.

At Dalhousie, students benefit from our unique approach to undergraduate engineering education. Renowned for innovation in education, the unique undergraduate engineering curricula at Dalhousie University provide a sound basis in Mathematics and pure Science and in Engineering Science and Design, that are a foundation for success in any engineering career. A substantial part of the work of the first and second years is common to all programs. The content of many of these courses will change very little over the course of an engineer’s career; they will become a sound basis of life-long learning.

The Faculty of Engineering has five engineering departments and one service department, the Department of Engineering Mathematics and Internetworking. Civil and Resource Engineering administers degree programs in the disciplines of Civil and Mineral Resource Engineering. The Department of Process Engineering and Applied Science administers degree programs in the disciplines of Environmental, Chemical, and Materials. The remaining departments are Electrical, Industrial and Mechanical Engineering.

At the end of Year 1, students apply for discipline placement indicating the order of their preferences. The Faculty of Engineering will inform students who have met

the criteria of promotion from Year 1 to Year 2 of their conditional placement in one of the accredited programs. The curriculum for each of the basic programs combines required 'core' subjects essential to the field, and 'elective' subjects permitting considerable diversity in individual programs of study. An important part of the curriculum is a series of Complementary Studies courses. The curriculum for the first two years of Engineering at Dalhousie is indicated below. **Students should refer to the appropriate departmental chapter of the calendar once a field of specialization has been determined for subsequent years.**

Admission to an Engineering Discipline

A student must apply to be admitted into one of the engineering disciplines. Application must be made by April 30 of any year, for conditional acceptance into year two of a specified engineering program.

Every engineering discipline has a defined maximum enrollment; therefore places are assigned on a competitive basis. The criterion for this competition is the average grade over all credits completed to date in the core curriculum of the Diploma of Engineering.

The procedure is as follows:

1. By April 30, each student must specify ordered preferences for five engineering disciplines. The application is for conditional acceptance into year two of an engineering discipline.
2. Any student who has completed all of the entry requirements for an engineering discipline, with a GPA of 3.30 or better, will be guaranteed a place in that engineering discipline.
3. In a single competition, students with a GPA greater than or equal to 2.00 and less than 3.30 will be assigned conditional places (year two) in engineering disciplines, proceeding in strict order of GPA, subject to discipline capacities.
4. Any student with a GPA of less than 2.00 will not be admitted to a discipline.

Humanities Electives

Some disciplines of engineering require a student to do one or more humanities electives. In such a case, the definition of a humanities elective shall be as follows:

Humanities would normally be in the Faculty of Arts and Social Sciences and may not include significant science, technical or mathematics content, nor may they include economics or language acquisition. Subject areas in which there may be suitable courses include: Arabic, Bioethics, Canadian Studies, Chinese, Classics, Contemporary Studies, Creative Writing, Early Modern Studies, English, European Studies, French, Gender and Women's Studies, German, History of Science and Technology, History, International Development Studies, Italian, Journalism, King's Foundation Year Program, Law, Leisure Studies, Music, Philosophy, Political Science, Religious Studies, Russian Studies, Social Work, Sociology and Social Anthropology, Spanish and Latin American Studies, Sustainability, Theatre.

BSc/BEng

Students who meet the admission requirements for the Bachelor of Science program and the Bachelor of Engineering program are eligible to select this concurrent degree option. Students wishing specific advice should consult the Assistant Dean, Faculty of Science and the Associate Dean, Faculty of Engineering. Students accepted will complete the 90 credit hours BSc and the first two years of engineering studies leading to the Diploma in Engineering concurrently in a period of three calendar years. At the end of the three year period, both the degree and the diploma will be awarded to successful candidates. This opportunity should appeal to students with career objectives in multi-disciplinary fields such as Biomedical Engineering, Environmental Science, or Materials Science (among others). It is thus possible to complete the requirements for the Bachelor of Science and Bachelor of Engineering degrees concurrently in a time period of five years in total (or up to six years for Co-op programs).

BA/BEng

Students wishing to do so may complete the 90 credit hours BA degree program and the first two years of engineering studies leading to the Diploma in Engineering concurrently in a period of three calendar years. At the end of the three year period, both the degree and the diploma will be awarded to successful candidates. It is thus possible to complete the requirements for the Bachelor of Engineering and the Bachelor of Arts degrees concurrently in a time period of five years in total (or up to six years for Co-op programs).

Courses in the fourth and fifth years are those required to finish the Bachelor of Engineering degree.

Diploma of Engineering

Students who have successfully completed the academic study program in the first four terms in any of the disciplines may be eligible to apply for the Diploma of Engineering. This means a student must have a minimum GPA of 2.0, and have completed, with a minimum grade of D, the required courses as specified in the discipline curriculum.

Curricula for Terms 1 - 4

Year 1—Term 1 Fall

- ENGI 1103 Engineering Design and Graphics I
- CPST 1103 Technical Communications I
- MATH 1280 Engineering Mathematics I
- ENGM 1081 Computer Methods
- CHEM 1021 Engineering Chemistry I
- PHYC 1190 Introduction to Physics I

Year 1—Term 2 Winter

- ENGI 1203 Mechanics I: Statics and Dynamics
- CPST 1203 Technical Communications II
- MATH 1290 Engineering Mathematics II
- ENGM 1041 Applied Linear Algebra
- CHEM 1022 Engineering Chemistry II
- PHYC 1290 Introduction to Physics II

Year 2—Term 3 Fall

- ENGM 2101 Applied Vector Calculus
- ENGM 2032 Probability and Statistics
- ECED 2000 Electric Circuits
- ENGI 2102 Thermo-Fluid Engineering I
- A three credit hour writing course
- IENG 2005 Engineering Economics

Year 2—Term 4 Winter

- ENGI 2203 Engineering Design II
- HSTC 1801 History of Engineering II
- ENGM 2022 Applied Differential Equations
- Three discipline-specific electives

Discipline-Specific Electives

Chemical Engineering

- PEAS 2201 Fundamentals of Process Engineering
- PEAS 2202 Fundamentals of Environmental Engineering
- BIOL 1030 Biology for Engineers

Civil Engineering

- ENGI 2204 Mechanics of Materials
- MINE 2200 Introductory Geology for Engineers
- ENGI 2103 Thermo-Fluid Engineering II

Electrical Engineering

- ECED 2001 Circuit Analysis
- ECED 2200 Digital Circuits
- BIOL 1030 Biology for Engineers

Environmental Engineering

- PEAS 2201 Fundamentals of Process Engineering
- PEAS 2202 Fundamentals of Environmental Engineering
- ENGI 2204 Mechanics of Materials

Industrial Engineering

Three electives as follows.

- Any one or both of:
 - MINE 2200 Geology for Engineers
 - BIOL 1030 Biology for Engineers
- Up to two electives from the following:
 - ECED 2001 Circuit Analysis
 - ECED 2200 Digital Circuits
 - PEAS 2201 Fundamentals of Process Engineering
 - PEAS 2202 Fundamentals of Environmental Engineering
 - ENGI 2204 Mechanics of Materials
 - ENGI 2103 Thermo-Fluid Engineering II

Materials Engineering

- PEAS 2201 Fundamentals of Process Engineering
- PEAS 2202 Fundamentals of Environmental Engineering
- ENGI 2204 Mechanics of Materials

Mechanical Engineering

- ENGI 2400 Mechanics II: Dynamics
- ENGI 2103 Thermo-Fluid Engineering II
- ENGI 2204 Mechanics of Materials

Mineral Resource Engineering

- MINE 2200 Introductory Geology for Engineers
- A humanities elective
- ENGI 2204 Mechanics of Materials

The elective choices are summarized in the table below.

	Discipline-Specific Electives	Environmental	Chemical	Civil	Electrical	Industrial	Mechanical	Materials	Mineral Resource
ECED 2001	Circuit Analysis				1	**			**
ECED 2200	Digital Circuits				1	**			**
PEAS 2201	Fundamentals of Process Engineering	1	1			**		1	**
PEAS 2202	Fundamentals of Environmental Engineering	1	1			**		1	**
BIOL 1030	Biology for Engineers		1		1	*			**
MINE 2200	Geology for Engineers			1		*			1
	A humanities elective								1
ENGI 2103	Thermo-Fluid Engineering II			1		**	1		**
ENGI 2204	Mechanics of Materials	1		1			1	1	1

* any one or both

** up to two

Engineering Co-op Program

The Faculty of Engineering offers a Bachelor of Engineering Co-operative Education program (BEng Co-op) that allows students to alternate career focused work terms with study terms and receive a Co-op degree designation upon graduation. Co-op enables students to apply what they learn in class to real-world work situations and then apply what they learn at work to their classroom studies, thereby enriching their learning. It also helps students to learn more about their career options by test-driving different work environments before they graduate. Graduation from this program requires satisfactory performance in both areas. The schedule of study and work terms varies according to the discipline, details of which are outlined below.

BEng Co-op is a selective program. Students interested in participating must apply, via the S.I.T.E. Co-op (<http://www.dal.ca/faculty/site.html>) by December 15th for the following programs: Chemical, Environmental, Materials and Mechanical, and by May 15th for Civil, Electrical, Industrial and Mineral Resource.

The Study and Work Schedule

The co-operative system requires students to alternate periods of study with periods of university approved, full-time, paid employment. The period of employment is called a work term and is normally four months (16 weeks) in length. Some programs combine two or more four-month work terms. Work terms have academic requirements that must be completed in addition to the requirements of the employer.

Each discipline has a specific work and study term schedule which students are required to follow (see the study and work sequence chart below). Work terms do not

begin until third year of the program. All programs end on an academic term rather than a work term to allow for the formal integration of workplace and classroom learning.

Study and Work Sequences

Discipline	Fall	Winter	Summer	Fall	Winter	Summer	Fall	Winter
Electrical	Study	Work	Study	Work	Study	Work	Study	
Industrial	Study	Work	Study	Work	Study	Work	Study	Study
Civil and Mineral Resource	Study	Study	Work	Work	Off	Work	Study	Study
Chemical, Environmental, Materials, Mechanical	Work	Study	Work	Study	Work	Work	Study	Study

See S.I.T.E. for a full description of the Co-op Program. Further details can be obtained from the Department (<http://www.dal.ca/faculty.site.html>).

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Courses for First 2 Years

Standard Courses for first 2 years of Study:

ECED 2000.03 Electric Circuits
 ECED 2001.03 Circuit Analysis
 ECED 2200.03 Digital Circuits
 ENGI 1101.045 Engineering Design I
 ENGI 1202.045 Mechanics of Materials
 ENGI 2102.03 Thermo-Fluid Engineering I
 ENGI 2103.03 Thermo-Fluid Engineering II
 ENGI 2203.03 Engineering Design II
 ENGI 2400.03 Mechanics II
 ENGM 1041.03 Applied Linear Algebra
 ENGM 1081.03 Computer Programming
 ENGM 2032.03 Applied Probability and Statistics
 ENGM 2101.03 Applied Vector Calculus
 IENG 2005.03 Engineering Economics
 PEAS 2201.03 Fundamentals of Process Engineering
 PEAS 2202.03 Fundamentals of Environmental Engineering
 PEAS 2203.03 Organic Chemistry for Process Engineers

CPST Series: Complementary Studies Courses

CPST 3030.03 Engineering in Society II

Course Descriptions

ENGI 1103 Engineering Design I

CREDIT HOURS: 3

The objective of the class is to provide students with conceptual design experience, team work experience, computer drafting experience and to develop skills in engineering free-hand sketching, 3-D visualization, and reading/drafting of engineering drawings. An integral part of the class is the Design Project, focused on design as the essence of engineering, and the process of design and reporting.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 3
COREQUISITE: CPST 1103.03
EXCLUSIONS: ENGI 1101.03

ENGI 1203 Mechanics of Materials

CREDIT HOURS: 3

This course teaches the concept of stress, strain and deformation of a solid body subjected to static forces. Topics considered include; stresses and strains under axial, bending, torsional and combined loadings, transformation relations for stresses and strains, Mohr's circle for stress and strain, strain gauges, mechanical properties of materials and failure theories. An individual design project is a major component of this course.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

COREQUISITE: CPST 1203.03

PREREQUISITE: PHYC 1190.03, MATH 1280.03

EXCLUSIONS: ENGI 1202.03

ENGI 2102 Thermo-Fluid Engineering I

CREDIT HOURS: 3

This course introduces the engineering sciences of thermodynamics and fluid mechanics in an integrated manner. A unified approach to energy transfer in thermal and mechanical systems is presented. The course covers basic properties of fluids, fluid statics, simplified analyses of fluid motion, the basic laws of thermodynamics, and the application of control volume techniques to engineering problems. Power systems are introduced through a study of the Rankine cycle.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGI 1203.03, CPST 1203.03 OR ENGI 1202..03; CHEM 1022.03; MATH 1290.03, PHYC 1290.03

ENGI 2103 Thermo-Fluid Engineering II

CREDIT HOURS: 3

This course builds on the fluid mechanics introduction presented in Thermo-fluids I to present engineering concepts of fluid mechanics and energy. The course covers dimensional analysis, completes fluid statics from Thermo-Fluids I, puts a large emphasis on the notion of control volume needed to properly solve thermal fluid problems using the conservation laws presented as integral relations, treats flow in ducts putting emphasis on head losses (friction and minor) and presents a practical theory of turbomachinery. The different concepts studied during the course are brought together at the end in a series of design examples and design problems.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGI 2102.03

ENGI 2203 Engineering Design II

CREDIT HOURS: 3

This class provides a project-based exercise in the engineering design process. Students work in teams and as individuals on defined projects which apply knowledge and skills in all areas of engineering studied in semesters 1 to 3. The projects encompass the design method, conceptual design, design selection, detailed analysis, CAD and simulation tools, engineering drawings, safety and preparation of professional technical reports. Discipline-specific projects are assigned. All projects involve evaluation/testing of student designs, depending on the discipline section either through (i) construction and testing of a physical prototype or (ii) development and testing of an engineering simulation model.

PREREQUISITE: ENGI 1103.03, ENGI 1203.03, ENGM 1081.03, CPST 1103.015, CPST 1203.015

ENGI 2400 Mechanics II

CREDIT HOURS: 3

This second class in Engineering Mechanics considers the kinematics and kinetics of a single particle and a single rigid body. The class builds on the concepts introduced in ENGI 1400.03 (Mechanics I). Both vector and scalar methods are used. Topics include kinematics of a particle, kinetics of a particle, kinematics of a rigid body in plane motion, and planar kinetics of a rigid body.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: ENGM 1081.03; MATH 1290.03; PHYC 1190.03,1290.03

ENGI 8890 Co-op Orientation and Job Competition Preparation

CREDIT HOURS: 0

This on-line course introduced aspects of career development including, self-assessment, resume and cover letter writing, interviewing skills and job search techniques. It also provides students with an overview of the graduate attributes, the Pre-Grad EIT work credit, and co-op program policies and procedures. This class is available every term and is a pre-requisite for all engineering co-op classes. It must be completed one term prior to the first work term. The grade will be Pass/Fail.

Chemical Engineering

Location:

Building/Room: Sexton House

Street Address 1: 1360 Barrington Street

Street Address 2: Room E102

P.O. Box: 15000

Halifax, NS B3H 4R2

Telephone: (902) 494-3953

Introduction

The Chemical Engineering program prepares students for careers in the chemical and process industries and in a variety of related fields. These encompass, among others, the traditional areas of environmental control, plastics and polymers, pulp and paper, instrumentation and process control, petrochemicals, petroleum and natural gas processing, and energy conversion and utilization, as well as the growing fields of biotechnology, food processing, composite materials, corrosion and protective coatings, and manufacture of microelectronic components.

The responsibilities assumed by Chemical Engineers include a wide range of activities such as research and development of novel products and processes, the design, development and operation of process plants, and management of technical operations and sales.

The curriculum is designed to provide the student with a broad background in the underlying sciences of Chemistry, Physics and Mathematics. This is then combined with a detailed knowledge of engineering principles and practice, along with a good appreciation of social and economic factors. Thorough understanding of the principles is accomplished through lecture, tutorial and laboratory activities, and extensive use is made of the departmental computing facilities. Laboratory involvement is considered an important component of the students' education. Emphasis in the laboratory is placed on team work and on the development of problem-identification and problem-solving skills. The Department stresses the preparation of students for independent work and the development of interpersonal skills necessary for professional engineers. Elective courses provide the student with the opportunity to obtain additional training in one of the following areas: computers and process control, biotechnology, environment, energy resources and utilization, and research and development.

In the later academic terms, students have an opportunity to work under conditions similar to those encountered in consulting and engineering organizations, particularly in the computer-aided-design and process design courses.

Research opportunities leading to the Master's and Doctorate degrees are offered in a wide range of topics within the Department as well as in conjunction with other departments and a number of research centres on the campus. Detailed information regarding the graduate program can be obtained from the Department.

Students have the option of joining either the co-op or non co-op undergraduate programs.

Curriculum and course descriptions

Refer to sections IIB and IIIB, Chemical Engineering Programs in the Process Engineering and Applied Science section.

Co-operative program and schedule

Refer to section Engineering Co-op Program, in the Engineering section.

Admissions

Admission requirements are those specified by the Faculty of Engineering.

Staff

Introduction

The Department of Civil and Resource Engineering consists of the Civil Engineering Program and the Mineral Resource Engineering Program. The Department currently offers two accredited professional degree programs:

BEng in Civil Engineering, co-op and non co-op programs;

BEng in Mineral Resource Engineering, co-op and non co-op programs.

For additional information on these programs and the nature of the engineering studies involved, the reader is referred to individual program listings in the Faculty of Engineering section of this calendar.

Professor Emeritus

Jaeger, L. G., BA, MA (Cantab), PhD, DSc (London), DEng (Carleton, MUN, TUNS)(hc), PEng

Civil Engineering

Years 1 and 2 follow the program that is outlined in the 'Faculty of Engineering' section of this calendar. The two Options, Earth and Environment and Infrastructure, contain a strong common core in those aspects of engineering considered to be crucial for all civil engineering baccalaureates, irrespective of specialization. Terms 5 and 6 are the same for both Options. In Terms 7 and 8 students will have the opportunity to select some courses from a list of technical electives based on their specific interests in focus areas of Civil Engineering.

Non Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	FREE
4	Study Term 7	Study Term 8	

Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	Work Term 1
4	Work Term 2	FREE	Work Term 3
5	Study Term 7	Study Term 8	

Infrastructure Option

Year 3 Term 5 (Fall)

- CIVL 3101.03 Soil Mechanics
- CIVL 3300.03 Hydraulics
- CIVL 3505.03 Structural Systems I-Form and Analysis
- CIVL 3705.03 Mechanics of Structural Materials & Components
- CIVL 3725.03 Construction Materials & Methods
- CIVL 3830.03 Surveying & Applied Geomatics

Year 3 Term 6 (Winter)

- CIVL 3200.03 Transportation Engineering
- CIVL 3310.03 Engineering Hydrology
- CIVL 3451.03 Water Quality & Treatment
- CIVL 3515.03 Structural Systems II-Loads & Behaviour
- CIVL 3740.03 Computations & Systems Modelling
- IENG 2005.03 Engineering Economics

Year 4 Term 7 (Fall)

- CIVL 4111.03 Geotechnical Engineering
- CIVL 4515.03 Reinforced Concrete Design
- CIVL 4525.03 Design of Steel Structures
- CIVL 4801.005 Senior Project I

*Technical Electives (choose two from the list below)

Year 4 Term 8 (Winter)

- CIVL 4710.03 Construction Planning
- CIVL 4802.025 Senior Project II
- CPST 3030.03 Engineering in Society II

*Technical Electives (choose three from the list below)

*Infrastructure Option Technical Electives:

Total number of technical electives must equal five.

Total of five (minimum of four) electives may be chosen from the following courses (schedule permitting):

- CIVL 4200.03 Transportation Systems
- CIVL 4250.03 Highway Engineering
- CIVL 4350.03 Hydraulic Engineering
- CIVL 4410.03 Engineering Hydrogeology
- CIVL 4431.03 Water Distribution & Sewerage Systems
- CIVL 4440.03 Water & Wastewater Treatment
- CIVL 4460.03 Solid Waste and Landfill Engineering
- CIVL 4541.03 Applications of Finite Element Method
- CIVL 4560.03 Special Topics in Structural Systems
- ENGM 4675.03 Risk Assessment Management
- MINE 3620.03 Petroleum Engineering

Total of one elective may be chosen from the following courses (schedule permitting):

- ENVE 3412.03 Energy and Environment
- ENVE 4421.03 Biogeochemistry & Bioremediation
- ENVE 4651.03 Solar Energy Utilization
- EARTH 3500.03 Geoscience Info Management
- IENG 4500.03 Operation Research
- IENG 4547.03 Company Operations and Management
- IENG 4558.03 Project Management
- MINE 3520.03 Introductory Mining Engineering
- MINE 3530.03 Mineral Processing
- MINE 4710.03 Mine Excavation Systems
- MINE 4812.03 Mine Production Engineering
- PLAN 1001.03 Intro to Community Design I

Other courses require Department approval.

NOTES:

1. One or more graduate courses may be included as technical electives in Term 8; however, permission of the instructor and department is required in order to register for such courses. Students require a 3.30 cumulative GPA to take a graduate level course. The Graduate Studies Pass Standards will be applied to any student taking a graduate level course.

2. Not all of the technical elective courses will be offered each year.

3. Many courses have pre-requisites (see section IV following). If it is felt, however, that an equivalent course of study has been taken, a waiver of the pre-requisite requirement can be sought from the instructor.

4. Some courses have co-requisites. A co-requisite can also be completed before the course in question (instead of being done concurrently).

Earth and Environment Option

Year 3 Term 5 (Fall)

- CIVL 3101.03 Soil Mechanics
- CIVL 3300.03 Hydraulics
- CIVL 3505.03 Structural Systems I-Form and Analysis
- CIVL 3705.03 Mechanics of Structural Materials & Components
- CIVL 3725.03 Construction Materials & Methods
- CIVL 3830.03 Surveying & Applied Geomatics

Year 3 Term 6 (Winter)

- CIVL 3200.03 Transportation Engineering
- CIVL 3310.03 Engineering Hydrology
- CIVL 3451.03 Water Quality & Treatment
- CIVL 3515.03 Structural Systems II-Loads & Behaviour
- CIVL 3740.03 Computations & Systems Modelling
- IENG 2005.03 Engineering Economics

Year 4 Term 7 (Fall)

- CIVL 4440.03 Water & Wastewater Treatment
- CIVL 4801.005 Senior Project I
- ENVE 4772.03 Environmental Assessment & Management

*Technical Electives (choose three from the list below)

Year 4, Term 8 (Winter)

- CIVL 4410.03 Engineering Hydrogeology
- CIVL 4802.025 Senior Project II
- CPST 3030.03 Engineering in Society II

* Technical Electives (choose three from the list below)

*Earth and Environment Option Technical Electives:

Total number of technical electives must equal six.

Total of six (minimum of five) electives may be chosen from the following courses (schedule permitting):

- CIVL 4200.03 Transportation Systems
- CIVL 4359.03 Form and Process in Alluvial Channels
- CIVL 4410.03 Engineering Hydrogeology
- CIVL 4541.03 Applications of Finite Element Method
- CIVL 4250.03 Highway Engineering
- CIVL 4350.03 Hydraulic Engineering
- CIVL 4431.03 Water Distribution & Sewerage Systems
- CIVL 4440.03 Water & Wastewater Treatment
- CIVL 4460.03 Solid Waste and Landfill Engineering
- CIVL 4111.03 Geotechnical Engineering
- ENGM 4675.03 Risk Assessment Management
- MINE 3620.03 Petroleum Engineering

Total of one elective may be chosen from the following courses (schedule permitting):

- ARCH 3104.03 Foundations in Architectural History and Theory
- ARCH 3105.03 Architectural History and Theory - 20th Century
- ENVE 3412.03 Energy and Environment
- ENVE 4651.03 Solar Energy Utilization
- EARTH 3500.03 Geoscience Information Management
- IENG 4500.03 Operation Research
- IENG 4547.03 Company Operations and Management

- IENG 4558.08 Project Management

Other courses require Department approval.

NOTES:

1. One or more graduate courses may be included as technical electives in Term 8; however, permission of the instructor and department is required in order to register for such courses.
2. Not all of the technical elective courses will be offered each year.
3. Many courses have pre-requisites (see section IV following). If it is felt, however, that an equivalent course of study has been taken, a waiver of the pre-requisite requirement can be sought from the instructor.
4. Some courses have co-requisites. A co-requisite can also be completed before the course in question (instead of being done concurrently).

Mineral Resource Engineering

Years 1 and 2 follow the common program outlined in the Engineering section of this calendar.

Non Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	FREE
4	Study Term 7	Study Term 8	FREE

Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	Work Term 1
4	Work Term 2	FREE	Work Term 3
5	Study Term 7	Study Term 8	

Year 3 Term 5 (Fall)

- MINE 3520.03 Introductory Mining Engineering
- MINE 3530.03 Mineral Processing
- MINE 3605.03 Mining Geology I
- CIVL 3101.03 Soil Mechanics
- CIVL 3830.03 Surveying & Applied Geomatics
- MINE 3620.03 Petroleum Eng.

Year 3 Term 6 (Winter)

- MINE 3600.03 Equipment Selection & Materials Handling
- MINE 3612.03 Rock Penetration & Fragmentation
- MINE 4706.03 Mining Geology II
- MINE 4711.03 Mine Vent & Environment
- MINE 3611.03 Rock Mechanics
- CIVL 3740.03 Computations and Systems Modeling

Year 4 Term 7 (Fall)

- IENG 4500.03 Operations Res for Systems Eng
- MINE 4750.03 Senior Design Project I
- MINE 4815.03 Mining and the Env.
- MINE 4835.03 Mineral Economics
- Technical elective I
- Technical elective II

Year 4 Term 8 (Winter)

- MINE 4850.03 Senior Design Project II
- CPST 3030.03 Engineering in Society II
- Technical elective III
- Technical elective IV
- MINE 4710.03 Mine Excavation Systems

* Minimum 2 of the 4 Technical electives must be from Mineral Resource Engineering (MINE xxxx)

Technical Electives:

- MINE 4801.03 Advanced Topics in Rock Mechanics
- MINE 4820.03 Surface Mine Slope Stability
- MINE 4821.03 Petroleum Reservoir Eng.
- ENVE 4772.03 Environmental Assessment Management
- CIVL 4111.03 Geotechnical Engineering
- CIVL 4410.03 Engineering Hydrogeology
- CIVL 4710.03 Construction Planning
- IENG 4558.03 Project Management and Control
- IENG 4574.03 Decision and Risk Analysis

Other courses require Department approval.

NOTES:

1. One or more graduate courses may be included as technical electives in Term 8; however, permission of the instructor and department is required in order to register for such courses. Students require a 3.30 CGPA to take a graduate level course. The Graduate Studies Pass Standards will be applied to any student taking a Graduate level course.
2. Not all of the technical elective courses will be offered each year.
3. Many courses have pre-requisites (see section IV following). If it is felt, however, that an equivalent course of study has been taken, a waiver of the pre-requisite requirement can be sought from the instructor.
4. Some courses have co-requisites. A co-requisite can also be completed before the course in question (instead of being done concurrently).

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions - Civil Engineering Series

CIVL 3101 Soil Mechanics I

CREDIT HOURS: 3

This course is concerned with the physical and mechanical properties of soils. It includes topics of soil chemistry and soil fabric, soil classification, compaction, hydraulic conductivity, one-dimensional and two-dimensional seepage, soil compressibility, time dependant deformation of soils, and shear strength behaviour of soils. Laboratory sessions involve experimentally evaluating the engineering properties of several different soil types and the application of these results to engineering problems.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 1

PREREQUISITE: MINE 2200.03, ENGI 1202.045

CIVL 3200 Transportation Engineering

CREDIT HOURS: 3

This course commences with an introduction to Transportation Engineering in the context of planning, design and operations of urban and rural systems. The course also provides an introduction to route location with special emphasis on Canadian standards and specifications. It also includes detailed study of road design elements, vehicle motion, vehicle/pavement interaction, and principles of roadway capacity.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: CIVL 3830.03

CIVL 3300 Hydraulics

CREDIT HOURS: 3

Fluid mechanics principles are applied to practical hydraulic problems involving flow in closed conduits and in open channels. Topics in pipe flow include losses in pipes, pipes in series and parallel, and network analysis. Topics in open channel flow deal with classification of flows, open channels and their properties, energy and momentum principles, uniform flow, design of erodible and non-erodible channels, and gradually varied flow. These aspects are explained in lectures and validated by laboratory measurements and demonstrations.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: ENGI 2102.03 and ENGI 2103.03

CIVL 3310 Engineering Hydrology

CREDIT HOURS: 3

The emphasis in this course is on quantitatively describing the physical processes in the hydrologic cycle. Such processes include precipitation, evaporation, infiltration, groundwater movement, surface runoff, as well as lake/reservoir routing effects. A working rainfall-runoff model is developed, and by convolution is used to produce a design hydrograph. The size of a detention ponds, statistical hydrology, and snow hydrology are also discussed.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGI 2102.03, ENGM 2022.03, ENGM 2032.03, CIVL 3300.03, MINE 2200.03

CIVL 3451 Water Quality and Treatment

CREDIT HOURS: 3

The course expands on the student's previous experience in aqueous chemistry and fluid mechanics. The course provides an Engineering perspective on: (i) water quality analysis, specifically on the physical, chemical and biological characteristics of water; (ii) significance and interpretation of water quality properties; (iii) modeling water quality in natural and engineered systems; and (iv) water treatment systems at the introductory level.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: CHEM 1021.03 and CHEM 1022.03, ENGI 2103.03

EXCLUSIONS: PEAS 2202

CIVL 3505 Structural Systems I: Form and Analysis

CREDIT HOURS: 3

This course begins with a review of the analysis of trusses and shear and moment in beams. Majority of the course covers the calculation of elastic deformations for statically determinate structures and various methods for analyzing statically indeterminate structures focusing on slope deflection method and moment distribution method. The application of matrix analysis in computer modeling using a typical commercially available structural analysis program will be introduced. Also the concept of influence lines for moving loads on statically determinate structures will be discussed.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PHYC 1190.03, ENGI 1202.045

CIVL 3515 Structural Systems II: Loads and Behaviour

CREDIT HOURS: 3

The objective of the course is to provide students with a solid background in the fundamentals of structural design used for typical civil engineering structures such as trusses, building frames and floor systems. The background and application of the National Building Code of Canada provisions for structural design will be emphasized. The student will be able to size basic tension, compression and flexural elements using steel, concrete and timber, for representative structures.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: CIVL 3505.03, CIVL 3705.03, CIVL 3725.03

CIVL 3705 Mechanics of Structural Materials and Components

CREDIT HOURS: 3

The content is focused on the application of the principles of the mechanics of solids in the design and analysis of structural materials and components. Building on engineering skills gained in the first two years, the class will examine general stress analysis, failure criteria, flexure, shear, torsion, compression buckling and plasticity as these aspects apply to structural components constructed of timber, steel, concrete and fibre-reinforced polymers.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PHYC 1190.03, ENGI 1202.045, ENGI 2400.04, ENGM 1041.03, MATH 1280.03

CIVL 3725 Construction Materials and Methods

CREDIT HOURS: 3

The purpose of this course is to provide students with knowledge of residential and commercial building techniques and materials. In it, the properties and applications of common construction materials, components, and systems that relate to wood, steel, and concrete-frame structures are examined.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

CIVL 3740 Computations and Systems Modeling

CREDIT HOURS: 3

This course introduces the application of various computational methods for solving a range of practical problems in civil engineering. Basic numerical methods for solving algebraic equations, non-linear and eigen-value problems, as well as numerical differentiation and integration are introduced. Curve-fitting and non-linear regression techniques are presented. Computational tools such as MatLab, MathCad, Excel, and Mathematica are introduced and used to analyze structural stability, the behaviour of space-frames, dynamics, vibrations, and other topics of interest in infrastructure systems.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGM 2101.03, ENGM 1041.03

CIVL 3830 Surveying and Applied Geomatics

CREDIT HOURS: 3

An introduction to the principles, calculations and equipment used in surveying and geomatics is presented with focus on their applications to civil and mineral resource engineering. Topics include fundamentals of distance measurement and surveying, leveling, traverses, corrections, GPS and Total Station instruments, coordinate systems and geodetic reductions, Geographic Information Systems, and engineering applications of geomatics with particular focus on common civil engineering and mining construction activities. Laboratory exercises will cover the basics of surveying techniques, building up to an exercise in combining a measured GPS data set to a pre-existing GIS database for engineering design considerations of a facility.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

EXCLUSIONS: CIVL 0124 and CIVL 4830

CIVL 4100 Earth Slopes/Embankments

CREDIT HOURS: 3

The focus of this class is the practical application of soil mechanics theory to soil slope stability issues in civil and mining engineering. Methods for soil slope stability analysis of natural slopes, cuts, embankments and, earth and tailings dams are presented. The effects of porewater pressures, and earthquake loadings are considered, as well as stabilization methods for slopes. Seepage through small earth dams, together with measures to control seepage, is considered. The class is focused primarily on the mining environment; however, the concepts are also directly applicable to civil engineering practice. The major topics covered include: soil mechanics and seepage applied to slope stability, modes of slope instability, methods of slope stability evaluation, remediation of unstable slopes, and soil embankments and small dams (tailings).

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

TUTORIAL HOURS PER WEEK: 3

PREREQUISITE: CIVL 3101.03

CIVL 4111 Geotechnical Engineering

CREDIT HOURS: 3

This course is concerned with the geotechnical aspects of temporary and permanent retaining walls for infrastructure or environmental works, deep and shallow foundations, soil-pipeline interaction, and design/analysis of natural cuts, embankments, and earth dams. The application of these design/analyses to particular infrastructure and environmental structures are emphasized in the laboratory sessions.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: CIVL 3101.03

CIVL 4200 Transportation Systems

CREDIT HOURS: 3

This course covers urban transportation planning, transportation demand and supply, transportation management. The environmental impact of transportation systems such as noise and air pollution will be examined. Methods to measure, predict, and evaluate impact of transportation modes will be covered.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: CIVL 3200.03

CIVL 4250 Highway Engineering

CREDIT HOURS: 3

This course provides introduction to route location with special emphasis on Canadian standards and road design elements. It includes a surveying workshop. The purpose of workshop is to expose students to operation and application of surveying instrumentation. It includes topics of vertical and horizontal curves, roadway design elements and classification, alignment and cross section elements, drainage and earthwork operations, highways materials and pavement design.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: CIVL 4200.03

CIVL 4350 Hydraulic Engineering

CREDIT HOURS: 3

This course deals with the application of hydraulics in civil engineering design. The topics include design of culvert systems, storage dams (gravity dams, arch dams, buttress dams, earth dams and rock-fill dams), overflow and chute spillways with emphasis on design of stilling basins. Hydraulic machinery (pumps and turbines) will be discussed with an emphasis on the selection a machine for a given application. Design of single port and multi-port outfall structures for effluent disposal in rivers and in oceans will also be discussed. Regular lectures and tutorial sessions will be supplemented with expert speakers from the industry and field trips.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: CIVL 3300.03

CIVL 4359 Form and Process in Alluvial Channels

CREDIT HOURS: 3

This course will consider various aspects of fluvial geomorphology from a civil engineering point-of-view. This will include discussion of hydraulic resistance based on quantitative estimates of channel roughness, regime concepts for artificial and natural rivers, uses of boundary shear stress and unit stream power in bed-load estimations, the hydraulics and statistics of suspended sediment, numerical versus physical modelling, and a review of case histories of responses of rivers to human activity. The hydraulics of fish habitat assessment is also considered. The application of HEC RAS to a bridged brook is done as a group project.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: CIVL 3300.03 and CIVL 3310.03 (minimum), CIVL 4350.03 (preferable)

CROSS-LISTING: CIVL 6159.03

EXCLUSIONS: CIVL 6159.03

CIVL 4410 Engineering Hydrogeology

CREDIT HOURS: 3

This relatively quantitative introduction to hydrogeology beings with a review of key definitions and hydraulic principles pertaining to flow through porous media. This is followed by consideration of well hydraulics in the context of the evaluation and management of groundwater resources. The theory and application of numerical methods are discussed in relation to simple groundwater systems, and this is followed by discussion of the chemistry of both natural and contaminated systems.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: CIVL 3300.03, CIVL 3310.03, CIVL 3101.03, and MINE 2200.03; ENGM 2022.03

CIVL 4431 Water Distribution and Sewerage Systems

CREDIT HOURS: 3

This design-oriented introduction to municipal engineering is concerned with the hydraulic and hydrologic basis for our water-related urban infrastructure. Specifically, the design of potable water distribution systems, wastewater collection systems, and storm water management systems is presented. The minimization of the environmental impacts associated with the construction of a subdivision is also presented, both qualitatively and quantitatively.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CIVL 3300.03, CIVL 3310.03

CIVL 4440 Water and Wastewater Treatment

CREDIT HOURS: 3

The focus of the course is on design of water treatment and municipal pollution control plants. Lectures and laboratory periods are on physical chemical and microbiological qualities of water and municipal wastewater. Lectures include various unit operations and unit processes of water and domestic wastewater treatment. Field visits to local and water and wastewater treatment plants are included.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: CIVL 3451.03 or PEAS 2202.03

CIVL 4460 Solid Waste & Landfill Engineering

CREDIT HOURS: 3

This course provides the students with an understanding of the types of solid waste generation, physical and chemical properties of solid waste, solid waste treatment and disposal alternatives, design and operation of a landfill (including landfill components and configuration, landfill siting, liner system, leachate control and treatment, and gas collection and control system).

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

COREQUISITE: CIVL 3451.03

PREREQUISITE: CIVL 3101.03

CIVL 4515 Reinforced Concrete Design

CREDIT HOURS: 3

This course will provide students with a basic understanding of the behaviour and analysis of reinforced concrete as a structural material, elementary skills and concepts necessary for designing a variety of common structural elements, and appropriate analysis techniques and code approximations. Current design code provisions related to flexure, shear and compression members will be reviewed leading to practical design examples for one-way floor systems, columns, footings, and cantilever retaining walls.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: CIVL 3515.03

CIVL 4525 Design of Steel Structures

CREDIT HOURS: 3

This introductory design course emphasizes the behaviour and design of steel members resisting tensile, compressive, and flexural loads and simple connections of these elements. Members subject to combined loading will also be studied. Upon course completion, the student will be able to design building elements to CSA-S16.1-01. Although most design examples will be based on framed buildings, many of the concepts apply equally to other types of structures; e.g. bridges, towers, and submarine hulls.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CIVL 3515.03

CIVL 4541 Application of Finite Element Method in Static & Dynamic Systems

CREDIT HOURS: 3

This course presents an introduction to the theory and application of the finite element method. The basic linear elasticity, principles of minimum work and energy methods will be used in developing the methodology. Students will gain practical experience, using a commercial software package, to treat a balance set of real-life two and three-dimensional stress deformation problem under static and dynamic loading systems that are of specific interest to structural engineers.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: CIVL 3505.03, CIVL 3705.03, CIVL 3740.03

CIVL 4560 Special Topics in Structural Systems

CREDIT HOURS: 3

Basic knowledge acquired from introductory design courses will be extended and synthesized in the analysis and design of aggregate systems including two-way concrete floor systems, pre-stressed concrete girders, and composite systems incorporating concrete and steel materials. Basic engineering concepts in the design of masonry structures will be introduced and extended to the design of masonry beams, columns, walls and building systems.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

COREQUISITE: CIVL 4515.03

PREREQUISITE: CIVL 3515.03

CIVL 4710 Construction Planning

CREDIT HOURS: 3

This course deals with construction administration, bidding procedures, cost controls, planning and execution of civil Engineering construction projects. The course also covers planning and scheduling techniques such as CPM and PERT. The course presents basic methods of estimating construction costs, with applications to buildings, bridges, foundations, highways and earthworks.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

CIVL 4801 Senior Project I

CREDIT HOURS: 1

This course develops the senior project requires for CIVL 4802. Topics include introduction to potential senior project topics elects, case studies of design projects by industry representatives, client meetings to discuss refine project scopes, project management of design projects, team building, and report writing and oral presentation requirements for various deliverables of CIVL 4801 and CIVL 4802. The deliverable for this course, a formal proposal, must be prepared to a professional standard of engineering practice. Students are also expected to formally present their proposal to the class and faculty.

CIVL 4802 Senior Project II

CREDIT HOURS: 2

The objective of this course is to provide experience in the application of engineering principles to the solution of specific problems in Civil Engineering. Under the supervision of a faculty member, students execute a project that may include laboratory and/or field experiments, design work, numerical simulations, technical communications on state-of-the-art technologies, or analysis of case histories. Students prepare a formal report according to faculty standards for report preparation and make an oral presentation of their project.

PREREQUISITE: CIVL 4801.005

Course Descriptions - Mineral Resource Engineering Series

MINE 2200 Introductory Geology for Engineers

CREDIT HOURS: 3

This course deals with the fundamental principles of geology. Topics include mineralogy, rock-forming processes, weathering, erosion, groundwater, glaciating, mass wasting, running water, deserts, shorelines, geologic structures, tectonism, and Earth's interior. The links between geology, engineering and the environment are explored through case studies. Laboratory exercises covering the identification and interpretation on minerals, rocks, landforms (using topographic maps and remote sensing images) and geologic map structures are an important part of the class.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

EXCLUSIONS: MINE 3500.03, EARTH 1080.03 and EARTH 1090.03

MINE 3520 Introductory Mining Engineering

CREDIT HOURS: 3

This course is an introduction to the mineral industry and mining engineering. Emphasis is placed on unit operations, equipment and surface and underground mining methods. Summaries of the national and global mineral industries, innovative technologies and practices, and the relationships between mining and mineral processing are included. A mandatory field trip is an integral part of the course to give students exposure to real life operations.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: MINE 2200.03

MINE 3530 Mineral Processing

CREDIT HOURS: 3

This course is concerned with the principles of unit operations employed in the physical processing of minerals: examination of mineral characteristics on which mineral separation methods are based, liberation of minerals, crushing, grinding, screening and classification. Mineral separation methods include: gravity, dense medium, magnetic and high tension separations, radiometric sorting, flotation and selective flocculation. Laboratory tests, their interpretations, and assessment of separation performance are covered.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: MINE 2200.03

MINE 3600 Equipment Selection and Materials Handling

CREDIT HOURS: 3

This course deals with mining equipment, analysis of parameters influencing the performance of equipment, and equipment selection. Included are cost analysis and estimation, unit costs, compressed air and hydraulic power systems applications in mining, pump selection, materials handling systems in underground and surface mining operations, ore and waste pass systems, and storage bins.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: MINE 3520

MINE 3605 Mining Geology I

CREDIT HOURS: 3

This course covers the topics of mineralogy, geologic structures, petrology of igneous, sedimentary and metamorphic rocks and tectonic processes. Emphasis is placed on the relationships between these topics and mining engineering. Laboratory exercises and assignments cover petrographic analysis, geologic maps and sections, stereographic projection and mineral stoichiometry.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: MINE 2200.03

MINE 3611 Rock Mechanics

CREDIT HOURS: 3

Concepts of mechanical behaviour and intact strength properties of rock masses are discussed. Classification systems and failure criteria for rocks are described. The principles of engineering design for underground and surface mine structures are covered. Stereographic projections and numerical methods are used to analyze surface and underground rock stability. Rock mechanics instrumentation is discussed. Laboratory sessions cover sample preparation and rock testing.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: MINE 3605.03

MINE 3612 Rock Penetration and Fragmentation

CREDIT HOURS: 3

This course presents the principles and theories of rock drilling and blasting in both underground and surface mining applications. It covers the properties of explosives and the principles for selection of explosives for different situations. The transportation methods, loading techniques and priming procedures for explosives are discussed. Current trends in drilling and blasting practices are considered as well as controlled blasting and blast monitoring methods. State-of-the-art techniques in rock penetration and fragmentation are presented.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

MINE 3620 Petroleum Engineering

CREDIT HOURS: 3

This course is designed to provide a comprehensive overview of the engineering aspects of the petroleum industry. Similarities between mining and petroleum engineering are stressed. Major topics cover well planning, rotary drilling techniques, drilling optimization, well cementing, well completion, and production methods.

Equipment selection and design procedures follow each unit operation.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: MINE 2200.03

MINE 4100 Mining Geotechnique

CREDIT HOURS: 3

The focus of the class is the practical application of soil mechanics theory to soil slope/embankment stability in a mining environment. Method of stability analysis for natural slopes, cuts, embankments and earth/tailings dams are outlined. The effects of seepage/porewater pressure and earthquake loading are considered, as well as stabilization methods for slopes. A project dealing with earth slopes or embankments is undertaken by the students, including an in class oral presentation.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: CIVL 3101

EXCLUSIONS: CIVL 4100

MINE 4706 Mining Geology II

CREDIT HOURS: 3

The Physical characteristics and origins of the main types of mineral deposits are covered. Individual mineral deposits are described in terms of their mineralogy, rock types, structures and geologic factors affecting mining engineering. Assignments and laboratory exercises concentrate on the three-dimensional analysis of mineral deposits using hand specimens, maps, sections, structure contours and modelling of reserves. Case studies are covered in assigned readings

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: MINE 3605.03, MINE 3520.03

EXCLUSIONS: MINE 4705.03

MINE 4710 Mine Excavation Systems

CREDIT HOURS: 3

This course deals with several specialized mining topics related to mine excavation including mine drainage in underground and surface operations, tunneling and shaft sinking equipment and techniques, mining related soil mechanics, pressure grouting, ground freezing and mine backfilling.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: MINE 3611

MINE 4711 Mine Ventilation and Environment Control

CREDIT HOURS: 3

This course presents the main principles of total mine air conditioning: air quality, air quantity, and temperature-humidity control in underground mines. Health hazards such as mine dusts, gases, radiation, and heat stress are discussed. Design of airflow in single openings, circuit analysis, and ventilation network design are studied using manual and computer based techniques. Temperature-humidity control systems design is discussed. Mine illumination and noise control are studied as part of the total mine environment.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: MINE 3520

MINE 4750 Senior Design Project I

CREDIT HOURS: 3

This is the first part of a two-part senior project. Methods of mineral /exploration are introduced. Methods of resources/reserves estimation are discussed. Surface and drillhole data are provided. Mineral deposit is outline by exploration together with information on site description, property rights, stratigraphy and structure, map and cross-sections. Students will use the provided data to create ore bodies and estimate ore reserves. Industrial software will be used to complete the project. A mandatory field trip is an integral part of the course to give students exposure to real life operations.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: MINE 3520.03 and MINE 3605.03 and MINE 4706.03

MINE 4801 Advanced Topics in Rock Mechanics

CREDIT HOURS: 3

This course deals with several specific topics in rock mechanics related to ground stability control in surface and underground mines. It covers ground failure, ground movement monitoring, "in-situ" stress management, application of numerical modelling methods, and back-analysis techniques in mining engineering. Theory and state-of-the-art of relevant techniques are discussed. Case studies are introduced to discuss practical problems.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: MINE 3611.03 or permission by instructor

MINE 4815 Mining and the Environment

CREDIT HOURS: 3

This course covers environmental practices, problems and solutions in the mineral industry. Topics include regulations, reclamation, mine closure, acid rock drainage, surface subsidence, nuclear waste disposal and coal mine explosions. Case studies are used to highlight these topics. Class participation is emphasized through oral and

written presentations.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: MINE 2200.03 and MINE 4706.03

CROSS-LISTING: MINE 6014

MINE 4816 Mining Engineering Project

CREDIT HOURS: 3

This project allows interested students to carry out supervised research on a suitable topic. The research topic must consist of an original research idea and/or novel application of existing technology. The student must obtain prior approval from a faculty member to act as project supervisor and agreement on the proposal scope of the research topic. In addition, the student must obtain approval of the undergraduate coordinator of the department. The student is required to submit a detailed technical report on the research topic, of appropriate length and format, for assessment.

NOTES: Students to contact the Civil and Resource Engineering Department for registration instructions, as registration is to be completed by override only

FORMAT: Lab

LAB HOURS PER WEEK: 5

MINE 4820 Surface Mine Slope Stability

CREDIT HOURS: 3

This course deals with the fundamentals of slope stability analysis in surface mining. A brief discussion is first given to field data collection and the mechanism of slope failure. Various techniques for solving slope problems encountered in the mining industry are then introduced, including plane failure, wedge failure, toppling, and rotational failure.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: MINE 3611.03 MINE 3520.03

MINE 4821 Petroleum Reservoir Engineering

CREDIT HOURS: 3

This course discusses the theory and calculations in petroleum reservoir engineering. Major topics include petroleum composition, formation, migration and trapping mechanisms, classification and properties of reservoir rocks and fluids, fluid flow through porous media, phase behaviour diagrams, reservoir energy and recovery mechanisms, reservoir evaluation, as well as geological and reservoir considerations in drilling, and production engineering. An introduction to petroleum exploration methods, and data interpretation techniques is also included.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: MINE 2200.03, MINE 3605.03

MINE 4835 Mineral Economics and Mine Production

CREDIT HOURS: 3

Major topics in Mineral Economics include the influence of mineral industry on the economy and mineral policy, marketing of minerals, price mechanisms, mine project evaluations and financing. Mine Production will cover topics on mine management, techniques to increase mine productivity, operating units analysis, mine maintenance, production scheduling and optimization.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MINE 3520.03

EXCLUSIONS: MINE 4713.03 and MINE 4812.03

MINE 4850 Senior Design Project II

CREDIT HOURS: 3

This is the second part of the two-part senior design project. Based on the work completed in part one, students, working in groups, will select proper mining methods, design mine structures of an underground and/or surface mine, select mining equipment, surface infrastructures and mineral processing facilities. This is followed by environmental considerations, mine evaluation and risk assessment. Regular progress reports, a final report and group presentations are required. Design projects in petroleum engineering with equivalent amount of work may be considered at the beginning of this course

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 1

LAB HOURS PER WEEK: 4

PREREQUISITE: MINE 4750.03 and Completion of all courses prior to Term 8 in the program. Exception may only be made to those with proven knowledge and industrial experience.

EXCLUSIONS: MINE 4811.03

Civil Engineering

Civil and Resource Engineering

Introduction

Civil engineering deals with the design, construction, and maintenance of the infrastructure of human civilization. Civil engineers are engaged in addressing two fundamental questions. First, how do we protect our society and its infrastructure from the impacts of the natural environment? Second, what are the impacts of society and its infrastructure on our natural environment? The infrastructure considered may be at the feasibility or the design stage, or already in existence.

First, humans need protection from the elements to thrive on this planet. With the growth of centers of population and highly organized societies, the need for very diverse kinds of 'shelter' has also dramatically increased – now routinely including hospitals, schools, skyscrapers, factories, and theatres. Cities and other centres require energy and must be connected, giving rise to the need for such ancillary infrastructure as hydro-dams, road networks, bridges, and airports. The results of the design work of the civil engineer are therefore quite visible and a source of enduring pride. However, nature sometimes deals harshly with our infrastructure, striking it with hurricanes and/or ice storms. Even if the basic designs are sound, a significant maintenance effort by engineers who are knowledgeable about the basis for the original designs is implied.

Second, Civil engineers must recognize that humans are biological entities that consume resources and generate waste. They need water, they generate wastewater. They buy consumer goods, they generate solid waste. How can we ensure that our water is pure, and that it stays pure? How can we ensure that the waste from our cities is handled in such a way that damage to the environment and risks to our own health are minimized, or perhaps even nullified? Nature metes out drought and heat, floods and freezing temperatures. How can we prepare society for such eventualities? The fact that our water and other planetary resources are also finite, can be badly or well-managed, and have been abused in the past all raise additional questions and endeavours that come under the purview of civil engineering. That the undergraduate civil engineering program at Dalhousie University has two options (the Infrastructure Option and Earth and Environment Option) is a reflection of the long-standing relevance and importance of the role of Civil engineers in addressing the above questions.

Although civil engineering is only one among many engineering disciplines available at Dalhousie, as an applied science it is characterized by exceptional technical diversity, great breadth and depth of subject matter, and a propensity for proactively addressing the practical needs of society. It is therefore natural that a BEng. in civil engineering is an excellent way to start 'life in the universe'. It is often used by our graduates as a launching pad for post-graduate studies in very diverse realms of study. Civil engineers are found in all levels of government, in private consulting companies, in public utilities, in global enterprises, and in a wide range of fields that has included technology management, business administration, and even biomedical engineering.

The Department of Civil and Resource Engineering has about 60 graduate students. They are involved in a wide-range of projects that will affect engineering practice. Our experienced and diversely-trained faculty members therefore have many research outcomes upon which they can draw when coming to the classroom or the laboratory and in doing so are eminently able to keep the undergraduate program current and modern.

A. Infrastructure Option

In this option, the following aspects of civil engineering are emphasized:

structural engineering and design, materials of construction (steel, concrete, timber, masonry, asphalt, fibre reinforced polymers), transportation engineering, construction management, and soil mechanics.

B. Earth and Environment Option

In this option the following aspects of civil engineering receive some emphasis:

environmental engineering, water and wastewater treatment, water resources and hydrogeology, geo-environmental engineering, and waste management.

Curriculum and Course Descriptions

Introduction

No other branch of engineering can claim to have such an impact on modern society as Electrical and Computer Engineering. The ease, speed and precision by which electrical energy and electrical signals can be transmitted, transformed and controlled has influenced not only the daily life of people, but has also changed the course of many other disciplines. Over only a few decades, Electrical and Computer Engineering has grown to a multi-branch discipline with significant applications in the areas of power systems, communication systems, microelectronics, photonics, computers and biomedical applications. This rapid growth, coupled with major advances in technology and material science, has made the field very dynamic, and poses a challenge to the student, to the educator and to the practicing Electrical and Computer Engineer for the breadth of its activities.

The Electrical and Computer Engineering curriculum is based on the physical and mathematical principles which constitute the unchanging foundation of the discipline. Courses apply these foundational principles to state-of-the-art applications within specialized areas of the field.

In the final year, technical elective courses are provided to enable the student to obtain a deeper, more detailed understanding of current technology in a field of interest. Technical electives may also be chosen from listed courses offered by other Departments. Also during the final year the students, usually in teams of two, work on a project requiring the application of knowledge to a realistic engineering problem. The projects are submitted by professionals in local industrial and research facilities who then provide supervision in conjunction with an assigned Faculty Advisor.

Laboratory sessions form an integral part of most Electrical and Computer Engineering courses. These sessions are conducted in laboratories housed in C Building.

Students enrolled in the Electrical and Computer Engineering Degree Programs may take part in Co-Operative Education where they can apply for up to three four-month work placements in industry. Students participating in the Co-op Program will require two years and four months to complete their degree while students not in the Co-op Program can finish in one year and eight months.

Students participating in our program may pursue either the Electrical or the Computer options as listed below.

Staff

Dean

Leon, L. J., BSc, MSc, PhD (Dalhousie), PEng

Department Head

Chen, Z., BEng (Fuzhou), MSc (Southeast), PhD (Ottawa), PEng, FIEEE, FCAE, FEIC

Professor Emeritus

Marble, A. E., BEng, MSc, PhD (TUNS), PEng

Professors

Cada, M., Dipl. Ing., MSc, PhD (Prague), PEng
Chen, Z., BEng (Fuzhou), MSc (Southeast), PhD (Ottawa), PEng, FIEEE, FCAE, FEIC
El-Hawary, M. E., BEng (Alexandria), PhD (Alberta), PEng, FIEEE, FCAE, FEIC
El-Masry, E. I., BEng, MSc (Alexandria), PhD (Man), PEng
Gu, J., BSc (Hefei), MSc (Shanghai), PhD (Alberta), PEng
Hughes, F. L., BSc (Carleton), MSc, PhD (Newcastle upon Tyne)
Ilow, J., BSc (Poland), MSc, PhD (Toronto), PEng
Leon, L. J., BSc, MSc, PhD (Dalhousie), PEng
Schlegel, C., BEng (Switzerland), MSEE, PhD (Notre Dame, US), FIEEE

Associate Professors

El-Sankary, K., BEng (LU, Lebanon), MSc (U of Quebec), PhD (U of Montreal), PEng (Undergraduate Advisor)
Little, T. A., BScEng (UNB), MEng (Memorial), PhD (UNB), PEng
Ma, Y., BSc, MEng (Southeast), MSc, PhD (Alberta)
Ponomarenko, S., Dipl. Phys. (Novosibirsk, Russia), PhD (U of Rochester) (Graduate Coordinator)

Assistant Professor

Adamson, R., PhD (Toronto)

Bousquet, J-F., BEng (Ecole Polytechnique), MSc, PhD (Calgary), PEng

Brown, J., PhD (Queen's)

Gonzalez-Cueto, J., BEng, MScE (Cuba), PhD (UNB) (Co-op Advisor)

Trukhachev, D., BSc (St. Petersburg), PhD (LUND)

Adjunct Professors

Baird, C. R., BEng (TUNS), MSc (UBC), PhD (UNB), PEng

Beslin, O., BSc (CAEN), MSc (LAUM), PhD (INSA)

Grabtchak, S., PhD (Guelph)

Hines, P., BS (Dalhousie), PhD (Univ of Bath)

Iseñor, G., BSc (Dalhousie), BEng, MSc (TUNS), PhD (Dalhousie)

Jin, P., BSc (Jilin China), MSc, PhD (HITChina)

Linney, N., BSc (Mt. A), BEng, MSc, PhD (TUNS)

Marabet, A., BEng (U of Annaba), MSc (Nantes), PhD (Quebec)

Marble, A. E., BEng, MSc, PhD (TUNS), PEng

Nie, H., MEng (Tsinghua), PhD (UBC), PEng

Stout-Grandy, S., BEng (TUNS), MSc, PhD (Carleton)

Yu, Y., BEng (Beijing), MSc, PhD (Swansea, UK)

Cross Appointment

Hill, I., (from Faculty of Science, Physics), BSc, PhD (Queen's)

Electrical Engineering Option

Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

Study Term 5 (Fall)

- ECED 3003.03 Networks & Systems
- ECED 3201.03 Introduction to Electronics
- ECED 3204.03 Microprocessors
- ECED 3300.03 Electromagnetic Fields
- ECED 3500.03 Signal Analysis
- ENGM 3282.03 Data Structures and Numerical Methods

Work Term 1 (Winter)

Study Term 6 (Summer)

- ECED 3101.03 Power Systems I
- ECED 3202.03 Analog Electronics
- ECED 3301.03 Electromagnetic Waves and Propagation
- ECED 3511.03 Communication Systems
- ECED 3600.03 Modern Control Systems
- ECED 3901.03 Electrical Engineering Design II

Work Term 2 (Fall)

Study Term 7 (Winter)

- ECED 4502.03 Digital Signal Processing
- ECED 4513.03 Communication Networks
- ECED 4900.03 Senior Year Project I
- Humanities Elective
- Technical Elective
- Technical Elective

Work Term 3 (Summer)

Study Term 8 (Fall)

- CPST 3030.03 Engineering in Society II
- ECED 4102.03 Electromechanics
- ECED 4601.03 Digital Control Systems
- ECED 4901.03 Senior Year Project II
- Technical Elective

Computer Engineering Option

Students follow the Electrical Engineering program for Study Terms 1 to 3. In Year 2, Study Term 4, students start the Computer Engineering program.

Study Term 5 (Fall)

- ECED 3003.03 Networks & Systems
- ECED 3201.03 Introduction to Electronics
- ECED 3204.03 Microprocessors
- ECED 3300.03 Electromagnetic Fields
- ECED 3500.03 Signal Analysis
- ENGM 3282.03 Data Structures and Numerical Methods

Work Term 1 (Winter)

Study Term 6 (Summer)

- CSCI 3120.03 Operating Systems
- ECED 3202.03 Analog Electronics
- ECED 3403.03 Computer Architecture
- ECED 3511.03 Communication Systems
- ECED 3600.03 Modern Control Systems
- ECED 3901.03 Electrical Engineering Design II

Work Term 2 (Fall)

Study Term 7 (Winter)

- ECED 4404.03 Computer Networks & Communications
- ECED 4502.03 Digital Signal Processing

- ECED 4513.03 Communication Networks
- ECED 4900.03 Senior Year Project I
- Humanities Elective
- Technical Elective

Work Term 3 (Summer)

Study Term 8 (Fall)

- CPST 3030.03 Engineering in Society II
- ECED 4102.03 Electromechanics
- ECED 4901.03 Senior Year Project II
- ECED 4402.03 Real Time Systems
- Technical Elective

Co-op Program

The students who choose the Co-op Program in either the electrical engineering or computer engineering stream follow the schedule below:

Year/Term	Fall	Winter	Summer
Year 1	Study Term 1	Study Term 2	FREE
Year 2	Study Term 3	Study Term 4	FREE
Year 3	Study Term 5	Work Term 1	Study Term 6
Year 4	Work Term 2	Study Term 7	Work Term 3
Year 5	Study Term 8		

Non-Co-op Program

The students who choose the Non Co-op Program in either the electrical engineering or computer engineering stream follow the schedule below:

Year/Term	Fall	Winter	Summer
Year 1	Study Term 1	Study Term 2	FREE
Year 2	Study Term 3	Study Term 4	FREE
Year 3	Study Term 5	FREE	Study Term 6
Year 4	Study Term 8	Study Term 7	

Technical Electives

- ECED 4071.03 Analog Filter Design
- ECED 4082.03 MOS Switched-Capacitor Circuits
- ECED 4130.03 Electric Power Systems II
- ECED 4140.03 Power Systems III
- ECED 4260.03 IC Design and Fabrication
- ECED 4350.03 Optical Electronics
- ECED 4421.03 Technology and Applications of Fiber Optics
- ECED 4460.03 Communications Electronics
- ECED 4504.03 Digital Transmission Theory
- ECED 4760.03 Biomedical Engineering

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

ECED 2000 Electric Circuits

CREDIT HOURS: 3

This is an introductory course in electric circuit analysis. The material covered starts with a review of the fundamental circuit variables such as voltage, current, charge, power and energy. Kirchhoff's laws are introduced and developed into node and loop analysis techniques. Terminal behavior and circuit equivalence including Thevenin and Norton circuits are covered. Analysis with controlled sources and energy storage elements is developed including steady state and transient response for first order networks. Phasors and sinusoidal steady state are introduced. Students are introduced to circuit simulation tools such as p-spice.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: MATH 1290.03, PHYC 1290.03 or equivalent

ECED 2001 Circuit Analysis

CREDIT HOURS: 3

This course covers advanced circuit analysis techniques, starting with sinusoidal excitation. The concepts of phasors and complex impedance are fully developed. Mutual inductance and magnetically coupled coils are used to introduce transformer behavior and performance. Real and reactive power flow is covered before the introduction of balanced three phase circuits for power distribution. Symmetrical components are introduced as a means of dealing with unbalanced networks. The concepts of grounding and harmonics are also introduced.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: ECED 2000.03

ECED 2200 Digital Circuits

CREDIT HOURS: 3

This course includes an introduction to: Boolean algebra, encoders, decoders, shift registers, asynchronous and synchronous counters, together with timing considerations. Design of asynchronous circuits, synchronous sequential circuits, and finite state machines, is covered. Karnaugh mapping techniques and state tables and diagrams are taught. Programmable logic is introduced. Contemporary computer aided design and analysis software is used throughout the course.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: ECED 2000.03

ECED 3003 Networks & Systems

CREDIT HOURS: 3

This course provides the basic networks and systems analysis skills required in subsequent courses in the Electrical and Computer Engineering program. It covers topics such as signals and systems modelling concepts; applications of Laplace transform in network analysis, Bode plots, block diagram; state-variable analysis; generalized two-port parameters; properties and analysis of linear time-invariant (LTI) systems, the convolution integral and Eigenfunction and Eigenvalues of LTI systems.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECED 2001.03, ENGM 2202.03

ECED 3101 Power Systems I

CREDIT HOURS: 3

This course presents the development of the models of each of the components making up a power system including: transformer behavior (power, control and instrument transformers), synchronous machine behavior (cylindrical rotor and salient pole theory) and transmission line behavior (lumped and distributed parameter). Per unit normalization is covered. The equipment models are compiled to present network models that can be used to study power system operation. Load flow is discussed as well as fault estimation and circuit protection.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECED 2001.03

ECED 3201 Introduction to Electronics

CREDIT HOURS: 3

The course gives an introduction to semiconductor physics. The theory of operation of semiconductor diodes, bipolar junction transistors (BJTs), and junction and metal oxide field effect transistors (MOSFETs), is covered in detail. The analysis and design of diode, BJT, and MOSFET circuits is covered including voltage multipliers, voltage regulators, and low frequency small signal amplifiers. Contemporary computer aided design and analysis software is applied to the aforementioned circuits.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECED 2000.03

ECED 3202 Analog Electronics

CREDIT HOURS: 3

This course covers behaviour of real op-amps, BJTs and FETs in high-frequency and multistage applications. Topics include linear and non-linear op-amp circuits; current mirrors, active loads and biasing; multistage amplifier design; feedback in amplifiers; high-frequency narrow-band amplifier tuning, coupling and matching; crystal, resonant, phase-shift and relaxation oscillators; waveform generation; class A, AB, B, C and D power amplifiers; voltage regulator design; heatsinking; design of MOSFET motor control circuits and pulse-width modulators. In addition, filtering, noise and distortion are introduced.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: ECED 3003.03 and ECED 3201.03

ECED 3204 Microprocessors

CREDIT HOURS: 3

This course introduces a currently available microprocessor system. Topics include microcontrollers as a type of microprocessor, microprocessor architecture, address, data and control buses, allocation of external memory modules, use of decoders, latches, flip-flops and other elements of a microprocessor system, CPU bus cycle, cycle-by-cycle execution, timing diagrams, I/O methods, I/O allocation, asynchronous serial communication, RS-232 standard, parallel port interfacing, handshaking protocols, timers, timer functions, interrupts, interrupt priority, assembly programming, software development and debugging.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: ECED 2200.03

ECED 3300 Electromagnetic Fields

CREDIT HOURS: 3

This course forms an introduction to basic electromagnetic principles upon which Electrical Engineering is based. The laws underlying the theory are presented in integral and differential form. A classical development of electrostatics, steady state current, and magnetostatics will lead to Maxwell's equations. The theory developed is applied to calculating circuit parameters such as resistance, capacitance, and inductance for any electronic or magnetic structure.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENGM 2101.03

ECED 3301 Electromagnetic Waves & Propagation

CREDIT HOURS: 3

This course presents the basic theory and applications of propagation of electromagnetic waves. Major topics include: time-varying Maxwell's equations, electromotive force, electromagnetic spectrum, transmission of plane waves, reflection and refraction, polarization, radiation, transmission line theory, standing wave ratio, Smith Chart, impedance matching, guided wave structures, modes and cut-off frequencies.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECED 3300.03

EXCLUSIONS: ECED 4301.03

ECED 3401 System Analysis

CREDIT HOURS: 3

Requirement analysis, specifications, concepts of transforming an ill-defined problem into a set of specifications. Functional decomposition and data dictionaries. Top down structured and object oriented analysis techniques. Laboratory and assignment work will address the analysis of relatively complicated systems using the different techniques.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ECED 2200.03

EXCLUSIONS: ECED 2400.03

ECED 3403 Computer Architecture

CREDIT HOURS: 3

This course deals with controllers, processor instruction sets, and memory systems. The student will study design methods, implementation techniques, modelling techniques, and performance analysis. Reduced instruction set architectures (RISC), pipelining, pipeline hazards, and their implementation for modern high speed applications will be studied. The student project will require a team to design and implement (or simulate) a RISC architecture.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ECED 3400.03 or ECED 3204.03

ECED 3500 Signal Analysis

CREDIT HOURS: 3

Transformation theory and frequency domain representation of continuous-time signals including Fourier series, Fourier transform and Laplace transformation. Discrete-time signals, sampling theorem, aliasing and frequency domain representation of discrete-time signals including the z-transformation. Introduction to communication systems, exponential and sinusoidal amplitude modulation.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENGM 1041.03 and ENGM 2022.03 and ENGM 2101.03

ECED 3511 Communication Systems

CREDIT HOURS: 3

Transmission of information in the presence of noise. The course combines a rigorous development of the fundamental principles in transceiver implementations with examples of modulation schemes that are used in modern communication systems, via quadrature modulation phase and frequency-shift keying and OFDM. Mathematical foundations of communications are applied to develop state-of-the-art digital modulation.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: ECED 3500.03

ECED 3600 Modern Control Systems

CREDIT HOURS: 3

This course deals with control systems analysis and design aspects. Techniques for analyzing the performance of analog systems are introduced. Emphasis is on the use of the Laplace transform and state space techniques in evaluating system performance indicators including its stability. Tools introduced include frequency response methods, and the root locus. Practical examples involving design of controllers for small systems to achieve desired response are discussed.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

EXCLUSIONS: ECED 4600.03

ECED 3901 Electrical Engineering Design II

CREDIT HOURS: 3

This course covers advanced aspects of design, interdisciplinary design and failure analysis. Students gain experience in the design of complex systems. The course culminates in a design contest in which groups of students design and implement a system to meet design objectives, and present and defend their design in an oral design review. The course will consist of both classroom and lab work. The classroom component will use case studies, design reviews and conventional lectures. The lab component is devoted to the design and implementation of a solution to the contest challenge.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: ENGI 2203.03

ECED 4071 Analog Filter Design

CREDIT HOURS: 3

This course deals with the theory and design of active filters, for audio-frequency applications, using op amps. It consists, basically, of two phases. Phase I deals with the realization of a given transfer function using cascade of first and/or second-order RC-op amps circuits. In phase II, the transfer functions of filters are studied in combination with frequency-response approximations such as Butterworth, Chebyshev, Inverse-Chebyshev, Caver (or Elliptic) and Bessel-Thompson.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECED 3003.03 and ECED 3202.03

ECED 4082 MOS Switched-Capacitor Circuits

CREDIT HOURS: 3

Metal-oxide-semiconductor (MOS) switched-capacitor (SC) techniques are the most common approach for realizing analog integrated circuits due to their high degree of accuracy and linearity. This course deals with the theory, analysis and design of SC circuits. It covers the following topics: fundamentals of sampled-data systems, MOS technologies, MOS devices for linear analog integrated circuits, Parasitic-capacitances, systematic analysis techniques, basic building blocks of SC filters, synthesis and design of SC filters.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: Permission of instructor

ECED 4102 Electromechanics

CREDIT HOURS: 3

This course covers the principles of electromechanical energy conversion and electric motors. A review of magnetic field behavior leads to magnetic circuit calculations and permanent magnet circuit behavior. Energy balance principles are used to develop force and torque relationships for many electromechanical applications including relays, meter movements and motor operation. Basic principles of motor operation such as rotating magnetic fields, efficiency and machine ratings are given as a prelude to an in depth presentation of AC and DC motor behavior. Emphasis is placed on motor control and application.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECED 3101.03

EXCLUSIONS: ECED 3100.03

ECED 4130 Electric Power Systems II

CREDIT HOURS: 3

Analysis of Interconnected Systems, Power Flow problem, and iterative methods for its solution. Power System Protection, Power System Stability, Optimal Operation of Electric Power Systems.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ECED 3101.03

ECED 4140 Power Systems III

CREDIT HOURS: 3

The course covers topics such as load curves and forecasting, characteristics and peak demand forecasting, weather-load models, discounted multiple regression and ARMA models, introduction to power system reliability evaluation, generating capacity reserve evaluation, contingency evaluation and an introduction to long-range power system expansion planning packages and production costing.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 2

ECED 4260 IC Design and Fabrication

CREDIT HOURS: 3

The theory of operation of MOS transistors is reviewed. Processing technologies such as diffusion, ion implantation, and etching are presented with an emphasis on CMOS circuit fabrication. Electrical and physical characteristics of circuits and clocking and I/O structures are studied. Subsystem design of PLA's, adders, counters, ROM, and RAM will be examined. Extensive use of CAD tools will give the student hands-on experience with systems typical of those used in industry.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 2
PREREQUISITE: ECED 2200.03 and ECED 3201.03

ECED 4350 Optical Electronics

CREDIT HOURS: 3

This course deals with the fundamentals of generation and detection of light in semiconductor materials as they pertain to optoelectronic devices such as light emitting diodes, laser diodes, photo detectors, and optocouplers. Major topics include: review of semiconductor properties; photo detectors such as PIN photodiodes and avalanche photodiodes (APDS); spontaneous emission and injection luminescence in light emitting diodes (LEDS); and stimulated emission and optical gain in laser diodes (LDS). Typical materials, structures, characteristics and parameters of these devices are discussed with relation to various applications in fiber optics, sensing and consumer products.

FORMAT: Lecture| Lab| Tutorial
LECTURE HOURS PER WEEK: 3

ECED 4402 Real Time Systems

CREDIT HOURS: 3

This course reviews system analysis and design techniques and then addresses real time implementation methods. Real time operating system (RTOS) requirements are covered. Topics include message queuing, resource sharing, priority assignments, event flags, interrupts, memory allocation, and typical RTOS configurations. Examples in engineering and networking will be discussed. A significant design and implementation project will be undertaken.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 2
LAB HOURS PER WEEK: 3
PREREQUISITE: ECED 3401.03 or ECED 3204.03, and CSCI 3120.03

ECED 4404 Computer Networks & Communications

CREDIT HOURS: 3

Network architecture and topology, ISO, physical and data link layers, LANS, ATM, routing, quality of service, and emerging technologies. The laboratory and assignments will require implementation of network software and evaluation of current technologies.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 2
PREREQUISITE: ECED 3400.03 or ECED 3204.03

ECED 4421 Technology and Applications of Fiber Optics

CREDIT HOURS: 3

This course deals with the basic principles and applications of optical fiber communications. Major topics include: ray theory and electromagnetic modes in optical fiber waveguides; step-index and graded-index multimode and single-mode fibers; transmission characteristics of optical fibers such as attenuation (absorption, scattering, bending), dispersion (multipath, waveguide, material, profile), and polarization (random, preserved); optical fiber communication systems (transmitter, receiver, digital and analog system design); advanced systems; non-communications applications.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 2

ECED 4460 Communications Electronics

CREDIT HOURS: 3

This course provides an introduction to the theory and design of electronic circuits for communications systems. Topics include: the realization of passive components for high frequency applications; small signal amplifier design and characterization employing s-parameter techniques; large signal circuit design realization and analysis employing volterra series and harmonic balance nonlinear analysis procedure; the realization and characterization of non-linear circuits as high efficiency power amplifiers, oscillators, frequency converters, and modulator/demodulator subsystems; the integration of appropriate subsystems into analog and digital terrestrial and space borne radio communication systems.

FORMAT: Lecture| Lab| Tutorial
LECTURE HOURS PER WEEK: 3
PREREQUISITE: ECED 3202.03, ECED 3301.03

ECED 4502 Digital Signal Processing

CREDIT HOURS: 3

This course introduces the basics of filtering and analysis of discrete time signals and systems. The synthesis and implementation of analog filters is discussed. An overview of the sampling theorem is followed by a discussion of the discrete Fourier transform and the z-transform. The analysis of discrete time signals is introduced, and synthesis of digital filters is covered. Contemporary signal processing hardware and design software is introduced.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 2
PREREQUISITE: ECED 3500.03

ECED 4504 Digital Transmission Theory

CREDIT HOURS: 3

Topics covered will include detailed analysis of channel and source coding techniques with derivation of bit error rates for various modulation schemes and power-bandwidth efficiency trade-offs. Design of optimum receivers is examined. Coding gains of error control coding schemes are calculated. Power Spectral Density of communications waveforms is presented. Channel fading and performance degradations are discussed. Information Theory issues are examined. Teletraffic analysis is presented for both circuit and packet switched networks.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Permission of instructor

RESTRICTIONS: Include: Ceng

ECED 4513 Communication Networks

CREDIT HOURS: 3

This course focuses on the fundamentals of data communication networks. It covers the layered architecture of packet networks and their network elements (switches, routers, bridges). The protocols used to enable transmission of packets through the Internet are examined in detail. Analysis and design of protocols to enhance the efficiency of data transmission in the context of information theory is also presented. Students will gain an appreciation of implementing voice over IP, DVB and WiFi transmissions.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ECED 3511.03

ECED 4601 Digital Control Systems

CREDIT HOURS: 3

This course deals with digital control systems analysis and design aspects. Techniques for analyzing the performance of sampled data systems are introduced. Emphasis is on the use of the Z-transform in evaluating system performance indicators including its stability. Tools introduced include frequency response methods, and the root locus. Practical examples involving design of controllers for digital control systems to achieve desired response are discussed.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECED 3600.03

ECED 4760 Biomedical Engineering

CREDIT HOURS: 3

Basic anatomy and physiology of the cardiovascular, respiratory and neurophysiological systems, and their contemporary mathematical and electrical models. Physiological transducers and data acquisition systems. Biophysical signal conditioning and processing. Biotelemetry. The computer in biomedical instrumentation. Electrical safety of medical equipment. Guest lectures in the areas of electrocardiography, echocardiography, respiratory technology, hospital engineering and neurophysiological measurements.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

ECED 4900 Senior Year Project I

CREDIT HOURS: 3

This course develops the use of fundamental theory in the detailed design of a suitable project selected by the student in consultation with the department. The student is expected to take the project from its preliminary stage through the various design stages to the ultimate completion of the design, which include a detailed report with calculations, drawings, possibly a model and verbal presentation.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 1

LAB HOURS PER WEEK: 5

PREREQUISITE: Successful completion of all third year courses

ECED 4901 Senior Year Project II

CREDIT HOURS: 3

This course is a continuation of Senior Year Project I leading to a final report and formal presentation. The presentation will be made to fellow students and departmental staff members.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 1

LAB HOURS PER WEEK: 5

PREREQUISITE: ECED 4900.03

Introduction

The Department provides the Applied Mathematics courses required to support the engineering programs offered by the other departments. It also provides a specialized graduate program in Engineering Mathematics and Internetworking with several specializations offered with the co-operation of Engineering Departments and the Faculty of Computer Science.

The technical subjects offered by the Engineering Departments depend upon a sound knowledge of mathematical principles. Courses in Engineering Mathematics are therefore offered to students in each of the Engineering Departments. Emphasis is placed on the application of mathematical techniques to the description and solution of engineering problems. The lectures are supplemented by tutorial sessions and, when appropriate, are illustrated by application of techniques that require use of the available computing facilities.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology

level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

ENGM 1011 Engineering Mathematics I

CREDIT HOURS: 3

This course covers functions, limits, continuity, differentiation and integration of polynomials, exponential, logarithmic and trigonometric functions, product, quotient and chain rules applications of differentiation to graphing, maximum-minimum problems and related rate problems, definite and indefinite integrals, and the fundamental theorem of Calculus.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

ENGM 1012 Engineering Mathematics II

CREDIT HOURS: 3

This course covers applications of integration including areas, volumes, moments, pressure and work, techniques of integration, numerical integration, length of curves, surfaces of revolution, parametric equations, polar coordinates, sequences and series, and Taylor series.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGM 1011.03

ENGM 1041 Applied Linear Algebra

CREDIT HOURS: 3

This course covers geometric vectors in three dimensions, dot product, cross product, lines and planes, complex numbers, systems of linear equations, matrix algebra, matrix inverse, determinants, Cramer's rule, introduction to vector spaces, linear independence and bases, rank, linear transformations, orthogonality and applications, Gram-Schmidt algorithm, eigenvalues and eigenvectors.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

ENGM 1081 Computer Programming

CREDIT HOURS: 3

This course covers fundamental programming principles including flow control, modularity, and structured programming. The student will implement significant programs in the C language to solve engineering problems.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

ENGM 2022 Applied Differential Equations

CREDIT HOURS: 3

This course covers first order linear and non-linear differential equations, differential equations of higher order with constant coefficients, applications to Engineering problems, Laplace transforms, periodic functions, applications of Laplace transforms to linear systems, Fourier Series, the line spectrum.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: MATH 1280.03 and MATH 1290.03

ENGM 2032 Applied Probability and Statistics

CREDIT HOURS: 3

The topics covered include probability laws and the interpretation of numerical data, probability distributions and probability densities, functions of random variables, joint distributions, inferences concerning mean and variance, tests of hypotheses, and introduction to linear regression. The course emphasizes engineering applications and makes extensive use of statistical computer packages.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: MATH 1280.03 and MATH 1290.03

ENGM 2101 Applied Vector Calculus

CREDIT HOURS: 3

This course covers space curves, arclength, curvature, functions of several variables, partial derivatives, implicit functions, constrained and unconstrained extrema, multiple integrals, line, surface, and volume integrals, change of variables in multiple integrals, scalar and vector fields, gradient, divergence and curl, Stokes Theorem,

the Divergence Theorem, and applications to heat flow, electrostatics and fluid flow. Programming skills are developed using software tools to solve practical problems.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 1280.03 and MATH 1290.03

ENGM 3032 Applied Statistics

CREDIT HOURS: 3

This course deals with some statistical techniques and their application to engineering problems. Topics included are: review of statistical inference, linear regression and correlation, analysis of variance, the design of experiments and nonparametric statistical methods.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGM 2032.03

ENGM 3052 Applied Numerical Methods

CREDIT HOURS: 3

This course provides an introduction to Numerical Analysis with emphasis on solution of Engineering problems. The course covers the following topics: a brief review of Computer Programming; concepts of software engineering; approximations and errors; roots of linear and non-linear equations; LU decomposition, Singular value decomposition, condition number; curve fitting; numerical differentiation and integration; and numerical solution of ordinary differential equations.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGM 1081.03, ENGM 2022.03, ENGM 2101.03

EXCLUSIONS: ENGM 3356.03

ENGM 3271 Engineering Mathematics V

CREDIT HOURS: 3

This course has three parts. The first is complex analysis, including the residue theorem and its applications. The second part concerns transform theory including Fourier Series, Fourier Transform, the frequency domain representation of signals, impulse response, and transfer function. The third part concerns partial differential equations including the classification of equations and boundary conditions, separation of variables, the wave equation, Laplace's equation, and applications to electrical engineering problems.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGM 1041.03, ENGM 2022.03, ENGM 2101.03

CROSS-LISTING: ECED 3500.03

ENGM 3282 Data Structures and Numerical Methods

CREDIT HOURS: 3

This course introduces the student to system analysis, and software techniques. Topics covered include objects, stacks, queues, multiple linked lists, searching and sorting algorithms and their implementations in the C++ programming language. The students use linear algebra and numerical methods in engineering examples while learning to implement properly structured solutions.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGM 1041.03, ENGM 1081.03

ENGM 3356 Numerical Methods and Partial Differential Equations

CREDIT HOURS: 3

This course provides an introduction to Numerical Analysis and Partial Differential Equations with emphasis on solution of problems related to Mechanical Engineering. The following topics are covered: approximations and errors; roots of non-linear equations; systems of equations, curve fitting; numerical integration and differentiation; numerical solution of ordinary differential equations; partial differential equations, separation of variables, solution of the equation, wave equation, and Laplace's equation with various boundary conditions; numerical solutions of partial differential equations.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGM 1081.03, ENGM 2101.03, ENGM 2022.03

EXCLUSIONS: ENGM 3052.03

ENGM 4675 Risk Assessment and Management

CREDIT HOURS: 3

This course introduces the risk assessment and system reliability methodologies, from classical event trees to simulation. Examples of risk-based decision making analyses will be covered, ranging from oil exploration to environmental site remediation. The student will carry out a risk assessment involving design decisions on a project of their own choosing.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGM 2032.03

ENGM 4680 Ecosystem Modelling of Marine and Freshwater Environments

CREDIT HOURS: 3

Students develop and apply mathematical models of marine and freshwater ecosystems to study biological production, biogeochemical cycling etc. Lectures provide theoretical background for coupling nutrient and plankton dynamics, including parameterizing biological processes and physical effects. Computer sessions provide

hands-on modelling experience. Students also learn to critique modelling literature in a journal-club setting.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

CROSS-LISTING: ENGM 6680.03, OCEA 5680.03

Introduction

Environmental Engineering is a rapidly growing discipline within the engineering profession. The program is intended to satisfy the needs of interested students and the environmental industry. The curriculum is designed to train professionals in multidisciplinary approaches to environmentally-based design, waste management, water and soil quality, energy conservation and renewables, and air quality.

Sustainable environmental approaches to production and management systems will continue to be required by industry, government and the consulting sector at the provincial, regional, national and international level. Challenging Environmental Engineering career positions are found in national and international petroleum companies and power utilities, manufacturers of environmental and energy efficient products, environmental consulting companies, provincial and national Government departments such as Natural Resources, Environment, Forestry, Agriculture and Food to name just a few.

Curriculum and course descriptions

Refer to sections IIC and IIIC, Environmental Engineering Program, in the Process Engineering and Applied Science section.

Co-operative program and schedule

Refer to section Technical Co-op Program, in the Engineering section.

Admissions

- Students who have successfully completed first year engineering at a recognized university will be eligible for admission in Year II of the Environmental Engineering program.
- Students who have completed a first year science program will be considered for admission into Environmental Engineering.
- Students who have completed two or more years of university studies will be considered for admission on the basis of transfer of credits.

Email Address: Food.Science@dal.ca

Introduction

Food Science is a discipline that combines a basic knowledge of science and engineering principles in the study of food products and preservation technologies. Food scientists have training in and employ the principles of the basic sciences such as physics, mathematics, chemistry, biology, biochemistry, and microbiology. Food Science is the application of the basic sciences and engineering to food processing, preservation and safety.

A Minor in Food Science is available to students registered in the BSc 120 credit hour major and honours programs.

Curriculum and course descriptions

Refer to sections IID and IIID, Food Science Program, in the Process Engineering and Applied Science section.

Admissions

Students from Canadian High schools are recommended to take the following subjects in high school: Pre-calculus Math and English and two or more of Physics, Chemistry, Food Science or Biology. The admission requirements are the same as for admission to the Bachelor of Science program. Many of our students have traditionally been transfer students. Please contact the program chair for advice on this matter.

Introduction

Industrial Engineers design systems to enable people and society to improve productivity, efficiency, effectiveness and quality. All engineers work at planning, designing, implementing and controlling the systems that enable people to use technology. The systems that industrial engineers design are broad and are characterized by a need to integrate both the physical and decision making capabilities of humans with all other aspects of the system design. Problems range from the design of a work method and work station, to the design of a factory layout and methods of controlling the flow of materials on the factory floor, to the design of an overall corporate plan involving materials procurement, production, inventory and distribution. The idea of a factory is also extended to include communications, systems, energy systems, health care systems, municipal systems, transportation systems; in fact all systems that are essential to the functioning of modern society. To facilitate effective decision-making and achieve high performance in areas such as scheduling, inventory and quality control, industrial engineers are often required to design and implement computer based information systems.

Human behaviour and capabilities are key elements in the systems industrial engineers work with. In designing the layout of a production line for an automobile manufacturer, the checkout counter for a supermarket, the organization of work flow for a bank or the materials handling system for a steel plant, the engineer must consider both physical requirements and cost parameters, and the physiological and behavioural performance of the human operators. The industrial engineer has a dual role, both to extend human capability to operate, manage and control the overall production system, and to ensure the safety and well being of those working in the system.

Design and development of these systems requires the unique background of the industrial engineer. The process of engineering always starts with measurement. Where other engineers might measure temperatures, pressures, or loads, the industrial engineer measures the time of a work cycle, dollar value of expenditures, rates of machine failures, and demand for finished goods. Usually the mathematical analysis must take into account risk and uncertainty to a larger extent than in other engineering fields. Computer simulation and optimization are often required. The concepts and techniques found in the Industrial Engineering curriculum have been selected to assist the student to develop the skills that meet the specific challenges of systems which involve managerial activities.

Students begin the Industrial Engineering program with a background in engineering fundamentals studied during their initial two years. In the latter portion of the IE program, they are introduced to the fundamental approaches of work place design and operations research, while at the same time enhancing their mathematical and computer background. Later, more advanced modelling approaches are examined together with courses more directly related to the management process. Production scheduling, inventory control, quality management and plant layout are studied, as are the factors which influence human performance. Students are provided with the opportunity to study such areas as manufacturing, service systems, or maintenance through the Department's elective course offerings.

In their final year, all students undertake a major design project. Projects are drawn from companies or institutions outside the University and are treated as a consulting assignment. Students are evaluated on their ability to achieve an innovative solution by drawing upon the analytical skills developed throughout their program of studies. They must also, of course, satisfy the practical requirements of the client.

Job opportunities for industrial engineers are both plentiful and widely based. Former graduates are currently practicing industrial engineering in areas ranging from semi-conductor manufacturing and airlines, to utilities and hospitals. Invariably, the work assigned is original in its nature, demanding that the industrial engineer be creative in applying his or her many abilities to achieve the best solution. Managers require such results if they are to keep their costs under control in an increasingly competitive world. This requirement will sustain the high demand for industrial engineers well into the future.

Program Guide

Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

Co-op Program

The students who choose the Co-op Program follow the schedule below:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Work Term 1	Study Term 6
4	Work Term 2	Study Term 7	Work Term 3
5	Study Term 8	Study Term 9	

Non Co-op Program

The students who choose the Non Co-op Program follow the schedule below:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	Study Term 6

3	Study Term 5	Study Term 7	FREE
4	Study Term 8	Study Term 9	

Students not wishing to participate in the co-op program are able to structure their academic program over a two-year time period. To do so requires the student to begin the program at the beginning of the summer study term, which commences the first week of May (Study Term 6). The student then completes Study Term 5 in the fall, and then Study Term 7 in the winter. After a summer “off”, the student completes the final two study terms in the same order as students in the co-op program thus completing the five study or academic terms within two calendar years.

Year 3, Term 5 (Fall)

- IENG 3301.03 Fundamentals of Industrial Engineering
- IENG 3303.03 Ergonomics and Work Design
- IENG 3305.03 Computational Methods and Algorithms for IE
- IENG 3344.03 Operations Research: Linear Models
- IENG 3348.03 Systems Engineering

Year 3, Work Term 1 (Winter)

Year 3, Term 6 (Summer)

- IENG 3316.03 Design of Information Management Systems
- IENG 3320.03 Analysis of Design of Production Systems
- IENG 3321.03 Manufacturing Processes and Materials
- IENG 3334.03 Industrial Statistics
- IENG 3345.03 Operations Research: Stochastic and Non-Linear Models

Year 4, Work Term 2 (Fall)

Year 4, Term 7 (Winter)

- IENG 4432.03 Simulation of Industrial Systems
- IENG 4443.03 Quality Control and Reliability
- IENG 4445.03 Facilities Design
- IENG 4454.03 Design of Inventory Systems
- IENG 4558.03 Project Management and Control

Year 4, Work Term 3 (Summer)

Year 5, Term 8 (Fall)

- IENG 4547.03 Company Operations and Management
- IENG 4581X/Y.06 Industrial Engineering Design Project
- IE Elective
- IE Elective

Year 5, Term 9 (Winter)

- IENG 4529. 03 Industrial and Organizational Psychology
- IENG 4581X/Y.06 Industrial Engineering Design Project
- IE Elective
- IE Elective

Industrial Engineering Electives

- IENG 4544.03 Routing and Scheduling
- IENG 4562.03 Maintenance Engineering and Management
- IENG 4564.03 Design and Optimization of Service Systems
- IENG 4571.03 Computer Integrated Manufacturing Systems
- IENG 4573.03 Industrial Biomechanics
- IENG 4574.03 Decision and Risk Analysis
- IENG 4575.03 Stochastic Processes and Queueing
- IENG 4578.03 Organizational Aspects of Quality Management
- IENG 4579.03 Supply Chain Management
- IENG 4580.03 Modelling and Performance Analysis of Computer Networks
- IENG 4599.03 Special Topics in Industrial Engineering

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

IENG 2005 Engineering Economics

CREDIT HOURS: 3

This course is designed to provide students with the fundamentals of engineering economics. Engineers must function as managers in the real world of decision making where the criteria include not only technological excellence, but cost. Time value of money, project screening, and a variety of discounting analysis techniques are presented. Make versus buy decisions and repair versus replace decisions are discussed. The tax effects on project cash flow and viability are also presented. This course is designed to introduce students to these fundamentals, and apply them through the use of software and projects.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

IENG 3301 Fundamentals of Industrial Engineering

CREDIT HOURS: 3

This course introduces students to fundamentals of industrial engineering. The history, development and theoretical basis of industrial engineering will be discussed, as well as the social and environmental impact of engineering decisions. Students will be introduced to the concept of systems and systems thinking. Fundamental industrial engineering techniques will be covered, including motion study, work measurement of standards, and operations evaluation and analysis.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGM 2032.03

EXCLUSIONS: IENG 3311.03

IENG 3303 Ergonomics and Work Design

CREDIT HOURS: 3

Ergonomics is the science of applying knowledge of the capabilities and limitations of humans into the design of products, work spaces and systems we use every day. Topics in this course include the musculoskeletal system, anthropometry, manual material handling, work physiology, the effect of work environment on performance, human/machine interaction, cognition and information processing. Design principles based on this knowledge will be presented. This course will include labs and final design project.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

CROSS-LISTING: KINE 3476.03

EXCLUSIONS: IENG 3313.03, IENG 3347.03

IENG 3305 Computational Methods and Algorithms for IE

CREDIT HOURS: 3

An overview of advanced programming methods is presented with an introduction to algorithms used in industrial engineering applications. Topics covered include sorting, searching, data structures, shortest paths, random number generation, simulated annealing, matrix operations, curve fitting and geometric algorithms. Algorithms for solving several classes of equations are considered. Techniques for writing and debugging large programs, and controlling numerical errors are taught. The C programming language will be used for implementation.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGM 1081.03

IENG 3316 Design of Information Management Systems

CREDIT HOURS: 3

Techniques used in the design of information management systems to support decision making are taught. This includes the principles of systems analysis, software engineering and requirements analysis. The design of relational database systems, user interfaces and documentation are covered. Current technologies for computer hardware, software, networking and communications are reviewed. Students are taught how to program database applications in a fourth generation environment.

Software development projects will be assigned.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGM 1081.03

IENG 3320 Analysis and Design of Production Systems

CREDIT HOURS: 3

This course provides the student with an introduction to issues in planning and control of production systems and scheduling techniques used in production environments. Topics include aggregate planning models, performance measurement, materials requirements planning, production lot-sizing, just-in-time (JIT) models and other pull control systems, and job scheduling and sequencing. Programs currently practiced in industry, such as Lean Manufacturing and Six-Sigma, will also be introduced.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: ENGM 1081.03, ENGM 2022.03, ENGM 2032.03, IENG 2005.03, IENG 3345.03 (may be taken concurrently)

IENG 3321 Manufacturing Processes and Materials

CREDIT HOURS: 3

The course deals with properties of manufacturing materials, casting and forming, traditional and non-traditional machining processes, welding and computer-integrated manufacturing (CIM). Theoretical background is provided that includes equilibrium diagrams, heat treatment, tool life and wear, and dimensioning and tolerance analysis. There will be lab experiments, video presentations and manufacturing plant visits.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGI 1101.045, ENGI 2203.03

IENG 3334 Industrial Statistics

CREDIT HOURS: 3

This course covers hypothesis testing, chi-square tests and nonparametric techniques, analysis of variance and experimental design, as well as simple and multiple linear regression. Numerical examples are solved by straightforward calculation as well as by computer software, and various applications are presented.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGM 2032.03

IENG 3344 Operations Research: Linear Models

CREDIT HOURS: 3

This course is an introduction to linear programming and its applications to industrial engineering design. The simplex method and duality theory are covered in detail. Formulation, solution algorithms, and applications of several problem classes are presented including network models and integer programs. Through a class project, students are introduced to the process of developing an optimization model, including the ideas of database, matrix generators, and report writers.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: ENGM 2101.03, ENGM 1041.03, ENGM 1081.03

IENG 3345 Operations Research: Stochastic and Non-Linear Models

CREDIT HOURS: 3

This course consists of an analysis of important probabilistic and nonlinear models in operational research. These include dynamic programming, queuing models and reliability models. Aspects of Markov processes and nonlinear programming are introduced. Application of these methods is reinforced through a term project.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: ENGM 2032.03, ENGM 1081.03

IENG 3348 Systems Engineering

CREDIT HOURS: 3

This course places the industrial engineering viewpoint in the context of systems theory. The course begins with an introduction to the general concepts of systems, and then examines classical linear systems theory as applied traditionally in engineering. It is shown how industrial engineering design can be viewed as a control system problem. The concepts of systems engineering are in turn applied to industrial engineering design. Systems dynamics simulation is used to explore these ideas. Issues of capacity planning, hierarchical production planning and control, short term scheduling and data envelopment analysis are presented.

PREREQUISITE: ENGM 2022.03, ENGM 2032.03

EXCLUSIONS: IENG 4548.03

IENG 4432 Simulation of Industrial Systems

CREDIT HOURS: 3

This course covers discrete event systems simulation. Model development includes validation and verification methods, the generation of pseudo-random numbers from continuous and discrete distributions, selection of probability distributions and variance reduction techniques. Statistical output analysis and inference are studied for effective interpretation of results. Applications in areas such as manufacturing, service operations, project management and system design are reviewed. Simulation software is used throughout the course.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: IENG 3305.03, IENG 3301.03, IENG 3334.03, IENG 3345.03

EXCLUSIONS: IENG 3432.03

IENG 4443 Quality Control and Reliability

CREDIT HOURS: 3

This course evaluates aspects of production to ensure that products meet specifications. Statistical quality control, which is used to determine process capability and to detect process changes, involves the design and use of different types of control charts. Sampling inspection, which is used to separate good lots from poor lots, covers the design of sampling plans. Reliability is concerned with the design of products and reliability testing.

FORMAT: Lecture

PREREQUISITE: ENGM 2032.03, IENG 3301.03, IENG 3334.03

EXCLUSIONS: IENG 3443.03

IENG 4445 Facilities Design

CREDIT HOURS: 3

This course deals with the principles, concepts and methods of plant layout and materials handling for the optimum design of a facility. The topics include information requirements for facility design, conventional and newer quantitative techniques for analyzing material flow, facilities location, space determination, computerized plant layout techniques, the unit load concept, materials handling equipment selection and automatic storage and retrieval systems. A project involves facilities design for the manufacture and assembly of a mechanical device.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: IENG 3301.03

EXCLUSIONS: IENG 3445.03

IENG 4454 Design of Inventory Systems

CREDIT HOURS: 3

This course introduces a number of quantitative methods for the analysis and of inventory systems. These include deterministic and probabilistic economic order quantity (EOQ) models and variants, single and multiple period inventory models, exchange curves, and other advanced inventory models. Forecasting algorithms applicable to inventory systems are also covered.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: IENG 2005.03, IENG 3301.03, IENG 3320.03, IENG 3334.03, IENG 3345.03

IENG 4500 Operations Research Methods for Systems Engineering

CREDIT HOURS: 3

This course will introduce non-industrial engineering students to operations research models and methodologies to optimize the design, development and operation of engineered systems. The objectives of this course will be to provide students with the skills to solve a variety of linear and non-linear models and the ability to recognize how such models can be applied in a wide variety of engineering disciplines. Topics to be covered include linear programming, integer programming, network models, decision analysis, dynamic programming, queuing models, and non-linear optimization. Applications will focus on diverse areas of engineering including mining, transportation, and environmental management.

PREREQUISITE: ENGM 2032.03

IENG 4529 Industrial and Organizational Psychology

CREDIT HOURS: 3

Individual behaviour and group processes are reviewed, particularly as they relate to activities in organizations. Perception, learning, motivation and attitudes are covered. The implications of different personality types at work are taught. Organizational issues such as group dynamics, communication, power and conflict are studied. Applications include job analysis, team effectiveness, personnel selection and training, job enrichment, leadership and career management.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

IENG 4544 Routing and Scheduling

CREDIT HOURS: 3

Optimization techniques for solving vehicle routing and scheduling problems are covered. Elementary concepts and notation for graphs, networks, maps and geographic information systems (GIS) are presented. Specific issues include NP-complete problems, shortest paths and travelling salesperson problems. Vehicle routing and scheduling with capacity constraints, time windows, pick-up and delivery constraints are also discussed. Applications in manufacturing and transportation are reviewed.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 2
PREREQUISITE: IENG 3305.03, IENG 3344.03, IENG 3345.03

IENG 4547 Company Operations and Management

CREDIT HOURS: 3

The purpose of this course is to introduce the student to the management and operation of large and small businesses. Topics include the business environment in Canada, entrepreneurship, small business startup and financing, organizational theory, management cycle, managing projects, human resources, industrial relations, management finance, marketing and sales. A term project is an integral part of this course.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 2
PREREQUISITE: IENG 2005.03

IENG 4558 Project Management and Control

CREDIT HOURS: 3

This course identifies the common aspects and peculiarities of projects and then illustrates the application of analytical approaches to meet the challenges of achieving effective project management. The following topics are covered: feasibility studies, project planning, cost estimation, bidding, use of professional engineering and other types of consultants, organization and control, resource allocation and project life cycle concepts. The role of the professional engineer in society and the impact that engineering in all its forms makes on the environmental, social, economic and cultural aspirations of society are discussed.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 2

IENG 4562 Maintenance Engineering and Management

CREDIT HOURS: 3

The course deals with basic maintenance systems of equipment and buildings, maintenance job planning and scheduling, maintenance work measurement/universal maintenance standard (UMS), breakdown versus preventive maintenance, total productive maintenance (TPM), budgets and cost control, computerized maintenance management information system, reliability measurement based on the Weibull distribution, maintainability measures and managing maintenance.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 2
PREREQUISITE: ENGM 2032.03, IENG 2005.03, IENG 3334.03

IENG 4564 Design and Optimization of Service Systems

CREDIT HOURS: 3

This course will focus on the design of systems in Canada's largest industry: healthcare. Throughout the course, examples drawn from healthcare will be used to illustrate how industrial engineering techniques can be applied in a wide variety of settings. Topics to be discussed include capacity planning, service distribution, quality, decision analysis, scheduling, and waiting line models.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 2
PREREQUISITE: IENG 3301.03, IENG 3345.03

IENG 4571 Computer Integrated Manufacturing Systems

CREDIT HOURS: 3

Techniques are introduced for the analysis and design of computer integrated manufacturing systems. The architecture of CIM systems is discussed, including machining stations, material handling, robotics, computer control and information systems. Specific topics include manufacturing simulation, automated material handling, warehouse management, robotics, manufacturing planning and control, just-in-time systems, group technology, cellular manufacturing, flexible manufacturing systems, concurrent engineering, computer aided process planning and information system design.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 2
PREREQUISITE: IENG 3320.03, IENG 3321.03, IENG 4432.03

IENG 4573 Industrial Biomechanics

CREDIT HOURS: 3

The course primarily deals with the functioning of the structural elements of the human body and the effects of external and internal forces on the body. Due emphasis is given to the biomechanical approach to job design. This takes into account human motor capabilities and limitations, work physiology, task demands, equipment and workplace characteristics in an integrated manner. Use of bioinstrumentation and applications of biomechanics in work, industry and rehabilitation are discussed.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 2

IENG 4574 Decision and Risk Analysis

CREDIT HOURS: 3

This course teaches the principles and applications of decision analysis. The cognitive processes involved with information acquisition, judgment, value assessment, and decision-making are presented. Methods for scoping a decision-making problem, decomposing it into elements, establishing criteria, and evaluating the options are discussed. Probability assessment under uncertainty, decision trees, value of information, utility theory, and multiple-agent contexts are explored to address increasingly complex scenarios.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

IENG 4575 Stochastic Processes and Queueing

CREDIT HOURS: 3

This course covers the analysis of stochastic models. After a review of the relevant aspects of probability theory, the course examines discrete-time Markov chains, Poisson processes, continuous-time Markov chains, and renewal theory. The course also touches on applications of the theory to queueing, inventory, and reliability.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: IENG 3344.03, IENG 3345.03

IENG 4578 Organizational Aspects of Quality Management

CREDIT HOURS: 3

In this course, quality is investigated as a strategic initiative for organizations. The concept of quality is described in relation to the philosophies of Shewart, Deming, and Juran. The organizational structures needed to support Total Quality Management (TQM) programs are described. Tools for process analysis and improvement are discussed, as is the concept of change management. The course concludes with an evaluation of current quality certification protocols, particularly the ISO 9000 series of standards.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

IENG 4579 Supply Chain Management

CREDIT HOURS: 3

This course will consider the design, analysis and operational control of manufacturing supply chain systems. Models of the supply chain at the strategic, tactical and operational levels are examined as well as the incorporation of these models in a variety of decision support systems. The role of information technology, including enterprise resource planning software, is studied in the supply chain context.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: IENG 3320.03, IENG 3344.03, IENG 4454.03

IENG 4580 Modeling and Performance Analysis of Computer Networks

CREDIT HOURS: 3

The fundamentals of computer network operation and design are covered. Topics include protocols, wide area networks, local area networks, internetworks, performance measurement, and data network simulation. A network design project will be assigned.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: IENG 4432.03

IENG 4581X/Y Industrial Engineering Design Project

CREDIT HOURS: 6

In this course, the students work in groups on an actual industrial engineering design problem from an organization outside the university. The problem may be in a manufacturing plant, a consulting firm, or a service industry. The ability to solve problems and communicate with the client organizations and with professional Industrial Engineers is stressed. Students are required to maintain a professional log, to prepare an interim report, and to demonstrate their presentation skills.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab

LAB HOURS PER WEEK: 6

PREREQUISITE: IENG 3301.03, IENG 3303.03, IENG 3316.03, IENG 3320.03, IENG 3321.03, IENG 4432.03, IENG 4443.03, IENG 4445.03, IENG 4454.03, IENG 4558.03, IENG 3348.03, IENG 3305, IENG 3344, IENG 3334, IENG 3345

IENG 4599 Special Topics in Industrial Engineering

CREDIT HOURS: 3

This senior year elective course will include special topics in Industrial Engineering that are not included in the regular offerings of the department. The course will be a lecture course, not directed studies. Topics may vary each year, and therefore students should consult with the department for more information before registering.

Introduction

Metals and materials are found in every aspect of society today. Materials have always been central to the advancement of civilization so it is not surprising that entire eras are named after them (bronze age, iron age). The importance of developing new, advanced materials is truly a global issue with societal demands for things such as more fuel efficient vehicles and faster computer processors reaching all time highs. Materials Engineers are the driving force behind such developments, having an unsurpassed understanding of the respective structure, properties and processing of materials. Consequently, graduates are employed in practically all industries. Principals amongst these are primary metal production, automotive, aerospace, government research establishments and consulting firms. Literally all graduates find immediate employment - historically, over 70% have secured full time positions before the start of their final academic term. These niche individuals are highly respected within the companies that they work for and many advance into upper managerial and executive positions.

The program has been designed to give students extensive coverage of this highly unique field which in itself is very broad. The principal branches of Materials Engineering in which students receive instruction include (i) Extractive Processing of Materials, (ii) Structure of Materials, and (iii) Mechanical Properties and Testing of Materials; usually the graduating engineer chooses to specialize in one of these three. Students learn about all of the major courses of materials including metals, ceramics, polymers, and composites - graduates are true "Materials Experts." In doing so, the respective curricula are designed to provide in-depth knowledge of engineering and more importantly, extensive coverage of discipline-specific areas. Students' understanding of the field is further accentuated by the fact that average class sizes are on the order of 20 to 25 students ensuring each an exceptional level of attention from faculty members and one on one interaction.

In 1979, Materials Engineering was the first discipline in the faculty to offer the now highly popular Co-op Program. Students are able to obtain a Bachelor of Materials Engineering with Co-Op distinction in two years following the completion of a Diploma in Engineering. There are two Co-op programs offered in Materials Engineering. One is a Bachelor of Engineering, the other a combined BEng/MASc Degree. The undergraduate curriculum is the same for both programs.

The BEng/MASc was developed in light of the program's strong commitment to research and to permit the identification of students interested in graduate studies before they completed their undergraduate courses. In this regard, all faculty members are actively involved in international research and development initiatives. Consequently, students may also choose to pursue Master's and Doctoral degrees in Materials engineering at Dalhousie in many technically challenging fields of global importance. Included are ceramic and metal matrix composites, automotive alloys, aerospace materials, electronic materials, corrosion, wear, and near-net-shape materials processing technologies.

Curriculum and course descriptions

Refer to sections IIE and IIIE, Materials Engineering Program, in the Process Engineering and Applied Science section.

Co-operative program and schedule

Mechanical Engineering

Location:

Building/Room: Sexton Campus

Street Address 1: 5269 Morris Street

Street Address 2: Room C360

P.O. Box: 15000
Halifax, NS B3H 4R2
Telephone: (902) 494-3052
Fax: (902) 423-6711
Website: www.dal.ca/faculty/engineering/mechanical.html
Email Address: mechug@dal.ca

Introduction

Mechanical Engineering covers a very broad field of professional activity in such areas as land, sea, air, and space transportation; primary and secondary manufacturing industries; energy supply, conversion and utilization; environmental control; and industrial management. In these areas, the Mechanical Engineer may become involved with design, construction, operation, development, research, planning, sales and management.

The curriculum is designed to develop an understanding of the fundamental principles of Mechanical Engineering through lecture, tutorial, and laboratory activities. Well-instrumented laboratories in thermofluids, energy conversion, stress analysis, vibrations, and control systems provide experience in measurements and applications, to ensure a thorough understanding and appreciation of the subject matter. Courses in mathematics, and various non-technical subjects are offered to broaden the student's outlook and understanding of the profession.

Laboratory involvement is considered an important component of mechanical engineering students' education. Emphasis in the laboratory is placed on project work in which design, development and testing are combined in term projects. The laboratory facilities include extensive equipment which is available for use by both undergraduate and graduate students. Measurement techniques and interpretation of test data are emphasized in the laboratories which include several testing machines, photoelastic equipment and strain gage facilities. The control systems laboratories include hydraulic, pneumatic and electronic control systems and components. Several test cells are available for engine testing and a well instrumented, low turbulence wind tunnel is available.

Most undergraduate laboratories use high-speed PC-based digital data acquisition and control systems with graphical interfaces for lab experiments and computations, and the Department has several advanced computer graphics systems.

A design project is an integral part of the senior year curriculum. This involves the student in the original design of a machine or system. Generally, the material learned in several courses must be applied in an imaginative way to achieve the required objective. Non-credit machine-shop practice courses are available to aid the design and construction of projects. Many design projects are sponsored by industry. Most projects involve hardware and typically result in construction and testing of prototypes.

Postgraduate studies in the Department are concentrated in the areas of renewable energy, conversion and storage, stress analysis, heat transfer, multi-phase flow, fluid and thermal power, dynamics of rotating machines, robotics, MEMS and computer aided design and manufacturing. Research and project master's degrees as well as the doctoral degree are offered.

Program Guide

Mechanical Engineering offers two versions of the BEng Program:

1. Co-op Program
2. Non Co-op Program

Co-op Program

The students who choose the Co-op Program follow the schedule below:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Work Term 1	Study Term 5	Work Term 2
4	Study Term 6	Work Term 3	Work Term 4
5	Study Term 7	Study Term 8	

Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

Year 3, Work Term 1 (Fall)

Year 3, Study Term 5 (Winter)

- MECH 3010.03 Machine Design: Loading of Components
- MECH 3500.03 Dynamics of Machines
- MECH 3805.03 Mechanical Engineering Thermodynamics
- CPST 3030.03 Engineering in Society II
- ENGM 3356.03 Numerical Methods and Partial Differential Equations
- MATL 3500.03 Materials Engineering

Year 3, Work Term 2 (Summer)

Year 4, Study Term 6 (Fall)

- MECH 3020.03 Machine Design: Power Components
- MECH 3305.03 Fluid Mechanics
- MECH 3660.03 Finite Element Method in Mechanical Design
- MECH 3705.03 Heat Transfer
- MECH 3900.03 Systems I
- Humanities Course*

Year 4, Work Term 3 (Winter)

Year 4, Work Term 4 (Summer)

Year 5, Study Term 7 (Fall)

- MECH 4015.05 Design Project I
- MECH 4300.03 Stress Analysis
- MECH 4600.03 Engineering Measurements
- MECH 4805.03 Thermo-Fluid Engineering III
- Technical Elective I

Year 5, Study Term 8 (Winter)

- MECH 4025.05 Design Project II
- MECH 4500.03 Vibrations
- MECH 4900.03 Systems II
- Technical Elective II
- Technical Elective III

*Humanities Course

Refer to general Engineering section for details.

Non Co-op Program

The students who choose the Non Co-op Program follow the schedule below:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE

3	Study Term 6	Study Term 5	FREE
4	Study Term 7	Study Term 8	

Non co-op students take the same academic program as the co-op students; however, Study Term 6 may be taken before Study Term 5 if desired. In this way, the program can be done in a total of four years.

Technical Elective Courses

- MECH 4000.03 Manufacturing
- MECH 4340.03 Energy Management I
- MECH 4430.03 Turbomachines
- MECH 4440.03 Principles of Marine Craft Design
- MECH 4444.03 Mechatronics
- MECH 4450.03 Marine Craft Design and Construction
- MECH 4521.03 Applied Dynamics
- MECH 4530.03 Mechanics of Composite Materials
- MECH 4540.03 Aerodynamics
- MECH 4560.03 Space Systems
- MECH 4631.03 CAD/CAM
- MECH 4638.03 Computer Aided Toler. & Dimensioning
- MECH 4640.03 Robotics
- MECH 4650.03 Biomechanical Engineering
- MECH 4652.03 Kinematics of Human Motion
- MECH 4660.03 Finite Element Method in Mechanical Design
- MECH 4810.03 Energy Conversion Systems
- MECH 4820.03 Energy from Renewable Resources
- MECH 4830.03 Reciprocating Internal-Combustion Engines
- MECH 4840.03 Steam Plant Engineering
- MECH 4851.03 Heating, Ventilating & Air Conditioning
- MECH 4880.03 Introduction to Nuclear Engineering
- MECH 4910.03 Fluid Power
- MECH 4950.03 Advanced Control Engineering
- MECH 4960.03 Computational Methods in Engineering

NOTES:

1. Not all of these courses will be offered every year.
2. Seniors may take one graduate course as a technical elective with the permission of the undergraduate advisor of the Mechanical Engineering department and the professor offering the course.
3. Seniors may take one technical elective from another engineering department at Dalhousie with the permission of the undergraduate advisor of the Mechanical Engineering department and the professor offering the course.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

MECH 3010 Machine Design: Loading of Components

CREDIT HOURS: 3

The application of basic methods and concepts of strength of materials to machine design including design concepts, stress, and theories of failure is developed. Topics

include: load analysis, materials, static stresses, strain and deflection, failure, impact, fatigue, surface damage. Applications include: screw fastenings, springs.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 2100.03 or ENGI 2203.03, ENGI 2400.03

MECH 3020 Machine Design: Power Components

CREDIT HOURS: 3

The use of engineering principles in the design of machine power components is developed. Topics include: Lubrication and sliding bearings, roller bearings, spur gears, helical, bevel and worm gears, shafts, clutches and brakes, power transmissions such as belts and chains.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 2100.03 or ENGI 2203.03, ENGI 2400.03

MECH 3305 Fluid Mechanics

CREDIT HOURS: 3

This course presents the dynamic governing equations of fluid flow in differential forms: continuity, Navier-Stokes and energy. Concepts of stream function, vorticity and velocity potential are also introduced. The physics and modeling of Turbulence in fluid systems is shown. The boundary layer theory is shown and flow past immersed bodies are studied: concepts of drag and lift forces are presented. Compressible flow is introduced: speed of sound, nozzle and diffuser, shock waves, Rayleigh and Fanno flow are all studied.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENGI 2102.03, ENGI 2103.03

MECH 3500 Dynamics of Machines

CREDIT HOURS: 3

The course focuses on design of mechanism, their motion, static and dynamic loads, and power transmission. It includes planar and spatial 4-bar and 6-bar linkages, cam mechanisms, gear trains, rotor systems, and manipulators. Linkage inversion, transformation, and synthesis are used for design of new mechanisms. Graphic, analytical, computer, and physical modeling techniques are used. Many real life mechanisms are analyzed.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENGI 2400.03, MECH 2100.03, or ENGI 2203.03, ENGM 1041.03, ENGI 1400.03 or PHYC 1280.03

MECH 3660 Finite Element Method in Mechanical Design

CREDIT HOURS: 3

This course deals with the application of the finite element method to stress analysis problems encountered in mechanical design. Introduction to the finite element method is followed by extensive applications to the design of machine and structural components. Mechanical and thermal stresses in trusses, beams, axisymmetric, shell, and 3D solid elements are considered. Professional finite element modeling best practices are discussed. A finite element pre-processor, code, post-processor are introduced and used in the course assignments.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENGI 2400.03

MECH 3705 Heat Transfer

CREDIT HOURS: 3

This course is an introduction to the three modes of heat transfer: conduction, convection and radiation. Topics covered in conduction include steady-state and transient conduction, in one and two-dimensional system, and the study of extended surfaces. Force and free convection for internal and external flows are examined. The fundamentals of radiation heat transfer are covered, including blackbody radiation, gray surfaces, Kirchhoff's law and radiation exchange between surfaces.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: ENGI 2102.03, ENGI 2103.03

MECH 3805 Mechanical Engineering Thermodynamics

CREDIT HOURS: 3

This course builds on the thermodynamics concepts presented in Thermo-Fluid Engineering I. Introductory concepts of cycles, processes, heat and work are reviewed.

The first and second law of thermodynamics are applied to open and closed systems, both steady-state and transient processes. Availability and exergy analysis are presented. Vapour and gas power and refrigeration cycles are studied; absorption refrigeration cycles and refrigerants are also discussed.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENGI 2102.03, ENGI 2103.03

MECH 3900 Systems I

CREDIT HOURS: 3

The course deals with the analysis of dynamic physical systems. Ordinary-differential-equation models are developed for mechanical, thermal, fluid and electrical systems. System equations are solved using classical methods and Laplace-transform techniques. S-plane characteristics are introduced, as are block-diagram & state-space representations. Systems are simulated by digital computer in the laboratory portion.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENGM 2021.03 or ENGM 2022.03, ENGM 1081.03 or ENGM 2081.03

MECH 4000 Manufacturing

CREDIT HOURS: 3

The course starts with a manufacturing process overview and a detailed process study in the following areas: manual assembly, machining, injection molding,

thermoforming and casting. A relationship between process and design is examined and design for manufacturing methodologies is introduced. Quality control and quality assurance issues are overviewed. The principles of cell design for assembly and machining are introduced and part redesign for process and system is studied.

FORMAT: Lecture| Lab| Tutorial
LECTURE HOURS PER WEEK: 3
PREREQUISITE: MECH 3020.03

MECH 4015 Design Project I

CREDIT HOURS: 5

This course provides a project-based exercise in the engineering design process in a real world engineering context. Students work in teams and are expected to take the project from its preliminary stage through the design stages to the ultimate completion of the design including: technical reports with calculations, engineering drawings, peer evaluation, oral presentations and possibly a physical prototype or model.

FORMAT: Lecture| Lab| Tutorial
LECTURE HOURS PER WEEK: 3
PREREQUISITE: MECH 3010.03 or MECH 3020.03

MECH 4025 Design Project II

CREDIT HOURS: 5

This course is a direct continuation of Design Project I leading to the implementation of the student team design. All projects involve evaluation/testing of student designs, this is usually done via a constructed physical prototype or a model. Students produce a final technical report, conduct peer evaluations and give a formal presentation.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 2
PREREQUISITE: MECH 4015.05

MECH 4300 Stress Analysis

CREDIT HOURS: 3

Course topics include: general state of stress, equilibrium equations, stress-strain-temperature relations, plane stress, axisymmetrical stress problems, thick cylindrical pressure vessels, rotating disks, bending of rectangular and circular plates, torsion of non-circular members, membrane analogy, thin-walled hollow sections, non-symmetrical bending, properties of cross-sections, shear center, composite beams, plastic hinge. Energy Methods, Castigliano's and theorems, statically indeterminate problems.

FORMAT: Lecture| Lab| Tutorial
LECTURE HOURS PER WEEK: 3
PREREQUISITE: ENGI 2200.03

MECH 4340 Energy Management I

CREDIT HOURS: 3

The purpose of this course is to introduce the concepts and techniques of energy management and conservation. The subjects that will be discussed are energy supply and demand, energy pricing, scope of the energy problem and approaches to provide solutions; energy auditing; improving energy utilization in space conditioning, and steam, hot water and compressed air systems; insulation; and electrical energy conservation. An interdisciplinary approach will be employed in this course to provide a wider understanding of the subject.

FORMAT: Lecture| Tutorial
LECTURE HOURS PER WEEK: 3
PREREQUISITE: MECH 3300.03 or MECH 3305.03, MECH 3700.03 or MECH 3705.03, MECH 3800.03 or MECH 3805.03
CROSS-LISTING: MECH 6340.03

MECH 4430 Turbomachines

CREDIT HOURS: 3

Various types of turbomachines, from wind turbines to high-ratio compressors are studied. Although hydraulic pumps and turbines are treated, the majority of the class time is devoted to compressible flow turbomachines and their characteristics. Emphasis is placed on practical design and performance parameters.

FORMAT: Lecture| Lab| Tutorial
LECTURE HOURS PER WEEK: 3

MECH 4440 Principles of Marine Craft Design

CREDIT HOURS: 3

This course covers the fundamentals of hydrostatics and hydrodynamics of marine craft. Topics include: hydrostatics and stability calculations for marine craft; dimensional analysis and modelling of marine systems; resistance estimation of low-speed and high-speed craft; sail power, marine propellers and jet propulsion; directional stability and control and wave theory and motion in waves.

FORMAT: Lecture| Lab| Tutorial
LECTURE HOURS PER WEEK: 3
PREREQUISITE: MECH 3300.03 or MECH 3305.03

MECH 4444 Mechatronics

CREDIT HOURS: 3

This course deals with the integration of mechanical, electrical, computer and control engineering which is increasingly becoming an important part of engineering design. Topics include Mechanical and Electrical Actuation Systems, Sensors, and Signal Conditioning, Microprocessors and Programming and Control. A major part of the course is project-based enabling students to apply the concepts studied in the course.

FORMAT: Lecture| Lab| Tutorial
LECTURE HOURS PER WEEK: 3
PREREQUISITE: MECH 3900.03, MECH 3020.03
EXCLUSIONS: BIOE 4312.03

MECH 4450 Marine Craft Design and Construction

CREDIT HOURS: 3

This course deals with design and construction methods for marine craft. Each student completes a preliminary design of a small marine vessel. Topics include: engineering and economic principles governing selection of dimensions and coefficients for marine craft, computer-aided design, design and generation of hull forms, performance and operability in the ocean environment, construction methods for glass-fibre, wood, aluminum and steel marine craft, and structural analysis and design.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 4440.03 or instructor's consent

MECH 4500 Vibrations

CREDIT HOURS: 3

Single and multiple degree of freedom lumped parameter systems subjected to harmonic and transient excitation are examined. Analytical as well as numerical solutions are covered. Vibrations of continuous systems such as beams and shafts are introduced. Laboratory experiments deal with vibration of lumped parameter physical models as well as vibrations of rotating machinery. Vibration control in industrial applications is emphasized and the effects of whole body vibration on humans is treated as a safety issue.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3500.03, MECH 3900.03

MECH 4510 Mechanics of Composite Materials

CREDIT HOURS: 3

The course introduces classification of composite materials, fabrication processes and applications of composites; the basic relations of elasticity of anisotropic materials, and the macro- and micromechanical modeling of composites. The elastic behaviour of laminated and fibre-reinforced composites is studied; the effective moduli theory and the strength of composite materials are considered. Smart composite structures and their constituents are introduced.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3010.03 and MECH 4300.03

CROSS-LISTING: MECH 6530.03

MECH 4521 Applied Dynamics

CREDIT HOURS: 3

This course begins with a review of planar kinematics and kinetics of rigid bodies. These concepts are extended to kinematics and kinetics of rigid bodies undergoing general three dimensional motion. Euler's Equations are applied to a wide range of engineering problems including vehicular and gyroscopic dynamics. Energy methods for bodies undergoing three dimensional motion are applied to multi-degree-of-freedom systems. Single-degree-of-freedom systems subjected to random and shock inputs are analyzed.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

CROSS-LISTING: MECH 6521.03

MECH 4530 Acoustics

CREDIT HOURS: 3

The class introduces classification of composite materials, fabrication processes and applications of composites; the basic relations of elasticity of anisotropic materials, and the macro- and micromechanical modeling of composites. The elastic behaviour of laminated and fibre-reinforced composites is studied; the effective moduli theory and the strength of composite materials are considered. Smart composite structures and their constituents are introduced

MECH 4540 Aerodynamics

CREDIT HOURS: 3

The course deals with the fundamentals of aerodynamics and the theory of flight. Material covered includes: the standard atmosphere; airfoil coefficients and section properties; finite wings and induced drag; airplane performance - power required, rate of climb, range and endurance; basics of stability and control.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3300.03 or MECH 3305.03

MECH 4560 Space Systems

CREDIT HOURS: 3

This course deals with the engineering design and analysis of space systems and their interrelationships. Topics include orbital mechanics, satellite perturbations, satellite actuator and sensor systems, satellite access and coverage.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3900.03

CROSS-LISTING: MECH 6560.03

MECH 4600 Engineering Measurements

CREDIT HOURS: 3

The static and dynamic characteristics of first and second order transducers and measurement systems are examined. The experimental versus theoretical approach to engineering problems is studied. Topics include data acquisition, analysis, and presentation, including the probabilistic nature of engineering measurements. The course is laboratory intensive covering measurements of force, strain, temperature, pressure, velocity, and fluid flow. Computers are used extensively in the laboratory experiments.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENGM 2032.03

MECH 4631 CAD/CAM - Computer Aided Design/Computer Aided Manufacturing

CREDIT HOURS: 3

The student is introduced to the concept of automation with application to design, production, and manufacturing systems. The use of digital computers is considered in design, including peripheral equipment and types of languages. Other topics include numerical control manufacturing systems such as Direct Numerical Control (DNC), Computer Numerical Control (CNC), Adaptive Control and Industrial Robots. Due to the diverse nature of the course content, various personnel from both the academic and industrial community aid in the class presentation.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3020.03

MECH 4638 Computer Aided Tolerancing and Dimensioning

CREDIT HOURS: 3

This course deals with dimensioning and mechanical tolerances to international standards - key factors in quality production. Topics covered include: review of basic manufacturing processes and tools, fundamental dimensioning and tolerances techniques, working and assembly drawings, CAD/CAM drawings for computer numerical control, geometric and positional tolerancing, quantity production, parts assembly, quality control and application of statistical and probabilistic methods. Biweekly assignments requires use of Auto-CAD, interactive computer programs for geometrical dimensioning/tolerancing, and a Coordinate Measuring Machine (CCM).

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3010.03, MECH 3020.03

MECH 4640 Robotics

CREDIT HOURS: 3

The prime objective of the course is to provide a survey of the state-of-the-art in robotics. A large portion of the course is focused on the robot hardware. However, robotics in an inherently interdisciplinary field and the course will also involve robotics control and application. Topics covered include kinematics and dynamics of the robot arm and gripper, drives, robot position measuring systems, external sensors and feeding, storage, changing position and clamping devices, all of which, together with the robot itself, constitute a "robotized" workplace.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3500.03, MECH 3900.03

CROSS-LISTING: BIOE 4011.03

MECH 4650 Biomechanical Engineering

CREDIT HOURS: 3

Engineering analysis of biological systems provides novel insight into evolutionary design of animals and plants and into the intelligent design of medical devices. This course examines the structure and function of the cardiovascular, pulmonary, and musculoskeletal systems using tools from solid and fluid mechanics. Topics include the heart as a pump, blood flow, arterial pulse propagation, the mechanics of breathing lung elasticity, muscle contraction, tissue mechanics, basic skeletal design, locomotion, and engineering of surgical implants.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

MECH 4652 Kinematics of Human Motion

CREDIT HOURS: 3

The science of biomechanics is based on mechanical models and biological experiments. Students will explore the application of classical mechanics to the analysis of human motion related to athletics, orthopaedics, and rehabilitation. Emphasis is also placed on numerous experimental facts collected from the biomechanical research literature. Topics include kinematic geometry of a single body, the description of joint configuration, and differential kinematics of biokinematic chains. Three-dimensional kinematics of individual joints (i.e., the knee, hip and elbow) is emphasized from the perspective of total joint replacement design.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

MECH 4660 Finite Element Method in Mechanical Design

CREDIT HOURS: 3

Class deals with the application of the finite element method to stress analysis problems encountered in mechanical design. Introduction to the finite element method is followed by the necessary relationships from linear elasticity, beam and plate theory. Various categories of structural elements are discussed in order of increasing complexity. Stresses in one- and two-dimensional trusses, beams, axisymmetric solids, and plates are considered. Finite element program is introduced and used in the course assignments.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENGI 2200.03 or ENGI 1202.03, ENGM 3352.03 or ENGM 3356.03

CROSS-LISTING: MECH 6660.03

MECH 4805 Thermo-Fluid Engineering III

CREDIT HOURS: 3

This course builds on the thermodynamics concepts presented in Thermo-Fluid Engineering I. Introductory concepts of cycles, processes, heat and work are reviewed. The first and second law of thermodynamics are applied to open and closed systems, both steady-state and transient processes. Availability and energy analysis are presented. Vapour and gas power and refrigeration cycles are studied; absorption refrigeration cycles and refrigerants are also discussed.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3705.03, MECH 3305.03, MECH 3805.03

MECH 4810 Energy Conversion Systems

CREDIT HOURS: 3

Application of basic principles of thermodynamics, fluid mechanics and heat transfer to the analysis and synthesis of energy conversion systems are studied. Primary energy sources and global energy demand are examined. Principles of conventional methods, thermal systems, fuel types, combustors, and gas turbines, initial planning of a hydroelectric power plant, selection of turbines and other components, nuclear fission and fusion, clean energy production, and environmental aspects of energy

production are covered.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3300.03 or MECH 3305.03, MECH 3700.03 or MECH 3705.03, MECH 3800.03 or MECH 3805.03, ENGI 2103.03 or ENGI 2300.03

MECH 4820 Energy from Renewable Resources

CREDIT HOURS: 3

This course concentrates on the theoretical and practical aspects of solar, wind, tidal and wave sources of energy with particular emphasis on their availability and use in the Atlantic Provinces. Design feasibility studies are undertaken on particular aspects of energy conversion from these sources. The impact of the environment of consumption of conventional energy forms is investigated. The nature and magnitude of energy consumption world-wide and locally is considered.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3700.03 or MECH 3705.03

MECH 4830 Reciprocating Internal-Combustion Engines

CREDIT HOURS: 3

The major topics of this course are basic engine types, test methods and pressure measurements, combustion, ideal cycles and model processes, equilibrium charts, fuel specifications and tests, engine knock, exhaust analysis, fuel systems, ignition systems, engine performance and supercharger matching. Hands-on laboratory work is an integral part of this course.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3800.03 or MECH 3805.03

MECH 4840 Steam Plant Engineering

CREDIT HOURS: 3

This course aims to provide basic fundamental and practical information to engineering students to design and operate thermal power plants. The following topics are covered: classification of steam generators; comparison of water tube and fire tube boilers; energy sources: nuclear and fossil fuel; fuels and combustion; thermal analysis of furnaces, superheaters, economizers, and air pre-heaters; boiler efficiency calculations; description of different types of heat exchangers; evaporators and condensers; steam generation systems: Pulverized, Cyclone, Fluidized beds; auxiliary equipment (fans, stacks); control system; cooling system design; environmental considerations.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENGI 2102.03 or ENGI 2800.03

MECH 4851 Heating, Ventilating and Air Conditioning

CREDIT HOURS: 3

This is an introduction to the design of thermal systems for indoor climate control. The major topics include: human comfort requirements, outdoor climate variables, heating and dehumidification loads, cooling and dehumidification loads, ventilation requirements and criteria, central system types and selection, energy sources and costs, piping, pumps, ducts, fans, and control systems. Computer programs will be introduced for design calculations involving heating and cooling load, piping, ducting and energy consumption.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3305.03 or MECH 3800.03

MECH 4880 Introduction to Nuclear Engineering

CREDIT HOURS: 3

The purpose of this course is to introduce the concepts of nuclear engineering and the resulting applications. The subjects that will be discussed are the fundamentals of particle physics: proton, neutron, electron, photon and neutrino, and the atomic model; radioactivity and radiation detection, protection and shielding; principle of nuclear energetic: fission and fusion; nuclear reactor kinetics and control; nuclear reactor design and cooling; nuclear propulsion, nuclear waste disposal.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3700.03 or MECH 3705.03, MECH 3800.03 or MECH 3805.03

MECH 4900 Systems II

CREDIT HOURS: 3

Response characteristics of open loop and feedback control systems are studied. Various controller types and their uses are analyzed. Techniques such as root-locus diagrams and Bode & Nichols plots are used for stability and performance evaluation. Digital simulations and experiments on computer-based control systems are done in the laboratory portion.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3900.03

MECH 4910 Fluid Power

CREDIT HOURS: 3

This is an introductory course to fluid power systems covering the principles of power hydraulics, hydraulic fluids, hydraulic actuators and power generation transducers. The concept of pressure controls, volume controls and directional controls is also covered, including an introduction to electro-hydraulic servos and the design of basic open and closed-center circuits. The time domain analysis of feedback systems is introduced. The student is introduced to the design and compensation of systems using both s-plane and time domain methods. Other topics include simulation and analysis of control systems using graphics terminal computer facilities.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

MECH 4950 Advanced Control Engineering

CREDIT HOURS: 3

The course develops the students' capabilities in system simulation and feed forward/feedback control-system design and implementation. Topics include: system-parameter identification, control-system hardware, computer-based control systems, design techniques for multiple-input multiple-output systems, and adaptive control. The course is supported by computer-based simulation activities and design procedures, and by hands-on laboratory experience.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MECH 3900.03

CROSS-LISTING: MECH 6950.03

MECH 4960 Computational Methods in Engineering

CREDIT HOURS: 3

The course presents basic computer methods of application of mathematical tools to solve engineering problems. Numerical methods such as finite differences, series expansions, and numerical integration are introduced. Numerical solutions of ordinary and partial differential equations with applications to equilibrium, eigenvalue and propagation problems in engineering are considered. Application of mathematical libraries, X-window system and the software tools associated with the Unix system are included.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENGM 3356.03 or ENGM 3361.03

CROSS-LISTING: MECH 6960.03

Mineral Resource Engineering

Location:

Building/Room: Sexton Campus

Street Address 1: 1360 Barrington Street

Street Address 2: Room D215

P.O. Box: 15000

Halifax, NS B3H 4R2

Fax: (902) 494-3108

Website: www.dal.ca/faculty/engineering/civil-resource.html

Email Address: care@dal.ca

Introduction

The Mineral Resource Engineering Program concentrates on the technical, environmental and economic aspects of the extraction and processing of the Earth's mineral resources. Students can pursue options in mineral resource engineering, petroleum engineering and mineral processing.

The main employers for Mineral Resource Engineering graduates are the mineral resource industries, oil and gas industries, financial and government institutions, consulting companies, mining equipment manufacturers and dealerships, marketing mine service companies, mineral investment and financial institutions, and research and teaching institutions. The development of an analytical attitude, team work and communication skills are important aims of the Mineral Resource Engineering Program. Participation in field trips to mining and petroleum operations in the Maritime region is a degree requirement and each student is required to share costs.

Opportunity also exists to continue in the MASc, MEng, and PhD programs for those who would like to specialize in areas of Mineral Extraction, Mineral Processing and Petroleum Engineering at Dalhousie.

Curriculum and course descriptions

Refer to sections IIB and IIIB, Mineral Resource Engineering Programs, in the Civil and Resource Engineering section.

Introduction

The Department of Process Engineering and Applied Science prepares students for professional careers in a wide range of fields related to the process industries. Process science and engineering is concerned with the development of new materials and processes to meet the specific needs to develop a given product. A process engineer could be working in research and development on the creation of added-value products or in an industrial setting on modification and optimization of existing processes, systems and process equipment to improve their safety, quality, cost effectiveness with special attention to environmental protection and sustainability.

Process Engineering graduates are actively being employed in the bioprocess industry (food, fiber, pharmaceutical, ...), materials process industry (metals, ceramics, composites, ...), petrochemical process industry (oil, gas, plastics, ...), energy engineering (energy efficiency, renewable sources ...), and several others.

The Department of Process Engineering and Applied Science currently offers three undergraduate professional degree programs to meet the needs of the increasing types and numbers of process industries as well as a BSc minor in Food Sciences. The degree programs are:

1. BEng in Chemical Engineering, co-op and non co-op programs
2. BEng in Environmental Engineering, co-op and non co-op programs
3. BEng in Materials Engineering, co-op and non co-op programs.

For a description of each of the above programs, admission requirements and more information on the opportunities for employment, refer to individual program listings in the Faculty of Engineering section of this calendar.

Opportunities exist within the Department for graduate studies and research leading to the master and doctorate degrees. Consult the Graduate Calendar, Dalhousie University for more details on these graduate programs.

Chemical Engineering

Chemical Engineering offers two versions of the BEng Program:

1. Co-op Program
2. Non Co-op Program

Co-op Program

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Work Term 1	Study Term 5	Work Term 2
4	Study Term 6	Work Term 3	Work Term 4
5	Study Term 7	Study Term 8	

Years 1 and 2 follow the core program outlined in the Engineering section.

Year 3, Work Term 1 (Fall)

Year 3, Term 5 (Winter)

- CHEE 3522.03 Mechanical Unit Operations
- CHEE 3525.03 Separation Processes
- CHEE 3544.03 Computer-Aided Process Design
- PEAS 2203.03 Organic Chemistry for Process Engineers
- PEAS 3500.03 Process Thermodynamics

Year 3, Work Term 2 (Summer)

Year 4, Term 6 (Fall)

- CHEE 3601.03 Thermal Unit Operations
- CHEE 3634.03 Chemical Reaction Engineering
- ENGM 3052.03 Applied Numerical Methods
- MATL 3500.03 Materials Engineering
- PEAS 3600.03 Transport Phenomena
- PEAS 3700.03 Law & Ethics in Process Engineering

Year 4, Work Term 3 (Winter)

Year 4, Work Term 4 (Summer)

Year 5, Term 7 (Fall)

- CHEE 4702.03 Unit Operations Lab I
- CHEE 4703.03 Process Dynamics & Control
- CHEE 4704.03 Separation Processes II
- CHEE 4741.03 Process and Plant Design I
- CHEE 4773.03 Industrial Safety & Loss Management
- Technical Elective I

Year 5, Term 8 (Winter)

- CHEE 4802.03 Unit Operations Lab II
- CHEE 4803.03 Oil and Gas Processing
- CHEE 4842.03 Process and Plant Design II
- MATL 4840.03 Corrosion and Degradation of Materials
- Technical Elective II
- Technical Election III

Technical Electives

This list is not exhaustive, nor does it imply that each course will be offered every year. Students should check with the Undergraduate Program Co-ordinator.

- BMNG 5010.03 Introductory Physiology for Biomedical Engineering
- BMNG 5020.03 Cell Biology for Biomedical Engineering
- BMNG 5030.03 Pathobiology for Biomedical Engineering
- BMNG 5040.03 Introduction to Biomedical Engineering
- BMNG 5110.03 Biocompatibility and Biomaterials Design
- BMNG 5150.03 Introduction to Tissue Engineering
- BMNG 5160.03 Bioeng in Ortho. & Dent
- BMNG 5210.03 Biomed Instrumentation, Data Acquisition & Analysis
- BMNG 5230.03 Biomedical Signals
- BMNG 5260.03 Principles of Medical Imaging
- ENVE 3251.03 Envir and Ind Microbiology
- ENVE 3500.03 Air Quality
- ENVE 3461.03 Environmental Measurement and Analysis
- ENVE 4342.03 Industrial Biotechnology
- ENVE 4432.03 Waste Management
- ENVE 4411.03 Indoor Env Control and Air Quality
- ENVE 4612.03 Waste Disposal and Utilization
- ENVE 4772.03 Environmental Assessment and Management
- ENVE 4872.03 Air Pollution
- CHEE 4791.03 Research Project I

- CHEE 4892.03 Research Project II
- CHEM 3305.03 Materials Science
- CHEM 4502.03 Polymer Science
- CHEM 5303.03 Physical Properties of Materials
- CIVL 4440.03 Water and Wastewater Treatment
- CIVL 4460.03 Solid Waste and Landfill Engineering
- CIVL 6101.03 Advanced Strength of Materials
- CIVL 6147.03 Advanced Theory of Structures
- CIVL 6148.03 Application of Finite Element Method I
- CIVL 6149.03 Application of Finite Element Method II
- CIVL 6153.03 Fibre-Reinforced Plastics
- ECED 3204.03 Microprocessors
- ECED 4601.03 Digital Control Systems
- ECED 4760.03 Biomedical Engineering
- ENVI 5001.03 Environmental Assessment
- ENVI 5010.03 Introduction to Environmental and Occupational Health
- EARTH 5270.03 Applied Geophysics
- FOSC 3070.03 Food Processing
- FOSC 4081.03 Brewing Science
- IENG 4432.03 Simulation of Industrial Systems
- IENG 4529.03 Industrial and Organizational Psychology
- IENG 4547.03 Company Operations and Management
- IENG 4558.03 Project Management and Control
- IENG 4574.03 Decision and Risk Analysis
- IENG 4578.03 Organizational Aspects of Quality Management
- MECH 4340.03 Energy Management
- MECH 4600.03 Engineering Measurements
- MECH 4650.03 Biomechanical Engineering
- MECH 4810.03 Energy Conversion Systems
- MECH 4820.03 Energy from Renewable Resources
- MECH 4851.03 Heat/Vent./Air Conditioning
- MECH 4950.03 Advanced Control Engineering
- MECH 6510.03 Advanced Mechanics of Solids
- MATL 3621.03 Mechanical Behaviour of Materials
- MATL 4710.03 Ferrous Alloys
- MATL 4720.03 Industrial Process of Materials
- MATL 4820.03 Non-Metallic Materials
- MATL 4830.03 Non Ferrous Alloys
- MATL 4826.03 Physical Metallurgy and Ceramics
- MATL 6010.03 Introduction to Transmission Electron Microscopy
- MATL 6011.03 Introduction to the SEM and Microprobe
- MATL 6030.03 Fracture of Metallic Materials
- MINE 3530.03 Mineral Processing
- MINE 3620.03 Petroleum Engineering
- MINE 6008.03 Advanced Petroleum Engineering
- MINE 6009.03 Offshore Drilling and Production
- MINE 6010.03 Solid-Liquid Separation
- PETR 6010.03 Petroleum Reservoir Engineering
- PETR 6030.03 Natural Gas Reservoirs
- PETR 6040.03 Drilling Engineering
- PETR 6050.03 Production Technology

Notes:

1. Seniors may take a postgraduate course as a Technical elective with the approval of the Undergraduate Program Coordinator and the professor offering the course.
2. Not all technical electives are available each year and other elective courses may be available. Please check with the department prior to registration.

Non Co-op Program

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 6	Study Term 5	FREE
4	Study Term 7	Study Term 8	

Non co-op students take the same academic program as the co-op students; however, Term 6 may be taken before Term 5 if desired. In this way, the program can be done in a total of four years.

Environmental Engineering

Environmental Engineering offers two versions of the BEng Program:

1. Co-op Program
2. Non Co-op Program

Co-op Program

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Work Term 1	Study Term 5	Work Term 2
4	Study Term 6	Work Term 3	Work Term 4
5	Study Term 7	Study Term 8	

Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

During their senior year, Environmental Engineering students can specialize in one or more of the following areas: Air Quality and Pollution Control, Energy and the Environment, Soil and Water Quality and Management, and Waste Utilization and Management.

Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

Year 3, Work Term 1 (Fall)

Year 3 - Term 5 (Winter)

- CHEE 3522.03 Mechanical Unit Operations
- ENVE 3500.03 Air Quality
- ENVE 3251.03 Environmental & Industrial Microbiology
- MINE 2200.03 Introducing Geology for Engineers
- PEAS 3500.03 Process Thermodynamics
- PEAS 2203.03 Organic Chemistry for Process Engineers

Year 3, Work Term 2 (Summer)

Year 4, Term 6 (Fall)

- CIVL 3101.03 Soil Mechanics
- ENGM 3052.03 Applied Numerical Methods
- ENVE 3452.03 Soil and Water Engineering
- ENVE 3461.03 Environmental Measurements and Analysis

- PEAS 3700.03 Law & Ethics in Process Engineering

Year 4, Work Term 3 (Winter)

Year 4, Work Term 4 (Summer)

Year 5, Term 7 (Fall)

- CHEE 4773.03 Industrial Safety & Loss Management

- CIVL 4440.03 Water & Wastewater Treatment
- ENVE 4123.03 Environmental Biotechnology
- ENVE 4401.03 Design Project for Environmental Engineering I
- ENVE 4772.03 Environmental Assessment & Management
- Technical Elective

Year 5, Term 8 (Winter)

- CIVL 4410.03 Engineering Hydrogeology
- ENVE 4872.03 Air Pollution Control
- ENVE 4432.03 Waste Management
- ENVE 4402.03 Design Project for Environmental Engineering II
- Technical Elective

Environmental Engineering—Recommended Technical Electives

- CIVL 4100.03 Earth Slopes and Embankments
- CIVL 4111.03 Geotechnical Engineering
- CIVL 4350.03 Hydraulic Engineering
- ENGM 4675.03 Risk Assessment and Management OR IENG 4574 Decision and Risk Analysis
- ENVE 4000.03 Small Watershed Hydrology
- ENVS 4002.03 Science of Wetland
- ENVE 4411.03 Indoor Environmental Control
- ENVE 4612.03 Waste Disposal and Utilization
- ENVE 4641.03 Contaminant Fate and Transport
- EARTH 3402.03 Practical Hydrology
- EARTH 3440.03 Geomorphology
- EARTH 3500.03 Geoscience Information Management
- FOSC 3070.03 Food Processing
- FOSC 4091.03 Food Safety
- IENG 4500.03 Operations Research Methods
- IENG 4529.03 Industrial and Organizational Psychology
- IENG 4547.03 Company Operations and Management
- IENG 4558.03 Project Management and Control
- MECH 4880.03 Intro to Nuclear Engineering
- MINE 4815.03 Mining and Environment

Note: Technical electives from other departments may be selected subject to availability and approval by the departments concerned.

Not all technical electives will be offered every year.

Non Co-op Program

Sequencing

Year	Fall	Winter	Summer

Non co-op students take the same academic program as the co-op students; however, Term 6 may be taken before Term 5 if desired. In this way, the program can be done in a total of four years.

Combined BEng - MASc Program Guide

1. Program Entrance Requirements

To be eligible to enter the Combined BEng/MASc Program, a student must be able to demonstrate an overall average of 70% based on the subjects in the first three academic terms of the Materials Engineering Program.

Since the first two academic terms of the BEng and combined BEng/MASc Programs are common, students enrolled in the BEng Program may apply for entrance into the combined degree program at any time before the beginning of the seventh academic term.

2. Financial Support

All students accepted into the BEng/MASc Program will be eligible for financial assistance beginning at the start of the seventh academic term. The assistance will be spread over the remainder of the academic terms and may have a total value of approximately \$15,000.

Part of the financial assistance is derived from money obtained to further specific research objectives on which the student is expected to work for his or her Master's Thesis. The remainder of the financial support is normally derived from assigned duties as Part-Time Teaching Assistants. A course work Master's Program (MEng) can be followed but the amount of financial assistance will be considerably reduced.

3. Maintenance of Standing

In order to retain standing in the Combined BEng/MASc Program, students must continue to maintain an academic average of B-. Failing this, a student may obtain a BEng Degree only by completing the required courses, but will not be eligible for further financial assistance from the Department. However, on graduation should the student attain an average of B, he/she may be eligible to pursue graduate studies in the department.

4. Scholarships

Students in the Combined BEng/MASc Program are encouraged to apply for the usual scholarships and bursaries in order to partially augment the financial support received. Contact the Department for details.

5. Combined BEng/MASc Scheduling

The combined BEng/MASc Degree follows the program as indicated for the BEng with the addition of two academic terms as follows:

Year 6, Term 10 (Fall)

- Graduate Course IV
- Thesis

Year 6, Term 11 (Winter)

- Thesis

6. Technical Electives

Choose three:

- ENVE 4772.03 Environmental Assessment and Management
- IENG 4558.03 Project Management and Control
- IENG 4547.03 Company Operations and Management
- MATL 4805.03 Electrochemical Processing of Materials
- MATL 4806.03 Particulates in Materials Engineering
- MATL 4813.03 Iron and Steel Production
- MATL 4825.03 Solidification and Casting
- MATL 4826.03 Physical Metallurgy and Ceramics
- MECH 4330.03 Mechanical Design
- MECH 4650.03 Biomechanical Engineering
- MECH 4880.03 Introduction to Nuclear Engineering
- MINE 4830.03 Advanced Mineral Processing

Technical electives from other engineering departments may be selected subject to availability and approval by the departments concerned.

Not all technical electives will be offered every year.

Minor in Food Science for BSc Major or Honours

See Minors section.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Course Descriptions - Biological Engineering Series

BIOE 3051 Principles of Food Engineering

CREDIT HOURS: 3

This course presents principles of engineering and applications to food processing unit operations. This course is intended for primarily food science majors, and other non-engineering students. Topics covered are units and dimensions, unit operations in food processing, material balance, thermodynamics and energy balance, fluid flow, heat transfer, and mass transfer.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: MATH 1280.03 and 1290.03, or ENGM 1011.03 and 1012.03, PHYC 1300X/Y.06

BIOE 4341 Food Science for Engineers

CREDIT HOURS: 3

This course introduces the fundamental chemical, nutritional and microbiological aspects of food processing. Emphasis is placed on food quality, deterioration and principles of its preservation. Topics covered include: constituents of food (properties, significance, and nutritive aspects); factors related to quality and deterioration; fats and oils; food additives; and the requirements for food preservation, packaging and storage.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOE 3251.03

BIOE 4351 Bioprocess Engineering

CREDIT HOURS: 3

This course focuses on the process design of unit operations involved in bioprocessing. Topics include fluid flow and mixing, transport phenomena in bioprocess systems, design and analysis of biological reactors, and bioseparation processes. Examples encompass various areas of bioprocessing. Simulation of a bioprocess is demonstrated using a software package.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

BIOE 4352 Food Engineering

CREDIT HOURS: 3

This course focuses on the process design of unit operations in food processing, preservation, packaging and storage. Topics include mass and energy balances, reaction kinetics modelling, size reduction, emulsification, food dehydration, packaging and storage, extrusion processes, freezing and thawing, evaporation and freeze concentration, crystallization, thermal process calculations and microwave heating. As a term project, a food process is simulated using a software package.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: BIOE 3252.03 or equivalent

BIOE 4391 Polymeric Biomaterials

CREDIT HOURS: 3

This course provides an introduction to the characterization, fabrication and use of synthetic and naturally-derived polymeric materials to replace or regenerate tissues and organs in the human body. Classes will include a discussion of natural and synthetic macromolecular structure, properties (chemical, physical, mechanical), synthesis, and interactions with the human body. The design and application of polymeric materials in tissues engineering, drug delivery, and prosthetics will also be discussed using specific examples including: blood vessel replacement, artificial pancreas, skin substitutes, and nerve regeneration.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

Course Descriptions - Chemical Engineering Series

CHEE 3522 Mechanical Unit Operations

CREDIT HOURS: 3

This course introduces the student to the principles and practices involved in contacting, conveying, separating and storing single and multiphase systems. It includes the flow of incompressible and compressible fluids in conduits and past immersed bodies, as well as the transportation, metering, and mixing of fluids. Unit operations involved in the contacting and separation of phases, such as fluidization, sedimentation and centrifugation, are also studied.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

CHEE 3525 Separation Processes

CREDIT HOURS: 3

This course provides an introduction to cascade theory and develops fundamentals for design and analysis of staged operations such as leaching, liquid-liquid extraction

and distillation. Topics include single-stage operations, multi-stage, counter-current cascade with and without reflux, and binary and multi-component distillation.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

CHEE 3544 Computer-Aided Process Design

CREDIT HOURS: 3

The course aims to develop the student's ability to solve process design problems using packaged software. Major emphasis is placed on how to translate a flow sheet into a suitable form for simulation and design. Other topics include relational data bases, and design of specific unit operations using both available software and student-developed programs.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 4

PREREQUISITE: PEAS 2201.03, ENGM 1081.03

CHEE 3601 Thermal Unit Operations

CREDIT HOURS: 3

In this course students will learn how to apply the fundamental concepts of momentum and energy transfer to the design of thermal processing unit operations.

Examples include double pipe heat exchanger, shell and tube heat exchanger, plate heat exchangers, air cooled heat exchangers, cooling towers, condensers, and boilers.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

COREQUISITE: PEAS 3600.03

CHEE 3634 Chemical Reaction Engineering

CREDIT HOURS: 3

This course introduces the subject of chemical reaction engineering. Classical reaction kinetics concerning rates, mechanisms, temperature effects and multiple reactions are studied. The concepts of batch, continuous stirred-tank and plug flow reactors are introduced for the ideal case. Non-isothermal reactors and non-ideal flow are considered in the design of chemical reactor systems. Heterogeneous reactors and catalysis are also discussed. Emphasis is placed on computational techniques for reactor problem solutions.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

CHEE 4702 Unit Operations Lab 1

CREDIT HOURS: 3

In this course, students will apply the principles of Unit Operations in the Laboratory using pilot scale equipment. An emphasis is placed on experimental, analysis and reporting.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 1

LAB HOURS PER WEEK: 4

PREREQUISITE: CHEE 3522.03, CHEE 3601.03, CHEE 3525.03, CHEE 3634.03, PEAS 3500.03

CHEE 4703 Process Dynamics and Control

CREDIT HOURS: 3

This course deals with the control and mathematical modeling of chemical processes. The dynamics of behaviour of processes is analyzed through transfer functions and means of determining the dynamic performance of feedback control systems are presented. Stability and Root Locus Analysis and design considerations, and multivariable systems are covered.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

TUTORIAL HOURS PER WEEK: 1

PREREQUISITE: CHEE 3544.03

CHEE 4704 Separation Processes II

CREDIT HOURS: 3

In this course, students will learn how to apply the fundamental concepts of momentum, energy and mass transport to the design of unit operations designed for separations of chemical streams. This is intended as a continuation of CHEE 3525: Separation Processes. Unit operations including but not limited to absorption/desorption, adsorption, solvent extraction, drying, humidification/dehumidification, solvent extraction, leaching and ion exchange will be covered.

PREREQUISITE: PEAS 3600.03, CHEE 3525.03, PEAS 3500.03

CHEE 4741 Process and Plant Design I

CREDIT HOURS: 3

This course aims to develop the student's abilities in the synthesis of processing elements into an integrated plant that is capable of achieving a prescribed goal. Various design projects are undertaken to emphasize: process selection and economic evaluation, and detailed design of process equipment as well as optimization of processing subsystems such as distillation systems.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 4

PREREQUISITE: ENGI 2203.03, CHEE 3522.03, CHEE 3525.03, CHEE 3544.03, MATL 3500.03, CHEE 3634.03, IENG 2005.03, CHEE 3601.03 or CHEE 3624.03,

CHEE 4760 Fundamentals of Combustion

CREDIT HOURS: 3

This course is an introduction to the principles of combustion processes. The properties of premixed gas flames are examined. Diffusion flames and the burning of

liquid and solid fuels are studied. Ignition phenomena and spontaneous combustion, with particular reference to safety in the chemical process industries, are examined.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

CHEE 4773 Industrial Safety and Loss Management

CREDIT HOURS: 3

Topics covered in this course include: history of health and safety; causes and effects of loss; policy development; loss control and health basics; emergency preparedness and standards; hazard identification; safe process design; inspection and investigation processes; measurement, evaluation and audits of OH&S program elements; legislation.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: PEAS 3700.03

EXCLUSIONS: CHEE 6701.03

CHEE 4791 Research Project I

CREDIT HOURS: 3

The course objective is to provide experience in the application of engineering principles to the solution of a specific problem in Chemical Engineering. A research project is chosen in collaboration with a particular faculty member. The student then prepares a work plan, carries out a literature search pertinent to the problem, designs and experimental setup, if needed, and arranges for the acquisition of necessary equipment. Interim and final progress reports are required in both written and oral formats.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

CHEE 4802 Unit Operations Lab II

CREDIT HOURS: 3

This course is a continuation of CHEE 4702.03 where additional Unit Operations experiments will be conducted, analyzed and reported.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 1

LAB HOURS PER WEEK: 4

PREREQUISITE: CHEE 4702.03

CHEE 4803 Oil and Gas Processing

CREDIT HOURS: 3

This course provides an overview of the oil and gas industry as a whole, introducing the typical technologies, processes and unit operations. Topics covered include: natural gas recovery and purification; and the properties of bitumen, its recovery, and subsequent refinement. Specific emphasis is placed on detailed design of unit operations for petroleum upgrading and the interrelation between processing steps for optimized petrochemical fuels production.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

TUTORIAL HOURS PER WEEK: 2

PREREQUISITE: CHEE 3601.03, CHEE 4704.03, CHEE 3634.03 or instructor approval

CHEE 4842 Process and Plant Design II

CREDIT HOURS: 3

This course is a continuation of Process and Plant Design I, but emphasizes the synthesis of whole systems. Design projects cover process identification and selection, material and energy balance, system sensitivity to various parameters and preliminary process optimization, design and specification of processing units, plant layout, costing and economic evaluation.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

COREQUISITE: MATL 4840.03

PREREQUISITE: CHEE 4741.03

CHEE 4854 Computer Process Control

CREDIT HOURS: 3

This course deals with digital computer control of chemical processes. Methods for analyzing and designing control systems using z-transforms are covered. Experience is provided in the use of currently popular control methods, such as model predictive control. An introduction is given for other advanced techniques, such as adaptive control, optimal control and stochastic control.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: CHEE 4752.03 or instructor's permission

CHEE 4856 Process Optimization

CREDIT HOURS: 3

The course deals with the study and application of optimization techniques to engineering problems, with particular emphasis on chemical processes. Topics include analytical and numerical techniques for optimization of single and multi-dimensional problems, linear programming, nonlinear programming and dynamic programming. The course employs available computer software and student-developed programs to solve the problems.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

CHEE 4862 Fundamentals of Combustion Engineering

CREDIT HOURS: 3

In this course, the principles of combustion processes (studied in Fundamentals of Combustion) are applied to industrial applications. The properties of solid, liquid and gaseous fuels are discussed. Various burner systems and the importance of combustion aerodynamics in boilers, furnaces and kilns are studied. The method of determining boiler and furnace efficiency and an introduction to pollution control are presented.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: CHEE 4760.03

CHEE 4892 Research Project II

CREDIT HOURS: 3

This course is a continuation of Research Project I. The student conducts the planned research work, analyses the data obtained and critically evaluates the findings. Written and oral progress reports are required at mid-term. A written report and an oral presentation are required at the end of the term.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: CHEE 4791.03

Course Descriptions - Environmental Engineering Series

ENVE 3251 Environmental and Industrial Microbiology

CREDIT HOURS: 3

The principles of microbial communities are applied to biological systems. Emphasis is placed on microbial populations in air, soil and water. Further investigation includes microorganisms found in food, aquaculture and mining industries. Applications of microbial ecology to agriculture, industry, biotechnology and environment are examined.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

ENVE 3452 Soil and Water Conservation Engineering

CREDIT HOURS: 3

The prediction, nature, effects and control of natural surface and sub-surface waters and non-point source pollutants in catchments are considered. Design flood hydrograph, flood routing, porous media flow and soil erosion prediction techniques are presented. Energy dissipating structures used to control flood flows which are discussed include terraces, chutes, drop inlets, grassed waterways, culverts and small earth dams. An earth dam design project extends over the course duration.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 4

LAB HOURS PER WEEK: 2

ENVE 3461 Environmental Measurement and Analysis

CREDIT HOURS: 3

This course will cover the fundamentals of characterizing and monitoring processes within environmental systems through measurement and analysis. The course will begin with an overview of transducers and the various types of sensors and data acquisition systems typically used in environmental monitoring. Students will learn how to properly measure fluid flow processes and sample for contaminants within surface water and ground water. In addition, the measurement and analysis of contaminants in soil and atmospheric media will be covered. Data presentation and the use of geographical information systems (GIS) and global positioning systems (GPS) will also be covered. Students will gain hands-on experience using environmental monitoring equipment and instrumental methods of analysis during field and laboratory classes. Students taking this class as a core course will be expected to attend a two-day surveying field camp on the Sexton Campus over the first weekend of term.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

ENVE 3500 Air Quality

CREDIT HOURS: 3

This course covers sources, the impact on health and the environment, atmospheric chemistry, fate and transport and the measurement and modeling of atmospheric pollutants. The application of regulatory computer models to air quality case studies will be demonstrated in laboratory classes. In addition, field and laboratory classes will provide hands on experience of measuring and characterizing air pollutants. Problem solving sessions are used to illustrate the application of meteorology, measurements and models to determine the sources and impact of air pollutants at various receptors found both outdoors and indoors.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

EXCLUSIONS: ENVE 4621.03

ENVE 4000 Small Watershed Hydrology

CREDIT HOURS: 3

Following an overview of the nature of hydrologic data and models, emphasis is placed on deterministic mathematical modelling of component processes and the synthesis of complete hydrographs. Components examined include precipitation, infiltration, evapotranspiration, surface and subsurface flow. The structure and application of selected current models are presented.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: A first class in engineering hydrology and microcomputer experience

ENVE 4123 Environmental Biotechnology

CREDIT HOURS: 3

This course outlines the principles and applications of environmental biotechnology. Quantitative tools for describing microbial stoichiometry and kinetics will be examined and related to reactors of interest to environmental engineering. Applications of biological treatment processes will be studied and may include the activated sludge process, lagoons, anaerobic treatment and bioremediation.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

TUTORIAL HOURS PER WEEK: 3

PREREQUISITE: ENVE 3251

EXCLUSIONS: ENVE 3432

ENVE 4342 Industrial Biotechnology

CREDIT HOURS: 3

This class introduces students to industrial applications of biotechnology. Basic biochemistry and molecular biology are covered in addition to stoichiometry and kinetics for bioprocesses. Modern tools and approaches of biotechnology are presented, followed by application of biotechnology to diverse areas (e.g. the environment, medicine, agriculture, pharmaceutical and food processing industries). This class is suitable for engineering/science students who may wish to pursue employment in the biotechnology sector with little/no prior knowledge of biotechnology or genetic engineering.

ENVE 4401 Design Project for Environmental Engineers I

CREDIT HOURS: 3

The objective of the course is to provide students with first hand experience in applying engineering design principles, biogeochemical analyses and environmental assessment techniques to the solution of specific environmental problems related to air, soil and water pollution control. Students are expected to display a high level of initiative and ingenuity in carrying out the project.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 1

LAB HOURS PER WEEK: 5

PREREQUISITE: Senior students only

ENVE 4402 Design Project for Environmental Engineers II

CREDIT HOURS: 3

This is a continuation of ENVE 4401 leading to a final presentation in both oral and written format.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 1

LAB HOURS PER WEEK: 5

PREREQUISITE: BIOE 4401.03

ENVE 4411 Indoor Environment Control and Air Quality

CREDIT HOURS: 3

The course deals with the design of heating, ventilating and air conditioning systems for controlled environment facilities such as: animal housing, residential and commercial buildings. Indoor air quality for humans and animals is discussed in relation to current methods of environmental control and energy conservation in buildings. Completion of an assigned term project is a part of this course.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: PEAS 3600.03 or equivalent

ENVE 4432 Waste Management

CREDIT HOURS: 3

This course examines the characteristics of solid waste, and options for collection systems and treatment/processing. Landfill disposal will be examined and emphasis put on other options such as energy recovery and biochemical treatment.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

TUTORIAL HOURS PER WEEK: 3

PREREQUISITE: ENVE 3251.03

EXCLUSIONS: ENVE 3432.03

ENVE 4612 Waste Disposal and Utilization

CREDIT HOURS: 3

The physical, chemical and biological properties of liquid and solid wastes are discussed and related to current handling and disposal methods. Solution to problems of pumping liquid waste, lagoon design and holding facilities are presented. Methods of land application of wastes are compared based on pollution problems and fertilizer issues. Technological advances of utilization of wastes for the production of compost, single cell protein, alcohol, fertilizer, biogas, and chemicals are discussed. The course includes a term project, field trips, and seminars.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

ENVE 4621 Atmospheric Air Quality

CREDIT HOURS: 3

This course will cover fundamentals of air quality. Sources and characteristics of atmospheric pollutants will be introduced as well as methods for sampling/measuring air pollutants and atmospheric processes. The thermodynamics and fluid mechanics of the planetary boundary layer, and the behaviour of plumes, will be primary focus. Contaminant transformations in the atmosphere, as well as wet and dry deposition of pollutants, will be covered. Other topics will include computer models,

standards/legislation and climate change.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

TUTORIAL HOURS PER WEEK: 1

ENVE 4641 Contaminant Fate and Transport

CREDIT HOURS: 3

This course focuses on the quantitative analysis of mechanisms that control the fate and transport of contaminants in the environment. The occurrence, movement, and transformation of contaminants in a variety of environmental media, including surface waters, terrestrial environments, and the atmosphere are covered. A 3-d field lab will be held at the beginning of the semester, in which students will gain experience in: (i)sampling environmental media, and (ii)characterizing transport processes in terrestrial and aquatic environments.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: ENVE 3452.03/CIVL 3310.03, PEAS 2202.03/CIVL 3450.03, ENGM 3052.03/CIVL 4720.03

ENVE 4772 Environmental Assessment and Management

CREDIT HOURS: 3

This course examines the ecological impacts of human activities with regard to water, air and soil pollution. Ecological theory and practice are reviewed and methods of environmental regulation and management considered in the light of the concepts of sustainability and maintenance of biodiversity. Lectures will include presentations by government and corporate regulators and managers. Tutorials will be devoted to the preparation and presentation of hypothetical environmental impact statements and assessments.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

TUTORIAL HOURS PER WEEK: 1

ENVE 4872 Air Pollution Control

CREDIT HOURS: 3

This course deals with air pollution from the standpoint of its generation and control. Both gaseous and particulate matter emitted from combustion and industrial sources are considered.

EXCLUSIONS: CHEE 4872.03

Course Descriptions - Food Science Series

FOSC 1000 Concepts in Food Science

CREDIT HOURS: 3

This course will present an overview of the discipline of Food Science and Food Processing. The overview will include discussions of topics such as food processing, food preservation and safety, seafood processing, quality assurance, and food packaging. Selected food processing operations will also be discussed in further detail. Food safety issues such as food infection and intoxication and HACCP will be introduced.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

COREQUISITE: BIOL 1010.03, BIOL 1011.03

FOSC 2010 Food Commodities

CREDIT HOURS: 3

This course will study the basic scientific principles underlying the processing of varying food commodities. General preservation methods such as freezing, dehydration, thermal processing, irradiation and microwave heating and their applicability to various foods will be examined during lectures and tours to industrial food processing plants. The practices of food manufacturing, preservation, distribution, and marketing of food materials will be related to basic food science principles.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

FOSC 3010 Food Chemistry

CREDIT HOURS: 3

This course will examine the molecular behaviour of basic constituents common to food products and relate this behaviour to the structure and properties of food constituents. Topics covered will include water, carbohydrates, proteins and lipids and micro nutrients such as vitamins and minerals, pigments and flavours. Chemical processes such as browning, enzyme reactions and emulsification will also be examined. The function of ingredients, additives and nutraceuticals will be examined.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: CHEM 2441 or CHEM 2401

CROSS-LISTING: FOSC 6328

FOSC 3020 Food Analysis

CREDIT HOURS: 3

This course will cover the theory and practice used in modern food analysis. The analysis of proteins, lipids and carbohydrates will be presented. As well, the principles of spectroscopy, titration, electrophoresis and chromatography will be discussed and demonstrated using various foods. Other analytical techniques specific to foods such as reflective colorimetry, texture profile analysis and water activity measurement will be presented.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3
PREREQUISITE: CHEM 2441 or CHEM 2401 or PEAS 3203
CROSS-LISTING: FOSC 6329

FOSC 3030 Food Quality Assurance

CREDIT HOURS: 3

This course will examine techniques employed to ensure the processing and delivery of quality foodstuffs. Topics covered will include quality management systems, statistical quality control, government regulation and food legislation. Details of Hazard Analysis Critical Control Point (HACCP) planning will be covered in detail. Quality assurance systems employed in government and the food industry will be examined.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: STAT 1060.03, FOSC 2010.03

FOSC 3070 Food Processing

CREDIT HOURS: 3

This course will examine various unit operations in food processing. Topics examined will include low temperature processes (chilling and freezing); thermal processing including commercial blanching, pasteurization and sterilization; drying and non-thermal processes including high pressure processes and irradiation. The unit operations of various food and seafood commodities will be examined in detail.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: FOSC 2010.03, BIOE 3051.03

FOSC 3080 Food Microbiology

CREDIT HOURS: 3

This course is designed to introduce students to current aspects of food microbiology with special emphasis on spoilage organisms and foodborne pathogens. Subjects covered will include food infection and intoxication, factors affecting microbial growth and death, sanitation and predictive microbiology. Special emphasis will be given to the microbial ecologies associated with foods from agricultural and marine sources. The characteristics of emerging food pathogens and their influence on the safety of the food supply will be examined. Rapid methods of detection of foodborne microorganisms will be studied.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOL 2004.03 or MICI 2100.03

FOSC 4020 Chemistry - Fats, Oils, Lipids

CREDIT HOURS: 3

The difference in physical and chemical properties of natural fatty acids are correlated with the physical nature of fats, oils and lipids, and the chemical combinations of fatty acids with glycerol, fatty alcohols, sterols and other chemical materials. Methods of separation such as chromatography, solubility and crystallization are explained in terms of the molecular properties. Important industrial processes and products are included.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: FOSC 3020.03 or CHEM 2201.03

CROSS-LISTING: FOSC 6329.03

FOSC 4030 Food Product Development

CREDIT HOURS: 3

This course examines the process of food product development and techniques used to measure food sensory aspects, shelf life and food stability. Topics covered will include food structure, colorimetry, shelf life modelling and sensory analysis. This course has been designated as a “capstone” course and it will incorporate concepts from other food science courses to develop problem solving and critical thinking abilities.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: FOSC 3030.03

FOSC 4070 Food Processing

CREDIT HOURS: 3

This course will examine various unit operations in food processing. Topics examined will include low temperature processes (chilling and freezing); thermal processing including commercial blanching, pasteurization and sterilization; drying and non-thermal processes including high pressure processes and irradiation. The unit operations of various food and seafood commodities will be examined in detail.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: Permission of instructor

CROSS-LISTING: FOSC 6325

FOSC 4081 Brewing Science

CREDIT HOURS: 3

This course will examine unit operations employed during the production of malt and beer. Brewing, fermentation and packaging aspects of beer production as well as brewing quality assurance, colloidal, flavour and haze stability will be discussed.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

FOSC 4091 Food Safety and Biotechnology

CREDIT HOURS: 3

This course will teach students biological aspects of safety in our food and water supply. The course is divided into three modules: (1) Introduction to molecular biology and biotechnology methods used to detect disease causing microorganisms, create genetically modified organisms and manipulate food related organisms, (2) Food hygiene and sanitation, and (3) Current issues in public health and safety of our food and drinking water supply.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: FOSC 3080.03

EXCLUSIONS: FOSC 4090.03

FOSC 4250 Food Product Development Project

CREDIT HOURS: 3

The objective of this course is to provide the student with experience in the application of food product development techniques. The student will be expected to develop a novel food product from initial stages through to pilot plant trials and shelf life evaluation. A final report and presentation will be required.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: FOSC 4030.03

EXCLUSIONS: FOSC 4750.03

FOSC 4500X/Y Seminar in Food Science

CREDIT HOURS: 3

The objective of this course is to allow the student to gain experience in verbal and written presentation of selected food science topics. Students will be encouraged to select topics which reflect their academic and food industry experience. Oral presentations and written reports will be required.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 1

COREQUISITE: FOSC 4750X/Y.06 or FOSC 4250.03

FOSC 4750X/Y Food Science Research Project

CREDIT HOURS: 6

The objective of this course is to provide experience in the application of Food Science principles to an academic or industrial research question or problem. The project will be chosen in conjunction with a supervising faculty member. The student will then devise and follow a work plan and write a project report. A critical statistical evaluation of the findings are an inherent part of this course.

NOTES: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: FOSC 3010.03, FOSC 3020.03, FOSC 3030.03, FOSC 3070.03, FOSC 3080.03

EXCLUSIONS: FOSC 4250.03

Course Descriptions - Materials Engineering Series

MATL 3500 Materials Engineering

CREDIT HOURS: 3

This course correlates properties of engineering materials with their structure. Laboratory objectives include preparation of reports in publication format and illustration of lecture material. Basic concepts of crystallography, chemical bonding and binary phase diagrams are introduced. These are used to describe properties of metallic and nonmetallic materials and how these may be controlled by engineers. Materials discussed include ferrous and nonferrous metals and alloys, ceramics, composites and semiconductors.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

MATL 3510 Extraction of Materials

CREDIT HOURS: 3

The lecture portion of this course covers the fundamental principles involved in the high temperature extraction of materials from their ores. Included are descriptions of the equipment used in unit operations such as roasting, smelting and refining and the application of these operations to the production of iron and steel and the more common nonferrous metals. The laboratory portion of this course consists of practice in stoichiometric mass balance and thermochemical calculations of common pyrometallurgical processes for extracting materials.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

MATL 3520 Structure of Materials

CREDIT HOURS: 3

This course presents the following topics: the electronic structure of materials, fundamentals of crystallography, electron motion in the space lattice, introduction to composites, X-ray diffraction and X-ray diffraction techniques, and the crystal structure of crystalline materials. Typical binary phase diagrams are discussed from the structural point of view. Laboratory experiments include preparation and evaluation of X-ray films and diffractometer charts, structural investigation of binary alloys, and crystallite size structure.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2
LAB HOURS PER WEEK: 3
EXCLUSIONS: MATL 3601.03

MATL 3600 Mechanical and Physical Behaviour of Materials

CREDIT HOURS: 3

This course is designed to give students a fundamental understanding of how materials deform and the mechanisms that can be engineered within the atomic structure so as to alter this behaviour. Core topics include basic crystallography, dislocation theory, strengthening mechanisms (dislocations, dispersoids, precipitation hardening, and ceramic reinforcements), and mechanical testing. For the latter, specific emphasis is placed on the techniques of tensile, creep, and fatigue testing.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

EXCLUSIONS: Students that have passed MATL 3620.03 and MATL 3621.03 can not register for this course.

MATL 4700 Materials Design Project I

CREDIT HOURS: 3

The course objective is to provide experience in the application of engineering principles to the solution of a specific problem in Materials Engineering. A research project is chosen in collaboration with a particular faculty member. The student then prepares a work plan, carries out a literature search, designs experimental setup as needed, and arranges for the acquisition of necessary equipment. The student conducts the planned research work, analyses the data obtained and critically evaluates the findings. Oral progress reports are required. A written report and an oral presentation are required at the end of the term.

FORMAT: Lab

LAB HOURS PER WEEK: 6

PREREQUISITE: MATL 3500.03

EXCLUSIONS: MATL 4704.03/4804.03

MATL 4710 Ferrous Alloys and Joining of Materials

CREDIT HOURS: 3

The course reviews the iron-carbon system, including the transformation products of austenite, alloying elements and combined thermo-mechanical treatments. Specific classes of steels, ranging from the simple plain carbon steels to the duplex stainless steels, are considered. The course also discusses the fusion welding of a representative selection of steels. Fusion welding process variables are studied together with the metallurgy of the weld metal and the heat-affected zone.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: MATL 3500.03

EXCLUSIONS: MATL 4722.03

MATL 4720 Industrial Processing of Materials

CREDIT HOURS: 3

The fundamentals of metal working in relation to rolling, forging, extrusion, and drawing are studied. In each scenario the physical and mechanical metallurgy principals involved are considered as in the role of tribology. Case studies for a variety of alloys are considered. Hands-on laboratory experiments are included to reinforce key topics.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: MATL 3500

EXCLUSIONS: MATL 4824.03

MATL 4800 Materials Design Project II

CREDIT HOURS: 3

The objective of this course is to provide experience in the design of materials to the solution of a specific problem. A research design project is chosen in collaboration with a particular faculty member. The student then prepares a work plan, carries out a literature search, and designs an experimental setup. The student conducts the planned research, analyses the data and critically evaluates the results. Students communicate their findings through written reports and an oral talk at the end of the term.

FORMAT: Lab

LAB HOURS PER WEEK: 6

PREREQUISITE: MATL 3500.03 and (MATL 4700.03 or MATL 4704.03)

MATL 4805 Electrochemical Processing of Materials

CREDIT HOURS: 3

The course discusses principles of electrochemistry and electrochemical engineering as they apply to the design of processes for the production of materials. The theory and application of various electrochemical techniques such as electroplating, electroforming, electromachining, electrefining, and fused-salt electrolysis are included. A brief overview on the development of electrochemical sensors and devices using solid state electrolytes is presented. Surface modification by electrochemical means is also discussed.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

CROSS-LISTING: MATL 6805.03

MATL 4806 Particulates in Materials Engineering

CREDIT HOURS: 3

The course covers the preparation, characterization, physical and chemical properties and processing of powders in materials processing including agglomeration, gas-solid reactions, sintering and hot pressing.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2
LAB HOURS PER WEEK: 3
CROSS-LISTING: MATL 6806.03

MATL 4810 Materials Process Design

CREDIT HOURS: 3

This course focuses on the design of new metallurgical plants, processes and products based on knowledge acquired in previous core courses. Material and heat balances, metal economics, design and optimization aspects are covered. Groups of students undertake design projects aiming at modernization of existing plants or establishing new plants operating on new technology. Emphasis is placed on process selection and economic evaluation, detailed design of process equipment, sizing, costing and optimizing the processing units.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: MATL 3500.03, MATL 4710.03

EXCLUSIONS: MATL 4802.03

MATL 4813 Iron and Steel Production

CREDIT HOURS: 3

This course discusses factors affecting the global iron and steel industry with particular reference to Canadian participation. These factors include the supply of raw materials, new technology, environmental concerns and economics. The future of any metallurgical industry is influenced by many concerns, not all of which are technical.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: MATL 3510.03

MATL 4817 Metallurgical Processing

CREDIT HOURS: 3

This course covers the principal practices related to metallurgical processing and the marketing of metals, including modification of concentrates (sintering, pelletizing, briquetting). Descriptive outlines of metallurgical processes such as iron and steel, lead, aluminum and zinc production are presented, along with utilization of fuels for metallurgical purposes (coal, coke, oil).

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

MATL 4820 Non-Metallic Materials

CREDIT HOURS: 3

This course includes a description of the chemical and structural characteristics of various common non-metallic materials as well as manufacturing methods. A number of applications for such materials are considered including glass, composites, refractors, solid electrolytes and electronic materials. The chemistry of multi-component systems are also discussed. The laboratory experiments are designed to illustrate the lecture material.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 2

EXCLUSIONS: MATL 4703.03

MATL 4825 Solidification and Casting

CREDIT HOURS: 3

The fundamental principles of solidification and practical applications in the casting industry are dealt within this course. The topics covered are nucleation processes, the growth of single crystals, plane front, cellular and dendritic solidification in single and polyphase alloys, solidification of castings, ingot moulding and core making processes, moulding sands, design of risers and gates, and the melting of metals. The laboratory experiments cover the growth of single crystals of pure metals, alloys, and semiconductors; pattern, mould and core making; and, the casting of commercial alloys.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: MATL 3500.03, PEAS 3600.03

MATL 4826 Physical Metallurgy and Ceramics

CREDIT HOURS: 3

The first portion of this course covers the physical metallurgy, properties and uses of the principle industrial alloys. The remainder of the course deals with the structure of important ceramic materials such as glass, porcelain and refractors, their properties, and the processing and applications of ceramics. The laboratory experiments will illustrate the principles discussed in the lectures.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

MATL 4830 Non-Ferrous Alloys

CREDIT HOURS: 3

The objective of this course is to introduce students to the structure, properties, and processing of different types of non-ferrous alloys. Alloys of principal interest include those that are premixed on aluminum, copper, nickel, and titanium. Select applications for these industrially-important material are also reviewed.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: MATL 3500.03

EXCLUSIONS: MATL 4823.03

MATL 4840 Corrosion and Degradation of Materials

CREDIT HOURS: 3

This course introduces the students to the basic theory of corrosion as well as the basic principles of hydrometallurgy. Students will also be introduced to the different types of corrosion and the practices of corrosion prevention and remediation.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: MATL 3500.03 and (MATL 3612.03 or PEAS 3500.03)

EXCLUSIONS: Students that have passed MATL 3611.03 can not register for this course.

Course Descriptions - Process Engineering Series

PEAS 2201 Fundamentals of Process Engineering

CREDIT HOURS: 3

The main objective of this course is to develop the student's ability to perform mass and energy balances on non-reactive and reactive processes. Introductory topics include systems of units and a study of process variables such as temperature, pressure and flow rate. Also covered are fundamental properties of multiphase systems, including phase equilibrium, vapour pressure, and Raoult's and Henry's Laws. Emphasis is placed on developing problem solving skills and adopting a consistent approach to the analysis of process systems.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENGI 2102.03

PEAS 2202 Fundamentals of Environmental Engineering

CREDIT HOURS: 3

The course will focus on sources of environmental pollutants, the effects of pollutants on living and non-living systems, and the processes by which pollutants are generated or by which their effects can be minimized or remediated. Lectures are supplemented by tutorials which include guest speakers, case studies and field trips.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: CHEM 1021.03 and CHEM 1022.03

PEAS 2203 Organic Chemistry for Process Engineers

CREDIT HOURS: 3

Students will first develop an understanding of structure and bonding in organic compounds. With this background, the chemical and physical properties of the major functional groups will be introduced, with a focus on applications relevant to process engineers. Specifically, the synthesis and chemical reactions of commercially important molecules will be highlighted. Physical separations (i.e., distillation, crystallization) used in organic synthesis and spectroscopic methods of analysis will also be described.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: CHEM 1021.03 and CHEM 1022.03

PEAS 3500 Process Thermodynamics

CREDIT HOURS: 3

The course covers the application of thermodynamic concepts such as entropy, enthalpy, free energy, activities and phase diagram relations, for pure substances and solutions (aqueous and molten) in biological, chemical and materials processing systems. The application of computer programs to the analysis of thermodynamics in chemical reactive systems is demonstrated. Problem solving sessions are used to illustrate the applications of these concepts in processing.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

TUTORIAL HOURS PER WEEK: 3

PEAS 3600 Transport Phenomena

CREDIT HOURS: 3

This course covers the physical, chemical and thermal factors affecting the mechanisms of heat and mass transfer in biological, chemical and materials processing systems. The principles of physical and mathematical modeling are demonstrated in real applications in the fields of biological, chemical and materials engineering. Problem solving sessions to illustrate the application of the above concepts to processing are given.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

TUTORIAL HOURS PER WEEK: 3

PEAS 3700 Law and Ethics in Process Engineering

CREDIT HOURS: 3

This course will provide students with the legal and ethical framework for the practice of engineering. The section on ethics will introduce ethical theories and demonstrate how these theories are embodied in various engineering codes of ethics. It will also show how these theories, as well as the codes of ethics, can be used to address real ethical dilemmas that can arise in the practice of engineering. Cases studies will be used extensively to guide the students through this. The course will also introduce the subject of law in its relation to the practice of engineering. It will cover the basics of what the students should know about contract law, professional liability and tort law, and intellectual property law. Because the students will be required to submit a good number of written assignments, the first third of the course will focus on improving their writing skills.

Faculty of Health Professions

Location:

Building/Room: Burbidge Building
Street Address 1: 5968 College Street
Street Address 2: 3rd Floor
P.O. Box: 15000
Halifax, NS B3H 4R2
Telephone: (902) 494-3327
Fax: (902) 494-1966
Website: www.dal.ca/faculty/healthprofessions.html
Email Address: fhp@dal.ca

Introduction

The Faculty of Health Professions consists of the School of Health and Human Performance, School of Health Administration, School of Human Communication Disorders, School of Social Work, School of Nursing, School of Occupational Therapy, School of Physiotherapy, College of Pharmacy, and the School of Health Sciences. The various undergraduate programs are described in the College, School, and other program sections of this Calendar. Details of the graduate programs in the Clinical Vision Science program and offered in the Schools are described in the Calendar of the Faculty of Graduate Studies.

In addition to the policies listed, please refer to the following other student related policies at <http://healthprofessions.dal.ca>:

- Allegation of Professional Unsuitability Policy
- FHP Immunization Policy
- Occupational Health and Infectious Diseases: Pre-clinical Placement Requirements for Health Care Worker Students
- Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability
- Guidelines for Personal Safety in Fieldwork Placements

Policy Statement on Affirmative Action

The Faculty of Health Professions recognizes that Affirmative Action is required to increase the admission of and number of graduates from underrepresented groups; Aboriginal peoples, African Canadians and Persons with (dis)Abilities. The constituent Units of the Faculty will develop and implement Affirmative Action policies that are consistent with the Human Rights Commission.

As a matter of priority, the Faculty will develop strategies to identify and create recruitment and support systems that will encourage and support members of these underrepresented groups to apply to and graduate from the Faculty of Health Professions

Policy Statement on Interprofessional Health Education

Students in the Faculties of Dentistry, Health Professions and Medicine are required to participate in interprofessional health education activities. These activities, together with specific program requirements, are currently evolving and in transition and are integrated into the curricula of individual programs. Participation is mandatory. The objective of interprofessional education in the Faculty of Health Professions include developing:

- knowledge and understanding of, and respect for, the expertise, roles and values of other health and human service professionals.
- understanding the concept and practice of patient/client/family-centred care.
- effective communication, teamwork and leadership skills applied in interprofessional contexts.
- positive attitudes related to the value of collaboration and teamwork in health and human service contexts.
- an understanding, from a multi-disciplinary perspective, of the Canadian health and social systems, the legal and regulatory foundation of professional practice, how health and human service institutions are organized and operate, and how different health and human service professions contribute to the systems and institutions.

Students in the entry-to-practice programs in the Faculty of Health Professions, are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions Interprofessional Health Education) for the duration of their studies. Successful completion of this course is a requirement for graduation in these programs, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration; to be presented by the Faculty of Health Professions. For more information, students should contact their specific school/college.

Statement Regarding Criminal Records Check

The Faculty of Health Professions of Dalhousie University does not require a Criminal Records Check or other screening procedure (e.g., Vulnerable Sector Screen) as a condition of admission into its programs. However, **students should be aware that such record checks or other screening procedures may be required by facilities outside the University used for clinical, fieldwork or co-op placements or experiences related to an academic class assignment, which, in some instances, may be a requirement for graduation.** It is the student's responsibility to have such procedures completed.

Such facilities may refuse to accept students on the basis of information contained in the record check or other screening procedures. If the student is unable to complete a clinical requirement due to a failure to meet the record check or screening requirements of the facility, or if the student is refused access to the facility on the basis of the information provided, such a student may fail the class, and as a result, in some instances, may not be eligible for progression or graduation.

Students should check with their School/College for details concerning any record checks or screening requirements relevant to clinical, fieldwork, or placements in their particular program. Note that facility requirements may change from time to time and are beyond the control of the University.

Students should also be aware that some professional regulatory bodies may require a satisfactory record check as a condition of professional licensure.

Practicum/Fieldwork Placements Outside Halifax

Students enrolled in programs of study in the Faculty of Health Professions (Health Sciences, Nursing, Health and Human Performance, Social Work and Pharmacy) are advised that they may have to do some or all of their required clinical education/fieldwork at sites outside Halifax, and hence may have to incur additional personal expenses for travel and temporary accommodation.

In some situations, sites may require a payment to the site for support of clinical education/fieldwork supervision, and some sites may require separate disability insurance in lieu of eligibility for Worker Compensation coverage. Such costs are the responsibility of the student.

Student Disclosure of Health Information

Faculty of Health Professions

Students registered in this Faculty are encouraged to inform both the School/College and the field work learning sites if they have a health concern that has the potential to compromise client, student and/or agency personnel safety and/or has the potential for limiting their ability to learn and perform their role as learner.

For the purposes of this policy, the term health concern refers to any cognitive, affective, and/or physical health problem, injury, or condition that may place the student and/or others at risk and/or inhibit the student's learning ability and performance.

Guidelines for Disclosure

The student has the right to decide if disclosure of health information is appropriate. The method, timing, and extent of the disclosure is at the student's discretion (for consultation options, see below). Early disclosure of the following information regarding the health concern may be helpful to students in the academic and/or field work sites.

To disclose this information:

1. Clearly describe the nature of the health concern and the potential limitations with regard to the learning tasks expected in either the academic or field work site. Appropriate verification of the information may be required.
2. List any adaptations, modifications, and/or safety procedures that may be required in planning the student's learning experiences in either setting.
3. Provide clear and appropriate advice regarding the management of this health concern.

If the disclosure of health information in field work and/or academic sites produces difficulties, students are encouraged to report these difficulties immediately to the appropriate person(s) within both the field work site and/or within their educational program (see below). Discrimination in any form will not be tolerated.

Students are advised to make the initial contact with the person with whom they are most comfortable from the lists below. These individuals would be available for consultation/advocacy:

- Academic /faculty advisor
- Field work coordinator(s)
- Director of the School or College where student is enrolled
- Dean of the Faculty of Health Professions

- Advisor to Students with Disabilities, Dalhousie University
- Dalhousie/King's Association of Students with Disabilities
- Human Rights Commission

College of Pharmacy

- Preceptor
- Site coordinator
- Externship administrator

School of Nursing

- Clinical instructor
- Class professor
- Associate Director, Undergraduate Student Affairs
- Nurse Practitioner/Arctic Nursing Program Coordinator

School of Occupational Therapy

- Preceptor
- Field site director
- Provincial or Atlantic Region fieldwork education coordinators

School of Physiotherapy

- Clinical supervisor
- Facility clinical coordinator
- Provincial coordinator

School of Social Work

- Agency field instructor
- Program coordinator
- Faculty field instructor

School of Health Administration

- Preceptor

School of Human Communication Disorders

- Clinical Educator

School of Health and Human Performance

- Student Services Administrator

QEII - Dalhousie School of Health Sciences

- Clinical Education Coordinator

Fax: (902) 494-3025

Website: www.dal.ca/occupationaltherapy

Email Address: disability.management@dal.ca

The School of Occupational Therapy offers a Certificate in Disability Management (CDM) Program specifically designed to educate and engage students in the elements of disability management. Disability management team members provide effective, efficient and safe co-ordination of services needed to help injured or ill individuals achieve their maximum level of functioning, and facilitate their ability to remain at or return to work. Graduates of the CDM Program will typically work as disability case managers, insurance case managers, return to work facilitators, vocational rehabilitation consultants, vocational counsellors, or employee wellness program administrators.

People in the field of disability management come from many different professional backgrounds such as education, human resources, kinesiology, nursing, occupational therapy, physiotherapy, and social work. More and more organizations are recognizing the important role that disability management can play, with benefits of an effective disability management program including reducing cost due to less work disruptions, enhanced employee morale and sense of belonging, as well as improved manpower consistency. Practical applications of disability management have been made in different sectors of occupational activity such as administrative, industrial, service provision, technical and business. With so many multi-faceted aspects characterizing the field of disability management, the Dalhousie program draws on many bodies of knowledge spanning theoretical and practical application.

Program Overview

The overall goal of the CDM Program is to educate individuals with integrated knowledge and skills necessary to provide quality disability management services, through recognizing and understanding the dynamic interaction between disability and work performance. Upon completion of the CDM Program, students will be able to demonstrate and apply skills and competencies in the areas of:

1. Foundations of Disability Management
2. Communication and Professional Relationships
3. Return to Work and Case Management
4. Policies, Ethics and Legal Issues

The CDM Program is made up of four academic undergraduate three credit hours courses that are taught completely online. These courses are normally taken as electives by students currently enrolled in an academic program at Dalhousie or another Canadian University. However, students not enrolled in a university program can pursue the CDM by applying as a Special Student Undergraduate. Any student interested in taking courses in the CDM Program must register through the Registrar's Office. Admission requirements vary based on previous education and the intended program of study at Dalhousie. The Registrar's Office can help guide students as to the eligibility for admission to specific Dalhousie programs.

Regulations

Students registered in the courses of the Disability Management Certificate Program (CDM) are bound by the University and Faculty regulations in the same manner as all Dalhousie students. The University and Faculty of Health Professions (FHP) regulations are found in the University Regulations section of the Dalhousie University Calendar. Academic regulations are found in the Academic Regulations section of the Calendar. It is the responsibility of each CDM student to become familiar with both the University and FHP regulations.

Please make note of the "Acceptable Use Policy" found in the University Regulations section of the Dalhousie Calendar. Because of the distance learning component of this Program, students should pay particular attention to regulations designed to respect the rights of other computer users.

Course Grades

The minimum passing grade for all of the CDM courses is 50%. A course may be repeated only once, with a maximum of two repeated courses permitted. A student who fails the same course twice will not be awarded the Certificate.

Appeals

On occasion, conflict or disagreement on final grades or evaluative procedures may arise. All students are expected to familiarize themselves with the processes available to them for academic appeals. Timeliness is of the essence for presentation and consideration of all appeals and, in all instances, the first level of appeal will be at the informal level.

Formal appeals of a final grade or a procedural problem must follow the regulations as stated in the University Calendar and such appeals will only be considered after failure to resolve the issue at the informal level has occurred. Students who do not follow these procedures will automatically forfeit their right to further consideration of their appeal and the original decision will remain in effect.

Informal Process

For each instance, the student and instructor, with guidance for the CDM Academic Director, are expected to attempt to resolve the matter informally within 15 days of the matter giving rise to the appeal.

Formal Process

If the matter cannot be resolved informally, the student may initiate a formal appeal by following the procedures set down in the University Calendar (see Regulation 16.7 of the Academic Regulations section for appeals of grades, and the Academic Regulations section for the Faculty of Health Professions appeals process).

Note that both the Dalhousie University Calendar and the Faculty of Health Professions policies appear on the Dalhousie University website.

Certificate Completion

Upon completion of all four courses of the Certificate in Disability Management Program, students submit the Request for Certificate form to the office of the Certificate in Disability Management Program. Once the Request form has been processed and approved, the Certificate is granted to the student. This Certificate is not awarded at Convocation.

To obtain the Request for Certificate form please refer to the Disability Management Program and click on [Certificate Overview](#).

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology

level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

DISM 3010 Introduction to Disability and Disability Management

CREDIT HOURS: 3

This course provides an overview of Disability Management theories, terminology and processes. Particular emphasis is on introduction to the practice of Disability Management, comprehending the relationship between occupation and disability, and, understanding the dynamic impact of disability on return to work.

CROSS-LISTING: KINE 3010.03

DISM 4010 Case Management and Return-to-Work

CREDIT HOURS: 3

This course will focus on the return-to-work process, with emphasis on the components of Disability Management that are critical for successful return-to-work outcomes. Appraisal of case management strategies, vocational rehabilitation, and ethical and legal implications of the return-to-work process will be highlighted.

PREREQUISITE: DISM 3010.03

DISM 4040 Understanding the Relationship between Health and Work

CREDIT HOURS: 3

This course will distinguish issues that span the continuum of health and work performance, and examine the complex interaction between health conditions and ability and/or capacity to work. Concepts presented will include acute illness and injury, chronic health conditions, and workplace health promotion and prevention.

PREREQUISITE: DISM 3010.03

DISM 4050 Communication and Professional Relationships in Disability Management

CREDIT HOURS: 3

This course identifies and analyzes key components that are part of the Disability Management communication toolkit. Application of strategies to enhance the professional relationships frequently encountered in the Disability Management process will be emphasized.

PREREQUISITE: DISM 3010

Health Administration

Diploma in Health Services Administration (DHSA)

The Diploma in Health Services Administration (DHSA) program is designed to prepare students for a career in healthcare at the managerial level. It meets the needs of students interested in health services administration and of those currently employed in the healthcare sector in a managerial capacity, particularly, middle managers in medium and large institutions, administrators in small facilities, and employees in community health, long-term care, primary care, multi-service centres, and community health boards.

The program provides a conceptual background for the increasingly complex managerial tasks performed in health institutions, agencies, and health-related government departments. Every effort is made to balance political, social, economic, cultural, medical, and ethical approaches to understanding the healthcare delivery system with those of the management sciences.

All students must observe the University and Academic Regulations described in the calendar.

Students may complete the DHSA on a full-time or part-time basis.

The program is conducted through the Internet and Web-based conferencing with a learning platform called BbLearn. BbLearn is a distance education course management system. It provides a learning environment where students direct their learning. BbLearn consists of a suite of tools which provide mechanisms for interactive exercises, such as group discussions, presentations, and information sharing.

NOTE: Courses offered through the online format are assessed a per course Distance Education Fee (DEF) in addition to the course-based tuition.

Application Procedure

Applicants must meet the Dalhousie University undergraduate admission requirements to warrant consideration into this program. Applicants require university preparation (you may not apply from high school). In addition to transcripts, students are required to submit a current resume and at least one letter of reference with their application to the Diploma program.

Applications should be submitted as early as possible, and not later than July 1 for September admission, November 15th for January admission and March 15 for May admission.

Students may be considered for advanced placement if they have completed courses equivalent to the required or elective courses. Application for advanced placement must be made in writing after an applicant has been accepted to the program.

Further information on the Diploma in Health Services Administration program may be obtained from:

School of Health Administration
Dalhousie University
5161 George Street, Suite 700
PO Box 15000
Halifax, NS B3H 4R2

Application forms are available online at www.dal.ca/admissions/apply.html

Curriculum

The one-year program features both an academic and outcome-oriented curriculum. Students accepted into the DHSA program take the following half-credit courses:

Fall term

- HESA 4000.03: Canadian Healthcare Delivery System
- HESA 4002.03: Health Human Resource Management
- HESA 4003.03: Quality Management
- HESA 4004.03: Healthcare Planning
- HLTH 4040.03: Health Law for Non-Lawyers

Winter term

- HESA 4001.03: Management Roles and Competencies
- HESA 4005.03: Healthcare Financial Management
- HESA 4200.03: Epidemiology for Managers
- HESA 4400.03: Introduction to Healthcare Economics

Summer term

- three credit hours as approved by the School

Diploma in Emergency Health Services Management (DEHSM)

The School of Health Administration offers an undergraduate diploma program in Emergency Health Services Management. The program meets the need for an educational program for students interested in emergency health services management and for mid-career managers working in the Emergency Health Services systems in Canada. The academic objectives of the program are to provide education in emergency health services management for potential managers of large and small emergency health services organizations, and to provide access to further education in Health Services Administration and Emergency Health Services for such individuals.

The program is designed for professionals working in emergency and/or first responder settings.

The program is conducted through the Internet and Web-based conferencing with a learning platform called BbLearn. BbLearn is a distance education course management system. It provides a learning environment where students direct their learning. BbLearn consists of a suite of tools which provide mechanisms for interactive exercises, such as group discussions, presentations, and information sharing.

NOTE: Courses offered through the online format are assessed a per course Distance Education Fee (DEF) in addition to the course-based tuition.

A. Application Procedure

Applicants must meet the university's undergraduate admission requirements to be considered for admission into the program. Applicants require university preparation (you may not apply from high school). Prospective students should submit a letter outlining their work experience and other activities with their application, fee and high school transcripts. In addition, students are required to submit a current resume and at least one letter of reference with their application to the diploma program.

Students may be considered for advanced placement if they have completed courses equivalent to the required or elective courses. Application for advanced placement must be made in writing after an applicant has been accepted to the program.

Further information on the Diploma in Emergency Health Management program may be obtained from:

School of Health Administration, Dalhousie University
5161 George Street, Suite 700
PO Box 15000
Halifax, NS B3H 4R2

Application forms are available online at <http://www.dal.ca/admissions/apply.html>. Deadline for September admission is July 1, November 15 for January admission and March 15 for May admission.

B. Curriculum

Fall term

- HESA 4000.03: Canadian Healthcare Delivery System
- HESA 4010.03: Management Process and Human Resource Issues in EHS
- HESA 4004.03: Healthcare Planning
- HESA 4020.03: Quality Improvement in EHS
- HLTH 4040.03: Health Law for Non-Lawyers

Winter term

- HESA 4005.03: Healthcare Financial Management
- HESA 4200.03: Epidemiology for Managers
- HESA 4400.03: Introduction to Healthcare Economics

Summer term

- HESA 4030.03: EHS System Design
- HESA 4040.03: Principles of Community-Based EHS

Course Descriptions

HESA 4000 Canadian Healthcare Delivery System

CREDIT HOURS: 3

The course is designed to provide an overview of healthcare in Canada, and more specifically in Nova Scotia, where the health reform process will be addressed. Aimed specifically at supervisors, middle management, and administrators the existing trends in healthcare from a national and provincial perspective will be reviewed. The goal of this course is to provide the student with a snapshot view of the existing healthcare system, its past development, and future direction.

CROSS-LISTING: CANA 4300.00

HESA 4001 Management Roles and Competencies

CREDIT HOURS: 3

This course seeks to help students to examine what managers do to add value to their organizations. As a starting point we will briefly explore the evolution of management theories, comparing the founding theories with more recent literature. We will also examine the role of managers in public organizations such as hospitals. Finally, we will examine specific skills and duties of healthcare managers including: leadership, power, motivation, decision making, communication, teamwork, conflict resolution, organizational change, and others. Learning is facilitated through a mix of individual study and group discussions, and direct feedback from the instructor.

HESA 4002 Health Human Resource Management

CREDIT HOURS: 3

This course will provide the student with a working knowledge of the day to day operational management of human resources. The course will focus on the requirements of a manager to mentor, lead and manage the organization's human resources. The interaction and interdependencies between the manager and the human resource department will be examined. Topics include labor management relations; human rights and labor related legislation; recruitment and selection; performance development and management; professional development and training; compensation related issues; collective bargaining and dealing with special employment related issues. Approved with Canadian Studies.

CROSS-LISTING: HESA 4010.03

HESA 4003 Quality Management

CREDIT HOURS: 3

This course will provide an introduction to the concept of quality improvement. Students will be exposed to the various methods to measure and assess quality in healthcare and be provided exposure with tools and techniques utilized in practice. A focus on safety and risk, patient satisfaction, team leadership as well as accreditation will be undertaken to ensure students gain practical understanding of the drivers of quality in Canadian healthcare. Approved with Canadian Studies.

CROSS-LISTING: HESA 4020.03

HESA 4004 Healthcare Planning

CREDIT HOURS: 3

This course will use lectures, readings and case discussion to explore issues and methods related to health planning and evaluation. Emphasis will be placed on learning how to apply theory to practice at the system, organization, and service levels.

HESA 4005 Healthcare Financial Management

CREDIT HOURS: 3

This course will introduce the student to financial management concepts. The key concepts of financial resource management will be explored with particular emphasis on implementation in the healthcare sector. Introduction of the basic components will enable the student to understand the concepts within the larger framework of strategic and organizational resource planning and utilization. Topics covered include preparing, managing, and evaluating department budgets, payment systems, and fiscal accountability.

HESA 4010 Management Process and Human Resource Issues in EHS

CREDIT HOURS: 3

The course is designed to develop skills in the eight core management processes required to effectively manage an EHS operation. The core management skills taught in this course include: Interpersonal Communications and Coaching, Building Effective Teams, Monitoring and Managing Performance, Project Management, Leading Others, productivity Improvement, Influencing and Negotiating with Others, and Managing Innovation and Change. The overall aim of this course is to provide EHS practitioners with the skills required to manage people effectively. The course has two principle goals: provide EHS practitioners with the management and human resource skills necessary to manage effectively in their own work environment, and introduce EHS practitioners to innovations in EHS systems design and management practices.

CROSS-LISTING: HESA 4002.03

HESA 4020 Quality Improvement in EHS

CREDIT HOURS: 3

The objectives of this course are to (1) lead EHS managers through a step by step process to design, plan, implement, monitor and evaluate a continuous quality improvement initiatives, (2) link continuous quality improvement principles to the concepts and practices of Higher Performance Systems (HPS), (3) apply the principles, practices and tools of continuous quality improvement to an EHS operation, and (4) create a team based continuous quality improvement environment. Participants will be introduced to and will apply the concepts of healthcare improvement teams throughout the course.

CROSS-LISTING: HESA 4003.03

HESA 4030 EHS System Design

CREDIT HOURS: 3

The advent of the high performance EHS system makes it evident that it is possible to "do more with less", however, that possibility requires sensible design tempered by the political realities of the services area. It also requires the use of CQI practices to modify the design and ever vigilant system status management to maintain high performance. This course will consider first the public policy issues that bear upon EHS system design. This course will consider first the structure issues, both external and internal, that bear upon EHS system design. Then the course will consider the different designs originated from organizational theory. In the second half of the course the various system components will be presented. Finally, the course will consider disaster management of EHS systems. The objectives of this course are: (1) provide managers and management-bound students a broad perspective of the process of providing EHS services, (2) identify the scope of factors that influence, create and alter the design of EHS systems, (3) provide a foundation for system evaluation, and (4) challenge students to anticipate the factors that will affect system design when disaster strikes.

HESA 4040 Principles of Community-Based EHS

CREDIT HOURS: 3

Emergency Health Service (EHS) systems face challenging environments. However, strategies can be developed that go beyond merely reacting to what occurs in the environment. This course presents public relations planning so that a disaster or even a scandal can be turned into an opportunity. In addition, the course offers a basic understanding of marketing strategies that can help offset market pressures and demands. The objectives of the course are: (1) appreciate how marketing strategies vary when designed for the public good or a public service, (2) develop a marketing plan specific to the student's emergency health service system, (3) develop and evaluate an emergency health services public relations plan, and (4) facilitate a collaborative activity between the student's emergency health organization and some of its stakeholders.

HESA 4200 Epidemiology for Managers

CREDIT HOURS: 3

This course is a general, introductory course in the principles of epidemiology. Discussion will concentrate on the occurrence of disease and injuries in human populations, examine methods of determining the causes of illness and death, and analyze conclusions which have been gained through the application of epidemiological studies.

HESA 4400 Introduction to Healthcare Economics

CREDIT HOURS: 3

This course is an introduction to economic issues in the Canadian Health Care System. The purpose of this course is to provide students with economic tools with which to examine issues affecting the Canadian health system. Specific topics to be examined include: the supply of, and demand for, healthcare; investment appraisal; healthcare systems and markets; health insurance schemes; rationing healthcare services; human resource planning; health technology assessment; and, outcome measurement and evaluation.

Introduction

Purposes of the School

The School's mission is to develop professionals and scholars who can generate, disseminate and apply knowledge to advance health and human performance. We do this by offering undergraduate and graduate programs as well as by conducting research in health promotion, kinesiology and recreation/leisure studies.

Limited Enrolment

All programs offered by the School of Health and Human Performance have enrolment limits.

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900.00 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. **Please register in IPHE 4900.00 (section 2).** Successful completion is a requirement for graduation, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

Affirmative Action Admission Policy

Purpose of the Policy

This policy is intended to create opportunities for the admission of under-represented African Canadians, Aboriginal peoples, and persons with disabilities, in the School of Health and Human Performance.

Eligibility

Persons eligible to be considered under this policy must self-identify as African Canadian, Aboriginal, or a person with a disability. Although the School of Health and Human Performance is committed to supporting eligible students from across Canada, preference will be given to those who are a resident of Atlantic Canada or who have a parent residing in Atlantic Canada at the time of application.

Consideration for admission under this policy is optional. Applicants wishing to be considered under this policy must identify on the undergraduate application form.

Requirements

To be considered for admission under this policy, the following criteria must be met:

1. Those applying directly from high school must have attained a minimum grade of 65% in each of the prerequisites listed for the program of choice. Transfer students (i.e., individuals having completed post secondary courses) must have achieved a minimum overall GPA of 2.3 (C+).
2. The applicant would otherwise not have been admitted through the regular admission process.
3. The application and a written statement outlining his/her motivation for applying must be submitted to the Registrar's Office no later than March 15.

Support Services

Once admitted to the School, students wishing to access the following support services must identify their need to the Student Services Administrator, or the course professor.

School of Health and Human Performance:

1. The Student Services Administrator will meet regularly with students to assist with advising, administrative needs, and other concerns.
2. Faculty members will facilitate extra support or instruction for their course content if necessary.
3. Faculty members who are members of the designated groups, or who are closely affiliated with those groups, will be asked to provide academic mentorship if required.
4. Faculty whose office is in a building that might be inaccessible to students with a physical disability will arrange an alternative, more accessible, space for meeting with those students.

Dalhousie University offers a variety of services to students

For further information go to www.dal.ca/campus_life/student_services.html

School of Health and Human Performance Regulations

1. All students must observe the University and Academic Regulations described in this Calendar.

2. Attendance

All students must attend the classes of their prescribed course regularly and punctually. When the work of a student becomes unsatisfactory or attendance is irregular, the student may be required to discontinue the course concerned.

3. Workload

The maximum course load for any fall or winter term is 15 credit hours (five half-credits) and during spring and summer terms, the maximum course load for each is 6 credit hours. Students wishing to exceed the maximum course load must receive permission from the academic advisor within the School. Permission will not normally be granted to any student in his or her first year of study or to any student who does not have a cumulative GPA of 3.00 or above. Other requests based on extenuating circumstances will be considered.

4. Grade Point Average Requirements

The grade point average system is described in the Academic Regulations.

5. Supplemental Examinations

The School of Health and Human Performance does not offer supplemental examinations in any of its programs.

6. Academic Appeals Procedures

A student wishing to appeal a decision based on School regulations should in the first instance attempt to resolve the issue with the instructor(s) concerned before proceeding as per School Appeal Procedures, See Academic Regulation 24.6.

6.a School Committee on Undergraduate Student Appeals

A School-wide Committee on Undergraduate Student Appeals exists for the purpose of hearing initial student appeals of academic decisions.

The student appellant is responsible for the preparation of all documentation in support of his/her appeal.

The student must submit the appeal to the Chair, Committee on Undergraduate Student Appeals.

The student has the right to appear before the Committee on Undergraduate Student Appeals and he/she should notify the Chair of his/her desire to do so. The student also has the right to be represented by an advocate of his/her choice.

The decision of the Committee on Undergraduate Student Appeals shall be conveyed to the student, in writing, by the Chair, Committee on Undergraduate Student Appeals within three working days after the conclusion of the appeal. If the student's appeal is being denied, this notification should include information about procedures to appeal to the Committee on Undergraduate Student Appeals of the Faculty of Health Professions (see Academic Regulation 25.6). It should be noted that this appeal to the Faculty Committee on Undergraduate Student Appeals must be presented within 30 days of notification from the School of the disputed academic decision.

7. Student Advisory Programs

Although many courses are compulsory in the School's programs, considerable latitude exists for the development and extension of individual interests. To help in planning a total personal program each student is assigned to the Student Services Administrator. He/she can help students to select courses, avoid common pitfalls, interpret regulations, and solve various types of problems. Although students are responsible for their own programs and for maintaining high academic standards, they should consult their advisor regularly.

Degree Programs

The School offers the following programs:

- Interdisciplinary Health Studies Certificate
- BSc (Health Promotion)
- BSc (Health Promotion) with Honours*
- BSc (Kinesiology)
- BSc (Kinesiology) with Honours*
- BSc (Recreation)**
- BSc (Recreation)/Bachelor of Management***
- BSc (Recreation) with Honours*
- BSc (Recreation) with Honours*/Bachelor of Management***

* Application is made to the Honours Coordinator by November 15 for HPRO, Rec (TR) and April 1 for Kinesiology, of the student's third year. Rec (Mgmt) students apply by November 15 of their fourth year. Consult department for further information.

** The BSc (Recreation) is a degree in Therapeutic Recreation.

***This is a five-year combined degree in which the student will graduate with both a Bachelor of Science (Recreation) and Bachelor of Management degree.

NOTE 1: Students entering into any of the above degree programs from high school should refer to the Admission Requirements section of this calendar.

NOTE 2: Students who are transferring into any of the above degree programs with previous academic work will formulate a program of study with the Student Services Administrator, based on previous work and area of concentration. Students transferring into the BSc (Health Promotion), BSc (Recreation) and BSc (Recreation)/BManagement programs should note that the internship experiences required in the final year of these programs are normally only offered in the fall and winter terms.

School of Health and Human Performance Courses

The following courses are required for certain degree programs within the School. Please refer to the Required Courses section of the specific degree program of interest:

- | | | |
|---|--------------|---|
| • | HAHP 2000.03 | 3 |
| • | HAHP 3000.03 | 3 |
| • | HAHP 3100.03 | 3 |

HAHP Course Descriptions

- HAHP 2000.03: Human Growth and Development.
- HAHP 3000.03: Community Development.
- HAHP 3100.03: Introduction to Research Methods.

Dean

Webster, W. G., PhD

Director

McGinn, F., BRec (Dalhousie), MA (Western Michigan), PhD (Southern Illinois Univ. at Carbondale)

Professor Emeritus

Belzer Jr., E. G., BS (West Chester State Coll), MS (Maryland), PhD (Illinois)

Professors

Gahagan, J., BA (Carleton), BA Honours (Carleton), MA (Univ of Windsor), PhD (Wayne State Univ)
Jackson, L. A., BA, MA, PhD (Toronto)
Karabanow, J., BA (Hon), MA (McGill), PhD (Wilfred Laurier). Major appointment with Social Work.
Klein, R., BA (SUNY), MA, PhD (Oregon). Major appointment in the Department of Psychology.
Rehman, L. A., BHK, MA (UBC), PhD (Waterloo)
Singleton, J. F., BA (Waterloo), MS (Penn State), PhD (Maryland)
Westwood, D. A., BSc, MA, PhD (Waterloo)

Associate Professors

Hutchinson, S. L., BA (Victoria), MA (Dalhousie), PhD (Georgia)
Keats, M., BA (Calgary), MA (Alberta), PhD (Calgary)
Kirk, S., BSc Honours (Leeds Metropolitan Univ.), PhD (Univ. of Leeds)
Kozey, J. W., BSc, MSc (Waterloo), PhD (TUNS)
MacGregor, L. A., BPE (Dalhousie), MS (Illinois) McGinn, F., BRec (Dalhousie), MA (Western Michigan), PhD (Southern Illinois Univ. at Carbondale)
Robinson, L. M., BSc Honours 1st. class (UVIC), MA, PhD (Simon Fraser)

Assistant Professors

Barnes, L. J., BPE, MSc (Dalhousie)
Boe, S., BPhED (Brock), MSc, PhD, MPT (Western Ontario). Major appointment with School of Physiotherapy
Dechman, G., BSc (Physio) Honours, PhD (McGill). Major appointment with School of Physiotherapy
Dithurbide, L., BA (St. Mary's), MA (Brock), PhD (Michigan State)
Gallant, K., BSc (Hon) (Mt. A), BJourn (U of King's College), MSc, PhD (Waterloo)
Grandy, S., BSc, MSc, PhD (Dalhousie)
Kimmerly, D. S., BSc (Hons) (Univ. of Waterloo), MSc, PhD (Univ. of Western Ontario)
Kozey, C. L., BPE (UNB), MSc (Waterloo), PhD (Dalhousie). Major appointment with the School of Physiotherapy
Ladouceur, M., BSc, MSc (Sherbrooke), PhD (McGill)
MacKenzie, D., BPE (Saskatchewan), BScOT (Alberta), MA (MSVU). Major appointment with School of Occupational Therapy
Martin, D., BRec (MUN), MA, PhD (Dalhousie)
Meisner, B., BSc Hon (U of T), MSc, PhD (York)
Moreside, J., BSc (UBC), MHK (Windsor), PhD (Waterloo)
Neyedli, H., BSc (Dalhousie), MAsc, PhD (Toronto)
Rutherford, D., BSc (UWO), BScPhysio (Toronto), MSc, PhD (Dalhousie). Major appointment with School of Physiotherapy
Stone, M., BPHE, BSc (Queen's), MSc (Sask), PhD (Exeter)
Welch, J., BA, BSc Honours (Carleton), MSc (Alberta), PhD (Purdue Univ.)
Wong, I., BSCh (Acadia), MD (Dalhousie). Major appointment with Department of Surgery

Adjunct Professors

Bayers, L., BA, BEd (Dalhousie), MA (SMU), PhD (South Australia)
Brooks, C., MD (Manchester Univ), Dipl Avration Med (Farnborough)
Holt, L., BSc, MSc (Springfield Coll.), PhD (Southern Illinois)
McCabe, J., BPE, BA (UNB), MS EdD (Tenn)
Steeves, D., BEd (UNB), MSc (Dalhousie)
Thornley, L., BSc (Univ of Brighton), MSc (Dalhousie)
Willgress, S., BSc, MSc (Calgary)

Interdisciplinary Health Studies Certificate

The Interdisciplinary Health Studies (IDHS) online undergraduate certificate aims to:

1. Provide a critical, case-based, interdisciplinary perspective on contemporary health issues for students with a broad interest in health.
2. Develop the following student competencies: critical and systems thinking, problem solving, ethics, communication, holistic perspectives, advocacy and collaboration.
3. Prepare students for possible future education and careers in health at Dalhousie and beyond.

This program of study will provide an environment for students to develop critical thinking skills that will set the stage for evidence-based practice and critical problem solving. IDHS's case-based curriculum applies multiple disciplinary lenses to urgent contemporary health issues within each individual course. Students will learn about the breadth of study that is connected with health: social, psychological, physical and spiritual influences on health and avenues for social, physical and political

change, while developing essential information gathering, management, analysis, interpretation and communication skills.

IDHS is primarily tailored to non-Dalhousie students and existing Dalhousie students outside the Health Professions who are seeking online courses in health, and a pre-professional exposure to health issues and health professions. Students within the Faculty of Health Professions may take IDHS courses, but non-FHP students will be prioritized and FHP student seats will be capped.

The IDHS undergraduate certificate consists of four required online courses delivered via Blackboard Learn:

1. Introduction to Health and Health Professions (HPRO 1000);
2. Introduction to Aboriginal People's Health and Healing (IPHE 2201);
3. Contemporary Issues in Food Studies (IDHS 3000); and
4. Contemporary Issues in Rural Health (IDHS 3100).

Admission requirements: Completion of secondary school (Grade 12) with a minimum overall average of 70% in five academic Grade 12 courses, including English (minimum 70%). These criteria apply to all applicants who are not currently Dalhousie students. Current Dalhousie students need to have a minimum GPA of 2.0.

Bachelor of Science (Health Promotion)

The Bachelor of Science (Health Promotion) is a four-year degree program. The goal of health promotion is to educate health promotion professionals in promoting, maintaining and improving the health and well-being of individuals, families and communities. As a profession, Health Promotion is principally devoted to employing health promotion processes and to fostering healthy behaviors.

The responsibilities of health promoters include: assessing health promotion needs; planning, conducting and evaluating health promotion programs; coordinating health promotion activities and resources; promoting health throughout the community; and professional development.

The BSc (Health Promotion) program guides students in attaining: (1) knowledge, attitudes and practices conducive to a healthy lifestyle; (2) professional preparation for a career in community health promotion; and (3) academic preparation for advanced study and research in health promotion or health-related fields.

Program of Study

NOTE: On admission into the BSc (Health Promotion) program, all students will be issued a Program of Studies Form. It is the responsibility of the student to ensure that all of the requirements for the degree as outlined on the form are completed for graduation.

Required Courses - BSc (Health Promotion)

HPRO 4495.15	15

* Language/Humanities Elective - see list under Degree Requirements Section in the Academic Calendar.

** Open Electives can be chosen from any available course at Dalhousie

***HPRO A, B, C (as per program of study form available from the School of Health and Human Performance).

**** Health Related Electives - To ensure the courses you select fill this requirement, please check with an advisor.

***** See list of writing requirement courses under Degree Requirements Section in the Academic Calendar. If students take SOSA 1050 in Year One, the Writing Requirement becomes six credit hours of open electives.

At graduation, valid Standard First Aid and CPR Level C Certification are required. Students must submit copies of valid certification to the Student Services Administrator before the end of their final term.

Bachelor of Science (Health Promotion) with Honours

Students wishing to be considered for entrance into the Honours Program must meet the minimum requirements listed below. *Acceptance to the program after meeting these requirements will depend on a faculty member being willing to supervise the honours thesis.*

1. Completed a minimum 75 credit hours towards his/her undergraduate degree.
2. Obtained a GPA of 3.5 based on the previous 45 credit hours of work.
3. Completed HAHP 3100 with a minimum grade of B.
4. Completed a 3000 level or higher HPRO course most related to the area of research.
5. Completed the Financial, Technical, Equipment and Space Support Form indicating the financial needs of the thesis can be met.

Application is made by November 15th of the student's third year.

NOTE: Students accepted into the Honours program must complete HPRO 4101.03 and HPRO 4102.03

The Honours Program is part of the 120 credit hours required for the Bachelor of Science (Health Promotion) degree. HPRO 4101 and HPRO 4102 may be attributed as open electives or as health-related electives.

Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

Honours Conversion

Students who have graduated with a Bachelor of Science (Health Promotion) degree can apply for the Honours Conversion program. Before taking HPRO 4101.03 and HPRO 4102.03, they must have satisfied the requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain prerequisite courses concurrently with HPRO 4101.03 and HPRO 4102.03. Application is made through the Honours Coordinator (details in the BSc (Health Promotion) with Honours section). Acceptance into the Honours Conversion program can only be considered provided a faculty member has agreed to supervise the project.

Bachelor of Science (Kinesiology)

Program Description

Kinesiology is the study of the structure and function of the human body within the context of human movement and with a focus on the maintenance and enhancement of health and well-being. Students may elect to concentrate in one of three professional areas - ergonomics; fitness and lifestyle; or coaching science* - or follow a more general stream with a focus on research or other professional areas in which human movement and health are central. The School offers a four-year BSc (Kinesiology) degree as well as a four-year honours degree in Kinesiology.

* See stream requirements under Program of Study below.

The goals of these degrees are to provide students with:

1. A broad background in various subdisciplines of Kinesiology, including anatomy, physiology, neuropsychology, biomechanics, movement control and psychology of performance;
2. An exposure to several science disciplines which are prerequisite and/or complementary to the kinesiology subdisciplines (e.g., biology, physics, psychology, mathematics);
3. An introduction to the discipline of health promotion and an appreciation of the role kinesiology plays in health and well-being concerns of the individual;
4. An exposure to some aspects of the humanities and social sciences, as a means of enhancing the liberal education of the student and addressing social concerns in relation to health promotion;
5. A solid foundation in research methodology and statistics, including opportunities for independent research if the student should so choose;
6. An understanding of the principles and tools necessary to evaluate human movement from a variety of perspectives and in a variety of settings, as well as hands-on experience in several evaluative procedures;
7. Professional preparation in the areas of fitness and lifestyle; ergonomics; or coaching sciences;
8. Experiences in active and problem-based learning;
9. The necessary background to enable the student to pursue graduate work in kinesiology or other related fields.

Program of Study

On admission into the BSc (Kinesiology) program, all students will be issued a Program of Studies Form. It is the responsibility of the student to ensure that all of the course requirements for the degree as outlined on the form are completed for graduation.

Required Courses - BSc (Kinesiology)

• TBA - writing course	
• HAHP 2000.03	3
• HAHP 3100.03	3
• ANAT 1020.03	3
• PHYC 1310.03	3
• PHYL 1010.06	6
• KINE 1102.03	3
• KINE 1104.03	3
• KINE 1106.06	3
• KINE 1108.03	3
• KINE 2250.03	3
• KINE 2310.03	3
• KINE 2320.03	3
• KINE 2430.03	3
• KINE 2465.03	3
• KINE 3200.03	3
• KINE 3500.03	3
• MATH 1060.03 /STAT 1060.03	3

Kinesiology Electives *18

Science Electives 12

Open Electives** 33

* 6 credit hours of Kinesiology electives must be at the 4000 level; the remaining 12 credit hours must be either at the 3000 or 4000 level.

12 credit hours of science electives must be selected from the following list:

- BIOL 1010.03 or BIOL 1020.03: Principles of General Biology I
- BIOL 1011.03 or BIOL 1021.03: Principles of General Biology II
- PHYC 1320.03: Physics In and Around You
- CHEM 1011.03: General Chemistry Part I
- CHEM 1012.03: General Chemistry Part II
- MATH 1000.03: Differential & Integral Calculus or MATH 1215.03
- MATH 1010.03: Differential & Integral Calculus
- PSYO 1011, PSYO 1021.03 or PSYO 1031.03: Introduction to Psychology and Neuroscience I
- PSYO 1012 or PSYO 1022.03 : Introduction to Psychology and Neuroscience II

** Open electives must include at least 15 credit hours at the 2000 level or above.

Students considering the Honours degree are required to take six credit hours of Math, and are required to have 30 credit hours of science electives, with 12 credit hours of those Science electives at the 2000 level or above by the end of their final year. For further information see Bachelor of Science (Kinesiology) with Honours.

Stream Requirements

Students interested in focusing on Ergonomics; Fitness and Lifestyle; or Coaching Science at an advanced level will be guided into one of three specialty streams. A maximum of 12 students/year/stream will be selected, primarily on the basis of GPA. Students wishing to complete a stream should consult the student advisor.

The following is a list of required courses for each stream. Any courses over the 18 credit hours of required KINE electives can be counted as open electives:

Ergonomics Stream

- KINE 3414.03: Physical Fitness Assessment and Program Design
- KINE 3476.03: Principles of Ergonomics
- KINE 3482.03: Care & Prevention of Injuries

- KINE 4466.03: Advanced Biomechanics
- KINE 4577.03: Cognitive Ergonomics
- KINE 4578.03: Physical Ergonomics
- KINE 4588.03: Clinical and Occupational Kinesiology

Fitness and Lifestyle Stream

- KINE 3414.03: Physical Fitness Assessment and Program Design
- KINE 3419.03: Application of Physiological Principles to Human Performance
- KINE 3485.03: Psychology of Sport **OR**
- LEIS 3492.03: Counselling for Health and Well-being
- KINE 4108.03: Mind/Body Connections and Well-being
- KINE 4412.06: Advanced Fitness Assessment Exercise Prescription and Lifestyle Counselling

Coaching Science Stream

- KINE 3320.03: Anatomical Basis of Human Movement
- KINE 3419.03: Application of Physiological Principles to Human Performance
- KINE 3430.03: Principles of Skill Acquisition
- KINE 3482.03: Care and Prevention of Injuries
- KINE 3485.03: Psychology of Sport
- KINE 3740.03: Coaching Science Seminar
- KINE 3741.03: Coaching Science Practicum
- KINE 4740.03: Advanced Coaching Science Seminar
- KINE 4741.03: Advanced Coaching Science Practicum
- MGMT 2401.03: Introduction to Marketing

Bachelor of Science (Kinesiology) with Honours

Students who wish to complete the Honours Program may apply at the end of their third year of study. *Acceptance into the honours program is contingent upon the willingness of a faculty member to serve as the honours thesis advisor.* To be considered for admission into the program, students must have fulfilled the following requirements:

1. Completed MATH 1060 / STAT 1060.
2. Completed a minimum of 24 credit hours of science electives, including a math course in addition to the required MATH 1060 / STAT 1060. The other math credit can be chosen from any MATH/STAT course at Dalhousie except for MATH 1001.03, MATH 1002.03, MATH 1110.03, MATH 1120.03, or MATH 1115.03. Of the 24 credit hours of science electives, at least six credit hours must be 2000 level or above.
3. Completed an upper level Kinesiology course (at the 3000 level or above) in the area in which the research will be undertaken (e.g., ergonomics, biomechanics, exercise physiology, neuromuscular physiology) with a grade of at least B;
4. Obtained an overall GPA of 3.5 on the previous 60 credit hours of work;
5. Completed HAMP 3100.03 (Research Methods) with a minimum grade of B.

Application is made through the Honours Coordinator by April 1st of the student's third year.

The completed Honours Program requires 30 credit hours of Science electives, six credit hours of which may be taken in the 4th year. 12 credit hours must be at the 2000 level or above.

NOTE: Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

NOTE: Students accepted into the Honours program must complete KINE 4900.06. This requirement is in lieu of six credit hours of Open Electives listed as part of the requirements for the BSc (Kinesiology).

Honours Conversion

Students who have graduated with a Bachelor of Science (Kinesiology) degree can apply for the Honours Conversion program. Before taking KINE 4900.06, they must have satisfied the requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain prerequisite courses concurrently with KINE 4900. Application is made through the Honours Coordinator (details in the BSc (Kinesiology) with Honours section). Acceptance into the Honours Conversion program can only be considered provided a faculty member has agreed to supervise the project.

Bachelor of Science (Recreation) - Therapeutic Recreation

Program Description

Therapeutic Recreation involves the delivery of change-oriented services to individuals with disabilities, illness and other limitations, with the focus on increasing quality of life through leisure and recreation involvement. The graduates of the Therapeutic Recreation degree will be skilled in the areas of: disability and illness, leisure theory, assessment, planning (program and client planning), program implementation and evaluation, and documentation. Graduates will find employment in both traditional clinical settings such as rehabilitation facilities, psychiatric hospitals and nursing homes, and in community settings such as community mental health centres or associations for community living, etc.

Objectives

The general objectives of the program are:

1. To provide the student with a broad educational exposure to various social science and humanities disciplines (e.g., Psychology, Sociology, Economics, Political Science, Anthropology, History);
2. To familiarize students with current social science-based research methods and statistics;
3. To provide the student with the necessary skills and knowledge for entry into the roles of leadership, advocacy, constancy and education in recreation and leisure services;
4. To provide the necessary background to enable students to pursue graduate work in leisure studies, management studies or the social sciences and humanities.

Program of Study

On admission into the BSc (Recreation) program, all students will be issued a Program of Studies Form. It is the responsibility of the student to ensure that all of the course requirements for the degree as outlined on the form are completed for graduation.

Required Courses BSc (Recreation) - Therapeutic Recreation

• HAFP 2000.03	3
• HAFP 3000.03	3
• HAFP 3100.03	3
• ANAT 1020.03	3
• PHYL 1010.06	6
• KINE 3384.03	3
• LEIS 1127.03	3
• LEIS 2127.03	3
• LEIS 2130.03	3
• LEIS 2361.03	3
• LEIS 2384.03	3
• LEIS 3127.03	3
• LEIS 3296.03	3
• LEIS 3426.03	3
• STAT 1060.03/MATH 1060.03	3
• LEIS 3492.03	3
• LEIS 4365.03	3
• LEIS 4597.15	15

Required Arts and Social Science Courses

- PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03 6
- PSYO 2220.03 3
- SOSA 1002.03 and SOSA 1003.03 or SOSA 1050.06 or SOSA 1200.06 6

Therapeutic Recreation Electives

Two of the following:

- | | |
|----------------|---|
| • LEIS 4482.03 | 3 |
| • LEIS 4512.03 | 3 |

• LEIS 4540.03	3
• LEIS 4563.03	3
• Designated Elective*	3
• Open Electives**	27

* Designated electives can be chosen from the courses in the Language/Humanities list (under Degree Requirements at the front of the calendar), Health Professions or Interdisciplinary Health Professions, Health Services Administration or Social Sciences.

**12 of the 27 credit hours of the open electives must be 2000 level or above.

NOTE: Students should consult the NCTRC website (<http://www.NCTRC.org>) for CTRS Certification requirements.

Bachelor of Science (Recreation)/Bachelor of Management

Program Description

The curriculum of this combined program was developed in response to guidance from alumni and practicing professionals in the field — it was clear that while graduates entering the field of recreation administration needed the strong grounding in the recreation discipline, they also needed more management skills. The Faculty of Management's Bachelor of Management degree emphasizes an orientation to management in the public and non-profit sector. This combined degree program enhances career options of future recreation students.

The Bachelor of Science (Recreation)/Bachelor of Management is a five-year program comprising 150 credit hours. Upon completion of this program, the successful student graduates with a Bachelor of Science (Recreation) degree and a Bachelor of Management degree.

Objectives

1. To provide the student with a broad educational exposure to various social science and humanities disciplines (e.g., Psychology, Sociology, Economics, Political Science, Anthropology, History);
2. To familiarize students with current social science-based research methods and statistics;
3. To provide the student with the necessary skills and knowledge for entry into the professional roles of leadership, advocacy, education and service delivery in recreation.
4. To provide the necessary background to enable students to pursue graduate work in leisure studies, management studies, or the social sciences and humanities.

Required Courses - Bachelor of Science (Recreation)/Bachelor of Management

Required Health and Human Performance Courses

• HAHF 2000.03	3
• HAHF 3000.03	3
• HAHF 3100.03	3
• LEIS 1127.03	3
• LEIS 2127.03	3
• LEIS 2361.03	3
• LEIS 2384.03	3
• LEIS 3127.03	3
• LEIS 3296.03	3
• LEIS 3360.03	3
• LEIS 3362.03	3
• LEIS 3370.03	3
• LEIS 4362.03	3
• LEIS 4597.15	15

Required Management Courses

• MGMT 1000.03	3
• MGMT 1001.03	3
• MGMT 1501.03	3
• MGMT 1601.03	3
• MGMT 1702.03	3
• MGMT 2101.03	3
• MGMT 2303.03	3
• MGMT 2304.03	3

• MGMT 2401.03	3
• MGMT 2702.03	3
• MGMT 2801.03	3
• MGMT 2803.03	3
• MGMT 3201.03	3
• MGMT 3501.03	3
• MGMT 3602.03	3
• MGMT 4001.03	3

Other Required Courses

- ECON 1101.03
- ECON 1102.03
- SOSA 1002.03 and SOSA 1003.03 or SOSA 1050.06 or SOSA 1100.06 or SOSA 1200.06
- Writing Requirement (6)*
- Open Electives (24)**
- MGMT/LEIS electives (06)***

*Students must complete a six credit hour writing requirement. This can be completed by choosing six credit hours from the list of Writing Courses within the College of Arts and Science Degree requirements.

**The equivalent of 24 credit hours chosen from all courses offered in the University. Twelve of the 24 credit hours must be 2000 level or above.

***The equivalent of six credit hours must be chosen from any MGMT or LEIS course.

Bachelor of Science (Recreation)/Bachelor of Management with Honours

Students wishing to be considered for entrance into the Honours Program must meet the minimum requirements listed below. Acceptance to the program after meeting these requirements will depend on a faculty member being willing to supervise the honours thesis.

1. Completed a minimum of 75 credit hours towards the Bachelor of Science (Recreation) degree. Normally students will have completed five semesters prior to beginning the honours component of the program.
2. Obtained a GPA of 3.5 based on the previous 45 credit hours of work.
3. Completed HAMP 3100: Research Methods with a minimum grade of B.
4. Completed a 3000 level or higher LEIS course most related to the area of research.
5. Completed the Financial, Technical, Equipment and Space Support Form indicating the financial needs of the thesis can be met.

Application is made by November 15th of the student's third year (for Therapeutic Recreation students) or fourth year (for Recreation Management students).

NOTE: Students accepted into the Honours program must complete LEIS 4101.03 and LEIS 4102.03. These six credit hours may be attributed as open electives or as MGMT/LEIS electives.

The Honours Program is part of the 120 credit hours required for the Bachelor of Science (Recreation) degree, or part of the 150 credit hours for Recreation Management.

Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

Honours Conversion

Students who have graduated with a Bachelor of Science (Recreation) degree can apply for the Honours Conversion program. Before taking LEIS 4101.03 and LEIS 4102.03, they must have satisfied the requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain pre-requisite courses concurrently with LEIS 4101.03 and LEIS 4102.03. Application is made through the Honours Coordinator (details in the BSc (Recreation) with Honours section). Acceptance into the Honours Conversion program can only be considered provided a faculty member has agreed to supervise the project.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions - Health and Human Performance

HAHP 1000 Introduction to Health, Health Promotion and Health Professions

CREDIT HOURS: 3

This course provides the philosophical and practical scope of the School's unique perspective on health. It includes an examination of theories, research, politics and practices that have helped to define health, and health promotion as an umbrella for health-related activities. An historical perspective of health and healthcare is offered and current international, national and local issues are considered. Also included is an introduction to the professional streams offered in the School and how they fit into health promotion and the Canadian healthcare system.

FORMAT: Lecture| Seminar

HAHP 2000 Human Growth and Development

CREDIT HOURS: 3

A study of factors influencing human growth and development from birth to maturity and throughout the lifespan, as revealed by observational and experimental studies.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: Restricted to students in the School of Health and Human Performance, and Bachelor of Health Science students. Others by permission of instructor with priority to Health Professions students.

HAHP 3000 Community Development

CREDIT HOURS: 3

This course examines the nature and process of community development, reviews differing interpretations and approaches to community development, and provides students the opportunity to develop skills to catalyze and engage in the process. The course will investigate current Canadian initiatives and projects that encourage the practice of community development, and provide the opportunity to witness and become involved in local health-related projects that foster the principles of community development.

FORMAT: Lecture| Tutorial| Discussion

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: Restricted to students in the School of Health and Human Performance.

HAHP 3100 Introduction to Research Methods

CREDIT HOURS: 3

This course provides students with basic knowledge for conducting research in health professions. The content covers ethics associated with research, research design, issues in measurement, sampling, data collection strategies, data analysis and report writing. Students will learn about different approaches to research from the classical scientific model to more subjective interpretative models of inquiry. Testing, as well as written assignments will serve as evaluative techniques.

FORMAT: Lecture| Discussion

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: Restricted to students in the School of Health and Human Performance, and Bachelor of Health Informatics students.

EXCLUSIONS: HSCE 3010.03

Course Descriptions - Health Promotion

HPRO 1000 Introduction to Health, Health Promotion and Health Professions.

CREDIT HOURS: 3

This course provides the philosophical and practical scope of the School's unique perspective on health. It includes an examination of theories, research, politics and practices that have helped to define health, and health promotion as an umbrella for health-related activities. An historical perspective of health and healthcare is offered and current international, national and local issues are considered. Also included is an introduction to the professional streams offered in the School and how they fit into health promotion and the Canadian healthcare system.

FORMAT: Lecture| Seminar

EXCLUSIONS: HAHP 1000

HPRO 1195 Introduction to Health Promotion

CREDIT HOURS: 3

While students are developing knowledge, understandings, attitudes and appreciations related to health and professional health promotion, they will be improving skills in library research, scholarly writing, and public speaking. In addition to the regular classroom meetings, the course includes a self-study assignment related to the organization and functioning of a charitable community-based health-related agency.

FORMAT: Lecture| Seminar| Discussion

RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 2110 Health Promotion Theory

CREDIT HOURS: 3

This course is designed to encourage those working and studying in the areas of health promotion to better understand the connection between health promotion theory

and research, policy and community practice. This course will also provide students with an opportunity to explore and critically analyze the principal methods and theoretical approaches in the evolution and assessment of evidence for effectiveness of health promotion programs and interventions.

PREREQUISITE: HPRO/HEED 1195.03

RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 2120 Health Promotion Policy

CREDIT HOURS: 3

The purpose of the course is to introduce students to the concept of policy and health promotion policy in particular. Students will be exposed to content that describes how policy is developed/approved/changed on the basis of research/evidence and what processes/tools can be used to influence political decision-making as it relates to the adoption of new/changed policy. Through the use of case studies, students will be asked to critically analyze existing health promotion policies and understand issues related to policy interpretation, application and compliance at national, provincial and local levels.

PREREQUISITE: HPRO/HEED 1195.03

RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 2255 Drugs and Drug Education

CREDIT HOURS: 3

International, national and regional issues of promotion, prevention, treatment and legislation of drug use are examined. Recreational, over-the-counter and some prescription drugs will be considered. Some strategies and methods of educating about drugs and drug-related issues will be included.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.

HPRO 2361 Program Planning

CREDIT HOURS: 3

Designing, planning, implementing and evaluating programs is fundamental to both leisure services and health promotion. Both disciplines develop programs to enhance the quality of life for individuals, groups and communities. This course reviews the principles of program planning, various program planning models, and examples of programs that are pertinent to leisure services and health education/promotion. The planning process will include issues such as targeting specific populations, scanning for needs and assets, partnering, managing stakeholder relationships, and evaluation.

FORMAT: Lecture| Discussion

PREREQUISITE: HPRO/HEED 1195.03 or LEIS 1127.03

CROSS-LISTING: LEIS 2361.03

RESTRICTIONS: Restricted to Recreation and Health Promotion students

HPRO 3250 Interdisciplinary Class in Human Nutrition

CREDIT HOURS: 3

This course focuses on the science of nutrition and the role of nutrition in health. We study how the body responds to different nutrients including protein, carbohydrate, fat, vitamins, minerals, and water. Current knowledge and controversies regarding the role of diet in disease and optimal health will be explored.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

CROSS-LISTING: KINE 3250

RESTRICTIONS: Restricted to students in 2nd year or higher.

EXCLUSIONS: HPRO 2250

HPRO 3325 Mental Health Promotion

CREDIT HOURS: 3

Concepts and issues of mental health are explored through an examination of related theories, research, writings and practices. Emphasis is placed on promoting individual and community mental health, but mental illness and its treatment are included. Mental health-related organizations and services will also be studied.

FORMAT: Lecture| Seminar

PREREQUISITE: PSYO 1011.03 or 1021.03 and PSYO 1012.03 or PSYO 1022.03, HAHF 2000.03, or permission of instructor

RESTRICTIONS: Restricted to School of Health and Human Performance students; limited space for other students may be made available.

HPRO 3335 Introduction to Disease Prevention

CREDIT HOURS: 3

This course will consider the concept of disease, the study of disease, and the causes of disease from the perspective of prevention. Primary, secondary and tertiary prevention strategies and methods will be examined, along with the role of the health promotion specialist. Selected communicable diseases will be used to illustrate these concepts.

FORMAT: Lecture| Discussion

PREREQUISITE: ANAT 1020.03 or ANAT 1010.03, HPRO/HEED 1195.03, PHYL 1010X/Y.06 or PHYL 1000X/Y.06, or PHYL 2030X/Y.06, or permission of instructor

RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students

HPRO 3345 Epidemiological Approach to Disease

CREDIT HOURS: 3

This course introduces students to the basic concepts of epidemiology - the study of the causes and distribution of disease in human populations. Emphasis will be on disease causation, morbidity and mortality through studying selected chronic conditions. In addition, this course examines social determinants of health and their relationship to chronic conditions.

FORMAT: Lecture| Discussion

PREREQUISITE: ANAT 1020.03, or ANAT 1010.03, HPRO/HEED 1195.03, PHYL 1010X/Y.06 or PHYL 1000X/Y.06 or PHYL 2030X/Y.06, or permission of instructor

RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students

HPRO 3351 Injury Prevention and Safety Education

CREDIT HOURS: 3

Students are introduced to the concept of safety, the causes and effects of injuries, and strategies for reducing same through safety education, engineering and legislation. Specific study of injuries, their causes, and preventive measures and programs is preceded by a review of definitions of health, health promotion/education models and policies. The latter part of the course focuses on community orientations to injury prevention.

FORMAT: Lecture| Discussion

RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students

HPRO 3360 Multicultural Health Promotion Research and Policy

CREDIT HOURS: 3

The purpose of this course is to provide students with an opportunity to explore the distinct and integrated influence of research and policy on the health of multicultural populations within the Canadian context. In particular, this course will assist students in developing a critical understanding of the intersection of multicultural health with policies and power. Through engagement with multidisciplinary perspectives, students will examine health research and policy issues pertaining specifically to New Canadians (Immigrants), African Canadians, and Aboriginal peoples.

PREREQUISITE: HPRO/HEED 1195.03, HPRO 2110.03

RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 3370 International Health Promotion Research and Policy

CREDIT HOURS: 3

The main goal of the course is to introduce students to the ways in which health promotion research questions, methods and ethics, as well as health policies, vary depending upon the specific international context (local and national). A comparative analysis will be undertaken of the disparities in health/well-being between (and within) developed and developing countries while considering the historical development of underdevelopment. Each year the students will choose from a number of cases two that will be examined in-depth by the class. Students will choose from among a variety of key global health issues (e.g. tobacco addiction, health issues for migrant workers, HIV/AIDS and nutrition). Focus will be placed on the social determinants of these health issues/problems, and the types of health promotion research and policy issues needed to address these health problems within particular geographical contexts/countries. One of the central tenets of the course is how societies are organized, and the way in which resources are invested and whose interests the investments serve, affect the health of individuals and populations within the society.

PREREQUISITE: HPRO/HEED 1195.03, HPRO 2110.03

RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 3397 Community Health Promotion Strategies

CREDIT HOURS: 3

A broad spectrum of health promotion strategies is available to facilitate health in various community settings and with diverse populations. The course reviews these major strategies and offers students practice in applying them. In addition, the various models and theories of health behaviour change will be examined.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: HPRO/HEED 1195.03, HPRO/HEED 2361.03

RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor with priority to Health Professions students

HPRO 4101 Advanced Topics in Applied Research Methods in Health Promotion and Policy

CREDIT HOURS: 3

The purpose of this course is to provide students with an opportunity to develop their understanding of research methodologies and apply their knowledge to a specific health promotion topic. Health policies will be discussed and considered relative to specific health issues.

PREREQUISITE: HPRO/HEED 1195.03, HAHF 3100.03

RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 4102 Honours Thesis

CREDIT HOURS: 3

The purpose of the course is to develop research skills by completing a major independent research project and writing a formal research report in the form of a thesis. By way of their research, students will demonstrate skills, knowledge and ability in literature research, research design, data collection/analysis and formal academic writing.

PREREQUISITE: HAHF 3100.03 and HPRO 4101.03 with a grade of B or better in each, and ethical approval by August 1.

RESTRICTIONS: Restricted to Health Promotion honours student.

HPRO 4365 Health: A Biopsychosocial Approach

CREDIT HOURS: 3

Health is increasingly recognized as multiply determined by the complex interactions of biological, psychological, and social systems and determinants. Research into these interactions is advancing rapidly. Students in this course are expected to develop an understanding of these processes, be aware of the most recent research and be capable of seeking out new research in the future and applying this knowledge to health problems in Canada.

PREREQUISITE: HPRO 3335.03 or HPRO 3345.03

RESTRICTIONS: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

HPRO 4412 Human Sexuality

CREDIT HOURS: 3

This course is concerned with biological, cultural, ethical, historical, psychological, religious and semantic aspects of human sexuality. Four themes are threaded throughout the course - diversity in gender roles and in sexual attitudes, behaviours and customs; critical thinking; making responsible decisions; sexual health. The course is designed to support positive integration of sexuality into the lives of individuals and to foster the prevention of sexuality-related problems, at all stages of life.

FORMAT: Lecture| Discussion

CROSS-LISTING: GWST 2412.03

HPRO 4422 Environmental Health

CREDIT HOURS: 3

Individual health and well-being is partially determined by the values we hold and the choices we make as individuals. Equally important is the environment that enables us to make those choices that maintain and enhance our health. This course emphasizes the importance of the environment, both physical and social, and how it is implicated in the work of health promoters and other health professionals. The content reviews principles of natural and social ecology, the role of policy in shaping our environments, and research aimed at understanding the impact of various environmental conditions on health. Students will explore environmental health issues

within the community and propose educational strategies to maintain and enhance health and well-being.

FORMAT: Lecture| Discussion

RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students

HPRO 4450 Comprehensive School Health Promotion

CREDIT HOURS: 3

This course will provide students with an overview of the components of a comprehensive health promotion program in the public school system from a community health promotion perspective. The school health curriculum, school health services, and the healthy school environment - and how a community health promoter might interact with the school system will comprise the content of the course.

FORMAT: Lecture| Tutorial

PREREQUISITE: HPRO 1195.03, HPRO, 2110.03, HPRO 2361.03, HPRO 3397.03; at least two of HPRO 2255, HPRO 4412, HPRO 4365, HPRO 3335, HPRO 3345, or HPRO 3351

RESTRICTIONS: Restricted to Health Promotion students in their final year of study.

HPRO 4495X/Y Health Promotion Internship

CREDIT HOURS: 15

This course is an extended professional development internship during the final year of study. It requires completion of a 14-week, 40 hours per week internship in a health promotion agency. The internship involves an in-depth agency analysis and the completion of a special service project for the agency, as well as several other academic projects. Details of the goals and specific procedures for the internship are contained in the current Internship Handbook.

FORMAT: Lab

PREREQUISITE: Completion of all other program requirements and approval of the Student Services Administrator. A Standard First Aid and Level C CPR Certification.

RESTRICTIONS: Restricted to Bachelor of Science (Health Promotion) students in their final term.

HPRO 4800X/Y Independent Study

CREDIT HOURS: 6

The Independent Study allows students to develop an area of specialization with library, laboratory or field research, under the tutelage of an appropriate faculty member.

NOTE: Course Details listed here also apply to HPRO 4801/HPRO 4802.

NOTES: Students may take no more than a total of 6 credit hours of independent studies.

FORMAT: Tutorial

PREREQUISITE: Fourth year status; a GPA of at least 3.00; a "B" grade in an earlier class in the area of study (where appropriate); consent of advisor; consent of tutor. Intention to register for an Independent Study should be confirmed with the undergraduate secretary by April 1st of the preceding academic year.

RESTRICTIONS: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students

HPRO 4801 Directed Study

CREDIT HOURS: 3

See HPRO 4800.

HPRO 4802 Directed Study

CREDIT HOURS: 3

See HPRO 4800.

Course Descriptions - Kinesiology

KINE 1102 Physical Activity and Health

CREDIT HOURS: 3

This course is designed to introduce students to the connection between exercise and health. The lecture portion explores how exercise affects the most prevalent diseases currently afflicting our society. The laboratory portion is designed to help students develop a progressive exercise program for themselves based on their current fitness and strength levels as well as physical activity preferences.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: Restricted to Kinesiology students only

KINE 1104 Foundations in Kinesiology

CREDIT HOURS: 3

The objective of this course is to introduce students to Kinesiology as a discipline and for them to learn about the sub-disciplines and content areas that contribute to the general body of knowledge in Kinesiology. In addition to understanding what these sub-disciplines are, students will gain an understanding of the interrelationships among these sub-disciplines and the types of careers that students can enter. Students will be exposed to discipline content as well as the methods of measurement and evaluation and the technology involved in each of the disciplines. Problem Based Learning (PBL) will be used as the course instruction method.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

RESTRICTIONS: Restricted to Kinesiology students

KINE 1106 Philosophy and Ethics for Kinesiologists

CREDIT HOURS: 3

Physical activity figures prominently in many aspects of society and culture. Kinesiologists are in a unique position to bridge the gap between the scientific study of physical activity and the implementation of physical activity programs in public and professional contexts. This course develops core principles in philosophy and ethics to help the aspiring kinesiologist think about and evaluate their role in society. Debate and critical analysis will figure prominently in the course.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: Restricted to Kinesiology students only

KINE 1108 Psychology and Physical Activity

CREDIT HOURS: 3

Physical inactivity is widely recognized as a lifestyle associated with considerable health risk. The challenge of increasing the level of physical activity in the population requires an in-depth understanding of the individual and environmental factors that either promote or inhibit regular activity. Accordingly, this introductory course will provide students with the fundamental knowledge of how psychological concepts are related to physical activity participation and health. The main focus is to provide (a) a basic understanding of various social-psychological concepts and principles involved in health and exercise psychology, and (b) to see how these concepts and principles might be translated into promoting health and wellness via physical activity participation. Core concepts include the basics of psychology research, theories, motivation, adherence, and behaviour modification.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: Priority given to Kinesiology students

KINE 2310 Physiology of Exercise

CREDIT HOURS: 3

This is an introductory course for students with a basic knowledge of anatomy and physiology. It concentrates on the respiratory, cardiovascular and neuromuscular systems in terms of their involvement during exercise, their adaptation to different types of training and how they limit performance during exercise in different environmental conditions.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ANAT 1020.03 or ANAT 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06

RESTRICTIONS: Restricted to Kinesiology students

KINE 2320 Kinesiological Anatomy

CREDIT HOURS: 3

Neuroanatomical and musculoskeletal structures are presented and discussed in order to establish the understandings necessary for an in-depth analysis of human movement.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 1

PREREQUISITE: ANAT 1020.03 or ANAT 1010.03 and PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06.

RESTRICTIONS: Restricted to Kinesiology students

KINE 2430 Motor Control and Learning

CREDIT HOURS: 3

This course deals with efficiency in completing movements to achieve a desired goal. It involves systematic changes in perception of the environment, decisions about what movements to make, as well as changes in how these movements are carried out. This course covers what is known about these processes as well as how this information can be applied.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: Restricted to Kinesiology students

KINE 2465 Introductory Biomechanics

CREDIT HOURS: 3

The purpose of this course is to introduce students to the area of biomechanics in human motion analysis. Students will be exposed to the concepts of kinematic and kinetic analysis of motion as well as muscle forces and moments of force as applied to the human system.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PHYC 1300.06 or PHYC 1310.03

RESTRICTIONS: Restricted to Kinesiology students

EXCLUSIONS: PHYC 2610.03

KINE 3010 Introduction to Disability and Disability Management

CREDIT HOURS: 3

This course provides an overview of Disability Management theories, terminology and processes. Particular emphasis is on introduction to the practice of Disability Management, comprehending the relationship between occupation and disability, and, understanding the dynamic impact of disability on return to work.

CROSS-LISTING: DISM 3010.03

KINE 3200 Sociocultural Issues in Physical Activity

CREDIT HOURS: 3

This course will provide students with an introduction to social theory, culture, and social psychology as applied to physical activity and sport. While recognizing that physical activity does not take place in a social vacuum, and that social content often influences how physical activity and sport are experienced, this course explores participation in, and perceptions of physical activity and sport according to gender, social class, age, sexual orientation, ethnic group and nationality. The meaning of physical activity and sport in society, the role of Canadian public policy in promoting and facilitating participation in physical activity, and sport as an agent for social change will also be explored.

FORMAT: Lecture

RESTRICTIONS: Restricted to Kinesiology students.

KINE 3250 Interdisciplinary Class in Human Nutrition

CREDIT HOURS: 3

This course focuses on the science of nutrition and the role of nutrition in health. We study how the body responds to different nutrients including protein, carbohydrate, fat, vitamins, minerals, and water. Current knowledge and controversies regarding the role of diet in disease and optimal health will be explored.

FORMAT: Lecture
LECTURE HOURS PER WEEK: 3
CROSS-LISTING: HPRO 3250.03, NURS 4800, KINE 5990
RESTRICTIONS: Restricted to students in 2nd year or higher.
EXCLUSIONS: KINE 2250

KINE 3320 Anatomical Basis of Human Movement

CREDIT HOURS: 3

The purpose of this course is to integrate information from movement sciences in order to analyze a broad spectrum of human activities, from simple single contractions to complex patterns of both fine motor and gross motor activities. Industrial, recreational, sport and fitness movements will be examined using an integrated digital video/8 channel EMG approach.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ANAT 1020.03 or ANAT 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06, KINE 1104.03, KINE 2310.03, KINE 2320.03, KINE 2430.03, KINE 2465.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 3384 Physical Activity for Persons with Disabilities

CREDIT HOURS: 3

The etiology and effects of the more prevalent disabling conditions form the bases of strategies for teaching, coaching and rehabilitating those affected. Emphasis is placed on the physical components of disability and the adaptation of the environment and equipment to facilitate learning of ADL skills and sport. A practicum is required.

FORMAT: Lecture

PREREQUISITE: KINE 2320.03

KINE 3414 Exercise Testing and Prescription for Healthy Populations

CREDIT HOURS: 3

The class will cover basic exercise testing techniques required to assess physical fitness as well as the knowledge required to design physical activity/exercise programs for healthy populations (children and youth, adults and older adults). Techniques to assess aerobic fitness, body composition, muscular endurance and flexibility will be covered in laboratory sessions.

FORMAT: Lecture| Lab

LAB HOURS PER WEEK: 3

PREREQUISITE: KINE 2310.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 3419 Application of Physiological Principles to Human Performance

CREDIT HOURS: 3

This course focuses on physiological adaptations made by the body to different kinds of physical training. How selected factors can influence these adaptations is also examined. Students apply their knowledge of exercise physiology to athletic performance in a research project.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 1

PREREQUISITE: KINE 2310.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 3430 Principles of Skill Acquisition

CREDIT HOURS: 3

This course will provide students with experience in applying the theoretical concepts of motor control and learning. Variables that impact on skill acquisition, practice and instruction will be examined and applied. Real world settings will be used to illustrate the application of the principles of skill acquisition.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: KINE 2430.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 3440 Neural Basis of Sensory and Motor Function

CREDIT HOURS: 3

This course will provide students with a comprehensive understanding of the neural systems that mediate sensory and motor functions in the human. Proprioception, vision, somatosensation and vestibular sense will be explored in detail. Spinal reflexes, supraspinal pathways and cortical systems will be analyzed in detail, using case studies to illustrate key principles. Students will learn about the major classes of neurological movement disorders, from assessment to intervention. The course will build upon introductory courses in neural basis of behaviour.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: KINE 2430 or PSYO/NESC 2470

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 3476 Principles of Ergonomics

CREDIT HOURS: 3

This course applies health and human performance concepts in kinesiology to the workplace. The course content includes identifying characteristics of work environments and the effect on performance and health, the design of effective workplaces and the use of training and educational programs to increase productivity and to reduce injuries.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: KINE 2310.03; KINE 2320.03; KINE 2430.03; KINE 2465.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 3482 Prevention and Care of Injuries

CREDIT HOURS: 3

An introduction into the fields of Sports Medicine and work-related musculo-skeletal disorders, specifically the basic injury mechanisms, early recognition, care and prevention, pathology, tissue healing, emergency care, and basic principles of therapeutic exercise and modalities.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ANAT 1020.03 or ANAT 1010.03, PHYL 1010.06 or 1000.06 or PHYL 2030.06, KINE 2320.03

RESTRICTIONS: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.

KINE 3485 Psychology of Sport

CREDIT HOURS: 3

This course offers an awareness and understanding of the phenomena involved in mental preparation in sport. It will systematically analyze, investigate and assess psychological skills, attributes and preparation in this area, and their application in other environments. Emphasis will also be placed upon personal experience and practical application.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 1011.03, 1021.03 or 1031.03 and PSYO 1012.03 or 1022.03 or permission of instructor

KINE 3500 Principles of Measurement and Evaluation

CREDIT HOURS: 3

An introduction to the fundamentals involved in measurement and evaluation, including writing objectives, designing and administering tests, organizing and analyzing test results. Tests used to measure physical fitness, specific motor skills and health knowledge are investigated.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 1

PREREQUISITE: KINE 1104.03, ANAT 1020.03 or 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06, STAT 1060.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 3740 Coaching Science Seminar

CREDIT HOURS: 3

The purpose of this course is to provide students with the opportunity to learn about the fundamental principles and concepts of effective coaching planning and practice. Students will explore the role of the coach; the philosophical approaches to coaching pedagogy; the holistic attainment of individual potential; as well as the coaching code of ethics. Identification of issues related to risk management; developmental age; skill analysis and development; and physical preparation will also prepare students to meet the requirements for the Part A and Part B of the Theory component of the National Coaching Certification Program (NCCP).

FORMAT: Lecture

PREREQUISITE: HAHP 2000, KINE 1104, KINE 2310, KINE 2320, KINE 2430, KINE 2465

KINE 3741 Coaching Science Practicum

CREDIT HOURS: 3

The purpose of this course is to provide students with the opportunity to observe, identify, apply and evaluate the fundamental principles and methodologies of coaching that are associated with the creation of an effective practice, and training environment, for the developing athlete. This will be facilitated through the completion of a twelve week placement with a school, or club, mentor coach.

PREREQUISITE: KINE 3740.03

KINE 4108 Mind/Body Connections and Well-being

CREDIT HOURS: 3

The connection of mind and body as it relates to well-being is addressed through a survey of complementary (or alternative) healthcare practices including mind/body medicine (e.g., relaxation, meditation), therapeutic systems (e.g., chiropractic, homeopathy), herbology, bodywork techniques (e.g., massage, pressure point therapies), movement therapies and exercises (e.g. Alexander, yoga) and integrated medical systems (e.g., Chinese medicine, Ayurveda). Theoretical and scientific bases of each are covered and controversies surrounding these practices are addressed. This course is not designed to train students to be practitioners of any technique.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: HAHP 3100.03

RESTRICTIONS: Restricted to students enrolled in their final year of study in the School of Health and Human Performance or by permission of instructor

KINE 4412X/Y Advanced Exercise Testing and Prescription for Clinical Populations

CREDIT HOURS: 6

This class will cover advanced exercise testing techniques (e.g. graded exercise testing, ECG, etc.) required to assess physical fitness in clinical populations as well as the theory required to design exercise programs for these populations. Pathophysiology and basic pharmacology will also be discussed. Disease topics covered include cardiovascular, pulmonary, metabolic and autoimmune diseases. SIGNATURE REQUIRED

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 1

PREREQUISITE: ANAT 1020.03 or 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06, KINE 2310.03, KINE 3414.03, KINE 3419.03, CPR

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 4466 Advanced Biomechanics

CREDIT HOURS: 3

This course takes a quantitative approach to understanding human movement from a mechanical perspective. Concepts presented in the course will be illustrated with examples taken from the areas of sport, exercise, activities of daily living, and ergonomics. Students will be introduced to several techniques used in biomechanics research.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 2
PREREQUISITE: KINE 2465.03
RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 4577 Cognitive Ergonomics

CREDIT HOURS: 3

This course examines the role of cognition in injury prevention and human performance in the workplace. The course generally takes an information processing approach to consider the various topics and related issues. The course requirements include a written test on the content, a data collection project and a class presentation.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: KINE 3476.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 4578 Physical Ergonomics

CREDIT HOURS: 3

This advanced level course examines the application of the physical sciences in the productivity, health and safety of the workplace. The course will consider the design of work and the workplace from a physical science perspective. Due emphasis will be placed on the importance of the understanding of, and designing for, the capacity and capabilities of the human operator. When possible, the course will consider the present national and international standards in health and safety related to the content areas. The course requirements include a written test on the content, a project and a class presentation.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 1

PREREQUISITE: STAT 1060.03 or STAT 2060, KINE 2310.03, KINE 2320.03, KINE 2465.03, KINE 3476.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 4588 Clinical and Occupational Kinesiology

CREDIT HOURS: 3

This advanced level course examines the role that Kinesiology can play in clinical and occupational settings. In particular, the course will expose the student to an integrated approach in human motion analysis with a primary focus on the use of electromyography and its relationship to other biomechanical and physiological measures. Due emphasis will be placed on the importance of understanding the strengths and weaknesses of present laboratory and field measures of human motion. The course requirements include a written test on the content, a project and a class presentation.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 1

PREREQUISITE: KINE 3414.03, KINE 4466.03

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 4600 Practicum in Kinesiology

CREDIT HOURS: 3

Students take part in a supervised practical experience that links classroom knowledge to professional practice. Under the supervision of a kinesiologist, fitness or training professional, physical or occupational therapist, ergonomist or other related professional, students gain hands-on experience in a fitness/wellness/allied health field. Students document and critically evaluate their experiences.

FORMAT: Seminar

PREREQUISITE: KINE 1104.03, KINE 2310.03, KINE 2320.03, KINE 2430.03, KINE 2465.03, HAHP 2000.03, HAHP 3100.03, KINE 3500.03, and at least three 3000 or 4000 level kinesiology courses.

RESTRICTIONS: Restricted to Kinesiology students enrolled in their final year of study in the School of Health and Human Performance.

KINE 4700X/Y Senior Seminar

CREDIT HOURS: 6

This course is tailored for small groups of students. It is designed to allow students to focus on a particular issue or set of related issues, that are not part of the regular curriculum. Part of this course could entail a practicum experience. The course will only be offered if a faculty member is available to supervise the work.

NOTE: Course Details listed here also apply to KINE 4701/KINE 4702.

NOTES: Students taking KINE 4700 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Seminar

RESTRICTIONS: Restricted to Kinesiology students in their final year of study.

KINE 4701 Senior Seminar

CREDIT HOURS: 3

See KINE 4700.

KINE 4702 Senior Seminar

CREDIT HOURS: 3

See KINE 4700.

KINE 4740 Advanced Coaching Science Seminar

CREDIT HOURS: 3

The purpose of this course is to provide students with the opportunity to learn about the advanced principles and concepts of effective coaching planning and practice. Students will design, quantify and monitor a season training plan using PLAN software, addressing the performance factors of speed, strength, suppleness, stamina and skill appropriate to the maturational level of the athlete, as well as the integration of psychological preparation and competitive strategies. The course will also prepare students to meet the requirements for Level Three of the Theory component of the national Coaching Certification Program (NCCP).

FORMAT: Lecture

PREREQUISITE: KINE 3740.03 and KINE 3741.03, Level 1 Technical, National Coaching Certification Programme. (Students are required, at their own expense, to pursue this certification externally.)

KINE 4741 Advanced Coaching Science Practicum

CREDIT HOURS: 3

The purpose of this course is to provide students with the opportunity to observe, identify, apply and evaluate the advanced principles and methodologies of coaching that are associated with the creation of an effective practice, and training environment, for the developing athlete. This will be facilitated through the completion of a twelve week placement with a varsity, school, or club, mentor coach. Students will also apply an intervention strategy developed to enhance a controllable specific performance factor in a sport of choice.

PREREQUISITE: KINE 4740.03

KINE 4800X/Y Independent Study

CREDIT HOURS: 6

Senior undergraduate students develop an area of specialization under the direction of a faculty member. FORMAT I: Experimental research (laboratory experiment) or other research study, 3 or 6 hours FORMAT II: Literature research, 3 or 6 hours.

NOTE: Course Details listed here also apply to KINE 4801/KINE 4802.

NOTES: Students may take no more than a total of 6 credit hours of independent studies

PREREQUISITE: The same as those for experimental research independent studies described under FORMAT I above, except that classes in research methods and statistics are not required

RESTRICTIONS: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

KINE 4801 Directed Study

CREDIT HOURS: 3

See KINE 4800.

KINE 4802X/Y Directed Study

CREDIT HOURS: 3

See KINE 4800.

KINE 4900X/Y Honours Thesis

CREDIT HOURS: 6

Students carry out an independent piece of original research in the respective field of expertise of their supervisor. Students become familiar with the experimental procedures involved in data collection, analysis, literature searches and scientific writing.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

RESTRICTIONS: Restricted to Kinesiology honours students.

Course Descriptions - Leisure

LEIS 1127 Foundations of Recreation

CREDIT HOURS: 3

An understanding of the place and potential of leisure for individual Canadians and Canadian society is essential if we are to move beyond the conviction that only labor is to be valued. This course introduces students to concepts including play, sport, recreation and leisure; how they are viewed and valued in our society; and how they relate to health and well-being. The content provides an overview of leisure service delivery, public access to leisure opportunities, variations in leisure involvement due to social and cultural differences, and issues that are important for future leisure service professionals. Students will have the opportunity to increase writing, verbal communication and computer skills, and learn how to use the library effectively. Participation in a professional conference is a component of the learning experience of this course. The students are required to participate in an Orientation to the recreation program that will provide the environment that will create a learning community for the next three to four years of their education experience. Students are also required to join a recreation professional group while enrolled in this course.

FORMAT: Lecture| Discussion

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.

LEIS 2127 Leisure Theory

CREDIT HOURS: 3

This course will provide an introductory analysis of leisure in modern society from sociological, psychological, and social psychological perspectives. The role of leisure in the everyday life of individuals will be discussed in terms of social relationships, life stage, gender, the family, work, attitudes and motivations, etc. In addition, since the role and function of leisure is affected by political, economic, and cultural systems, a main-level perspective on leisure will also be provided by focusing on such topics as the influence of modern technology, the commercialization of leisure, the influence of social institutions and of the mass media.

FORMAT: Lecture| Discussion

LECTURE HOURS PER WEEK: 3

PREREQUISITE: SOSA 1002.03 and 1003.03 or SOSA 1200.06 or PSYO 1011.03, 1021.03, or 1031.03 and PSYO 1012.03 or 1022.03; LEIS 1127.03

RESTRICTIONS: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.

LEIS 2130 Foundations and Concepts of Therapeutic Recreation

CREDIT HOURS: 3

This course provides the conceptual foundation for the study of therapeutic recreation. Philosophical, conceptual and historical issues related to the delivery of therapeutic recreation services will be discussed in terms of health and health promotion. The course will also involve the examination of professional issues such as standards of practice, ethics, quality assurance, etc.; the scope of therapeutic recreation service delivery; and service delivery settings. Finally, students will be exposed to the variety of therapeutic recreation settings through site visits and observation. Students are required to join a therapeutic recreation professional group or provide the instructor with documentation on their current membership in a therapeutic recreation organization.

FORMAT: Lecture| Discussion

PREREQUISITE: LEIS 1127.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.

LEIS 2361 Program Planning

CREDIT HOURS: 3

Designing, planning, implementing and evaluating programs is fundamental to both leisure services and health education. Both disciplines develop programs to enhance the quality of life for individuals, groups and communities. This course reviews the principles of program planning, various program planning models, and examples of programs that are pertinent to leisure services and health education/promotion. The planning process will include issues such as targeting specific populations, scanning for needs and assets, partnering, managing stakeholder relationships, and evaluation.

FORMAT: Lecture| Discussion

PREREQUISITE: LEIS 1127.03

CROSS-LISTING: HPRO/HEED 2361.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation), Bachelor of Science (Recreation)/Bachelor of Management and Bachelor of Science (Health Promotion) students or with permission of the instructor.

LEIS 2384 Leisure and Individuals with Disabilities

CREDIT HOURS: 3

An introduction of current philosophy, issues and practices relating to leisure opportunities for persons who, due to physical, mental, and social conditions, have difficulty gaining access to community services. An analysis of leisure behaviours, attitudes and attitudinal development, barriers, and needs of individuals with various disabilities and members of the community will be provided throughout the course. Issues related to mainstreaming, integration and normalization will be themes throughout the course. A practicum is required in order to facilitate hands-on experience with individuals with disabilities.

FORMAT: Lecture| Discussion

PREREQUISITE: LEIS 1127.03

RESTRICTIONS: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.

LEIS 3127 Leisure Education

CREDIT HOURS: 3

This course is designed to provide students with the knowledge and skills required to facilitate leisure education interventions designed to bring about desired changes in the leisure behaviour of individuals with disabilities. While the focus of the course is on leisure education, the overarching concepts of health, wellness, and health promotion will be incorporated into the course material. The course will address the following three broad areas: a) concepts and models of leisure education, b) content related to specific skills required for leisure involvement [leisure awareness, values clarification, social skills development, friendship development, stress management, assertiveness, leisure resources, decision making, etc.] and c) instructional and interactional techniques used in leisure education. In addition, students will have the opportunity to plan and facilitate leisure education experiences in class.

FORMAT: Lecture| Lab| Discussion

LAB HOURS PER WEEK: 3

PREREQUISITE: LEIS 1127.03; LEIS 2130.03; LEIS 2361.03; LEIS 2384.03

RESTRICTIONS: Restricted to Recreation students. Others by permission of instructor, with priority to Health Professions students.

LEIS 3296 Leadership and Group Dynamics

CREDIT HOURS: 3

This course will focus primarily on the function of leadership and the process of small group dynamics, as applied to recreation and health education service delivery. Emphasis will be placed on the achievement of individual and group goals in health related settings. In addition, effective leadership of individuals and groups within a community, through direct experience and observation, will be emphasized.

FORMAT: Lecture| Discussion

PREREQUISITE: LEIS 1127.03 or HPRO 1195.03

RESTRICTIONS: Restricted to Health Promotion and Recreation students.

LEIS 3360 Analysis of Leisure Service Delivery Settings

CREDIT HOURS: 3

Reflections on the twentieth century reveal tremendous changes in the way people live. These changes have impacted work, family structure, and mental and physical well-being, and signal the importance and need of opportunities for leisure pursuits. Leisure is one of life's greatest gifts — an important dimension influencing the quality of an individual's life. Similarly, leisure enhances the quality of life available to a society or culture. The growth of the leisure industry reflects the ever increasing value that individuals are placing upon leisure in their lives. It is essential for the student of recreation management to know and understand that leisure delivery and life satisfaction are dependent upon effective organizational analysis and the quality of services provided. This course presents historical and contemporary concepts of the diverse types of agencies and institutions providing leisure services in North America. It will review the nature and effectiveness of services provided by various leisure service agencies in the private, private non-profit, commercial recreation, travel and tourism sectors of the leisure industry. It will seek to (a) evaluate the political, social, physical and economic impact on each of the sectors, (b) determine ways of assessing the assurance of quality service delivery, and (c) find ways of motivating improvements in the identifying and meeting of consumers' leisure needs, today and in the future. Consideration is also given to organizational structure and governance within leisure service settings, and the incorporation of the "benefits based approach" to leisure service delivery.

FORMAT: Lecture| Discussion

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS/HPRO/HEED 2361.03, MGMT 1000.03, MGMT 1001.03, MGMT 2801.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others by permission of instructor, with priority to Health Professions students.

LEIS 3362 Financial Management and Fundraising

CREDIT HOURS: 3

This course builds on previous functions of management such as program planning and analysis of leisure services by further focusing on the budgeting process, cost analysis, pricing of services, resource inventory and management, fundraising and grant writing. Strategic analysis of economic trends in understanding financial management, purchasing, inventory control, fiscal policy and accountability, and financial auditing will also be examined. Course content will be presented through lecture, case study analysis, budget, and grant proposal development. Such information will be applicable to management of public, private, commercial and/or community non-governmental recreation, health, and/or sport organizations.

PREREQUISITE: LEIS/HPRO/HEED 2361.03, MGMT 2101.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others with permission of the instructor.

EXCLUSIONS: LEIS 4361.03

LEIS 3370 Recreation Facility Design and Operations Management

CREDIT HOURS: 3

This course will emphasize the management functions of planning, organizing, and coordinating as it looks at the role of the manager in effectively managing recreation physical facilities and environmental resources. The course will review the new and emerging trends in facility design and cover the management process in the planning, and construction of indoor and outdoor recreation facilities, parks, playgrounds and pools. The course content will also focus on the core operational management competencies essential for the management of recreational facilities: namely, organizational structure and staffing; facility operations and maintenance, control and security; risk management and litigation; equipment procuring and inventory control.

FORMAT: Lecture

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS 2361.03/HPRO 2361.03/HEED 2361.03, MGMT 1601.03, MGMT 2303.03 and MGMT 2304.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others by permission of instructor, with priority to Health Professions students.

LEIS 3426 Therapeutic Recreation Service Delivery

CREDIT HOURS: 3

Issues related to the delivery of therapeutic recreation services will be the focus of this course. In particular, the following topics will be addressed: documentation in therapeutic recreation; client assessment issues; therapeutic recreation program planning (identifying client needs, selecting appropriate interventions, task and activity analysis, planning change-oriented programs, writing behavioural objectives, etc.); program and client evaluation; written plans of operation. The final component of this course will be the opportunity to work with individuals with disabilities in a program planning context.

FORMAT: Lecture| Discussion

PREREQUISITE: LEIS 1127.03, LEIS 2130.03, LEIS/HPRO/HEED 2361.03, LEIS 2384.03, KINE 3384.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.

LEIS 3492 Counselling for Health and Well-being

CREDIT HOURS: 3

This course is designed to provide students with the knowledge and skills required to utilize effective communication and helping behaviours which are designed to facilitate change in the leisure behaviour of individuals with disabilities or other health problems. While the focus of the course is on facilitation techniques, the overarching concepts of quality of life, health, and health promotion will be incorporated into the course material. The course will address four broad topical areas: a) concepts of quality of life, health, health promotion, and lifestyle; b) concepts and models of helping; c) communication skills and therapeutic techniques; d) lifestyles issues related to health and well-being. Finally, students will have the opportunity to practice counselling techniques through role playing and simulations.

FORMAT: Lecture| Lab| Discussion

LAB HOURS PER WEEK: 3

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.

LEIS 4101 Advanced Research Methods

CREDIT HOURS: 3

The purpose of this course is to provide students with an opportunity to develop their understanding of research methodologies and apply their knowledge to a specific recreation/leisure studies topic. Theories and methodologies will be discussed with relevance to leisure studies. The students will develop an honours thesis and ethics proposal as part of the course requirements.

PREREQUISITE: LEIS 1127.03, HAHP 3100.03

RESTRICTIONS: Restricted to Recreation honours students.

LEIS 4102 Honours Thesis

CREDIT HOURS: 3

The purpose of this course is to develop research skills by conducting an independent research project and writing a formal research report based on the findings.

Students will demonstrate their knowledge and ability in research methodologies, data collection, analysis, and formal academic writing.

PREREQUISITE: HAHP 3100.03 and LEIS 4101.03 with a grade of B or better in each, and ethical approval by August 1.

RESTRICTIONS: Restricted to Recreation honours students.

LEIS 4362 Recreation Entrepreneurship and Special Events

CREDIT HOURS: 3

Through lecture, discussion, and case study analysis, this course will provide the student with advanced insight and applied experience in selective people-based management concepts and functions of directing, coordinating and staffing that will be useful to the potential or practicing manager in sport administration, community, or commercial leisure and health service delivery agencies. In particular, a focus will be directed towards special event management and planning, and marketing and business plan development.

PREREQUISITE: LEIS/HPRO/HEED 2361.03, LEIS 3362.03, MGMT 2303.03, MGMT 2401.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others with permission of the instructor.

EXCLUSIONS: LEIS 3361.03

LEIS 4365 Administrative Concepts in Therapeutic Recreation

CREDIT HOURS: 3

This course emphasizes the essentials of management that are pertinent to being an effective practicing therapeutic recreation manager in either a clinical setting, a healthcare facility, or a community-based leisure or health service setting. After introducing the student to the theory and discipline of management and related ethical perspectives, the course will examine selective administrative functions in each of the areas of (a) *Operational Management*, i.e. budgeting and financial management, sources of revenue generation and grant writing, decision making, problem solving and conflict management, etc.; (b) *Human Services Management*, i.e., staff recruiting and selection, staff training and development, effective communication, motivation, performance appraisal, and volunteer management, etc. (c) *Consumer Management*, i.e., quality service management, practitioner performance, legal liability and risk management, etc.

FORMAT: Lecture| Discussion

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.

LEIS 4482 Therapeutic Recreation Specialization: Youth at Risk

CREDIT HOURS: 3

Youth as a sector of society and as a stage in human development is of great significance in the study of leisure. Particularly relevant is the issue of unemployment and underemployment which has created a number of problems such as low self-worth, alcohol abuse, teenage suicide, etc. There are programs being developed to address these problems, many of which are experientially based, e.g., Outward Bound, study service, service learning and national service. This course will study the phenomenon of youth development in the light of experiential educational approaches. During the course there will be an expectation that the students will meet and interact with a variety of youth. A practicum is included.

FORMAT: Lecture| Discussion

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03, PSYO 2220.03

RESTRICTIONS: Bachelor of Science (Recreation) students in their final two years of study.

LEIS 4512 Therapeutic Recreation Specialization: Physical and Developmental Disabilities

CREDIT HOURS: 3

This course is an upper level therapeutic recreation specialization course which takes the concepts and skills learned in the previous therapeutic recreation courses and applies them specifically to clients with physical and developmental disabilities. Initially, issues related to etiology, characteristics, and treatment needs of clients with various physical and developmental disabilities will be discussed. The implications of these characteristics for therapeutic recreation services and the various service settings in which therapeutic recreation services are provided will then be examined. Finally, the therapeutic recreation service delivery issues specific to physical and developmental disabilities will be examined, including assessment procedures, program intervention techniques, etc. Site visits, observations, and simulations will be used to facilitate the application of this material.

FORMAT: Lecture| Discussion

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03, KINE 3384.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students in their final two years of study. Others by permission of instructor, with priority to Health Professions students.

LEIS 4540 Therapeutic Recreation Specialization: Addiction and Mental Illness

CREDIT HOURS: 3

This course is an upper level therapeutic recreation specialization course which takes the concepts and skills learned in the previous therapeutic recreation courses and applies them specifically to clients with mental health problems and/or addiction. Initially, issues related to etiology, characteristics, and treatment needs of clients with addiction and mental illness will be discussed. The implications of these characteristics for therapeutic recreation services and the various service settings in which therapeutic recreation services are provided will then be examined. Finally, the therapeutic recreation service delivery issues specific to mental illness and addiction will be examined, including assessment procedures, program intervention techniques, etc. Site visits, observations, and simulations will be used to facilitate the application of this material.

FORMAT: Lecture| Discussion

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03, PSYO 2220.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students in their final two years of study. Others by permission of instructor, with priority to Health Professions students.

LEIS 4563 Therapeutic Recreation Specialization: Aging and Lifestyle

CREDIT HOURS: 3

This course is an upper level therapeutic recreation specialization course which takes the concepts and skills learned in the previous therapeutic recreation courses and applies them specifically to older adults. Initially, issues related to theories of aging, characteristics of older adults and pre-retirement planning will be discussed. The implications of these characteristics for therapeutic recreation services and the various service settings in which therapeutic recreation services are provided will then be examined. Finally, the therapeutic recreation service delivery issues specific to older adults will be examined, including assessment procedures, program intervention techniques, documentation and efficacy of therapeutic recreation service delivery for this population. Site visits, observations, and simulations will be used to facilitate the application of this material.

FORMAT: Lecture| Discussion

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03, PSYO 2220.03

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students in their final two years of study. Others by permission of instructor, with priority to Health Professions students.

LEIS 4597X/Y Recreation Management Internship

CREDIT HOURS: 15

This course is an extended professional development internship during the final year of study. It requires the completion of a minimum 14 week, internship in a recreation service delivery agency. The internship involves an in-depth agency analysis and the completion of a special service project for the agency, as well as several other academic projects. Details of the goals and specific procedures for the internship are contained in the current Internship Handbook.

PREREQUISITE: Completion of all other program requirements and approval of the Student Services Administrator. Standard First Aid and Level C CPR certifications. Minimum cumulative GPA of 2.0.

RESTRICTIONS: Restricted to Bachelor of Science (Recreation), and Bachelor of Science (Recreation)/Bachelor of Management students in their final term.

LEIS 4598 Therapeutic Recr Internship

CREDIT HOURS: 15

NOTES: This course is an extended professional development internship during the final year of study. It requires the completion of a minimum 16 week, 35 hours per week internship in a recreation service delivery agency. The internship involves an in-depth agency analysis and the completion of a special service project for the agency, as well as several other academic projects. Details of the goals and specific procedures for the internship are contained in the current Internship Handbook.

PREREQUISITE: Completion of all other program requirements and approval of the Student Services Administrator. Standard First Aid and Level C CPR certifications. Minimum cumulative GPA of 2.0.

RESTRICTIONS: Restricted to Bachelor of Science (Recreation) students in their final term.

LEIS 4700X/Y Senior Seminar

CREDIT HOURS: 6

This course is tailored for small groups of students. It is designed to allow students to focus on a particular issue or set of related issues, that are not part of the regular curriculum. Part of this course could entail a practicum experience. The course will only be offered if a faculty member is available to supervise the work.

NOTE: Course Details listed here also apply to LEIS 4701/LEIS 4702.
FORMAT: Seminar
RESTRICTIONS: Restricted to Recreation students in their final year of study

LEIS 4701 Senior Seminar

CREDIT HOURS: 3
See LEIS 4700.

LEIS 4702 Senior Seminar

CREDIT HOURS: 3
See LEIS 4700.

LEIS 4800X/Y Independent Study

CREDIT HOURS: 6
Senior undergraduate students develop an area of specialization under the direction of a faculty member.
NOTE: Course Details listed here also apply to LEIS 4801/LEIS 4802.
NOTES: Students taking 4800X/Y.06 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.
PREREQUISITE: A GPA of at least 3.00, a “B” grade in an earlier class in the area in which the project will be conducted (where applicable), consent of advisor, consent of faculty. Intention to register for an Independent Study should be confirmed with the undergraduate secretary by April 1st of the preceding academic year.
NOTE: Students may take no more than 6 credit hours of independent studies.

LEIS 4801X/Y Directed Study

CREDIT HOURS: 3
See LEIS 4800.

LEIS 4802 Directed Study

CREDIT HOURS: 3
See LEIS 4800.

Health Professions, Interdisciplinary

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department.

Course Descriptions

HLTH 4040 Health Law for Non-Lawyers

CREDIT HOURS: 3

The objective of this course is to provide the non-law student with an overview of significant legal issues that arise in the healthcare context. The first part of the course covers an introduction to the Canadian legal system, the Canadian healthcare system from a legal perspective, and the nature of legal proceedings. The second part focuses on issues of particular relevance in the provision of health services; these issues may include: practice management; confidentiality and disclosure of information, including whistle blowing; consent to treatment, including issues regarding minors and those lacking capacity; mental health law; and the regulation of drugs. Finally, the third part addresses contemporary issues in health law such as cost containment, issues of care at the end of life, and the impact of human rights legislation on healthcare services and delivery.

RESTRICTIONS: Health Profession students only

Bachelor of Health Science Degree Program

The BHSc program is a four-year degree program that provides an integrated course of studies including both theory and practice. There is also a post-diploma offering for practising professionals. (See section on Post-Diploma)

The program offers education in six professional streams:

- Diagnostic Cytology**
- Diagnostic Medical Ultrasound
- Nuclear Medicine Technology
- Radiological Technology
- Respiratory Therapy
- Post-Diploma

**Intake to the BHSc, (Diagnostic Cytology) program is suspended for the 2015-2016 and 2016-2017 academic years.

Students follow an integrated curriculum that includes core, interdisciplinary and discipline-specific courses. Clinical practica are included in each year of study requiring a full-time commitment in the May-June time period.

In order to accommodate all third year Respiratory Therapy students in required clinical rotations, courses for this group only will begin on September 2, 2015.

Dalhousie University confers a Diploma in Health Science (for Diagnostic Cytology, Diagnostic Medical Ultrasound, and Respiratory Therapy only) and a Bachelor of Health Science (Specific Discipline) degree. The programs leading to these credentials are accredited. The University *does not* determine eligibility for certification/registry exams. Rather, through accreditation, the University ensures that graduates of its programs meet the eligibility criteria set by the professional associations. Diagnostic Cytology, Diagnostic Medical Ultrasound (General, Cardiac and Vascular), Nuclear Medicine and Radiological Technology are accredited by The Canadian Medical Association. Respiratory Therapy is accredited by The Council on Accreditation for Respiratory Therapy Education.

For the professions of Diagnostic Cytology*, Diagnostic Medical Ultrasound, and Respiratory Therapy

Students are eligible to write the certification/registry exam upon successful completion of Year 3, when all requirements for a diploma exit have been met. They are eligible even if they choose not to exit with a diploma. Students should check with faculty concerning examination dates.

Following degree completion, students in Diagnostic Medical Ultrasound may be eligible to write certification/registry exams in the specialized areas of cardiac and vascular sonography.

***Note that intake to the Diagnostic Cytology program is suspended for 2015-2016.**

For the professions of Nuclear Medicine Technology and Radiological Technology

Students are eligible to write the CAMRT certification exam upon successful completion of the Bachelor of Health Science degree.

The Professions

Diagnostic Cytology

A cytotechnologist is a health professional who specializes in detecting and diagnosing cancer at a cellular level. A cytotechnologist requires expertise and precise diagnostic skills to identify and accurately evaluate minute changes within cells to provide a diagnosis. A cytotechnologist integrates scientific knowledge, cellular morphology and clinical history to formulate a cytological report. The cytotechnologist must be comfortable with using a compound microscope as this is how s/he must spend a great portion of their day. The cytotechnologist has limited patient contact, but must communicate effectively with other health care professionals in discussing results, procedures and/or policies and practices.

Diagnostic Medical Ultrasound

The Diagnostic Medical Sonographer utilizes high frequency sound waves, specialized equipment, and other diagnostic techniques to collect detailed information on the anatomical, physiological and pathological state of the patient. This health professional is able to produce and evaluate ultrasound images and related data that are used by specialized physicians to render a medical diagnosis. Sonographers typically provide technical expertise in abdomen, superficial structures, obstetrics/gynecology, vascular and cardiac applications.

Nuclear Medicine Technology

A nuclear medicine technologist is a health professional responsible for performing diagnostic and therapeutic nuclear medicine procedures. The technologist administers radiopharmaceuticals to the patient most often by way of an intravenous injection while adhering to proper drug preparation techniques, radiation protection guidelines and patient care practices.

The technologist operates a variety of radiation detection equipment, one of which is the gamma camera, in order to provide an assessment of the distribution of the radiopharmaceutical within the patient. By using various computer programs, the technologist analyzes the data to obtain the best information from the study which is then interpreted by a nuclear medicine physician.

Optimum operation of all equipment used in the practice of nuclear medicine is accomplished by the technologist, through the accurate implementation of a quality control program involving the assessment of radiation detection equipment, gamma cameras, and computers.

Radiological Technology

The radiological technologist is a health professional who utilizes radiation to produce images of patient's anatomical structures. The quality of the image is critical as it will assist the physician in the diagnosis/treatment of the disease or injury.

The technologist must be knowledgeable and skilled in a wide variety of procedures as all body systems are imaged. Responsibilities include (but are not limited to) positioning the patient for radiologic procedures, care of the patient, appropriate choice and use of equipment, image manipulation, selection of radiation exposure factors, implementation of radiation protection techniques and critique of the radiograph. Whatever the procedure, the technologist must be adaptable to meet challenges presented by the patient's physical or psychological state.

Respiratory Therapy

A respiratory therapist is a health professional who assists in the diagnosis, treatment and health promotion of patients with cardio-respiratory disorders through therapeutic means. Respiratory therapists provide cardio-pulmonary support, including cardio-pulmonary resuscitation, mechanical ventilation support, administration of medical gases, aerosolized medications, humidity therapy and airway management. The respiratory therapist also performs respiratory assessments of patients, tests and monitors cardio-pulmonary function, assists with the transport of high-risk patients and participates in home care programs.

The therapist plays an important role in the education of patients, families and hospital staff. The therapist is also involved in the maintenance, repair, testing and evaluation of respiratory equipment. The therapist must be able to provide competent assistance in cardio-pulmonary research.

Pre-Enrolment Requirements

Immunization (current detailed version of policy can be found at

<http://www.dal.ca/fhp> (current students, Policies and Procedures, clinical placement-Immunization forms)

1. It is a regulation of the Faculty of Health Professions and affiliated health care agencies that all students must be immunized. This has been instituted to protect patients as well as to protect students and employees.
2. Upon entering the program students must show certification for current immune status against tetanus, diphtheria, measles, mumps, rubella, rubeola and varicella (chickenpox). Evidence of tuberculin testing (Mantoux – two step method) must also be shown. Annual Mantoux testing is also required. It is also recommended that students be immunized for influenza on an annual basis.
3. The Hepatitis-B vaccination is required for all students. It is a series of three injections: the second and third shots are administered one month and six months after the first injection. The vaccination lasts for several years. This cost (approximately \$105, subject to change) must be paid by the student.

Criminal Record Check

- All BHSc students must provide a criminal record check (obtained within the previous six months) prior to attendance at any Capital Health or IWK facility. An additional check may be required depending on clinical site requirements for later placements.

BLS-HCP Certification

- All BHSc students must present proof of current certification in BLS at a Healthcare Provider prior to entry into the program. Students are required to maintain current certification throughout the program.

First Aid Certification

- All BHSc students must show proof of Standard First Aid current certification prior to entry into the program. Standard First Aid must be recertified bi-annually.

N95 Mask Fit Testing

- All BHSc students must be mask fit tested for a particulate respirator according to clinical site requirements. This must be recertified every two years, and may need to be recertified annually, depending on the mask in use at your clinical site. Note: There is a cost to the student for this procedure. Consult your school for details.

Additional Costs

There are additional costs associated with all professional streams of the BHSc program, including but not limited to Standard First Aid and BLS-HCP certification, immunization, uniforms, membership in professional associations, equipment, fees for writing registry exams, mask-fit testing, criminal record check, and travel to clinical sites. These additional costs are the responsibility of the student. A detailed list is available from the School.

Intellectual, Emotional and Physical Demands

The health professions included in the Bachelor of Health Science program are intellectually, emotionally and physically demanding. It is important that students become familiar with the profession before entering the program so that they are able to function at an acceptable standard. It is common to have to lift and move heavy equipment, position patients, wear lead aprons, manipulate valves and knobs on equipment, remain on your feet for extended periods of time and move frequently from one clinical area to another. It is also common to have to view information displayed on computer monitors or on slides under a microscope. It might be necessary to distinguish fine gradations of color and to respond to alarms and buzzers. There may be emergency situations that arise in the health care setting that require students to respond immediately. Shift work may be required, including rotating 12-hour shifts. Latex gloves are in wide use and chemicals are used in a variety of settings. Refer to <http://www.dal.ca/shs> (Admissions) for Statements of Fitness required for each profession. Students who have concerns about fitness should contact the School for further information.

Program Outline

Four-Year Entry-Level Program

The curriculum is comprised of four years of full-time study with each year including core, interdisciplinary, discipline-specific, health professional and basic science courses.

Fourth-year BHSc students must meet the School's clinical skills maintenance requirements and complete the "Record of Clinical Practise for Year 4" each term, until the 4th-year classwork is completed. Students should contact the School for full details.

Diagnostic Cytology

Please note that this program has suspended admissions for the 2015-2016 academic year.

Year 1

- BIOC 1420.03
- BIOL 1020.03
- CHEM 1410.03
- DCYT 1000.03
- DCYT 1010.03
- DCYT 1500.03
- HSCE 1000.03
- HSCE 1010.03
- HSCE 1020.03
- HSCE 1030.03
- IPHE 4900.00 (section 3)
- STAT 1060.03

Year 2

- BIOL 2020.03
- DCYT 2001.03
- DCYT 2002.03
- DCYT 2010.03
- DCYT 2500.03
- HESA 4000.03
- HSCE 2000.03
- HSCE 3000.03
- HSCE 3010.03
- IPHE 4900.00 (section 3)
- MICI 1100.03
- Open Electives (three credit hours)

Year 3

- BIOL 3024.03
- BIOL 3430.03
- DCYT 3000.03
- DCYT 3010.03
- DCYT 3020.03
- DCYT 3200.03
- DCYT 3210.03
- DCYT 3220.03
- DCYT 3230.03
- DCYT 3240.03
- DCYT 3500.03
- IPHE 4900.00 (section 3)

Year 4

Required:

- HLTH 4040.03
- HSCE 4030.03
- HSCE 4200.03
- HSCE 4220.03
- IPHE 4900.00 (section 3)
- Students must select 12 credit hours from the Faculty of Health Professions. These courses can be any FHP course, which may or may not include a discipline-specific specialty practice. A Suggested FHP Electives list will be provided to the student by their academic advisor. ** Note - a student can take no more than 5 HESA courses (HESA 4000 and HLTH 4040 are required courses, therefore allowing a maximum of 3 additional HESA electives). ** Note

- students who take all 4 DISM courses receive an additional Disability Management Certificate along with their BHSc degree.

- Open Electives (6 credit hours)*

* some courses may require the approval of the applicable department/faculty

Diagnostic Medical Ultrasound

Year 1

- DMUT 1000.03
- DMUT 1010.03
- DMUT 1020.03

- RADT 3240.06
- RADT 3500.03
- MRIT 4100.03 (if enrolled in MRIT certificate program)

Year 4

Required:

- HLTH 4040.03
- HSCE 4200.03
- HSCE 4220.03
- IPHE 4900.00 (section 3)
- RADT 4200.03
- RADT 4220.03
- In year 4 of the BHSc, students must select 15 credit hours from the Faculty of Health Professions. These courses can be any FHP course, which may or may not include a discipline-specific specialty practice. A Suggested FHP Electives list will be provided to the student by their academic advisor. ** Note - a student can take no more than 5 HESA courses (HESA 4000 and HLTH 4040 are required courses, therefore allowing a maximum of 3 additional HESA electives). ** Note - students who take all 4 DISM courses receive an additional Disability Management Certificate along with their BHSc degree.
- Open electives (6 credit hours)*

* some courses may require the approval of the applicable department/faculty

Or, for an MRIT certificate:

Required:

- MRIT 4110.03
- MRIT 4120.03
- MRIT 4130.03
- RADT 4000.12
- Faculty of Health Professions (FHP) Electives (3 credit hours)*

* some courses may require the approval of the applicable department

Respiratory Therapy

Year 1

- BIOC 1420.03
- HSCE 1000.03
- HSCE 1010.03
- HSCE 1020.03
- HSCE 1030.03
- IPHE 4900.00 (section 3)
- RSPT 1000.03

- RSPT 1020.03
- RSPT 1030.03
- RSPT 1500.03
- STAT 1060.03
- Open elective (three credit hours)

Year 2

- HSCE 2000.03
- HSCE 3010.03
- IPHE 4900.00 (section 3)
- RSPT 2000.03
- RSPT 2020.03
- RSPT 2030.03
- RSPT 2050.03
- RSPT 2063.03
- RSPT 2065.03
- RSPT 2070.03
- RSPT 2500.03
- Open elective (three credit hours)

Year 3

- IPHE 4900.00 (section 3)
- RSPT 3000X/Y.06
- RSPT 3010X/Y.06
- RSPT 3020X/Y.06
- RSPT 3230X/Y.06
- RSPT 3250X/Y.06
- RSPT 3500.03

Note: Fall term start date for RSPT year three is September 2, 2015

Year 4

Required:

- HESA 4000.03
- HLTH 4040.03
- HSCE 4030.03
- HSCE 4200.03
- HSCE 4220.03
- IPHE 4900.00 (section 3)
- In year 4 of the BHSc, students must select 15 credit hours from the Faculty of Health Professions. These courses can be of any FHP course, which may or may not include a discipline-specific specialty practice. A Suggested FHP Electives list will be provided to the student by their academic advisor. ** Note - a student can take no more than 5 HESA courses (HESA 4000 and HLTH 4040 are required courses, therefore allowing a maximum of 3 additional HESA electives). ** Note - students who take all 4 DISM courses receive an additional Disability Management Certificate along with their BHSc degree.
- Open electives (6 credit hours)*

* some courses may require the approval of the applicable department/faculty

A note about Open Electives: Open electives in both the BHSc and BHSc-Post Diploma programs can be any Dalhousie course at any level, or any course that Dalhousie accepts as a Transfer Credit. ** Note - a student can take no more than 5 HESA courses (HESA 4000 and HLTH 4040 are required courses, therefore a maximum of 3 additional HESA electives are allowed). ** Note - student who take all 4 DISM courses receive an additional Disability Management Certificate along with their BHSc degree.

BHSc Degree Completion Program

This program requires 30 credit hours of university study. It is available only to students who have successfully completed the Dalhousie diploma portion of the BHSc degree program in the professional stream for which you are applying.

Post Diploma Program

The School of Health Sciences offers a post diploma program leading to a Bachelor of Health Science in any of: Diagnostic Cytology, Diagnostic Medical Ultrasound, Medical Laboratory Technology, Nuclear Medicine Technology, Radiological Technology and Respiratory Therapy. The program has been developed to meet the needs of practicing technologists, sonographers and Respiratory Therapists who have expressed an interest in the opportunity to complete a baccalaureate degree as a means of pursuing life long learning and increasing career opportunities.

Through a guided selection process, students will choose courses that contribute to their professional growth and interest. Students will be provided the opportunity to broaden their knowledge and scope of the Canadian health care system as well as to enhance leadership abilities and to equip themselves for participation in a rapidly changing health care environment.

The post-diploma BHSc curriculum is equivalent to two years of full time university study (60 credit hours). Courses may be completed in the sequence best suited for the student; however, attention must be paid to the course pre-requisites. To accommodate the working professional the post diploma program is available on a full time or part-time basis and most of the courses are delivered via Online Web Learning (OWL). There are university regulations concerning the maximum length of time allowed for degree completion. Refer to Academic Regulation 15.2 (Duration of Undergraduate Studies).

Required Courses (30 credit hours)

- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- HSCE 1000.03: Introduction to Health Professional Practice
- HSCE 2000.03: Health Care Ethics
- HSCE 3000.03: Culture, Diversity and Health
- HSCE 3010.03: Introduction to Research Methods
- HSCE 4030.03: Leadership in Healthcare
- HESA 4000.03: Canadian Health Care Delivery
- HSCE 4200.03: Foundations in Clinical and Professional Education
- HLTH 4040.03: Health Law for Non-Lawyers
- HSCE 4220.03: Critical Research Evaluation
- Students may choose 5 electives from the Faculty of Health Professions (FHP). The Post-Diploma Advisor will provide a list of suggested courses for FHP Electives. Consult the academic timetable for details regarding the academic term and course information. ** Note - a student can take no more than 3 HESA elective courses in both the FHP Electives and Open electives combined. ** Note - students who take all 4 DISM courses receive an additional Disability Management Certificate along with their post diploma degree.
- Open elective courses (15 credit hours)*
Students may choose 5 electives from Dalhousie University. Consult the academic timetable for details regarding the academic term and course information. ** Note – a student can take no more than 3 HESA elective courses in both the FHP Electives and Open electives combined. ** Note - a student cannot repeat any courses they completed in their diploma. If a student does take a course that was completed in their diploma it will not be counted towards their health science degree. Consult the Post-Diploma advisor on any questions regarding electives.

* some courses may require the approval of the applicable department/faculty

Additional Options:

There are additional options (such as discipline-specific specialty practice, independent study courses, etc) available. Consult the Post-Diploma Advisor for approvals and information on restrictions."

Magnetic Resonance Imaging (MRI) Certificate

Entry level students in their fourth year or School of Health Sciences Alumni in Diagnostic Medical Ultrasound, Nuclear Medicine Technology and Radiological Technology may elect to complete a 24 credit hour Magnetic Resonance Imaging (MRI) Certificate. Entry level students who pursue the MRI certificate will complete courses/credit hours in addition to their normal degree requirements. (Entry level students in NUMT and RADT will complete 12 credit hours beyond the degree requirement and DMUT students will complete three credit hours beyond the degree requirement.) The 24 credit hour certificate program requires successful completion of:

- MRIT 4100.03: MRI Physics
- MRIT 4110.03: Advanced MRI Physics
- MRIT 4120.03: MRI Instrumentation, Safety and Contrast Media
- MRIT 4130.03: MRI Techniques and Applications
- DMUT 4000.12, NUMT 4000.12, or RADT 4000.12: Specialty Practice in MRI

Clinical site criteria must be met as a requirement of admission. Students enrolled in this program must meet School standards regarding BLS-HCP certification and

Standard First Aid.

Contact the School for further details.

Anaesthesia Assistant Certificate Program has been suspended until further notice.

Certificates in Cardiac or Vascular Ultrasound

Fourth-year and post-diploma students in Diagnostic Medical Ultrasound may complete a 15 credit hour program leading to a Certificate in Cardiac Ultrasound or a Certificate in Vascular Ultrasound. Working Diagnostic Sonographers who meet post-diploma requirements may also complete either of the Certificates as stand-alone credentials. The 15 credit hour certificates require successful completion of the following Dalhousie courses:

Certificate in Cardiac Ultrasound

DMUT 4020.03: Cardiac Ultrasound

DMUT 4000.12: Specialty Practice (Cardiac Ultrasound)

Certificate in Vascular Ultrasound

DMUT 4010.03: Vascular Ultrasound

DMUT 4000.12: Specialty Practice (Vascular Ultrasound)

Admission Requirements:

- Successful completion of a diploma program in Diagnostic Medical Ultrasound.
- Evidence of good standing with professional association.
- Two years of post-diploma work experience in Diagnostic Medical Ultrasound (for post-diploma applicants).

Contact the School for further details.

Regulations

All students are required to observe the University Regulations and Academic Regulations as described in this calendar.

Academic

Workload

The normal workload is 30 credit hours per year during the regular academic session (September - April). In addition, an eight to 10 week clinical practicum worth three credit hours takes place in May - June following Years 1, 2, and 3 of the BHSc program:

Fall Term	15 credit hours
Winter Term	15 credit hours
Spring Term (May-June)	three credit hours

Normally, only a full-time course of studies (30 credit hours during the regular academic year and a three credit-hour practicum in the May-June time period) can be taken in the first three years of the four-year entry-level program. Interruption of studies will only be granted for leave of absence or voluntary withdrawal. The fourth year can be pursued on a part-time basis, subject to Academic Regulation 15.2, which regulates duration of undergraduate studies.

It is the responsibility of each individual student to ensure she/he is enrolled in the courses required to complete the BHSc program of study. Therefore students are expected to meet with their academic advisors to seek counselling in this regard, to ensure that course selections and course load are appropriate, and will not cause difficulties later on in the program.

The BHSc post-diploma program is available on a part time basis.

Permission to carry more than a normal workload

A workload exceeding these credit hours in any given term will be considered an *Overload*.

- Students who wish to take on an overload must have the approval from the School of Health Sciences Academic Regulations Officer. Any student applying for an increased workload (overload) must apply at least four weeks in advance of the start of the semester or year in question.
- In their request, students should include their reasons for seeking an overload and include supporting arguments and evidence, such as their academic record and any other relevant considerations.
- Applications from students who give good reasons for wishing to take an overload will be considered. Such permission will not normally be granted to any student in the first year of study, or to any student who, in the preceding academic term, obtained a grade point average of less than 3.00.
- During Clinical Practicum and/or Clinical Education Courses no additional courses will be permitted without prior approval from the Academic Regulations Officer.
- Such requests require student completion of a Waiver of Academic Regulation Application, available from your academic advisor, or the Registrar's Office.
- Students who exceed the normal workload per academic term without the Academic Regulations Officer's approval, will be required to withdraw from the course.

Attendance at Courses

Regular and punctual attendance at courses is required; students are expected to notify instructors if they are going to miss a course. When the work of a student becomes unsatisfactory or attendance is irregular, the student may be required to withdraw from the school.

Grade Requirements

A student must receive a grade of C+ in each course with a course number in the School of Health Sciences (HSCE, DCYT, DMUT, MDLT, MRIT, NUMT, RADT, RSPT) in order for that course:

- to be counted as a credit towards the Bachelor of Health Science or Diploma in Health Science
- to be considered as a prerequisite for another course

Since most professional courses are prerequisites for more advanced courses and for clinical practica, the student's academic progress will be severely impacted by a failure. Students must seek academic advice.

Any student failing a required course for the second time must withdraw from the School of Health Sciences. Such a failure will be deemed an academic dismissal. See Regulation 20.2 for information on applying for readmission following an academic dismissal.

Students are reminded of Academic Regulations 18, 19.2 and 20.2 governing good standing, probation and academic dismissal.

Grade Point Average

A description of the grade point average (GPA) is found in Regulation 17.1.1 in the Dalhousie Undergraduate Calendar. The grade scale and definitions are found in Regulation 17.1.

Grading of Clinical Courses

Clinical education and specialty practice courses are graded on a letter grade basis.

Students who have been removed from any course due to unsafe or unsatisfactory clinical performance will receive a failing (F) grade.

Supplemental Exams

In courses with a course number in the School of Health Sciences, supplemental privileges may be granted only at the discretion of the course professor to a student with a final grade of FM (Regulation 16.5, Dalhousie Undergraduate Calendar). Each course outline will state the conditions that must be met in order to be eligible. The supplemental may be practical, written or combined practical/written exam at the discretion of the professor. Students who receive a grade of F are ineligible for supplemental privileges and will be required to repeat the course.

The date and time of the supplemental exam will be negotiated between the student and course professor within the following guidelines: For Fall Term courses, the supplemental exam must be completed before the end of the first week of classes of the Winter Term. For Winter Term courses, the supplemental exam must be passed

before the student can begin their clinical placement. In no case will a clinical placement be delayed for more than two weeks.

No more than two supplemental exams for courses with course numbers in the School of Health Sciences will be allowed in one year. Only one supplemental exam is allowed per course.

Voluntary Withdrawal

Students who voluntarily withdraw from the School of Health Sciences, having satisfactorily completed courses toward the BHSc (specific discipline) degree, with the intention of returning at a later date are advised that re-acceptance is contingent upon there being an available place.

Leave of Absence

1. Students who apply for a leave of absence (LOA) from their program of study must do so in writing to the School of Health Sciences Academic Regulations Officer. If possible, such applications should be made in advance of the term or year for which a LOA is being requested.
2. A request for Leave of Absence may be for a duration of one term to a maximum of one year in length. Students are eligible for a maximum of one such leave for the duration of their program.
3. Following approval of the application for LOA, the Academic Regulations Officer will notify the following individuals:< br/> a) The student;
b) Dalhousie University Registrar's Office;
c) Students Services office at the School; and
d) Student's academic advisor
4. Students may apply to return to the program prior to the designated end of the LOA. At the time students return to the program, the LOA is considered ended.
5. At least two to three months prior to returning to the program, students granted LOA will inform the following, in writing, of their intent to resume their studies:
a) Academic Regulations Officer; and
b) Student's academic advisor
Students should also initiate discussion with his/her academic advisor to discuss plans for resumption of courses and required remedial action plan.
6. The Academic Regulations Officer will notify the Dalhousie Registrar's Office and the Student Services office at the School of the student's planned return date to the program.
7. It is important to note that for the duration of a leave of absence, the clock stops on the six year rule for discipline-specific courses, and the 10 year rule for all other courses.
8. No academic credit will be granted towards BHSc course requirements for work completed at another institution during a LOA.
9. If a leave of absence is granted, students must ensure they formally withdraw from courses in accordance with Dalhousie University regulations.
10. Students on approved leave of absence will be considered in abeyance from regular academic programming, and therefore not a student at Dalhousie University, until such time that they reactivate their student status through the Registrar's Office.

Policy on Students at Academic Risk

The School of Health Sciences is concerned with providing students every opportunity for success in their program. Although the responsibility ultimately lies with the student, processes are in place at the School to identify, and assist students at academic risk.

The School of Health Sciences Studies at Academic Risk Policy aims to identify students at risk and recommend a course of academic and clinical remediation to ensure minimum clinical competencies are maintained.

Re-Admission of Academically Dismissed Students Policy

The primary goal of the School of Health Sciences and Dalhousie University is to ensure students are successful in their chosen profession while maintaining integrity of the program. Academic Regulation Section 20.1.3 allows for students who have been academically dismissed to apply for readmission to the University. Decisions on readmission to a program in the School of Health Sciences are made in consultation with the individual stream, clinical coordinator, and the Admissions Committee and will include, but not be limited to, consideration of availability of clinical placements.

Appeal

Students who wish to appeal a decision based on school or university regulations should consult the Chair of the Committee on Student Appeals concerning the correct procedure. Contact the School office for complete terms of reference for the Committee on Student Appeals and the application regarding academic appeals.

Clinical Education Components of Health Sciences

Health Sciences education encompasses a broad spectrum of learning experiences that together prepare caring, competent and ethical practitioners able to function in a

rapidly changing health care environment. The BHSc program is delivered through an integrated curriculum and students receive clinical education logically sequenced within core, interdisciplinary, discipline-specific, and clinical education courses and clinical practica. Clinical education components enable students to integrate theory with practice, master clinical competencies, develop critical reasoning skills and demonstrate professional behavior in a variety of settings with a diversity of patients.

Successful completion of all clinical components of the program is mandatory. Clinical practica and clinical education courses are required courses in the program of study and it is not possible to exercise the diploma exit option or to receive a BHSc degree without successfully completing these courses. In addition, each of the clinical experiences is a prerequisite for further progress in the program. Course outlines provide specific information about criteria for successful completion and opportunities for remediation.

In preparation for clinical practicum, all students must participate in a workshop dedicated to various aspects of professional behavior. The specific date is available from the School of Health Sciences.

Two elements of clinical education are:

Clinical Practicum

The program includes three clinical practica scheduled during the May - early July time period following Years 1, 2, and 3. The Clinical Practicum is designed to provide students with opportunities to develop the knowledge, skills and professional attitudes necessary to function as competent entry-level practitioners within a variety of settings and with a broad range of patients. Students are assigned to various clinical sites, based on their level within the program, the expected learning outcomes of their professional stream, and the availability of appropriate sites.

Clinical placements will be arranged by the Clinical Coordinator for the School of Health Sciences. Students may be assigned to clinical sites located within the Halifax region, throughout the Atlantic provinces, and in various sites across Canada. All expenses related to clinical placement are the responsibility of the student. Students are scheduled in a clinical setting for eight-to-ten consecutive weeks, and are supervised by faculty and/or preceptors. The normal student/preceptor ratio is one-to-one. Evaluation may include, but is not limited to, assessment of skills competencies, demonstration of professional behaviors, and application of theory to practice. Students monitor their personal and professional growth through introspection and reflection by maintaining journals, recording experiences in skills log books, successfully passing examinations or presenting case studies.

Clinical Education Courses

These courses provide students with an opportunity to gain hands-on experience in a specific area of clinical practice. Scheduling requires full-time rotations in the clinical setting and, depending on the area, may require shift work and/or off-site rotation. Students may be required to travel to a site outside Halifax in order to meet their clinical learning objectives. Preceptors supervise and guide students through this period of study and skills practice. Faculty continue to support students by facilitating seminars/tutorials, conducting assessments, providing constructive feedback and structuring learning experiences to further develop critical reasoning skills. Medical specialists and practitioners may be invited to share their expertise with students. There may be interprofessional learning experiences designed to enhance students' understanding of the team approach to health care. Evaluation methods may include, but are not limited to, a written examination to assess knowledge of subject matter, and practical assessments to confirm that clinical skills and professional behavior are readily applied at the expected level of performance. Clinical Education Courses are taken in Year 3 at all programs. In addition, Clinical Education Courses are a required part of the Year 4 curriculum for students in Nuclear Medicine Technology and Radiological Technology.

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. **Please register in IPHE 4900.00 section 3.** Successful completion of this course is a requirement for graduation and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

DCYT Diagnostic Cytology - Course Descriptions

DCYT 1000 Diagnostic Cytology Laboratory Applications

CREDIT HOURS: 3

This course provides a comprehensive study of topics relevant to the Diagnostic Cytology laboratory. Safety, collection of specimens, interpretation of clinical data, cytopreparatory techniques, and specimen processing are examined. Topics such as quality assurance, fixation and transportation of biological specimens, record keeping and organization of the Diagnostic Cytology laboratory will be discussed. Laboratory sessions will demonstrate the techniques required to prepare, and process a specimen adequate for cytologic diagnosis. In this context, emphasis will be placed on safe professional practice and the delivery of care.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

DCYT 1010 Gynecological Cytopathology I

CREDIT HOURS: 3

This course is designed to provide the foundation of gynecological Cytopathology. The purpose of the course is to introduce the basic skills and knowledge required to integrate, interpret and evaluate the cellular morphology of normal histologic tissues, cytologic cellular specimens of normal and benign processes of the female reproductive tract. Emphasis will be placed on the critical evaluation of pathologic and cytologic characteristics of normal and benign processes. The course will further allow students to maintain their professional practice in the role of respect towards the patient.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 4

COREQUISITE: HSCE 1030.03

PREREQUISITE: HSCE 1000.03, DCYT 1000.03, HSCE 1020.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

DCYT 1500 Laboratory and Clinical Gynecological Applications I

CREDIT HOURS: 3

This clinical practicum enables the student to integrate theoretical knowledge with application to specimen procurement and normal gynecological diagnoses. The student consolidates concepts, techniques and knowledge required to perform skills introduced in DCYT 1000.03, DCYT 1010.03, HSCE 1000.03. Students are expected to work under direct supervision, assume responsibility for their actions and decisions and to interact effectively with peers, technologists, supervisors and medical staff.

PREREQUISITE: BIOL 1010.03 OR 1020.03 and DCYT 1010 and HSCE 1020, and HSCE 1030

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology.

DCYT 2001 Gynecological Cytopathology II

CREDIT HOURS: 3

This course will focus on the cellular morphology and nomenclature of abnormal and malignant disease in gynecological cytology. Emphasis will be placed on the interpretation and critical evaluation of the cellular morphology of normal, benign and malignant disease processes. A variety of therapy modalities and recent advances will be examined.

NOTES: Students taking this class must register in both DCYT 2001 and DCYT 2002 in consecutive terms.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: DCYT 1500.03

RESTRICTIONS: Restricted to the Bachelor of Health Science students in the professional stream of diagnostic Cytology

EXCLUSIONS: DCYT 2000.06

DCYT 2002 Clinical Application for Gynecological Cytopathology

CREDIT HOURS: 3

This clinical education course will provide an opportunity for students to integrate theory from DCYT 2001.03 into clinical practice. This course will offer a simulated environment where diagnosis and reporting of gynecologic specimens will be the focus.

FORMAT: Lab

PREREQUISITE: DCYT 1500 and DCYT 2001

RESTRICTIONS: Restricted to Bachelor of Health Science in the professional stream of Diagnostic Cytology

EXCLUSIONS: DCYT 2000.06

DCYT 2010 Pathology and Histopathology for Diagnostic Cytology

CREDIT HOURS: 3

This course provides a basic understanding of the disease process at the tissue level. It provides the appropriate information that will allow a student to recognize conditions and to orient themselves about the origin of the cells. In the General Pathology component, topics covered include: cell injury and adaptation, inflammation and repair, disorders of growth, fluid and hemodynamic arrangements, neoplasia, environmental and nutritional diseases, microbiology and cancer. The Systems Pathology component covers all the body systems and enables the student to identify histologic processes related to various disease processes.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: DCYT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science in the professional stream of Diagnostic Cytology

DCYT 2500 Gynecological Cytopathology Practicum

CREDIT HOURS: 3

This practicum will prepare the student, in a clinical setting, to integrate and apply knowledge and skills introduced during DCYT 2000. The student consolidates cytologic concepts and microscopy skills necessary to render an accurate cytologic diagnosis. Students are required to diagnose gynecological cases ranging from normal to malignant. Students are expected to assume responsibility for their actions and decisions and to interact effectively with patients, peers, technologists, supervisors and medical staff.

PREREQUISITE: DCYT 2010.03, DCYT 2001.03, DCYT 2002.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

DCYT 3000 Non-Gynecological Cytopathology I

CREDIT HOURS: 3

This course provides a high level of study of non-gynecological Cytopathology. The purpose of the course is to introduce and develop the diagnostic skills required to integrate, interpret and evaluate the cellular morphology of normal, benign and malignant processes of non-gynecological specimens with particular emphasis on exfoliative cytology. Students will be introduced to the cellular morphology, nomenclature and diagnostic application of all disease processes diagnosed cytologically from all body sites external to the female reproductive tract. Emphasis will be placed on the critical evaluation of pathologic and cytologic characteristics. The students are placed in a simulated environment where diagnosis and reporting will be the focus. This environment provides an opportunity for active learning, feedback, communication between student and faculty as well as self evaluation. The course further allows students to maintain their professional practice in the role of respect towards the patient.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: DCYT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

DCYT 3010 Non-Gynecological Cytopathology II

CREDIT HOURS: 3

This course provides a high level of study of non-gynecological Cytopathology and reflects the content provided in DCYT 3000.03. The purpose of the course is to introduce and develop the diagnostic skills required to integrate, interpret and evaluate the cellular morphology of normal, benign and malignant processes of non-gynecological specimens with particular emphasis on Fine Needle Aspiration Biopsy (FNAB) cytology. Students will be introduced to the cellular morphology, nomenclature and diagnostic application of all disease processes diagnosed cytologically from all body sites external to the female reproductive tract. Emphasis will be placed on the critical evaluation of pathologic and cytologic characteristics. The students are placed in a simulated environment where diagnosis and reporting will be the focus. This environment provides an opportunity for active learning, feedback, communication between student and faculty as well as self evaluation. The course further allows students to maintain their professional practice in the role of respect towards the patient.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: DCYT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

DCYT 3020 Issues and Trends in Cytopathology

CREDIT HOURS: 3

Diagnostic cytology as a specialty of pathology and medicine will be scientifically analyzed. A critical appraisal of the literature relevant to advances in the detection and treatment of cancer will be conducted. Adjunctive techniques and practices will be evaluated. Emphasis will be placed on the understanding and application of research methodology. Research findings will be presented in oral and written format.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: DCYT 3000.03, DCYT 3010.03, DCYT 3200.03, 3024.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

DCYT 3200 Diagnostic Gynecological Cytology Application I

CREDIT HOURS: 3

This third year course is a 3.0 credit hour gynecological clinical education course. This will provide an opportunity for students to further their abilities, formulate decisions and implement diagnostic expertise in relation to gynecological clinical competencies. This provides an opportunity to implement and enhance knowledge with application to diagnosis. Under supervision, students assume responsibility and build their case load to approximately 70% of that of an entry-level diagnostic cytotechnologist.

PREREQUISITE: DCYT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

DCYT 3210 Diagnostic Gynecological Cytology Application II

CREDIT HOURS: 3

This third year course is a 3.0 credit hour gynecological clinical education course. This will provide an opportunity for students to further their abilities, formulate decisions and implement diagnostic expertise in relation to gynecological clinical competencies. This provides an opportunity to implement and build upon knowledge and experience with application to diagnosis gained in DCYT 3200.03. Under supervision, students assume responsibility and build their case load to approximately 80% of that of an entry-level diagnostic cytotechnologist.

PREREQUISITE: DCYT 3200.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

DCYT 3220 Diagnostic Gynecological Cytology Application III

CREDIT HOURS: 3

This third year course is a 3.0 credit hour gynecological clinical education course. This will provide an opportunity for students to further their abilities, formulate decisions and implement diagnostic expertise in relation to gynecological clinical competencies. This provides an opportunity to implement and further build upon knowledge and experience with application to diagnosis gained in DCYT 3210.03. Under supervision, students assume responsibility and build their case load to approximately 90% of that of an entry-level diagnostic cytotechnologist.

PREREQUISITE: DCYT 3200.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

DCYT 3230 Diagnostic Non-Gynecological Cytology Application I

CREDIT HOURS: 3

This third year course is a 3.0 credit hour non-gynecological clinical education course. This will provide an opportunity for students to further their abilities, formulate decisions and implement diagnostic expertise in relation to non-gynecological clinical competencies. This provides an opportunity to implement and further build upon knowledge and experience with application to diagnosis gained in DCYT 3000.03 and DCYT 3010.03. Under supervision, students assume responsibility and build their case load to approximately 80% of that of an entry-level diagnostic cytotechnologist.

PREREQUISITE: DCYT 3010.03 and DCYT 3200.03, DCYT 3000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

DCYT 3240 Diagnostic Non-Gynecological Cytology Application II

CREDIT HOURS: 3

This third year course is a 3.0 credit hour non-gynecological clinical education course. This will provide an opportunity for students to further their abilities, formulate decisions and implement diagnostic expertise in relation to non-gynecological clinical competencies. This provides an opportunity to implement and further build upon knowledge and experience with application to diagnosis gained in DCYT 3230.03. Under supervision, students assume responsibility and build their case load to approximately 90% of that of an entry-level diagnostic cytotechnologist.

PREREQUISITE: DCYT 3010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

DCYT 3500 Gynecological and Non-Gynecological Clinical Applications - Practicum III

CREDIT HOURS: 3

This clinical practicum provides the student with an opportunity to integrate the theoretical knowledge and the application of cytopathologic diagnoses to gynecologic and non-gynecologic sites. The purpose of this practicum is to further develop the diagnostic skills required to integrate, interpret and evaluate the cellular morphology of normal, benign and malignant gynecological and non-gynecological disease processes. Emphasis will be placed on the critical evaluation of pathologic and cytologic morphology while continuing to meet the objectives set by the School. The course will further allow the student to maintain their professional practice in the role of respect towards the patient.

PREREQUISITE: DCYT 3240.03, DCYT 3220.03, DCYT 3020.03

DCYT 4000X/Y Specialty Practice I/Specialty Practice II

CREDIT HOURS: 12

Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. This course can be six or twelve credit hours depending on the nature of the specialty practice. Specialty practice is arranged through consultation with the fourth year/post diploma advisor.

NOTE: Course Details listed here also apply to DCYT 4100.

PREREQUISITE: DCYT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTIONS: Restricted to Bachelor of Health Science students in DCYT. Enrolment may be limited due to clinical site availability.

DCYT 4100 Specialty Practice Diagnostic Cyto II

CREDIT HOURS: 6

See DCYT 4000.

DMUT Diagnostic Medical Ultrasound - Course Descriptions

DMUT 1000 Fundamentals of Sonography I

CREDIT HOURS: 3

This course provides a general overview of organs and structures within the abdominopelvic cavity which are fundamental to sonography. It includes concepts of relational sectional anatomy and basic ultrasound scanning principles. Also included is an historical perspective and discussions involving the national Code of Ethics for the profession of Diagnostic Medical Ultrasound.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 1010 Principles and Instrumentation of Diagnostic Medical Ultrasound I

CREDIT HOURS: 3

This course provides the student with the basic knowledge of the physical principles of ultrasound. It examines how diagnostic ultrasound works (how it is generated and how it interacts with tissues). Also covered in this course is the instrumentation used to transmit, receive and present echo information and the application of these to the practice of Diagnostic Medical Ultrasound.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

COREQUISITE: PHYC 1300X/Y.06

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 1020 Fundamentals of Sonography II

CREDIT HOURS: 3

This course provides a general overview of the normal sonographic appearance of organs and structures of the abdominopelvic cavity which are fundamental to sonography. Where applicable, the sonographic application and normal variants of specific organs and structures within the abdominopelvic cavity are also discussed. Included are reference charts highlighting other common diagnostic tests, normal measurements, and laboratory values associated with each organ and structure of interest.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 3
PREREQUISITE: DMUT 1000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 1500 Clinical Practicum I in Diagnostic Medical Ultrasound

CREDIT HOURS: 3

This clinical practicum introduces students to Diagnostic Medical Ultrasound. Within the Diagnostic Imaging Department, students will develop a knowledge of departmental procedures, an ability to interpret and utilize requisitions and demonstrate proficiency in equipment selection and instrumentation. Students will develop clinical skills in performing abdominal and pelvic ultrasound examinations. Students will apply health professional practice skills when interacting with patients and healthcare professionals.

PREREQUISITE: DMUT 1010.03, 1020.03, HSCE 1010.03, PHYC 1300.06, HSCE 1020.03, HSCE 1030.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 2000 Sonography of the Abdomen/Superficial Structures I

CREDIT HOURS: 3

This is the first of three courses related to abdomen and superficial structures. This course will focus on the pathology of the vascular system, liver, biliary system and the mammary glands. This course will provide further opportunity to develop skills and integrate knowledge from all discipline specific first year courses. The etiology, incidence, laboratory testing, sonographic presentation, differential diagnosis and treatment modalities will be examined. Documented ultrasound images with relevant pathology will be challenged, analyzed, and reviewed in a simulated clinical laboratory environment. This simulated environment will further provide an opportunity for students to integrate their knowledge of anatomy and pathology to formulate sonographic scanning strategies.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: DMUT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 2010 Sonography in Gynecology

CREDIT HOURS: 3

This course focuses on the normal structure, development, and pathologies of the female genitourinary system in the non-gravid state. Sonographic scanning techniques, presentation and documentation of normal and abnormal gynecological ultrasound examinations are covered. Critical evaluation of uterine and ovarian pathologies and sonographic characteristics associated with these pathologies will be fully explored.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: DMUT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 2020 Principles and Instrumentation of Diagnostic Medical Ultrasound II

CREDIT HOURS: 3

This course builds on knowledge and experience gained in DMUT 1010. This course provides the student with principles and instrumentation of continuous-wave/pulsed-wave Doppler spectral analysis and color-flow imaging. Imaging artifacts, quality assurance, and bioeffects/safety are investigated thoroughly. Application of this knowledge and the development of skills and competence needed in the clinical practice of Diagnostic Medical Ultrasound will be included in this course.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: DMUT 1500.03, HSCE 2010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 2030 Sonography of the Abdomen/ Superficial Structures II

CREDIT HOURS: 3

This is the second of three courses related to Abdomen and Superficial Structures. The course will focus on the pathology of the: pancreas, adrenals, retroperitoneum, lymphatic system, urinary tract, thyroid and parathyroid glands. Etiology, incidence, laboratory testing, sonographic presentation, differential diagnosis and treatment modalities related to these body systems will be examined. Students will be challenged to analyze, formulate sonographic scanning strategies, and diagnose appropriately relevant pathology viewed in a hospital clinical environment. The course will provide students with the opportunity to integrate skills and concepts learned in previous courses and continue development of professional skills in Diagnostic Medical Ultrasound.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: DMUT 2000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 2040 Sonography in Obstetrics I

CREDIT HOURS: 3

This course provides the learner with a comprehensive study of normal and abnormal first trimester and normal second trimester obstetrical ultrasound examinations. Critical evaluation of first trimester pregnancy complications and the sonographic appearances in a second trimester obstetrical patient essential to continuing study in DMUT 3000. Multiple gestations, infertility and assisted reproductive technologies are also explored in detail. The study of embryology is an important focus of this course and the sonographic appearance associated with the growing fetus. Ethical issues related to obstetrical ultrasound will be examined and discussed.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: DMUT 1500.03

RESTRICTIONS: HOLD Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 2500 Clinical Practicum II in Diagnostic Medical Ultrasound

CREDIT HOURS: 3

Practicum II provides students with the opportunity to continue skill development in abdominal and pelvic ultrasound examinations including the recognition, identification and documentation of pathologies. In addition, students will develop clinical skills in performing first and second trimester obstetrical ultrasound examinations. This clinical practicum requires the student to travel to clinical sites outside the Halifax Regional Municipality. Students will be responsible for travel and accommodation arrangements.

PREREQUISITE: DMUT 2010.03, 2020.03, 2030.03, HSCE 2040.03, DMUT 2040.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3000 Sonography in Obstetrics II

CREDIT HOURS: 3

This course provides a comprehensive study of the normal and abnormal second and third trimester ultrasound examinations. Critical evaluation of fetal pathologies and sonographic characteristics associated with these pathologies will be fully explored. Maternal complications associated with pregnancy and antenatal testing will also be covered.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: DMUT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3010 Sonography of Abdomen/ Superficial Structures III

CREDIT HOURS: 3

The third and final course DMUT 3010, Abdomen and Superficial Structures III, focuses on abdominal pathology of the gastrointestinal tract and organs of the male reproductive system, noncardiac chest, abdominal Doppler, musculoskeletal, extracranial cerebral vascular and lower extremity venous ultrasound. This course will prepare the student for a more advanced level of study and clinical practice in ultrasound interventional biopsy, aspiration techniques and procedures. An integration of previously acquired knowledge and clinical skills will be applied to a more advanced level of theoretical and clinical application using Doppler ultrasound technology.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: DMUT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3200 Abdominal Imaging

CREDIT HOURS: 3

This clinical education course allows the student to integrate and consolidate knowledge, concepts and skills developed and maintained from previous courses. The expectation is that the student will be able to recognize, identify and document normal and abnormal sonographic images of the abdomen under indirect supervision. This experience will enhance the student's ability to make independent decisions and to critically evaluate images of abdominal organs and related structures. Students are expected to assume responsibility for their actions and decisions. Students are expected to interact effectively with patients and all healthcare team professionals while maintaining accepted professional practice standards in an ultrasound environment.

PREREQUISITE: DMUT 3010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3210 Obstetrical Imaging

CREDIT HOURS: 3

Building on experience developed in Clinical Practicum II and knowledge and concepts learned in Sonography in Obstetrics and Gynecology I and II, this obstetrical ultrasound clinical education course enhances the student's ability to recognize, identify and document normal and abnormal obstetrical ultrasound examinations. This course provides the opportunity to reflect on their own clinical and professional skills in dealing with the obstetrical patient. Assuming responsibility for their actions and decisions in the clinical setting, the student becomes competent in performing obstetrical sonographic examinations.

PREREQUISITE: DMUT 3000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3220 Gynecological Imaging

CREDIT HOURS: 3

This clinical course allows the student to integrate knowledge, concepts and skills developed in previous courses and enhance their independent decision making skills. The expectation is for the student to achieve competency in recognizing, identifying, and documenting normal and abnormal sonographic images of the female pelvis under indirect supervision. The student will experientially reflect on their own skills and assume responsibility for their actions and decisions in the clinical setting.

PREREQUISITE: DMUT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3230 Superficial Structure Imaging

CREDIT HOURS: 3

This clinical education course allows the student to integrate and consolidate knowledge, concepts and skills developed and maintained from previous courses. The expectation is that the student will be able to recognize, identify and document normal and abnormal sonographic images of superficial structures under indirect supervision. This clinical experience will enhance the student's ability to make independent decisions and to critically evaluate images of superficial structures. Students are expected to assume responsibility for their actions and decisions. Students are expected to interact effectively with patients and all healthcare professionals while maintaining accepted professional practice standards in an ultrasound environment.

PREREQUISITE: DMUT 3010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3240 Application of Ultrasound Instrumentation

CREDIT HOURS: 3

This clinical education course further expands the student's ability to analyze and process data. Integrating knowledge, concepts and skills developed in previous courses, the student will enhance their independent decision making skills. The expectation is for the student to achieve competency in their utilization of ultrasound instrumentation in a variety of ultrasound examinations. The student will experientially reflect on their own skills in their application of theory to practice.

PREREQUISITE: DMUT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 3500 Clinical Practicum III in Diagnostic Medical Ultrasound

CREDIT HOURS: 3

Practicum III provides students with the clinical exposure to various specialties which include: related imaging modalities, vascular technology, echocardiography and fetal assessment (biophysicals, amniocentesis etc.). This clinical practicum will provide the student with the opportunity to correlate ultrasound imaging with other imaging specialties. This clinical practicum also allows the student to gain clinical exposure to specialty practice areas which they may choose to pursue in the fourth year.

PREREQUISITE: Successful completion of all other third year DMUT courses

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

DMUT 4000X/Y Specialty Practice I/Specialty Practice II

CREDIT HOURS: 12

Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. This course can be six or twelve credit hours depending on the nature of the specialty practice. Specialty practice is arranged through consultation with the program advisor.

NOTE: Course Details listed here also apply to DMUT 4100.

PREREQUISITE: DMUT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTIONS: Restricted to Bachelor of Health Science students in DMUT. Enrolment may be limited due to clinical site availability.

DMUT 4010 Vascular Ultrasound

CREDIT HOURS: 3

This course builds on knowledge and experience gained in DMUT 2020 (Principles and Instrumentation of Diagnostic Medical Ultrasound II) and DMUT 3010 (Sonography of the Abdomen/Superficial Structures III). The student will review hemodynamics, physics and instrumentation, spectral analysis, colorflow imaging and the use of contrast agents in vascular sonography. Applications in vascular sonography and technology to include, examinations of the cerebral vessels, arteries and veins of the extremities and abdominal vessels will be covered.

FORMAT: Online Delivery

PREREQUISITE: DMUT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Sciences students in the professional stream of Diagnostic Medical Ultrasound. Post diploma students by permission of instructor

DMUT 4020 Cardiac Ultrasound

CREDIT HOURS: 3

This course builds on knowledge and experience gained in DMUT 2020 (Principles and Instrumentation of Diagnostic Medical Ultrasound II) and HSCE 2040 (Pathophysiology for Health Sciences). This course provides a comprehensive study of the normal and abnormal cardiac ultrasound examinations. The student will review anatomy and physiology and hemodynamics of the heart and relate theory to echocardiography. General principles of cardiac ultrasound, normal echo examination techniques and standard views will be covered including: two-dimensional, M-mode and Doppler. Clinical indications for echocardiography examinations will be covered as well as congenital and acquired cardiac disease processes evaluated with echocardiography.

FORMAT: Online Delivery

PREREQUISITE: DMUT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Sciences students in the professional stream of Diagnostic Medical Ultrasound. Post diploma students by permission of instructor

DMUT 4100 Specialty Practice Diag Med Ultras II

CREDIT HOURS: 6

See DMUT 4000.

HSCE Health Sciences Education - Course Descriptions

HSCE 1000 Foundations of Health Care Practice

CREDIT HOURS: 3

This course introduces students in the five BHSc professions to the Canadian Health Care System and the role of the health professional within that system. The course compares the Canadian system to systems from other countries and covers diverse healthcare models such as primary care, palliative care, long term care, etc. The role of the health professional is explored through the study of professionalism, scope of practice, and risk management in an interprofessional context. The course will allow students the opportunity to develop/improve essential skills to help them study and work in a multi-disciplinary system including critical thinking, writing skills, communication and teamwork.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: Restricted to Bachelor of Health Science students or by permission of instructor

HSCE 1010 Clinical Skills for Health Sciences

CREDIT HOURS: 3

This course will further the students' understanding of working within a healthcare environment as they learn the skills required to provide patient-centered care. The course provides academic knowledge and laboratory experiences for students to develop clinical skills essential in all five professional streams of the BHSc program.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: HSCE 1000.03 and one discipline specific course

RESTRICTIONS: Restricted to Bachelor of Health Science students

HSCE 1020 Human Anatomy and Physiology I

CREDIT HOURS: 3

This course, which is along with HSCE 1030 is designed to provide the student with an understanding of the cellular, organ, and system levels of organization of the human body. It includes a comprehensive study of facts pertaining to the covering, support and movement of the human body. Topics covered will include: organization of the body, the integumentary, skeletal and muscular systems.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: None, however priority is given to Health Sciences students.

HSCE 1030 Human Anatomy and Physiology II

CREDIT HOURS: 3

This course studies the systems that serve in maintaining the human body and ensuring its continuity. Topics covered will include: cardiovascular, immune, respiratory, digestive, urinary and reproductive systems. This course will provide students with an appreciation of the complexities of the human function and form, and set the stage for understanding the integration of organ system functions.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: HSCE 1020.03

RESTRICTIONS: None, however priority is given to Health Sciences students

HSCE 2000 Health Care Ethics

CREDIT HOURS: 3

This is an introductory course in healthcare ethics. Students will be provided with an overview of moral theory and principles; a chance to reflect upon and discuss contemporary ethical issues in healthcare; and an opportunity to acquire the conceptual and practical tools required to make competent ethical decisions in their own practice. Teaching methods will include lecture, group instruction and case analysis.

FORMAT: Online Delivery

RESTRICTIONS: None, however priority is given to Health Sciences students

HSCE 2010 Digital Imaging

CREDIT HOURS: 3

This course provides an overview of computer basics, digital file structure, digital imaging principles and their applications in radiological technology, magnetic resonance imaging, nuclear medicine technology, and diagnostic medical ultrasound. The principles of image distribution by Teleradiology and Picture Archiving Communication Systems are also provided. The course operates as a distance education course using BLS, with materials being distributed via the Internet. Tutorial sessions are scheduled throughout the term.

PREREQUISITE: RADT 1010.03 or NUMT 1020.03 or DMUT 1010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional streams of Diagnostic Medical Ultrasound, Nuclear Medicine Technology and Radiological Technology

HSCE 2020 Radiation Physics

CREDIT HOURS: 3

The purpose of this course is to build on the basic principles of the science of radiation physics with a focus on the concepts that directly apply to the medical radiation fields of nuclear medicine technology and radiological technology. Topics of study include atomic physics, radioactivity and electromagnetic radiation. The course will explain radiation interaction with matter in relation to attenuation, absorption and dosimetry. X-ray production, as well as fission and reactor production of radioactive materials used in nuclear medicine will be investigated. Students will be provided an opportunity to investigate the newest modalities connected with their fields.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

COREQUISITE: PHYC 1300.03 or Equivalent

RESTRICTIONS: Restricted to students enrolled in the Bachelor of Health Science; students in the professional streams of Nuclear Medicine Technology and Radiological Technology programs

HSCE 2030 Radiation Biology and Protection

CREDIT HOURS: 3

This course provides a theoretical overview of the bioeffects of radiation. This knowledge is linked to radiation physics principles as applied to the practice of medical radiation technology. Current regulations regarding radioactive substances and imaging and survey equipment will be presented. Emphasis will be placed on practical means of radiation protection for the technologist, the patient and the general public.

FORMAT: Lecture

PREREQUISITE: HSCE 2020.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional streams of Nuclear Medicine Technology and Radiological Technology

HSCE 2040 Pathophysiology for Health Sciences

CREDIT HOURS: 3

This course is intended to provide a concentrated study of the biological and behavioural interactions of the human body in disease. Emphasis will be placed on the examination of the Pathophysiology of diseases prevalent in Canada. This course will examine various therapeutic strategies used in treating these diseases and their implications for patient care.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: HSCE 1020.03, HSCE 1030.03

RESTRICTIONS: None, however priority is given to the Health Sciences students

HSCE 3000 Culture, Diversity and Health

CREDIT HOURS: 3

Community development, community advocacy, social justice and primary healthcare will be the theoretical frameworks for exploring the Health Science practitioner's role and practice in the context of working with populations in high risk environments. The emphasis is on understanding the issues, collaborating with those involved,

and building individual and group capacities to enhance and promote the health and well-being of specific populations.

FORMAT: Online Delivery

RESTRICTIONS: None, however priority is given to the Health Sciences students

HSCE 3010 Introduction to Health Research

CREDIT HOURS: 3

HSCE 3010 is designed to help students make sense of the research they can be expected to encounter in their professional practices. By focusing on the role of research in contemporary health professional practice this course will provide the student with a sound basis in the principles underlying research theory, measurement issues, experimental, exploratory and descriptive research designs, data analysis and communication skills.

FORMAT: Online Delivery

RESTRICTIONS: None, however priority is given to the Health Sciences students

EXCLUSIONS: HAHP 3100.03

HSCE 3600 Clinical Elective

CREDIT HOURS: 1

This clinical elective is available for visiting students only, in the health professions of diagnostic medical ultrasound, diagnostic cytology, nuclear medicine technology, radiological technology, or respiratory therapy. Contact department for details.

HSCE 4030 Leadership In Health Care

CREDIT HOURS: 3

This course will consider various elements of leadership in a complex, multi-professional and rapidly changing healthcare system, and will enable students to assess and strengthen their own leadership style. An understanding of current trends and issues in healthcare will provide a basis for the development of leadership skills. Critical thinking, decision-making processes and other leadership behaviours will be examined.

FORMAT: Online Delivery

RESTRICTIONS: None, however priority is given to the Health Sciences students

HSCE 4040 Independent Study

CREDIT HOURS: 3

The student will carry out an independent study or complete a project related to health sciences. Facilitation is provided by faculty or a course supervisor and is dependent upon the nature of the course of study. Students wishing to pursue HSCE 4040.03 must consult with the program/post diploma advisor for approval a minimum of three months prior to the beginning of the term in which they hope to enrol in the course. This course may not be offered every year and will be contingent upon the availability of faculty.

HSCE 4041 Independent Study

CREDIT HOURS: 3

The student will carry out an independent study or complete a project related to health sciences. Facilitation is provided by faculty or a course supervisor and is dependent upon the nature of the course of study. Students wishing to pursue HSCE 4041.03 must consult with the program/post diploma advisor for approval a minimum of three months prior to the beginning of the term in which they hope to enroll in the course. This course may not be offered every year and will be contingent upon the availability of faculty.

HSCE 4200 Foundations in Clinical & Professional Education

CREDIT HOURS: 3

Using an adult education theoretical perspective, this course introduces students to elements of program design, objective setting, selection of instructional methods and assessment strategies for application to their roles as preceptors, patient educators, and lifelong students. This course will discuss a variety of teaching, learning and delivery methods as well as their appropriateness to clinical and professional education.

FORMAT: Online Delivery

RESTRICTIONS: Restricted to students within the Faculty of Health Professions

HSCE 4220 Critical Research Appraisal and Practices

CREDIT HOURS: 3

This course is designed to give students and practicing professionals the opportunity to further develop and practice those skills essential to the competent translation of knowledge into clinical practice. Through evaluation and use of evidence-informed decision making and change management processes students will be prepared to assist their future workplaces in staying at the forefront of clinical practice.

PREREQUISITE: HAHP 3100 or HSCE 3010 or equivalent

RESTRICTIONS: Restricted to 4th Year Health Professions students.

MDLT Medical Lab Technology - Course Descriptions

MDLT 4000X/Y Specialty Practice I

CREDIT HOURS: 12

Specialty practice provides students with learning experiences at a level not previously available and affords the opportunity to attain additional competence and knowledge in a specialty practice area. This may include learning directed toward additional certification or clinical and theoretical opportunities that stretch the boundaries of a particular discipline. There are three components to specialty practice: clinical, contextual and theoretical. This course can be six or twelve credit hours depending on the nature of the specialty practice. Six-credit hour specialty practice required 220 clinical hours and twelve credit hours requires 440 clinical hours. Specialty Practice is arranged through consultation with the program/post diploma advisor.

NOTE: Course Details listed here also apply to MDLT 4100 .

PREREQUISITE: Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTIONS: Restricted to BHSc students MDLS; Enrollment may be limited due to clinical site availability.

MDLT 4100 Specialty Practice II

CREDIT HOURS: 6

See MDLT 4000.

MRIT Magnetic Resonance Imaging Technology - Course Descriptions

MRIT 4100 MRI Physics

CREDIT HOURS: 3

The physical principles involved with Magnetic Resonance Imaging (MRI) are introduced. The course covers topics such as basic principles, image weighting and contrast, image acquisition and reconstruction, data collection and image formation, and a detailed study of MRI pulse sequences.

RESTRICTIONS: Restricted to 3rd and 4th year BHSC DMUT, NUMT or RADT students. Permission to register must be obtained by the School of Health Sciences.

MRIT 4110 Advanced MRI Physics

CREDIT HOURS: 3

Advanced MRI Physics builds on the foundations established in MRIT 4100. This course includes a comprehensive study of the artifacts encountered in magnetic resonance imaging as well as flow phenomena. The physics behind advanced imaging techniques are presented including: vascular, cardiac, functional, diffusion, perfusion, spectroscopy, interventional and breast MR. Image post processing techniques are also introduced.

PREREQUISITE: MRIT 4100.03

RESTRICTIONS: Restricted to 4th year BHSc DMUT, NUMT or RADT students.

MRIT 4120 MRI Instrumentation, Safety and Contrast Media

CREDIT HOURS: 3

MRI Instrumentation, Safety and Contrast Media presents instrumentation and equipment, RF coil technology, quality control methods, patient monitoring, site planning for new MRI sites and new advances in MRI technology. This course will focus on the study of MRI safety as well as composition, safety, and applications of MRI contrast media in current practice.

PREREQUISITE: MRIT 4110.03

RESTRICTIONS: Restricted to 3rd and 4th year BHSc DMUT, NUMT or RADT students.

MRIT 4130 MRI Techniques and Applications

CREDIT HOURS: 3

MRI Techniques and Applications expands on the physics and theory of MRI introduced in MRIT 4100.03 and introduces students to the practice of MRI scanning. Positioning techniques, coil selection, pulse sequences, protocol development, anatomy, pathology and artifacts imaged with MRI will be discussed to prepare students for clinical practice.

PREREQUISITE: MRIT 4110.03

RESTRICTIONS: Restricted to 3rd and 4th year BHSC DMUT, NUMT and RADT students

NUMT Nuclear Medicine Technology - Course Descriptions

NUMT 1000 Fundamentals of Nuclear Medicine

CREDIT HOURS: 3

This course is designed to provide the students with an introduction to nuclear medicine technology by exploring how radiation and detection equipment are used to perform clinical procedures. The course is divided into sections with each section containing content which builds on the previous concepts. Concepts covered include: detectors used in measuring radiation, semiconductors and scintillation detectors with a focus on the gamma camera - components, acquisition techniques, SPECT reconstruction and quality control.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 1010 Nuclear Medicine Instrumentation I

CREDIT HOURS: 3

This course is designed to expand on the learner's knowledge of gamma camera instrumentation acquired in NUMT 1000.03. Image acquisition, processing and quantitative image analysis will be explored in detail. Special emphasis will be placed on theory, practical applications, and quality control of Single Photon Emission Computed Tomography (SPECT) as it relates to current clinical practice. Opportunity to apply and expand on the theory will be provided through laboratory and self-directed learning sessions. In addition students will cover the concept of quality assurance and gain the ability to design and critique a Nuclear Medicine quality assurance program.

FORMAT: Lecture| Lab| Online Delivery

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: NUMT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 1020 Nuclear Medicine Clinical Procedures I

CREDIT HOURS: 3

In this course the student will learn the Nuclear Medicine procedures that involve the use of radiopharmaceuticals in the investigation in the function of organs in the skeletal, genitourinary and tumour/inflammatory systems.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NUMT 1000.03, HSCE 1000.03, HSCE 2020.03, HSCE 1020.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 1500 Nuclear Medicine Clinical Practicum I

CREDIT HOURS: 3

This clinical practicum introduces students to the Nuclear Medicine and Diagnostic Imaging Department. Students will develop knowledge of departmental procedures

and demonstrate health professional practice skills when interacting with patients and healthcare professionals. Emphasis will be placed on development of clinical skills in skeletal, genitourinary and tumor/inflammatory systems. Students will also have opportunities in; image acquisition and critique, patient management/care instrumentation skills and quality control.

PREREQUISITE: HSCE 1010.03, HSCE 2030.03, NUMT 1020.03, HSCE 1030.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 2000 Radiopharmacy

CREDIT HOURS: 3

This course encompasses all aspects of radiopharmaceutical preparation utilized in a nuclear medicine facility. Classification of radiopharmaceuticals, the production of nuclides, generator construction and elution, labeling methods and pharmaceutical standards are covered in detail. Emphasis is placed on preparing, assaying, dispensing, calculating, safe handling and storing of radiopharmaceuticals. A comprehensive quality assurance program is presented, as well as licensing and record keeping.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: NUMT 1010.03, NUMT 2010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 2010 Nuclear Medicine Clinical Procedures II

CREDIT HOURS: 3

This course provides students with the knowledge and skills to perform Nuclear Medicine procedures in the central nervous, respiratory and gastrointestinal systems. Image critique and interpretation, radiopharmaceutical distribution, computer analysis, related pathologies and procedural troubleshooting will be covered. Clinical lab sessions will enable students to observe and practice these skills.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NUMT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 2020 Nuclear Medicine Clinical Procedures III

CREDIT HOURS: 3

In this course the student will learn the Nuclear Medicine procedures that involve the use of radioactive pharmaceuticals in the investigation of the function of organs in the endocrine and cardiovascular systems. Image critique and interpretation, radiopharmaceutical distribution, computer analysis, related pathologies and procedural troubleshooting will be covered. Clinical lab sessions will enable students to observe and practice these skills.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NUMT 1010.03, NUMT 2010.03, and HSCE 2010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 2500 Nuclear Medicine Practicum II

CREDIT HOURS: 3

This clinical practicum is designed to enable the student to integrate primary nuclear medicine and patient care principles. The student will consolidate concepts, theories and skills in performing nuclear medicine procedures. The student will be exposed to image evaluation, patient management/care as well as radiopharmaceutical preparation and quality control.

PREREQUISITE: NUMT 2000.03, 2020.03

RESTRICTIONS: RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3020 Positron Emission Tomography

CREDIT HOURS: 3

The course provides students with advanced knowledge of Positron Emission Tomography (PET) scanner physics, instrumentation, and quality control. Students will also explore cyclotron physics and radiopharmaceutical synthesis in hot cells. A section of the course content involves the use of various PET radiopharmaceuticals in clinical imaging, presented in the larger context of current PET clinical procedures. Clinical application of fusion imaging with PET/CT will also be covered.

FORMAT: Tutorial

PREREQUISITE: NUMT 3100.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3100 CT for Hybrid Technologies

CREDIT HOURS: 3

This course provides students with knowledge of CT instrumentation, procedures and cross sectional anatomy. CT image acquisition, processing and quantitative analysis will be explored in detail. Processing and post-processing of CT will be contrasted to single photon computed tomography (SPECT) processing and post-processing. Special emphasis will be placed on the role of CT as it relates to current clinical practice in hybrid technologies. Opportunity to apply and expand upon the knowledge gained through lectures will be provided through clinical exposure and self-directed learning sessions.

PREREQUISITE: NUMT 2500.03

RESTRICTIONS: Restricted to students enrolled in the Bachelor of Health Science Program in the professional stream of Nuclear Medicine Technology.

NUMT 3200 Radiopharmacy

CREDIT HOURS: 3

Students will be exposed to the daily operation of a central radiopharmacy. Generator elution, product preparation and performance of quality control procedures will be practiced. Record keeping and documentation of daily operations will be stressed. Emphasis will be on efficiency and organization in order to respond to the demands of the nuclear medicine department. Students will also have exposure to non-routine radiopharmaceutical duties: dilutions, stock-solutions, and radiopharmacy research and development. Quality Control procedures, evaluation and trouble-shooting techniques will be utilized to optimize efficiency and validate results.

PREREQUISITE: NUMT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3210 Non-Imaging Procedures

CREDIT HOURS: 3

This clinical course will allow students to apply theory to clinical practice by performing a variety of non-imaging Nuclear Medicine procedures to include: white blood cell labelling; 14C urea breath tests, and radioiodine therapeutic procedures, including ablations. Proper lab technique will be emphasized. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality Control procedures, evaluation and trouble-shooting techniques will be utilized to optimize efficiency and validate results.

PREREQUISITE: NUMT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3220 General Imaging I

CREDIT HOURS: 3

Students will apply theory to clinical practice by performing a variety of procedures. Emphasis will be on the application and evaluation of nuclear medicine general imaging procedures as they relate to the diagnosis and management of patients. Students will be assessed and required to obtain a minimum number of general imaging clinical competencies. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation and troubleshooting techniques will be utilized to optimize efficiency and validate results.

PREREQUISITE: NUMT 2500

RESTRICTIONS: Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3222 General Imaging II

CREDIT HOURS: 3

Students will apply theory to clinical practice by performing a variety of procedures. Emphasis will be on the application and evaluation of nuclear medicine general imaging procedures as they relate to the diagnosis and management of patients. Students will be assessed and required to obtain a minimum number of general imaging clinical competencies beyond those obtained in General Imaging I. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation and troubleshooting techniques will be utilized to optimize efficiency and validate results.

PREREQUISITE: NUMT 3220.03, NUMT 3100.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology.

NUMT 3230 Cardiac Imaging

CREDIT HOURS: 3

Students will apply theory to clinical practice by performing procedures involving the cardiovascular system. Application and evaluation of acquisition and processing of nuclear cardiology procedures with a focus on stress imaging (treadmill and medication induced) and wall motion imaging will be emphasized. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality Control procedures, evaluation and trouble-shooting techniques will be utilized to optimize efficiency and validate results.

PREREQUISITE: NUMT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3240 Pediatric Imaging

CREDIT HOURS: 3

Students will focus on nuclear medicine practice in the care of children and their families. Application and evaluation of nuclear medicine procedures relevant to the diagnosis and management of children will be emphasized. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality Control procedures, evaluation and trouble-shooting techniques will be utilized to optimize efficiency and validate results.

PREREQUISITE: NUMT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3500 Clinical Practicum In Nuclear Medicine Technology III

CREDIT HOURS: 3

Clinical Practicum III is intended to consolidate nuclear medicine theory and practice covered by the end of year three. The students will be provided the opportunity to demonstrate competency in nuclear medicine practice, integrating aspects of all discipline and health science related course theory. This course allows students to expand their knowledge of the healthcare team by providing an opportunity for them to observe and experience healthcare services provided by other professionals.

PREREQUISITE: NUMT 3200.03, 3222.03 3230.03, 3020.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 4100 Specialty Practice I/Specialty Practice II

CREDIT HOURS: 6

Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. Specialty Practice is arranged through consultation with the program advisor.

PREREQUISITE: NUMT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology. Enrolment may be limited due to clinical site availability.

NUMT 4210 Professional Practice in Nuclear Medicine Technology I

CREDIT HOURS: 3

This clinical education course provides the student with the opportunity to assume clinical responsibility and develop leadership skills through two processes. Students will apply professional skills acquired through previous courses to function as a member of the diagnostic team and perform duties associated with a team leader role.

Also, through a mentorship program, students will act as role models and support first year nuclear medicine students in an effort to further develop leadership skills.

NOTES: Students cannot be registered in NUMT 4210.03 and NUMT 4220.02 concurrently.

PREREQUISITE: NUMT 4220.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 4220 Professional Practice in Nuclear Medicine Technology II

CREDIT HOURS: 3

This clinical education course provides the student with the opportunity to assume clinical responsibility and to continue development of professional skills in nuclear

medicine technology. Students will be scheduled to a variety of imaging areas where they will be responsible, with remote supervision, for functioning as an integral member of the nuclear medicine team. This course also provides the opportunity for students to become actively involved in the education of patients, as well as the continuing education of both practicing nuclear medicine technologists and affiliate healthcare groups.

NOTES: Students cannot be registered in NUMT 4210.03 and 4220.03 concurrently.

PREREQUISITE: NUMT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

RADT Radiological Technology - Course Descriptions

RADT 1000 Skeletal Radiography

CREDIT HOURS: 3

This course provides the student with the knowledge required to perform basic skeletal radiography examinations. Aspects studied include: patient positioning, alignment of the radiation field, and radiation exposure factors. Radiographic images are analyzed with a focus on structures demonstrated, evaluation criteria, and modifications required to improve sub-optimal images. Students have the ability to develop radiographic skills for positioning and image analysis in lab/tutorial sessions.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

COREQUISITE: RADT 1010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 1010 Imaging Fundamentals

CREDIT HOURS: 3

This course offers an introduction to the processes involved in the production of x-radiation and use of radiation for diagnostic imaging. The basic principles and equipment involved in radiography and fluoroscopy are studied as well as an introduction to the controlling parameters for image production. A major emphasis of the course is an analysis of the radiographic image and the factors that influence its quality. Students have the opportunity to use imaging equipment during lab sessions.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

COREQUISITE: RADT 1000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 1020 Skeletal and Systems Radiography

CREDIT HOURS: 3

Skeletal and Systems Radiography provides the student with the knowledge required to perform radiological imaging procedures of the vertebral column, craniofacial structures, body organs and systems. Elements of the course include patient positioning, alignment of the radiation field, patient management, use of contrast media, and image analysis. Images are assessed with a focus on structures demonstrated, evaluation criteria, and modifications required to improve image quality. Students have the opportunity to practice and demonstrate the radiographic positions in a tutorial/simulation setting. Clinical lab sessions are included in this course to link theory to practice and to provide the student with an orientation to the Diagnostic Imaging Department as well as the operating room environment.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: RADT 1000.03, 1010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 1500 Clinical Practicum I in Radiological Technology

CREDIT HOURS: 3

This clinical practicum introduces students to radiological technology and a Diagnostic Imaging department. Students will have the opportunity to experience a wide variety of procedures and interact with healthcare professionals and patients. Students will develop skills in skeletal/systems radiography, image evaluation, and patient management/care.

PREREQUISITE: RADT 1020.03, HSCE 1010.03, HSCE 1030.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 2000 Advanced Skeletal & Systems Radiography

CREDIT HOURS: 3

This course provides the students with the knowledge of advanced skeletal examinations, and imaging examinations of the gastrointestinal, genitourinary, biliary, reproductive, endocrine, cardiovascular, and central nervous systems. Learning labs in which the students reinforce their knowledge of anatomy, physiology, image quality, and radiographic criteria support this course. Clinical labs and tutorial sessions prepare the students to challenge advanced patient examinations.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 4

PREREQUISITE: RADT 1500

RESTRICTIONS: Restricted to the Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 2010 Imaging Equipment

CREDIT HOURS: 3

This course covers the structure, operating principles, and quality control of the equipment involved in radiological technology. It includes a comprehensive study of x-ray generators, tubes, fluoroscopic, and processing equipment with a focus on technical parameters and clinical applications. This course also covers quality control concepts, equipment used for quality control testing and testing procedures for the imaging equipment in radiological technology.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

COREQUISITE: RADT 2020.03

PREREQUISITE: RADT 1500.03, HSCE 2020.03, HSCE 2010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 2020 Adaption Radiography

CREDIT HOURS: 3

The Adaption Radiography course provides the student with the knowledge required to adapt imaging procedures for unique clinical situations including trauma, mobile, and operating room examinations, and for patients with special needs (pediatric, geriatric, and disabled). Selected radiographic projections and procedures related to the topics are also studied and pertinent radiographic images are analyzed. Students will have the opportunity to develop radiographic adaption skills in clinical/learning lab sessions and clinical simulation sessions.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 4

COREQUISITE: RADT 2010.03

PREREQUISITE: RADT 2000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 2500 Clinical Practicum II in Radiological Technology

CREDIT HOURS: 3

This practicum provides students with the opportunity to continue skill development in the clinical examinations/procedures introduced in RADT 1500. In addition, an introduction to specialized clinical procedures is provided, including operating room imaging, computed tomography, and pediatric radiography.

PREREQUISITE: RADT 2010.03, 2020.03, HSCE 2030.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3000 Applied Pathology in Radiological Technology

CREDIT HOURS: 3

This course provides the student with the fundamental knowledge to recognize the radiographic appearances of specific pathologies. This knowledge is directly applicable to the clinical component of the program. The course is presented by lecture and through clinical lab sessions and learning labs where the student studies a variety of images related to pathologic processes. Studies from related diagnostic modalities are reviewed when appropriate.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: RADT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology.

RADT 3010 Specialty Practice Concepts

CREDIT HOURS: 3

This course provides the foundation for RADT 3210 and RADT 4000 as it focuses on concepts for specialty practice in computed tomography (CT), vascular/interventional imaging, mammography, bone densitometry and magnetic resonance imaging (MRI). Specific topics include: clinical application/procedures, sectional anatomy, radiological image review, patient management, and specialized imaging apparatus. Knowledge obtained in previous courses and clinical practica is also related as applicable. Students will have the opportunity to relate theory to practice during scheduled clinical lab sessions.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 4

PREREQUISITE: RADT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3210 CT and Interventional Imaging

CREDIT HOURS: 3

This course provides the students with the opportunity to experience the clinical practice of computed tomography and angiography/interventional imaging. Under the direction of a preceptor, students will meet the competencies required in these imaging areas. This class allows students to apply the theory from the Specialty Practice Concepts course (RADT 3010.03) and promotes further development of professional skills and behaviors.

PREREQUISITE: RADT 3010.03, RADT 3000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3220 Fluoroscopic Imaging and Special Procedures

CREDIT HOURS: 3

This clinical education course will prepare students for the clinical practice of radiological technology that involve fluoroscopic imaging and other special procedures. These include gastrointestinal, genitourinary and operating room imaging as well as mammography. Under the direction of a preceptor, students will apply acquired knowledge and skills to radiological procedures. The students will develop their skills in providing a high standard of patient care, producing and evaluating images, problem solving and collaboration. FORMAT: Clinical Education Course

PREREQUISITE: RADT 2500.03, RADT 3000.03, RADT 3010.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3240 General/Adaption Radiography

CREDIT HOURS: 6

This course provides the student with the opportunity to further develop general radiography skills. Under appropriate direction from a preceptor, students will apply the knowledge and skills acquired in previous courses/practica and adapt routine imaging procedures for challenging clinical situations and patients with special needs. Students will be scheduled to a variety of imaging areas where radiographic adaption is typically required: emergency, and in-patient/mobile procedures. Clinical experience on evening, night, and weekend shifts is provided in this course.

PREREQUISITE: RADT 2500.03, RADT 3000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3500 Clinical Practicum III

CREDIT HOURS: 3

Clinical Practicum III provides students with an opportunity to integrate skills and concepts from previous courses, clinical practica and the clinical education courses. Under appropriate levels of supervision, the student will assume the responsibilities of a radiological technologist and demonstrate competency in radiography and computed tomography. This practicum takes place in a Diagnostic Imaging Department outside the QEII Health Sciences Centre.

PREREQUISITE: RADT 3210.03, 3220.03, 3240.06

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 4000X/Y Specialty Practice I

CREDIT HOURS: 12

Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. This course can be six or twelve credit hours depending on the nature of the specialty practice. Specialty practice is arranged through consultation with the program advisor.

NOTE: Course Details listed here also apply to RADT 4100.

PREREQUISITE: RADT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology. Enrolment may be limited due to clinical site availability.

RADT 4100 Specialty Practice II

CREDIT HOURS: 6

See RADT 4000.

RADT 4200 Pediatric Radiography

CREDIT HOURS: 3

This course provides students with the opportunity to meet the competencies required in pediatric radiography. A wide variety of clinical experiences are scheduled at the IWK Health Centre, including mobile and operating room imaging, gastrointestinal and urinary system examinations, and general imaging. Under the direction of preceptors, students will apply theoretical principles and further develop professional skills and behaviours. Students will also have the opportunity to attend pediatric radiology rounds and observe related imaging procedures.

PREREQUISITE: RADT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 4210 Professional Skill Development in Radiological Technology

CREDIT HOURS: 3

This clinical education course provides students with an opportunity to integrate skills/concepts from previous courses, clinical practica, and clinical education courses and continue development of professional skills in radiological technology. Through reflection and self-evaluation, students will develop learning contracts, and under appropriate levels of supervision will perform general radiologic imaging procedures. Various themes of professionalism will also be explored.

PREREQUISITE: RADT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 4220 Professional Practice in Radiological Technology

CREDIT HOURS: 3

This clinical education course provides the student with the opportunity to strengthen radiological technology skills while increasing confidence and independence in clinical practice. Under appropriate direction from a preceptor, students will apply the knowledge and skills acquired in previous courses/practica to further develop clinical judgement and self-confidence. To demonstrate competence, students must successfully complete a summative clinical assessment and comprehensive competency based written examinations. Students will also plan, design, and deliver a professional development session/activity for students and/or radiological technologists.

PREREQUISITE: RADT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RSPT Respiratory Therapy - Course Descriptions

RSPT 1000 Respiratory Therapy Instrumentation and Techniques

CREDIT HOURS: 3

This course provides the student with the fundamental knowledge required to understand the physical principles and concepts necessary for the safe and efficient delivery of physician prescribed therapy. Clinical skills competency through lab simulation is required.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

RSPT 1020 Respiratory Therapy Clinical Assessment and Techniques

CREDIT HOURS: 3

RSPT 1020.03 is designed as a continuation of the knowledge and concepts acquired in Term 1 and the skills competencies completed in RSPT 1000.03. Students will focus on the basic background information and psychomotor skills necessary for understanding the physical principles and concepts associated with the safe handling and efficient operation of respiratory therapy equipment. Limited clinical opportunities may be provided. Clinical skills competency testing through lab simulation is required.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: RSPT 1000.03, HSCE 1000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

RSPT 1030 Cardiopulmonary Physiology I

CREDIT HOURS: 3

The course presents a modular approach to developing a thorough understanding of normal and abnormal cardiopulmonary function in the human body and is considered a foundation course for all RSPT specific courses in the program.

FORMAT: Lecture

COREQUISITE: BIOC 1420.03

PREREQUISITE: RSPT 1000.03, HSCE 1020.03

RSPT 1500 Clinical Practicum I

CREDIT HOURS: 3

Clinical Practicum I introduces students to clinical practice in the patient care (hospital) environment. Students will have the opportunity to apply theory to skills practice at the defined competency level.

NOTES: Full-time rotations in clinical settings with assigned preceptors. Shift work and weekends may be required. Students will be required to travel to clinical sites outside the Halifax Regional Municipality. Students will be responsible for travel and accommodations.

PREREQUISITE: RSPT 1020.03, RSPT 1030.03, HSCE 1010.03, HSCE 1030.03, BIOC 1420.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

RSPT 2000 Principles of Mechanical Ventilation

CREDIT HOURS: 3

This course will introduce the students to the delivery of mechanical ventilation by learning the terminology, physical principles and physiologic concepts associated with the application of mechanical ventilation. Equipment operation, function and troubleshooting will be investigated in the lab and clinical setting.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

COREQUISITE: RSPT 2070.03

PREREQUISITE: RSPT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

RSPT 2020 Application of Mechanical Ventilation

CREDIT HOURS: 3

Students will be introduced to the background knowledge necessary for understanding the physical principles and concepts governing the operation of mechanical ventilators and adjunct respiratory therapy equipment to ensure the safe and effective delivery of therapy. Clinical skills testing is required.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: RSPT 2000.03, 2030.03, 2063.03, 2070.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

RSPT 2030 Cardiopulmonary Physiology II

CREDIT HOURS: 3

This course is a continuation of the physiological concepts introduced in RSPT 1030 and will examine the intricate chemical and physiological processes of fluid and electrolyte balance, pulmonary function testing, hemodynamics and the cardiopulmonary response to unusual and changing environments. Case study presentations and patient scenarios will complement the learning environment and assist the student in integrating previous knowledge.

FORMAT: Lecture

PREREQUISITE: RSPT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

RSPT 2050 Health Practice for Respiratory Therapy

CREDIT HOURS: 3

This course consists of classroom work, clinical skills testing, guest presentations, community project and an advanced cardiac life support course (ACLS). The learning environment will enhance the understanding of the role of the respiratory therapist in hospitals, healthcare facilities and the community. Basic competency level in the skills required for RSPT 2500 will be achieved through practicing the clinical skills in the lab. Students will be challenged to evaluate and integrate knowledge and skills.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: RSPT 2000.03, 2030.03, 2070.03, 2063.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

RSPT 2063 Respiratory Disease & Therapeutics I

CREDIT HOURS: 3

The proper assessment, evaluation and treatment of clients with conditions and diseases affecting the cardio-respiratory system are vital to the role of a respiratory therapist. The purpose of this course is for students to gain knowledge and understanding of the incidence, etiology, clinical manifestations, pathophysiology, and differential diagnosis of pathologies treated by respiratory therapists in the acute, chronic and home care environments. While studying each individual disease, the evidence-based treatment and prevention strategies, including pharmacology, will be examined.

FORMAT: Lecture

PREREQUISITE: RSPT 1500.03

RSPT 2065 Respiratory Disease & Therapeutics II

CREDIT HOURS: 3

The proper assessment, evaluation and treatment of clients with conditions and diseases affecting the cardio-respiratory system are vital to the role of a respiratory therapist. The purpose of this course is for students to gain knowledge and understanding of the incidence, etiology, clinical manifestations, pathophysiology, and differential diagnosis of pathologies treated by respiratory therapists in the acute, chronic and home care environments. While studying each individual disease, the evidence-based treatment and prevention strategies, including pharmacology, will be examined.

FORMAT: Lecture

PREREQUISITE: RSPT 2063.03

RSPT 2070 Human Pregnancy and Fetal/Newborn Development

CREDIT HOURS: 3

This course contains background information and assessment skills necessary for the progression to more advanced assessment, skills and competency levels in respiratory care of the neonate and child. The integration of this and additional required courses will allow the student to learn and to challenge the competency component of the program as it relates to neonatal/pediatric therapeutics and instrumentation, pathophysiology, applications of mechanical ventilation, pharmacology, and Neonatal Resuscitation Program (NRP).

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: RSPT 1500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream of Respiratory Therapy

RSPT 2500 Clinical Practicum II

CREDIT HOURS: 3

This clinical practicum provides students with the opportunity to continue clinical skill competency development and achieve defined skills by performing in a clinical patient environment. Students will have the opportunity to rotate through assigned clinical placements through 8 and 12 hour day and night shifts including weekends, depending upon the placement requirements.

PREREQUISITE: RSPT 2020.03, 2050.03, 2065.03, 2070.03, HSCE 2000.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

RSPT 3000X/Y Anesthesia Instrumentation and Clinical Techniques

CREDIT HOURS: 6

This course will consist of two modules; the first being a seminar/lecture series during the first few weeks of the Fall semester and the second being two weeks of full-time clinical application program in the operating room. Students will be precepted by an anesthetist with focus on airway management skills and patient monitoring. Students will also attend an intensive 2-day workshop in management of the difficult airway. Depending on availability of clinical sites, students may be expected to travel outside the metro area at their own expense.

NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

PREREQUISITE: RSPT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

RSPT 3010X/Y Neonatal and Pediatric Therapeutics

CREDIT HOURS: 6

This course will consist of two modules; the first being a seminar/lecture series during the first few weeks of the Fall semester and the second being a five week full-time clinical application program. Students will integrate and apply theories and skills in the neonatal and pediatric environment under the guidance of skilled preceptors. Students will be assigned to diverse clinical areas including Neonatal Intensive Care I and II, Pediatric Intensive Care, Birth Unit, and General Wards. Students may be assigned to clinical experiences during twelve hour day or night shifts. Students may be required to travel outside the metro area at their own expense.

NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

PREREQUISITE: RSPT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

RSPT 3020X/Y Cardiac and Pulmonary Diagnostics

CREDIT HOURS: 6

This course will consist of two modules; the first being a seminar/lab series during the first few weeks of the Fall semester and the second being a three week full-time clinical application program in the adult and pediatric pulmonary function, arterial blood gas analysis, electrocardiography and sleep laboratories. Students will integrate and apply theories and skills in specialized diagnostic environments. Students will be precepted and evaluated by certified technologists. This course will enable students to become proficient in performing cardio-pulmonary diagnostic testing including spirometry. Students will have exposure to bronchoprovocation testing and exercise stress testing. Students may be required to travel outside the metro area at their own expense.

NOTES: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

PREREQUISITE: RSPT 2500.03, STAT 1060.03

RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

RSPT 3230X/Y Critical Care Instrumentation and Clinical Techniques

CREDIT HOURS: 6

This class will consist of two modules; the first being a seminar/lecture series during the first few weeks of the fall semester and the second being a five week full-time clinical application program in diverse critical care areas. Students will be presented with the concepts and theories relevant to the respiratory care of the critical patient. Students will recall and apply theories and concepts learned in previous courses in order to integrate this knowledge with new information presented. The clinical application program will provide the students with the opportunity to integrate theories and procedures learned in the seminar/lecture series. Students may be assigned to any of the following critical care areas: medical, surgical, neurosurgical, cardiovascular and coronary care. Depending on availability of clinical sites, students may be expected to travel outside the Metro area at their own expense.

NOTES: Students taking this course must register in both X and Y terms; Credit will be given only if both are completed consecutively

COREQUISITE: RSPT 3000X/Y.06

PREREQUISITE: RSPT 2500.03

RSPT 3250X/Y Health Practice

CREDIT HOURS: 6

This course enables students to apply theories, practice clinical skills and integrate previous learning experiences acquired throughout the three years of the BHSc program. Students will be assigned to a rotating clinical schedule at various clinical sites. Clinical experiences in this course may occur on weekends or night shifts. Students will be evaluated by preceptors at the assigned clinical sites in consultation with faculty. Students may be required to travel outside the metro area at their own expense.

NOTES: Students taking this course must register in both X and Y terms; credit will be given only if both are completed consecutively.

PREREQUISITE: RSPT 2500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

RSPT 3500 Clinical Practicum III

CREDIT HOURS: 3

This course enables students to integrate theories and skills acquired throughout the previous three years of the program; including theory, clinical practicum and clinical education courses. Students will be evaluated on skills proficiency, time management, organizational skills, and decision-making at a high level of independence. Students will be assigned to diverse clinical areas and patient populations. Clinical experiences in this course will occur during twelve hour day and night shifts, including weekends.

PREREQUISITE: RSPT 3000.06, 3010.06, 3020.06, 3230.06, 3250.06

RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

RSPT 4000X/Y Specialty Practice I

CREDIT HOURS: 12

Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. This course can be six or twelve credit hours depending on the nature of the specialty practice. Specialty practice is arranged through consultation with the program advisor.

NOTE: Course Details listed here also apply to RSPT 4100.

PREREQUISITE: RSPT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy. Enrolment may be limited due to clinical site availability

RSPT 4010 Anaesthesia Technology and Related

CREDIT HOURS: 3

The course will provide advanced knowledge of the function, operation, set-up and quality assurance issues regarding anaesthesia and related equipment. The student will be provided with the knowledge necessary to work with anaesthesia equipment in operating room and related settings.

FORMAT: Online Delivery

PREREQUISITE: RSPT 3500.03

RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor

RSPT 4020 Anaesthesia Medication Delivery

CREDIT HOURS: 3

This course will provide in depth knowledge of the modes of delivery and action and interaction of anesthesia pharmacology. The student will be provided with knowledge regarding common medications related to the delivery of anaesthesia and monitoring their effect in the operating room and related settings.

FORMAT: Online Delivery

PREREQUISITE: RSPT 3500.03 or equivalent

RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor

RSPT 4030 Clinical Anaesthesia

CREDIT HOURS: 3

This course will provide in-depth knowledge of evaluation, monitoring and interventions for patients receiving anaesthesia under varying conditions. The student will be provided with the knowledge necessary to anticipate the needs of the patient and the assistance required by the anaesthetist during different aspects of the anaesthetic process.

FORMAT: Online Delivery

PREREQUISITE: RSPT 3500.03 or equivalent

RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor

RSPT 4100 Specialty Practice II

CREDIT HOURS: 6

See RSPT 4000.

Interprofessional Health Education

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

IPHE 2201 Introduction to Aboriginal Peoples' Health and Healing

CREDIT HOURS: 3

This course provides students the opportunity to learn about Aboriginal perspectives regarding health, as well as the multiple and complex challenges facing Aboriginal peoples with respect to key health issues, such as health and social inequities, the epidemiology of disease and culturally appropriate service provision.

IPHE 4900 Interprofessional Health Education Portfolio

CREDIT HOURS: 0

This course is intended to prepare students to work in a collaborative and patient/client/community/family-centered work environments. Students in Health Professions undergraduate programs are required to maintain registration in this course for the duration of their studies. The student will be required to have completed, by the end of their program of study, a total number of different, meaningful and relevant interprofessional collaborative learning experiences (as determined and approved by the School/College) equal to two times the number of years or part of years of study in the program. At least one of these experiences will be in a practice setting (in the event there are no students from other professions in any of the student's practice settings, credit may be granted for interactions with non-student professionals which follow an approved structured format). The experiences will include interactions with undergraduate and/or graduate students from a total of at least 4 different related professions with which there are natural affinities or linkages in the professional environment, some professions of which are outside the student's home School/College. In accordance with the guidelines/requirements of the home School/College, students will prepare a portfolio (or comparable document/process) which maps their interprofessional collaborative learning experiences on to the specific requirements of the School/College. The portfolio will be graded by the School/College on a Pass/Fail basis. Successful completion of this course is a requirement for graduation in all programs, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions.

NOTES: Students must ensure they are registered for the correct section that corresponds with their school/college and should check the timetable for the appropriate section for their discipline. Health and Human Performance: section 02 Health Sciences: section 03

RESTRICTIONS: Health Professions students only

Introduction

The School of Nursing opened in 1949 and became a constituent part of the Faculty of Health Professions in 1961. Currently the School offers an undergraduate program, a Bachelor of Science (Arctic Nursing), a Master of Nursing Program and a PhD (Nursing) Program.

Staff

Dean

Webster, W. G., PhD

Director

MacMillan, K., Diploma Nursing, BSc, MA, MSc, PhD (Toronto), RN

Associate Director, Graduate Studies

MacDonald, M., BN (UNB), MSN (S. Maine), PhD (San Diego), RN

Associate Director, Undergraduate Studies

van Soeren, M., Diploma N (Oster), BSc, PhD (Guelph) RN

Associate Director, Research and International Affairs

Tomblin Murphy, G., BN, MN (Dalhousie), PhD (Toronto), RN

Assistant Director, Graduate Studies

Steenbeck, A., BScN, MScN, PhD (UBC), RN

Assistant Director, Undergraduate Studies

Houk, S., Diploma N (Kelsey), BScN (Sask), MN (Dalhousie), RN

Senior Clinical Coordinator

Bleasdale, B., BN (Dalhousie), RN

Clinical Coordinator, CLSC, NP Program

Herbert, K., BN (MUN), MN (Athabasca), NP

Professor Emeritus

Keddy, B., BScN (MSVU), MA, PhD

Coordinator, BScN (Arctic Nursing)

Edgecombe, N., BN (Lethbridge), MN, PhD (Alberta), NP

Professors

Hughes, J. M., BN (Dalhousie), MS (Boston), PhD (McGill), RN
Sullivan, P. L., BScN (MSVU), MSc (Boston), PhD (Alberta), RN
Tomblin Murphy, G., BN, MN (Dalhousie), PhD (U of T), RN

Associate Professors

Aston, M., BNSc, MEd (Queen's), PhD (U of T), RN
Goldberg, L., BA (UCCB), MA (Dalhousie), PhD (Alberta), RN
Latimer, M., BA (MAU), BScN, MN (Dalhousie), PhD (McGill), RN

Srivastava, R., BN (Dalhousie), MScN, PhD (Toronto)
Vandewater, D., BN, MN (Dalhousie), RN
Vine, J., MH (Athabasca), CHE
Whelan, R., BN, MN (Dalhousie), RN
Yates, G., BN, MN (Dalhousie), SNP, RN

Cross Appointments

Fenety, A., BSc (UNB), DipPT (Man), MscPT (Alberta), PhD (Dalhousie)
Gahagan, J., BA Honours (Carleton), MA (Windsor), PhD (Wayne State)
Harbison, J., BA, BSS (Trinity Coll), Grad DipSW (Edinburgh), PhD (U of T)
Jackson, L. A., BA, MA, PhD (Toronto)
Lauckner, H., BSc, MSc, PhD (Queen's)
Murphy, A., BSc Pharm (Dalhousie), PhD Pharm (British Columbia)
Singleton, J., BA (Waterloo), MS (Penn State), PhD (Maryland), Associate Professor, School of Recreation, Physical and Health Education
Warner, G., BSc (Elmhurst), MSc, PhD (Case Western Reserve)

Preceptors

Many nurses and persons in other disciplines, and settings, provide valuable assistance in the education of nursing students. Names can be obtained by contacting the School of Nursing.

School of Nursing Regulations

1. Students are required to observe the University Regulations and Academic Regulations as described in this calendar.
2. Students are assessed in each year on their aptitude and fitness for nursing. Students who, in the judgment of the faculty, fail to attain a satisfactory standard in this assessment may be required to withdraw from the School.
3. Students are responsible for ensuring that they are registered in appropriate courses throughout the program. Incorrect registration, at any time, could cause conflicts in a student's year-to-year progression and/or graduation.
4. Students in the Baccalaureate Program are responsible for (a) the purchase of uniforms including shoes and a watch with a sweep hand or a digital watch with seconds display, (b) cost of accommodation and travel while on clinical experiences. Additional expenses are incurred by students in the Basic Baccalaureate Program for field experience, books, first aid course, CPR course, graduation pin, equipment, and nurse registration examinations and recommended and/or required immunizations and/or testing. Each student must also purchase a name tag from the University.
5. Because of enrolment limits on class size, part-time students who wish to change to full-time status must present this request in writing to the Assistant Director, Undergraduate Studies by March 1.
6. Students are assigned to a faculty member from the Undergraduate Student Affairs Committee to help them plan their academic program and to discuss academic progress or difficulties.
7. Students are permitted to repeat a nursing course, exclusive of nursing electives, in the BScN program only once. A second failure will result in dismissal from the program.
8. Students wishing to appeal a decision based on faculty regulations or decisions should follow the School of Nursing Appeal Procedure outlined in the Nursing Student Guide.
9. Supplemental exams will not be available in any nursing courses.
10. Because of the nature of the study and practice of Nursing which places Nursing students in a position of special trust, applicants will be asked to complete a screening question related to past criminal convictions which might affect the applicant's suitability for the practice of nursing. Students accepted into the nursing program who provide false information will be disciplined by the university. It is the student's responsibility to inform the Assistant Director (Undergraduate Studies) of any new criminal conviction which could affect the student's suitability for practice.
11. Once enrolled in the Nursing Program it is the students' continuing responsibility to inform the Assistant Director Undergraduate Studies of any criminal conviction or any significant personal circumstance which would adversely affect their ability to continue with their studies or which would make them ineligible for registration within CRNNS upon graduation.

School of Nursing Appeal Procedure

The University has established a system which allows students to appeal academic decisions made by faculty. Appeals can be heard at different levels within the University: At the School and at Senate. Appeals are heard in the School by the Student Appeals Committee and at Senate level by the Senate Academic Appeals Committee.

Procedure for Undergraduate Appeals

Undergraduate appeals are heard by the Student Appeals Committee of the School of Nursing. Procedures for the undergraduate appeal process are available from the School.

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. Successful completion of this course is a requirement for graduation, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

Degree Options Bachelor of Science (Nursing) for Basic Students

Degree Requirements

Throughout the undergraduate program students must: obtain a minimum cumulative GPA of 2.00; accumulate a minimum of 129 credit hours; successfully complete all compulsory courses, as well as the necessary number of elective courses; and, complete the degree within six years of commencing nursing courses. Credit will be given for non-nursing courses that are up to ten years old by the date the degree is completed.

Grade Point Average Standards (GPA)

The grade point average system is described in the Academic Regulations.

Grades

The following letter-grade system is used to evaluate performance. Pass in nonnursing courses: A+, A, A-, B+, B, B-, C+, C, C-, D, and P. In nursing courses students must attain a minimum of C in both theory and clinical/laboratory components: FM, F, and INC are failing grades. ILL and W are considered neutral.

Requirements for Promotion

Besides meeting the GPA requirements students must meet the following for promotion:

Year I to Year II: A student must pass all 1000-level courses in order to advance to 2000-level nursing courses, including, ANAT 1010.03, PHYL 1010.06, and BIOC 1420.03.

Year II to Year III: A student must pass all second-year nursing courses, MICI 1100.03, and STAT 1060.03.

Year III to Year IV: A student must pass all 3000-level nursing courses.

Normal Workload

The program consists of 129 credit hours; Students can register for a maximum of 15 credit hours per term.

Prerequisite for Course Admissions

There are a number of courses that require prerequisites (see course descriptions). Students must successfully complete the required prerequisites for each course or obtain approval from the Committee on Studies prior to registration.

Advanced Placement

Incoming students with previous post-secondary work may qualify to complete a two calendar year accelerated option. To qualify, students must have a GPA of at least 3.0 and specific prerequisites. Space is limited. For more information please contact the Undergraduate Admissions Secretary.

Bachelor of Science (Nursing) (Arctic Nursing)

The Arctic Nursing Program, developed collaboratively between Nunavut Arctic College and Dalhousie University, is a four-year program that focuses on nursing in Nunavut. This program is designed for Nunavut residents. The curriculum emphasizes awareness and respect for Inuit culture and will prepare Inuit nurses to be leaders in the health-care system of Nunavut.

To apply or learn more about the program <http://www.dal.ca/faculty/healthprofessions/nursing/programs/arctic-nursing.html>.

Graduate Programs

For details of the Master of Nursing, the joint Master of Nursing/Master of Health Administration programs and the PhD (Nursing) program, please consult the Faculty of Graduate Studies calendar.

Bachelor of Science (Nursing) Degree Program

In response to a health care system based on principles of primary health care, the Bachelor of Science (Nursing) Program prepares nurses to work in partnerships with individuals, families, groups and communities to promote, maintain and strengthen health. Graduates are prepared to respond to a range of health and illness needs in a variety of settings and organizational health care infrastructures. The curriculum is designed to enable graduates to meet the standards of nursing practice in Canada and be eligible for registration in Nova Scotia.

In addition to the Dalhousie Campus, students may complete a BScN degree on site in Yarmouth. Students interested in this option should contact the School for further information.

Program Objectives

The Bachelor of Science (Nursing) graduate will:

1. Demonstrate application of nursing science through critical inquiry, commitment to life-long learning and evidence-based practice.
2. Practice competently by applying the principles of primary health care with diverse *clients in a variety of health care contexts and by responding to emerging trends, technology and concepts in health.
3. Communicate, collaborate and partner with *clients, and other members of the health care team to increase capacity and enhance health of populations.
4. Demonstrate ethical, legal and professional accountability in the practice of nursing and remain committed to professional competence through life-long learning.
5. Influence nursing and health care through a social and political analysis of current health care issues and application of leadership skills.

*(individuals, family, groups, community and/or populations)

Bachelor of Science (Nursing) for Basic Students

The Bachelor of Science in Nursing degree is a 129 credit hour program. Graduates are eligible to write examinations for membership in the College of Registered Nurses of Nova Scotia.

Immunization

Before commencing first year studies, students are responsible to have complete and current immunizations against diphtheria, polio, tetanus, pertussis, measles, mumps, rubella, Hepatitis B and a 2-step Mantoux. Access to clinical agencies will be denied if immunizations are not current and complete.

CPR, (HPC) and Standard First Aid Certification

Before commencing first year studies, students must have CPR (Health Care Provider Level) and Standard First Aid certification. CPR (Health Care Provider Level) must be recertified biannually. A cardio-pulmonary resuscitation (CPR) course and standard first-aid course are the student's responsibilities in time and cost. Access to clinical settings will be denied if certification is not current.

Criminal Record Check/Vulnerable Sector Search

Before commencing first year studies, students are responsible for completing a criminal record check (CRC) and Vulnerable Sector Search (VSS). Access to clinical agencies will be denied if these checks are not current.

Course of Study

The Program is offered at both the Halifax and Yarmouth sites. The following is an outline of courses that are normally taken each year.

Program requirements may change with ongoing curricular revisions.

First Year

- ANAT 1010.03
- BIOC 1420.03
- PHYL 1010.06
- NURS 1000.03
- NURS 1030.03
- NURS 1220.03
- NURS 1240.03 (a five-week clinical/course starting in late April or early May with annual variations)
- nine credit hours at the 1000 level from Biology, Chemistry, Philosophy, Psychology and/or Sociology.

Second Year

- MICI 1100.03
- NURS 2000.03
- NURS 2035.03
- NURS 2050.03
- NURS 2080.03
- NURS 2090.03
- NURS 2200.03
- NURS 2280.03
- NURS 2220.06 (a six-week clinical nursing intersession taken in May/June or June/July)
- STAT 1060.03

Third Year

- NURS 3040.03
- NURS 3060.03
- NURS 3260.03
- NURS 3270.03
- NURS 3280.03
- NURS 3290.06 (a six-week clinical nursing intersession, usually starting in April or early May with annual variations)
- Six credit hours at the 2000 or 3000 level from Biology, Chemistry, Philosophy, Psychology, and/or Sociology
- Three credit hours of general electives may be taken from any course NOT listed as a nursing elective: however, the course must be at the 2000 level or above except in the case of a language (not English) which can be taken at the 1000 level.
- One Nursing elective (three credit hours)

Fourth Year

- NURS 4030.03

- NURS 4050.03
- NURS 4060.03
- NURS 4210.03
- NURS 4220.03
- NURS 4250.03
- NURS 4260.03
- One Nursing elective (three credit hours)
- NURS 4240.06 (minimum 280 hour internship beginning in March)

Bachelor of Science (Nursing) for Registered Nurses

[This program has been terminated.]

The Bachelor of Science (Nursing) for registered nurses consists of 60 credit hours of study. Students may complete the program at either the Halifax or Yarmouth site through full- or part-time study. The program can be completed in two calendar years of full-time study provided Faculty resources allow required nursing courses to be offered during the summer session. Otherwise, students without transfer credits can complete the program in two full-time and one part-time academic year (September - April). Part-time students who wish to change their status to full-time must write their request to the Associate Director of Undergraduate Student Affairs by March 1.

A clinical major option in oncology nursing may be available as a course component of the BScN (RN) degree program.

The School of Nursing has made a commitment to offer accessible nursing education to registered nurses allowing them to obtain their education in the communities where they live and work.

Check with the Distance Advisor for Post RN students regarding course offerings.

Course of Study

With the help of an academic advisor, an individual course of study is determined. Course of study may be affected by the actual courses offered in an academic year. Certain courses may have prerequisites as noted in the course descriptions. Part-time students are encouraged to complete most of the required non-nursing courses before starting nursing courses. The course of study varies considerably when the student applies transfer credits toward the degree. Transfer credit regulations are outlined under the Academic Regulations section of the University Calendar.

Required Courses

- STAT 1060.03
- NURS 2250.03
- NURS 3030.03
- NURS 4030.03
- NURS 4250.03
- NURS 4260.03
- Nursing Electives (six credit hours)
- The six credit hours of electives may be chosen from Nursing and Interdisciplinary courses. Course selections vary by year. Please consult the current years timetable for course offerings.

Optional courses (nine credit hours must be selected)

- NURS 2080.03
- NURS 2240.03
- NURS 3270.03
- NURS 4050.03

Eighteen credit hours must be chosen from at least two of the following non-nursing subjects areas: Anatomy, Biochemistry, Biology, Chemistry, Microbiology, Philosophy, Physiology, Psychology and Sociology

Six credit hours of general electives must be taken from any course NOT listed as a nursing elective; however, the course must be at the 2000 level or above except in the case of a language (not English) which can be taken at the 1000 level. An open elective (either nursing or general) is also required.

Nursing Elective Courses

Basic students are required to complete six credit hours of nursing electives. Post RN students must complete six credit hours of nursing electives. NOT ALL NURSING ELECTIVES ARE OFFERED EVERY YEAR. Please consult the School to ascertain the current offerings. When resources allow, the following are offered:

- NURS 2360.03: The Phenomenon of Pain: Assessment and Management.
- NURS 2390.03: Emergency Preparedness: A Nursing Perspective
- NURS 3080.03: Culture Caring and Health Care.
- NURS 3310.03: Health Informatics.
- NURS 3320.03: Acute Care Specialty Nursing
- NURS 3330.03: Fundamentals of Oncology Nursing
- NURS 3360.03: Alternative and Complementary Therapies: Implications for Nursing Practice.
- NURS 4091.03: Breast Feeding for Family and Community Health.
- NURS 4330.03: Self-Directed Learning.
- NURS 4351.03: Specialty Practice of Oncology Nursing.
- NURS 4360.03: Management - The Process in Health Care Agencies.
- NURS 4371.03: Addictions Nursing Practice.
- NURS 4380.03: Introduction to Epidemiology Methods in Nursing Practice.
- NURS 4390.03: Intermediate Pathophysiology and Nursing.

Interdisciplinary Nursing Elective Courses

- NURS 4370.03: Women and Aging.
- NURS 4800.03: Interdisciplinary Course in Human Nutrition.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

NURS 1000 Introduction to the Foundations of Nursing

CREDIT HOURS: 3

Major concepts of health and professional nursing are introduced. Students begin to develop an awareness of the practice of nursing based on the determinants of health, primary healthcare and major nursing concepts. Emphasis is given to the helping role of nursing. A variety of experiences facilitate learning and students are introduced to the practice of nursing in clinical settings.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 2

TUTORIAL HOURS PER WEEK: 1

NURS 1030 Human Development and Health I: Adults and Healthy Aging

CREDIT HOURS: 3

Guided by the principles of Primary Health Care and building on the concepts introduced earlier, students examine the developmental processes experienced by adults. Students focus on the psychosocial, cultural, cognitive, and spiritual health of adults and on nursing practices that promote health in adults at specific developmental stages. Issues of safety and nutrition are specifically addressed. Strategies to promote healthy aging at the individual, family, and community level are explored.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NURS 1000.03

NURS 1220 Knowledge and Process in Nursing Practice I

CREDIT HOURS: 3

Students develop beginning competence in the use of health assessment. Comprehensive health assessments are integrated as a basis for clinical interventions inherent in the caring role. In addition, students are introduced to the organizational and work role competencies required for clinical practice.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 2

PREREQUISITE: NURS 1000.03

NURS 1240 Introduction to Nursing Practice

CREDIT HOURS: 3

(Intersession) Students are introduced to healthcare settings where they interact with older adults at various levels of health. As a basis for these experiences the foundations of nursing addressed in NURS 1000.03 and NURS 1030.03, are further developed. Learning experiences are designed to promote beginning knowledge and skills for the practice of nursing with an emphasis on helping relationships.

FORMAT: Lecture| Lab

PREREQUISITE: NURS 1030.03, 1220.03

NURS 2000 Teaching and Learning and the Communication Process

CREDIT HOURS: 3

Teaching and learning transactions among nurses and individuals, families, groups and communities are integral to health and well-being. The process of communication is central to the teaching-learning process and occurs within the nurse-patient relationship (a collaborative-partnership). The course is designed to assist students to critically analyze and integrate the teaching-coaching domain of nursing practice within the helping role of the nurse. Principles and theories of learning are used to identify strategies to help clients acquire knowledge, skills and attitudes that enable them to attain/maintain optimal levels of health. The course includes an introduction to the counseling role of the nurse with a focus on therapeutic communication strategies necessary to establish partnerships with clients. Students are given opportunities to expand their existing interviewing and communication skills and teaching abilities.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NURS 1240.03, BIOC 1420.03, PHYL 1010.06, ANAT 1010.03

NURS 2035 Nursing Research

CREDIT HOURS: 3

This course requires students to engage in a critical inquiry about how research processes influence the way knowledge is constructed. Students explore dimensions of knowing from multiple perspectives of acquired knowledge, experiential knowledge of nursing practice, conceptual meanings, collaborative practice partnerships and values and beliefs about the contributions of nursing knowledge as transformative in the healthcare system. Sharing new knowledge resulting from the synthesis and transfer of evidence across disciplines and healthcare sectors will be examined. The use of innovative and creative thinking supports students to design ways of communicating and translating research findings for application to practice.

LECTURE HOURS PER WEEK: 3

COREQUISITE: STAT 1060.03/MATH 1060.03

PREREQUISITE: NURS 1240.03, ANAT 1010.03, PHYL 1010.06, BIOC 1420.03

NURS 2050 Pharmacology and Nursing

CREDIT HOURS: 3

Students are introduced to the pharmacokinetics and pharmacodynamics of the major drug classes with an emphasis on application in the clinical setting. Interdisciplinary and collaborative aspects of the nurse's role in administering and monitoring medications and their effects are explored. Students demonstrate knowledge of dosage calculation, preparation and administration of medications. Legal, ethical and professional principles of accountability are examined.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

COREQUISITE: NURS 2090.03, NURS 2200.03

PREREQUISITE: NURS 1240.03, BIOC 1420.03, PHYL 1010.06, ANAT 1010.03

NURS 2080 Social and Cultural Determinants of Health

CREDIT HOURS: 3

Social inequities often make it difficult for individuals, families, groups and communities to attain or maintain health. This course is designed to critically analyze the social and cultural determinants of health. Students explore their own attitudes and beliefs related to topics including racism, poverty, ageism, sexism and classism. Critical social theory, cross cultural nursing, communication, health promotion, health education and social action are included in this course to provide students with the knowledge and skills to influence the social determinants of health in the healthcare system.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NURS 1240.03, BIOC 1420.03, PHYL 1010.06, ANAT 1010.03

NURS 2090 Pathophysiology and Nursing

CREDIT HOURS: 3

This course provides a foundation for understanding human physiological responses to health alterations. An in-depth understanding of structural and functional changes from normal serves as the basis for nursing assessment, intervention, and care.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

COREQUISITE: MICI 1100.03, NURS 2050.03, NURS 2200.03

PREREQUISITE: BIOC 1420.03, ANAT 1010.03, PHYL 1010.06, NURS 1240.03

NURS 2200 Knowledge and Process in Nursing Practice II

CREDIT HOURS: 3

Students are introduced to theoretical bases of nursing to evaluate health behaviours and outcomes. Students build on health assessment skills, and monitor, implement and evaluate nursing interventions. Students are introduced to nursing research to guide reflective nursing practice and the safe use of technology and caring approaches

in laboratory settings.

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 1

COREQUISITE: NURS 2050.03, NURS 2090.03

PREREQUISITE: NURS 1240.03, ANAT 1010.03, PHYL 1010.06, BIOC 1420.03

NURS 2220X/Y Nursing Practice II

CREDIT HOURS: 6

(Intersession) This clinical practicum enables students to continue to integrate primary healthcare principles, nursing knowledge and theory, and nursing processes within nursing practice. Students consolidate concepts, theories and skills in caring for individuals in acute and chronic care settings. Emphasis is placed on collaborating with clients to identify health goals as well as perceptions and attitudes about their health. Students must be prepared to travel beyond the Halifax metropolitan area for part or all of this experience.

PREREQUISITE: NURS 2000.03, 2035.03, 2200.03, 2280.03, 2050.03, 2080.03, 2090.03, MICI 1100.03

NURS 2250 Theoretical Perspectives for Contemporary Nursing Practice

CREDIT HOURS: 3

The purpose of this course is to provide students the opportunity to use theoretical perspectives in nursing to discover knowledge related to the process of nurse-client interaction. Students will examine the development and progress of relevant nursing theories and explore the relationships between nursing theory, nursing science, and nursing knowledge. Students will be introduced to selected methods of theory analysis. The concepts and assumptions of selected nursing theories will be used to describe and explain phenomena relevant to nurse-client interaction.

LECTURE HOURS PER WEEK: 2

RESTRICTIONS: For POST-RN students only

NURS 2280 Care of Adults I

CREDIT HOURS: 3

Students learn to integrate nursing knowledge and processes in the care of adults coping with illnesses. Emphasis is placed on the integration of primary healthcare concepts as related to alterations in health status. Students further develop knowledge and skills during clinical experiences in adult medical and surgical settings.

LECTURE HOURS PER WEEK: 2

PREREQUISITE: NURS 2050.03, 2090.03, 2200.03, MICI 1100.03

NURS 2360 The Phenomenon of Pain: Assessment and Management

CREDIT HOURS: 3

This course challenges students to critically examine their current knowledge and skill in the nursing responsibilities associated with care of clients experiencing pain and to further develop students knowledge, attitudes, skills and competencies in providing effective pain management. Students will improve their ability to identify the client who has pain, perform comprehensive assessments of pain and its impact, initiate nursing interventions to alleviate the pain and evaluate the effectiveness of those interventions. Emphasis is placed on advancing the students ability to assess, analyze and manage this complex phenomenon in order to successfully provide effective pain relief. Critical thinking, interpersonal communication and assessment skills will be enhanced through a variety of learning activities including case studies and weekly online, asynchronous discussions.

FORMAT: Online Delivery

COREQUISITE: NURS 2200.03, 2050.03, 2090.03

NURS 2390 Emergency Preparedness: A Nursing Perspective

CREDIT HOURS: 3

This course focuses on preparation of future nurses for various hazards using an "all hazards" approach. Local, provincial and national disaster response systems, in the event of a mass casualty, are explored, and the ability to care for victims and responders of all types of hazards is emphasized.

FORMAT: Online Delivery

PREREQUISITE: NURS 2090.03, NURS 2200.03

NURS 3040 Human Development and Health II: Children and Youth

CREDIT HOURS: 3

This course examines concepts and theories of healthy growth and development across the life-span from conception to adolescence. Content is organized around health, nutrition, and the safety of individuals at specific stages in their physical, cognitive, and psychosocial development. Concepts of culture/ethnicity, environment, economic status and other life situations are introduced in terms of their relationship to optimal health.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NURS 2220.06, STAT 1060.03, MICI 1100.03

NURS 3060 Legal and Ethical Issues in Nursing Practice

CREDIT HOURS: 3

Note: This course available starting 2014-2015. This course is designed to promote student understanding and application of ethical and legal concepts and theory within the dimensions of nursing practice. Students focus on decision-making processes and the impact of technology on nursing practice.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NURS 2220.03, STAT 1060.03/MATH 1060.03

NURS 3080 Culture Caring and Health

CREDIT HOURS: 3

This nursing elective promotes students awareness of the international/global impact of culture on health beliefs and client access to healthcare systems. Students explore their own attitudes and approaches to international/global cultures. Through this exploration, students identify strategies for international/global healthcare practices.

PREREQUISITE: NURS 1240 or with instructor's permission.

NURS 3260 Nursing Practice: Mothers, Infants and Childbearing Families

CREDIT HOURS: 3

Students focus on the integration of the domains of nursing practice in caring for mothers and newborn infants within the context of the childbearing family. The nature of the childbearing experience is critically analyzed from the perspective of the determinants of health as well as the theoretical bases of maternal-infant attachment and nurse caring. Clinical experience with clients during pregnancy, birthing and post birth in hospital and home settings enable students to focus on health promotion within the context of family-centred care.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 2

PREREQUISITE: NURS 2220.06, STAT 1060.03, MICI 1100.03

NURS 3270 Nursing Practice: Caring for Families

CREDIT HOURS: 3

Guided by the principles of primary healthcare, students focus on families and family health with an emphasis on a thorough understanding of family assessment and developing family therapeutic relationship skills. Students examine family health and health issues from a nursing, cultural, sociological, psychological and other theoretical perspectives as they relate to nursing practice that focuses on working with families in all settings. Upon completion of the course, students will have developed competencies required to use a systems approach when working with families. Laboratory and clinical experiences that include visiting families in their homes provide the students with opportunities to integrate, discuss and practice family nursing.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 2

PREREQUISITE: STAT 1060.03, MICI 1100.03, NURS 2220.06; NURS 2250.03 for post diploma students

NURS 3280 Care of Adults II

CREDIT HOURS: 3

This course focuses on family-centered nursing practice with adults who are managing complex health problems. Emphasis is placed on theoretically based nursing strategies incorporating principles of primary healthcare. Students are guided to incorporate theoretical bases into their clinical practice.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 2

PREREQUISITE: NURS 2220.06, STAT 1060.03, MICI 1100.03

NURS 3290 Nursing Practice III

CREDIT HOURS: 6

(Intercession) This is an opportunity to apply the principles of primary healthcare through reflective practice, the integration and application of theories and family nursing. Students enhance their ability to work with clients through a continuum of care approach. Students must be prepared to travel beyond the Halifax metropolitan area for part or all of this experience.

PREREQUISITE: NURS 3030.03, 3040.03, 3260.03, 3270.03, 3280.03

NURS 3310 Health Informatics

CREDIT HOURS: 3

This nursing elective provides an overview of information technology and systems as they relate to practice, research, and education. Students are introduced to information technology and provided with opportunities to use critical thinking in analyzing the implications of information systems.

FORMAT: Online Delivery

PREREQUISITE: NURS 2220.06; none for Post-RNs; open to students from other departments

NURS 3320 Acute Care Specialty Nursing

CREDIT HOURS: 3

This course introduces students to acute care specialty nursing. Students will further develop, critically analyze and apply knowledge gained in previous courses with a focus on the management of critically ill adult clients in specialized settings. Emphasis will also be placed on interpersonal and interprofessional relationships within specialty practice.

PREREQUISITE: NURS 3280.03

NURS 3330 Fundamentals of Oncology Nursing

CREDIT HOURS: 3

This nursing elective provides an introduction to oncology nursing. Beginning with a review of the physiology of the cancer cycle, the course considers cancer control related to: prevention, screening, early detection, diagnosis, treatment, supportive care/rehabilitation, palliative care. The focus of the course is to provide an opportunity for students to understand the cancer experience from the perspective of the patients and their families.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NURS 2220.06

EXCLUSIONS: NURS 2350.03

NURS 3350 Family Centered Supportive Care for Those Who are Living with Cancer

CREDIT HOURS: 3

This course focuses on families connected to an oncology experience. A family assessment model frames the role of the nurse in family centered supportive care.

Supportive care is the provision of the necessary services as defined by those living with or affected by cancer to meet their physical, social, emotional, nutritional, informational, psychological, spiritual and practical needs throughout the spectrum of the cancer experience. These needs may occur during the diagnostic, treatment, or follow-up phases and encompass issues of survivorship, recurrence, palliative care and bereavement.

NOTES: This course fulfills the requirement for NURS 3270.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 2

COREQUISITE: NURS 3330.03

PREREQUISITE: NURS 2220.06

NURS 3360 Alternative and Complementary Therapies: Implications for Nursing Practice

CREDIT HOURS: 3

This elective course is designed to advance student knowledge and competencies in caring for clients and families who choose to use complementary and alternative therapies. The use of alternative and complementary therapies is prevalent and popular. Issues such as patient autonomy, freedom of choice, and the principle of non-maleficence are but a few of the ethical challenges faced by nurses and other healthcare practitioners. This course introduces students to alternative/complementary therapies and their associated nursing implications. The primary therapies to be examined include mind-body interventions, manual healing therapies, botanical healing, diet therapy, native healing and spiritual therapies. Students will also have the opportunity to research non-conventional therapies in relation to cancer treatment and health promotion. This course fills a pressing need for graduating nurses to have a full understanding of these therapies so that they will be prepared to work with clients and families who have chosen to use complementary healthcare practices.

FORMAT: Online Delivery

PREREQUISITE: NURS 2200.03, or completion of second year of study in any Health Professions program

NURS 4030 Collaborative Leadership for Nursing Practice

CREDIT HOURS: 3

Based on the view that leadership is integral to the practice of every nurse, the focus of the course is on leadership theories and behaviours essential to nursing practice. Critical thinking, decision-making processes and other leadership behaviours are fostered through experiential and simulated learning methods.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NURS 3290.06; Second and third year Nursing classes are strongly recommended for Post-Diploma; Post-RN NURS 2250.03

NURS 4050 Advanced Communication and Counselling

CREDIT HOURS: 3

This course provides theory related to the counselling role of the nurse and addresses the dynamics of therapeutic communication in complex collaborative situations. Counselling occurs within the nurse-patient relationship viewed as a collaborative partnership which requires the active participation, involvement, and agreement of all partners. The course is designed to assist students to facilitate and encourage individuals, families or client groups to effectively deal with change related to complex health situations. Application of course content in simulated nurse-client interviews in home, clinic or institutional settings enables the student to develop interactive skills in dealing with complex, collaborative health situations such as those requiring immediacy, confrontation, advocacy, conflict resolution and crisis intervention.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 2

PREREQUISITE: NURS 3290.06; NURS 2250.03 for Post-RN Students

NURS 4060 Palliative Care Nursing

CREDIT HOURS: 3

This course provides an overview of the significant issues facing individuals and their families related to life threatening illness, dying, and the promotion of quality of life. An exploration of one's own attitudes, beliefs, and values regarding death and dying provide a foundation for examination and discussion of course content. An analysis of the principles and standards of palliative care, principles of primary healthcare, methods of assessment, and means of pain and symptom management guide delivery of care. Emphasis on communication, collaboration within teams, ethical issues, spiritual and cultural influences, and grief and coping provide opportunities for reflection and discussion. Online resources offer opportunities for students to enhance their knowledge and understanding of course content.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NURS 3290.06

CROSS-LISTING: NURS 5830.03

NURS 4091 Breast Feeding for Family and Community Health

CREDIT HOURS: 3

This nursing elective is designed to promote student understanding of the process of human lactation. Developmental, sociocultural, physiological, psychological dimensions of breast feeding are used to describe and discuss the dynamics and effects of breast feeding on personal, family and community health. Interprofessional issues and strategies for the protection, promotion and support of breast feeding are explored in the context of primary healthcare and the Canadian healthcare system.

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NURS 2220.06 or permission of course instructor for non-nursing student

NURS 4210 Nursing Practice: Children and Families

CREDIT HOURS: 3

Students focus on nursing practice in the care of children and families. The determinants of child and family healthcare are examined, as well as the role of nursing practice in health promotion and illness prevention for children. Clinical and family issues associated with childhood illness and hospitalization draw on knowledge of child and family development as well as the art and science of nursing knowledge. Students work in clinical settings where care is provided to children and families experiencing illness.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 2

PREREQUISITE: NURS 3290.06

NURS 4220 Mental Health Nursing Practice

CREDIT HOURS: 3

Integrating a holistic perspective within a primary healthcare philosophy, this course focuses on the promotion of individual and community mental well-being. Through reflective practice the use of nursing theories and effective communication, students assist clients through the challenges of mental health problems, crisis, and mental disorders. Students critique the social responsibility of the nursing profession through, not only direct care, but also client advocacy.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 2

PREREQUISITE: NURS 3290.06

NURS 4240X/Y Nursing Practice IV Internship

CREDIT HOURS: 6

Nursing 4240, a clinical internship prior to graduation, provides students with the opportunity to consolidate and apply knowledge and processes within the domains of nursing practice. Students integrate leadership knowledge and behaviours within social healthcare systems. Collaboration and advocacy with clients, other healthcare

professionals and peers are emphasized. Students are precepted with a staff nurse and work the full-time hours of the preceptor. Students have input into their clinical placements, based on their learning needs and interests. Students must be prepared to travel beyond the Halifax metropolitan area for part or all of this experience. PREREQUISITE: All other nursing and non-nursing requirements for the BScN Program must be completed.

NURS 4250 Community Health Assessment

CREDIT HOURS: 3

Community health is a vital component of primary healthcare. The focus of this course is on the integration of community assessment theory and nursing practice in health promotion and illness prevention. Primary healthcare and population-focused health strategies are used as students collaborate with individuals, families, groups, communities and other healthcare professionals in working toward community health goals. Students apply critical thinking in assessing needs and strengths for community development in a variety of community settings.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 2

TUTORIAL HOURS PER WEEK: 1

PREREQUISITE: NURS 3290.06; Post-Diploma students NURS 2250.03

NURS 4260 Community Development and Advocacy

CREDIT HOURS: 3

This course builds on the content of NURS 4250.03. The focus is on critical thinking, interventions, and the evaluation of community health nursing strategies with client groups and communities. Community development is used as a strategy to put primary healthcare principles into nursing practice. Students are encouraged to work with communities using an empowerment and advocacy approach. Current local, national and international health issues are explored. Clinical experience in a variety of community settings allows students to practice nursing in a reflective manner to improve the health of the community as a whole.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 2

TUTORIAL HOURS PER WEEK: 1

PREREQUISITE: NURS 4250.03

NURS 4330 Self-Directed Learning

CREDIT HOURS: 3

Students may carry out independent studies or projects related to the theory or practice of nursing, under the direction of a faculty facilitator. Students are encouraged to systematically identify, plan, execute and evaluate a learning project that is relevant to nursing practice.

PREREQUISITE: NURS 2220.06

CROSS-LISTING: NURS 5950.03

NURS 4351 Specialty Practice of Oncology Nursing

CREDIT HOURS: 3

This nursing elective challenges learners to consider the comprehensive care of a range of health and illness needs of individuals at risk or living with cancer within the existing infrastructure for cancer care. While the focus of this course is on the context of adults with cancer, the course reflects a critical analysis of the existing theoretical and evidence-based perspectives influencing health related behaviours of health promotion, illness prevention and decision-making that span from individual to organizational levels.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NURS 3330.03 (or NURS 2350.03) and NURS 3350.03

NURS 4360 Management - The Process in Health Care Agencies

CREDIT HOURS: 3

This nursing elective focuses on management of resources to achieve goals within healthcare agencies and institutions. The agency/institution is viewed as a system within which each manager uses a variety of theory and practice based techniques to establish goals, plan and utilize resources and evaluate outcomes. Emphasis is placed on the day-to-day use of management strategies, techniques and skills. Relevant theoretical constructs and research are explained and discussed while examining their implications for practice. Current management problems in nursing are explored through this introductory course in management.

FORMAT: Lecture| Seminar

PREREQUISITE: NURS 4030.03, or instructor's permission

NURS 4370 Women and Aging

CREDIT HOURS: 3

This interdisciplinary nursing elective explores the issues related to socio-economic factors that are major determinants of the well-being of aging women. Topics include; aging as a process; menopause, violence against older women, older women and housing; self-image and sexuality; health and the aging woman; and older women and poverty.

FORMAT: Lecture| Seminar| Discussion

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NURS 2220.03; Non-nursing students should have completed 2 years of university study

CROSS-LISTING: SOSA 3245.03/5245.03, GWST 3810.03, NURS 5850.03

NURS 4371 Addictions Nursing Practice

CREDIT HOURS: 3

This nursing elective introduces major concepts associated with addiction nursing practice. It provides a foundation for students pursuing careers in addiction-related care. Within a primary healthcare perspective, students critique models and theories of addiction, consider the interplay between social, gender, cultural environments and addictions and become knowledgeable of a variety of treatment approaches. Universal, selective, and prevention activities at an individual, family and community level are explored.

PREREQUISITE: NURS 2050.03, NURS 2250.03 strongly recommended for Post RNs

CROSS-LISTING: NURS 5871.03

NURS 4380 Introduction to Epidemiology Methods in Nursing Practice

CREDIT HOURS: 3

This introductory course intended to provide students with a working knowledge and understanding of the basic concepts and methods of epidemiology. The focus of this course will be the analysis and interpretation of information about disease and other health related occurrences at a population level within a Public Health Nursing context. This course will also introduce students to concepts for development and evaluating public health programs.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NURS 2220.03

CROSS-LISTING: NURS 5895.03

NURS 4390 Intermediate Pathophysiology and Nursing

CREDIT HOURS: 3

This nursing elective is intended to provide a more in-depth examination of human physiological function in disease than the Introductory Pathophysiology and Nursing (N2090.03). Emphasis is placed on the study of pathophysiology of diseases prevalent in Canada. This course introduces students to up-to-date concepts involved in research on these diseases. In addition, it examines various therapeutic strategies used in treating these diseases and their implications for nursing care.

FORMAT: Lecture| Discussion

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Basic - PHYL 1010.06, ANAT 1010.03, MICI 1100.03, NURS 2050.03, and NURS 2090.03

NURS 4800 Interdisciplinary Class in Human Nutrition

CREDIT HOURS: 3

The interdisciplinary nursing elective is an interdisciplinary study of the basic principles of nutrition needs throughout the life cycle. Physiological, psychological, socio-economic, physical, educational and cultural determinants are explored to explain why the nutritional status of Canadians can vary and how this variation affects the development of chronic disease. Special emphasis is given to community nutrition in the Atlantic Region.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 1000.06 or by faculty permission

CROSS-LISTING: PHAR 4950.03, PHYT 3090.03, HPRO 2250.03, NURS 5990.03

Introduction

The Atlantic School of Occupational Therapy was established in 1982 as the only occupational therapy education program in Atlantic Canada. The School exists in response to strong regional advocacy, particularly since 1958 when a School was approved in principle by the University Senate. The regional orientation of the School fosters collaborative teaching, research and professional activities linking those at the university with occupational therapy and other service providers, government workers, and citizens in the four Atlantic Provinces. This regional mandate is combined with an international perspective linking Dalhousie with universities and communities for fieldwork and research.

Occupational Therapy is a health profession concerned with social inclusion. Practitioners enhance the occupational performance engagement, health and well-being of individuals, groups, and organizations, particularly where inequities or injustice limit opportunities for meaningful participation in daily life occupations.

Occupation is viewed broadly to include everything we do to “occupy” ourselves in enjoying life, looking after ourselves and others, and contributing to the social and economic productivity of our communities.

Health is viewed broadly as having the ability, opportunity and resources, for quality of life with meaningful occupations in supportive environments.

Occupational therapists use their understanding of occupation, enabling processes, justice and systems to enable individuals, groups and organizations to overcome obstacles that limit their ability to do things they need and want to do. Obstacles addressed by occupational therapists may include illness, injury, physical or mental disability, developmental delay, social disadvantage, old age, cultural, and physical barriers in the home, community and workplace. Using a “partnership” approach, occupational therapists work with individual families, groups, communities, organizations, populations, businesses or governments. The focus can be either on enabling individual change, or enabling change in physical and social environments, policies or legislature to enhance occupational performance and engagement in society. Practice may enable change in skills, attitudes, routines, design of buildings, use of assistive technology, policies, etc.

The role of an occupational therapist is varied and challenging. Occupational issues are never the same because no two people or environments are ever exactly the same. The challenge for occupational therapists is to plan and implement the “just right” program or strategy for each and every client so that everyone can achieve just opportunities to participate in society.

Degrees Offered

In concert with national standards and requirements for occupational therapy education, the School of Occupational Therapy at Dalhousie University only offers graduate level degree programs. For further information on our occupational therapy degree programs, please refer to the Graduate Calendar.

Certificate in Disability Management

The School of Occupational Therapy offers a Certificate Program in Disability Management to students currently enrolled in an academic program at Dalhousie or another Canadian university. The Certificate Program is built around the philosophy of disability management and early assistance as the most effective means by which to assist injured and ill workers to attain their maximum level of functioning and ability to return to work. Disability Management is designed to benefit injured workers through its participatory and proactive problem-solving process incorporating strategies that ensure workers timely and safe return to work. All courses in the Certificate Program are offered completely on-line.

Please refer to the Disability Management section in this calendar for additional information.

Post Professional Certificates

These certificates are for people who are working in health, social, or community services whose professional preparation has normally included a bachelor's degree or higher in a relevant field. The following certificates are being offered in the School:

- Chronic Condition Self-Management
- Aging and Continuing Care
- Diversity and Inclusion

Please refer to the Occupational Therapy section in the Graduate Calendar for additional information.

Master of Science (Occupational Therapy) - MSc (OT): Master's Program to Enter the Profession

MSc (OT) First class accepted into the program in September 2006.

Master of Science (Occupational Therapy–Post- Professional): Post Professional Master's program for qualified occupational therapists.

1. Research Thesis Stream
2. Practice Leaders Stream
3. Single graduate courses (with instructor's permission)

PhD

Faculty in the School of Occupational Therapy welcome applications for PhD studies focused on occupational therapy or occupational science. Interested persons should contact individual faculty at the School. Applications will be submitted through the most suitable program, such as the PhD in Health, Interdisciplinary PhD program, or Biomedical Engineering PhD program. Prospective students may be eligible for funding through scholarship programs at NSERC, SSHRC, CIHR, or from the Nova Scotia Health Research Foundation (NSHRF). Within Dalhousie funding possibilities include Killam scholarships.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Note

The School does not currently offer an undergraduate degree.

We offer undergraduate courses for continuing professional development, refresher education and/or to advance one's knowledge of occupational science. Not all courses are offered each year. Please contact the School for the current course offerings and enrollment in single course.

Course Descriptions

OCCU 2000 Occupation and Daily Life

CREDIT HOURS: 3

This introductory course for students in arts, social sciences, science and other fields is designed to explore the meaning of occupation in everyday life. Typically, the term "occupation" refers to categories of paid work. This course will explore a broader meaning of occupation; namely purposeful activity. This concept of occupation will include everything we do to look after and develop ourselves, be involved in meaningful endeavours, contribute to our communities, promote health, advocate for opportunities, generate income and more. Students will be exposed to a broad range of literature on occupation; the motivation, organization and performance of occupation; the environment as a context for occupational performance; and the promotion of health through occupation. Students will gain an appreciation of occupation as the foundation of everyday life through sociological, anthropological and narrative analysis, and experiential activities.

FORMAT: Lecture| Discussion

RESTRICTIONS: None. This course is OPEN to non-Occupational Therapy students

OCCU 2207 Occupational Development Across the Life Span

CREDIT HOURS: 3

Theories and processes that explain the complexity and dynamics of occupational development across the lifespan are introduced. The course explores typical patterns of physical, cognitive, and psychosocial development and their occupational implications, as well as contexts for occupational development including roles and environments.

PREREQUISITE: Instructor permission

OCCU 4402 Program Design and Evaluation for Enabling Occupation

CREDIT HOURS: 3

This course enables students to critically assess, plan and design an evaluation for occupational therapy programs in a variety of settings. Students will be provided with the basic knowledge and skills of: strategic planning; program development; resource management; and program evaluation. As part of this course, students will complete a novice consulting project. This project will provide students with the opportunity to explore the provision of occupational therapy in a non-traditional setting.

PREREQUISITE: Instructor permission

OCCU 4420 Fieldwork III

CREDIT HOURS: 0

This eight week fieldwork placement introduces students to occupational therapy practice outside the Atlantic region. There are a limited number of opportunities for International options outside Canada and expanded fieldwork with an off-site occupational therapist preceptor within Atlantic Canada. Students develop competence and increased independence in integrating theoretical knowledge and skills through the full process of Occupational Therapy practice. Under supervision, students assume responsibility for a case load of approximately 40-60% of that of an entry level therapist. All expenses are the responsibility of the student including a placement fee, travel, accommodations, etc.

PREREQUISITE: Instructor permission

OCCU 4422 Fieldwork Level III (Continued)

CREDIT HOURS: 0

During this six week fieldwork experience students focus on refining professional competencies and seeking new challenges with minimum guidance from a preceptor. Students are expected to develop the capacity to carry 75% or more of the responsibilities of an entry-level occupational therapist by the completion of this fieldwork education placement.

PREREQUISITE: Instructor permission

History

Formal pharmacy education in the Maritime provinces began in 1908, with evening classes in pharmacy and chemistry conducted in the Nova Scotia Technical College. Success of these courses encouraged the Nova Scotia Pharmaceutical Society to establish the Nova Scotia College of Pharmacy in 1911. The College was affiliated with Dalhousie University in 1912.

The New Brunswick Pharmaceutical Society and the Prince Edward Island Pharmaceutical Association were admitted to affiliation with the College in 1917 and 1950, respectively. With the affiliation of the former society, the College was renamed the Maritime College of Pharmacy.

In 1961, the Maritime College of Pharmacy was admitted into Dalhousie University as the College of Pharmacy, a constituent part of the new Faculty of Health Professions. A four-year baccalaureate program was introduced.

In 1966, a Master's program was established, followed by a Doctor of Philosophy program in 1977.

In 1972, a twelve month pharmacy residency program was initiated by Camp Hill Hospital in cooperation with the College of Pharmacy. Programs were initiated at the Halifax Infirmary in 1974, at the Victoria General Hospital in 1981 and at the Saint John Regional Hospital in 1982.

In the fall of 1968, the College of Pharmacy moved into the George A. Burbidge Pharmacy Building. This building, the former Medical Sciences Building was renamed in honour of the first Dean of the College, in recognition of his contribution to pharmacy education in the Maritimes. Present facilities accommodate approximately 360 undergraduate students.

College of Pharmacy Mission Statement

Mission

Enhancing health through pharmaceutical education, community service and research.

Vision

The College of Pharmacy is a leader in practice-based pharmacy education and is respected for pharmacy research. The College is also a major enabler in advancing the practice of pharmacy.

We are highly responsive to patient-needs and changes in the health care environment. Our graduates are well prepared to become effective practitioners, researchers and future leaders.

Accreditation

The Bachelor of Science in Pharmacy Program of the College of Pharmacy, Dalhousie University, has been granted Full Accreditation Status by the Canadian Council for Accreditation of Pharmacy Programs for a six year term, 2010-2016.

Davies, H., BSc (Hons) (Biology) (Acadia), BSc (Pharm) (Dalhousie), MEd (Curriculum Studies) (Acadia), CDE

Coordinator, Community Experience Program

Harris, N., BSc (Pharm) (Dalhousie)

Adjunct Appointments

Fisher, J., BSc (Pharm) (U of Toronto), MA (Gerontology) (Simon Fraser), PhD (U of Toronto)
MacDonald, T., BSc (Biology), BSc (Honours) (Marine Biology), BSc (Pharm) (Memorial), PharmD (Florida)
Massoud, E., MB, BCh, MSc (Cairo), FRCSC (Royal College)
Skedgel, C., BA (Hon) (Lakehead), MDE (Dalhousie), PhD (Univ of Sheffield) Expected

PEP Associates

Throughout the Maritime provinces pharmacist preceptors in community and hospital pharmacies participate in structured practice experience programs (PEP). The College of Pharmacy would like to acknowledge the valuable and essential contribution that preceptors make to the education process. Sincere thanks and appreciation is extended to all preceptors for the time and energy they devote to students.

The PEP is administered by the College with the support of the provincial pharmacy regulatory authorities in the Maritimes. Second, third, and fourth year students demonstrate their knowledge and professional competency in practice rotations in community and hospital pharmacy sites.

College of Pharmacy Regulations

All students are required to observe the University Regulations and Academic Regulations as described in this Calendar. The academic performance of each student in the College is assessed by the Student Promotions Committee.

Academic Requirements

Workload

The curriculum is composed of problem-based learning (PBL) and other courses, which may include tutorials, lectures, labs, practice experience and other components. (See IV. Programs offered). To satisfy the requirements for the degree of Bachelor of Science in Pharmacy, a student must achieve a grade of Pass in each prescribed component. PBL courses vary in length from three to seven weeks, and are weighted as either 1.5, 3, or 6 credit hours. Each academic year totals 27, 31.5, or 33 credit hours, with the program total being 123 credit hours.

Students are required to successfully complete all practice experience rotations. These placements may be outside the Halifax/Dartmouth area. Students are responsible for any travel, accommodation and any other costs associated with practice experience rotations.

Academic Recognition

Awards

The College of Pharmacy Awards Committee administers a number of awards, each with defined criteria. Selection of award recipients described as the “student who excels” is based on a combination of performance in knowledge assessments and in tutorials. Eligibility for In-course Scholarships is determined on the basis of knowledge assessments alone.

Dean’s List

Students will be assessed for Dean’s List based on their knowledge assessments and class standing in the annual “Progress Exam.” No student who has obtained a failing grade (FM or F) will be eligible for the Dean’s List in the year in question.

Distinction

Students who have been on the Dean’s List for three of the four years of the Pharmacy Program and a cumulative GPA of 3.70 or higher will graduate with Distinction.

Assessment

1. Grading is on a Pass/Fail basis, and grades recorded on the official University transcript are “Pass”, “Marginal Fail” or “Fail” (P, FM, F). Students must pass all components of the year in which they are registered to proceed to the next year. The passing grade for knowledge assessments is 60% unless otherwise indicated.
2. Student performance will be assessed during and at the end of each PBL course. Assessment will be of both the learning process and the knowledge/skills achieved. Tutors will provide informal assessment of the student’s learning process throughout a PBL course and a formal assessment (student tutorial performance assessment) at the completion of a course. Knowledge/skills will be assessed as described in the syllabus provided for each course.
3. To pass a PBL course, a student must pass both the student tutorial performance assessment and the course knowledge assessment.
4. A student who fails no more than one academic course will be assigned a grade of marginal failure (FM) in that course. The student must meet with the Associate Director, Undergraduate Education to discuss remediation and/or support. More than one failure will result in all failed course being assigned the grade of Fail (F).
5. The Student Promotions Committee of the College of Pharmacy is responsible for monitoring the academic progress of students and providing recommendations to faculty regarding promotion and graduation of students. Students who seek redress for the application of the regulations of the College of Pharmacy should refer to the appeals process described in Appeals section below.

6. Attendance at the tutorials, skills laboratory and practice experience program (PEP) is mandatory. Absence must be supported with a valid reason, such as illness with a medical certificate or other reason approved by the Undergraduate Education Committee. Other absences will be reported to the Student Promotions Committee and may be reason for failure.

Reassessment of a Grade

See Academic Regulation 16.7. In all cases of reassessment, the calculations used to arrive at the final grade will be checked. In those courses where the student has had ample time to consider marks obtained for all work done, except for the final examination, reassessment in such courses shall be done on the final examination only. For other courses, a reassessment shall include the results from all work not previously available to the student during the term.

Supplemental Assessment

1. A student who receives a grade of FM is eligible for remedial work and supplemental assessment.
2. A student who fails one PBL student tutorial performance assessment must undertake remedial work during the following course, organized by the Associate Director, Undergraduate Education. If the failure occurs in the final course of the year, remediation will occur during the summer. The student must successfully complete the remedial work and supplemental assessment to achieve a Pass.
3. A student who fails the knowledge assessment or other requirement outlined in the syllabus of a PBL or non-PBL course will be required to do remedial work and must pass a supplemental assessment, which will be scheduled by the course coordinator in consultation with the Associate Director, Undergraduate Education and the students involved.
4. If a student fails one PBL or non-PBL course, the grade will be recorded as "FM" on the student's transcript. Failure to pass the remedial work and supplemental assessment will lead to conversion of the grade to "F". If the student successfully completes the remedial work and supplemental assessment, the passing grade will then be added to the transcript and recorded as "P" with a notation that the grade was earned by supplemental assessment.
5. Failure in a second course (either a PBL or non-PBL course) will negate a pass that may have been achieved by supplemental assessment in the first failed course. (See F.1.a below.)

Repeating the Year

1. Subject to eligibility, a student will be required to repeat the year if:

a) the student has failed any two courses (PBL or non-PBL courses) or

b) the student has failed one course and has not successfully completed the prescribed remedial work and supplemental assessment.

2. To be eligible to repeat a year, a student who has failed two courses must satisfactorily complete all other year requirements except the Practice Experience Program. However, a student with two failures will not be eligible to register in the Practice Experience Program.
3. Application to repeat the year must be made in writing to the Associate Director, Undergraduate Education by a predetermined date.
4. Any student who withdraws voluntarily, due to illness or other personal circumstances, and is allowed to repeat the year, will be considered a student in a repeat year unless the student withdraws before the last day of the first PBL course of the academic year, or the student tutorial performance assessment, if the two do not coincide.
5. No student will be allowed more than one repeat year during the undergraduate program. All students who repeat the year will be assessed on performance in the repeated year.

Leave of Absence

A student who needs to take leave from the pharmacy program must apply to the Director to do so. A leave of absence must be approved in advance by the Director of the College of Pharmacy. Normally, a student who absents himself/herself from the College of Pharmacy without prior permission for an extended period (four weeks or greater) will be presumed to have withdrawn and will have to re-apply for admission to the College of Pharmacy. A leave of absence will be limited to one leave period and will not normally exceed one academic year. A leave of absence will not count towards time in the Pharmacy program.

Dismissal from the Study of Pharmacy

1. Any student who fails more than two courses (PBL or non-PBL courses) of the curriculum in one year will be dismissed from the study of pharmacy.
2. A student in a repeat year who does not meet the criteria for promotion will be dismissed. The normal regulation allowing remedial work and supplemental assessment in one course will apply.
3. Students are also referred to University Regulations: Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability - Faculty of Health Professions.

Appeals

Students who wish to raise questions or to register complaints in matters of academic appeal are advised to communicate informally with their instructor within 10 working days of the alleged unfairness or irregularity. If no resolution arises from this (these) meeting(s), the student may initiate a formal appeal.

Students wishing to initiate a formal appeal should follow the appeals procedures as set out by the College of Pharmacy, Undergraduate Student Appeals Committee, Faculty of Health Professions. These procedures are available within the General Office, College of Pharmacy. Application for a formal appeal should be made to the College of Pharmacy Chair, Undergraduate Student Appeals Committee within 20 working days of the matter giving rise to the appeal.

General Information

Immunization

Students must show proof* of current immunization against tetanus, diphtheria, pertussis, polio, measles, mumps, rubella, Hepatitis B, varicella (if non-immune) and a negative two-step Mantoux (TB) test prior to admission to the College.

Evidence of a negative two-step tuberculin testing (Mantoux) is required before all hospital rotations. Students are responsible for the cost of all tests and immunizations.

*Students must complete the Faculty of Health Professions' infectious disease and immunization checklist.

Each student is required to maintain their personal immunization record, and submit a copy by a set deadline for their student file. Individual sites may require students to present immunization records prior to acceptance at a practice site. Individual clinical practice sites may have additional immunization requirements. Failure to provide this information may result in a student being denied access to a placement site.

Career Opportunities

Pharmacy is a health profession in which pharmacists provide care for their patients as one member of the health care team. This care focuses on the patient from the perspective of drug therapy. The pharmacist is responsible to identify, prevent and resolve patient drug therapy problems. Specific activities include: taking medication histories, identifying goals for drug therapy, providing recommendations and education to patients regarding self-medication, providing recommendations to other health care providers on drug therapy, working with patients to maximize benefits and minimize adverse effects of drug therapy, maintaining patient drug profiles, counseling patients on prescribed medication, monitoring drug interactions, adverse drug reactions and patient compliance with their drug treatment. Other activities include the provision of information on drugs to patients and other health professionals, the preparation of suitable materials for use as medicines from natural and synthetic sources, the compounding of drugs and the dispensing of suitable medication.

Pharmacy graduates have a wide range of career opportunities. The majority enter community pharmacy practice. Hospital pharmacy also provides an interesting challenge for pharmacists, particularly in view of their expanding role within the clinical setting. The pharmaceutical industry provides opportunities for pharmacists in the fields of sales and marketing, production, research and quality control.

The increased role of federal and provincial governments in public health provides opportunities for pharmacists in analytical laboratories and in administrative position as consultants, government inspectors and health officers. Opportunities may also be available in universities as teachers and researchers.

A Bachelor of Science in Pharmacy is necessary for those who wish to practice as licensed pharmacists. For those who wish to enter research or teaching, a Master of Science degree or further postgraduate study is usually required.

Practice Requirements

1. Licence in Pharmacy

The College of Pharmacy, being purely educational, has no jurisdiction in matters related to licensing or to registration as a Pharmacist. These functions are entirely under the control of the provincial regulatory authority concerned; a period of practical training or apprenticeship is required by the provincial regulatory authority before a graduate in pharmacy is licensed as a pharmacist. Information regarding licensing or registration in each province may be obtained from the respective provincial regulatory authority: New Brunswick Pharmaceutical Society, Unit #8, 1224 Mountain Road, Moncton, NB E1C 2T6; Prince Edward Island Pharmacy Board, PO Box 89, Crapaud, PE C0A 1J0; Nova Scotia College of Pharmacists, Suite 200, 1559 Brunswick Street, Halifax, NS B3J 2G1.

2. Pharmacy Examining Board of Canada (PEBC)

The Pharmacy Examining board of Canada was created by Federal Statute on December 21, 1963, to establish qualifications for pharmacists acceptable to participating pharmacy provincial regulatory authorities. The Board provides for annual examinations and issues a certificate to the successful candidate, which may be filed with a

Canadian provincial regulatory authority in connection with an application for license to practice pharmacy under the laws of that province. Baccalaureate graduates from Faculties of Pharmacy accredited by the Canadian Council for Accreditation of Pharmacy Programs are eligible to write these examinations. Successful completion of these examinations is a prerequisite to licensure in Canada.

Individuals who are not graduates of an accredited Canadian Faculty of Pharmacy must first complete the PEBC Qualifying Exam.

Student Pharmacy Society

The basic aims of the Student Pharmacy Society are to promote a closer liaison with the other societies on campus, to give the pharmacy students a strong position with regard to Student Council activities, to provide a means of communications between students and their respective provincial regulatory authorities in the Maritimes, and to provide an organizational body which plans and finances the various unique Pharmacy Society activities.

Membership in the Pharmacy Society includes membership in the Canadian Association of Pharmacy Students and Interns and membership in the Canadian Pharmacists Association.

Programs Offered

The College of Pharmacy offers a four-year program, following at least one year of general science, leading to the degree of Bachelor of Science (Pharmacy) - BSc (Pharm).

The undergraduate program has a patient-oriented curriculum integrating clinical pharmacy with the pharmaceutical sciences. The curriculum utilizes an integrated problem-based learning format.

Year 1 includes pharmacy law and health care ethics, biomedical and physical sciences (anatomy, biochemistry, microbiology, pharmacology and physiology) in discrete three-to seven-week courses. The pharmaceutical sciences (biopharmaceutics and pharmacokinetics, medicinal chemistry, drug metabolism, toxicology, pharmaceutics and physical pharmacy) with necessary reviews of biomedical content, are integrated in Years 2 through 4, with therapeutics, pharmacoepidemiology, pharmacoeconomics, pharmaceutical care, communications, interprofessional relations, law and ethics, social and administrative pharmacy issues, and the role of pharmacy in the health care system.

The College participates with the Queen Elizabeth II Health Science Centre, Halifax, NS, and the Horizon Health Network, NB in providing a Canadian Hospital Pharmacy Residency Board accredited twelve-month post graduate hospital pharmacy residency program.

Through structured rotations in various areas of pharmacy practice, the program aims to prepare pharmacists for exemplary pharmacy practice. Areas of rotation include patient care, drug information, drug distribution, pharmacy administration, a research project and in-service and education. The emphasis is on providing exemplary patient care. Practitioner role models/preceptors are utilized throughout the program to mentor the necessary skills, knowledge and values required to be a pharmacist for application by the resident. A stipend is provided and a certificate is presented to candidates successfully completing the program.

Undergraduate Curriculum Structure

The PBL curriculum, within the College of Pharmacy, may be scheduled past the posted exam periods. Students are responsible for all costs associated with expenses during this time (i.e., meal plan expiration, residence closure, etc.).

Tutorials

The principal feature of the curriculum is problem-based learning (PBL). Students learn together in tutorial groups of eight to ten.

Each group is facilitated by a trained non (content)-expert tutor who may be faculty, sessional tutors, practitioners or graduate students.

Two-hour tutorials are held three times a week. In tutorial sessions students are presented with a situation for which they must identify their own prior knowledge and set specific learning objectives. Students use the time between tutorial sessions for self-directed learning of the objectives that they have set. Subsequent tutorials consist of discussion and application of knowledge.

Courses

A minimal number of courses explain difficult concepts and summarize learning modules. Science laboratory sessions are limited to experiments and demonstrations that enhance student learning of concepts.

Skills Laboratory

The skills laboratory focuses on practical skill development and application of knowledge acquired in the PBL curriculum and critical appraisal series. Activities required for successful completion of the practical experience program are introduced and practiced. Content includes but is not limited to: extemporaneous compounding, prescription filling and assessment, written and verbal communication skills, patient education, device training, injection training, and jurisprudence.

A cardiopulmonary resuscitation (CPR) level HCP and standard first aid course are the students' responsibility in cost.

Practice Experience Program (PEP)

A progressive professional field experience complements the PBL curriculum as follows:

Year 1 - Community Experience Program (CEP)

- the equivalent of a half day per week in a goal-related service learning in a non-pharmacy health-oriented community site.

Year 2 - Practice Experience Program (PEP)

- PHAR 2081.03 - Hospital Rotation (two consecutive weeks)
- PHAR 2082.03 - Community Rotation (two consecutive weeks)

Second year rotations are completed during the months of May - August, after successful completion of all other second year courses. Each rotation is two weeks in length, at a minimum of 35 hours/week. Second year rotations provide students with an opportunity to see pharmacists practice patient focused care in both community and hospital practice settings. Time is also spent on the distributive, legislative and administrative components of pharmacy practice.

Year 3 - Practice Experience Program (PEP)

- PHAR 3080.03 - Community Rotation (four consecutive weeks)

This rotation is completed during the months of May - August, after successful completion of all other third year courses. This rotation is four weeks in length at a minimum of 35 hours/week and introduces students to the practical application of the pharmacist's patient care process in a community pharmacy. Rotation objectives address drug information, prescription and non-prescription medications, patient education, and health promotion presentations to community groups. This rotation is intended to provide an introductory experience to clinical activities including: monitoring patients, identifying drug-related problems, and defining and measuring patient goals and outcomes.

Year 4 - Practice Experience Program (PEP)

- PHAR 4080.045 – Hospital Rotation (six consecutive weeks)
- PHAR 4085.045 – Community Rotation (six consecutive weeks)

These six-week rotations are the culmination of the student's study. Experiential rotations in hospital and community practice sites allow students the opportunity to apply all the knowledge, skills and values they have developed to the provision of total pharmacy care. The focus of these rotations is patient-based and primarily clinical. Each rotation is six-weeks, at a minimum of 40 hours/week.

For each rotation, from year 2 through to year 4, students are required to travel to sites outside of the Halifax area and will be responsible for any costs incurred as a result of the program.

Students should note that there are very limited PEP rotation sites outside the Maritime Provinces. All PEP rotations must take place within Canada. Students must be prepared to complete all PEP rotations within the Maritimes.

Prescribed Courses

Year 1

- ANAT 1040.03
- BIOC 1040.06
- CHEM 2442.03
- MICI 1050.03
- PHAC 1470.06
- PHAR 1060.015
- PHAR 1070.03
- PHAR 1080.00
- PHYL 1400.06

Year 2

- PHAR 2010.03
- PHAR 2015.03
- PHAR 2020.03
- PHAR 2035.06
- PHAR 2040.03
- PHAR 2045.015
- PHAR 2055.015
- PHAR 2060.015
- PHAR 2070.03
- PHAR 2081.03
- PHAR 2082.03

Year 3

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. **Please register in IPHE 4900.00 (section 5).** Successful completion of this course is a requirement for graduation, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

PHAR 1060 Pharmacy Law and Health Care Ethics

CREDIT HOURS: 1.5

This problem-based learning course focuses on the provincial and federal laws that regulate the practice and profession of pharmacy, and key ethical principles and considerations for the pharmacist. Students will learn through a series of mini-cases based on real-life practice scenarios, with integrated ethical components. Students will be introduced to professionalism and the associated responsibilities of a pharmacist. This course introduces students to the legal and professional framework on which all pharmacists practice. Integrated courses in future classes will build on the law and ethics introduced in this course.

Coordinator: C. Connolly

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PHAR 1070X/Y Pharmacy Skills Lab I

CREDIT HOURS: 3

Skills Lab I provides an introduction to skills required by a practicing pharmacist. These include communication skills, pharmacy computer skills, prescription processing and compounding of select dosage forms.

Coordinator: L. Walker

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 1

PHAR 1080X/Y Community Experience Program

CREDIT HOURS: 0

This program consists of service learning at a health-related but non-pharmacy site such as the Canadian Cancer Society, CNIB, Special Olympics etc. The purpose is to augment developing communication skills, interpersonal skills, basic work ethics including the importance of teamwork, introduction to client needs and the professional helping ethic. An inter-professional health mentor experience is also part of this course. N. Harris

PHAR 2010X/Y Critical Appraisal Series I

CREDIT HOURS: 3

Students are introduced to a variety of drug/health information resources, including specific websites, texts, journals, bibliographic databases, and the Regional Drug Information Service. They gain experience in evaluating and using these resources efficiently and effectively through various activities including assignments. Second term focuses on the fundamentals of clinical research methodology, evaluating research papers, and biostatistics.

Coordinator: J. Isenor

FORMAT: Lecture

LECTURE HOURS PER WEEK: 2

PHAR 2015 Topical Products (Dermatologicals)

CREDIT HOURS: 3

Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy 2015 deals with common dermatological problems seen by pharmacists and the management of these problems.

Coordinator: E. Black

FORMAT: Lecture| Tutorial

PREREQUISITE: Successful completion of all first year classes

PHAR 2020 Topical Products (Eye and Ear)

CREDIT HOURS: 3

Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy 2020 is devoted to common problems of the eye and ear, and include those of an infectious and non-infectious nature.

COORDINATOR: E. Black

FORMAT: Lecture| Tutorial

PREREQUISITE: Successful completion of all first year classes

PHAR 2035 Respiratory Tract Complaints

CREDIT HOURS: 6

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy administration is also integrated. Pharmacy 2035 deals with common infectious and non-infectious respiratory complaints, treated with non-prescription and prescription medications.

COORDINATOR: E. Black

FORMAT: Lecture| Tutorial

PREREQUISITE: Successful completion of all first year classes

PHAR 2040 Gastrointestinal Disorders

CREDIT HOURS: 3

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy 2040 focuses on gastrointestinal ailments, and their management. Topics include acid-pepsin disease, diarrhea, constipation, and inflammatory bowel disease and anemia.

COORDINATOR: E. Black

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Successful completion of all first year classes

PHAR 2045 Nutrition

CREDIT HOURS: 1.5

Students will learn about nutritional needs of healthy clients and special populations. The roles, the daily requirements and sources of various vitamins, and pathological consequences of dietary deficiencies will be addressed. Special nutritional challenges in pregnancy, infancy, elderly, and grave illness will be examined.

COORDINATOR: S. Mansour

FORMAT: Lecture| Tutorial

PREREQUISITE: Successful completion of all first year classes

PHAR 2055 Drug Disposition

CREDIT HOURS: 1.5

The objective of this course is to provide students with an overview of the determinants of drug disposition, including a qualitative and quantitative assessment of drug absorption, distribution, metabolism and excretion. Major topics include hepatic and renal clearance, and factors which alter pharmacokinetics such as protein binding, disease states, age, enzyme induction/inhibition, drug interactions, and obesity, gender, and genetics.

COORDINATOR: K. Goralski

FORMAT: Lecture

PREREQUISITE: Successful completion of all first year classes

PHAR 2060 Medication Use Management

CREDIT HOURS: 1.5

This course introduces the pharmacy student to the "big picture" issues of the medication-use system. The three parts of the course are as follows: (1) an overview of the medication-use system, (2) discussion of the problems with the medication-use system and (3) exploration of potential solutions to these problems.

COORDINATOR: A. Murphy

FORMAT: Lecture

PREREQUISITE: Successful completion of all first year pharmacy

PHAR 2070X/Y Pharmacy Skills Lab II

CREDIT HOURS: 3

Skills Lab II expands upon the skills earned in Skills Lab I. Students are introduced to the Dalhousie College of Pharmacy Pharmacist's Patient Care Process. Written and verbal communication skills and patient assessment techniques are taught to support this process. Students learn to identify drug therapy problems and develop therapeutic management and monitoring plans. Knowledge obtained in the Problem Based Learning (PBL) and Critical Appraisal Series (CAS) components of the program are applied. Students will examine social, ethical and professional practice issues. Successful completion of a cardiopulmonary resuscitation (CPR) level HCP and standard first aid course is a requirement for a passing grade.

COORDINATOR: N. Kennie-Kaulbach

FORMAT: Lecture| Lab

PREREQUISITE: Successful completion of all first year classes

PHAR 2081 Practice Experience Program (PEP) I

CREDIT HOURS: 3

This rotation provides students with an opportunity to see patient centered pharmacy care in a hospital practice setting. Specific units focus on drug information, hospital pharmacy services provided as part of the healthcare team, sterile procedures and IV admixtures, medication safety, and interprofessional education opportunities. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

COORDINATOR: H. Davies

PREREQUISITE: Successful completion of second year classes (see College of Pharmacy Regulation F2)

PHAR 2082 Practice Experience Program (PEP) II

CREDIT HOURS: 3

This rotation provides students with an opportunity to participate in patient care in a community pharmacy setting. Pharmacy law, narcotics and controlled drugs, third party insurers, processing prescriptions, provincial formularies, drug information and systems management are key areas of this rotation. This rotation provides students with an opportunity to participate in patient care in a community pharmacy setting. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

COORDINATOR: H. Davies

PREREQUISITE: Successful completion of second year classes (see College of Pharmacy Regulation F2)

PHAR 3010X/Y Critical Appraisal Series II

CREDIT HOURS: 3

This course advances and reinforces the topics learned in PHAR 2010.03. The first term focuses on research methods and biostatistics seen in various trial designs. Students learn to critically evaluate the medical literature and write a term paper reviewing the evidence behind a clinical decision. The second term will focus on applying the tenets of evidence-based clinical practice. Through a journal club setting, students will evaluate the strengths and weaknesses seen in the literature as they relate to a clinical situation. Students are expected to use these skills in their problem-based learning classes.

COORDINATOR: D. Gardner

FORMAT: Lecture

PREREQUISITE: PHAR 2010.03 or consent of instructor

PHAR 3020 Women's Health Issues

CREDIT HOURS: 3

Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. PHAR 3020.03 deals with common women's health issues such as contraception, osteoporosis and menopause and the management of these problems.

COORDINATOR: H. Deal

FORMAT: Lecture| Tutorial

PREREQUISITE: Successful completion of all second year classes

PHAR 3030 Infectious Diseases

CREDIT HOURS: 3

Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. PHAR 3030.03 is devoted to miscellaneous infectious diseases.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 5

PREREQUISITE: Successful completion of all second year classes

PHAR 3040 Cardiovascular Diseases

CREDIT HOURS: 6

Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. PHAR 3040.06 addresses cardiovascular diseases such as hypertension, ischemic heart disease, congestive heart failure and thromboembolism, and the pharmacologic management of these conditions.

COORDINATOR: H. Deal

FORMAT: Lecture| Tutorial

PREREQUISITE: Successful completion of all second year classes

PHAR 3050 Pain and Rheumatology

CREDIT HOURS: 3

Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. PHAR 3050.03 deals with the understanding and management of acute and chronic pain of various origins.

COORDINATOR: H. Deal

FORMAT: Lecture| Tutorial

PREREQUISITE: Successful completion of all second year classes

PHAR 3055 CNS and Behavioral Disorders

CREDIT HOURS: 6

Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. PHAR 3055.06 involves the study of an array of conditions ranging from depression to seizure disorders.

COORDINATOR: H. Deal

FORMAT: Lecture| Tutorial

PREREQUISITE: Successful completion of all second year classes

PHAR 3060 Endocrine Disorders

CREDIT HOURS: 3

Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Disorder included in PHAR 3060.03 are diabetes and thyroid conditions.

COORDINATOR: H. Deal

FORMAT: Lecture| Tutorial

PREREQUISITE: Successful completion of all second year classes

PHAR 3070X/Y Pharmacy Skills Lab III

CREDIT HOURS: 3

Skills Lab III expands on the concepts learned in skills lab I and II. An added emphasis will be placed on written communication skills and prescription therapeutics as covered in the PBL curriculum. Students are expected to use Knowledge from CAS for the purposes of therapeutic-decision making and patient education. Lectures and device training will compliment the PBL curriculum. Standardized patients will be used for teaching purposes as well as for the final objective structured clinical exam.

COORDINATOR: K. Sponagle

FORMAT: Lecture| Lab| Seminar

PREREQUISITE: Successful completion of all second year classes

PHAR 3080X/Y Practice Experience Program (PEP) III

CREDIT HOURS: 3

This rotation focuses on the practical implementation of patient centered pharmacy care in community practice. Students will complete a variety of patient care work-

ups. Provision of drug information, prescription and non-prescription medications, patient education and health promotion are integral components of this rotation. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

COORDINATOR: H. Davies

PREREQUISITE: Successful completion of third year classes (see College of Pharmacy Regulations F2)

PHAR 4010 Critical Appraisal Series III

CREDIT HOURS: 1.5

This is a continuation of PHAR 3010.03. Students will combine their skills from the previous courses in this series as well as knowledge and skills derived from their problem-based learning curriculum and skills lab courses in a variety of tasks over the term. The ability to follow an evidence-based approach for supporting clinical decisions will be emphasized.

COORDINATOR: D. Gardner

FORMAT: Lecture

PREREQUISITE: Successful completion of all third year classes

PHAR 4025X/Y Pathocytologic Disorders

CREDIT HOURS: 6

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. This course deals with the pharmacotherapy of common cancers and includes issues such as pain control.

COORDINATOR: TBA

FORMAT: Lecture| Tutorial

PREREQUISITE: Successful completion of all third year classes

PHAR 4035 Disorder of the Liver and Genitourinary Systems

CREDIT HOURS: 6

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy administration is also integrated. This course deals with hepatitis, various other liver disorders, renal disease and men's health issues related to the genitourinary tract.

COORDINATOR: TBA

FORMAT: Lecture| Tutorial

PREREQUISITE: Successful completion of all third year classes

PHAR 4060 Advanced Patient Health Management

CREDIT HOURS: 3

Three major areas of patient health management will be discussed in this class: (1) the Canadian healthcare system and pharmacy benefit management; (2) pharmacoeconomics and formulary decision making; and (3) human resource management and leadership principles and practices in pharmacy.

COORDINATOR: A. Murphy

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 6

PREREQUISITE: Successful completion of third year pharmacy.

PHAR 4070 Pharmacy Skills Lab IV

CREDIT HOURS: 1.5

Skill Lab IV expands upon the skills learned in Skills Lab I, II and III. Students must apply the knowledge learned in other components of the curriculum and specific activities include but are not limited to: patient interviewing, assessment and education. Standardized patients will be used for teaching purposes as well as for the final objective structured clinical exam. Injection Training is a required component of Skills Lab IV.

COORDINATOR: H. Deal

FORMAT: Lecture| Lab| Seminar

PREREQUISITE: Successful completion of all third year classes

PHAR 4080 Practice Experience Program (PEP) IV

CREDIT HOURS: 4.5

This clinical rotation focuses primarily on the provision of patient focused pharmacy care in hospital or long-term care practice. The student will apply the knowledge, skills and values that have been learned in their academic study and previous PEP rotations, using a patient-centered approach. Students will serve as a member of the healthcare team incorporating professionalism, ethical principles, drug information, patient education and health promotion in the application of patient focused pharmacy care. Students will be required to complete a full patient care work-up on several patients and present the cases to a health professional audience. Students will expand their educational role by preparing and presenting an in-service on a relevant topic to a health professional audience. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

COORDINATOR: H. Davies

PREREQUISITE: successful completion of fourth year classes (see College of Pharmacy Regulation F2)

PHAR 4085 Practice Experience Program (PEP) V

CREDIT HOURS: 4.5

This clinical rotation focuses primarily on the practical provision of patient centered pharmacy care in community practice. As with the hospital rotation, students will apply the knowledge, skills and values that have been acquired throughout academic study and previous PEP rotations using a patient-centered approach. Interaction with family physicians and other healthcare professionals in the community is a key component of this rotation. Students should have the opportunity to interact with patients in the physician's office, pharmacy and/or home environment. Students will serve as a member of the healthcare team and incorporate professionalism, ethical principles, drug information, patient education and health promotion in the application of patient focused pharmacy care. Students will be required to complete full patient care work-ups on several patients and present the cases to a health professional audience. Students will expand their educational role by preparing and presenting a relevant health promotion/disease prevention topic to a community audience. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

COORDINATOR: H. Davies

PREREQUISITE: Successful completion of fourth year classes (see College of Pharmacy Regulation F2)

Social Work

School of Social Work

Location:

Building/Room: Mona Campbell Building

Street Address 1: 1459 LeMarchant Street

Street Address 2: Suite 3201

P.O. Box: 15000

Halifax, NS B3H 4R2

Telephone: (902) 494-3760

Fax: (902) 494-6709

Website: www.socialwork.dal.ca

Email Address: social.work@dal.ca

Introduction

The School of Social Work's vision is a commitment to building a socially just society, defined as one that upholds and validates the values of equality, diversity, inclusiveness, democracy and concern for human welfare. We manifest and advance curricula, scholarship and school culture that are congruent with those values.

The BSW degree program is accredited by the Canadian Association for Social Work Education. It embraces a critical and anti-oppressive approach to social work practice that includes an emphasis on social policy, research skills and critical analysis, professional values, theoretical perspectives and practice methods. While the program has evolved within the context of the people, communities and service network of the Maritime Provinces, graduates are qualified to practice social work throughout Canada and beyond.

BSW Delivery Options

The BSW is a 20 credit degree program and is offered on campus and by distance delivery online. Both delivery methods include field placement experience. The application deadline is February 15th of each year.

Relationship to the MSW Program

The School of Social work offers a Master of Social Work degree for advanced specialized study in social work practice. The academic prerequisite for the MSW degree is a BSW or a Master's degree in a related field of study.

Continuing Education

The School offers a Continuing Education Program (non-credit) of thematic workshops.

Nova Scotia Association of Social Workers

Provincial legislation requires that only persons who are registered with the Nova Scotia Association of Social Workers (NSASW) can practice as social workers within Nova Scotia. To become fully registered and use the title of Social Worker after award of the BSW degree, at least 3,858 hours of paid supervised social work experience is necessary.

Staff

Director of the School

MacDonald, J. (Interim)

Associate Director

Campbell, C.

Undergraduate Coordinator

Brown, M.

Professor Emeritus

Wein, F. C., BA (Queen's), MA, PhD (Cornell)

Professors

Karabanow, J., BA, MA (McGill), PhD (Wilfrid Laurier)
Thomas Bernard, W., BA (MSVU), MSW (Dalhousie), PhD (Sheffield)
Ungar, M., BA, BSW, MSW (McGill), PhD (Wilfrid Laurier)

Associate Professors

Brown, C., BA, MA (Manitoba), MSW (Carleton), PhD (U of T)
Brown, M., BA, BSW, MSW (Dalhousie), PhD (MUN)
Campbell, C., BSc (King's), BEd, (Acadia), MSW (Carleton), PhD (MUN)
MacDonald, J., BSW (St. Thomas), MSW (Carleton), PhD (MUN)
Richard, B. K., BA (M.A.), MSW (Dalhousie)

Assistant Professors

Baikie, G., BSW, MSW, PhD candidate (MUN)
Hanrahan, C., BA (McGill), MS, PhD (U of Toronto)
MacDonald, N., BA, BSW, MSW (Dalhousie), PhD Candidate (Dal)
Ross, N., BA, BSW, MSW, PhD candidate (Dalhousie)
Turner, L., BSW (Dalhousie), MSW (Moncton), MEd (New Brunswick), PhD (MUN)
Weinberg, M., BA (U of T), MSW (Smith College), PhD (U of T)

Adjunct Professors

Campbell, S.
Doiron, N.
Gilroy, J.
Harbison, J.
Liebenberg, L.
Wien, F.

Instructors

Kondrashov, O., BA (Lviv National Polytechnic U), BSW (U Manitoba), MEd (Lviv National Polytechnic U), MSW, PhD candidate (U Manitoba)
Mucina, M., BA (U of Victoria), MSW (U of Toronto), PhD candidate (U of Toronto)

Agency Field Instructors

Many individuals throughout the municipality, province, and country contribute to the education of Social Work students through offering and supervising student placements. They represent a wide range of agencies and organizations including: community based, non-profit, government, physical/mental health and addiction prevention and treatment services. Their invaluable assistance is gratefully acknowledged and appreciated.

Admissions

Information on academic preparation, admission and application procedures is contained in the Admission Requirements section of the calendar. Enrolment is limited to a specified number of places that are offered once a year to the best qualified candidates, selected by the School's Admissions Committee. Equal consideration is given to part-time and full-time applications.

Prior Criminal Conviction

BSW applicants should be aware that a prior criminal conviction may render them unable to obtain a license in their field of study upon graduation, or unable to participate in some clinical field work experiences throughout their course of study.

Affirmative Action

The School of Social Work has an affirmative action policy for applicants who are Acadian, Aboriginal, African Canadian, members of other racially visible groups, and persons with (dis)Abilities. The school is committed to admitting and graduating the highest possible number of students who qualify under this policy. Members of these groups who have five general (non social work) university credits that average B- are encouraged to apply under this policy. Applicants may self identify in a place provided on the Social Work Statement cover sheet, which is part of the BSW application package. Each candidate is considered individually on the basis of her/his qualifications, rather than in relation to other applicants. The admissions prerequisites and selection criteria are otherwise the same for all candidates.

BSW Degree Program Program Objectives

Upon successful completion of the BSW program, students will:

1. Have an understanding of equity and justice through critical analysis.
2. Develop intellectual skills, scholarly attributes, and professional characteristics and values, including but not limited to, curiosity, open-mindedness, effective communications, judgment, rigor, respect, humility, embracing of difference, acceptance, integrity, compassion, self-care and ethical action.
3. Develop insight into the complex, contextual, and sometimes contradictory nature of social work theory, practice, policy, ethics and research.
4. The development of practice theory and skills “required to analyze situations, establish accountable relationships, intervene appropriately with clients and related systems and evaluate one’s social work interventions” (CASWE, 2007) This includes an understanding of a range of life events and processes that may impact peoples’ development, personalities and potentials.
5. Develop a critical understanding of the personal and professional “use of self.”

Program Requirements

The five admission credits that form the basic BSW academic prerequisite reduces the 120 credit hours requirement to 90 credit hours for all students.

Required Courses

- SLWK 2010.03: Introduction to Community Social Work
- SLWK 2111.06: Development of Canadian Social Work and Social Welfare
- SLWK 2222.03: Advancing Social Justice
- SLWK 2333.06: Beginning Social Work Practice or SLWK 2334.03/SLWK 2335.03
- SLWK 2444.03: Life Processes: Conceptualizations and Practices for Critical Social Work
- SLWK 3030.06: Theoretical Foundations of Social Work Practice
- SLWK 3012.03: Perspectives on Social Welfare Policy
- SLWK 3083.03: Introduction to Research Methods and Statistics

- SLWK 3084.03: Understanding Research Methods in Social Work
- SLWK 3220.03: Cross-Cultural Issues in Social Work Practice
- SLWK 4010.06: Advanced Social Work Practice
- SLWK 4033.09: Field Practicum and Seminar or SLWK 4034.03/SLWK 4035.03
- Social Work Elective
- Social Work Elective

Distance students are required to take SLWK 2335.03, Beginning Social Work Practice which is the second half of SLWK 2334. The course is a combination of online study in the winter term with a two week on-campus (Dalhousie, Halifax, NS) residency component in the spring session, normally in early May.

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. **Please register in IPHE 4900.00 (section 6).** Successful completion of this course is a requirement for graduation, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

Because of the nature of this course, registration in IPHE 4900 does not constitute a course overload.

Transfer Credit Policy

The 90 credit hours may be further reduced by the amount of transfer credits for which a student is eligible. Suitable university credits that have been completed with a cumulative average of 2.7 (or B-) are eligible for transfer credit consideration. The following procedures guide the assignment of transfer credit:

1. A maximum of 30 transfer credit hours can be awarded.
2. As a general rule, transfer credit is assigned first to Elective Courses and then to Required Courses within the BSW curriculum.
3. Transfer credit for university Social Work courses taken prior to a student's admission to the SSW may be assigned to required courses within the BSW curriculum. For this to occur students are required to submit the course outlines for these courses (calendar descriptions are not sufficient).
4. No matter where transfer credit is assigned, all students must complete at least 60 credit hours offered by the SSW to complete the BSW degree.
5. The only exception to the above will be students transferring from other BSW programs. Transfer credits for these students will be assigned following an individual file review of the student's previous course outlines to determine equivalency of content and credit value within the SSW curriculum. Transfer credit is assigned as fairly and appropriately as possible, although some loss of credit usually occurs. Students who transfer from other BSW degree programs are governed by the regulation that any student with a previous degree is required to complete a minimum of 36 credit hours under Dalhousie instruction, and that any student without a degree is required to complete a minimum of 45 credit hours under Dalhousie instruction.

Course Load and Sequencing

Length of Program

Most students accepted to the BSW program have a degree on entry with the required cumulative grade point average. Such students normally require 60 credit hours to complete the BSW degree. Students studying on campus may register on a full-time basis for two years of study, or on a part-time basis (to a maximum of ten years). Distance students may register for a two-year (24 month) full-time program of study, or a three-year part-time program of study (to a maximum of 10 years).

Students registered who have only 30 credit hours on entry (usually persons with related work experience) are required to complete three full-time years of study (90 credit hours) or the part-time equivalent.

Students registered with 36 credit hours or more on entry but less than 90 credit hours, complete a two-to-three year program as determined by the number of prior credits in relation to the School's transfer credit policy.

Course load and sequencing may vary from student to student depending upon the number of transfer credits and full or part-time status.

On-Campus Delivery

- For full-time students the usual load is 15 credit hours (i.e., five .03 credit courses) in the Fall and Winter terms.
- For part-time study the course load may be as minimal as one .03 credit course per term.
- The only Social Work courses offered in the Spring semester consist of one Social Work elective and Field Practicum and Seminar.
- It is important to pay close attention to the pre or co-requisites for each course. These are indicated in the course descriptions.

Distance Delivery

Distance Students are strongly encouraged to maintain their course sequencing schedule. Any changes must be in accordance with pre- and co-requisites as outlined in the calendar and are dependent upon availability of course offerings, especially electives. Students studying by distance will be assessed distance delivery fees in addition to tuition.

Registration

Registration is completed online for all students regardless of delivery method. For more information, go to <http://www.dal.ca/registration> and <http://www.dal.ca/online>.

The academic timetable is available online each year. On-campus Social Work courses have section numbers of 01 or 02. Online Distance Social Work courses have section numbers of 07 or 08, and a notation of “DR”.

IMPORTANT: Please note that it is not possible to transfer between onsite and the online delivery or to register for courses other than those which apply to the delivery method for which the student has been accepted.

Field Education

The Field Practicum and Seminar course consists of a 700 hour placement at a community agency plus participation in a concurrent integrated seminar. For a full explanation of the placement process, roles and responsibilities please download the Field Manual at http://socialwork.dal.ca/Prospective_Students/

Field Placements are organized by the Field Education Coordinator at the School of Social Work.

Advising Sessions for New Students

New on campus students are expected to attend Orientation which is scheduled prior to the commencement of courses. Students can meet individually with the Student Services Coordinator to review the curriculum advising forms and ask questions pertaining to the BSW program. Distance students are provided with an online orientation and information site and should contact the Distance Coordinator regarding their program schedule and questions.

Regulations

All Bachelor of Social Work students are required to observe the University and Academic Regulations of Dalhousie University and the Faculty of Health Professions set forth in the annual Undergraduate Calendar. The website location is <http://www.registrar.dal.ca> - Undergraduate Calendar - Academic Regulations, University Regulations.

Grade Point Average Requirements

Faculty of Health Professions' academic regulations applies to the BSW degree requirements. Students require a cumulative GPA of 2.0 to graduate. In addition, the School's grade requirements specified in Items 2 and 3 below apply to components of the Social Work curriculum.

Grade Requirements for Social Work Courses

The minimum requirements for satisfactory completion of a Social Work course is C-. In the case of a core course, a student who earns a grade of less than C-, but is otherwise still eligible to continue in the program, must repeat the course until a grade of C- is attained. In the case of an elective, a student who earns a grade of less than a C-, but is otherwise still eligible to continue in the program, must repeat the same elective or if not offered during the student's course of study, a different elective until a grade of at least C- is attained. Social Work courses are all courses taken under BSW study other than those designated as general admission credits.

Required Withdrawal: Academic Dismissal

A student who fails to meet sessional GPA standards as defined in the Academic Regulations - Faculty of Health Professions must withdraw from the School for at least 12 months. (Please refer to Academic Regulations - Good Standing, Probation and Academic Dismissal, Dalhousie Undergraduate Calendar).

- A student who fails a repeated academic course must normally withdraw from the BSW Program.
- A student who fails SLWK 4033, Field Practicum and Seminar is required to withdraw from the BSW Program.

Required Withdrawal on Grounds of Unsuitability

See University Regulations: Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability - Faculty of Health Professions.

Consideration of Readmission

Students are normally required to complete their undergraduate studies within ten years of their first registration and comply with the program requirements at the time of first registration. If a student is readmitted and cannot complete the program within 10 years they may be required to comply with the new program requirements.

5.a Request for Readmission After Dismissal

Students who have been required to withdraw from the School of Social Work on the basis of academic dismissal may apply for readmission by the annual February 15 admissions deadline date that follows a minimum of 12 month's absence from the School. Due to the competitive nature of the enrolment process, readmission of students is not guaranteed.

5.b Request for Readmission After Voluntary Withdrawal

Students in good standing who have not registered in the program for 36 months or less and who wish to be reinstated are required to submit a new application form to be returned with a letter to the Undergraduate Program Coordinator requesting re-admission to resume their BSW degree studies. Students in good standing who have not registered in the program for 37 months or more and who wish to be reinstated are required to reapply by the February 15 admission deadline date. The application and all supporting documentation must be accompanied by a letter explaining the reasons for the interruption in the student's studies and the decision to request readmission to the BSW degree program.

Appeals

A student wishing to appeal a decision based on School regulations, should consult with the Chair of the Committee on Undergraduate Studies for advice on appeal procedures.

Duration of Undergraduate Study

Students are normally required to complete the BSW degree within 10 years of their first registration (see Academic Regulation—Duration of Undergraduate Studies).

Workload Regular Academic Year

30 credit hours per academic year shall be regarded as constituting a normal workload for a full-time student. Permission of the Undergraduate Program Coordinator is required if this workload is to be exceeded, or if the planned workload in any one term (Fall or Winter) would amount to more than 15 credit hours per term.

On-campus, part-time students may register for a minimum of one .03 credit (three credit hours) per term. Part-time status applies to students registered for no more than a total of 2.5 credits (15 credit hours) in the Fall and/or Winter terms. All new students are required to register in the first Fall term following their acceptance in order to maintain their place in the program.

Workload Summer Session (includes May-June and July-August)

Dalhousie regulations permit students to take six credit hours in each of the May-June and July-August parts of Summer term. Social Work students may, following consultation with the Field Coordinator, register for the Field Practicum and Seminar course during this session.

The School usually offers one .03 credit Social work course in the May/June period for BSW campus students, provided that minimum enrollment requirements are met. Students in distance delivery take their elective courses in the summer sessions. Consult the timetable for current course offerings.

Permission of the Undergraduate Program coordinator is required to exceed the two-credit limit for the two summer terms.

Students in Other Degree Programs (applicable for on-campus students only)

Students enrolled in degree programs at Dalhousie may, in conformance with their program regulations, choose their degree electives from Social Work Field of Practice electives. Permission from the instructor is required; course prerequisites and class size limitations apply. Students are able to enroll in Social Work electives

only to the maximum credit value allowable for open electives by their degree requirements. Any additional Social Work courses would be considered on the same basis as “No Degree.”

Special Students “Non-Degree” (applicable for on-campus students only)

Social Work courses are not available to persons on a “no degree” basis, with the exception of agency field instructors and other qualified Social Work professionals who are able to satisfy normal admission requirements. Permission of the Undergraduate Coordinator is also required.

Students enrolled in other Social Work degree programs may be permitted to enroll in specific courses, by application for admission as a visiting student with letter(s) of permission from the home university. Course prerequisites and size limitations apply. Further information may be obtained from the Student Services Coordinator.

Deferral Policy

Newly accepted applicants who, for reasons beyond their control, are unable to take up their position on the date from which they were accepted, may request a deferral of one, two, or three terms. No student may receive more than one deferral.

Requests for a deferral of admission should be sent in writing to the Admissions Coordinator of the School of Social Work by August 15th for the year in which they were offered admission. When submitting a request for deferral, an applicant should clearly state the reason for their deferral and, where relevant or appropriate, provide additional documentation to support the request (for example, medical certificates). All deferrals are subject to the approval of the Undergraduate Program Coordinator.

Audit by Agency Field Instructors

The School of Social Work permits Agency Field Instructors to audit Social Work courses. Prior permission of the instructor concerned is required. In order for the audit to show on a University transcript, the agency field instructor must abide by the audit and fee regulations as outlined in Academic Regulation—Audit of Courses.

Tuition Fees

Detailed information concerning tuition and fees is available in the Fees section as well as <http://www.dal.ca/studentaccounts>.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department.

The following courses are restricted to Social Work students.

SLWK 2010.03: Introduction to Community Social Work.
SLWK 2111X/Y.06: Development of Canadian Social Work and Social Welfare.
SLWK 2222.03: Advancing Social Justice.
SLWK 2333X/Y.06 (SLWK 2334/SLWK 2335): Beginning Social Work Practice.
SLWK 2444.03: Life Processes: Conceptualizations and practices for Critical Social Work.
SLWK 3012.03: Perspectives on Social Welfare Policy.
SLWK 3030.06: Theoretical Foundations of Social Work Practice.
SLWK 3083.03: Introduction to Research Methods and Statistics in Social Work.
SLWK 3084.03: Understanding Research and Research Methods in Social Work.
SLWK 3220.03: Cross-Cultural Issues and Social Work Practice.
SLWK 4010.06: Advanced Social Work Practice.
SLWK 4033.09 (SLWK 4034/SLWK 4035): Field Practicum and Seminar.

Electives

In keeping with the overall program goals of the BSW program of SSW, all elective courses are designed to help students develop a critical analysis of the major themes and current issues related to the course topic. In addition, all electives explore the differential impact of social constructs such as race, gender, class, age, sexual orientation, and ability on the particular issue or practice field.

There are no pre or co-requisites for Social Work Field of Practice Electives. The format is generally a combination of lecture, discussions and small group activities. Participation of non-social work students is dependent upon approval of their home School/Department, course enrollment and the permission of the instructor. Not all electives are offered every year; check the timetable for each year's offerings.

Possible Elective Offerings

- SLWK 3110.03: Africentric Perspectives in Social Work
- SLWK 3120.03: International Social Work
- SLWK 3130.03: Women and Violence
- SLWK 3135.03: Social Work and Mental Health
- SLWK 3140.03: Crisis Counseling
- SLWK 3150.03: Poverty and Inequality
- SLWK 3160.03: Social Work with Aboriginal Populations
- SLWK 3200.03: Law and Social Work
- SLWK 3245.03: Queer-Centred Social Work Practice
- SLWK 3250.03: Social Work in Corrections
- SLWK 3270.03: Social Work in Addictions
- SLWK 3290.03: Advanced Counseling in Social Work Practice
- SLWK 3320.03: Social Work and Aging
- SLWK 3330.03: Independent Study
- SLWK 3350.03: Social Work with Groups
- SLWK 3360.03: Social Work and Adolescents
- SLWK 3370.03: Child Welfare
- SLWK 4380.03: Disability Policy and Service

Course Descriptions

SLWK 2010 Introduction to Community Social Work

CREDIT HOURS: 3

Community Development within social work is the facilitation of meaningful change within communities to improve the quality of life for members of those communities. This course considers various conceptions of community, elements of change processes, and specific change strategies.

SLWK 2111X/Y Development of Canadian Social Work and Social Welfare

CREDIT HOURS: 6

This course is delivered online for campus students. This is an introductory survey course, offering a beginning examination of topics and issues that will be examined in greater depth in other courses during the BSW program. By reviewing the historical development of the politics, principles, policies, practices, values, and ethics of Canadian social work and social welfare students appreciate the contextual, complex, and sometimes contradictory nature of the social work profession.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

SLWK 2222 Advancing Social Justice

CREDIT HOURS: 3

This course introduces students to the central concepts of a social justice perspective through a deconstruction and reconstruction of various assumptions, practices, and positionalities that advance and/or impede social justice. Rooted in processes of critically reflective analysis this course attends to cognitive, affective, and spiritual learning processes.

SLWK 2333X/Y Beginning Social Work Practice

CREDIT HOURS: 6

This course introduces students to the processes and practices of the social work profession including a range of beginning practice skills, social work values and ethics, the varied contexts of social work practice, and the roles and responsibilities of professional social workers. This multi-faceted course may include course room instruction, simulations, seminars, workshops, contact with practicing social workers, visits to various social service agencies, and exposure to "first voice" experiences. This course requires 40 hours of self-directed learning activity time to be completed outside regularly scheduled class time.

NOTE: Course Details listed here also apply to SLWK 2334/SLWK 2335.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: /Co-requisite: SLWK 2111, SLWK 2222

SLWK 2334 Beginning Social Work Practice

CREDIT HOURS: 3
See SLWK 2333.

SLWK 2335 Beginning Social Work Practice

CREDIT HOURS: 3
See SLWK 2333.

SLWK 2444 Life Processes: Conceptualizations and practices for Critical Social Work

CREDIT HOURS: 3

This course critically explores a range of life events and processes that may impact peoples' development, personalities and potentials. Attention is given to how ethnicity, race, social class, ability, gender, sexual orientation, age, religion, and other social variables intersect with the individual development. The need for differential reactions from workers in response to clients varied life experiences will also be considered.

PREREQUISITE: /Co-requisite: SLWK 2111, SLWK 2222

SLWK 3012 Perspectives on Social Welfare Policy

CREDIT HOURS: 3

As an introduction to social policy analysis, this course surveys a variety of perspectives on social problems and social policy issues, with a focus on contemporary debates. The impact of policy on service users is a central theme of the course.

PREREQUISITE: /Co-requisite: SLWK 2111, SLWK 2222

SLWK 3030X/Y Theoretical Foundations of Social Work Practice

CREDIT HOURS: 6

The central theme of this course is the integration of theory and practice, recognizing that theory guides practice and practice informs theory. The first term consists of the theoretical foundations of social work, understanding their relation to social work practice from social, political, economic and historical positions. The second term offers an in depth examination of the theoretical foundations of a variety of critical perspectives. Case applications are explored from a variety of practice situations and problem definitions.

PREREQUISITE: /Co-requisite: SLWK 2111, SLWK 2222

SLWK 3083 Introduction to Research Methods and Statistics in Social Work

CREDIT HOURS: 3

This course provides an introduction to both quantitative and qualitative research methods, with particular attention to examples from social work research. Students become familiar with the whole of the research process from the identification of the problem to the presentation of results, including the application of statistics. Students will be exposed to the full range of alternative research designs, including both quantitative and qualitative research methods.

SLWK 3084 Understanding Research and Research Methods in Social Work

CREDIT HOURS: 3

This course provides students with the research methods required to evaluate social work practice at the case and program level. Students will learn how to evaluate organizations, casework, plan evaluations, and analyze quantitative and qualitative approaches to evaluations. Emphasis will be placed on evaluating benefits and outcomes of interventions for clients.

PREREQUISITE: SLWK 3083.03 is required

SLWK 3220 Cross-Cultural Issues and Social Work Practice

CREDIT HOURS: 3

This course provides an opportunity to critically examine theoretical frameworks for viewing marginalized racial, ethnic and cultural groups in society, to examine personal values as they relate to the above groups, to develop skills in working effectively with these groups, and to understand related social policies.

PREREQUISITE: SLWK 2222, SLWK 2111, SLWK 2333, SLWK 3012

SLWK 4010X/Y Advanced Social Work Practice

CREDIT HOURS: 6

Building on a number of preceding courses this course considers numerous advanced practice theories and skills including a critical analysis of ethics. Student will become proficient in applying a critical social work practice framework at the beginning practitioners' level.

COREQUISITE: SLWK 3030

PREREQUISITE: SLWK 2111, SLWK 2222, SLWK 2333, SLWK 2444

SLWK 4033X/Y Field Practicum and Seminar

CREDIT HOURS: 9

This course includes a 700 hour agency based practice placement, integrated seminars and the opportunity to develop a broad range of practice knowledge and skills sufficient to meet the requirements of an entry level professional position. The field practicum is done at the end of a student's program. Students are responsible to stay in touch with the Field Coordinator during the coordination process and comply with various requirements of placement sites (for example: immunizations, CRC, Child Abuse Registry). Some sites may require separate disability insurance in lieu of eligibility for Worker Compensation Coverage. Such costs are the responsibility of the student.

NOTE: Course Details listed here also apply to SLWK 4034/SLWK 4035.

COREQUISITE: SLWK 3030.03, SLWK 4010.03

PREREQUISITE: SLWK 2111.03, SLWK 2222.03, SLWK 2333.03, SLWK 2444.03

SLWK 4034 Field Practicum & Seminar

CREDIT HOURS: 4.5

See SLWK 4033.

SLWK 4035 Field Practicum & Seminar

CREDIT HOURS: 4.5

See SLWK 4033.

Introduction

The Faculty of Management includes four schools - Rowe School of Business, School of Information Management, School of Public Administration, and School for Resource and Environmental Studies. The Faculty has two undergraduate program options - BComm (co-op) in the Rowe School of Business and BMgmt offered jointly by the four schools. The Commerce degree has a mandatory co-operative education format.

Students wishing to enrol in programs offered by the Faculty should address themselves directly to the Schools concerned for further information or for help in planning courses of study; for the Undergraduate Programs, contact the Undergraduate Academic Advising Office at (902) 494-3710.

Introduction

Dalhousie's Norman Newman Centre for Entrepreneurship, in collaboration with the Centre for Entrepreneurship Education and Development (CEED), offers a Certificate Program in entrepreneurship – the Entrepreneurial Skills Program (ESP), which is open to all Dalhousie University students.

ESP facilitates the development, growth and success of student-run ventures. Through extracurricular, individualized, experiential learning, you will apply skills learned in the classroom to your own ventures. Students participating in the program develop personal portfolios that illustrate their entrepreneurial capabilities. At Dalhousie there is a particular emphasis on ventures that address larger societal needs in the area of sustainability and social responsibility.

What is the Entrepreneurial Skills Program (ESP)?

The program is designed to be taken over the length of your time as a student at Dalhousie and therefore shouldn't extend time to degree completion. Successful students will earn a certificate in entrepreneurship in addition to their associated Dalhousie University academic degree in their field of study. The program culminates in the development of a personal portfolio that illustrates a student's entrepreneurial capabilities which is then presented to an accreditation panel. Upon successful completion of ESP, students are accredited and receive a certificate indicating venture readiness.

How do I know if ESP is for me?

Like most things, you probably won't know till you know. What we can say is that ESP typically appeals to those students who have an interest in being the masters of their own destiny. If you've got an idea for a business that you want to start, either during University or after graduation, then you owe it to yourself to get involved with ESP.

What's in it for me? Why would I want to be part of ESP?

Being part of ESP introduces you to a network of like-minded individuals. It's no surprise that successful people surround themselves with talented, energetic and visionary people. If you want to learn more about being in business for yourself, or if you want to get better at being an entrepreneur, then ESP is a good start.

By enrolling in ESP, you become part of a growing cohort of students that are interested in making a difference in their own lives and the lives of others. Aside from networking and peer-to-peer learning opportunities, you will also have access to training subsidies, business coaching, and skills development opportunities that you can leverage to make yourself a better business owner (or make yourself more marketable as an employee). If you participate in Dr. Leach's classes you may be able to pursue your venturing interests while at the same time fulfilling some of the class assignment requirements.

If I sign up, how big a commitment are we talking about?

Students enrolled in ESP are free to choose their degree of involvement. Many students become heavily involved, attending most, if not all, ESP-sponsored events. Others attend a limited number of events. ESP is flexible enough to accommodate you and your personal, academic and professional schedules.

Is Dalhousie the only University that offers ESP?

No. Mount Saint Vincent University also has an active ESP program. On occasion, Dalhousie and MSVU partner to run ESP-sponsored events that are attended by students from both Universities.

ESP sounds like a lot of work – what if it gets too much for me?

Involvement in ESP is entirely optional. You are free to leave the program at any point. Unlike most academic programs, there's no downside risks (mark-related/academic) associated with dropping ESP.

Introduction

The Rowe School of Business provides quality programs at both the undergraduate and master's levels that prepare students to contribute to and take leading positions in business and society. Graduates of the programs are competitive in the global, diverse and continually changing workplace. Teaching, scholarship and service link theory and practice to benefit students, the University and the business community in Canada and abroad.

Specific objectives are to:

- Attract, retain and educate students of high calibre from Nova Scotia, elsewhere in Canada and internationally.
- Develop students' knowledge of key concepts and issues in business operations, as well as in-depth knowledge within specialized business disciplines.
- Develop students' analytical and decision-making skills through a mix of theoretical and applied approaches including lectures, discussion groups, individual research projects, team projects and casework, as well as comprehensive field projects.
- Enhance students' team and communication skills, which are needed to succeed in careers and management.
- Develop knowledge through research and association with the academic and professional communities.
- Maintain strong ties with both the private and public sectors.

The Bachelor of Commerce Co-op program includes studies in the humanities and social sciences as well as in the functional areas of business. It is offered on a co-operative education (work/study) basis.

Wooden, K., BComm, MBA (Saint Mary's)

Bachelor of Commerce (Co-op) Program

The Rowe School of Business offers a four-year, Bachelor of Commerce (Co-operative Education) Program that is accredited by both the Association to Advance Collegiate Schools of Business (AACSB) and the Canadian Association for Co-operative Education (CAFCE). It is one of the few mandatory co-op business degree programs in Canada. Cooperative education is an academic strategy that integrates on-campus study with off-campus work experience. The schedule for the Bachelor of Commerce (Co-op) Program includes seven academic terms (AT) and three work terms (WT), as follows:

	Fall	Winter	Summer
Year 1	AT1	AT2	FREE
Year 2	AT3	WT1	AT4
Year 3	WT2	AT5	WT3
Year 4	AT6	AT7	

The co-op program in Commerce requires a broad and general range of studies, including required and elective courses provided by various Faculties within the university. The program also allows students to choose a major in a variety of special areas, and a minor in an area outside of the Faculty of Management. The Commerce (Co-op) program does not currently offer double majors.

The three work-terms each receive credit, but constitute a full work load. (See the Regulations section of this calendar for “overload” limits and conditions.)

Degree Requirements

- Four-year program - seven academic terms and three work-terms
- Total credit hours required - 120
- Required GPA for graduation 2.00

Note: A suitable replacement for MATH 1115.03 is MATH 1000.03

- Commerce electives - 24 credit hours
- Work-terms - 9 credit hours
- COMM 1010.03
- COMM 1101.03
- COMM 1502.03
- COMM 1710.03
- COMM 1720.03
- COMM 2102.03
- COMM 2202.03
- COMM 2203.03
- COMM 2303.03
- COMM 2310.03
- COMM 2401.03
- COMM 2501.03
- COMM 2502.03
- COMM 2603.03
- COMM 3501.03
- COMM 3511.03
- COMM 4351.03
- COMM 4352.03
- ECON 1101.03
- ECON 1102.03
- MATH 1115.03
- Non-commerce electives - 18 credit hours (of which 9 credit hours must be at or above the 2000 level) selected from all courses offered in the University other than Commerce, Management and Business.
- Free electives - 6 credit hours (can be Commerce or Management, at or above the 2000 level; or non-commerce at any level)

NOTE: Students readmitted to the Commerce program will be subject to the Academic Regulations as stated in the Calendar for the year of readmission. For further information, contact the Rowe School of Business, Undergraduate Advising Office, 6100 University Avenue, Suite 2086, (902) 494-3710. Email: uao@dal.ca

Program Guide

Students normally follow a fixed program of study, as outlined below:

Academic Term One

- COMM 1010.03: Business in a Global Context

- COMM 1101.03: Financial Accounting
- COMM 1502.03: Core Business Applications
- ECON 1101.03: Principles of Microeconomics
- One non-commerce elective

Academic Term Two

- COMM 1710.03: Business Communications I
- COMM 2102.03: Managerial Accounting
- ECON 1102.03: Principles of Macroeconomics
- MATH 1115.03: Mathematics for Commerce
- One non-commerce elective

Academic Term Three

- COMM 1720.03: Business Communications II
- COMM 2202.03: Finance 1
- COMM 2401.03: Intro to Marketing
- COMM 2501.03: Statistics
- One non-commerce elective

Work Term I - COMM 2801.03

Academic Term Four

- COMM 2203.03: Finance 2
- COMM 2303.03: Organizational Behaviour
- COMM 2310.03: Business Ethics and Corporate Social Responsibility (CSR)
- COMM 2502.03: Predictive Analytics
- COMM 2603.03: Legal Aspects of Business

Work Term II - COMM 3801.03

Academic Term Five

- COMM 3501.03: Operations Management
- COMM 3511.03: Management Information Systems
- Three commerce electives
- One non-commerce elective

Work Term III - COMM 3802.03

Academic Terms Six and Seven

- COMM 4351.03 and COMM 4352.03: Competitive Strategy & Strategic Mgmt
- Five commerce electives
- Two non-commerce electives
- Two free electives

During their fifth, sixth and seventh academic terms, students can either pursue a customized program of study, by choosing electives from a wide range of the functional areas of business, or they can follow a more specialized program, taking their elective courses towards a major.

Major in Accounting

Note: An average grade of B- must be obtained between COMM 1101.03 and COMM 2102.03 to major in Accounting.

Students **must** complete the following six courses:

- COMM 3105.03
- COMM 3111.03
- COMM 3114.03
- COMM 3116.03
- COMM 4101.03
- COMM 4125.03

Plus two of:

- COMM 3207.03
- COMM 4102.03 (recommended)
- COMM 4112.03
- COMM 4126.03 (recommended)
- COMM 4511.03

CPA Canada requires certain academic prerequisites for admission to the CPA certification program. That is, CPA candidates must complete an undergraduate degree and cover certain specific prerequisite subject areas. Appropriate courses can be taken in the Rowe School of Business, as part of the Accounting Major structure, in order to meet these requirements. Particulars can be obtained from the Chartered Professional Accountants Canada website <http://cpacanada.ca>

Major in Entrepreneurship

Students **must** complete the following four courses:

- COMM 3307.03
- COMM 3308.03 OR MGMT 3902.03
- COMM 4301.03
- COMM 4523.03

Plus two of:

- COMM 3309.03
- MGMT 3902.03 OR COMM 3308.03
- COMM 3401.03
- COMM 3402.03
- COMM 3404.03
- COMM 3405.03
- COMM 3408.03
- COMM 3409.03
- COMM 3410.03
- COMM 4701.03

Note: At least one Work Term must either be in an approved "Entrepreneurial Setting "; OR an "Entrepreneurial Work Term " as defined by the Norman Newman Centre for Entrepreneurship and Management Career Services.

Major in Finance

Note: An average grade of B- must be obtained between COMM 2202.03 and COMM 2203.03 to major in Finance.

Students **must** complete the following three courses:

- COMM 3203.03
- COMM 3206.03
- COMM 4240.03

Plus three of:

- COMM 3207.03
- COMM 4201.03
- COMM 4202.03
- COMM 4250.03
- COMM 3100.03 or COMM 3105.03 or COMM 4340.03 or ECON 2200.03 or ECON 2201.03

Note: Courses outside of Commerce, such as ECON, are counted as non-commerce electives or free electives

Major in International Business

Students **must** complete the following:

- Language Requirement; six credit hours (at a level appropriate to knowledge, as determined by department concerned)

Plus the following:

- COMM 3405.03
- COMM 4201.03
- COMM 4315.03
- COMM 4701.03

Plus one of the following:

- ECON 2213.03
- ECON 2219.03
- ECON 2334.03

Students must also complete one academic term or one work term in a country that is not their primary residence.

Note: Courses outside of Commerce, such as ECON or FREN (for example), are counted as non-commerce electives or free electives.

Major in Managing People and Organizations

Students **must** complete the following:

- SOSA 1002.03 and SOSA 1003.03; or SOSA 1100.06; or SOSA 1200.06; or PSYO 1011.03/PSYO 1021.03 and PSYO 1012.03/PSYO 1022.03
- COMM 3303.03
- COMM 3309.03
- COMM 3310.03
- COMM 4315.03
- COMM 4510.03
- COMM 4340.03

Note: Courses outside of Commerce, such as SOSA and PSYO, are counted as non-commerce electives or free electives

Major in Marketing Logistics

Students **must** complete the following five courses:

- COMM 3404.03
- COMM 3405.03
- COMM 3407.03
- COMM 3408.03
- COMM 4401.03

Plus one of:

- COMM 3401.03

- COMM 3409.03
- COMM 3410.03

Major in Marketing Management

Students **must** complete the following five courses:

- COMM 3401.03
- COMM 3402.03
- COMM 3404.03
- COMM 3407.03
- COMM 4401.03

Plus one of:

- COMM 3405.03
- COMM 3408.03
- COMM 3409.03
- COMM 3410.03

Students interested in majoring should consult the [School's website](#) and their Academic Advisor for further details before registering for their fifth academic term.

Co-op Work Terms

(For more information visit: www.dal.ca/mcs)

A work term is a period of time when a student gains practical experience in a business-related work environment. Each passed work term is an academic half credit and must meet the requirements listed below. Three passed work terms are required to graduate.

During a work term a student is considered an employee of their work term employer with reference to the conditions of their employment and is a student with respect to academic evaluation only. The university does not accept liability for the student's work environment.

Students are remunerated according to employer policy and the labour laws of the jurisdiction in which they work.

Career and Recruitment Specialists conduct mid-term reviews with both the employers and students to ensure the work term objectives are being met.

Work Term Requirements

Students receive academic credit upon completion of the following for each work term:

1. Students must register for each work term (COMM 2801, COMM 3801 and COMM 3802) via Dal on-line.
2. Students must participate in co-op orientation.
3. Each work term must be completed within the designated semester with one employer. A work term must total no less than 12 weeks with a cumulative total of 42 weeks over three work terms. A work term must be a minimum of 35 hours per week.
4. All jobs, including self-developed jobs must be approved by Management Career Services (MCS).
5. Students are responsible for finding suitable employment and students sign a Co-op Education Program Agreement prior to the first work term accepting this responsibility. (Support for the job search is provided by Management Career Services and some job opportunities are posted on the myCareer job posting system.)
6. Employers commit to completing and submitting an evaluation detailing the student's performance level which must be assessed as satisfactory to receive academic credit.
7. For each work term, students must submit a satisfactory work term report to the assigned faculty member in the Rowe School of Business.

Work Term Eligibility

Only students who meet the prerequisites (see **Section II: Courses Offered** of this calendar) are eligible to participate in a work term. Students whose grades drop below a 1.70 GPA overall will be **required to withdraw** from the University. Also refer to the university regulation regarding probation.

Co-operative Education Fee

Students are charged a Co-operative Education Fee. In an effort to balance the cost, the fees are charged on each academic term until completion of the degree. While no fee is charged for the actual work term, any student taking an academic course during the work term will be charged an additional pro-rated fee. Co-op fees are prorated for part-time students.

These fees are non-refundable after the deadline dates listed in the University Calendar. Students who transfer into the program from another department or another institution are responsible for back payments.

Students taking a full academic term on a Letter of Permission are also responsible for the payment of co-op fees. Before the Letter of Permission can be granted, students must sign a form available from the Undergraduate Advising Office, which states they will pay the full co-op fees for terms done at another university.

Payment of all instalments is required to obtain a Bachelor of Commerce (Co-op) Degree. Consult the Fees section of the Dalhousie University Calendar for details.

The Co-op fee covers:

Administration of the co-op work term including, but not limited to;

- Job search assistance (cover letters and resume building, interview preparation and debrief, coaching for self-developed job search strategies)
- Orientation workshops and other training
- Networking opportunities with employers (including special events, competitions, information sessions, corporate tours, mentoring etc)
- Work term monitoring and mediation of unsatisfactory situations
- Post work term debrief
- Development of job opportunities
- Access to on-line job posting site and job posting administration
- Interview space and co-ordination
- Facilitation of job offers
- Tracking of eligibility and job search activity

Management Information Systems

All Faculty of Management students have access to a computer lab with 45 terminals. All computers are based on the Intel family of processors, are fully networked, run Windows software, and the latest Windows-based applications. Students will have full access to the Internet, with a choice of printing on black-and-white or colour laser printers (direct debit with DalCard) as well as access to a full-sized color scanner (free of charge).

Exchange Programs

Dalhousie offers Bachelor of Commerce (Co-op) students the opportunity to study abroad in a variety of countries all over the world, including Denmark, France, Sweden, Norway, Korea and Germany (a complete list of partnerships can be found at (citt.management.dal.ca)). While participating in this extremely popular program, students develop international contacts, immerse themselves in a different culture, and gain valuable international experience. For more information, please contact the Undergraduate Advising Office by email at uao@dal.ca or by telephone at (902) 494-3710.

Minors

Bachelor of Commerce (Co-op) students can choose to complement their degree by declaring a minor in another subject area outside of the Faculty of Management. Students should consult with their program Academic Advisor concerning their degree requirements, and an Advisor from within their desired subject area for the minor requirements. For a current list of available minors please see Minors.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

COMM 1010 Business in a Global Context

CREDIT HOURS: 3

This course provides an introduction to the national and international context of Canadian political, economic and business activity. It presents a sampling of the most relevant issues facing managers in business, labour and public sector organizations. Emphasis is placed on developing an understanding of Canada's competitive position today, and of the historical background and current influences on this position. The focus of the course will be on lectures, the text, guest speakers, and more specifically what is said in class by your instructor as well as in tutorials by your tutorial leader and your colleagues. Leading edge ideas and concepts - many of which are not confined exclusively to any one particular text or article - will be introduced by your instructor during the lectures, and may be reinforced through hand-outs from time to time.

NOTES: Students in BComm Program can not receive credit for Mgmt 1000.03 or Mgmt 1001.03

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

EXCLUSIONS: COMM 1000.03

COMM 1101 Introductory Accounting I (Financial)

CREDIT HOURS: 3

An introduction to the principles and practices used by accountants in processing and communicating data, both within and outside the organization. Emphasis is on financial accounting and reporting, with the following objectives: To introduce the theoretical framework upon which financial statements are based, and examine the major underlying concepts and principles; To demonstrate basic financial accounting methodologies, and develop the analytical and procedural skills related thereto; To understand the information content of conventional financial statements, and the inherent limitations of accounting data.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

EXCLUSIONS: MGMT 2101.03

COMM 1502 Core Business Applications: Introduction to Computers

CREDIT HOURS: 3

The course focuses on how business applications, notably Word Processors, Spreadsheets, Enterprise Resource Planning (ERP) systems e.g. SAP and Data Visualization tools, contribute to the management, analysis and reporting of data with respect to business processes and how they can aid in the solving of business problems. This course begins with an overview of Management Information Systems, before proceeding through several modules that involve data-to-document transformations, along with data integration between various applications. We use spreadsheets to perform routine business calculations, and visualize the data using business digital dashboards. The analyses are then collated and summarized using features of word processors to produce a final report for each business case that is analyzed. Each successive module increases the complexity of the analyses and reports. As the course progresses, business simulations will be used in assignments to provide experiential and immersive learning opportunities. The course is taught with both in-class lectures and self-paced computer laboratory exercises

NOTES: MGMT 1601.03, ASSC 1000 or CSCI 1200 will not be counted in the Commerce program.

EXCLUSIONS: COMM 1501.03, MGMT 1601.03, INFO 1601.03, ASSC 1000.03, CSCI 1200.03

COMM 1700 Prepare for Study and Work in Canada

CREDIT HOURS: 3

This course is a mix of lectures, seminars, presentations, workshops and guest presentations. Activities covered in course will be targeted towards a Canadian work place environment. Students are expected to participate in class discussions, presentations and group projects. The activities in class will be based on practical applications of business communication strategies and language skills. Students will demonstrate their progress in in-class activities and take home assignments.

NOTES: Entrance into this course is by special permission. Please contact the Undergraduate Advising Office (uao@dal.ca) for more information

FORMAT: Lecture

COMM 1710 Business Communications I

CREDIT HOURS: 3

Students will learn how to be effective speakers and presenters. The primary goal of this course is to introduce the first-year students to the types of oral communication used in today's workplace. The course will start with introducing a philosophy for lean, effective, and ethical communication, how to construct analyses, develop arguments and lead to self reflection and individual value proposition. The course will cover a variety of topics such as networking, creating effective job application cover letters and resumes, interviewing, formal and informal presentation, job search skills, listening, team dynamics and conducting meetings, while doing research on potential employers. Students will have the opportunity to practice their skills and evaluate the skills of others.

NOTES: INFO 1002.03, ENGL 2100.03, ENGL 2110.03, and CSCI 2100.03 will not be counted in the Commerce program.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

EXCLUSIONS: COMM 1702.03, MGMT 3602.03, COMM 2701.03, INFO 1002.03, ENGL 2100.03, ENGL 2110.03, CSCI 2100.03

COMM 1720 Communications II

CREDIT HOURS: 3

This course follows COMM 1710.03. While the primary goal of this course is to teach students how to properly prepare written business correspondence, second-year students will also learn about academic writing (the concept of intellectual property, library resources, essay writing, and critical thinking). The course will again start with introducing a philosophy for lean, effective and ethical communication, how to construct analyses, develop arguments, make strategic choices on sentence structure, choice of channel, type of message, gain an understanding of the audience, the context and present culturally sensitive and ethically correct messages in the appropriate channel and form. Additionally, they will learn about communication theory and the importance of communication in the workplace so that they will learn about critical listening, critical reading, and how to be strategic writers. By the end of the course, students will be able to understand business contexts and know how to

make choices of medium, channel, form and also how to write business memos, e-mail messages, letters, reports, and proposals, analytical reports, participate and learn about group work.

NOTES: INFO 1003.03, ENGL 2100.03, and CSCI 2100.03 will not be counted in the Commerce program.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 1710.03

EXCLUSIONS: COMM 1701.03, MGMT 3602.03, INFO 1003.03, ENGL 2100.03, CSCI 2100.03

COMM 2102 Introductory Accounting II (Managerial)

CREDIT HOURS: 3

An introduction to the use of accounting information by managers, within the organization. Emphasis is on management accounting and analysis, with the following objectives: To develop an understanding of the kinds of accounting information managers need; To examine managerial accounting methodologies and develop the analytical and procedural skills related thereto; To prepare accounting reports which are useful for management planning, control and decision-making; To develop an awareness of the limitations of managerial accounting information.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 1101.03

EXCLUSIONS: MGMT 2102.03

COMM 2110 Accounting Database Analysis and Design

CREDIT HOURS: 3

This class provides a basic understanding of information systems, especially accounting information systems including the five major business processes: (1) Revenue, Receivables and Cash Receipts; (2) Purchases, Payables and Cash Disbursements; (3) Manufacturing Conversion and Inventory; (4) Human resource and Payroll; (5) Finance This understanding includes for each process: the design elements; associated resources, events and personnel; the significant control risks; the major documents/files; and the database design including the structure of all necessary tables to support each process. You will be able to design your own accounting information system using Access 2007 - a database program. This will be done through a project that will continue throughout the course. You should be able to analyze a business process and prepare the proper database design, flowcharts and other documentation. You should be able to use database software to design the user interface including: preparing queries, forms, reports, pivot tables, web documents, macros and we will introduce Visual Basic programming. You should be aware of the security features of database software.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 1101.03, 2102.03, and 1502.03

EXCLUSIONS: COMM 3516.03

COMM 2202 Finance I

CREDIT HOURS: 3

An introduction to the problems faced by business managers in the acquisition and effective use of the firm's resources, and analytical concepts for evaluating financial decisions. Topics covered are: financial planning, time value of money, working capital management, risk and return, and valuation of debt and equity instruments.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 1101.03; ECON 1101.03 and ECON 1102.03; MATH 1115.03 or MATH 1000.03

EXCLUSIONS: MGMT 3201.03

COMM 2203 Finance II

CREDIT HOURS: 3

This course provides students with an overview of the theory of corporate finance and its application to the problems faced by financial managers. This course covers an in-depth study of capital budgeting and long term investment decisions in national and international contexts, capital structure, dividend policy, and the fundamentals of options and futures.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 2202.03

EXCLUSIONS: MGMT 3201.03

COMM 2303 Introduction to Organizational Behaviour

CREDIT HOURS: 3

This course will provide an overview of organizational behaviour theory, as well as an introduction to the practical application of that theory, within the context of the external and organizational forces that impact management. Through mini lectures, cases and discussion, students will be introduced to the theoretical basis of managing people in organizations. Key topics will include individual factors, such as personality and perception; organizational processes, such as appraisal and performance management; and contextual issues, such as organizational culture and change as well as the legislative framework within which managers must act. Experiential exercises will be incorporated to link theory with practice.

FORMAT: Lecture| Discussion

PREREQUISITE: COMM 1010.03

EXCLUSIONS: MGMT 2303.03 and MGMT 2304.03

COMM 2310 Business Ethics and Corporate Social Responsibility (CSR)

CREDIT HOURS: 3

Business is a collection of private, commercially oriented organizations, whereas society is a broad group of people with varying traditions, values, institutions, and collective activities and interests. Hence, businesses operate in free markets but are subject to obligations to protect (or *do no harm to*) the common good. Their challenge is to marry 'the freedom to be' with responsibility for others and particularly for the vulnerable. Business ethics provides moral systems for aligning priorities amid what are regularly contradictory or inconsistent sets of goals. This course examines the nature of these challenges from the basis of business ethics, their effects on companies and managers, and the corporate social responsibility tools managers can use to better understand and address complex issues involving numerous stakeholders. Broad topic areas include: (a) the social-cultural context of economic activity, (b) fundamentals of business ethics, (c) corporate social responsibility, (d) corporate-stakeholder relations, (e) globalization and consumer protection, and (f) sustainability and social, civic, and political action.

FORMAT: Lecture

PREREQUISITE: At least second-year standing

COMM 2401 Introduction to Marketing

CREDIT HOURS: 3

The objective of this course is to familiarize you with marketing's mode of inquiry-the way marketers look at the world. As a marketer you should be able to: 1) ask the right questions about markets; 2) organize data into relevant information; 3) discover market opportunities; 4) set goals; 5) create a marketing plan that includes clear target markets, as well as product, price, distribution and communication strategies; and 6) implement and control a marketing program. Students work in groups and run a business in an online marketing simulation. This provides students with hands-on group decision making and data analysis skills, and they are specifically responsible for making product, pricing, promotion and placement strategies for a brand or group of brands. The course will also train you in a number of skills that are necessary for higher level courses and career advancement (i.e., case analysis and analytical report writing).

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 1010.03, ECON 1101.03 and ECON 1102.03

CROSS-LISTING: MGMT 2401.03

COMM 2501 Statistics for Business

CREDIT HOURS: 3

An introduction to the principles and applications of statistics relevant to commerce students, with emphasis on making inferences based on observed data. Topics covered include descriptive statistics, probability, random variables, estimation, hypothesis testing, statistical software.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 1010.03, COMM 1502.03 and MATH 1115.03 (or MATH 1000.03)

EXCLUSIONS: MGMT 1501.03 and MGMT 2502.03; MATH 1060.03; STAT 1060.03; ECON 2260.03; ENGM 2032.03

COMM 2502 Predictive Analytics

CREDIT HOURS: 3

This course is a follow-up to COMM 2501.03. It concerns mostly the relationship of two or more measurements. Topics covered in detail are analysis of variance, simple and multiple regression, and time series. Statistical software is featured prominently throughout the course for statistical computations.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 2501.03 (or MATH 1060.03 or STAT 1060.03 or ECON 2260.03, or ENGM 2032.03)

EXCLUSIONS: MGMT 1501.03 and MGMT 2502.03, MATH 2080.03, STAT 2080.03, ECON 2280.03

COMM 2603 Legal Aspects of Business

CREDIT HOURS: 3

This course provides an appreciation of some of the legal problems that might be faced by the business community. It examines the meaning and sources of law, the machinery of justice, the law of torts, various aspects of the law of contracts and application of principles from equity, the law of agency, the law relating to the sale of goods, bailment, contracts of employment, negotiable instruments, real property, mortgages, partnerships, international transactions, corporations and secured transactions. Students must make extensive use of the law library in writing reports on a series of cases.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: At least second-year standing.

COMM 2801 Work-Term One, Bachelor of Commerce (Co-op)

CREDIT HOURS: 3

Unless written permission is obtained, in advance, work term I is completed in the Winter term of the second year.

PREREQUISITE: At least 6 1/2 full credits, which must include COMM 1502.03, COMM 1710.03 and COMM 1720.03 plus at least 4 other full credits which must be in the Core Area (COMM, ECON 1101.03 and ECON 1102.03 and MATH 1115.03 or MATH 1000.03)

COMM 3100 Financial Reporting and Statement Analysis

CREDIT HOURS: 3

This course is intended for students who are not majoring in accounting. The approach to the course is analytical rather than procedural, with an emphasis on a user perspective. Topics include analysis of financing, investing and operating activities; profitability, and credit risk. Accounting topics include pensions, inter-corporate investments, leases, earnings per share, and cash flow.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 1101.03 and 2102.03

EXCLUSIONS: COMM 3105.03 and COMM 3111.03

COMM 3105 Intermediate Financial Accounting I

CREDIT HOURS: 3

This course and its follow-up, Commerce 3111.03, are meant to provide a solid understanding of the corporate financial reporting model and related conceptual issues. The course develops expertise in financial reporting issues related to revenue and expense recognition and a wide range of asset accounting issues, including receivables, inventories, and capital assets.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 1101.03 and COMM 2102.03 with an average of at least B-

EXCLUSIONS: COMM 3100.03

COMM 3111 Intermediate Financial Accounting II

CREDIT HOURS: 3

In conjunction with its prerequisite, Commerce 3105.03, this course is intended to provide an understanding of the corporate financial reporting model and related

conceptual issues. The course will develop expertise in accounting and reporting issues related to liabilities and shareholders' equity, including complex debt and equity instruments, corporate income taxes, leases, pensions and other post-retirement obligations, earnings per share, accounting changes and restatements.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 3105.03 with a minimum grade of C-

CROSS-LISTING: BUSI 6108.03

EXCLUSIONS: COMM 3100.03

COMM 3114 External Auditing

CREDIT HOURS: 3

This course covers the theory and practice of public auditing according to generally accepted auditing standards (GAAS). The course emphasizes Canadian Auditing Standards (CASs) and considers the forces impacting on the setting of standards and the current level of standards. This includes pronouncements of the accounting profession, reporting standards, professional ethics, audit planning, risk assessment, standards for examination of internal control in both manual and computerized environments, standards for the quality of evidence, statistical sampling and the sufficiency of evidence, documentation and working papers. The course considers typical audit programs for examination of financial statement elements and fraud awareness.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 3105.03 or COMM 3100.03

CROSS-LISTING: BUSI 6101.03

COMM 3116 Cost Management

CREDIT HOURS: 3

The major objective of this course is to develop a deeper understanding of the key topics in cost/managerial accounting and their management control implications. The selected topics to be covered include costing systems, cost-volume-profit analysis, cost and profit variance analysis, control and performance evaluation in decentralized organizations. This course is intended primarily for students who plan to major in the accounting area.

FORMAT: Lecture| Discussion

PREREQUISITE: COMM 1101.03 and 2102.03, with at least a B- average

COMM 3203 Financial Institutions

CREDIT HOURS: 3

This course is designed to introduce students to the structure and operations of financial institutions and the role they play in the growth and operation of capital markets. The class content includes reviewing the operation and functioning of various types of financial institutions and their roles in the economy. An emphasis will be put on measuring different types of risks and methods for managing these risks for financial institutions, particularly the banks. The topics include (but are not limited to) interest rate risk management, credit risk management, liquidity risk management, market risk management, and so forth. The role of derivative securities in various hedging strategies will also be reviewed.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 2202.03 and COMM 2203.03 (with a minimum average grade of B-)

COMM 3206 Investment and Money Management

CREDIT HOURS: 3

This course is designed to provide the students with an overview of current investment theories and their application to the real world. In particular, a considerable effort will be made to compare and contrast the activities of money managers with the ones that are suggested in various theoretical models. The intention is to provide our students with the needed skills to successfully face the challenging world of portfolio and money management.

FORMAT: Lecture| Seminar

PREREQUISITE: COMM 2202.03 and COMM 2203.03 (with a minimum average grade of B-)

COMM 3207 Canadian Securities

CREDIT HOURS: 3

The topics covered in this course include an overview of capital markets and the financial services industry; financial statement analysis; an overview of the Canadian economy; fixed income securities; equity securities; investment funds; derivatives; security analysis; financing, listing and regulation; financial planning and taxation issues; and, portfolio management. Upon meeting the CSI's requirements, the student will earn the Canadian Securities Course designation.

NOTES: This course is offered via Distance Education. Students will have to register with the Canadian Securities Institute and will incur an additional fee.

PREREQUISITE: COMM 2202.03

EXCLUSIONS: COMM 3202.03

COMM 3303 Introduction to Human Resource Management

CREDIT HOURS: 3

The role of human resource management and administration of the personnel function are analyzed, along with the major aspects of the personnel function: job analysis, human resource planning, recruitment and selection, training, performance appraisal, compensation, labour relations, and safety and health. Knowledge of the processes is supplemented by the development of analytical skill in coping with various human resource problems and in the integration of the processes with the many other functions required in the organization. This "system and process" analysis builds upon the skill and knowledge acquired in COMM 2303.03. Cases simulate work environments.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 2303.03

COMM 3304 Labour-Management Relations

CREDIT HOURS: 3

Introduces students to some practical and theoretical aspects of labour-management relations in Canada. Examines historical, legal, behavioural, economic and political backgrounds of our system. Emphasis is on the key processes of industrial relations as they impinge on the activities of managers. Cases used are drawn from Canadian sources.

PREREQUISITE: COMM 2303.03

COMM 3307 New Venture Creation

CREDIT HOURS: 3

This course is about venturing - the process of creating new ventures in both the for-profit and not-for-profit environment. By linking theory and practice, the course will expose students to the issues, problems and challenges of creating new ventures and provide students with the opportunity, within the framework of a formal class, to explore and develop venture ideas as they have been considering or wish to investigate. Experiential exercises enable the students to build their personal entrepreneurial strategy, identify an innovative idea, build their business model, write and pitch a winning business plan in front of a panel of angels, government agencies representatives that support start-ups and experienced entrepreneurs.

FORMAT: Lecture

PREREQUISITE: COMM 1010.03, COMM 1101.03 and COMM 2401.03

CROSS-LISTING: MGMT 3907.03

COMM 3308 Managing the Family Enterprise

CREDIT HOURS: 3

Managing the Family Enterprise is about the special problems and issues that confront family businesses. It explores the family system, the business system, the ownership system and their interactions - functional and dysfunctional. Specific topics, examined from the family business perspective, include: the decision to join a family firm, management succession, ownership succession, the role of key non-family employees, strategic planning and other issues especially relevant for family firms. The course also addresses conflict and communication in the family and the business. The course has two purposes. First, it provides an organized framework for students to understand the dynamics and special issues of family firms. Second, it is designed to allow students to explore their interest in joining a family firm.

Therefore, it is especially intended for students who come from families which are in business or for students considering joining a family business. Others who wish to explore a key segment of Canadian business are also welcome. The course relies on field projects, guest speakers, case studies, videos, research papers and extensive class discussion to explore the territory of managing family businesses.

FORMAT: Lecture| Discussion

PREREQUISITE: COMM 1101.03 and COMM 3801.03

CROSS-LISTING: MGMT 3308.03

EXCLUSIONS: BUSI 6006.03

COMM 3309 Management Skills Development

CREDIT HOURS: 3

This course will introduce students to knowledge, skills, and attitudes (KSAs) that are critical to managing human resources effectively. Topic areas include: understanding what the successful manager needs to know, understanding the self, communications, interpersonal negotiations, goal setting, managing innovation and change, handling conflict and anger, performance evaluation, counselling and feedback, and management attitudes needed for success. Significant amounts of classroom time will be devoted to behaviour modelling exercises, role plays, case studies, and group discussions. Class participation forms a significant part of this course.

FORMAT: Lecture| Discussion

PREREQUISITE: COMM 2303.03

EXCLUSIONS: MGMT 3309.03

COMM 3310 Reflections on Leadership

CREDIT HOURS: 3

Course focuses on the study of leadership as a process of influencing people, rather than dealing with leadership at the organizational level. The course will comprise: a) a study of leadership theory, b) an opportunity to observe leadership through case studies, films, and various exercises, and c) an opportunity to practice leadership by leading a group in a short course-related project. The parameters of ethical leadership will be emphasized.

PREREQUISITE: COMM 1010.03 and COMM 2303.03

COMM 3401 Consumer Behaviour

CREDIT HOURS: 3

In view of the very competitive situation in modern business, the firm that is successful designs and sells products that meet the desires of specific consumer segments. Thus, analysis and prediction of consumer behaviour are increasing in importance and sophistication. An extensive body of research evidence from marketing and the behavioral sciences is explored and evaluated to assess the marketing implications of elements of consumer behaviour. Emphasis in course will be focused on how to incorporate an understanding of consumer behaviour into strategic marketing plans.

FORMAT: Lecture| Discussion

PREREQUISITE: COMM 2401.03

COMM 3402 Marketing Communications

CREDIT HOURS: 3

This course is designed to provide students with an understanding of how the major types of marketing communication messages are created and delivered. This means students should come away knowing the strengths and weakness of the major marketing communication functions (e.g. advertising, public relations, direct response, sales promotion, social marketing, packaging, etc.) and the major media used by them. By the end of the course, the student will have the ability to: (1) establish a knowledge base of researching and evaluating a company's marketing and promotional situations; (2) gain hands-on experiences in the creation of an integrated marketing communication campaign that impact customer relationships and brands; and (3) develop effective communication strategies and programs for real company situations. For those students who are not marketing majors, this course will also provide a basic understanding of persuasive skills which can be used no matter what vocation they choose in the future.

FORMAT: Lecture

PREREQUISITE: COMM 2401.03

COMM 3404 Marketing Research

CREDIT HOURS: 3

Students learn the scientific method in solving marketing problems and creating marketing intelligence from data. Emphasis is on planning and formulating research problems, research design, application of sampling methods, and analysis of data collected. The course uses cases and a real world project to hone skills needed for a wide range of marketing positions in industry.

FORMAT: Lecture| Tutorial| Discussion

PREREQUISITE: COMM 2401.03 and COMM 2502.03

COMM 3405 Global Marketing

CREDIT HOURS: 3

This course will examine similarities and differences in international marketing structures, functions and processes as related to the socio-economic and cultural environment and the opportunities and problems associated with international marketing for Canadian firms wanting to export to overseas markets. It is designed to be a comprehensive course embodying lectures, class discussion, assignments, and case studies. Students will also complete an export marketing plan for a Canadian company wishing to explore marketing opportunities in a foreign country.

FORMAT: Lecture| Discussion

PREREQUISITE: COMM 2401.03

COMM 3407 Logistics & Supply Chain Management

CREDIT HOURS: 3

An examination of the decisions faced by managers within the supply chain: the channels of distribution, the transportation and storage of products/services, and the communications and data processing systems, in order to minimize the total cost of these activities and satisfy the marketing requirements of the firm and its customers. Topics include: the integrated logistics & supply chain management concept, customer service, transportation, distribution centres, inventory management, materials management, packaging, purchasing, order processing and information systems, financial control, logistics organization, international logistics, reverse distribution and recycling, and the strategic logistics supply chain plan.

PREREQUISITE: COMM 2401.03

COMM 3408 Transportation Modes and Policy

CREDIT HOURS: 3

This course will introduce the student to the business of managing a transport enterprise. It will focus on understanding the regulatory (policy) environment and customer requirements prior to exploring operational considerations across a number of transport modes. The intent will be to explore the impacts of policy and modal structure on marketing the transportation company and structuring it for growth. The course is suitable for students wishing to work in the transport industry, in the supply chain activities of a transport customer or, tangentially, in the strategic management of any service business.

FORMAT: Lecture

PREREQUISITE: COMM 2401.03

COMM 3409 Personal Selling and Sales Management

CREDIT HOURS: 3

This course is designed to provide an understanding of the tasks and problems facing today's sales professionals and sales managers and to familiarize one with current personal selling and sales force management practices. Specifically, this course provides an exposure to personal selling concepts, techniques and procedures used in buyer-seller relations such as prospecting, sales call planning, negotiation skills, overcoming obstacles, persuasion and closing skills. It also covers sales management topics including the organization of the sales force, personnel management, selection, sales training, motivation, compensation, evaluation and supervision, budgets, quotas, territories and sales control. Sales role-plays, mock sales presentations, case studies and classroom discussion are used to extend the basic text material and examine other points of view.

FORMAT: Lecture

PREREQUISITE: COMM 2401.03

COMM 3410 Services Marketing

CREDIT HOURS: 3

Intangible services play an increasingly important role in the global economy, and most especially in the economies of developed countries. Yet, business school curriculae have customarily emphasized the marketing of tangible products in consumer and industrial markets. A basic premise of the elective course is that services (versus tangible goods) share a number of attributes that present unique challenges for marketing. The course seeks to prepare students to face those challenges. It is ideal for students who wish to work in a service industry (e.g., banking, insurance, travel, hospitality, consulting) or in a service capacity in the manufacturing sector (e.g., sales, customer relations). Emphasis will be placed on understanding the distinctive characteristics of services, the implications of these distinctions for marketing, the role of service quality as a determinant of customer satisfaction, and the measurement of these phenomena. Examples will be drawn from North American and European service industries.

PREREQUISITE: COMM 2401.03

COMM 3501 Production/Operations Management

CREDIT HOURS: 3

"Production" is one of the basic functions of any organization, whether it provides goods or services. Consequently, all managers, whatever their specialist interests, should have an understanding of some of the key concerns in managing operations, particularly if they aspire towards senior/general management positions. The purpose of this course is to provide such an understanding. It begins at a basic level by examining various types of production processes and continues by considering key aspects of inventory, supply chains and quality assurance. It concludes by examining production planning and strategy.

NOTES: MGMT 3501.03 will not be counted in the Commerce program

FORMAT: Lecture| Discussion

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 1101.03, COMM 1502.03, COMM 2401.03, and COMM 2502.03

EXCLUSIONS: MGMT 3501.03

COMM 3511 Management Information Systems

CREDIT HOURS: 3

Information is a key resource for businesses, other organizations, and professionals in both the contemporary and emerging worlds. Innovative uses of information are often keys to survival in an increasingly competitive economy. In addition, information systems account for an increasing larger share of assets in most organization. The ability to harness and manage information resources and information technologies demands a sound understanding of a broad range of concepts, terms, and challenging issues in a constantly evolving context. This course is designed to help students acquire the essential skills and conceptual background to become an effective client, user, and planner of Management Information Systems. It will help students develop a broad understanding of how information systems are used in organizations, the technologies that influence their use, their role in supporting business operations and decision making, how they need to be managed, and the impact that they can have on organizations' and professionals' competitive positions. Students will be exposed to SAP ERP systems and Business Analytics tools via hands-on lab work and exercises.

PREREQUISITE: COMM 1010.03, COMM 1502.03

COMM 3801 Work-Term Two, Bachelor of Commerce (Co-op)

CREDIT HOURS: 3

Unless written permission is obtained in advance, work term II is completed in the Fall term of the third year.

PREREQUISITE: At least 9 full credits earned, including COMM 2801.03 and at least 7 ½ other credits in the Core Area (Commerce, ECON 1101.03 and ECON 1102.03, MATH 1115.03 or MATH 1000.03, PHIL 2081.03)

COMM 3802 Work-Term Three, Bachelor of Commerce (Co-op)

CREDIT HOURS: 3

Unless written permission is obtained in advance, work term III is completed in the Summer term of the Third year.

PREREQUISITE: At least 11.5 full credits earned, including COMM 3801.03 and at least 10 other credits in the Core Area (Commerce, ECON 1101.03 and ECON 1102.03, MATH 1115.03 or MATH 1000.03, PHIL 2081.03)

COMM 4000 Directed Reading and Research

CREDIT HOURS: 3

This course offers the student the opportunity to explore in greater detail a particular area of interest. The content of the course is negotiated with the individual instructor involved. The student and instructor must develop a proposal, and submit it to the Curriculum Committee for approval. Guidelines are available from the Undergraduate Advising Office, Suite 2086, Rowe Building.

COMM 4101 Advanced Topics in Accounting I

CREDIT HOURS: 3

This course provides a theoretical framework for the study of accounting policy. Case analysis is an integral part of the course. Topics covered include accounting policy choice in a dynamic framework, an introduction to the impact of accounting policy choice and normalized income on business valuation partnerships, and the role of the professional accountant as part of these engagements. As well, the course may consider various practical and theoretical topics, including the role of the professional accountant working within an organization, as well as current topics as appropriate.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 3105.03 and COMM 3111.03

CROSS-LISTING: BUSI 6110.03

EXCLUSIONS: COMM 3113.03

COMM 4102 Advanced Topics in Accounting II

CREDIT HOURS: 3

This course provides an in-depth study of the interrelated topics of intercorporate investments, business combinations, consolidated financial statements, foreign currency transactions and foreign operations. The course also covers segmented reporting and bankruptcy, and not-for-profit accounting and fund accounting.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 3105.03 and COMM 3111.03

CROSS-LISTING: BUSI 6109.03

COMM 4112 Accounting Research

CREDIT HOURS: 3

This course considers the fundamental issues of financial reporting, establishing the reasons that accounting is valuable, and how financial reporting can best describe the economic value and economic performance of enterprises. Topics include accounting under ideal conditions, complications caused by information asymmetry, adverse selection and moral hazard, challenges in the decision-based models of accounting information users, standard setting frameworks and mechanisms, governance and social responsibility implications of reporting issues. The course will follow a seminar format, including presentations and analysis of current events. Students will be required to formulate a research proposal as a major course deliverable.

FORMAT: Lecture

PREREQUISITE: COMM 2202.03, COMM 3105.03, COMM 3111.03

COMM 4125 Taxation

CREDIT HOURS: 3

This course is an introduction to the taxation system in Canada, with a focus on personal income tax. The course will be a mixture of lecture style classes and problem solving classes. The class will be interactive and student will be expected and encouraged to participate. By the end of the course students should be able to:- Calculate taxes payable for individuals- Identify and analyze tax issues both orally and in writing

PREREQUISITE: ECON 1101.03 and ECON 1102.03 and COMM 3105.03.

EXCLUSIONS: COMM 4120.03

COMM 4126 Taxation II

CREDIT HOURS: 3

This course is a follow up to COMM 4125 and focuses on corporate income tax. The course will be a mixture of lecture style classes and problem solving classes. the Class will be interactive and students will be expected and encouraged to participate. By the end of the course students should be able to:- Calculate taxes payable for corporations- Identify and analyze tax issues both orally and in writing.

PREREQUISITE: COMM 4125.03

EXCLUSIONS: COMM 4121.03

COMM 4201 International Financial Management

CREDIT HOURS: 3

The purpose of the course is to present some techniques which have been developed to help managers manage sets of cash flows of different currencies. The first section of the course is a description of the financial transactions associated with international trade. Some models dealing with the interaction between international trade and currency prices are described. The second section of the course examines properties of currency exchange rates. It presents models for forecasting exchange rates and describes the economic justifications for the models, the arbitrage opportunities presented by the models, and practical limitations of the models. The third section presents models for assessing foreign exchange risk: so-called transaction, economic, and translation exposure. Implications for the operation of the firm subject to the different types of foreign exchange exposure are also presented. Some implications of international equity investments will also be presented. The fourth section

examines techniques for hedging foreign exchange risk. Foreign exchange derivative products, such as forward contracts, futures contracts, call and put options, and currency swaps are examined.

PREREQUISITE: COMM 2202.03, COMM 2203.03

COMM 4202 Derivatives

CREDIT HOURS: 3

This course is an introduction to derivatives and the main applications of derivatives for both investment purposes and corporate finance use. As an introductory or first course in derivatives, the goal is to cover the central concepts and issues that will permit the student to start using the products and understanding the main advantages, as well as the issues with derivative transactions. The course covers both quantitative pricing issues, as well as the many practical qualitative issues involved with the use of derivatives. Students should be comfortable with basic statistics and algebra. Knowledge of calculus is not required for this course. Students should also be comfortable with Excel spreadsheets and basic Excel mathematical functions.

PREREQUISITE: COMM 2202.03 and COMM 2203.03

COMM 4240 Advanced Corporate Finance

CREDIT HOURS: 3

This course will help students learn to apply fundamental ideas of corporate finance to real-life problems of business valuation and financial decision. Topics that will be discussed include valuation, mergers and acquisitions, financial distress, capital structure, payout policy, securities issuance, and corporate governance. The course builds on concepts and techniques that students have learned in finance, accounting, statistics, and economics. Case studies will be used to bridge the gap between finance theory and its applications to practical problems in corporate finance.

PREREQUISITE: COMM 2202.03 and COMM 2203.03 (with a minimum grade of B-)

COMM 4250 Theory of Finance

CREDIT HOURS: 3

This course is designed to complement other finance courses that have been previously offered to finance majors. It covers core theory of capital markets and corporate finance. Topics include functions and operations of capital markets, analysis of consumption-investment decisions, diversification and portfolio selection, valuation theory and equilibrium pricing of risky assets, and investment and financing decisions of firms. Theoretical foundation for further study and practical applications will be emphasized.

FORMAT: Seminar

PREREQUISITE: COMM 3206.03

CROSS-LISTING: BUSI 6250.03

COMM 4301 Managing the Venturing Process

CREDIT HOURS: 3

Managing the Venturing Process is a capstone course that explores the strategic elements required to venture successfully. By linking theory and practice, the course is designed to familiarize students with entrepreneurial strategies for the emerging venture, for the growing venture, and for sustaining growth in the established venture. Venturing will be explored in the context of both for-profit and not-for-profit objectives and will examine nurturing single entrepreneurs as well as organizational entrepreneurs. As this is a capstone course students will be expected to use knowledge acquired in other business courses.

PREREQUISITE: COMM 3307.03

CROSS-LISTING: MGMT 4901.03

COMM 4315 International and Intercultural Management

CREDIT HOURS: 3

This senior level course is designed to provide students with the knowledge and skills necessary for effective membership and management in global as well as culturally diverse domestic workplaces. The growing importance of international business and escalating levels of involvement in global competitiveness necessitates that the manager of the 21st century acquire additional skills and abilities for effective international and intercultural interactions at home and abroad. The course content includes such topics as: introduction to comparative and cross-cultural management, variations on cultural orientations and value, cross-cultural communications, employee attitude, motivational issues in cross-cultural settings, differences in management and leadership styles, training for international assignments, cross-cultural staffing, inter-cultural negotiations, ethics and social responsibility, expatriation and repatriation management, and designing global structure. RECOMMENDED: COMM 3303.03 and COMM 3309.03

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: COMM 2303.03

COMM 4340 Corporate Governance

CREDIT HOURS: 3

The central focus of corporate governance is the relationship between the top management team (TMT), the board of directors (BoD), and other stakeholders, especially stockholders. The collapse of once successful, large corporations across the globe illustrates the frankishness of their board members and the degree of their lack of concern for stockholders' interests. The reputation of audit and consulting companies associated with these ill-fated corporations suffered a great setback, leaving stakeholders wondering whom to trust to safeguard their interests. Students will take an in-depth look at the corporate governance triad, as indicated above, that controls the modern corporation. Accordingly, this course will deal with the control, composition, functions, roles, and structure of boards; board responsibility and accountability, CEO tenure and compensation, shareholder and other stakeholder representation; corporate board's vis-à-vis social responsibility and ethics; and comparative corporate governance across North America, Europe, and selected Asian countries.

FORMAT: Lecture

PREREQUISITE: COMM 4351.03

COMM 4351 Competitive Strategy

CREDIT HOURS: 3

Competitive Strategy focuses on how a firm competes at various levels; that is, functional, business and corporate. The course is designed to analyze the sources of competitive advantage among firms and to develop knowledge and skills necessary for effectively analyzing and formulating strategy. Accordingly, the course examines the role of the general manager in the organization; environmental and industry factors; organizational resource and capability constraints; the creation of value through functional-, business-, and corporate-level strategies, and, finally, how an organization leverages its resources and capabilities to extend its product and geographic scope internationally. Building upon this foundation, students will practice formulating well thought-out strategy recommendations that are specific and actionable. Throughout the term, students will be exposed to a wide variety of organizations through readings, case studies, and experiential exercises.

PREREQUISITE: All required first, second, and third year core courses, including the three work-terms, for the Bachelor of Commerce (Co-op) program.

EXCLUSIONS: MGMT 4001.03

COMM 4352 Strategic Management

CREDIT HOURS: 3

Strategic Management builds on COMM 4351.03: Competitive Strategy. After conducting a brief review of the external environment faced by the organizations, the focus of this capstone course turns to the examination of the internal workings of an organization. More specifically, this course is about the general manager's task of implementing competitive strategy and managing strategic changes. This course is integrative, as it deals with the organization as a holistic entity. In COMM 4352.03, various pedagogical methods are used to develop and enhance your analytical, writing, and presentation skills required in today's business environment. It also emphasizes analytical tools and conceptual frameworks that aid in the development of judgment. Although it draws on specific concepts, tools, and techniques from other core courses in the Bachelor of Commerce program, its basic purpose is to sharpen students' expertise and skills at developing judgments to help guide managerial actions in the face of uncertainty and complexity. Therefore, students are strongly encouraged to leverage and apply those concepts, tools, and techniques in this course.

PREREQUISITE: COMM 4351.03

EXCLUSIONS: MGMT 4002.03

COMM 4401 Marketing Strategy

CREDIT HOURS: 3

This course is intended for marketing majors who wish to deepen their understanding of how marketing strategy is formulated and implemented. This involves high-level, long time-frame decisions, since the product and market strategies are at issue. The course aims to improve decision-making skills in managing product/market portfolios and implementing marketing strategies. As a capstone course, it is designed to permit the integration of learning from other marketing courses. Instruction is mostly through case study discussions, report writing, and group presentations.

FORMAT: Seminar

PREREQUISITE: COMM 2401.03, COMM 3404.03 and one other marketing course (choose from: COMM 3401.03, COMM 3402.03, COMM 3405.03, COMM 3407.03, COMM 3408.03, COMM 3409.03 OR COMM 3410.03)

COMM 4501 Operations Research

CREDIT HOURS: 3

The goal of this course is to provide an understanding of the major O.R. techniques and how to apply them, not their theoretical development. Topics include: linear programming formulation, simplex method, sensitivity, integer variables, transportation, network problems, and simulation. Excel and cases are used to illustrate the main topics.

PREREQUISITE: COMM 1502 and COMM 2502

COMM 4510 Corporate Communication

CREDIT HOURS: 3

By the end of this course, students will have learnt about various communication strategies adopted and deployed by corporations. Students will have competently demonstrated their ability to devise a corporate communications portfolio for stakeholders they will adopt in particular case scenarios. This portfolio will include formulating & delivering internal and external communications, developing and authoring press releases, creating a strategy document for managing press conferences and media relations, creating a post-incident marketing campaign, and writing incident and preliminary investigative reports (with financial and accounting analysis as evidence where available). Student teams will then make team presentations to possibly hostile audiences, and outline how to manage internal and external public relations, both day-to-day and in crisis conditions.

PREREQUISITE: COMM 1710.03, COMM 1720.03 and COMM 2303.03

COMM 4511 Business Process Integration using ERP Systems

CREDIT HOURS: 3

Enterprise Systems are comprised of a unified database with shared analysis and reporting tools allowing for real time business intelligence across global operations. Emphasis in this course is equally on learning business processes and integration between different functional areas as it is about the technology that facilitates this. This course will be taught in the teaching labs with a combination of individual and group simulations interspersed with short lectures. An active learning approach in this course will include hands-on learning using SAP ERP, as well as ERPSim, a game-based SAP ERP simulation. Here you will learn to manage companies from end-to-end using the actual SAP ERP in a real-time simulated competitive environment and will learn the processes, gain technical skills with SAP and playfully learn how Enterprise Systems facilitate Business Intelligence which can be used to lead a company in a competitive environment.

PREREQUISITE: COMM 3501.03 and COMM 3511.03

COMM 4512 Business Intelligence and Data Visualization

CREDIT HOURS: 3

This course provides an introduction to Business Intelligence and Data Visualization. It covers the processes, methodologies and practices used to transform the large amounts of business and public data into useful information to support business decision-making. Students will learn how to extract and manipulate data from these systems with the necessary security safeguards. They will also acquire basic knowledge of data mining and statistical analysis, with a focus on data visualization. The students will also learn to build and use management dashboards and balanced scorecards using a variety of data design and visualization tools. The course will be made up of a combination of conceptual and applied topics with classes being held in a computer lab. Technologies to be used will be focused on end-user analytics and data visualization and will include state-of-the-art tools for self-serve business analytics.

PREREQUISITE: COMM 3511.03

COMM 4523 Project Management

CREDIT HOURS: 3

Many organizations in the private sector and the public sector are now using projects as tools to implement and achieve strategic goals, to innovate and to respond to customers' changing needs. This course will introduce students to the management of project portfolio, the project management methodology, the cross-cultural leadership skills, the concepts, the tools and techniques required to successfully manage a project. In this course, a practical and hands-on approach is used and involves several experiential exercises enabling the students to build an expertise in the process of managing projects.

PREREQUISITE: COMM 3501.03

CROSS-LISTING: MGMT 4333.03

COMM 4701 International Business Strategy

CREDIT HOURS: 3

The objective of this course is to help the students understand why firms expand overseas and how foreign operations differ from domestic ones. It provides the students with the necessary knowledge for a career or further study in international business. The course introduces the basic concepts of international business from a manager's perspective. It examines the issues and problems that arise when business operations extend across national boundaries and become international in scope or character. The emphasis is two-fold. First, consideration is given to the characteristics and contemporary dynamics of the world economy. Second, analysis is made of the development of the multinational firm and of the adaptation of the basic managerial functions due to internationalization. The course orientation is pragmatic and managerial. Through case studies, class discussions, assigned readings, and lectures, the students are expected to develop the skills for analyzing situations and formulating solutions in an international business context.

General

The Faculty offers a curriculum of undergraduate and graduate studies designed to prepare students for careers in the fields of business, public administration, environmental and information management.

The undergraduate management degree includes studies from the humanities and social sciences as well as in the functional areas of management.

In co-operation with the School of Health and Human Performance, the Faculty also offers a combined, five-year program in which the student receives both degrees upon graduation. Please refer to the School of Health and Human Performance section for more information on the Bachelor of Science (Recreation)/Bachelor of Management.

Laffin, D.

Tarry, J.

Faculty

Faculty are drawn from all four Schools that comprise the Faculty of Management: Rowe School of Business, Information Management, Public Administration, and Resource and Environmental Studies.

Bachelor of Management

The Bachelor of Management provides undergraduate education in the management of organizations and human activities, in public sector management, environmental management, information management, and enterprise management.

This degree recognizes that managers work and move across borders between these sectors of management. Drawing on faculty from all four schools in the Faculty of Management, the program recruits students locally, nationally and internationally.

The objectives of the Bachelor of Management program are to:

- Develop students' knowledge of key concepts and issues that arise in formulating and implementing strategy in organizations.
- Develop students' analytical and decision making skills.
- Develop students' teamwork and communication skills.
- Develop students' awareness of their strengths, career aspirations and personal goals.
- Prepare students to graduate with management skills that can be applied in general management, information management, environmental management, public sector management, not-for-profit management, and enterprise management.

Degree Requirements

- Four year program
- Total credit hours required - 120
- Required GPA for graduation - 2.00
- Required core area courses - 63 credit hours:
 - ECON 1101.03
 - ECON 1102.03
 - MGMT 1000.03
 - MGMT 1001.03
 - MGMT 1501.03
 - MGMT 1601.03
 - MGMT 1702.03
 - MGMT 2101.03
 - MGMT 2303.03
 - MGMT 2304.03
 - MGMT 2401.03
 - MGMT 2402.03
 - MGMT 2601.03
 - MGMT 2702.03
 - MGMT 2801.03
 - MGMT 2803.03
 - MGMT 3201.03
 - MGMT 3501.03
 - MGMT 3602.03
 - MGMT 4001.03
 - MGMT 4002.03
- Required Management electives
 - nine credit hours in management electives are required
 - six credit hours Writing Course (see Section C.)
- Open Electives
 - 42 credit hours, chosen from all courses offered in the University
 - A maximum of 18 credit hours at the 1000 level is permitted.
 - A maximum of 18 credit hours in Commerce is permitted.
 - Strongly advise students to choose a course in ethics (e.g., PHIL 2081 Business Ethics, PHIL 2485 Technology and the Environment).

Program Guide

Students will normally follow the courses as listed in the table below:

Year	Fall Sept - Dec (A)	Winter Jan - Apr (B)
Year 1	Writing Requirement	Writing Requirement
	ECON 1101.03	ECON 1102.03
	MGMT 1000.03	MGMT 1001.03
	MGMT 1601.03 or MGMT 1501.03	MGMT 1501.03 or MGMT 1601.03
	Open Elective.03	MGMT 1702.03

Year 2	MGMT 2101.03	Open Elective .03
	MGMT 2303.03	MGMT 2304.03
	MGMT 2401.03	MGMT 2402.03
	MGMT 2601.03	MGMT 2702.03
	MGMT 2801.03	MGMT 2803.03
Year 3	MGMT 3201.03	MGMT 3501.03
	MGMT Elective .03 or	MGMT 3602.03 or MGMT
	MGMT 3602.03	Elective.03
	Open Elective .03	MGMT Elective .03
	Open Elective .03	Open Elective .03
Year 4	Open Elective .03	Open Elective .03
	MGMT 4001.03	MGMT 4002.03
	MGMT Elective .03	Open Elective .03
	Open Elective .03	Open Elective .03
	Open Elective .03	Open Elective .03

Writing Course

One of the first five credits chosen should be selected from a list of courses in which written work is considered frequently and in detail. These writing courses are approved by the Writing Across the Curriculum committee and are listed under Writing Courses of the academic calendar.

Courses which satisfy the Writing Requirement are identified by the following text in their formal description (under FORMAT):

Meets Writing Requirement

Combined Degree

The School of Health and Human Performance and the Faculty of Management offer a five-year program in which a student graduates with both degrees, Bachelor of Science (Recreation)/Bachelor of Management. Please consult the School of Health and Human Performance section in the calendar for more information.

Majors

During their fifth, sixth, seventh and eighth academic terms, students can either pursue a general program of study, by choosing electives from a wide range of the functional areas, or they can follow a more specialized program, taking their elective courses towards a major. Six interdisciplinary thematic majors are available to students who focus their studies in specific aspects of management.

Entrepreneurship and Innovation Major

Required Courses

- COMM 3511.03: Management Information Systems
- MGMT 3907.03: New Venture Creation
- MGMT 4333.03: Project Management
- MGMT 4901.03: Managing the Venturing Process
- MGMT 3308.03: Managing the Family Enterprise OR MGMT 3902.03: Starting Lean

Leadership and Organization Major

Required Courses:

One of:

- SOSA 1002.03: People in Culture/SOSA 1003.03: People in Society
- SOSA 1100.06: Introduction to Anthropology
- SOSA 1200.06: Introduction to Sociology
- PSYO 1011.03/PSYO 1012.03: Introduction to Psychology and Neuroscience I and II
- PSYO 1021.03/PSYO 1022.03: Introduction to Psychology and Neuroscience I and II

Plus:

- MGMT 3309.03: Management Skills Development
- COMM 3310.03: Leadership and Strategic Change
- MGMT 3320.03: Organizational Theory OR COMM 3303.03: Human Resource Management
- COMM 3304.03: Labour Relations

Management and Globalization Major

Required Courses:

- Six credit hours from second-year Political Science
- COMM 4315.03: International/Intercultural Management
- COMM 4701.03: International Management Strategy

Public Sector Management Major

Required Courses:

- MGMT 2502.03: Statistics for Managers II
- MGMT 3810.03: Government Policy towards Business
- MGMT 3802.03: Public Policy
- ECON 2216.03: Economics of Global Warming or ECON 2217.03: Women and the Economy or ECON 2218.03: Canadian Economy

Knowledge Management Major

Required Courses:

- MGMT 3601.03: Information in a Networked World
- MGMT 3603.03: Beyond Google
- INFO 6400.03: Advanced Knowledge Management
- MGMT 4540.03/INFO 6540.03: Database Management Systems **or** CSCI 2141.03: Intro to Database Systems

Sustainable Resources and the Environment Major

Termination of this major is pending MPHEC approval

Major in Environment, Sustainability and Society

Required courses:

- SUST 1000.06 (or SUST 1001.06)*
- SUST 2000.06 or SUST 2001.06
- SUST 3502.03 or MGMT 3701.03
- SUST 4000X/Y.06

* SUST 1000 or SUST 1001 satisfy the first year ESS Major requirement, however; SUST 1000 also satisfies the BMgmt writing requirement and can be more easily accommodated in the first year BMgmt schedule. SUST 1001 does not satisfy the BMgmt writing requirement.

Majors - Electives

Major in Entrepreneurship and Innovation

Students need nine credit hours from list.

- COMM 2603.03 Legal Aspects of Business
- COMM 3310.03 Reflections on Leadership
- COMM 3401.03 Consumer Behaviour
- COMM 3402.03 Marketing Communications
- COMM 3404.03 Marketing Research
- COMM 3405.03 Global Marketing
- COMM 3409.03 Sales Management
- COMM 3410.03 Service Marketing
- LEIS 4362.03 Recreational Entrepreneurship and Special Events
- MGMT 2102.03 Managerial Accounting
- MGMT 3308.03 Managing the Family Enterprise
- MGMT 3309.03 Management Skills Development
- MGMT 3902.03 Starting Lean

Major in Knowledge Management

Students need 12 credit hours from list.

COMM 3511.03 Management Information Systems

CSCI 1107.03 Social Computing

INFX 2601.03 Information Security

MGMT 4300.03/INFO 6300.03 Information Resources in Government

MGMT 4370.03/INFO 6370.03 Records Management

MGMT 4611.03/INFO 6610.03 Information Policy

MGMT 4620.03/INFO 6620.03 Electronic Text Design

MGMT 4681.03/INFO 6681.03 Geospatial Information Management

MGMT 4310.03/INFO 6310.03 Resources for Business Intelligence

Major in Leadership and Organizations

Students need 12 credit hours from list.

COMM 2603.03 Legal Aspects of Business

ECON 2217.03 Women and the Economy

ECON 2218.03 The Canadian Economy in the New Millennium: Economic Policy Debates for the Next Decade

ECON 3315.03 Labour Economics

ECON 3319.03 Industrial Organization

LEIS 3296.03 Leadership and Group Dynamics

MGMT 2102.03 Managerial Accounting

MGMT 3601.03 Information In a Networked World

MGMT 4333.03 Project Management

PHIL 2081.03 Ethics in the World of Business

PSYO 2080.03 Social Psychology

PSYO 2130.03 Introduction to Cognitive Psychology

PSYO 2770.03 Brain and Behaviour

SOSA 2002.06 The Sociological Perspective: Thinking and Doing Sociology

SOSA 3005.03 Knowledge, Work and Culture in the Contemporary World

SOSA 3060.03 Social Change and Development

SOSA 3165.03 People & Cultures/Area Study

SOSA 3206.03 Ethnicity, Nationalism, Race

SOSA 3284.03 Living Cities

Major in Management and Globalization

Students need 12 credit hours from list. A minimum of three credit hours from each of columns A and B.

Column A International Development Focus

ECON 2213.03 Economic Rise of China & India

ECON 2334.03 Globalization & Economic Development

ECON 3317.03 Poverty and Inequality

GWST 2217.03 Women and the Economy

One of:

Column B International Business Focus

COMM 3405.03 Export Marketing

COMM 4201.03 International Financial Management

ECON 2219.03 Euros and Cents

ECON 2239.03 European Economic History

INTD 2001.03 Introduction to Development I
 INTD 2002.03 Introduction to Development II
 INTD 3002.03 Introduction to Development IV
 INTD 2045.03 Indian Society: Continuity and Change
 INTD 2106.03 Africa: An Introduction
 INTD 3000 or above
 INTD 3114.03 Environment and Development
 INTD 3115.03 Global Health
 MGMT 2102.03 Managerial Accounting
 PHIL 2475.03 Justice in Global Perspective
 POLI 2300.06 Comparative Politics
 POLI 2520.03 World Politics
 POLI 3360.03 Politics in Latin America
 POLI 3385.03 Politics of the Environment

A minimum 3 credit hour language course

ECON 3326.03 Money and Banking
 ECON 3330.03 International Trade
 ECON 3331.03 International Finance
 GWST 2217.03 Women and the Economy
 MGMT 2102.03 Managerial Accounting
 PHIL 2081.03 Ethics in the World of Business
 POLI 2300.06 Comparative Politics
 POLI 2520.03 World Politics
 POLI 3321.03 Politics of the European Union
 POLI 3544.03 Political Economy of South Africa
 POLI 3378: Us Constitutions, Government and Politics to the Management and Globalization
 A minimum 3 credit hour language course

Major in Public Sector Management

Students need 12 credit hours from list. A minimum of three credit hours from each of columns A and B.
 Students are strongly recommended to take six credit hours of French or Spanish. Note that it is also possible to obtain a certificate of proficiency in Spanish.

Column A

COMM 3511.03 Management Information Systems
 ECON 2200.03 Intermediate Microeconomics
 ECON 3326.03 Money and Banking
 ECON 3330.03 International Trade

 A minimum 3 credit hour language course

Environment, Sustainability and Society Major

- Six credit hours SUST/ESS electives at 2000 level or above
- Three credit hours SUST/ESS electives at 3000 level or above (MGMT 3702.03 is recommended)

Minors

For Bachelor of Management students

Bachelor of Management students can undertake a minor from various departments within the Faculty of Arts and Social Science, the Faculty of Science or the Faculty of Computer Science. They should consult advisors in those faculties for the most current information on the requirements for particular minors.

For a current list of minors please see “Minor Programs” of the Undergraduate Calendar

For students registered in the BA, BSc, Blnf and BCSc programs

The minor in management is available to students registered in the BA, BSc, Blnf and BCSc programs. The requirements are as for the appropriate degree program with completion of the following courses:

Required courses:

- MGMT 1000.03: Introduction to Management Issues I
- MGMT 1001.03: Introduction to Management Issues II
- ECON 1101.03: Micro Economics
- ECON 1102.03: Macro Economics
- MGMT 1501.03: Statistics for Managers

Any three half-credits chosen from:

- MGMT 2101.03: Financial Accounting
- MGMT 2303.03: People, work and organizations: Micro Organizational Behaviour
- MGMT 2401.03: Introduction to Marketing
- MGMT 2601.03: Knowledge Management
- MGMT 2702.03: Resource and Environmental Management
- MGMT 2801.03: Government Structure

Plus an additional two full credits of MGMT courses at or above the 2000 level.

Optional Internship

The Bachelor of Management (BMgmt) internship is a minimum of 32 weeks (approximately eight months) of consecutive, full time work experience related to your studies. Internships can be at large multi-national corporations or small offices, at a not-for-profit organization or a government department. We will work with you to help you secure your Internship.

Bachelor of Management students currently in the second year of their program are eligible to apply for the Internship Program. Please meet with your Academic Advisor to discuss your course plan.

Acceptance to participate in the Internship Program will be assessed on the following criteria:

1. Completion of Application Form
2. Statement of Intent
3. Resume
4. GPA of 2.70 or higher in the two terms preceding application submission
5. Positive recommendations from references
6. Personal interview with Management Career Services (to be arranged once complete application is reviewed)
7. Full participation in the Internship Prep Seminar, MGMT 4895 (no fee, no credit value) which is held each fall

Internship Fee

Students accepted into the Internship Program are charged an Internship Fee. This fee is non-refundable after the last day to drop a course without a "W".

The Internship Fee covers:

Administration of the internship including, but not limited to:

- Job search assistance (cover letters and resume building, interview preparation and debrief, coaching for self-developed job search strategies)
- MGMT 4895, the Internship Prep Seminar
- Networking opportunities with employers
- Development of job opportunities
- Access to on-line job posting site and job posting administration
- Interview space and co-ordination
- Facilitation of job offers
- Tracking of eligibility and job search activity
- Internship monitoring and mediation of unsatisfactory situations
- Internship report instruction and grading
- Marketing and Communications, tools and activities to promote the internship program to employers

Career Development Fee

Bachelor of Management students have access to specialized career development services through the Management Career Services unit. This service is covered through the payment of a mandatory Management Career Services Fee. This fee is prorated for part-time students. The Management Career Services team provides the following services:

- Career Related Workshops and individual advising in topics including: Winning Resumes, Effective Interviewing, Job Search Strategies and Networking
- On Campus Grad Recruitment
- Special Events (i.e. Interview Competition, sector specific Recruiting Events and Corporate Tours, both locally and in other cities)
- Strong Interest Inventory (career assessment tool)

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

MGMT 1000 Managing Organizational Issues I

CREDIT HOURS: 3

The course places management in its broadest context and helps students from diverse disciplines understand the complex social, economic, ecological, political and technological forces shaping 21st century leadership in the public, private and non profit sectors. Key themes explored in the course include systems thinking, values based approaches to management, and personal and professional development. We see those who successfully complete MGMT 1000/1001 as holistic, critical and strategic thinkers, acting with integrity to engage stakeholders, individually and in teams, to achieve personal, organizational and societal goals through interdisciplinary approaches. MGMT 1000/MGMT 1001 graduates will possess the ability to think globally, strategically, boldly, holistically and inter-disciplinarily, while considering local ecological, economic and cultural differences.

MGMT 1001 Managing Organizational Issues II

CREDIT HOURS: 3

A continuation of MGMT 1000.03.

PREREQUISITE: MGMT 1000.03

EXCLUSIONS: ASSC 1100.03, SCIE 1100.03

MGMT 1501 Statistics for Managers I

CREDIT HOURS: 3

An introduction to the principles and applications of statistics relevant to managers, with emphasis on making inferences based on observed data. Topics covered include descriptive statistics, probability, random variables, estimation, hypothesis testing and statistical software.

NOTES: Students enrolled in the Bachelor of Management must register for this course.

EXCLUSIONS: COMM 2501.03 and COMM 2502.03, MATH 1060.03 or STAT 1060.03

MGMT 1601 Electronic Information Management

CREDIT HOURS: 3

This course will teach students how to use computer applications to record and process data to create and communicate information and knowledge. It will show students the importance of business applications in the management environment. Students will master the word processing, spreadsheet, and presentation software in an integrated office suite, and will learn the fundamentals of database design. They will also learn to design and create web pages with html. It is strongly recommended that students complete this course in their first year of study.

NOTES: ASSC 1000 or CSCI 1200 will not be counted in the Bachelor of Management program.

MGMT 1702 Ecosystem Goods and Services

CREDIT HOURS: 3

The course explores the ecosystem goods and services on which our societies and economies depend, and the environmental basis of those goods and services. The

course will cover the nature and function of: matter, energy, ecosystems, primary producers, natural resources, biodiversity, ecological footprints, and feedback loops; and their importance for managers.

EXCLUSIONS: MGMT 1700.06, ENVI 1100X/Y.06, ENVS 1000.06

MGMT 2101 Financial Accounting

CREDIT HOURS: 3

This course introduces basic financial accounting methodologies and accounting principles used in the measurement and reporting of an organization's operating, financing and investing activities to external parties. Students develop an understanding of the information content of financial statements and techniques for analyzing the financial statements. The organizational context includes business, government and not-for-profit settings. The coverage includes an examination of the accounting process, basic issues in financial reporting, and the financial statement disclosure requirements.

PREREQUISITE: MGMT 1000.03, MGMT 1001.03

EXCLUSIONS: COMM 1101.03

MGMT 2102 Managerial Accounting

CREDIT HOURS: 3

This course examines how accounting can provide information to assist management in their planning, decision-making and performance evaluation activities -- whether for businesses, governments, not-for-profit organizations or special projects. Both qualitative and quantitative information supports this decision-making. Topics will include the understanding and determination of cost behaviours, an examination of the problems of tracing and allocating costs to the purpose(s) their incurrence was intended to serve, and the criteria for determining which costs are relevant to various types of decisions or areas of responsibility.

PREREQUISITE: MGMT 2101.03

EXCLUSIONS: COMM 2102.03

MGMT 2104 Public Sector Financial and Managerial Accounting

CREDIT HOURS: 1

This is required for all students who have completed COMM 2101.03 or COMM 1101.03. It covers the components that are covered in the MGMT courses and absent from typical private sector accounting courses.

PREREQUISITE: COMM 2101.03 or COMM 1101.03

MGMT 2303 People, Work, and Organizations: Micro Organizational Behaviour

CREDIT HOURS: 3

Organizational behaviour and the study of work organizations and management draw on a number of disciplines within social sciences to help us to understand and make sense of individual behaviour and human action in groups and organizations. Through a combination of individual and group work and a blend of classroom based activities supplemented by additional resources and materials available via BBL, this course will explore concepts and theories relating to micro aspects of organizational behaviour. Topics include: individual motivation, personality, perception, attitudes and values, and the relationships between individual choices and actions. Links will also be made to practice and processes in organizations (for example: rewards, appraisal, feedback and organizational commitment).

PREREQUISITE: MGMT 1000.03 and MGMT 1001.03

EXCLUSIONS: COMM 2303.03*Students who have taken COMM 2303.03 Introduction to Managing People are currently required to take MGMT 3309.03 (Management Skills Development) for full exclusion to MGMT 2303.03 and MGMT 2304.03.

MGMT 2304 People, Work and Organizations: Macro Aspects of Organizational Behaviour

CREDIT HOURS: 3

Mgmt 2304.03 builds on the concepts and principles identified in Mgmt 2303.03. This course takes a macro perspective that will consider the relationships between structural, cultural, social, economic and political factors and managing and organizing work. Topics include: organizational structure and processes; leadership, power and politics; organizational cultures, processes of organizational change, and legal and ethical issues and frameworks. To achieve a balance between theoretical and practical learning, the teaching methods will combine mini-lectures with in-class/on-line exercises, cases, presentations and group facilitated discussions.

PREREQUISITE: MGMT 2303.03

EXCLUSIONS: COMM 2303.03 Please note: where a student is transferring from Commerce to Management and has taken COMM 2303.03, they will need to take the complementary course MGMT 3309.03 (Management Skills Development) to receive full credit for MGMT 2303.03 and MGMT 2304.03

MGMT 2401 Introduction to Marketing

CREDIT HOURS: 3

The objective of this course is to familiarize you with marketing's mode of inquiry—the way marketers look at the world. As a marketer you should be able to: 1) ask the right questions about markets; 2) organize data into relevant information; 3) discover market opportunities; 4) set goals; 5) create a marketing plan that includes clear target markets, as well as product, price, distribution and communication strategies; and 6) implement and control a marketing program. Students work in groups and run a business in an online marketing simulation. This provides students with hands-on group decision making and data analysis skills, and they are specifically responsible for making product, pricing, promotion and placement strategies for a brand or group of brands. The course will also train students in a number of skills that are necessary for higher level courses and career advancement (i.e., case analysis and analytical report writing).

NOTES: Students enrolled in the Bachelor of Management must register for this course under its MGMT designation. Only students enrolled in the Bachelor of Management are permitted to take MGMT 2401.03

PREREQUISITE: MGMT 1000.03, MGMT 1001.03, ECON 1101.03, ECON 1102.03.

EXCLUSIONS: COMM 2401.03

MGMT 2402 Marketing Applications in the Not-for-Profit Sectors

CREDIT HOURS: 3

This course is intended to further the student's understanding of the ways in which the discipline of marketing can be applied to a number of public policy, environmental, professional and non-profit management areas. It will integrate the basic theory and concepts covered in the introductory marketing course with the knowledge gained in the introductory courses in environmental and public policy management or in introductory courses in a number of professional fields. The course will maintain an overall managerial perspective in examining the ways in which various constituencies fulfill their strategic organizational objectives through the application of marketing practices. Topic areas examined will be: micro-marketing (firm perspective) vs. macro-marketing (societal perspective); non-profit, cause-related, "green" and social marketing; de-marketing (e.g. anti-smoking, etc.); the use of marketing communications in the electoral and public policy-making process; ethics in marketing; marketing and development. The course may also examine the application of the discipline of marketing to a number of professional fields, such as sports/recreation and health sciences. Learning activities might include: lectures, videos, seminars, internet exercises, examinations and field assignments.

PREREQUISITE: MGMT 2401.03

MGMT 2502 Predictive Analytics

CREDIT HOURS: 3

A continuation of MGMT 1501.03. The main topics covered are analysis of variance, goodness of fit tests, simple and multiple regression, time series, statistical software.

PREREQUISITE: MGMT 1501.03

EXCLUSIONS: COMM 2501.03 and COMM 2502.03, MATH 2080.03, or STAT 2080.03

MGMT 2601 Knowledge Management

CREDIT HOURS: 3

In today's economy cutting-edge organizations in every industry are harnessing the power of knowledge as a core asset of the organization and the key to a sustainable competitive advantage. The aim of this Knowledge Management (KM) course is to provide an introductory and integrated approach to the various topics, emerging issues and perspectives in KM and organizational learning. We will explore how all types of organizations can effectively understand, analyze, measure, and manage, knowledge as an asset, i.e., manage the organization's intellectual assets and turn organizational wisdom into market value. Emphasis is placed on the development and application of both technical and people management skills within Knowledge Management environments.

PREREQUISITE: MGMT 1601.03

MGMT 2702 Resource and Environmental Management

CREDIT HOURS: 3

This course provides an overview of principles and techniques and explores challenging cases of environmental and resource management. It highlights the relevance of sustainability to today's business and government leaders, providing a framework for examining the issues involved in the extraction, manufacture, use and disposal of resources (materials, energy and products), and the tools available to optimally manage such systems.

PREREQUISITE: MGMT 1702.03

EXCLUSIONS: MGMT 1700.06, ENVI 1100.06 or ENVS 1000.06

MGMT 2801 Government Structure

CREDIT HOURS: 3

This course introduces students to the organizing principles and structures of the three levels of Canadian government; federal, provincial and municipal. The focus is particularly directed at the permanent public service and seeks to examine the collective "whole of government" influence on Canadian affairs. For those interested in business this is an important course as it provides an understanding of the core structures business must understand when dealing with government. As citizens this course provides a framework for understanding how you might protect your rights.

PREREQUISITE: MGMT 1000.03, MGMT 1001.03, second year student

MGMT 2803 Management in the Public Sector

CREDIT HOURS: 3

This course provides an introduction to the principles and methods used in the management of financial, human, and information resources in public sector organizations, with an emphasis on leadership in the Canadian context. It is designed to meet the educational needs of undergraduate students who are interested in a career in public service, the arts, or non-profit organizations, and who wish an exposure to modern management practices in the public sector.

PREREQUISITE: MGMT 2801.03

MGMT 2902 Innovation: An Introduction to Design Thinking

CREDIT HOURS: 3

Ever wonder how great ideas turn into innovative solutions people or organizations want to adopt? In today's highly dynamic environment, innovation has become not only a priority, but a driving force for highly successful organizations that adopt Design Thinking tools and processes that promote innovation. When done well, these tools and processes link inspiration and passion to implementation and delivery – and help individuals and organizations develop a culture that embraces and promotes innovation. This course combines theory and application and provides a hands-on practical learning experience for students as they actually design and implement innovative solutions to real world problems using creative problem solving and design thinking techniques. Students work in teams and learn how to apply these techniques to more fully understand the problem, identify novel and suitable solutions, and determine whether their proposed solution is a fit with those that will be using it.

FORMAT: Lecture

PREREQUISITE: 2nd year students

MGMT 3201 Financial Management

CREDIT HOURS: 3

This course is an introduction to the techniques and core principles for making optimal financial decisions for profit, not for profit and public sector organizations. The emphasis is on understanding the role of finance in an integrated management framework. Concepts covered include stakeholder analysis, financial planning, valuation and triple bottom line analysis.

PREREQUISITE: MGMT 2101.03, MGMT 1501.03

EXCLUSIONS: COMM 2202.03 and COMM 2203.03

MGMT 3308 Managing the Family Enterprise

CREDIT HOURS: 3

Managing the Family Enterprise is about the special problems and issues that confront family businesses. It explores the family system, the business system, the ownership system and their interactions - functional and dysfunctional. Specific topics, examined from the family business perspective, include: the decision to join a family firm, management succession, ownership succession, the role of key non-family employees, strategic planning and other issues especially relevant for family firms. The course also addresses conflict and communication in the family and business. The course has two purposes. First it provides an organized framework for students to understand the dynamics and special issues of family firms. Second it is designed to allow students to explore their interest in joining a family firm. Therefore, it is especially intended for students who come from families which are in business or for students considering joining a family business. Others who wish to explore a key segment of Canadian business are also welcome. The course relies on field projects, guest speakers, case studies, videos, research papers and extensive class discussion to explore the territory of managing family businesses.

PREREQUISITE: MGMT 2101.03

CROSS-LISTING: COMM 3308.03

EXCLUSIONS: BUSI 6006.03

MGMT 3309 Managing the Family Enterprise

CREDIT HOURS: 3

This course will expose students to key knowledge, skills, and attitudes (KSAs) considered critical to managerial success. Such an exposure is designed to provide the students with behaviours which will help ensure that, when managing human resources, staff will perform at or near peak capabilities. Topic areas include: understanding what the successful manager needs to know, understanding the personal self, communications, interpersonal negotiations, goal setting, managing innovation and change, handling conflict and anger, performance evaluation, counselling and feedback, and management attitudes needed for success. Significant amounts of classroom time will be devoted to behaviour modelling exercises, role plays, case studies, and group discussions.

FORMAT: Lecture| Discussion

PREREQUISITE: MGMT 2303.03 and MGMT 2304.03

EXCLUSIONS: COMM 3309.03

MGMT 3320 Organizational Theory

CREDIT HOURS: 3

This course will demonstrate how organizations are designed and structured to be most effective, and how they develop and change as a strategic and adaptive response to forces in their internal and external environments. How organizational structures are driven by strategy, technology, culture and how organizations deal with change will also be primary areas of foci. The course is designed to provide students with theoretical and practical approaches and frameworks that are useful for assessing organizational structures and processes in relation to environmental demands, for defining change strategies designed to improve organizational effectiveness, and for undertaking the practical task of managing change processes toward that end. The course will be structured around a combination of lectures, student presentations, and in-class discussions and exercises.

PREREQUISITE: MGMT 2303.03, MGMT 2304.03

EXCLUSIONS: COMM 4306.03

MGMT 3400 Introduction to Real Estate Management

CREDIT HOURS: 3

The purpose of this course is to provide students with an overview of the varied aspects of property management in the Canadian environment. Topics include:

Residential Management, Building Operations, Green Programs and Initiatives, Facility Management and Site Development.

PREREQUISITE: MGMT 2101 and MGMT 3201 or COMM 1101, COMM 2202 and COMM 2203

MGMT 3501 Operations Management

CREDIT HOURS: 3

This course introduces the student to some of the standard techniques used in managing operations in manufacturing, services, as well as not-for profit organizations. Topics include: inventory, supply chains, production planning, project management, quality and queueing. Cases and class examples are used to build general skills, illustrate the application of techniques and general approaches to managing operations in the public and private sector.

PREREQUISITE: MGMT 1601.03, MGMT 2101.03, MGMT 2401.03, MGMT 1501.03

EXCLUSIONS: COMM 3501.03

MGMT 3601 Information in a Networked World

CREDIT HOURS: 3

This course provides an introduction to the economic, political, and social dimensions of today's networked information economy. It considers the historical development of information and knowledge production, issues related to control versus the free flow of information, the ethical and legal aspects of information management, and organizational use of information management for storing and processing information, managing knowledge, and making decisions.

PREREQUISITE: MGMT 2601.03

MGMT 3602 Professional Communication Skills

CREDIT HOURS: 3

This course will introduce students to the broad range of written and oral communication skills needed by managers, including how to adapt a document or presentation for a particular audience and purpose, how to select a suitable method of organization, how to make good use of graphics, how to work effectively as part of a collaborative project team. Students will have the opportunity to practice their communication skills and techniques in small groups, and in formal presentations before the whole class.

PREREQUISITE: Writing Requirement

RESTRICTIONS: Third year student

EXCLUSIONS: (COMM 1701.03 and COMM 1702.03) or (LIBS 1002.03 and LIBS 1003.03) or (INFO 1002.03 and INFO 1003.03) or (MGMT 1002.03 and MGMT 1003.03) or (COMM 1710.03 and COMM 1720.03)

MGMT 3603 Beyond Google

CREDIT HOURS: 3

Contextually relevant information is essential to support decision making and strategic planning by individuals, groups and organizations. This course discusses the theory and practice of searching for information, from the level of needs assessment through to systematically scanning through electronic, print and human sources efficiently, effectively and ethically. The use of technologies to streamline search processes will be emphasized, as well as the behavioural, affective and cognitive aspects of human information behaviour.

PREREQUISITE: MGMT 2601.03

MGMT 3701 The Community as a Living Laboratory

CREDIT HOURS: 3

This course introduces students to research, concepts and methods for analyzing community sustainability across a spectrum of perspectives. In this course, the Halifax community serves as a living laboratory for identifying, evaluating and assessing indicators of progress toward greater environmental, social and economic sustainability. Working in groups, students apply problem-solving models to case studies using qualitative and quantitative research methods to help community-based organizations grapple with real world problems. A variety of tools may be used including systems analysis, environmental audits, field surveys, questionnaires, interviews, and statistical analysis. Students then draw conclusions and make recommendations for improvements on the basis of their analysis.

PREREQUISITE: MGMT 1700.06 or ENVI 1100.06 or ENVS 1000.06 or SUST 2000.06 OR SUST 2001.06 or MGMT 1702.03 and MGMT 2702.03

EXCLUSIONS: ENVS 3502.03, SUST 3502.03

MGMT 3702 Resource/Environmental Problem-Solving: Sustainable Industries

CREDIT HOURS: 3

The course introduces students to concepts and methods for analyzing industrial sustainability based on both renewable (e.g., forests, fisheries, agriculture) and non-renewable (e.g., minerals, fossil fuels) resources. Students learn how natural resources are managed and used, and how sustainable businesses and innovative economic enterprises can be based on sustainable resource use. A range of management and policy mechanisms for ensuring resource sustainability is explored.

PREREQUISITE: MGMT 1700.06 or ENVI 1100.06 or ENVS 1000.06, or SUST 2000.06 or SUST 2001.06 or (MGMT 1702.03 and MGMT 2702.03)

MGMT 3802 Public Policy

CREDIT HOURS: 3

This course serves as an introduction to the public policy process with an emphasis on the interplay between policy and the four thematic areas of study and professional practice upon which the Faculty of Management has been formed – the private sector, the environment, the public sector and information technology. Students assume the role of a policy analyst during the course and pursue a policy problem of their choosing through the policy process that culminates in a policy project briefing and paper.

PREREQUISITE: MGMT 1000.03, MGMT 1001, MGMT 2801.03, MGMT 2803.03

MGMT 3810 Government Policy Toward Business

CREDIT HOURS: 3

The focus of this course is twofold: first, how governments shape business behaviour through policy, regulation, state ownership, and other forms of intervention; and secondly, why collaboration is a growing reality enjoining public sector and private sector organizations and the implications for each sector and society as a whole.

The course aims to understand the fundamental difference between the public interest and the private interest and how such differences are sorted out through contemporary governance systems involving public, private and civic actors. While the emphasis will be on the Canadian environment, a comparative perspective will also be used in light of many issues that are increasingly transnational in scope. Students will be able to develop a critical view of government intervention and grow a sense of when and where government action is warranted and when and where it is not.

FORMAT: Lecture| Seminar

PREREQUISITE: MGMT 2801.03, MGMT 2803.03, ECON 1101.03, ECON 1102.03

MGMT 3902 Starting Lean

CREDIT HOURS: 3

This course provides real world, hands-on learning on what it's like to actually build a scalable startup company. This is a practical course - essentially a lab, not a theory course providing experiential learning. You will work in teams learning how to turn a great idea into a great company. You will learn how to talk to customers, partners, and competitors, as you encounter the chaos and uncertainty of how a startup actually works. You'll learn how to use a business model canvas to brainstorm each element of a company. You will learn the importance of customer development and customer discovery to determine whether anyone other than you would want/use your product and what your 'Minimum Viable Product' (MVP) should look like. Each day will be a new adventure outside the classroom as you test each part of your business model, then share your hard earned knowledge with the rest of the class.

CROSS-LISTING: BUSI 5902.03

MGMT 3907 New Venture Creation Entrepreneurship

CREDIT HOURS: 3

This course is about venturing - the process of creating new ventures in both the for-profit and not-for-profit environment. By linking theory and practice, the course will expose students to the issues, problems and challenges of creating new ventures and provide students with the opportunity, within the framework of a formal class, to explore and develop venture ideas as they have been considering or wish to investigate. Experiential exercises enable the students to build their personal entrepreneurial strategy, identify an innovative idea, build their business model, write and pitch a winning business plan in front of a panel of angels, government agencies representatives that support start-ups and experienced entrepreneurs.

PREREQUISITE: MGMT 1000.03, MGMT 1001.03, MGMT 2101.03, and MGMT 2401.03

CROSS-LISTING: COMM 3307.03

MGMT 4001 Strategy Formulation

CREDIT HOURS: 3

This is a capstone course which draws upon all previous courses in the Bachelor of Management Program. The course introduces students to different theoretical frameworks for the analysis and development of strategy. Moving through the analysis phase by way of external and internal scans of the environment and of the organization itself, students' progress to the formulation phase of strategy-making through lectures, case studies and in-class discussions. Strategy is examined in the context of the four thematic areas of study and professional practice upon which the Faculty of Management has been formed - the private sector, the environment, the public sector and information technology. Student knowledge is consolidated through the preparation of a major individual project on a real organization, a significant team application of course material, and a final examination.

PREREQUISITE: All required first, second, and third year core courses for the Bachelor of Management program.

EXCLUSIONS: COMM 4351.03

MGMT 4002 Strategy Implementation

CREDIT HOURS: 3

This course is the second capstone course in the Bachelor of Management Program and is a continuation of MGMT 4001.03. The course introduces students to strategic implementation and involves the examination of the major factors that impact effective organizational performance. Students will learn how to effectively manage the strategy implementation process through an examination of leadership and governance, corporate social responsibility and ethics, management operations, organizational structure and design as well as organizational culture. Knowledge will be consolidated through the preparation of an individual strategic implementation project, group case analysis and presentation. The course also examines strategic sustainability by drawing upon the four thematic areas of study and professional practice upon which the Faculty of Management has been formed - the private sector, the environment, the public sector and information technology.

PREREQUISITE: MGMT 4001.03

EXCLUSIONS: COMM 4352.03

MGMT 4013 Marine Protected Areas

CREDIT HOURS: 3

The creation of refugia from human exploitation in the marine environment for the purposes of conservation and sustainable resource usage is a fast-growing application of ecological theory and ecosystem-based management. The holistic approach marries ecological research, fisheries science, park management and social policy. Criteria and information requirements for the selection, establishment and adaptive management of Marine Protected Areas are evolving on many fronts. Professionals in marine affairs need to be aware of the state of the art in Marine Protected Areas theory and practice. That is the goal of this class.

NOTES: MGMT courses cross-listed with MARA graduate classes are restricted to students majoring in Sustainable Resources and the Environment and approval from Marine Affairs Program.

PREREQUISITE: MGMT 1700.06 MGMT 1702.03 and MGMT 2702.03, and MGMT 3701.03 and MGMT 3702.03

CROSS-LISTING: MARA 5013.03

MGMT 4021 Fisheries Management

CREDIT HOURS: 3

This interdisciplinary course focuses on the theory and practice of fishery management, with emphasis on Sustainable Fishery Systems. It will address the structure and dynamics of fisheries, and key themes in managing fisheries for sustainability and resilience, through class seminars and discussion, as well as attendance at related fisheries and coastal events.

NOTES: MGMT classes cross-listed with MARA graduate classes are restricted to students majoring in Sustainable Resources and the Environment and approval from Marine Affairs Program.

PREREQUISITE: MGMT 1700 and MGMT 3701 and MGMT 3702

CROSS-LISTING: MARA 5021.03

MGMT 4050X/Y Directed Reading and Research

CREDIT HOURS: 3

This course offers the student the opportunity to explore in greater detail a particular area of interest. The content of the course is negotiated with the individual instructor involved. The student and instructor must develop a proposal, and submit it to the Program Committee for approval. Guidelines are available from the Bachelor of Management Program Administrator.

MGMT 4333 Project Management

CREDIT HOURS: 3

Many organizations in the private sector and the public sector are now using projects as tools to implement and achieve strategic goals, to innovate and to respond to customers changing needs. This course will introduce students to the management of project portfolio, the project management methodology, the cross-cultural leadership skills, the concepts, the tools and techniques required to successfully manage a project. In this course, a practical and hands-on approach is used and involves several experiential exercises enabling the students to build an expertise in the process of managing projects.

PREREQUISITE: MGMT 3501.03

CROSS-LISTING: COMM 4523.03

MGMT 4895 Internship Prep Seminar

CREDIT HOURS: 0

Upon acceptance into the Bachelor of Management Optional Internship Program (Winter Term), students register for MGMT 4895 for the Fall Term. This course is designed to introduce internship students to aspects of career development and preparation for their internship experience. Students apply to the Internship Program through Management Career Services in their second year.

NOTES: This course carries zero credit hours. Details on the Bachelor of Management Internship Program are available at www.dal.ca/mcs/internship

MGMT 4896 Management Internship

CREDIT HOURS: 3

The optional internship will take place between academic year 3 and the final academic year. It is designed to offer opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.

NOTES: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree.

PREREQUISITE: MGMT 3201.03, MGMT 3501.03, MGMT 3602.03, MGMT 4895.

MGMT 4897 Management Internship

CREDIT HOURS: 3

The optional internship will take place between academic year 3 and the final academic year. It is designed to offer opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.

NOTES: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree.

PREREQUISITE: MGMT 3201.03, MGMT 3501.03, MGMT 3602.03, MGMT 4895

MGMT 4898 Management Internship

CREDIT HOURS: 0

The optional internship will take place between academic year 3 and the final academic year. It is designed to offer opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.

NOTES: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree.

PREREQUISITE: MGMT 3201.03, MGMT 3501, MGMT 3602.03, MGMT 4895

MGMT 4899 Management Internship

CREDIT HOURS: 0

The optional internship will take place between academic year 3 and the final academic year. It is designed to offer opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.

NOTES: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree.

PREREQUISITE: MGMT 3201, MGMT 3501, MGMT 3602.03, MGMT 4895

MGMT 4901 Managing the Venturing Process

CREDIT HOURS: 3

Managing the Venturing Process is a capstone course that explores the strategic elements required to venture successfully. By linking theory and practice, the course is designed to familiarize students with entrepreneurial strategies for the emerging venture, for the growing venture, and for sustaining growth in the established venture.

Venturing will be explored in the context of both for-profit and not-for profit objectives and will examine nurturing single entrepreneurs as well as organizational entrepreneurs. As this is a capstone course students will be expected to use knowledge acquired in others business courses.

PREREQUISITE: MGMT 3907.03 or COMM 3307.03

General Information

Dalhousie Medical School was organized in 1868, but medical teaching was carried out by the independent Halifax Medical College from 1875 to 1911, when the Faculty of Medicine was re-established by the University.

The Faculty provides a complete medical training leading to the degree of Doctor of Medicine (MD). Nationally accredited postgraduate training in family medicine and specialty training is provided in University-affiliated hospitals in Nova Scotia, Prince Edward Island and New Brunswick. Continuing Medical Education is provided to the practitioners of the three Maritime Provinces.

The Faculty is fully accredited by the Liaison Committee on Medical Education and the Committee on Accreditation of Canadian Medical Schools.

The Medical School has strong research programs in basic biomedical sciences, clinical sciences, population health and medical education.

Mission Statement

Serving Maritime Canada, the Faculty of Medicine enables excellence in health care through our medical education and research programs in partnership with government, health authorities and health care providers.

Introduction

The Department of Medical Neuroscience fosters research and training in neuroscience that advances the understanding and treatment of diseases of the nervous system. Our faculty members contribute to undergraduate neuroscience courses in the Faculty of Science including NESC 3440 (Human Neuroanatomy) and NESC 4070 (Chemical Neurobiology)

The Department of Medical Neuroscience is also the home for Anatomy at Dalhousie University, at the undergraduate level offering courses in basic anatomy and histology.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

ANAT 1010 Basic Human Anatomy

CREDIT HOURS: 3

This course is offered by the Department of Medical Neuroscience primarily to students in the Schools of Nursing (Section 01). A limited number of seats are available for Special Health Professions, Arts and Science, or Non-Degree students. Note that this course is also offered by DISTANCE EDUCATION (ANAT 1010.03, Section 02) during the Regular Term (Fall or Winter). Upon successful completion of the course, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. This course uses an online Virtual Anatomy Laboratory.

NOTES: Please note that the Distance Anat 1010 section 02 course is unrestricted and open to all students.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: Section 01 is restricted to Nursing students and a limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students.

ANAT 1020 Basic Human Anatomy

CREDIT HOURS: 3

This course is offered by the Department Medical Neuroscience primarily to student in Recreation, Physical and Health Education and Kinesiology. A limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students. Note that this course is also offered by DISTANCE EDUCATION (ANAT 1010.03, Section 02) during the Regular Term (Fall or Winter). Upon successful completion of this course, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. This course uses an online Virtual Anatomy Laboratory.

NOTES: This course is NOT offered during the summer term.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: Restricted to student in Recreation, Physical and Health Education and Kinesiology. A limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students.

ANAT 1040 Basic Human Anatomy for Pharmacy Students

CREDIT HOURS: 3

This course is offered by the Department of Medical Neuroscience to students in the College of Pharmacy. Upon successful completion of the course, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. There are no formal laboratory sessions.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: Restricted to Pharmacy students

ANAT 2160 Introduction to Human Histology

CREDIT HOURS: 3

Histology is the study of the structure of cells, tissue and organ systems, and utilized information derived from both light and electron microscopy. This course complements studies in anatomy, cell biology, physiology, and biochemistry, broadening the understanding of how organisms function.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 2
LAB HOURS PER WEEK: 2
PREREQUISITE: BIOL 2020.03 or permission of instructor
CROSS-LISTING: BIOL 3430.03

ANAT 3421 Comparative Vertebrate Histology

CREDIT HOURS: 3

An advanced histology course surveying the whole range of vertebrate tissues and organs. The material is approached from a comparative perspective, considering tissue and organ histology throughout the major vertebrate courses.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 2

PREREQUISITE: BIOL 3430.03 or ANAT 2160.03 or equivalent

CROSS-LISTING: BIOL 3421.03

Pharmacology

Location:

Building/Room: Sir Charles Tupper Medical Building

Street Address 1: 5850 College Street

Street Address 2: 6B3, 6th Floor

Introduction

Pharmacology is the study of the actions and fates of drugs in biological systems. Studies of the interaction of drugs with their receptors and the elucidation of the cellular mechanisms underlying the resulting responses are central to Pharmacology. It is also important to understand how drugs are handled in the body, why they produce adverse effects, and how they interact with each other. In addition, scientists often use drugs as tools to determine the basic mechanisms that underlie both normal and pathological conditions in biology. A solid understanding of the principles of Pharmacology is essential for any scientist who wishes to use drugs as tools properly. The experimental approaches used in Pharmacology are varied, ranging from bioassay, electrophysiology, chemical and biochemical analyses to molecular biology.

Degree Programs

Students intending to pursue graduate training in Pharmacology are encouraged to study pharmacology at the undergraduate level. In addition, a solid background in pharmacology can open the door to employment in numerous sectors, most notably the pharmaceutical industry. The Department of Pharmacology does not offer an honours pharmacology degree program as such. However, it does provide courses that may be taken for credit within various other honours degree programs, including Biology, Biochemistry, Psychology (Neurosciences) and Microbiology and Immunology. In addition, students can conduct honours thesis research projects in the laboratories of Pharmacology faculty. Finally, undergraduate students may, with permission of their home department and the course instructor, take certain graduate specialty courses which are offered in the Department of Pharmacology.

Cross Appointments

Acott, P., Bc (UNB), MD (Dalhousie) Major appointment in Pediatrics

Gardner, E. L., AB (Harvard), MA, PhD (McGill)

Goralski, K., BSc, PhD (Manitoba), Major appointment in College of Pharmacy

Grandy, S. A., BScK, MSc, PhD (Dalhousie) Major appointment in School of Health and Human Performance

Hall, R. I., BSc Pharm, MD (Dalhousie), FRCP (C), FCC, Major appointment in Department of Anesthesia

Hung, O. R., BSc Pharm, MD (Dalhousie) FRCP (C), Major appointment in Department of Anesthesia

Lehmann, C., MD (Humboldt U Berlin), Major appointment in Anesthesia

Lynch, M. E., BSc, MD (Dalhousie), FRCPC, Major appointment in Department of Anesthesia

Manchia, M., MD, PhD (Cagliari, Italy). Major appointment in Psychiatry

Pohlmann-Eden, B., MD, PhD (U of Heidelberg, Germany), Major appointment in Neurology

Pollak, P. T., MD, PhD (Western Ontario), Major appointment in Pharmacology and Cardiac Services, U of Calgary

Rupasinghe, H. P. V., BSc (U of Peradeniya, Sri Lanka), MSc (Iowa State U., USA), PhD (Guelph), Major appointment in Faculty of Agriculture

Rusak, B., BA (Toronto), PhD (Berkeley), Major appointments in Departments of Psychiatry and Psychology

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

PHAC 1470X/Y Pharmacology for Pharmacy

CREDIT HOURS: 6

This class will provide an introduction to pharmacology, emphasizing basic mechanisms of drug action and principles of drug-receptor interactions, pharmacokinetics, and drug metabolism.

COORDINATORS: R. Pelisi, J. McDougall

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOC 1040.06, MICR 1050.03, PHYL 1400.06

PHAC 3001 Pharmacology I

CREDIT HOURS: 3

This course introduces students to pharmacology, the study of the interaction of drugs and toxins with the human body. Topics include drug receptors, metabolic transformation and distribution of drugs. Lectures explore the action of clinical agents used to treat cardiovascular diseases, neurological diseases, pain, and cancer. Experts in the various fields of pharmacology present the different topics.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 2020 or instructor's consent. A course in Biochemistry or Physiology is recommend.

RESTRICTIONS: Restricted to third year and above

EXCLUSIONS: PHAC 5406, BIOC 4804, BIOL 4404, NESC 4374

PHAC 4001 Pharmacology II

CREDIT HOURS: 3

This course is designed to follow Pharmacology I, with further learning on the interaction of drugs and toxins with the human body. Topics include cell signaling, pain, hormones, special population pharmacology, chemical carcinogenesis, immunopharmacology, drugs of abuse, epilepsy and multiple sclerosis. Experts in various fields of pharmacology present the different topics.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PHAC 3001 or instructor's consent

RESTRICTIONS: Restricted to third year or above

EXCLUSIONS: PHAC 5409, BIOC 4806, BIOL 4407, NESC 4376

Physiology and Biophysics

Location:

Building/Room: Sir Charles Tupper Medical Building

Street Address 1: 5850 College Street

Street Address 2: 3rd Floor

Email Address: jennifer.graves@dal.ca

Introduction

The Department of Physiology and Biophysics offers a wide range of undergraduate courses in addition to those restricted to students in the faculties of Medicine, Dentistry and Health Professions. Students who have previously taken biology, chemistry, physics will be best equipped to study physiology.

The courses listed below are aimed at providing the student with an understanding of the functioning of the human body. The Distance Education course PHYL 1000X/Y.06 is open to all students. PHYL 2041.03 and/or PHYL 2032.03 is/are the recommended prerequisite for science students interested in taking higher level physiology courses. Students wishing to enrol in other specialized courses require permission from the Course Director.

Course Descriptions

PHYL 1000X/Y Human Physiology

CREDIT HOURS: 6

A full-credit Distance Education course equivalent to PHYL 1010X/Y.06. The functions of body organs and body systems, as well as integrative functions of the whole organism are studied. The course is based on a selected textbook and is supported by extensive blackboard content including a step-by-step guide, learning objectives, assignments, and virtual laboratories. The course is normally given in the Regular session (Sept - Apr), as well as in the Summer session (May - June, PHYL 1000). Distance Education courses have an additional fee over and above the listed tuition fees. DIRECTOR: C. Penney

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PHYL 1010X/Y Human Physiology

CREDIT HOURS: 6

This is a full-credit introductory human physiology course equivalent to PHYL 1000X/Y.06. The functions of body organs and body systems, as well as integrative functions of the whole organism are studied. This course is intended primarily for students in the Health Professions.

DIRECTOR: C. Penney

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term. This course cannot be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).

FORMAT: Lecture| Lab

ASSESSMENT METHOD: Four examinations of multiple-choice format

PHYL 1400X/Y Human Physiology

CREDIT HOURS: 6

This course is designed to give Pharmacy students a broad understanding of normal human physiology using pathophysiologic scenarios. Selected topics in physiology and biophysics will be presented in tutorials as case studies and in lectures. The central themes include: respiratory, endocrine/reproductive, gastrointestinal, neuromuscular, nervous system, renal and cardiovascular. Students will be provided with means for self-evaluation throughout the unit. Evaluation will be based on tutorial performance as well as mid- and end-of-unit examinations. This course is only for Pharmacy students. DIRECTOR: M. Murphy

FORMAT: Lecture| Tutorial

PREREQUISITE: ANAT 1040.03

PHYL 2031 Human Neurophysiology

CREDIT HOURS: 3

The aim of this class is to understand the functional mechanisms of the human nervous and muscular systems, together with their clinical significance. The class covers the electrical and chemical properties of neurons and glia, and how neurons communicate with one another and with muscle cells. The physiology of skeletal, smooth and cardiac muscles will also be covered. It will review the motor, sensory and higher integrative functions of the central nervous system, and the closely related autonomic nervous system. It will survey the physiology and functional anatomy of the somatosensory, visual, auditory, vestibular and chemical senses. Both normal functions and selected pathologies of these systems will be discussed. The class also surveys important investigative techniques in neuroscience and includes a laboratory component. The overall objective is to provide a solid, factual foundation of knowledge in nerve and muscle physiology as well as their underlying principles.

PREREQUISITE: BIOL 1010.03 (or BIOL 1020.03) and BIOL 1011.03 (or BIOL 1021.03) and CHEM 1012 or CHEM 1022 or equivalent

EXCLUSIONS: PHYL 2030.06

PHYL 2032 Human Systems Physiology

CREDIT HOURS: 3

The aim of this class is to explain how six such organ systems (respiratory, cardiovascular, renal, gastrointestinal, endocrine and reproductive) function to allow us to live and carry out our daily activities. Although the emphasis is on normal function there is also discussion of selected pathologies. An accompanying laboratory

component underscores the clinical relevance of the physiology taught in lecture. Director: N. Morgunov
PREREQUISITE: BIOL 1010.03 (or BIOL 1020.03) and BIOL 1011.03 (or BIOL 1021.03) and CHEM 1012 or CHEM 1022 or equivalent
EXCLUSIONS: PHYL 2030.06

PHYL 2041 Human Neurophysiology

CREDIT HOURS: 3

The aim of this class is to understand the functional mechanisms of the human nervous system and its clinical significance. The course covers the electrical and chemical properties of neurons and glia, and how neurons communicate with one another and with muscle cells. It reviews the motor, sensory and higher integrative functions of the central nervous system, and the closely related autonomic nervous system. It also surveys the physiology and functional anatomy of the somatosensory, visual, auditory, vestibular and chemical senses. Both normal functions and selected pathologies of these systems will be discussed. The class also covers important investigative techniques in neuroscience. The overall objective is to provide a solid, factual foundation of knowledge in neurophysiology as well as its underlying principles.

NOTES: PHYL 2041, a core neurophysiology class for students in the Medical Sciences program, serves as equivalent to NESC 2470.03 as prerequisite for upper level NESC courses. Medical Sciences students intending to take NESC 2470.03 in place of PHYL 2041 are advised to also enroll in NESC 2570 as a Selective. Directors:

A.A. French and P. Torkkeli

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: (BIOL 1010.03 or BIOL 1020.03) and (BIOL 1011.03 or 1021.03) and (CHEM 1012.03 or CHEM 1022.03), or SCIE 1500, or equivalent

EXCLUSIONS: NESC 2470.03, PHYL 2031.03, PHYL 2030.03

PHYL 2570 Cellular Neurophysiology

CREDIT HOURS: 3

This course provides an introduction to the function of the nerve cells of the brain, which forms the basis for explaining features of brain function in terms of activity of individual cells and their membrane properties, as well as small networks of neurons. The course is designed for all students wishing to take more advanced courses in, or to major in, Neuroscience. Although the course covers topics of neuroscience at all levels, the content is directed towards cellular neuroscience; detailed coverage of the strictly developmental systems or molecular levels of neuroscience is provided in other courses. DIRECTOR(S): S. Adamo and S. Barnes

FORMAT: Lecture

PREREQUISITE: PSYO 2470.03 or NESC 2470.03 or PHYL 2041.03 or permission of the class director

CROSS-LISTING: NESC 2570.03, PSYO 2570.03

PHYL 3120 Exercise Physiology in Health and Disease

CREDIT HOURS: 3

The function and dysfunction of body organ systems are reviewed, and the short- and long-term responses of these systems to physical exercise are analyzed. Factors affecting physical performance are considered, and the preventive and therapeutic use of exercise for a wide range of clinical conditions is examined. DIRECTOR: T.F. McDonald

FORMAT: Lecture| Tutorial

PREREQUISITE: PHYL 2041.03 and 2032.03 or permission of the class director

PHYL 3320 Human Cell Physiology

CREDIT HOURS: 3

Events at the cellular and molecular level determine the activities of tissues, organs, and systems. This course examines key physiological principles at the cellular level, and uses this information to develop understanding of important body functions. Lectures focus on signaling within individual cells, membrane transport, electrical excitability and electrical signaling, communication between cells, muscle contractility, and epithelial transport. DIRECTOR: P. Linsdell

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PHYL 2041.03 or permission of course director

PHYL 3420 Sensory Physiology

CREDIT HOURS: 3

This course will describe the physiological and biophysical basis of human sensory systems including vision, audition, vestibular, olfaction, gustation, and somatosensory (skin and proprioception). Emphasis will be on the transduction of physical stimuli and the early neural processing that occurs in sensory cells and immediately associated tissues. DIRECTOR: S. Barnes and guest lecturers

FORMAT: Seminar

PREREQUISITE: NESC 2470 or PHYL/NESC 2570 or equivalents

PHYL 3520 Core Concepts in Medical Physiology

CREDIT HOURS: 3

Through didactic (lectures) and problem-solving (tutorial) sessions, students will gain a deeper understanding of the functions of various organ system physiologies. In addition, the integration of a number of organ system functions will also be discussed. Where appropriate, the physiology of disease processes will underscore the consequences of a malfunction of a physiological process. Organ systems covered include cardiovascular, renal, respiratory and gastrointestinal. A firm understanding of physiological principles is essential for any student contemplating a career in the health professions. DIRECTOR: N.S. Morgunov

FORMAT: Lecture| Tutorial

PREREQUISITE: PHYL 2032.03 or permission of course director

PHYL 4000 Current Advances in Synaptic Function and Plasticity

CREDIT HOURS: 3

Key recent research studies in cellular and system neurophysiology are presented and discussed. Emphasis is placed on synaptic function, and plasticity, excitability, dendritic integration, neural networks and relevant advances in experimental methods. Newly published papers within these areas are reviewed weekly, followed by a more extensive critique of two publications. Directors: S. Krueger and A. Fine

FORMAT: Seminar

PREREQUISITE: NESC 2570/PHYL 2570 or permission of course directors

CROSS-LISTING: NESC 4185.03

PHYL 4324 Endocrine Physiology

CREDIT HOURS: 3

This course is designed to provide intermediate and advanced undergraduates with a basic understanding of the function of the endocrine system. The course will progress from a consideration of basic concepts and mechanisms to the physiological function of specific endocrine systems. Interactions between organ systems will be emphasized. DIRECTOR: P.R. Murphy

PREREQUISITE: PHYL 3320.03 or permission of the class director

PHYL 4328X/Y Directed Project in Physiology

CREDIT HOURS: 3

This course allows the advanced undergraduate student to pursue more specialized training. A student wishing to take this course must find a faculty member who is prepared to supervise a directed project. Before registering for this course, a student must provide the Course Director with a letter from the faculty member describing the project and agreeing to serve as supervisor. Class approval will not be given until this is done. DIRECTOR: TBA

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: PHYL 2041.03 and 2032.03 or permission of the course director

PHYL 4504 Respiratory Physiology

CREDIT HOURS: 3

This class will provide a detailed overview of key concepts in respiratory physiology. Attention will be given to aspects of integrated physiology, as well as cellular and molecular concepts. Particular reference will be given to pulmonary diseases. Students will be expected to make presentations based on appropriate literature. Specific topics to be covered include: mechanics of breathing; gas exchange; gas transport; ventilation-perfusion ratios; pulmonary function testing; blood flow and metabolism; airway epithelial cells and transepithelial transport; mechanisms of airways host defence; control of ventilation; respiratory system under stress; cardiopulmonary response to aerobic exercise. Director: E.A. Cowley

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

COREQUISITE: PHYL 2032.03

PHYL 4680 Cardiovascular Physiology

CREDIT HOURS: 3

This course provides an overview of key principles of cardiovascular physiology. Topics include cardiac anatomy/ultrastructure, cardiac pump-function, cardiac electrophysiology, excitation-contraction coupling, cardiac mechanics, cardiac energy metabolism and regulation of the vasculature. Cardiac diseases will be addressed.

Director: R. Rose

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: One of PHYL 3320 or PHYL 3520 or permission of the course director

EXCLUSIONS: PHYL 4326

Introduction

Dalhousie's Faculty of Science is the primary centre in the region for science education and research. The principal mission of the Faculty is the discovery, organization, dissemination and preservation of knowledge and understanding of the natural world. The Faculty is dedicated to excellence in the pursuit of this mission. Students in the Faculty of Science develop a capacity for inquiry, logical thinking and analysis; cultivate an ability to communicate with precision and style; and acquire skills and attitudes for lifelong learning.

We offer students the opportunity to pursue undergraduate degrees in 15 different Science programs, including disciplines in the life sciences, physical sciences, and mathematical or economic sciences. In addition, students may combine studies across science disciplines, or with subject areas from other faculties, including the Faculty of Arts & Social Sciences, the Faculty of Computer Science or the College of Sustainability. Other opportunities include the Co-op Education in Science option, where paid work terms are integrated into academic programs, opportunities to participate in research projects led by internationally renowned scientists, and the chance to work toward Certificates that recognize particular skill sets or training obtained as part of a science undergraduate education.

Details concerning particular programs of study are found in the departmental and program entries.

Departments and Programs of the Faculty of Science

The Faculty of Science offers 15 undergraduate programs:

- Biochemistry and Molecular Biology * °
- Biology °
- Chemistry °
- Earth Sciences °
- Economics °
- Environmental Science °
- Marine Biology °
- Mathematics
- Medical Sciences **
- Microbiology and Immunology *°
- Neuroscience
- Ocean Sciences
- Physics °
- Psychology
- Statistics

* Departments belong to the Faculty of Medicine

** Offered in cooperation with the Faculty of Medicine

° Co-operative Education option available

Co-operative Education in Science

The Co-op Program allows students to alternate three, career-focused work terms with study terms and receive a co-op degree designation upon graduation. Co-op enables students to apply what they learn in class to real-world work situations and then apply what they learn at work to their classroom studies, thereby enriching their learning. It also helps students to learn more about their career options by test-driving different work environments before they graduate.

Co-op is available to students in many of our BSc (120 credit hour) Honours or Major programs. Interested students normally apply to join Co-op at the end of their first year of study.

Further details are available from departmental Co-op Academic Advisors and from [S.I.T.E.](#)

Certificates

Certificates in Science

Certificates are one way that the Faculty of Science recognizes graduating students who have achieved a level of proficiency or specialization in a particular area or subject. Certificates are awarded upon graduation from a degree program and will be recorded on the student's academic transcript.

Certificates vary in their goals and requirements. Many have a research or practicum component. Some are interdisciplinary, requiring work in more than one department, while others focus on a specialization within a single program. Some Certificates are designed for students enrolled in particular programs, while others are broadly applicable to students in any science program.

In Certificate programs, students enrol by applying to the Certificate Coordinator. Interested students are advised to enrol early in their programs of study, but enrolment is usually also permitted in the final year of study, provided requirements have been met. To be awarded a Certificate, students must notify the Coordinator of their intention to graduate, and provide evidence of completion of all Certificate requirements, prior to the end of the examination period of their final year. Some Certificate programs may require earlier notification; please check with your Coordinator.

Faculty of Science students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

The following Certificates are offered by the Faculty of Science. Students enrolled in one of the programs listed beside the Certificate are most likely to be able to meet the Certificate requirements within their programs. Specific Certificate requirements are described below.

- Certificate in Actuarial and Financial Mathematics (Mathematics, Statistics)
- Certificate in Animal Behaviour (Biology, Psychology)
- Certificate in Applied and Computational Mathematics (Mathematics, Statistics)
- Certificate in Environmental Impact Assessment (Biology, Environmental Science)
- Certificate in Genetics (Biochemistry & Molecular Biology, Biology, Microbiology & Immunology)
- Certificate in Geographic Information Science (Biology, Earth Sciences, Environmental Science)
- Certificates for Geoscientists: Geology, Environmental Geoscience (Earth Sciences)
- Certificate in Information Technology (Earth Sciences, Physics)
- Certificate in Materials Science (Chemistry, Physics, Earth Sciences)
- Certificate in Medicinal Chemistry (Chemistry)
- Certificate in Science Leadership and Communication (any 4-year Faculty of Science program)

Certificate in Actuarial and Financial Mathematics

Offered by: Mathematics & Statistics

Coordinator: Dr. Toby Kenney (tkenney@mathstat.dal.ca) (Mathematics and Statistics)

This program provides many of the learning objectives and fundamental mathematical and statistical skills required to complete the classes (and examinations) of the Society of Actuaries accreditation program. Students who are interested in a career in actuarial science should consult the Basic Education Catalogue on the Society of Actuaries web page (www.soa.org) or the Syllabus of Basic Education on the Casualty Actuaries website (www.casact.org). This program also prepares students for employment in general financial institutions where modeling, quantitative risk analysis, management of investment instruments, asset and liability management, life contingencies and insurance assessment, and other complex financial calculations are required. You must register your intent to complete the requirements with the Certificate Coordinator before graduation.

Certificate Requirements:

1. Completion of a 120 credit hour Major or Honours program in Mathematics and/or Statistics
2. Completion of the following mathematics courses:

MATH 1000, MATH 1010, MATH 2001, MATH 2002, MATH 2030, MATH 2600

Completion of the following statistics courses:
STAT 2060, STAT 2080, STAT 3340 and STAT 3360

Completion of either:
Financial Option: MATH 2102, MATH 3300, and MATH 3900

OR

Actuarial Option: STAT 3703, STAT 3720, and STAT 4390

Certificate in Animal Behaviour

Offered by: Biology, Psychology and Neuroscience

Coordinator: Dr. Cindy Staicer cindy.staicer@dal.ca

The Certificate in Animal Behaviour provides students with an opportunity to specialize in Animal Behaviour through a set of courses and a research project. Students enroll in the Certificate during their third or fourth year of studies when they obtain approval of their research topic from the Certificate Coordinator. It is the responsibility of the student to complete the courses specified, and to provide the Certificate Coordinator with confirmation that the necessary courses have been taken, by mid-April of their graduating year.

Certificate requirements:

1. A minimum grade of a B- is required in four mandatory courses:

- PSYO 2160.03/NESC 2160.03
- PSYO 2501.03 or STAT 2080.03
- BIOL 3062.03 or PSYO 3162.03/NESC 3162.03
- BIOL 3630.03 or NESC 3161.03/PSYO 3161.03

2. A grade of B- in 12 credit hours of courses chosen from the following list. Six credit hours must be at the 3000/4000 level.

2000 level

- ANSC 2003.03 Companion Animal Behaviour
- PSYO 2140.03/NESC 2140.03 Learning
- PSYO 2470.03/NESC 2470.03 Systems Neuroscience

3000 level

- BIOL 3327.03: Entomology
- BIOL 3622.03: Ornithology
- BIOL 3067.03: Ecology and Evolution of Fishes
- BIOL 3626.03: Field Studies of Marine Mammals
- BIOL 3632.03: Applied Field Methods in Fish Ecology
- PSYO 3000.06/NESC 3000.06: Independent Research in Modern Psychology (Animal Behaviour topic)
- PSYO 3001.03/NESC 3001.03: Directed Research Project in Psychology (Animal Behaviour topic)
- PSYO 3043.03/NESC 3043.03: Neurobiology and Learning
- PSYO 3044.03/NESC 3044.03: Laboratory Methods of Learning and Conditioning
- PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour
- PSYO 3165.03/NESC 3165.03: Neuroethology
- PSYO 3170.03/NESC 3170.03: Hormones and Behaviour
- PSYO 3180.03/NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- PSYO 3670.03/NESC 3670.03: Genes, Brain and Behaviour

4000 level

- PSYO 4160.03/NESC 4160.03: Topics in Behavioural Biology
- BIOL 4060.03: Marine Mammalogy
- BIOL 4323.03: Biologging in Ecology
- BIOL 4800.06: Special Topics (Animal Behaviour topic)
- BIOL 4806.03, BIOL 4807.03: Special Topics (Animal Behaviour topic)

3. A grade of B- in 3 credit hours or more of independent research in Animal Behaviour.

Students must obtain approval of their research topic from a Certificate Coordinator prior to the start of the research course. Animal behaviour research projects may be completed through one or more of PSYO 3000.06/NESC 3000.06, PSYO 3001.03/NESC 3001.03, PSYO 4500.06/NESC 4500.06, BIOL 4800.06, BIOL 4806.03, BIOL 4807.03, or BIOL 4900.06.

Honours students may fulfill this requirement by conducting their honours thesis research on a topic in Animal Behaviour. Students are encouraged to further develop their study design and analysis skills by taking additional courses such as BIOL 4061.03 (Design of Biological Experiments) or BIOL 4062.03 (Analysis of Biological Data).

The Certificate Coordinator will enroll students in the Certificate program at the same time they seek approval of their research topics.

Please note: Students must inform the Certificate Coordinator when they are planning to graduate in order to receive their Certificate.

Certificate in Applied and Computational Mathematics

Offered by: Mathematics & Statistics

Coordinator: Dr. P. Selinger selinger@mathstat.dal.ca

This program is concerned with the development of the core mathematical and computational skills required in science, government and industry. Areas of application include everything from mathematical modeling to operations research to cryptography to software development. Students who intend to fulfil the requirements should contact the Certificate Coordinator prior to graduation.

Certificate Requirements:

1. Completion of the 120 credit hour Major or Honours program in Mathematics or an equivalent program
2. Completion of the following mathematics courses: MATH 1000, MATH 1010, MATH 2001, MATH 2002, MATH 2030, MATH 2040, MATH 2112/CSCI 2112, MATH 2120
3. Completion of at least four of: MATH 3120, MATH 3210, MATH 3260, MATH 3300, MATH 3330, MATH 3400
4. Completion of at least two of: MATH 4116, MATH 4220, MATH 4230, MATH 4250, MATH 4320

Additional recommended courses: MATH 2300, STAT 2060, STAT 2080

Certificate in Environmental Impact Assessment

Offered by: Biology, Environmental Science, Marine Biology

Coordinator: Dr. Pat Lane patricia.lane@dal.ca

The Certificate in Environmental Impact Assessment is for Faculty of Science students interested in, or majoring in environmental areas, who wish to pursue additional training in EIA. This certificate is also available for students in International Development Studies (IDS) in the Faculty of Arts and Social Sciences, Faculty of Management, and the College of Sustainability. Students must have a minimum grade of B for all courses counted toward the certificate.

The Certificate requires a total of 24 credit hours as follows:

1. Required EIA course: BIOL 4001.03/ENVS 4001.03 (3 credit hours) to be taken in fourth year. Note: transfer or online courses are not acceptable substitutes for this requirement.
2. Introductory Science or IDS course (min 3 credit hours) from Table 1
3. Environmental courses with theoretical content from Table 2 (minimum 9 credit hours)
4. Methods courses with field, laboratory, statistical, or modelling experience from Table 3 (minimum 3 credit hours)
5. Supplementary courses in Major or Related Disciplines from Table 4 (minimum 6 credit hours)

Certificate Requirements:

Table 1. Introductory Courses (minimum of 3 credit hours from the following list)

- BIOL 2060.03 Introductory Ecology
- EARTH 2410.03 Environmental Issues in Earth Science
- ENVS 1000X/Y.06 Introduction to Environmental Science
- GEOG 2100 X/Y.06 Environment and Culture (SOSA 2100.06)
- INTD 2001.03 Introduction to Development 1 (GEOG 2201.03)
- INTD 2002.03 Introduction to Development 2 (GEOG 2202.03)
- OCEA 2000X/Y.06 (or OCEA 2001.03 + OCEA 2002.03) The Blue Planet
- SUST 2000.06 Humanity in the Natural World
- SUST 2001.06 Environment, Sustainability and Governance: A Global Perspective

Table 2. Theory-Based courses (minimum of 9 credit hours from the following list)

- BIOL 3060.03 Environmental Ecology
- BIOL 3061.03 Communities and Ecosystems
- BIOL 3062.03 Behavioural Ecology
- BIOL 3063.03/MARI 3063.03 Resource Ecology
- BIOL 3065.03 Conservation Biology
- BIOL 3069.03 Population Ecology
- BIOL 3601.03 Nature Conservation
- EARTH 3400.03 Fundamentals of Hydrogeology
- EARTH 4440.03 Geomorphology and Landscape Evolution
- ENVS 3200.03 Introduction to Environmental Law
- ENVS 3501.03 Environmental Problem Solving I
- ENVS 3061.03/ERTH 3601.03 Global Biogeochemical Cycles
- GEOG 3440.03/ERTH 3440.03 Geomorphology
- INTD 3114.03/GEOG 3114.03 Environment and Development
- MARI 3067.03/BIOL 3067.03 Ecology and Evolution of Fishes
- MARI 3761.03/BIOL 3761.03 Marine Ecology
- MGMT 3702.03 Resource and Environmental Problem Solving 2: Sustainable Industries
- OCEA 3001.03 Introduction to Physical Oceanography
- OCEA 3002.03 Introduction to Chemical Oceanography
- PLAN 3010.03 Urban Ecology
- SOSA 2260.03 Society, Politics and Culture
- SOSA 3060.03 Social Change and Development
- SUST 3000.03 Global Approaches to Environmental Decision-Making

Table 3. Field and Methods-based Courses (minimum of 3 credit hours from the following list)

- BIOL 2601.03 The Flora of Nova Scotia
- BIOL 3003.03/MARI 3003.03 Dynamics of Biological Oceanography
- BIOL 3066.03 Plant Ecology
- BIOL 3221.03/MARI 3221.03 Diversity of Algae
- BIOL 3301.03/MARI 3301.03 Invertebrate Biology
- BIOL 3327.03 Entomology
- BIOL 3615.03/ENVS 3615.03 Methods in Ecology
- BIOL 3620.03 Field Survey of Terrestrial Biodiversity
- BIOL 3622.03 Ornithology
- BIOL 3623.03/ENVS 3623.03/MARI 3623.03 Applied Coastal Ecology
- BIOL 3624.03/ENVS 3624.03 Urban Freshwater Systems
- BIOL 3626.03/MARI 3626.03 Field Studies of Marine Mammals
- BIOL 3630.03 Field Methods in Animal Behaviour
- BIOL 3632.03/ENVS 3632.03/MARI 3632.03 Applied Field Methods in Fish Ecology
- BIOL 3633.03/ENVS 3633.03/GEOG 3633.03 Spatial Information and GIS in Ecology
- BIOL 3634.03 Agroforestry
- BIOL 3664.03/ENVS 3664.03/MARI 3664.03 Intertidal Ecology and Diversity
- BIOL 3665.03 Food Web Assembly and Modeling
- BIOL 3666.03 Species Invasions
- BIOL 3680.03/MARI 3680.03 Scientific Diving Methods for Marine Ecology
- BIOL 3762.03 Terrestrial Ecology

- BIOL 4061.03 Design of Biological Experiments
- BIOL 4062.03 Analysis of Biological Data
- BIOL 4323.03/MARI 4323.03 Biologging in Ecology
- EARTH 3402.03 Practical Hydrogeology
- EARTH 3500.03/ENVS 3500.03/GEOG 3500.03 Geoscience Information Management
- EARTH 4520.03/GEOG 4520.03 GIS Applications to Environmental and Geological Sciences
- EARTH 4530.03/GEOG 4530.03 Environmental Remote Sensing
- ENVS 2000.03 Urban Field School
- ENVS 2100.03 Environmental Informatics
- ENVS 3001.03 Environmental Science Field School
- ENVS 3300.03 Contaminated Site Management
- INTD 3002.03 Development Practice
- INTD 3103.03 Participatory Development: Methods and Practice
- MGMT 3701.03 Resource and Environmental Problem Solving 1: Sustainable Ecosystems
- OCEA 4220.03 Numerical Modelling of Atmospheres and Oceans
- OCEA 4380.03 Marine Modelling
- STAT 3345.03 Environmental Risk Assessment
- SUST 3502.03/ENVS 3502.03 The Campus as a Living Laboratory

Table 4. Higher-level Supplementary Courses (minimum of 6 credit hours from the following list)

- BIOL 4060.03/MARI 4060.03 Marine Mammalogy
- BIOL 4065.03 Sustainability and Global Change
- BIOL 4160.03 Political Ecology
- EARTH 4450.03/GEOG 4450.03 Introduction to Landscape Simulation
- ENVS 3301.03 Enterprise Sustainability
- ENVS 3400.03/GEOG 3400.03 Human Health and Environment
- ENVS 4002.03/BIOL 4002.03 The Science of Wetland Ecosystems
- ENVS 4003.03/MARI 4003.03 Coral Reefs and Environmental Change
- ENVS 4210.03 Administration Environmental Law
- INTD 4013.03 Environmental Conflict and Security
- MGMT 4009.03 Coastal Zone Management
- MGMT 4021.03 Fisheries Management
- MGMT 4031.03 Economics for Resource & Environmental Management
- MGMT 4205.03 Law and Policy for Resource & Environmental Management
- OCEA 4110.03/ERTH 4110.03 Geological Oceanography
- OCEA 4120.03 Physical Oceanography
- OCEA 4130.03 Chemical Oceanography
- OCEA 4140.03 Biological Oceanography (BIOL 4661.03/MARI 4661.03)
- OCEA 4160.03 Fisheries Oceanography (BIOL 4369.03/MARI 4369.03)
- OCEA 4222.03 Estuary, Coast and Shelf Dynamics
- OCEA 4230.03 Biology of Phytoplankton (BIOL 4662.03/MARI 4662.03)
- OCEA 4330.03 Benthic Ecology (BIOL 4666.03/MARI 4666.03)
- OCEA 4335.03/BIOL 4335.03/MARI 4335.03 Environmental Impacts in Marine Ecosystems
- SUST 4000.06 ESS Capstone

Certificate in Genetics

Offered by: Biochemistry & Molecular Biology, Biology, Microbiology & Immunology

Coordinator: Dr. Melanie Dobson melanie.dobson@dal.ca (Biochemistry & Molecular Biology), Elizabeth Welsh ewelsh@dal.ca (Biology), Dr. Lois Murray lois.murray@dal.ca (Microbiology & Immunology)

The Certificate in Genetics provides students with an opportunity to complete a set of courses and research that will accord them recognition of specialization in genetics. Students should enrol in the Certificate in Genetics in their third year of studies when they are seeking approval of the research component by a Genetics Certificate Coordinator.

Note: It is the responsibility of students to complete the required courses, and to provide the Certificate Coordinator with confirmation that the necessary courses have been taken by the end of the examination period in their final year of study.

Certificate requirements:

1. A minimum grade of a B- in four mandatory courses:

- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

2. A minimum grade of B- in 12 credit hours of elective courses chosen from the following list. At least 6 credit hours must be at the 4000 level.

2000 level

- BIOL 2040.03: Evolution

3000 level

- BIOL 3036.03: Transgenic Organisms
- BIOL 3042.03/MARI 3042.03: Molecular Ecology
- BIOL 3044.03: Ecological Genetics
- BIOL 3046.03: Molecular Evolution
- BIOL 3102.03: Microbial Eukaryotes: Biodiversity and Evolution
- MICI 3114.03: Virology
- MICI 3119.03: Physiology of the Prokaryotic Cell
- NESC 3670.03/PSYO 3670.03: Genes, Brain and Behaviour

4000 level

- BIOC 4010.03: Bioinformatics
- BIOC 4027.03/MICI 4027.03: Molecular Mechanisms of Cancer
- MICI 4033.03: Advanced Microbial Genetics
- MICI 4114.03: Advanced Topics in Molecular and Medical Virology
- BIOC 4403.03: Genes and Genomes
- BIOC 4404.03: Gene Expression
- BIOC 4501.03: Medical Biotechnology
- BIOC 4835.03/BIOL 4035.03: Human Genetics

3. Other required courses (prerequisites for BIOC 3400.03)

- CHEM 2441.03, or CHEM 2401.03 and CHEM 2402.03

4. A minimum grade of B- in 3 credit hours or more of independent research in one of the research courses listed below. Research must be on a topic involving microbial, molecular, transmission or population genetics, and must be pre-approved by Certificate Coordinator prior to start of the course.

- BIOC 4001.03
- BIOC 4604.03 and BIOC 4605.03
- BIOL 4806.03/MARI 4806.03
- BIOL 4807.03/MARI 4807.03
- BIOL 4900.06/MARI 4900.06
- BIOL 4901.03/MARI 4901.03 and BIOL 4902.03/MARI 4902.03
- MICI 4700X/Y.06
- MICI 4701.03
- MICI 4702.03
- MICI 4900X/Y.06
- MICI 4901.03 and MICI 4902.03

Certificate in Geographic Information Science (GIS)

Offered by: Earth Sciences, Environmental Sciences, Biology

Coordinator: C. C. Walls ccwalls@dal.ca (Earth Sciences), Dr. C. Staicer cindy.staicer@dal.ca (Biology), Dr. D. Rainham daniel.rainham@dal.ca (Environmental Sciences)

The GIS Certificate program provides training and experience in geographic information science as part of an undergraduate degree program, usually in Earth Sciences, Environmental Science or Biology, and prepares students for further study or employment in the area. The Certificate requires the completion of GIS-related courses and a pre-approved research project that involves work with geographic information systems and geomatics. Students enrol in the GIS Certificate by contacting the Certificate Coordinator. Students may enrol in their second, third or fourth year of study, but early enrolment is advised.

Certificate Requirements:

1. A minimum grade of B- in each of the following courses:

- ENVS 3500.03/ERTH 3500.03/GEOG 3500.03: Geoscience Information Management
- ERTH 4520.03/GEOG 4520.03: GIS Applications to Environmental and Geological Science

2. A minimum grade of B- in a minimum of two of the following courses:

- GEOG 2000.03: Cartography
- GEOG 2006.03: Space, Place and GIS
- BIOL 3633.03/ENVS 3633.03/GEOG 3633.03: Spatial Information and GIS in Ecology
- ERTH 4530.03/GEOG 4530.03: Environmental Remote Sensing
- ENVS 2100.03: Environmental Informatics
- ENVS 3400.03/GEOG 3400.03: Environment and Human Health
- SUST 3000.03: Environmental Decision Making

3. Completion of a research project with an emphasis in geomatics or geographic information science via one of the following sets of courses (minimum grade of B-). Research topics must be pre-approved by the Certificate Coordinator

- BIOL 4900.06/MARI 4900.06 or BIOL 4901.03/MARI 4902.03: Honours Thesis
- BIOL 4806.03/MARI 4806.03 or BIOL 4807.03: Special Topics
- ENVS 3801.03: Directed Readings
- ENVS 4901.03/ENVS 4902.03: Honours Thesis
- ERTH 4100.06: Research Project
- ERTH 4200.06: Honours Thesis
- ERTH 4510.03 or ERTH 4511.03: Directed Studies
- SUST 4800.03: Independent Study
- SUST 4900.06: Honours Thesis

Research Project Guidelines for the Certificate in Geographic Information Science

Students should learn how to design, manage and complete a research project that emphasizes the use of a geographic information system (GIS). Students will identify a suitable research problem and work to solve it through acquiring, organizing, analyzing and presenting data using GIS. A substantive analytical component involving GIS must be included. Projects should be undertaken after all or most of the coursework is completed, i.e., students should already be familiar with GIS concepts and functions, and be proficient in the use of at least one GIS package. Supervision and evaluation of research projects must include input from a professor or GIS technician competent in geographic information science, methods and technologies.

Students enrolled in an undergraduate program other than Biology, Environmental Science, Earth Sciences or the College of Sustainability, may be able to complete the project through a directed readings or honours thesis course listed within their home department. The project must be pre-approved by a Certificate Coordinator.

Certificates in Geoscientists (Earth Sciences students only)

Offered by: Earth Sciences

Coordinator: Milton Graves milton.graves@dal.ca

The Certificates for Geoscientists provide comprehensive sequences of courses intended to prepare a student for the knowledge requirements for registration in the Geology or Environmental Geoscience stream of Professional Geoscience. See the Earth Sciences departmental entry for specific information on the recommended sequence of courses. It is strongly recommended that students discuss their course and program choices with an undergraduate advisor early in their studies. These certificates are restricted to students completing a 120 credit hour Major or Honours degree in Earth Sciences.

Certificate in Information Technology

Offered by: Earth Sciences, Physics

Coordinators: Dr. Laurent Kreplak kreplak@dal.ca (Earth Sciences), Milton Graves milton.graves@dal.ca (Earth Sciences)

The goal of this certificate is to recognize students who have completed courses with a substantial Information Technology (IT) component, and to provide these students with a document to present to potential employers who seek graduates with IT skills. Depending on the program of study, students may work with symbolic calculation packages such as MATLAB or MAPLE, statistical packages such as R or S-Plus, numerical computation or programming languages. Others develop proficiency in web design, or use of database, drawing (e.g., CAD) or GIS software. Experience with a variety of hardware and operating systems experience may further round out the set of skills.

The Certificate in IT is a discipline-based program available to students majoring in Physics or Earth Sciences.

Certificate Requirements (Physics):

- Completion of a 120 credit hour Major or Honours degree program in Physics
- One of PHYC 3050.03, PHYC 3250.03, PHYC 4250.03

Certificate Requirements (Earth Sciences):

- Completion of a 120 credit hour Major or Honours degree program in Earth Sciences
- Completion of the following courses with a minimum grade of B
- EARTH 2001.03
- EARTH 2270.03 or EARTH 3400.03
- EARTH 3000.03
- EARTH 3500.03
- EARTH 4200.03 or EARTH 4100.03
- EARTH 4520.03 or EARTH 4530.03 or EARTH 4450.03
- CSCI 1100.03
- MATH 2300.03 or MATH 2400.03

Certificate in Materials Science

Offered by: Chemistry, Physics and Earth Sciences

Coordinator: Dr. May Ann White mawhite@dal.ca (Chemistry)

The purpose of a Certificate in Materials Science is to show that the graduate has appropriate training in the breadth and depth of materials science within their 120 credit hour Honours or Major program. It is particularly suited for students in Chemistry, Earth Sciences and Physics programs. Students enrol by contacting the Certificate Coordinator. Students may enrol in the second, third or fourth year of their programs, but early enrolment is advised.

Certificate Requirements

1. At least four of the following courses, with a minimum grade of B- in each:

- CHEM 3305.03/PHYC 3303 (or CHEM 3303.03): Materials Science
- CHEM 4502.03: Polymer Science
- CHEM 4311.03: Fundamental and Applied Electrochemistry
- EARTH 2001.03: Earth Materials Science I
- EARTH 2002.03: Earth Materials Science II
- PHYC 3900.03: Introduction to Soft Condensed Matter Physics
- PHYC 4230.03: Introduction to Condensed Matter
- BIOE 4391.03: Polymeric Biomaterials
- BMNG 5110.03: Biocompatibility and Biomaterials Design
- MATL 3500.03: Materials Engineering
- MATL 3510.03: Extraction of Materials
- MATL 3601.03: Structure of Materials
- MATL 3611.03: Corrosion and Degradation of Materials
- MATL 3612.03: Thermodynamics of Materials

- MATL 3620.03: Introduction to Physical Metallurgy
- MATL 3621.03: Mechanical Behaviour of Materials
- MATL 4703.03: Non-Metallic Materials
- MATL 4722.03: Ferrous Alloys and Joining of Materials
- MATL 4805.03: Electrochemical Processing of Materials
- MATL 4806.03: Particulates in Materials Engineering
- MATL 4815.03: Kinetics of Materials Processing
- MATL 4823.03: Non-ferrous Alloys
- MATL 4824.03: Industrial Metallurgy
- MATL 4825.03: Solidification and Casting

2. Students must complete a research project with a materials emphasis (pre-approved by the Certificate Coordinator) via one of the following sets of courses, with a minimum grade of B-:

- CHEM 4801.03 and CHEM 4802.03
- CHEM 4901.06
- EARTH 4200.06 OR EARTH 4100.06
- PHYC 4800.03 and PHYC 4850.03

Certificate in Medicinal Chemistry

Offered by: Chemistry

Coordinator: Dr. Alison Thompson alison.thompson@dal.ca (Chemistry)

The Department of Chemistry offers a Certificate in Medicinal Chemistry in conjunction with its Major and Honours programs. This certificate is intended to reflect that the student has completed a course of study in chemistry that is appropriate for employment or further study related to pharmaceutical development and production.

Certificate Requirements:

- Completion of a 120 credit hour program in Chemistry (Honours, Combined Honours, Major, Double Major)
- CHEM 2101.03, CHEM 2201.03, CHEM 2301.03, CHEM 2304.03, CHEM 2401.03, CHEM 2402.03
- CHEM 3201.03, CHEM 3401.03, CHEM 3404.03, CHEM 3601.03
- CHEM 4401.03, CHEM 4601.03
- Any two of: CHEM 3301.03, CHEM 4205.03, CHEM 4206.03, CHEM 4301.03, CHEM 4402.03

Recommended Electives: BIOC 2300, BIOC 2610, BIOC 3200, BIOC 4701

To be awarded the Certificate in Medicinal Chemistry, students should contact the Certificate Coordinator no later than four weeks after the start of the term in which they intend to graduate, and indicate that they wish to have their qualifications for the certificate assessed.

Certificate in Science Leadership and Communication

Offered by: Faculty of Science

Coordinator: Dr. Anne Marie Ryan amryan@dal.ca (Earth Sciences), Dr. Allison Schmidt allison.schmidt@dal.ca (Biology)

The focus of the Certificate in Science Leadership and Communication is to develop leadership and communication skills specifically in and through the sciences, and to enable Dalhousie Science graduates to better understand the nature of science, the process of change, and to have the skills to communicate and to lead others effectively. The Certificate is available to any student in the Faculty of Science. To enrol, students should contact a Certificate Coordinator.

Certificate Requirements

Students are required to complete the following six components:

1. Leadership: Core course

- SCIE 444.03/BIOL 4444.03 Leadership in Science

2. Communicating Science

One of the following two courses with a practicum component

- SCIE 3111.03 Communicating Science
- PSYO 3010.06 Advanced General Psychology

3. Ethics in Science

One of the following courses in ethics

- PHIL 2680.03 Ethics in Science (credit is not given for PHIL 2680 and 1050)
- PHIL 1050.03 Ethics in Science

4. Understanding the nature of science

One of the following courses

- HSTC 2400.03 Science and the Media
- HSTC 2000.06 Introduction to the History of Science
- HSTC 2204.03 The Darwinian Revolution
- HSTC 2205.03 Totalitarianism and Science
- HSTC 2206.03 Biopolitics: Human Nature in Contemporary Thought
- HSTC 3201.03 Science and Religion: Contemporary Perspectives
- HSTC 3212.03 The Biosphere: Global Perspectives in Science and Philosophy
- HSTC 3411.03 Feminism and Science
- HSTC 4301.03 History of Neuroscience
- HSTC 1801.03 Technology and Engineering: From Industrial Age to Cybernetic Age
- HSTC 4000.06 Science and Nature in the Modern Period
- BIOL 3580.03/PHIL 3580.03 Philosophy of Biology
- PHIL 2660.03 Understanding Scientific Reasoning
- PHIL 2480.03 Environmental Ethics
- ECON 3360.03 Ethics, Justice and Economics

5. Discipline-specific courses: situating your discipline

One of the following courses:

- BIOL 3601.03 Nature Conservation
- BIOL 3065.03 Conservation Biology
- ECON 2850.03/PHYC 2850.03 Science and Economics of Climate Change
- ENVS 3501.03 Environmental Problem-solving I
- EARTH 3500.03 Geoscience Information Management
- EARTH 4000.03 Advanced Field School
- BIOL 4664.03/MARI 4664.03* History of Marine Sciences
- NESC 2007.03 Neuroscience Principles and Methods
- PSYO 2000.03 Methods in Experimental Psychology
- PSYO 3581.03 History of Psychology I
- PSYO 3582.03 History of Psychology II
- BIOC 4510.03 Medical Biotechnology I

* Cross-listed as OCEA 4331.03, HIST 3073.03, HSTC 3331.03, SCIE 4000.03

6. Portfolio of leadership development

The portfolio is a record that can be shared with future employers, and built upon into the future. It will document, at a minimum:

- The activities undertaken in each of the above 5 components of the certificate
- Reflections on how each component fits into leadership and communication development in their discipline of study
- Reflection on the practicum components
- Record of any additional leadership aspects of employment or science-related volunteer activities

Further information is available at <http://www.dal.ca/faculty/science/programs/diploma---certificate-programs/scienceleadership.html>.

Biochemistry and Molecular Biology

Email Address: advisor@webmail.biochem.dal.ca

Introduction

Biochemistry is the study of biological function at the molecular level. Although biochemical processes follow the basic laws of physics and chemistry, living organisms, because of their complexity, operate on a set of distinct principles that are not found in simple isolated chemical systems. The goal of biochemistry is to elucidate these principles. The department offers an integrated series of courses that will provide students with an up-to-date view of modern biochemistry and molecular biology ranging from evolution of genomes to structure-function relationships in macromolecules to the dynamic aspects of metabolism. The core programs can be adapted to emphasize different biochemical specialties such as structural biology, metabolism, molecular biology and cell signaling. Students wishing to pursue advanced studies in related sciences can include courses in Physiology, Pharmacology and/or Pathology in their programs. Greater flexibility is available in combined degree programs of Biochemistry and Molecular Biology with another subject; most often with Chemistry, Microbiology, Biology, Neuroscience, Psychology or Environment, Sustainability and Society. Specific programs developed with the Department of Microbiology and Immunology provide coordinated studies of metabolism, enzymology and molecular biology with bacteriology, virology and immunology. These programs provide the foundation for molecular genetics, genetic engineering, biotechnology, biomedical research and medicine.

Laboratory Exercises: Some of the courses offered by the Department of Biochemistry and Molecular Biology include a laboratory component. The laboratory exercises provide an opportunity to develop laboratory skills, as well as to illustrate the theoretical principles taught in course. This process culminates in fourth year, with a supervised research project required for Honours Biochemistry and Molecular Biology students. Although no exercise involves live animals, experiments may use materials derived from animal sources, as well as from plants and micro-organisms. Laboratory experiments will often be performed in groups, but writing of reports is expected to be an individual effort, meeting the guidelines on plagiarism set out in the University Regulations in the Calendar and the Department Policy on Plagiarism.

Degree Programs

The Department offers the following degree programs in Biochemistry and Molecular Biology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- Minor in Biochemistry and Molecular Biology

* BSc Co-op option available (see below)

* May be combined with Minors from other disciplines

Departmental Requirements for each degree program can be seen by following the links in the menu to the right and in the Undergraduate Handbook, available on the departmental website biochem.dal.ca/programs/undergraduate/. In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully. It is recommended that students considering an Honours or Major program consult with a Biochemistry and Molecular Biology Academic Advisor prior to registering for second year classes.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Biochemistry and Molecular Biology program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1540.27
- SCIE 1505.18

Staff

Dean

Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Head of Department

Bearne, S. L.

Program Advisors

Archibald, J., Graduate Coordinator

Professors Emeriti

Doolittle, W. F., AB (Harv), PhD (Stan)

Helleiner, C. W., BA, PhD (Toronto)

Gray, M. W., BSc, PhD (Alta)

Professors

Archibald, J. M., BSc, PhD (Dalhousie)

Bearne, S. L., BSc (Acadia), PhD (Toronto), MD CM (McGill) - cross appointment in Chemistry

Byers, D. M., BSc, MSc (Dalhousie), PhD (Alta) - cross appointment in Pediatrics

Dobson, M. J., BSc (Dalhousie), DPhil (Oxon)

Doolittle, W. F., AB (Harv), PhD (Stan) - Post-Retirement

Duncan, R., BSc (Guelph), MSc (Queen's), PhD (Guelph) - major appointment in Microbiology and Immunology

Gray, M. W., BSc, PhD (Alta) - Post-Retirement

Liu, P. X. -Q., BSc (Wuhan), PhD (Cornell)

McLeod, R., BSc, PhD (UBC)

McMaster, C. R., BSc, PhD (Man) - major appointment in Pharmacology

Ridgway, N. D., BSc, MSc (Dalhousie), PhD (UBC) - joint appointment with Pediatrics

Ro, H. -S., BSc, PhD (McMaster)

Roger, A. J., BSc (UBC), PhD (Dalhousie)

Rosen, K. V., BSc, MSc, PhD (Moscow) - joint appointment with Pediatrics

Singer, R. A., AB (Princeton), PhD (Harv) - cross appointment in Medicine

Too, C. K. L., BSc, MSc (Malaya), PhD (Hawaii)

Waisman, D. M., BSc (Brandon), PhD (Manitoba) - joint appointment in Pathology

Wallace, C. J. A., BA, MA, DPhil (Oxon)

Associate Professors

Blouin, C., BSc, (Laval), PhD (Dalhousie) - joint appointment with Computer Science

Dellaire, G., BSc (UBC), PhD (McGill) - major appointment in Pathology

Karten, B., MSc (Hamburg), PhD (Karl-Franzens, Austria)

Marignani, P., BSc (Windsor), MSc (Western), PhD (McMaster), EMBA (Western) - cross appointment in Pathology

Rainey, J. K., BSc (Guelph), MSc, PhD (Toronto) - cross appointment in Chemistry

Assistant Professors

Kienesberger, P., MSc, PhD (Graz, Austria)

Pulinilkunnil, T., MSc (India), PhD (UBC)

Slamovits, C., BSc, PhD (Buenos Aires, Argentina)

Van der Spoel, A. C., MSc (Erasmus, The Netherlands), PhD (Utrecht, The Netherlands) - major appointment in Pediatrics

Senior Instructor

Briggs, P., BSc (Acadia), BEd (Dalhousie), MEd (MSVU)

Instructor

Ewart, K. V., BSc (Moncton), PhD (Memorial)

BSc (120 credit hour) Concentrated Honours in Biochemistry and Molecular Biology

Students who want a challenging program that results in a broad and in-depth background in Biochemistry and Molecular Biology, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Biochemistry and Molecular Biology subject courses, with a minimum GPA of 3.0, and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of BIOC 4604.03/BIOC 4605.03. Because Biochemistry and Chemistry are closely interwoven both conceptually and experimentally, the list of required courses includes both subjects. Additional chemistry courses beyond those required for the honours degree may be taken as electives.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Biochemistry and Molecular Biology. See Co-operative Education Program.

Admission to Honours

Students who wish to enrol in a Biochemistry and Molecular Biology Honours program should apply for admission after their second year Fall term grades are in. To be admitted, students must have

- Consulted with a Departmental Academic advisor
- Minimum grades of B- in BIOL 1010, BIOL 1011, CHEM 1011 and CHEM 1012 (or equivalents)

Departmental Requirements

In addition to fulfilling the requirements outlined in Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Concentrated Honours program in Biochemistry and Molecular Biology must complete the following courses:

1000 level

- BIOL 1010.03/BIOL 1011.03 OR BIOL 1020.03/BIOL 1021.03 (minimum grade of "B-")
- CHEM 1011.03/CHEM 1012.03 (minimum grade of "B-")
- MATH 1000.03 or MATH 1215.03
- MATH 1010.03 or STAT 1060.03

Or Integrated Science Program

2000 level

- BIOL 2020.03 and BIOL 2030.03
- BIOC 2300.03 AND BIOC 2610.03

- CHEM 2401.03 and CHEM 2402.03
- CHEM 2201.03

3000 level

- BIOC 3300.03
- BIOC 3400.03
- CHEM 3601.03 or one course in Biochemistry at or above the 3000 level
- BIOC 3700.03

4000 level

- BIOC 4604.03 and BIOC 4605.03 (Honours Thesis)
- Nine credit hours from BIOC 40XX, 43XX, 44XX, 45XX, 47XX
- Six additional credit hours in BIOC at the 4000 level

Other requirements:

A pass is required in the Honours Qualifying examination. Students should ensure that they enrol in any 2000 or 3000 level courses that are prerequisites for advanced courses they intend to take (see calendar entries).

BSc (120 credit hour) Combined Honours in Biochemistry and Molecular Biology and another subject

Students who wish to study Biochemistry and Molecular Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Biochemistry and Molecular Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Biochemistry and Molecular Biology, this requirement is satisfied through BIOC 4604.03/BIOC 4605.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Biochemistry and Molecular Biology as the primary subject. See Co-operative Education Program below.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Combined Honours program in Biochemistry and Molecular Biology and another subject must complete the following:

Biochemistry and Molecular Biology as the primary or secondary subject

1000 level

- 1000 level as for Concentrated Honours, except MATH 1000 AND MATH 1010 required if Chemistry is the other subject

2000 level

- BIOL 2020.03 and BIOL 2030.03
- CHEM 2401.03 and CHEM 2402.03
- BIOC 2300.03 and BIOC 2610.03

3000 level

- BIOC 3300.03
- BIOC 3400.03
- BIOC 3700.03

4000 level

- Six credit hours from BIOC 40XX, 43XX, 44XX, 45XX, 47XX
- BIOC 4604.03 and BIOC 4605.03 (if Honours thesis and qualifying exam are in Biochemistry)

Consult an Undergraduate advisor for recommended courses of study.

BSc (120 credit hour) Major in Biochemistry and Molecular Biology

The 120 credit hour Major is suited to students who want to focus on Biochemistry and Molecular Biology, but wish to have a program that is somewhat less constrained than the Honours program. Biochemistry and Molecular Biology Majors complete a minimum of 45 credit hours in program courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories, and through direct research and experiential classes. Although Dalhousie University does not require formal application for its 120 credit hour Major programs, this Department requires that all those registering with a view to completing such a degree must first consult with an undergraduate advisor from the Department of Biochemistry and Molecular Biology.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Biochemistry and Molecular Biology. See Co-operative Education Program.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Major program in Biochemistry and Molecular Biology must complete the following:

1000 level

- BIOL 1010.03/BIOL 1011.03 or BIOL 1020.03/BIOL 1021.03 (minimum grade of "B-")
- CHEM 1011.03/CHEM 1012.03 (minimum grade "B-")
- Six credit hours of mathematics

OR Integrated Science Program

2000 level

- BIOL 2020.03 and BIOL 2030.03
- BIOC 2300.03 and BIOC 2610.03
- CHEM 2401.03 and 2402.03
- CHEM 2201.03

3000 level

- BIOC 3300.03
- BIOC 3400.03
- BIOC 3700.03
- Three additional credit hours in BIOC courses at or above the 3000 level

4000 level

- 12 credit hours in BIOC at the 4000 level

BSc (120 credit hour) Double Major in Biochemistry and Molecular Biology and another subject

The Double Major degree program allows students to combine a study of Biochemistry and Molecular Biology with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Biochemistry and Molecular Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program seek advice from advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Biochemistry and Molecular Biology as the primary subject. See Co-operative Education Program.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Double Major program in Biochemistry and Molecular Biology and another subject must complete the following set of core courses:

1000 level

- BIOL 1010.03/BIOL 1011.03 OR BIOL 1020.03/BIOL 1021.03 (minimum grade of "B-")
- CHEM 1011.03/CHEM 1012.03 (minimum grade of "B-")
- Six credit hours of mathematics

Or Integrated Science Program

2000 level

- BIOL 2020.03 and BIOL 2030.03
- BIOC 2300.03 BIOC 2610.03
- CHEM 2401.03 and 2402.03

3000 level

- BIOC 3300.03
- BIOC 3400.03
- BIOC 3700.03

4000 level

- Six credit hours of BIOC courses at the 4000 level

The same set of core courses is required in a Double Major with Biochemistry and Molecular Biology as the primary or secondary subject.

Minor in Biochemistry and Molecular Biology

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

Requirements

- A minimum of 18 credit hours in Biochemistry (BIOC) courses at the 2000 level or higher to a maximum of 36 credit hours.

Please note that there are prerequisite requirements for entry into upper level Biochemistry (BIOC) courses. Some non-BIOC courses such as BIOL 2020.03, BIOL 2030.03, CHEM 2401.03 and CHEM 2402.03 are required for the Biochemistry and Molecular Biology degree programs. These non-BIOC courses cannot be counted as part of the 18 credits hours in BIOC required for a minor.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Biochemistry and Molecular Biology

Co-op Academic Advisor: Dr. D. Byers, Email: david.byers@dal.ca

Cooperative Education (Co-op) is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Biochemistry and Molecular Biology, or in Combined Honours or Double Major programs with Biochemistry and Molecular Biology as the primary subject. The number of students admitted into Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) in the Fall term of the year they join.

Details are available from the Biochemistry and Molecular Biology Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Biochemistry and Molecular Biology, please see the Departmental webpage www.dal.ca/academics/programs/undergraduate/bcmb/what_will_i_learn/coop_work_terms.html.

Minors available to students in Biochemistry and Molecular Biology

Minor programs allow students to develop subject specialities in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour programs (including Co-op).

Students in a BSc (120 credit hour) program in Biochemistry and Molecular Biology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Biochemistry and Molecular Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at Faculty of Science - Certificates. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a Major or Honours program in Biochemistry and Molecular Biology include:

- Certificate in Genetics
- Certificate in Medicinal Chemistry

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade

requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Notes

The Department also teaches students in Dentistry and Medicine; these courses are described in the appropriate sections of the Calendar.

Other Courses

The following courses given by other departments may be taken as a Biochemistry and Molecular Biology course toward BSc Biochemistry and Molecular Biology degrees. See course descriptions in relevant section of this calendar.

Chemistry - CHEM 3601.03, CHEM 4601.03

Microbiology - MICI 4033.03

Pharmacology - PHAC 3001.03, PHAC 4001.03

Note: CHEM 3601.03 and PHAC 3001.03 are considered to be BIOC 3000-level courses, and CHEM 4601.03, MICI 4033.03 and PHAC 4001.03 to be BIOC 4000-level courses when taken as part of Biochemistry and Molecular Biology Major and Honours degree programs. These courses, in addition to required non-BIOC 2000-level courses (BIOL 2020, BIOL 2030, CHEM 2401, CHEM 2402), can not be counted towards the 18 credit hours in BIOC required for a Minor in Biochemistry and Molecular Biology.

Course Descriptions

BIOC 1040X/Y Biological Chemistry and Metabolism for Students of Pharmacy

CREDIT HOURS: 6

The structures, significance, and metabolism of the main biologically important compounds are outlined in lectures, with some topics of particular interest studied further in the laboratory. Tutorials aim to develop students' ability to learn biochemistry on their own and in small groups.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 4

LAB HOURS PER WEEK: 3

COREQUISITE: CHEM 2442.03

RESTRICTIONS: This class is restricted to students in the BSc (Pharm) program.

BIOC 1420 Introductory Biochemistry for Nursing Students

CREDIT HOURS: 3

Topics discussed include the structure, biosynthesis and functions of biologically important compounds, enzymes, control of metabolism, genetic engineering and nutrition. Medical aspects are stressed.

NOTES: This course cannot be used as a prerequisite for any other biochemistry course and is not normally accepted by Faculties of Dentistry or Medicine in fulfilment of the requirement of a biochemistry course for admission.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

RESTRICTIONS: This class is restricted to students in the BScN and BHSc programs.

BIOC 2300 Introduction to Biochemistry

CREDIT HOURS: 3

This course surveys basic topics and concepts of Biochemistry. The structures, properties and metabolic inter-relations of proteins, carbohydrates and lipids are considered together with an introduction to nutrition and metabolic control. Although mammalian examples predominate some consideration of special aspects of biochemistry of microbes and plants is included.

NOTES: Students are advised to also take CHEM 2401.03 and CHEM 2402.03 COORDINATOR: D. Byers

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 1010.03 and 1011.03 (or equivalent), CHEM 1011.03 and 1012.03 (or equivalent), all with grades of B- or higher, or instructor's consent.
EXCLUSIONS: BIOC 2200.03

BIOC 2610 Introductory Biochemistry Lab

CREDIT HOURS: 3

An introduction to fundamental techniques in Biochemistry through the exploration of the properties of essential biomolecules. This course is intended for students in Biochemistry and Molecular Biology and Microbiology Programs.

FORMAT: Lab

LAB HOURS PER WEEK: 3

COREQUISITE: BIOC 2300.03 and CHEM 2401.03 and CHEM 2402.03 or instructor's consent

PREREQUISITE: BIOL 1010.03 and 1011.03 (or equivalent), CHEM 1011.03 and 1012.03 (or equivalent), all with grades of B- or higher, or instructor's consent.

EXCLUSIONS: BIOC 2200.03

BIOC 3300 Intermediary Metabolism

CREDIT HOURS: 3

This course covers synthesis and catabolism of carbohydrates, lipids and some nitrogen compounds. Metabolic regulation is emphasized, including factors influencing the rate at which compounds flow through selected pathways. Compartmentalization of, inter-relationships between and environmental impact on metabolic pathways are considered. Laboratory exercises examine the techniques used to study metabolic pathways. COORDINATOR: R. McLeod

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOC 2300.03 and BIOC 2610.03 (both with grades of B- or higher) and BIOL 2020.03 and BIOL 2030.03 and CHEM 2401.03 and CHEM 2402.03, or instructor's consent

BIOC 3400 Nucleic Acid Biochemistry and Molecular Biology

CREDIT HOURS: 3

This course focuses on the relationship of structure to function in RNA and DNA. Methods for studying the primary, secondary, and tertiary structures of nucleic acids are explored in lectures and in the laboratory. Topics covered include enzymic mechanisms for biosynthesis, rearrangement, degradation, and repair of nucleic acid molecules, and processes of replication, transcription, and translation. Nucleic acid biochemistry is emphasized as a basis for understanding storage and transfer of biological information. COORDINATOR: J. Archibald

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: CHEM 2401.03 and CHEM 2402.03, or CHEM 2441.03; BIOL 2020.03 and BIOL 2030.03 (both with grades of B- or higher); BIOC 2300.03; or instructor's consent

BIOC 3620 Experiential Learning in Biochemistry and Molecular Biology

CREDIT HOURS: 3

This course is an outside the classroom learning experience in which the student works in a research laboratory an average of one day per week acquiring biochemistry or molecular biology knowledge and skills. COORDINATOR: M. Dobson

NOTES: To register in this course, students must first find a faculty member from the Department of Biochemistry & Molecular Biology willing to supervise the work experience and sign a learning agreement with the supervisor. Grading is Pass/Fail.

FORMAT: Lab

PREREQUISITE: BIOC 2300, BIOC 2610, BIOL 2020, BIOL 2030 (all with a grade of B- or higher), CHEM 2401 and CHEM 2402.

EXCLUSIONS: The following may not be used towards BIOC 3620: lab work that is part of another scheduled course at a learning institution, study that would qualify for Special Topics courses, co-op work terms, and paid work. Only one experiential learning course per degree is permitted. The class is only open to students registered in Biochemistry & Molecular Biology Degree programs, either Major or Honours, combined or concentrated. Students may not take BIOC 3620 concurrently with BIOC 4604 or BIOC 4605.

BIOC 3700 Biomolecular Chemistry

CREDIT HOURS: 3

This course covers structural and functional properties of biomolecules, including the physical bases for their characterization, thermodynamic principles of protein folding and biomolecular interactions, and the kinetics and mechanisms of enzyme catalysis.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOC 2300.03, 2610.03, CHEM 2401.03, and CHEM 2402.03 (all with a grade of B- or higher), or instructor's consent

EXCLUSIONS: BIOC 3200.03

BIOC 4001 Special Topics in Biochemistry

CREDIT HOURS: 3

Students interested in topics not covered in formal courses may ask the department for special courses to meet their needs. An Undergraduate Advisor will assist students to ascertain if faculty expertise is available to direct reading and the preparation of papers and seminars in a particular subject area. COORDINATOR: C. Too

PREREQUISITE: BIOC 3300.03, BIOC 3400.03, and BIOC 3700.03 (average of B or higher and consent of coordinator)

BIOC 4010 Bioinformatics

CREDIT HOURS: 3

This course presents the theory and practice of bioinformatics. Topics include: rate of mutation, sequence alignment, database searching, phylogenetic analysis, bioinformatic tools for analyzing genes, genomes and proteins.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOC 3400.03 or instructor's consent

CROSS-LISTING: BIOC 5010.03

BIOC 4027 Molecular Mechanisms of Cancer

CREDIT HOURS: 3

The course focuses on the molecular mechanisms of cancer. Topics include: receptors and downstream signaling, oncogenes and tumor suppressors, cancer metastasis and angiogenesis, cell cycle control, and apoptosis.

FORMAT: Lecture| Discussion

PREREQUISITE: Minimum grades of B+ in a 3000 level Biochemistry class and another 3000 level Biochemistry, Microbiology or Pathology class. Permission of instructor required

CROSS-LISTING: PATH 5027.03 and MICI 5027.03/4027.03

BIOC 4302 Biochemistry of Lipids

CREDIT HOURS: 3

The biochemistry and metabolism of a variety of lipids is studied, especially of those, such as fatty acids, glycolipids, eicosanoids, steroids and phospholipids, with specialized physiological or lipid-second messenger functions. Intracellular and inter-tissue transport and regulatory processes are emphasized. The chemistry and physics of insoluble lipids in an aqueous environment are explored and problems in the interaction of lipids with soluble and insoluble enzymes are considered.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOC 3300.03 and 3700.03

BIOC 4305 Mechanisms of Signal Transduction

CREDIT HOURS: 3

The emphasis of this course is to introduce concepts and key mediators of signal transduction. Topics include protein kinases, tumour suppressors, oncogenes, G-protein coupled receptors, calcium signalling, lipids in signalling, integration of signalling cascades, cytoskeletal reorganization, cellular metastasis, apoptosis, anoikis, genomic stability, and stem cell biology.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOC 3300.03, 3400.03, and 3700.03 or instructor's consent

EXCLUSIONS: BIOC 4301.03

BIOC 4306 Nutritional Biochemistry

CREDIT HOURS: 3

Appropriate nutrition is essential for health and reflects the basic biochemistry of the organism. Changes in the human diet can impact health and disease. This course considers the principles of optimal nutrition in a biochemical context and the role of nutrition in disease etiology and treatment.

FORMAT: Other (explain in comments)

PREREQUISITE: BIOC 3300.03, BIOC 3400.03, BIOC 3700.03 or instructor's permission

BIOC 4403 Genes and Genomes

CREDIT HOURS: 3

This course discusses the organization of genes into genomes. It deals with (i) compartmentalization of genetic material in nuclear and organellar genomes, (ii) the structure, behaviour and origins of components of both nuclear and organellar genomes which are not genes (transposable and other repetitive elements, introns), (iii) genetic and physical methods for mapping genomes, and (iv) the significance of genetic organization and higher order chromosomal structure and function. The methodology and prospects of genomics are discussed at some length.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOC 3400.03 or instructor's consent

CROSS-LISTING: BIOC 5403.03

BIOC 4404 Gene Expression

CREDIT HOURS: 3

The different mechanisms for regulation of gene expression in bacterial and eukaryotic cells, and their viruses, are emphasized. Particular topics include genomic, transcriptional, and post-transcriptional modes of regulation.

PREREQUISITE: BIOC 3400.03 or instructor's consent

CROSS-LISTING: BIOC 5404.03

BIOC 4501 Medical Biotechnology I

CREDIT HOURS: 3

This course covers fundamental principles of biotechnology from a medical perspective. Topics discussed include: recombinant DNA technology, polymerase-chain reaction-based applications, DNA microarrays, DNA sequencing, immunochemical techniques and applications, production of transgenic organisms, potential applications for embryonic stem cell and nuclear transfer cloning, business and legal aspects of biotechnology.

FORMAT: Lecture| Discussion

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOC 3400.03 or instructor's consent

CROSS-LISTING: BIOL 5105.03, and BIOC 5501.03

BIOC 4604 Research Project I

CREDIT HOURS: 3

This course requires original biochemical research in the laboratory of a faculty member, and requires the equivalent of at least one day per week to be spent in the laboratory. A report is submitted at the end of the term. COORDINATOR: R. Singer

NOTES: This course is intended to be taken in conjunction with BIOC 4605.03 and no credit can be given for one course without the other. The work undertaken in BIOC 4605.03 should be a continuation of that initiated in BIOC 4604.03 and hence the report submitted for BIOC 4605.03 may include data and analysis incorporated in the BIOC 4604.03 report. In exceptional cases, the research project can be done outside the Department of Biochemistry and Molecular Biology. Prior approval must be obtained from the course coordinator.

FORMAT: Lab

PREREQUISITE: Permission of coordinator and a member of the Department who will serve as supervisor. At least a B average for BIOC 3300.03, BIOC 3400.03 and

BIOC 4605 Research Project II

CREDIT HOURS: 3

This course requires original biochemical research in the laboratory of a faculty member, and requires the equivalent of at least one day per week to be spent in the laboratory. A report is submitted at the end of the term. COORDINATOR: R. Singer

NOTES: This course is intended to be taken in conjunction with BIOC 4604.03 and no credit can be given for one class without the other. The work undertaken in BIOC 4605.03 should be a continuation of that initiated in BIOC 4604.03 and hence the report submitted hence the report submitted for BIOC 4605.03 may include data and analysis incorporated in the BIOC 4604.03 report. In exceptional cases the research project can be done outside the Department of Biochemistry & Molecular Biology. Prior approval must be obtained from the course coordinator.

FORMAT: Lab

PREREQUISITE: BIOC 4604.03

BIOC 4700 Proteins

CREDIT HOURS: 3

Our theme is the relationship between structure and function. The kinetic and thermodynamic determination of the protein fold is explored. Specific details of how form determines function in binding other molecules both small and large in membranes, and in energy transduction are provided. Protein evolution and turnover are examined.

NOTES: Some weeks, in addition to lectures, students will independently research and write about specialized topics suggested by the instructor and occasionally present these to a class in discussion group format.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOC 3700; or (CHEM 3601 AND CHEM 2301 AND CHEM 2304), all with grades of B or higher or instructor's consent.

CROSS-LISTING: BIOC 5700.03

BIOC 4701 Enzymes

CREDIT HOURS: 3

Fundamental principles of enzyme catalysis and its regulation are examined. Topics include enzyme kinetics, enzyme inhibition and inactivation, isotope effect measurements, site-directed mutagenesis, and the active site architecture and transition state stabilization of selected enzymes. Classic and current papers in the literature are reviewed and the experimental and conceptual approaches are critically appraised.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOC 3700.03; or (CHEM 3601 AND CHEM 2301 AND CHEM 2304), all with grades of B or higher or instructor's consent.

CROSS-LISTING: BIOC 5701.03

BIOC 4702 Biophysical Characterization of Macromolecules

CREDIT HOURS: 3

This course covers methods allowing determination of sub-molecular and atomic-level structure and dynamics of biomacromolecules in physiological settings (e.g. solution-state or lipid bilayers) including: fluorescence, electronic and vibrational circular dichroism and NMR spectroscopy; light vs. X-ray vs. neutron scattering; and, single molecule methods.

FORMAT: Lecture| Tutorial| Seminar

PREREQUISITE: BIOC 3700.03; or (CHEM 3601 AND CHEM 2301 AND CHEM 2304), all with grades of B or higher or instructor's consent. Recommended: PHYC 1280.03/1290.03 or 1300.06

CROSS-LISTING: BIOC 5702.03, CHEM 5602.03, CHEM 4602.03

BIOC 4813 Biochemistry of Clinical Disorders

CREDIT HOURS: 3

This course is an introduction to the pathophysiology of disease. It provides the clinical and biochemical background to disease groups and system disorders and the laboratory approach to their diagnosis. Topics include cardiovascular, renal, gastrointestinal and hepatobiliary disorders, addiction, and acid-base, carbohydrate, lipid and amino acid disorders; endocrine and rheumatological diseases, as well as tumor markers and toxicology, blood and immune abnormalities.

FORMAT: Lecture| Discussion

PREREQUISITE: BIOC 3300.03 and BIOC 3400.03 and BIOC 3700.03 or consent of instructor

CROSS-LISTING: PATH 5013.03, BIOC 5813.03

EXCLUSIONS: BIOC 4811.03 and BIOC 4812.03

BIOC 4835 Human Genetics

CREDIT HOURS: 3

For science students with special interest in human genetics. Topics include errors of metabolism, human development, transmission genetics, DNA structure, gene function, mutation and chromosomal alterations, population genetics, genetics of immunity and cancer, genetic technology in medicine, and ethical and social issues related to medical genetics.

COORDINATOR(S): W.L. Greer

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOC 3400.03 or permission from instructor

CROSS-LISTING: BIOL 4035.03, 5035.03, PATH 5035.03

BIOC 8891 Co-op work term 1

CREDIT HOURS: 0

NOTES: CHEM 3601.03 and PHAC 3001.03 are considered to be BIOC 3000-level courses, and CHEM 4601.03, MICI 4033.03 and PHAC 4001.03 to be BIOC 4000-level courses when taken as part of Biochemistry & Molecular Biology Major and Honours degree programs. These courses, in addition to required non-BIOC 2000-level courses (BIOL 2020, BIOL 2030, CHEM 2401, CHEM 2402), can not be counted towards the 18 credit hours in BIOC required for a Minor in Biochemistry & Molecular Biology.

Welcome to the Department of Biology. It has been said that the 21st century will be the century of Biology. We are inclined to agree. Biologists study the entire hierarchy of living systems from molecules, cells, organelles and organs to individuals, populations, and ecosystems. Increasingly, the focus of biological inquiry has shifted from reducing living systems into their parts to investigating how these parts interact in complex systems from which novel and unique properties emerge.

The Department of Biology offers both undergraduate and graduate students a wide range of learning experiences and training in the biological sciences. The undergraduate core introduces the student to the whole biological hierarchy and provides an excellent introduction to the biodiversity of species and their habitats. There are multiple avenues for more tailored learning as well, including independent research opportunities, special topics courses, experiential learning, specialty certificates, and honours research. State of the art laboratories provide experience in current technology and experimental design. Our Seaside Program includes a large number of summer field courses covering freshwater, marine, and terrestrial ecosystems. We excel in Marine Biology as proximity to the Atlantic Ocean gives us the capacity to provide hands-on marine training. In 2014, the Department of Biology began participating in a unique Medical Sciences program that was developed collaboratively by the Faculty of Science and the Faculty of Medicine.

There has never been a more exciting time to be a Biologist, nor has the need to understand the intricacies of nature been more urgent. Our comprehensive programs prepare students for a wide range of career options, including research and education, field and laboratory positions, environmental management and conservation, medical sciences and biotechnology, bioengineering, industry, and business. Not every student will use this degree to be a biologist but each one will have the opportunity to participate in and contribute to one of the most worthwhile endeavors in humanity's near future: understanding nature and how humanity can live better without endangering the multitude of living systems around us, and in turn, ourselves.

Degree Programs

The Department of Biology offers the following degree programs in Biology

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Biology
- Minor in Biology

* BSc Co-op option available

* May be combined with Minor programs from other disciplines

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Biology undergraduate academic advisor.

Prospective Biology students should be aware that to advance to second year Biology courses, they must achieve at least a C+ grade in the prerequisite first year Biology courses. Students with exceptional extenuating circumstances may appeal this requirement to the Biology Undergraduate Curriculum Committee. Students should go to the Biology Main Office for further details.

Staff

Dean

Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Chair

Bentzen, P., MSc (UBC), PhD (McGill)

Biology Program Advisors

For Biology program advising, please email biology.advising@dal.ca and indicate whether you are interested in Majors or Honours advising.

Professors Emeriti

Hall, B. K., PhD, DSc (UNE), FRSC, University Research Professor Emeritus
McLaren, I. A., MSc (McGill), PhD (Yale), George S. Campbell Professor Emeritus

Professors

Bentzen, P., MSc (UBC), PhD (McGill)
Croll, R. P., PhD (McGill), (major appointment in Physiology and Biophysics)
Freedman, B., MSc, PhD (Toronto), Campbell Chair in Biology
Hutchings, J. A., PhD (Memorial)
Iverson, S. J., PhD (Maryland), University Research Professor
Johnston, M. O., PhD (Chicago)
Lane, P. A., MSc (SUNY Binghamton), PhD (SUNY Albany)
LaRoche, J., PhD (Dalhousie)
Leonard, M. L., PhD (Ottawa)
MacRae, T. H., MSc, PhD (Windsor)
Metaxas, A., PhD (Dalhousie)
O'Dor, R. K., PhD (UBC)
Ruzzante, D. E., MSc, PhD (Dalhousie)
Scheibling, R. E., PhD (McGill)
Walde, S., PhD (Calgary)
Whitehead, H., PhD (Cambridge), University Research Professor
Worm, B., PhD (Kiel)
Wright, J. M., PhD (MUN)

Associate Professors

Bielawski, J. P., PhD (Texas A & M)
Gunawardena, A., PhD (Oxford Brookes)
Herbinger, C. M., PhD (Dalhousie)
Latta, R., PhD (Colorado)
Lotze, H. K., PhD (Kiel)
Pinder, A., PhD (Mass)
Romanuk, T. N., PhD (McMaster)
Simpson, A. G. B., PhD (Sydney)
Stone, S., PhD (York)

Assistant Professors

Bertrand, E., PhD (Woods Hole/MIT)
Côté, P., PhD (McGill)
Crossin, G., PhD (UBC)
Staicer, C., PhD (UMass/Amherst)

Summer Education and Applied Science Institute at Dalhousie in Ecology (S.E.A.S.I.D.E.)

Staicer, C., PhD (UMass/Amherst), Director

Adjunct Professors

Adl, S., MSc (UBC), PhD (Paris-VI)
Bowen, W. D., PhD (UBC), BIO
Broders, H., BSc (Acadia), MSc (Memorial), PhD (UNB)
Franz-Odendaal, T., BSc (Hons), MSc, PhD (Cape Town)
Fraser, D. J., BSc (Guelph), PhD (Laval)
Fredeen, A., BSA (Saskatoon), MSc (Guelph), PhD (California)
Jonsen, I., PhD (Alberta)
Kenchington, E., MSc (Dalhousie), PhD (Tasmania), BIO
Kernaghan, G., MSc (UBC), PhD (Alberta)
Lada, R., PhD (NSAC)
Lee, R. W., PhD (Stoney Brook)
Lynch, D., BSc, MSc (McGill), PhD (Guelph)
MacKinnon, S., BSc (UNB), MSc (Dalhousie), PhD (Ottawa)
Ross, N., BSc, PhD (McGill)
Shutler, D., BSc, MSc (McGill), PhD (Carleton)
Swain, D. P., PhD (UBC)
Wang-Pruski, G., BSc (China), PhD (Alberta)
Wong, M., BSc (Mt. A), PhD (UNB)
Whoriskey, F., PhD (Brown)

Honorary Research Associates

Horn, A., PhD (Toronto)
Weilgart, L., PhD (Dalhousie)

Senior Instructors

Beauchamp, C., BSc., MSc (Memorial), BEd (Dalhousie)
Bishop, T., BSc, MSc (Memorial)
Gass, G., PhD (Toronto)
McAllister-Irwin, N., PhD (Dalhousie)
McCarville, M., BSc, MSc (Dalhousie)
Welsh, E., BSc, (McMaster), MSc (Guelph), BEd (Dalhousie)
Van Dommelen, J. A., MSc (Dalhousie)

Instructors

Cooper, M., BEd (Ottawa), PhD (Dalhousie)
Gibson, L., BSc (UVic), MSc (Dalhousie)
Gantham, D., MSc (Dalhousie)
Schmidt, A., MSc, PhD (Dalhousie)

Post Doctoral Fellows

Eddy, T., PhD (UVic)

Liu, H., PhD (China Agricultural University)

Park, J. S., PhD (Seoul)

Roy, D., PhD (V. Windsor)

Tittensor, D., PhD (Dalhousie)

BSc or BA (120 credit hour) Concentrated Honours in Biology

Students who want a challenging program resulting in a broad background in Biology, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours.

To graduate with Honours, students must complete a minimum of 54 credit hours above the 1000 level in Biology. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the core Biology courses. Students must also have a cumulative B average (GPA of 3.0) at the time of graduation. Students write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of BIOL 4900X/Y.06 or BIOL 4901.03 AND BIOL 4902.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Biology. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours should consult with a Biology Honours Advisor early in their studies. To be admitted, students must:

- Have a minimum B+ average (GPA of 3.3) in core Biology courses with no grade less than C. A maximum of two of these core courses may be repeated to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses.
- Identify and gain the support of a thesis supervisor during their third year of studies (see Honours webpage for supervisor eligibility).
- With the supervisor's input, draft and submit a thesis proposal to the Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Biology Honours webpage <http://biology.dal.ca/honours/index.html>

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Biology must complete the following courses:

1000 level

- BIOL 1010.03 or BIOL 1020.03 or SCIE 1505X/Y.18 or equivalent
- BIOL 1011.03 or BIOL 1021.03 or SCIE 1505X/Y.18 or equivalent
- MATH 1060.03/STAT 1060.03 or SCIE 1505X/Y.18 or equivalent
- An additional 3 credit hours in MATH or STAT (BSc)
- CHEM 1011.03 and CHEM 1012.03

Recommended:

- PHYC 1300X/Y.06 or equivalent
- MATH 1000.03 or MATH 1215.03

2000 level

- BIOL 2003.03 Diversity of Life I
- BIOL 2004.03 Diversity of Life II
- BIOL 2020.03 Cell Biology
- BIOL 2030.03 Genetics and Molecular Biology

- BIOL 2040.03 Evolution
- BIOL 2060.03 Introductory Ecology

3000/4000 level

- A minimum of 30 additional credit hours in BIOL or BIOL- equivalent courses at or above the 2000 level, of which at least 18 credit hours must be at or above the 3000 level. One of the following options must be included:
 - BIOL 3050.03 Developmental Biology,
 - BIOL 3078.03 AND BIOL 3079.03 Principles of Animal Physiology Part I and Part II

AND

- BIOL 4900X/Y.06 Honours Research and Thesis or BIOL 4901.03 and BIOL 4902.03 Honours Research and Thesis I & II (for Co-op students)

Students are encouraged to consult the sections on Course Selection Guidelines and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

BSc or BA (120 credit hour) Combined Honours in Biology and another subject

Students who wish to study Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science (other than Marine Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas.

To graduate, students must complete a minimum of 36 credit hours (Biology as primary subject) or 30 credit hours (Biology as secondary subject) above the 1000 level in BIOL or BIOL-equivalent courses. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the core Biology courses. Students must also have a cumulative B average (GPA of 3.0) at the time of graduation. Students write a research-based Honours thesis. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Biology, this requirement is satisfied through BIOL 4900X/Y.06 or BIOL 4901.03 AND BIOL 4902.03.

A Co-op option is available for students enrolled in a BSc Combined Honours in Biology. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. To be admitted to the Biology Honours program, students must:

- Have a minimum B+ average (GPA of 3.3) in core 2nd year Biology courses with no grade less than C. A maximum of two of these core courses may be repeated to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses.
 - If Biology is to be the primary subject area, students must
 - Identify and gain the support of a thesis supervisor during their third year of studies (see Biology Honours webpage for supervisor eligibility).
 - With the supervisor's input, draft and submit a thesis proposal to the Biology Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Biology Honours webpage biology.dal.ca/honours/index.html

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Combined Honours program in Biology and another subject must complete the following:

1000 level

- BIOL 1010.03 or BIOL 1020.03 or SCIE 1505X/Y.18 or equivalent
- BIOL 1011.03 or BIOL 1021.03 or SCIE 1505X/Y.18 or equivalent
- MATH 1060.03/STAT 1060.03 or SCIE 1505X/Y.18 or equivalent
- CHEM 1011.03 and CHEM 1012.03

Recommended:

- PHYC 1300X/Y.06 or equivalent
- MATH 1000.03 or MATH 1215.03

2000 level

- BIOL 2003.03 Diversity of Life I
- BIOL 2004.03 Diversity of Life II
- BIOL 2020.03 Cell Biology
- BIOL 2030.03 Genetics and Molecular Biology
- BIOL 2040.03 Evolution
- BIOL 2060.03 Introductory Ecology

3000/4000 level

- A minimum of 12 additional credit hours in BIOL or BIOL-equivalent courses. One of the following options must be included:
 - BIOL 3050.03 Developmental Biology,
 - BIOL 3078.03 AND BIOL 3079.03 Principles of Animal Physiology Part I and Part II

If Biology is the primary subject, students will also complete

- BIOL 4900 X/Y.06 Honours Research and Thesis or BIOL 4901.03 and BIOL 4902.03 Honours Research and Thesis I & II (for co-op students)

Students are encouraged to consult the sections on Course Selection Guidelines BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

BSc or BA (120 credit hour) Major in Biology

The 120 credit hour Major is suited to students who want to focus on Biology, but wish to have a program that is somewhat less constrained than the Honours program. It provides a four-year survey of Biology, and is designed for students not anticipating subsequent experimental graduate-level training in Biology or related disciplines. Biology Majors complete a minimum of 42 credit hours in BIOL or BIOL-equivalent courses above the 1000 level. Biology Majors do not have thesis (or related) requirements. Research and other experiential learning opportunities are available through laboratories, special topics and experiential courses. Students should plan their programs carefully and, if required, obtain advice from an academic advisor.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Biology. See Co-operative Education Program.

Core Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Major program in Biology must complete the following courses:

1000 level

- BIOL 1010.03 or BIOL 1020.03 or SCIE 1505X/Y.18 or equivalent
- BIOL 1011.03 or BIOL 1021.03 or SCIE 1505X/Y.18 or equivalent
- CHEM 1011.03 and CHEM 1012.03
- MATH 1060.03/STAT 1060.03 (if planning to take BIOL 2060.03)
- An additional three credit hours in MATH or STAT (BSc)

2000 level

- BIOL 2020.03 Cell Biology
- BIOL 2030.03 Genetics and Molecular Biology
- BIOL 2040.03 Evolution
- Any TWO of BIOL 2003.03 Diversity of Life I, BIOL 2004.03 Diversity of Life II, BIOL 2060.03 Introductory Ecology
- Three additional credit hours in BIOL or BIOL-equivalent courses at or above the 2000 level

3000/4000 level

- Minimum of 24 credit hours in BIOL or BIOL-equivalent courses at or above the 3000 level

Students are encouraged to consult Course Selection Guidelines and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

BSc or BA (120 credit hour) Double Major in Biology and another subject

The Double Major degree program allows students to combine a study of Biology with another subject. The other subject may be any discipline from the Faculty of Science (other than Marine Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

The Biology requirements are the same for Biology as the primary or secondary subject. Students must complete a minimum of 30 credit hours in BIOL or BIOL-equivalent courses above the 1000 level. It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Biology as the primary subject. See Co-operative Education Program.

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Double Major program in Biology and another subject must complete the following:

1000 level

- BIOL 1010.03 or BIOL 1020.03 or SCIE 1505X/Y.18 or equivalent
- BIOL 1011.03 or BIOL 1021.03 or SCIE 1505X/Y.18 or equivalent
- CHEM 1011.03 and CHEM 1012.03
- MATH 1060.03/STAT 1060.03 (if planning to take BIOL 2060.03)
- An additional three credit hours of MATH or STAT (BSc)

2000 level

- BIOL 2020.03 Cell Biology
- BIOL 2030.03 Genetics and Molecular Biology
- BIOL 2040.03 Evolution
- Any TWO of
 - BIOL 2003.03 Diversity of Life I
 - BIOL 2004.03 Diversity of Life II
 - BIOL 2060.03 Introductory Ecology
- Three additional credit hours in BIOL or BIOL-equivalent courses at or above the 2000 level

3000/4000 level

- A minimum of 12 credit hours in BIOL or BIOL-equivalent courses at or above the 3000 level

Students are encouraged to consult the sections on Course Selection Guidelines and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

BSc or BA (90 credit hour) Minor in Biology

The 90 credit hour degree with Minor in Biology is appropriate for students who want to study some Biology but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Biology. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Biology is usually the preferred option for students who wish to combine studies in Biology with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

See the **Minor in Biology** section of this Calendar.

Minor in Biology

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

This minor is not available to students majoring in Marine Biology.

A BSc or BA (90 credit hour) degree program with a Minor in Biology is available to students in the Faculty of Science.

Requirements

- A minimum of 18 credit hours in Biology (BIOL) courses at the 2000 level or higher to a maximum of 36 credit hours.

Please note that upper level Biology (BIOL) courses have prerequisite requirements.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Biology

Co-op Academic Advisor: Mindy McCarville mindy.mccarville@dal.ca

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Biology, or in Combined Honours or Double Major programs with Biology as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Biology Co-op Academic Advisor and from the Co-operative Education office http://www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Biology, please see the Biology department webpage.

Minors available to students in Biology

Minor programs allow students to develop subject specialities in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Biology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic

transcript.

A complete list of Faculty of Science Certificates and requirements. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to student enrolled in a BSc or BA in Biology include:

- Certificate in Animal Behaviour
- Certificate in Environmental Impact Assessment
- Certificate in Genetics
- Certificate in Geographic Information Science
- Certificate in Science Leadership and Communication

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Biology with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Biology and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Biology and from the Faculty of Engineering in their first year of study.

Required Biology courses for a BSc/BEng or BA/BEng program in Biology

- A minimum of 18 credit hours in BIOL above the 1000 level

Note that there are prerequisite requirements for entry into upper level Biology courses.

Course Selection Guidelines

Biology is a large and diverse field, and students enroll in Biology programs with a corresponding diversity of interests and goals. While we encourage students to sample broadly across the various biological disciplines during their undergraduate years, we recognize that many students wish to emphasize one or more general areas within Biology. To help students select courses that fit their interests and goals, we have identified three general areas in Biology:

- A. Ecology and Evolution,
- B. Organismal Biology,
- C. Cell/Molecular Biology.

Below, we list courses associated with each area, and provide recommendations for designing individual programs at the third and fourth year levels.

IMPORTANT: Students should choose 2000 level courses in their second year with care, so that they will have the necessary pre-requisites to enroll in third and fourth year courses in their interest areas.

NOTE: These are not requirements. Students may select courses from any or all areas, provided they meet requirements for their degree program.

Ecology and Evolution

Ecology and Evolution (E&E) spans a broad range of concepts and applications from ecosystem ecology through population ecology to molecular evolution. A well-rounded course of study in Ecology or Evolution or both will include some courses in basic principles applicable to all organisms and habitats/ecosystems, as well as more specific courses on the details of how these principles play out in particular situations (e.g. taxa, habitats), and how these principles are applied to real world problems. In addition, a well-trained student in E&E should have both well-developed numerical skills as well as exposure to the application of E&E in broader society. Students wishing to emphasize E&E in their degree program should select courses from the following:

Principles: BIOL 3042, BIOL 3044, BIOL 3046, BIOL 3061, BIOL 3062, BIOL 3065, BIOL 3069, BIOL 3101

Biodiversity: BIOL 3067, BIOL 3221, BIOL 3301, BIOL 3322, BIOL 3327, BIOL 3620, BIOL 3622, BIOL 3626, BIOL 4060

Ecosystems: BIOL 3101, BIOL 3623, BIOL 3624, BIOL 3664, BIOL 3761, BIOL 4002, BIOL 4323, BIOL 4370, BIOL 4661, BIOL 4666, OCEA 3001, OCEA 3002, OCEA 3003, OCEA 3004

Evolution: BIOL 3102, BIOL 3326, EARTH 2205, EARTH 2420

Applications: BIOL 3060, BIOL 3063, BIOL 3225, BIOL 3226, BIOL 3328, BIOL 3329, BIOL 3580, BIOL 3600, BIOL 3601, BIOL 3623, BIOL 3624, BIOL 3634, BIOL 4001, BIOL 4065, BIOL 4160, BIOL 4335, BIOL 4369, PSY 2670, HSTC 2204

Organismal Biology

Organismal biology includes areas such as development, physiology and anatomy, as well the study of particular taxonomic groups. Students interested in organismal biology are encouraged to select courses from the following:

Developmental Biology: BIOL 3050

Physiology/Anatomy: BIOL 3078, BIOL 3079, BIOL 3326, BIOL 3421, BIOL 3430, PHYL 3120, PHYL 3140, BIOL 4074, BIOL 4404

Microbes: BIOL 2004, BIOL 3101, BIOL 3102, BIOL 3113, BIOL 4020

Algae/plants: BIOL 3221, BIOL 3225, BIOL 3226

Animals: BIOL 3067, BIOL 3301, BIOL 3322, BIOL 3326, BIOL 3327, BIOL 3622, BIOL 3626, BIOL 4060, EARTH 2420, MARI 3627

Organisms in the environment: BIOL 3062, BIOL 3101, BIOL 3600, BIOL 3615, BIOL 3620, BIOL 3623, BIOL 3630, BIOL 3664, BIOL 4323, BIOL 4369, BIOL 4370

General: BIOL 3024, BIOL 3404, BIOL 3503, BIOL 3580, BIOL 4061, BIOL 4062, BIOL 4063, BIOL 4664

Cell/Molecular Biology

Cell/molecular biology includes areas such as cell biology, molecular biology, genetics, biochemistry, microbiology, development, evolution and biotechnology. Students interested in cell/molecular biology are encouraged to consider the courses listed below. Note that Biology credit can be obtained for Microbiology, Biochemistry and Physiology courses above the 2000 level.

Biology: BIOL 3020, BIOL 3046, BIOL 3102, BIOL 4035

Microbiology: all MICI courses 2000 level or higher

Biochemistry: all BIOC courses 2000 level or higher

Neuroscience: NESC 2570, NESC 2670, NESC 3970

Physiology: all PHYL courses 2000 level or higher

BIOL-Equivalent Courses

Several other Dalhousie departments offer courses in one or more areas of Biology. Students enrolled in a 120 credit hour BSc or BA program in Biology may count any of the following courses toward their Biology program course requirements:

Any course cross-listed as a BIOL course

Agriculture (AGRI)	AGRI 1000
Anatomy (ANAT)	All ANAT courses 2000 level or higher
Animal Science (ANSC)	ANSC 2002, ANSC 2005, ANSC 2006, ANSC 3000, ANSC 3006, ANSC 4008
Aquaculture (AQUA)	AQUA 2000, AQUA 3000
Biochemistry (BIOC)	All BIOC courses 2000 level or higher
Biology (BIOA)	BIOA 2000, BIOA 2001, BIOA 2002, BIOA 2004, BIOA 2005, BIOA 2006, BIOA 2007, BIOA 2008, BIOA 3002, BIOA 3003, BIOA 3004, BIOA 3006, BIOA 3008, BIOA 4000, BIOA 4003, BIOA 4004
Environmental Science (ENVA)	ENVA 4002, ENVA 4003
Genetics (GENE)	GENE 3000, GENE 3001, GENE 4000, GENE 4003, GENE 4004
History (HIST)	HIST 2074, HIST 2995, HIST 3073, HIST 3074
History of Science and Technology (HSTC)	HSTC 1200, HSTC 2200, HSTC 3212
Microbiology (MICI)	All MICI courses 2000 level or higher

Microbiology (MCRA)	MCRA 2000, MCRA 3000, MCRA 4000
Marine Biology (MARI)	All MARI courses
Neuroscience (NESC)	NESC 3125, NESC 3440, NESC 4374, NESC 4375, NESC 4376, NESC 4377
Nutrition (NUTR)	NUTR 3000, NUTR 3001, NUTR 3002, NUTR 4000
Physiology (PHYL)	All PHYL courses 2000 level or higher
Plant Science (PLSC)	PLSC 3000, PLSC 4000, PLSC 4002, PLSC 4003, PLSC 4004
Psychology (PSYO)	PSYO 2160, PSYO 3162
Research Methods /Project Seminars (RESM)	RESM 4002, RESM 4003, RESM 4008, RESM 4009, RESM 4010, RESM 4011
Science, Interdisciplinary (SCIE)	SCIE 2000
Statistics (STATS)	STAT 4570

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Notes

The normal entry requirement for admission to upper level courses in Biology is a grade of C+ or better in each of BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03 or in SCIE 1505.18. Students with a lower grade and extenuating circumstances may appeal to the department Undergraduate Curriculum committee. Students should go to the Biology Main Office for further details.

Consult the Biology Department's website for updates on new courses and suggested course combinations.

Biology courses are grouped into four general categories:

1. 1000 Level Courses

(BIOL 1010.03 or BIOL 1020.03) and (BIOL 1011.03 or BIOL 1021.03). These courses are the introductory university-level courses in biology.

2. 2000 Level Courses

All Biology majors (15, 20 credit and Honours) are required to take a core program at the 2000 level. Students should normally complete these core courses in their second year. The core program is designed to provide a basis for more advanced studies in Biology as well as to ensure that all majors are exposed to the general discipline or subject areas of biology. A variety of skills including writing, oral presentation, computer literacy, library use, and problem solving are integrated into the curriculum of these core courses along with 'hands-on' activities in the laboratory or field. The second-year core program covers five discipline areas:

1. Cell Biology - BIOL 2020.03
2. Diversity of Organisms (animals, plants and microbes)
 - BIOL 2003.03
 - BIOL 2004.03
3. Ecology - BIOL 2060.03
4. Evolution - BIOL 2040.03
5. Genetics and Molecular Biology - BIOL 2030.03

Students interested in BIOL-equivalent subjects (eg. biochemistry, microbiology, etc.) are advised to take the relevant second-year courses offered by these departments. This is not part of our core-program but is a prerequisite for entry into higher level courses in those departments.

Students majoring in subjects other than Biology can design their own programs and will not have to conform to these 2000 level core requirements.

3. 3000 Level Courses

These courses are mainly for second- and third-year students. All students should ensure they have the necessary prerequisite courses required for entry into 3000 level courses.

4. 4000 Level Courses

These courses are primarily for honours or major students. They are open to others with the permission of the instructor. Where biology courses are identified as being given in another department (eg. Anatomy), that department should be consulted for details.

Enrolment Limitations

Students intending to enroll in programs in Biology and Marine Biology should note that there are limitations on the number of students that can be accepted into 2000 and higher level courses in any given year. Passing the introductory Biology courses with the required minimum grade does not guarantee a place in any of these courses. Lecture courses are limited by room size. Additional size restrictions are imposed on laboratory courses because of equipment limitations and the much closer supervision required. Size limitations on 2000 and 3000 level laboratory courses are specified under the timetable listings for those courses. Students are advised to register as early as possible during the registration period to secure their space within their desired courses. Please note also that being registered for a course does not guarantee late admission. Students not appearing on the first day of a course may be deleted from course lists.

Course Descriptions

BIOL 1010 Principles of Biology Part I

CREDIT HOURS: 3

This course, which prepares students for more advanced courses in biology and allied subjects, surveys the fundamental principles of biology with an emphasis on those features common to all organisms. Topics covered include cell and molecular biology, genetics, and evolution. Knowledge of high school mathematics, chemistry and biology is recommended.

NOTES: Students wishing to continue as biology or marine biology majors should complete BIOL 1010 (or BIOL 1020) and BIOL 1011 (or BIOL 1021) in the first year of study. Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

EXCLUSIONS: BIOL 1020.03, SCIE (15XX), BIOA 1002.03

BIOL 1011 Principles of Biology Part II

CREDIT HOURS: 3

Biology 1011 broadens the background laid down in BIOL 1010 to include plant and fungi form and function, animal form and function, and ecology. Knowledge of high school mathematics, chemistry and biology is recommended

NOTES: Students wishing to continue as biology or marine biology majors should complete BIOL 1010 (BIOL 1020) and BIOL 1011 (BIOL 1021) in the first year of study. Students planning to take further courses in Biology or Marine Biology should read the Program Requirements

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

EXCLUSIONS: BIOL 1021.03, SCIE 15XX, BIOA 1003.03

BIOL 1020 Introductory Biology I: Cells, Genetics & Evolution

CREDIT HOURS: 3

Biology 1020.03 is the online distance education equivalent of BIOL 1010.03, and is offered in the fall, winter and summer terms. Topics include cell and molecular biology, genetics, and evolution. High school mathematics, chemistry, and biology is recommended. Learning activities include readings, quizzes, interactive multimedia, online labs and home labs.

NOTES: Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees.

FORMAT: Online Delivery

EXCLUSIONS: BIOL 1010.03, SCIE 15XX, BIOA 1002.03

BIOL 1021 Introductory Biology II: Organismal Biology & Ecology

CREDIT HOURS: 3

Biology 1021.03 is the online distance education equivalent of BIOL 1011.03, and is offered in the fall, winter and summer terms. Topics include diversity of eukaryotic life, ecology, and plant and animal biology. High school mathematics, chemistry, and biology are recommended. Learning activities include readings, quizzes, interactive multimedia, online labs and home labs.

NOTES: Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees.

FORMAT: Online Delivery
EXCLUSIONS: BIOL 1011.03 or SCIE 15XX, BIOA 1003.03

BIOL 1030 Biology for Engineers

CREDIT HOURS: 3

An introduction to Biology as it relates to Engineering, including a basic understanding of cell structure and function, genetics, ecology, the relationship between living systems and the man-made environment, and the relevance of Biology to industrial and engineering applications.

NOTES: This course is restricted to students registered in an Engineering program.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

EXCLUSIONS: BIOL 1010.03, BIOL 1011.03, BIOL 1020.03, BIOL 1021.03, SCIE 15XX

BIOL 1031 Introduction to Biology II

CREDIT HOURS: 3

A continuation of introductory Biology. Assumes a background in Cell Biology and Ecology. Topics presented at an introductory level include Genetics, Molecular Biology, Evolution, Organismal Diversity, and Plant and Animal Form and Function.

NOTES: Signature required; together with BIOL 1030.03 or SCIE 1530.27, this course provides the same introduction to Biology as BIOL 1010.03 and BIOL 1011.03

PREREQUISITE: SCIE 1530.27 or BIOL 1030.03 and (CHEM 1011.03 or CHEM 1021.03) and (MATH 1000.03 or STAT 1060.03 or MATH 1215.03)

BIOL 1050 Biology and Society

CREDIT HOURS: 3

Health, climate change, genetically modified organisms, species and the evolution of disease. Designed for non-majors this course introduces the basics of cell biology, genetics and evolution and how they affect our society. Students acquire a foundation for life-long learning and critical thinking in biology through lectures, independent study and lab activities. NOTE: This course is for students in an Arts program or program other than Biology.

FORMAT: Lecture| Lab

PREREQUISITE: None

EXCLUSIONS: BIOL 1010.03, BIOL 1020.03, SCIE 15XX

BIOL 2003 Diversity of Life

CREDIT HOURS: 3

Surveys the diversity of forms and function in invertebrate and vertebrate animals. Emphasis is placed on the invertebrate phyla and fish of marine environments, and on arthropods, birds and mammals on land. The course takes a phylogenetic approach, exploring the evolutionary relationships, and introduces examples of the different life forms.

NOTES: Students who took a Biology 1000-level prerequisite prior to September 2013 and did not get a grade of C+ or higher should contact an advisor in the Biology Department preferably before registration begins.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: A grade of C+ or higher in BIOL 1011.03 or (BIOL 1021.03, BIOL 1031.03, BIOA 1003.03, SCIE 1505.18).

BIOL 2004 Diversity of Life II

CREDIT HOURS: 3

Introduces the main domains of plant, fungal and microbial life, based on modern phylogenetic taxonomy. Examines the diversity, structure, physiology and ecology of non – animal life forms. Reviews the origins of the main lineages of living things - Archaea, Eubacteria and Eukaryota, as well as the main groups of eukaryotes.

NOTES: Students who took a Biology 1000 level prerequisite prior to September 2013 and did not get a grade of C+ or higher should contact an advisor in the Biology Department preferably before registration begins.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: A grade of C+ or higher in BIOL 1010.03 or (BIOL 1020.03, or BIOA 1002.03 or BIOL 1030.03) and BIOL 1011.03 or (BIOL 1021.03, BIOA 1003.03, or BIOL 1031.03); or SCIE 1505.18.

BIOL 2020 Cell Biology

CREDIT HOURS: 3

An introduction to the eukaryotic cell. Major cell components and activities are described at ultrastructural and molecular levels with emphasis on mammalian systems. The concept of the cell as an integrated structural, functional unit is developed.

NOTES: Students who took a Biology 1000 level prerequisite prior to September 2013 and did not get a grade of C+ or higher should contact an advisor in the Biology Department, preferably before registration begins.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: A grade of C+ or higher in BIOL 1010.03 or (BIOL 1020.03, BIOL 1030.03, BIOA 1002.03) or SCIE 1505.18 or equivalent. RECOMMENDED: CHEM 1011.03 and CHEM 1012.03

EXCLUSIONS: BIOA 2001.03

BIOL 2030 Genetics and Molecular Biology

CREDIT HOURS: 3

The power and prominence of modern genetics have grown from a blend of classical and molecular approaches; both approaches are emphasized. Topics include: Mendelian, population and quantitative genetics; chromosome structure and variation; structure and function of nucleic acids; DNA replication, transcription and translation; gene expression; gene mutations; and genetic engineering.

NOTES: Students who took a Biology 1000 level prerequisite prior to September 2013 and did not get a grade of C+ or higher should contact an advisor in the Biology Department preferably before registration begins.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: A grade of C+ or higher in BIOL 1010 or BIOL 1020.03 or BIOA 1002.03 or BIOL 1031.03 or DISP (SCIE 15XX) or equivalent.

RECOMMENDED: CHEM 1011.03 and CHEM 1012.03

EXCLUSIONS: GENE 2000.03

BIOL 2040 Evolution

CREDIT HOURS: 3

A thorough overview of the process of evolution. Genetic variation and changes in genetic composition of populations, the relationship between genetic and phenotypic change. Adaptation at various levels of organization (DNA to species), speciation, phylogeny, and macroevolutionary patterns. Introduces the full breadth of evolutionary concepts, preparatory to more advanced courses.

NOTES: Students who took a Biology 1000 level prerequisite prior to September 2013 and did not get a grade of C+ or higher should contact an advisor in the Biology Department, preferably before registration begins.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: A grade of C+ or higher in BIOL 1010.03, BIOL 1020.03, BIOA 1002.03, BIOL 1031.03, BIOA 1003.03, SCIE 1505.18 or equivalent

EXCLUSIONS: BIOL 3041.03

BIOL 2060 Introductory Ecology

CREDIT HOURS: 3

Ecology examines interactions of plants and animals, including humans, with each other and with their non-living world. Topics include population growth, competition, predation, food webs, metapopulation dynamics, biodiversity and ecosystem function. The course has a quantitative approach providing a foundation for further work in ecology, marine biology and environmental science.

NOTES: Students who took a Biology 1000 level prerequisite prior to September 2013 and did not get a grade of C+ or higher should contact an advisor in the Biology Department, preferably before registration begins.

FORMAT: Lecture| Lab| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: A grade of C+ or higher in BIOL 1011.03, BIOL 1021.03, BIOA 1003.03, ENVS 1000.06, BIOL 1030.03, or (SCIE 1505.18); and a grade of D or higher in MATH/STAT 1060.03 or MATH/STAT 2080.03.

EXCLUSIONS: BIOA 3001.03

BIOL 2601 The Flora of Nova Scotia

CREDIT HOURS: 3

Introduction to the biodiversity of flowering plants (Angiosperms) found in Nova Scotia. A wide range of plant communities are visited on several day-long field trips. A focus on plant identification is supplemented with lessons in plant ecology, floral biology, pollination mechanisms, natural history, and human uses (e.g., edible, poisonous, medicinal).

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: One year of university courses

BIOL 2605 Introduction to Marine Life of Nova Scotia

CREDIT HOURS: 3

Introduction to the variety of marine life found in Nova Scotia. The diversity and zonation of invertebrates and macroalgae is explored on field trips to different shore environments, including a salt marsh, rocky shore and sandy beach. Lectures and laboratory-based investigations on live marine organisms complement the field trips.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Marine Biology students may NOT use this course as part of their major degree requirements. This course is aimed at non-majors who have completed at least one year of university.

FORMAT: Lecture| Lab

PREREQUISITE: One year of university courses

BIOL 3003 Introduction to Field Oceanography

CREDIT HOURS: 3

See course description for OCEA 3003.03 in the Oceanography section of the calendar.

BIOL 3020 Advanced Cell Biology

CREDIT HOURS: 3

The eukaryotic cell is a complex array of interconnected organelles. Topics include the processing of proteins during trafficking, how the cell interacts with its environment and how it integrates information, with an emphasis on signaling pathways. Lectures are supplemented with assigned readings of original research articles for discussion in class.

FORMAT: Lecture| Discussion

PREREQUISITE: BIOL 2020.03 or BIOA 2001.03 with a minimum grade of B or instructor's consent

BIOL 3024 Microscopy

CREDIT HOURS: 3

See course description for MICI 3024.03 in the Microbiology and Immunology section of the calendar.

BIOL 3042 Molecular Ecology

CREDIT HOURS: 3

We survey techniques of molecular genetic analysis and consider how they can be used to identify species, populations, sexes, individuals and family relationships, and study population attributes such as historical dispersal, contemporary connectivity, mating behaviour and effective population size. Evaluation is based on assignments,

a test and a final exam.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: A grade of B- or better in each of BIOL 2030.03 (or GENE 2000.03), BIOL 2040.03, and BIOL 2060.03.

CROSS-LISTING: MARI 3042.03

EXCLUSIONS: BIOL 4042.03

BIOL 3044 Ecological Genetics

CREDIT HOURS: 3

An advanced examination of genetic variation in ecologically important (especially quantitative) traits. Topics will include determining whether a trait is inherited; natural selection in the wild; specialist vs. generalist strategies; how variation is maintained in the face of selection; trade-offs between competing selective pressures and selection for diversification.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 2040.03 or BIOL 3041.03

EXCLUSIONS: BIOL 4044.03

BIOL 3046 Molecular Evolution

CREDIT HOURS: 3

This course examines the process of evolutionary change at the molecular level. It begins with the sources of mutation, and moves on to dynamics of population variation. The course culminates with a macro-evolutionary perspective on topics such as adaptive evolution and genetic co-option. This course is complementary to BIOC 4010.03 (Bioinformatics).

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 2030.03 (or GENE 2000.03) and BIOL 2040.03

BIOL 3050 Developmental Biology

CREDIT HOURS: 3

Lectures describe development as a sequence of processes and events, in which 'simple' structures such as fertilized eggs are progressively transformed into complex organisms. These events are governed by developmental 'rules' which have been determined through experimental study of animal and plant model organisms. Laboratories use live material whenever possible.

FORMAT: Lecture| Lab| Discussion

PREREQUISITE: BIOL 2020.03 (or BIOA 2001.03) and BIOL 2030.03 (or GENE 2000.03)

BIOL 3060 Environmental Ecology

CREDIT HOURS: 3

The ecological effects of pollution, disturbance, and other stressors, both anthropogenic and natural. Major subject areas are air pollutants, toxic metals, acidification, eutrophication, oil spills, pesticides, forestry, warfare, urban ecology, risks to biodiversity, and resource degradation. The overarching context of the course is ecological sustainability of the human economy.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03) (or see instructor)

BIOL 3061 Communities and Ecosystems

CREDIT HOURS: 3

Part 1 includes ecosystem history and theory, complex systems and species interactions. Part 2 discusses community structure descriptors, interactions, stability, and food webs. Part 3 discusses the ecosystem approach, environmental management, ecosystem health and integrity, environmental indicators, ecological footprint, and resilience theory.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03) or INTD 2001.03 or INTD 2002.03

BIOL 3062 Behavioral Ecology

CREDIT HOURS: 3

This course examines animal behaviour from an evolutionary perspective. Using the theory of natural selection as a basis, we will examine foraging, grouping patterns, territorial behaviour, parenting, mating behaviour, social organization, aggression and cooperation. There will be tutorials and essay assignments.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03)

BIOL 3063 Resource Ecology

CREDIT HOURS: 3

This course considers the ecology, utilization, and management of natural resources in fisheries, wildlife and forest management, agriculture and aquaculture. Topics include population dynamics, community interactions, and ecosystem support of resources as well as the history of resource utilization, practices of controlling production, pests, and predators, and sustainable management strategies.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 2

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03) and MATH 1000.03 (or MATH 1215.03 or SCIE 1505.18) and STAT 1060.03 (or SCIE 1505.18)

CROSS-LISTING: MARI 3063.03

BIOL 3065 Conservation Biology

CREDIT HOURS: 3

This course offers an introduction to conservation biology: the science of understanding and conserving biodiversity on Earth. Students learn how biodiversity change is assessed and what tools are used to prevent the extinction of species and the disruption of ecosystems. Tutorials involve oral presentations as well as a written essay, and an in-depth discussion of controversial topics.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 2

TUTORIAL HOURS PER WEEK: 2

PREREQUISITE: BIOL 2060.03 or BIOA 3001.03

BIOL 3078 Principles of Animal Physiology Part I

CREDIT HOURS: 3

Lectures on the mechanisms which coordinate the activities of cells within multicellular organisms and permit such organisms to remain in homeostatic balance. The emphasis is on the mechanisms most widely distributed throughout the animal kingdom. The laboratories are designed to illustrate these principles in a variety of organisms.

NOTES: Students must complete 3078.03 before 3079.03

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOL 2003.03, and BIOL 2020.03 (or BIOA 2001.03)

CROSS-LISTING: MARI 3074.03

BIOL 3079 Principles of Animal Physiology Part II

CREDIT HOURS: 3

This course is a continuation of a discussion of the mechanisms which coordinate the activities of cells within multicellular organisms which began in BIOL 3078.03.

This term emphasizes the urinary, cardiovascular and respiratory systems. The laboratories reflect the approaches taken to study these systems in a variety of organisms.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOL 3078.03 or MARI 3074.03

CROSS-LISTING: MARI 3076.03

EXCLUSIONS: BIOA 3005.03

BIOL 3080 The Ecology and Evolution of Fishes

CREDIT HOURS: 3

The class examines selected topics on the ecology and evolution of marine and freshwater fishes. Topics include: phylogeny and systematics; functional morphology and physiology; population biology; life-history evolution; behavior; fisheries science; and conservation biology.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: A cumulative GPA of 2.7 (B-) or better in BIOL 2003.03, BIOL 2040.03, BIOL 2060.02 (or BIOA 3001.03)

CROSS-LISTING: MARI 3080.03

EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03

BIOL 3101 Microbial Ecology

CREDIT HOURS: 3

Lectures on the ecology of bacteria, viruses and protists. Community structure, food web nutrient cycling, biogeochemical cycles, competition, succession and symbiosis are discussed with examples from marine, fresh-water and soil habitats. There is an emphasis on marine organisms.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 2004.03 (or MICI 2100.03), and BIOL 2060.03 (or BIOA 3001.03)

CROSS-LISTING: MARI 3101.03

BIOL 3102 Microbial Eukaryotes: Biodiversity and Evolution

CREDIT HOURS: 3

Microbial eukaryotes are of tremendous ecological, evolutionary and medical/veterinary importance. This course provides a comprehensive understanding of the biodiversity and evolution of both algal and protozoan eukaryotes, and examines important aspects of their organismal biology, including cell and genome organization, life histories, trophic strategies, locomotion and symbiosis.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2020.03 (or BIOA 2001.03) and BIOL 2004.03 (or MICI 2100.03)

BIOL 3221 Diversity of Algae

CREDIT HOURS: 3

This is a taxonomic introduction to the major algal groups (macrophytic and microscopic) with an emphasis on the marine seaweeds. Basic taxonomic differences are covered, along with an introduction to macrophyte ecology, human uses and symbioses. Laboratory sessions focus on morphology and reproduction.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: BIOL 2004.03 or equivalent

CROSS-LISTING: MARI 3221.03

EXCLUSIONS: BIOL 3212.03, MARI 3212.03

BIOL 3225 Plants in the Human Landscape

CREDIT HOURS: 3

The use of plants for human recreation and aesthetic purposes in gardens, public parks, suburban and urban landscapes. Topics include: history of gardens, garden

design, plant materials, edible landscaping, plants and human health. The course includes field trips and group work and students complete a design project.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: BIOL 1010.03 or BIOL 1020.03 (C- or better) and BIOL 1011.03 or BIOL 1021.03 (C- or better); or SCIE 1505.18 or PLAN 2001.03

CROSS-LISTING: ENVS 3225, PLAN 3225

BIOL 3226 Economic Botany: Plants & Civilization

CREDIT HOURS: 3

See course description for ENVS 3226.03 in the Environmental Studies section of the calendar.

BIOL 3301 Invertebrate Biology

CREDIT HOURS: 3

A survey of the diversity, ecology and evolutionary history of the major invertebrate groups. Lectures will emphasize phylogenetics and diversity of body plans. Labs will emphasize identification and anatomy through dissections and observations.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOL 2003.03

CROSS-LISTING: MARI 3301.03

EXCLUSIONS: BIOL 3321 X/Y.06

BIOL 3322 Parasitology

CREDIT HOURS: 3

The course emphasizes the parasite-host relationships, evolution of the parasites and adaptations to the host, modifications of physiology, structure and life cycle for a parasitic existence. Since the most extensive research pertains to parasites of man, the emphasis is on human parasites.

NOTES: Students who took a Biology 1000 level prerequisite prior to September 2013 and did not get a grade of C+ or higher should contact an advisor in the Biology Department preferably before registration begins.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: A grade of C+ or higher in BIOL 1010 (or BIOL 1020.03 or BIOA 1002.03) and BIOL 1011.03 (or BIOL 1021.03 or BIOA 1003.03) or SCIE 1505.18

BIOL 3326 Vertebrate Design: Evolution and Function

CREDIT HOURS: 3

Vertebrate Design explores 600 million years of vertebrate evolution, with particular attention to origins of major groups and the anatomical and functional innovations associated with their rise and diversification. Functional morphology of swimming, flying and terrestrial locomotion is also covered, along with the effect of body size on function.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 2003.03 and BIOL 2040.03

BIOL 3327 Entomology

CREDIT HOURS: 3

The course is an introduction to the study of insects. Topics include insect classification, evolutionary diversity, biology, ecology, behaviour, and various applied aspects. Through this survey of the insects, students will gain an appreciation of insect biodiversity as well as their economic and ecological importance.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2003.03

EXCLUSIONS: BIOA 3000.03

BIOL 3328 Medical Entomology

CREDIT HOURS: 3

Medical Entomology covers direct injuries caused by arthropods such as phobias, annoyance, allergies, toxins, venoms and myiasis, arthropod transmission of vertebrate parasites, epidemiology of arthropod-borne diseases. Students study transmission of diseases, methods of surveillance of diseases, management by vector control and other methods of arthropod-borne diseases.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For date, times and special registration procedures, see seaside.science.dal.ca

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOL 3327.03 or BIOL 3322.03 or BIOA 3000.03, or permission of instructor

BIOL 3329 Applied Entomology

CREDIT HOURS: 3

Insects not only comprise more than half of the world's biodiversity, but influence human health and economic well-being in many ways. In this course students are introduced to insect pest management, agricultural, forest and medical entomology, forensic entomology, and insects in food science, beneficial and harmful insects.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 3327.03 or BIOA 3000.03 or the permission of the instructor

BIOL 3421 Comparative Vertebrate Histology

CREDIT HOURS: 3

See course description for ANAT 3421.03 in the Anatomy and Neurobiology section of this calendar.

BIOL 3430 Introduction to Human Histology

CREDIT HOURS: 3

See course description for ANAT 2160.03 in the Anatomy and Neurobiology section of the calendar.

BIOL 3503X/Y Knowing and Making the World: the history of science from the ancients to the moderns

CREDIT HOURS: 6

See course description for HSTC 2200X/Y.06 in the History of Science & Technology section of the calendar.

BIOL 3580 Philosophy of Biology

CREDIT HOURS: 3

See course description for PHIL 3420.03 in the Philosophy section of this calendar.

BIOL 3600 Aquaculture

CREDIT HOURS: 3

Through lectures, laboratories and field trips (additional fees apply), this course offers an introductory overview of aquaculture, the culturing of aquatic plants and animals. The following topics are covered with both a Maritimes and global perspective: overview, physico-chemistry of water, engineering, culture techniques, health, nutrition, genetics, environmental and socio-economic considerations.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOL 2003.03

CROSS-LISTING: MARI 3600.03

BIOL 3601 Nature Conservation

CREDIT HOURS: 3

This interdisciplinary course explores relationships between humans and the natural world, including damage caused to species and ecosystems. The course looks at environmental ethics and world views, environmental philosophy, sustainability, the cultural expression of natural values (literature, music, art) and conservation science and actions, including the establishment of protected areas.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 1010.03 (or BIOL 1020.03 or BIOA 1002.03) and BIOL 1011.03 (or BIOL 1021.03 or BIOA 1003.05); or SCIE 15XX, or permission of instructor

BIOL 3615 Methods in Ecology

CREDIT HOURS: 3

Through participation in several class projects, students obtain experience conducting field studies and laboratory experiments. Projects include a range of ecological questions, techniques, organisms, and ecosystems. Students collect, analyze, and interpret their own data in formal scientific reports. Recommended for students interested in ecological research, or environmental field sampling.

NOTES: Additional fees are charged to cover the cost of field trip transportation.

FORMAT: Lab

PREREQUISITE: BIOL 2060.03, (or BIOA 3001.03) and MATH/STAT 1060 (or SCIE 1505.18) and at least one diversity class (e.g. BIOL 2003 or BIOL 2004)

RECOMMENDED: STAT 2080

CROSS-LISTING: ENVS 3615

EXCLUSIONS: BIOL 3614

BIOL 3620 Field Survey of Terrestrial Biodiversity

CREDIT HOURS: 3

Measuring and interpreting trends in the biodiversity of organisms in terrestrial environments. Field-intensive, with one week spent camping at a field station.

Techniques for identification of major groups (lichens, mosses, higher plants, insects, amphibians, birds, mammals), sampling presence and abundance of species, and relating trends to natural and anthropogenic variation.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03) or permission of instructor

BIOL 3622 Ornithology

CREDIT HOURS: 3

Overview of avian biology and techniques for the scientific study of bird populations, including identification by sight and sound. Field-intensive, with 8 days in the field, including one week camping at a field station in southwestern Nova Scotia to conduct research on birds in their natural habitats.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2003.03 or BIOL 2060.03 or BIOA 3001.03, or permission of instructor

BIOL 3623 Applied Coastal Ecology

CREDIT HOURS: 3

Impacts of anthropogenic inputs on the structure and function of coastal ecosystems. Through field trips and other classwork, students examine ecosystem health, e.g., in macroalgal communities on rocky shores, in seagrass beds on sedimentary shores, and learn basic experimental design, principles of environmental assessment and

monitoring, and coastal habitat remediation.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Not offered every year.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03)

CROSS-LISTING: ENVS 3623.03, MARI 3623.03

BIOL 3624 Urban Freshwater Systems

CREDIT HOURS: 3

Ecology of urban freshwater systems with a focus on understanding how they respond to human-caused stresses within their watersheds. Students conduct case studies at nearby lakes and/or streams to monitor water quality and characterize resident communities of plants and animals. Evaluation is based on individual and group research reports.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2060.03 or BIOA 3001.03 and MATH 1060.03 (or STAT 1060.03 or DISP) or permission of instructor

CROSS-LISTING: ENVS 3624.03

BIOL 3626 Field Studies of Marine Mammals

CREDIT HOURS: 3

Hands-on introduction to research on marine mammals. Lectures provide an overview of marine mammal adaptations, evolution, population biology, social organization, conservation, and management. Labs include a necropsy and techniques of photographic identification of individuals. On a several-day camping trip, students observe marine mammals from whale-watch boats and conduct research projects.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03) and BIOL 3062.03 (or BIOL 3630.03 or PSYO 2160.03), and MATH 1060.03/STAT 1060.03

CROSS-LISTING: MARI 3626.03

BIOL 3628 Marine Ornithology

CREDIT HOURS: 3

Overview of the biology of birds in marine environments. Seabird ecology, evolution, adaptations, identification, and natural history. Tools and techniques for studying their behaviour, diet, and populations in the field. Lectures, exercises, and a week-long field trip to Maritime seabird breeding colonies. Student team and independent research projects and presentations.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITE: BIOL 1010 or BIOL 1020 or equivalent, and BIOL 1011 or BIOL 1021 or equivalent, or SCIE 15XX, one of BIOL 2003 or BIOL 2004, and BIOL 2060, or instructor's permission. Knowledge of statistics, Geographic Information Systems (GIS), and familiarity with Excel spreadsheets are helpful, but not required, for research projects.

CROSS-LISTING: MARI 3628.03

BIOL 3630 Field Methods in Animal Behaviour

CREDIT HOURS: 3

First-hand experience in studying animal behaviour in the field. Day-long field exercises teach basic methods, then students plan, conduct, write up, and orally present a 5-day project of their own.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 3062.03 or PSYO 2160.03 or PSYO 3160X/Y.06 or permission of instructor

BIOL 3632 Applied Field Methods in Fish Ecology

CREDIT HOURS: 3

Practical experience conducting field research on fishes with field trips to streams and shallow water marine/freshwater habitats. Techniques include collecting fish, designing and conducting surveys, studying behaviour, measuring phenotypic variability, quantifying temporal and spatial variation, planning for statistical analysis, and weighing tradeoffs between data quality, quantity, costs and ethical/environmental considerations.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03) and STAT 1060.03 (or MATH 1060.03 or SCIE 1505), or their equivalents, or permission of instructor. STAT 2080 is recommended.

CROSS-LISTING: MARI 3632.03, ENVS 3632.03

BIOL 3633 Spatial Information and GIS in Ecology

CREDIT HOURS: 3

A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.

NOTES: Offered in the summer through **SEASIDE**. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2060.03 or BIOA 3001.03

CROSS-LISTING: ENVS 3633.03, GEOG 3633.03

BIOL 3634 Agroforestry

CREDIT HOURS: 3

Agroforestry is a land-use system in which trees or shrubs are grown in association with agricultural crops or livestock. As practiced in the tropics, agroforestry generates numerous ecological, environmental and economic benefits. This hands-on, field-intensive course provides a foundation for understanding this traditional practice and its applications in North America.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures, see seaside.science.dal.ca

PREREQUISITE: BIOL 2060.03 or AGRI 1000.03 or BIOA 3001.03 or permission of the Instructor. An additional class on the biology, ecology, diversity or physiology of plants is recommended.

BIOL 3640 Tropical Ecology and Biodiversity Field Class

CREDIT HOURS: 6

Hands-on introduction to tropical ecology, biodiversity, and conservation. Includes 18-day field trip to Belize to visit a variety of tropical terrestrial, freshwater, and marine ecosystems, quantify habitats, identify species, study animal behavior, and examine ecological interactions. Evaluation includes lecture and field tests, field notebooks, presentations, reports, and an independent research project.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.

PREREQUISITE: Introductory biology (BIOL 1010 or BIOL 1020, and BIOL 1011 or BIOL 1021, or equivalent); a diversity course (one of BIOL 2003 or BIOL 2004, or equivalent), and Introductory Ecology (BIOL 2060), or instructor's permission. An introductory course in statistics (STAT 1060 or similar) is recommended.

BIOL 3664 Intertidal Ecology and Diversity

CREDIT HOURS: 3

Hands-on, intensive introduction to ecological research on rocky shores, tidal flats, and sandy beaches. Relevant ecological concepts, sampling techniques for flora and fauna, and statistical skills are learned. Field sampling on day and camping trips is followed by lab work (e.g., identification of seaweeds, invertebrates), statistical analysis, and report preparation.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03), and STAT 1060.03 (or MATH 1060.03 or SCIE 15xx), and BIOL 2003.03

CROSS-LISTING: ENVS 3664.03, MARI 3664.03

EXCLUSIONS: BIOL 3662.03, BIOL 3663.03

BIOL 3665 Food Web Assembly and Modelling

CREDIT HOURS: 3

Students will examine the structure and functioning of ecological communities through a lens of "who eats whom" predator-prey feeding interactions through field studies, experiments, and computer simulations.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: MATH 1060.03 (or STAT 1060.03) and BIOL 2060.03 (or BIOA 3001.03)

RESTRICTIONS: This course is restricted to third and fourth year students, or with permission of the instructor.

EXCLUSIONS: For third year and above or with permission of the instructor

BIOL 3666 Species Invasions

CREDIT HOURS: 3

Students will examine species invasions, the establishment of non-native species in new communities, using an interdisciplinary framework incorporating impacts, theory, and management and control of invasive species.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2003

RESTRICTIONS: This course is restricted to third and fourth year students, or with permission of the instructor.

BIOL 3680 Scientific Diving Methods for Marine Ecology

CREDIT HOURS: 3

This course introduces students that are certified divers to the practice of underwater research using SCUBA. It combines lectures with supervised dives in various marine habitats to demonstrate the application of standard sampling and experimental procedures in marine ecology, with an emphasis on logistical considerations and diving safety.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2003.03, BIOL 2060.03 or BIOA 3001.03, STAT 1060.03 or DISP, internationally recognized diving certification, diving physical; recommended: BIOL 3321.03, BIOL 3301.03

CROSS-LISTING: MARI 3680.03

BIOL 3761 Marine Ecology

CREDIT HOURS: 3

Building upon an understanding of basic ecological and evolutionary principles, and a familiarity with the major marine invertebrate and algal taxa, this course examines patterns and processes at the organismal, population and community levels that determine the diversity and distribution of life in the sea.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03) and (BIOL 2003.03 or BIOL 2004.03), and OCEA 2000X/Y.06 or (OCEA 2001.03 and OCEA 2002.03)

CROSS-LISTING: MARI 3761.03

RESTRICTIONS: This course is restricted to 3rd and 4th year students.

BIOL 3762 Terrestrial Ecology

CREDIT HOURS: 3

This course provides a conceptual framework for understanding the function of terrestrial ecosystems. One week at a field station in Nova Scotia provides practical experience with forest, bog and agroecosystems. Topics include soil profiles and nutrients; plant productivity and interactions; and ecological roles of microorganisms, lichens, fungi, insects, and vertebrates.

NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures see seaside.science.dal.ca

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2003.03 or BIOL 2004.03 , and BIOL 2060.03 (or BIOA 3001.03)

BIOL 3800 Experiential Learning

CREDIT HOURS: 3

Experiential Learning recognizes the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and a timetable.

NOTES: To register in this course, a student must first find a suitable supervisor and sign a learning agreement between the course coordinator, the student and the supervisor.

PREREQUISITE: Students must be registered in a Biology or Marine Biology program, have completed a minimum of 18 credit hours in Biology above the 1000 level and have a minimum cumulative GPA of 2.4 or permission of course coordinator.

CROSS-LISTING: MARI 3800.03

EXCLUSIONS: Scheduled courses at a learning institution, study that would qualify for a Special Topics course, an Honours project, co-op work terms and paid work. Only one experiential learning course per degree is permitted.

BIOL 4001 Environmental Impact Assessment

CREDIT HOURS: 3

This course provides an opportunity to explore all aspects of environmental impact assessment (EIA) as practiced in Canada and in other countries. The course traces the development of EIA over the past 30 years and critically examines the scientific, procedural and political dimensions.

NOTES: All students taking BIOL 4001.03 or ENVS 4001.03 must have completed 90 credit hours and be in their fourth year of study or have permission of instructor.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENVS 1000X/Y.06 or BIOL 2060.03 (or BIOA 3001.03) or EARTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or INTD 2002.03 or OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) or SUST 2000.06 or SUST 2001.06.

RESTRICTIONS: This class is restricted to For 3rd and 4th year students.

BIOL 4002 The Science of Wetland Ecosystems

CREDIT HOURS: 3

See ENVS 4002.03 in the Environmental Science section of the calendar.

BIOL 4035 Human Genetics

CREDIT HOURS: 3

See BIOC 4835 in the Biochemistry section of the calendar.

BIOL 4060 Marine Mammalogy

CREDIT HOURS: 3

The course will examine the characteristics that mammals brought with them when they returned to the ocean, the evolution of the different groups of marine mammals, some of their special adaptations, the roles of marine mammals in oceanic ecosystems and general principles of marine mammal population biology. Students will use information on the biology of marine mammals to explore conservation/management issues.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03)

CROSS-LISTING: MARI 4060.03

RESTRICTIONS: This course is restricted to For 3rd and 4th year students in BIOL, ENVS, MARI, OCEA, and OCSC major/ honours program.

BIOL 4061 Design of Biological Experiments

CREDIT HOURS: 3

This course introduces students with previous training in univariate statistics to the practice and pitfalls of experimental design and data analysis in biology. Lectures and take-home exams are used to demonstrate the fundamentals of design and analysis, with emphasis on potential problems and how they are overcome.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2080.03 or STAT 2080.03 or ECON 2280.03 (Grade of B+ or higher); offered to well prepared honours students as well as graduate students

BIOL 4062 Analysis of Biological Data

CREDIT HOURS: 3

The course introduces students to techniques available for the analysis of biological data, including regression, general linear models and multivariate methods.

Emphasis is on the practical use of these techniques rather than derivations. Students analyze real and realistic data sets, and are assessed on write-ups of these analyses.

PREREQUISITE: STAT 2080.03 or ECON 2280.03 or MATH 2080.03

BIOL 4065 Sustainability and Global Change

CREDIT HOURS: 3

Sustainability emphasizes equitable societies, protected environments, and robust economies. Most countries pursue Sustainable Development yet the concept remains controversial, and defined differently in the North and the South. The global trends focus on those that relate to environment and sustainability. Discussion format with Blackboard Learning/Internet assignments.

FORMAT: Lecture| Discussion

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03) and one of BIOL 3003.03, BIOL 3060.03, BIOL 3061.03, BIOL 3062.03, BIOL 3063.03, BIOL 3065.03, BIOL 3066.03, BIOL 3067.03, BIOL 3068.03, BIOL 3069.03, BIOL 3080.03, BIOL 3101.03, BIOL 3601.03, BIOL 3615.03, BIOL 3601.03, or BIOL 3623.03, BIOL 3624.03, BIOL 3664.03, BIOL 3761.03 or BIOL 3762.03, or INTD 2001.03 or INTD 2002.03 or permission of instructor

BIOL 4080 Laboratory Studies of Fishes

CREDIT HOURS: 3

Through a series of laboratory exercises, the course provides students with practical experience on various topics related to the study of ichthyology. Topics shall include the following: species identification; meristics and morphometrics; use of dichotomous keys; internal and external morphology; ageing and growth determination; ecomorphological attributes; data collection and analysis.

FORMAT: Lab

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOL 3080.03 or MARI 3080.03

CROSS-LISTING: MARI 4080.03

EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03

BIOL 4160 Political Ecology

CREDIT HOURS: 3

Political ecology (PE) examines the politics of the environment but not on specific policies, political theories, or ideologies. PE considers an interacting array of political and socio-economic forces that shape human-environmental relationships. International case studies will be evaluated using several PE tools. Discussion format with Blackboard Learning/Internet assignments.

FORMAT: Discussion

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03), and one of BIOL 3003.03, BIOL 3060.03, BIOL 3061.03, BIOL 3062.03, BIOL 3063.03, BIOL 3065.03, BIOL 3067.03, BIOL 3069.03, BIOL 3101.03, BIOL 3601.03, BIOL 3623.03, BIOL 3624.03, BIOL 3761.03, BIOL 3762.03, or INTD 2001 or INTD 2002 or permission of instructor

BIOL 4220 Plant Cell Biology

CREDIT HOURS: 3

This course covers the structure, function, and dynamic properties of plant cellular components including constituent organelles, cytoskeleton, and the cell wall. Current areas of research such as programmed cell death, cell signalling and cellular trafficking are discussed in depth. The course consists of lectures, student seminars, and report writing.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 2020.03 (or BIOA 2001.03) , and BIOL 2004.03 or BIOL 3050.03 with a minimum of B- in these course or permission of the instructor

BIOL 4302 Molecular Immunology

CREDIT HOURS: 3

See course description for MICI 4302.03 in the Microbiology and Immunology section of this calendar.

BIOL 4323 Biologging in Ecology

CREDIT HOURS: 3

This course explores the fundamentals and applications of biologging and biotelemetry: the use of electronic tags to study free-ranging animals and their environment. Students are introduced to the wide range of tags and their diverse applications in biology.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03), or PSYO/NESC 2160.03 or permission of the instructor.

CROSS-LISTING: MARI 4323.03

BIOL 4335 Environmental Impacts in Marine Ecosystems

CREDIT HOURS: 3

See course description for OCEA 4335.03, in the Oceanography section of this calendar.

BIOL 4369 Fisheries Oceanography

CREDIT HOURS: 3

See course description for OCEA 4160.03 in the Oceanography section of this calendar.

BIOL 4370 Deep Sea Biology

CREDIT HOURS: 3

See course description for MARI 4370.03 in the Marine Biology section or OCEA 4370.03 in the Oceanography section of this calendar.

PREREQUISITE: (BIOL 2060 or BIOA 3001) and OCEA 2000 or (OCEA 2001 and OCEA 2002)

BIOL 4444 Leadership in Science

CREDIT HOURS: 3

Students develop leadership skills and build confidence while applying their scientific knowledge. Through in-class activities and a science-based practicum, students gain experience with various aspects of leadership, allowing for integration and application of their expertise.

PREREQUISITE: Instructor permission. Students should have completed at least three third year courses in their declared major and have a minimum of B+ average in their major.

CROSS-LISTING: SCIE 4444.03

RESTRICTIONS: This course is restricted to For 3rd and 4th year students

BIOL 4661 Biological Oceanography

CREDIT HOURS: 3

See course description for OCEA 4140.03, in the Oceanography section of this calendar.

PREREQUISITE: OCEA 2000 or (OCEA 2001 and OCEA 2002) and OCEA 2020 and OCEA 2021

BIOL 4662 Biology of Phytoplankton

CREDIT HOURS: 3

See course description for OCEA 4230.03 in the Oceanography section of this calendar.

BIOL 4664 History of Marine Sciences

CREDIT HOURS: 3

See course description for MARI 4664.03 in the Marine Biology section, or SCIE 4001.03 in the Science, Interdisciplinary section of this calendar.

BIOL 4666 Benthic Ecology

CREDIT HOURS: 3

See course description for OCEA 4330.03 in the Oceanography section of the calendar.

BIOL 4667 Census of Marine Life

CREDIT HOURS: 3

The Census of Marine Life recorded over 250,000 known species of eukaryotes in the world's oceans. In this course, the Senior Scientist for Census 2010 examines the diversity, distribution and abundance of marine biota globally and reviews new approaches to discover new species and to monitor responses to climate change.

FORMAT: Lecture| Discussion

PREREQUISITE: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03) and 18 credit hours of BIOL, MARI, or OCEA courses

CROSS-LISTING: MARI 4667.03

RESTRICTIONS: This course is restricted to For 3rd and 4th year students

BIOL 4806 Special Topics in Biology

CREDIT HOURS: 3

Independent study intended for students who wish to study an area of biology not covered in other courses. Students should first consult with a faculty member to arrange the topic of study. An outline of the course content must be approved by the Chair of the Biology Undergraduate Curriculum Committee.

NOTES: For registration forms and further information see: <http://biology.dal.ca/Undergraduate/index.htm>

BIOL 4807 Special Topics in Biology

CREDIT HOURS: 3

Independent study intended for students who wish to study an area of biology not covered in other courses. Students should first consult with a faculty member to arrange the topic of study. An outline of the course content must be approved by the Chair of the Biology Undergraduate Curriculum Committee.

NOTES: This course is for students who have already completed one Special Topics course. For registration forms and further information see:

<http://biology.dal.ca/Undergraduate/index.htm>

BIOL 4809 Special Topics in Biology

CREDIT HOURS: 3

Independent study intended for students who wish to study an area of biology not covered in other courses. Students should first consult with a faculty member to arrange the topic of study. An outline of the course content must be approved by the Chair of the Biology Undergraduate Curriculum Committee.

NOTES: This course is for students who have already completed two Special Topics courses. For registration forms and further information see: <http://biology.dal.ca/Undergraduate/index.htm>

BIOL 4850 Geographic Information Science Research Project

CREDIT HOURS: 3

Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.

LECTURE HOURS PER WEEK: 1

TUTORIAL HOURS PER WEEK: 2

PREREQUISITE: ENVS 3500 or EARTH3500 or GEOG 3500 and EARTH 4520 or GEOG 4520; and permission of instructor.

CROSS-LISTING: ENVS 4850/ERTH 4850/GEOG 4850/SCIE 4850

RESTRICTIONS: This course is restricted to 3rd and 4th year students.

BIOL 4900X/Y Honours Research and Thesis

CREDIT HOURS: 6

This course is required of, and restricted to, all Biology Honours programs in which Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class.

NOTES: The course grade is based on the results of the research which are submitted in April as an Honours Thesis, an oral presentation about the research to the class, and an oral or poster presentation at the Honours Cameron Conference in February. Co-op students attend this course by registering for BIOL 4901 and BIOL 4902.

See details about selecting a supervisor for the honours research under general requirements for Biology honours program or on the honours page of Biology website

<http://biology.dal.ca/honours/under.html>.

CROSS-LISTING: MARI 4900X/Y.06

RESTRICTIONS: Honours students are normally in their final year of study.

BIOL 4901 Honours Research and Thesis I

CREDIT HOURS: 3

This is required of, and restricted to, all Biology Co-op Honours programs. The course description is the same as for Biology 4900X/Y. Students attend BIOL 4901 in the Winter term of their 4th year and BIOL 4902 in the Fall term of their 5th year to accommodate their work terms.

NOTES: BIOL 4901 and BIOL 4902 must be taken in consecutive winter/fall terms to get a grade for either course. No grade will be recorded for BIOL 4901 until BIOL 4902 is also completed and the final Honours Thesis has been evaluated.

CROSS-LISTING: MARI 4901.03

RESTRICTIONS: Students in the Biology Co-op Honours Programme, normally in their final year of study.

EXCLUSIONS: BIOL 4900.06 and MARI 4900.06

BIOL 4902 Honours Research Thesis II

CREDIT HOURS: 3

This is the 2nd half of the required course for Biology Co-op honours students. The course description is the same as for Biology 4900X/Y. Students attend 4902 in the fall of their 5th year.

NOTES: BIOL 4901 and BIOL 4902 must be taken in consecutive winter/fall terms to get a grade for either course. No grade will be recorded for BIOL 4901 until BIOL 4902 is also completed and the final Honours Thesis has been evaluated.

CROSS-LISTING: MARI 4902.03

RESTRICTIONS: Students in the Biology Co-op Honours Programme, normally in their final year of study.

EXCLUSIONS: BIOL 4900.06 and MARI 4900.06

BIOL 8891 Co-op Work Term I

CREDIT HOURS: 0

PREREQUISITE: SCIE 2800.03

BIOL 8892 Co-op Work Term II

CREDIT HOURS: 0

PREREQUISITE: SCIE 2800.03, BIOL 8891.00

BIOL 8893 Co-op Work Term III

CREDIT HOURS: 0

PREREQUISITE: SCIE 2800.03, BIOL 8892.00

BIOL 8894 Co-op Work Term IV

CREDIT HOURS: 0

PREREQUISITE: SCIE 2800.03, BIOL 8893.00

Introduction

Chemistry is often called the central science because of its relevance to so many other disciplines. Understanding the composition and properties of matter, as well as the manner in which one substance is transformed into another, is essential to the study of our physical and natural worlds. As such, chemistry is often a starting point for many different careers in science. A variety of programs are available, ranging from focused studies to interdisciplinary options to suit the interests of the student.

A chemistry degree involves considerable breadth of training in the major branches of chemistry. These include organic, inorganic, physical, analytical and biological chemistry. In addition to establishing a solid foundation in the fundamental principles of chemistry, students who undertake a chemistry degree develop essential skills that include problem solving, critical thinking, organization, data analysis, and written and oral communication. The laboratories associated with courses develop the necessary experience with laboratory procedures, equipment and safety, and serve to reinforce the concepts learned in lecture.

Degree Programs

The Department of Chemistry offers the following degree programs in Chemistry

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Chemistry
- Minor in Chemistry

- * BSc Co-op option available
- * May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment in the Faculty of Science, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects; otherwise the student should consult the calendar of the appropriate year.

The 120 credit hour Concentrated Honours and Major degrees, as well as corresponding Co-op programs, are accredited by the Canadian Society for Chemistry (CSC). CSC accreditation ensures that graduates of these programs have met certain criteria concerning the quantity and quality of their instruction. It qualifies such graduates for membership in the CSC and to practice chemistry as professionals.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Chemistry undergraduate academic advisor.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies.

Staff

Dean

Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Chairperson of Department

Schepp, N. P.

Graduate Coordinator

Stradiotto, M.

Co-op Academic Advisor

Zhang, P.

Faculty Undergraduate Advisors

Laws, P. A. (902 494-6143) First year Coordinator
MacDonald, J. L. (902 494-2440) DUUCS advisor
Wentzell, P. D. (902 494-3708) Chair
Whalen, J. M. (902 494-4467) Outreach
White, R. L. (902 494-6403) Transfer credits
Zheng, P. (902 494-3323) Co-op

Professors Emeriti

Aue, W. A., PhD (Vienna), FCIC
Boyd, R. J., BSc (UBC), PhD (McGill), FCIC
Coxon, J. A., BA (Cambridge), MSc, PhD (East Anglia)
Knop, O., DSc (Laval), FCIC

Kwak, J. C. T., BSc, MSc, PhD (Amsterdam), FCIC

Professors

Bearne, S. L., BSc (Acadia), PhD (Toronto), MDCM (McGill), cross-appointment from Biochemistry and Molecular Biology

Becke, A. D., BSc (Queen's), MSc, PhD (McMaster), FRSC, FRS, FCIC, Killam Chair in Computational Science, Shirreff Chair of Chemistry

Burnell, D. J., BSc, MSc (Carleton), PhD (UNB)

Dahn, J. R., BSc (Dalhousie), MSc, PhD (UBC), Canada Research Chair in Battery and Fuel Cell Materials, NSERC/3M Canada Inc. Industrial Research Chair and cross-appointment from Physics and Atmospheric Science

Jakeman, D. L., BSc, PhD (Sheffield), cross-appointment from College of Pharmacy

Martin, R. V., BS (Cornell), MSc (Oxford), PhD (Harvard), cross-appointment from Physics and Atmospheric Science

Stradiotto, M., BSc, PhD (McMaster), Faculty of Science Killam Professor, Alexander McLeod Professor of Chemistry

Thompson, A., BSc (Leicester), PhD (Sheffield), Faculty of Science Killam Professor

Wentzell, P. D., BSc (Dalhousie), PhD (Mich State)

White, M. A., BSc (Western), PhD (McMaster), FCIC, FRSC, University Research Professor and cross-appointment with Physics and Atmospheric Science

Zwanziger, J. W., BA (Chicago), PhD (Cornell), Canada Research Chair in NMR Studies of Materials, cross-appointment with Physics and Atmospheric Science

Associate Professors

Andreas, H. A., BSc, PhD (Calgary)

Cozens, F. L., BSc (York), PhD (Toronto)

Doucette, A. A., BSc (Dalhousie), PhD (Alberta)

Obrovac, M. N., BSc (SFU), MSc, PhD (Dalhousie), Industrial Research Chair in Materials Science, cross-appointment with Physics and Atmospheric Science

Rainey, J. K., BSc (Guelph), MSc, PhD (Toronto) Director of NMR-3, cross-appointment from Biochemistry and Molecular Biology

Schepp, N. P., BSc, PhD (Toronto)

Turculet, L., BSc (MIT), PhD (Berkeley)

White, R. L., BSc (Dalhousie), PhD (McMaster), FCIC

Zhang, P., BSc, MSc (Jilin U, China), PhD (Western), cross appointment with School of Biomedical Engineering

Assistant Professor

Welch, G. C., BSc (Calgary), PhD (Windsor), Canada Research Chair in Organic Functional Materials

Senior Instructors

Alemán Milán, G., BEng (Superior Polytechnic Institute of Havana), MSc, PhD (Dalhousie)

Laws, P. A., BSc (Acadia), MSc (Dalhousie), BEd (MSVU)

Thompson, K. E., BSc (Acadia), MBA (SMU)

Instructors

MacDonald, J. L., BSc, BTech (CBU), PhD (Dalhousie)

Moya Barrios, R., BSc (U of Havana, Cuba), MSc, PhD (Dalhousie)

Whalen, M., BSc (Dalhousie), PhD (McMaster)

Adjunct Professors

Boyd, R. J., BSc (UBC), PhD (McGill), FCIC

Cameron, T. S., BA, MA, DPhil (Oxon), Dalhousie University, Halifax, NS

Chatt, A., BSc (Calcutta), MSc (Roorkee), MSc (Wat), PhD (Toronto), FCIC, Dalhousie University, Halifax, NS

Grindley, T. B., BSc, MSc, PhD (Queen's), FCIC, Dalhousie University, Halifax, NS

Grossert, J. S., BSc, MSc, PhD (Natal), FCIC, Dalhousie University, Halifax, NS

Kralovec, J., MSc (U of Chemical Technology, Prague); PhD (Czech Academy of Sciences, Prague), Ocean Nutrition, Dartmouth, NS

Matta, C., BPharm Sci (Alexandria U, Egypt), Graduate Diploma in Health and Hospital Administration (National Institute of Management, Egypt), PhD (McMaster), Mount Saint Vincent University, Halifax, NS

Pacey, P. D., BSc (McGill), PhD (Toronto), FCIC, Dalhousie University, Halifax, NS

Pincock, J. A., BSc, MSc (Man), PhD (Toronto), FCIC, Dalhousie University, Halifax, NS

Pinto, D. M., BSc (McGill), PhD (Alberta), Institute for Marine Biosciences, Halifax, NS

Pottie, I. R., BSc (SMU), PhD (MUN), Mount Saint Vincent University, Halifax, NS
Quilliam, M., BSc, PhD (Manitoba), National Research Council, Institute for Marine Biosciences, Halifax, NS
Ramaley, L., BA (Colorado), MA, PhD (Princeton), FCIC, Dalhousie University, Halifax, NS
Weaver, D. F., MD, PhD (Queen's), FRCP(C) (Dalhousie), FCIC, Toronto Western Research Institute, UHN/University of Toronto
Werner-Zwanziger, U., Vordiplom (Mathematics), Diploma (Chemistry), PhD (Westfälische Wilhelms-Universität Münster, Germany), Dalhousie University, Halifax, NS

Part-time Academics

Aish, G., BSc, MSc (Dalhousie)
Berryman, V., BSc, PhD (Dalhousie)
Carter, M., BSc, MSc (Queen's), PhD (Dalhousie), MD (U of T)
Grindley, T. B., BSc, MSc, PhD (Queen's)
MacDonald, C. A., BSc (UNB)
Perrott, A., BSc, PhD (Dalhousie), BEd (Acadia)
Pincock, J. A., BSc, MSc (Man), PhD (Toronto)

Postdoctoral Fellows, Research Associates/Assistants

Banfield, S. C., BSc (Acadia), PhD (Western)
Brown, T. N., BSc (TRU, BC), PhD (U of T)
Borzenko, A., Specialist (St. Petersburg State U, Russia), PhD (UBC)
Bushnell, E., BCs, BSc, PhD (Windsor)
Cleversey, C. N. (Solvent Asst, Stores)
Hanson, M. A., BSc (Mt. A), PhD (Western)
Hatchard, T., BSc, BComm (SMU), MSc, PhD (Dalhousie)
Johnson, M., BSc (Dalhousie), MSc (UWO)
Li, Z., BSc, PhD (U of Science and Technology, China)
Werner-Zwanziger, U., Vordiplom (Mathematics), Diploma (Chemistry), PhD (Westfälische Wilhelms-Universität Münster, Germany)
Zhao, X., BSc (Hebei Normal U, China), PhD (Beijing U of Technology)

BSc or BA (120 credit hour) Concentrated Honours in Chemistry

Students who want a challenging program resulting in a broad and in-depth background in Chemistry that includes an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider the Honours program. Honours students complete a minimum of 54 credit hours above the 1000 level in Chemistry with a minimum GPA of 3.0 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of CHEM 4901.06. The Honours program is accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Chemistry. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Chemistry should consult with a Chemistry Academic Advisor early in their studies.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Concentrated Honours program in Chemistry must complete the following courses:

1000 level

- CHEM 1011.03/CHEM 1012.03, or CHEM 1021.03/CHEM 1022.03, or equivalent
- MATH 1000.03/MATH 1010.03, or equivalent
- PHYC 1190.03/PHYC 1290.03, or PHYC 1300.06, or equivalent

2000 level

- CHEM 2101.03
- CHEM 2201.03
- CHEM 2301.03 and CHEM 2304.03
- CHEM 2401.03 and CHEM 2402.03

3000 level

- CHEM 3103.03
- CHEM 3201.03 or CHEM 3203.03
- CHEM 3301.03
- CHEM 3401.03 or CHEM 3404.03
- CHEM 3601.03

4000 level

- CHEM 4901.06 (minimum grade of B-)

Additional Requirements

- MATH 2001.03 and MATH 2030.03
- A minimum of 15 additional credit hours in CHEM courses at or above the 2000 level
- Combined lab hours across CHEM 3XXX and 4XXX must be >190.
- Minimum grade of C in all Honours subject courses (except CHEM 4901.06, which requires a minimum grade of B-)

BSc or BA (120 credit hour) Combined Honours in Chemistry and another subject

Students who wish to study Chemistry in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Chemistry may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. The Combined Honours program is not accredited by the Canadian Society for Chemistry.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Chemistry, this requirement is satisfied through CHEM 4901.06.

A Co-op option is available for students enrolled in BSc Combined Honours with Chemistry as the primary subject. See Co-operative Education Program.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Combined Honours program in Chemistry and another subject must complete the following:

Chemistry as the primary subject

- CHEM 1011.03/CHEM 1012.03, or CHEM 1021.03/CHEM 1022.03, or equivalent
- MATH 1000.03/MATH 1010.03, or equivalent
- CHEM 2101.03
- CHEM 2201.03
- CHEM 2301.03 and CHEM 2304.03
- CHEM 2401.03 and CHEM 2402.03
- A minimum of 15 additional CHEM credit hours at or above the 2000 level (including CHEM 4901.06 if applicable)

Chemistry as the secondary subject

- CHEM 1011.03/CHEM 1012.03, or CHEM 1021.03/CHEM 1022.03, or equivalent
- MATH 1000.03/MATH 1010.03, or equivalent
- A minimum of 30 CHEM credit hours at or above the 2000 level

BSc or BA (120 credit hour) Major in Chemistry

The 120 credit hour Major is suited to students who want to focus on Chemistry, but wish to have a program that is somewhat less constrained than the Honours program. Chemistry Majors complete a minimum of 45 credit hours in Chemistry courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories and research project classes. Like the Honours degree, the 120 credit hour Major program is accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Chemistry. See Co-operative Education Program.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Major program in Chemistry must complete the following courses:

1000 level

- CHEM 1011.03/CHEM 1012.03, or CHEM 1021.03/CHEM 1022.03, or equivalent
- MATH 1000.03/MATH 1010.03, or equivalent
- PHYC 1190.03/PHYC 1290.03, or PHYC 1300.06, or equivalent

2000 level

- CHEM 2101.03
- CHEM 2201.03
- CHEM 2301.03 and CHEM 2304.03
- CHEM 2401.03 and CHEM 2402.03

3000 level

- CHEM 3103.03
- CHEM 3201.03 or CHEM 3203.03
- CHEM 3305.03
- CHEM 3401.03 or CHEM 3404.03
- CHEM 3601.03

Additional Requirements

- Six additional hours from a combination of MATH 2XXX, any STAT course, CSCI 1100.03
- A minimum of 12 additional CHEM credit hours at or above the 2000 level, including at least 3 credit hours at or above the 3000 level
- Combined lab hours across CHEM 3XXX and 4XXX must be >190.

BSc or BA (120 credit hour) Double Major in Chemistry and another subject

The Double Major degree program allows students to combine a study of Chemistry with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Chemistry may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA. The Double Major program is not accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in BSc Double Major with Chemistry as the primary subject. See Co-operative Education Program.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Chemistry and another subject must complete the following:

Chemistry as the primary subject

- CHEM 1011.03/CHEM 1012.03, or CHEM 1021.03/CHEM 1022.03, or equivalent
- MATH 1000.03
- MATH 1010.03 or MATH 1060.03/STAT 1060.03
- CHEM 2101.03 and CHEM 2201.03
- CHEM 2301.03 or CHEM 2304.03
- CHEM 2401.03
- A minimum of 18 additional CHEM credit hours at or above the 2000 level, including 12 credit hours at or above the 3000 level

Chemistry as the secondary subject

- CHEM 1011.03/CHEM 1012.03, or CHEM 1021.03/CHEM 1022.03, or equivalent
- MATH 1000.03
- MATH 1010.03 or MATH 1060.03/STAT 1060.03
- A minimum of 30 CHEM credit hours at or above the 2000 level, of which 12 must be at or above the 3000 level

BSc or BA (90 credit hour) Minor in Chemistry

The 90 credit hour degree with Minor in Chemistry is appropriate for students who want to study some Chemistry but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Chemistry. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies and is not accredited by the Canadian Society for Chemistry. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Chemistry is usually the preferred option for students who wish to combine studies in Chemistry with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

See Minor in Chemistry section.

Minor in Chemistry

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

A BSc or BA (90 credit hour) degree program with a Minor in Chemistry is available to students in the Faculty of Science.

Requirements

- A minimum of 18 credit hours in Chemistry (CHEM) courses at the 2000 level or higher to a maximum of 36 credit hours, not including any course that cannot be used toward a Chemistry degree

Please note that entry into upper level Chemistry (CHEM) courses requires completion of six credit hours at the first year level (CHEM 1011.03/CHEM 1012.03)

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students Co-operative Education Program (Science Co-op) in Chemistry

Co-op Academic Advisor: Dr. P. Zhang peng.zhang@dal.ca

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms

interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs, or in Combined Honours or Double Major programs. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Chemistry Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Chemistry please see the departmental page www.dal.ca/faculty/science/chemistry/programs/undergraduate-studies/degree-programs/co-operative-education.html

Minors available to students in Chemistry

Minor programs allow students to develop subject specialities in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Chemistry may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Chemistry, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to student enrolled in a BSc or BA in Chemistry include:

- Certificate in Materials Science
- Certificate in Medicinal Chemistry
- Certificate in Science Leadership and Communication

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Chemistry with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Chemistry and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Chemistry and from the Faculty of Engineering in their first year of study.

Required Chemistry courses for a BSc/BEng or BA/BEng program in Chemistry

- CHEM 1011.03/CHEM 1012.03, or CHEM 1021.03/CHEM 1022.03, or equivalent
- A minimum of 18 credit hours in CHEM courses at the 2000 level or higher

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Notes

Undergraduate courses that are regularly offered by the Chemistry Department are briefly described in this section. More detailed information can be found on the departmental web site at <http://chemistry.dal.ca>. Students should note the following.

- Not all courses are offered every year. Please consult the Academic Timetable for the details of courses offered in a particular academic year.
- The first digit of the course number is the year of a student's program that a course would typically be taken, but this is not meant to be restrictive if a student has the necessary prerequisites or permission of the instructor. For example, a 3000 level course can be taken in the fourth year and 4000 level course can be taken in the third year.
- The second digit of the course number defines the general sub-discipline:

0 = General Chemistry
1 = Inorganic Chemistry
2 = Analytical Chemistry
3 = Physical Chemistry
4 = Organic Chemistry

5 = Interdisciplinary
6 = Biological Chemistry
8,9 = Research Classes

- The extension following the course number (e.g., XXXX.03) indicates the number of credit hours assigned to the course (e.g., three credit hours). Note that six credit hours are equivalent to one credit.
- All chemistry courses, unless stated otherwise, have a minimum grade requirement of C- for their prerequisite chemistry courses. Students with grades below C- in the prerequisite chemistry courses can only register with the permission of the instructor for the course.
- Unless stated otherwise, the minimum grade requirement for credit in a chemistry course is a D, except for Honours programs, where the minimum grade requirement for chemistry credit is a C (B- for Honours Qualifying Examination).

Chemistry Resource Centres

First-Year and Advanced Chemistry Resource Centres are located in Rooms 122 and 115, respectively. The former is staffed with advanced undergraduate and graduate students to help with both lab and course material. First-year students are encouraged to make use of the Concept Room, which is located in the First-Year Resource Centre. Here, first-year Instructors will be available at regularly scheduled times to provide aid with course material in a small group or one-on-one atmosphere.

The First-Year Chemistry Resource Centre also houses a number of computers with chemistry-specific programs for students to use. Additionally, there is a selection of resource materials such as molecular model kits and reference texts available to students.

Course Descriptions

CHEM 1011X/Y Concepts in Chemistry: Structure and Reactivity

CREDIT HOURS: 3

The electronic structures of atoms and molecules are used to explain the reactivity and properties of chemicals. Topics include atomic structure, bonding models, structure and shape of molecules and ions, and acid/base chemistry. It is recommended that students have Nova Scotia grade 12 chemistry or equivalent before taking this course.

COORDINATORS: J. MacDonald, P. Laws

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

EXCLUSIONS: Credit will be given for only one of the following combinations: CHEM 1011.03/1012.03 or CHEM 1021.03/1022.03 or DISP (SCIE 15XX)

CHEM 1012 Concepts in Chemistry: Energy and Equilibrium

CREDIT HOURS: 3

The principles of thermodynamics and kinetics are used to explain chemical reactivity and the principles of organic chemistry are used to develop an understanding of organic synthesis. Special topics include electrochemistry, spectroscopy, chirality, polymers, and the chemistry of living systems to illustrate the relevance of chemistry in everyday life.

COORDINATORS: J. MacDonald, P. Laws

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: CHEM 1011.03 or equivalent

EXCLUSIONS: Credit will be given for only one of the following combinations: CHEM 1011.03/ CHEM 1012.03 or CHEM 1021.03/CHEM 1022.03 or DISP (SCIE 15XX)

CHEM 1021 Engineering Chemistry I

CREDIT HOURS: 3

The electronic structures of atoms and molecules are used to explain the reactivity and properties of chemicals. Topics include atomic structure, bonding models, structure and shape of molecules and ions, and acid/base chemistry. It is recommended that students have Nova Scotia grade 12 chemistry or equivalent before taking this course.

COORDINATORS: J. MacDonald, P. Laws

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

EXCLUSIONS: Credit will be given for only one of the following combinations: CHEM 1011.03/ CHEM 1012.03 or CHEM 1021.03/CHEM 1022.03 or DISP (SCIE 15XX)

CHEM 1022 Engineering Chemistry II

CREDIT HOURS: 3

The principles of thermodynamics and kinetics are used to explain chemical reactivity and the principles of organic chemistry are used to develop an understanding of organic synthesis. Special topics include electrochemistry, spectroscopy, chirality, polymers, and the chemistry of living systems to illustrate the relevance of chemistry in everyday life.

COORDINATORS: J. MacDonald, P. Laws

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: CHEM 1021.03 or equivalent

EXCLUSIONS: Credit will be given for only one of the following combinations: CHEM 1011.03/ CHEM 1012.03 or CHEM 1021.03/CHEM 1022.03 or DISP (SCIE 15XX)

CHEM 1410 Introductory Chemistry Related to Human Health

CREDIT HOURS: 3

General introductory chemistry topics are covered with an emphasis on their relevance to health related disciplines. Subject matter includes atomic and molecular structure, nuclear chemistry, chemical reactions, energy, gases, solutions, chemical equilibria, acids and bases, and introductory organic chemistry. Basic math skills and some chemistry background are assumed.

NOTES: This course does not qualify as a chemistry credit towards a chemistry degree.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

EXCLUSIONS: CHEM 1410.03 cannot be taken concurrently with or after CHEM 1011.03/CHEM 1012.03, CHEM 1021.03/CHEM 1022.03 or DISP/SCIE 15XX

CHEM 2101 Introductory Inorganic Chemistry

CREDIT HOURS: 3

The fundamentals of inorganic chemistry are covered. Specific topics include ionic bonding and the nature of solids, the structure of atoms and simple bonding theory, coordination chemistry of the transition metals, and selected topics in main group chemistry. The preparation, analysis and observation of inorganic compounds are the laboratory assignments.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 1011.03/1012.03 or equivalent (grade of C- or better)

CHEM 2201 Introductory Analytical Chemistry

CREDIT HOURS: 3

The basic principles of analytical chemistry are presented, including chemical and instrumental methods of analysis. Instrumental techniques covered include chromatography, spectroscopy, and electrochemistry. Laboratory experiments explore all of these topics, and illustrate the techniques with practical examples.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 4

PREREQUISITE: CHEM 1011.03/1012.03 or equivalent (grade of C- or better)

CHEM 2301 Introduction to Physical Chemistry I

CREDIT HOURS: 3

The physical principles underlying chemical systems and reactivity are explored, with an emphasis on the forces between molecules and the properties of matter. Principles of thermodynamics are presented, including thermochemistry, entropy and free-energy relationships. Applications include phase equilibria, chemical equilibria, solutions, colligative properties and electrochemistry.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 1011.03/CHEM 1012.03 or equivalent; MATH 1000.03 or equivalent (grade of C- or better). PHYC 1280.03/ PHYC 1290.03 or PHYC 1300.06 is strongly recommended

CHEM 2304 Introductory Physical Chemistry II

CREDIT HOURS: 3

The physical properties of chemical systems at the level of atoms and molecules are examined. Topics include the quantum mechanical description of atoms and molecules, chemical bonding, experimental and computational methods for studying molecular systems, and the kinetics of chemical processes.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 4

PREREQUISITE: CHEM 1011.03/1012.03 or equivalent; MATH 1000.03 and MATH 1010.03 or equivalent (grade of C- or better). PHYC 1280.03/PHYC 1290.03 or PHYC 1300.06 is strongly recommended

CHEM 2401 Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy

CREDIT HOURS: 3

Organic chemistry is introduced through an examination of bonding, conformation and stereochemistry. Spectroscopic methods (MS, IR, ¹H and ¹³C NMR) are used to determine the structures of compounds. Alkanes, alkenes, alkynes and alkyl halides are presented with an emphasis on the mechanisms of their reactions.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: CHEM 1011.03/1012.03 or equivalent (grade of C- or better)

CHEM 2402 Introductory Organic Chemistry: Reactivity of Functional Groups

CREDIT HOURS: 3

Building on CHEM 2401, the properties and reactions of alcohols, ethers, amines, nitriles, the carbonyl-containing functional groups and aromatic compounds are examined. The reactions are used in synthetic sequences, and reaction mechanisms are stressed. The concepts of resonance and aromaticity become familiar. The use of spectroscopic methods is reinforced.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: CHEM 2401.03 (grade of C- or better)

CHEM 2442 Organic Chemistry for Pharmacy Students

CREDIT HOURS: 3

Aspects of organic chemistry relevant to the requirements for the degree of Bachelor of Science in Pharmacy are presented. This course does not serve as a prerequisite for any other chemistry course.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 4

RESTRICTIONS: Restricted to students in the Bachelor of Science in Pharmacy program.

CHEM 3103 Intermediate Inorganic Chemistry

CREDIT HOURS: 3

Modern bonding theories are developed using symmetry concepts. These are applied to understanding the molecular structure, reactivity and spectroscopic properties of inorganic compounds, including coordination compounds and organometallic complexes. The compounds prepared in the laboratory introduce more advanced synthetic procedures for the preparation of inorganic compounds.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 4

PREREQUISITE: CHEM 2101.03 (grade of C- or better)

EXCLUSIONS: CHEM 3101.03, CHEM 3102.03

CHEM 3201 Analytical Mass Spectrometry and Separations

CREDIT HOURS: 3

The most commonly employed instrumental techniques in chemical analysis use spectroscopy in some form or involve separations. Qualitative and quantitative analysis and the instrumentation involved are discussed in some detail for mass spectrometry. Methods of separation including solvent extraction and the various types of chromatography are presented. Laboratory experiments illustrate the above techniques with practical examples.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 4

PREREQUISITE: CHEM 2201.03 (grade of C- or better)

CHEM 3203 Advanced Analytical Laboratory

CREDIT HOURS: 3

An introduction to the fundamentals of instrumental chemical analysis is presented in a laboratory environment, with emphasis on selection of appropriate analytical techniques, sample treatment, data handling, and communication of experimental results. Instrumental techniques include chromatography, spectrophotometry, mass spectrometry, and electrochemistry, with applications in biological, environmental, forensic and health-related areas.

FORMAT: Lecture| Lab| Tutorial

LAB HOURS PER WEEK: 8

TUTORIAL HOURS PER WEEK: 1

PREREQUISITE: CHEM 2201.03 (grade of C- or better)

CHEM 3301 Quantum Mechanics and Chemical Bonding

CREDIT HOURS: 3

The fundamentals and postulates of quantum mechanics are developed from first principles, with applications to illustrative model systems, vibrations, rotations, atoms, and molecules.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2001.03 and MATH 2030.03, and CHEM 2304.03, (grade of C-or better) and PHYC 1190.03/1290.03 or 1300.06

CHEM 3305 Materials Science

CREDIT HOURS: 3

This course emphasizes the principles involved in understanding physical properties of materials, such as thermal and mechanical stability, and electrical and optical properties. All phases of matter are examined: gases, liquids, films, liquid crystals, perfect crystals, defective solids, glasses. Important processes such as photography and Xerography are explained.

NOTES: This course is the same as PHYC 3303, except CHEM 3305 has a lab and PHYC 3303 has a major term paper. Also, PHYC 3200.03 could be taken as a corequisite.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 2301.03 (grade of C- or better) or PHYC 2520.03 or PHYC 3200.03 (can be a corequisite) or EARTH 2001.03/2002.03 or ENGI 2800.03 or permission of instructor

EXCLUSIONS: PHYC 3303.03, CHEM 3303.03

CHEM 3401 Intermediate Organic Chemistry

CREDIT HOURS: 3

Topics presented include aromatics, heterocycles, amines, enolate anions and other methods for forming C-C bonds, concerted reactions, carbohydrates and some heteroatom chemistry. There is a continuing emphasis on the principles of mechanistic organic chemistry. Students work independently in the laboratory on the preparation of organic compounds.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 4

PREREQUISITE: CHEM 2401.03/2402.03 (grade of C- or better)

CHEM 3404 Intermediate Organic Chemistry—Physical Organic and Spectroscopy

CREDIT HOURS: 3

This course provides an introduction to concepts in physical organic chemistry that are used to explain structure reactivity relationships. Spectroscopic techniques are also described with an emphasis on NMR spectroscopy. The organic laboratory will focus on organic compound separation and identification.

FORMAT: Lecture| Lab

PREREQUISITE: CHEM 2401.03/2402.03 (grade of C- or better)

EXCLUSIONS: CHEM 3402.03

CHEM 3601 Chemistry of Living Systems

CREDIT HOURS: 3

The chemical principles governing a wide variety of biological processes are discussed. Structure and mechanism are emphasized in explanations and predictions of the behavior of organic compounds in nature. Specific topics include proteins, activation of carboxyl groups, peptide synthesis and biosynthesis, enzyme catalysis, coenzymes and prochirality.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 2402.03 (grade of C- or better)

CHEM 3801 Experiential Learning in Chemistry

CREDIT HOURS: 3

This is an outside-the-classroom learning experience in which students work to acquire knowledge and skills relevant to chemistry under the direction of a supervisor. Suitable work environments can be located at Dalhousie or in a commercial/industrial setting.

NOTES: To register for this course, each student must first find a supervisor willing to supervise the chemistry work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator.

PREREQUISITE: At least four of the following courses: CHEM 2101.03, CHEM 2201.03, CHEM 2301.03, CHEM 2304.03, CHEM 2401.03 and CHEM 2402.03.

RESTRICTIONS: Restricted to students in third year and above.

EXCLUSIONS: The following may not be used towards CHEM 3801: work that is part of another scheduled course at a learning institution; study that would qualify for Special Topics course; co-op work terms; and paid work. Only one experiential learning course per degree

ASSESSMENT METHOD: Pass/Fail

CHEM 4101 Advanced Main Group Chemistry

CREDIT HOURS: 3

Following a brief overview of the fundamental aspects of preparation, structure and bonding for familiar systems, selected topics are examined in some detail. An emphasis is placed on novel structure and bonding arrangements in comparison with carbon chemistry.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 3103.03 (grade of C- or better)

CROSS-LISTING: CHEM 5101.03

CHEM 4102 Advanced Transition Metal Chemistry

CREDIT HOURS: 3

Various themes of modern transition metal chemistry are examined, including but not restricted to: fundamental structure and bonding; spectroscopic characterization methods; as well as reactivity and reaction mechanisms.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 3103.03 (grade of C- or better)

CROSS-LISTING: CHEM 5102.03

CHEM 4120 Advanced Organometallic Chemistry

CREDIT HOURS: 3

Catalytic and stoichiometric transition metal mediated reactions of fundamental significance in synthetic chemistry are surveyed. Molecular orbital theory is used to understand structure and bonding in metal complexes and the reactivity properties of these species. Relevant examples from the current chemical literature are introduced.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 3103.03 (grade of C- or better)

CHEM 4205 Chemometrics

CREDIT HOURS: 3

The application of statistical tools to univariate and multivariate chemical measurements is explored. Topics include descriptive statistics, probability and probability distributions, propagation of errors, hypothesis testing, analysis of variance, experimental design, univariate and multivariate calibration, pattern recognition, exploratory data analysis and mixture analysis. Students are introduced to programming in MatLab.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 2201.03 (grade of C- or better)

CROSS-LISTING: CHEM 5205.03

CHEM 4206 Analytical Mass Spectrometry

CREDIT HOURS: 3

This course offers a thorough treatment of modern analytical mass spectrometry instrumentation, with applications towards chemical and biochemical analysis. Specific examples include characterization of pharmaceuticals and biomolecules (proteins, carbohydrates), and discussion of field portable instruments. Reaction mechanisms and spectral interpretation are discussed, but are not emphasized in this applied course.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 2201.03 (grade of C- or better)

CROSS-LISTING: CHEM 5206.03

CHEM 4301 Theory of Chemical Bonding

CREDIT HOURS: 3

This course develops molecular orbital theory from both qualitative and quantitative perspectives. Topics include the basic principles of the LCAO (Linear Combination of Atomic Orbitals) MO method, qualitative understanding of MOs in simple molecules, orbital symmetries, through to state-of-the-art techniques for computer computations of molecular properties.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 3301.03 (grade of C- or better)

CROSS-LISTING: CHEM 5301.03

CHEM 4311 Fundamental and Applied Electrochemistry

CREDIT HOURS: 3

This course provides a broad introduction to the fundamentals of electrochemistry, including electrochemical theory, double layer modelling and electrochemical methods. Additionally, important electrochemical applications are discussed, including corrosion, energy production and energy storage (fuel cells, batteries and supercapacitors).

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 2301.03 and CHEM 2304.03 (grade of C- or better)

CROSS-LISTING: CHEM 5311.03

CHEM 4401 Synthesis in Organic Chemistry

CREDIT HOURS: 3

A number of important organic reactions are examined in depth with particular attention to regioselectivity and the development of relative or absolute stereochemistry. Applications of these reactions in the synthesis of complex molecules are illustrated with recent examples from the literature.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 3401.03 (grade of C- or better)

CROSS-LISTING: CHEM 5401.03

CHEM 4402 Organic Structure Determination

CREDIT HOURS: 3

Nuclear magnetic resonance spectroscopy and mass spectrometry are emphasized in solving structural problems. Topics include 2D NMR, correlation of structure with chemical shifts and coupling constants, operation of NMR spectrometers, NMR relaxation, analysis of spectral patterns, the vector model of 1D and 2D experiments and ionization methods in mass spectrometry.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 3404.03 (grade of C- or better)

CROSS-LISTING: CHEM 5402.03

CHEM 4502 Polymer Science

CREDIT HOURS: 3

Aspects of synthesis, analysis, characterization, structure and uses of synthetic and naturally occurring macromolecules are explored. Emphasis is on the application of standard methods of organic synthesis, analytical separations, and physico-chemical characterization. There is no laboratory, but students will do an independent literature project.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 2201.03 and 2301.03 and 2304.03 and 2402.03 (grade of C- or better)

CHEM 4504 Diffraction Techniques in Solid State Chemistry

CREDIT HOURS: 3

All chemical elements and compounds can exist as crystalline solids. This course studies the arrangements of atoms and molecules in such solids and examines the methods used to determine these structures. Particular emphasis is placed on the techniques of X-ray crystallography.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: CHEM 2101.03 (grade of C- or better) and MATH 2001.03 and 2030.03

CHEM 4595 Atmospheric Chemistry

CREDIT HOURS: 3

Fundamental introduction to the physical and chemical processes determining the composition of the atmosphere and its implications for climate, ecosystems, and human welfare. Origin of the atmosphere. Nitrogen, oxygen, carbon, sulfur cycles. Atmospheric transport and turbulence. Stratospheric ozone. Oxidizing power of the atmosphere. Regional air pollution: aerosols, smog, acid rain.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Math 1000, PHYC 1280.03/1290.03 or PHYC 1300 and CHEM 1011/1012 (grade of C- or better)

CROSS-LISTING: PHYC 4595.03, OCEA 4595.03, OCEA 5595.03

CHEM 4601 Principles of Biomolecular and Drug Molecule Design

CREDIT HOURS: 3

The course covers both general principles and biochemical considerations in drug design. The fundamental goal is to give students the necessary tools to design new chemical structures as putative therapeutics for a human or veterinarian pathological problem. Students in chemistry are strongly recommended to take CHEM 3601.03 prior to registering in this course.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 2402.03 (grade of C- or better)

CROSS-LISTING: CHEM 5601

CHEM 4602 Biophysical Characterization of Macromolecules

CREDIT HOURS: 3

Covers methods allowing determination of sub-molecular and atomic-level structure and dynamics of biomacromolecules in physiological settings (e.g. solution-state or lipid bilayers) including: fluorescence, electronic and vibrational circular dichroism and NMR spectroscopy; light vs. X-ray vs. neutron scattering; and, single molecule methods.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 1010.03, BIOC 3200.03 or CHEM 3601.03, CHEM 2303.03 or CHEM 2301.03, CHEM 2304.03. Recommended: PHYC 1280.03/1290.03.06 or PHYC 1300.06

CROSS-LISTING: BIOC 4702.03, CHEM 5602.03, BIOC 5702.03

CHEM 4801X/Y Research Project in Chemistry I

CREDIT HOURS: 3

Students carry out research projects under the supervision of a faculty member, and submit a report and make an oral presentation.

PREREQUISITE: CHEM 2101.03, 2201.03, 2301.03, 2304.03 (or 2302.03), 2401.03 and 2402.03 plus at least one full credit at the 3000 or 4000 level in the area of interest with an average grade of at least B-, or permission of instructor; GPA 3.0

CHEM 4802X/Y Research Project in Chemistry II

CREDIT HOURS: 3

Students carry out research projects under the supervision of a faculty member and submit a report and make an oral presentation. This course is intended for those students in the Major program who wish greater exposure to independent scientific research.

PREREQUISITE: CHEM 4801.03

CHEM 4901X/Y Honours and Major Research Project

CREDIT HOURS: 6

This course is required for students in the latter stages of the honours program. Students carry out research projects under the supervision of a faculty member and submit reports and make oral presentations to the Department.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: A minimum GPA of 3.0 is required for this course. Permission of instructor.

Email Address: earth.sciences@dal.ca

Introduction

Earth Science is a holistic discipline whose focus of study is the Earth System. It includes the geosciences which address the solid earth, but necessarily also extends to study of the atmosphere, hydrosphere, oceans and biosphere. Broadly, Earth scientists work to understand

1) how the Earth System works;

2) how it evolved to its current state;

- 3) the processes for and distribution of Earth's physical resources such as fossil fuels, minerals, and water; and
- 4) limits to and consequences of the use of physical resources by humans.

Examples of specific questions within Earth Sciences include: How was the Earth formed? What is its composition? Where do we look for oil? Where do we look for reliable water supplies? What are the relationships between glaciers, rivers, and climate, both now and in the deep past? To answer questions such as these, Earth scientists typically use methods from the foundation sciences -- physics, chemistry, biology, mathematics - along with discipline-specific methods and modern tools including computing and satellite mapping. Some Earth scientists also consider or draw expertise from the social sciences, particularly as humans collectively become a significant agent in modifying components of the Earth System.

Career paths

Earth Science is of tremendous importance to Canadians and can be an immensely satisfying profession. Earth scientists are employed in universities, government agencies, the oil, gas and mineral industries, environmental consulting, and beyond. The Earth Sciences department offers programs and courses designed to meet the needs of students with varying goals for her/his undergraduate education. In general, the following summary recommendations can be made:

- To prepare to become a professional geoscientist, students should enroll in a 120 credit hour BSc or BA degree (Major, Honours or Combined) and meet the knowledge requirements for professional registration by completing one or both of the Certificates for Geoscientists.
- To prepare for postgraduate study (MSc or PhD) in Earth Sciences or a related field, students should pursue a BSc Concentrated Honours in Earth Sciences or Combined Honours with a related subject, and consider one of the Certificates listed above.
- Students seeking an undergraduate preparation for Law, Education, or another professional program outside of Earth Sciences, or to complement another subject, should consider a BSc or BA Major or Double Major.
- Electives courses and Minors: Earth Sciences is about understanding how the Earth 'works'. As such it makes an excellent general education subject. Several EARTH courses that may be suitable electives are listed below.

General interest courses

These courses are designed to be accessible to students who want to know something about the Earth, but whose major field of study is not Earth Sciences. For example, the course may be of interest to an economics student concerned with resources, a history student interested in the role played by Canada's geological framework in the development of transportation, a biology student interested in faunal environments on the seafloor.

Courses without prerequisites

- EARTH 1030.03: Introduction to Physical Geography
- EARTH 1060.03: Earthquakes, Volcanoes and Natural Disasters
- EARTH 1080.03: Geology I (lab course)

Courses with prerequisites

- EARTH 1090.03: Geology II (lab course)
- EARTH 1091.03: Geology II (non-lab course)
- EARTH 2410.03: Environmental Issues in Earth Sciences
- EARTH 2420.03: Dinosaurs
- EARTH 2205.03: Introduction to Paleontology (lab course)
- EARTH 3440.03: Geomorphology

High School Preparation

Students in high school who plan a career in Earth Sciences, should have Advanced Math or Pre-calculus Math, plus Chemistry and Physics. Note that only Mathematics is required as a prerequisite, but the others are strongly recommended. A student should ideally aim to make up deficiencies in high school preparation in the first year at Dalhousie.

Degree Programs

The Department of Earth Sciences offers the following degree programs in Earth Sciences

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*

- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Earth Sciences
- Minor in Earth Sciences

* BSc Co-op option available

* May be combined with Minor programs from other disciplines

Departmental Requirements for these programs are described below. In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Earth Sciences undergraduate academic advisor.

Staff

Dean

Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Chair of Department

Jamieson, R. A., BSc (Dalhousie), PhD (MUN)

Undergraduate Advisor

Plug, L. (902 494-1200)

Co-op Academic Advisor

Wach, G. (902 494-8019)

Graduate Coordinator

Gosse, J. (902 494-6632)

Professors Emeriti

Cooke, H. B. S., MSc, DSc (Witwatersrand)

Gibling, M. R., BA (Oxon), PhD (Ottawa)

Milligan, G. C., MSc (Dalhousie), PhD (Harv)

Reynolds, P. H., BSc (Toronto), PhD (UBC)

Scott, D. B., BSc (Washington), MSc (Washington State), PhD (Dalhousie)

Zentilli, M., BSc (Chile), PhD (Queen's), PGeo

Professors

Grujic, D., BSc (Belgrade), PhD (ETH Zurich)

Jamieson, R. A., BSc (Dalhousie), PhD, (MUN)
Wach, G. D., BA (Hons) (Western Ontario), MSc (South Carolina), DPhil (Oxford)

Associate Professors

Culshaw, N., BA (Keele), PhD (Ottawa)
Fedortchouk, Y., MSc (Moscow State Univ), PhD (Victoria)
Gosse, J. C., BSc (MUN), PhD (Lehigh University)
Nedimovic, M., BSc (Belgrade), MSc, PhD (Toronto)

Assistant Professors

Coutand, L., BSc, PhD, (Univ. of Rennes, France)
Plug, L., BA (McGill), PhD (Univ. of Alaska - Fairbanks) (cross appointment with College of Sustainability)
Sterling, S., PhD (Duke Univ.) (cross appointment with Environmental Science)

Senior Instructors

Ryan, A. M., BSc (Univ College Dublin), MSc, BEd (Acadia), MEd (MSVU), PhD (Dalhousie) cross appointed with Environmental Science
Walls, C., BSc, MSc (Dalhousie)

Instructors

Cox, R., BSc Hons (Glasgow Univ.), MSc (Glasgow Univ.), PhD (MUN)
Young, M., BSc (Dalhousie), MSc (Queen's)

Cross Appointment

Rainham, D., PhD (Ottawa), Major appointment in Environmental Science

Adjuncts

Anderson, A., BSc (Univ. of Windsor), MSc (Manitoba), PhD (Queen's), St. Francis Xavier
Barr, S., BSc (UNB), PhD (UBC), Acadia University
Brown, D., BSc (Dalhousie), Canada-NS Offshore Petroleum Board (CNSOPB)
Campbell, C., BSc Honours (SMU), PhD (Dalhousie)
Clarke, B., BSc, MSc (Toronto), PhD (Edinburgh)
Deptuck, M., BSc (St. Mary's Univ.), PhD (Dalhousie) Canada-NS Offshore Petroleum Board
Dostal, J., BSc (Charles), PhD (McMaster), St. Mary's University
Dyke, A., BSc Honours (MUN), MA, PhD (Univ of Colorado)
Fedak, T. J., BA (NSCAD), PhD (Dalhousie)
Fensome, R., BSc (Sask), MSc (Sask.), PhD (Nottingham), GSC Atlantic
Forbes, D., BA Honours (Carleton), MA (U of T), PhD (UBC)
Froese, D. G., BSc (Univ of Lethbridge), MSc, PhD (Univ of Calgary)
Gerbi, C., AB (Amherst College), MS (UC Davis), PhD (Univ of Maine)
Gibling, M. R., BA (Oxon), PhD (Ottawa)
Gibson, D., BA (Colgate Univ), MSc, PhD (Carleton)
Godin, L., BSc, MSc (Univ du Que a Montreal), PhD (Carleton)
Hanley, J., PhD (Toronto), St. Mary's University
Jansa, L., BSc, MSc (Masaryk State U, Czechoslovakia), PhD (Charles), GSC Atlantic, retired
Keen, C., BSc Honours, MSc (Dalhousie), PhD (Cambridge)
Kellman, L., BA (McMaster), MSc (McGill), PhD (Univ. du Quebec à Montreal), St. Francis Xavier University
Kettanah, Y., BSc (Baghdad Univ.), PhD (Southampton Univ. UK), Selahaddin University
Kosters, E., BSc (Groningen), MSc (Univ of Amsterdam), PhD (Louisiana State Univ)
Laroque, C., BSc (Sask.), MSc, PhD (Univ. of Victoria), Mt. Allison University
Lavigne, M., BScF (UNB), MPhil, PhD (Yale)
Louden, K. E., BA (Oberlin), MEd (Temple), PhD (MIT)
Marsh, J., BS (Univ of California, Santa Barbara), MS (San Diego State Univ), PhD (Univ of Maine)

Melchin, M., MSc (Waterloo), PhD (Western), St. Francis Xavier University
Mosher, D., BSc (Acadia), MSc (Memorial), PhD (Dalhousie) GSC Atlantic
Mudie, P. J., BSc (Cape Town), BSc (Leicester), PhD (Dalhousie)
Mukhopadhyay, P., BSc, MSc, PhD (Jadavpur Univ), Global Geoenergy Research Limited
Murphy, J. B., BSc (Dublin), MSc (Acadia), PhD (McGill), St. Francis Xavier University
Parsons, M., BSc (Dalhousie), PhD (Stanford), GSC Atlantic
Pe-Piper, G., BSc (Athens), PhD (Cantab), St. Mary's University
Piper, D. J. W., BA (Hons) (St Catharine's Col, Cantab), MA (Cantab), PhD (Darwin Col, Cantab), GSC Atlantic
Richards, F. W., BSc (Bristol), MSc (Imperial College), ESSO Australia
Risk, D., BSc (Toronto), MSc (St. FX), PhD (Dalhousie), St. Francis Xavier University
Salisbury, M. H., BSc (MIT), MSc, PhD (Wash), GSC Atlantic Emeritus Scientist
Scott, D., BSc, MSc (Wash State), PhD (Dalhousie)
Shaw, C. S. J., BSc Honours (Univ of London), MSc, PhD (Western Ontario)
Shimeld, J., B Applied Sci (Waterloo), MSc (Dalhousie), GSC Atlantic
Simpson, D., BSc Honours, MSc (Dalhousie), PhD (Australian National Univ)
Stockli, D., BSc, MSc (ETH Zurich), PhD (Stanford Univ), University of Kansas
Swinden, S., BSc (Dalhousie), MSc, PhD (Memorial), NS Dept of Natural Resources, retired
Tibert, N., BSc, MSc (Dalhousie), PhD (Massachusetts, Amherst), University of Mary Washington
Vincent, H., BSc (Univ of West Indies), MSc (Imperial College), PhD (Dalhousie)
Waldron, J., BA (Cambridge), PhD (Edinburgh), University of Alberta
Warren, C., BA (Oxford), MSc (Univ College London), DPhil (Oxford)
Watson, N., BSc Honours (Univ of Manitoba), Atlantic Petrophysics Limited
Webster, T., BSc (UNB), MSc (Acadia), PhD (Dalhousie), COGS, Lawrencetown, NS
Whipp, D. M., BSc, PhD (Univ of Michigan)
Wild, P., BAsC (UBC), PhD (UVic), PEng
Zentilli, M., BSc (Univ of Chile), PhD (Queen's)

Core Requirements for all BSc and BA (120 credit hour) Degrees

All 120 credit hour degrees in Earth Sciences (Concentrated Honours, Combined Honours, Major, Double Major) share the following required courses:

1000 level

- EARTH 1080.03 and EARTH 1090.03, or equivalent
- MATH 1000.03 (recommended) or MATH 1215.03 or equivalent
- CHEM 1011.03 AND CHEM 1012.03

Students in the Integrated Science Program should contact the department regarding first year equivalencies.

2000 level

- EARTH 2000.015: Earth Sciences Field School
- EARTH 2001.03: Earth Materials Science I
- EARTH 2002.03: Earth Materials Science II
- EARTH 2110.03: Field Methods (Prerequisite: EARTH 2000.015)
- EARTH 2203.03: Sediments and Sedimentary Rocks
- EARTH 2380.03: Geochemistry

3000 level

- EARTH 3140.03: Structural Geology
- EARTH 3303.03: Stratigraphy

Field Work

Field excursions are part of many courses and are conducted at appropriate times during the session. In addition, some optional field excursions may be held each year. Note that some mandatory field trips may be held on Saturdays or Sundays. Field Schools EARTH 2000 and EARTH 3000, which are required for most degree programs, are offered for about 10 days in late August, just before the start of the university Fall term.

BSc or BA (120 credit hour) Concentrated Honours in Earth Sciences

Students who want a challenging program that includes an in-depth background in Earth Sciences and an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Earth Sciences with a minimum GPA of 3.5 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of EARTH 4200.06.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Earth Sciences.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Earth Sciences should consult with an Earth Sciences Academic Advisor early in their studies.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in the Concentrated Honours program in Earth Sciences must complete the following:

Core Requirements (Section A)

1000 level

- MATH 1010.03, or MATH 2030.03, or MATH 2300.03, or STAT 1060.03 or STAT 2060.03
- PHYC 1190.03 and PHYC 1290.03, or PHYC 1300XY.06

2000 level and higher

- EARTH 2270.03: Intro to Applied Geophysics
- EARTH 3000.015: Intermediate Field School
- Minimum of 21 additional credit hours of EARTH courses at or above the 2000 level, of which at least 15 credit hours must be at or above the 3000 level
- EARTH 4200XY.06: Honours Thesis

Additional Requirements

- Minimum GPA of 3.5 in Honours subject courses, with no grade less than a C
- First-class Honours; Minimum GPA of 3.7 in Honours subject courses, with at least an A- in EARTH 4200.06

BSc or BA (120 credit hour) Combined Honours in Earth Sciences and another subject

Students who wish to study Earth Sciences in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Earth Sciences may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Earth Sciences, this requirement is satisfied through EARTH 4200.06.

A **Co-op option** is available for students enrolled in BSc Combined Honours with Earth Sciences as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Earth Sciences and another subject must complete the following:

Earth Sciences as primary subject

- Core requirements (Section A)

1000 level

- One of MATH 1010.03, MATH 2030.03, MATH 2300.03, STAT 1060.03 STAT 2060.03 (BSc only)
- PHYC 1190.03/PHYC 1290.03, or PHYC 1300.06

2000 level and higher

- EARTH 2270.03: Intro to Applied Geophysics
- EARTH 3000.015: Intermediate Field School
- A minimum of nine additional credit hours in EARTH at or above the 3000 level, which includes EARTH 4200XY.06 (Honours Thesis)

Students in Combined Honours should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student's particular subject combination.

Earth Sciences as secondary subject

- Core requirements (Section A)

1000 level

- One of MATH 1010.03, MATH 2030.03, MATH 2300.03, STAT 1060.03 STAT 2060.03 (BSc only)
- PHYC 1190.03/PHYC 1290.03, or PHYC 1300.06

2000 level and higher

- EARTH 2270.03: Intro to Applied Geophysics
- EARTH 3000.015: Intermediate Field School
- A minimum of three additional credit hours in EARTH at or above the 3000 level

Students in Combined Honours should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student's particular subject combination.

BSc or BA (120 credit hour) Major in Earth Sciences

The 120 credit hour Major is suited to students who want to focus on Earth Sciences, but wish to have a program that is somewhat less constrained than the Honours program. Earth Sciences Majors complete a minimum of 42 credit hours in Earth Sciences courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories and research project classes.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Earth Sciences.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Earth Sciences must complete the following courses:

- Core requirements (Section A)

1000 level

- One of MATH 1010.03, MATH 2030.03, MATH 2300.03, STAT 1060.03 STAT 2060.03 (BSc only)

2000 level and higher

- EARTH 3000.015: Intermediate Field School
- A minimum of 18 credit hours in EARTH at or above the 3000 level

BSc or BA (120 credit hour) Double Major in Earth Sciences and another subject

The Double Major degree program allows students to combine a study of Earth Sciences with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Earth Sciences may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A **Co-op option** is available for students enrolled in BSc Double Major with Earth Sciences as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Earth Sciences and another subject must complete the following:

Earth Sciences as the primary or secondary subject

- Core requirements (Section A)

1000 level

- One of MATH 1010.03, MATH 2030.03, MATH 2300.03, STAT 1060.03 STAT 2060.03 (BSc only)

2000 level and higher

- EARTH 3000.015: Intermediate Field School
- A minimum of six credit hours in EARTH at or above the 3000 level

Students in Double Major programs should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student's particular subject combination.

BSc or BA (90 credit hour) Minor in Earth Sciences

The 90 credit hour degree with Minor in Earth Sciences is appropriate for students who want to study some Earth Sciences but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Earth Sciences. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Earth Sciences is usually the preferred option for students who wish to combine studies in Earth Sciences with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

See Minor in Earth Sciences section.

Minor in Earth Science

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

A BSc or BA (90 credit hour) degree program with a Minor in Earth Sciences is available to students in the Faculty of Science.

Requirements

Students starting in 2014-15:

- EARTH 1080.03 and EARTH 1090.03
- A minimum of 18 credit hours in Earth Sciences courses at the 2000 level or higher, must include at least six credit hours at the 3000 level or higher

Students starting prior to Fall 2014-15:

- EARTH 1080.03 and one of EARTH 1030.03, EARTH 1060.03, EARTH 1090.03, EARTH 1091.03
- A minimum of 18 credit hours in Earth Sciences courses at the 2000 level or higher, must include at least six credit hours at the 3000 level or higher

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students Co-operative Education Program (Science Co-op) in Earth Sciences

Co-op Academic Advisor: Dr. G. Wach grant.wach@dal.ca

Science Co-op is a program of academic study in a science subject, combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Earth Sciences, or in Combined Honours or Double Major programs with Earth Sciences as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Earth Sciences Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html

Minors available to students in Earth Sciences

Minor programs allow students to develop subject specialities in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Earth Sciences may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Earth Sciences, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward

obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a BSc or BA program in Earth Sciences include:

- Certificate in Environmental Impact Assessment (EIA)
- Certificate in Geographic Information Science (GIS)
- Certificate in Information Technology
- Certificate in Materials Science
- Certificate in Science Leadership and Communication
- Certificates for Geoscientists: Geology, Environmental Geoscience

Knowledge Requirements for Professional Practice as a Geoscientist

Geoscience is a regulated profession in most of Canada. Individual provinces and territories have acts that restrict the practice of geoscience to individuals who are registered members of professional associations. In Nova Scotia, the Association of Professional Geoscientists of Nova Scotia (APGNS) is the licensing body which fulfils this mandate. APGNS and other provincial geoscience associations, under the guidance of Geoscientists Canada, ensure high standards of geoscience practice and education.

Students who intend to pursue geoscience as a profession, or simply want the most in-depth education in geoscience, should complete the Certificate in Geology, or Certificate in Environmental Geoscience, or both. These Certificates are comprehensive sequences of courses intended to prepare a student for professional practice in modern geoscience, and to meet formal requirements for registration in the Geology and Environmental Geoscience streams, respectively.

Certificate requirements are more specific and stringent than degree requirements in terms of the courses required in Earth Sciences and in the Foundation Sciences (mathematics and physics in particular). Earth Science students can complete the Certificates within a 120 credit hour degree by careful selection of EARTH courses and Foundation Science courses, and this should begin in the first year. Less than judicious course selection, and/or combining Earth Science with another subject which also has numerous specific course requirements, may result in a student needing extra courses (beyond the 120 credit hours) in order to complete the Certificate(s) and meet knowledge requirements for registration.

These Certificates have been developed within Dalhousie University with the intention of meeting the knowledge requirements for registration for Professional Geoscience. However, registration occurs in steps after graduation and is administered by professional associations whose requirements may change over time and may vary between jurisdictions. Consult the professional associations -- Geoscientists Canada and APGNS - for additional information on registration.

Shared requirements for the Certificate in Geology and the Certificate in Environmental Geoscience

- EARTH 1080.03/ERTH 1090.03 (for students starting program in 2014-15) or EARTH 1080.03 and one of EARTH 1030.03, EARTH 1060.03, EARTH 1090.03 (earlier years)

Foundation Sciences

- CHEM 1011.03/CHEM 1012.03
- PHYC 1190.03/PHYC 1290.03
- MATH 1000.03, or MATH 1215.03 or MATH 1280.03 or MATH 1500X.03
- MATH 1010.03 or MATH 1290.03 or MATH 1500Y.03
- One of MATH 2030.03, MATH 2300.03, MATH 2001.03, MATH 2051.03, MATH 2120.03, STAT 1060.03, STAT 2060.03
- An additional two courses from MATH, PHYC, CHEM, STAT, CSCI, or BIOL. Each course must count toward a BSc degree in that subject.

Earth Sciences

- EARTH 2000.015: Field School
- EARTH 2001.03: Earth Materials Science I
- EARTH 2002.03: Earth Materials Science II
- EARTH 2110.03: Field Methods
- EARTH 2203.03: Sediments and Sedimentary Rock
- EARTH 2270.03: Introduction to Applied Geophysics
- EARTH 2380.03: Geochemistry
- EARTH 3000.015: Computer Camp
- EARTH 3140.03: Structural Geology
- EARTH 3303.03: Stratigraphy
- EARTH 3440.03: Geomorphology
- An additional 15 credit hours in EARTH at or above the 2000 level, including nine credit hours at or above the 3000 level.

Certificate in Geology (in addition to shared requirements)

- EARTH 3010.03: Igneous Petrology
- EARTH 3020.03: Metamorphic Petrology
- EARTH 4350.03: Tectonics

Certificate in Environmental Geoscience (in addition to shared requirements)

- EARTH 4410.03: Environmental Geoscience
- Two of
 - EARTH 3400.03 Fundamentals of Hydrogeology
 - EARTH 3402.03 Practical Hydrogeology
 - EARTH 3701.03 Fundamentals of Hydrology
 - EARTH 4520.03 GIS Applications to Geological Sciences
 - EARTH 4530.03 Environmental Remote Sensing

NOTE: EARTH 3500 is a prerequisite for EARTH 4520 and EARTH 4530

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Program with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Earth Sciences and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see undergraduate advisors from Earth Sciences and from the Faculty of Engineering in their first year of study.

Required Earth Sciences courses for a BSc/BEng or BA/BEng program in Earth Sciences

- EARTH 1080.03 and EARTH 1090.03 (students starting in 2014-15 or later)
- EARTH 1080.03 and one of EARTH 1030.03, EARTH 1060.03, EARTH 1090.03, EARTH 1091.03 (earlier years)
- A minimum of 18 credit hours in EARTH at the 2000 level or higher, which must include at least six credit hours at the 3000 level or higher

Field Work

Field excursions are part of many courses and are conducted at appropriate times during the session. In addition, some optional field excursions may be held each year. Note that some mandatory field trips may be held on Saturdays or Sundays. Field Schools EARTH 2000 and EARTH 3000, which are required for most degree programs, are offered for about 10 days in late August, just before the start of the university Fall term.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Notes

NOTE: Some mandatory field trips may be held on Saturdays or Sundays. Check with Instructor.

Course Descriptions

ERTH 1030 Introduction to Physical Geography

CREDIT HOURS: 3

This non-lab science course examines the nature of weather and climate, earth's surface features and processes, and internal processes that contribute to landform development. An integral component of the course is an exploration of the representation and interpretation of physical geographic data through the examination of a variety of maps.

NOTES: There are no pre-requisites for this course, and students may take this course in addition to any other first year Earth Science course.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

TUTORIAL HOURS PER WEEK: 1

CROSS-LISTING: GEOG 1030.03

ERTH 1060 Earthquakes, Volcanoes and Natural Disasters

CREDIT HOURS: 3

Earthquakes, meteorite impacts, rapid climate change, volcanic eruptions, hurricanes, landslides, solar flares, and floods are natural disasters that affect our economy, public policy, and safety. Where, why and how frequently do natural disasters occur? Are predictions possible? Are media portrayals of risk and damage realistic? This course, aimed at the nonspecialist, investigates these intriguing questions. Excerpts of "disaster films", in conjunction with lectures and discussions are used to identify the causes, consequences and sometimes erroneous perceptions of natural hazards. Examples from Atlantic Canada and contemporary disasters are used to assess local risk and real-time events worldwide.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

CROSS-LISTING: GEOG 1060.03

ERTH 1080 Geology I

CREDIT HOURS: 3

This course focuses on the solid earth (geosphere) and how it evolved throughout earth's vast history, and continues to evolve today. The processes involved are recorded in the rocks and minerals of our earth, and we explore these natural processes and materials as a way to understanding our earth. The course meets the needs of students who require a science course with a lab component, is a required prerequisite course for all Earth Science majors, and serves as an introduction for all those interested in Earth Science. No previous knowledge of geology is required.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

EXCLUSIONS: Credit will be given for only one of EARTH 1080, 1010, 1040 or 1041.

ERTH 1090 Geology II

CREDIT HOURS: 3

Earth systems introduced in Geology I are explored in greater detail, with an emphasis on change through time, earth resources, and on geologic systems that are connected to human actions. This course provides a strong background to pursue further work in the environmental sciences and is the required course for Earth Sciences majors.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 1080 is a pre- or co-requisite for EARTH 1090 or EARTH 1091.

EXCLUSIONS: credit will only be given for one of EARTH 1090, 1091, 1020, or 1050

ERTH 1091 Geology II

CREDIT HOURS: 3

ERTH 1091 has the same lecture content and lecture time as 1090, but does not have a corresponding lab session.

NOTES: This course is not offered every year. Please consult department.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: EARTH 1080.03 or permission of instructor.

EXCLUSIONS: Credit will be given for only one of EARTH 1091.03, EARTH 1090.03, EARTH 1020.03 or EARTH 1050.03.

ERTH 2000 Earth Sciences Field School

CREDIT HOURS: 1.5

This course provides 10 to 11 days of introductory field methods in a broad range of Earth Science disciplines. A wide variety of Earth materials and geological processes are examined in the field through thematic excursions throughout southern Nova Scotia led by a variety of Earth Sciences faculty. Skills taught are soil, sediment and rock classification; note-taking, compass, map-reading and traversing; and geological analysis and report writing. The course is held at the end of summer before regular courses in the Fall term and should be taken by those enrolling in second-year level Earth Sciences courses: EARTH 2001.03, 2002.03, 2110.03, 2203.03. PREREQUISITE: EARTH 1080.03 (or SCIE 1505.18) and EARTH 1090 (or SCIE 1515 or SCIE 1530)

ERTH 2001 Earth Materials Science I

CREDIT HOURS: 3

Earth Materials Science I EARTH 2001 introduces the chemical/physical properties of minerals, their origins and distribution. Labs include mineral identification, crystal chemistry, crystallography, and optical mineralogy. X-ray diffraction and electron microprobe methods are introduced. Students who have not taken CHEM 1010 (or equivalent) are encouraged to take this concurrently.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 1080 (or SCIE 1505) and EARTH 1090 (or SCIE 1515 or SCIE 1530) and CHEM 1011/CHEM 1012 or CHEM 1021/CHEM 1022: Chemistry majors should consult the department.

ERTH 2002 Earth Materials Science II

CREDIT HOURS: 3

This course builds on the knowledge of mineral chemistry, crystal structure, and identification techniques gained in EARTH 2001. The use of mineral assemblages and textures to classify rock types is discussed in class and labs. In the labs, students use the petrographic microscope to look at a variety of igneous, sedimentary, and metamorphic rocks in thin section.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 2001.03

ERTH 2110 Field Methods

CREDIT HOURS: 3

This is intended as an introduction to field techniques useful to the practicing geologist, particularly those concepts essential for the accurate field description and identification of rocks and the use and construction of geological maps. Computer techniques and elementary structural geology are also considered.

NOTES: Attendance at the Field School (ERTH 2000.015) is mandatory prior to attendance at this course.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 2000.015

ERTH 2203 Sediments and Sedimentary Rocks

CREDIT HOURS: 3

The course deals with physical, chemical and biological processes that generate modern sediments, and their conversion to sedimentary rocks through time. Labs provide a practical introduction to sediment analysis and to a range of sedimentary structures and rock types. Fieldwork includes description of beaches and bedrock in the Halifax area.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 1080 (or SCIE 1505) and EARTH 1090 (or SCIE 1515 and SCIE 1530)

ERTH 2205 Introduction to Paleontology

CREDIT HOURS: 3

This course encompasses an introduction to all the major invertebrate groups that are important in the fossil record. It begins with introduction of the first life forms, basic taxonomy and uses of fossils followed by lectures and laboratories on each major group.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 2203.03 or permission of the instructor

ERTH 2270 Introduction to Applied Geophysics

CREDIT HOURS: 3

An Introduction to using physical principles to explore the Earth's subsurface, with an emphasis on near-surface applications. Topics include seismic, gravity, magnetic, electrical, and electromagnetic surveying techniques, and their application in prospecting, hydrogeology, environmental assessments, and well-logging. The geophysics field school, normally conducted during the last week of April, is an integral part of this course.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: EARTH 1080 (or SCIE 1505) and first year Mathematics and PHYC 1280.03/PHYC 1290.03 or PHYC 1300X/Y (or SCIE 1515Y or SCIE 1530Y)

CROSS-LISTING: PHYC 2270.03

ERTH 2380 Geochemistry

CREDIT HOURS: 3

An introduction to the principles of chemistry applied to geologic systems, including an overview of the chemistry of rocks and minerals, isotopes in the geologic environment, processes that control the release and mobility of contaminants in the environment, and the use of geochemical data in solving geologic and environmental problems.

FORMAT: Lecture| Tutorial

PREREQUISITE: EARTH 1080/ERTH 1090 or SCIE 1515 or SCIE 1530, and EARTH 2001 & CHEM 1011/CHEM 1012 or equivalent, or permission of the instructor

ERTH 2410 Environmental Issues in Earth Sciences

CREDIT HOURS: 3

Geology underlies many of the environmental problems facing humans today. Topics include environmental aspects of energy and mineral resource, geologic hazards, geologic connections to pollution and waste disposal, and the role that water plays in its various guises. Canadian examples are incorporated where appropriate.

Approved with Canadian Studies.

NOTES: This course is not offered every year. Please consult department in the spring for further information.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: One of: EARTH 1080, EARTH/GEOG 1030, EARTH/GEOG 1060, ENVS 1000, SUST 1001 with a grade of B or above, or DISP with Earth Sciences

CROSS-LISTING: CANA 2410, ENVS 2410

EXCLUSIONS: This class is not available for Earth Sciences Majors

ERTH 2420 Dinosaurs

CREDIT HOURS: 3

Students will consider the origin, evolution and extinction of non-avian dinosaurs. What are dinosaurs? Why were some dinosaurs so big? What did dinosaurs eat? How fast could dinosaurs run? Were dinosaurs good parents? To answer these questions, we will examine the nature of evidence gathered from dinosaur fossils and their surrounding rocks.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: EARTH 1080.03 or any two of EARTH 1010, EARTH 1020, EARTH 1030, EARTH 1040, EARTH 1041, EARTH 1050, EARTH 1060, EARTH 1090, EARTH 1091, or SCIE 1515, SCIE 1515 or SCIE 1530, or permission of instructor

ERTH 2430 Forensic and Medical Geology

CREDIT HOURS: 3

Designed for non-earth sciences majors, this course explores the evolving fields within the realm of geosciences. Forensic and medical geology share a common thread in that both depend upon identifying potential geologic and geoenvironmental sources of evidence, and applying this information to solve a larger problem, either legal or health-related.

NOTES: This course is not offered every year. Please consult department in the spring for further information.

FORMAT: Lecture| Tutorial

PREREQUISITE: EARTH 1080 and one other Earth Sciences course or instructor's permission.

ERTH 3000 Intermediate Field School

CREDIT HOURS: 1.5

This course provides 10 days of geological mapping in the field and entails (1) identifying, measuring and localizing rocks and geological structures, (2) drawing geological maps from field observations and (3) writing a report describing and interpreting the data. Strong mapping skills are crucial to future geologists. Note: This class is held at the end of summer before regular classes in the fall term and is required for BSc Major and Honours programs.

PREREQUISITE: EARTH 2000.015, EARTH 2002.03, EARTH 2110.03, EARTH 2203.03

ERTH 3010 Igneous Petrology

CREDIT HOURS: 3

Igneous petrology is the study of the field relations, mineralogy, texture, and geochemistry of volcanic and plutonic rocks. Lectures discuss the classification and graphical representation of igneous rocks; the production, differentiation, and emplacement of magma in different tectonic environments. Practical work consists of laboratory petrographic examination and two field trips.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 2002.03 and EARTH 2380.03

ERTH 3020 Metamorphic Petrology

CREDIT HOURS: 3

Metamorphic petrology is the study of the way in which pre-existing igneous, sedimentary, and metamorphic rocks respond to changes in pressure, temperature, and geochemical environment. Metamorphic reactions, deformation and recrystallization, the stability relations of minerals and mineral assemblages under various physical and chemical conditions, and the concept of metamorphic facies are discussed. The relationship of metamorphism to other geological processes is considered. In the labs, microscopic mineralogy and texture are used to decipher the metamorphic history of rocks.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 3010.03

ERTH 3140 Structural Geology

CREDIT HOURS: 3

Introduction to the behaviour of rocks during deformation, stressing the geometrical aspects of rock structures. Students learn: (a) geometrical principles to identify, describe, and interpret common types of structures in outcrop and hand sample; (b) to interpret the mechanical properties of rocks based on their microstructure; (c) construction techniques to calculate and interpret stress and strain in deformed rocks.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 2002.03, EARTH 2110.03, EARTH 2203.03

ERTH 3302 Quaternary Sedimentary Environments

CREDIT HOURS: 3

The student is exposed to fluvial, alluvial, subglacial, glaciolacustrine, hillslope, eolian, coastal, shallow marine, rift, wedge top, retroarc, and foreland basin environments. Field trips and labs provide experience in methods used to distinguish the environments, including sedimentology, geomorphology, geochronology and thermochronology, and analysis of soils, cores, pebble fabrics, and section-scale non-petroleum sedimentary facies. Quaternary paleoclimatology and tectonic controls on weathering and deposition are discussed and debated.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 2203.03

CROSS-LISTING: GEOG 3302

ERTH 3303 Stratigraphy

CREDIT HOURS: 3

Stratigraphy is the backbone of the geological sciences; it brings together sedimentology, paleontology, petrology and structural geology to reconstruct Earth history. We survey the impact of sea-level change, tectonics and climate on sediment accumulation, with emphasis on seismic and sequence stratigraphy. Case studies focus on sedimentary basins across Canada, and practical work includes laboratory and class exercises, as well as field excursions.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 3
PREREQUISITE: EARTH 2203.03

ERTH 3400 Fundamentals of Hydrogeology

CREDIT HOURS: 3

This course quantitatively examines groundwater movement, as well as geophysical and geological methods for groundwater exploration, regional occurrence and chemical quality. Laboratory work stresses familiarity with techniques employed in the assessment and exploration of groundwater resources, as well as the analysis and interpretation of water quality data.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 3
PREREQUISITE: EARTH 2001.03 and MATH 1000 (or MATH 1215) permission of instructor

ERTH 3402 Practical Hydrogeology

CREDIT HOURS: 3

This course is designed to build on EARTH 3400.03 and focuses on the practical aspects of groundwater resources development and monitoring system installation, including drilling methods, well design, well hydraulics and aquifer analysis, slug testing, data interpretation, and introduction to groundwater modelling. Actual case history data and problem assignments with practical applications are emphasized.

FORMAT: Lecture| Lab| Tutorial
LECTURE HOURS PER WEEK: 3
PREREQUISITE: EARTH 3400.03

ERTH 3420 Geochemistry of Aquatic Environments

CREDIT HOURS: 3

Given the abundance of water at the earth's surface and the wide use both humans and other organisms make of aqueous environments, it becomes imperative for environmentally-oriented scientists to understand the chemistry of natural bodies of water. In particular, we need to comprehend the processes that lead to the observed composition of groundwaters, lakes, rivers and oceans. We also need to be aware of how man's activities can alter these natural systems. Water is also an agent for geologic and environmental change, both on short and long time-scales. Earth and environmental scientists should have an appreciation of these processes (sources, sinks and transport mechanisms) and the resulting geological cycles. This course is an introduction to the governing principles and processes of aquatic geochemistry. Specific topics will include physical chemistry of natural waters, kinetics (mechanisms & rates) of geochemical reactions, the hydrologic cycle, the dissolved carbonate system and pH controls, redox reactions and the influence of life, rainwater and acid rain, weathering and the formation of soils, mineral-solution equilibria, controls on the composition of rivers, lakes and oceans, sediments and their after-burial changes, and the global cycles of carbon, nitrogen, and sulfur. Students will be taught to approach problems quantitatively through the principles of mass action (Eh-pH and activity-diagrams) and of mass balance (box models and conservation equations).

FORMAT: Lecture
LECTURE HOURS PER WEEK: 3
PREREQUISITE: CHEM 1011.03/1012.03 or equivalent and EARTH 1080/1090 or EARTH 1010/1020
CROSS-LISTING: OCEA 3420.03

ERTH 3440 Geomorphology

CREDIT HOURS: 3

Geomorphology is the quantitative study of Earth's surface processes and landforms with applications geology, civil engineering, hydrogeology, and environmental management. We investigate slope stability, weathering and soils, sediment production, wind-driven and coastal environments, tectonic landforms, and river, glacial and permafrost processes.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 3
PREREQUISITE: EARTH 1080 and EARTH 1090 recommended; or SCIE 1505.21, SCIE 1515.27 or SCIE 1530.33 or permission of instructor AND completion or concurrent enrolment of a 1000-level mathematics class, a 1000-level physics class and a 1000-level chemistry class.
CROSS-LISTING: GEOG 3440.03

ERTH 3500X/Y Geoscience Information Management

CREDIT HOURS: 3

Geographic Information Systems (GIS), as a tool for the management of georeferenced data, have become indispensable for disciplines where location of objects and pattern of processes is important. GIS plays a significant role a wide range of applications, from modeling, to analysis and predictions, to decision making. The course is aimed at a broad base of potential users and draws on examples of the role of GIS in global climate change, mineral exploration, preservation of biodiversity, coastal zone management, resource depletion, and many other present and future environmental issues. The course material will be of interest to those studying geoscience, environmental science, ecology, marine biology, oceanography, epidemiology, urban and rural planning, civil engineering, and any other field involving spatial data. Laboratory exercises emphasize the principles of raster and vector GIS, and the integration of databases and GPS (global positioning systems) data into GIS. Exercises draw on the diversity of GIS applications in a number of application areas.

FORMAT: Lecture| Lab
LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 3
PREREQUISITE: Two years of university study or equivalent or instructor's permission
CROSS-LISTING: EARTH 5600, GEOG 3500, ENVS 3500
EXCLUSIONS: Credit will only be given for one of EARTH 3500.03, EARTH 5600.03, GEOG 3500.03, SCIE 3600.03 or ENVS 3500

ERTH 3601 Global Biogeochemical Cycles

CREDIT HOURS: 3

We currently face daunting environmental challenges at the global scale that are expected to worsen in the 21st century, including a global water crisis, climate change and pollution of our waters and atmosphere; this course examines the science behind these environmental issues from the multidisciplinary framework of global biogeochemical cycling. With the global scale as the focus, this course pulls together the many disparate fields that are encompassed by the broad reach of

biogeochemistry. You will learn about the processes that drive the movement of carbon, water, nitrogen, phosphorus, and sulphur, through the earth system, and the residency of these elements in the atmosphere, soils, lithosphere, oceans and freshwaters. In the quantitative and analytical exercises you calculate and compare the effects of industrial emissions, land clearing, agriculture, and rising population on the processes driving the Earth's chemical cycles. Weekly journal readings for discussion in laboratory group cover the latest developments in this exciting and rapidly changing field. This course provides an excellent framework for those interested in the science of global change.
PREREQUISITE: CHEM 1011/ CHEM 1012 or equivalent, and one of ENVS 1000, SUST 1001, EARTH 1080, or one of SCIE 1502XY/SCIE 1504/ SCIE 1510XY, and completion of 2 years of an undergraduate degree.
CROSS-LISTING: ENVS 3601.03

ERTH 3701 Fundamentals of Hydrology

CREDIT HOURS: 3

This course is an introduction to hydrology, emphasizing surface processes and watershed responses. In this course we learn about both the pure and applied uses of hydrology. The course is quantitative and introduces hydrologic processes in the atmosphere, on the land surface, in groundwater and in stream channels.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 1000.03 or MATH 1215.03 and one of ENVS 1000.06, SUST 1001.06, EARTH 1080.03, or one of SCIE 1505, SCIE 1515, SCIE 1530.27 and completion of 2 years of an undergraduate degree. PHYC 1280 and PHYC 1290.03 (or PHYC 1300X/Y.06) Recommended.

CROSS-LISTING: ENVS 3701.03

ERTH 4001 Sponsored Geologic Experience

CREDIT HOURS: 1.5

These Field Trips &/or Laboratory Sessions Introduce students to some of the following: Practical exploration techniques, field and laboratory skills, familiarization with deposit models, related economic and environmental geology, and the business side of Earth-science industries.

FORMAT: Lab

ERTH 4002 Advanced Field School

CREDIT HOURS: 3

This application of the principles of field geology is a comprehensive and intellectually challenging program designed to provide pre-professional field training for senior BSc geoscience students. Multiple field-based projects challenge students to synthesize field observations and solve geological and environmental geoscience problems to gain training that is otherwise difficult to obtain in the classroom or laboratory.

NOTES: The field camp is usually offered in May at selected international settings, and involves mapping exercises and camping over a wide range of climate and topography.

PREREQUISITE: EARTH 3000, EARTH 3140 permission from instructor

ERTH 4010 Advanced Topics in Petrology and Geochemistry

CREDIT HOURS: 3

This course advances students' knowledge of modern aspects of petrology, volcanology, and geochemistry, chosen to reflect instructor and students interests. The focus is on learning thermodynamic and computational methods as well as advanced petrographic work and field mapping for interpretation of igneous and metamorphic rocks.

PREREQUISITE: EARTH 3010, EARTH 3020, EARTH 3000

CROSS-LISTING: EARTH 5010

ERTH 4100X/Y Research Project

CREDIT HOURS: 6

This course allows students who are not in an Honours program to do a research project. See course description for EARTH 4200X/Y.06.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

ERTH 4110 Geological Oceanography

CREDIT HOURS: 3

This course is intended to give a broad survey of topics in marine geology and geophysics. The course content covers recent methods and observations with quantitative applications to an understanding of geophysical and geological processes. Some topics covered are: plate tectonics and seismic, heat flow, gravity, and magnetic methods, patterns and processes of sediment transport and deposition.

NOTES: Some laboratory exercises augment the lectures, including a field cruise to local beaches. Third year and honours undergraduates will be admitted by consent of the instructor. No previous background in Geology or Geophysics is required.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

CROSS-LISTING: OCEA 5110.03, OCEA 4110.03

ERTH 4131 Advanced Petroleum Geoscience

CREDIT HOURS: 3

This is an advanced course in petroleum geoscience applications and interpretation of basin/prospect evaluation. Students work in a team interpreting industry data, including well logs and reflection seismic, in a competitive environment. The team submits its findings and recommendations in written and oral presentations.

FORMAT: Lecture

PREREQUISITE: EARTH 3303.03, EARTH 4153.03, or permission of the instructor

CROSS-LISTING: EARTH 5131.03

ERTH 4151 Mineral Deposits

CREDIT HOURS: 3

This course is an introduction to the geology of metallic ore and some industrial mineral deposits. Emphasis is given to the ore formation processes that lead to the economic concentrations of commodities. The course integrates many Earth Science disciplines. Laboratory work introduces ore study in reflected light microscopy.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3
LAB HOURS PER WEEK: 3
PREREQUISITE: EARTH 3010.03, 3140.03
CROSS-LISTING: EARTH 5151.03

ERTH 4153 Petroleum Geology

CREDIT HOURS: 3

This course provides an introduction to petroleum geology (gas and oil) with some discussion of alternative energy sources. The course provides an introduction to petroleum geology and petroleum systems with discussion of basin analysis, source rock evaluation, seismic and well log sequence stratigraphy, core and outcrop description, depositional facies analysis, oil sands geology, biostratigraphy, drilling and completions, petrophysics and well log analysis in addition to other topics.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 2270.03, EARTH 3140.03, EARTH 3303.03

ERTH 4157 Petroleum Geoscience Field Methods

CREDIT HOURS: 3

This course provides an advanced-level overview of petroleum systems and petroleum geology field methods including basin analysis, source rock evaluation, seismic and well log sequence stratigraphy and depositional facies analysis, biostratigraphy, drilling and completions, petrophysics and well log analysis in addition to other topics. The course comprises lecture, presentations, and a one week field seminar.

PREREQUISITE: EARTH 3303.03 and EARTH 4153.03 and permission of instructor

ASSESSMENT METHOD: Students will produce and present a geologic report and a safety report, as well as a final report and presentation. This is in addition to the assignments and labs in the field that are submitted for assessment.

ERTH 4200X/Y Honours Thesis

CREDIT HOURS: 6

This course covers many aspects of written and oral communication of scientific material. In particular, it covers the scientific method, the elements of scientific style, the logical organization and development of ideas and scientific writing. Individual research presentations form a key component.

NOTES: This is a compulsory course for students writing an Honours thesis in Earth Sciences, but is open to students from other disciplines. Field work may be part of thesis research. Credit can only be given for this course if X and Y are completed in consecutive terms.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

ERTH 4350 Tectonics

CREDIT HOURS: 3

This is a required course for Earth Sciences honours students. It is intended to synthesize the various aspects of geology covered in the third year core program. The focus of the course is on tectonic processes and the ways in which these processes create and modify the Earth's crust. We cover the fundamental geological, geophysical, and geochemical controls that operate today, including plate tectonics, and the ways in which these might have differed in the geological past. The tectonic evolution of specific orogenic belts is discussed, including both modern and ancient examples in Canada and other parts of the world.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: EARTH 2270.03, 3140.03

CROSS-LISTING: EARTH 5350.03

ERTH 4410 Environmental Geoscience

CREDIT HOURS: 3

Environmental geoscience integrates various aspects of earth sciences to critically examine the interaction between humans and the geologic environment. Topics include: environmentally sensitive elements and minerals, geologic hazards, water, soil, mineral and energy issues, use of isotopes as tracers, as well as waste management, radioactivity, and the urban environment.

PREREQUISITE: or Co-REQUISITE: EARTH 2380.03 and three EARTH courses at the 3000 level or above, or permission of instructor

RESTRICTIONS: Restricted to students in third year or above.

ERTH 4470 Introduction to Seismic Imaging

CREDIT HOURS: 3

This course teaches the basic techniques of the reflection seismic method for imaging of earth structures such as those used in hydrocarbon exploration. Lectures introduce concepts and techniques that are applied in computer lab to the processing of a multi-channel seismic dataset. Concepts covered include: source and receiver geometry, digital filtering, deconvolution, velocity analysis, stacking, and migration.

FORMAT: Lecture| Lab

PREREQUISITE: EARTH 2270.03 or consent of instructor

CROSS-LISTING: EARTH 5470.03, OCEA 4470.03, PHYC 4470.03, PHYC 5470.03

ERTH 4480 Advanced Seismic Imaging

CREDIT HOURS: 3

This course teaches more advanced techniques of seismic imaging of earth structures. Lectures introduce techniques that will be applied in the computer lab to the processing of multi-channel reflection and wide-angle refraction seismic datasets. Concepts covered include: multiple removal, pre-stack migration in time and depth, amplitude analysis, velocity modeling and inversion.

NOTES: This course is not offered every year. Please consult department in the spring for further information.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 4470.03 or consent of instructor

CROSS-LISTING: EARTH 5480.03, OCEA 4480.03, PHYC 4480.03, PHYC 5480.03

ERTH 4510 Directed Reading

CREDIT HOURS: 3

This course is intended to permit further study of a specific topic of interest, or to correct a deficiency in a student's program. The course is supervised by a regular faculty member and the course content and marking scheme must be submitted to and approved by the chairperson in the first week of classes. Note: Further guidelines for directed reading courses are available from the undergraduate advisor or the Earth Sciences office.

NOTE: Course Details listed here also apply to ERTH 4511.

PREREQUISITE: Permission of Department

ERTH 4511 Directed Readings

CREDIT HOURS: 3

See ERTH 4510.

ERTH 4520 GIS Applications to Environmental and Geological Sciences

CREDIT HOURS: 3

Geographic information systems (GIS) provide a rich set of new tools to the geologist and environmental scientist, not only to solve conventional problems, but also to explore questions not readily answered by other means. This course builds on the fundamentals of GIS taught in ERTH 3500.03 to explore analytical tools that aid in decision-making processes encountered in mineral exploration, hydrogeology, site selection, environmental assessment, and global change analysis. The course concentrates on case studies and problem solving, including those requiring multi-criteria and multi-objective decision making processes.

NOTES: This course is not offered every year. Please consult department in the spring for further information.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: GEOG 3500.03, ENVS 3500, ERTH 3500.03; ERTH 5600, or SCIE 3600.03; STAT 1060.03

CROSS-LISTING: GEOG 4520.03, ERTH 5520.03

ERTH 4530 Environmental Remote Sensing

CREDIT HOURS: 3

The goal of this course is to introduce students to the role of remote sensing as a technique provide environmental and geologic information. Particular emphasis will be placed on examining the potential and limitations of remote sensing methods and data in this context. The lectures discuss the fundamentals of remote sensing with an emphasis on multi-spectral satellite systems. In the lab, students use computerized techniques of digital image enhancement and thematic information extraction to process images derived from optical, radar, and hyperspectral remote-sensing systems. The integration of remote-sensing information with GIS (Geographic Information Systems) is stressed in both the labs and lectures.

NOTES: This course is not offered every year. Please consult department in the spring for further information.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: ERTH 3500.03, GEOG 3500.03, ENVS 3500.03 or ERTH 5600.03 or SCIE 3600.03

CROSS-LISTING: GEOG 4530.03, ERTH 5530.03

ERTH 4850 Geographic Information Science Research Project

CREDIT HOURS: 3

Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

COREQUISITE: ERTH 5420.03/GEOG 4520.03

PREREQUISITE: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03 and permission of instructor

CROSS-LISTING: SCIE 4850.03, ENVS 4850.03, ERTH 4850.03, GEOG 4850.03

EXCLUSIONS: Restricted to 3rd and 4th year students

Introduction

Economics is a social science - a science because it involves a rigorous intellectual effort to derive logical conclusions from basic facts and propositions; a social science because it has human beings and their welfare as its ultimate concern. The basic facts of Economics cannot be knowable and measurable with the same precision as those of the physical sciences - human society and its motivations are far too complex to permit this - but none of the sciences surpasses economics in its relevance to our needs, problems and goals.

Economics analyzes the equity, efficiency, and sustainability of human behavior in the production, distribution, and consumption of commodities. Economics is not an easy science; indeed, it is one of the most complex, difficult (and fascinating) areas of study when you pursue it beyond its elementary levels, but some basic knowledge of economics is essential for any educated person. A more extensive knowledge of the subject is an invaluable complement to other fields of specialization such as law, commerce, politics and other studies in social sciences or humanities, and a specialization in the field can lead to a variety of interesting career opportunities.

Degree Programs

The Department of Economics offers the following degree programs in Economics

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Economics
- Minor in Economics

* May be combined with Minor programs from other disciplines

Departmental Requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Economics undergraduate academic advisor.

Staff

Dean

Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Chairperson of Department

Xu, K., Dip. (Beijing Teachers' Univ.), MBA, PhD (Concordia)

Faculty Advisors

Dasgupta, S., Undergraduate Coordinator, Co-op Academic Advisor (econadvisor@dal.ca)

Burton, P., BSc (Saskatchewan), MA, PhD (UBC)

Professor Emeritus

Sinclair, A., BA (Dalhousie), MA, BPhil (Oxon), PhD (Harvard)

Professors

Burton, P., BSc (Saskatchewan), MA, PhD (UBC)

Dasgupta, S., BA (Calcutta), MA (Delhi), MA, PhD (Rochester)

Iscan, T., BA (Middle East Tech.), MA, PhD (Cornell)

Lesser, B., BComm (Dalhousie), MA, PhD (Cornell)
Osberg, L., BA (Hons) (Queen's), MPhil, PhD (Yale), McCulloch Professor of Economics
Phipps, S. A., BA (Hons) (Victoria), MA, PhD (UBC), Maxwell Chair of Economics
Xu, K., Dip. (Beijing Teachers' Univ.), MBA, PhD (Concordia)

Associate Professors

Cyrus, T., BA (UCLA), PhD (Berkeley)
Kotlyarova, Y., Dip. Software Eng (Lviv Poly. Inst.), MSc (U of Illinois - Urbana), PhD (McGill)
Rosenblum, D., BA (Williams College), MA, MPhil, PhD (Yale)
Ward, C., BA (Saskatchewan), MA (Queen's), PhD (Toronto)

Assistant Professors

Akbulut-Yuksel, M., BS (Middle East Tech.), MA, PhD (Houston)
Giusto, A., Laurea in Economics (Bologna), PhD (Oregon)
Okoye, C., BA (Hons), PhD (UWO)
Warman, C., BA (Combined Hons), MA, PhD (Carleton)
Yuksel, M., BSc (METU), MA, PhD (Houston)
Zhou, W., BE, MA (Tokyo Inst. of Technology), PhD (UBC)

Adjunct Professors

Amirkhalkhali, S. I., BA Hons (Shiraz), MA, PhD (Dalhousie), SMU
Cross, M. L., AA (Dawson College), BA (Montana), MA (SFU), PhD (Texas A&M)
de Lamirande, P., BA, MA (Laval), PhD (Montreal)
Dufour, M., PhD (Massachusetts), MA (UBC)
Huber, P. B., BA, MA, PhD (Yale)
MacDonald, M., BA (Dalhousie), PhD (Boston College), SMU
Marfels, C. T., Diplom-Volkswirt, Dr.Rer.Pol. (Berlin)
McAllister, R. I., MA (Oxon), MA (Cantab)
Rankaduwa, W., BA, MSc (Sri Lanka), MA, PhD (Dalhousie), UPEI
Sinclair, A. M., BA (Dalhousie), MA, BPhil (Oxon), PhD (Harvard), Professor Emeritus

Senior Instructor

Boulaltoff, C., MS (Université Catholique de l'Ouest), PhD (Utah State)

Instructors

Forsdyke, R., BSc (Hons) Biochemistry, BEd, MA (Queen's), PhD (Simon Fraser)
Kivinen, S., BA (Hons) (Lakehead), MA (Simon Fraser), PhD (ABD) (Queen's)

Cross-Appointed Faculty

Clark, S., BA (Guelph), MSc (Saskatchewan), PhD (North Carolina), Faculty of Agriculture
Yiridoe, E. I., BSc (Univ Science and Tech Ghana), MSc, PhD (Guelph), Faculty of Agriculture
Zhao, Y., MSc (Western Kentucky), PhD (British Columbia), Professor of Finance, Faculty of Management

BSc or BA (120 credit hour) Concentrated Honours in Economics

Students who want a challenging program that results in a broad background in Economics and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Economics with a minimum GPA of 3.3 and write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of ECON 4200.06: Honours Thesis.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Economics should consult with an Economics Honours Advisor early in their studies. To be admitted, students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03, ECON 2201.03, ECON 3338.03, ECON 3339.03, and ECON 3700.03
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Concentrated Honours program in Economics must complete the following courses:

1000 level

- ECON 1101.03/ECON 1102.03
- MATH 1000.03/MATH 1010.03
- MATH 1060.03/STAT 1060.03 or STAT 2060.03

2000 level and higher

- ECON 2200.03/ECON 2201.03
- ECON 2280.03 (or MATH 2080.03/STAT 2080.03)
- MATH 2030.03
- ECON 3338.03/ECON 3339.03
- ECON 3700.03
- One of ECON 2233.03, ECON 2239.03, ECON 3310.03, or ECON 3349.03
- ECON 4420.03/ECON 4421.03
- ECON 4200.06 (Honours thesis)
- An additional 21 credit hours in Economics at or above the 2000 level

BSc or BA (120 credit hour) Combined Honours in Economics and another subject

Students who wish to study Economics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Economics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Economics, this requirement is satisfied through ECON 4200.06: Honours Thesis.

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Combined Honours program in Economics and another subject must complete the following:

Economics as primary or secondary subject

1000 level

- ECON 1101.03/ECON 1102.03
- MATH 1000.03/MATH 1010.03
- MATH 1060.03/STAT 1060.03 or STAT 2060.03

2000 level and higher

- ECON 2200.03/ECON 2201.03
- ECON 2280.03 (or MATH 2080.03/STAT 2080.03)
- MATH 2030.03
- ECON 3338.03/ECON 3339.03
- ECON 3700.03
- One of ECON 2233.03, ECON 2239.03, ECON 3310.03, or ECON 3349.03
- ECON 4420.03/ECON 4421.03
- An additional 3 credit hours in Economics at or above the 2000 level

If Economics is the primary subject, students will also complete

- ECON 4200.06 Honours Thesis

BSc or BA (120 credit hour) Major in Economics

The 120 credit hour Major is suited to students who want to focus on Economics, but wish to have a program that is somewhat less constrained than the Honours program. BSc Economics Majors complete a minimum of 42 credit hours in Economics courses; BA Economics majors complete a minimum of 36 credit hours in Economics courses. Research and other experiential learning opportunities are available through special topics and experiential classes.

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

BSc Major requirements:

1000 level

- ECON 1101.03/ECON 1102.03
- MATH 1000.03/MATH 1010.03
- MATH 1060.003/STAT 1060.03 or STAT 2060.03

2000 level

- ECON 2200.03/ECON 2201.03
- ECON 2280.03 (or MATH 2080.03/STAT 2080.03)
- MATH 2030.03
- An additional 15 credit hours in Economics at or above the 2000 level

3000 level and higher

- ECON 3338.03
- An additional 15 credit hours in Economics at or above the 3000 level

BA Major requirements:

1000 level

- ECON 1101.03/ECON 1102.03
- MATH 1000.03
- MATH 1060.03/STAT 1060.03

2000 level

- ECON 2200.03/ECON 2201.03
- An additional 12 credit hours in Economics at or above the 2000 level

3000 level and higher

- An additional 18 additional credit hours in Economics at or above the 3000 level

BSc or BA (120 credit hour) Double Major in Economics and another subject

The Double Major degree program allows students to combine a study of Economics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Economics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

BSc requirements (Economics as primary or secondary subject)

1000 level

- ECON 1101.03/ECON 1102.03
- MATH 1000.03/MATH 1010.03
- MATH 1060.03/STAT 1060.03 or STAT 2060.03

2000 level

- ECON 2200.03/ECON 2201.03
- ECON 2280.03 (or MATH 2080.03/STAT 2080.03)
- MATH 2030.03
- An additional 9 credit hours in Economics at or above the 2000 level

3000 level and higher

- ECON 3338.03
- An additional 9 credit hours in Economics at or above the 3000 level

BA requirements (Economics as primary or secondary subject)

1000 level

- ECON 1101.03/ECON 1102.03
- MATH 1000.03
- MATH 1060.03/STAT 1060.03

2000 level

- ECON 2200.03/ECON 2201.03
- An additional 12 credit hours in Economics at or above the 2000 level

3000 level and higher

- An additional 12 additional credit hours in Economics at or above the 3000 level

BSc or BA (90 credit hour) with Minor in Economics

The 90 credit hour degree with Minor in Economics is appropriate for students who want to study some Economics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Economics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Economics is usually the preferred option for students who wish to combine studies in Economics with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

See the Minor in Economics section of this Calendar.

Minor in Economics

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

A BSc or BA (90 credit hour) degree program with a Minor in Economics is available to students in the Faculty of Science.

Requirements

- ECON 1101.03/ECON 1102.03
- Must complete between 18 and 36 credit hours in Economics courses at the 2000 level or higher

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Economics

Co-op Academic Advisor: Dr. T. Cyrus (teresa.cyrus@dal.ca)

Co-operative Education in Science is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in **BSc (120 credit hour) Honours or Major programs** in Economics, or in Combined Honours or Double Major programs with Economics as the primary subject. The number of students admitted into Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is strongly recommended that interested students meet with their Department Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Co-operative Education office dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Economics, please see the Department webpage dal.ca/faculty/science/economics/programs/co-operative-education.html.

Minors available to students in Economics

Minor programs allow students to develop subject specialities in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Economics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Economics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section of this calendar. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Economics with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Economics and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Economics and from the Faculty of Engineering in their first year of study.

Graduate Studies

The Department offers a graduate program leading to the MA, MDE and PhD degrees. Details of these programs, including a list of graduate courses, are given in the Calendar of the Faculty of Graduate Studies. Senior undergraduates may be admitted to some graduate courses at the discretion of the instructors concerned.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Notes

Recent course outlines are available on the department's website (<http://economics.dal.ca>)

All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

Course Descriptions

ECON 1101 Principles of Microeconomics

CREDIT HOURS: 3

How do you decide whether or not to go to university? Why does the price of pizza change so much less than the price of oil? What will better help prevent climate change: a carbon tax, or a cap-and-trade system? Microeconomic analysis, which considers the behaviour of individuals and businesses, can answer questions like these.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

ECON 1102 Principles of Macroeconomics

CREDIT HOURS: 3

Why are some countries rich and others poor? If high oil prices cause the loonie to rise, how are Ontario manufacturers affected? Why were mortgage interest rates above 20% in 1981 but below 5% in 2013? Macroeconomic analysis, which considers the behaviour of the entire economy, can answer questions like these.

NOTES: ECON 1101.03 is not required before taking ECON 1102.03. ECON 1101.03 and ECON 1102.03 (together) satisfy the Principles of Economics requirement for Economics majors and for Bachelor of Commerce and Bachelor of Management students.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

ECON 2200 Intermediate Microeconomics

CREDIT HOURS: 3

This course covers consumer behaviour, the theory of the firm, factor markets, and general equilibrium welfare analysis. The course serves as the microeconomic prerequisite for higher-level courses in economics.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 1101.03

EXCLUSIONS: ECON 2220.03

ECON 2201 Intermediate Macroeconomics

CREDIT HOURS: 3

An extension of macroeconomic theory of income, unemployment, the exchange rate, inflation and financial markets that satisfies the minimum macroeconomic theory requirement for majors in economics. Serves as the macroeconomic prerequisite for higher-level courses in economics.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 1102.03

ECON 2213 Emerging Giants: The Economic Rise of China and India

CREDIT HOURS: 3

This course examines the economic history, current issues, and future trends of China and India, answering such questions as: What explains China's and India's growth? How is climate change affected by this growth? How are global labour markets affected? Must growth lead to rising inequality? Is democracy required for development?

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 1101.03, ECON 1102.03

CROSS-LISTING: CHIN 2290.03

ECON 2216 Economics of Global Warming

CREDIT HOURS: 3

This course uses economic principles to investigate such questions as: What are the benefits and costs of various time paths for abating emissions? How do we value the well-being of future generations? How do we balance helping the poor with environmental sustainability? What policies can align incentives with environmental sustainability?

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 1101.03

EXCLUSIONS: ECON2850.06, PHYC2850.06

ECON 2217 Women and the Economy

CREDIT HOURS: 3

This course studies questions such as: Have economic conditions improved for women in Canada over the past 30 years? Is there gender discrimination in the Canadian labour market? What are the economic consequences of divorce? Are women more likely than men to be poor? Are there inequalities within families?

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses. Approved with Canadian Studies.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 1101.03, ECON 1102.03

CROSS-LISTING: GWST 2217.03

ECON 2218 The Canadian Economy in the New Millennium: Economic Policy Debates

CREDIT HOURS: 3

Canada's economy today faces many problems: unemployment, productivity, income distribution, environmental protection, trade relations, federal-provincial fiscal relations, maintenance of social programs, etc. What are the most important economic policy issues that Canada now faces? What is the appropriate policy role for government?

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses. Approved with Canadian Studies.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 1101.03, ECON 1102.03

CROSS-LISTING: CANA 2218.03

ECON 2219 Euros and Cents: From Common Market to European Union

CREDIT HOURS: 3

The European Union is a grand experiment to unite countries in a single market. The stepwise evolution from customs union to common market to economic and monetary union with a single currency, the Euro, is reviewed and analyzed. Learn more about an economic integration that is unparalleled in history.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 1101.03, ECON 1102.03 or permission of instructor

ECON 2220 Microeconomic Theory

CREDIT HOURS: 3

This course covers the economic behaviour of individual decision makers, such as a consumer, a worker or a firm. Emphasis is on theoretical ideas, while applications of these ideas are also considered. Of particular interest to those planning to major or to do honours in economics.

NOTES: Students may not receive credit for both 2200.03 and 2220.03. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Econ 1101.03, MATH 1000.03 (or equivalent)

ECON 2231 Health Economics

CREDIT HOURS: 3

This course introduces students to the role of economics in health, health care, and health policy. It comprises a survey of major topics in health economics and an introduction to the ongoing debate over health care policy. Topics include the economic determinants of health, the market, the market for medical care, the market for health insurance, the role of government in health care, and health care reform.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 1101.03, ECON 1102.03

ECON 2233 Canadian Economic History

CREDIT HOURS: 3

An examination of the economic history of Canada from the time of Confederation to WWI. Major topics explored include: the economic reasons for Confederation, the building of the CPR, the Wheat Boom, foreign trade and investment and the roots of regional disparities.

NOTES: Approved with Canadian Studies. The student is recommended to have some knowledge of history prior to taking this course. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 1101.03, ECON 1102.03

CROSS-LISTING: CANA 2233.03

ECON 2239 The European Economy Since 1900

CREDIT HOURS: 3

This course applies economic theories to interpret quantitative economic changes in major European countries during the turbulent 20th century. Issues addressed include sources of growth and unevenly improved welfare, war, inflation, depression; Nazi economy; Communism's nature, success, and ultimate failure; reparations and the transfer 'problem'; and the 'transition.'

NOTES: Approved with Canadian Studies. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 1101.03, ECON 1102.03

ECON 2260 Statistics I

CREDIT HOURS: 3

See course description for MATH 2060.03, in Mathematics section of this calendar.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

PREREQUISITE: MATH 1000.03 or MATH 1215.03 and either MATH 1010.03 or 2030.03 or DISP

CROSS-LISTING: MATH 2060.03, STAT 2060.03

EXCLUSIONS: ENGM 2032.03

ECON 2280 Statistics II

CREDIT HOURS: 3

See course description for MATH 2080.03, in Mathematics section of this calendar.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

PREREQUISITE: STAT 1060.03 or STAT 2060 or DISP

CROSS-LISTING: MATH 2080.03, STAT 2080.03

ECON 2334 Globalization and Economic Development: Current Debates

CREDIT HOURS: 3

Economists have long debated whether the task of development should be entrusted largely to market forces, or whether there was role for the state in directing a nation's economic affairs. These debates over development continue. We assess critiques of the economic analysis of development. Students will be encouraged to debate these issues and come to their own conclusions.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 1101.03, ECON 1102.03

ECON 2336 Regional Development

CREDIT HOURS: 3

Why are some countries or regions poor? Why have the relative positions of different countries and regions shifted over the last several decades? Economic development issues, policies, and theories are analyzed to answer these questions.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture| Seminar

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 1101.03, 1102.03

CROSS-LISTING: GEOG 2336.03

ECON 2400 Economics of Retirement

CREDIT HOURS: 3

This course aims to explain how households save for retirement and manage their finances once retired. It applies a modified version of standard economic theory of shed light on the adequacy of households discussion-making. It appraises defined benefit and defined contribution pensions, and proposes ways of mitigating their shortcomings.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

PREREQUISITE: ECON 1101.03 and ECON 1102.03

ECON 2850 The Science and Economics of Climate Change

CREDIT HOURS: 6

This course examines how climate change will impact the environment and human activities, and how to formulate and implement economically realistic solutions. It integrates the physical and biological science with economics in order to analyze the response options as we move towards a carbon-neutral society.

FORMAT: Lecture

CROSS-LISTING: PHYC 2850.06

EXCLUSIONS: PHYC 2800.03, ECON 2216.03

ECON 3111 Writing in Economics

CREDIT HOURS: 3

This course provides instruction in principles and practice of good writing about economics. Students read and examine writing samples and practice writing for various venues (such as government, firms, and news media) in various formats (such as opinion editorials, government policy papers, economics blogs, and journal articles).

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

PREREQUISITE: ECON 2200.03, ECON 2201.03 and a Dalhousie writing course

ECON 3310 Economic Growth in Historical Perspective

CREDIT HOURS: 3

This course examines the sources of long-run economic growth and development in a historical perspective. Topics covered include invention, innovation, culture, legal institutions governing access to resources, demography, fertility, mortality, and alternative modes of production.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2200.03 or ECON 2220.03, ECON 2201.03

ECON 3315 Labour Economics

CREDIT HOURS: 3

This course considers the theory, evidence and policy of labour economics from a Canadian perspective. Topics include: How does EI affect the Canadian labour market? Do minimum wages reduce employment? What is economic discrimination and does it exist in Canada? How well do immigrants fare in the Canadian labour market?

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3
PREREQUISITE: ECON 2200.03 or ECON 2220.03, and ECON 2201.03

ECON 3317 Poverty and Inequality

CREDIT HOURS: 3

Why are some people poor, while others are rich? Why do some nations have more poverty or inequality than others? What can or should be done? This course examines the extent of poverty and inequality in contemporary societies, and the theories underlying alternative measures and explanations.

NOTES: Approved with Canadian Studies. The student is advised to take ECON 3315 before taking ECON 3317. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2200.03 or ECON 2220.03, and ECON 2201.03

ECON 3319 Industrial Organization

CREDIT HOURS: 3

The course provides an overview of the organization of production. Market structure, firm conduct, and performance affect each other in complex ways; the degree of horizontal and vertical integration affects the ability to set prices, for example. Governments regulate firms in order to reduce socially harmful anticompetitive behaviour.

NOTES: Approved with Canadian Studies. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2200.03 or 2220.03

ECON 3326 Money and Banking

CREDIT HOURS: 3

The course concerns the nature and operation of the financial system, with particular reference to Canadian experience. It treats financial instruments (including money) and institutions and the social control of the supply of money and credit.

NOTES: Approved with Canadian Studies. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2201.03

ECON 3330 International Trade

CREDIT HOURS: 3

This course examines the theory and empirics of international trade, including standard historical trade theories, more recent theories, and evidence regarding these theories. The course investigate factor movements, the welfare effects of trade policies in both industrial and developing countries, and the institutions that have developed to regulate those policies.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2200.03 or ECON 2220.03

ECON 3331 International Finance

CREDIT HOURS: 3

This course covers the theory and empirics of international macroeconomics. It examines the determination of exchange rates, international capital flows, and risk; the effectiveness of fiscal and monetary policy in an open economy; modern international policy coordination; and the determination of the current account and net foreign assets.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2201.03

ECON 3332 Resource Economics

CREDIT HOURS: 3

This course focuses on intertemporal economics and the economics of market failure as they pertain to the use of natural resources. A selection of resource sectors will also be discussed. Fisheries, agriculture, forestry, and energy represent possibilities, but this will vary from year to year.

NOTES: Approved with Canadian Studies. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2200.03 or ECON 2220.03, MATH 1000.03 or equivalent

ECON 3333 Theories of Economic Development

CREDIT HOURS: 3

This course surveys current applications of economic theory to the problem of economic development. Topics covered include recent advances in theory of economic growth, theories of poverty and inequality and their relation to economic performance, theories of fertility and population growth, and the microeconomics of peasant agriculture.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2200.03 or 2220.03, ECON 2201.03

ECON 3335 Environmental Economics

CREDIT HOURS: 3

This course serves as an introduction to environmental economics. Topics include social decision making, externalities and public goods, regulatory approaches (standards, charges, tradable permits), forms of value derived from the environment and measurement techniques.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2200.03 or 2220.03

ECON 3338 Econometrics I

CREDIT HOURS: 3

The theory of some quantitative methods commonly used by economists is discussed in the context of the classical linear model. Estimation problems caused by violations of the assumptions of the classical model are studied including heteroscedasticity and autocorrelation.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 1000.03 (or equivalent) and ECON 2280.03/MATH 2080.03/STAT 2080.03

ECON 3339 Econometrics II

CREDIT HOURS: 3

This course is an extension of ECON 3338.03 and covers a range of econometric methods that are used in economic research. The topics for this course include: Logit, Probit, Tobit, Distributed Lags, Panel Data, Simultaneous Equations and Time Series.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 3338.03

ECON 3344 Public Finance

CREDIT HOURS: 3

This course studies the economics of public expenditure, tax and transfer programs in a federal state such as Canada. The core issue addressed is when and how public policy can (or cannot) improve equity and efficiency.

NOTES: Approved with Canadian Studies. In addition to the prerequisites, the student is advised to take ECON 2201.03 before taking ECON 3344.03. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2200.03 or ECON 2220.03

ECON 3345 Public Finance II

CREDIT HOURS: 3

This class studies the economics of taxes and transfers. Equity and efficiency effects of both are considered. Approved with Canadian Studies.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

PREREQUISITE: ECON 2200.03, or ECON 2210.03 and ECON 2201.03

ECON 3349 History of Economic Thought

CREDIT HOURS: 3

This course will examine theories of value, production, distribution, and growth as developed in classical political economy and neoclassical economics. Theories of equilibrium and stability, the links between classical political economy and macroeconomic theory, and reactions to classical and neoclassical economics will be considered as time permits.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2200.03 or ECON 2220.03, ECON 2201.03

ECON 3350 Social Cost Benefit Analysis

CREDIT HOURS: 3

Social cost benefit analysis is used to evaluate public projects and private sector regulations. It is similar to the revenue cost accounting used by firms but takes into account external costs and benefits such as environmental damages. This course explains the methodology in the context of case studies after which students apply the method to evaluate a public policy problem.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2200.03 or 2220.03

ECON 3360 Ethics, Justice, and Economics

CREDIT HOURS: 3

Assumptions of Neoclassical economic theory are critically examined, with a focus on the ethical and distributional consequences of using markets as an allocation mechanism. We discuss the major conceptions of economic justice, including utilitarianism and social choice theory, Rawlsian egalitarianism, Nozickian libertarianism, Sen's capabilities approach, and equality of opportunity.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2200.03, ECON 2201.03

CROSS-LISTING: PHIL 3361.03

ECON 3500 Public Economics

CREDIT HOURS: 3

Analyzes the role of government in problems of resource allocation due to market failure. Concentrates on theories of public goods, collective choice, potential of conflict and cooperation in individually-motivated actions, incentive structures capable of realizing rational, cooperative, group outcomes. Provides theoretical underpinnings of many applied fields. Involves mathematical methods.

NOTES: While a background of ECON 3700 is helpful, it is not a prerequisite. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2200.03 or ECON 2220.03, MATH 1000.03 or instructor permission

ECON 3600 Strategic Behaviour in Economics

CREDIT HOURS: 3

Many economic questions (such as price competition, tax policy, research and development decision, bargaining) can be interpreted as games, in which each player's action affects payoffs of other players. The students learn how to recognize various strategic interactions in economics, and how to evaluate the outcomes of such interactions.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

PREREQUISITE: ECON 2200.03 or ECON 2220.03, MATH 1000.03 or equivalent

ECON 3700 Mathematics for Economists

CREDIT HOURS: 3

This course presents mathematical methods used in modern economics. The lectures concentrate on the basic concepts of analysis, comparative statics and optimization theory. Topics include an introduction to set theory and matrix algebra, the implicit function theorem, unconstrained optimization, constrained optimization with equality and inequality constraints, and intertemporal choice.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

PREREQUISITE: ECON 2200.03 or ECON 2220.03, ECON 2201.03, MATH 1000.03 or permission of the instructor

CROSS-LISTING: MATH 3700.03

ECON 3800 Financial Economics

CREDIT HOURS: 3

This course is an introduction to decision making by investors under uncertainty, portfolio theory, asset pricing, financial markets, and instruments. The course covers both the theoretical and practical aspects of investment, surveys the techniques available for economists, and emphasizes "hands-on" learning using Canadian and international case studies.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2200.03 or ECON 2220.03, ECON 2201.03

CROSS-LISTING: MATH 3800.03

ECON 3900 Financial Mathematics

CREDIT HOURS: 3

See course description for MATH 3900.03 in the Mathematics section of this calendar.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

PREREQUISITE: MATH 2060.03 and (MATH 2120.03 or MATH 3110.03) or instructor's permission

CROSS-LISTING: MATH 3900.03

ECON 4002X/Y Experiential Learning (in Economics)

CREDIT HOURS: 3

Experiential learning recognized the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and timetable.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

PREREQUISITE: ECON 1101.03, ECON 1102.03, ECON 2200.03 or ECON 2220.03, ECON 2201.03, ECON 3338.03, ECON 3339.03. To be eligible, students should have a minimum average GPA of 3.0 in Economics.

EXCLUSIONS: Scheduled classes at a learning institution, study that would qualify for co-op work terms and paid work. Only one experiential learning class per degree is permitted.

ECON 4200X/Y Honours Thesis

CREDIT HOURS: 6

This course is required for honours students, and helps students define, research, and write an original research project under the supervision of an economics faculty member. Students develop a topic, critique current literature, run statistical tests, and present their results in a public conference. Attendance at weekly department seminars is mandatory.

NOTES: To be given permission to take the Honours Thesis course, students should have completed the Dalhousie writing requirement, with a grade of B or higher in at least one Dalhousie writing course.

FORMAT: Seminar

PREREQUISITE: ECON 2200.03 or ECON 2220.03, ECON 2201.03, ECON 3338.03, ECON 3339.03 and permission of instructor

ECON 4420 Microeconomic Theory

CREDIT HOURS: 3

In-depth study of outcomes of decision-making by agents, individually, collectively or as an interdependent system. Selects topics from: linear and non-linear optimization and applications to theory of consumers and firms, general equilibrium, game theory, alternative solution concepts, comparative statics, stability, welfare, market failures, collective choice, intertemporal economics, uncertainty.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2200.03 or ECON 2220.03, ECON 3700.03, MATH 1000.03 (or equivalent), MATH 1010.03

ECON 4421 Macroeconomic Theory

CREDIT HOURS: 3

Students are introduced to contemporary issues in macroeconomics including aggregate growth accounting; neoclassical growth models; monetary policy, inflation and unemployment; theories of consumption and investment; and trade and exchange rates. Mathematical methods are applied extensively and their application to economic problems will be stressed at both the theoretical and intuitive levels.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2201.03, ECON 3700.03, MATH 1000.03 (or equivalent), MATH 1010.03

ECON 4426 Monetary Policy

CREDIT HOURS: 3

Assuming a basic knowledge of monetary institutions and macroeconomics, a critical analysis of the objectives and effectiveness of monetary policy is developed.

Particular attention is given to the Canadian experience and the effectiveness of Canadian policy. Approved with Canadian Studies.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ECON 2201.03 and ECON 3326.03

ECON 4440 Time Series in Economics

CREDIT HOURS: 3

This is a course in econometrics that focuses on time series models. The topics cover estimation and inference procedures for univariate and multivariate time series models with stationary and nonstationary data, including various vector autoregressive models, Markov switching models, and fractionally integrated processes.

PREREQUISITE: ECON 3338.03 (grade of C or higher), ECON 3339.03 (grade of B or higher)

ECON 4700 Advanced Mathematics for Economists

CREDIT HOURS: 3

The course emphasizes abstract analytical methods via a selection of topics in mathematics which prepares the advanced undergraduate student for pursuing graduate studies in economics. Topics include elements of mathematical logic, sets and correspondence, vector spaces, metric spaces, topological concepts, fundamentals of analysis, multivariate calculus, fixed point theorems, dynamic optimization.

NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

PREREQUISITE: ECON 3700.03

ECON 8891 Co-op Work-Term I

CREDIT HOURS: 0

ECON 8892 Co-op Work-Term II

CREDIT HOURS: 0

ECON 8893 Co-op Work-Term III

CREDIT HOURS: 0

Introduction

Environmental Science in the Faculty of Science offers several programs. These include a BSc Honours/Major in Environmental Science, a Minor in Environmental Science, a Double Major in Environmental Science and Community Design, and a BSc or BA Double Major or Combined Honours in Environmental Science and any Major/Honours subject in the Faculty of Science, Faculty of Arts and Social Sciences (FASS) or with the College of Sustainability. The Faculty of Arts and Social Sciences (FASS), the Faculty of Science, the Faculty of Computer Science and the Faculty of Architecture and Planning also offer a Minor in Environmental Studies which is administered through Environmental Science.

Environmental Science applies the findings and principles from multiple disciplines to environmental questions and problems. Environmental Science, by nature, is multidisciplinary and interdisciplinary. Most environmental scientists develop expertise in a particular discipline, and work co-operatively with specialists in other disciplines to solve environmental problems. They work in a variety of institutions in both the public and private sectors: municipal, provincial and federal government departments, consulting and engineering companies, development aid organizations in the non-governmental sector and activist community organizations. In all of these institutions they must integrate their scientific knowledge into the prevailing political, economic and legal systems.

The courses required for the BSc Environmental Science stress the links among the fields of study that the students acquire. Thus, students graduate with a combination of depth and breadth of knowledge and the ability to solve problems in the real world.

Degree Programs

The Faculty of Science offers the following degree programs in Environmental Science

- BSc (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- Minor in Environmental Science
- Minor in Environmental Studies

* BSc Co-op option available

* May be combined with Minor programs from other disciplines

Program Requirements can be seen by following the links to the right. In addition to the program requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with the Environmental Science undergraduate academic advisor.

Staff

Dean

Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Director

Gibling, M., PhD (Univ of Ottawa) (902 494-2355 martin.gibling@dal.ca)

Faculty

Gass, S., PhD (Open University, UK) (902 494-4530 susan.gass@dal.ca)

Mushkat, P., LLB (Dalhousie) (902 494-8056 pwm@dal.ca) Co-op Academic Advisor

Rainham, D., PhD (Univ of Ottawa) (902 494-1286 daniel.rainham@dal.ca)

Sterling, S., PhD (Duke Univ) (902 494-7741 shannon.sterling@dal.ca) Major appointment in Earth Sciences

Wright, T., PhD (Univ of Alberta) (902 494-3683 tarah.wright@dal.ca)

Undergraduate Advisor

Gass, S.

Administrative Assistant

Hall, D. (902 494-7117 dhall@dal.ca)

Supporting Faculty

Environmental Science draws on faculty from the departments below:

Biology
Chemical Engineering
Chemistry
Earth Sciences
Economics
Environmental Engineering
International Development Studies
Mathematics
Oceanography
Philosophy
Physics and Atmospheric Science
Political Science
School for Resource and Environmental Studies
School of Planning
Sociology and Social Anthropology
Statistics

Note: This field is rapidly expanding. Students interested in these types of programs should ask about courses related to the environment, other than those listed on the following pages, through the departmental contacts noted above.

BSc (120 credit hour) Concentrated Honours in Environmental Science

Students who want a challenging program resulting in a broad background in Environmental Science, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Environmental Science or Environmental Science Equivalent Courses (see the Academic Advisor or online at www.dal.ca/environmentalscience for a list of ENVS Equivalent Courses) with a minimum GPA of 3.0, and each ENVS and ENVS Equivalent Course above the 1000-level must be passed with a grade of "C" or better. Honours students write a research-based Honours thesis and the Honours Qualifying Examination requirement is satisfied through completion of ENVS 4901.03 and ENVS 4902.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Environmental Science. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Environmental Science should consult with the Environmental Science Advisor early in their studies. To be admitted, students must have a cumulative GPA of 3.5 in the first two years of study. More information on applying to the Environmental Science Honours program can be found at www.dal.ca/environmentalscience.

Program Requirements

In addition to fulfilling the requirements outline in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Concentrated Honours program in Environmental Science must complete the following:

1. 1000 level courses (below)
2. Common Core courses (Honours) (below)
3. ENVS 4901.03 and ENVS 4902.03 (Honours thesis and Qualifying Exam)
4. An additional 12 credit hours of ENVS or ENVS-equivalent courses at or above the 2000 level

1000 Level

- Integrated Science - SCIE 1505.18

OR

- BIOL 1010.03 or BIOL 1020.03
- MATH 1000.03 or MATH 1215.03
- STAT 1060.03
- CHEM 1011.03
- CHEM 1012.03
- EARTH 1080.03
- ENVS 1100.06 (grade of B or higher)
- ENVS 1200.03 (grade of B or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement and/or their writing requirement in their first year.

The courses listed above should be taken in the first year, if possible, if ENVS 1100.03 and ENVS 1200.03 are not taken in the first year, it should be taken in the second year.

Also required but usually taken in the second year.

- ECON 1101.03* or ECON 1102.03*

Common Core Courses

Completed at various times over a four year degree program, the Common Core Courses introduce students to the scope and magnitude of Environmental Science and are designed to provide students with an appreciation of the scientific, historic, legal and social aspects of environmental issues.

- STAT 2080.03*
- BIOL 2060.03
- PHIL 2480.03**
- PHYC 2310.03
- ENVS 2000.03
- ENVS 2100.03
- ENVS 3001.03
- ENVS 3200.03
- ENVS 3500.03
- ENVS 3501.03
- ENVS 3502.03
- ENVS 3601.03
- ENVS 4001.03

*STAT 2080.03 and ECON 1101.03 or ECON 1102.03 together satisfy the College of Arts and Science requirement for six credit hours in social science.

**PHIL 2480.03 satisfies half of the College of Arts and Science requirement for six credit hours in Language and Humanities.

BSc or BA (120 credit hour) Combined Honours in Environmental Science and another subject

Students who wish to study Environmental Science in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Environmental Science may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Environmental Science, this requirement is satisfied through ENVS 4901.03 and ENVS 4902.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Environmental Science as the primary subject. See Co-operative Education Program.

Program Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc or BA Combined Honours program in Environmental Science and another subject must complete the following (BSc requirements are listed first followed by those for a BA):

BSc Combined Honours in Environmental Science and another subject

ENVS as primary or secondary subject

1000 Level (to be taken in first year, if possible)

- Integrated Science - SCIE 1505.18

OR

- MATH 1000.03 or MATH 1215.03
- STAT 1060.03
- CHEM 1011.03
- CHEM 1012.03
- ENVS 1100.03 (grade of B or higher)
- ENVS 1200.03 (grade of B or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement and/or their writing requirement in their first year.

Also required but normally taken in the second year:

- ECON 1101.03 or ECON 1102.03

Common Core Courses as listed for BSc Concentrated Honours except:

- PHYC 2310.03 not required
- Choice of ENVS 2000.03 or ENVS 3001.03

If ENVS is the primary subject: a minimum of six additional credit hours of ENVS or ENVS-equivalent courses, which may be ENVS 4901.03/ENVS 4902.03 (Honours Thesis and Qualifying Exam).

If ESS (Environment, Sustainability and Society) is the primary subject, ENVS 3502.03 is waived and should be replaced with another ENVS course at or above the 3000 level.

BA Combined Honours in Environmental Science and another subject

Requirements are the same for ENVS as primary or secondary subject. Students must complete the following:

1000 Level

- ENVS 1100.03 (grade of B or higher)
- ENVS 1200.03 (grade of B or higher)
- Six credit hours in a single first-year science subject chosen from BIOL, CHEM, PHYC, EARTH, ECON
- STAT 1060.03

2000 Level

- ENVS 2000.03
- ENVS 2100.03
- Six credit hours chosen from:
 - BIOL 2003.03
 - BIOL 2004.03
 - BIOL 2060.03
 - GEOG 2800.03
 - CHEM 2505.03
 - OCEA 2000.06
 - ECON 2216.03
 - EARTH 2410.03

- PHYC 2310.03
- PHIL 2480.03

3000 and 4000 Level

- ENVS 3200.03
- ENVS 3501.03
- ENVS 3502.03*
- ENVS 4001.03
- At least six additional credit hours from:
 - Any ENVS course
 - BIOL 3060.03
 - BIOL 3061.03
 - BIOL 4160.03

If ENVS is the primary subject, a minimum of six additional credit hours of ENVS or ENVS equivalent courses, which may be ENVS 4901.03, ENVS 4902.03 (Honours Thesis and Qualifying Exam).

*If ESS is the primary subject, ENVS 3502.03 is waived and should be replaced with another ENVS course at or above the 3000 level.

BSc (120 credit hour) Major in Environmental Science

The 120 credit hour Major is suited to students who want to focus on Environmental Science, but wish to have a program that is somewhat less constrained than the Honours program. Environmental Science Majors complete 36 credit hours in Environmental Science courses. Research and other experiential learning opportunities are available through laboratories, field, special topics and internship courses.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Environmental Science. See Co-operative Education Program.

Program requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Major program in Environmental Science must complete the 1000 level courses (listed below) and the Common Core courses - Majors (also listed below).

1000 Level Courses (to be taken in first year, if possible)

- Integrated Science – 1505.18

Or

- BIOL 1010.03 or BIOL 1020.03
- MATH 1000.03 or MATH 1215.03
- STAT 1060.03
- CHEM 1011.03
- CHEM 1012.03
- EARTH 1080.03
- ENVS 1100.03 (grade of B or higher)
- ENVS 1200.03 (grade of B or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement in their first year.

Also required but usually taken in the second year:

- ECON 1101.03 or ECON 1102.03*

Common Core Courses - Majors

To be completed over the course of a four year degree program: Common Core Courses introduce students to the scope and magnitude of Environmental Science and

are designed to provide students with an appreciation of the scientific, historic, legal and social aspects of environmental issues.

- STAT 2080.03*
- BIOL 2060.03
- PHIL 2480.03**
- PHYC 2310.03
- ENVS 2000.03
- ENVS 2100.03
- ENVS 3001.03
- ENVS 3200.03
- ENVS 3500.03
- ENVS 3501.03
- ENVS 3502.03
- ENVS 3601.03
- ENVS 4001.03

*STAT 2080.03 and ECON 1101.03 or ECON 1102.03 together satisfy the College of Arts and Science requirement for six credit hours in Social Science.

**PHIL 2480.03 satisfies half of the College of Arts and Science requirement for six credit hours in Languages and Humanities.

BSc Double Major in Environmental Science and Community Design

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Double Major program in Environmental Science and Community Design must complete the following:

1000 Level

- Integrated Science - SCIE 1505.18
- ECON 1101.03 or ECON 1102.03
- PLAN 1001.03 and PLAN 1002.03

OR

- BIOL 1010.03 and BIOL 1011.03 or BIOL 1020.03 and BIOL 1021.03
- MATH 1000.03 or MATH 1215.03
- STAT 1060.03
- EARTH 1030.03
- ECON 1101.03 or ECON 1102.03
- PLAN 1001.03 and PLAN 1002.03

Common Core Courses - as listed for BSc Major, except:

- PHYC 2310.03 not required
- Choice of ENVS 2000.03 or ENVS 3001.03

Community Design Courses

- PLAN 2001.03
- PLAN 2002.03
- PLAN 2005.03
- PLAN 3001.03
- PLAN 3002.03
- PLAN 3005.03
- PLAN 3006.03
- An additional three credit hours in PLAN

BSc or BA (120 credit hour) Double Major in Environmental Science and another subject

The Double Major degree program allows students to combine a study of Environmental Science with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, the College of Sustainability or Community Design in the Faculty of Architecture and Planning. Environmental Science may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Environmental Science as the primary subject. See Co-operative Education Program.

Program Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc or BA Double Major program in Environmental Science and another subject must complete the following (BSc requirements are listed first followed by those for a BA):

BSc Double Major, ENVS as primary or secondary subject

Students must complete the following:

1000 Level (to be taken the first year, if possible)

- Integrated Science - SCIE 1505.18

OR

- MATH 1000.03 or MATH 1215.03
- STAT 1060.03
- CHEM 1011.03
- CHEM 1012.03
- ENVS 1100.03 (grade of B or higher)
- ENVS 1200.03 (grade of B or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement in their first year.

Also required but usually taken in the second year:

- ECON 1101.03 or ECON 1102.03*

Common Core Courses as listed for BSc Major except:

- PHYC 2310.03 is not required
- Choice of ENVS 2000.03 or ENVS 3001.03

BA Double Major, ENVS as primary or secondary subject

1000 Level

- ENVS 1100.03 (grade of B or higher)
- ENVS 1200.03 (grade of B or higher)
- Six credit hours in a first year science subject chosen from BIOL, CHEM, PHYC, EARTH, ECON
- STAT 1060.03

2000 Level

- ENVS 2000.03
- ENVS 2100.03
- Six credit hours chosen from:
 - BIOL 2003.03
 - BIOL 2004.03
 - BIOL 2060.03
 - GEOG 2800.03
 - CHEM 2505.03
 - OCEA 2000.06
 - ECON 2216.03
 - EARTH 2410.03
 - PHYC 2310.03
 - PHIL 2480.03

3000 and 4000 Level

- ENVS 3200.03
- ENVS 3501.03
- ENVS 3502.03*
- ENVS 4001.03
- At least six additional credit hours from:
 - Any additional ENVS courses
 - BIOL 3060.03
 - BIOL 3061.03
 - BIOL 4160.03

*If ESS is the A subject ENVS 3502.03 is waived, and should be replaced with another ENVS course at or above the 3000 level.

Minor in Environmental Science

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

Requirements

- Between 18 and 36 credit hours in Environmental Science (ENVS) courses at the 2000 level or higher

Minor in Environmental Science - Agriculture

This minor is also available to **Bachelor of Science (Agriculture)** students.

15 credit hours including:

- ENVA 2000.03: Environmental Studies I or APSC 1012: Introduction to Bioresource Science
- ENVA 2001.03: Environmental Studies II

Nine credit hours are required from the following approved courses:

- APSC 4005.03
- BIOA 3001.03
- CHMA 3009.03; CHMA 3010.03
- ENVA 2002.03; ENVA 3000.03; ENVA 3002.03; ENVA 3004.03; ENVA 3021.03; ENVA 4000.03; ENVA 4002.03; ENVA 4005.03; ENVA 4006.03
- HORT 3000.03
- MCRA 2000.03; MCRA 4000.03
- SOIL 2000.03; SOIL 3001.03; SOIL 4000.03

Students may not select courses which are required for their major.

Minor in Environmental Studies

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

BA Minor

BA students must take 12 credit hours of required courses and 18 elective credit hours from the list of approved courses below. The following rules apply to the selection of courses for the Minor:

- A maximum of three credit hours in the Major subject (i.e., a course beyond those required for the Major) can count instead toward the Minor.
- At least six credit hours from the Approved Electives list must be in FASS courses and at least six credit hours must be from Science Approved Electives courses.
- In addition to ENVS 3200.03, at least nine credit hours must be at the 3000 level or above.

Required Courses:

- ENVS 1000X/Y.06: Introduction to Environmental Science or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Issues in Environmental Science
- PHIL 2480.03: Environmental Ethics
- ENVS 3200.03: Introduction to Environmental Law

BA Approved Electives in Environmental Studies:

Additions to the following lists will be made, as relevant courses become available.

Faculty of Science:

- BIOL 2060.03: Introductory Ecology
- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction to Marine Life in Nova Scotia
- BIOL 3060.03: Environmental Ecology
- BIOL 3061.03: Communities and Ecosystems
- BIOL 3225.03: Plants in the human landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3615.03: Methods in Ecology
- BIOL 4065.03: Sustainability and Global Change
- CHEM 2505.03: Environmental Chemistry
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- EARTH 2410.03: Environmental and Resource Geology I
- EARTH 3500.03: Geoscience Information Management
- GEOG 2800.03: Climate Change
- OCEA 2000.06: The Blue Planet
- OCEA 2800.03: Climate Change
- PHYC 2451.03: Astronomy I: The Sky and Planets
- PHYC 2800.03: Climate Change
- ENVS 2001.03: Analytical Environmental Science and Social Responsibility
- ENVS 2100.03: Environmental Informatics
- ENVS 3000.03: Environmental Science Internship
- ENVS 3210.03: Environmental Law II: Natural Justice and Unnatural Acts
- ENVS 3220.03: International Environmental Law for Scientists
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3400.03: Human Health and Sustainability
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory

Faculty of Arts and Social Sciences (FASS):

- CTMP 3000.06: Science and Culture
- CTMP 3150.03: Nature and History
- CTMP 3210.03: Intersecting Bodies, Selves and Environments

- CTMP 3411.03: Studies in Contemporary Science and Technology
- EMSP 2310.03: Women and Gender in Early Modern Science
- EMSP 2330.03: Nature Imagined
- EMSP 3000.06: The Study of Nature in Early Modern Europe
- ENGL 4005.03: Green Reading: Nature, Culture, Canada
- ENGL 4400.03: Nature of America
- HSTC 3000.03: The Scientific Revolution
- HSTC 4000.06: Science and Nature in the Modern Period
- HSTC 4300.03: Nature and Romanticism
- HIST 3073.03: History of Marine Sciences
- HIST 3210/CANA 3020/GEOG 3020.03: Canadian Cultural Landscapes
- HIST 3302.03: Technology and History in North America
- HIST 3370.03: North American Landscapes
- HIST 3750.03: History of Seafaring
- HIST 4271.03: The Fisheries of Atlantic Canada - Society and Ecology in Historical Perspective
- HIST 4350.03: People and Things - Material Culture
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- INTD 3002.03: Seminar in Development: Development Practice
- INTD 3114.03: Environment and Development
- INTD 3304.03: Sustainable Development in Cuba
- INTD 4013.03: Environmental Conflict & Security
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2485.03: Technology and the Environment
- PHIL 3670.03: Philosophy of Science
- PHIL 4120.03: Theory of Rational Decision-Making
- POLI 3585.03: Politics of the Environment
- POLI 4228.03: Interest Groups
- POLI 4380.03: Politics of Climate Change
- SOSA 2100.06: Environment and Culture
- SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America
- SOSA 3190.03: Social Movements
- SOSA 3220.03: Coastal Communities
- SOSA 4210.03: Tourism and Development
- SPAN 2070.03: Area Studies on Mexico and Central America
- GWST 3310.03: Gender and Development in Africa

Other Electives

- PLAN 2001.03: Landscape Analysis
- PLAN 3001.03: Landscape Ecology
- PLAN 3002.03: Reading the City
- PLAN 3005.03: Cities and the Environment in History
- PLAN 3010.03: Urban Ecology
- PLAN 3020.03: Landscape Design
- PLAN 4106.03: Transportation Planning

BSc, BCSc, BInf, BComm, BMgmt Minor

Students in these programs must take 18 credit hours of required courses, plus 12 credit hours from the approved list of elective courses below. Note: In planning their programs students must take into account the prerequisites which apply to many of the elective courses listed below. The following rules apply to the selection of courses for the Minor:

- No course can fulfill a requirement of both the Major or Honours subject and the Minor.
- A maximum of three credit hours in the Major/Honours subject (i.e., a course beyond those required for the Major/Honours) can count toward the Minor.
- At least three credit hours beyond the required courses must be at the 3000 level or above.

Additions to the Electives list will be made as relevant courses become available.

Required Courses:

- ENVS 1000X/Y.06: Introduction to Environmental Science or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Issues in Environmental Science
- PHIL 2480.03: Environmental Ethics

- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3200.03: Introduction to Environmental Law

Electives (12 credit hours from the list):

- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction the Marine Life of Nova Scotia
- BIOL 3063.03 Resource Ecology
- BIOL 3225.03: Plants in the Human Landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3xxx.03: Any ecology-related course at 3000-level or above
- BIOL 4065.03: Sustainability and Global Change
- BIOL 4104.03: Environmental Microbiology
- BIOL 4160.03: Political Ecology
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- CHEM 4595.03: Atmospheric Chemistry
- CTMP 3210.03: Intersecting Bodies, Selves and Environment
- CTMP 3220.03: The Aesthetics of Nature
- EARTH 2203.03: Sediments and Sedimentary Rocks
- EARTH 2410.03: Environmental and Resource Geology I
- EARTH 3302.03: Quaternary Sedimentary Environments
- EARTH 3400.03: Fundamentals of Hydrogeology
- EARTH 3402.03: Practical Hydrogeology
- EARTH 3410.03: Environmental Geology 2
- EARTH 3420.03: Geochemistry of Aquatic Environments
- EARTH 3440.03: Geomorphology
- EARTH 3500.03: Geoscience Information Management
- EARTH 4450.03: Introduction to Landscape Simulation
- EARTH 4502.03: Micropaleontology and Global Change
- EARTH 4520.03: GIS Applications to Environmental and Geological Sciences
- EARTH 4530.03: Environmental Remote Sensing
- ECON 2210.03: Emerging Giants: the Economic Rise of China and India
- ECON 2216.03: Economics of Global Warming
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ENVS 2100.03: Environmental Informatics
- ENVS 3000.03: Environmental Science Internship
- ENVS 4210.03: Administrative Environmental Law: Natural Justice and Unnatural Acts
- ENVS 3220.03: International Law for Environmental Scientists
- ENVS 3225.03: Plants in the Human Landscapes
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3301.03: Enterprise Sustainability
- ENVS 3400.03: Human Health and Sustainability
- ENVS 3500.03: Geoscience Information Management
- ENVS 3615.03: Methods in Ecology
- ENVS 3632.03: Applied Field Methods in Fish Ecology
- ENVS 3801.03: Directed Readings in Environmental Science
- ENVS 4001.03: Environmental Impact Assessment
- GEOG 2800.03: Climate Change
- HIST 3370.03: North American Landscapes
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- INTD 3304.03: Sustainable Development in Cuba
- MICI 4104.03: Environmental Microbiology
- OCEA 2000.06: The Blue Planet
- OCEA 2800.03: Climate Change
- OCEA 4110.03: Introduction to Geological Oceanography
- OCEA 4120.03: Introduction to Physical Oceanography
- OCEA 4130.03: Introduction to Chemical Oceanography
- OCEA 4140.03: Introduction to Biological Oceanography
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2485.03: Technology and the Environment
- PHYC 2310.03: Energy and the Environment
- PHYC 2451.03: Astronomy I: The Sky and Planets
- PHYC 2800.03: Climate Change
- PLAN 2001.03: Landscape Analysis

- PLAN 3001.03: Landscape Ecology
- PLAN 3002.03: Reading the City
- PLAN 3005.03: Cities and the Environment in History
- PLAN 3010.03: Urban Ecology
- PLAN 3020.03: Landscape Design
- PLAN 4106.03: Transportation Planning
- POLI 3380.03: Politics of Climate Change
- POLI 3385.03: Politics of the Environment
- POLI 3589.03: Politics of the Sea I
- POLI 3590.03: Politics of the Sea II
- SOSA 2100.06: Environment and Culture
- SOSA 3211.03: Continuity and Change in Rural Society
- SOSA 3220.03: Coastal Communities in the North Atlantic

BCD Minor

The Minor in Environmental Studies is a five credit (30 credit hour) Minor taken in conjunction with the Bachelor of Community Design Honours (It is not available within the three year BCD program). The Minor in Environmental Studies provides a student with an appreciation of the scientific, cultural, economic, historic, legal and social aspects of environmental issues. The student will have the opportunity to earn an additional credential on the degree to recognize the special concentration of courses in environmental studies. Approval for the program is required from the School of Planning and from the Coordinator of Environmental Programs. Students complete all requirements for their Honours Major in addition to these required courses for the minor. Students may count the course ENVS 1000 towards both the BCD requirements and towards the requirement for the Minor. Other courses cannot be counted towards both sets of requirements.

Required Courses:

- ENVS 1000.06: Introduction to Environmental Studies (or DISP)
- PHIL 2480.03: Environmental Ethics
- ENVS 3200.03: Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II

Elective requirements:

12 credit hours of courses from the following list:

- BIOL 2605.03: Introduction to Marine Life of Nova Scotia
- BIOL 3601.03: Nature Conservation
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- ECON 2216.03: Economics of Global Warming
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ENVS 3000.03: Environmental Science Internship
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3301.03: Enterprise Sustainability
- ENVS 3220.03: International Environmental Law for Scientists
- ENVS 3400.03: Environment and Human Health
- ENVS 3500.03: Exploring Geographic Information Systems
- ENVS 4001.03: Environmental Impact Assessment
- ESMP 2330.03: Nature Imagined
- ESMP 3000.06: The Study of Nature in Early Modern Europe
- EARTH 3302.03: Quaternary Sedimentary Deposits
- EARTH 3440/GEOG 3440: Geomorphology
- HIST 3370.03: North American Landscapes
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- OCEA 2001.03: The Blue Planet I
- OCEA 2002.03: The Blue Planet II
- OCEA 2800.03: Climate Change
- OCEA 3001.03: Introduction to Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- PHIL 2485.03: Technology and the Environment

- POLI 3385.03: Politics of the Environment
- POLI 3589.03: Politics of the Sea I
- SOSA 2100.06: Environment and Culture
- SOSA 3211.03: Continuity and Change in Rural Society
- SOSA 3220.03: Coastal Communities in the North Atlantic
- SOSA 4072.03: Naturalistic Approaches to the Social Sciences
- STAT 3345.03: Environmental Risk Assessment

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students Co-operative Education Program (Science Co-op) in Environmental Science

Co-op Academic Advisor: Peter Mushkat pwm@dal.ca

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Environmental Science, or in Combined Honours or Double Major programs with Environmental Science as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Environmental Science Co-op Academic Advisor and from the Co-operative Education office http://www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Environmental Science, please see www.dal.ca/environment.

Minors available to students in Environmental Science

Minor programs allow students to develop subject specialities in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Environmental Science may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Environmental Science, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements.

Certificates of particular interest to student enrolled in a BSc or BA in Environmental Science include:

- Certificate in Animal Behaviour
- Certificate in Environmental Impact Assessment
- Certificate in Geographic Information Science
- Certificate in Science Leadership and Communication

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to

students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

ENVS 1100 Foundations of Environmental Science: ecosphere, resources & sustainability

CREDIT HOURS: 3

This course introduces students to key topics in Environmental Science including science literacy, environmental ethics, principles of ecology, evolution, biodiversity, human population growth, soil, agriculture, forestry, and oceans and freshwater systems. Tutorials reinforce and supplement lectures and allow for small group discussion and debate.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

EXCLUSIONS: ENVI 1100.06, ENVS 1000.06

ENVS 1200 Current Environmental Challenges: Analysis and Solutions

CREDIT HOURS: 3

This course introduces current issues and challenges in Environmental Science including air pollution and climate change, non-renewable and renewable energy, waste, urbanization, environmental law, and sustainability and education. Tutorials reinforce and supplement lectures and allow for small group discussion and debate.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

EXCLUSIONS: ENVI 1100.06, ENVS 1000.06

ENVS 2000 Urban field School

CREDIT HOURS: 3

This field course offers an introduction to urban environmental science by examining the role of humans in ecosystems and how humans change ecosystem processes and functions within urban areas. Students gain hands-on experience in environmental science techniques during excursions in different urban settings within the Halifax Regional Municipality.

NOTES: Offered in early May. Daily field trips and/or labs. An auxiliary fee is charged to cover field expenses.

FORMAT: Lecture| Lab

PREREQUISITE: ENVS 1000.06 or SCIE 1505.18 or (ENVS 1100.03 and ENVS 1200.03) or equivalent and open only to students in the BSc or BA Environmental Science Programs

ENVS 2100 Environmental Informatics

CREDIT HOURS: 3

Environmental Informatics is the knowledge, skills and tools which enable information to be collected, managed and disseminated to support research in environmental science. Students develop skills for the analysis, evaluation and synthesis of knowledge in environmental science. Information systems, tools, and techniques are introduced and applied to current environmental challenges.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENVS 1000X/Y.06 (or ENVS 1100.03 and ENVS 1200.03) SCIE 1505.18 or equivalent

ENVS 2410 Environmental Issues in Earth Sciences

CREDIT HOURS: 3

Geology underlies many of the environmental problems facing humanity today. Topics include environmental aspects of energy and mineral resource, geologic hazards, geologic connections to pollution and waste disposal, and the role that water plays in its various guises. Canadian examples are incorporated where appropriate.

Approved with Canadian Studies.

NOTES: This course is not offered every year. Please consult department in the spring for further information.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: One of: EARTH 1080, EARTH/GEOG 1030, EARTH/GEOG 1060, ENVS 1000 (or ENVS 1100 and 1200), SUST 1001 with a grade of B or above, or DISP with Earth Sciences

CROSS-LISTING: CANA 2410, EARTH 2410

EXCLUSIONS: This class is not available for Earth Sciences Majors

ENVS 3000 Environmental Science Internship

CREDIT HOURS: 3

This course allows students to gain hands-on experience while addressing a question of personal and academic interest relevant to the field of environmental science by working as interns for 8 hours a week over a twelve-week period on a specific project at a sponsoring agency.

NOTES: It is the student's responsibility to consult with Environmental Program at least 3 weeks prior to the term in which the internship will take place to arrange for a placement and to make sure that the details of the internship are in accordance with university standards.

PREREQUISITE: Open ONLY to students in Minor in Environmental Studies, Honours/Major/Double Major/Combined Honours in Environmental Science

ENVS 3001 Environmental Science Field School

CREDIT HOURS: 3

Daily field trips introduce methods used in environmental science and environmental processes at diverse sites within Nova Scotia. Involves full-day trips from Halifax and a multi-day camping trip away from Halifax. Offered during the last 2 weeks before Labour Day.

PREREQUISITE: Open ONLY to students in BSc or BA Environmental Science

ENVS 3200 Introduction to Environmental Law

CREDIT HOURS: 3

This course will take a look at how environmental law operates in Nova Scotia within the Federal framework and it will illustrate some of the multi-disciplinary aspects which make this area of law part science, part art and part soothsaying.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Must be a third year student

ENVS 3225 Plants in the human landscape

CREDIT HOURS: 3

The use of plants for human recreation and aesthetic purposes in gardens, public parks, suburban and urban landscapes. Topics include: history of gardens, garden design, plant materials, edible landscaping, plants and human health. The course includes field trips and group work and students complete a design project.

FORMAT: Lecture| Tutorial

PREREQUISITE: BIOL 1010.03 or BIOL 1020.03 (C- or better) and BIOL 1011.03 or BIOL 1021.03 (C- or better) or DISP or PLAN 2001.03

CROSS-LISTING: PLAN 3225, BIOL 3225

ENVS 3226 Economic Botany, Plants and Civilization

CREDIT HOURS: 3

The story of the human use of plants for food, fibre and fuel including the botany, domestication, development, distribution, production, processing, history, economic and social impacts of the major world crops (cereals, fruits, vegetables, flowers and industrial crops) and the development of novel plant based bioproducts (bio-fuels, etc).

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 1010.03 or BIOL 1020.03 (B- or better) and BIOL 1011.03/BIOL 1021.03 (B- or better)

CROSS-LISTING: BIOL 3226.03

ENVS 3300 Contaminated Site Management

CREDIT HOURS: 3

Scientists, engineers and planners should have a basic understanding of the issues surrounding environmental site assessment given the potential environmental and socio-economic impacts. Topics include phased assessments, risk assessment, remediation and monitoring. Case studies, projects, guest speakers and field trips augment the class. Class offered in alternate years.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 1011.03/1012.03; EARTH 1010.03/1020.03; OR permission of the instructor

ENVS 3301 Enterprise Sustainability

CREDIT HOURS: 3

Integration of sustainability into corporate environment is reviewed from perspectives of practical application of pollution prevention (P2). Tools for data collection, communication, analysis, and presentation will be taught. Field trip(s) will provide practical experience and form foundation for major project. Guest speakers will supplement the course. Class offered in alternate years.

FORMAT: Lecture

COREQUISITE: ENVS 1000X/Y.06 or ENVS 2001.03 or ENVS 1100.03 and ENVS 1200.03

ENVS 3400 Environment and Human Health

CREDIT HOURS: 3

This course examines the relationships between the health of populations and health determinants in the context of environmental sustainability. Weekly laboratory exercises will teach students how geomatics (GIS, GPS, and remote sensing technologies) and epidemiological tools can be used to assess the links between the health of human populations and the health of the environment, and how to use these tools for environmental health research.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Must be a third year student or have permission of instructor

CROSS-LISTING: GEOG 3400.03

ENVS 3500 Geoscience Information Management

CREDIT HOURS: 3

See course description for EARTH 3500 in the Earth Sciences section of the calendar.

ENVS 3501 Environmental Problem Solving I

CREDIT HOURS: 3

This course introduces students to concepts and methods for analyzing environmental problems. Students will learn analytical approaches for problem solving that are appropriate for a wide range of environmental issues and apply these to the analysis of case studies.

PREREQUISITE: ENVS 1000.06 (with a grade of B or better) or ENVS 1100.03 AND ENVS 1200.03 (with a grade of B or better). Must be a 3rd year student OR have permission of instructor.

ENVS 3502 Environmental Problem Solving II: The Campus as a Living Laboratory

CREDIT HOURS: 3

In this course the campus serves as a living laboratory for identifying, evaluating and assessing indicators of progress toward greater campus sustainability. Working in

groups, students apply problem solving models to case studies using qualitative and quantitative research methods and make recommendations for improvements on campus based on their analyses.

PREREQUISITE: ENVS 3501.03 or permission of instructor

CROSS-LISTING: SUST 3502.03

EXCLUSIONS: MGMT 3701.03

ENVS 3601 Global Biogeochemical Cycles

CREDIT HOURS: 3

An interdisciplinary course that examines example global cycles of water, carbon, nitrogen, phosphorus, and sulphur, and human impacts on these cycles, as manifested in our atmospheric, soil, ocean and freshwater environments. This course involves discussion of the latest developments in this rapidly changing field and will provide a framework for those interested in global change.

PREREQUISITE: An introductory Chemistry class and one of ENVS 1000.06, SUST 1001.06, EARTH 1080.03, or EARTH 1090.03, or OCEA 2000.06, or OCEA 2001.03 and OCEA 2002.03

CROSS-LISTING: EARTH 3601.03

ENVS 3615 Methods in Ecology

CREDIT HOURS: 3

See course description for BIOL 3615 in the Biology section of the calendar.

ENVS 3623 Applied Coastal Ecology

CREDIT HOURS: 3

See course description for BIOL 3623 in the Biology section of the calendar.

ENVS 3624 Urban Freshwater Systems

CREDIT HOURS: 3

See course description for BIOL 3624 in the Biology section of the calendar.

ENVS 3632 Applied Field Methods in Fish Ecology

CREDIT HOURS: 3

See course description for BIOL 3632 in the Biology section of the calendar.

FORMAT: Lecture| Lab

ENVS 3633 Spatial Information and GIS in Ecology

CREDIT HOURS: 3

A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address and applied problem in ecology.

NOTES: Offered in the summer through DEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITE: BIOL 2060.03

CROSS-LISTING: BIOL 3633.03, GEOG 3633.03

ENVS 3664 Intertidal Ecology and Diversity

CREDIT HOURS: 3

See course description for BIOL 3664 in the Biology section of the calendar.

ENVS 3701 Fundamentals of Hydrology

CREDIT HOURS: 3

This course is an introduction to hydrology, emphasizing surface processes and watershed responses. In this course we learn about both the pure and applied uses of hydrology. The course is quantitative and introduces hydrologic processes in the atmosphere, on the land surface, in groundwater and in stream channels.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 1000.03 or MATH 1214.03 and one of ENVS 1000.06, SUST 1001.06, EARTH 1080.03, or EARTH 1090.03 or one of SCIE 1515X/Y.21, SCIE 1530.27, SCIE 1540X/Y.33 and completion of 2 years of an undergraduate degree. PHYC 1280 and PHYC 1290.03 (or PHYC 1300X/Y.06) and MATH 1010.03 are recommended.

CROSS-LISTING: EARTH 3701.03

ENVS 3801 Directed Readings in Environmental Science

CREDIT HOURS: 3

This course is intended for third and fourth-year students who wish to study in an area of environmental science not covered in other courses offered at the university. It involves independent study supervised by a faculty member. Class content and marking scheme must be approved by the Director of Environmental Programs during the first week of the academic term in which the credit is being sought. It is the student's responsibility to consult with Environmental Programs at least 2 weeks prior to the term in which the Directed Readings course will take place.

PREREQUISITE: ENVS 1000X/Y.06 or ENVS 2001.03 or (ENVS 1100.03 and ENVS 1200.03) and third year student status.

ENVS 4001 Environmental Impact Assessment

CREDIT HOURS: 3

This course provides an opportunity to explore all aspects of environmental impact assessment (EIA) as practiced in Canada and in other countries. The course traces the development of EIA over the past 30 years and critically examines the scientific, procedural and political dimensions.

NOTES: All students taking BIOL 4001.03 or ENVS 4001.03 must have completed 90 credits and be in their fourth year of study or have permission of instructor.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: ENVS 1000X/Y.06 or BIOL 2060.03 or EARTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or INTD 2002.03 or OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) or SUST 2000.06 or SUST 2001.06.

CROSS-LISTING: ENVE 4772.03 (winter session only), BIOL 4001.03

ENVS 4002 The Science of Wetland Ecosystems

CREDIT HOURS: 3

An interdisciplinary introduction to wetland ecosystems, with emphasis on the relationship between wetlands and the surrounding watershed. This relationship determines wetland type, function and in developed landscapes, wetland health. Inversely, wetland type, function and health can affect the developed landscapes. Students will gain an appreciation of the physical relationship through an examination of wetland hydrology, chemical cycling, and ecology. Management of wetlands in the landscape through policy and engineering will also be studied.

FORMAT: Lecture

PREREQUISITE: CHEM 1011.03/1012.03 or CHEM 1021.03/1022.03 and BIOL 2060.03

CROSS-LISTING: BIOL 4002.03

ENVS 4003 Coral Reefs and Environmental Change

CREDIT HOURS: 3

Coral reefs are iconic marine ecosystems both biologically and economically. This class introduces students to the biology of both tropical and cold-water corals, key characteristics of their abiotic environments, human impacts at both local and global scales, and management options for sustainable resource use and the protection of biodiversity.

PREREQUISITE: Chem 1011/Chem 1012 and Biol 2060. Also restricted to students with 6 credit hours in Environmental Science or Biology or Marine Biology at or above the 3000 level.

CROSS-LISTING: MARI 4003

RESTRICTIONS: Restricted to exclude E1, E2, E3.

ENVS 4210 Environmental Law: Natural Justice and Unnatural Acts

CREDIT HOURS: 3

Environmental Science in Canada is largely defined by statutes and regulations. The course will consider administrative processes, the role of legislation, the function of administrative boards and tribunals and the general principles of judicial review. Offered every odd winter term.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: ENVS 3200.03 with a grade of A-

ENVS 4220 International Environmental Law for Scientists

CREDIT HOURS: 3

The problems posed by environmental issues are global requiring solutions that are only achievable through multi-lateral collaboration. Over 20 years, there has been an explosion of international agreements intended to either redress or avoid environmental disasters. Some of these are based on sound science, some on politics. How do these two elements mix at the international level? Can international law accommodate the inherent uncertainty in scientific hypotheses? Offered every even winter term.

FORMAT: Lecture| Seminar

PREREQUISITE: ENVS 3200.03 with a grade of A-

EXCLUSIONS: ENVS 3220.03

ENVS 4850 Geographic Information Science Research Project

CREDIT HOURS: 3

Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

COREQUISITE: EARTH 5420.03/GEOG 4520.03

PREREQUISITE: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03 and permission of instructor

CROSS-LISTING: BIOL 4850.03, SCIE 4850.03, EARTH 4850.03, GEOG 4850.03

EXCLUSIONS: Restricted to 3rd and 4th year students.

ENVS 4901 Honours Thesis Part A

CREDIT HOURS: 3

Mastery of the basic skills of problem definition, proposal preparation and project implementation is the key to dealing with a wide range of "real-life" situations, both on and off the career path. Includes lectures and tutorials on proposal writing, research design and methodologies, and an independent environmental science research project carried out under the supervision of an approved faculty member. Required for Honours Environmental Science.

FORMAT: Lecture| Seminar

PREREQUISITE: Fourth year Environmental Science and permission of Instructor/Director

ENVS 4902 Honours Thesis Project Part B

CREDIT HOURS: 3

Independent research project carried out under the supervision of an approved faculty member or affiliated research scientists. Required for Honours Environmental Science.

PREREQUISITE: ENVS 4901.03

ENVS 4950 Advanced Topics in Environmental Science

CREDIT HOURS: 3

This course will address current interdisciplinary issues in environmental science with topics varying each semester. Details as to the content of the course will be announced by Environmental Programs at least one month in advance of the course offering. The course will be taught by Dalhousie faculty, and/or visiting scholars.

FORMAT: Lecture| Seminar

PREREQUISITE: This class is restricted to students in the Honours/Major/Double Major in Environmental Science, or permission of the Director of Environmental Programs.

Environment, Sustainability and Society

Location:

Building/Room: College of Sustainability

Street Address 1: 1459 LeMarchant Street

Street Address 2: Suite 1401

P.O. Box: 15000

Halifax, NS B3H 4R2

Telephone: (902) 494-4581

Fax: (902) 494-8923

Website: www.ess.dal.ca

Email Address: sustainability@dal.ca

Degree Programs

The College of Sustainability offers a BSc Double Major, Combined Honours and Minor in Environment, Sustainability and Society with any major/honours subject in the Faculty of Science and the Faculty of Computer Science. For complete details about the College, its programs and courses please see the College of Sustainability.

Students in the ESS Program are eligible to pursue the following Certificates offered by the Faculty of Science:

- Certificate in Environmental Impact Assessment
- Certificate in Geographical Information Systems

BSc, Double Major/Combined Honours, Environment, Sustainability and Society

Environment, Sustainability and Society as Subject A

Subject A: Environment, Sustainability and Society

- SUST 1000.06 (six credit hours in fall term)
- SUST 1001.06 (six credit hours in winter term)
- SUST 2000.06 (six credit hours in fall term)
- SUST 2001.06 (six credit hours in winter term)
- SUST 3000.03
- SUST 3502.03 or MGMT 3701.03
- SUST 4000X/Y.06

For Double Major:

- 18 credit hours SUST/ESS Electives (at least 12 credit hours outside subject B)

For Combined Honours:

- 12 credit hours SUST/ESS Electives (at least six credit hours outside Subject B)
- SUST 4900X/Y.06
- Cumulative GPA in Honours subject courses above 1000 level of 3.3, with no individual grade less than C

Subject B: Any Major/Honours subject in the Faculty of Science

For detailed requirements please consult the calendar and academic advisor for your allied subject.

Environment, Sustainability and Society as Subject B

Subject A: Any Major/Honours subject in the Faculty of Science or the Faculty of Computer Science

For detailed requirements please consult the calendar and academic advisor for your allied subject.

Additional requirements for Combined Honours: Must comply with Honours requirements for Subject A.

Subject B: Environment, Sustainability and Society

- SUST 1000.06 (six credit hours in fall term)
- SUST 1001.06 (six credit hours in winter term)
- SUST 2000.06 or SUST 2001.06
- six additional credit hours in SUST at the 2000 level or above
- 18 credit hours SUST/ESS elective (at least 12 credit hours outside subject A)
- at least 12 credit hours must be at the 3000 level or above

Minor in Environment, Sustainability and Society

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

- a minimum of 18 credit hours and a maximum of 27 credit hours at the 2000 level or above in SUST courses.
- Prerequisites: SUST 1000.06 and SUST 1001.06

Food Science

Minor in Food Science

This minor is available to students registered in a 120 credit hour Bachelor of Science program.

Requirements

The requirements are as for the appropriate program with the completion of the following courses to fulfill the Food Science Minor:

- FOSC 1000.03: Concepts in Food Science
- 24 credit hours from the following list:
 - ANSC 2004.03: Organic Livestock Production
 - BIOL 3226.03: Plants and Civilization
 - CPST 1103.03/CPST 1203.03: Technical Communications
 - CPST 3030.03: Engineering in Society II
 - ENVE 4342.03: Industrial Biotechnology
 - FOSC 2010.03: Food Commodities
 - FOSC 3010.03: Food Chemistry
 - FOSC 3020.03: Food Analysis
 - FOSC 3030.03: Food Quality Assurance
 - FOSC 3080.03: Food Microbiology
 - FOSC 4020.03: Chemistry - Fats, Oils, Lipids
 - FOSC 4030.03: Food Product Development
 - FOSC 4070.03: Food Processing
 - FOSC 4081.03: Brewing Science
 - FOSC 4091.03: Food Safety and Biotechnology
 - FOSC 4500.03: Seminar in Food Science
 - FOSC 4250.03: Food Product Development Project
 - HPRO 2250.03: Interdisciplinary Class in Human Nutrition
- Other electives as approved by the Food Science Coordinator

Geography

Note: There is no Geography program at Dalhousie; however, several courses taught in various departments are commonly recognized as Geography courses. Only courses which are cross-listed in Science departments may be used to meet the life or physical science subject requirement for the BA degree.

Staff

Deans

Macy, C., BA (Arch) (Calif. At Berkeley), MArch (MIT)

Moore, C., BA (Hons), PhD (Cambridge) Professor, Psychology

Summerby-Murray, R., ATCL Dip (Trinity College, London), BA, MA (Canterbury), PhD (Toronto)

Geography Coordinators

Architecture and Planning: **Manuel, P.**, BA (Carleton), MSc (McGill), PhD (Dalhousie), MCIP, LPP (patricia.manuel@dal.ca)

Arts and Social Sciences: **Summerby-Murray, R.**, ARCL Dip (Trinity College, London, BA, MA (Canterbury), PhD (Toronto) (fassdean@dal.ca)

Science: **Ryan, A. M.**, BSc (Univ College Dublin), MSc, BEd (Acadia), MEd (MSVU), PhD (Dalhousie) (amryan@dal.ca)

Minor in Geography

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Community Design (Hons), Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

To fulfill the requirements for a Minor in Geography, students must complete 24 credit hours, including the following:

- GEOG 1030.03/ERTH 1030.03: Introduction to Physical Geography
- GEOG 1035.03: Introduction to Human Geography
- GEOG 2000.03: Cartography

Additional 15 credit hours from the following list: at least 6 of which must be at the 3000 level or higher.

- GEOG 2001.03/PLAN 2001.03: Landscape analysis
- GEOG 2006.03/PLAN 2006.03: Space, Place, and Geographic Information Systems
- GEOG 2070.03/PLAN 2070.03: Area Studies on Mexico and Central America
- GEOG 2100X/Y.06.SOSA 2100.06: Environment and Culture
- GEOG 2201.03/INTD 2001.03: Introduction to Development
- GEOG 2202.03/INTD 2002.03: Introduction to Development II
- GEOG 2206.03/INTD 2106.03: Africa: An Introduction
- GEOG 2336.03/ECON 2336.03: Regional Development
- GEOG 2800.03/PHYC 2800.03: Climate Change
- GEOG 3001.03/PLAN 3001.03: Landscape Ecology
- GEOG 3002.03/PLAN 3002.03: Reading the City
- GEOG 3005.03/PLAN 3005.03: Cities and the Environment
- GEOG 3006.03/PLAN 3006.03: Reading the Landscape
- GEOG 3110.03/INTD 3110.03: Migration and Development
- GEOG 3114.03/INTD 3114.03: Environment and Development
- GEOG 3165.03/SOSA 3165.03: Peoples and Cultures of the World: Selected Area Studies
- GEOG 3210.03/HIST 3210.03/CANA 3020.03: Canadian Cultural Landscapes
- GEOG 3220.03/SOSA 3220.03: Coastal Communities in the North Atlantic
- GEOG 3284.03/SOSA 3284.03: Living in cities
- GEOG 3370.03/HIST 3370.03: North American Landscapes
- GEOG 3400.03/ENVS 3400.03: Human Health and Sustainability
- GEOG 3440.03/ERTH 3440.03: Geomorphology
- GEOG 3500.03/ERTH 3500.03/ENVS 3500.03/ERTH 5600.03: Exploring Geographic Information Systems
- GEOG 3633.03/ENVS 3633.03/BIOL 3633.03: Spatial Information and GIS in Ecology
- GEOG 4440.03/ERTH 4440.03: Geomorphology and Landscape Evolution
- GEOG 4450.03/ERTH 4450.03: Introduction to Landscape Simulation
- GEOG 4520.03/ERTH 4520.03: GIS Applications to Environmental and Geological Sciences
- GEOG 4530.03/ERTH 4530.03: Environmental Remote Sensing

NOTE: Students in the BCD program may not select PLAN cross-listed courses that are required courses for their degree program

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

GEOG 1030 Introduction to Physical Geography

CREDIT HOURS: 3

This non-lab science course examines the nature of weather and climate, earth's surface features and processes, and internal processes that contribute to landform development. An integral component of the course is an exploration of the representation and interpretation of physical geographic data through the examination of a variety of maps.

NOTES: There are no pre-requisites for this course and students may take this class in addition to any other first year Earth Sciences class.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

CROSS-LISTING: EARTH 1030.03

GEOG 1035 Introduction to Human Geography

CREDIT HOURS: 3

Human geography examines the ways that people perceive, use, and alter the landscapes they occupy. This course considers aspects of culture that characterize different social groups, as well as the systems of production, livelihood, spatial organization, and administration that societies erect. The class introduces the principal tools of human geographers: maps, demography, and analysis of cultural patterns.

NOTES: This class cannot be used to meet the life or physical science subject requirement for the BA degree.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

GEOG 1060 Earthquakes, Volcanoes and Natural Disasters

CREDIT HOURS: 3

Earthquakes, meteorite impacts, rapid climate change, volcanic eruptions, hurricanes, landslides, solar flares, and floods are natural disasters that affect our economy, public policy, and safety. Where, why and how frequently do natural disasters occur? Are predictions possible? Are media portrayals of risk and damage realistic? This course, aimed at the nonspecialist, investigates these intriguing questions. Excerpts of "disaster films", in conjunction with lectures and discussions are used to identify the causes, consequences and sometimes erroneous perceptions of natural hazards. Examples from Atlantic Canada and contemporary disasters are used to assess local risk and real-time events worldwide.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

CROSS-LISTING: EARTH 1060.03

GEOG 2000 Cartography

CREDIT HOURS: 3

Maps, are essential aids to disciplines that span archaeology to zoology. Navigation is the art and science of finding one's way through both natural and built landscapes. This class investigates how maps are constructed and interpreted, how maps can distort perceptions, and can influence one's decisions.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: EARTH/GEOG 1030, or EARTH 1080

GEOG 2001 Landscape Analysis

CREDIT HOURS: 3

Designers and planners need to understand the influence of physical, biological, and cultural systems in landscape evolution, and the relevance of that information in analyzing land capability. Students develop inventory and analysis tools for understanding environmental processes and their implications for design and planning. There will be field trips and a lab component.

FORMAT: Lecture| Lab

PREREQUISITE: EARTH 1030.03

CROSS-LISTING: PLAN 2001.03

GEOG 2006 Space, Place and Geographic Information Systems

CREDIT HOURS: 3

Planners use Geographical Information systems (GIS) for data collection, coordination, and analysis. Properly interpreted, GIS data contribute to informed decision-making. This course explores the application of GIS in planning within a project-centred setting. Students learn to use GIS to address and use and site planning issues.

The course also considers mapping standards used within the field of planning, and examines legal, privacy, and ethical implications of using GIS data in the public realm.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: PLAN/GEOG 2001

CROSS-LISTING: PLAN 2006.03

GEOG 2070 Area Studies on Mexico and Central America

CREDIT HOURS: 3

Following an examination of the indigenous heritage, and the colonial legacy of the conquistadors, the class deals principally with the contemporary period, examining the Mexican Revolution and its aftermath, the Somoza dynasty, Nicaragua under the Sandinistas, the U.S. role in the region, the human rights situation in Central America, and probable developments in the region. The class is designed to provide an understanding of the contemporary reality of this volatile region, in many ways a microcosm of the crucial situation of Latin America as a whole.

FORMAT: Lecture| Discussion

LECTURE HOURS PER WEEK: 2

PREREQUISITE: No prerequisites. Open to students in all departments. No knowledge of Spanish necessary

CROSS-LISTING: HIST 2383.03

GEOG 2100X/Y Environment and Culture

CREDIT HOURS: 6

Concern about the environment is a widespread phenomenon as virtually everyone is confronted by environmental issues -- be they global warming, the depletion of the ozone layer or the continuing problems of water pollution and solid waste disposal. Furthermore, we are becoming increasingly aware of that environmental issues often have global implications. The efforts of cities in Canada to deal with environmental pollution, for example, may lead to conflicts with rural regions. Similarly, rural regions, in their use of various chemical agents, may find themselves affecting the lives of city dwellers. This class will explore key relationships between human culture and the physical environment. Topics to be examined include: historical, social, and legal aspects of contemporary environmentalism, food and agriculture, environmental ethics, health, traditional ecological knowledge, sustainable forestry, waste management, public participation and environmental movements.

NOTES: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200 X/Y.06

CROSS-LISTING: SOSA 2100.06

GEOG 2201 Introduction to Development I

CREDIT HOURS: 3

Poverty, inequality and injustice are widespread throughout the contemporary developing world. This course will examine how this situation came to be. It begins by analyzing the different meanings of the term "development" and then examines the major approaches that have shaped practical development initiatives on the ground in the Global South over the past 60 years. The course also examines the legacies of history for contemporary development efforts in the Global South through specific case studies.

FORMAT: Lecture| Tutorial

PREREQUISITE: Completion of five full credits at the 1000 level or permission of the instructor

CROSS-LISTING: INTD 2001.03

GEOG 2202 Introduction to Development II

CREDIT HOURS: 3

This course builds upon the core concepts and approaches studied in INTD 2001 (i.e. different theoretical approaches to development and the historical creation of underdevelopment). The course examines key contemporary issues in the field of development and analyses the connections between them: debt, global trade rules, foreign aid, hunger and malnutrition, rural and urban livelihoods, population growth. The course also examines the principle actors involved in development and the strategies they have used to promote and resist development, including: governments, non-governmental organizations (NGOs), the World Bank and IMF, and popular social movements in the Global South and North.

FORMAT: Lecture| Tutorial

PREREQUISITE: Completion of five credits at the 1000 level or permission of the instructor

CROSS-LISTING: INTD 2002.03

GEOG 2206 Africa: An Introduction

CREDIT HOURS: 3

This course will focus on contemporary Africa. Sterotypical portrayals of Africa will be examined and critiqued with the goal of emphasizing the immensity, diversity and complexity of the continent in order to better understand the opportunities and challenges of African development in the twenty-first century.

FORMAT: Lecture| Tutorial

CROSS-LISTING: INTD 2106.03

GEOG 2336 Regional Development

CREDIT HOURS: 3

Most countries have richer and poorer regions. Economic development issues, policies, and theories facing more industrialized nations are analyzed with particular focus on Canada (especially the Atlantic region), the European Economic Community, U.S.A., Japan, and Australia. Approved with Canadian Studies. In addition to the prerequisites, the student is advised to take one class in Political Science and one class in Canadian History before taking ECON 3336.

FORMAT: Tutorial| Seminar

PREREQUISITE: ECON 1101.03 and 1102.03

CROSS-LISTING: ECON 2336.03

GEOG 2800 Climate Change

CREDIT HOURS: 3

Most models of the atmosphere predict that increasing concentrations of greenhouse gases will continue to warm the surface of the earth and the oceans in the twenty-first century. The magnitude of the warming and its consequences are still very controversial. This class will discuss, mainly from a nonmathematical viewpoint, the

reasons for the greenhouse effect, the current warming in the context of the historical record of climate change, and sources of natural climate variability such as the El Nino Southern Oscillation. It will also review arguments that attribute the warming that has occurred in the Twentieth century to natural variability, and those that attribute the warming to increased human emission of greenhouse gases.

CROSS-LISTING: PHYC 2800.03 and OCEA 2800.03

EXCLUSIONS: ECON2850.06, PHYC2850.06

GEOG 3001 Landscape Ecology

CREDIT HOURS: 3

Landscapes reflect the interaction of natural and cultural processes. This course introduces the principles of ecology to landscape analysis. It explores relationships between environmental components in the landscape to inform community design and land use planning applications.

FORMAT: Lecture| Lab

PREREQUISITE: PLAN 2001.03 or GEOG 2001.03 or permission of the instructor

CROSS-LISTING: PLAN 3001.03

GEOG 3002 Reading the City

CREDIT HOURS: 3

Any city reflects the history of its topography, cultural traditions, and design interventions. This course introduces the principles, theories, and methods of urban form analysis in the local urban context. Students explore the local urban environment to interpret what the city means, and how it comes to take the shape it does.

FORMAT: Lecture| Lab

CROSS-LISTING: PLAN 3002.03

GEOG 3005 Cities and the Environment

CREDIT HOURS: 3

The contemporary landscape reflects a long history of human activities on the land and design and planning interventions through time. Civilizations rise and fall, often because of their degradation of the ecosystems that support them. This course examines the relationship of cities with the environment to enhance our understanding of landscape change, urban form and patterns in human settlements through the ages.

FORMAT: Lecture| Seminar

CROSS-LISTING: PLAN 3005.03

GEOG 3006 Reading the Landscape

CREDIT HOURS: 3

Any landscape reflects its natural and cultural history. This course explores principles, theories, and methods of landscape interpretation. These approaches will be applied to community design problems in local landscapes.

FORMAT: Lecture| Lab

PREREQUISITE: PLAN 3001.03, 3002.03, or GEOG 3001.03, 3002.03

CROSS-LISTING: PLAN 3006.03

GEOG 3110 Migration and Development

CREDIT HOURS: 3

The purpose of this course is to explore and better understand the connections between migration and development in contemporary societies. Classes will introduce or further explore one main theme or issue, such as development-induced displacement, labour migration, and HIV/AIDS and migration. Each class will centre on one or more discussion questions, exchange insights from relevant experiences of class participants or focus on a case study

FORMAT: Lecture| Seminar

CROSS-LISTING: INTD 3110.03

GEOG 3114 Environment and Development

CREDIT HOURS: 3

This course will examine the interconnections between the natural environment and different forms of social and economic development with a specific focus on developing countries. Various perspectives will be used to analyze the links between environmental issues and poverty, inequality, wealth, economic globalization and the ways in which different cultures understand and interact with the environment.

FORMAT: Lecture| Seminar

CROSS-LISTING: INTD 3114.03

GEOG 3165 Peoples and Cultures of the World: Selected Area Studies

CREDIT HOURS: 3

This class examines a specific geographic and/or culture area. The class begins with background material on geography and history. Its focus is on the people themselves, their social organization and political, economic, and cultural systems. How they relate to globalization and development will also be examined. Consult the Department to find which region is to be covered in a particular year. **Approved with International Development Studies.**

FORMAT: Lecture

PREREQUISITE: SOSA 1000X/Y.06; 1050X/Y.06; 1100X/Y.06; 1200X/Y.06

CROSS-LISTING: SOSA 3165.03

EXCLUSIONS: SOSA 2370.03

GEOG 3210 Canadian Cultural Landscapes

CREDIT HOURS: 3

This course explores the origins of one "signature" landscape in each province. Contact with different geographies shaped distinctive regional histories; but at the same time, the story of each place is tied to the national narrative. These landscapes also illuminate how nature has been understood, used, and transformed since the fifteenth century.

FORMAT: Lecture| Discussion

CROSS-LISTING: HIST 3210.03, CANA 3020.03

GEOG 3220 Coastal Communities in the North Atlantic

CREDIT HOURS: 3

Coastal communities as a social/ecological type are examined as populations, and social structures (territorial, economic, occupational, political) as they have developed in response to particular ecological and social circumstances. Various perspectives which have been applied to coastal communities are examined with regard to the contribution they may make to understanding the dynamics of these communities. The focus is on North Atlantic communities.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSS-LISTING: SOSA 3220.03

GEOG 3284 Living in Cities

CREDIT HOURS: 3

2008 marked the first time in history that more of the global population lived in cities than in rural areas. What perspectives to anthropology and sociology offer on cities and their inhabitants? This course explores the social dynamics that constitute 'the city' and surveys how social scientists have studied and engaged with cities and city-dwellers. It approached 'the city' both as a whole and through its constituent parts: people and places. Examples may be drawn from cities large and small, near and far - including Halifax.

FORMAT: Lecture| Seminar

PREREQUISITE: One of SOSA 1000.06, SOSA 1050.06, SOSA 1100.06 SOSA 1200.06 FYP or PLAN 2005.06

CROSS-LISTING: SOSA 3284.03

GEOG 3302 Quaternary Sedimentary Environments

CREDIT HOURS: 3

The student is exposed to fluvial, alluvial, subglacial, glaciolacustrine, hillslope, eolian, coastal, shallow marine, rift, wedge top, retroarc, and foreland basin environments. Field trips and labs provide experience in methods used to distinguish the environments, including sedimentology, geomorphology, geochronology and thermochronology, and analysis of soils, cores, pebble fabrics, and section-scale non-petroleum sedimentary facies. Quaternary paleoclimatology and tectonic controls on weathering and deposition are discussed and debated.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: EARTH 2203.03

CROSS-LISTING: EARTH 3302.03

GEOG 3370 North American Landscapes

CREDIT HOURS: 3

Landscapes are the product of human culture ordering nature for economic, social, political, religious, recreational, and artistic purposes. Landscape history analyzes and interprets the use and design of such features as fields and woodlands, roads and waterways, settlements and buildings, towns and suburbs, and parks and cities. This class examines the use and meaning of the spatial environment among the various societies in North America from the sixteenth to the twentieth centuries. Among the topics are the meaning of area resources for indigenous peoples, the occupation and settlement of colonial populations, transportation and continental expansion, town planning, the politics of water and land in the West, preservation movements, scenic tourism, and the literary and artistic stylization of landscapes. The class welcomes non-history students with an interdisciplinary interest in issues regarding planning and design, cultural ecology, and the governance of resources.

FORMAT: Lecture| Discussion

LECTURE HOURS PER WEEK: 3

CROSS-LISTING: HIST 3370.03

GEOG 3400 Human Health and Sustainability

CREDIT HOURS: 3

This course examines the relationships between the health of populations and health determinants in the context of environmental sustainability. Weekly laboratory exercises will teach students how geomatics (GIS, GPS, and remote sensing technologies) and epidemiological tools can be used to assess the links between the health of human populations and the health of the environment, and how to use these tools for environmental health research.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 2

PREREQUISITE: Must be a third year student or have permission of instructor

CROSS-LISTING: ENVS 3400.03

GEOG 3440 Geomorphology

CREDIT HOURS: 3

Geomorphology is the quantitative study of Earth's surface processes and landforms applies to geology, civil engineering, hydrogeology, and environmental management. We investigate slope stability, weathering and soils, sediment production, wind-driven and coastal environments, tectonic landforms, and river, glacial and permafrost processes.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 1080, EARTH 1090; or SCIE 1505, or SCIE 1515, or SCIE 1530, or permission of the instructor AND completion or concurrent enrollment of a 1000-level mathematics class, a 1000-level physics class, and a 1000-level chemistry class.

CROSS-LISTING: EARTH 3440.03

GEOG 3500 Exploring Geographic Information Systems

CREDIT HOURS: 3

Geographic Information Systems (GIS), as a tool for the management of georeferenced data, have become indispensable for disciplines where location of objects and pattern of processes is important. GIS plays a significant role a wide range of applications, from modeling, to analysis and predictions, to decision making. The class is aimed at a broad base of potential users and draws on examples of the role of GIS in global climate change, mineral exploration, preservation of biodiversity, coastal zone management, resource depletion, and many other present and future environmental issues. The course material will be of interest to those studying geoscience, environmental science, ecology, marine biology, oceanography, epidemiology, urban and rural planning, civil engineering, and any other field involving spatial data. Laboratory exercises emphasize the principles of raster and vector GIS, and the integration of databases and GPS (global positioning systems) data into GIS. Exercises draw on the diversity of GIS applications in a number of application areas.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: Two years of university study or equivalent or instructor's permission

CROSS-LISTING: EARTH 3500, EARTH 5600, ENVS 3500

EXCLUSIONS: Credit will only be given for one of GEOG 3500, SCIE 3600, EARTH 3500, EARTH 5600, ENVS 3500

GEOG 3633 Spatial Information and GIS in Ecology

CREDIT HOURS: 3

A hands-on approach to understanding and using spatial information, this class introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address and applied problem in ecology.

NOTES: Offered in the summer through SEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITE: BIOL 2060.03

CROSS-LISTING: ENVS 3633.03, BIOL 3633.03

GEOG 4440 Geomorphology and Landscape Evolution

CREDIT HOURS: 3

Ripple-to mountain range-scale landforms evolve under predictable internal and external forces that are modulated by the physical and chemical properties of the rock. The purpose of this course is to provide a thorough examination of the development of landscapes by tectonics and surficial processes involving weathering, mass wasting, streams, and glaciers. The concepts of equilibria, climate and vegetation change, and rock character are recurring themes throughout the course. Dating and thermochronology methods are discussed in the context of rates of landscape change. Early classic viewpoints of landform development are contrasted with the latest numerical simulations of landscape evolution. The labs are mostly field-oriented with emphasis on Quaternary stratigraphy, describing and interpreting soils, local geomorphology, and geomorphometrics.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 1080 and EARTH 1090 recommended. Must be a 4th year Science student familiar with excel, or with instructor's permission

CROSS-LISTING: EARTH 4440.03

GEOG 4450 Introduction to Landscape Simulation

CREDIT HOURS: 3

We examine different approaches to numerical modelling of earth-surface processes such as erosion and landslides, melting permafrost, and braided rivers. Using class and/or individual projects as examples, the selection of variables, sensitivity testing, and methods for testing models against nature are discussed. We use Matlab; programming experience is useful but not essential.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: EARTH 3440.03, MATH 1010 or 1400, PHYC 1280.03/1290.03X/Y and three courses at the 3000-level in the physical sciences (chemistry, earth science, physics) or with consent of instructor

CROSS-LISTING: EARTH 4450

GEOG 4520 GIS Applications to Environmental and Geological Sciences

CREDIT HOURS: 3

Note: This class is not offered every year. Please consult department in the spring for further information. Geographic information systems (GIS) provide a rich set of new tools to the geologist and environmental scientist, not only to solve conventional problems, but also to explore questions not readily answered by other means. This class builds on the fundamentals of GIS taught in EARTH 3500.03 to explore analytical tools that aid in decision-making processes encountered in mineral exploration, hydrogeology, site selection, environmental assessment, and global change analysis. The class concentrates on case studies and problem solving, including those requiring multi-criteria and multi-objective decision making processes.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: GEOG 3500.03, ENVS 3500, EARTH 3500.03; EARTH 5600, or SCIE 3600.03; STAT 1060.03

CROSS-LISTING: EARTH 4520.03

GEOG 4530 Environmental Remote Sensing

CREDIT HOURS: 3

The goal of this class is to introduce students to the role of remote sensing as a technique provide environmental and geologic information. Particular emphasis will be placed on examining the potential and limitations of remote sensing methods and data in this context. The lectures discuss the fundamentals of remote sensing with an emphasis on multi-spectral satellite systems. In the lab, students use computerized techniques of digital image enhancement and thematic information extraction to process images derived from optical, radar, and hyperspectral remote-sensing systems. The integration of remote-sensing information with GIS (Geographic Information Systems) is stressed in both the labs and lectures.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: EARTH 3500.03, ENVS 3500.03, or EARTH 5600.03 or SCIE 3600.03 or GEOG 3500.03

CROSS-LISTING: EARTH 4530.03

GEOG 4850 Geographic Information Science Research Project

CREDIT HOURS: 3

Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3
COREQUISITE: EARTH 5420.03/GEOG 4520.03
PREREQUISITE: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03 and permission of instructor
CROSS-LISTING: BIOL 4850.03, ENVS 4850.03, SCIE 4850.03, EARTH 4850.03
EXCLUSIONS: Restricted to 3rd and 4th year students

Humanistic Studies in Science

Attention is drawn to the following courses, offered in several departments. All of these courses are concerned with the humanistic aspects of scientific thought and its development. For complete course descriptions please consult the appropriate department listing in this calendar.

NOTE: Not all courses are offered every year. Please consult the current timetable for this year's offerings.

History of the Sciences

- BIOL 3503.06, HSTC 2200.06, SCIE 2000.06: Introduction to the History of Science
- BIOL 4664.03/OCEA 4331.03/SCIE 4001.03/HIST 3073.03/HSTC 3331.03: History of Marine Sciences

Philosophy of the Sciences

- PHIL 3420.03, BIOL 3580.03: Philosophy of Biology
- PHIL 2560.03: Minds & Machines: Introduction to cognitive Science
- PHIL 2660.03 Logic: Understanding Scientific Reasoning
- BIOL 3601.03: Nature Conservation
- PHIL 2130.03: Logic
- PHIL 3051.03: Epistemology
- PHIL 3670.03: Philosophy of Science

Integrated Science Program

Introduction

Dalhousie's Integrated Science Program is an alternative and unique way for a serious, well-prepared student to complete the first year of a BSc. In addition to learning the core material of several first-year science subjects, students gain an interdisciplinary perspective, develop transferrable skills, and conduct research, all in their first year. The goals of the program are:

1. To engage students in the process of scientific inquiry and provide them with hands-on experience in scientific research skills.
2. To provide sufficient background to enter second-year courses in the specific disciplines included in the program.
3. To point out the interrelationships among the science disciplines.
4. To indicate how the history and philosophy of scientific thought helps us to understand science.
5. To show the relevance of science in students' lives and the links between science and society.

This first-year program exposes students to a broader range of science disciplines than is possible in regular courses and does so in an integrated manner. Students learn from a team of instructors from different departments in the Faculty of Science. Instructors meet weekly to coordinate their teaching efforts and track learning outcomes. While teaching the material from regular first-year science courses, Integrated Science instructors highlight the natural links among their disciplines and help students apply the scientific method and quantitative techniques to topics and questions across the sciences.

Integrated Science students are members of a small cohort (maximum 75) of BSc students who take their courses, field trips and labs together. The course schedule varies each week, to use the time available efficiently for lectures, labs, and field trips, and to allow flexibility to link particular topics when appropriate. The flexible schedule also allows field trips to be scheduled without interfering with other courses. The course takes field trips approximately weekly throughout the first six weeks of fall term.

A companion course, Ethics in Science, provides an introduction to ethical questions that arise in the practice of science and uses examples that link to topics studied in the science components of the program. Regular instruction, practice, and feedback in writing are integrated across Ethics in Science and the Writing in Science component of Integrated Science. Students develop scientific writing skills through formal writing assignments in the fall and a series of research project assignments in winter.

Emphasis on scientific research methods and communication skills, along with a broad introduction to science, makes Integrated Science an excellent foundation for most Honours or Combined Honours BSc, or Major or Double Major BSc degrees. The broader exposure to science is helpful for students who are interested in many sciences and want to see what different subjects have to offer. Integrated Science is also excellent preparation for professional graduate programs, such as Law or Medicine.

Integrated Science candidates should be highly-motivated and have a strong interest in science. They should find the idea of being immersed in science very stimulating; they should want to learn to think across the discipline boundaries as well as to master discipline-specific material at the first-year level; they should be enthusiastic about being part of a small cohort of students intent on learning how to work and think like scientists; they should want to be cooperative and effective team members; they should have good study, work, and time-management skills; and they should welcome challenges to work hard, to think critically, and to solve problems.

Students wishing to enter this program normally must have a minimum Grade 12 average of 80%, with a minimum of 80% in Mathematics and 70% English, and a minimum of 75% in Grade 12 Chemistry plus Grade 12 Biology or Grade 12 Physics. The average high school mark of incoming Integrated Science students is around 90%. Students must be accepted to the Integrated Science Program as well as be accepted to the BSc at Dalhousie University.

Choosing an Integrated Science Option

The program includes SCIE 1505.18 (the core Integrated Science components), a companion, three credit hour humanities course, PHIL 1050.03 (Ethics in Science), and one to three science co-requisites. The schedules of SCIE 1505 plus PHIL 1050 are coordinated with the timetable of regular science courses to ensure that first-year Chemistry, Mathematics, and Physics will fit into student schedules. A student can choose one of three Integrated Science Options in which to register. Each incorporates a different suite of co-requisite science courses and is designed to prepare students for a range of degree programs at Dalhousie. Contact the Program Director to discuss other possibilities.

First year pre-requisites

Component or subject	SCIE 1505 or co-requisite	Course or equivalent	Option A: Physical Sciences or Engineering	Option B: Biomedical Sciences	Option C: Life Sciences
Biology	SCIE 1505	BIOL 1010.03/BIOL 1011.03	Fall & Winter	Fall & Winter	Fall & Winter
Chemistry	Co-requisite	CHEM 1011.03/CHEM 1012.03	Fall & Winter	Fall & Winter	Fall & Winter
Earth Science	SCIE 1505	ERTH 1080.03	Winter	Winter	Winter
Math (Calculus)	Co-requisite	MATH (see Options)	Fall & Winter (MATH 1000/MATH 1010 or MATH	Fall & Winter(MATH	Fall (MATH

			1280/MATH 1290 or MATH 1500)	1000/MATH 1010)	1215.03)
Physics	Co-requisite	PHYC (see Options)	Fall & Winter (PHYC 1190/PHYC 1290)	Fall & Winter (PHYC 1300)	(none)
Psychology	SCIE 1505	PSYO 1011.03/PSYO 1012.03	Fall & Winter	Fall & Winter	Fall & Winter
Statistics	SCIE 1505	STAT 1060.03	Fall	Fall	Fall
Writing in Science	SCIE 1505	SCIE 1111.03	Winter	Winter	Winter
Humanities	Co-requisite	PHIL 1050.03	Fall	Fall	Fall
Number of credit hours	Number of credit hours	Number of credit hours	39	39	30

* Full-credit course or equivalents is six credit hours (0.06); half-credit course or equivalents is three credit hours (.03). Options A and B represent overloads. Option C is 30 credit hours, a normal course load. Note that students get some exposure to Earth Sciences through field trips and integrated sessions in the fall, and study the subject formally in Winter term.

First-year pre-requisites. All three options fulfil several first-year requirements for the BSc. The full-year Psychology component of SCIE 1505 fulfils the Social Science requirement. The Statistics component of SCIE 1505 plus one Calculus course fulfil the full-year of Mathematics requirement.

The integrated Writing in Science component of SCIE 1505 and the companion Humanities course (PHIL 1050) together serve as a full-year Writing Requirement Course at Dalhousie University. The Integrated Science writing course serves in lieu of ENGL 1000 for entry to the School of Pharmacy at Dalhousie University. Note that PHIL 1050 also satisfies three credit hours of Humanities or Language requirement at Dalhousie; before they graduate, students will need to take another three credit hour course in a Humanities or Language.

Integrated Science students can expect a higher course load (more credits) and heavier workload than regular first-year BSc students. A heavier workload is unavoidable considering the larger number of disciplines studied, the integrated writing course, and the research project component. The workload of Integrated Science is managed, however, so students have less work than if taking all of the equivalent components as separate courses. Also, assignments and tests are spread out as evenly as possible through the week and the term. Students should note that the heavier workload is excellent preparation for higher workloads in second year of the BSc. A student's actual workload will depend on the Option (science co-requisites) selected to complete the first-year program.

Option A (Physical Sciences and Engineering) is recommended preparation for physical science BSc degrees (e.g., Atmospheric Science, Chemistry, Earth Sciences, Physics and Atmospheric Science) or Engineering degrees, because this option includes a full year of Calculus and full year of calculus-based Physics (PHYC 1190/PHYC 1290) with content needed for Engineering. Option A or B is suitable for BSc degrees or minors in Economics, Mathematics, or Statistics.

Option B (Biomedical Sciences) is intended for students who are mainly interested in the life sciences but want to keep their options open by taking a full year of Calculus (MATH 1000/MATH 1010) and full year of Physics for the Life Sciences (PHYC 1300). Option B is recommended preparation for BSc degrees in Biology, Biochemistry and Molecular Biology, Environmental Science, Microbiology and Immunology, Marine Biology, Medical Science, Neuroscience, Ocean Science, or Psychology.

Option C (Life Sciences) will prepare students for BSc degrees in the life sciences, such as Biology, Biochemistry and Molecular Biology, Environmental Science, Microbiology and Immunology, Marine Biology, Medical Science, Neuroscience, or Psychology. This option is intended for life or medical science students who want a more normal workload and typical selection of courses. Option C is recommended for students interested in Pharmacy. Any option will provide a solid foundation for professional degrees, such as Law or Medicine.

IB or AP credits in Chemistry, Math or Physics can be used in lieu of taking the corresponding co-requisite. All Integrated Science students are required to take PHIL 1050 and all components of SCIE 1505 because the content and skills practiced are integrated across these components (i.e., IB or AP credits cannot be used in lieu of Biology, Earth Science, Philosophy, Psychology, or Statistics).

On their transcripts, students receive a single letter grade for SCIE 1505 and separate grades for their other courses. A breakdown of subject marks in SCIE 1505 is provided, upon request, for the purpose of applying for scholarships or professional programs or transferring other universities.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

SCIE 1505X/Y Integrated Science

CREDIT HOURS: 18

This program provides comprehensive first-year preparation for science major or honours degrees and includes a full-year writing course and research project in the sciences. Concepts and techniques are taught in Biology, Earth Science, Psychology, and Statistics and are linked to material taught in separate Chemistry, Mathematics, and Physics courses.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Lab

Introduction

The Marine Biology Program offers students the opportunity to study and experience marine life, from the tiny plankton that drive ocean ecosystems to the sharks and marine mammals at the top of the food chain. In the first two years of the program, Marine Biology students obtain a basic grounding in Biology and start to learn the basics of how the ocean works. They then use their third and fourth years to study in greater depth the diversity, physiology, ecology, and evolution of marine animals and plants. Many students combine their studies of marine biology with courses in the chemistry or physics of the ocean. Marine Biology students are offered a Co-op option, where three work terms in industry, government or university laboratories, or ecotourism are included within the program.

The Biology department is located adjacent to the sea in the Life Sciences Centre. All eight floors have running sea water, and we have a 15m pool tank and a 10m deep tower tank. Within a 30 km radius there are salt marshes, rocky shores, estuaries, and sand beaches for field work.

Our students have many opportunities to participate in marine-related research; examples can be viewed on our website. "Ocean studies" is an area of special emphasis for Dalhousie University, and thus many faculty members have active research programs in marine science. In addition, many marine scientists at local research institutions, including the Bedford Institute of Oceanography and the Institute for Marine Biosciences serve as supervisors for our Honours students.

An undergraduate major in Marine Biology at Dalhousie qualifies you for technical positions in places like government fisheries laboratories, aquaculture farms, and consulting firms. In the Marine Biology program's summer field courses or in the honours research courses, you'll get plenty of hands-on opportunities to explore the ocean—preparing you for the exciting challenges of diverse marine-related careers.

Degree Programs

The Department of Biology offers the following degree programs in Marine Biology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- Minor in Marine Biology

* BSc Co-op option available

* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu at the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Marine Biology undergraduate academic advisor.

Prospective Marine Biology students should be aware that to advance to the second year Biology courses in the Marine Biology program, they must achieve at least a C+ grade in the prerequisite first year Biology courses. Students with exceptional extenuating circumstances may appeal this requirement to the Biology Undergraduate Curriculum Committee. Students should go to the Biology Main Office for further details.

Staff

Dean

Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Undergraduate Program Co-ordinator

Program Advisors

For Marine Biology program advising, please email biology.advising@dal.ca and indicate whether you are interested in Majors or Honours advising.

BSc or BA (120 credit hour) Concentrated Honours in Marine Biology

Students who want a challenging program resulting in a broad background in Marine Biology, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours.

To graduate with Honours, students must complete a minimum of 54 credit hours above the 1000 level in Marine Biology/Biology. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the core 2nd year Biology courses. Students must also have a cumulative B average (GPA of 3.0) at the time of graduation. Students write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of MARI 4900X/Y.06 or MARI 4901.03 AND MARI 4902.03.

A Science Co-op option is available for students enrolled in a BSc Concentrated Honours in Marine Biology. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours should consult with a Marine Biology Honours Advisor early in their studies. To be admitted, students must:

- Have a minimum B+ average (GPA of 3.3) in core 2nd year Biology courses with no grade less than C. A maximum of two of these core courses may be repeated to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses.
- Identify and gain the support of a thesis supervisor during their third year of studies (see Honours webpage for supervisor eligibility)
- With the supervisor's input, draft and submit a thesis proposal to the Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Marine Biology/Biology Honours webpage <http://biology.dal.ca/honours/index.html>

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Marine Biology must complete the following courses:

1000 level

- BIOL 1010.03 or BIOL 1020.03 or SCIE 1505X/Y.18 or equivalent
- BIOL 1011.03 or BIOL 1021.03 or SCIE 1505X/Y.18 or equivalent
- MATH 1060.03/STAT 1060.03 or SCIE 1505X/Y.18 or equivalent
- CHEM 1011.03 and CHEM 1012.03
- MATH 1000.03 or MATH 1215.03

Marine Biology students who wish to include 2nd year courses in Ocean Sciences (other than OCEA 2000.06) in their programs should also take PHYC 1300X/Y.06 or equivalent.

2000 level

Core Biology courses

- BIOL 2003.03 Diversity of Life I
- BIOL 2004.03 Diversity of Life II
- BIOL 2020.03 Cell Biology
- BIOL 2030.03 Genetics and Molecular Biology
- BIOL 2040.03 Evolution
- BIOL 2060.03 Introductory Ecology

Other required courses

- OCEA 2000.06 or OCEA 2001.03/OCEA 2002.03 The Blue Planet
- MATH 2080.03/STAT 2080.03 Statistical Methods for Data Analysis and Inference

3000/4000 level

- A minimum of 18 credit hours of MARI courses
- An additional 12 credit hours in MARI or MARI-equivalent, or BIOL or BIOL-equivalent courses (see Biology section of the calendar for a list of BIOL equivalent courses)
- MARI 4900X/Y.06 Honours Research and Thesis or MARI 4901.03/MARI 4902.03 Honours Research and Thesis I & II (for co-op students)

Please speak with an advisor for a comprehensive list of acceptable courses.

BSc or BA (120 credit hour) Combined Honours in Marine Biology and another subject

Students who wish to study Marine Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science (other than Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Marine Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas.

To graduate, students must complete a minimum of 36 credit hours (Marine Biology as primary subject) or 30 credit hours (Marine Biology as secondary subject) above the 1000 level in Marine Biology/Biology. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the core 2nd year Biology courses. Students must also have a cumulative B average (GPA of 3.0) at the time of graduation. Students write a research-based Honours thesis. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Marine Biology, this requirement is satisfied through MARI 4900X/Y.06 or MARI 4901.03/MARI 4902.03.

A Co-op option is available for students enrolled in a BSc Combined Honours in Marine Biology. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. To be admitted to the Marine Biology Honours program, students must:

- Have a minimum B+ average (GPA of 3.3) in core 2nd year Biology courses with no grade less than C. A maximum of two of these core courses may be repeated to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses.
- If Marine Biology is to be the primary subject area, students must
 - Identify and gain the support of a thesis supervisor during their third year of studies (see Marine Biology Honours webpage for supervisor eligibility)
 - With the supervisor's input, draft and submit a thesis proposal to the Marine Biology Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Marine Biology/Biology Honours webpage <http://biology.dal.ca/honours/index.html>

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Marine Biology and another subject must complete the following:

1000 level

- BIOL 1010.03 or BIOL 1020.03 or SCIE 1505X/Y.18 or equivalent
- BIOL 1011.03 or BIOL 1021.03 or SCIE 1505X/Y.18 or equivalent
- MATH 1060.03/STAT 1060.03 or SCIE 1505X/Y.18 or equivalent
- CHEM 1011.03 and CHEM 1012.03
- MATH 1000.03 or MATH 1215.03

Marine Biology students who wish to include 2nd year courses in Ocean Sciences (other than OCEA 2000.06) in their programs should also take PHYC 1300.06 or equivalent.

2000 level

Core Biology courses

- BIOL 2003.03 Diversity of Life I
- BIOL 2004.03 Diversity of Life II
- BIOL 2020.03 Cell Biology
- BIOL 2030.03 Genetics and Molecular Biology
- BIOL 2040.03 Evolution
- BIOL 2060.03 Introductory Ecology

Other recommended courses

- OCEA 2000.06 or OCEA 2001.03/OCEA 2002.03 The Blue Planet
- MATH 2080.03/STAT 2080.03 Statistical Methods for Data Analysis and Inference

3000 level

- A minimum of 9 credit hours of MARI courses
- An additional 3 credit hours in MARI or MARI-equivalent, or BIOL or BIOL-equivalent courses. (see Biology section of the calendar for a list of BIOL equivalent courses)

If Marine Biology is the primary subject, students will also complete

- MARI 4900 X/Y.06 Honours Research and Thesis or MARI 4901.03/MARI 4902.03 Honours Research and Thesis I & II (for co-op students)

Please speak with an advisor for a comprehensive list of acceptable courses.

BSc or BA (120 credit hour) Major in Marine Biology

The 120 credit hour Major is suited to students who want to focus on Marine Biology, but wish to have a program that is somewhat less constrained than the Honours program. It provides a four-year survey of Marine Biology, and is designed for students not anticipating subsequent experimental graduate-level training in Marine Biology or related disciplines. Marine Biology Majors complete a minimum of 42 credit hours in Marine Biology courses above the 1000 level and do not have thesis (or related) requirements. Research and other experiential learning opportunities are available through laboratories, special topics and experiential courses. Students should plan their programs carefully and, if required, obtain advice from an academic advisor.

A Science Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Marine Biology. See Co-operative Education Program.

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Marine Biology must complete the following courses:

1000 level

- BIOL 1010.03 or BIOL 1020.03 or SCIE 1505X/Y.18 or equivalent
- BIOL 1011.03 or BIOL 1021.03 or SCIE 1505X/Y.18 or equivalent
- MATH 1060.03/STAT 1060.03 or SCIE 1505X/Y.18 or equivalent
- CHEM 1011.03 and CHEM 1012.03
- MATH 1000.03 or MATH 1215.03

Marine Biology students who wish to include 2nd year courses in Ocean Sciences (other than OCEA 2000.06) in their programs should also take PHYC 1300.06 or equivalent.

2000 level

- BIOL 2003.03 Diversity of Life I
- BIOL 2004.03 Diversity of Life II
- BIOL 2020.03 Cell Biology
- BIOL 2030.03 Genetics and Molecular Biology
- BIOL 2040.03 Evolution
- BIOL 2060.03 Introductory Ecology
- OCEA 2000.06 or OCEA 2001.03/OCEA 2002.03 Blue Planet

3000/4000 level

- A minimum of 24 credit hours of Marine Biology (MARI) or MARI-equivalent courses or BIOL courses with marine emphasis (For example, BIOL 3065.03, BIOL 3102.03, BIOL 3326.03, BIOL 3615.03, BIOL 3665.03, BIOL 4061.03, BIOL 4062.03, and approved summer field courses).

Please speak with an advisor for a comprehensive list of acceptable courses.

BSc or BA (120 credit hour) Double Major in Marine Biology and another subject

The Double Major degree program allows students to combine a study of Marine Biology with another subject. The other subject may be any discipline from the Faculty of Science (other than Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Marine Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Regardless of whether Marine Biology is the primary or secondary subject, the Biology departmental requirements are the same (see below). Students must complete a minimum of 30 credit hours in Marine Biology courses above the 1000 level. It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Science Co-op option is available for students enrolled in BSc Double Major with Marine Biology as the primary subject. See Co-operative Education Program.

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Marine Biology and another subject must complete the following:

1000 level

- BIOL 1010.03 or BIOL 1020.03 or SCIE 1505X/Y.18 or equivalent
- BIOL 1011.03 or BIOL 1021.03 or SCIE 1505X/Y.18 or equivalent
- MATH 1060.03/STAT 1060.03 or SCIE 1505X/Y.18 or equivalent
- CHEM 1011.03 and CHEM 1012.03
- MATH 1000.03 or MATH 1215.03

Marine Biology students who wish to include 2nd year courses in Ocean Sciences (other than OCEA 2000.06) in their programs should also take PHYC 1300.06 or equivalent.

2000 level

- BIOL 2003.03 Diversity of Life I
- BIOL 2020.03 Cell Biology
- BIOL 2030.03 Genetics and Molecular Biology
- BIOL 2040.03 Evolution
- BIOL 2060.03 Introductory Ecology

3000/4000 level

- A minimum of 15 credit hours of Marine Biology (MARI) or MARI-equivalent courses or BIOL courses with marine emphasis (For example, BIOL 3065.03, BIOL 3102.03, BIOL 3326.03, BIOL 3615.03, BIOL 3665.03, BIOL 4061.03, BIOL 4062.03, and approved summer field courses).

Please note that a double major in Biology and Marine Biology is not offered.

Please speak with an advisor for a comprehensive list of acceptable courses.

Minor in Marine Biology

This minor is available to non-Biology/Marine Biology students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Marine Biology (MARI) courses at the 2000 level or higher

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students Co-operative Education Program (Science Co-op) in Marine Biology

Co-op Academic Advisor: Dr. N McAllister-Irwin (nancy.mcallister-irwin@dal.ca)

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in **BSc (120 credit hour) Honours or Major programs** in Marine Biology, or in Combined Honours or Double Major programs with Marine Biology as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. For entry into Marine Biology Co-op, a minimum grade of B+ in BIOL 1010.03 is required. Students must be

eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Marine Biology/Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Marine Biology, please see the Departmental webpage www.dal.ca/academics/programs/undergraduate/marinebio/what_will_i_learn/coop_work_terms.html

Minors available to students in Marine Biology

Minor programs allow students to develop subject specialities in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Marine Biology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Marine Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to student enrolled in a BSc in Marine Biology include:

- Certificate in Animal Behaviour
- Certificate in Environmental Impact Assessment
- Certificate in Genetics
- Certificate in Geographic Information Science
- Certificate in Science Leadership and Communication

MARI-Equivalent Courses

The following courses given by other departments may be taken as a Marine Biology course toward a BA, BSc and BSc (Honours) Marine Biology degrees.

Any course cross-listed as a MARI course

Aquaculture (AQUA)	AQUA 2000, AQUA 3000, AQUA 4000, AQUA 4001
Nutrition (NUTR)	NUTR 3002
Research Methods/Project Seminars	RESM 4010, RESM 4011

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

The normal entry requirement for upper level courses in Biology and Marine Biology is a grade of C+ or better in BOTH terms of first year Biology or in SCIE 15050.18. Students with extenuating circumstances may appeal to the departmental Undergraduate curriculum committee. Students should go to the Biology Main Office for further details.

Course Descriptions

MARI 3003 Introduction to Field Oceanography

CREDIT HOURS: 3

See course description for OCEA 3003.03 in the Oceanography section of the calendar.

MARI 3042 Molecular Ecology

CREDIT HOURS: 3

We survey techniques of molecular genetic analysis and consider how they can be used to identify species, populations, sexes, individuals and family relationships, and study population attributes such as historical dispersal, contemporary connectivity, mating behaviour and effective population size. Evaluation is based on assignments, a test and a final exam.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: A grade of B- or better in each of BIOL 2030.03 (or GENE 2000.03), BIOL 2040.03, and BIOL 2060.03

CROSS-LISTING: BIOL 3042.03

EXCLUSIONS: BIOL 4042.03

MARI 3063 Resource Ecology

CREDIT HOURS: 3

This course considers the ecology, utilization, and management of natural resources in fisheries, wildlife and forest management, agriculture and aquaculture. Topics include population dynamics, community interactions, and ecosystem support of resources as well as the history of resource utilization, practices of controlling production, pests, and predators, and sustainable management strategies.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 2

TUTORIAL HOURS PER WEEK: 2

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03), MATH 1000.03 (or MATH 1215.03 or SCIE 15xx), STAT 1060.03 (or SCIE 15xx)

CROSS-LISTING: BIOL 3063.03

MARI 3074 Physiology of Marine Animals, Part I

CREDIT HOURS: 3

Animals in a marine environment are quite different from those found in air or fresh water, but the “physiological principles” are similar. This course deals with the same principles as BIOL 3078, but emphasizes the special characteristics of marine animals and the techniques necessary to study them in laboratories. Note: Students must complete MARI 3074.03 before MARI 3076.03

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOL 2003.03 and BIOL 2020.03 (or BIOA 2001.03)

CROSS-LISTING: BIOL 3078.03

MARI 3076 Physiology of Marine Animals Part II

CREDIT HOURS: 3

Animals in a marine environment are quite different from those found in air or fresh water, but the “physiological principles” are similar. This course deals with the same principles as BIOL 3079, but emphasizes the special characteristics of marine animals and the techniques necessary to study them in laboratories.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: MARI 3074.03 OR BIOL 3078.03

CROSS-LISTING: BIOL 3079.03

RESTRICTIONS: BIOA 3005.03

MARI 3080 The Ecology and Evolution of Fishes

CREDIT HOURS: 3

The course examines selected topics on the ecology and evolution of marine and freshwater fishes. Topics include: phylogeny and systematics; functional morphology and physiology; population biology; life-history evolution; behavior; fisheries science; and conservation biology.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: A cumulative GPA of 2.7 (B-) or better in BIOL 2003.03, BIOL 2040.03, BIOL 2060.03 (or BIOA 3001.03)

CROSS-LISTING: BIOL 3080.03

EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03

MARI 3101 Microbial Ecology

CREDIT HOURS: 3

Lectures on the ecology of bacteria, viruses, protists. Community structure, food web nutrient cycling, biogeochemical cycles, competition, succession and symbiosis are discussed with examples from marine, fresh-water and soil habitats. There is an emphasis on marine organisms.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 2004.03 (or MICI 2100.03) and BIOL 2060.03 (or BIOA 3001.03)

CROSS-LISTING: BIOL 3101.03

MARI 3221 Diversity of Algae

CREDIT HOURS: 3

This course is a taxonomic introduction to the major algal groups (macrophytic and microscopic) with an emphasis on the marine seaweeds. Basic taxonomic differences are covered, along with an introduction to macrophyte ecology, human uses and symbioses. Laboratory sessions focus on morphology and reproduction.

PREREQUISITE: BIOL 2004.03 or equivalent

CROSS-LISTING: BIOL 3221.03

EXCLUSIONS: BIOL 3212.03, MARI 3212.03

MARI 3301 Invertebrate Biology

CREDIT HOURS: 3

A survey of the diversity, ecology, and evolutionary history of the major invertebrate groups. Lectures will emphasize phylogenetics and diversity of body plans. Labs will emphasize identification and anatomy through field trips to local sites, computer aided learning, and group projects to construct food-webs for local invertebrate communities.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOL 2003.03

CROSS-LISTING: BIOL 3301.03

RESTRICTIONS: This course is restricted to MARI majors.

EXCLUSIONS: BIOL 3321X/Y.06

MARI 3600 Aquaculture

CREDIT HOURS: 3

Through lectures, laboratories and field trips (additional fees apply), this course offers an introductory overview of aquaculture, the culturing of aquatic plants and animals. The following topics are covered with both a Maritimes and global perspective: overview, physico-chemistry of water, engineering, culture techniques, health, nutrition, genetics, environmental and socio-economic considerations.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOL 2003.03

CROSS-LISTING: BIOL 3600.03

MARI 3623 Applied Coastal Ecology

CREDIT HOURS: 3

Impacts of anthropogenic inputs on the structure and function of coastal ecosystems. Through field trips and other coursework, students examine ecosystem health, e.g., in macroalgal communities on rocky shores, in seagrass beds on sedimentary shores, and learn basic experimental design, principles of environmental assessment and monitoring, and coastal habitat remediation.

NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Not offered every year.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03)

CROSS-LISTING: BIOL 3623.03, ENVS 3623.03

MARI 3626 Field Studies of Marine Mammals

CREDIT HOURS: 3

Hands-on introduction to research on marine mammals. Lectures provide an overview of marine mammal adaptations, evolution, population biology, social organization, conservation, and management. Labs include a necropsy and techniques of photographic identification of individuals. On a several-day camping trip, students observe marine mammals from whale-watch boats and conduct research projects.

NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03), and BIOL 3062.03 (or BIOL 3630.03 or PSYO 2160.03), and STAT 1060.03 (or equivalent)

CROSS-LISTING: BIOL 3626.03

MARI 3627 Biology and Conservation of Sharks, Skates and Rays

CREDIT HOURS: 3

This course offers a combination of lectures, labs, and field trips that explore the elements of elasmobranchs (shark, skate and ray) biology and conservation. Students are introduced to current methods used in shark research, such as tagging, and learn about the role of sharks in ecosystems.

NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03) and BIOL 2003.03

MARI 3628 Marine Ornithology

CREDIT HOURS: 3

Overview of the biology of birds in marine environments. Seabird ecology, evolution, adaptations, identification, and natural history. Tools and techniques for studying

their behaviour, diet, and populations in the field. Lectures, exercises, and a week-long field trip to Maritime seabird breeding colonies. Student team and independent research projects and presentations.

NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 1010 or BIOL 1020 or equivalent, and BIOL 1011 or BIOL 1021 or equivalent, or SCIE 15XX, one of BIOL 2003 or BIOL 2004, and BIOL 2060, or instructor's permission. Knowledge of statistics, Geographic Information Systems (GIS), and familiarity with Excel spreadsheets are helpful, but not required, for research projects.

CROSS-LISTING: BIOL 3628.03

MARI 3632 Applied Field Methods in Fish Ecology

CREDIT HOURS: 3

Practical experience conducting field research on fishes with field trips to streams and shallow water marine/freshwater habitats. Techniques include collecting fish, designing and conducting surveys, studying behaviour, measuring phenotypic variability, quantifying temporal and spatial variation, planning for statistical analysis, and weighing tradeoffs between data quality, quantity, costs and ethical/environmental considerations.

NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2060.03 or BIOL 2003.03 or BIOA 3001.03 and STAT 1060.03 or their equivalents or permission of instructor. STAT 2080 is recommended.

CROSS-LISTING: BIOL 3632.03, ENVS 3632.03

MARI 3664 Intertidal Ecology and Diversity

CREDIT HOURS: 3

Hands-on, intensive introduction to ecological research on rocky shores, tidal flats, and sandy beaches. Relevant ecological concepts, sampling techniques for flora and fauna, and statistical skills are learned. Field sampling on day and camping trips is followed by lab work (e.g., identification of seaweeds, invertebrates), statistical analysis, and report preparation.

NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03) and BIOL 2003.03 and (MATH 1060.03/STAT 1060.03 or SCIE 15xx)

CROSS-LISTING: BIOL 3664.03, ENVS 3664.03

EXCLUSIONS: BIOL 3662.03, BIOL 3663.03

MARI 3680 Scientific Diving Methods for Marine Ecology

CREDIT HOURS: 3

This course introduces students that are certified divers to the practice of underwater research using SCUBA. It combines lectures with supervised dives in various marine habitats to demonstrate the application of standard sampling and experimental procedures in marine ecology, with an emphasis on logistical considerations and diving safety.

NOTES: Offered every other summer through the SEASIDE program. An auxiliary fee is charged to cover costs of dive trips. For dates, times and special registration procedures, see seaside.science.dal.ca.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03) and STAT 1060.03 or SCIE 15xx, and an internationally recognized diving certification, and a diving physical. Recommended: BIOL 3221.03/MARI 3221.03, BIOL 3301.03

CROSS-LISTING: BIOL 3680.03

MARI 3685 The Gulf of Eilat Ecosystem: Coral Reef and Subtropical Sea

CREDIT HOURS: 3

Introductin to physical, chemical, and biological ocenography, marine geology, biogeochemistry, and coral-reef biology. Focus is on subtropical seas, the coral reef ecosystem, and the unique characteristics of the Gulf of Eilat. Lectures, laboratories, demonstrations, field trips, exam, group field research projects in the sea, oral presentation, and scientific research paper.

NOTES: This is a field course given at the Eilat Ocean Studies Centre in Isreal. Entry is restricted and requires submissionof an application form

FORMAT: Lecture| Lab

PREREQUISITE: OCEA 2000, STAT 1060 or permissin of instructor

CROSS-LISTING: OCEA 3685.03

MARI 3761 Marine Ecology

CREDIT HOURS: 3

Building upon an understanding of basic ecological and evolutionary principles, and a familiarity with the major marine invertebrate and algal taxa, this course examines patterns and processes at the organismal, population and community levels that determine the diversity and distribution of life in the sea.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2060.03 (or BIOA 3001.03), and (BIOL 2003.03 or BIOL 2004.03) and OCEA 2000X/Y.06 or (OCEA 2001.03 and OCEA 2002.03)

CROSS-LISTING: BIOL 3761.03

RESTRICTIONS: This course is restricted to 3rd and 4th year students.

MARI 3800 Experiential Learning

CREDIT HOURS: 3

Experiential Learning recognizes the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and a timetable.

NOTES: To register in this course, a student must first find a suitable supervisor and sign a learning agreement between the course coordinator, the student and the supervisor.

PREREQUISITE: Students must be registered in a Biology or Marine Biology program, have completed a minimum of 18 credit hours in Biology or Marine Biology above the 1000 level and have a minimum cumulative GPA of 2.4 or permission of the course coordinator.

CROSS-LISTING: BIOL 3800.03

EXCLUSIONS: Scheduled courses at a learning institution, study that would qualify for a Special Topics class, an Honours project, co-op work terms and paid work. Only one experiential learning course per degree is permitted.

MARI 4003 Coral Reefs and Environmental Change

CREDIT HOURS: 3

Coral reefs are iconic marine ecosystems both biologically and economically. This course introduces students to the biology of both tropical and cold-water corals, key characteristics of their abiotic environments, human impacts at both local and global scales, and management options for sustainable resource use and the protection of biodiversity.

PREREQUISITE: CHEM 1011.03/CHEM 1012.03 and BIOL 2060.03 and 6 credit hours in ENVS or BIOL or MARI at or above the 3000 level.

CROSS-LISTING: ENVS 4003

RESTRICTIONS: This course is restricted to fourth year students.

MARI 4060 Marine Mammalogy

CREDIT HOURS: 3

The course examines the characteristics that mammals brought with them when they returned to the ocean, their evolution, special adaptations, and roles in oceanic ecosystems and general principles of marine mammal population biology. The biology of marine mammals is used to explore conservation/management issues.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 2060.03 or BIOA 3001.03

CROSS-LISTING: BIOL 4060.03

RESTRICTIONS: This course is restricted to third and fourth year MARI majors.

MARI 4080 Laboratory Studies of Fishes

CREDIT HOURS: 3

Through a series of laboratory exercises, the course provides students with practical experience on various topics related to the study of ichthyology. Topics shall include the following: species identification; meristics and morphometrics; use of dichotomous keys; internal and external morphology; ageing and growth determination; ecomorphological attributes; data collection and analysis.

FORMAT: Lab

LAB HOURS PER WEEK: 3

PREREQUISITE: BIOL 3080.03 or MARI 3080.03

CROSS-LISTING: BIOL 4080.03

EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03

MARI 4323 Biologging in Ecology

CREDIT HOURS: 3

This course explores the fundamentals and applications of biologging and biotelemetry: the use of electronic tags to study free-ranging animals and their environment. Students are introduced to the wide range of tags and their diverse applications in biology.

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2060.03 or BIOA 3001.03 or PSYO/NESC 2160.03 or permission of the instructor.

CROSS-LISTING: BIOL 4323.03

MARI 4335 Environmental Impacts in Marine Ecosystems

CREDIT HOURS: 3

See course description for OCEA 4335.03, in the Oceanography section of this calendar.

MARI 4369 Fisheries Oceanography

CREDIT HOURS: 3

See course description for OCEA 4160.03, in the Oceanography section of this calendar.

MARI 4370 Deep Sea Biology

CREDIT HOURS: 3

See course description for OCEA 4370.03, in the Oceanography section of this calendar.

MARI 4661 Biological Oceanography

CREDIT HOURS: 3

See course description for OCEA 4140.03, in the Oceanography section of this calendar.

MARI 4662 Biology of Phytoplankton

CREDIT HOURS: 3

See OCEA 4230.03 in the Oceanography section of the calendar.

MARI 4664 History of Marine Sciences

CREDIT HOURS: 3

In this course, we will trace the history of marine sciences from the ancients to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped human understanding of the oceans.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Instructor's consent

CROSS-LISTING: BIOL 4664.03, OCEA 4331.03/5331.03, HIST 3073.03, HSTC 3331.03, SCIE 4001.03

MARI 4666 Benthic Ecology

CREDIT HOURS: 3

See course description for OCEA 4330.03, in the Oceanography section of this calendar.

MARI 4667 Census of Marine Life

CREDIT HOURS: 3

The Census of Marine Life recorded over 250,000 known species of eukaryotes in the world's oceans. In this course, the Senior Scientist for Census 2010 examines the diversity, distribution and abundance of marine biota globally, and reviews new approaches to discover new species and to monitor responses to climate change.

FORMAT: Lecture| Discussion

PREREQUISITE: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03) and 18 credit hours of BIOL, MARI, or OCEA classes.

CROSS-LISTING: BIOL 4667.03

RESTRICTIONS: This course is restricted to third and fourth year students.

MARI 4806 Special Topics in Marine Biology

CREDIT HOURS: 3

Independent study intended for students who wish to study an area of marine biology not covered in other courses. Students should first consult with a faculty member to arrange the topic of study. An outline of the course content must be approved by the Biology Undergraduate Curriculum Committee Chair.

NOTES: For registration forms and further information go to: <http://biology.dal.ca/Undergraduate/index.htm>

MARI 4807 Special Topics in Marine Biology

CREDIT HOURS: 3

Independent study intended for students who wish to study an area of marine biology not covered in other courses. Students should first consult with a faculty member to arrange the topic of study. An outline of the course content must be approved by the Biology Undergraduate Curriculum Committee Chair.

NOTES: This course is for students who have already completed one Special Topics Course. For registration forms and further information go to:

<http://biology.dal.ca/Undergraduate/index.htm>

MARI 4900X/Y Honours Research and Thesis

CREDIT HOURS: 6

This course is required of, and restricted to, all Marine Biology Honours programs in which Marine Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class.

NOTES: The course grade is based on the results of the research which are submitted in April as an Honours Thesis, an oral presentation about the research to the course, and an oral or poster presentation at the Honours Cameron Conference. Co-op students attend this course by registering for MARI 4901 and MARI 4902. See details about selecting a supervisor for the honours research under the general requirements for MARI honours programs or on the honours page of Biology's website <http://biology.dal.ca/honours/index.htm>

CROSS-LISTING: BIOL 4900X/Y.06

RESTRICTIONS: Honours students are normally in their final year of study.

MARI 4901 Honours Research and Thesis I

CREDIT HOURS: 3

This is required of, and restricted to, all Marine Biology Co-op Honours programs. The course description is the same as for MARI 4900X/Y. Students attend MARI 4901 in the Winter term of their 4th year and MARI 4902 in the Fall term of their 5th year to accommodate their work terms.

NOTES: MARI 4901 and MARI 4902 must be taken in consecutive winter/fall terms to get a grade for either course. No grade will be recorded for MARI 4901 until 4902 is also completed and the final Honours Thesis has been evaluated.

CROSS-LISTING: BIOL 4906.03

EXCLUSIONS: BIOL 4900.06 and MARI 4900.06

MARI 4902 Honours Research Thesis II

CREDIT HOURS: 3

This is the 2nd half of the required course for Marine Biology Co-op honours students. The course description is the same as for MARI 4900X/Y. Students attend 4902 in the fall of their 5th year.

NOTES: MARI 4901 and MARI 4902 must be taken in consecutive winter/fall terms to get a grade for either course. No grade will be recorded for MARI 4901 until 4902 is also completed and the final Honours Thesis has been evaluated.

FORMAT: Seminar

CROSS-LISTING: BIOL 4902

RESTRICTIONS: Students in Marine Biology Co-op Honours Program, usually in their final year of study.

EXCLUSIONS: BIOL 4900.06 and MARI 4900.06

MARI 8891 Co-op Workterm I

CREDIT HOURS: 0

PREREQUISITE: SCIE 2800.03

MARI 8892 Co-op Workterm 2

CREDIT HOURS: 0

PREREQUISITE: SCIE 2800.03, MARI 8891.00

MARI 8893 Co-op Workterm 3

CREDIT HOURS: 0

PREREQUISITE: SCIE 2800.03, MARI 8892.00

MARI 8894 Co-op Workterm 4

CREDIT HOURS: 0

PREREQUISITE: MARI 8893.00 and SCIE 2800.03

The Mathematics division offers a full range of programs aimed at students of diverse interests and levels. This includes honours, major, minor and joint degree programs. We work closely with students to choose a program that is the right fit for their interests and goals. Mathematics is a creative activity with its own intrinsic value and beauty. Mathematics also provides a solid foundation for every scientific field. A degree in mathematics can prepare students for a career in academia, industry, management, information technology, banking, teaching, and other areas.

General Interest Courses

We offer a number of courses for students not majoring in Mathematics:

- MATH 1000.03/MATH 1010.03: These core calculus courses are the starting point for any degree program in the sciences.
- MATH 1060.03: This course serves as an introduction to the basic ideas of statistics, through examples drawn from a wide variety of disciplines.
- MATH 1115.03: Linear algebra and calculus are arranged to meet the needs of commerce students, but of interest to anyone wishing a brief introduction to these topics.
- MATH 1215.03: This course emphasizes the application of calculus to the life sciences.
- MATH 2112.03: Whereas calculus deals with continuous phenomena, this course deals with discrete objects, especially varieties of ways to count.
- MATH 2030.03/MATH 2040.03: These courses serve as introductions to matrix theory, linear equations and linear algebra, topics of importance in many fields.
- MATH 2300.03: Topics from science and technology are used to motivate and illustrate basic mathematical tools of linear algebra and calculus. Mathematical software such as Matlab and Maple is also introduced.

Six credit hours of Mathematics or Statistics are required for a BSc degree. The following courses may not be used to satisfy this requirement: MATH 1001.03, MATH 1002.03, MATH 1003.03, MATH 1115.03.

Degree Programs

The Department of Mathematics and Statistics offers the following degree programs in Mathematics

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc (90 credit hour) Minor in Mathematics
- Minor in Mathematics (added to a 120 credit hour degree)

* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A BSc degree is the choice of most students in Mathematics; however, a BA degree option is also available for each of the programs listed below. The Departmental requirements for each BA degree program are the same as those of the corresponding BSc degree program; however, students are advised that some of the general College of Arts and Science requirements differ for the BA and BSc degrees. Minors and certificates that can be combined with a BSc degree can also be combined with a BA degree.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Mathematics undergraduate academic advisor. Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies.

Students in any Mathematics program are strongly encouraged to include CSCI 1100.03 and CSCI 1101.03 in their programs.

Staff

Dean

Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

Chairperson of Department

Smith, B., MA (Calgary), PhD (Berkeley)

Director of Division

Selinger, P., PhD (Pennsylvania)

Faculty Advisors

Iron, D., PhD (UBC) (Honours) Advisor

Selinger, P., PhD (Pennsylvania) Undergraduate Advisor

BSc (120 credit hour) Concentrated Honours in Mathematics

An Honours degree offers an in-depth preparation in undergraduate mathematics, including an independent research experience. This degree option is recommended for students interested in eventually pursuing graduate studies in mathematics. Honours students complete a minimum of 54 credit hours above the 1000 level in Mathematics with a minimum GPA of 3.0 and write an Honours Comprehensive Examination.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Mathematics should consult with a Mathematics Honours Advisor early in their studies to have their programs approved.

Departmental requirements

The Department offers two Honours streams in Mathematics: (A) Pure Mathematics and (B) Applied Mathematics. Stream A emphasizes the power and beauty of mathematics as an independent academic discipline. Stream B emphasizes the connections between mathematics and other scientific disciplines. Both streams follow the same courses for the first two years. Students decide which stream to pursue during their second year.

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc Concentrated Honours program in Mathematics must complete the following courses:

2000 level

- MATH 2001.03/MATH 2002.03
- MATH 2030.03/MATH 2135.03 and MATH 2505.03
- Twelve additional credit hours in mathematics at or above the 2000 level - not including courses listed below

3000 level

- MATH 3031.03 and MATH 3501.03
- Students in Stream A are required to take MATH 3032.03 and MATH 3502.03
- Students in Stream B are required to take MATH 3080.03 and MATH 3260.03

4000 level

- MATH 4950.03/Honours Research Project
- Twelve additional credit hours at or above the 4000 level

Students in Stream A are advised to include a selection of courses from the following list in their programs:

- MATH 2051.03
- MATH 2113.03
- MATH 3045.03
- MATH 3070.03
- MATH 3080.03
- MATH 3260.03
- MATH 3330.03
- MATH 3360.03

Students in Stream B are advised to include a selection of courses from the following list in their programs:

- MATH 2060.03
- MATH 2300.03
- MATH 3032.03
- MATH 3045.03
- PHYC 3050.03
- MATH 3300.03
- MATH 3330.03
- MATH 3360.03
- MATH 3400.03

- MATH 3502.03
- MATH 3900.03

Honours Comprehensive Examination

The Honours Comprehensive Examination in mathematics consists of a written paper of about 20-30 pages researched and prepared by the student. The topic is decided on in conjunction with the Honours advisor. The paper is also presented to the honours seminar. The work for this paper is done as part of the required course MATH 4950.03 (Honours Research Project).

BSc (120 credit hour) Combined Honours in Mathematics and another subject

Students who wish to study Mathematics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Mathematics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students contemplating a Combined Honours program in Mathematics and another subject should bear in mind, however, that the work in either subject may be insufficient for admission to a regular graduate program.

Students planning to enrol in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Mathematics, this requirement is satisfied through MATH 4950.03.

Departmental Requirements

Students in a BSc Combined Honours program in Mathematics and another subject must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. A combined total of 66 credit hours above the 1000 level must be completed in two subjects, with a minimum of 30 credit hours above the 1000 level in each subject.

Mathematics as the primary subject

The Mathematics part of a Combined Honours program in Mathematics and another subject will be designed to suit the needs and interests of the student. However, the program must be approved by a Mathematics Honours Advisor and an Honours advisor from the other subject. Students will normally complete MATH 4950.03 Honours Research Project.

Mathematics as the secondary subject

The Mathematics part of a Combined Honours program in Mathematics and another subject will be designed to suit the needs and interests of the student. However, the program must be approved by a Mathematics Honours Advisor and an Honours advisor from the other subject.

BSc (120 credit hour) Major in Mathematics

The 120 credit hour Major is suited to students who want to focus on Mathematics, but wish to have a program that is somewhat less constrained than the Honours program. Students in a Major program normally choose to concentrate in Pure Mathematics, Applied Mathematics or Mathematics Education.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc Major program in Mathematics must complete the following courses:

2000 level

- MATH 2001.03 and MATH 2002.03
- MATH 2030.03 and MATH 2040.03 (or MATH 2135.03)
- At least one of MATH 2112.03, MATH 2051.03 or MATH 2505.03
- Three additional credit hours in MATH at or above 2000 level

- Three credit hours in a STAT course at or above 2000 level

3000 level

- 24 additional credit hours in MATH at or above the 3000 level. This selection may not include MATH 3700, MATH 3800.

Students wishing to concentrate in Applied Mathematics should choose the additional MATH courses from

- MATH 2060.03/MATH 2080.03
- MATH 2120.03/MATH 3120.03
- MATH 2300.03
- MATH 3210.03
- MATH 3260.03
- MATH 3300.03
- MATH 3330.03
- MATH 3400.03

Students wishing to concentrate in Pure Mathematics should choose the additional MATH courses from

- MATH 2060.03/MATH 2080.03
- MATH 2120.03/MATH 3120.03
- MATH 3031.03/MATH 3032.03
- MATH 3045.03
- MATH 3070.03
- MATH 3080.03

Students contemplating a career in Mathematics Education should choose the additional MATH courses from

- MATH 2051.03
- MATH 2060.03/MATH 2080.03
- MATH 2112.03/MATH 2113.03
- MATH 2300.03
- MATH 3031.03/MATH 3032.03
- MATH 3070.03
- MATH 3080.03
- MATH 3140.03
- MATH 3150.03
- MATH 3300.03
- MATH 3330.03
- MATH 3400.03

BSc or BA (120 credit hour) Double Major in Mathematics and another subject

The Double Major degree program allows students to combine the study of Mathematics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Mathematics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program are advised to review their proposed program of study with advisors in both subject areas.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Double Major program in Mathematics and another subject must complete the following:

Mathematics as the primary subject

Student completing a double major with Mathematics as the primary subject can fulfill the Mathematics requirements by following one of two programs below.

Pure Mathematics

2000 level

- MATH 2001.03 and MATH 2002.03
- MATH 2030.03 and MATH 2040.03 (or MATH 2135.03)
- At least one of MATH 2112.03, MATH 2051.03, MATH 2505.03

3000 level

- 15 additional MATH credit hours at or above the 3000 level. This selection may not include MATH 3700, MATH 3800.

Applied Mathematics

2000 level

- MATH 2001.03
- MATH 2030.03 and MATH 2040.03 (or MATH 2135.03)
- MATH 2120.03 or MATH 2002.03
- MATH 2060.03 or MATH 2080.03

3000 and 4000 level

- MATH 3120.03 or MATH 3260.03
- At least four of MATH 3080.03, MATH 3210.03, MATH 3300.03, MATH 3330.03, MATH 3400.03, MATH 3900.03, MATH 4190.03, MATH 4220.03, MATH 4230.03, MATH 4250.03, MATH 4320.03, MATH 4370.03, MATH 4540.03

Mathematics as the secondary subject

A student enrolled in a Double Major with Mathematics as the secondary subject also fulfills the Mathematics requirements by following one of the programs listed above for a Double Major with Mathematics as the primary subject.

BSc (90 credit hour) Minor in Mathematics

The 90 credit hour Minor in Mathematics is appropriate for students who want to study some Mathematics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Mathematics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc in Mathematics is usually the preferred option for students who wish to combine studies in Mathematics with a degree in Engineering (see BSc/BEng Concurrent Program).

See the Minor in Mathematics section of this Calendar.

Minor in Mathematics

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

BA or BSc (90 credit hour) degree program with a Minor in Mathematics is also available.

Requirements

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1500.06X/Y: Calculus
- MATH 2001.03: Intermediate Calculus I
- MATH 2030.03: Matrix Theory and Linear Algebra I
- MATH 2120.03: Methods for Ordinary Differential equations
- nine additional credit hours of Math at or above the 2000 level

Bachelor of Science (Agriculture)

This minor is also available to **Bachelor of Science (Agriculture)** students.

15 credit hours including:

- MTHA 4000.03: Agricultural Modeling

12 credit hours courses approved by the Head of the Engineering Department selected from the following:

- MTHA 2000.03: Multivariable Calculus
- MTHA 2001.03: Differential Equations
- MTHA 3000.03: Applied Linear Algebra
- STAA 3000.03: Introduction to Planned Studies: Surveys & Experiments
- STAA 4000.03: Intermediate Statistical Methods
- CSCA 2000.03: Computer Science
- CSCA 3000.03: Data Structures & Numerical Methods
- ECOA 3000.03: Mathematical Economics
- ECOA 3003.03: Mathematical Programming
- ECOA 3006.03: Statistics for Economics & Business
- PHYS 1001.03: Physics for the Life Sciences II
- PHYS 1003.03: Physics II

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Mathematics

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Mathematics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Mathematics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to students enrolled in a BSc in Mathematics include:

- Certificate in Actuarial and Financial Mathematics
- Certificate in Applied and Computational Mathematics

BSc/BEng Concurrent Program

Students interested in combining their interest in Mathematics with a degree in Engineering may choose a BSc/BEng Concurrent Program, normally completed in a 5

year period. Over the first three years, students complete the requirements for a 90 credit hour BSc degree in Mathematics and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Mathematics and from the Faculty of Engineering in their first year of study.

Departmental Requirements

In addition to fulfilling the requirements for a 90 credit hour BSc degree outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in the BSc/BEng Concurrent Program must complete the following Mathematics courses:

Option 1:

- MATH 1000.03/MATH 1010.03 or MATH 1500.06X/Y
- MATH 2001
- MATH 2030
- MATH 2120
- Nine additional credit hours in MATH courses at or above the 2000 level

Option 2:

- ENGM 2022.03, ENGM 2032.03, and ENGM 2101.03
- MATH 2300.03
- At least one of MATH 2051.03, MATH 2112.03, or MATH 2135.03
- Twelve additional credit hours in MATH courses at or above the 3000 level. This selection may not include MATH 3700, MATH 3800.

Please note that all ENGM courses require a minimum grade of B-.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Notes

Course descriptions for Statistics can be found in the calendar under Statistics.

Credit may not be obtained twice for the same course even if the numbers have been changed.

Courses with the designation (MLC) are supported by the tutorial services of the Math Learning Centre.

The following three courses below the 1000 level are offered by the College of Continuing Education. Students register and pay for them at the College of continuing Education located at 1220 LeMarchant Street, 2nd Floor or by calling (902) 494-2375 (see College of Continuing Education for more details).

Course Descriptions

MATH 0009 Academic Math

CREDIT HOURS: 0

Academic Math has been developed to prepare you for the math involved in non-calculus courses. If you have solid math skills (at least grade 11 academic level) and want to develop them to the university level necessary for entrance to the Faculty of Arts, Bachelor of Commerce, Management, or Nursing programs, this course is designed for you. MATH 0009.00 is accepted by Dalhousie University in place of NS Math 12 Academic.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

TUTORIAL HOURS PER WEEK: 1

PREREQUISITE: At least grade 10 academic math or equivalent

MATH 0010 Pre-Calculus Accelerated

CREDIT HOURS: 0

This single-term accelerated course has been designed for calculus bound students, who have a firm grasp of grade 11 and 12 math skills. Focus is placed on pre-calculus key concepts, assuming students have current knowledge of grade 11 and 12 math concepts. Students requiring review of grade 11 and 12 concepts should take Pre-Calculus Plus (MATH 0011.00). Topics are explored in class following a clear, logical progression, with mastery generally occurring after assignments are completed.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

LAB HOURS PER WEEK: 1

PREREQUISITE: Recommend at least 80% in grade 11 and 12 math

MATH 0011 Pre-calculus Plus

CREDIT HOURS: 0

This full year course has been designed for the majority of students either requiring pre-calculus to gain admittance to the Dalhousie BSc program or as preparation for MATH 1000.03. This course provides a more in depth coverage of math concepts than found in the accelerated 1 term class, and adds a review of relevant 11 and 12 material, as well as a study of area under a curve. Students who have been away from math for 2 or more years, or have a heavy schedule, will find this course a better fit than the accelerated MATH 0010.00. Throughout the course, algebra, and applied geometric problem solving skills needed for calculus, are emphasized.

FORMAT: Lecture| Tutorial

PREREQUISITE: Grade 11 and 12 math or equivalent

MATH 1000X/Y Differential and Integral Calculus I

CREDIT HOURS: 3

This course offers a self-contained introduction to differential and integral calculus. The topics include functions, limits, differentiation of polynomial, trigonometric, exponential and logarithmic functions, product, quotient and chain rules, applications of differentiation, antiderivatives and definite integrals, integration by substitution. A sequel to this course is MATH 1010.03. The XY version of this course covers the same material, but the course duration is spread over the Fall and Winter term. The format of the XY course (1.5 hour workshops twice a week, and the smaller class size) allows for a more interactive learning environment than in a regular lecture format.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus. Pre-calculus is highly recommended.

EXCLUSIONS: MATH 1215.03, MATH 1280.03, MATH 1500X/Y.06

MATH 1010 Differential and Integral Calculus II

CREDIT HOURS: 3

A continuation of the study of calculus with topics including: Riemann sums, techniques of integration, elementary differential equations and applications, parametric equations and polar coordinates, sequences and series, Taylor series.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 1000.03, or MATH 1215.03 with a grade of B or better

MATH 1060 Introductory Statistics for Science and Health Sciences

CREDIT HOURS: 3

See course description for STAT 1060.03 in the Statistics section of this calendar.

MATH 1115 Mathematics for Commerce

CREDIT HOURS: 3

An introduction to matrices, linear programming, mathematics of finance, probability and differential calculus. All topics are taught with an emphasis on applications to business. This course cannot be used to partially satisfy the BSc Mathematics requirement.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Nova Scotia Advanced Mathematics 11 or 12 or equivalent

EXCLUSIONS: MATH 1110.03, MATH 1120.03

MATH 1215 Life Sciences Calculus

CREDIT HOURS: 3

This course emphasizes the application of calculus to the life sciences. The concepts and content studied include derivatives, techniques of differentiation, logarithmic and exponential functions, optimization, basic ordinary differential equations, integration, and techniques and applications of integration.

NOTES: Students who have already received credit for MATH 1215.03 cannot subsequently receive credit for MATH 1115.03.

FORMAT: Lecture| Tutorial

PREREQUISITE: Nova Scotia Mathematics 11 and 12 or pre-calculus is highly recommended.

EXCLUSIONS: MATH 1000.03, MATH 1500X/Y.06

MATH 1280 Engineering Mathematics I

CREDIT HOURS: 3

This forms an introduction to differential and integral calculus for Engineering students. All topics of MATH 1000.03 are covered, but in greater depth. In addition, this course covers functions, differentiation of polynomial, trigonometric, exponential and logarithmic functions, product, quotient and chain rules, Taylor series, antiderivatives and definite integrals, Riemann sums, polynomial approximations, and numerical approximations of integrals.

NOTES: Students who have already received credit for MATH 1280.03 cannot subsequently receive credit for MATH 1000.03 or MATH 1115.03

FORMAT: Lecture| Tutorial

PREREQUISITE: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus. Pre-calculus is highly recommended.

EXCLUSIONS: MATH 1000.03, MATH 1215.03

MATH 1290 Engineering Mathematics II

CREDIT HOURS: 3

This course is a sequel to MATH 1280. All topics of MATH 1010.03 are covered, but in greater depth. This course also introduces the students to the application of mathematics in engineering problems.

NOTES: 1: Students who have already received credit for MATH 1290.03 cannot subsequently receive credit for MATH 1010.03 2: MATH 1010.03 is not equivalent to MATH 1290.03

FORMAT: Lecture| Tutorial

PREREQUISITE: MATH 1280.03

MATH 1500X/Y Calculus

CREDIT HOURS: 6

This course is intended primarily for students who are considering a majors or an honours program in the physical or mathematical sciences. The topics of MATH 1000/MATH 1010 are covered, but in greater depth. MATH 1500 is equivalent as a credit to MATH 1000/MATH 1010.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus. Pre-calculus is highly recommended.

EXCLUSIONS: Credit can be given for only one of MATH 1000/MATH 1010 and MATH 1500.

MATH 2001 Intermediate Calculus I

CREDIT HOURS: 3

Topics include review of parametric equations, polar coordinates, conic sections, coordinate systems and vectors, dot product and cross product, vector functions, derivatives and integrals of vector functions, arc length and curvature, functions of several variables and partial derivatives, directional derivatives and double and triple integrals.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 1010.03

MATH 2002 Intermediate Calculus II

CREDIT HOURS: 3

Topics include multiple integrals and changes of variables, and vector calculus, with an emphasis on Green's and Stokes' theorems. The course also includes an introduction to second order ordinary differential equations.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2001.03

MATH 2030 Matrix Theory and Linear Algebra I

CREDIT HOURS: 3

This course is a self-contained introduction to Matrix Theory and Linear Algebra. Topics include: subspaces, linear transformations, determinants, eigenvalues and eigenvectors, systems of linear equations. Students should note that this is a second-year course and, although it has no formal first-year prerequisites, certain mathematical maturity is expected.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Nova Scotia advanced Mathematics 11 or 12

MATH 2040 Matrix Theory and Linear Algebra II

CREDIT HOURS: 3

This course is a continuation of MATH 2030.03. Topics include: vector spaces and linear transformations, eigenvalues and eigenvectors, similarity and diagonalization, inner product spaces and orthogonal transformations, diagonalization of symmetric matrices and quadratic forms.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2030.03, and MATH 1000.03 or MATH 1500X/Y.06 or MATH 1215.03

EXCLUSIONS: MATH 2135.03

MATH 2051 Problems in Geometry

CREDIT HOURS: 3

This is a basic course for all students interested in geometry. Topics from Euclidean and non-Euclidean geometry may include: transformation geometry, symmetry groups, frieze groups, wallpaper groups and the crystallographic restrictions, similarities; projective geometry and the classical theorems of Menelaus, Ceva, Desargues, Pappus, Pascal; hyperbolic geometry.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 1010.03 or MATH 1500X/Y.06

MATH 2060 Introduction to Probability and Statistics

CREDIT HOURS: 3

See course description for STAT 2060.03 in the Statistics section of this calendar.

MATH 2080 Statistical Methods For Data Analysis and Inference

CREDIT HOURS: 3

See course description for STAT 2080.03 in the Statistics section of this calendar.

MATH 2112 Discrete Structures I

CREDIT HOURS: 3

This course together with MATH 2113.03 offers a survey of the following areas: set theory, mathematical induction, number theory, relations, functions, algebraic structures and introductory graph theory. The topics to be discussed are fundamental to most areas of Mathematics and have wide applicability to Computer Science.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Nova Scotia Mathematics 441 or equivalent

CROSS-LISTING: CSCI 2112.03

MATH 2113 Discrete Structures II

CREDIT HOURS: 3

This course continues CSCI 2112.03/MATH 2112.03. This course covers some basic concepts in discrete mathematics which are of particular relevance to students of computer science, engineering, and mathematics. The topics to be covered will include solution of recurrence relations, generating functions, number theory, Chinese remainder theorem, trees and graphs, finite state machines, abstract algorithms, Boolean algebra.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CSCI 2112.03 or MATH 2112.03

CROSS-LISTING: CSCI 2113.03

MATH 2120 Methods for Ordinary Differential Equations

CREDIT HOURS: 3

A comprehensive introduction to the theory of ordinary differential equations (ODEs), which is a broad field in pure and applied mathematics with numerous applications in other sciences. The topics include: special types of ODEs of 1st order, homogeneous and inhomogeneous linear ODEs with constant coefficients, Laplace transforms, systems of ODEs.

COREQUISITE: MATH 2030.03

PREREQUISITE: MATH 1010.03 or MATH 1500X/Y.06 or permission of the instructor

MATH 2135 Linear Algebra

CREDIT HOURS: 3

This course is a continuation of MATH 2030.03 with an emphasis on foundations and the theory of vector spaces and linear transformations. Additional topics include inner product spaces, symmetric and orthogonal transformations, bilinear forms, similarity and diagonalization, the solution of linear differential equations, and various applications in mathematics, physics and computer science.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2030.03 and MATH 1000.03

EXCLUSIONS: MATH 2040.03

MATH 2300 Mathematical Modelling

CREDIT HOURS: 3

By using fundamental calculus concepts in a modelling framework, the student investigates practical problems chosen from common experiences encompassing many academic disciplines, including the mathematical sciences, operations research, engineering and the management and life sciences. A significant part of the course is learning to use MAPLE as a mathematical tool.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

COREQUISITE: MATH 2030.03

PREREQUISITE: MATH 1000.03

CROSS-LISTING: STAT 2300.03

MATH 2505 Introductory Analysis

CREDIT HOURS: 3

This course is for honours students and other serious students of mathematics. Topics include: the axioms for the real number system, geometry and topology of Euclidean space, limits, continuity, differentiability, the inverse and implicit function theorems.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2001.03

MATH 2600 Theory of Interest and Life Contingencies

CREDIT HOURS: 3

Simple and compound interest are covered in detail. Topics include: nominal and effective rates of interest/discount, force of interest, annuities, perpetuities, and bonds.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 1010.03, MATH 1115.03 or MATH 1215.03

CROSS-LISTING: STAT 2600.03

MATH 3030X/Y Abstract Algebra

CREDIT HOURS: 6

In this first course in abstract algebra the following topics are treated: groups, subgroups, factor groups, homomorphisms, rings, ideals, Euclidean domains, polynomial rings, fields, unique factorization, irreducible polynomials, Sylow theorems, solvability of polynomial equations, Galois theory, and the Jordan canonical form.

NOTES: MATH 3030X/Y.06 is equivalent as a credit to MATH 3031.03 and MATH 3032.03

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2040.03 or MATH 2135.03

EXCLUSIONS: MATH 3031.03, MATH 3032.03

MATH 3031 Abstract Algebra I

CREDIT HOURS: 3

Groups, subgroups, permutation groups, cosets, direct products, fundamental theorem of finitely generated abelian groups, simple groups, group homomorphisms, factor groups, isomorphism theorems of groups, series of groups, Sylow theorems and applications. Additional topics may include free groups, group actions, and groups in Topology.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2040.03 or MATH 2135.03

EXCLUSIONS: MATH 3030X/Y.06

MATH 3032 Abstract Algebra II

CREDIT HOURS: 3

Rings, fields, integral domains, Fermat's theorem, Euler's theorem, ideals, quotient rings, prime and maximal ideals, factorization of polynomials, Grobner bases, Unique Factorization Domains, Euclidean Domains and Gaussian integers, and applications as time allows.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 3031.03

EXCLUSIONS: MATH 3030X/Y.06

MATH 3045 Curves and Surfaces

CREDIT HOURS: 3

The course is designed as an introduction to differential geometry, the study of geometric objects by means of analysis. It presents a comprehensive study of curves and surfaces in Euclidean space. Topics include: Frenet frame and equations, curvature, torsion, first and second fundamental forms, shape operator, Gauss-Weingarten equations.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2002.03 and (MATH 2040.03 or MATH 2135.03) or consent of instructor

MATH 3070 Theory of Numbers

CREDIT HOURS: 3

Topics include: congruences and residues; elementary properties of congruences, linear congruences, theorems of Fermat, Euler and Wilson, Chinese remainder theorem, quadratic residues, law of quadratic reciprocity, Legendre, Jacobi and Kronecker symbols, arithmetic functions, algebraic fields, algebraic numbers and integers, uniqueness of factorization, elementary properties of ideals, and class number.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2040.03 (or MATH 2135.03)

MATH 3080 Introduction to Complex Variables

CREDIT HOURS: 3

An introduction to the basic elements of complex analysis. Topics include: complex numbers, functions, differentiation and integration in the complex plane, some special mappings, series in general, Taylor and Laurent Series, residues, some principles of conformal mapping theory.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2002.03

MATH 3120 Differential Equations

CREDIT HOURS: 3

The topics discussed are of great importance to any student interested in applied mathematics. Areas include Fourier series, orthogonal polynomials, Sturm-Liouville problems, the classical partial differential equations, and some applications to physics, chemistry and engineering.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2120.03 or MATH 2135.03 or PHYC 2140.03

MATH 3140 Introduction to Wavelets

CREDIT HOURS: 3

Wavelet analysis provides an extremely powerful and highly flexible tool for the compression, denoising, and recognition of both audio and image signals. This course will develop many of the essential mathematical ideas behind Fourier analysis and wavelets. Many applications will also be discussed and examined.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2002.03 and MATH 2030.03

MATH 3210 Introduction to Numerical Analysis

CREDIT HOURS: 3

This course covers the practice as well as theory of basic numerical techniques. Topics may include: root finding, interpolation, integration, initial value problems, linear and nonlinear fitting, boundary value problems. We will emphasize error analysis and stability of methods, as well as practical implementation on a computer.
PREREQUISITE: MATH 2001.03 or (MATH 2120.03 and MATH 2030.03)

MATH 3260 Applied Differential Equations

CREDIT HOURS: 3

This course provides an introduction to a variety of mathematical techniques that are used in modelling real-world problems. Topics may include: population dynamics and hysteresis; diffusion, the heat kernel and Fourier series; spread of disease and phase plane analysis; networks, image processing and spectral clustering; delay differential equations; traffic modelling, first order PDE's and method of characteristics; and numerical schemes for differential equations.

PREREQUISITE: MATH 2120.03.03 or MATH 2135.03 or PHYC 2140.03 or consent of the instructor

MATH 3300 Optimization

CREDIT HOURS: 3

An introduction to the concepts and applications of linear programming. Topics include the simplex method for linear programming, duality and sensitivity analysis. Some of these topics are illustrated by means of interactive computer packages.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2030.03

MATH 3330 Applied Graph Theory

CREDIT HOURS: 3

This course offers an introduction to graph theory, with an emphasis on applications and modelling. Topics include: paths and cycles, shortest route problem, connectivity and trees, minimum spanning trees, network flow, planar graphs, matchings, assignment problem, graph colouring and applications to scheduling, Hamilton cycles, and the Travelling Salesman Problem.

PREREQUISITE: MATH 2112.03 or MATH 2030.03

MATH 3340 Regression and Analysis of Variance

CREDIT HOURS: 3

See course description for STAT 3340.03 in the Statistics section of this calendar.

MATH 3350 Design of Experiments

CREDIT HOURS: 3

See course description for STAT 3350.03 in the Statistics section of this calendar.

MATH 3360 Probability

CREDIT HOURS: 3

See course description for STAT 3360.03 in the Statistics section of this calendar.

MATH 3380 Sample Survey Methods

CREDIT HOURS: 3

See course description for STAT 3380.03 in the Statistics section of this calendar.

MATH 3400 Classical Game Theory

CREDIT HOURS: 3

This course will cover the important concepts of classical game theory: game trees, dominance, zero-sum games, saddle points, utility theory, non-zero sum games, Nash equilibrium, non-competitive solutions, Prisoner's dilemma, Chicken, Newcomb's problem. There will be applications to many areas including anthropology, biology, business, economics and philosophy.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2030.03, or permission of the instructor

MATH 3460 Intermediate Statistical Theory

CREDIT HOURS: 3

See course description for STAT 3460.03 in the Statistics section of this calendar.

MATH 3500X/Y Intermediate Analysis

CREDIT HOURS: 6

MATH 3500.06 continues the analysis sequence begun in MATH 2505.03. Topics include: number systems, metric spaces, compactness, continuous functions on metric spaces, Stone-Weierstrass theorem, Arzela-Ascoli theorem, sequences and series of functions and their properties, inverse and implicit function theorems, extrema, co-ordinate transformations.

NOTES: MATH 3500X/Y.06 is equivalent as credit to MATH 3501.03 and MATH 3502.03.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2135.03, 2505.03

EXCLUSIONS: MATH 3501.03, MATH 3502.03

MATH 3501 Intermediate Analysis I

CREDIT HOURS: 3

MATH 3501.03 continues the analysis sequence begun in MATH 2505.03. Topics include: Metric spaces, point-set topological notions, sequences, completeness, separability, compactness (Heine-Borel, Bolzano-Weierstrass, Finite Intersection, complete and totally bounded), limits and continuity, continuity in topological terms, connectedness, path and local-path connectedness, homeomorphisms, uniform continuity, Lipschitz continuity, contractions, contraction principle, sequences of functions, uniform convergence. Further topics may include: Arzela-Ascoli theorem, Stone-Weierstrass theorem.

FORMAT: Lecture
LECTURE HOURS PER WEEK: 3
PREREQUISITE: MATH 2135.03, MATH 2505.03
EXCLUSIONS: MATH 3500X/Y.06

MATH 3502 Intermediate Analysis II

CREDIT HOURS: 3

Topics include: The full derivative for functions between Euclidean spaces, directional derivatives, Jacobian matrix, differentiability, C1 functions, multilinear maps, higher derivatives, Taylor's theorem, extrema, inverse and implicit function theorems, extrema subject to constraints, Lagrange multipliers. Further topics may include: normed vector spaces and basic functional analysis, basic theory of manifolds in \mathbb{R}^n , Fourier series.

PREREQUISITE: MATH 3501.03

EXCLUSIONS: MATH 3500X/Y.06

MATH 3700 Mathematics for Economists

CREDIT HOURS: 3

See course description for ECON 3700 in the Economics section of this calendar.

MATH 3800 Financial Economics

CREDIT HOURS: 3

See course description for ECON 3800.03 in the Economics section of this calendar.

MATH 3900 Financial Mathematics

CREDIT HOURS: 3

This course is an introduction to derivative pricing. Topics include: binomial tree model, stochastic calculus, Itô calculus, Black-Scholes model, market price of risk, log-normal models.

PREREQUISITE: MATH 2060.03 and (MATH 2120.03 or MATH 2135.03), or permission of the instructor

CROSS-LISTING: ECON 3900.03

MATH 4001 AARMS Summer School I

CREDIT HOURS: 3

A Topics class given by leading researchers in the precise field, which varies from year to year. Consult the Department for current details.

FORMAT: Lecture

PREREQUISITE: Permission of the Honours Advisor

CROSS-LISTING: STAT 4001.03

MATH 4002 AARMS Summer School II

CREDIT HOURS: 3

A Topics class given by leading researchers in the precise field, which varies from year to year. Consult the Department for current details.

FORMAT: Lecture

PREREQUISITE: Permission of the Honours Advisor

CROSS-LISTING: STAT 4002.03

MATH 4010 Introduction to Measure Theory and Integration

CREDIT HOURS: 3

Lebesgue's theory of measure and integration. The topics include: sigma-algebras, measures, construction of measures, Lebesgue measure on the real line, measurable functions, the Lebesgue integral and convergence theorems, L_p spaces, product measures and the Fubini-Tonelli theorem.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 3501.03

CROSS-LISTING: MATH 5010.03

MATH 4020 Analytic Function Theory

CREDIT HOURS: 3

Topics include: review of analytic complex functions including topological properties of the plane, Möbius mappings, exponential, logarithmic, trigonometric and related functions, integration and the Cauchy theorem. Cauchy's integral formula, residues, harmonic functions, analytic continuation, entire and meromorphic functions, some results of conformal mapping, including the Riemann mapping theorem.

PREREQUISITE: MATH 2002.03 (MATH 3080.03 recommended)

CROSS-LISTING: MATH 5020.03

MATH 4025 Commutative Algebra I

CREDIT HOURS: 3

This introduction to commutative algebra includes a selection of the following topics: prime and maximal ideals, primary decomposition, Noetherian rings, Hilbert's Basis Theorem and the Nullstellensatz.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 3032.03

CROSS-LISTING: MATH 5025.03

MATH 4035 Topics in Commutative Algebra

CREDIT HOURS: 3

This course covers special topics in commutative algebra.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3
PREREQUISITE: MATH 4045.03 or permission of the instructor
CROSS-LISTING: MATH 5035.03

MATH 4045 Advanced Algebra I

CREDIT HOURS: 3
Introduction to module theory: modules, submodules, quotient modules, module homomorphisms, generators for modules, direct sums, free modules, tensor products, exact sequences, projective modules, injective modules, and flat modules. Modules over principal ideal domains. Additional topics may include homological algebra, Ext and Tor Functors, symmetric and exterior algebras.
FORMAT: Lecture
LECTURE HOURS PER WEEK: 3
PREREQUISITE: MATH 3032.03
CROSS-LISTING: MATH 5045.03

MATH 4055 Advanced Algebra II

CREDIT HOURS: 3
Field theory, field extensions, Galois theory and applications.
FORMAT: Lecture
LECTURE HOURS PER WEEK: 3
PREREQUISITE: MATH 3032.03
CROSS-LISTING: MATH 5055.03

MATH 4065 Algebraic Geometry

CREDIT HOURS: 3
This is a first course in algebraic geometry and will introduce students to the basic properties of affine and projective varieties. Topics covered will include a selection from: local properties of plane curves, elliptic curves, Bezout's Theorem, Riemann-Roch Theorem.
FORMAT: Lecture
LECTURE HOURS PER WEEK: 3
PREREQUISITE: MATH 3032.03
CROSS-LISTING: MATH 5065.03

MATH 4066 Advanced Statistical Theory I

CREDIT HOURS: 3
See course description for STAT 4066.03 in the Statistics section of this calendar.

MATH 4070 Algebraic Number Theory

CREDIT HOURS: 3
An introduction to algebraic number theory, with special emphasis on quadratic and cyclotomic fields. A more general study of rings of integers of algebraic number fields focuses on divisibility properties. Other topics include Dedekind domains, ideals and their factorization into prime ideals, and class groups and class numbers.
FORMAT: Lecture
LECTURE HOURS PER WEEK: 3
PREREQUISITE: MATH 3032.03 (MATH 3070.03 recommended)
CROSS-LISTING: MATH 5070.03

MATH 4116 Cryptography

CREDIT HOURS: 3
This course is an introduction to modern cryptographic techniques and its mathematical foundations. The material covered includes: elementary number theory and algebra, classical cryptosystems, probability, the Data Encryption Standard, prime number generation and primality tests, public key cryptosystems, and further applications, such as digital signatures and identification.
PREREQUISITE: MATH 1000.03, MATH 1010.03, MATH 2030.03, and at least six additional credit hours in Mathematics beyond the first year, or permission of the instructor.
CROSS-LISTING: CSCI 4116.03

MATH 4130 Design and Analysis of Algorithms II

CREDIT HOURS: 3
See course description for CSCI 4113.03 in the Computer Science section of this calendar.

MATH 4135 Introduction to Category Theory

CREDIT HOURS: 3
Categories, functors, natural transformations and adjointness are introduced with emphasis on examples drawn from undergraduate Mathematics and theoretical Computer Science. The calculus of diagram chasing, limits, colimits and Kan extensions is explored in detail.
FORMAT: Lecture
LECTURE HOURS PER WEEK: 3
PREREQUISITE: MATH 3031.03 and MATH 3501.03 or permission of the instructor.
CROSS-LISTING: MATH 5135.03

MATH 4136 Topics in Category Theory

CREDIT HOURS: 3
Topics of current interest in category theory will be discussed with an emphasis on open problems. No previous knowledge of category theory is required. The necessary concepts will be discussed in the context of their applications. However, a certain familiarity with the basic concepts of modern mathematics such as found in courses on algebra and topology would be an asset.
PREREQUISITE: MATH 3031.03 and consent of instructor
CROSS-LISTING: MATH 5136.03

MATH 4140 Introduction to Functional Analysis

CREDIT HOURS: 3

An introduction to the basic principles of functional analysis including the following topics: infinite dimensional vector spaces, normed spaces, inner-product spaces, Banach and Hilbert spaces, linear and continuous linear functionals, the Hahn-Banach Theorem, the principle of uniform boundedness, dual spaces, weak* topology, and the Alaoglu theorem, the open mapping and closed graph theorems, and consequences and applications.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 3502.03

CROSS-LISTING: MATH 5140.03

MATH 4165 Mathematical Methods in Physics

CREDIT HOURS: 3

Complex variables and applications including solutions to Laplace equation, ideal fluid flow and Joukowski airfoil. Fourier series and generalizations; separation of variables; completeness. Green's functions in one and two dimensions. Asymptotic evaluation of integrals and special functions. Plus some additional topics in mathematical physics.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 3120.03 or MATH 3260.03 or permission of instructor.

CROSS-LISTING: PHYC 4160.03, PHYC 5160.03, MATH 5165.03

MATH 4170 General Topology

CREDIT HOURS: 3

An introduction to topological spaces that includes the following topics: classification in terms of cardinality of bases, separation, etc., product spaces, Tychonoff theorem, compactness, compactifications, Tychonoff spaces, metrization.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 3502.03

CROSS-LISTING: MATH 5170.03

MATH 4175 Topics in Mathematical Physics

CREDIT HOURS: 3

This course is a continuation of MATH 4165.03 and deals with special topics in mathematical physics selected from areas such as the Green's function technique for solving ordinary and partial differential equations, scattering theory and phase shift analysis, diffraction theory, group theory, tensor analysis and general relativity.

PREREQUISITE: MATH 4165.03

CROSS-LISTING: PHYC 4170.03, PHYC 5170.03

MATH 4180 Introduction to Algebraic Topology

CREDIT HOURS: 3

An introduction to algebraic topology including the following topics: the definitions, properties and methods of computation of the fundamental group of a topological space; simplicial, singular and cellular homology groups; basic properties and methods of computation of homology groups; a selection of application such as the classification of surfaces and fixed point theorems.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2505.03, MATH 4170.03

CROSS-LISTING: MATH 5180.03

MATH 4190 Ordinary Differential Equations

CREDIT HOURS: 3

A graduate-level introduction to ordinary differential equations. Topics covered include flows, existence and uniqueness theorems, continuity of solutions, coordinate transformations, symmetry methods and reductions, linearization of dynamical systems, and ODEs on manifolds.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: (MATH 3120.03 or MATH 3260.03) and MATH 2505.03 or permission of the instructor

CROSS-LISTING: MATH 5190.03

MATH 4200 Ordinary Differential Equations - Qualitative Theory

CREDIT HOURS: 3

Qualitative theory is concerned with determining the behaviour of solutions of differential equations without finding explicit solutions. Topics are selected from Liapunov stability theory, stable and unstable manifolds of singular points and periodic solutions, classification of plane singular points, structural stability and Hamiltonian systems. Other topics at the instructor's discretion.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 4190.03

CROSS-LISTING: MATH 5200.03

MATH 4220 Introduction to Partial Differential Equations

CREDIT HOURS: 3

This course is a basic introduction to the theory of partial differential equations. Topics covered include: modelling physical systems, method of characteristics, Laplace, wave and heat equations, separation of variables, eigenfunction expansions, integral transforms, maximum principles and Ritz-Raleigh theory.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 3120.03 or MATH 3260.03 or permission of instructor

CROSS-LISTING: MATH 5220.03

MATH 4230 Partial Differential Equations

CREDIT HOURS: 3

This course will provide students with an introduction to advanced topics in partial differential equations in a variety of settings. Topics may include: reaction diffusion systems, pattern formation, numerical methods, applications to physical sciences, variational methods, Sobolev Theory.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 3120.03 or MATH 3260.03 or permission of the instructor

CROSS-LISTING: MATH 5230.03

MATH 4250 Asymptotic Analysis

CREDIT HOURS: 3

Most mathematical models of physical systems cannot be solved exactly. Often such systems have a naturally occurring small parameter which may be exploited using asymptotic analysis techniques. In this course, we will study a variety of physical systems which illustrate many of the common approaches used in asymptotic analysis. Focus will be on applications to ordinary and partial differential equations.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2030.03 and (MATH 3120.03 or MATH 3260.03), or permission of the instructor

CROSS-LISTING: MATH 5250.03

MATH 4320 Combinatorial Optimization

CREDIT HOURS: 3

Various graph algorithms will be presented and analyzed. Specifically we will treat the algorithms for the problems: minimum spanning tree, shortest path, maximal flow, minimum cost flow, maximum matching. For each problem, various algorithms will be presented and compared. The link with Linear Programming, especially LP-Duality, will receive special attention.

PREREQUISITE: MATH 2030.03, some knowledge of linear programming and the theory of algorithms is recommended.

CROSS-LISTING: MATH 5320.03

MATH 4330 Topics in Graph Theory

CREDIT HOURS: 3

This course is intended for math and computer science students. Items to be selected from the following topics: graphs and matrices, graphs and groups, network analysis, extremal graph theory, enumeration problems, and algebraic methods in graph theory.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 3330.03 or CSCI 3110.03 or permission of the instructor

CROSS-LISTING: MATH 5330.03, CSCI 4115.03

MATH 4340 Discrete Random Structures

CREDIT HOURS: 3

This course will cover basics of probability and stochastic processes, and then focus on areas where probability and combinatorics interact. Topics include: probabilistic method, stochastic graph models for complex networks, probabilistic algorithms. Probabilistic techniques include: expectation and concentration of random variables, stochastic processes, conditional expectation, Markov chains, martingales, branching processes.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 4330.03/MATH 5330.03 or MATH 2113.03 or permission from the instructor

CROSS-LISTING: MATH 5340.03

MATH 4360 Combinatorial Modelling

CREDIT HOURS: 3

This course introduces a common framework for combinatorial structures (graphs, digraphs, hypergraphs, posets, preorders, lattices, finite topologies, simplicial complexes), with an emphasis on how to model these structures with other fields of mathematics, such as matrix theory and linear algebra, commutative algebra, topology, analysis, probability and logic.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2060.03 and MATH 3032.03 or permission of the instructor.

CROSS-LISTING: MATH 5360.03

MATH 4370 Combinatorics: Techniques and Structures

CREDIT HOURS: 3

We introduce counting techniques and combinatorial structures, and show their application and use in all branches of mathematics. Counting techniques include combinations and permutations, the pigeonhole principle, inclusion/exclusion. Advanced techniques include recurrence relations, generating functions and power series. Structures include partial orders, set systems and transversals, and finite geometries

FORMAT: Lecture

PREREQUISITE: MATH 2112.03 or MATH 2051.03 or MATH 3070.03 or MATH 3330.03

CROSS-LISTING: MATH 5370.03

MATH 4410 Cosmology

CREDIT HOURS: 3

A self-contained introduction to cosmology will be given and no prior knowledge of differential geometry or general relativity will be assumed (although some knowledge of elementary differential equations will be useful). A cosmological model is a model of the universe, as a whole, on the largest scales; the emphasis of the course will be on the modelling aspects of cosmology.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Instructor's permission
CROSS-LISTING: MATH 5410.03, PHYC 4660.03/PHYC 5660.03

MATH 4500 Introduction to Harmonic Analysis

CREDIT HOURS: 3

This course covers the basic elements of L_p -spaces, convolution, interpolation, maximal functions, Fourier analysis of functions, and the theory of generalized functions, or distributions. Further topics may include L_2 -Sobolev spaces, boundary values of harmonic functions, spherical harmonics, singular integral operators, or multipliers.

FORMAT: Lecture

PREREQUISITE: MATH 4010.03/MATH 5010.03, or MATH 3502.03 with permission of instructor

CROSS-LISTING: MATH 5500.03

MATH 4530 Differential Geometry

CREDIT HOURS: 3

This course is a self-contained introduction to manifold theory. Topics include: elements of surface theory, the tangent space, vector fields, differential forms and more general tensors, the Lie derivative, connections, Riemannian geometry, applications in mechanics and general relativity.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 3045.03 or MATH 3502.03 or permission of the instructor

CROSS-LISTING: MATH 5530.03

MATH 4540 Applied Analysis

CREDIT HOURS: 3

This course is an introduction to the methods of modern applied analysis. This course is suitable for advanced undergraduate and graduate students. The topics include classification of planar dynamical systems, nonlinear dynamics, and equilibria, global nonlinear techniques, closed orbits and limit cycles. Calculus of Variations: first and second variations, symmetries, conservation laws and Noether's theorem, Hamiltonian formalism. Time permitting, other topics in Applied Analysis such as tensor calculus will be covered.

FORMAT: Lecture

PREREQUISITE: (MATH 3120.03 or MATH 3260.03) and MATH 3501.03, or consent of instructor

CROSS-LISTING: MATH 5540.03

MATH 4650 General Relativity

CREDIT HOURS: 3

A review of differential geometry will be given followed by an introduction to the general theory of relativity. Various topics will be discussed, including: linearized theory and gravitational radiation, spherically symmetric metrics and the Schwarzschild solution, gravitational collapse, black holes, and cosmology.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 3045.03 or permission of the instructor

CROSS-LISTING: MATH 5650.03, PHYC 4650.03/PHYC 5650.03

MATH 4660 Theory of Computation

CREDIT HOURS: 3

See course description for CSCI 4112.03 in the Computer Science section of this calendar.

MATH 4680 Topics in Logic and Computation

CREDIT HOURS: 3

This course covers topics of current interest in logic and/or the foundations of computation. Suitable topics include: formal logic, soundness and completeness, Gödel's incompleteness theorem, formal set theory, the Zermelo-Fraenkel axioms, non-standard models, independence of axioms, lambda calculus and foundations of functional programming languages, proof theory, semantics.

NOTES: Please consult the instructor for the topics offered in a particular year. This course is suitable for advanced undergraduates and graduate students from both mathematics and computer science.

FORMAT: Seminar

PREREQUISITE: MATH 3030X/Y.06 or MATH 3500X/Y.06, or CSCI 3110.03 and CSCI 3136.03, or permission of the instructor.

Suggested prerequisites for math students are algebra or analysis at honours undergraduate level. Students from computer science should be familiar with formal language theory and concepts of programming languages. All students should be comfortable with writing mathematical proofs. When in doubt about prerequisites, please consult the instructor.

CROSS-LISTING: MATH 5680.03

MATH 4800 Introduction to Mathematical Research

CREDIT HOURS: 3

This course is intended to introduce students to the science and methodology of research in the mathematical sciences. The course will be organized around topics from a wide spectrum of mathematics from which students will be guided to investigate open problems. Conjectures will be formulated and evidence will be developed.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 3031.03 and MATH 3501.03, or permission of the instructor

MATH 4900 Combinatorial Game Theory

CREDIT HOURS: 3

This course looks at 2-player games of strategy where there are no chance devices and both players have perfect information. The surprising mathematical structure underlying these games will be introduced along with the evaluation scheme and its application to specific hot, all-small and impartial games.

PREREQUISITE: (MATH 2040.03 or MATH 2135.03) and MATH 2002.03

CROSS-LISTING: MATH 5900.03

MATH 4950 Honours Research Project

CREDIT HOURS: 3

A requirement for the mathematics honours degree, this course consists of a supervised research project culminating in a written report and an oral presentation in the honours seminar. Enrolment must be approved by the mathematics honours coordinator.

NOTES: Students are required to take twelve additional credit hours at or above the 4000-level in addition to this one.

Introduction

The Medical Sciences program is a new program at Dalhousie aimed at students who wish to initiate studies in medical science as undergraduates. The program will introduce students to subjects such as human anatomy and physiology, neuroscience, epidemiology and medical ethics.

In the first two years of the program, students will take core courses in Biology, Chemistry, Math, Biochemistry, Neuroscience, Physiology, Microbiology, Sociology of Health, and Psychology. These courses will not only provide a solid background in basic sciences, but will prepare students for admission tests for various medical sciences disciplines (such as the MCAT), meet (or exceed) the early pre-requisites for acceptance into medically related professional faculties (such as Medicine, Dentistry, and Pharmacy) locally and across the country, and meet (or exceed) the early pre-requisites required for acceptance into biomedical sciences graduate programs at Dalhousie and across the country. In their third and fourth years, students take core and elective courses in various subjects within the medical sciences. Students will graduate with a broad biomedical science background that will prepare them for a variety of clinical/professional programs, graduate school, or employment in the biotechnology industry or government.

Career path advising and the course selection process are critical to the success of the Medical Sciences undergraduate program. In addition to guidance with respect to professional schools and their entry requirements, academic advising is provided so that students are aware of what courses are required should they want to enter graduate programs in the various biomedical science disciplines. Opportunities are available to concentrate in areas of special interest (e.g., Immunology, Microbiology, Pharmacology). In addition, students may choose to loop out and join the undergraduate programs in Biology, Biochemistry & Molecular Biology, Microbiology & Immunology, or Psychology & Neuroscience, if that better suits their interests or career goals.

Degree Programs

The core required courses not only provide a broad background in biomedical science but they are also designed to meet prerequisites of more advanced selectives and to provide a guided learning experience through the program content.

The program also includes "Selective" courses in a number of relevant biomedical fields (a selective is a course from a predetermined list provided by the program - see below). Students will be encouraged to choose their selective courses carefully such that they result in more specialized education in a particular area of emphasis (in Immunology or Biochemistry, for example). This will allow them to take advanced courses in the chosen area in their fourth year, to pursue Honour's research if they wish, and to be excellent candidates for graduate programs in a specialized field at Dalhousie or elsewhere in Canada.

The program includes 21 credit hours in open "Electives", which allows students to take any course offered at Dalhousie (at the appropriate level). Students will be encouraged to fulfill the Writing requirement using one or both of the Electives in the first year. Students can fill the elective slots with selectives if they wish; the reverse will not be allowed.

NOTE: Most second and third year core courses in the Medical Sciences curriculum have pre-requisites with minimum grade requirements in those prerequisite courses. Please consult the appropriate calendar section for these requirements.

The Medical Sciences program offers the following degree options:

- BSc (Medical Sciences) Concentrated Honours (120 credit hour)
- BSc (Medical Sciences) Major (120 credit hour)

Program requirements can be seen by following the links to the right. In addition, students must satisfy the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections of this calendar.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

In both the Major and Honours programs students take a set of core required courses, and choose their selective and elective courses. The core required courses provide a broad background in biomedical science and a guided learning experience through the program content. Selective courses are courses offered in a number of relevant biomedical fields. Students are encouraged to choose their selective courses carefully such that they result in more specialized education in a particular area of emphasis (in Immunology or Biochemistry, for example). This will allow them to take advanced courses in the chosen area in their fourth year, to pursue Honour's research if they wish, and to be excellent candidates for graduate programs in a specialized field at Dalhousie or elsewhere in Canada.

NOTE: Most second and third year core courses in the Medical Sciences curriculum have pre-requisites with minimum grade requirements in those pre-requisite courses. Please consult the appropriate calendar section for these requirements.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Medical Sciences undergraduate academic advisor.

BSc (120 credit hour) Major in Medical Sciences

Medical Sciences offers a 4-yr, 120 credit hour Major program. Although the program does not provide the required preparation for graduate school, it will provide an educational experience that offers a broad, interdisciplinary background in all relevant subjects in biomedical sciences. The Major degree also meets the general degree requirements for the Faculty of Science.

Requirements

In addition to the courses listed below, students must ensure that they satisfy the requirements outlined in the "Degree Requirements" section for the College of Arts and Science. For the required Writing class, students can choose from the list of "Writing Across the Curriculum" approved classes. SCIE 1111 allows BSc students to fulfill this requirement in a one-semester course. However, before selecting a writing course, students are encouraged to consult the advising sheet available on the Medical Sciences program website, as some professional schools require an ENGL course.

1000 Level

- BIOL 1010.03 or BIOL 1020.03 with BIOL 1011.03 or BIOL 1021.03 *or* SCIE 1505X/Y.18 Integrated Science
- CHEM 1011.03/CHEM 1012.03
- MATH 1215.03 or MATH 1000.03
- STAT 1060.03 *or* SCIE 1505X/Y.18 Integrated Science

- PSYO 1021.03 or PSYO 1011.03 with PSYO 1022.03 or PSYO 1012.03 *or* SCIE 1505X/Y.18 Integrated Science
- PHYC 1310.03 *or* PHYC 1300X/Y.06
- Writing course

2000 Level

- BIOL 2020.03
- BIOL 2030.03
- CHEM 2401.03/CHEM 2402.03
- BIOC 2300.03
- PHYL 2032.03

- PHYL 2041.03
- PHIL 2810.03
- SOSA 2503.03

3000 and 4000 Level

- MICI 3115.03
- PHAC 3001.03
- Anatomy*
- Introductory Pathology*
- Introductory Epidemiology*

24 credit hours of Selectives, including at least 3 credit hours of Advanced Selectives

BSc (120 credit hours) Honours in Medical Sciences

Students who want a challenging program resulting in a broad background in Medical Sciences, including independent research experience, may want to enrol in an Honours program. An Honours degree in the Medical Sciences program aims to prepare students for graduate studies in a number of medically related fields. In addition to specific course requirements and completion of at least 54 credit hours in Medical Sciences courses above the 1000 level, with a minimum GPA of 3.3, students must complete an Honours Qualifying Examination. Students will have the flexibility to do their Honours research in a laboratory of their choice (Faculty of Science, Faculty of Medicine, or other), subject to the approval of the Honours class director. All students conduct an independent research project in their final year under the supervision of a faculty member, and a presentation of the thesis research in an Honours student research forum will be required.

Students should consult with an advisor and choose their electives and selectives carefully in their second, third and fourth years to ensure that they are prepared for graduate studies in their field of interest. Students with an Honours degree will also be well prepared for entry into professional schools.

Requirements

In addition to the courses listed below, students must ensure that they satisfy the requirements outlined in the "Degree Requirements" section for the College of Arts and Science. For the required Writing class, students can choose from the list of "Writing Across the Curriculum" approved classes. SCIE 1111 allows BSc students to fulfill this requirement in a one-semester course. However, before selecting a writing course, students are encouraged to consult the advising sheet available on the Medical Sciences program website, as some professional schools require an ENGL course.

1000 Level

- Introductory Epidemiology*
- MSCI Honours thesis

21 credit hours of Selectives (see list below), including at least 3 credit hours of Advanced Selectives

List of Selectives and Advanced Selectives

Medical Sciences Honours students must include at least seven of the following courses in their program. Major students must include at least nine of these courses. In both cases, at least one of the Selectives must be an Advanced Selective.

Selectives:

Biochemistry and Molecular Biology

BIOC 2610 - Introductory Biochemistry Lab
BIOC 3300 - Intermediary Metabolism
BIOC 3400 - Nucleic Acid Biochemistry & Molecular Biology
BIOC 3700 - Biomolecular Chemistry

Biology

BIOL 2040 - Evolution
BIOL 2060 - Introductory Ecology
BIOL 3020 - Advanced Cell Biology
BIOL 3036 - Transgenic Organisms
BIOL 3046 - Molecular Evolution
BIOL 3050 - Developmental Biology
BIOL 3078 – Animal Physiology I
BIOL 3079 – Animal Physiology II
BIOL 3322 - Parasitology
BIOL 3328 - Medical Entomology
BIOL 3430 - Introduction to Human Histology
BIOL 3421 - Comparative Vertebrate Histology

Chemistry

CHEM 2301 - Introduction to Physical Chemistry I
CHEM 2304 - Introduction to Physical Chemistry II

Humanities and Social Sciences

ENGL 2030 – Literature, Health, and Healing (offered in alternate years to ENGL 3320)
ENGL 3320 – Literature and the History of Medicine (offered in alternate years to ENGL 2030)
INTD 3115 - Global Health in the 21st Century
PHIL 2805 - Ethics and Health Care: Patient Care
SOSA 2400 - Health & Illness Across Cultures
SOSA 2502 - Biomedicine and the Illness Experience
SOSA 3135 - The Social Organization of Health Care
SOSA 3141 - Sociology of Mental Disorders
SOSA 3143 - Health, Illness, and the World System
SOSA 3145 - Gender and Health (cross-listed with GWST 3145.03)
SOSA 3147 - Social Gerontology
SOSA 3148 - The Sociology of Addiction/ Drugs, Health, and Society

Mathematics

MATH 1010 – Differential and Integral Calculus II

Medical Neuroscience

ANAT 2160/BIOL 3430 - Introduction to Human Histology
ANAT 3421/BIOL 3421 - Comparative Vertebrate Histology

Microbiology and Immunology

MICI 3114 - Virology
MICI 3119- Physiology of Prokaryotic Cell
MICI 4115 – Immunology of Host Resistance
MICI 4218 – Clinical Microbiology

Neuroscience

NESC 2007 - Neuroscience Principles & Methods
NESC 2570 - Cellular Neuroscience
NESC 3270 - Developmental Neuroscience
NESC 3670 - Genes, Brain and Behaviour

Pharmacology

PHAC 4001 – Pharmacology II

Physics

PHYC 1300X/Y – Physics in and Around You
PHYC 2250 - Physics of Biological and Medical Technology

Physiology and Biophysics

PHYL 1010X/Y – Human Physiology
PHYL 3120 - Exercise Physiology in Health & Disease
PHYL 3320 - Human Cell Physiology
PHYL 3420 - Sensory Physiology
PHYL 3520 - Core Concepts in Medical Physiology

Psychology

PSYO 2000 - Research Methods in Experimental Psychology
PSYO 2080 - Social Psychology
PSYO 2090 - Developmental Psychology
PSYO 2170 - Hormones and Behaviour
PSYO 2220 - Abnormal Behaviour
PSYO 2501 - Statistical Methods I
PSYO 2770 - Brain & Behaviour
PSYO 3082 - Experimental Social Psychology
PSYO 3122 - Methods in Experimental Clinical Psychology
PSYO 3129 - Childhood Psychopathology
PSYO 3180 - Psychoneuroimmunology/Ecological Immunology
PSYO 3225 - Health Psychology
PSYO 3237 - Drugs and Behaviour

Advanced Selectives:

Biochemistry and Molecular Biology

BIOC 4010 – Bioinformatics
BIOC 4302 – Biochemistry of Lipids
BIOC 4305 – Mechanisms of Signal Transduction
BIOC 4306 - Nutritional Biochemistry
BIOC 4403 – Genes and Genomes
BIOC 4404 – Gene Expression
BIOC 4501 – Medical Biotechnology I
BIOC 4700 – Proteins
BIOC 4701 – Enzymes
BIOC 4702 – Biophysical Characterization of Macromolecules
BIOC 4811– Biochemistry of Clinical Disorders I
BIOC 4812 – Biochemistry of Clinical Disorders II
BIOC 4835/BIOC 4035 – Human Genetics

Biology

BIOC 4050 - Advanced Topics in Developmental Biology

Humanities and Social Sciences

PHIL 4801 - Topics in Ethics and Health Care
POLI 4260 - The Politics of Health Care

Microbiology and Immunology

MICI 4027 - Molecular Mechanisms of Cancer
MICI 4033 - Advanced Microbial Genetics
MICI 4100 – Processes & Mediators of Inflammation
MICI 4114 – Advanced Topics in Molecular & Medical Virology
MICI 4116 – Current Topics in Mucosal Immunology
MICI 4118 – Molecular Bacterial Pathogenesis
MICI 4302 – Molecular Immunology

Neuroscience

NESC 4000 - Senior Seminar

Physiology and Biophysics

PHYL 4000 - Current Advances in Synaptic Function and Plasticity
PHYL 4324 - Endocrine Physiology
PHYL 4680 - Cardiovascular Physiology

Psychology

PSYO 4000 - Senior Seminar

Courses

For course descriptions, please see section of the calendar corresponding to the department offering the course (e.g. BIOL = Biology).

Courses marked with an asterisk (*) above are upper level courses that are being developed especially for students in the Medical Sciences program.

Microbiology and Immunology

Location:

Website: medicine.dal.ca/departments/department-sites/microbiology.html

Email Address: microimm.advising@dal.ca

Introduction

Microbiologists study small cells (microorganisms) and viruses. Among other things, immunologists want to know how larger organisms (such as humans) respond to foreign objects, many of which are very small. These two disciplines are thus inextricably linked, and when taken together comprise a major strength of the Dept. Another focus of the department is cancer biology, a natural fit with other interests, as cancers can be thought of as foreign objects, and many are caused by bacteria and viruses.

Degree programs in Microbiology and Immunology at Dalhousie focus on education and training in bacteriology, virology and immunology, with an understanding that biochemistry, genetics, and cell and molecular biology are also essential elements of a comprehensive academic program. A degree in Microbiology and Immunology provides a firm foundation for future employment in a variety of laboratory environments, for the pursuit of an advanced post-graduate degree, and/or for entry into the health professions (e.g., medicine).

Degree Programs

The Department offers the following degree programs in Microbiology and Immunology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- Minor in Microbiology and Immunology

* BSc Co-op option available

* May be combined with Minors from other disciplines

NOTE: There is no 90 credit hour (3 year) degree program in Microbiology and Immunology.

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully. It is recommended that students considering an Honours or Major program consult with a Microbiology and Immunology Academic Advisor prior to registering for second year classes.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Microbiology and Immunology program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1540.27
- SCIE 1505.18

Staff

Marshall, J. S.

Advising

MicroImm.Advising@dal.ca

Professors

Anderson, R., PhD (Cologne), (Viral Pathogenesis)
Duncan, R., PhD (Guelph) Graduate Studies Coordinator (Molecular Virology)
Hoskin, D. W., PhD (McGill), (Tumour Immunology; Cancer Biology)
Issekutz, T. B., MD (Dalhousie), FRCP(C), Prof., Pediatrics (Lymphocytes in Autoimmune Disease)
Lee, P. W. K., PhD (Alberta), (Molecular Virology; Cancer Biology)
Lee, S. F., PhD (Guelph) (Oral Microbiology; Microbial Pathogenesis, Mucosal Vaccines)
Lee, T., PhD (Glasgow) (Immunoregulation, Transplantation Immunology)
Lin, T. -J., PhD (Peking) (Mechanisms of Host Defense Against Pathogen Infection)
Marshall, J. S., PhD (Manchester) (Mast Cells in Inflammation and Cancer)
Richardson, C. D., PhD (British Columbia) (Molecular Virology)
Stadnyk, A. W., PhD (McMaster) (Intestinal Inflammation; Cytokines)
Stoltz, D. B., PhD (McMaster) (Biology of Parasitic Insects; Polydnviruses)

Associate Professors

Barnes, C., BA, PhD (Dalhousie), Molecular Genetics)
Davidson, R. J., PhD (Manitoba) (Antimicrobial Mechanisms of Action and Resistance)
Haldane, D. J. M., MBChB (Dundee), FRCP(C) (Medical Microbiology)
Issekutz, A. C., MD (Dalhousie), FRCP(C), Prof., Pediatrics (Inflammation)
Johnston, B., PhD (Calgary) (Inflammation and Immune Response)
Li, Y. H., PhD (Manitoba) (Bacteriology and Molecular Biology)
McCormick, C., PhD (British Columbia) (Viral Oncology)

Thomas, N., PhD (Queen's) (Molecular Bacterial Pathogenesis)

Wang, J., PhD (McMaster) (Host Defense Mechanisms Against Infection and Cancer and Vaccine Development)

Assistant Professors

Corcoran, J., PhD (Dalhousie) (Virus-Cell Interactions; Viruses and Cancer)

Hatchette, T. F., MD (Memorial), Pathology (Clinical Virology and Influenza)

LeBlanc, J., PhD (Dalhousie) (Molecular Pathogenesis and Diagnostics)

Rohde, J., PhD (British Columbia) (Bacterial Pathogenesis and Ubiquitin)

Senior Instructor

Murray, L. E., PhD (Dalhousie) (Molecular Genetics)

BSc (120 credit hour) Concentrated Honours in Microbiology and Immunology

Students who want a challenging program that results in a broad and in-depth background in Microbiology and Immunology, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Microbiology and Immunology subject courses, with a minimum GPA of 3.0 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of MICI 4900.06. Certain specified courses from other departments (BIOC, BIOL, CHEM, NESC) count as MICI-subject courses (see below).

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Microbiology and Immunology.

Admission to Honours

Students who wish to enrol in a Microbiology and Immunology Honours program should apply for admission after their 2nd year Fall term grades are in. To be admitted, students must have

- Consulted with a Departmental Academic advisor
- Completed the required 1000 level classes
- A GPA of B+ at the time of application

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc Concentrated Honours program in Microbiology and Immunology must complete the following courses:

1000 level

- BIOL 1010.03/BIOL 1011.03 or BIOL 1020.03/BIOL 1021.03
- CHEM 1011.03/CHEM 1012.03
- MATH 1000.03 or MATH 1215.03
- MATH 1010.03 or STAT 1060.03

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

2000 level

- MICI 2100.03
- BIOL 2020.03 and BIOL 2030.03
- BIOC 2300.03 and BIOC 2610.03
- CHEM 2401.03 and CHEM 2402.03

3000 level

- BIOC 3400.03
- MICI 3114.03
- MICI 3115.03
- MICI 3119.03

4000 level

- MICI 4900.06*
- One additional 4000-level MICI course
- A minimum of four additional courses from the list below, at least one of which is at the 4000 level
 - MICI 2115.03, MICI 3024.03, MICI 3620.03, MICI 4027.03, MICI 4033.03, MICI 4100.03, MICI 4114.03, MICI 4115.03, MICI 4116.03, MICI 4118.03, MICI 4218.03, MICI 4302.03
 - BIOC 4010.03, BIOC 4403.03, BIOC 4404.03, BIOC 4501.03, BIOC 4835.03
 - BIOL 2004.03, BIOL 3101.03, BIOL 3102.03, BIOL 3322.03
 - PSYO 3180.03/NESC 3180.03
 - FOSC 3080.03

* The honours research thesis (MICI 4900.06) is normally supervised by a faculty member from Microbiology and Immunology or from Biochemistry and Molecular Biology (including joint and cross appointments). Students who wish to undertake their honours research project in another department must first have the project approved by the Microbiology and Immunology Undergraduate Studies Committee.

Grade requirements for Honours:

- In the following core courses, MICI 2100.03, MICI 3114.03, MICI 3115.03, MICI 3119.03 and MICI 4900.06, a minimum grade of B in four and a minimum grade of B- in the fifth course. In the other MICI or required courses a grade of C or greater is required.

BSc (120 credit hour) Combined Honours in Microbiology and Immunology and another subject

Students who wish to study Microbiology and Immunology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Microbiology and Immunology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Microbiology and Immunology, this requirement is satisfied through MICI 4900.06.

A Co-op option is available for students enrolled in BSc Combined Honours with Microbiology and Immunology as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Microbiology and Immunology and another subject must complete the following:

Microbiology and Immunology as the primary subject

- 1000-level as for Concentrated Honours (above)
- MICI 2100.03
- BIOL 2020.03 and BIOL 2030.03
- BIOC 3400.03
- CHEM 2401.03 and CHEM 2402.03
- BIOC 2300.03 and BIOC 2610.03
- MICI 3114.03, MICI 3115.03, MICI 3119.03
- MICI 4900.06
- At least one additional MICI course at the 4000 level

Requirements for a Combined Honours with Biochemistry & Molecular Biology as the secondary subject can be met by completing the following courses in addition to

the above list:

- BIOC 3300.03, BIOC 3700.03
- Two courses from BIOC 40XX, 43XX, 44XX, 45XX, or 47XX
- Two additional MICI or BIOC courses at or above the 2000 level

Microbiology & Immunology as the secondary subject

- 1000-level as for Concentrated Honours (above)
- MICI 2100.03
- BIOL 2020.03, BIOL 2030.03
- BIOC 3400.03
- CHEM 2401.03 and CHEM 2402.03
- BIOC 2300.03 and BIOC 2610.03
- MICI 3114.03, MICI 3115.03, MICI 3119.03
- MICI 4900.03

Grade requirements for Combined Honours:

In the following core courses, MICI 2100.03, MICI 3114.03, MICI 3115.03, MICI 3119.03 AND MICI 4900.06, a minimum of B in four and a minimum of B- in the fifth course. In the other MICI or required courses a grade of C or greater is required.

BSc (120 credit hour) Major in Microbiology and Immunology

The 120 credit hour Major is suited to students who want to focus on Microbiology and Immunology, but wish to have a program that is somewhat less constrained than the Honours program. Microbiology and Immunology Majors complete a minimum of 42 credit hours in program courses above the 1000 level. Certain specified courses from other departments (BIOC, BIOL, CHEM, NESC) count as program courses (see below). Research and other experiential learning opportunities are available through laboratories, and through direct research and experiential classes.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Microbiology and Immunology.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Microbiology and Immunology must complete the following courses:

1000 level

- BIOL 1010.03/BIOL 1011.03 or BIOL 1020.03/BIOL 1021.03
- CHEM 1011.03/CHEM 1012.03
- MATH 1000.03 or MATH 1215.03
- MATH 1010.03 or STAT 1060.03

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

2000 level

- MICI 2100.03
- BIOL 2020.03 and BIOL 2030.03
- BIOC 2300.03 and BIOC 2610.03
- CHEM 2401.03 and CHEM 2402.03

3000 level

- BIOC 3400.03
- MICI 3114.03
- MICI 3115.03

- MICI 3119.03

4000 level

- One of MICI 4027.03, MICI 4033.03, MICI 4100.03, MICI 4114.03, MICI 4115.03, MICI 4116.03, MICI 4118.03, MICI 4218.03, or MICI 4302.03
- Six additional credit hours in MICI-approved courses at or above the 2000 level

Grade requirements for Majors:

For all MICI or required courses you must obtain a grade of C- or better. In some cases, you will need a grade of B as a prerequisite for entry into 3000 or 4000 level courses.

BSc (120 credit hour) Double Major in Microbiology and Immunology and another subject

The Double Major degree program allows students to combine a study of Microbiology and Immunology with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Microbiology and Immunology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Microbiology and Immunology as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Microbiology and Immunology and another subject must complete the following set of core courses:

1000 level

- BIOL 1010.03/BIOL 1011.03 or BIOL 1020.03/BIOL 1021.03
- CHEM 1011.03/CHEM 1012.03
- MATH 1000.03 or MATH 1215.03
- MATH 1010.03 or STAT 1060.03

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

2000 level

- MICI 2100.03
- BIOL 2020.03 and BIOL 2030.03
- BIOG 2300.03 and BIOG 2610.03
- CHEM 2401.03 and CHEM 2402.03

3000 level

- BIOG 3400.03
- MICI 3114.03
- MICI 3115.03
- MICI 3119.03

4000 level

- One of MICI 4027.03, MICI 4033.03, MICI 4100.03, MICI 4114.03, MICI 4115.03, MICI 4116.03, MICI 4118.03, MICI 4218.03, or MICI 4302.03

The same set of core courses is required in a Double Major with Microbiology and Immunology as the primary or secondary subject.

Grade requirements for Double Majors:

For all MICI or required courses you must obtain a grade of C- or better. In some cases, you will need a grade of B as a prerequisite for entry into 3000 or 4000 level courses.

Minor in Microbiology and Immunology

This minor is available to non-Microbiology students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

Requirements

A minimum of 18 to a maximum of 36 credit hours in Microbiology and must include:

- MICI 2100.03: Introductory to Microbiology and Immunology
- A minimum of 15 additional credit hours in Microbiology courses at the 2000 level or higher

Please note that there are prerequisite requirements for entry into upper level Microbiology courses, including BIOL 2020.03 and BIOL 2030.03, CHEM 2401.03 and CHEM 2402.03 (or CHEM 2441.03).

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Microbiology and Immunology

Co-op Academic Advisor: Dr. D.B. Stoltz (dstoltz@dal.ca)

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Microbiology and Immunology, or in Combined Honours or Double Major programs with Microbiology and Immunology as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.3 is required for admission and for continuation in the Co-op program as is a grade of B+ in MICI 2100.03. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) in the Fall term of the year they join.

Details are available from the Microbiology and Immunology Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html For more information on Co-op Education in Microbiology and Immunology, please see the Department webpage www.dal.ca/academics/programs/undergraduate/mbim/what_will_i_learn/coop_work_terms.html

Minors available to students in Microbiology and Immunology

Minor programs allow students to develop subject specialities in addition to their major or honours subjects. Minors in other subjects are normally embedded within 120 credit hour programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Microbiology and Immunology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Microbiology and Immunology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a Microbiology and Immunology Major or Honours program include:

- Certificate in Genetics
- Certificate in Medicinal Chemistry

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Notes

For more detailed information on the following courses please see the departmental webpage <http://microbiology.medicine.dal.ca>

NOTE: Owing to the combined pressures of student numbers and a dearth of available space, the names of students absent from the first day of course may be deleted from course lists; students are therefore advised that being signed into a course is no guarantee of continued registration.

Course Descriptions

MICI 1050 Basic Microbiology and Immunology for Pharmacy

CREDIT HOURS: 3

This course is only for pharmacy students and involves problem based learning tutorials, lectures and laboratory sessions (demonstrations and exercises). Topics include: concepts of antibiotics and immunity, basic principles of microbial structure, physiology, and genetics in relation to microbial pathogenesis.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: BIOL 1000X/Y.06 or (BIOL 1010 or BIOL 1020 and BIOL 1011 or BIOL 1021) or instructor's consent

MICI 1100 Health Science Microbiology

CREDIT HOURS: 3

An introduction to microbiology and infectious diseases designed for healthcare professionals. It includes a study of the structure and physiology of microorganisms, the ways microorganisms cause disease in man and the way they affect human's well being.

NOTES: This course is also offered by distance education.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

MICI 1200 Introduction to General and Oral Microbiology

CREDIT HOURS: 3

See course description in the Dental Hygiene section of the Dentistry, Law and Medicine Calendar (DEHY 2850.03).

MICI 2100 Introductory Microbiology and Immunology

CREDIT HOURS: 3

An introduction to the basic concepts of microbiology and immunology. Topics include: structure, genetics and biology of microorganisms, basic immunology and host defence mechanisms. The class is designed to interrelate the major research themes within the Department (bacteriology and microbial pathogenesis, immunology, microbial and molecular genetics, virology and cancer biology).

NOTES: This class is also offered by distance education.

FORMAT: Lecture| Lab| Online Delivery

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Grade of B- or better in BIOL 1010.03 and 1011.03, CHEM 1011.03 (or BIOL 1020.03 and BIOL 1021.03) and CHEM 1012.03

MICI 2115 Human Organs and Tissues

CREDIT HOURS: 3

Using a histology approach, students look at how tissues and organs are constructed and function at the cellular level normally and in disease. The course does not cover all histology topics. Instead, the subject matter has been selected for its relevance and potential for complementing advanced courses in microbiology/immunology.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Grade of B- or better in MICI 2100.03

MICI 2400 Laboratory Methods in Microbiology and Immunology

CREDIT HOURS: 3

An introduction to techniques in Microbiology and Immunology through a rigorous wet laboratory experience that includes training in how to explore safely and effectively the properties of viruses, bacteria and immune cells. This course is directed to students in Microbiology and Immunology, Biochemistry & Molecular Biology, and Biology programs.

FORMAT: Lab

COREQUISITE: BIOL 2020.03 and BIOL 2030.03

PREREQUISITE: MICI 2100.03 with a grade of B- or higher, or instructor's consent

RESTRICTIONS: Second year or above

MICI 3024 Microscopy

CREDIT HOURS: 3

Biological ultrastructural analysis concentrating on transmission and scanning electron microscopy. Topics include: physical and chemical principles governing technical procedures such as fixation, staining, freeze-fracture, immunocytochemistry, autoradiography, X-ray microanalysis and photography. During laboratory periods, students have the opportunity through individual projects to participate in some techniques covered in lectures.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: A grade of B- or better in MICI 2100.03 and BIOL 2020.03

CROSS-LISTING: BIOL 3024.03

MICI 3114 Virology

CREDIT HOURS: 3

Viruses play important roles in infectious diseases and cancer as well as in model systems for gene regulation, molecular evolution and gene therapy. Topics include: virus structure, assays, classification, gene organization and expression, host-cell interactions, cell transformation, gene therapy and molecular mechanisms of pathogenesis.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Includes all of MICI 2100.03, BIOC 2300.03 and BIOC 2610.03, BIOL 2020.03 and BIOL 2030.03 (a minimum of B- in each of these courses).

BIOC 3400.03 must be taken either prior to or concurrently with this course; the same grade requirement applies.

MICI 3115 Immunology

CREDIT HOURS: 3

An introduction to cellular and molecular immunology. Topics include: cells and tissues of the immune system, the structure and synthesis of antibodies, complement pathways, lymphocyte subsets and their functions, hypersensitivity reactions, and the genetics of the immune response.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Includes all of MICI 2100.03, BIOC 2300.03 and BIOC 2610.03, BIOL 2020.03 and BIOL 2030.03 (a minimum of B- in each of these courses)

MICI 3119 Physiology of the Prokaryotic Cell

CREDIT HOURS: 3

An introduction to the bacterial physiological processes required for interactions with other organisms and the environment. Topics include: molecular architecture and assembly of bacterial cell components, metabolism and energy production, utilization of energy, adaptation responses to host and environmental challenges, and host-pathogen interactions.

PREREQUISITE: MICI 2100.03, BIOC 2300.03 and BIOC 2610.03, BIOL 2020.03 and BIOL 2030.03, (a minimum of B- in each of these courses).

MICI 3620 Experiential Learning in Microbiology and Immunology

CREDIT HOURS: 3

This lab-based course is designed to give students an introduction to general lab procedures, molecular and cell biological techniques in bacterial pathogenesis, cancer cell biology, immunology, molecular genetics or virology. In collaboration with the research supervisor and the course coordinator, students will draft a learning agreement specifying learning outcomes and how these will be achieved.

NOTES: To register in this course students will need to find a research supervisor and receive approval from the Undergraduate Committee.

PREREQUISITE: Includes all of MICI 2100.03, BIOC 2300.03, BIOC 2610.03, BIOL 2020.03, BIOL 2030.03 (a minimum of B- in each of these courses). Permission of instructor required.

RESTRICTIONS: Normally restricted to students registered in a Majors or Honours degree in Microbiology and Immunology; any other students interested should consult the course coordinator.

EXCLUSIONS: The following may not be used towards MICI 3620: lab work that is part of another scheduled class, co-op workterms, and paid employment. Only one

experiential learning course per degree is permitted. Students may not take MICI 3620 concurrently with MICI 4900, MICI 4700, MICI 4901, MICI 4902, or a co-op work term.

MICI 4027 Molecular Mechanisms of Cancer

CREDIT HOURS: 3

This advanced course focuses on the molecular mechanisms of cancer and consists of lectures and student presentations based on review articles and current research papers. Topics include: receptors and downstream signaling, oncogenes and tumor suppressors, cancer metastasis and angiogenesis, cell cycle control, and apoptosis

FORMAT: Lecture| Discussion

PREREQUISITE: Minimum grades of B in a 3000 level Microbiology, Pathology or Biochemistry course. Permission of instructor required.

CROSS-LISTING: MICI 5027.03/PATH 5027.03/BIOC 4027.03

MICI 4033 Advanced Microbial Genetics

CREDIT HOURS: 3

This advanced course focuses on select aspects on bacterial gene regulation including bacterial viruses. Topics include gene transfer, transposon biology, bacterial cell signaling, activators and repressors, molecular and chemical approaches to genetic analysis and regulation of bacterial gene expression.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: A grade of B- or better in MICI 3119.03 or instructor's consent is required.

CROSS-LISTING: MICI 5033.03

MICI 4100 Processes and Mediators of Inflammation

CREDIT HOURS: 3

This advanced course focuses on the cellular and molecular mechanisms of inflammation and consists of lectures and student presentations based on review articles and current research papers. Topics include: inflammatory mediators and receptors, complement, steroids, tissue remodeling and transplant modulation. Current research questions and emerging treatments are emphasized.

FORMAT: Lecture| Discussion

PREREQUISITE: MICI 3115.03 with a grade of B+ or better and instructor's consent is required

CROSS-LISTING: MICI 5100.03, PATH 5100.03

MICI 4114 Advanced Topics in Molecular and Medical Virology

CREDIT HOURS: 3

This advanced course focuses on selected aspects of molecular and medical virology and consists of lectures and student presentations based on review articles and current research papers. Topics include: Hepatitis C virus and innate immunity, influenza virus pathogenesis, virus interactions with host cells, viruses as vectors for gene therapy and applications.

FORMAT: Lecture| Discussion

PREREQUISITE: Students enrol in the Fall semester, but must attend the first class where final admittance is determined. Restricted enrollment based on performance in MICI 3114.03 (minimum A- or instructor's consent)

CROSS-LISTING: MICI 5114.03

MICI 4115 Immunology of Host Resistance

CREDIT HOURS: 3

This advanced course focuses on mechanisms involved in the host immune response to pathogens and tumour cells and consists of lectures and student presentations based on review articles and current research papers. Topics also include: allergic inflammation and transplantation immunology.

FORMAT: Lecture| Discussion

PREREQUISITE: Minimum grade of B in MICI 3115.03 or instructor's consent

MICI 4116 Current Topics in Mucosal Immunology

CREDIT HOURS: 3

This advanced course focuses on the mucosal immune system, which maintains a state of tolerance to environmental antigens while mounting a strong immune response to infectious agents. The course consists of lectures and student presentations based on review articles and research papers. Topics include: immune mechanisms in the gastrointestinal tract and respiratory and genitourinary systems.

PREREQUISITE: MICI 3115.03 with a grade of B or better or instructor's consent

CROSS-LISTING: MICI 5116.03

MICI 4118 Molecular Bacterial Pathogenesis

CREDIT HOURS: 3

This advanced course focuses on the molecular basis of bacterial pathogenesis and consists of lectures and student presentations based on landmark articles and current research papers. Topics include: the regulation of genes encoding virulence factors, the function of these factors in surface colonization, invasion, intracellular growth and toxin production.

PREREQUISITE: MICI 3119.03 with a grade of B or better or instructor's consent.

CROSS-LISTING: MICI 5118.03

MICI 4218 Clinical Microbiology

CREDIT HOURS: 3

This advanced course covers all aspects of clinical microbiology including bacteriology, virology, parasitology, mycology and molecular diagnostics. The emphasis will be placed on bacteriology. Topics include epidemiology and transmission, laboratory management and identification, antimicrobial testing and resistance, treatment and prevention of infectious diseases.

FORMAT: Lecture

PREREQUISITE: A grade of B- or better in MICI 3119.03 or Instructor's consent.

MICI 4302 Molecular Immunology

CREDIT HOURS: 3

This advanced course focuses on understanding the generation and expression of immune responses. Topics include: regulation of cytokines, antibody diversity by

immunoglobulin gene rearrangement, class switching, structure/function of cell surface receptors including the T cell antigen receptor, MHC and adhesion molecules, receptor signaling and the genetics of immune regulation.

FORMAT: Lecture| Discussion

PREREQUISITE: MICI 3115.03 with a grade of B or instructor's consent

CROSS-LISTING: BIOL 4302.03/5302.03, MICI 5302.03

MICI 4403 Genes and Genomes

CREDIT HOURS: 3

See course description for BIOC 4403.03 in the Biochemistry and Molecular Biology section of this calendar.

PREREQUISITE: BIOC 3400 or BIOL 3014

MICI 4404 Gene Expression

CREDIT HOURS: 3

MICI 4700X/Y Directed Research Project

CREDIT HOURS: 6

Students spend at least one day per week performing laboratory research in the lab of approved departmental faculty. This course is not for students in a regular BSc Honours program. Approval is required from the departmental undergraduate committee.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: Permission of the Undergraduate Studies Committee and a member of the Department who will serve as a supervisor. At least a B average for MICI, 3114.03, 3115.03 and 3119.03

MICI 4701 Advanced Topics in Microbiology and Immunology

CREDIT HOURS: 3

This advanced course is an independent studies course that is not part of the regular BSc program. Approval is required from the departmental undergraduate committee.

PREREQUISITE: Permission of the Undergraduate Studies Committee and a member of the Department who will supervise the independent study program.

MICI 4702 Advanced Topics in Microbiology and Immunology

CREDIT HOURS: 3

This advanced course is an independent studies course that is not part of the regular BSc program. Approval is required from the departmental undergraduate committee.

PREREQUISITE: Permission of the Undergraduate Studies Committee and a member of the Department who will supervise the independent study program.

MICI 4900X/Y Honours Research and Thesis

CREDIT HOURS: 6

This advanced course requires at least one day per week (or equivalent) of laboratory research in the laboratory of an approved departmental faculty member. This course is for students in a MICI or combined MICI B.Sc. Honour's program. Students must meet the course instructor prior to registering for the course. NOTE: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

NOTE: Course Details listed here also apply to MICI 4901/MICI 4902.

PREREQUISITE: B average in at least three of MICI 3114, 3115, 3119 and BIOC 3400 with no grade lower than B- (or Instructor's permission); and a member of the Department who will serve as a supervisor.

MICI 4901 Honours Research and Thesis

CREDIT HOURS: 3

See description for MICI 4900X/Y.06. MICI 4901.03 and MICI 4902.03 do not necessarily have to be taken in consecutive terms, although that will normally be the case.

MICI 4902 Honours Research and Thesis II

CREDIT HOURS: 3

See description for MICI 4900X/Y.06. MICI 4901.03 and MICI 4902.03 do not necessarily have to be taken in consecutive terms, although that will normally be the case.

MICI 8891 Co-op Work Term I

CREDIT HOURS: 0

MICI 8892 Co-op Work Term II

CREDIT HOURS: 0

MICI 8893 Co-op Work Term III

CREDIT HOURS: 0

MICI 8894 Co-op Work Term IV (optional)

CREDIT HOURS: 0

MICI 8895 Co-op Work Term V (optional)

Introduction

The last century has witnessed the emergence of a new, interdisciplinary field called Neuroscience. Its primary goal is the understanding of the brain. Neuroscience is a rapidly developing research area which includes all aspects of the structure and function of nervous systems. Neuroscience involves a variety of experimental strategies to understand nervous systems. These include molecular, biochemical, behavioural, anatomical, physiological, and developmental approaches. Although firmly grounded in the natural sciences, the scope of Neuroscience also encompasses fundamentally important philosophical issues, such as the nature of human thought and its mechanism. The programs outlined below represent all of these approaches, with an emphasis on behaviour as the adaptive product of neural activity. Knowledge obtained from research in Neuroscience is applied to a variety of human health problems, including Alzheimer's disease, Parkinson's disease, and a variety of drug- or injury-induced behavioural disorders. Research in Neuroscience is also contributing new information related to the major psychiatric disorders, including affective disorders and the schizophrénias.

Degree Programs

The Department of Psychology and Neuroscience offers the following degree programs in Neuroscience:

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- Minor in Neuroscience

* May be combined with Minor programs from other disciplines.

Departmental requirements for each degree program can be seen by following the links in the menu at the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Neuroscience undergraduate academic advisor.

Staff

Dean

Moore, C. L., BA, PhD (Cantab)

Program Advisors

To contact a program advisor, please go to the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263), telephone (902) 494-3417, or visit the [Psychology and Neuroscience website](#).

For a complete listing of faculty members in the Department of Psychology and Neuroscience.

BSc (120 credit hour) Concentrated Honours in Neuroscience

The Honours program is intended to serve as a preparation for graduate work in Neuroscience, biological psychology, medicine, human communication disorders and related fields. Its interdisciplinary nature is reflected in the participation of faculty from several departments in the program. In the first year of study, students take courses which provide a firm grounding in the physical and biological sciences. In subsequent years, the program includes credits in courses drawn from Neuroscience, Psychology and Biology. These include a number of required core courses that emphasize the acquisition and application of laboratory skills.

Honours students complete a minimum of 54 credit hours above the 1000 level in Neuroscience with a minimum GPA of 3.0 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of NESC 4500.06.

Admission to Honours

Students must apply for admission to Honours programs. Students wishing to enrol in Honours in Neuroscience should consult with the Neuroscience Honours Advisor in January of their third year. A detailed description of the Honours application process can be found on the departmental website www.dal.ca/psychandneuro. Admission requirements include:

- A grade of B or better in NESC 2007.03
- A minimum of A- or better in the most recently completed:
 - 18 credit hours of NESC courses (for admission January of 3rd year)
 - OR
 - 27 credit hours of NESC courses (for admission at end of 3rd year)

Students in the Honours program should find a thesis supervisor, and begin the preparation for their Honours research (reading, learning laboratory methodology) as early as possible in their third year.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Neuroscience must complete the following:

1000 level

- MATH 1000.03 (preferred) or MATH 1215.03
- An additional three credit hours in mathematics, (ideally, but not necessarily MATH 1010.03)
- BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, or BIOL component of the Integrated Science Program (all with a grade of B- or better)
- CHEM 1011.03/CHEM 1012.03
- Recommended:
 - PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03, or PSYO component of the Integrated Science Program (all with a grade of B- or better)

Students are strongly recommended to take PHYC 1190.03/PHYC 1290.03 or PHYC 1300.06 prior to finishing their degrees.

2000 level

- NESC 2007.03
- NESC 2470.03
- NESC 2570.03
- PSYO 2501.03 (or STAT 2080.03)
- BIOL 2020.03
- Six credit hours selected from: NESC 2130.03, NESC 2140.03, NESC 2150.03, NESC 2160.03, BIOC 2300.03, BIOL 2030.03, PHYC 2250.03

3000 level

- Six credit hours of laboratory courses selected from NESC 3044.03, NESC 3051.03, NESC 3137.03, NESC 3161.03, NESC 3370.03, NESC 3371.03, NESC

3440.03, NESC 3775.03

- PSYO 3502.03
- Six additional credit hours selected from NESC 3043.03, NESC 3052.03, NESC 3131.03, NESC 3132.03, NESC 3133.03, NESC 3134.03, NESC 3162.03, NESC 3165.03, NESC 3170.03, NESC 3180.03, NESC 3190.03, NESC 3227.03, NESC 3237.03, NESC 3260.03, NESC 3264.03, NESC 3270.03, NESC 3670.03, NESC 3770.03, NESC 3790.03, NESC 3970.03, BIOC 3200.03, BIOL 3020.03, PHAC 3001.03

4000 level

- NESC 4500X/Y.06 Honours Thesis and Qualifying Exam
- Six credit hours selected from NESC 4000.03, NESC 4007.03, NESC 4050.03, NESC 4070.03, NESC 4130.03, NESC 4160.03, NESC 4170.03, NESC 4177.03, NESC 4185.03, NESC 4230.03, NESC 4740.03, PHAC 4001.03
- Six additional credit hours from NESC 3000- or 4000-level courses

BSc (120 credit hour) Combined Honours in Neuroscience and another subject

Students who wish to study Neuroscience in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be from any discipline in the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Neuroscience may be the primary subject (with a minimum of 45 credit hours beyond the 1000 level), or the secondary subject (30 credit hours).

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Neuroscience, this requirement is satisfied through NESC 4500.06.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Neuroscience and another subject must complete the following:

1000 level

- MATH 1000.03 (preferred) or MATH 1215.03
- An additional three credit hours in mathematics, (ideally, but not necessarily MATH 1010.03)
- BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, or BIOL component of the Integrated Science Program (all with a grade of B- or better)
- CHEM 1011.03/CHEM 1012.03
- Recommended:
 - PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03, or PSYO component of the Integrated Science Program (all with a grade of B- or better)

Students are strongly recommended to take PHYC 1190.03/PHYC 1290.03 or PHYC 1300.06 prior to finishing their degrees.

Neuroscience as the primary subject

2000 level

- NESC 2007.03
- NESC 2470.03
- NESC 2570.03
- PSYO 2501.03 (or STAT 2080.03)
- BIOL 2020.03*
- Three credit hours selected from: NESC 2130.03, NESC 2140.03, NESC 2150.03, NESC 2160.03, BIOC 2300.03, BIOL 2030.03, PHYC 2250.03

3000 level

- Six credit hours of laboratory courses selected from NESC 3044.03, NESC 3051.03, NESC 3137.03, NESC 3161.03, NESC 3370.03, NESC 3371.03, NESC 3440.03, NESC 3775.03

- PSYO 3502.03
- Three additional credit hours selected from NESC 3043.03, NESC 3052.03, NESC 3131.03, NESC 3132.03, NESC 3133.03, NESC 3134.03, NESC 3162.03, NESC 3165.03, NESC 3170.03, NESC 3180.03, NESC 3190.03, NESC 3227.03, NESC 3237.03, NESC 3260.03, NESC 3264.03, NESC 3270.03, NESC 3670.03, NESC 3770.03, NESC 3790.03, NESC 3970.03, BIOC 3200.03, BIOL 3020.03, PHAC 3001.03

4000 level

- NESC 4500X/Y.06 Honours thesis and Qualifying Exam
- Six credit hours selected from NESC 4000.03, NESC 4007.03, NESC 4050.03, NESC 4070.03, NESC 4130.03, NESC 4160.03, NESC 4170.03, NESC 4177.03, NESC 4185.03, NESC 4230.03, NESC 4740.03, PHAC 4001.03
- Six additional credit hours from NESC 3000- or 4000-level courses

Neuroscience as the secondary subject

2000 level

- NESC 2007.03
- NESC 2470.03
- NESC 2570.03
- PSYO 2501.03 (or STAT 2080.03)
- BIOL 2020.03*

3000/4000 level

- Six credit hours of laboratory courses selected from NESC 3044.03, NESC 3051.03, NESC 3137.03, NESC 3161.03, NESC 3370.03, NESC 3371.03, NESC 3440.03, NESC 3775.03
- Nine additional credit hours selected from NESC courses, at least six credit hours at the 3000 or 4000 level, including BIOC 3200.03, BIOL 3020.03, PHAC 3001.03, PHAC 4001.03

* If students undertake another program of study that requires BIOL 2020.03, they should substitute another three credit hour elective in a Neuroscience topic at the 2000 level for BIOL 2020.03.

BSc (120 credit hour) Major in Neuroscience

The 120 credit hour Major is suited to students who want to focus on Neuroscience, but wish to have a program that is somewhat less constrained than the Honours program. It provides a four-year survey of Neuroscience, and is designed for students not anticipating subsequent experimental graduate-level training in Neuroscience or related disciplines. Neuroscience Majors complete a minimum of 45 credit hours in Neuroscience courses above the 1000 level and do not have thesis (or related) requirements.

Students should plan their programs carefully and, if required, obtain advice from an academic advisor. Advisors can be consulted by contacting the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263 or 902 494-3417).

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Neuroscience must complete the following courses:

1000 level

- MATH 1000.03 (preferred) or MATH 1215.03
- An additional three credit hours in mathematics, (ideally, but not necessarily MATH 1010.03)
- BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, or BIOL component of the Integrated Science Program (all with a grade of B- or better)
- CHEM 1011.03/CHEM 1012.03
- Recommended:
 - PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03, or PSYO component of the Integrated Science

Program (all with a grade of B- or better)

Students are strongly recommended to take PHYC 1190.03/PHYC 1290.03 or PHYC 1300.06 prior to finishing their degrees.

2000 level

- NESC 2007.03
- NESC 2470.03
- NESC 2570.03
- PSYO 2501.03 (or STAT 2080.03)
- BIOL 2020.03
- Six credit hours selected from: NESC 2130.03, NESC 2140.03, NESC 2150.03, NESC 2160.03, BIOC 2300.03, BIOL 2030.03, PHYC 2250.03

3000/4000 level

- Six credit hours of laboratory courses selected from NESC 3044.03, NESC 3051.03, NESC 3137.03, NESC 3161.03, NESC 3370.03, NESC 3371.03, NESC 3440.03, NESC 3775.03
- Six more credit hours selected from NESC 3043.03, NESC 3052.03, NESC 3131.03, NESC 3132.03, NESC 3133.03, NESC 3134.03, NESC 3162.03, NESC 3165.03, NESC 3170.03, NESC 3180.03, NESC 3190.03, NESC 3227.03, NESC 3237.03, NESC 3260.03, NESC 3264.03, NESC 3270.03, NESC 3670.03, NESC 3770.03, NESC 3790.03, NESC 3970.03, BIOC 3200.03, BIOL 3020.03, PHAC 3001.03, PHAC 4001.03
- An additional 12 credit hours from NESC 3000- or 4000-level courses

BSc (120 credit hour) Double Major in Neuroscience and another subject

The Double Major degree program allows students to combine a study of Neuroscience with another subject. The other subject may be from any discipline in the Faculty of Science (other than Psychology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Neuroscience may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Neuroscience and another subject must complete the following:

1000 level

- MATH 1000.03 (preferred) or MATH 1215.03
- An additional three credit hours in mathematics, (ideally, but not necessarily MATH 1010.03)
- BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, or BIOL component of the Integrated Science Program (all with a grade of B- or better)
- CHEM 1011.03/CHEM 1012.03
- Recommended:
 - PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03, or PSYO component of the Integrated Science Program (all with a grade of B- or better)

Students are strongly recommended to take PHYC 1190.03/PHYC 1290.03 or PHYC 1300.06 prior to finishing their degrees.

Neuroscience as the primary subject

2000 level

- NESC 2007.03
- NESC 2470.03

- NESC 2570.03
- PSYO 2501.03 (or STAT 2080.03)
- BIOL 2020.03*

3000/4000 level

- Six credit hours of laboratory courses selected from NESC 3044.03, NESC 3051.03, NESC 3137.03, NESC 3161.03, NESC 3370.03, NESC 3371.03, NESC 3440.03, NESC 3775.03
- Six more credit hours selected from NESC 3043.03, NESC 3052.03, NESC 3131.03, NESC 3132.03, NESC 3133.03, NESC 3134.03, NESC 3162.03, NESC 3165.03, NESC 3170.03, NESC 3180.03, NESC 3190.03, NESC 3227.03, NESC 3237.03, NESC 3260.03, NESC 3264.03, NESC 3270.03, NESC 3670.03, NESC 3770.03, NESC 3790.03, NESC 3970.03, BIOC 3200.03, BIOL 3020.03, PHAC 3001.03, PHAC 4001.03
- An additional six credit hours from NESC 3000- or 4000-level courses

Neuroscience as the secondary subject

2000 level

- NESC 2007.03
- NESC 2470.03
- NESC 2570.03
- PSYO 2501.03 (or STAT 2080.03)
- BIOL 2020.03*

3000/4000 level

- Six credit hours of laboratory courses selected from NESC 3044.03, NESC 3051.03, NESC 3137.03, NESC 3161.03, NESC 3370.03, NESC 3371.03, NESC 3440.03, NESC 3775.03
- Nine additional credit hours selected from NESC courses, at least six credit hours at the 3000 or 4000 level, including BIOC 3200.03, BIOL 3020.03, PHAC 3001.03, PHAC 4001.03

* If students undertake another program of study that requires BIOL 2020.03, they should substitute another three credit hour elective in a Neuroscience topic at the 2000 level for BIOL 2020.03.

Minor in Neuroscience

This Minor is available to non-Neuroscience/Psychology students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Neuroscience courses at the 2000 level or higher, other than NESC 2007.03 and PSYO 2501.03, which are available only to students in a Major/Honours program.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Neuroscience

Minor programs allow students to develop subject specialities in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Neuroscience may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Neuroscience, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a BSc in Neuroscience include:

- Certificate in Animal Behaviour
- Certificate in Science Leadership and Communication

BSc/BEng Concurrent Program

Students wishing to combine their interest in Neuroscience with a degree in Engineering may choose a BSc/BEng Concurrent Program. Students take courses toward, and complete the requirements for a BSc 120 credit hour Major in Neuroscience, at the same time as they fulfill their BEng requirements. Such a program normally takes 5 years (or longer) to complete. Interested students should see undergraduate advisors from Neuroscience and from the Faculty of Engineering in their first year of study.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Notes

In 2006/2007, the six credit hour Introduction to Psychology courses were divided into two three credit hour courses. PSYO 1000X/Y.06 became PSYO 1021.03 and PSYO 1022.03, and PSYO 1001X/Y.06 became PSYO 1011.03 and PSYO 1012.03. If a course now requires PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03 as prerequisites, this requirement may also be met by either PSYO 1000.06 or PSYO 1001.06.

4000-Level Seminars

These seminars are intended for fourth-year Honours students. Third-year Honours students are eligible provided they obtain permission from the instructor, and the needs of all the fourth-year Honours students have been met. The topics covered in these courses vary from year to year. Go to the departmental website www.dal.ca/psychandneuro for more detail about the topics to be covered in the current academic year.

Course Descriptions

NESC 2007 Neuroscience Principles and Methods

CREDIT HOURS: 3

This course introduces methods used to investigate contemporary issues in Neurobiology. Characteristics of these methods, including their strengths and limitations, are presented conceptually in lectures, and then practically in the form of supervised laboratory experiments where students implement in the lab what they encountered first in lectures.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1505X/Y.18 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27, or BIOL 1010.03 or 1020.03 and BIOL 1011.03 or 1021.03 (with a grade of B- or better)

RESTRICTIONS: Students registered in Neuroscience Major or Honours programs.

EXCLUSIONS: PSYO 2000.03

NESC 2130 Introduction to Cognitive Psychology

CREDIT HOURS: 3

Lectures focus on the processes involved in transforming sensory information into the meaningful everyday world that we know. Initially, emphasis is on the visual system, and how information within that system is structured and organized, followed by a consideration of the character of internal representations used in thinking and remembering.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1505X/Y.18, 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27 (with a grade of B- or better)

CROSS-LISTING: PSYO 2130.03

NESC 2140 Learning

CREDIT HOURS: 3

Lectures focus on several goals: (1) providing general principles of learning; (2) understanding the behaviour of particular species; (3) direct application to human problems. Emphasis is on understanding why researchers in animal learning do what they are currently doing (given the goals and the historical context).

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1505X/Y.18, 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27 (with a grade of B- or better)

CROSS-LISTING: PSYO 2140.03

NESC 2150 Perceptual Processes

CREDIT HOURS: 3

Perception deals with the way in which our senses provide us with information about our environment. This course focuses on the process by which sensory experiences are coded, how they are interpreted by the nervous system, and how experience modifies perception.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1505X/Y.18, 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27, or BIOL 1010.03 or 1020.03 and BIOL 1011.03 or 1021.03 (with a grade of B- or better)

CROSS-LISTING: PSYO 2150.03

EXCLUSIONS: NESC/PSYO 3005.03

NESC 2160 Animal Behaviour

CREDIT HOURS: 3

Using concepts from behavioural biology and psychology, animal behaviourists attempt to explain why animals behave the way they do. The course examines topics such as mating and social systems, mate choice, the evolution of behaviour, and animal communication. The behaviour of a wide range of animals is studied.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1505X/Y.18, 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27, or BIOL 1010.03 or 1020.03 and BIOL 1011.03 or 1021.03 (with a grade of B- or better)

CROSS-LISTING: PSYO 2160.03

NESC 2470 Systems Neuroscience

CREDIT HOURS: 3

This course provides an introduction to the functional systems of the brain. We examine neural systems (e.g., the sensory systems, motor system, neurotransmitter-specific systems) individually. We explore their anatomy and function, neurobiological properties that make each unique, and factors that are common to all neural systems (e.g., development and plasticity).

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03, or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1505X/Y.18, 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27 or (BIOL 1010.03 or BIOL 1021.03) and (BIOL 1011.03 or BIOL 1021.03) (with a grade of B- or better)

CROSS-LISTING: PSYO 2470.03

RESTRICTIONS: Restricted to students registered in Neuroscience or Psychology Major or Honours programs.

EXCLUSIONS: PSYO 2770.03

NESC 2570 Cellular Neuroscience

CREDIT HOURS: 3

This course explores the brain at the neuronal level. Material covered includes: the ionic basis of resting potentials; the electrical activity of neurons; synaptic transmission and plasticity; synthesis and action of synaptic transmitters; and drug actions. Cellular phenomena relevant to healthy and neurologically-dysfunctional systems are also discussed.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1505X/Y.18, 1515X/Y.36, 1520X/Y.30, 1540X/Y.27, or BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03 (with a grade of B- or better)

CROSS-LISTING: PSYO 2570.03, PHYL 2570.03

NESC 3000X/Y Independent Research in Neuroscience

CREDIT HOURS: 6

Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in NESC 2007.03 or PSYO 2000.03, a high level of performance in other Neuroscience courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. SIGNATURE REQUIRED

COORDINATOR: J. Christie

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab

LAB HOURS PER WEEK: 4

PREREQUISITE: PSYO 2000.03 or NESC 2007.03 or NESC/PSYO 2470.03, PSYO 2501.03 or STAT 2080.03, and previous or concurrent enrolment in two other NESC/PSYO 3000-level courses, and Coordinator's consent.

CROSS-LISTING: PSYO 3000X/Y.06

EXCLUSIONS: NESC/PSYO 3001.03

NESC 3001 Directed Project in Neuroscience

CREDIT HOURS: 3

Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in NESC 2007.03 or PSYO 2000.03, a high level of performance in other Neuroscience courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. SIGNATURE REQUIRED

COORDINATOR: J. Stamp

NOTES: This course provides only a half-year research experience. Students wanting a full-year research experience in a lab should register for NESC 3000X/Y.06

FORMAT: Lab

LAB HOURS PER WEEK: 4

PREREQUISITE: PSYO 2000.03 or NESC 2007.03 or NESC/PSYO 2470.03, PSYO 2501.03 or STAT 2080.03, and previous or concurrent enrolment in two other NESC/PSYO 3000-level courses, and Coordinator's consent.

CROSS-LISTING: PSYO 3001.03

EXCLUSIONS: NESC/PSYO 3000X/Y.06

NESC 3010X/Y Advanced General Psychology

CREDIT HOURS: 6

An active learning course for suitably-qualified senior students. Students complete a series of oral and written assignments designed to consolidate critical thinking and communication skills in Psychology/Neuroscience. After instructional training, assignments include preparing and delivering lab material to a small group (approximately 30) of PSYO 1011.03 and 1012.03 students. SIGNATURE REQUIRED

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture| Lab| Seminar

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, advanced courses in Psychology or Neuroscience, and instructor's consent.

CROSS-LISTING: PSYO 3010X/Y.06

NESC 3043 Neurobiology of Learning

CREDIT HOURS: 3

This course examines the neurobiological processes underlying various forms of learning such as classical and operant conditioning, song learning by birds, spatial learning, and fear conditioning. Different methods used to study the neurobiology of learning, and the evolutionary origins of these systems are also considered.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and one of NESC/PSYO 2140.03 or NESC/PSYO 2470.03 or PSYO 2770.03

CROSS-LISTING: PSYO 3043.03

NESC 3044 Laboratory Methods of Learning and Conditioning

CREDIT HOURS: 3

A hands-on course on techniques used to test learning and memory in animals, including operant conditioning and spatial memory, and an exposure to the neurobiological systems involved. Students work in pairs to conduct a series of experiments, analyze data as a class, but write individual laboratory reports on each experiment.

NOTES: Students should be aware that some data collection occurs outside of class time.

FORMAT: Lab

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and one of NESC/PSYO 2140.03 or NESC/PSYO 2470.03 or PSYO 2770.03

CROSS-LISTING: PSYO 3044.03

EXCLUSIONS: PSYO 3042.03

NESC 3051 Sensory Neuroscience I Vision

CREDIT HOURS: 3

This course examines the neural basis for the perception of light, colour, movement, depth, and form. The course covers developmental events important for vision, and the extent to which vision is constrained by anatomical and physiological development.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, NESC/PSYO 2470.03 or PSYO 2770.03, and NESC/PSYO 2150.03

CROSS-LISTING: PSYO 3051.03

NESC 3052 Sensory Neuroscience II Hearing and Speech

CREDIT HOURS: 3

This course explores hearing at levels that include stimulus parameters and their psychophysical correlates, middle ear function, cochlear biophysics, central auditory neurophysiology, and principles of speech perception. We emphasize mechanisms of normal hearing and speech, but address pathology wherever it helps us understand the relation between neurophysiology and perception.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and NESC/PSYO 2470.03
CROSS-LISTING: PSYO 3052.03

NESC 3131 Research Methods in Attention

CREDIT HOURS: 3

The methods, findings, and theories that underpin our understanding of attention (alertness, preparation, selection, and control of information processing) are covered. Behavioural and neuroscientific evidence as well as computational models are examined in the lectures. Laboratories emphasize behavioural methods used to isolate and reveal the components of attention.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and NESC/PSYO 2130.03 or NESC/PSYO 2150.03

CROSS-LISTING: PSYO 3131.03

EXCLUSIONS: NESC/PSYO 3130.06

NESC 3132 Research Methods in Visual Cognition

CREDIT HOURS: 3

Visual cognition is the study of how we extract meaning from our visual environment and use it to direct our behaviour. Emphasis is placed on object, face, and word recognition as revealed by normal behaviour, and by neuroimaging techniques and neuropsychological studies of brain-damaged individuals who have lost these recognition abilities.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and NESC/PSYO 2130.03 or NESC/PSYO 2150.03

CROSS-LISTING: PSYO 3132.03

EXCLUSIONS: NESC/PSYO 3130.06

NESC 3133 Research Methods in Memory

CREDIT HOURS: 3

This course examines human memory from the perspective of cognitive psychology and, to a lesser extent, cognitive neuroscience. Lectures emphasize cognitive approaches to the study of memory with an explicit focus on empirical research methods, data, and interpretation of results.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and NESC/PSYO 2130.03

CROSS-LISTING: PSYO 3133.03

EXCLUSIONS: NESC/PSYO 3130.06

NESC 3134 Research Methods in Psycholinguistics

CREDIT HOURS: 3

Provides hands-on experience with various methodologies employed in the study of language processing, and uses these to explore topics in psycholinguistics in greater depth. Methods covered may include reaction time, priming, self-paced reading, computational modeling, corpus-based research, and event-related brain potentials. Students serve as experimenters and participants in class experiments.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and NESC/PSYO 3190.03

CROSS-LISTING: PSYO 3134.03

EXCLUSIONS: NESC/PSYO 3130.06

NESC 3137 Research Methods in Cognitive Neuroscience

CREDIT HOURS: 3

An overview of neuroimaging and other techniques of cognitive neuroscience (including fMRI, ERP, and others) focusing on how they work, how they are applied, and their inherent limitations. Labs include experience collecting and analyzing ERP data, demonstrations of fMRI scanning, and analysis of fMRI data.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and NESC/PSYO 2130.03

CROSS-LISTING: PSYO 3137.03

NESC 3161 Measuring Behaviour

CREDIT HOURS: 3

Measuring behaviour is essential in the study of ethology, behavioural neuroscience, developmental, social and clinical psychology. The function of this laboratory course is to teach methods of observing and scoring behavior using qualitative and quantitative methods. Sampling methods, behaviour description and analysis will be done in laboratory and naturalistic settings.

FORMAT: Lab

PREREQUISITE: PSYO 2000.03 or NESC 2007.03

CROSS-LISTING: PSYO 3161.03

NESC 3162 Advanced Animal Behaviour: Theories and Applications

CREDIT HOURS: 3

This course focuses on advanced theories and applications of animal behaviour, with a focus on proximate, integrative and applied questions. It offers a more in-depth analysis of topics covered in NESC/PSYO 2160.03 and explores trends and issues in contemporary ethology, animal psychology and behavioural ecology.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007 or BIOL 3062.03 or BIOL 3630.03, and NESC/PSYO 2160.03

CROSS-LISTING: PSYO 3162.03

NESC 3165 Neuroethology

CREDIT HOURS: 3

Neuroethology explores how assemblies of neurons work together to produce behaviour. Neural control of selected behaviours from a wide range of animals, both invertebrate and vertebrate, are examined. From this comparative perspective an attempt is made to tease out common themes in the physiological control of behaviour. NOTES: All experiments in the accompanying lab involve insects. Students are required to handle insects during the lab.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 2

PREREQUISITE: NESC/PSYO 2160.03 or BIOL 3062.03; and NESC/PSYO 2570.03 or BIOL 3078.03 and BIOL 3079.03 or MARI 3074.03 and MARI 3076.03; and PSYO 2000.03 or NESC 2007.03 or one of following Biology courses: 2003.03, 2004.03, 2020.03, 2030.03, 2060.03

CROSS-LISTING: PSYO 3165.03

NESC 3170 Hormones and Behaviour

CREDIT HOURS: 3

How chemical signals of the neural, endocrine, and immune systems interact to influence the brain and behaviour. How neurotransmitters, cytokines, and hormones control neural and behavioural development, sexual, aggressive, and maternal behaviour. Hormone receptors in the brain, reproduction, puberty, brain sex differences, and stress are also examined.

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and either NESC/PSYO 2470.03 or PSYO 2770.03, or BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03 (with a grade of B- or better)

CROSS-LISTING: PSYO 3170.03

EXCLUSIONS: NESC/PSYO 2170.03

NESC 3180 Psychoneuroimmunology/Ecological Immunology

CREDIT HOURS: 3

Our behaviour can influence how well we resist disease, and infection can alter behaviour. This course examines how immune systems and nervous systems interact in both vertebrates and invertebrates. Evolutionary forces that have led to the existence of these interactions are also examined.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and either NESC/PSYO 2470.03 or PSYO 2770.03 or MICI 2100.03; OR BIOL 2020.03

CROSS-LISTING: PSYO 3180.03

NESC 3190 Psycholinguistics

CREDIT HOURS: 3

Explores the cognitive and neural bases of human language processing. Topics include: human language and other communication systems; phonology; morphology; semantics; syntax; discourse; first and second language acquisition; relationship of language to general cognitive functions such as music and mathematics; signed languages such as American Sign Language, and non-linguistic gesture.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and NESC/PSYO 2130.03

CROSS-LISTING: PSYO 3190.03

EXCLUSIONS: NESC/PSYO 2190.03

NESC 3227 Principles of Human Neuropsychology

CREDIT HOURS: 3

Clinical neuropsychologists study the organization of cognitive, emotional, and social functions in the brain to understand how brain damage alters human behaviour across the lifespan. We examine how clinicians diagnose and rehabilitate persons with brain diseases and disorders. Assignments emphasize application of textbook/lecture-based knowledge, critical thinking, and group presentation skills.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and NESC/PSYO 2470.03 or PSYO 2770.03; NESC/PSYO 2130.03 is helpful

CROSS-LISTING: PSYO 3227.03

NESC 3237 Drugs and Behaviour

CREDIT HOURS: 3

An introduction to behavioural psychopharmacology. The lectures involve basic anatomy, physiology, and chemistry of the nervous system. Behavioural effects and underlying mechanisms of various psychoactive drugs are discussed. Specific topics covered are alcohol, tobacco, amphetamines, cocaine, opiates, hallucinogens, tranquilizers, and antipsychotic drugs.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and one of NESC/PSYO 2470.03, NESC/PSYO 2570.03, or PSYO 2770.03

CROSS-LISTING: PSYO 3237.03

NESC 3260 Biological Rhythms

CREDIT HOURS: 3

Daily (circadian) clocks generate rhythms in many functions, including sleep, reproduction, and intellectual performance. This course examines the nature of these biological clocks, their neural mechanisms, and their roles in regulating sleep and other aspects of physiology and in pathological conditions, including sleep disorders, jet lag, and psychiatric disorders.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, or BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, and NESC/PSYO 2470.03 or PSYO 2770.03

CROSS-LISTING: PSYO 3260.03

NESC 3264 The Science of Sleep

CREDIT HOURS: 3

This course reviews the history, methods and results of the scientific study of sleep. Topics include: circadian and homeostatic regulation; developmental and cultural impacts; normal and abnormal function of neural and other control mechanisms; effects of sleep loss on performance and health; theories of the functions of sleep.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and either NESC/PSYO 2470.03 or PSYO 2770.03; OR BIOL 2020.03

CROSS-LISTING: PSYO 3264.03

NESC 3270 Developmental Neuroscience

CREDIT HOURS: 3

This course presents the fundamentals of development in complex and simple nervous systems. Cell differentiation, pattern regulation, proliferation, migration, and circuit development are discussed. Special attention is given to later developmental events such as neuronal growth cones, cell death, growth factors, neuron-target interactions, and synapse formation.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, NESC/PSYO 2470.03 and NESC/PSYO 2570.03

CROSS-LISTING: PSYO 3270.03

NESC 3370 Neuroscience Laboratory I

CREDIT HOURS: 3

Introduction to several neurophysiological techniques used in contemporary neuroscience, employing extracellular and intracellular electrical recording and stimulation methods on nervous system preparations, both sensory and motor. After introductory instruction, students in groups of 2 or 3 get to perform quite sophisticated practical experiments themselves, enabled by computer-based data acquisition.

FORMAT: Lab

LAB HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, NESC/PSYO 2470.03 and 2570.03, or NESC/PSYO 3270.03

CROSS-LISTING: PSYO 3370.03

NESC 3371 Neuroscience Laboratory II

CREDIT HOURS: 3

Introduction to several techniques used in contemporary neuroscience. Students work under supervision in groups of 2 or 3 in regular labs that introduce neuroanatomical analyses using the following: Golgi impregnation, immunocytochemistry, dye-tracing of connections, electronmicroscopy of the retina, and neurotransmitter determinations using HPLC.

FORMAT: Lab

LAB HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, NESC/PSYO 2470.03 and 2570.03, or NESC/PSYO 3270.03

CROSS-LISTING: PSYO 3371.03

NESC 3440 Neuroanatomy

CREDIT HOURS: 3

This is a survey of the structure and function of the human central nervous system (CNS, the brain and spinal cord). The laboratory component provides the opportunity to dissect the human brain and to study the microscopic anatomy of the CNS. This course provides the lecture and laboratory component for the graduate course ANAT 5100 Human Neuroanatomy. ORGANIZER: W. Baldrige

FORMAT: Lecture| Lab

PREREQUISITE: BIOL 2020.03 or permission of the instructor

NESC 3670 Genes, Brain and Behaviour

CREDIT HOURS: 3

The application of genetic techniques to the study of cognitive abilities, psychopathology, personality disorders, stress-related illnesses, and ethical issues in genetic research. The role of genetic factors in eating and drug abuse problems, as well as methods used to study gene-environment interactions are explored.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NESC/PSYO 2470.03 or PSYO 2770.03, AND BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03 or SCIE 1505X/Y.18, SCIE 1515X/Y.36, SCIE 1520X/Y.30, or SCIE 1540.27 (with a grade of B or better); BIOL 2020.03 and BIOL 2030.03 are useful

CROSS-LISTING: PSYO 3670.03

EXCLUSIONS: NESC/PSYO 2670.03

NESC 3770 Behavioural Neuroscience

CREDIT HOURS: 3

Behavioural neuroscience explores the neural and hormonal mechanisms underlying a variety of behavioural phenomena. The course focuses on neural correlates of social and emotional behaviour, motor behaviour and patterns, and behavioural toxicology processes (neurotoxins and endocrine disruptors).

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and NESC/PSYO 2470.03 or PSYO 2770.03

CROSS-LISTING: PSYO 3770.03

NESC 3775 Behavioural Neuroscience Laboratory

CREDIT HOURS: 3

Students motivated to pursue a career in Neuroscience, or in a related biomedical discipline, gain direct experience studying the nervous system in relation to behaviour. Students acquire skills in animal handling, ethics, and measuring behaviour. Emphasis is placed on histological/molecular analysis of the brain including examining protein and/or mRNA levels. SIGNATURE REQUIRED

FORMAT: Lab

PREREQUISITE: PSYO 2000.03 or NESC 2007, NESC 2470.03/PSYO 2470.03 or PSYO 2770.03, PSYO 2501.03 or STAT 2080.03, and one of NESC

2160.03/PSYO 2160.03 or NESC 3237.03 /PSYO 3237.03 or NESC 3770.03/PSYO 3770.03, and instructor's consent
CROSS-LISTING: PSYO 3775.03

NESC 3790 Neurolinguistics

CREDIT HOURS: 3

The course covers: (1) brain damage and language disorders; (2) aphasia; (3) localization of lesions in the human brain; (4) neuroimaging; (5) intracranial electric stimulation experiments; (6) event-related brain potential experiments; (7) PET, fNMR scan experiments; (8) neural models of language processing.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NESC/PSYO 2470.03 or PSYO 2770.03

CROSS-LISTING: PSYO 3790.03

NESC 3970 Molecular Neuroscience

CREDIT HOURS: 3

This course examines the development, function, and pathology of the brain at the molecular level. Model systems are examined from the perspective of ion channels, messengers, receptors, intracellular signaling cascades, transcription factors, and genes. The concepts underlying basic cellular and molecular neuroscience tools are emphasized.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: NESC/PSYO 2570.03

CROSS-LISTING: PSYO 3970.03

NESC 4000 Senior Seminar

CREDIT HOURS: 3

An individually tailored reading or study course designed to allow Honours students to focus on a particular issue, or a set of related issues, that are not part of the regular program. Enrolment is contingent upon securing a faculty member to supervise the study program. SIGNATURE REQUIRED

COORDINATOR: J. Stamp

FORMAT: Seminar

CROSS-LISTING: PSYO 4000.03

NESC 4007 Contemporary Issues in Neuroscience

CREDIT HOURS: 3

This is a seminar course that focuses on a significant theme or topic in the research literature in Neuroscience. Topics vary from year to year. Consult the department for the details about course content. SIGNATURE REQUIRED

FORMAT: Seminar

PREREQUISITE: NESC Honours student, permission of the instructor.

NESC 4050 Topics in Perception

CREDIT HOURS: 3

SIGNATURE REQUIRED

FORMAT: Seminar

PREREQUISITE: NESC/PSYO 3051.03 or instructor's consent

CROSS-LISTING: PSYO 4050.03

NESC 4070 Chemical Neurobiology

CREDIT HOURS: 3

The goal is to acquaint the student with neurotransmitters (excitatory amino acids, acetylcholine, monoamines, neuropeptides). Anatomical, biochemical, physiological, pharmacological, behavioral, and clinical aspects of individual neurotransmitter systems are discussed. Lectures are given by the instructors. Students are expected to write an examination and a review, and give a presentation.

FORMAT: Seminar

PREREQUISITE: NESC/PSYO 2470.03 and 2570.03, or NESC/PSYO 3270.03, or instructor's consent

CROSS-LISTING: NESC 5070.03

NESC 4130 Topics in Human Information Processing

CREDIT HOURS: 3

SIGNATURE REQUIRED

FORMAT: Seminar

CROSS-LISTING: PSYO 4130.03

NESC 4160 Topics in Behavioural Biology

CREDIT HOURS: 3

SIGNATURE REQUIRED

FORMAT: Seminar

CROSS-LISTING: PSYO 4160.03

NESC 4170 Topics in Behavioural Neuroendocrinology

CREDIT HOURS: 3

SIGNATURE REQUIRED

FORMAT: Seminar

CROSS-LISTING: PSYO 4170.03

RESTRICTIONS: Restricted to NESC/PSYO Honours Students

NESC 4177 Theoretical Neuroscience

CREDIT HOURS: 3

An introduction to basic concepts and research questions in computational neuroscience. This includes cellular mechanisms such as spike generation and synaptic plasticity, network-level concepts such as perceptrons and associative attractor networks, and system-level concepts such as memory, learning and anticipation. This course includes an introduction to MATLAB programming. SIGNATURE REQUIRED

FORMAT: Seminar

PREREQUISITE: Intended for third- or fourth-year Neuroscience students.

NESC 4185 Current Advances in Synaptic Function and Plasticity

CREDIT HOURS: 3

Key recent research studies in cellular and system neurophysiology are presented and critically discussed. Emphasis is placed on plasticity, synaptic function, excitability, dendritic integration, neural networks and relevant advances in experimental methods. Newly published papers within these areas are reviewed weekly, followed by a more extensive critique of two publications.

FORMAT: Seminar

PREREQUISITE: NESC 2570/PHYL 2570 or permission of course instructors

CROSS-LISTING: PHYL 4000.03

NESC 4230 Human Performance Topics

CREDIT HOURS: 3

SIGNATURE REQUIRED

FORMAT: Seminar

CROSS-LISTING: PSYO 4230.03

NESC 4374 Introduction to Pharmacology I

CREDIT HOURS: 3

See course description for PHAC 5406.03, in the Pharmacology section of the calendar.

NESC 4376 Introduction to Pharmacology II

CREDIT HOURS: 3

See course description for PHAC 5409.03, in the Pharmacology section of the calendar.

NESC 4500X/Y Honours Thesis

CREDIT HOURS: 6

Under a staff member's supervision, each student conducts original research in experimental neuroscience. Students meet to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. SIGNATURE REQUIRED

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: Fourth-year Honours students, and instructor's consent

CROSS-LISTING: PSYO 4500X/Y.06

RESTRICTIONS: Restricted to Honours students in their graduating year

NESC 4740 Topics in the Neurobiology of Learning and Memory

CREDIT HOURS: 3

SIGNATURE REQUIRED

FORMAT: Seminar

PREREQUISITE: NESC/PSYO 2470.03, NESC/PSYO 2140.03

CROSS-LISTING: PSYO 4740.03

Ocean Sciences

Location:

Building/Room: Life Sciences Centre

Street Address 1: Department of Oceanography

Street Address 2: 1355 Oxford Street

P.O. Box: 15000

Halifax, NS B3H 4R2

Telephone: (902) 494-3557

Fax: (902) 494-3877

Website: www.dal.ca/oceanography

Email Address: oceanography@dal.ca

Introduction

Ocean Sciences includes the study of the physics, biology, geology, chemistry, and meteorology of the marine environment. Topic areas include ocean currents, waves, tides, marine sediments, oceanic crustal structure, nutrient cycling, acoustics, ocean-atmosphere coupling, biological production, marine biodiversity, and seawater properties, among others. Students enrolled in the Ocean Sciences program will be educated in the core oceanographic sub-disciplines of physical, geological, chemical, and biological oceanography, while also being exposed to issues in marine policy, law, and management. Graduates of the Ocean Sciences program will have gained an appreciation of the interdisciplinary and collaborative approaches often required to arrive at effective solutions to environmental problems relating to the oceans. They will have developed strong quantitative and practical skills, as well as a breadth of knowledge across ocean science disciplines. Ocean scientists are employed in research laboratories, universities, government agencies, and private industry. Career paths include environmental prediction, environmental monitoring and assessment, marine technology, marine surveying, marine resource use and extraction, and marine conservation.

NOTE: Not all courses are offered every year. Please consult the current timetable for this year's offerings.

Degree Programs

The Department of Oceanography offers the following degree programs in Ocean Sciences:

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- Minor in Ocean Sciences

Programs in Oceanography available only to fourth year students:

- Combined Honours: Oceanography
- Double Major: Oceanography

* May be combined with Minor programs from other disciplines

NOTE: There is no 90 credit hour (3 year) degree program in Ocean Sciences.

Departmental Requirements for these programs are described below. In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Ocean Sciences undergraduate academic advisor.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Ocean Sciences program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1530.27
- SCIE 1540.27, MATH 1000.03/MATH 1010.03 and PHYC 1300.06 or PHYC 1310.03/PHYC 1320.03
- SCIE 1505.18, Option A or B (MATH 1000.03/MATH 1010.03, PHYC 1300.06 or PHYC 1310.03/PHYC 1320.03)

Ruddick, B. R., BSc (UVic), PhD (MIT)
Smith, J., BSc (McGill), MA (Chicago), PhD (Toronto)

BSc (120 credit hour) Concentrated Honours in Ocean Sciences

Students who want a challenging program that results in a broad and in-depth background in Ocean Sciences, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Ocean Sciences with a minimum GPA of 3.3 and write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of OCEA 4200.06.

Admission to Honours

Students considering Honours should consult with an Ocean Sciences Honours Advisor early in their studies.

Departmental Requirements

In addition to fulfilling the requirements outline in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Concentrated Honours program in Ocean Sciences must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03 or PHYC 1300.06
- MATH 1000.03/MATH 1010.03
- MATH 1060.03/STAT 1060.03
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03, CHEM 1011.03/CHEM 1012.03, EARTH 1080.03/ERTH 1090.03

OR Integrated Science Program (options above)

A "B+" average (3.3) must be attained in the following 2000, 3000, and 4000 level courses.

2000 level

- OCEA 2000.06 or OCEA 2001.03/OCEAN 2002.03 (minimum grade of "B")
- OCEA 2020.03/OCEA 2021.03 (minimum grade of "B")

3000 and 4000 level

- OCEA 3003.03
- A minimum of six credit hours each from three of the four Ocean Science areas (18 credit hours total). See Ocean Science Areas below.
- One additional six credit hours from any of the four Ocean Science areas.
- OCEA 3001.03 or OCEA 4120.03 must be included in one of the preceding two requirements.
- OCEA 4000.03
- OCEA 4401.03/OCEA 4402.03

- OCEA 4200.06

BSc (120 credit hour) Combined Honours in Ocean Sciences and another subject

Students who wish to study Ocean Sciences in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Ocean Sciences may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Ocean Sciences, this requirement is satisfied through OCEA 4200.06.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc or BA Combined Honours program in Ocean Sciences and another subject must complete the following:

Ocean Sciences as the primary subject

1000 level

- PHYC 1190.03/PHYC 1290.03 or PHYC 1300.06
- MATH 1000.03/MATH 1010.03
- MATH 1060.03/STAT 1060.03
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03, CHEM 1011.03/CHEM 1012.03, EARTH 1080.03/ERTH 1090.03

OR Integrated Science Program (options above)

A “B+” average (3.3) must be attained in the following 2000-, 3000- and 4000- courses.

2000 level

- OCEA 2000.06 or OCEA 2001.03/OCEA 2002.03 (minimum grade of "B")
- OCEA 2020.03/OCEA 2021.03 (minimum grade of "B")

3000 and 4000 level

- OCEA 3003.03
- OCEA 3001.03 or OCEA 4120.03
- Six credit hours selected from: OCEA 3002.03, OCEA 4110.03, OCEA 4140.03
- An additional nine credit hours from the Ocean Science areas. See Ocean Science Areas (below).
- OCEA 4000.03
- OCEA 4401.03/OCEA 4402.03
- OCEA 4200.06

Ocean Sciences as the secondary subject

1000 level

- PHYC 1190.03/PHYC 1290.03 or PHYC 1300.06
- MATH 1000.03
- MATH 1060.03/STAT 1060.03
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03, CHEM 1011.03/CHEM 1012.03, EARTH 1080.03/ERTH 1090.03

OR Integrated Science Program (options above)

A “B+” average (3.3) must be attained in the following 2000-, 3000- and 4000- courses.

2000 level

- OCEA 2000.06 or OCEA 2001.03/OCEA 2002.03
- OCEA 2020.03/OCEA 2021.03

3000 and 4000 level

- OCEA 3003.03
- A minimum of six credit hours each from three of the four Ocean Sciences areas (18 credit hours total). See Ocean Sciences areas (below).
- OCEA 4000.03

BSc (120 credit hour) Major in Ocean Sciences

The 120 credit hour Major is suited to students who want to focus on Ocean Sciences, but wish to have a program that is somewhat less constrained than the Honours program. Ocean Science Majors complete a minimum of 42 credit hours in OCEA courses. Research and other experiential learning opportunities are available through laboratories, special topics and experiential courses.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Major program in Ocean Sciences must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03 or PHYC 1300.06
- MATH 1000.03/MATH 1010.03
- MATH 1060.03/STAT 1060.03
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03, CHEM 1011.03/CHEM 1012.03, EARTH 1080.03/ERTH 1090.03

OR Integrated Science Program (options above)

2000 level

- OCEA 2000.06 or OCEA 2001.03/OCEA 2002.03
- OCEA 2020.03/OCEA 2021.03

3000 and 4000 level

- OCEA 3003.03
- A minimum of six credit hours each from three of the four Ocean Science areas (18 credit hours total). See Ocean Science Areas (below).
- OCEA 4000.03
- OCEA 4401.03/OCEA 4402.03

BSc or BA (120 credit hour) Double Major in Ocean Sciences and another subject

The Double Major degree program allows students to combine a study of Ocean Sciences with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Ocean Sciences may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students must fulfill the requirements listed for the BSc (120 credit hour) Major in Ocean Sciences.

The Ocean Science course requirements for students in a Double Major program, with Ocean Sciences as the primary or secondary subject, are the same as for the Major program (above).

Minor in Ocean Sciences

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Ocean Sciences courses at the 2000 level or higher.

Please note that there are prerequisite requirements for entry into upper level Ocean Sciences courses (see Department of Oceanography course listings).

Ocean Science Areas

NOTE: Classes marked with an asterisk* are required in that area.

Physical Oceanography

OCEA 3001.03 and/or OCEA 4120.03*, OCEA 4210.03, OCEA 4220.03, OCEA 4222.03, OCEA 4311.03, OCEA 4411.03, OCEA 4412.03, OCEA 4505.03, OCEA 4520.03, OCEA 4541.03, OCEA 4550.03

Biological Oceanography

OCEA 4140.03*, OCEA 4160.03, OCEA 4230.03, OCEA 4330.03, OCEA 4335.03, OCEA 4370.03, OCEA 4380.03

Chemical Oceanography

OCEA 3002.03*, OCEA 3420.03 (NOTE: this course may fulfill a three credit hour requirement in either this Ocean Science Area or the Geological Oceanography Ocean Science Area, but not both), OCEA 4130.03, OCEA 4595.03

Geological Oceanography

OCEA 3004.03, OCEA 3420.03 (NOTE: this course may fulfill a three credit hour requirement in either this Ocean Science Area or the Chemical Oceanography Ocean Science Area, but not both), OCEA 4110.03*, OCEA 4115.03, OCEA 4470.03, OCEA 4480.03

See Oceanography section for course descriptions.

Combined Honours: Oceanography

Available to students in their fourth year.

Combined Honours Program: Marine Biology/Oceanography

Oceanography is intended to be the second honours subject and Marine Biology is intended to be the primary honours subject. The requirements for a combined honours program in Marine Biology/Oceanography are that the students take a minimum of 66 credit hours beyond 1000-level in the two subjects with not more than 54 nor fewer than 30 in either. Core Biology requirements for the current Marine Biology Program (e.g. 1000-3000 level courses in the Calendar) are unchanged. Other courses currently required by the Marine Biology Program in Chemistry, Mathematics, and Statistics are unchanged; however, the Oceanography Department strongly recommends completion of higher level mathematics and statistics courses.

To fulfill the requirements for the combined program, students will take 12 credit hours from required courses listed below. In addition, students will need to choose a minimum of 12 elective credit hours either from the required courses or elective listed below to complete the program. Finally, students working with faculty in Oceanography or Marine Biology on their honours research would be required to enroll in BIOL 4900.06 as well as BIOL 8880.00.

Required Courses

- OCEA 2000X/Y.06: The Blue Planet
- OCEA 2800.03: Climate Change
- OCEA 3001.03: Introduction to Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 3003.03: Introduction to Biological Oceanography
- OCEA 3004.03: The Last Billion Years
- OCEA 4140.03: Biological Oceanography
- BIOL 4900.06: Honours Thesis/Project
- BIOL 8880.00: Honours Qualifying Examination

Electives

- OCEA 3420.03: Geochemistry of Aquatic Environments
- OCEA 4000.03: Oceans and Global Change
- OCEA 4160.03: Fisheries Oceanography
- OCEA 4230.03: Biology of Phytoplankton
- OCEA 4330.03: Benthic Ecology
- OCEA 4331.03: History of Marine Sciences
- OCEA 4335.03: Environmental Impacts in Marine Ecosystems
- OCEA 4370.03: Deep Sea Biology
- OCEA 4380.03: Marine Modelling

Combined Honours Program: Chemistry/Oceanography

Oceanography is designated as the second subject of the Combined Honours Degree. At least 69 credit hours beyond the 1000 level are required in Chemistry and Oceanography/Related Sciences. CHEM 2101.03, CHEM 2201.03, CHEM 2301.03, CHEM 2302.03, CHEM 2401.03, and CHEM 2402.03 must be part of this combined honours program and must be passed with a grade of C or better.

The additional 48 credit hours must be chosen in consultation with the two departments involved, specifically the Honours Student Advisor in Chemistry and the Undergraduate Coordinator in Oceanography before registering in the combined program. Students should also consult the handbook "Undergraduate Studies in Chemistry" for more information.

Courses for Combined Honours with Oceanography degree.

Required marked with an asterisk (*).

First Year

- *CHEM 1011.03 + CHEM 1012.03: Concepts in Chemistry I & II or CHEM 1021.03 + CHEM 1022.03: Engineering Chemistry I & II
- *MATH 1000.03 + MATH 1010.03: Differential and Integral Calculus I & II
- *PHYC 1100.06 or PHYC 1300.06: Intro or Physics in and Around You
- *Writing Course - Language or Humanities
- *Social Science

2000 level courses (chemistry)

- *CHEM 2101.03 + CHEM 2201.03: Intro. Inorganic + Intro. Analytical
- *CHEM 2301.03 + CHEM 2304.03: Thermodynamics + Kinetics and Dynamics

- *CHEM 2401.03/CHEM 2402.03: Organic Chemistry

3000 and 4000 level courses (chemistry)

- *CHEM 3201.03: Spectroscopy & Separations
- *CHEM 4205.03: Chemometrics
- Three courses from CHEM 31XX, 33XX, 34XX, 4304†
- *CHEM 4901‡: Honours Research Project

Oceanography and related courses

- *OCEA 2000.06: The Blue Planet
- OCEA 2800.03: Climate Change
- EARTH 2400.03: Marine Geoscience
- *OCEA 3001.03: Introduction to Physical Oceanography
- *OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 3003.03: Introduction to Biological Oceanography
- OCEA 3004.03: The Last Billion Years
- OCEA 3420.03: Geochemistry of Aquatic Environments
- *OCEA 4130.03: Chemical Oceanography
- OCEA 4331.03: History of Marine Sciences
- OCEA 4520.03: Introduction to Atmospheric Sciences
- OCEA 4595.03: Atmospheric Chemistry
- *OCEA 4200.06: Honours Research Project

† - CHEM 4205 is not taught every year; students may need to take it in the third year of their program.

‡ Students will conduct their Honours thesis work as OCEA 4200, but will defend their project in the Chemistry Department as part of CHEM 4901

1 - students are required to take EARTH 1080 + EARTH 1090 first

2 - students are required to take OCEA 3001 and OCEA 3002 first

3 - Students are required to take EARTH 1080 + EARTH 1090 first

4 - students are advised to take EARTH 1080 + EARTH 1090 first

5 - as available

6 - students are advised to take OCEA 4520 first

7 - students are required to take OCEA 4130 first

Students must take a total of nine credit hours of non-required CHEM courses and six credit hours of non-required OCEA and related courses.

In addition, six credit hours from MATH 2001 + MATH 2002 (calculus), or MATH 1060 + MATH 2080 (stats).

Recommended other courses (please review prerequisites):

- BIOL 1000, BIOL 3060, BIOL 4068
- EARTH 1080 + EARTH 1090, EARTH 1040 + EARTH 1050, EARTH 2410
- MATH 1400, 2001-2202, 2030-2300, 3110-3120-3260

Note: in the future, we could be adding a Methods and Instruments course and a Isotope Chemistry course

Combined Honours Program: Earth Sciences/Oceanography

Oceanography is designated as the second subject of the Combined Honours Degree. As a minimum, students must choose 66 credit hours beyond 1000-level in the two subjects with not more than 54 nor fewer than 30 in either; at a maximum, students will choose 78 credit hours beyond 1000-level in two subjects with not more than 54 nor fewer than 24 in either.

Four Required Oceanography Credits taken from:

- OCEA 2000.06: The Blue Planet
- OCEA 2800.03: Climate Change
- OCEA 3001.03: Introduction to Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 3004.03: The Last Billion Years
- OCEA 3420.03: Geochemistry of the Aquatic Environments

- OCEA 4110.03: Geological Oceanography
- OCEA 4331.03: History of Marine Sciences
- OCEA 4470.03: Introduction to Seismic Imaging
- OCEA 4200.06: Honors Thesis *

*Students registered for this course must take instruction in thesis writing along with students registered in EARTH 4200.06

These Oceanography credits must be combined with core Earth Sciences courses, which constitute 30 credit hours:

- EARTH 2000.015: Field School
- EARTH 2001.03: Earth Materials Science I
- EARTH 2002.03: Earth Materials Science II
- EARTH 2050.03: Principles of Geophysics I
- EARTH 2110.03: Field Methods
- EARTH 2203.03: Sediments and Sedimentary Rocks
- EARTH 2205.03: Introduction to Palaeontology
- EARTH 3000.015: Computer Camp
- EARTH 3140.03: Structural Geology
- EARTH 3303.03: Stratigraphy
- EARTH 4000.00: Advanced Field School (NB: 0 credit hours)
- EARTH 4350.03: Tectonics

Additional EARTH credit hours will be chosen from the following list so that the total of OCEA and EARTH courses is between 66 and 78 credit hours.

- EARTH 2400.03: Marine Geosciences (recommended)
- EARTH 3010.03: Igneous Petrology
- EARTH 3020.03: Metamorphic Petrology
- EARTH 3302.03: Quaternary Sedimentary Environments
- EARTH 3500.03: Exploring GIS
- EARTH 4152.03: Fossil Fuels
- EARTH 4270.03: Applied Geophysics
- EARTH 4430.03: Quaternary Dating and Palaeoclimatology
- EARTH 4502.03: Micropalaeontology and Global Change
- EARTH 4520.03: GIS Applications to Environmental
- EARTH 4530.03: Environmental Remote Sensing

Combined Honours Program: Mathematics/Oceanography

Mathematics is intended to be the primary honours subject and Oceanography the second subject. The requirements for a combined honours program in Mathematics/Oceanography are that the students take a minimum of 66 and a maximum of 84 credit hours beyond the 1000 level in the two subjects with not more than 54 nor fewer than 30 in each. Oceanography courses must be chosen in consultation with the Honours Project advisors.

Required Courses

- MATH 2001.03/MATH 2002.03: Intermediate Calculus
- MATH 2030.03/MATH 2135.03: Linear Algebra
- MATH 2505.03: Analysis
- One of:
 - MATH 3030.06: Abstract Algebra or
 - MATH 3500.06: Analysis
- Six credit hours in MATH at 4000 level.
- OCEA 2000.06: The Blue Planet
- OCEA 3001.03: Introduction to Physical Oceanography
- Plus MATH 4950 or OCEA 4200 (Honours Research Project)

Recommended Mathematics Courses

- MATH 2120.03/MATH 3120.03: Differential Equations
- MATH 3210.03: Introduction to Numerical Analysis
- MATH 4220.03/MATH 4230.03: Partial Differential Equations

Remaining Oceanography Electives Should Be Chosen From:

- OCEA 2800.03: Climate Change
- OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 3003.03: Introduction to Biological Oceanography
- OCEA 3004.03: The Last Billion Years
- OCEA 4110.03: Geological Oceanography
- OCEA 4140.03: Biological Oceanography
- OCEA 4160.03: Fisheries Oceanography
- OCEA 4210.03: Time Series Analysis in Oceanography and Meteorology
- OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans
- OCEA 4221.03: Ocean Dynamics
- OCEA 4222.03: Estuary, Coast and Shelf Dynamics
- OCEA 4250.03: Acoustical Oceanography
- OCEA 4290.03: Advanced Chemical Oceanography
- OCEA 4311.03: Fluid Dynamics I
- OCEA 4335.03: Environmental Impacts in Marine Ecosystems
- OCEA 4380.03: Marine Modelling

Combined Honours Program: Physics/Oceanography

Oceanography is designated as the second subject of the Combined Honours Degree. At least 66 credit hours beyond the 1000 level are required in Physics and Oceanography. The additional 54 credit hours must be chosen in consultation with the two departments involved, specifically the Honours Student Advisor in Physics and the Undergraduate Coordinator in Oceanography, before registering in the combined program.

Required Physics courses are:

2000 level:

- PHYC 2140.03: Physics Tools: Theory
- PHYC 2150.03: Physics Tools: Experiment.
- PHYC 2515.03: Modern Physics
- PHYC 2510.03: Electricity and Magnetism.

3000 level:

- PHYC 3000.03/PHYC 3010.03: Experimental Physics
- PHYC 3200.03: Thermodynamics
- PHYC 3210.03: Statistical Mechanics
- PHYC 3590.03: Advanced Classical Mechanics
- PHYC 3540.03: Optic and Photonics

4000 level:

- PHYC 4800.03/PHYC 4850.03 two Honours Projects*
- PHYC 4160.03: Math Methods in Physics
- PHYC 4100.03: Electrodynamics.

Other required courses as dictated by pre-requisites for the different physics courses offered:

- CHEM 1011.03/CHEM 1012.03: Concepts in Chemistry I/II
- MATH 1000.03/MATH 1010.03: Differential and Integral Calculus I/II
- MATH 2001.03/MATH 2002.03: Intermediate Calculus I/II
- MATH 2030.03: Matrix Theory and Linear Algebra I and (MATH 2135.03: Linear Algebra or MATH 2300.03: Mathematical Modelling I or MATH 2400.03: Introduction to Numerical Computing)
- MATH 3110.03/MATH 3120.03: Differential Equations I/II

A six credit hour course in scientific computer programming (e.g. PHYC 2050: Computer Simulations in Science) is recommended to be taken before the end of the second year.

* the 2nd honours projects (PHYC 4850) can be a continuation of the first one (PHYC 4800). The projects need to have a strong oceanographic component, with a supervisor or co-supervisor chosen from the faculty members in the Department of Oceanography.

The Oceanography component is comprised of the following courses:

Required Oceanography Courses:

- OCEA 2000X/Y.06 or OCEA 2001A/OCEA 2002B: The Blue Planet
- OCEA 4120.03: Physical Oceanography
- OCEA 4311.03: Fluid Dynamics I

The following courses are available to fill the remaining OCEA credits*:

- OCEA 4130.03: Chemical Oceanography
- OCEA 4210.03: Time Series Analysis in Oceanography and Meteorology
- OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans
- OCEA 4221.03: Ocean Dynamics
- OCEA 4222.03: Estuary, Coast and Shelf Dynamics
- OCEA 4250.03: Acoustical Oceanography
- OCEA 4520.03: Introduction to Atmospheric Science
- OCEA 5680.03: Ecosystem Modelling of Marine and Freshwater Environments (cross-listed as ENGM 4680)

* Students are responsible for fulfilling all pre-requisite courses or obtaining the permission of the instructor to enroll. Students in the program must consult regularly with the Undergraduate Coordinator in each Department.

Combined Honours Program: Statistics/Oceanography

Oceanography is designated as the second subject of the Combined Honours Degree. As a minimum, students must choose 66 credit hours beyond the 1000 level in two subjects, with not more than 54 nor fewer than 30 credit hours in either. At a maximum, the student will choose 84 credit hours beyond the 1000 level in two subjects, with no more than 54, nor fewer than 30 in either. Oceanography courses must be chosen in consultation with the Honours Project supervisors.

Required Oceanography Credits taken from:

- OCEA 2000.06: The Blue Planet (or equivalently OCEA 2001.03/OCEA 2001.03)
- OCEA 3001.03: Introduction to Physical Oceanography

Elective Oceanography courses¹ taken from the following list so that the total number of OCEA credits is at least four.

- OCEA 2800.03: Climate Change
- OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 3003.03:² Introduction to Biological Oceanography
- OCEA 3004.03: The Last Billion Years
- OCEA 4110.03: Geological Oceanography
- OCEA 4140.03:² Biological Oceanography
- OCEA 4160.03: Fisheries Oceanography
- OCEA 4210.03/ STAT 4390.03: Time Series Analysis in Oceanography and in Meteorology
- OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans
- OCEA 4221.03: Ocean Dynamics
- OCEA 4222.03: Estuary, Coast and Shelf Dynamics
- OCEA 4250.03: Acoustical Oceanography
- OCEA 4311.03: Fluid Dynamics I
- OCEA 4330.03: Benthic Ecology
- OCEA 4335.03: Environmental Impacts in Marine Ecosystems
- OCEA 4370.03: Deep Sea Biology
- OCEA 4380.03: Marine Modelling

Required Statistics/Mathematics Courses

- MATH 2001.03: Intermediate Calculus I

- MATH 2002.03: Intermediate Calculus II
- MATH 2030.03: Matrix Theory and Linear Algebra I
- MATH 2040.03: Matrix Theory and Linear Algebra II
- STAT 2050.03: Exploratory Data Analysis
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory

At least two half courses chosen from:

- STAT 4066.03: Advanced Statistical Theory I
- STAT 4350.03: Applied Multivariate Analysis
- STAT 4620.03: Data Analysis
- STAT 4390.03/OCEA 4210.03: Time Series Analysis I

Elective Statistics/Mathematics courses taken from the following list so that the total of OCEA and STAT credit hours is at least 66.

- MATH 3110.03: Differential Equations
- STAT 3345.03: Environmental Risk Assessment
- STAT 4066.03: Advanced Statistical Theory I
- STAT 4350.03: Applied Multivariate Analysis
- STAT 4620.03: Data Analysis
- STAT 4390.03/OCEA 4210: Time Series Analysis I

Either

- OCEA 4200.06:³ Honours Thesis or
- STAT 4950.03:³ Honours Research Project

¹ - Students should be aware of prerequisites or permissions needed for any of these courses.

² - Only one of OCEA 3003 and OCEA 4140 can be counted towards the Combined Honours degree. OCEA 3003 is currently given in the summer session.

³ - Students in the program must have co-supervisors in each Department, unless the advisor is Cross- or Joint-Appointed or holds Adjunct status in the other Department.

Note: Cross-listed courses can only be counted once for the fulfillment of degree requirements.

Double Major: Oceanography

Available to students in their fourth year.

Students should follow the requirements for a Combined Honours program (see sub-sections above), but replace the Honours thesis with other MARI/OCEA, CHEM/OCEA, EARTH/OCEA, MATH/OCEA, PHYS/OCEA, STAT/OCEA courses.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Ocean Sciences

Minor programs allow students to develop subject specialities in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc programs

Students in a BSc program in Ocean Sciences may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Ocean Sciences, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

OCEA 1000X/Y Conversations with Ocean Scientists

CREDIT HOURS: 6

Students engage with working ocean scientists about their research, its relevance, and how to communicate science to different audiences. In addition to regular writing exercises that include journaling, blogging, and lab reporting, students compose a research paper and follow it through the process of submission and peer-review for an in-class journal.

FORMAT: Lecture| Tutorial

COREQUISITE: MATH 1000.03 or MATH 1215.03 and STAT 1060.03

OCEA 2000X/Y The Blue Planet

CREDIT HOURS: 6

This course provides a general survey of oceanography. It is designed to develop an understanding of the ocean and of the science of oceanography. Students learn about the geological, chemical, physical and biological processes at work in the sea. Consideration is also given to human impacts.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. The exception is for Marine Biology Co-op students, who can enroll in OCEA 2001X.03 and OCEA 2002Y.03 in non-consecutive terms if their program demands conflict with a full year enrollment.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

EXCLUSIONS: OCEA 2001.03/2002.03, OCEA 2850.06, OCEA 2851.03/2852.03

OCEA 2001 The Blue Planet I

CREDIT HOURS: 3

This course provides a general survey of oceanography. It is designed to develop an understanding of the ocean and of the science of oceanography. Students learn about the geological, chemical, physical and biological processes at work in the sea. Consideration is also given to human impacts.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. The exception is for Marine Biology Co-op students, who can enroll in OCEA 2001X.03 and OCEA 2002Y.03 in non-consecutive terms if their program demands conflict with a full-year enrollment.

EXCLUSIONS: OCEA 2000.06, OCEA 2850.06, OCEA 2851.03/2852.03

OCEA 2002 The Blue Planet II

CREDIT HOURS: 3

This course provides a general survey of oceanography. It is designed to develop an understanding of the ocean and of the science of oceanography. Students learn about the geological, chemical, physical and biological processes at work in the sea. Consideration is also given to human impacts.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms. The exception is for Marine Biology Co-op students, who can enroll in OCEA 2001X.03 and OCEA 2002Y.03 in non-consecutive terms if their program demands conflict with a full-year enrollment.

OCEA 2020 Tools and Concepts in Ocean Sciences I

CREDIT HOURS: 3

Students gain practical insights oceanographic concepts introduced in OCEA 2000.06 through lab exercises. Labs focus on instruments, building/calibration a sensor,

ocean optics and acoustics, mapping and remote sensing, particle dynamics, ocean oxygen and pH. Labs involve data acquisition and analyses to develop quantitative skills. Some familiarity with 'R' programming is recommended.

FORMAT: Lab

LAB HOURS PER WEEK: 3

COREQUISITE: OCEA 2000.06 (or OCEA 2001.03/2002.03); or permission of instructor.

PREREQUISITE: MATH 1000.03; STAT 1060.03; PHYC 1280/1290.03 (or PHYC 1300.06); at least 1 credit from BIOL 1010/1011 or (BIOL 1020.03/1021.03), or CHEM 1011.03/1012.03, EARTH 1080.03/1090.03 ; or permission of instructor.

OCEA 2021 Tools and Concepts II

CREDIT HOURS: 3

Following OCEA 2020.03, students gain additional practical insight through lab exercises. Labs again involve various instruments with the focus on ocean nutrients, convection, waves, Coriolis effect, primary and secondary production and biomass, production modeling, and an Aquatron mesocosm study. Additional data acquisition and analyses in 'R' will further enhance quantitative skills.

FORMAT: Lab

LAB HOURS PER WEEK: 3

COREQUISITE: OCEA 2000.06 (or OCEA 2001.03/2002.03); or permission of instructor

PREREQUISITE: OCEA 2020.03

OCEA 2800 Climate Change

CREDIT HOURS: 3

See course description for PHYC 2800.03 in the Physics and Atmospheric Science section of this calendar.

CROSS-LISTING: PHYC 2800.03, GEOG 2800.03

EXCLUSIONS: ECON2850.06, PHYC2850.06

OCEA 3001 Introduction to Physical Oceanography

CREDIT HOURS: 3

This course introduces Ocean Physics, focusing on issues of interest to undergraduates in ocean-related disciplines. The approach is to bind facts together with ideas, often starting with thought experiments and proceeding to simple mathematical models.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: OCEA 2000.06 (or OCEA 2001.03/2002.03); OCEA 2020.03; OCEA 2021.03; or permission of Instructor

EXCLUSIONS: OCEA 3170

OCEA 3002 Introduction to Chemical Oceanography

CREDIT HOURS: 3

This course provides students with a basic understanding of the composition of seawater and the processes that leads to this composition. This understanding is both qualitative and quantitative through the use of thermodynamic, kinetic and box models to describe the balances that produce the observed chemical distributions.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 1011.03 and CHEM 1012.03 or equivalents, and OCEA 2000.06 (or OCEA 2001.03/2002.03); OCEA 2020.03; OCEA 2021.03; or permission of instructor

EXCLUSIONS: OCEA 3170

OCEA 3003 Introduction to Field Oceanography

CREDIT HOURS: 3

This course explores interrelationships between living organisms in the sea and the ocean environment. Biological processes are introduced in the context of the physical and chemical oceanography. The emphasis is on sea-going field work on day trips in local marine waters and hands-on laboratory investigation.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: OCEA 2000

CROSS-LISTING: MARI 3003.03, BIOL 3003.03

OCEA 3004 The Last Billion Years

CREDIT HOURS: 3

This course examines major events in Earth history. The geological evidence of major events will be described, and the hypothesized causes of the events will be examined. The goal of this course is to develop on the part of students an understanding of the functioning of the earth/ocean/atmosphere system.

PREREQUISITE: OCEA 2000X/Y or EARTH 1080

OCEA 3420 Geochemistry of Aquatic Environments

CREDIT HOURS: 3

This course is an introduction to the governing principles and processes of aquatic geochemistry. Specific topics will include physical chemistry of natural waters, kinetics of geochemical reactions, the hydrologic cycle, the carbonate system and pH, redox reactions, weathering and mineral-solution equilibria, controls on the composition of rainwater, rivers, and oceans.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: CHEM 1011.03/1012.03 or equivalent and EARTH 1080.03/1090.03

CROSS-LISTING: EARTH 3420.03

OCEA 3685 Gulf of Eilat Ecosystem

CREDIT HOURS: 3

Introduction to physical, chemical, and biological oceanography, marine geology, biogeochemistry, and coral-reef biology. Focus is on subtropical seas, the coral reef ecosystem, and the unique characteristics of the Gulf of Eilat. Lectures, laboratories, demonstrations, field trips, exam, group field research projects in the sea, oral presentation, and scientific research paper.

NOTES: This is a field course given at the Eilat Ocean Studies Centre in Israel. Entry is restricted and requires submission of an application form

FORMAT: Lecture| Lab

PREREQUISITE: OCEA 2000, STAT 1060, permission of instructor

CROSS-LISTING: MARI 3685.03

OCEA 4000 Oceans and Global Change

CREDIT HOURS: 3

This course examines the role and response of the Oceans to global change, including alterations in currents and circulation, increases in sea level and storm surges, changes in ocean chemistry, modification to the types and patterns of sediment deposition, alterations in the abundances and distributions of organisms, and overall productivity. The course will discuss means of predicting these changes and their effects.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: OCEA 3001.03, OCEA 3002.03, OCEA 4110.03, OCEA 4140.03 or permission of Instructor

OCEA 4110 Geological Oceanography

CREDIT HOURS: 3

This course is intended to give a broad survey of topics in marine geology and geophysics. The course content covers recent methods and observations with quantitative applications to an understanding of geophysical and geological processes. Some topics covered are: plate tectonics; seismic, heat flow, gravity, and magnetic methods; patterns and processes of sediment transport and deposition.

NOTES: Some laboratory exercises may augment the lectures. Third year and honours undergraduates will be admitted by consent of the instructor. No previous background in Geology or Geophysics is required.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: OCEA 2000.06 (or OCEA 2001.03/2002.03); OCEA 2020.03; OCEA 2021.03; or permission of instructor.

CROSS-LISTING: OCEA 5110.03, EARTH 4110.03

OCEA 4115 Micropaleontology and Global Change

CREDIT HOURS: 3

See course description for EARTH 4502 in the Earth Sciences section of this calendar.

CROSS-LISTING: EARTH 4502.03

OCEA 4120 Physical Oceanography

CREDIT HOURS: 3

This course introduces undergraduate students to the physical properties and dynamics of the oceans. Topics range from global circulation down to the small scales of turbulence. Fact and theory are blended throughout. Quantitative problem solving is emphasized in assignments.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 1000.03, MATH 1010.03, classic calculus or equivalent, and permission of the instructor

CROSS-LISTING: OCEA 5120.03

RESTRICTIONS: Third- and fourth-year students only

OCEA 4130 Chemical Oceanography

CREDIT HOURS: 3

This course covers the major and minor constituents of sea water, the controls on its chemical composition, nutrient cycling, gas exchange and the influence of the oceans on atmospheric chemistry. Other topics included are chemical tracers, and radiochemical dating methods, stable isotope studies, chemical speciation and chemical models of sea water.

FORMAT: Lecture| Lab

LECTURE HOURS PER WEEK: 3

PREREQUISITE: OCEA 2000, OCEA 3002 or instructor's consent

CROSS-LISTING: OCEA 5130.03

OCEA 4140 Biological Oceanography

CREDIT HOURS: 3

The goal is to describe how physical, chemical and biological processes interact to determine the species composition, biogeochemical activities, and trophic structure of marine communities. Outstanding problems currently facing biological oceanographers and earth systems scientists are discussed, as are current attempts and methodologies to address them.

NOTES: Biological oceanography is a quantitative science and extensive problem solving is required. Students should be competent in mathematics through calculus.

Permission of instructor is required.

PREREQUISITE: OCEA 2000.06 (or OCEA 2001.03/2002.03); OCEA 2020.03; OCEA 2021.03; or permission of instructor

CROSS-LISTING: OCEA 5140.03, BIOL 4661.03, 5661.03, MARI 4661.03

OCEA 4160 Fisheries Oceanography

CREDIT HOURS: 3

Oceanographic influences on ecology of marine fish: on population dynamics, distribution, abundance, reproduction, life history, feeding, growth, metabolism, mortality, and recruitment. Emphasis on contemporary hypotheses and primary literature and some on fishery management. Primary-publication-style research paper required. Competence with fundamental population dynamics, ecology, physical oceanography, mathematics, and statistical analyses expected.

FORMAT: Lecture| Tutorial

LECTURE HOURS PER WEEK: 3

PREREQUISITE: OCEA 2000.06 or 2001.03 or 2002.03, BIOL 2060.03 and/or 3067.03 or equivalent. MATH/STAT 1060.03 and/or 2080.03 or equivalent or instructor's consent.

CROSS-LISTING: BIOL 4369.03, MARI 4369.03, OCEA 5160.03

OCEA 4200X/Y Honours Research

CREDIT HOURS: 6

This course is required for students enrolled in the Concentrated Honours in Ocean Sciences, and certain streams of the Combined Honours in Oceanography program. It consists of a research project under the supervision of a faculty member, and should include an original component in oceanography. Students are required to participate in weekly meetings of the class and make a presentation (oral or poster) at the annual CDOGS meeting in March.

NOTES: Credit can only be given for this course if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: Permission given by instructor.

OCEA 4210 Time Series Analysis in Oceanography and Meteorology

CREDIT HOURS: 3

This course describes the application of advanced time series analysis in oceanography and meteorology. Time and frequency domain approaches are covered. Students will develop their own computer programs to analyze real observations. Specific topics include stationarity, auto and cross covariance functions, power and cross spectra, and state space models.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Instructor's consent

CROSS-LISTING: STAT 4390.03/5390.03, OCEA 5210.03

OCEA 4220 Numerical Modelling of Atmospheres and Oceans

CREDIT HOURS: 3

This course discusses numerical modelling techniques for simulating atmospheric and oceanic circulations. Material includes: review of governing equations; finite difference, finite element, and spectral methods; Eulerian, semi-implicit and semi-Lagrangian time integration techniques; accuracy and stability analyses; data assimilation and ensemble prediction methods; and boundary treatment for ocean models.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: 1000-level calculus course and instructor's consent

CROSS-LISTING: OCEA 5220.03

OCEA 4221 Ocean Dynamics

CREDIT HOURS: 3

An advanced course for students in Physical Oceanography and Atmospheric Science that studies the basic equations governing rotating geophysical flows, plus applications. Topics include geostrophy, conservation of potential vorticity, quasi-geostrophic dynamics, geostrophic adjustment, response to surface forcing (steady and unsteady).

CROSS-LISTING: OCEA 5221.03

OCEA 4222 Estuary, Coast and Shelf Dynamics

CREDIT HOURS: 3

This course discusses the physical processes that operate on continental shelves to create long waves, tides, tidal mixing, thermohaline circulation, wind forcing, upwelling, etc. Both observations and models for these processes are discussed.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: OCEA 4120.03

CROSS-LISTING: OCEA 5222.03

OCEA 4230 Biology of Phytoplankton

CREDIT HOURS: 3

This class presents the phytoplankton in the context of their evolutionary history and ecological diversity, with an emphasis on their adaptations and acclimation to different environments and their role in food webs and in biogeochemical cycling.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Instructor's consent

CROSS-LISTING: BIOL 4662.03, OCEA 5230.03, MARI 4662.03

OCEA 4250 Acoustical Oceanography

CREDIT HOURS: 3

This class covers the basic theory of sound propagation and scattering in the ocean environment, and the applications to acoustic remote sensing of the ocean interior. Topics include: normal modes; ray theory; scattering from particles, bubbles and biota; sonar theory and operation.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 2001.03 and 2002.03 or equivalent and instructor's consent

CROSS-LISTING: OCEA 5250.03

OCEA 4290 Advanced Chemical Oceanography

CREDIT HOURS: 3

This course presents research topics in chemical oceanography, taught as 3-4 self-contained modules. Examples include, the oceanic CO₂ system and its relation to climate change, chemical reactions in sediments, photochemistry in the upper ocean, and inferring the chemistry of ancient oceans through the isotope record in sediments.

PREREQUISITE: Students will have completed all required 3000 level courses in Oceanography, OCEA 4130, and have the consent of the instructor of this course.

CROSS-LISTING: OCEA 5290.03

RESTRICTIONS: Open only to students enrolled in the combined Honours in Chemistry and Oceanography

OCEA 4311 Fluid Dynamics I

CREDIT HOURS: 3

An introduction to the theory of fluid dynamics, with some emphasis on geophysically important aspects. Contents: tensor mathematics, flow kinematics, equations of

motion, viscous flow, potential flow, convection, turbulence, and basic aerodynamics. Occasional reference will be made to current research topics, especially those in Physical Oceanography.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Intended for first-year graduate students in physical oceanography, but graduate students or senior undergraduates in Mathematics or Physics are invited to take it (subject to instructor approval)

CROSS-LISTING: PHYC 4311.03, PHYC 5311.03, OCEA 5311.03

OCEA 4330 Benthic Ecology

CREDIT HOURS: 3

A graduate/fourth year undergraduate course on major problems of benthic ecology, such as food supply to benthic animals, and geomicrobiological processes in sediments. Classes consist of two lectures per week and one journal paper discussion session. The last three weeks of the course are devoted to a class research project.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Instructor's consent

CROSS-LISTING: BIOL 4666.03, OCEA 5330.03, MARI 4666.03

OCEA 4331 History of Marine Sciences

CREDIT HOURS: 3

In this course, we will trace the history of marine sciences from the ancients to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped human understanding of the oceans.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: Instructor's consent

CROSS-LISTING: BIOL 4664.03, OCEA 5331.03, SCIE 4001.03, HIST 3073.03, HSTC 3331.03, MARI 4664.03

OCEA 4335 Environmental Impacts in Marine Ecosystems

CREDIT HOURS: 3

Consideration of various activities in marine environments, with focus on ecosystem level influences: dispersion, elemental fluxes, benthic impacts, food webs, biodiversity. Simulation modelling of ecosystems is undertaken using Simile OOP software. Classes include lectures, modelling examples, and discussion of research papers. Course requirements consist of problem sets and modelling project.

FORMAT: Lecture

COREQUISITE: BIOL 2060.03, MATH 1000.03, STAT 1060, or permission of the instructor.

CROSS-LISTING: OCEA 5335.03, BIOL 4335.03, MARI 4335.03

OCEA 4370 Deep Sea Biology

CREDIT HOURS: 3

We focus on the biology of organisms inhabiting the deep sea: physiological adaptations to the physicochemical and geological environment; spatial and temporal distributions of biological assemblages; and regulatory factors of these assemblages, such as currents, food availability, reproduction and recruitment. Also, we delve into unique habitats, such as hydrothermal vents.

PREREQUISITE: BIOL 2060.03 and OCEA 2000.06

CROSS-LISTING: BIOL 4370.03, MARI 4370.03, OCEA 5370.03

OCEA 4380 Marine Modelling

CREDIT HOURS: 3

This course provides a survey of modelling techniques applied to physical, biological and biogeochemical problems in oceanography. Lecture material covers the philosophy of modelling, dimensional analysis, parameterization of various processes, numerical approaches to solving differential equations, etc. Students are given the opportunity to study topics of particular interest to them.

FORMAT: Lecture

LECTURE HOURS PER WEEK: 3

PREREQUISITE: MATH 1000.03; MATH 1010.03; OCEA 2020.03; OCEA 2021.03; or permission of instructor

CROSS-LISTING: OCEA 5380.03

OCEA 4401 Marine Management I

CREDIT HOURS: 3

This course exposes students with a marine science background to the increasing need for marine scientists and ocean managers and policy makers to work collaboratively to address the interdisciplinary nature of the problems confronting the world's oceans. This course is restricted to 4th year students with a marine science background.

FORMAT: Lecture

PREREQUISITE: OCEA 2000.06 (or OCEA 2001.03/2002.03)

RESTRICTIONS: Restricted to 4th year students

OCEA 4402 Marine Management II

CREDIT HOURS: 3

Students focus on the linkages between ocean governance and ocean science to understand the role of marine science in informing and influencing decisions affecting coastal and marine space and resources at multiple geographic and jurisdictional scales. This course is restricted to 4th year students with a marine science background.

PREREQUISITE: OCEA 2000.06 (or OCEA 1002.03/2002.03)

OCEA 4411 Atmospheric Dynamics I

CREDIT HOURS: 3

See course description for PHYC 4411.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITE: PHYC 2140.03, or instructor's consent

CROSS-LISTING: OCEA 5411.03, PHYC 4411.03/5411.03

OCEA 4412 Atmospheric Dynamics II

CREDIT HOURS: 3

See course description for PHYC 4412.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITE: OCEA 4411.03/5411.03 or PHYC 4411.03/5411.03, or instructor's consent

CROSS-LISTING: OCEA 5412.03, PHYC 4412.03/ PHYC 5412.03

OCEA 4470 Introduction to Seismic Imaging

CREDIT HOURS: 3

See course description for EARTH 4470.03 in the Earth Sciences section of this calendar.

PREREQUISITE: EARTH 3270.03, or instructor's consent

CROSS-LISTING: OCEA 5470.03, EARTH 4470.03/5470.03

OCEA 4480 Advanced Seismic Imaging

CREDIT HOURS: 3

See course description for EARTH 4480.03 in the Earth Sciences section of this calendar.

PREREQUISITE: EARTH 4470.03, or instructor's consent

CROSS-LISTING: EARTH 4480.03, EARTH 5480.03, OCEA 5480.03

OCEA 4505 Atmospheric Physics

CREDIT HOURS: 3

See course description for PHYC 4505.03 in the Physics & Atmospheric Science section of this calendar.

CROSS-LISTING: OCEA 5505, PHYC 4505/5505

OCEA 4520 Introduction to Atmospheric Science

CREDIT HOURS: 3

See course description for PHYC 4520.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITE: PHYC 2140.03, or instructor's consent

CROSS-LISTING: OCEA 5520.03, PHYC 4520.03/5520.03

OCEA 4541 Synoptic Meteorology I

CREDIT HOURS: 3

See course description for PHYC 4540.03 in the Physics and Atmospheric Science section of this calendar.

COREQUISITE: OCEA 4411.03

PREREQUISITE: At least one third-year Physics course

CROSS-LISTING: OCEA 5541.03, PHYC 4541.03/5541.03

OCEA 4550 Synoptic Meteorology II

CREDIT HOURS: 3

See course description for PHYC 4550.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITE: OCEA 4541.03, or PHYC 4540

CROSS-LISTING: OCEA 5550.03, PHYC 4550.03/5550.03

OCEA 4595 Atmospheric Chemistry

CREDIT HOURS: 3

See course description for PHYC 4595.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITE: PHYC 2140.03 and a first-year chemistry course

CROSS-LISTING: OCEA 5595.03, PHYC 4595.03, PHYC 5595.03, CHEM 4595.03

Introduction

How does the world work? What are the rules that govern how things happen? These are the questions that intrigue physicists who try to explain the great diversity of nature with the fewest and simplest hypotheses. They discover that there are underlying similarities between things that look very different on the surface. Good physicists have the imagination to see these similarities, coupled with the understanding of the fundamentals of their science to determine the rules that govern the universe. Our programs are designed to allow you to learn physics in a systematic manner and understand how physics applies to the world around us.

Physicists are employed in many areas in universities, government departments and industry and are valued for their ability to discover and apply fundamental insights to a variety of situations.

This intellectual rigor can be applied in many fields beyond physics including meteorology, engineering, education, law, medicine, dentistry, health sciences, and business. Because practicing physicists often have knowledge of several fields, we have a number of combined programs with other science disciplines to provide that broader approach.

Our Honours program is our most comprehensive program aimed at those intending to become career physics specialists. Our various major and combined programs described below provide the opportunity to pursue a broad education in both physics and other areas.

First Year Courses

There are three first year courses. PHYC 1450.06 is a general interest course for BA students and is not acceptable as a prerequisite for further courses in physics. PHYC 1190.03/PHYC 1290.03, and PHYC 1300.06 both give a general introduction to physics, but each has its own particular approach and selection of topics.

PHYC 1190.03/PHYC 1290.03 is primarily for students intending to make a study of a physical science or engineering; it has regular labs, occasional tutorials, uses calculus, and is accepted as a prerequisite for advanced physics courses. Nova Scotia Grade XII Physics or its equivalent is a prerequisite. It is recommended that PHYC 1190/PHYC 1290 be taken consecutively, but PHYC 1190 is not a prerequisite for PHYC 1290.

PHYC 1300.06 is an introductory course which is oriented towards the health sciences and is primarily intended for students in biology, pre-medicine, pre-dentistry and allied health sciences. The course incorporates labs and tutorials, and is accepted as a prerequisite for advanced physics courses when MATH 1000.03 and MATH 1010.03 are taken concurrently. It is a good preparation for the Medical College Admission Test (MCAT). Nova Scotia Grade XII Physics or its equivalent is highly recommended.

Students who participate in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Physics program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1530.27
- SCIE 1505.18, Option A or B

Second Year Courses

There are four 2nd year core physics courses (PHYC 2140, PHYC 2150, PHYC 2510, PHYC 2515). These courses are also suitable for students in other disciplines who would like to enhance their knowledge of physics. In particular, PHYC 2150 provides an opportunity to gain more laboratory experience, which is extremely valuable in many jobs.

Third and Fourth Year Courses

Not all courses are offered each year. Students should take careful note of the year in which each of these courses is planned to be offered. This information can be found at the department website <http://www.physics.dal.ca>

Prizes are awarded to the top students in each year of the program. Please refer to Awards.

Degree Programs

The Department of Physics and Atmospheric Science offers the following degree programs in Physics

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Major combined with a Diploma in Meteorology*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit) Minor in Physics
- Minor in Physics
- One year Diploma in Meteorology

* BSc Co-op option available

* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Physics undergraduate academic advisor.

Staff

Dean

Moore, C. L., BA, PhD (Cantab)

Chair of Department and George Munro Professor

Rotermund, H. H. (902 494-2342)

Undergraduate Advisor

Kreplak, L. (902 494-8435) UGPhysicsAdvisor@dal.ca

Graduate Coordinator

Hewitt, K. (902 494-2315) kevin.hewitt@dal.ca

Coordinator, Atmospheric Science

Drummond, J. R. (902 494-2324) james.drummond@dal.ca

Coordinator, Diploma in Meteorology

Folkins, I. (902 494-1292) ian.folkins@dal.ca

Co-op Academic Advisor

Labrie, D. (902 494-2322) daniel.labrie@dal.ca

Professors Emeriti

Jericho, M. H., BSc, MSc (Dalhousie), PhD (Cantab), FRSC

Kreuzer, H. J., MSc, DSc (Bonn), FRSC - A.C. Fales Professor of Theoretical Physics

Stroink, G., BSc, MSc (Delft), PhD (McGill), PEng

Professors Research

Geldart, D. J. W., BSc (Acadia), PhD (McMaster), FRSC - Research

Kreuzer, H. J., MSc, DSc (Bonn), FRSC - A.C. Fales Professor of Theoretical Physics

Professors

Chapman, S. C., BSc, MSc, PhD (UBC)

Dahn, J. R., BSc (Dalhousie), MSc, PhD (UBC), FRSC, NSERC/3M Canada Inc. Industrial Research Chair, Canada Research Chair in Materials for Batteries and Fuel Cells, cross appointment with Chemistry

Drummond, J. R., BA, MA, PhD (Oxford), FRSC - Canada Research Chair, Remote Sounding of Atmospheres

Dunlap, R. A., BS (Worcester), AM (Dart), PhD (Clark), Director, Institute for Research in Materials; cross appointment with College of Sustainability

Geldart, D. J. W., BSc (Acadia), PhD (McMaster), FRSC - Research

Hill, I. G., BSc, PhD (Queen's)

Martin, R. V., BS (Cornell), MS, PhD (Harvard), Killam Professor, cross appointment with Environmental Programs, Chemistry

Rotermund, H. H., PhD (Berlin), George Munro Professor of Physics

Rutenberg, A. D., BSc (Toronto), PhD (Princeton)

White, M. A., BSc (Western), PhD (McMaster), FRSC, University Research Professor, primary appointment with Chemistry

Zwanziger, J. W., BA (Chicago), PhD (Cornell), Canada Research Chair in NMR Studies of Materials, primary appointment with Chemistry

Associate Professors

Duck, T., BSc, PhD (York)

Folkins, I., BSc (Dalhousie), MSc, PhD (Toronto)

Hall, K. C., MSc, PhD (Toronto), Canada Research Chair, Ultrafast Science

Hewitt, K., BSc (Toronto), PhD (Simon Fraser), P. Phys.

Kelly, R., BSc, MSc (Memorial), PhD (Western)

Kreplak, L., MSc (Supelec), PhD (Univ. Paris XI), cross appointment with Biomedical Engineering

Kyriakidis, J., BSc, MSc (Dalhousie), PhD (Basel)

Labrie, D., BSc (Montreal), MSc, PhD (McMaster)

Maksym, G. N., PhD (McGill), primary appointment in the School of Biomedical Engineering

Monchesky, T., BAsC (Toronto), PhD (Simon Fraser)

Robar, J., MSc (McGill), PhD (UBC), primary appointment with Radiation Oncology

Thomas, C., BSc (SMU), MSc (Dalhousie), PhD (Western Ontario)

Wells, S. M., BSc (Western), PhD (Toronto) (NSERC University Faculty Award), primary appointment with Medicine

Xu, H., BSc (Zhejiang), MSc (Regina), PhD (McMaster)

Assistant Professors

Chang, R. Y. -W., BASc, MASc, PhD (Toronto) Canada Research Chair in Atmospheric Science

Lesins, G. B., PhD (Toronto)

Senior Instructor

Payne, S. H., BSc, PhD (Canterbury)

Instructors

de Vet, S. J., MSc (Dalhousie), PhD (Western)

Adjunct Professors

Azzouz, M., PhD (J. F., France), Physics and Astronomy, Laurentian University

Bennett, J. C., PhD (Waterloo), Physics, Acadia

Beyea, S., PhD (UNB), National Research Council of Canada

Bonev, S. A., MSc (Dalhousie), PhD (Cornell)

Bowen, C., PhD (Western), Institute for Biodiagnostics, NRC

Butler, M., PhD (Caltech), Carleton University
Grabtchak, S., PhD, Department of Physics (UPEI)
Greatbatch, R., BSc (Liverpool), PhD (Cambridge), NSERC/MARTEC/MSC Industrial Research Chair
Hornidge, D., PhD (U of Saskatchewan) Physics, Mount Allison
Kanungo, R., PhD (Calcutta U), Astronomy and Physics, SMU
Pierce, J., BS (Northeastern), PhD (Carnegie Mellon), Colorado State
Ritchie, H. C., MSc, PhD (McGill), Meteorological Service of Canada - Atlantic
Robertson, M., **PhD** (Waterloo), Physics, Acadia
Sarty, A., PhD (U of Saskatchewan) Astronomy and Physics, SMU
Schmidt, P., PhD (Michigan)
Titus, L., BSc (SMU), DMet, MSc (Dalhousie)

Postdoctoral Fellows/Research Associates

Croft, B., PhD (Dalhousie)
Du, Z., PhD (Beihang)
Geddes, J., (U of Toronto)
Hall, D., PhD (U of Ottawa)
Kim, C., PhD (KAIST)
Ma, X., PhD (Florida State)
Nie, M., PhD (U of Rhode Island)
Snider, G., PhD (McGill)
Stevens, D., PhD (Dalhousie)
Tikhomirov, A., DSci (Institute of Atmospheric Optics, St. Petersburg)
Tsehtik, Y., MSc (Mozhaisky Military Space Engineering University)
Topple, J., PhD (McGill)
van Donkelaar, A., PhD (Dalhousie)
Wang, Y., PhD (McMaster)
Xia, J., PhD (Sun Yat-sen)
Xia, Y., PhD (Sun Yat-sen)

BSc or BA (120 credit hour) Concentrated Honours in Physics

Students who want a challenging program resulting in a broad and in-depth background in Physics, including an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in the Physics courses listed below with a minimum GPA of 3.0, and write a research-based Honours thesis. The thesis requirement is satisfied through completion of PHYC 4800.03/PHYC 4850.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Physics.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Physics should consult with a Physics Undergraduate Advisor early in their second year.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Physics must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03 or PHYC 1300.06
- MATH 1000.03/MATH 1010.03
- CHEM 1011.03/CHEM 1012.03

Or Integrated Science Program (options above)

2000 level

- PHYC 2140.03/PHYC 2150.03
- PHYC 2515.03/PHYC 2510.03
- MATH 2001.03/PHYC 2002.03
- MATH 2030.03
- One of MATH 2120.03, MATH 2135.03, MATH 2300.03, MATH 2400.03

3000 and 4000 level

- PHYC 3000.03/PHYC 3010.03
- PHYC 3640.03/PHYC 3590.03
- PHYC 3200.03/PHYC 3210.03
- MATH 3120.03
- PHYC 4151.03
- PHYC 4160.03/PHYC 4100.03
- PHYC 4800.03/PHYC 4850.03 (Honours thesis)
- At least one of PHYC 3050.03, PHYC 3250.03, PHYC 4250.03
- An additional six credit hours of 3000 or 4000 level PHYC courses, other than PHYC 3160.03, PHYC 3170.03, PHYC 3330.03, PHYC 4540.03, PHYC 4550.03

* Up to 30 credit hours of general electives may be chosen from the Faculty of Engineering.

Honours Qualifying Exam

The Honours Qualifying Exam grade is the average of best ten grades obtained in 3000 and 4000 level Honours courses.

BSc or BA (120 credit hour) Combined Honours in Physics and another subject

Students who wish to study Physics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Physics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. In recent years, students have combined Physics with

- Mathematics
- Biology
- Earth Sciences
- Chemistry
- Computer Science
- History of Science and Technology
- Contemporary studies

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Physics, this requirement is satisfied through PHYC 4800.03/PHYC 4850.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Physics as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Physics and another subject must complete the courses listed below. Elective Physics courses should be chosen in consultation with a Physics undergraduate advisor. If courses are not selected carefully, students in a Combined Honours program may not be qualified to enter a regular graduate program in Physics after graduation.

Physics as the primary or secondary subject

1000 level

- PHYC 1190.03/PHYC 1290.03 or PHYC 1300.06
- MATH 1000.03/MATH 1010.03
- CHEM 1011.03/CHEM 1012.03

Or Integrated Science Program (options above)

2000 level

- PHYC 2140.03/PHYC 2150.03
- PHYC 2515.03/PHYC 2510.03
- MATH 2001.03/MATH 2002.03

3000 and 4000 levels

- A minimum of 18 credit hours in PHYC courses at or above the 3000 level, which must include one of PHYC 3050.03, PHYC 3250.03, PHYC 4250.03

If Physics is the primary subject

- An additional six credit hours at or above the 3000 level, which may be PHYC 4800.03/PHYC 4850.03 (Honours thesis)

BSc or BA (120 credit hour) Major in Physics

The 120 credit hour Major is suited to students who want to focus on *Physics*, but wish to have a program that is somewhat less constrained than the Honours program. Physics Majors complete a minimum of 42 credit hours in Physics courses past the 1000 level as listed below. Research and other experiential learning opportunities are available through laboratories, special topics and experiential classes.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Physics.

Departmental requirements

In addition to fulfilling the requirements outline in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Physics must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03 or PHYC 1300.06
- MATH 1000.03/MATH 1010.03
- CHEM 1011.03/CHEM 1012.03

Or Integrated Science Program (options above)

2000 level

- PHYC 2140.03/PHYC 2150.03
- PHYC 2515.03/PHYC 2510.03
- MATH 2001.03/MATH 2002.03
- Six additional physics credit hours at or above the 2000 level

3000 and 4000 level

- A minimum of 24 additional physics credit hours at or above the 3000 level, which must include at least one of PHYC 3050.03, PHYC 3250.03, PHYC 4250.04

BSc (120 credit hour) Major in Physics combined with a Diploma in Meteorology

This is an integrated Physics/Meteorology program. In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03 or PHYC 1300.06
- MATH 1000.03/MATH 1010.03
- CHEM 1011.03/CHEM 1012.03

Or Integrated Science Program (options above)

2000 level

- PHYC 2140.03/PHYC 2150.03
- PHYC 2515.03/PHYC 2510.03
- MATH 2001.03/MATH 2002.03
- MATH 2030.03
- One of MATH 2040.03, MATH 2120.03, MATH 2135.03, MATH 2300.03, MATH 2400.03
- Three additional physics credit hours at or above the 2000 level

3000 level

- PHYC 3050.03 or PHYC 3250.03 or PHYC 3590.03 or PHYC 4311.03
- PHYC 3200.03

4000 level: Meteorology course requirements

- PHYC 4505.03/PHYC 4570.03
- PHYC 4540.03/PHYC 4550.03
- PHYC 4411.03/PHYC 4412.03
- PHYC 4520.03/PHYC 4595.03
- OCEA 4120.03
- OCEA 4220.03 or another three credit hour course approved by Program Coordinator

Students are encouraged to ensure that their program meets the requirements for the 90 credit hour BSc by the end of Year 3.

After completion of the Major in Physics and Diploma in Meteorology program, students are eligible to be considered for admission to a graduate program in Atmospheric Science at Dalhousie.

BSc or BA (120 credit hour) Double Major in Physics and another subject

The Double Major degree program allows students to combine a study of Physics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Physics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Physics as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Physics and another subject must complete the following:

Physics as the primary or secondary subject

1000 level

- PHYC 1190.03/PHYC 1290.03 or PHYC 1300.06 or equivalent
- MATH 1000.03/MATH 1010.03
- CHEM 1011.03/CHEM 1012.03

Or Integrated Science Program (options above)

2000 level

- PHYC 2140.03/PHYC 2150.03
- PHYC 2515.03/PHYC 2510.03

3000 and 4000 levels

- A minimum of 18 credit hours in PHYC courses at or above the 3000 level, which must include one of PHYC 3050.03, PHYC 3250.03, PHYC 4250.03

BSc or BA (90 credit hour) Minor in Physics

The 90 credit hour degree with Minor in Physics is appropriate for students who want to study some Physics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Physics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc in Physics is usually the preferred option for students who wish to combine studies in Physics with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program below). Students with a 90 credit hour BSc in Physics may also want to consider the one year Diploma in Meteorology program.

See the Minor in Physics section of this Calendar.

Minor in Physics

This minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Commerce, Bachelor of Science, Bachelor of Computer Science, Bachelor of Informatics or Bachelor of Management program.

A BSc or BA (90 credit hour) degree program with a Minor in Physics is available to students in the Faculty of Science.

Departmental Requirements

1000 level

- PHYC 1190.03: Introduction to Physics/PHYC 1290.03: Introduction to Physics OR PHYC 1300.06: Physics in and Around You
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus II
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- OR Integrated Science Program

2000 level

- PHYC 2140.03: Physics Tools: Theory
- PHYC 2150.03: Physics Tools: Experiment
- PHYC 2510.03: Electricity and Magnetism
- PHYC 2515.03: Modern Physics
- MATH 2001.03: Intermediate Calculus I
- MATH 2002.03: Intermediate Calculus II

3000 and 4000 levels

- A minimum of 12 credit hours in PHYC courses at or above the 3000 level, which must include one of PHYC 3050.03, PHYC 3250.03, PHYC 4250.03

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Physics

Co-op Academic Advisor: Dr. D. Labrie (daniel.labrie@dal.ca)

Co-operative Education in Science is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Physics, or in Combined Honours or Double Major programs with Physics as the primary subject. The number of students admitted into Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four month prior to the first work term.

Details are available from the Physics Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Physics, please see the departmental webpage www.dal.ca/academics/programs/undergraduate/pas/what_will_i_learn/coop_work_term.html.

Minors available to students in Physics

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Physics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Physics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to student enrolled in a BSc or BA in Physics include:

- Certificate in Information Technology
- Certificate in Materials Science
- Certificate in Science Leadership and Communication

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Physics with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour degree in Physics and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng.

A BSc (Honours Physics)/BEng combination is also possible. Interested students should see an undergraduate advisor from Physics and from the Faculty of Engineering in their first year of study.

Geophysics

For students interested in Geophysics, two options are recommended:

- Combined Honours program in Physics and Earth Sciences,

OR

- Concentrated Honours in Physics
- Elective courses: EARTH 2270.03, EARTH 3270.03, EARTH 4470.03, EARTH 4480.03.

Diploma in Meteorology

Students with a general 90 credit hour BSc degree in Physics, Mathematics, Chemistry, or other quantitative disciplines, may apply for admission into a one year Diploma in Meteorology program, provided they have completed the appropriate Physics and Mathematics courses. A strong background in Physics and Mathematics is necessary, and courses taken should cover Vector Calculus and differential equations. More information on the Diploma in Meteorology program is available at http://atm.dal.ca/Diploma_in_meteorology/.

Course requirements

- PHYC 4505.03/PHYC 4570.03
- PHYC 4540.03/PHYC 4550.03
- PHYC 4411.03/PHYC 4412.03
- PHYC 4520.03/PHYC 4595.03
- OCEA 4120.03
- OCEA 4220.03 or another three credit hour course approved by Program Coordinator
