This clinical practicum will enable students to integrate patient care principles and previously acquired core and discipline-specific theory into clinical practice through a full-time, immersive, eight-week clinical placement. Students will consolidate concepts, theories, and skills in performing a variety of nuclear medicine procedures. They will be exposed to image evaluation, patient management/care, radiopharmaceutical preparation, and quality control. Students will be provided with the opportunity to take an active role in clinical rotations and gain independence and competence in patient interviews, injections, and a variety of nuclear medicine imaging procedures.
PREREQUISITES: NUMT 2000.03, NUMT 2020.03
RESTRICTIONS: RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3020 Positron Emission Tomography

CREDIT HOURS: 3
This course will provide students with knowledge and understanding of Positron Emission Tomography (PET) physics, instrumentation, and quality control. The clinical applications of PET/CT in oncology, neurology, cardiology, infection/inflammation, and pediatrics will be covered in detail. In addition, a variety of PET radiopharmaceuticals will be discussed along with their corresponding clinical applications. Students will be introduced to radiation safety practices in PET/CT and how they differ from general nuclear medicine. Cyclotron physics, generators, and radiopharmaceutical synthesis will also be explored. PET radiopharmaceutical production and quality control, scanner instrumentation, equipment quality control, and imaging techniques will be covered with an emphasis on 18F FDG imaging, including clinical indications, normal bio-distribution, variants, artifacts, and pathological findings.
PREREQUISITES: HSCE 3020.03, NUMT 3220.03
RESTRICTIONS: Restricted to Bachelor o f Health Science students in the professional stream of Nuclear Medicine Technology
FORMATS: Tutorial

NUMT 3200 Radiopharmacy

CREDIT HOURS: 3
This clinical education course will provide students with exposure to the daily operations and skills related to radiopharmacy practice in the clinical environment. Students will integrate radiopharmacy theory and practice through an immersive three-week clinical placement. Generator elution, product preparation, and performance of quality control procedures will be practiced. Record keeping and documentation of daily operations will be expanded upon from NUMT 2000. Emphasis will be placed on efficiency and organization in order to respond to the dynamic nature of a nuclear medicine department. Students will also gain exposure to non-routine radiopharmacy responsibilities such as: dilutions, stock solutions, radiopharmacy research, and quality improvement. Quality control procedures, evaluation, and troubleshooting techniques will be used to optimize outcomes and ensure validity of results.
PREREQUISITES: NUMT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3210 Non-Imaging Procedures

CREDIT HOURS: 3
This clinical education course will provide students with the opportunity to apply theory to clinical practice through an immersive three-week clinical placement focused on non-imaging, therapeutic, and emerging theranostic procedures in nuclear medicine. Students will be required to achieve competency in white blood cell labelling, thyroid uptakes, radioiodine treatments, glomerular filtration rates, and small equipment quality control. Proper lab technique and radiation safety will be emphasized, in addition to professional interactions with patients and interprofessional health care providers. Students will assess, modify, and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation, and troubleshooting techniques will be used to optimize outcomes and ensure validity of results.
PREREQUISITES: NUMT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3220 General Imaging I

CREDIT HOURS: 3
This clinical education course will provide students with the opportunity to expand upon their knowledge and understanding of all nuclear medicine practices and procedures. Students will apply theory to practice through an immersive clinical placement, with an emphasis on the application and evaluation of general imaging procedures as they relate to patient management. Prior to the completion of this course, students will be required to obtain a minimum number of

general imaging clinical competencies, achieved through assessment by faculty and preceptors. Students will assess, modify, and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation, and troubleshooting techniques will be used to optimize outcomes and ensure validity of results.
PREREQUISITES: NUMT 2500
RESTRICTIONS: Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3222 General Imaging II

CREDIT HOURS: 3
This clinical education course will provide students with the opportunity to expand upon their knowledge and understanding of all nuclear medicine practices and procedures. Students will apply theory to practice through an immersive clinical placement, with an emphasis on the application and evaluation of general imaging procedures as they relate to patient management. Prior to the completion of this course, students will be required to obtain a minimum number of general imaging clinical competencies, achieved through assessment by faculty and preceptors. Students will assess, modify, and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation, and troubleshooting techniques will be used to optimize outcomes and ensure validity of results.
PREREQUISITES: NUMT 3220.03, HSCE 3020.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology.

NUMT 3230 Cardiac Imaging

CREDIT HOURS: 3
This clinical education course will provide students with the opportunity to apply theory gained in Nuclear Medicine Clinical Procedures III (NUMT 2020) to clinical practice through an immersive four- week clinical placement focused on cardiovascular procedures. Emphasis will be placed on the application, evaluation, acquisition, and processing of nuclear cardiology procedures with a focus on myocardial perfusion imaging (rest, exercise, and pharmacological), equilibrium radionuclide angiography, and 12-lead electrocardiography (ECG). Students will assess, modify, and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation, and troubleshooting techniques will be used to optimize outcomes and ensure validity of results.
PREREQUISITES: NUMT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3240 Pediatric Imaging

CREDIT HOURS: 3
This clinical education course will provide students with the opportunity to enhance their knowledge and understanding of nuclear medicine practice in the care of pediatric patients and their families. Students will further develop their radiopharmacy, radiation safety and patient care skills through an immersive three-week clinical placement in a pediatric nuclear medicine department. Emphasis will be placed on the role of nuclear medicine in the diagnosis and management of pediatric-specific pathologies and conditions. Students will assess, modify, and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation, and troubleshooting techniques will be used to optimize outcomes and ensure validity of results.
PREREQUISITES: NUMT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 3500 Clinical Practicum In Nuclear Medicine Technology III

CREDIT HOURS: 3
This clinical practicum will provide students with the opportunity to achieve competency in nuclear medicine practice though a full-time, immersive, eight-week clinical placement. Students will be required to consolidate and apply all previously acquired core and discipline-specific theory and clinical skills into practice. Emphasis will be placed on achieving competency in all general and non-imaging nuclear medicine procedures, as well as CT, radiopharmacy, and when available, PET/CT. Students will be provided with the opportunity to expand upon their knowledge and understanding of the broader healthcare system through observational learning experiences in affiliated clinical departments.
PREREQUISITES: NUMT 3200.03, NUMT 3222.03, NUMT 3230.03, NUMT 3020.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 4000 Spec Practice Nuclear Medicine

CREDIT HOURS: 12

FORMATS: Lecture

NUMT 4001 SP NUCLEAR MEDICINE part I

CREDIT HOURS: 6

CALENDAR NOTES: Students taking this course must register in and complete NUMT 40001.06 and NUMT 4002.06 in consecutive terms; credit will not be granted if courses are not completed consecutively.
RESTRICTIONS: Restricted to students in Nuclear Medicine Technology
EXCLUSIONS: NUMT 4000XY.12
FORMATS: Lecture

NUMT 4002 SP NUCLEAR MEDICINE part II

CREDIT HOURS: 6

CALENDAR NOTES: Students taking this course must register in and complete NUMT 40001.06 and NUMT 4002.06 in consecutive terms; credit will not be granted if courses are not completed consecutively.
RESTRICTIONS: Restricted to students in Nuclear Medicine Technology
EXCLUSIONS: NUMT 4000XY.12
FORMATS: Lecture

NUMT 4100 Specialty Practice I/Specialty Practice II

CREDIT HOURS: 6
Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. Specialty Practice is arranged through consultation with the program advisor.
PREREQUISITES: NUMT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology. Enrolment may be limited due to clinical site availability.

NUMT 4210 Professional Practice in Nuclear Medicine Technology I

CREDIT HOURS: 3
This clinical education course will provide students with the opportunity to assume clinical responsibility and further develop professionalism skills in nuclear medicine technology. Students will be scheduled in a variety of diagnostic imaging areas where they will be responsible, with remote supervision, for functioning as an integral member of an interprofessional health care team. This course will also provide the opportunity for students to practice professional advocacy, act as mentors, and engage in continuing professional development. Students will be required to obtain all remaining competencies as required by the CAMRT National Competency Profile.
CALENDAR NOTES: Students cannot be registered in NUMT 4210.03 and NUMT 4220.02 concurrently.
PREREQUISITES: NUMT 4220.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

NUMT 4220 Professional Practice in Nuclear Medicine Technology II

CREDIT HOURS: 3
This clinical education course will provide students with the opportunity to assume clinical responsibility and further develop professionalism skills in nuclear medicine technology. Students will be scheduled in a variety of diagnostic imaging areas where they will be responsible, with remote supervision, for functioning as an integral member of an interprofessional health care team. This course will also provide the opportunity for students to practice professional advocacy, recommend evidence-based changes to current practice, and engage in activities to support and promote the nuclear medicine profession. Students will be required to obtain all remaining competencies as required by the CAMRT National Competency Profile.
CALENDAR NOTES: Students cannot be registered in NUMT 4210.03 and 4220.03 concurrently.
PREREQUISITES: NUMT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

RADT Radiological Technology - Course Descriptions

RADT 1000 Skeletal Radiography

CREDIT HOURS: 3
This course provides the student with the knowledge required to perform basic skeletal radiography examinations. Aspects studied include: patient positioning, alignment of the radiation field, and radiation exposure factors. Radiographic images are analyzed with a focus on structures demonstrated, evaluation criteria, and modifications required to improve sub-optimal images. Students have the ability to develop radiographic skills for positioning and image analysis in lab/tutorial sessions.
COREQUISITES: RADT 1010.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology
FORMATS: Lecture | Lab | Tutorial

RADT 1010 Imaging Fundamentals

CREDIT HOURS: 3
This course offers an introduction to the processes involved in the production of x-radiation and use of radiation for diagnostic imaging. The basic principles and equipment involved in radiography and fluoroscopy are studied as well as an introduction to the controlling parameters for image production. A major emphasis of the course is an analysis of the radiographic image and the factors that influence its quality. Students have the opportunity to use imaging equipment during lab sessions.
COREQUISITES: RADT 1000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology
FORMATS: Lecture | Lab

RADT 1020 Skeletal and Systems Radiography

CREDIT HOURS: 3
Skeletal and Systems Radiography provides the student with the knowledge required to perform radiological imaging procedures of the vertebral column, craniofacial structures, body organs and systems. Elements of the course include patient positioning, alignment of the radiation field, patient management, use of contrast media, and image analysis. Images are assessed with a focus on structures demonstrated, evaluation criteria, and modifications required to improve image quality. Students have the opportunity to practice and demonstrate the radiographic positions in a tutorial/simulation setting. Clinical lab sessions are included in this course to link theory to practice and to provide the student with an orientation to the Diagnostic Imaging Department, including the emergency room, fluoroscopy and mobile imaging.
PREREQUISITES: RADT 1000.03, RADT 1010.03, PHYC 1310.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology
FORMATS: Lecture | Lab | Tutorial

RADT 1500 Clinical Practicum I in Radiological Technology

CREDIT HOURS: 3
This clinical practicum introduces students to radiological technology and a Diagnostic Imaging department. Students will have the opportunity to experience a wide variety of procedures and interact with healthcare professionals and patients. Students will develop skills in skeletal/systems radiography, image evaluation, and patient management/care.
PREREQUISITES: RADT 1020.03, HSCE 1010.03, HSCE 1030.03, PHYC 1320.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 2000 Advanced Skeletal & Systems Radiography

CREDIT HOURS: 3
This course provides the students with the knowledge of advanced skeletal examinations, and imaging examinations of the gastrointestinal, genitourinary, biliary, reproductive, cardiovascular, and central nervous systems. Learning labs in which the students reinforce their knowledge of anatomy, physiology, image quality, and radiographic criteria support this course. Clinical labs and tutorial sessions prepare the students to challenge advanced patient examinations.
PREREQUISITES: RADT 1500
RESTRICTIONS: Restricted to the Bachelor of Health Science students in the professional stream of Radiological Technology
FORMATS: Lecture | Lab | Tutorial

RADT 2010 Imaging Equipment

CREDIT HOURS: 3
This course covers the structure, operating principles, and quality control of the equipment involved in radiological technology. It includes a comprehensive study of x-ray generators, tubes, fluoroscopic, and processing equipment with a focus on technical parameters and clinical applications. This course also covers quality control concepts, equipment used for quality control testing and testing procedures for the imaging equipment in radiological technology.
COREQUISITES: RADT 2020.03
PREREQUISITES: RADT 1500.03, HSCE 2020.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology
FORMATS: Lecture | Lab

RADT 2020 Adaption Radiography

CREDIT HOURS: 3
The Adaption Radiography course provides the student with the knowledge required to adapt imaging procedures for unique clinical situations including trauma, mobile, and operating room examinations, and for patients with special needs (pediatric, geriatric, and persons with a disability). Selected radiographic projections and procedures related to the topics are also studied and pertinent radiographic images are analyzed. Students will have the

opportunity to develop radiographic adaption skills in clinical/learning lab sessions and clinical simulation sessions.
COREQUISITES: RADT 2010.03
PREREQUISITES: RADT 2000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology
FORMATS: Lecture | Lab | Tutorial

RADT 2500 Clinical Practicum II in Radiological Technology

CREDIT HOURS: 3
This practicum provides students with the opportunity to continue skill development in the clinical examinations/procedures introduced in RADT 1500. In addition, an introduction to specialized clinical procedures is provided, including operating room imaging, computed tomography, and pediatric radiography.
PREREQUISITES: RADT 2010.03, 2020.03, HSCE 2030.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3000 Applied Pathology in Radiological Technology

CREDIT HOURS: 3
This course provides the student with the fundamental knowledge to recognize the radiographic appearances of specific pathologies. This knowledge is directly applicable to the clinical component of the program. The course is presented by lecture and through clinical lab sessions and learning labs where the student studies a variety of images related to pathologic processes. Studies from related diagnostic modalities are reviewed when appropriate.
PREREQUISITES: RADT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology.
FORMATS: Lecture | Lab

RADT 3210 CT and Interventional Imaging

CREDIT HOURS: 3
This course provides the students with the opportunity to experience the clinical practice of computed tomography and angiography/interventional imaging. Under the direction of a preceptor, students will meet the competencies required in these imaging areas. This class allows students to apply the theory from the CT Instrumentation and Applications course (HSCE 3020.03) and promotes further development of professional skills and behaviors.
PREREQUISITES: RADT 3000.03, HSCE 3020.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3220 Fluoroscopic Imaging and Special Procedures

CREDIT HOURS: 3
This clinical education course will prepare students for the clinical practice of radiological technology that involve flouroscopic imaging and other special procedures. These include gastrointestinal, genitourinary and operating room imaging as well as mammography. Under the direction of a preceptor, students will apply acquired knowledge and skills to radiological procedures. The students will develop their skills in providing a high standard of patient care, producing and evaluating images, problem solving and collaboration. FORMAT; Clinical Education Course
PREREQUISITES: RADT 2500.03 and RADT 3000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3240 General/Adaption Radiography

CREDIT HOURS: 6
This course provides the student with the opportunity to further develop general radiography skills. Under appropriate direction from a preceptor, students will apply the knowledge and skills acquired in previous courses/practica and adapt routine imaging procedures for challenging clinical situations and patients with special needs. Students will be scheduled to a variety of imaging areas where radiographic adaption is typically required: emergency, and in-patient/mobile procedures. Clinical experience on evening, night, and weekend shifts is provided in this course.
PREREQUISITES: RADT 2500.03, RADT 3000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 3500 Clinical Practicum III

CREDIT HOURS: 3
Clinical Practicum III provides students with an opportunity to integrate skills and concepts from previous courses, clinical practica and the clinical education courses. Under appropriate levels of supervision, the student will assume the responsibilities of a radiological technologist and demonstrate competency in radiography and computed tomography.
PREREQUISITES: RADT 3210.03, RADT 3220.03, RADT 3240.06
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 4000 Specialty Practice I
CREDIT HOURS: 12
NOTE: Course Details listed here also apply to RADT 4100.
PREREQUISITES: RADT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology. Enrolment may be limited due to clinical site availability.

RADT 4100 Specialty Practice II
CREDIT HOURS: 6
See RADT 4000.
PREREQUISITES: RADT 3500.03

RADT 4200 Pediatric Radiography
CREDIT HOURS: 3
This course provides students with the opportunity to meet the competencies required in pediatric radiography. A wide variety of clinical experiences are scheduled at the IWK Health Centre, including mobile and operating room imaging, gastrointestinal and urinary system examinations, and general imaging. Under the direction of preceptors, students will apply theoretical principles and further develop professional skills and behaviours. Students will also have the opportunity to attend pediatric radiology rounds and observe related imaging procedures.
PREREQUISITES: RADT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 4210 Professional Skill Development in Radiological Technology
CREDIT HOURS: 3
This clinical education course provides students with an opportunity to integrate skills/concepts from previous courses, clinical practica, and clinical education courses and continue development of professional skills in radiological technology. Through reflection and self-evaluation, students will develop learning contracts, and under appropriate levels of supervision will perform general radiologic imaging procedures. Various themes of professionalism will also be explored.
PREREQUISITES: RADT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RADT 4220 Professional Practice in Radiological Technology
CREDIT HOURS: 3
This clinical education course provides the student with the opportunity to strengthen radiological technology skills while increasing confidence and independence in clinical practice. Under appropriate direction from a preceptor, students will apply the knowledge and skills acquired in previous courses/practica to further develop clinical judgement and self-confidence. To demonstrate competence, students must successfully complete a summative clinical assessment and comprehensive competency based written examinations. Students will also plan, design, and deliver a professional development research project for to faculty, technologists, and stakeholders.
PREREQUISITES: RADT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

RSPT Respiratory Therapy - Course Descriptions

RSPT 1000 Respiratory Therapy Instrumentation and Techniques
CREDIT HOURS: 3
Respiratory Therapy Instrumentation and Techniques introduces students to the technical components, skills competencies, and basic assessment skills for Respiratory Therapy. Clinical skills competency through lab simulation is required.
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy
FORMATS: Lecture | Lab

RSPT 1020 Respiratory Therapy Clinical Assessment and Techniques

CREDIT HOURS: 3
RSPT 1020.03 builds on the knowledge, concepts, and competencies acquired in RSPT 1000.03. Students will gain foundational knowledge and competencies necessary for understanding the physical principles and concepts associated with the safe handling and efficient operation of respiratory therapy equipment. Students will develop patient assessment skills, skills competency practice and therapeutic decision-making using lab simulation. Skills competency testing will be completed in preparation for Clinical Practicum I (RSPT 1500.03). Limited clinical opportunities may be provided. Clinical skills competency testing through lab simulation is required.
PREREQUISITES: RSPT 1000.03, HSCE 1000.03, RSPT 1030.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy
FORMATS: Lecture | Lab

RSPT 1030 Cardiopulmonary Physiology I

CREDIT HOURS: 3
The course presents a modular approach to developing a thorough understanding of normal and abnormal cardiopulmonary function in the human body and is considered a foundation course for all RSPT specific courses in the program.
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy
FORMATS: Lecture

RSPT 1500 Clinical Practicum I

CREDIT HOURS: 3
Clinical Practicum I introduces students to clinical practice in the patient care (hospital) environment. Students will have the opportunity to apply theory to skills practice at the defined competency level.
CALENDAR NOTES: Full-time rotations in clinical settings with assigned preceptors. Shift work and weekends may be required. Students will be required to travel to clinical sites outside the Halifax Regional Municipality. Students will be responsible for travel and accommodation.
PREREQUISITES: RSPT 1020.03, HSCE 1010.03, HSCE 1030.03, RSPT 2030.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy
FORMATS: Experiential Learning

RSPT 2000 Principles of Mechanical Ventilation

CREDIT HOURS: 3
This course will introduce the students to the delivery of mechanical ventilation by learning the terminology, physical principles and physiologic concepts associated with the application of mechanical ventilation. Equipment operation, function and troubleshooting will be investigated in the lab and clinical setting.
PREREQUISITES: RSPT 1500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy
FORMATS: Lecture | Lab

RSPT 2020 Application of Mechanical Ventilation

CREDIT HOURS: 3
Students will be introduced to the background knowledge necessary for understanding the physical principles and concepts governing the operation of mechanical ventilators and adjunct respiratory therapy equipment to ensure the safe and effective delivery of therapy. Clinical skills testing is required.
PREREQUISITES: RSPT 2000.03, RSPT 2063.03, RSPT 2070.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy
FORMATS: Lecture | Lab

RSPT 2030 Cardiopulmonary Physiology II

CREDIT HOURS: 3
This course is a continuation of the physiological concepts introduced in RSPT 1030 and will examine the intricate chemical and physiological processes of fluid and electrolyte balance, pulmonary function testing, and the cardiopulmonary response to unusual and changing environments. Case study presentations and patient scenarios will complement the learning environment and assist the student in integrating previous knowledge.
PREREQUISITES: RSPT 1030.03, RSPT 1000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy
FORMATS: Lecture

RSPT 2050 Health Practice for Respiratory Therapy

CREDIT HOURS: 3
This course consists of classroom work, clinical skills testing, guest presentations, and a community project. The learning environment will enhance the

understanding of the role of the respiratory therapist in hospitals, healthcare facilities and the community. Basic competency level in the skills required for RSPT 2500 will be achieved through practicing the clinical skills in the lab. Students will be challenged to evaluate and integrate knowledge and skills.
PREREQUISITES: RSPT 2000.03, RSPT 2070.03, RSPT 2063.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy
FORMATS: Lecture | Lab

RSPT 2063 Respiratory Disease & Therapeutics I

CREDIT HOURS: 3
The proper assessment, and treatment of clients with conditions and diseases affecting the cardio-respiratory system are vital to the role of a respiratory therapist. The purpose of this course is for students to gain knowledge and understanding of the incidence, etiology, clinical manifestations, pathophysiology, and differential diagnosis of pathologies treated by respiratory therapists in the acute and home care environments. While studying each individual disease, the evidence-based treatment and prevention strategies, including pharmacology, will be examined.
PREREQUISITES: RSPT 1500.03
FORMATS: Lecture

RSPT 2065 Respiratory Disease & Therapeutics II

CREDIT HOURS: 3
The proper assessment and treatment of clients with conditions and diseases affecting the cardio-respiratory system are vital to the role of a respiratory therapist. The purpose of this course is for students to gain knowledge and understanding of the incidence, etiology, clinical manifestations, pathophysiology, and differential diagnosis of pathologies treated by respiratory therapists in the acute, and home care environments. While studying each individual disease, the evidence-based treatment and prevention strategies, including pharmacology, will be examined.
PREREQUISITES: RSPT 2063.03
FORMATS: Lecture

RSPT 2070 Human Pregnancy and Fetal/Newborn Development

CREDIT HOURS: 3
This course contains background information and assessment skills necessary for the progression to more advanced assessment, skills and competency levels in respiratory care of the neonate and child. The integration of this and additional required courses will allow the student to learn and to challenge the competency component of the program as it relates to neonatal/pediatric therapeutics and instrumentation, pathophysiology, applications of mechanical ventilation, and pharmacology.
PREREQUISITES: RSPT 1500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream of Respiratory Therapy
FORMATS: Lecture

RSPT 2500 Clinical Practicum II

CREDIT HOURS: 3
This clinical practicum provides students with the opportunity to continue clinical skill competency development and achieve defined skills by performing in a clinical patient environment. Students will have the opportunity to rotate through assigned clinical placements through day and night shifts including weekends, depending upon the placement requirements.
PREREQUISITES: RSPT 2020.03, RSPT 2050.03, RSPT 2065.03, RSPT 2070.03, HSCE 2000.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

RSPT 3001 Anesthesia Instrumentation and Clinical Techniques

CREDIT HOURS: 3
This course will consist of two modules; the first being a seminar/lecture series during the first few weeks of the Fall semester and the second being two weeks of full-time clinical application program in the operating room. Students will be precepted with a focus on airway management skills and patient monitoring. Students will also attend an intensive 2-day workshop in management of the difficult airway. Depending on availability of clinical sites, students may be expected to travel outside the metro area at their own expense.
CALENDAR NOTES: Students taking this course must register in and complete RSPT 3001.03 and RSPT 3002.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.
PREREQUISITES: RSPT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy
EXCLUSIONS: RSPT 3000.06
FORMATS: Lecture | Experiential Learning

RSPT 3002 Anesthesia Instrumentation and Clinical Techniques

CREDIT HOURS: 3
This course will consist of two modules; the first being a seminar/lecture series during the first few weeks of the Fall semester and the second being two weeks of full-time clinical application program in the operating room. Students will be precepted with a focus on airway management skills and patient monitoring. Students will also attend an intensive 2-day workshop in management of the difficult airway. Depending on availability of clinical sites, students may be expected to travel outside the metro area at their own expense.
CALENDAR NOTES: Students taking this course must register in and complete RSPT 3001.03 and RSPT 3002.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.

RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy
EXCLUSIONS: RSPT 3000.06
FORMATS: Lecture

RSPT 3011 Neonatal and Pediatric Therapeutics

CREDIT HOURS: 3
This course will consist of two modules; the first being a seminar/lecture series during the first few weeks of the Fall semester and the second being a five week full-time clinical application program. Students will integrate and apply theories and skills in the neonatal and pediatric environment under the guidance of skilled preceptors. Students will be assigned to diverse clinical areas including Neonatal Intensive Care I and II, Pediatric Intensive Care, Birth Unit, and General Wards. Students may be assigned to clinical experiences during twelve hour day or night shifts. Students may be required to travel outside the metro area at their own expense.
CALENDAR NOTES: Students taking this course must register in and complete RSPT 3011.03 and RSPT 3012.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.
PREREQUISITES: RSPT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy
EXCLUSIONS: RSPT 3010.06
FORMATS: Lecture

This course will consist of two modules; the first being a seminar/lecture series during the first few weeks of the Fall semester and the second being a five week full-time clinical application program. Students will integrate and apply theories and skills in the neonatal and pediatric environment under the guidance of skilled preceptors. Students will be assigned to diverse clinical areas including Neonatal Intensive Care, Pediatric Intensive Care, Birth Unit, Emergency Department, and General Wards. Students may be assigned to clinical experiences during day, night, or weekend shifts. Students may be required to travel outside the metro area at their own expense.
CALENDAR NOTES: Students taking this course must register in and complete RSPT 3011.03 and RSPT 3012.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.
PREREQUISITES: RSPT 2500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy
EXCLUSIONS: RSPT 3010.06
FORMATS: Lecture | Experiential Learning

RSPT 3021 Cardiac and Pulmonary Diagnostics

CREDIT HOURS: 3
This course will consist of two modules; the first being a seminar/lab series during the first few weeks of the Fall semester and the second being a three week full-time clinical application program in the adult and pediatric pulmonary function, arterial blood gas analysis, electrocardiography and sleep laboratories. Students will integrate and apply theories and skills in specialized diagnostic environments. Students will be precepted and evaluated by certified technologists. This course will enable students to become proficient in performing cardio-pulmonary diagnostic testing including spirometry. Students will have exposure to bronchoprovocation testing and exercise stress testing. Students may be required to travel outside the metro area at their own expense.

CALENDAR NOTES: Students taking this course must register in and complete RSPT 3021.03 and RSPT 3022.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.
PREREQUISITES: RSPT 2500.03, STAT 1060.03
RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy
EXCLUSIONS: RSPT 3020.06
FORMATS: Lecture | Experiential Learning

RSPT 3022 Cardiac and Pulmonary Diagnostics

CREDIT HOURS: 3
This course will consist of two modules; the first being a seminar/lab series during the first few weeks of the Fall semester and the second being a three week full-time clinical application program in the adult and pediatric pulmonary function, arterial blood gas analysis, electrocardiography and sleep laboratories. Students will integrate and apply theories and skills in specialized diagnostic environments. Students will be precepted and evaluated by certified technologists. This course will enable students to become proficient in performing cardio-pulmonary diagnostic testing including spirometry. Students will have exposure to bronchoprovocation testing and exercise stress testing. Students may be required to travel outside the metro area at their own expense.

EXCLUSIONS: RSPT 3020.06
FORMATS: Lecture | Experiential Learning

RSPT 3231 Critical Care Instrumentation and Clinical Techniques I

CREDIT HOURS: 3
This class will consist of two modules; the first being a seminar/lecture series during the first few weeks of the fall semester and the second being a five week full-time clinical application program in diverse critical care areas. Students will be presented with the concepts and theories relevant to the respiratory care of the critical patient. Students will recall and apply theories and concepts learned in previous courses in order to integrate this knowledge with new information presented. The clinical application program will provide the students with the opportunity to integrate theories and procedures learned in the seminar/lecture series. Students may be assigned to any of the following critical care areas: medical, surgical, neurosurgical, cardiovascular and coronary care. Depending on availability of clinical sites, students may be expected to travel outside the Metro area at their own expense.
CALENDAR NOTES: Students taking this course must register in and complete RSPT 3231.03 and RSPT 3232.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.
COREQUISITES: RSPT 3001.03
PREREQUISITES: RSPT 2500.03, HSCE 3000.03
EXCLUSIONS: RSPT 3230.06
FORMATS: Lecture

RSPT 3232 Critical Care Instrumentation and Clinical Techniques II

CREDIT HOURS: 3
This class will consist of two modules; the first being a seminar/lecture series during the first few weeks of the fall semester and the second being a five week full-time clinical application program in diverse critical care areas. Students will be presented with the concepts and theories relevant to the respiratory care of the critical patient. Students will recall and apply theories and concepts learned in previous courses in order to integrate this knowledge with new information presented. The clinical application program will provide the students with the opportunity to integrate theories and procedures learned in the seminar/lecture series. EXCLUSIONS: RSPT 3230.06
FORMATS: Lecture

RSPT 3251 Health Practice

CREDIT HOURS: 3
This course enables students to apply theories, practice clinical skills and integrate previous learning experiences acquired throughout the three years of the BHSc program. Students will be assigned to a rotating clinical schedule at various clinical sites. Clinical experiences in this course may occur on weekends or night shifts. Students will be evaluated by preceptors at the assigned clinical sites in consultation with faculty. Students may be required to travel outside the HRM area at their own expense.
CALENDAR NOTES: Students taking this course must register in and complete RSPT 3251.03 and RSPT 3252.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.
PREREQUISITES: RSPT 2500.03, HLTH 3010.03
RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

EXCLUSIONS: RSPT 3250.06
FORMATS: Lecture | Experiential Learning

RSPT 3252 Health Practice

CREDIT HOURS: 3
This course enables students to apply theories, practice clinical skills and integrate previous learning experiences acquired throughout the three years of the BHSc program. Students will be assigned to a rotating clinical schedule at various clinical sites. Clinical experiences in this course may occur on weekends or night shifts. Students will be evaluated by preceptors at the assigned clinical sites in consultation with faculty. Students may be required to travel outside the HRM area at their own expense.
CALENDAR NOTES: Students taking this course must register in and complete RSPT 3251.03 and RSPT 3252.03 in consecutive terms; credit will not be granted if courses are not completed consecutively.
PREREQUISITES: RSPT 2500.03; HLTH 3010.03
RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy
EXCLUSIONS: RSPT 3250.06
FORMATS: Lecture | Experiential Learning

RSPT 3500 Clinical Practicum III

CREDIT HOURS: 3
This course enables students to integrate theories and skills acquired throughout the previous three years of the program; including theory, clinical and clinical education courses. Students will be evaluated on skills proficiency, time management, organizational skills, and decision-making at an elevated level of independence. Students will be assigned to diverse clinical areas and patient populations. Clinical experiences in this course will occur during day and night shifts, including weekends. Students may be required to travel outside the HRM metro area at their own expense.
PREREQUISITES: RSPT 3002.03, RSPT 3012.03, RSPT 3022.03, RSPT 3232.03, RSPT 3252.03
RESTRICTIONS: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

RSPT 4010 Anaesthesia Technology and Related

CREDIT HOURS: 3
The course will provide advanced knowledge of the function, operation, set-up and quality assurance issues regarding aneasthesia and related equipment. The student will be provided with the knowledge necessary to work with aneasthesia equipment in operating room and related settings.
PREREQUISITES: RSPT 3500.03
RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor
FORMATS: Online Delivery

RSPT 4020 Anaesthesia Medication Delivery

CREDIT HOURS: 3
This course will provide in depth knowledge of the modes of delivery and action and interaction of anesthesia pharmacology. The student will be provided with knowledge regarding common medications related to the delivery of anaesthesia and monitoring their effect in the operating room and related settings.
PREREQUISITES: RSPT 3500.03 or equivalent
RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor
FORMATS: Online Delivery

RSPT 4030 Clinical Anaesthesia

CREDIT HOURS: 3
This course will provide in-depth knowledge of evaluation, monitoring and interventions for patients receiving anaesthesia under varying conditions. The student will be provided with the knowledge necessary to anticipate the needs of the patient and the assistance required by the anaesthetist during different aspects of the anaesthetic process.
PREREQUISITES: RSPT 3500.03 or equivalent
RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor
FORMATS: Online Delivery

RSPT 4100 Specialty Practice I

CREDIT HOURS: 6
Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. Specialty practice is arranged through consultation with the program advisor.
CALENDAR NOTES: PREREQUISITES: RSPT 3500.03 for entry level students. Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met. RESTRICTIONS: Restricted to Bachelor of Health Science students in Respiratory Therapy. Enrolment may be

limited due to clinical site availability
PREREQUISITES: RSPT 3500.03
RESTRICTIONS: RSPT 3500.03
FORMATS: Experiential Learning

Interprofessional Health Education

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

IPHE 4900 Interprofessional Health Education Portfolio
CREDIT HOURS: 0
This course is comprised of interprofessional activities intended to prepare students to work in collaborative and patient/client/community/family-centered work environments. Students in Faculty of Health undergraduate programs are required to maintain registration in this course for the duration of their studies. To earn a passing grade a student must complete a minimum of four activities or more as required by their program. IPE experiences must be relevant to their program of study and must include a range of exposure and immersion level experiences, with at least one of these experiences in a practice setting, which can include a simulated practice setting. In the event there are no students from other professions in any of the student's practice settings, credit may be granted for interactions with non-student professionals which follow an approved structured format. Across the required IPE experiences students must interact with at least 4 different related professions with which there are natural affinities or linkages in the professional environment. In accordance with the guidelines/requirements of the home program, students will prepare a portfolio (or comparable document/process) which maps their interprofessional collaborative learning experiences on to the specific requirements of the program. The portfolio is graded by the program on a Pass/Fail basis. Successful completion of this course is a requirement for graduation in all programs and will be recognized further with the awarding of a non-credit Certificate in Interprofessional Collaboration issued by the Faculty of Health.
CALENDAR NOTES: Time is protected in the academic timetable on Tuesdays and Thursdays from 4-5:30 pm; students will be advised by their program in advance when their required IPE classes are scheduled. Students should check the timetable for the appropriate section for their school/college to ensure they are registered for that section.
COREQUISITES: IPHE 4900.00
RESTRICTIONS: Faculty of Health students only

Chambers, C., BSc (Dalhousie), MA, PhD (UBC)
Murphy, A., BSc Pharm (Dalhousie), PhD Pharm (UBC)

Preceptors

Many nurses and persons in other disciplines, and settings, provide valuable assistance in the education of nursing students. Names can be obtained by contacting the School of Nursing.

School of Nursing Regulations

School of Nursing Regulations

1. Students are required to observe the University Regulations and Academic Regulations as described in this calendar.
2. Students are assessed in each semester on their academic progression, aptitude and fitness for nursing. Students who, in the judgment of the faculty, fail to attain a satisfactory standard in this assessment may be required to withdraw from the School.
3. Students are responsible for ensuring that they are registered in appropriate courses throughout the program. Incorrect registration, at any time, could cause conflicts in a student's year-to-year progression and/or graduation.
4. Students in the Baccalaureate Program are responsible for (a) the purchase of uniforms as per the School of Nursing Dress and Uniform Policy and (b) cost of accommodation and travel while on clinical experiences. Additional expenses are incurred by students in the BScN Program for clinical experience, learning resources and books, first aid course, CPR course, and RN licensure examinations and recommended and/or required immunizations and/or testing.
5. Faculty semester leads assist students to plan their academic program and academic progress.
6. Progression in the program requires a C (minimum 60%) in each non-nursing course and C+ (minimum 65%) or Pass (P) in each nursing course. Progression in the program requires a GPA of 2.30 or greater in semesters 3 through 8. F and INC are failing grades. ILL and W are considered neutral.
7. Academic progression decisions for ES1 (Entry Semester 1) Students will occur following the completion of Semester 2.
8. Students are permitted to repeat any course (non-nursing, core nursing courses including clinical practice and electives) in the BScN program only once. A second failure in any course (whether the second failure occurs in a previously failed course, or in a course taken for the first time in the program) will result in dismissal from the program for 1 year.
9. Following a dismissal, students are permitted to reapply to the program after 12 months. Readmission to the program is not guaranteed and the applicant must demonstrate their preparation to return to studies. If a BSc Nursing student is readmitted, failure in any course (including non-nursing courses, core nursing courses including clinical practica and electives) will result in a second dismissal from the Nursing program. (Ref. Academic Calendar; Section 20 – Academic Dismissal; Para 20.1.1)
10. Faculty of Health students who have been academically dismissed twice will not be allowed to apply for re-admission. (Ref. Academic Calendar; Section 20 – Academic Dismissal; Para 20.1.6).
11. Students wishing to appeal a decision based on faculty regulations or decisions should follow the Faculty of Health Appeal Procedure outlined in the Undergraduate Bachelor of Science in Nursing (BScN) Student Handbook.
12. Supplemental exams are available in all nursing courses with the exception of nursing elective courses. A student who achieves a Marginal Fail (FM 59.5%-64.5%) will be eligible to write a supplemental exam. Refer to the 'Supplemental Exam for Knowledge Assessment Policy'.
13. The profession of Nursing situates Nursing students in a position of special trust, applicants will be asked to complete and submit a recent Criminal Record Check and Vulnerable Sector Search which might affect the applicant's suitability for the practice of nursing. Students accepted into the nursing program who provide false information will be disciplined by the university. Once enrolled in the Nursing Program it is a student's continuing responsibility to inform the Undergraduate Associate Directors of any criminal conviction or any significant personal circumstance which would adversely affect their ability to continue with their studies or which would make them ineligible for registration within Nova Scotia College of Nursing (NSCN) upon graduation.

Leave of Absence

A Dalhousie University nursing student may apply to take a leave of absence (LOA) to a maximum of 24 months over 1- 2 occurrences during their program of study. For further information, please consult the School of Nursing BScN Student Handbook.

School of Nursing Appeal Procedure

The University has established a system which allows students to appeal academic decisions made by faculty. Appeals can be heard at different levels within the University: At the Faculty level and at Senate. Appeals are heard in the Faculty of Health by the Student Appeals Committee and at Senate level by the Senate Academic Appeals Committee.

Procedure for Undergraduate Appeals

Undergraduate appeals are heard by the Student Appeals Committee in the Faculty of Health Procedures for the undergraduate appeal process are available on the School of Nursing and Faculty of Health websites.

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. Successful completion of this course is a requirement for graduation and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions. Individual schools determine the specific guidelines and expectations regarding the required IPHE portfolio.

Degree Options

Bachelor of Science (Nursing) (Arctic Nursing)

Bachelor of Science (Nursing) (Arctic Nursing)

The Arctic Nursing Program, developed collaboratively between Nunavut Arctic College and Dalhousie University, is a four-year program that focuses on nursing in Nunavut. This program is designed for Nunavut residents. The curriculum emphasizes awareness and respect for Inuit culture and will prepare Inuit nurses to be leaders in the health-care system of Nunavut.

To learn more about the program https://www.dal.ca/faculty/health/nursing/undergraduate-program/arctic-nursing.html

Graduate Programs

For details of the Master of Nursing, the joint Master of Nursing/Master of Health Administration programs and the PhD (Nursing) program, please consult the Faculty of Graduate Studies Calendar.

Bachelor of Science (Nursing)

Degree Requirements

Throughout the undergraduate program students must: obtain a minimum sessional and cumulative GPA of 2.30; accumulate a minimum of 120 credit hours; successfully complete all compulsory courses, as well as the necessary number of elective courses; and complete the degree within six years of commencing nursing courses. Credit will be given for non-nursing courses that are up to ten years old by the date the degree is completed.

Grade Point Average Standards (GPA)

The grade point average system is described in the Academic Regulations.

Grades

The following letter-grade system is used to evaluate performance. Pass in non-nursing courses: A+, A, A-, B+, B, B-, C+, and C, and PASS. In nursing courses students must attain a minimum of C+ in both theory and clinical/laboratory components: F, FM. and INC are failing grades. ILL and W are considered neutral. A student that receives a Marginal Fail (FM) can refer to the 'Supplemental Exam for Knowledge Assessment Policy'.

Requirements for Promotion

Besides meeting the GPA requirements, progression in the program requires minimum C in each non-nursing course and minimum C+ in each nursing course. Progression in the program requires a GPA of 2.30 or greater in semesters 3 through 8.

Normal Workload

The program consists of 120 credit hours; Students can register for a maximum of 15 credit hours per term.

Prerequisite for Course Admissions

There are a number of courses that require prerequisites (see course descriptions). Students must successfully complete the required prerequisites for each course.

All students will complete 3 semesters per year:

-Fall Semester September to November

-Winter Semester January to March

-Summer Semester is May to July

Students will have a one-month break between each semester.

Semester 1 Entry (ES1)

This entry option is for students coming directly from high school or who do not have the required prerequisites for the ES3 - Entry Semester 3 option (see below). It is made up of 8 semesters over a 3-calendar year period.

Semester 1 runs September to December and Semester 2 runs January to April. Upon completion of Semester 1 and 2, students will enter Semester 3 (May to July in Halifax, Sept to Nov in Yarmouth) of the Bachelor of Science (Nursing) Program; see Course of Study.

Semester 3 Entry (ES3)

Students entering the program in Semester 3 have all the required non-nursing courses (equivalent to semesters 1 and 2) completed with at least 30 credit hours and will enter the program in Semester 3 in September or May. It consists of 6 semesters over a 2-calendar year period. Semesters 3 to 8 are exclusively nursing and interprofessional health courses.

Final Exams

Final exams for the BSc Nursing program will be administered in the last week of each semester: November for Fall Semester; March for Winter Semester and July for Summer Semester.

Graduation: Halifax Semester 1 Entry students will graduate in October, with eligibility to practice as a graduate nurse and apply to write the NCLEX-RN Licensure Examination; Halifax Semester 3 Entry student and Yarmouth students will graduate in October, with eligibility to practice as a graduate nurse and to apply to write the NCLEX-RN Licensure Examination.

Bachelor of Science (Nursing) Degree Program (Admitted in Sep 2016 or later)

Bachelor of Science (Nursing) Degree Program

In response to a health care system based on principles of primary health care, the Bachelor of Science (Nursing) Program prepares nurses to work in partnerships with individuals, families, groups and communities to promote, maintain and strengthen health. Graduates are prepared to respond to a range of health and illness needs in a variety of settings and organizational health care infrastructures. The curriculum is designed to enable graduates to meet the standards of nursing practice in Canada and be eligible for registration in Nova Scotia.

In addition to the Dalhousie Halifax Campus, students may complete a BScN degree on site in Yarmouth, Nova Scotia. Students interested in this option should contact the nursing.inquires@dal.ca for further information.

Program Objectives

The Bachelor of Science (Nursing) graduate will:

1. Demonstrate application of people-centred nursing art and science through critical inquiry, commitment to life-long learning and informed practice.

2. Practice competently by applying the principles of primary health care with diverse *clients in a variety of health care contexts and by responding to emerging trends, technology, and concepts in health.
3. Communicate, collaborate and partner with *clients, and other members of the health care team to increase capacity and enhance health of populations.
4. Demonstrate ethical, legal and professional accountability in the practice of nursing and remain committed to professional competence through life-long learning.
5. Influence nursing and health care through a social and political analysis of current health care issues and application of leadership skills.

*(individuals, family, groups, community and/or populations)

Bachelor of Science (Nursing)

The Bachelor of Science in Nursing degree is a 120-credit hour program. Graduates are eligible to write licensure examinations for membership with the Nova Scotia College of Nursing (NSCN).

Before commencing Semester 3 all students must have the following completed:

Immunization

Students are responsible for having complete and current immunizations against diphtheria, polio, tetanus, pertussis, measles, mumps, rubella, Hepatitis B and a 2-step Mantoux. Students will be **denied** access to clinical agencies if immunizations are not current and complete.

CPR, (HCP) and Standard First Aid Certification

Students must have CPR (Health Care Provider Level) and Standard First Aid certification. CPR (Health Care Provider Level) must be recertified biannually (or in compliance with the healthcare facility in which a student may be completing a clinical practicum). A cardio-pulmonary resuscitation (CPR) course and standard first-aid course are the student's responsibilities in time and cost. Online certifications are not accepted and access to clinical settings will be denied if certification is not current.

Child Abuse Registry (CAR)

All students admitted to the School of Nursing are required to submit a current Child Abuse Registry as part of their Passport for Clinical Practice Application. Students entering Semester 3 in May should not have this completed prior to January 1 and those entering Semester 3 in September should not have this completed prior to July 1.

Criminal Record Check/Vulnerable Sector Search

Students are responsible for completing a criminal record check (CRC) and Vulnerable Sector Search (VSS). Access to clinical agencies will be **denied** if these checks are not current.

Course of Study

The Program is offered at both the Halifax and Yarmouth sites. The following is an outline of courses that are taken in each semester.

Program requirements may change with ongoing curricular revisions.

Semester 1

- PHYL 1011.03: Human Physiology
- ANAT 1010.03: Basic Human Anatomy
- ASSC 1700.03: Communications for Nursing and Kinesiology
- Open elective (3 credit hours)
- Open elective (3 credit hours)

Semester 2

- PHYL 1012.03: Human Physiology
- BIOC 1420.03: Introductory Biochemistry for Nursing Students (recommended; or 3 credit hour Science elective)
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

- HAHP 2000.03: Human Growth and Development (Strongly recommended; or 3 credit hour open elective)
- MICI 1100.03: Health Science Microbiology

Semester 3

- NURS 2705.03: An Introduction to Health Assessment in Nursing Practice (First offered in September 2025)
- NURS 2710.06: Nursing and Community Health (Last offered in May 2025)
- NURS 2710.03: Population Health Nursing (First offered in September 2025)
- NURS 2715.03: Clinical Integration I
- NURS 2720.03: Health and Healing I: Pathophysiology and Therapeutics
- NURS 2730.03: Foundation of Nursing Practice

Semester 4

- NURS 2725.03: Clinical Integration II
- NURS 2740.06: Nursing and Family Health
- NURS 2750.03: Health and Healing II: Pathophysiology and Therapeutics
- HLTH 3010.03: Introduction to Research Methods

Semester 5

- NURS 3710.03: Nursing and Episodic Illness: Preventative Care and Intervention
- NURS 3715.06: Clinical Integration III
- NURS 3720.03: Professional Formation of Nursing Practice: Leadership Perspectives

Semester 6

- NURS 3725.06: Clinical Integration IV
- NURS 3730.06: Nursing in the Context of Persistent Illness: Prevention and Recovery
- Nursing Elective (3 credit hours)

Semester 7

- NURS 4705.06 Professional Reasoning and Social Responsibility
- NURS 4715.06 Exploratory Nursing Practice
- Nursing Elective (3 credit hours)

Semester 8

- NURS 4725.15: Transition to Practice

Course of Study

With the help of a faculty advisor, an individual course of study is determined. Course of study may be affected by the actua1 courses offered in an academic year. Certain courses may have prerequisites as noted in the course descriptions. The course of study may vary when the student applies non-nursing course transfer credits toward the degree. Transfer credit regulations are outlined under the Academic Regulations section of the University Calendar.

Degree Options (admitted prior to Sep 2016)

Bachelor of Science (Nursing) (Arctic Nursing)

Bachelor of Science (Nursing) (Arctic Nursing)

The Arctic Nursing Program, developed collaboratively between Nunavut Arctic College and Dalhousie University, is a four-year program that focuses on nursing in Nunavut. This program is designed for Nunavut residents. The curriculum emphasizes awareness and respect for Inuit culture and will prepare Inuit nurses to be leaders in the health-care system of Nunavut.

To learn more about the program https://www.dal.ca/faculty/health/nursing/undergraduate-program/arctic-nursing.html

Graduate Programs

For details of the Master of Nursing, the joint Master of Nursing/Master of Health Administration programs and the PhD (Nursing) program, please consult the Faculty of Graduate Studies Calendar.

Courses

Courses

Course Descriptions

NURS 2705 INTRODUCTION TO HEALTH ASSESSMENT IN NURSING PRACTICE

CREDIT HOURS: 3
Performing an accurate health assessment with diverse populations is a critical component in nursing practice. This course will focus on the development of competencies to complete both a comprehensive and focused health assessment which includes developing competencies in physical assessment. Students will develop clinical reasoning skills to interpret and document health assessment findings for clients across the lifespan. The collection of data through these skills is the first step in the clinical decision-making process to promote health, prevent illness, or manage illness.
CALENDAR NOTES: First offering in the Fall 2025 (Term 202610)
PREREQUISITES: PHYL 1011.03 and 1012.03, ANAT 1010.03, STAT 1060.03, MICI 1100.03, and ASSC 1700.03 plus an additional 15 credit hours totaling 30 credit hours of study
FORMATS: Lecture | Lab

NURS 2710 Population Health Nursing

CREDIT HOURS: 3
The structures and relationships we live in are fundamental to the development of human potential and nursing practice. Mental and physical health concerns that have significant impact on health and social wellbeing are explored. Community concepts essential for a healthy society are introduced.
CALENDAR NOTES: Revised course first time offering is the Fall 2025 (Term 202610)
PREREQUISITES: PHYL 1011.03 and 1012.03, ANAT 1010.03, STAT 1060.03, MICI 1100.03, and ASSC 1700.03 plus an additional 15 credit hours totaling 30 credit hours of study
FORMATS: Lecture | Tutorial

NURS 2715 Clinical Integration 1

CREDIT HOURS: 3
Integration of foundational nursing skills and practices, such as health history and assessment, safety, infection control, communication and relational inquiry occurs in clinical application settings. Students use multiple learning modalities to master fundamentals of nursing practice.
COREQUISITES: IPHE 4900.00
PREREQUISITES: PHYL 1011.03 and 1012.03, ANAT 1010.03, STAT 1060.03, MICI 1100.03, and ASSC 1700.03 plus an additional 15 credit hours totaling 30 credit hours of study
FORMATS: Lab

NURS 2720 Pathophysiology and Therapeutics I

CREDIT HOURS: 3
Fundamentals of health and disease patterns, the role of genetics, developmental biology and environment are explored. Cellular mechanisms, inflammatory and infectious responses and cellular biology of cancer are investigated. Diagnosis and therapeutic concepts including preventative therapies and pharmacological and non-pharmacological interventions with consideration of age and cultural variations are introduced.
PREREQUISITES: PHYL 1011.03 and 1012.03, ANAT 1010.03, STAT 1060.03, MICI 1100.03, PHYL 1000X/Y.06, and ASSC 1700.03 plus an additional 15 credit hours totaling 30 credit hours of study
FORMATS: Lecture | Tutorial

NURS 2725 Clinical Integration 2

CREDIT HOURS: 3
Population health, family and perinatal theoretical concepts and evidence are utilized in a variety of practice settings. Family health assessments across various family life stages including focused fetal/newborn/child and parental care in dynamic interprofessional settings enable students to apply theory to practice.
COREQUISITES: IPHE 4900.00
PREREQUISITES: NURS 2705.03, NURS 2710.03, NURS 2715.03, NURS 2720.03 and NURS 2730.03
FORMATS: Lab

NURS 2730 Foundation of Nursing Practice

CREDIT HOURS: 3
Ethical, professional, legal concepts and theories guiding professional nursing practice are examined. Professional identity, collaboration, comportment, and reasoning related to nursing practices are developed. Theories and frameworks are used to investigate health and social care constructs and the impact of hierarchal structures on individual, communal and global health.
COREQUISITES: NURS 2710.03
PREREQUISITES: PHYL 1011.03 and 1012.03, ANAT 1010.03, STAT 1060.03, MICI 1100.03, and ASSC 1700.03 plus an additional 15 credit hours totaling 30 credit hours of study
FORMATS: Lecture | Seminar | Online Delivery

NURS 2740 Nursing and Family Health

CREDIT HOURS: 6
Nurses combine knowledge from primary health care and public health, social and nursing sciences, recognizing the uniqueness and diversity in family systems to support transitions that occur across the life course. Understanding health promotion, protection and prevention of illness in the context of family development is the focus.
PREREQUISITES: NURS 2705.03, NURS 2710.03, NURS 2715.03, NURS 2720.03 and NURS 2730.03
FORMATS: Lecture | Seminar

NURS 2750 Pathophysiology and Therapeutics II

CREDIT HOURS: 3
Integrating knowledge of disease, diagnosis and person-centred management is key to successful nursing practice. Specific disease processes related to body systems are described and mechanisms of therapeutic options for management are evaluated. Evidence to support use of pharmacological, non-pharmacological, alternative and complimentary treatments is evaluated
PREREQUISITES: NURS 2705.03, NURS 2710.03, NURS 2715.03, NURS 2720.03, and NURS 2730.03
FORMATS: Lecture

NURS 3710 Nursing and Episodic Illness: Preventative Care and Interventions

CREDIT HOURS: 6
Collaborating with clients across the life course during the acute phase of physical or mental illness requires a focus on preventative and curative care strategies. Utilization of evidence and application of nursing and inter-professional collaborative care and informed decision-making is examined within the context of person, family and society.
PREREQUISITES: NURS 2740.03, NURS 2725.03, NURS 2750.03, and HLTH 3010.03
FORMATS: Lecture

NURS 3715 Clinical Integration 3

CREDIT HOURS: 6
Using simulation and clinical experiential learning students apply knowledge related to caring for clients with acute, episodic illnesses from birth to death. Interprofessional practice and evaluation of the impact of collaborative care will be a focus.
COREQUISITES: IPHE 4900.00
PREREQUISITES: NURS 2740.03, NURS 2725.03, NURS 2750.03 and HLTH 3010
FORMATS: Lab | Experiential Learning

NURS 3720 Professional Formation of Nursing Practice: Leadership Perspectives

CREDIT HOURS: 3
Leadership is integral to the practice of every nurse. Examining and applying leadership theories and behaviours enable effective practices to be evaluated. The nursing role in conflict resolution, crisis intervention and therapeutic communication to manage complex situations using multiple perspectives is examined.
PREREQUISITES: NURS 2725.03, NURS 2740.03, NURS 2750.03, and HLTH 3010

FORMATS: Lecture | Seminar

NURS 3725 Clinical Integration 4

CREDIT HOURS: 6
Students apply theoretical and practical knowledge in caring for individuals and families from conception to death focusing on chronic and/or terminal illness. Significant issues related to life threatening illness, dying, and the promotion of quality of life using a collaborative care model will form the basis for practice
COREQUISITES: IPHE 4900.00
PREREQUISITES: NURS 3710.03, NURS 3715.03 and NURS 3720.03
FORMATS: Lab

NURS 3730 Nursing in the Context of Persistent Illness: Prevention and Recovery

CREDIT HOURS: 6
Using nursing and other theoretical frameworks, students focus on clients/families living with chronic and life altering diseases across the life course. Students use the nursing process, relational practice, critical inquiry and evidence to apply principles of disease management and advanced communication with a person-centred, Interprofessional approach.
PREREQUISITES: NURS 3710.03, NURS 3715.03 and NURS 3720.03
FORMATS: Lecture | Seminar

NURS 4330 Self-Directed Learning

CREDIT HOURS: 3
Students may carry out independent studies or projects related to the theory or practice of nursing, under the direction of a faculty facilitator. Students are encouraged to systematically identify, plan, execute and evaluate a learning project that is relevant to nursing practice.
PREREQUISITES: NURS 3710.03; NURS 3715.03; NURS 3720.03
EXCLUSIONS: NURS 5950.03

NURS 4331 Self-Directed Learning

CREDIT HOURS: 3
Students may carry out independent studies or projects related to the theory or practice of nursing, under the direction of a faculty facilitator. Students are encouraged to systematically identify, plan, execute and evaluate a learning project that is relevant to nursing practice.
PREREQUISITES: NURS 4330.03

NURS 4352 Exploring Concepts in Oncology

CREDIT HOURS: 3
Introduction to concepts of oncology nursing including cancer biology/pathophysiology, pain and symptom management, bio-psychosocial-ethical issues, treatment modalities, psychosocial distress and decision-making across the cancer continuum. The implications of cancer care at the individual, community, organization/system to the global level are explored. Students learn the principles, standards and competencies underpinning quality of life cancer care.
PREREQUISITES: NURS 3710.06, NURS 3720.03, NURS 3715.06
RESTRICTIONS: BScN
FORMATS: Online Delivery

NURS 4353 Multi-dimensional Aspects of Cancer

CREDIT HOURS: 3
Building on Exploring Concepts in Oncology, this course will challenge learners to consider the comprehensive care of a range of health and illness needs of individuals at risk for or living with cancer within a dynamic and changing system. The course reflects a critical analysis of the existing theoretical and evidence-informed perspectives influencing health related behaviours within the context of cancer at the individual, organizational and global levels.
PREREQUISITES: NURS 4352.03
RESTRICTIONS: BScN
FORMATS: Online Delivery

NURS 4370 Women and Aging

CREDIT HOURS: 3
This interdisciplinary nursing elective explores the issues related to socio-economic factors that are major determinants of the well-being of aging women. Topics include; aging as a process; menopause, violence against older women, older women and housing; self-image and sexuality; health and the aging woman; and older women and poverty.

PREREQUISITES: NURS 3710.03, NURS 3715.03, NURS 3720.03
CROSSLISTED: SOSA 3245.03/5245.03, GWST 3810.03, NURS 5850.03
FORMATS: Lecture | Seminar | Discussion

NURS 4371 Addictions Nursing Practice

CREDIT HOURS: 3
This nursing elective introduces major concepts associated with addiction nursing practice. It provides a foundation for students pursuing careers in addiction-related care. Within a primary healthcare perspective, students critique models and theories of addiction, consider the interplay between social, gender, cultural environments and addictions and become knowledgeable of a variety of treatment approaches. Universal, selective, and prevention activities at an individual, family and community level are explored.
CALENDAR NOTES: Students who complete NURS 4371 must also complete NURS 4372
PREREQUISITES: NURS 3710.03, NURS 3720.03 and NURS 3715.03
CROSSLISTED: NURS 5871.03
FORMATS: Online Delivery

NURS 4372 Mental Health Nursing

CREDIT HOURS: 3
Students will gain insight into individuals' experiences of mental health problems, mental disorders/psychiatric illnesses, and addictions over the life course. Multiple perspectives, including biological, nursing, sociological, philosophical and political, will guide the analysis. Treatment modalities will be critiqued. The association between nurses' relational practices and individuals' quests for life fulfillment will be examined.
PREREQUISITES: NURS 4371.03, NURS 3710.03, NURS 3720.03 & NURS 3715.03
FORMATS: Online Delivery

NURS 4380 Introduction to Epidemiology Methods in Nursing Practice

CREDIT HOURS: 3
This introductory course is intended to provide students at both the undergraduate and graduate level with a working knowledge and understanding of the basic concepts and methods of epidemiology. The main focus of this course will be to learn to analyse and interpret information about disease (i.e. both acute and chronic) and other health related occurrences at a population level (e.g. risk factors, diversity, determinants of health) within a Public and Community Health Nursing context. This course will also provide an introduction to the concepts for developing, implementing and evaluating public health programs and, for independent inquiry and decision making around public health policy. There are no prerequisites for this course though students are required to have completed their second year of their undergraduate program or have permission from the course instructor. A clinical background and a basic understanding of statistics for the Graduate students are essential but not necessary for Undergraduate students.
PREREQUISITES: NURS 3710.03; NURS 3720.03; NURS 3715.03
FORMATS: Online Delivery

NURS 4381 Public Health Nursing

CREDIT HOURS: 3
This course provides an opportunity for students to advance their introductory knowledge of public health nursing principles, roles, and functions. Public health nursing integrates knowledge from public health and nursing science to promote, protect, improve and restore the health of populations. The focus will be on advancing their understanding and application of population health, priority setting and planning approaches, partnerships, public policy literacy and health equity.
CALENDAR NOTES: NURS 4381 being taught by St. FX for the Fall 2020 semester
PREREQUISITES: NURS 3710.03; NURS 3720.03; NURS 3715.03
FORMATS: Online Delivery

NURS 4410 Perinatal Nursing across the Childbearing Continuum

CREDIT HOURS: 3
Students build upon core curriculum knowledge of the perinatal experience. The nature of the childbearing experience is critically analyzed from multiple perspectives, while evidence-informed nursing care for childbearing families with health complexities is appraised. Theory underlining processes of maternal transformation, person-centered care, relational practice and parent-infant attachment overlay these analyses.
PREREQUISITES: NURS3710, NURS3720, NURS3715
RESTRICTIONS: Only for BScN UG Students
FORMATS: Online Delivery

NURS 4420 Paediatric Nursing

CREDIT HOURS: 3
Recognizing the unique health needs of children, this course focuses on the synthesis of knowledge and the partnership between the nurse, child, family and interprofessional team. Students will integrate developmentally supportive, family-centred care and application of nursing management with the paediatric population experiencing serious episodic and persistent illness and hospitalization.
PREREQUISITES: NURS3710, NURS3720, NURS3715
RESTRICTIONS: Only for BScN UG Students
FORMATS: Online Delivery

NURS 4471 Emergency Preparedness: A Nursing Perspective

CREDIT HOURS: 3
This course focuses on preparation of future nurses for various hazards using an "all hazards" approach. Local, provincial and national disaster response systems, in the event of a mass casualty, are explored, and the ability to care for victims and responders of all types of hazards is emphasized.
PREREQUISITES: NURS 3710.03; NURS 3715.03 & NURS 3720.03
EXCLUSIONS: NURS 2390
FORMATS: Online Delivery

NURS 4472 Critical Care Nursing

CREDIT HOURS: 3
With the focus on critical care nursing in the intensive care area, students will further develop, critically analyze, and apply knowledge gained in previous courses with a focus on the management of critically ill clients. Emphasis includes working with clients across the lifespan and inter-professional relationships and collaborative management within specialty practice.
PREREQUISITES: NURS 3710.03, NURS 3715.03, NURS 3720.03
EXCLUSIONS: NURS 3320.03
FORMATS: Online Delivery

NURS 4473 Emergency Nursing

CREDIT HOURS: 3
With the focus on emergency nursing in the emergency room area, students will further develop, critically analyze, and apply knowledge gained in previous courses with a focus on the management of clients requiring emergency care. Emphasis includes working with clients across the lifespan and inter-professional relationships and collaborative management within specialty practice.
CALENDAR NOTES: This course will be first offered in Summer 2025.
PREREQUISITES: NURS 3710, NURS 3715, NURS 3720
RESTRICTIONS: Available only for BScN Students
FORMATS: Online Delivery

NURS 4705 Nursing 4705.06 Professional Reasoning & Social Responsibility

CREDIT HOURS: 6
Learners synthesize principles of relational inquiry, professional practice, and multiple ways of knowing related to health and social care. This course offers immersive learning experiences to facilitate collaboration with and across diverse populations and communities. In a seminar setting learners engage in critical reflection and scholarly discussion related to clinical experiences, in the context of current trends and issues.
CALENDAR NOTES: The first offering of this course will be in the Winter 2025. For incoming BScN students, this will affect those starting in the Fall 2023. This course will replace NURS 4710 and NURS 4720
PREREQUISITES: NURS 3725; NURS 3730; 3 Credit Nursing Elective
RESTRICTIONS: Only BScN students
FORMATS: Seminar

NURS 4715 Clinical Integration V

CREDIT HOURS: 6
Students engage in a broad range of clinical, research or theoretical activities, under the direction of faculty or clinical preceptor/facilitator to complete a project relevant to nursing practice. These learning experiences will assist the student to understand the complexity of the integrated nursing ole across a range of settings.
COREQUISITES: IPHE 4900
PREREQUISITES: NURS 3730.03 and NURS 3725.03
RESTRICTIONS: Restricted to Dalhousie BScN students
FORMATS: Experiential Learning

NURS 4725 Transition to Practice

CREDIT HOURS: 15

Students consolidate nursing knowledge and entry-to-practice competencies through intensive, reflective, mentored practice. Emphasizing the professional nursing role, collaboration, interprofessional teamwork, advocacy, time management, priority setting and leadership are key components of relational practice. Peer-to-peer mentoring and self-directed lifelong learning skill development support preparation for National Licensure examination and ongoing professional development.

COREQUISITES: IPHE 4900

PREREQUISITES: NURS 4710.03, NURS 4715.06, NURS 4720.03 (Prior to Summer 2025); NURS 4705.06 (First offered Winter 2025)

FORMATS: Experiential Learning

NURS 4821 Aging and the Older Adult

CREDIT HOURS: 3

This course covers the process of growing older with reference to theories on universal aging. Students will learn to improve the function, quality of life, and self-care abilities of the elderly well, to assist them in maintaining independence. Topics include aging-related changes; the role of the family and other aggregates; how elderly adults define and promote their health; the use of community resources.

NURS 8100 Anatomy and Physiology I

CREDIT HOURS: 6

Provides students with an understanding of the fundamental principles of human anatomy and physiology. This course will enable students to describe and explain the gross anatomy and histology of the human body. Students will study the functions of the organs and systems of the body focusing in basic cellular physiology. Learners will study the functions of the organs and systems of the body as they relate to nursing practice. The course will also explore the integration of functions within the body. Additional lab requirement 2 hours per week

CALENDAR NOTES: Nunavut Arctic College (NAC) Course Number is ANPH 8100.45

RESTRICTIONS: Open for Nunavut Arctic College BScN students only.

FORMATS: Lecture | Lab

NURS 8101 Anatomy and Physiology II

CREDIT HOURS: 3

Provides students with an understanding of the fundamental principles of human anatomy and physiology. This course will enable students to describe and explain the gross anatomy and histology of the human body. Students will study the functions of the organs and systems of the body focusing in basic cellular physiology. Learners will study the functions of the organs and systems of the body as they relate to nursing practice. The course will also explore the integration of functions within the body. Additional lab requirement 2 hours per week

CALENDAR NOTES: Nunavut Arctic College (NAC) Course Number is ANPH 8101.45

RESTRICTIONS: Open for Nunavut Arctic College BScN students only.

FORMATS: Lecture | Lab

NURS 8102 Introduction to Psychology for Nursing

CREDIT HOURS: 3

An overview of psychological theory is used to introduce students to the biopsychosocial factors that influence human behaviour. Students develop an understanding of personality development, the biology of behaviour, sensation and perception, learning and other concepts involved in the social behaviour of humans.

CALENDAR NOTES: Nunavut Arctic College (NAC) Course Number is PSYO 1000.03

RESTRICTIONS: Open for Nunavut Arctic College BScN students only.

FORMATS: Lecture

NURS 8103 Introduction to Sociology for Nursing

CREDIT HOURS: 3

Provides students with an overview of general concepts of sociology and how they relate to the structure and function of communities in circumpolar environments. The impact of the historical relationship between Inuit and non-Inuit people on Inuit social structures, processes, and the health of families and communities are explored.

CALENDAR NOTES: Nunavut Arctic College (NAC) Course Number is ENGL SOCI 1000

RESTRICTIONS: Open for Nunavut Arctic College BScN students only.

FORMATS: Lecture | Lab

NURS 8104 Academic Writing

CREDIT HOURS: 3
The course will explore a variety of issues in academic writing such as style, argument, format and the presentation of information. The course is designed to prepare students to write academic papers. Frequent written exercises will be required.
CALENDAR NOTES: Nunavut Arctic College (NAC) Course Number is ENGL 1100.03
RESTRICTIONS: Open for Nunavut Arctic College BScN students only.
FORMATS: Lecture

NURS 8105 Introductory Biochemistry for Nursing Students

CREDIT HOURS: 3
Topics discussed include the structure, biosynthesis and functions of biologically important compounds, enzymes, control of metabolism, genetic engineering and nutrition. Medical aspects are stressed.
CALENDAR NOTES: Nunavut Arctic College (NAC) Course Number is BIOC 8100.03
RESTRICTIONS: Open for Nunavut Arctic College BScN students only.
FORMATS: Lecture

NURS 8106 Health Science Microbiology

CREDIT HOURS: 3
An introduction to microbiology and infectious diseases only for healthcare professionals. It includes a study of the structure and physiology of microorganisms, the ways microorganisms cause disease in man and the way they affect human's wellbeing.
CALENDAR NOTES: Nunavut Arctic College (NAC) Course Number is MICI. 1101.03
RESTRICTIONS: Open for Nunavut Arctic College BScN students only.
FORMATS: Lecture | Tutorial

NURS 8110 Teaching and Learning

CREDIT HOURS: 3
Students will critically analyze and integrate the teaching-coaching domain of nursing practice through examination of the developmental, sociocultural and motivational conditions that affect teaching and learning. Principles and theories of learning are used to develop health education strategies for diverse populations. Students will develop communication and teaching skills.
RESTRICTIONS: NURS 8110 is reserved for BScN students attending the Arctic College only.

NURS 8111 Foundations of Nursing Practice

CREDIT HOURS: 3
Ethical, professional, legal concepts and theories guiding professional nursing practice are examined. Professional identity, collaboration, comportment, and reasoning related to nursing practices are developed. Theories and frameworks are used to investigate health and social care constructs and the impact of hierarchal structures on individual, communal and global health.
RESTRICTIONS: NURS 8111 is reserved for BScN students attending the Arctic College only.

NURS 8115 Clinical Integration I

CREDIT HOURS: 3
Integration of foundational nursing skills and practices, such as health history and assessment, safety, infection control, communication and relational inquiry occurs in clinical application settings. Students use multiple learning modalities to master fundamentals of nursing practice.
RESTRICTIONS: NURS 8115 is reserved for BScN students attending the Arctic College only.

NURS 8210 Health & Healing I: Pathophysiology and Therapeutics

CREDIT HOURS: 3
Fundamentals of health and disease patterns, the role of genetics, developmental biology and environment are explored. Cellular mechanisms, inflammatory and infectious responses and cellular biology of cancer are investigated. Diagnosis and therapeutic concepts including preventative therapies and pharmacological and non-pharmacological interventions with consideration of age and cultural variations are introduced.
RESTRICTIONS: NURS 8210 is reserved for BScN students attending the Arctic College only.

NURS 8211 Community and Mental Health Nursing

CREDIT HOURS: 3
The structure and relationships in our existence are fundamental to the development of human potential and nursing practice. Community concepts for a healthy society in the context of northern communities will be introduced. Mental, spiritual, and physical health concerns that impact on health and social

well-being in communities will be explored.
RESTRICTIONS: NURS 8211 is reserved for BScN students attending the Arctic College only.

NURS 8212 Contemporary Issues in Health Care

CREDIT HOURS: 3
The changing patterns of health care delivery and increasing complexity in all practice environments are examined. The nurses' role requires exploration of clients' unique biopsychosocial spiritual and cultural needs and advocacy of health choices and decisions. Ethical decision making and reasoning related to nursing practices are developed.
RESTRICTIONS: NURS 8212 is reserved for BScN students attending the Arctic College only.

NURS 8215 Clinical Integration II

CREDIT HOURS: 3
Through clinical application (using simulation & clinical experiential learning) students will integrate nursing process, critical thinking, relational practice and evidence-informed decision making in caring for clients with acute and chronic alterations in health to achieve optimal functioning.
RESTRICTIONS: NURS 8215 is reserved for BScN students attending the Arctic College only.

NURS 8220 Health & Healing II: Pathophysiology and Therapeutics

CREDIT HOURS: 3
Integrating knowledge of disease, diagnosis and person-centred management is key to successful nursing practice. Specific disease processes related to body systems are described and mechanisms of therapeutic options for management are evaluated. Evidence to support use of pharmacological, non-pharmacological, alternative and complimentary treatments is evaluated.
RESTRICTIONS: NURS 8220 is reserved for BScN students attending the Arctic College only.

NURS 8221 Nursing Research, Epidemiology & Evidence Informed Practice

CREDIT HOURS: 3
Examines the methods used to generate, apply and evaluate knowledge in nursing and health care focusing on the basic processes of quantitative, qualitative and epidemiological research. The emphasis is on analysis, synthesis and evaluation of research and the implications for theory and evidence-informed nursing practice. Collaboration with inter-professional research teams is described.
RESTRICTIONS: NURS 8221 is reserved for BScN students attending the Arctic College only.

NURS 8222 Foundations of Clinical Nursing Practice

CREDIT HOURS: 3
Collaborating with adults across the life course who experience acute and/or chronic physical or mental illness requires a focus on preventative and curative care strategies. Utilization of evidence and application of nursing and interprofessional collaborative care and informed decision-making is examined within the context of person, family, and society.
RESTRICTIONS: NURS 8222 is reserved for BScN students attending the Arctic College only.

NURS 8225 Clinical Integration III – Medical Surgical Nursing in Acute and Chronic Settings

CREDIT HOURS: 6
Using simulation and clinical experiential learning students apply knowledge related to caring for clients with acute, episodic illnesses from birth to death. Interprofessional practice and evaluation of the impact of collaborative care will be a focus.
RESTRICTIONS: NURS 8225 is reserved for BScN students attending the Arctic College only.

NURS 8310 Professional Formation: Leadership Perspectives

CREDIT HOURS: 3
Leadership is integral to the practice of every nurse. Examining and applying leadership theories and behaviours enable effective practices to be evaluated. The nursing role in conflict resolution, crisis intervention and therapeutic communication to manage complex situations using multiple perspectives is examined.
RESTRICTIONS: NURS 8310 is reserved for BScN students attending the Arctic College only.

NURS 8311 Nursing Concepts for the Aging Adult Population

CREDIT HOURS: 3
Guided by the principles of Primary Health Care students focus on the psychosocial, cultural, cognitive, and spiritual health of adults and on nursing practices that promote health in adults at specific developmental stages. Issues of determinants of health are specifically addressed. Strategies to promote healthy aging at the individual, family, and community level are explored.
RESTRICTIONS: NURS 8311 is reserved for BScN students attending the Arctic College only.

NURS 8312 Nursing Concepts for Childbearing Families

CREDIT HOURS: 3
Focuses on the concepts of health related to childbearing families including assessment during pregnancy, birth and post-partum. Approaches to perinatal care and the role of midwifery in northern communities are explored. Theories and concepts in caring for the family as client are utilized
RESTRICTIONS: NURS 8312 is reserved for BScN students attending the Arctic College only.

NURS 8315 Clinical Integration IV

CREDIT HOURS: 3
Population health, family and perinatal theoretical concepts and evidence are utilized in a variety of practice settings. Family health assessments across various family life stages including focused fetal/newborn/child and parental care in dynamic inter-professional settings enable students to apply theory to practice.
RESTRICTIONS: NURS 8315 is reserved for BScN students attending the Arctic College only.

NURS 8320 Nursing Concepts for Children, Adolescents and Young Adults

CREDIT HOURS: 3
Principles of Primary Health Care are applied to health promotion, risk reduction, disease prevention, and common health problems experienced by infants, children, young adults, and their families in rural and remote settings. Concepts of healthy development, illness, and disability, related to the health of the child, adolescent, young adult and family unit are explored.
COREQUISITES: NURS8325.06
PREREQUISITES: NURS8110.03, NURS8222.03, NURS8225.03
FORMATS: Lecture

NURS 8321 Community and Population Health

CREDIT HOURS: 3
Students focus on integration of community, public health theory and nursing practice as it applies to primary health care within a population health context. The philosophical basis, roles, settings and functions of community health nursing will be examined and used to explore evidence-informed nursing care delivery to persons, families and populations in community settings.
CALENDAR NOTES: 3 Hour Lecture, 1 Tutorial/week
PREREQUISITES: NURS8211.03, NURS8222.03, NURS8225.03
FORMATS: Lecture | Tutorial

NURS 8325 Clinical Integration V: Children, Adolescents and Young Adults

CREDIT HOURS: 6
Students participate in the care of children, adolescents, young adults and families along a continuum from prevention to specialized care. Through project work students develop an understanding of health equity using principles of primary health care and social determinants of health to positively influence the health profiles of the pediatric population living in the North.
CALENDAR NOTES: 6CR, 220 hours Lab/Sim/Clinical Practice
COREQUISITES: NURS8320.06
PREREQUISITES: NURS8222.03, NURS8225.03
FORMATS: Lab | Experiential Learning

NURS 8335 Clinical Integration VI: Nursing Care of Clients Experiencing Episodic and Persistent Illness

CREDIT HOURS: 6
Students apply the principles of Primary Health Care through the integration and application of nursing knowledge and theory to collaborate with clients experiencing episodic and persistent alterations of health, and assist them to meet their optimal level of functioning. Students will work with clients through a continuum of care. Clinical practice will occur in a variety of settings focusing on health issues in urban settings. 220 hours Clinical Practice
PREREQUISITES: NURS8211.03, NURS8222.03, NURS8225.03
FORMATS: Experiential Learning

NURS 8410 Relational Practice and Advanced Clinical Reasoning

CREDIT HOURS: 3
Students engage in relational inquiry, clinical reasoning and multiple ways of knowing related to health and social care. Evaluation of evidence in the context of person-centred care forms the basis for reflective practice that promotes health and wellness and supports management of complex situations.
PREREQUISITES: NURS 8335
FORMATS: Lecture | Lab | Tutorial | Online Delivery

NURS 8411 Professional Formation: Nursing and Social Responsibility

CREDIT HOURS: 3
Collaborating with and across professions, theoretical frameworks are critiqued and applied to gain insight into the nursing role that influences policies and practices in health care. Evaluation of the processes that influence and support change, as well as system inertia, will assist in developing strategies to improve health for society
PREREQUISITES: NURS 8335
FORMATS: Lecture | Lab | Tutorial | Online Delivery

NURS 8415 Exploratory Nursing Practice

CREDIT HOURS: 3
Students engage in relational inquiry, clinical reasoning and multiple ways of knowing related to health and social care. Evaluation of evidence in the context of person-centred care forms the basis for reflective practice that promotes health and wellness and supports management of complex situations.
PREREQUISITES: NURS 8335
FORMATS: Lecture | Lab | Tutorial | Online Delivery

NURS 8425 Transition to Practice in the North I

CREDIT HOURS: 6
Students synthesize their nursing knowledge and refine entry-to practice competencies through integration of theory and practice in concentrated clinical mentorship programs. Through intensive engagement in application of evidence-informed and person-centered care, students are able to develop and refine skills to enhance future nursing practice that is specific to northern nursing.
PREREQUISITES: NURS 8415
FORMATS: Experiential Learning

NURS 8435 Transition to Practice in the North II

CREDIT HOURS: 6
Students consolidate nursing knowledge and entry-to-practice competencies through intensive, reflective, mentored practice. Emphasizing the professional nursing role, collaboration, interprofessional teamwork, advocacy, time management, priority-setting and leadership are key components of relational practice. Peer-to-peer mentoring and self-directed lifelong learning skill development support preparation for National Licensure examination and ongoing professional development.
PREREQUISITES: NURS 8415
FORMATS: Experiential Learning

Occupational Therapy

Occupational Therapy

School of Occupational Therapy

Location:
Forrest Building
5869 University Avenue
Room 215
PO BOX 15000
Halifax NS

B3H 4R2

Phone Number: (902) 494-8804
Fax Number: (902) 494-1229
Email Address: occupational.therapy@dal.ca
Website: www.dal.ca/faculty/health/occupational-therapy.html

Introduction

Located within the Faculty of Health, the Atlantic School of Occupational Therapy was established in 1982. The regional orientation of the School fosters collaborative teaching, research and professional activities linking those at the university with service providers, government workers, related disciplines and citizens in the four Atlantic Provinces. This regional mandate is combined with an international perspective linking Dalhousie with universities and communities for fieldwork and research. The School of Occupational Therapy offers two MSc degrees: 1) an in-person clinical degree to become an occupational therapist and 2) a fully online degree in occupational science, with coursework-only or thesis-based options.

Occupational Therapy: Occupational therapy is a regulated *health profession* concerned with promoting participation in meaningful and desired daily life occupations (e.g., caring for the self or home, engaging in leisure pursuits, working, studying). Occupational therapists work to promote justice and equity so that all persons have the opportunity and ability to engage in meaningful daily occupations. Within occupational therapy, health is viewed broadly as having the ability, opportunity and resources, for quality of life with meaningful engagement in desired activities in supportive environments.

As a regulated health profession, occupational therapists use their unique and diverse knowledge and skills to enable individuals, groups, and organizations to overcome obstacles that limit their ability to do the things they need and want to do. Obstacles addressed by occupational therapists may include illness, injury, physical or mental disability, developmental delay, social disadvantage, old age, and environmental barriers within the home, community and workplace. The focus of occupational therapy is to enhance occupational performance and engagement through enabling individual change, occupational change and/or enabling change in physical and social environments, policies or legislation. Strategies may facilitate change in skills, attitudes, routines, design of buildings, use of assistive technology, policies, etc.

The role of an occupational therapist is varied and challenging. Occupational issues are never the same because no two people or environments are ever exactly the same. The challenge for occupational therapists is to plan and implement the "just right" program or strategy for each and every client so that everyone can achieve just opportunities to participate in society.

Occupational Science: Occupational Science is an interdisciplinary field in the social, health and behavioral sciences that studies the nature and function of human occupation (the things people do in their everyday lives) as it relates to the health and well-being of individuals, communities and societies. Occupation in this field of study is viewed broadly to include everything we do to "occupy" ourselves such as enjoying life, looking after ourselves and others, and contributing to the social and economic productivity of our communities. Simply put, occupations are all the things we want, need, or have to do. Occupational Science explores what people do and why, as well as the meanings ascribed to doing, by individuals and the broader society. Not only does occupational science provide foundational research that can inform occupational therapy, the science of doing can inform and build on work in many different fields. The MSc in Occupational Science is an online graduate degree, involving a thesis or major project, that teaches students to complete research related to the science of doing, with a particular focus on critical thinking, research methodologies and social change. An MSc in Occupational Science provides a foundation for further research or work that guides change in organizational, health, accessibility, or public/social policy that can support improvements in human and social capital. Such research and work can contribute to industry, government and the private sector across multiple fields and disciplines, such as, but not limited to: policy studies, accessibility and inclusion, critical health or disability studies, disability management, mental health, occupational health and safety, occupational therapy, leisure and recreation, organizational management and planning, to name a few. Please note that although an MSc in Occupational Science would provide an excellent foundation for study in occupational therapy, this degree does NOT lead to becoming an occupational therapist, a regulated health professional.

Degrees Offered

In concert with national standards and requirements for occupational therapy education, the School of Occupational Therapy at Dalhousie University only offers graduate level degree programs. For further information on our occupational therapy degree programs, please refer to the Graduate Calendar.

We do offer undergraduate courses in Occupational Science (see courses for more information). For further information on our Occupational Therapy and Occupational Science Masters degree programs, please refer to the Graduate Calendar."

Certificate in Disability Management

The School of Occupational Therapy offers a 4-course Certificate Program in Disability Management that is open to students currently enrolled in an undergraduate degree program at Dalhousie or another Canadian university, as well as individuals who are not pursuing a degree but wish to enhance their knowledge and skills in this area.

The certificate is comprised of four academic 3-credit hour university-level courses, delivered completely online. Learners are not required to visit the Dalhousie campus at any point during the program.

The program is built around the philosophy of disability management and early assistance as the most effective means by which to assist injured and ill workers to attain their maximum level of functioning and ability to return-to-work. Disability management is designed to benefit injured workers through its participatory and proactive problem-solving process incorporating strategies that ensure workers timely and safe return-to-work.

The program also serves as a strong academic foundation and pathway to further study in Occupational Therapy and Occupational Science, where understanding the intersection of work, health, and participation is essential.

Please refer to the Disability Management section in this calendar for additional information.

Staff

Director
Rushton, P., MCISc (OT), PhD (UBC). Measurement, intervention, knowledge translation and education related to improving the wheeled mobility of both adults and children through an improved wheelchair service provision process

MSc (Occupational Therapy) Graduate Student Coordinator
Askari, S., BSc (OT) (Shahid Beheshti University of Medical Sciences), MSc (OT) (Iran University of Medical Science), BA (Payam Noor University), PhD (McGill)

MSc (Occupational Science) Graduate Coordinator
Kiepek, N., BSc (Hon) (Toronto), MSc (OT) (Toronto), PhD (Western), LLM (Dalhousie). Substance use, nonsanctioned occupations, evidence-informed law, healthcare equity

Professors Emeriti
O'Shea, B., DipP & OT (Toronto), BSc (Queens), MS (Colorado State), LLD (Dalhousie), Honourary PhD
Townsend, E., DipP & OT, BSc (OT) (Toronto) MAdEd (St. FX), PhD (Dalhousie)

Professors
Beagan, B., BA, MA (Dalhousie), PhD (UBC). Sociology of health and illness, health profession education, social inequality, research methodology
MacKenzie, D.E., BSc Physical Education (Saskatchewan), BSc (OT) (Alberta), MA (Ed) (MSVU), PhD (Dalhousie). Observation and eye movement, Neurological rehabilitation, and interprofessional education
Phelan, S.K., BSc (Hon) (Guelph), MSc (OT), PhD (Western). Critical Disability, Childhood Disability, Children's Culture, Qualitative Methodology

Associate Professors
Dieleman, C., BSc (OT) (Western), MSc, PhD (Queen's). Mental health care for criminal offenders with mental illness, policy implementation in dual prison hospitals, understanding crime as occupation
Ghanouni, P., BSc (OT), MSc (OT) (Shahid Beheshti University of Medical Sciences), PhD (UBC)
Kiepek, N., BSc (Hon) (Toronto), MSc (OT) (Toronto), PhD (Western), LLM (Dalhousie). Substance use, nonsanctioned occupations, evidence-informed law, healthcare equity
Merritt, B., BS (Psychology), MS (OT), PhD (Colorado State). Occupation-based assessment, occupational therapy theory, educational leadership, efficacy of occupation-based practice
Rushton, P., MCISc (OT), PhD (UBC). Measurement, intervention, knowledge translation and education related to improving the wheeled mobility of both adults and children through an improved wheelchair service provision process

Assistant Professors
Askari, S., BSc (OT) (Shahid Beheshti University of Medical Sciences), MSc (OT) (Iran University of Medical Science), BA (Payam Noor University), PhD (McGill)
Lauckner, H., BSc (OT), MSc, PhD (Queen's). Community development and occupational therapy; community-base rehabilitation;

qualitative research; fieldwork education
Pride, T., BSc (Dalhousie), MSc (OT) (Dalhousie), PhD (Dalhousie)

Senior Instructor
Harris, J., BScHon (Kinesiology), MSc Kinesiology, MSc (OT), (Dalhousie)
Landry, K., BSc (OT), MSc (Rehabilitation Research-Physiotherapy) (Dalhousie)

Instructor
Joudrey, K., BSc (OT), (Dalhousie)
Shephard, D., BSc (Dalhousie), MSc(OT) (Dalhousie)
Sibbald, K., BSc (Univ. of King's College / Dalhousie), MSc (OT) (Dalhousie), PhD (Dalhousie)
Tawashy, A., BSc (British Columbia), MSc (British Columbia), MSc (OT) (Dalhousie)
Valavaara, K., BA(Hons) (Alberta), MSc (OT) (Alberta)

School Fieldwork Education Coordinator
Harris, J., BScHon (Kinesiology), MSc Kinesiology, MSc (OT), (Dalhousie)

International Fieldwork Education Coordinator and Graduate Student Coordinator of MScOS Program
Lauckner, H., BSc (OT), MSc, PhD (Queen's). Community development and occupational therapy; community-base rehabilitation; qualitative research; fieldwork education

Provincial Fieldwork Education Coordinators
Newfoundland: **Moores, P.,** BSc (OT) (Hons) (Queen's)
Nova Scotia: **Harris, J.,** BScHon (Kinesiology), MSc Kinesiology, MSc (OT), (Dalhousie)
Prince Edward Island: **Reid, L.**, BA (Psychology) (UPEI), BSc (OT) (Dalhousie)

Cross Appointments
Rudnick, A., BMedSc (Hebrew University), MD (Hebrew University), MPsych (Tel Aviv), PhD (Tel Aviv)

Adjunct (FGS)
Farias Vera, L., BSc (OT) (University of Chile), MSc (OT) (Amsterdam University), PhD (Western)
Galvaan, R., BSc (OT), MSc (OT), PhD (University of Cape Town)
Rebeiro Gruhl, K., BSc (OT) (Western U), MSc (OT) (Western U), PhD, Rural and Northern Health (Laurentian U)
Malfitano, A., BHSc (OT) (Federal University of Sao Carlos), ME (Estadual University of Campinas), PhD (University of Sao Paolo)
Shaw, L. E., BSc (OT), MSc (OT), PhD, (Western)
Sholdice, K., BSc (Toronto Metropolitan)

Courses

Courses

Note
The School does not currently offer an undergraduate degree.

We offer undergraduate courses for continuing professional development, refresher education and/or to advance one's knowledge of occupational science. Not all courses are offered each year. Please contact the School for the current course offerings and enrollment in a single course.

Course Descriptions

OCCU 2000 Occupation and Daily Life
CREDIT HOURS: 3
This introductory course for students in any field of study is designed to explore the meaning of occupation in everyday life. Typically, the term "occupation"

refers to categories of paid work. This course will explore a broader understanding of occupation as a framework for daily living; namely what we need to do, want to do, or have to do daily, and over time. Students will be exposed to a broad range of literature on occupation, including personal and environmental factors that influence, and are influenced by, occupation. Students will gain a deeper understanding of occupation as the foundation of everyday life through a range of perspectives and experiential activities.
FORMATS: Lecture

OCCU 3500 Human Occupations Across the Lifespan

CREDIT HOURS: 3
Designed for students from any discipline, this course builds on basic concepts in occupational science. We explore how human development from infancy through late adulthood shapes participation, performance and meaning in occupations. Far beyond employment, 'occupation' means those purposeful activities that occupy time, energy, and attention.
FORMATS: Lecture

OCCU 4500 To Do or Not to Do: Social Sanctioning of Occupations

CREDIT HOURS: 3
This course will cover the key concepts and debates in occupational science, with focus on the social structures which lead to the binary labelling of occupations as "sanctioned" and "non-sanctioned." Students will gain in-depth understanding of the way society shapes the values and statuses associated with occupations, where available through a comparative, cross-cultural perspective. This will be achieved through a comprehensive, interdisciplinary study of literature relevant to occupations.
EXCLUSIONS: OCCU 5500 (co-located)
FORMATS: Lecture

Pharmacy

College of Pharmacy

Location:
George A. Burbidge Building
5968 College Street

PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 494-2378

Email Address: pharmacy@dal.ca
Website: www.dal.ca/pharmacy

History

Formal pharmacy education in the Maritime provinces began in 1908, with evening classes in pharmacy and chemistry conducted in the Nova Scotia Technical College. Success of these courses encouraged the Nova Scotia Pharmaceutical Society to establish the Nova Scotia College of Pharmacy in 1911. The College was affiliated with Dalhousie University in 1912.

The New Brunswick Pharmaceutical Society and the Prince Edward Island Pharmaceutical Association were admitted to affiliation with the College in 1917 and 1950, respectively. With the affiliation of the former society, the College was renamed the Maritime College of Pharmacy.

In 1961, the Maritime College of Pharmacy was admitted into Dalhousie University as the College of Pharmacy, a constituent part of the new Faculty of Health Professions. A four-year baccalaureate program was introduced. In 2020 the BSc(Pharm) Program was replaced by the Doctor of Pharmacy (PharmD) Program.

In 1966, a Master's program was established, followed by a Doctor of Philosophy program in 1977.

In 1972, a twelve-month pharmacy residency program was initiated by Camp Hill Hospital in cooperation with the College of Pharmacy. Programs were initiated at the Halifax Infirmary in 1974, at the Victoria General Hospital in 1981 and at the Saint John Regional Hospital in 1982.

In the fall of 1968, the College of Pharmacy moved into the George A. Burbidge Pharmacy Building. This building, the former Medical Sciences Building was renamed in honour of the first Dean of the College, in recognition of his contribution to pharmacy education in the Maritimes. Present facilities accommodate approximately 360 undergraduate students.

College of Pharmacy Mission Statement

Mission
Advance Maritime health through pharmacy education and research.

Accreditation
The Doctor of Pharmacy Program of the College of Pharmacy at Dalhousie University has been awarded Provisional Accreditation Status by the Canadian Council for Accreditation of Pharmacy Programs.

MacDonald, T., BSc(Biology), BSc (Honours) (Marine Biology), BSc (Pharm) (Memorial), PharmD (Florida)
Mulherin, K.,BSc(Pharm) (Dalhousie), PharmD (UofT)

PEP Associates
Throughout the Maritime provinces pharmacist preceptors in community and hospital pharmacies participate in structured practice experience programs (PEP). The College of Pharmacy would like to acknowledge the valuable and essential contribution that preceptors make to the education process. Sincere thanks and appreciation is extended to all preceptors for the time and energy they devote to students.

The PEP is administered by the College with the support of the provincial pharmacy regulatory authorities in the Maritimes. First, second, and fourth-year students demonstrate their knowledge and professional competency in practice rotations in community pharmacy, collaborative patient care, and elective sites.

College of Pharmacy Regulations
All students are required to observe the University Regulations and Academic Regulations as described in this Calendar. The academic performance of each student in the College is assessed by the Student Promotions Committee.

Academic Requirements
PharmD Workload

To satisfy the requirements for the degree of Doctor of Pharmacy (PharmD), a student must achieve the minimum grade in each prescribed component as indicated in the Assessment section below. Each academic year totals 48, 43, 38 or 32 credit hours, with the program total being 161credit hours.

Students who began the program starting in Fall 2021
The curriculum is composed of problem-based learning (PBL) and other courses, which may include tutorials, lectures, labs, practice experience and other components.

Excluding practice experience courses, pharmacy courses occur in condensed blocks of learning or as longitudinal courses throughout the fall and winter terms and are weighted between 1 and 9 credit hours per course. The workload for each academic year (including practice experience courses) is:

Class of 2024:
Year 1- 48 credit hours
Year 2- 43 credit hours
Year 3- 38 credit hours
Year 4- 32 credit hours
The program total being 161 credit hours.

Class of 2025 and onward:
Year 1- 45 credit hours
Year 2- 43 credit hours
Year 3- 41 credit hours
Year 4- 32 credit hours
The program total being 161 credit hours.

Students are required to complete practice experience placements as part of the curriculum. These placements may be outside the Halifax/Dartmouth area. Students are responsible for any travel, accommodation and any other costs associated with practice experience rotations.

Students who began the program PRIOR to Fall 2021

To satisfy the requirements for the degree of Bachelor of Science in Pharmacy, a student must achieve a grade of Pass in each prescribed component. PBL courses vary in length from three to seven weeks, and are weighted as either 1.5, 3, or 6 credit hours. Each academic year totals 27, 31.5, or 33 credit hours, with the program total being 123 credit hours.

Attendance

Students who began the program starting in Fall 2021

Attendance at the tutorials, skills laboratory and pharmacy practice experience courses is mandatory. Absence must be supported with a valid reason, such as illness, with appropriate documentation, or other reason approved by the Undergraduate Education Committee. Unapproved absences will be reported to the Student Promotions Committee and may be reason for failure.

Students who began the program PRIOR to Fall 2021

Refer to Assessment, Regulation 6.

Academic Recognition

Awards

The College of Pharmacy Awards Committee administers a number of awards, each with defined criteria. Awards criteria and eligibility can be found in the Undergraduate Calendar under Awards. Dalhousie Academic Calendars - View Calendar.

Students who began the program starting in Fall 2021

Dean's List

Dean's List Standing will be awarded **each term** to students in the top 15% of the class by term GPA, where the term GPA must be greater than or equal to 3.7, as described in Academic Regulation 23.

Distinction

Distinction will be awarded to graduating students who have achieved a cumulative GPA greater than or equal to 3.7 throughout the Doctor of Pharmacy program, as described in Academic Regulation 21.2.

Students who began the program PRIOR to Fall 2021

Dean's List

Students will be assessed for Dean's List based on their knowledge assessments and class standing in the annual "Progress Exam." No student who has obtained a failing grade (FM or F) will be eligible for the Dean's List in the year in question.

Distinction

Students who have been on the Dean's List for three of the four years of the Pharmacy Program and a cumulative GPA of 3.70 or higher will graduate with Distinction.

Assessment

To satisfy the requirements for promotion within the program and completion of the Doctor of Pharmacy degree, a student must achieve the minimum required grade in each prescribed course as described below.

Minimum Grade Required to receive credit for promotion and degree completion:

Minimum grade of C/60%
Year 1: PHAR 1040.06, PHAR 1051.06, PHAR 1052.06, PHAR 1061.03, PHAR 1062.03, PHAC 1471.03, PHAC 1472.03
Year 2: PHA2021.03, PHAR 2051.09, PHAR 2052.09, PHAR 2041.01, PHAR 2042.01, PHAR 2063.03, PHAR 2064.03
Year 3: PHAR 3041.01, PHAR 3051.09, PHAR 3052.09, PHAR 3061.03, PHAR 3062.03, Pharmacy Elective.03

Minimum grade of C+/65%
Year 1: PHAR 1073.03, PHAR 1074.03, PHAR 1075.03, PHAR 1011.02
Year 2: PHAR 2013.02, PHAR 2014.02, PHAR 2073.03, PHAR 2074.03
Year 3: PHAR 3013.02, PHAR 3014.03, PHAR 3073.03, PHAR 3074.02, PHAR 3075.03

Minimum grade of Pass-
Year 1: PHAR 1183.00, PHAR 1283.00, PHAR 1083
Year 2: PHAR 2083
Year 4: IPHE 4900, PHAR 4081.12, PHAR 4082.11, PHAR 4083.09

All students must have passed all courses of the year in which they are registered in in order to register for and begin any courses included within the next year's courses. Also, all students must have passed any pre-requisite courses before being able to register for and begin a course.

1. Grading criteria, including mandatory requirements to earn a passing grade, will be described in the syllabus for each course.
2. With respect to all PBL courses, a student much pass both the student tutorial performance assessment and the course knowledge assessments.
3. Student performance will be assessed during and at the end of each PBL course. Assessment will be of both the learning process and the knowledge/skills achieved. Tutors will provide informal assessment of the student's learning process throughout a PBL course and a formal assessment (student tutorial performance assessment) at the completion of a course. Knowledge/skills will be assessed as described in the syllabus provided for each course.
4. A student who earns a grade in a single course below the required minimum, described in assessment section 1 above, will be required to meet with the Associate Director, Student Affairs to discuss remediation, supplemental assessment, and support. A student who fails to achieve other minimum requirements within a course, as described in the course syllabus, will be assigned the earned letter grade to a maximum of one letter grade below the required minimum passing grade.
5. The Student Promotions Committee of the College of Pharmacy is responsible for monitoring the academic progress of students and providing recommendations to College of Pharmacy Full Faculty Committee regarding promotion and graduation of students. Students who seek redress for the application of the regulations of the College of Pharmacy should refer to the appeals process described in Appeals section below.

Reassessment of a Grade

Students who began the program starting in Fall 2021

See Academic Regulation 16.7. In all cases of reassessment, the calculations used to arrive at the final grade will be checked. In those courses where the student has had ample time to consider marks obtained for all work done, except for the final examination, reassessment in such courses shall be done on the final examination only. For other courses, a reassessment shall include the results from all work not previously available to the student during the term.

Students who began the program PRIOR to Fall 2021

See Academic Regulation 16.7. In all cases of reassessment, the calculations used to arrive at the final grade will be checked. In those courses where the student has had ample time to consider marks obtained for all work done, except for the final examination, reassessment in such courses shall be done on the final examination only. For other courses, a reassessment shall include the results from all work not previously available to the student during the term.

Supplemental Assessment

Students who began the program starting in Fall 2021

1. A student who fails no more than one course is eligible for remedial work and supplemental assessment in that course. Eligibility for supplemental assessment will be determined at the end of the winter semester.

2. A student who fails one PBL student tutorial performance assessment must undertake remedial work during the following course, organized by the Associate Director, Student Affairs, in collaboration with the course coordinator. If the failure occurs in the final course of the year, remediation will occur during the summer. The student must successfully complete the remedial work and supplemental assessment to achieve a Pass.
3. A student who fails to meet the minimum required grade or mandatory requirements of a course as outlined in the syllabus will be required to complete remedial work and must pass a supplemental assessment. This work will be scheduled by the course coordinator in consultation with the Associate Director, Student Affairs and the students involved, and must be completed by June 30th of the academic year in question.
4. If a student successfully completes the remedial work and supplemental assessment, the earned grade will be reported on the transcript with a notation that the grade was earned by supplemental assessment.

Students who began the program PRIOR to Fall 2021

1. A student who receives a grade of FM is eligible for remedial work and supplemental assessment.
2. A student who fails one PBL student tutorial performance assessment must undertake remedial work during the following course, organized by the Associate Director, Student Affairs. If the failure occurs in the final course of the year, remediation will occur during the summer. The student must successfully complete the remedial work and supplemental assessment to achieve a Pass.
3. A student who fails the knowledge assessment or other requirement outlined in the syllabus of a PBL or non-PBL course will be required to do remedial work and must pass a supplemental assessment, which will be scheduled by the course coordinator in consultation with the Associate Director, Student Affairs and the students involved.
4. If a student fails one PBL or non-PBL course, the grade will be recorded as "FM" on the student's transcript. Failure to pass the remedial work and supplemental assessment will lead to conversion of the grade to "F". If the student successfully completes the remedial work and supplemental assessment, the passing grade will then be added to the transcript and recorded as “P” with a notation that the grade was earned by supplemental assessment.
5. Failure in a second course (either a PBL or non-PBL course) will negate a pass that may have been achieved by supplemental assessment in the first failed course. (See F.1.a below.)

Repeating Courses

Students who began the program starting in Fall 2021

1. Subject to eligibility, a student will be required to repeat courses if:
   a) the student has failed any two courses or
   b) the student has failed one course and has not successfully completed the prescribed remedial work and supplemental assessment or
   c) the final assigned grade in the course(s) was INC or ILL.
2. A student will not be permitted to participate in Pharmacy Practice Experience Placements if:
   a) they have a grade of INC or ILL in one or more courses in the current year or
   b) they have failed two courses in the current year or
   c) they have failed one course and they have not successfully completed required supplemental assessment.
3. Application to repeat courses must be made in writing to the Associate Director, Student Affairs, by July 31.
4. No student will be allowed to repeat a course more than once during the undergraduate program. All students who repeat course(s) will be assessed on performance in the repeated course(s). Courses that had not commenced prior to a leave of absence, dismissal, or withdrawal as well as courses where students have received a grade of ILL will not be considered repeat courses in application of regulations.

Students who began the program PRIOR to Fall 2021

1. Subject to eligibility, a student will be required to repeat the year if:
   a) the student has failed any two courses (PBL or non-PBL courses) or
   b) the student has failed one course and has not successfully completed the prescribed remedial work and supplemental assessment.
2. To be eligible to repeat a year, a student who has failed two courses must satisfactorily complete all other year requirements except the Practice Experience Program. However, a student with two failures will not be eligible to register in the Practice Experience Program.
3. Application to repeat the year must be made in writing to the Associate Director, Student Affairs by a predetermined date.

4. Any student who withdraws voluntarily, due to illness or other personal circumstances, and is allowed to repeat the year, will be considered a student in a repeat year unless the student withdraws before the last day of the first PBL course of the academic year, or the student tutorial performance assessment, if the two do not coincide.
5. No student will be allowed more than one repeat year during the undergraduate program. All students who repeat the year will be assessed on performance in the repeated year.

Leave of Absence and Withdrawal

Students who began the program starting in Fall 2021

A student who needs to take leave from the pharmacy program must apply to the Director to do so. A leave of absence must be approved in advance by the Director of the College of Pharmacy. A leave of absence will be limited to one leave period and will not normally exceed one academic year. A leave of absence will not count towards time in the Pharmacy program.

Students who wish to withdraw from the pharmacy program are asked to notify the College of Pharmacy in writing of their intent.

A student who is absent from the College of Pharmacy without prior permission for an extended period (four weeks or greater) will be presumed to have withdrawn.

Students who began the program PRIOR to Fall 2021

A student who needs to take leave from the pharmacy program must apply to the Director to do so. A leave of absence must be approved in advance by the Director of the College of Pharmacy. Normally, a student who absents himself/herself from the College of Pharmacy without prior permission for an extended period (four weeks or greater) will be presumed to have withdrawn and will have to re-apply for admission to the College of Pharmacy. A leave of absence will be limited to one leave period and will not normally exceed one academic year. A leave of absence will not count towards time in the Pharmacy program.

Dismissal from the Study of Pharmacy

In addition to the University Regulations pertaining to dismissal (Academic Regulations 19.1.1 and 20.1.1), students in the following circumstances will be dismissed from the College of Pharmacy.

Students who began the program starting in Fall 2021

1. Any student who fails to earn the minimum passing grades in more than two courses of the curriculum in one year will be dismissed from the study of pharmacy.
2. A student who is repeating a course and does not obtain the minimum passing grade will be dismissed. The normal regulation allowing remedial work and supplemental assessment in one course will apply.
3. Students are also referred to University Regulations: Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability - Faculty of Health.

Students who began the program PRIOR to Fall 2021

1. Any student who fails more than two courses (PBL or non-PBL courses) of the curriculum in one year will be dismissed from the study of pharmacy.
2. A student in a repeat year who does not meet the criteria for promotion will be dismissed. The normal regulation allowing remedial work and supplemental assessment in one course will apply.
3. Students are also referred to University Regulations: Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability - Faculty of Health Professions.

Appeals

Students who began the program starting in Fall 2021

Students wishing to initiate a formal appeal should follow the appeals process described in the Student Appeals Policy for the Faculty of Health, available of the Faculty of Health website. https://www.dal.ca/faculty/health/current-students/student-policies-and-procedures.html

Students who began the program PRIOR to Fall 2021

Students who wish to raise questions or to register complaints in matters of academic appeal are advised to communicate informally with their instructor within 10 working days of the alleged unfairness or irregularity. If no resolution arises from this (these) meeting(s), the student may initiate a formal appeal.

Students wishing to initiate a formal appeal should follow the appeals procedures as set out by the College of Pharmacy, Undergraduate Student Appeals Committee, Faculty of Health Professions. These procedures are available online, Faculty of Health Professions website, "For current students", Student Policies and Procedures. Application for a formal appeal should be made to the College of Pharmacy Chair, Undergraduate Student Appeals Committee within 20 working days of the matter giving rise to the appeal.

Re-Admission

Students who began the program starting in Fall 2021

1. An application for readmission to the program may be considered 12 months after dismissal. A student who has been dismissed may be readmitted to the pharmacy program only once.
2. Students who have withdrawn may apply for readmission in the next academic year. A student who has withdrawn may be readmitted to the pharmacy program only once.
3. Applications for readmission must be received by the College of Pharmacy Admissions Committee no later than June 30th for the year in which readmission is sought.
4. Application for readmission will be considered for a period of 3 years after dismissal or withdrawal.
5. Conditions of readmission, if granted, may include a requirement to re-take previously completed courses.

Programs Offered

PharmD

The undergraduate program has a patient-oriented curriculum integrating clinical pharmacy with the pharmaceutical sciences. The curriculum utilizes an integrated problem-based learning (PBL) format as well as a wide variety of other learning methods. The first three years of the program include courses covering pharmaceutical sciences, social, behavioural and administrative pharmacy, therapeutics, pharmacoepidemiology, pharmacoeconomics, pharmaceutical care, communications, interprofessional education and collaboration, law and ethics, and the role of pharmacy in the health care system. Practice experiences in community and hospital pharmacy take place in the summers following first and second year, respectively. The final year, beginning immediately at the end of the third year of the program, consists of practice experience rotations in community, collaborative health care and elective placement sites.

Pharmacy Residency Program

The College participates with the Nova Scotia Health Authority (Central Zone), Halifax, NS; the Horizon Health Network, Saint John, Moncton, and Fredericton, NB; and the IWK Health Centre, Halifax, NS, in providing a Canadian Pharmacy Residency Board (CPRB) accredited twelve-month post graduate hospital pharmacy residency program. In addition, the College participates with the Nova Scotia Health Authority (Central Zone), Halifax, NS, in providing a Canadian Pharmacy Residency Board (CPRB) accredited twelve-month post-graduate year two hospital pharmacy residency program in Oncology.

Through structured rotations in various areas of pharmacy practice, the program aims to prepare pharmacists for exemplary pharmacy practice. Areas of rotation include patient care, drug information, drug distribution, pharmacy administration, a research project and in-service and education. The emphasis is on providing exemplary patient care. Practitioner role models/preceptors are utilized throughout the program to mentor the necessary skills, knowledge and values required to be a pharmacist for application by the resident. A stipend is provided, and a certificate is presented to candidates successfully completing the program.

Undergraduate Curriculum Structure

Integrated Problem-Based Learning (PBL) Courses

Lectures are provided by faculty experts to introduce the therapeutic topic covered in the PBL case, discuss the clinical relevance of the content material, explain difficult concepts and summarize case material.

Tutorials

In PBL tutorials students learn together in tutorial groups of eight to ten students.

Each group is facilitated by a trained non (content)-expert tutor who may be sessional tutors, practitioners or graduate students.

Two-hour tutorials are held three times a week. In tutorial sessions students are presented with a situation for which they must identify their own prior knowledge and set specific learning objectives. Students use the time between tutorial sessions for self-directed learning of the objectives that they have set. Subsequent tutorials consist of discussion and application of knowledge.

Non-PBL Courses

There are some courses in each year that may be lecture based, assignment based, or case based.

Skills Laboratory

The skills laboratory focuses on practical skill development and application of knowledge acquired in the PBL and other courses in the curriculum. Activities required for successful completion of the practical experience program are introduced and practiced. Content includes but is not limited to: extemporaneous compounding, calculations, clinical and technical skills in pharmacy practice, written and verbal communication skills, patient education, injection training, medication administration and jurisprudence.

Practice Experience Program (PEP)

All rotation sites and preceptors are recruited by the College of Pharmacy. For each rotation, from year 1 through to year 4, students may be required to travel to sites outside of the Halifax/Dartmouth area and will be responsible for any costs incurred as a result of the program.

All PEP rotations must be completed in Canada with the possible exception of PHAR4083.09 elective rotation course. Students must be prepared to complete all PEP rotations within the Maritimes.

Year 1 – Practice Experience Program

Introduction to Pharmacy Practice Experience: Community (4 weeks)

PHAR 1083.04

This four-week introductory rotation is completed during the summer following first year and provides pharmacy students with an opportunity to contribute to patient care in a community pharmacy setting. Pharmacy students will build upon the knowledge, skills and abilities they have developed during the first year of the Doctor of Pharmacy program. Opportunity will be provided to help pharmacy students cultivate their patient care skills and begin to gain personal clinical experiences working with patients and other members of the healthcare team encountered in a community pharmacy. Students will begin to make health care decisions with the help and guidance of a pharmacist preceptor. The Pharmacist's Patient Care Process, pharmacy law and ethics, medication coverage in Canada, the operation of a community pharmacy, case presentations, drug information, quality assurance and interprofessional practice are key areas of this rotation.

Year 2 – Practice Experience Program

Introduction to Pharmacy Practice Experience: Hospital (4 weeks)

PHAR 2083.04

This four-week introductory rotation is completed during the summer following second year and provides students with an opportunity to actively participate in pharmacy patient care within a hospital pharmacy practice setting. Pharmacy students will build upon the knowledge, skills and abilities they have developed during the first two years of the Doctor of Pharmacy program. Opportunity will be provided to allow pharmacy students to continue to cultivate their patient care skills and gain personal clinical experiences working with patients and other members of the healthcare team within a hospital setting. Students will begin to make healthcare decisions with the help and guidance of a pharmacist preceptor. Specific units will focus on: the role of the hospital pharmacist as part of the healthcare team; understanding the patient chart; documentation of patient care; applying the Pharmacist's Patient Care Process; ordering and interpreting lab values as required for the management of drug therapy; case presentations; drug information; medication safety; and interprofessional practice.

Year 4 – Practice Experience Program

Advanced Pharmacy Practice Experience: Collaborative Health Care Setting (12 weeks)

PHAR 4081.12

This twelve-week clinical rotation focuses on the provision of patient focused pharmacy care in a collaborative healthcare practice setting e.g. hospital, long-term care, ambulatory or primary care sites. Pharmacy students will apply the knowledge, skills and abilities they have developed during the past three years of the Doctor of Pharmacy program to further refine their clinical skills in preparation to enter independent practice. Students will serve as an active member of the healthcare team incorporating professional, legal and ethical principles; identifying and resolving drug related problems; providing drug information and patient education. Using the Pharmacist's Patient Care Process learned at the College of Pharmacy students will gain clinical experience providing safe and

effective, patient focused and evidence-informed care to patients with acute and chronic conditions; across the lifespan; and across all levels of care offered within the institution as well as for patients in the transitions between levels of care.

Advanced Pharmacy Practice Experience: Community Setting (12 weeks)

PHAR 4082.11

This twelve-week clinical rotation focuses on the provision of patient focused pharmacy care in a community pharmacy practice setting. Pharmacy students will complete rotations at community pharmacy practice sites offering an expanded scope of pharmacy practice. Pharmacy students will build upon the knowledge, skills and abilities they have developed during the first three years of the Doctor of Pharmacy curriculum to further refine their clinical skills in preparation to enter independent practice. Students will serve as an active member of the healthcare team and provide safe and effective care under the supervision of a pharmacist preceptor to patients presenting with chronic and acute conditions across the lifespan.

Advanced Pharmacy Practice Experience: Elective (8 weeks)

PHAR 4083.09

This eight-week advanced pharmacy practice rotation will focus on an area of pharmacy practice or research that is of personal interest to the pharmacy student. Rotations may be completed in a direct or non-direct patient care setting. Preceptors may be pharmacists, other health professionals or suitable supervisors who are committed to learning and teaching with a fourth-year pharmacy student. Students will explore and/or develop both traditional and non-traditional roles of pharmacists within either a Canadian or global health care context. Pharmacy students will contribute meaningfully and productively to the patient care and/or professional activities of the rotation site. Students will be required to design, develop and complete a project for the rotation site.

Active certification in cardiopulmonary resuscitation (CPR) Level C and emergency first aid course are the sudents' responsibility in cost.

Prescribed Courses – PharmD

Year 1

- PHAC 1471.03: Pharmacology for Pharmacy 1
- PHAC 1472.03: Pharmacology for Pharmacy 2
- PHAR 1011.02: Critical Appraisal Series 1
- PHAR 1040.06: Pharmaceutical Sciences
- PHAR 1051.06: Integrated PBL 1
- PHAR 1052.06: Integrated PBL 2
- PHAR 1061.03: Social, Behavioural, and Administrative Pharmacy 1
- PHAR 1062.03: Social, Behavioural, and Administrative Pharmacy 2
- PHAR 1073.03: Skills Lab 1
- PHAR 1074.03: Skills Lab 2
- PHAR 1075.03: Skills Lab 3
- PHAR 1083.04: Introductory Pharmacy Practice Experience: Community

Year 2

- PHAR 2013.02: Critical Appraisal Series 2A
- PHAR 2014.02: Critical Appraisal Series 2B
- PHAR 2021.03: Immunology & Vaccinology for Pharmacy
- PHAR 2041.01:Special Considerations in Pharmacotherapeutics: Pregnancy, Lactation and Pediatrics
- PHAR 2042.01:Special Considerations in Pharmacotherapeutics: Substance Use Disorders
- PHAR 2051.09: Integrated PBL 3
- PHAR 2052.09: Integrated PBL 4
- PHAR 2063.03: Social, Behavioural, and Administrative Pharmacy 3
- PHAR 2064.03: Social, Behavioural, and Administrative Pharmacy 4
- PHAR 2073.03: Skills Lab 4
- PHAR 2074.03: Skills Lab 5
- PHAR 2083.04: Introductory Pharmacy Practice Experience: Hospital

Year 3

- PHAR 3013.02: Critical Appraisal Series 3A
- PHAR 3014.03: Critical Appraisal Series 3B
- PHAR 3041.01:Special Considerations in Pharmacotherapeutics: Geriatrics
- PHAR 3051.09: Integrated PBL 5
- PHAR 3052.09: Integrated PBL 6
- PHAR 3061.03: Social, Behavioural, and Administrative Pharmacy 5
- PHAR 3062.03: Social, Behavioural, and Administrative Pharmacy 6
- PHAR 3073.03: Skills Lab 6
- PHAR 3074.02: Skills Lab 7
- PHAR 3075.03: Skills Lab 8
- PHAR 3001.03, PHAR 3002.03, PHAR 3003.03, PHAR 3004.03, PHAR 3005.03: Pharmacy Elective 1, 2, 3, 4, 5

Year 4

- PHAR 4081.12: Advanced Pharmacy Practice Experience: Collaborative Health Care Setting
- PHAR 4082.11: Advanced Pharmacy Practice Experience: Community Setting
- PHAR 4083.09: Advanced Pharmacy Practice Experience: Elective

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. **Students must register in IPHE 4900.00 (section 5).** Successful completion of this course is a requirement for graduation, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

General Information

Immunization

Students must show proof* of current immunization against tetanus, diphtheria, pertussis, polio, measles, mumps, rubella, Hepatitis B, varicella, a negative two-step Mantoux (TB) test, and two COVID vaccines and one COVID Booster**.

Evidence of a negative two-step tuberculin testing (Mantoux) is required before all hospital rotations. Students are responsible for the cost of all tests and immunizations.

*Students must complete the Dalhousie University, Faculty of Health's Infectious Disease Preclinical Requirements Form.

**Different agencies may require additional COVID vaccines.

Each student is required to maintain their personal immunization record, and submit a copy six months in advance of their first clinical placement for their student file. Deadline will be provided upon admission to the College. Individual sites may require students to present immunization records prior to acceptance at a practice site. Individual clinical practice sites may have additional immunization requirements. Failure to provide this information may result in a student being denied access to a placement site.

Career Opportunities

Pharmacy is a health profession in which pharmacists provide care for their patients as one member of the health care team. This care focuses on the patient from the perspective of drug therapy. The pharmacist is responsible to identify, prevent and resolve patient drug therapy problems. Specific activities include: taking medication histories, identifying goals for drug therapy, providing recommendations and education to patients regarding self-medication, providing recommendations to other health care providers on drug therapy, in some cases prescribing drug therapy, working with patients to maximize benefits and minimize adverse effects of drug therapy, maintaining patient drug profiles, counseling patients on prescribed medication, monitoring drug interactions, adverse drug reactions and patient compliance with their drug treatment, and monitoring patient outcomes. Other activities include the provision of information on drugs to patients and other health professionals, the preparation of suitable materials for use as medicines from natural and synthetic sources, the compounding of drugs and the dispensing of suitable medication.

Pharmacy graduates have a wide range of career opportunities. The majority enter community pharmacy practice. Hospital pharmacy also provides an interesting challenge for pharmacists, particularly in view of their expanding role within the clinical setting. The pharmaceutical industry provides opportunities for pharmacists in the fields of sales and marketing, production, research and quality control.

The increased role of federal and provincial governments in public health provides opportunities for pharmacists in analytical laboratories and in administrative position as consultants, government inspectors and health officers. Opportunities may also be available in universities as teachers and researchers.

An entry-to-practice pharmacy degree is necessary for those who wish to practice as licensed pharmacists. For those who wish to enter research or teaching, a Master of Science degree or further postgraduate study is usually required.

Practice Requirements

1. License in Pharmacy

The College of Pharmacy, being purely educational, has no jurisdiction in matters related to licensing or to registration as a Pharmacist or pharmacy student. These functions are entirely under the control of the provincial regulatory authority concerned; a period of practical training or apprenticeship is required by the provincial regulatory authority before a graduate in pharmacy is licensed as a pharmacist. Information regarding licensing or registration in each province may be obtained from the respective provincial regulatory authority: New Brunswick College of Pharmacists; Prince Edward Island College of Pharmacists; Nova Scotia College of Pharmacists.

2. Pharmacy Examining Board of Canada (PEBC)

The Pharmacy Examining board of Canada was created by Federal Statute on December 21, 1963, to establish qualifications for pharmacists acceptable to participating pharmacy provincial regulatory authorities. The Board provides for annual examinations and issues a certificate to the successful candidate, which may be filed with a Canadian provincial regulatory authority in connection with an application for license to practice pharmacy under the laws of that province. Entry-to-practice graduates from Faculties of Pharmacy accredited by the Canadian Council for Accreditation of Pharmacy Programs are eligible to write these examinations. Successful completion of these examinations is a prerequisite to licensure in Canada.

Individuals who are not graduates of an accredited Canadian Faculty of Pharmacy must first complete the PEBC Qualifying Exam.

Student Pharmacy Society

The basic aims of the Student Pharmacy Society are to promote a closer liaison with the other societies on campus, to give the pharmacy students a strong position with regard to Student Council activities, to provide a means of communications between students and their respective provincial regulatory authorities in the Maritimes, and to provide an organizational body which plans and finances the various unique Pharmacy Society activities.

Membership in the Pharmacy Society includes membership in the Canadian Association of Pharmacy Students and Interns and membership in the Canadian Pharmacists Association.

Courses

Courses

Course Descriptions

PHAR 1011 Critical Appraisal Series 1

CREDIT HOURS: 2

This course serves as the introduction to the Critical Appraisal Series (CAS) courses, exploring the foundational concepts of evidence-based practice, critical appraisal, and critical thinking as core principles in pharmacy education and practice. Students learn to evaluate and strategically utilize credible primary, secondary, and tertiary drug and health information resources—including key texts, bibliographic databases, journals, and other tools—as an integral component of patient care.

FORMATS: Lecture

PHAR 1040 Pharmaceutical Sciences

CREDIT HOURS: 6

This lecture-based course is comprised of three core pharmaceutical science subject areas: medicinal chemistry, pharmaceutics and biopharmaceutics and pharmacokinetics that will be taught concurrently. The course will provide students with a strong foundational knowledge in the core pharmaceutical sciences, which will support further integrated learning and application of pharmaceutical sciences principles as it relates to therapeutic topics and practical experience training during the remainder of the curriculum.

FORMATS: Lecture

PHAR 1051 Integrated PBL 1: Foundation, Nutrition, Eye and Ear, Integration

CREDIT HOURS: 6

Integrated PBL 1, is the introductory Problem-based (PBL) learning course and the first of 6 PBL courses in the curriculum. Students will learn to use the pharmacy specific problem-solving process and will be introduced to lab values and physical assessment. In the nutrition portion of the course, students will learn about nutritional needs of healthy clients and special populations. The roles, the daily requirements and sources of various vitamins, and pathological consequences of dietary deficiencies will be addressed. Special nutritional challenges in pregnancy, infancy, elderly, and grave illness will be examined. In the Eye and Ear portion, students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Common problems of the eye and ear, including those of an infectious and non-infectious nature will be examined. Students will apply cumulative knowledge to a complex patient case.

FORMATS: Lecture | Tutorial | Discussion

PHAR 1052 Integrated PBL 2: Dermatology, Respiratory, Gastrointestinal, Integration

CREDIT HOURS: 6

Integrated PBL 2 deals with common dermatological problems seen by pharmacists and the management of these problems. Students will learn about non-infectious respiratory complaints and gastrointestinal ailments and their management. Students will learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Students will apply cumulative knowledge to a complex patient case.

FORMATS: Lab | Tutorial | Discussion

PHAR 1061 Social, Behavioural, and Administrative Pharmacy 1

CREDIT HOURS: 3

This course is the first course in a series that focus on the social, behavioural, and administrative responsibilities of a pharmacist. Each course will include learning about the principles of professionalism, ethics, and leadership. In this course students will learn about the Canadian Health Care System, global health and the history of pharmacy.

FORMATS: Lecture | Tutorial

PHAR 1062 Social, Behavioural, and Administrative Pharmacy 2

CREDIT HOURS: 3

This course is the second course in a series that focus on the social, behavioural, and administrative responsibilities of a pharmacist. Each course will include learning about the principles of professionalism, ethics, and leadership. During this course, students will cover topics including cultural competency and diversity, approaches to modern medicine and pharmacotherapy, pharmacy law, and regulation of the profession.

FORMATS: Lecture | Tutorial

PHAR 1073 Skills Lab 1

CREDIT HOURS: 3

Skills Lab 1 is the first of 8 skills lab courses in the curriculum. Students will explore the legal, ethical and practical aspects of pharmacy practice and discuss safe and effective practices within pharmacy workflow. Students will learn fundamental frameworks and skills necessary for effective communication in pharmacy practice, including patient interviewing and over-the-counter medication consultations. Students will learn and demonstrate proficiency in Medical Terminology.

FORMATS: Lecture | Lab

PHAR 1074 Skills Lab 2

CREDIT HOURS: 3

In this course students will learn the fundamentals of the Pharmacist's Patient Care Process and further develop communication skills to effectively assess and communicate with patients. Students will have the opportunity to apply therapeutic content learning in PBL to various consultations including new

prescription consultations. Students will be introduced to basic concepts of patient assessment, physical assessment and clinical documentation. Students will assess, identify and manage common drug therapy problems in patient encounters related to OTC consultations, prescription therapy and drug interactions. Students will be introduced to patient monitoring consultations.
FORMATS: Lecture | Lab

PHAR 1075 Skills Lab 3

CREDIT HOURS: 3
In this course students will learn the fundamentals of pharmacy calculations and fundamental methods of compounding for day-to-day pharmacy practice. Students will explore compounding literature in order to gain skills in researching formulas and ingredient information. At the end of this course, students will be competent in processing prescriptions for and compounding selected dosage forms for pharmacy practice.
FORMATS: Lecture | Lab

PHAR 1083 Introduction to Pharmacy Practice Experience: Community

CREDIT HOURS: 4
This four-week (40 hours per week) introductory rotation provides pharmacy students with an opportunity to engage in medication dispensing and patient care in a community pharmacy setting with the help and guidance of a pharmacist preceptor. The Pharmacist's Patient Care process, pharmacy law and ethics, medication coverage, medication dispensing process, drug information, communication skills, and collaborative practice are key areas of this rotation. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.
PREREQUISITES: Successful completion of all first year Pharmacy courses (See College of Pharmacy Regulations)
FORMATS: Experiential Learning

PHAR 1183 Orientation to Practice Experience

CREDIT HOURS: 0
These orientation sessions will provide a general introduction to the Introductory Pharmacy Practice Experience in Community (IPPE-1C) rotation and will outline specific activities, expectations and requirements that must be completed for students to participate in the rotation, as well as provide strategies to ensure student success during the rotation.
FORMATS: Lecture

PHAR 1283 Orientation to Practice Experience Course 2

CREDIT HOURS: 0
These orientation sessions will provide a general introduction to the Introductory Pharmacy Practice Experience in Community (IPPE-1C) rotation and will outline specific activities, expectations and requirements that must be completed for students to participate in the rotation, as well as provide strategies for student success during the rotation.
FORMATS: Lecture

PHAR 2013 Critical Appraisal Series 2A

CREDIT HOURS: 2
In this course students are introduced to clinical research methods with emphasis on understanding various study designs and related principles of biostatistics and their applications to research studies. There will be a focus on the critical appraisal of research using different study designs, including but not limited to randomized controlled trials.
PREREQUISITES: Successful completion of all first-year Pharmacy classes.
FORMATS: Lecture | Tutorial

PHAR 2014 Critical Appraisal Series 2B

CREDIT HOURS: 2
This course builds on the Critical Appraisal Series to develop a student’s care provider, critical appraisal, and communication skills. Students will learn to read, critically evaluate, and interpret the biostatistics and findings of various study designs used in the medical and pharmacy literature. Students will demonstrate these skills through discussions, group work, assignments, and written tasks.
PREREQUISITES: Successful completion of all first-year Pharmacy classes
FORMATS:

PHAR 2021 Immunology and Vaccinology for Pharmacy

CREDIT HOURS: 3
PHAR 2021 is a course that provides students with the foundations in immunology and vaccinology needed for competency development and in infectious

diseases and to meet regulatory requirements for vaccine administration. The course emphasizes physiological principles, communication skills, and social considerations essential for modern pharmacy practice. Through lectures and case-based learning, students develop competencies required for further leaning within the problem-based learning curriculum.
PREREQUISITES: Successful completion of all first-year Pharmacy classes
FORMATS: Lecture

PHAR 2041 Special Considerations in Pharmacotherapeutics: Pregnancy, Lactation and Pediatrics

CREDIT HOURS: 1
PHAR 2041 is a focused pharmacotherapeutics course that focuses on physiological changes and drug use principles and management during pregnancy, lactation and growth and development in children. Students will be introduced to common conditions and complications in pregnancy. Special nutritional needs and use of vitamins and supplements for these special populations will be addressed. Assessment and management of common symptoms, conditions and infections in pediatric patients will be discussed. Current childhood immunization schedules and vaccine administration issues in children will be reviewed.
PREREQUISITES: Successful completion of all first-year Pharmacy classes
FORMATS: Lecture

PHAR 2042 Special Considerations in Pharmacotherapeutics – Substance Use Disorders

CREDIT HOURS: 1
PHAR 2042 is a focused pharmacotherapeutics course module relating to the background and management of substance use disorders. Students will be introduced to the basic concepts of substance use disorders including the scope of the problem, the pharmacists' role in management and education, as well as legal and ethical considerations. Assessment and management of commonly used substances including alcohol, benzodiazepines, opioids, stimulants, hallucinogens, volatile solvents, performance enhancing drugs, and cannabinoids will be addressed. Skills related to patient assessment and motivational interviewing will be introduced and applied. Relevant scope of practice activities such as minor aliments assessment, prescribing, and smoking cessation counselling will be discussed. Students will gain a deeper understanding of the stigma people who use substances face, and the potentially challenging scenarios clinicians may face. Resources and programs available for the management of substance use disorders will be reviewed, and the voices and perspectives of people with lived experience of substance use and marginalization will be included.
PREREQUISITES: Successful completion of all first-year Pharmacy classes.
FORMATS: Lecture

PHAR 2051 Integrated PBL 3: Cardiovascular Diseases, Endocrine Disorders, Integration

CREDIT HOURS: 9
Integrated PBL3 addresses cardiovascular diseases, diabetes, thyroid conditions, and their management. Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Students will apply cumulative knowledge to a complex patient case.
PREREQUISITES: Successful completion of all first-year Pharmacy classes
FORMATS: Lecture | Tutorial

PHAR 2052 Integrated PBL 4: Contraception, Osteoporosis, Menopause, Infectious Disease 1, Pain, Integration

CREDIT HOURS: 9
This course encompasses issues such as contraception, osteoporosis and menopause; common infectious disease states including colds/influenza, otitis media and pneumonia; acute and chronic pain of various origins and the management of these conditions. Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Students will apply cumulative knowledge to a complex patient case.
PREREQUISITES: Successful completion of all first-year Pharmacy classes
FORMATS: Lecture | Tutorial

PHAR 2063 Social, Behavioural, and Administrative Pharmacy 3

CREDIT HOURS: 3
This course will build on topics covered in PHAR1061 and PHAR1062 such as professionalism, ethics, and leadership. Students will analyze various aspects related to health care economics and pharmacoeconomics including supply and demand factors, third party prescription insurance plans and payment policies, drug use management strategies, and pharmacoeconomic analyses and concepts.
PREREQUISITES: Successful completion of all first-year Pharmacy classes
FORMATS: Lecture | Tutorial

PHAR 2064 Social, Behavioural, and Administrative Pharmacy 4

CREDIT HOURS: 3
This course will build on concepts taught in other Social, Behavioural, and Administrative Pharmacy courses, but will have a focus on various aspects of pharmacy management. Topics covered include basic responsibility of management; marketing, financial, and human resource management in pharmacy; and a pharmacist's role as manager.
PREREQUISITES: Successful completion of all first-year Pharmacy classes
FORMATS: Lecture | Tutorial

PHAR 2073 Skills Lab 4

CREDIT HOURS: 3
In Skills Lab 4, students will build on the fundamental skills introduced in previous skills lab courses. Students will have the opportunity to apply therapeutic content learning in PBL to various consultations including over the counter and new prescription consultations at a more challenging level. Students will apply basic concepts of patient assessment, physical assessment and laboratory data interpretation related to therapeutic areas taught in PBL. Students will be introduced to Medication Reconciliation, Pharmacist Prescribing and answering drug information questions. Students will revisit prescription processing using pharmacy software in relation to clinical assessment and documentation.
PREREQUISITES: Successful completion of all first-year Pharmacy classes
FORMATS: Lecture | Lab

PHAR 2074 Skills Lab 5

CREDIT HOURS: 3
In Skills Lab 5, students will build on the skills introduced in Skills Lab 4. Students will have the opportunity to apply therapeutic knowledge learned in PBL to various clinical scenarios including over the counter and new prescription consultations at a more challenging level and will be introduced to the monitoring consultation. Students will apply basic concepts of patient assessment, physical assessment and laboratory data interpretation related to therapeutic areas taught in PBL. Students will be introduced to the Focused Medication History and will revisit prescription processing using pharmacy software in relation to clinical assessment and documentation.
PREREQUISITES: Successful completion of all first-year Pharmacy classes
FORMATS: Lecture | Lab

PHAR 2083 Introductory Pharmacy Practice Experience: Hospital

CREDIT HOURS: 4
This four-week introductory rotation provides students with an opportunity to actively participate in pharmacy patient care within a hospital pharmacy practice setting with the help and guidance of a pharmacist preceptor. The rotation will focus on the role of the hospital pharmacist as part of the healthcare team; understanding the patient chart; documentation of patient care; applying the Pharmacist's Patient Care Process; interpreting lab values required for the management of drug therapy; informal case presentations; drug information; medication safety; and interprofessional practice. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.
PREREQUISITES: Successful completion of all second year Doctor of Pharmacy courses.
FORMATS: Experiential Learning

PHAR 2183 Orientation to Practice Experience Course 3

CREDIT HOURS: 0
These orientation sessions will provide a general introduction to the Introductory Pharmacy Practice Experience in Hospital (IPPE-2H) rotation and will outline specific activities, expectations and requirements that must be completed for students to participate in the rotation, as well as provide strategies for student success during the rotation.
FORMATS: Lecture

PHAR 2283 Orientation to Practice Experience Course 4

CREDIT HOURS: 0
These orientation sessions will provide a general introduction to the Introductory Pharmacy Practice Experience in Hospital (IPPE-2H) rotation and will outline specific activities, expectations and requirements that must be completed for students to participate in the rotation, as well as provide strategies for student success during the rotation.
FORMATS: Lecture

PHAR 3001 Research and Scholarly Studies Elective

CREDIT HOURS: 3
This course introduces the undergraduate pharmacy student to research skills through participation in a research or scholarly project in an area of pharmacy or health-related research that is of interest to the student. The student will work with a faculty supervisor on a project in areas such as pharmaceutical sciences, social, behavioural and administrative pharmacy, pharmacy practice, pharmacy educational research or program evaluation. Given the time allotted, it is

reasonable that the student may participate in a specific part of the research process, for example, any one or more of the following: a review of the background literature, preparing a research ethics submission, identifying appropriate research methods, helping with data collection and/or data analysis, developing a decision aid for pharmacy practice etc. The expectation is, however, that the student will understand how their specific project fits within the supervisor's larger research or scholarly project.
PREREQUISITES: Successful completion of all second-year Pharmacy Classes
FORMATS: Lecture

PHAR 3002 Introduction to Pharmacy Home Health Care Elective

CREDIT HOURS: 3
This course introduces the undergraduate pharmacy student to the home healthcare aspect of pharmacy practice, including but not limited to enteral feeding, incontinence, ostomy, and mobility aids. Students will learn about common services and products available to patients, as well as facilitators and barriers to access and use. Students will explore the roles of pharmacists and other healthcare professionals in provision of these products and services and discuss opportunities for collaboration in care.
PREREQUISITES: Successful completion of all second-year Pharmacy Classes
FORMATS: Lecture

PHAR 3003 Antimicrobial Resistance, Antimicrobial Stewardship, and Advanced Infectious Diseases

CREDIT HOURS: 3
This course is an elective course that builds on core competencies for pharmacists in the areas of antimicrobial resistance, antimicrobial stewardship, and infectious diseases. This elective course aims to prepare students to engage in antimicrobial stewardship initiatives and promote appropriate antimicrobial use in hospital and community settings. In addition, students will also apply principals of antimicrobial stewardship and gain advanced knowledge of pharmacotherapy for management of select infectious diseases through discussion of patient cases. This course was developed using the World Health Organization's "Health Workers' Education and Training on Antimicrobial Resistance" curricula guide.
PREREQUISITES: Successful completion of all second-year Pharmacy Classes
FORMATS: Lecture

PHAR 3004 Critical Care Elective

CREDIT HOURS: 3
Consult Department
PREREQUISITES: Successful completion of all second-year Pharmacy Classes
FORMATS: Lecture

PHAR 3005 Primary Care Elective

CREDIT HOURS: 3
This elective course introduces students to the pharmacist's role in primary care by applying the patient care process across complex, integrated clinical scenarios. Students will engage in lectures, workshops, and case-based scenarios to build competencies in shared decision-making, patient-centred care, assessment, documentation, communication, and collaboration. Concepts of shared decision-making and inclusive communication are integrated to reflect the diversity of real-world primary care practice.
PREREQUISITES: Successful completion of all second-year Pharmacy Classes
FORMATS: Lecture

PHAR 3013 Critical Appraisal Series 3A

CREDIT HOURS: 2
This course develops student's advanced care provider, critical appraisal, and communication skills. Students will learn to read, critically evaluate, and interpret the biostatistics and findings of various study designs used in the literature. Mastery will be demonstrated through discussions, group work, assignments, and written tasks.
PREREQUISITES: Successful completion of all second-year Pharmacy classes
FORMATS: Lecture | Tutorial

PHAR 3014 Critical Appraisal Series 3B

CREDIT HOURS: 3
This course is the final installment of the Critical Appraisal Series. Students will combine their skills from the previous courses in this series, as well as knowledge and skills derived from their problem-based learning curriculum and skills lab courses in a variety of tasks over the term. The ability to follow an evidence-based approach for supporting clinical decisions will be emphasized.
PREREQUISITES: Successful completion of all second-year Pharmacy classes
FORMATS: Lecture | Tutorial

PHAR 3041 Special Considerations in Pharmacotherapeutics: Geriatrics

CREDIT HOURS: 1
PHAR 3041 is a focused pharmacotherapeutics course relating to the management of common issues and conditions in elderly patients. Students will be introduced to concepts related to physiological changes in aging and how drug response may be affected. Key concepts relevant to the care of elderly patients including fitness, frailty, functional ability, social vulnerability, elder abuse and therapeutic decision making will be addressed as it applies to pharmacy practice. Students will be exposed to the concept of polypharmacy and the basis for medication review as part of the comprehensive geriatric assessment. The assessment and management of common conditions such a cognition, continence and falls will be reviewed and will complement topics covered in PBL cases in PHAR3052. Special nutritional challenges in elderly patients will also be examined. This course will further compliment general knowledge in PBL.
PREREQUISITES: Successful completion of all second-year Pharmacy classes
FORMATS: Lecture

PHAR 3051 Integrated PBL 5: Infectious Disease 2, Autoimmune, Genitourinary/Renal/Liver, Integration

CREDIT HOURS: 9
In this course student learning of infectious diseases and their management continues. Autoimmune diseases, men's health issues related to the genitourinary tract, and liver and kidney disease and their respective managements are other foci of learning. Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Students will apply cumulative knowledge to a complex patient case.
PREREQUISITES: Successful completion of all second-year Pharmacy classes
FORMATS: Lecture | Tutorial

PHAR 3052 Integrated PBL 6: CNS, Oncology, Integration

CREDIT HOURS: 9
This course focusses on central neurologic and behavioural disorders and pathocytologic disorders and their respective managements. Students learn the medicinal chemistry, pharmaceutics, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Students will apply cumulative knowledge to a complex patient case.
PREREQUISITES: Successful completion of all second-year Pharmacy classes
FORMATS: Lecture | Tutorial

PHAR 3061 Social, Behavioural, and Administrative Pharmacy 5

CREDIT HOURS: 3
This course will build on topics covered in previous Social, Behavioural, and Administrative Pharmacy courses focusing on the issues surrounding the development of community and hospital pharmacy practices as well as how to develop, plan, implement, and evaluate patient care services.
PREREQUISITES: Successful completion of all second-year Pharmacy classes
FORMATS: Lecture | Tutorial

PHAR 3062 Social, Behavioural, and Administrative Pharmacy 6

CREDIT HOURS: 3
The final course in the Social, Behavioural, and Administrative Pharmacy series will build on concepts taught in previous courses but will have a focus on various aspects of pharmacy management. Topics covered include bioethics and the similarities and differences between the management of hospital and community pharmacies.
PREREQUISITES: Successful completion of all second-year Pharmacy classes
FORMATS: Lecture | Tutorial

PHAR 3073 Skills Lab 6

CREDIT HOURS: 3
In Skills Lab 6, students will build on the fundamental skills introduced in Skills Lab 5 and previous Skills Lab courses. Students will have the opportunity to apply therapeutic content learning in PBL to various consultations including over the counter and new prescription consultations, monitoring consultations and answering drug information questions at a more challenging level. Students will apply basic concepts of patient assessment, physical assessment and laboratory data interpretation related to therapeutic areas taught in PBL. Students will be introduced to how to conduct a Comprehensive Medication Review and how to effectively communicate with other health care providers in the provision of patient care. Students will revisit prescription processing using pharmacy software in relation to clinical assessment and documentation.
PREREQUISITES: Successful completion of all second-year Pharmacy classes
FORMATS: Lecture | Lab

PHAR 3074 Skills Lab 7

CREDIT HOURS: 2
In Skills Lab 7, students will build on the fundamental communication skills introduced in Skills Lab 6 and previous Skills Lab courses. This course will provide the knowledge and skills needed to administer vaccines and medications by injection safely and effectively in selected populations. NOTE: Prior to administering injections in a practice setting students must fulfill regulatory requirements as outlined by the pharmacy regulatory body of the jurisdiction in which they wish to practice.
PREREQUISITES: Successful completion of all second-year Pharmacy Classes
FORMATS: Lecture | Lab

PHAR 3075 Skills Lab 8

CREDIT HOURS: 3
In Skills Lab 8, students will build on the skills introduced in the previous Skills Lab courses and will have the opportunity to apply therapeutic content learning from PBL to various clinical scenarios. Students will encounter more complex patient cases and will apply skills in various exercises involving assessment, consultation, monitoring, drug information, deprescribing, and interprofessional collaboration. Students will demonstrate effective written and oral communication in the provision of patient care, including communication of risks and benefits in an evidence-based manner.
PREREQUISITES: Successful completion of all second-year Pharmacy classes
FORMATS: Lecture | Lab

PHAR 4080 Practice Experience Program (PEP) IV

CREDIT HOURS: 4.5
This clinical rotation focuses primarily on the provision of patient focused pharmacy care in hospital or long-term care practice. The student will apply the knowledge, skills and values that have been learned in their academic study and previous PEP rotations, using a patient-centered approach. Students will serve as a member of the healthcare team incorporating professionalism, ethical principles, drug information, patient education and health promotion in the application of patient focused pharmacy care. Students will be required to complete a full patient care work-up on several patients and present the cases to a health professional audience. Students will expand their educational role by preparing and presenting an in-service on a relevant topic to a health professional audience. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

PREREQUISITES: successful completion of fourth year classes (see College of Pharmacy Regulation F2)

PHAR 4081 Advanced Pharmacy Practice Experience: Collaborative Health Care Setting

CREDIT HOURS: 12
This twelve-week clinical rotation focuses on the provision of patient care in a collaborative healthcare practice setting (e.g. hospital, long-term care, ambulatory or primary care sites) to further refine students' clinical skills in preparation to enter independent practice. Students will gain clinical experience providing safe and effective, patient focused and evidence-informed care under the supervision of a pharmacist preceptor to a variety of patients across levels of care offered within the practice site under the supervision of a pharmacist preceptor. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.
PREREQUISITES: Successful completion of all third-year Pharmacy classes and any prior scheduled fourth year rotations.
FORMATS: Experiential Learning

PHAR 4082 Advanced Pharmacy Practice Experience: Community Setting

CREDIT HOURS: 11
This twelve-week clinical rotation focuses on the provision of patient care in a community pharmacy practice setting offering a full scope of pharmacy services to further refine students' clinical skills in preparation to enter independent practice. Students will provide safe and effective, patient focused and evidence-informed care under the supervision of a pharmacist preceptor to a variety of patients presenting with acute and chronic conditions across the lifespan. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.
PREREQUISITES: Successful completion of all third-year Pharmacy classes and any prior scheduled fourth year rotations.
FORMATS: Experiential Learning

PHAR 4083 Advanced Pharmacy Practice Experience Elective

CREDIT HOURS: 9
This eight-week advanced pharmacy practice rotation provides an opportunity for students to explore and gain exposure to non-traditional or specialized pharmacist roles in a variety of sites and organizations in pharmacy and healthcare in a direct or non-direct patient care setting. Pharmacy students will contribute meaningfully and productively to the patient care and/or professional activities of the rotation site and will be required to design, develop and complete a practice project during the rotation. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.
PREREQUISITES: Successful completion of all third-year Pharmacy classes and any prior scheduled fourth year rotations.
FORMATS: Experiential Learning

PHAR 4181 Orientation to Practice Experience
CREDIT HOURS: 0
These orientation sessions will provide a general introduction to Advanced Pharmacy Practice Experience (APPE) rotations and will outline specific activities, expectations and requirements that must be completed for students to participate in APPE rotations (PHAR 4081, 4082, 4083) during the fourth year of the pharmacy program, as well as provide strategies for student success during the rotation.
FORMATS: Lecture

PHAR 4281 Orientation to Practice Experience
CREDIT HOURS: 0
These orientation sessions will provide a general introduction to Advanced Pharmacy Practice Experience (APPE) rotations and will outline specific activities, expectations and requirements that must be completed for students to participate in APPE rotations (PHAR 4081, 4082, 4083) during the fourth year of the pharmacy program, as well as provide strategies for student success during the rotation.
FORMATS: Lecture

Social Work

School of Social Work

Location:
Mona Campbell Building
1459 LeMarchant Street
Suite 3201
PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 494-3760
Fax Number: (902) 494-6709
Email Address: social.work@dal.ca
Website: www.socialwork.dal.ca

Introduction
The School of Social Work's vision is a commitment to building a socially just society, defined as one that upholds and validates the values of equality, diversity, inclusiveness, democracy and concern for human welfare. We manifest and advance curricula, scholarship and school culture that are congruent with those values.

The BSW degree program is accredited by the Canadian Association for Social Work Education. It embraces a critical and anti-oppressive approach to social work practice that includes an emphasis on social policy, research skills and critical analysis, professional values, theoretical perspectives and practice methods. While the program has evolved within the context of the people, communities and service network of the Maritime Provinces, graduates are qualified to practice social work throughout Canada and beyond.

BSW Delivery Options
The BSW is a 120 credit hour degree program and is offered on campus and online. Both delivery methods include a 700 hour community based field placement experience. The application deadline is February 15th of each year.

Continuing Education

The School offers a Continuing Education Program (non-credit) of thematic workshops.

Nova Scotia College of Social Workers
Provincial legislation requires that only persons who are licensed with the Nova Scotia College of Social Workers (NSCSW) can practice as social workers within Nova Scotia. To become fully licensed and use the title of Social Worker after award of the BSW

degree, at least 3,858 hours of paid supervised social work experience is necessary. For more information please contact NSCSW at http://nscsw.org/

Staff

Director of the School
MacDonald, J.

Associate Director
Karabanow, J.

Breen, K.
Parzniewski, S.
Ru, S.

Agency Field Instructors
Many individuals throughout the municipality, province, and country contribute to the education of Social Work students through offering and supervising student placements. They represent a wide range of agencies and organizations including: community based, non-profit, government, physical/mental health and addiction prevention and treatment services. Their invaluable assistance is gratefully acknowledged and appreciated.

Admissions

Bachelor of Social Work Degree Program Admission

Information on academic preparation, admission and application procedures is contained in the Admission Requirements section of the calendar. Enrolment is limited to a specified number of places that are offered once a year to the best qualified candidates, selected by the School's Admissions Committee. Equal consideration is given to part-time and full-time applications.

Prior Criminal Conviction
BSW applicants should be aware that a prior criminal conviction may render them unable to obtain a license in their field of study upon graduation, or unable to participate in some clinical field work experiences throughout their course of study.

Affirmative Action
The School of Social Work has an affirmative action policy for applicants who are Acadian, Aboriginal, African Canadian, members of other racially visible groups, and persons with (dis)Abilities and for Lesbian, Gay, Bisexual, Transgender, Two-Spirit, Queer and Intersex (LGBTTQI) people. The school is committed to admitting and graduating the highest possible number of students who qualify under this policy. Members of these groups who have five (30 credit hours) general (non social work) university credits that average B- are encouraged to apply under this policy. Applicants make their request in a place provided on the Social Work Statement cover sheet, which is part of the BSW application package. Each candidate is considered individually on the basis of her/his qualifications, rather than in relation to other applicants. The admissions prerequisites and selection criteria are otherwise the same for all candidates.

Regulations

School of Social Work Regulations: BSW Degree Program

All Bachelor of Social Work students are required to observe the University Regulations and Academic Regulations of Dalhousie University and the Faculty of Health set forth in the annual Undergraduate Calendar.

Grade Point Average Requirements
Faculty of Health's academic regulations applies to the BSW degree requirements. Students require a cumulative GPA of 2.0 to graduate. In addition, the School’s grade requirements specified in Items 2 and 3 below apply to components of the Social Work curriculum.

Grade Requirements for Social Work Courses
The minimum requirements for satisfactory completion of a Social Work course is C-. In the case of a core course, a student who earns a grade of less than C-, but is otherwise still eligible to continue in the program, must repeat the course until a grade of C- is attained. In the case of an elective, a student who earns a grade of less than a C-, but is otherwise still eligible to continue in the program, must repeat the same elective or if not offered during the student’s course of study, a different elective until a grade of at least C- is attained. Social Work courses are all courses taken under BSW study other than those designated as general admission credits.

Required Withdrawal: Academic Dismissal

A student who fails to meet sessional GPA standards as defined in the Academic Regulations - Faculty of Health must withdraw from the School for at least 12 months. (Please refer to Academic Regulations - Good Standing, Probation and Academic Dismissal, Dalhousie Undergraduate Calendar).

- A student who fails a repeated academic course must normally withdraw from the BSW Program.

Required Withdrawal on Grounds of Unsuitability

See University Regulations: Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability - Faculty of Health.

Consideration of Readmission

Students are normally required to complete their undergraduate studies within ten years of their first registration and comply with the program requirements at the time of first registration. If a student is readmitted and cannot complete the program within 10 years they may be required to comply with the new program requirements.

A. Request for Readmission After Dismissal

Students who have been required to withdraw from the School of Social Work on the basis of academic dismissal may apply for readmission by the annual February 15 admissions deadline date that follows a minimum of 12 month's absence from the School. Due to the competitive nature of the enrolment process, readmission of students is not guaranteed.

B. Request for Readmission After Voluntary Withdrawal

Students in good standing who have not registered in the program for 36 months or less and who wish to be reinstated are required to submit a new application form to be returned with a letter to the Undergraduate Program Coordinator requesting re-admission to resume their BSW degree studies.

Students in good standing who have not registered in the program for 37 months or more and who wish to be reinstated are required to reapply by the February 15 admission deadline date. The application and all supporting documentation must be accompanied by a letter explaining the reasons for the interruption in the student's studies and the decision to request readmission to the BSW degree program.

Appeals

A student wishing to appeal a decision based on School regulations, should consult with the Undergraduate Program Coordinator for advice on appeal procedures.

Duration of Undergraduate Study

Students are normally required to complete the BSW degree within 10 years of their first registration (see Academic Regulation—Duration of Undergraduate Studies).

Workload Regular Academic Year

30 credit hours per academic year shall be regarded as constituting a normal workload for a full-time student. Permission of the Undergraduate Program Coordinator is required if this workload is to be exceeded, or if the planned workload in any one term (Fall or Winter) would amount to more than 15 credit hours per term.

On-campus, part-time students may register for a minimum of one .03 credit (three credit hours) per term. Part-time status applies to students registered for no more than a total of 2.5 credits in the Fall and/or Winter terms. All new students are required to register in the first Fall term following their acceptance in order to maintain their place in the program.

Workload Summer Session (includes May-June and July-August)

Dalhousie regulations permit students to take two .03 credit (six credit hours) in each of the May-June and July-August parts of Summer term. Social Work students may, following consultation with the Field Coordinator, register for the Field Practicum and Seminar course during this session.

The School usually offers one .03 credit (three credit hours) Social Work elective in the May/June period for BSW campus students, provided that minimum enrollment requirements are met. Students in distance delivery take elective and core courses in the summer sessions. Consult the timetable for current course offerings.

Permission of the Undergraduate Program coordinator is required to exceed the two .03 credit limit for the two summer terms.

Students in Other Degree Programs (applicable for on-campus students only)

Students enrolled in degree programs at Dalhousie may, in conformance with their program regulations, choose their degree electives from Social Work Field of Practice electives. Permission from the instructor is required; course prerequisites and class size limitations apply. Students are able to enroll in Social Work electives only to the maximum credit value allowable for open electives by their degree requirements. Any additional Social Work courses would be considered on the same basis as "No Degree."

Special Students "Non-Degree" (applicable for on-campus students only)

Social Work courses are not available to persons on a "no degree" basis, with the exception of agency field instructors and other qualified Social Work professionals who are able to satisfy normal admission requirements. Permission of the Undergraduate Coordinator is also required.

Students enrolled in other Social Work degree programs may be permitted to enroll in specific elective courses, by application for admission as a visiting student with letter(s) of permission from the home university. Course prerequisites and size limitations apply. Permission of the Undergraduate Coordinator and the course instructor is required. Further information may be obtained from the Student Services Coordinator.

Deferral Policy

Newly accepted applicants who, for reasons beyond their control, are unable to take up their position on the date from which they were accepted, may request a deferral of one year. No student may receive more than one deferral. Foundational courses begin in September, therefore the deferral would be from September to the following September.

Requests for a deferral of admission should be sent in writing to the Undergraduate Coordinator of the School of Social Work by August 15th for the year in which they were offered admission. When submitting a request for deferral, please clearly state the reason for the deferral and, where relevant or appropriate, provide additional documentation to support the request (for example, medical certificates). All deferrals are subject to the approval of the Undergraduate Program Coordinator.

Audit by Agency Field Instructors

The School of Social Work permits Agency Field Instructors to audit Social Work courses. Prior permission of the instructor is required. In order for the audit to show on a University transcript, the agency field instructor must abide by the audit and fee regulations as outlined in Academic Regulation—Audit of Courses.

Tuition Fees

Detailed information concerning tuition and fees is available in Money Matters at https://www.dal.ca/admissions/money_matters/tuition_payments.html

BSW Degree Program

Program Objectives

Upon successful completion of the BSW program, students will:

1. Have an understanding of equity and justice through critical analysis.
2. Develop intellectual skills, scholarly attributes, and professional characteristics and values, including but not limited to, curiosity, open-mindedness, effective communications, judgment, rigor, respect, humility, embracing of difference, acceptance, integrity, compassion, self-care and ethical action.
3. Develop insight into the complex, contextual, and sometimes contradictory nature of social work theory, practice, policy, ethics and research.
4. Develop practice theory and skills "required to analyze situations, establish accountable relationships, intervene appropriately with clients and related systems and evaluate one's social work interventions" (CASWE, 2007) This includes an understanding of a range of life events and processes that may impact peoples' development, personalities and potentials.
5. Develop a critical understanding of the personal and professional "use of self."

Program Requirements

Program Requirements

The BSW degree is comprised of 120 credit hours

30 credit hours:
These are the basic academic pre-requisite for all applicants to the program.
These are called **Admission Credits.**

60 credit hours:
These are the credits that all students are required to complete within the Dalhousie University BSW Program.
These are called **Social Work Credits**.

30 credit hours:
These are **General Social Sciences Credits** taken outside the BSW program:

1. Some students have more than the 30 Admission Credits at a B- minimum average ***before*** beginning the BSW program. These General Social Sciences Credits are assessed for eligibility at the time of acceptance to the program from the last 60 credit hours completed. These are called *Admission Transfer Credits.* They may have been completed at Dalhousie or another university. Please see the Admission Transfer Credit Policy below for requirements.
2. Some students undertake the additional 30 General Social Sciences Credits ***during*** the BSW degree. These are not admission transfer credits. These may be taken at Dalhousie or another university and must be assessed as at or above the 2000 level by Dalhousie University. Please review the academic regulations regarding Letter of Permission in the Academic Calendar.

* Electives external to the School of Social Work or the Faculty of Health taken during the SW program must be assessed at the Dalhousie equivalency of 2000 level or above.
* For electives external to Dalhousie University taken during the SW program please review the academic regulations regarding Letter of Permission in the Academic Calendar.
* For electives external to Dalhousie University taken before admission to the Dalhousie SW program please see the Admission Transfer Credit Policy below.

Admission Transfer Credit Policy

Suitable university credits that have been completed with a minimum grade of 2.7 (or B-) are eligible for admission transfer credit consideration. Community College credits, diploma and certificate work are not eligible for consideration. The following guides the assignment of transfer credit:

1. Applicants who are admitted with the minimum academic requirement of 30 credit hours are not eligible to receive Admission Transfer Credits.
2. For those who have more than the minimum noted in #1, a maximum of 30 General Social Sciences credit hours that are complete at the time of application may be eligible for Admission Transfer Credit consideration.
3. Potential Admission Transfer Credits are assessed for accepted students and only on the last 60 credit hours completed.
4. Those 60 credit hours must have been completed within 15 years of the BSW program start date.
5. Regardless of transfer credit eligibility, all students must complete at least 60 credit hours offered by the Dalhousie SSW to complete the BSW degree.
6. The only exception to the above is students transferring from other BSW university programs. These students will be governed under the Faculty of Health Policy regarding transfer students. To obtain a BSW degree from Dalhousie, at least half the credits must be taken at Dalhousie University. Transfer credit is assigned as fairly and appropriately as possible, although some loss of credit usually occurs

Admission Transfer Credit assessment is completed after the admission process, and only for successful applicants. Admission Transfer Credit is assessed on an individual basis at the School of Social Work.

Required Courses

SLWK 3000.03 Introduction to Community Organizing and Advocacy

- SLWK 3101.03 History of Canadian Social Work
- SLWK 3102.03 Advancing Social Justice
- SLWK 3103.03 Theory into Practice I
- SLWK 3104.03 Africentric Perspectives in Social Work
- SLWK 3105.03 2SLGBQTIA+ Communities of Resilience
- SLWK 3106.03 Mental Health, Substance Use & Behavioural Addictions

- SLWK 3107.03 (dis)Ability Justice
- SLWK 3108.03 Preparing for Field Practicum
- SLWK 3109.03 Indigenizing and Decolonizing Social Work
- SLWK 4101.03 Social Work Research I
- SLWK 4102.03 Social Work Research II
- SLWK 4103.03 Theory into Practice II
- SLWK 4104.03 Perspectives on Social Welfare Policy
- SLWK 4105.03 Child,Youth, and Family Well-Being
- SLWK 4034.045 Field Practicum and Seminar (part time option)
- SLWK 4035.045 Field Practicum and Seminar (part time option)
- SLWK 4033.09 Field Practicum and Seminar (full time block option)
- Social Work Elective
- Social Work Elective

For distance students the Beginning Social Work Practice course has two course numbers and students must register for both SLWK 2334 and SLWK 2335. The course is a combination of online study in the winter term and a two week on-campus (Dalhousie, Halifax, NS) residency component in the spring session, normally in May.

Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. **Please register in IPHE 4900.00 (section 6)** which is a shell course comprised of four interprofessional learning experiences across the BSW degree. Successful completion of this course is a requirement for graduation with a BSW degree.

Course Load and Sequencing

Length of Program

Course load varies from student to student depending on the number of Admission Transfer Credits and full or part-time status. Each student receives a personalized curricular advising form which details course load and sequencing. The minimum length of program is two years taken fulltime.

Campus Delivery

- For full-time students the usual load is 15 credit hours (e.g. five .03 credit courses) in the Fall and Winter terms.
- For part-time study the course load may be as minimal as one .03 credit course per term.
- Very few courses are offered during the Summer term. Normally only one elective and field practicum and seminar (block placement option).
- It is important to pay close attention to the pre or co-requisites for each course. These are indicated in the course descriptions.

Online Delivery

Students in the online program are strongly encouraged to maintain their course sequencing schedule. Any changes must be in accordance with pre- and co-requisites as outlined in the calendar and are dependent upon availability of course offerings, especially electives. Students studying online are assessed auxilliary fees in addition to tuition.

Registration

Registration is completed online for all students regardless of delivery method. For more information, go to http://www.dal.ca/registration and http://www.dal.ca/online.

The academic timetable is available online each year.

IMPORTANT: Please note that it is not possible to transfer between onsite and the online delivery or to register for courses other than those which apply to the delivery method for which the student has been accepted.

Field Education

The Field Practicum and Seminar course consists of a 700 hour placement at a community agency **plus** participation in a concurrent integrated seminar. For a full explanation of the placement process, roles and responsibilities please download the Field Manual at https://www.dal.ca/faculty/health/socialwork/programs/field-education/manual.html

Field Placements are organized by the Field Education Coordinator at the School of Social Work.

Advising Sessions for New Students

All new students are expected to attend orientation sessions which are scheduled during the first week of the Fall term. Incoming students will also be provided with a detailed information package which includes course requirements and course sequencing recommendations. Students may also schedule individual meetings with the BSW Student Advisor, the BSW Program Coordinator, and/or the Manager, eLearning as needed.

A comprehensive orientation to field education is also offered later in the first year.

Courses

Courses

Course Notes

The following courses are restricted to Social Work students.

SLWK 3000.03	Introduction to Community Organizing and Advocacy
SLWK 3101.03	History of Canadian Social Work
SLWK 3102.03	Advancing Social Justice
SLWK 3103.03	Theory into Practice I
SLWK 3104.03	Africentric Perspectives in Social Work
SLWK 3105.03	2SLGBQTIA+ Communities of Resilience
SLWK 3106.03	Mental Health, Substance Use & Behavioural Addictions
SLWK 3107.03	(dis)Ability Justice
SLWK 3108.03	Preparing for Field Practicum
SLWK 3109.03	Indigenizing and Decolonizing Social Work
SLWK 4101.03	Social Work Research I
SLWK 4102.03	Social Work Research II
SLWK 4103.03	Theory into Practice II
SLWK 4104.03	Perspectives on Social Welfare Policy
SLWK 4105.03	Child,Youth, and Family Well-Being
SLWK 4034.045	Field Practicum and Seminar
SLWK 4035.045	Field Practicum and Seminar

SLWK 4033.09 Field Practicum and Seminar

Electives

In keeping with the overall program goals of the BSW program of SSW, all elective courses are designed to help students develop a critical analysis of the major themes and current issues related to the course topic. In addition, all electives explore the differential impact of social constructs such as race, gender, class, age, sexual orientation, immigration status, nationality and ability on the particular issue or practice field.

There are no pre or co-requisites for Social Work electives. The format is generally a combination of lecture, discussions and small group activities. Participation of non-social work students is dependent upon approval of their home School/Department, course enrollment and the permission of the instructor. Not all electives are offered every year; check the timetable for each year's offerings.

Possible Elective Offerings

SLWK 4001.03 Gender, Power, and Violence

SLWK 4002.03 Trauma Informed Social Work

SLWK 4003.03 Law, Power, and Social Change: The Role of Social Work

SLWK 4004.03 Social Work with Youth

SLWK 4005.03 Elders, Communities, and Care: Social Work in Later Life

SLWK 4006.03 Social Work in Carceral Settings

SLWK 4007.03 Crisis Interventions

SLWK 4013.03 Global Analyses of Social Work

SLWK 4014.03 Animals, Society, and Environment in Social Work

Course Descriptions

SLWK 3000 Introduction to Community Organizing and Advocacy

CREDIT HOURS: 3
This course introduces students to the praxis of community organizing. It provides foundational knowledge of the skills, strategies, and tactics needed to facilitate community building and social change. It explores models of working with rather than on communities. Students will become familiar with thinking about community organizing from the margins by using practices developed to challenge social inequalities, and to work with the inherent capacities of marginalized populations, especially those advanced by grassroots groups. The course draws on interdisciplinary insights from various fields in examining the dynamics of race, class, migration, nationality, community healing, and their intersections in the context of community organizing.

SLWK 3012 Perspectives on Social Welfare Policy

CREDIT HOURS: 3
As an introduction to social policy analysis, this course surveys a variety of perspectives on social problems and social policy issues, with a focus on contemporary debates. The impact of policy on service users is a central theme of the course.
PREREQUISITES: /Co-requisite: SLWK 2112, SLWK 2113, SLWK 2222

SLWK 3032 Theoretical Perspectives and Practice in Social Work - Part 1

CREDIT HOURS: 3
This is the first of two consecutive core courses on theoretical concepts, perspectives, and practice. This course introduces the conceptual building blocks of theory, exploring purpose and application in social work. Using ideological and political lenses to understand theory making and implementation, the aim is to demystify the theory/practice relationship.
CALENDAR NOTES: Students taking this course must register in SLWK 3033.03 (the second half of the course) in the winter term. Credit will not be granted if courses are not completed consecutively.
PREREQUISITES: /Co-requisite: SLWK 2112.03/SLWK 2113.06, SLWK 2222.03
FORMATS: Lecture

SLWK 3033 Theoretical Perspectives and Practice in Social Work - Part 2

CREDIT HOURS: 3
This is the second of two consecutive core courses on theoretical concepts, perspectives, and practice. Building on SLWK 3031.03, the focus here is on the analysis of dominant and pathologizing theoretical discourses and their impacts on disadvantaged and marginalized groups. The course includes a number of practice theories using case applications.
CALENDAR NOTES: This course is continued from SLWK 3032.03. Credit will not be granted if courses are not completed consecutively.
PREREQUISITES: /Co-requisite: SLWK 2112.03, SLWK 2113.03, SLWK 2222.03
FORMATS: Lecture

SLWK 3101 History of Canadian Social Work

CREDIT HOURS: 3
This course offers a critical examination of Canadian social work's early development and history from the 17th to 21st centuries. The implications of colonization, industrialization, and urbanization driven by the colonial project are unpacked. Relations between European settlers and Indigenous first peoples as well as people of African descent, and Francophone peoples are situated as foundational for understanding how colonialism and 'othering' have shaped Western social work, concepts of helping, and the development of social policies and programs

SLWK 3102 Advancing Social Justice

CREDIT HOURS: 3
This course introduces students to the central concepts of social justice perspectives through the deconstruction and reconstruction of various assumptions, practices, and positionalities that advance and/or impede social justice. Rooted in processes of critically reflective analysis, this course attends to cognitive, affective, and spiritual learning processes.

SLWK 3103 Theory into Practice I

CREDIT HOURS: 3
This foundational course introduces students to progressive social work theories and their practical applications in diverse practice settings. Emphasizing critical social work and social justice for systems change, students explore key theoretical frameworks such as critical race theory, intersectionality, structural and post-structural social work, Indigenous knowledge paradigms and theories, feminist theory, queer and transgender theories, (dis)Ability theories, and political economy. Theories of human development are contextualized through these lenses. Through case studies, experiential exercises, and critical reflection, students learn to understand and analyze power dynamics, challenge systemic oppression, and apply theory-driven interventions in micro, mezzo, and macro social work settings. The course requires self-reflection on positionality, privilege, and ethical decision-making in practice. This course is a pre-requisite for Theory into Practice II.

SLWK 3104 Africentric Perspectives in Social Work

CREDIT HOURS: 3
In this course students engage in critical dialogue, reflection, and action about historical and contemporary experiences of African Nova Scotians and Africans in the Diaspora. Students learn Africentric theory and its application in social work practice with Africans and non-Africans.?

SLWK 3105 2SLGBQTIA+ Communities of Resilience

CREDIT HOURS: 3
This course unpacks the historical and contemporary lives of Two-Spirit, Lesbian, Gay, Bisexual, Transgender, Queer, Intersex, and Asexual (2SLGBTQIA+) persons and communities relative to the profession of social work. The impacts of heteronormativity, homo-erasure, liberalism, colonization and medicalization are examined. Drawing from first-voice evidence-based analyses, the course explores how these constructs manifested and how the profession of social work developed from these bases. The course is situated within the resilience of the communities to change current conditions.

SLWK 3106 Mental Health, Substance Use & Behavioural Addictions

CREDIT HOURS: 3
This course examines the intersections of mental health, substance use, and addictive behaviours from a social work perspective. Students will explore both substance-related addictions (such as alcohol and drugs) and behavioural addictions (including gambling, pornography, and digital media use), with attention to how these issues are shaped by social context, stigma, and structural inequalities. Emphasis will be placed on developing critical understanding, reflective practice, and approaches to supporting individuals, families, and communities impacted by addictions and mental health challenges.

SLWK 3107 (dis)Ability Justice

CREDIT HOURS: 3
This course examines (dis)Ability from a critical, anti-oppressive, social constructivist, rights-based lens, focusing primarily on three areas: (dis)Ability identities – how they are constructed, perceived, and taken up within an ableist world; examining the historical and current day (dis)placement of people with

(dis)Abilities; and policy into practice implications, ranging from grassroots (dis)Ability organizations to government legislation.

SLWK 3108 Preparing for Field Practicum

CREDIT HOURS: 3

The purpose of this course is to consolidate learning from the classroom, filter it through a critical social work lens and knowledge of self, and prepare to apply it to professional field placement experiences. Critically reflective analysis of social work ethics is central to this process, as is understanding social welfare systems and the role of student social workers in field settings. The class focuses on learning to interrogate and integrate values, beliefs, assumptions, knowledges, theories, skills, policy, and ethics in preparation for placement and future practice. The self is the primary tool in social work, thus use of self and planning for longevity in the field are course anchors.

SLWK 3109 Indigenizing and Decolonizing Social Work

CREDIT HOURS: 3

A diversity of Indigenous perspectives and practices for social work are introduced. Students will analyze the historical and contemporary experiences of Canada's Indigenous peoples and consider the implications for practice.? Indigenous knowing, doing, and being is emphasized. Students examine their positionality and use critical reflection to decolonize their practices.

SLWK 3145 Trauma Informed Practice in Social Work

CREDIT HOURS: 3

This is an introductory course on trauma informed practice in social work which focuses on understanding trauma, coping with trauma, trauma informed care and practice in generalist and community based social work settings. The course will explore how trauma impacts people and communities on personal, interpersonal and societal levels across generations with an emphasis on children/youth, Indigenous peoples, women and other marginalized populations. It will examine the interconnections of social work values with trauma informed practice and explore ways for social work to avoid retraumatizing and revictimizing those we work with. This course will also explore the knowledge and skills needed to help mitigate the impact of working in trauma exposed social work environments. The first class will discuss how course material can be difficult and the importance of addressing trauma as a central aspect of social work practice.

SLWK 3220 Cross-Cultural Issues and Social Work Practice

CREDIT HOURS: 3

This course provides an opportunity to critically examine theoretical frameworks for viewing marginalized racial, ethnic and cultural groups in society, to examine personal values as they relate to the above groups, to develop skills in working effectively with these groups, and to understand related social policies.

PREREQUISITES: SLWK 2222.03, SLWK 2112.03, SLWK 2113.03, SLWK 2334.03, SLWK 2335.03, SLWK 3012.03

SLWK 3270 Social Work in Addiction

CREDIT HOURS: 3

FORMATS: Lecture

SLWK 3300 Independent Study

CREDIT HOURS: 3

FORMATS: Lecture

SLWK 4001 Gender, Power, and Violence

CREDIT HOURS: 3

Gender-based violence is a pervasive social issue rooted in power, oppression, and systemic inequities. This course critically examines the intersections of gender, race, class, sexuality, and ability in shaping experiences of violence, from intimate partner violence and sexual assault to state-sanctioned violence and structural harms. Using feminist, anti-oppressive, and trauma-informed frameworks, students explore the role of social work in both responding to and preventing gender-based violence. Topics include historical and contemporary movements for gender justice, community-led interventions, survivor advocacy, policy and legal responses, and transformative justice approaches. Through case studies, applied learning, and engagement with survivor-centered and abolitionist perspectives, students develop the knowledge and skills to support survivors, challenge harmful systems, and advocate for social change.

SLWK 4002 Trauma Informed Practice in Social Work

CREDIT HOURS: 3

This course on trauma informed practice in social work focuses on understanding contemporary and historical trauma, coping with trauma on individual and collective levels, and learning how to facilitate trauma informed practice in generalist and community based social work settings. The course explores how trauma impacts people and communities on personal, interpersonal, and societal levels across generations with an emphasis on children/youth, Indigenous and Francophone peoples, women, and people of African descent and those living in poverty. It examines the interconnections of social work values with trauma informed practice and explores ways for social work to avoid retraumatizing and revictimizing.?This course addresses the knowledge and skills needed to help mitigate the impact of working in trauma exposed social work environments and experiences of vicarious trauma.

SLWK 4003 Law, Power, and Social Change: The Role of Social Work

CREDIT HOURS: 3

This course requires students to understand the intersections of social work and law by analyzing legislation and policies through social work theories and determining how to engage and respond to clients and communities in helpful ways. In addition, this course explores the differential impacts and overlaps of socially constructed concepts including race, gender, class, age, ability, and sexual orientation related to a range of social-legal issues. Consideration is given to the application of critical race theory, feminist legal theory, jurisprudence theory, and social and relational theory. All theories and concepts will be viewed within the context of social justice and access to justice. Historical and contemporary legal harms to Indigenous and Francophone peoples, gender fluid and queer people, people of African descent, and additional priority communities, are analysed.? The contemporary legislative context for Indigenous Peoples is also considered.

SLWK 4004 Social Work with Youth

CREDIT HOURS: 3

This course provides a comprehensive exploration of the theories, practices, and interventions necessary to effectively engage, support, and advocate for youth in diverse settings. Students will develop a deep understanding of youth development, social and environmental influences, and the impact of social constructions and systemic factors such as education, family, and mental health. Using a critical social work approach, this course emphasizes culturally responsive and trauma-informed practices. Students will critically analyze policies affecting youth, examine ethical considerations in the field, and learn intervention strategies that foster strength and capabilities.

SLWK 4005 Elders, Communities, and Care

CREDIT HOURS: 3

Aging is a deeply personal and profoundly social experience shaped by intersecting factors such as health, race, gender, socioeconomic status, and policy. This course examines the role of social work in supporting elders within diverse communities, focusing on aging with dignity, autonomy, and community connection. Students explore ageism, elder rights and roles, caregiving, mental health, housing, healthcare access, and end-of-life care. Grounded in critical social work, the course emphasizes interdisciplinary collaboration and policy advocacy to address systemic barriers faced by aging populations. Through case studies, applied learning, and community engagement, students will develop practical skills to support older adults and their networks in various social work settings, from healthcare to long-term care and community-based programs.

SLWK 4006 Social Work in Carceral Settings

CREDIT HOURS: 3

This course equips students with the knowledge and skills necessary to address the complex structural concerns of, and needs of individuals involved in, carceral systems. Students will analyze ethical and systemic challenges faced by clients and social workers. Through case studies, students will develop practice integrating skills and knowledge to support individuals impacted by incarceration and contribute to the reform of correctional policies and practices.

SLWK 4007 Crisis Interventions

CREDIT HOURS: 3

This course combines the historical underpinnings of the theory and the philosophical approach to practice with direct application of theory in providing time-limited crisis intervention in diverse practice settings. Classroom participation in exercises with crisis intervention case studies is expected, to demonstrate application of short-term crisis stabilization concepts and techniques, and comfort and confidence in responding to crisis. Topics include triage, crisis assessment, crisis management, and stabilization focused approaches, documentation, and strength-based coping skills.

SLWK 4008 Advanced Social Work Practice

CREDIT HOURS: 3

Building on a number of preceding courses this course considers numerous advanced practice theories and skills including a critical analysis of ethics. Student will become proficient in applying a critical social work practice framework at the beginning practitioners' level.

COREQUISITES: SLWK 3032, SLWK 3033, IPHE 4900

PREREQUISITES: SLWK 2112, SLWK 2113, SLWK 2222, SLWK 2334, SLWK 2335, SLWK 2550

FORMATS: Lecture

SLWK 4009 Advanced Social Work Practice

CREDIT HOURS: 3
Building on a number of preceding courses this course considers numerous advanced practice theories and skills including a critical analysis of ethics. Student will become proficient in applying a critical social work practice framework at the beginning practitioners' level.
CALENDAR NOTES: Part of a multi-term course. Students must also register in SLWK 4008 in the fall term to receive credit for this course.
COREQUISITES: SLWK 3032.03, SLWK 3033.03, IPHE 4900.00
PREREQUISITES: SLWK 2112.03, SLWK 2113.03, SLWK 2222.03, SLWK 2334.03, SLWK 2335.03, SLWK 2550.03
FORMATS: Lecture

SLWK 4010 Advanced Social Work Practice

CREDIT HOURS: 6
Building on a number of preceding courses this course considers numerous advanced practice theories and skills including a critical analysis of ethics. Student will become proficient in applying a critical social work practice framework at the beginning practitioners' level.
COREQUISITES: SLWK 3030, IPHE 4900
PREREQUISITES: SLWK 2111, SLWK 2222, SLWK 2333, SLWK 2444,

SLWK 4013 Global Analyses of Social Work

CREDIT HOURS: 3
This course focuses on social issues beyond Canada, and the ways in which global analyses in social work theory and practices attend to them. By broadening the scope of what social work is and does, students learn strategies to challenge hegemonic approaches as well as the colonial and imperial epistemic frameworks that typically shape the Anglo-American centric social work views of helping. Students critically engage with the similarities and differences in social work practices across diverse sociopolitical and cultural contexts, emphasizing the importance of social work rooted in local realities and lived experiences. Nuanced, decolonial analyses acknowledge and respect diverse knowledge systems while interrogating power relations in global and local social work practice.

SLWK 4014 Animals, Society, and Environment in Social Work

CREDIT HOURS: 3
This course is designed to provide perspectives of human relationships to other animals and to the natural world, including theoretical explorations of the meaning of animals and of nature in human lives as well as for their own sake. Applications of ideas regarding other animals and natural environments in social work practice examine the effects of animals and nature for children and youth with trauma histories; animal-assisted interventions; what animal companions in families can tell the social worker about risk assessment and interventions; the human-animal bond; grief, loss, and animal companions; and why companion animal welfare/wellbeing is relevant to human welfare/wellbeing

SLWK 4033 Field Practicum and Seminar

CREDIT HOURS: 9
NOTE: Course Details listed here also apply to SLWK 4034/SLWK 4035.
COREQUISITES: SLWK 3032.03, SLWK 3033.03, SLWK 3012.03, SLWK 3086.03, SLWK 3087.03, SLWK 3220.03, SLWK 4008.03, SLWK 4009.03
PREREQUISITES: SLWK 2010.03, SLWK 2112.03, SLWK 2113.03, SLWK 2222.03, SLWK 2334.03, SLWK 2335.03, SLWK 2550.03

SLWK 4034 Field Practicum & Seminar

CREDIT HOURS: 4.5
This course includes a 700 hour agency based practice placement, integrated seminars and the opportunity to develop a broad range of practice knowledge and skills sufficient to meet the requirements of an entry level professional position. The field practicum is done at the end of a student's program. Students are responsible to stay in touch with the Field Coordinator during the coordination process and comply with various requirements of placement sites (for example: immunizations, CRC, Child Abuse Registry). Some sites may require separate disability insurance in lieu of eligibility for Worker Compensation Coverage. Such costs are the responsibility of the student. NOTE: Course Details listed here also apply to SLWK 4034/SLWK 4035.
COREQUISITES: SLWK 3032, SLWK 3033, SLWK 4008, SLWK 4009
PREREQUISITES: SLWK 2112, SLWK 2113, SLWK 2222, SLWK 2334, SLWK 2335, SLWK 2550
FORMATS: Lecture

SLWK 4101 Social Work Research I

CREDIT HOURS: 3
This is a survey course that presents the core foundations and processes of social work research from a critical perspective. The course will critically explore a diversity of research paradigms, methodologies, methods, and designs in order to demystify 'doing research' and contextualize research within the social work world. Part 1 will be taken in the Fall term.

SLWK 4102 Social Work Research II

CREDIT HOURS: 3
This is a survey course that presents the core foundations and processes of social work research from a critical perspective. The course will critically explore a diversity of research paradigms, methodologies, methods, and designs in order to demystify 'doing research' and contextualize research within the social work world. Part II will be taken in the Winter term.
PREREQUISITES: SLWK 4101

SLWK 4103 Theory into Practice II

CREDIT HOURS: 3
Building on the foundational concepts and skills in Theory into Practice I, this course deepens students' ability to apply progressive social work theories in complex and interdisciplinary practice settings. Students critically engage with theories and models such as postmodern, narrative, radical social work, critical race theory, intersectionality, Indigenous knowledge paradigms and theories, decolonial theory, queer and transgender theories, critical (dis)Ability justice, and migration and citizenship regimes. Students examine their implications for practice, policy, and advocacy. Through case analysis, interactive simulations, group skill building activities, and community-engaged learning, students refine their ability to implement critical social work practice applications, navigate ethical dilemmas, and challenge oppressive systems in diverse contexts.
PREREQUISITES: SLWK 3103

SLWK 4104 Perspectives on Social Welfare Policy

CREDIT HOURS: 3
This course offers students an introduction to social policy analysis and surveys a variety of perspectives on social problems and social policy issues, with a focus on contemporary tensions and debates that exist within the field of social welfare. The impact of policy and how it shapes service provision and service users is a central theme of the course.

SLWK 4105 Child,Youth, and Family Well-Being

CREDIT HOURS: 3
This course provides an overview of perspectives, theories and frameworks that advance child and youth well-being. The course covers the provincial and Indigenous legislative arrangements and funding for child welfare services and agencies in Canada. The historical and political contexts are examined from an anti-colonial lens, situating how social workers provide care and control in progressive and oppressive ways. The impacts of medicalization, urbanization, modernization and colonization relative to age, gender, abilities, class, sexual orientation, and race are unpacked, as are the impacts of the overrepresentation of marginalized communities within the child welfare systems in Canada. The course examines the impacts of residential schools on Indigenous Peoples and the movement for Indigenous nations to resume jurisdictional control of child welfare. Students learn theoretical concepts and practice approaches to build a collaborative framework for advancing child and youth well-being.

Introduction

The Faculty of Management is a community for individuals and organizations who have a sense of purpose and want to make a positive contribution to the world around them. For more than a century, this is where students, faculty, staff, alumni, and the public have come together to conduct research, share knowledge, and build relationships. These activities are the foundation on which we've built a global reputation that puts us among the most desirable places to pursue an education and launch a career.

Our programs cover subject matter that is essential to leaders, managers and professionals working in public, private, and not-for-profit sectors. We develop competency in financial, technological, organizational, ethical, cultural, and administrative topics. No matter the discipline, our faculty cultivates the skills necessary to thrive in any workplace or community such as resilience, adaptability, critical thinking, and collaboration.

We understand that private, public, and not-for-profit sectors need to work together to generate new possibilities. We are an inclusive community driven by curiosity, integrity, and discovery. We welcome and celebrate diverse perspectives.

Students come here knowing that we are a place that inspires social and economic action and innovation. We foster talent in people who want to focus on activities that matter, are useful, and make a positive difference in the world.

The Faculty of Management offers two undergraduate programs, the Bachelor of Commerce Cooperative and the Bachelor of Management. Students outside these programs are welcome to take many of our courses and certificates and can complete a Minor in Innovation and Entrepreneurship. Our degree programs are all externally accredited.

Our graduate programs include direct-entry and mid-career versions of the Master of Information, Master of Business Administration, and Master of Public Administration, as well as the Master of Science in Business. We actively participate in the Interdisciplinary PhD program and the multi-Faculty Master of Digital Innovation.

Undergraduate students wishing to enrol in programs or seek further information should contact the Undergraduate Advising Office by calling +1 (902) 494-3710, or by emailing uao@dal.ca.

Bachelor of Commerce (Co-op) Program

Introduction
As one of two universities in Canada with mandatory work terms integrated into the student experience, we are a proud leader in embedding experiential learning into our Bachelor of Commerce Co-op Program. We continue this path with a robust team of professionals who support students in their pursuit of meaningful work. Our students are encouraged to broaden their experiential opportunities by engaging with our many student societies, participating in case competitions and pursuing international study or work terms which are supported by our Global Experience Hub.

With faculty who offer relevant and challenging material in the classroom and a dedicated co-op and career services team who understands the needs of employers, locally, nationally, and globally, our students begin their careers with confidence and skill. Accredited by the Association to Advance Collegiate Schools of Business (AACSB) and Co-operative Education and Work Integrated Learning Canada (CEWIL Canada) our students are also prepared with the necessary scholarship should they wish to continue their education.

BComm Co-op Student Learning Objectives and Outcomes

- Develop knowledge of key concepts and issues relevant to organizations and their communities, as well as in-depth knowledge within specialized business disciplines.
- Enhance communication skills which are needed to excel in business and management careers.

- Develop analytical and decision-making skills, through a mix of theoretical and applied approaches which include lectures, discussion groups, individual and collaborative research projects, casework, and field work.
- Develop an understanding of the needs of public, private and not-for-profit sectors and the significance of socially responsible management practices to ensure we understand the impact of decisions on future generations.

Questions about the Bachelor of Commerce Co-op program can be directed to the Undergraduate Advising Office, 6100 University Avenue, Suite2086, by sending an email to uao@dal.ca or calling 1 (902) 494-3710.

Bachelor of Commerce (Co-op) Program

Bachelor of Commerce (Co-op) program overview

The schedule for the Bachelor of Commerce (Co-op) Program includes seven academic terms (AT) and three mandatory work terms (WT), as shown in the following table:

	Fall	Winter	Summer
Year 1	AT1	AT2	
Year 2	AT3	WT1	AT4
Year 3	WT2	AT5	WT3
Year 4	AT6	AT7	

The BComm Co-op program offers students the opportunity to participate in various national and international learning experiences, both academically as part of an exchange and practically as part of their work terms. Students may also choose a major in a variety of special areas, a minor in an area outside of the Faculty of Management, and additional certificate(s) should they wish to do so. The BComm Co-op program does not currently offer double majors.

Each of the three work-terms receives academic credit, and constitutes a full work load (see the Regulations section of this calendar for workload limits and conditions).

Degree Requirements

- Four-year program - seven academic terms and three work-terms
- Total credit hours required - 120
- Required GPA for graduation - 2.00

- Work-terms - 9 credit hours (3.0 credit hours each)
- COMM 1713.03 Fundamentals of Work Integrated Learning
- COMM 1010.03: Business in a Global Context
- COMM 1101.03: Introduction to Accounting I (Financial)
- COMM 1102.03: Introduction to Accounting II (Managerial)
- COMM 1503.03: Introduction to Quantitative Decision Making
- COMM 1715.03: Business Communication
- COMM 2202.03: Finance I
- COMM 2203.03: Finance II
- COMM 2303.03: Introduction to Organizational Behaviour
- COMM 2310.03: Business Ethics and Corporate Social Responsibility (CSR)
- COMM 2401.03: Introduction to Marketing
- COMM 2504.03: Intermediate Quantitative Decision Making
- COMM 2603.03: Legal Aspects of Business
- COMM 3500.03: Advanced Quantitative Decision Making
- COMM 3501.03: Production/Operations Management
- COMM 3511.03: Management Information Systems
- COMM 4353.03: Strategic Management
- ECON 1101.03: Principles of Microeconomics
- ECON 1102.03: Principles of Macroeconomics
- Six Electives (18 credit hours) can be at or above the 1000 level in any discipline
- Two Electives (6 credit hours) must be at or above the 2000 level in any discipline
- Ten Electives (30 credit hours) must be at or above the 2000 level in either Commerce or Management

NOTE: Students readmitted to the Commerce Co-op program will be subject to the Academic Regulations as stated in the Calendar for the year of readmission. For further information, contact the Faculty of Management's Undergraduate Advising Office, 6100 University Avenue, Suite 2086 by sending an email to uao@dal.ca or calling 1 (902) 494-3710.

Program Guide

Students normally follow a fixed program of study, as outlined below:

Academic Term One

- COMM 1010.03: Business in a Global Context
- COMM 1101.03: Introduction to Accounting I (Financial)
- COMM 1503.03: Introduction to Quantitative Decision Making
- COMM 1713.03: Fundamentals of Work Integrated Learning
- ECON 1101.03: Principles of Microeconomics

Academic Term Two

- COMM 1102.03: Introduction to Accounting II (Managerial)
- COMM 1715.03: Business Communication (**or** one elective from term three)
- COMM 2401.03: Introduction to Marketing
- ECON 1102.03: Principles of Macroeconomics
- One elective

** **Two electives** - to be completed during any work term (financial implcations) or academic term after winter term of 1st year (email uao@dal.ca for details)

Academic Term Three

- One elective (**or** COMM 1715.03: Business Communication from term two)
- COMM 2202.03: Finance I
- COMM 2504.03: Intermediate Quantitative Decision Making
- COMM 2603.03: Legal Aspects of Business
- One elective

Work Term One

- COMM 2801.03

Academic Term Four

- COMM 2203.03: Finance II
- COMM 2303.03: Introduction to Organizational Behaviour
- COMM 2310.03: Business Ethics and Corporate Social Responsibility (CSR)
- COMM 3501.03: Productions/Operations Management
- COMM 3511.03: Management Information Systems

Work Term Two

- COMM 3801.03

Academic Term Five

- COMM 3500.03: Advanced Quantitative Decision Making
- Four electives

Work Term Three

- COMM 3802.03

Academic Terms Six and Seven

- COMM 4353.03: Strategic Management
- Nine electives

Students can either pursue a customized program of study by choosing electives from a wide range of the functional areas of business, humanities, or social sciences, or they can follow a more specialized program taking their elective courses towards a major, a minor, and/or a certificate(s). Students interested in majoring should consult the School's website and their Academic Advisor for further details before registering for their fifth academic term.

Major in Accounting

Note: An average grade of B- must be obtained between COMM 1101.03 and COMM 1102.03 to major in Accounting.

Students **must** complete the following eight courses:

- COMM 3105.03: Intermediate Financial Accounting I
- COMM 3111.03: Intermediate Financial Accounting II
- COMM 3114.03: External Auditing
- COMM 3116.03: Cost Management
- COMM 4101.03: Advanced Topics in Accounting I

- COMM 4102.03: Advanced Topics in Accounting II
- COMM 4125.03: Taxation
- COMM 4126.03: Taxation II

Chartered Professional Accountants (CPA) Canada requires certain academic prerequisites for admission to the CPA certification program. That is, CPA candidates must complete an undergraduate degree and cover specific prerequisite subject areas. Appropriate courses can be taken in the Bachelor of Commerce (Co-op) program, as part of the Accounting Major structure, to meet these requirements. Particulars can be obtained from the Chartered Professional Accountants Canada website https://cpacanada.ca

Major in Entrepreneurship

Students **must** complete the following four courses:

- MGMT 2902.03: Innovation
- COMM 3907.03: New Venture Creation
- COMM 4901.03: Applied Entrepreneurship and Innovation
- COMM 4523.03: Project Management

Plus four of:

- COMM 3309.03: Management Skills Development
- COMM 3401.03: Consumer Behaviour
- COMM 3402.03: Marketing Communications
- COMM 3404.03: Marketing Research
- COMM 3405.03: Global Marketing
- COMM 3409.03: Personal Selling and Sales Management
- COMM 3410.03: Services Marketing
- COMM 3508.03: Transportation Modes and Policy
- COMM 3908.03: Managing the Family Enterprise
- COMM 4701.03: International Business Strategy
- MGMT 3690.03: Managing Change, Information and Innovation
- MGMT 3902.03: Starting Lean

Major in Finance

Note: An average grade of B- must be obtained between COMM 2202 and COMM 2203 to major in Finance

Students **must** complete the following three courses:

- COMM 3203.03: Financial Institutions
- COMM 3206.03: Investment and Money Management
- COMM 4240.03: Advanced Corporate Finance

Plus five of:

- COMM 2220.03: Introduction to FinTech
- COMM 3207.03: Canadian Securities
- COMM 4201.03: International Financial Management
- COMM 4202.03: Derivatives
- COMM 4205.03: Impact Finance
- COMM 4250.03: Theory of Finance
- SUST 3108.03: Green Finance & Environment, Social, and Governance (ESG) Investing
- COMM 3102.03: Financial Statement Analysis*
- COMM 3105.03: Intermediate Financial Accounting I*
- COMM 4340.03: Corporate Governance*
- ECON 2200.03: Intermediate Microeconomics*
- ECON 2201.03: Intermediate Macroeconomics*
- MGMT 3204.03: Risk Management*

* Maximum two electives from NON-Finance courses

Note: ECON satisfies "electives" (not COMM/MGMT electives)

Major in International Business

Students **must** complete:

- One academic term, or one work term, in a country the student does not hold citizenship.

Plus the following five courses:

- COMM 3405.03: Global Marketing
- COMM 3705.03: Contemporary Issues in Global Business
- COMM 4201.03: International Financial Management
- COMM 4315.03: International and Intercultural Management
- COMM 4701.03: International Business Strategy

Plus three of:

- ECON 2213.03: Emerging Giants: The Economic Rise of China and India
- ECON 2219.03: Euros and Cents: From Common Market to European Union
- ECON 2239.03: European Economic History
- ECON 2334.03: Globalization and Economic Development: Current Debates
- ECON 2336.03: Regional Development
- ECON 3330.03: International Trade
- ECON 3331.03: International Finance
- INTD 2045.03: Indian Society: Change and Continuity
- INTD 2106.03: Africa: An Introduction
- INTD 3125.03: The French-Speaking World
- POLI 1060.03: Political Worlds: Themes and Concepts
- POLI 1065.03: Political Worlds: The Global Domain
- POLI 1500.06: Globalization
- POLI 2301.03: Comparative Politics I: Developed Democracies Under Pressure
- POLI 2302.03: Comparative Politics II: The Developing World
- POLI 2520.03: World Politics
- POLI 2530.03: Foreign Policy in Theory and Practice
- POLI 3233.03: Canada in the Global Economy
- POLI 3315.03: African Politics
- POLI 3360.03: Politics in Latin America
- POLI 3476.03: Liberalism & Global Justice
- POLI 3535.03: Wealth, Power and Poverty in the Global South
- POLI 3569.03: Canadian Foreign Policy
- POLI 3574.03: American Foreign Policy

Note: ECON, INTD, and POLI satisfy "electives" (not COMM/MGMT electives)

Major in Managing People and Organizations

Students **must** complete the following four courses:

- COMM 3303.03: Introduction to Human Resource Management
- COMM 3309.03: Management Skills Development
- COMM 3310.03: Reflections on Leadership
- COMM 3320.03: Organizational Theory

Plus four of:

- COMM 3405.03: Global Marketing

- COMM 3507.03: Logistics Management
- COMM 4201.03: International Financial Management
- COMM 4315.03: International and Intercultural Management
- COMM 4501.03: Business Analytics for Decision Making
- COMM 4510.03: Corporate Communication
- COMM 4523.03: Project Management
- COMM 4701.03: International Business Strategy
- MGMT 3690.03: Managing Change, Information and Innovation
- MGMT 3802.03: Public Policy
- MGMT 3810.03: Government Policy Towards Business

Major in Marketing

Students **must** complete the following four courses:

- COMM 3401.03: Consumer Behaviour
- COMM 3402.03: Marketing Communications
- COMM 3404.03: Marketing Research
- COMM 4401.03: Marketing Strategy

Plus four of:

- COMM 3405.03: Global Marketing
- COMM 3409.03: Personal Selling and Sales Management
- COMM 3410.03: Services Marketing
- COMM 3413.03: Brand Management
- COMM 3414.03: Digital Marketing

Major in Supply Chain & Logistics Management

Students **must** complete the following six courses:

- COMM 3507.03: Supply Chain Management
- COMM 3508.03: Sustainable Logistics
- COMM 4501.03: Supply Chain Analytics
- COMM 4511.03: Business Process Integration using ERP Systems
- COMM 4512.03: Business Intelligence and Data Visualization
- COMM 4520.03: Supply Chain Planning & Execution

Plus two of:

- COMM 3405.03: Global Marketing
- COMM 4315.03: International and Intercultural Management
- COMM 4523.03: Project Management
- MGMT 3902.03: Starting Lean
- SUST 2106.03: Climate Change & Sustainability

Note: SUST satisfies an "elective" (not a COMM/MGMT elective)

Minors

Bachelor of Commerce (Co-op) students can choose to complement their degree by declaring a minor in another subject area outside of the Faculty of Management. Students should consult with their program Academic Advisor concerning their degree requirements, and an Advisor from within their desired subject area for the minor requirements. For a current list of available minors please see Minors.

Co-op Work Terms

(For more information visit: www.dal.ca/mcs)

A work term is a period when a student gains practical experience in a business-related work environment. Each passed work term is an academic half credit and must meet the requirements listed below. Three passed work terms are required to graduate.

During a work term a student is an employee of their work term employer with reference to the conditions of their employment and is a student with respect to academic evaluation and conduct only. The university does not accept liability for the student's work environment.

Students are responsible for finding employment suitable to an undergraduate level study of business, and must not take an additional course where the class schedule or delivery interferes with potential work hours or performance expectations; if students elect to take a class, an asynchronous delivery method is strongly recommended. Students complete a Work-Integrated Learning (WIL) Agreement prior to the first work term accepting this and all other responsibilities associated with the co-op portion of their program.

Students must be remunerated via a guaranteed base salary of minimum wage or higher in the region of employment, and paid in accordance with the labour laws of the jurisdiction in which they work.

Support for the job search is provided by Management Career Services (MCS), and job opportunities are posted on the *my*Career job posting system. Members of the MCS team conduct mid-term review meetings with both the employers and students to ensure the work term objectives and requirements are being met. Employers commit to completing and submitting an evaluation detailing the student's performance level which must be assessed as satisfactory or above to receive academic credit.

Work Term Requirements

All students must meet the academic requirements and complete all Co-op Orientation deliverables required for Work Term Eligibility, as outlined in the relevant components of COMM 1713, the Fundamentals of Work Integrated Learning.

Students receive academic credit upon completion of the following for each work term:

1. Registering for each work term course (COMM 2801, COMM 3801 and COMM 3802) via Dal Online.
2. Finding suitable business-related employment that is approved by Management Career Services (MCS) within the set work term deadlines.
3. Completing the work term within the designated semester with one employer, hired as either an employee (not as an independent contractor) or approved by MCS for an Entrepreneurial Work Term. Each work term must total no less than 12 weeks and must be a minimum of 35 hours per week.
4. Communicating with a member of the MCS team during the work term to discuss performance and work term experience.
5. Receiving a satisfactory performance evaluation from the employer or Entrepreneurial Business Coach.
6. Submitting a satisfactory work term report to the assigned faculty member in the Faculty of Management.

Academic Eligibility for Work Terms

Only students who meet the prerequisites (see **Section II**: **Courses Offered** of this calendar) are eligible to participate in a work term. Note that as per CEWIL Canada accreditation guidelines, students are expected to be registered in full-time studies (at least nine credit hours) in each of the semesters following a work term, as well as complete their program on an academic semester.

Students whose grades drop below a 1.70 GPA overall will be **dismissed** from the University. Refer to the university regulations regarding academic probation and dismissal for more information.

Co-op/Career Services Fees

Students are charged Co-operative Education/Career Services Fees.

These fees support the administration of work terms as well as career services provided during the student's program to prepare them for their post-graduation job search. It covers, but is not limited to;

- Administration of all work terms and Commerce Co-op Orientation,
- Work term report instruction and grading by the assigned Instructor for COMM 2801, COMM 3801, and COMM 3802,
- Job search assistance (cover letters and resume building, interview preparation and debrief, coaching for self-developed job search strategies),
- Variety of workshops and other training,
- Networking opportunities with employers (including special events, information sessions, corporate tours, mentoring, etc.),
- Work term monitoring and mediation of difficult situations,
- Marketing and communications activities to promote the program to employers,
- Development and administration of work term and grad job opportunities,
- Access to an on-line job posting site (*my*Career) and job posting administration,

- Additional electronic tools including asynchronous video interviewing for practice interviews,
- Interview space and schedule co-ordination,
- Facilitation of job offers,
- Tracking of work term eligibility and student job search activity.

To balance the cost, the fees are charged on each academic term until completion of the degree (pro-rated for part-time studies), which includes academic semesters outside of the regular program structure after all work terms have been successfully completed. While no co-op/career services fee is charged for the actual work term, any student taking an academic course during a work term will be charged additional pro-rated academic fees.

These fees are non-refundable after the deadline dates listed in the University Calendar.

Students taking a full academic term (three or more half credit courses) at another university via a Letter of Permission are also responsible for the payment of Dalhousie's Co-op/Career Services fees. Before the Letter of Permission is considered, students must sign a Fee Agreement, available from the Undergraduate Advising Office which states they will pay the full fees for terms completed at another university.

Payment of all fees is required to obtain a Bachelor of Commerce (Co-op) Degree. Consult the Fees section of the Dalhousie University Calendar for details.

Exchange Programs

Dalhousie offers Bachelor of Commerce (Co-op) students the opportunity to study abroad in a variety of countries all over the world, including Denmark, France, Sweden, Norway, South Korea and China (a complete list of partnerships can be found here). While participating in this program, students create international contacts, immerse themselves in a different culture, and gain valuable experiences. For more information, please contact our Global Experience Manager by emailing management.global@dal.ca

Courses

Courses

Course Descriptions

COMM 1010 Business in a Global Context

CREDIT HOURS: 3
This course provides an introduction to the national and international context of Canadian political, economic and business activity. It presents a sampling of the most relevant issues facing managers in business, labour and public sector organizations. Emphasis is placed on developing an understanding of Canada's competitive position today, and of the historical background and current influences on this position. The focus of the course will be on lectures, the text, guest speakers, and more specifically what is said in class by your instructor as well as in tutorials by your tutorial leader and your colleagues. Leading edge ideas and concepts - many of which are not confined exclusively to any one particular text or article - will be introduced by your instructor during the lectures, and may be reinforced through hand-outs from time to time.
CALENDAR NOTES: Students in BComm Program can not receive credit for Mgmt 1000.03 or Mgmt 1001.03
FORMATS: Lecture

COMM 1101 Introductory Accounting I (Financial)

CREDIT HOURS: 3
An introduction to the principles and practices used by accountants in processing and communicating data, both within and outside the organization. Emphasis is on financial accounting and reporting used in the measurement and reporting of an organization's operating, financing and investing activities to external users. Students will develop an understanding of basic financial accounting methodologies, and develop the analytical and procedural skills related thereto; as well as understand the information content of conventional financial statements, and the inherent limitations of accounting data. The organizational context includes business and not-for-profit settings. The coverage includes an examination of the accounting process, basic issues in financial reporting, and the financial statement disclosure requirements.
CALENDAR NOTES: Students who have completed COMM 2101.03 or MGMT 1101.03 (MGMT 2101.03) cannot also receive credit for COMM 1101.03.
EXCLUSIONS: MGMT 1101.03
FORMATS: Lecture | Tutorial

COMM 1102 Introductory Accounting II (Managerial)

CREDIT HOURS: 3
An introduction to the use of accounting information by managers, within the organization. This course examines how accounting can provide information to assist management in their planning, decision-making and performance evaluation activities. Both qualitative and quantitative information supports this decision-making. Emphasis is on management accounting and analysis, with the following objectives: To develop an understanding of the kinds of accounting information managers need; To examine managerial accounting methodologies and develop the analytical and procedural skills related thereto; To prepare accounting reports which are useful for management planning, control and decision making; To develop an awareness of the limitations of managerial accounting information.
CALENDAR NOTES: Students who have completed COMM 2102.03, or MGMT 1102.03 (MGMT 2102.03) cannot also receive credit for COMM 1102.03.
PREREQUISITES: COMM 1101.03 OR MGMT 1101.03
CROSSLISTED: MGMT 1102.03
FORMATS: Lecture | Tutorial

COMM 1503 Introduction to Quantitative Decision Making

CREDIT HOURS: 3
An introductory course on quantitative decision making with emphasis on applications in business, economics and management. Lecture topics include descriptive statistics, data visualization, applied probability, and some elementary decision analysis. Tutorial labs are held for students to practice related tools and techniques on cases and computers using Excel.
CALENDAR NOTES: MGMT 1601.03, ASSC 1000.03, CSCI 1200.03, MATH 1060.03, STAT 1060.03, or MATH 1115.03 will NOT be counted in the Commerce program.
EXCLUSIONS: MGMT 1601.03, ASSC 1000.03, CSCI 1200.03, MATH 1060.03, STAT 1060.03, MATH 1115.03
FORMATS: Lecture | Lab

COMM 1700 Preparing for Study and Work in Canada

CREDIT HOURS: 3
This course is a mix of online lectures and in-class seminars, presentations, and workshops. Activities in this course will help students meet the demands of the Canadian workplace and academic environments. These activities will involve practical applications of business communication strategies and language skills. The course will address writing resumes and professional emails, participating in job interviews and business meetings, delivering presentations, and giving constructive feedback.
CALENDAR NOTES: Entrance into this course is by special permission. Please contact the Undergraduate Advising Office (uao@dal.ca) for more information
FORMATS: Lecture

COMM 1711 Personal and Professional Development (PPD) I

CREDIT HOURS: 1.5
To meet the demands of the modern workplace, Personal and Professional Development I offers an introduction to the academic and professional challenges of the Bachelor of Commerce Co-op program. To succeed in the classroom and the workplace, students must be proficient in Canadian Business English. Students will demonstrate the foundational skills in grammar and usage necessary to write clearly and confidently in the workplace (emails, text messages and reports). This course provides students strategies for career exploration and techniques for exploring their targeted industry. Students will become integrated into the academic and professional community at the Faculty of Management by being introduced to various societies, programs, and resources available. They will also have opportunities to explore time management skills, goal setting, and guidelines for academic integrity.
RESTRICTIONS: restricted to first year Commerce students (0-29 hours)
EXCLUSIONS: COMM 1710.03
FORMATS: Lecture

COMM 1712 Personal and Professional Development (PPD) II

CREDIT HOURS: 1.5
Personal and Professional Development II focuses on the skills necessary to secure work terms, as well as concepts to assist with completing effective academic reports a required part of each of the three mandatory work term components of the Program. As emerging professionals, students will identify techniques used when searching for work term opportunities, creating job application documents, and achieving workplace success. Students will discover effective methods of developing business relationships, critical self-reflection, goal setting, and obtain an understanding of the co-op course requirements.
PREREQUISITES: COMM 1711.015
RESTRICTIONS: restricted to first year Commerce students (0-29 hours)
EXCLUSIONS: COMM 1710.03
FORMATS: Lecture

COMM 1713 Fundamentals of Work Integrated Learning (WIL)

CREDIT HOURS: 3

This course is designed to prepare students for the academic and professional demands of the Bachelor of Commerce Co-op program. To succeed in both the classroom and the workplace, students must be proficient in Canadian Business English. The course helps students develop the necessary skills for writing clearly and confidently in workplace communications such as emails, text messages, and reports. To support students in completing the three mandatory work terms required by the program, the course offers strategies for exploring careers and target industries. It covers techniques for job searching, creating job application documents, and succeeding in the workplace. Students will also learn how to build business relationships, set SMART goals, engage in critical self-reflection, and understand the academic co-op courses. They will become part of the academic and professional community within the Faculty of Management by connecting with societies, programs, and resources. Additionally, the course provides opportunities to learn and follow academic integrity guidelines.

CALENDAR NOTES: Students who have already completed COMM 1711 and COMM 1712 cannot receive credit for COMM 1713.

RESTRICTIONS: restricted to Bachelor of Commerce Co-op students, with 0-29 credit hours.

EXCLUSIONS: COMM 1711 and COMM 1712

FORMATS: Lecture

COMM 1715 Business Communication

CREDIT HOURS: 3

This course teaches students professionalism in written and oral business correspondence. Students learn how to assess the business context and how to make strategic choices of medium, channel, and form. The course develops students' ability to work through the writing process, tailor business messages to specific purposes and audiences, and utilize techniques of persuasion in business memos, e-mail messages, letters, and informational and analytical reports. Students will also learn how to be effective speakers and presenters. The course introduces students to storytelling, structure, body language, and vocal techniques to enhance content in presentations.

PREREQUISITES: COMM 1713

EXCLUSIONS: COMM 1710.03, COMM 1720.03, COMM 1702.03, MGMT 3602.03, ENGL 2100.03, ENGL 2110.03, CSCI 2100.03 Note - excluded classes will not be counted in the Commerce Co-op program

FORMATS: Lecture | Experiential Learning | Online Delivery | Other (explain in comments)

COMM 2202 Finance I

CREDIT HOURS: 3

An introduction to the problems faced by business managers in the acquisition and effective use of the firm’s resources, and analytical concepts for evaluating financial decisions. Topics covered are: financial planning, time value of money, working capital management, risk and return, and valuation of debt and equity instruments.

PREREQUISITES: COMM 1101.03, COMM 1503.03 (or MATH 1115 or MATH 1000), ECON 1101.03, and ECON 1102.03.

EXCLUSIONS: MGMT 3201.03

FORMATS: Lecture | Tutorial

COMM 2203 Finance II

CREDIT HOURS: 3

This course builds on the foundational concepts introduced in COMM 2202 and deepens students' understanding of key corporate finance principles and decision-making tools. Topics include net present value and competing valuation techniques, capital budgeting, the cost of capital, capital structure decisions, payout policy, mergers and acquisitions, and the fundamentals of derivatives. Emphasis is placed on applying financial theory to real-world corporate challenges.

PREREQUISITES: COMM 2202.03

EXCLUSIONS: MGMT 3201.03 and MGTA 2019.03

FORMATS: Lecture

COMM 2220 Introduction to FinTech

CREDIT HOURS: 3

This course exposes students to the rapidly evolving FinTech landscape. We examine the main changes happening in the financial industry and the factors driving the unprecedented growth in the use of technology, what FinTech is, the main trends related to FinTech, the components of the FinTech ecosystem, and the emerging FinTech innovations. The first wave of FinTech led to the unbundling of banking, i.e., FinTech startups have challenged banks vertically on one of their core functions by providing better and cheaper options. This part will focus on FinTech companies competing with incumbents in the personal finance, payments, lending, capital markets, wealth management, insurance, and money transfer sectors. The next generation of FinTechs that are moving beyond their initial mono-product and into rebundling will also be examined. A distinctive component of the course will be focused on aspects around the launching of a FinTech startup, including early stage financing and valuation of FinTech companies. Throughout the course, students will be encouraged to think about the role FinTech can play in increasing Equity, Diversity, Inclusion, and Accessibility (EDIA) and meeting the UN Sustainable Development Goals.

PREREQUISITES: At least second year standing

FORMATS: Lecture

COMM 2303 Introduction to Organizational Behaviour

CREDIT HOURS: 3

This course will provide an overview of organizational behaviour theory, as well as an introduction to the practical application of that theory, within the context of the external and organizational forces that impact management. Through lectures, assignments, and discussion, students will be introduced to the theoretical basis of managing people in organizations. Key topics will include understanding how individual factors, such as personality and perception; group processes, such as team development and leadership; and contextual issues, such as organizational culture influence how people work. Experiential exercises will be incorporated to link theory with management practice.

PREREQUISITES: COMM 1010.03, and at least second-year standing.

EXCLUSIONS: MGMT 2303.03 and MGMT 2304.03

FORMATS: Lecture | Discussion | Experiential Learning

COMM 2310 Business Ethics and Corporate Social Responsibility (CSR)

CREDIT HOURS: 3

Business is a collection of private, commercially oriented-organizations, whereas society is a broad group of people with varying traditions, values, institutions, and collective activities and interests. Hence, businesses operate in market conditions but are subject to obligations to protect (or to avoid harming) the common good. Their challenge is to marry 'the freedom to be' with responsibility for others, particularly the vulnerable. Business ethics provides moral systems for aligning priorities amid what are regularly contradictory or inconsistent sets of goals. This course examines the nature of these challenges from the basis of business ethics, their effects on companies and managers, and the corporate social responsibility tools managers can use to understand and address complex issues involving numerous stakeholders. The students will explore issues including, but not limited to, environmental & social sustainability, collective and systemic responsibility, and ethical responsibility in the absence of regulatory frameworks.

PREREQUISITES: At least second-year standing

EXCLUSIONS: PHIL 2081.03

FORMATS: Lecture | Tutorial

COMM 2401 Introduction to Marketing

CREDIT HOURS: 3

The objective of this course is to familiarize you with marketing's mode of inquiry-the way marketers look at the world. As a marketer you should be able to: 1) ask the right questions about markets; 2) organize data into relevant information; 3) discover market opportunities; 4) set goals; 5) create a marketing plan that includes clear target markets, as well as product, price, distribution and communication strategies; and 6) implement and control a marketing program. A mixture of instructional methods will be used, including lectures, video cases, assignments, and current topics discussions. You are expected to prepare for class each week by prior reading of the assigned materials. Active participation is expected throughout the course.

PREREQUISITES: COMM 1010.03

EXCLUSIONS: MGMT 2401.03

FORMATS: Lecture

COMM 2504 Intermediate Quantitative Decision Making

CREDIT HOURS: 3

A second course on quantitative decision making with emphasis on applications in business, economics and management. Lecture topics include a review of probability, sampling and their distributions; estimation and hypothesis testing for statistical inference; regression analysis and model building; and time series analysis and forecasting. Tutorial labs are held for students to practice related tools and techniques on cases and computers using Excel.

CALENDAR NOTES: STAT 1060.03, MATH 1060.03, MATH 2080.03, STAT 2080.03, ECON 2260.03, ENGM 2032.03 will NOT be counted in the Commerce Program

PREREQUISITES: COMM 1503.03

EXCLUSIONS: STAT 1060.03, MATH 1060.03, MATH 2080.03, STAT 2080.03, ECON 2260.03, ENGM 2032.03

FORMATS: Lecture | Lab

COMM 2603 Legal Aspects of Business

CREDIT HOURS: 3

This course provides students with a comprehensive understanding of the Canadian legal system and its application to business. It covers key areas of law impacting business operations, including contracts, torts, property, intellectual property, taxation, environmental compliance, indigenous rights, and business associations, among others. A particular focus is placed on the intersection of law and business, with an emphasis on legal risk management, compliance, and dispute resolution strategies. Through case studies and practical examples, students will learn how legal principles apply in real-world business scenarios, with a special focus on business transactions, contract formation, liability, intellectual property, and corporate governance. By the end of the course, students will develop the critical skills necessary to analyze business-related fact situations, identify relevant legal issues, and apply appropriate legal principles to guide sound decision-making in a business environment. They will also gain an understanding of how to manage legal risks, handle disputes through negotiation, mediation, or litigation, and navigate the complexities of business law in Canada. This course will prepare students for making informed legal decisions that are vital to the success of their businesses or professional careers.

PREREQUISITES: at least second-year standing.
CROSSLISTED: MGMT 2200.03
RESTRICTIONS: at least second-year standing.
EXCLUSIONS: MGTA 2001.03
FORMATS: Lecture

COMM 2801 Work-Term One, Bachelor of Commerce (Co-op)

CREDIT HOURS: 3
The Bachelor of Commerce Co-op Program has three mandatory work terms for which students receive academic credit. COMM 2801 is the first of these three work terms. A passing grade in the course requires a satisfactory assessment of both the student's work component completed by their supervisor and an academic work term report component assessed by a faculty member. Work term 1 is completed in the Winter term of the second year.
PREREQUISITES: At least 13 half credits earned (must include COMM 1713.03 (OR COMM 1711.015 and COMM 1712.015) and COMM 1715.03 plus at least 7 half credits of required core courses from the first three academic terms)
FORMATS: Experiential Learning

COMM 3050 Artificial Intelligence (AI) for Business

CREDIT HOURS: 3
This course provides undergraduate students with a comprehensive foundation in artificial intelligence, helping them become informed practitioners who understand when, why, and how AI creates value in organizations. Through a 12-week progression from AI literacy to hands-on application of AI, students will develop practical skills in prompting, context engineering, prototyping, and workflow design, taking a whole-system view that considers technology, users, finance, and organizational impact together while building critical judgment about AI's capabilities, limitations, and ethical implications.
PREREQUISITES: At least third-year standing
RESTRICTIONS: At least third-year standing
FORMATS: Lecture

COMM 3102 Financial Statement Analysis

CREDIT HOURS: 3
This course involves analyzing financial statements and entire annual reports for a variety of different entities. Topics include analysis of financial statements, MD&A and notes to the financial statements. Accounting topics include but are not limited to: asset recognition and impairment, pensions, deferred taxes, inter-corporate investments, leases, earnings per share, and cash flow. The approach to the course is analytical rather than procedural, with an emphasis on a user perspective. There is a HEAVY qualitative component of testing in this course.
PREREQUISITES: COMM 1101.03 or MGMT 1101.03, and at least a second year standing
EXCLUSIONS: COMM 3100.03
FORMATS: Lecture

COMM 3105 Intermediate Financial Accounting I

CREDIT HOURS: 3
This course, and its follow-up Commerce 3111.03, are meant to provide a solid understanding of the corporate financial reporting model and related conceptual issues. The course develops expertise in financial reporting issues related to revenue and expense recognition and a wide range of asset accounting issues, including receivables, inventories, and capital assets.
PREREQUISITES: COMM 1101.03 and COMM 1102.03 with a combined average of at least B-
EXCLUSIONS: COMM 3100.03
FORMATS: Lecture

COMM 3111 Intermediate Financial Accounting II

CREDIT HOURS: 3
In conjunction with its prerequisite, COMM 3105.03, this course is intended to provide an understanding of the corporate financial reporting model and related conceptual issues. The course will develop expertise in accounting and reporting issues related to liabilities and shareholders' equity, including complex debt and equity instruments, corporate income taxes, leases, pensions and other post-retirement obligations, earnings per share, accounting changes and restatements.
PREREQUISITES: COMM 3105.03 with a minimum grade of C-
EXCLUSIONS: COMM 3100.03 BUSI 6108.03
FORMATS: Lecture

COMM 3114 External Auditing

CREDIT HOURS: 3
This course covers the theory and practice of public auditing according to generally accepted auditing standards (GAAS). The course emphasizes Canadian Auditing Standards (CAS) and considers the forces impacting the setting of standards and the current level of standards. This includes pronouncements of the accounting profession, understanding the operations of auditing teams in a professional setting, as well as understanding the stakeholders and pressures and incentives that impact those stakeholders. The course also provides an understanding of reporting standards, professional ethics, audit planning, risk assessment, standards for examination, as well as internal control in both manual and computerized environments. Standards for the quality of evidence, statistical sampling and the sufficiency of evidence, documentation and working papers are addressed. The course considers typical audit programs for examination of financial statement elements and fraud awareness. The course also introduces the use of data analytics and data visualization as part of the external financial statement audit and reporting to stakeholders.
PREREQUISITES: COMM 3105.03 with a minimum grade of C-
EXCLUSIONS: BUSI 6101.03
FORMATS: Lecture

COMM 3116 Cost Management
CREDIT HOURS: 3
The major objective of this course is to develop a deeper understanding of the key topics in cost/managerial accounting and their management control implications. The selected topics to be covered include costing systems, cost-volume-profit analysis, variance analysis, control and performance evaluation in decentralized organizations. This course is intended for students who wish to deepen their understanding of cost management concepts and their impact to an organization's decision making.
PREREQUISITES: COMM 1101.03 and COMM 1102.03, with a combined average of B-
FORMATS: Lecture | Discussion

COMM 3203 Financial Institutions
CREDIT HOURS: 3
This course is designed to introduce students to the structure and operations of financial institutions in Canada, and the role they play in the growth and operation of capital markets. The class content includes reviewing the operation and functioning of various types of financial institutions and their roles in the economy. An emphasis will be put on measuring different types of risks and methods for managing these risks for financial institutions, particularly the banks. The topics include (but are not limited to) interest rate risk management, credit risk management, market risk management, regulation, and so forth. The role of derivative securities in various hedging strategies will also be reviewed.
PREREQUISITES: average grade of B - between COMM 2202.03 and COMM 2203.03; or MGMT 3201.03 minimum grade of B-
FORMATS: Lecture | Tutorial

COMM 3206 Investment and Money Management
CREDIT HOURS: 3
This course is designed to provide the students with an overview of current investment theories and their application to the real world. In particular, a considerable effort will be made to compare and contrast the activities of money managers with the ones that are suggested in various theoretical models. The intention is to provide our students with the needed skills to successfully face the challenging world of portfolio and money management.
PREREQUISITES: average grade of B- between COMM 2202.03 and COMM 2203.03
FORMATS: Lecture | Seminar

COMM 3303 Introduction to Human Resource Management
CREDIT HOURS: 3
The role of human resource management (HRM) is strategic. HRM personnel respond to strategic organizational initiatives by ensuring the right people, with the right skills, at the right time are in place. We will discuss and explore HRM topics: job analysis, human resource planning, recruitment and selection, training, performance appraisal, compensation, labour relations, and safety and health. Knowledge of HRM processes is supplemented by applying solutions to human resource problems and understanding how HRM integrates with other organizational functions and areas. This course builds upon the skill and knowledge acquired in COMM 2303. Class discussions and assignments focus on applying HRM skills to various work environments. The course will be structured around a combination of lectures, student presentations, group work, in-class discussions, and experiential exercises.
PREREQUISITES: COMM 2303.03 or MGMT 2304.03
FORMATS: Lecture | Discussion | Experiential Learning

COMM 3309 Management Skills Development
CREDIT HOURS: 3
As a professionalization course, students are asked to explore the theories and practices of management with an emphasis on skill development and the application of effective professional practices. Key topic areas include: the functions of management in the workplace, team collaboration and shared leadership, self-management practices, interpersonal communication, negotiation and conflict resolution, EDIAD, stakeholder and relationship management. Particular emphasis will be placed on management and leadership theories in practice through in-class exercises and a research project. In class, students will experience a combination of lectures, student presentations, group work, individual work, skill development practice session, in-class discussions, and

experiential exercises.
PREREQUISITES: COMM 2303.03 OR MGMT 2304.03; and at least third-year standing.
CROSSLISTED: MGMT 3309.03
FORMATS: Seminar

COMM 3310 Reflections on Leadership

CREDIT HOURS: 3
Reflections on Leadership explores the meaning of leadership in today's changing world, enabling students' capacity and capability to influence change and position themselves as a positive force within organizations and society. Students will explore how to engage and navigate an organization as a complex adaptive system and to envision the fundamental competencies required to engage in complexity through use of dialogue, adaptation and resilience. Students learn reflexive strategies to enable self-awareness and effective leadership practices. The course will consider ways to approach leadership through lenses of, for instance, Indigenous knowledge co-operation and sustainability. Emphasis will be placed on the interrogation of the long history of leadership theory and practices, questioning assumptions about leadership and by addressing its long history of patriarchy and colonization. Students will question accepted norms and consider how issues of equity, diversity, inclusion, accessibility and decolonization (EDIAD) can change the future of leadership in both theory and practice.
PREREQUISITES: At least third-year standing
FORMATS: Seminar

COMM 3320 Organizational Theory

CREDIT HOURS: 3
If you want to know how to assess and create organizations that are adaptable, effective, and flexible in today’s complex environments then this is the course for you. The goal of this course is to prepare students to assess, design and structure organizations to be more effective. The interrelationships between strategy, technology, culture, and the organization’s internal and external environments will be explored. An emphasis will be placed on change management practices and other frameworks that are useful for assessing and increasing organizational effectiveness. In class, students will experience a combination of lectures, student presentations, group work, individual work, in-class discussions, and experiential exercises.
PREREQUISITES: COMM 2303.03
CROSSLISTED: MGMT 3320.03
EXCLUSIONS: COMM 4306.03
FORMATS: Lecture | Seminar | Discussion | Experiential Learning

COMM 3401 Consumer Behaviour

CREDIT HOURS: 3
In view of the very competitive situation in modern business, the firm that is successful designs and sells products that meet the desires of specific consumer segments. Thus, analysis and prediction of consumer behaviour are increasing in importance and sophistication. An extensive body of research evidence from marketing and the behavioral sciences is explored and evaluated to assess the marketing implications of elements of consumer behaviour. Emphasis in course will be focused on how to incorporate an understanding of consumer behaviour into strategic marketing plans.
PREREQUISITES: COMM 2401.03 or MGMT 2401.03
FORMATS: Lecture | Discussion

COMM 3402 Marketing Communications

CREDIT HOURS: 3
This course is designed to provide students with an understanding of how the major types of marketing communication messages are created and delivered. This means students should come away knowing the strengths and weakness of the major marketing communication functions (e.g. advertising, public relations, direct response, sales promotion, social media marketing, web marketing, packaging, etc.) and the major media used by them. By the end of the course, the student will have the ability to: (1) establish a knowledge base of researching and evaluating a company’s marketing and promotional situations; (2) gain hands-on experiences in the creation of an integrated marketing communication campaign that impact customer relationships and brands; and (3) develop effective communication strategies and programs for real company situations. For those students who are not marketing majors, this course will also provide a basic understanding of persuasive skills which can be used no matter what vocation they choose in the future.
PREREQUISITES: COMM 2401.03 or MGMT 2401.03
FORMATS: Lecture

COMM 3404 Marketing Research

CREDIT HOURS: 3
Students learn the scientific method in solving marketing problems and creating marketing intelligence from data. Emphasis is on planning and formulating research problems, research design, application of sampling methods, and analysis of data collected. The course uses cases and a real world project to hone skills needed for a wide range of marketing positions in industry.
PREREQUISITES: COMM 2401.03, and COMM 2504.03 (or COMM 2502.03)
FORMATS: Lecture | Tutorial | Discussion

COMM 3405 Global Marketing

CREDIT HOURS: 3

This course will examine similarities and differences in international marketing structures, functions and processes as related to the socio-economic and cultural environment and the opportunities and problems associated with international marketing for Canadian firms wanting to export to overseas markets. It is designed to be a comprehensive course embodying lectures, class discussion, assignments, and case studies. Students will also complete an export marketing plan for a Canadian company wishing to explore marketing opportunities in a foreign country.

PREREQUISITES: COMM 2401.03

FORMATS: Lecture | Discussion

COMM 3409 Personal Selling and Sales Management

CREDIT HOURS: 3

This course is designed to provide an understanding of the tasks and problems facing today's sales professionals and sales managers and to familiarize one with current personal selling and sales force management practices. Specifically, this course provides an exposure to personal selling concepts, techniques and procedures used in buyer-seller relations such as prospecting, sales call planning, negotiation skills, overcoming obstacles, persuasion and closing skills. It also covers sales management topics including the organization of the sales force, personnel management, selection, sales training, motivation, compensation, evaluation and supervision, budgets, quotas, territories and sales control. Sales role-plays, mock sales presentations, case studies and classroom discussion are used to extend the basic text material and examine other points of view.

PREREQUISITES: COMM 2401.03

FORMATS: Lecture

COMM 3410 Services Marketing

CREDIT HOURS: 3

Intangible services play an increasingly important role in the global economy, and most especially in the economies of developed countries. Yet, business school curriculae have customarily emphasized the marketing of tangible products in consumer and industrial markets. A basic premise of the elective course is that services (versus tangible goods) share a number of attributes that present unique challenges for marketing. The course seeks to prepare students to face those challenges. It is ideal for students who wish to work in a service industry (e.g., banking, insurance, travel, hospitality, consulting) or in a service capacity in the manufacturing sector (e.g., sales, customer relations). Emphasis will be placed on understanding the distinctive characteristics of services, the implications of these distinctions for marketing, the role of service quality as a determinant of customer satisfaction, and the measurement of these phenomena. Examples will be drawn from North American and European service industries.

PREREQUISITES: COMM 2401.03

COMM 3413 Brand Management

CREDIT HOURS: 3

This course is designed to provide students with an in-depth understanding of branding. Students will explore how social and psychological factors contribute to creating brand meaning. Students will learn how to design a creative brand identity. Students will further understand brand equity and how successful brands are managed. By the end of this course, students will be able to create and effective and creative branding strategy.

PREREQUISITES: COMM 2401.03

FORMATS: Lecture

COMM 3414 Digital Marketing

CREDIT HOURS: 3

This course is designed to provide students with an in-depth understanding and practice of digital marketing. This course allows students to learn about the principles that govern digital marketing and to put these principles into practice. Students should expect a hands-on experience as they get to build a website, social media content, and execute real advertising campaigns. By the end of the course, students will have the ability to: 1) Formulate a digital marketing strategy; 2) Build website content that takes the user experience into consideration; 3) Design a search engine optimization strategy; 4) Execute digital advertising campaigns; 5) Understand the principles of content creation and build effective content; 6) Understand the different social media platforms and build an effective social media plan ; 7) Measure the success of digital marketing strategies.

PREREQUISITES: COMM 2401.03

FORMATS: Lecture

COMM 3500 Advanced Quantitative Decision Making

CREDIT HOURS: 3

A third course on quantitative decision making with emphasis on applications in business, economics and management. Lecture topics include a review of probability, spreadsheet modelling, simulation, and optimization. Tutorial labs are held for students to practice related tools and techniques on cases and computers using Excel.

CALENDAR NOTES: MATH 2080.03; STAT 2080.03; ECON 2260.03; ECON 2280.03; ENGM 2032.03 will NOT be counted in the Commerce program.
PREREQUISITES: COMM 2504.03
EXCLUSIONS: MATH 2080.03; STAT 2080.03; ECON 2260.03; ECON 2280.03; ENGM 2032.03
FORMATS: Lecture | Lab

COMM 3501 Operations Management

CREDIT HOURS: 3
A core business function, operations management transforms inputs (raw materials, labour, capital, technology, and information) into value-added outputs such as goods and services. This course introduces some of the standard techniques to manage operations in manufacturing and services. Topics include product demand forecasting, productivity analysis, inventory management, workforce scheduling, production planning, project management, quality control and assurance, continuous process improvement, and waiting line models for service operations. Cases and class examples are used to develop problem-solving skills and illustrate concepts and techniques to tackle real-world business issues.
PREREQUISITES: COMM 1101.03, COMM 2401.03, COMM 2504.03
EXCLUSIONS: MGMT 3501.03
FORMATS: Lecture | Lab

COMM 3507 Supply Chain Management

CREDIT HOURS: 3
Supply chains form the backbone of any business, enabling companies to deliver products and services efficiently from origin to consumption. Therefore, a company's ability to succeed depends more on the efficiency, agility, and resilience of its entire network of suppliers, producers, distributors, and retailers than on its own internal operations alone. This introductory course lays the foundation for understanding the concepts, analytical tools, and critical problem-solving skills needed for sustainably managing supply chains. Topics in this course include supply chain strategies and performance, international trade and logistics, sourcing and procurement, product development, manufacturing, sales and operations planning, distribution channels, customer accommodation, and risk management in supply chains. Students will learn about various supply chain applications, drawn from e-commerce, consumer goods, artificial intelligence, finance, non-profit, and healthcare sectors.
PREREQUISITES: COMM 1503.03
RESTRICTIONS: At least third-year standing
FORMATS: Lecture

COMM 3508 Sustainable Logistics

CREDIT HOURS: 3
Across industries from retailing to manufacturing to consulting, professionals skilled in sustainable logistics are in high demand. From the perspective of sustainability (a core business competency), this niche course explores the principles and practices of designing and managing logistics systems that comply with economics, environmental, social, and cultural imperatives in reducing carbon emissions, optimizing resource use, and promoting circularity. Topics include green transportation modes and policies, inventory management, energy-efficient warehousing, reverse logistics, life-cycle analysis, the design of collaborative logistics networks, humanitarian logistics supply chains, and the role of technology in enabling sustainable logistics serve operations.
PREREQUISITES: COMM 1503.03
CROSSLISTED: BUSI 6408.03
FORMATS: Lecture

COMM 3511 Management Information Systems

CREDIT HOURS: 3
Information is a key resource for organizations, and professionals. Innovative uses of information are often keys to survival in an increasingly competitive and digital economy. Information systems enable these uses and account for an increasing larger share of assets in most organizations. This course is designed to help students understand how organizations leverage their information systems - that include digital technologies, business process, data, and people - in ways that deliver business value. In addition to conceptual frameworks, business cases and simulations, students will develop hands-on skills in information systems such as SAP Enterprise Resource Planning (ERP) systems and Business Intelligence digital technologies.
PREREQUISITES: COMM 1010.03 and at least a second-year standing
CROSSLISTED: MGMT 3511.03
FORMATS: Lecture | Lab | Discussion | Experiential Learning

COMM 3705 Contemporary Issues in Global Business

CREDIT HOURS: 3
Large cross-border movements of goods, services, capital and technology increasingly demand a transnational view of firm strategy and operations. Some global corporations seek competitive advantage through the close coordination of geographically dispersed units while others choose to tailor their multinational operations to the legitimate economics, political and social aspirations of diverse national governments. Yet others seek to balance conflicting demands through intensive organization wide coordination and shared decision making. This course examines critically the generic and functional strategies open to multinational enterprises and through numerous industry and business case studies. Classes comprise of case analyses, lectures, as well as independent

research, class presentations and guest speakers. As the success depends in large measure on the preparedness and effective participation of course members, attendance is crucial and particular attention is paid to the quality of individual contributions to case discussion.
PREREQUISITES: COMM 1010.03 and COMM 2401.03; OR MGMT 1302 and MGMT 2401
EXCLUSIONS: COMM 4705.03
FORMATS: Lecture

COMM 3710 Doing Business in Emerging Markets

CREDIT HOURS: 3
This course is designed to give students an understanding of the traditional challenges and opportunities Canadian businesses face when expanding their business to emerging markets, including those in Africa, Asia, Latin America, and Eastern and Central Europe. Through this course, students will be expected to acquire a holistic understanding of the political, cultural, social, and economic challenges companies face when considering the benefits of expanding and conducting business in emerging markets.
PREREQUISITES: COMM 2303.03 and COMM 2401.03
CROSSLISTED: MGMT 3710.03
FORMATS: Lecture

COMM 3801 Work-Term Two, Bachelor of Commerce (Co-op)

CREDIT HOURS: 3
The Bachelor of Commerce Co-op Program has three mandatory work terms for which students receive academic credit. COMM 3801 is the second of these three work terms. A passing grade in the course requires a satisfactory assessment of both the student's work component completed by their supervisor and an academic work term report component evaluated by a faculty member. Work term two is completed in the fall term of the third year.
PREREQUISITES: At least 18 half credits earned. Must include COMM 2801.03 (and it's prerequisites) plus at least 12 half credits of required core courses from the first four academic terms.
FORMATS: Experiential Learning

COMM 3802 Work-Term Three, Bachelor of Commerce (Co-op)

CREDIT HOURS: 3
The Bachelor of Commerce Co-op Program has three mandatory work terms for which students receive academic credit. COMM 3802 is the third and final work term. A passing grade in the course requires a satisfactory assessment of both the student's work component completed by their supervisor and an academic work term report component evaluated by a faculty member. Work term three is completed in the summer term of the third year.
PREREQUISITES: At least 23 half credits earned. Must include COMM 3801.03 plus at least 14 half credits of required core courses from the first five academic terms.
FORMATS: Experiential Learning

COMM 3907 New Venture Creation

CREDIT HOURS: 3
This course looks under the hood of new venture creation through the lens of entrepreneurship. Entrepreneurship is the engine that drives new venture creation but it is also much more. Understanding entrepreneurship is understanding economic and social change. Entrepreneurship is a path to personal growth and fulfillment. In the course we use in class activities, experiential exercises, lecture, and Socratic discussion to learn about entrepreneurship and related topics such as types of entrepreneurship, innovation, culture, risk, business models, value creation, and etc... The course is part of the university wide entrepreneurship minor. As a result you will be learning with students who could come with a variety of knowledge and educational backgrounds. This gives us the opportunity to learn from each other and the need to help each other develop new knowledge and review things we sometimes take for granted.
CROSSLISTED: MGMT 3907.03
RESTRICTIONS: at least third year standing
FORMATS: Lecture | Discussion | Experiential Learning

COMM 3908 Managing the Family Enterprise

CREDIT HOURS: 3
We explore the family system, the business system, the ownership system and their interactions - functional and dysfunctional. Specific topics, examined from the family business perspective, will include: the decision to join a family firm, management succession, ownership succession, the role of key non-family employees, strategic planning and other issues especially relevant for family firms. The course also addresses conflict and communication in the family and the business. The course has two purposes. First, it provides an organized framework for students to understand the dynamics and special issues of family firms. Second, it is designed to allow students to explore their interest in joining a family firm. Therefore, the course will especially resonate with students who come from families which are in business or for students considering joining a family business. The material taught is also valuable to many students who will be employed by family businesses as employees, managers, or providers of professional services (e.g. accounting, finance, law). Others who wish to explore a key segment of Canadian business are also welcome.
PREREQUISITES: At least third-year standing, and COMM 1010.03 OR (COMM3907 OR COMM 3307)
EXCLUSIONS: COMM 3308.03, MGMT 3308.03, BUSI 6006.03

FORMATS: Lecture | Discussion | Experiential Learning

COMM 4000 Directed Reading and Research

CREDIT HOURS: 3
This course offers the student the opportunity to explore in greater detail a particular area of interest. The content of the course is negotiated with the individual instructor involved. The student and instructor must develop a proposal, and submit it to the Curriculum Committee for approval. Guidelines are available from the Undergraduate Advising Office, Suite 2086, Rowe Building.

COMM 4101 Advanced Topics in Accounting I

CREDIT HOURS: 3
This course provides a theoretical framework for the study of accounting policy. Case analysis is an integral part of the course, with the bulk of the course focusing on analysis of simulated cases. Topics covered include accounting policy choice in a dynamic framework, an introduction to the impact of accounting policy choice and normalized income on business valuation, and the role of the professional accountant as part of these engagements. As well, the course may consider various practical and theoretical topics, including the role of the professional accountant working within an organization, as well as current topics as appropriate. There is a HEAVY qualitative component of testing in this course.
PREREQUISITES: A minimum grade of C- in both COMM 3111.03 and COMM 3114.03
EXCLUSIONS: BUSI 6110.03
FORMATS: Lecture

COMM 4102 Advanced Topics in Accounting II

CREDIT HOURS: 3
This course provides an in-depth study of the interrelated topics of intercorporate investments, business combinations, consolidated financial statements, foreign currency transactions and foreign operations. The course also covers segmented reporting, and not-for-profit accounting and fund accounting.
PREREQUISITES: COMM 3105.03 and COMM 3111.03
CROSSLISTED: BUSI 6109.03
FORMATS: Lecture

COMM 4125 Taxation

CREDIT HOURS: 3
This course is an introduction to the taxation system in Canada, with a focus on the calculation of net income for tax purposes and concluding with personal tax payable calculations. By the end of the course students should be able to calculate taxes payable for individuals, and identify and analyze tax issues related to these calculations.
PREREQUISITES: COMM 3105.03 with a minimum grade of C-
EXCLUSIONS: COMM 4120.03 BUSI 6102.03
FORMATS: Lecture

COMM 4126 Taxation II

CREDIT HOURS: 3
This course is a follow up to COMM 4125. It covers areas of personal tax not covered in COMM 4125 and then focuses on corporate income tax. By the end of the course students should be able to calculate taxes payable for corporations, and identify and analyze tax issues for both individuals and corporations.
PREREQUISITES: COMM 4125.03
EXCLUSIONS: COMM 4121.03
FORMATS: Lecture

COMM 4201 International Financial Management

CREDIT HOURS: 3
This course aims at acquainting students with international aspects of corporate finance. The ultimate objective of the course is to develop your ability to understand and analyze major problems of financial management in an international context. Specifically, we will see throughout this course, how the business of the multinational corporation (MNC) - compared to that of a purely domestic firm - is affected by the changes in the international financial environment and by the presence of new variables, in particular the exchange rate risk and the political risk. Therefore, the first part of the course will provide an overview of the MNC and the international environment in which it operates and describe the functioning of the international financial markets with emphasis on the Foreign Exchange Market. We will also thoroughly examine the theories underlying exchange rate determination, as well as exchange rate risk measurement and management. Finally, we will analyze how exchange rate risk affects the pricing of capital assets.
PREREQUISITES: COMM 2203.03
FORMATS: Lecture

COMM 4202 Derivatives
CREDIT HOURS: 3
This course is an introduction to derivatives and the main applications of derivatives for both investment purposes and corporate finance use. As an introductory or first course in derivatives, the goal is to cover the central concepts and issues that will permit the student to start using the products and understanding the main advantages, as well as the issues with derivative transactions. The course covers both quantitative pricing issues, as well as the many practical qualitative issues involved with the use of derivatives. Students should be comfortable with basic statistics and algebra. Knowledge of calculus is not required for this course. Students should also be comfortable with Excel spreadsheets and basic Excel mathematical and financial functions.
PREREQUISITES: COMM 2203.03
FORMATS: Lecture

COMM 4205 Impact Finance
CREDIT HOURS: 3
The objective of this course is to provide students with a unique, hands-on industry experience in core areas of finance and financial management. Its primary goal is to enhance students' practical understanding of finance, cultivate local talent, foster connections between students, the Faculty of Management, and the business community, and equip them with real-world skills. The course is structured into nine modules, covering key topics: (i) Insights from Chartered Accounting Practice, (ii) Commercial Lending & Banking, (iii) Insights from CFOs, (iv) Mergers & Acquisitions (M&A), (v) Private Equity, (vi) Venture Capital, (vii) Investments and Pension Finance, (viii) Corporate Governance & ESG Investment, and (ix) Private Wealth Management. In each module, leading industry experts will share relevant aspects of their professional experience, ensuring that students gain a strong understanding of essential functions within these areas and how the skills they learn translate into real-world scenarios. IMPACT Finance is designed to provide students with a distinct competitive advantage, while also offering industry experts the opportunity to shape the next generation of leaders and empower students to contribute positively to their communities. Students must apply and be selected for entry into this course, and must have a minimum grade of B+ in COMM 3203 and COMM 3206.
CALENDAR NOTES: This course is Signature Only. The call for applications will be sent by email each fall, with interviews to follow. Only those students accepted will be permitted to register.
PREREQUISITES: minimum grade of B+ in COMM 3203.03 and COMM 3206.03
RESTRICTIONS: FINA majors
FORMATS: Lecture

COMM 4240 Advanced Corporate Finance
CREDIT HOURS: 3
This course will help students learn to apply fundamental ideas of corporate finance to real-life problems of business valuation and financial decision. Topics that will be discussed include valuation, mergers and acquisitions, financial distress, capital structure, payout policy, securities issuance, and corporate governance. The course builds on concepts and techniques that students have learned in finance, accounting, statistics, and economics. Case studies will be used to bridge the gap between finance theory and its applications to practical problems in corporate finance.
PREREQUISITES: average grade of B- between COMM 2202.03 and COMM 2203.03; and COMM 3206.03
FORMATS: Lecture

COMM 4250 Theory of Finance
CREDIT HOURS: 3
This course is designed to complement other finance courses. Topics include time value of money, valuation of stocks, bonds, and derivative securities (including structured products such as defaultable bonds and credit default swaps), portfolio theory and equilibrium pricing models, portfolio investment and performance analysis, capital budgeting with real options, and capital structure theory. All theoretical models will be implemented using Excel.
PREREQUISITES: COMM 2203.03
FORMATS: Seminar

COMM 4315 International and Intercultural Management
CREDIT HOURS: 3
The growing importance of international business and involvement in global competitiveness requires the manager of the 21st century to acquire additional skills and abilities for effective international and intercultural interactions at home and abroad. This senior-level course is designed to provide students with the knowledge and skills necessary for effective management in global and culturally diverse domestic workplaces. The course content includes such topics as introduction to international human resource management, cultural orientations and values, cross-cultural communications, employee attitude, motivational issues in cross-cultural settings, differences in management and leadership styles, staffing and training for international assignments, expatriation and repatriation management, ethics and social responsibility across cultures, and intercultural negotiations. RECOMMENDED prior learning: COMM 3303.03 and COMM 3309.03
PREREQUISITES: COMM 2303.03 or MGMT 2304.03. At least fourth year standing
RESTRICTIONS: At least fourth year standing
FORMATS: Lecture

COMM 4340 Corporate Governance

CREDIT HOURS: 3

The central focus of corporate governance is the relationship between the top management team (TMT), the board of directors (BoD), and other stakeholders, especially stockholders. The collapse of once successful, large corporations across the globe illustrates the prankishness of their board members and the degree of their lack of concern for stockholders' interests. The reputation of audit and consulting companies associated with these ill-fated corporations suffered a great setback, leaving stakeholders wondering whom to trust to safeguard their interests.Students will take an in-depth look at the corporate governance triad, as indicated above, that controls the modern corporation. Accordingly, this course will deal with the control, composition, functions, roles, and structure of boards; board responsibility and accountability, CEO tenure and compensation, shareholder and other stakeholder representation; corporate board's vis-à-vis social responsibility and ethics; and comparative corporate governance across North America, Europe, and selected Asian countries.

PREREQUISITES: COMM 4353.03 or COMM 4351.03

CROSSLISTED: MGMT 4340.03

FORMATS: Lecture

COMM 4353 Strategic Management

CREDIT HOURS: 3

Strategic Management focuses on how a firm competes at various levels (functional, business, corporate, and international). The course is designed to analyze the sources of competitive advantage among firms and to develop knowledge and skills necessary for effectively analyzing, formulating, and implementing strategy. By the end of the course, the student should: 1. Understand the key concepts, tools and techniques in competitive strategy, strategy formulation, and strategy implementation; 2. Understand relevant methods and decision criteria in making strategic decisions; 3. Have an ability to use the appropriate concepts, tools, and techniques when discerning key issues, analyzing situations, and making sound decisions in a variety of strategic situations; and 4. Have oral and written communication skills that enable the effective presentation of strategic management and implementation concepts within the case-study format.

PREREQUISITES: All required CORE first, second, and third year courses, including the three work-terms, for the Bachelor of Commerce (Co-op) program.

EXCLUSIONS: COMM 4351.03, COMM 4352.03, MGMT 4001.02 and MGMT 4002.03

FORMATS: Lecture

COMM 4401 Marketing Strategy

CREDIT HOURS: 3

Marketing Strategy is the capstone course for marketing majors designed to integrate learning from other marketing courses as well as to introduce marketing strategy concepts. For both B2C and B2B firms, the aim of marketing strategy is to create superior value for customers and build long-term relationships with them. The course focuses strategies that help firms grow and expand their markets. Marketing strategy is underpinned by insightful customer, competitive and market analysis so that firms can achieve competitive advantage in the markets where they operate. Marketing plans designed to implement a firm's marketing strategy are also critical tools in determining a firm's success. Discussion of cases are the main learning tools. Simulations, report writing, and group presentations will also be used to enhance the acquisition of essential marketing skills.

PREREQUISITES: COMM 3401.03 OR COMM 3402.03 OR COMM 3404.03; plus one additional marketing elective course (choose from COMM 3405.03, COMM 3409.03, COMM 3410.03, COMM 3413.03, COMM 3414.03, or COMM 3710.03)

FORMATS: Lecture | Discussion

COMM 4501 Supply Chain Analytics

CREDIT HOURS: 3

Supply chains generate vast amounts of data spanning from financing, sourcing raw materials, manufacturing, marketing, logistics, consumption, and product returns. Supply chain analytics helps organizations (profit or non-profit) to make faster, smarter, and more effective decisions. This course examines the importance of business analytics in supply chain and logistics management, including descriptive, predictive, prescriptive, and cognitive tools and techniques for analyzing current supply chain operations, forecasting new trends, and making efficient tactical and strategic decisions. Students will be introduced to a variety of example applications and real-life cases and will further develop their own understanding and skills through acomprehensive class project.

PREREQUISITES: COMM 3500.03

FORMATS: Lecture | Lab | Discussion

COMM 4510 Corporate Communication

CREDIT HOURS: 3

By the end of this course, students will learn about various communication strategies adopted and deployed by corporations. Students will learn about key concepts from the field including the study of public relations, integrated marketing, and internal corporate communications. Through the course, students will assemble a corporation communication portfolio that includes press releases, internal memos, an investigative communication audit, integrated marketing campaign, media kit, press conference, crisis communication strategy, and strategic communication plan

PREREQUISITES: COMM 1715.03 and COMM 2303.03; OR MGMT 2304.03 and MGMT 3602.03

FORMATS: Lecture

COMM 4511 Business Process Integration using ERP Systems

CREDIT HOURS: 3

An experiential learning approach is adopted in this class that includes hands-on learning using SAP ERP, analytics tools, and a game-based SAP ERP simulation. Here you will learn to manage a company end-to-end from vendors to buyers using the actual SAP ERP in a real-time simulated competitive environment. You will grasp the concept of processes, gain technical skills with SAP, and playfully learn how Enterprise Systems facilitate Business Intelligence which can be used to lead a company in a competitive environment. Since the emphasis of this class is on experiential learning, the class time is focused on hands-on cases and simulations instead of lectures. There is an expectation that you are prepared and complete the readings before each class. In this course, there will be a balanced focus on learning both business processes integrating different functional areas and the technology that facilitates this. The class will be taught in the lab activities through a combination of individual and group tasks interspersed with short lectures.

PREREQUISITES: COMM 3511.03 or MGMT 3511.03

FORMATS: Lecture | Lab | Experiential Learning

COMM 4512 Business Analytics and Data Visualization

CREDIT HOURS: 3

This course provides an introduction to business analytics and data visualization using state-of-the-art technologies. It covers the processes, methodologies and practices used to transform data into useful information to support business decision-making. Students will learn how to extract and manipulate data from various sources and acquire basic knowledge of data mining and data analysis, with a focus on data visualization. Students will also learn to build dashboards using a variety of data design and visualization tools. The course will be comprised of both conceptual and applied topics, with classes being held in an interactive computer lab (or virtually via asynchronous lectures and synchronous office hours). Technologies to be used will be focused on end-user analytics and data visualization and will include state-of the-art tools for self-serve business analytics, such as MS Excel, SAP Lumira Discovery, SAP Cloud Analytics, SAP Business Objects Analysis, SAP Predictive Analytics, and Tableau.

PREREQUISITES: COMM 3511.03 or MGMT 3511.03

FORMATS: Lecture | Lab | Experiential Learning

COMM 4520 Supply Chain Planning & Execution

CREDIT HOURS: 3

A Supply Chain (SC) consists of all parties involved in fulfilling a customer request. Efficient integration of suppliers, manufacturers, distribution/logistics companies, and retailers/customers is vital in managing SCs so that the right products are delivered to the right place at the right price, quantity, condition, and time. Good management of an SC creates a competitive advantage. Focusing on the planning and execution of SC decisions, this course will help students gain a deep understanding of modern SCs and the reasons behind SC disruptions and utilize the analytical tools necessary to solve complex SC issues. Topics include strategic SC management, SC network design, SC coordination mechanisms, and SC sustainability. Students will experience a hands-on industry-partnered SCLM Major capstone project and apply managerial levers to optimize SC performance.

PREREQUISITES: COMM 3507.03 and COMM 3501.03

FORMATS: Lecture

COMM 4523 Project Management

CREDIT HOURS: 3

Many organizations in the private sector and the public sector are now using projects as tools to implement and achieve strategic goals, to innovate and to respond to customers changing needs. This course will introduce students to the management of project portfolio, the project management methodology, the cross-cultural leadership skills, the concepts, the tools and techniques required to successfully manage a project. In this course, a practical and hands-on approach is used and involves several experiential exercises enabling the students to build an expertise in the process of managing projects.

PREREQUISITES: COMM 3501.03 OR MGMT 3501.03

CROSSLISTED: MGMT 4333.03

COMM 4701 International Business Strategy

CREDIT HOURS: 3

The objective of this course is to help the students understand why firms expand overseas and how foreign operations differ from domestic ones. It provides the students with the necessary knowledge for a career or further study in international business. The course introduces the basic concepts of international business from a manager's perspective. It examines the issues and problems that arise when business operations extend across national boundaries and become international in scope or character. The emphasis is two-fold. First, consideration is given to the characteristics and contemporary dynamics of the world economy. Second, analysis is made of the development of the multinational firm and of the adaptation of the basic managerial functions due to internationalization. The course orientation is pragmatic and managerial. Through case studies, class discussions, assigned readings, and lectures, the students are expected to develop the skills for analyzing situations and formulating solutions in an international business context.

PREREQUISITES: At least fourth year standing

RESTRICTIONS: At least fourth year standing

FORMATS: Lecture

COMM 4901 Applied Entrepreneurship and Innovation
CREDIT HOURS: 3
COMM 4901 is the capstone undergraduate course in Entrepreneurship and Innovation. Linking theory and practice, students will practice learning's from prerequisite courses, while enhancing their understanding through an instructor led project. Working in groups, students will progress through an innovation management process consisting of secondary research, primary research, design thinking, refinement and implementation. As concepts are refined, students will work to establish the feasibility of their business model. This course will challenge students to identify opportunities; develop innovative concepts and manage the process for successful entrepreneurial outcomes. Students will learn how to manage innovation projects for both individual and corporate entrepreneurship. This course is a demanding, yet rewarding experience.
PREREQUISITES: COMM 3307.03 or COMM 3907.03 or MGMT 3907.03
CROSSLISTED: MGMT 4901.03
FORMATS: Lecture

Bachelor of Management

The Bachelor of Management (BMgmt) program is designed to be flexible and open to your creative and varied interests. It's built on a foundation of key management concepts like leadership, marketing, organizational behaviour and innovation. We want you to have the freedom to find careers in business environments, government, social enterprises or non-profit sectors. We want you to work on the things that excite you. This is a program for students who want a business degree, but it's also a program for students who know that they want to run an art gallery, write creative environment policy, manage a community theatre, streamline a family business or work in a library system; the possibilities are endless.

The objectives of the the BMgmt are:

- Enhance and lead organizations in diverse industries and sectors.
- Analyze and assess information in context to make appropriate decisions.
- Synthesize and evaluate information and ideas to make informed, creative decisions in complex, data rich, global environments.
- Develop intercultural understandings, skills, and competencies for navigating a culturally diverse society. Develop a capacity to practice and critique the principles of equailty, inclusion, accessibility, and decolonization for participating in an inclusive and socially just society.
- Apply interdisciplinary management theories and tools to solve complex organizational problems in a dynamic environment.
- Apply leadership theories in ethical, socially responsible, and innovate ways.

Degree Requirements

- Four year program
- Total credit hours required - 120
- Required GPA for graduation - 2.00
- Required core area courses - 60 credit hours:
    - ECON 1101.03: Principles of Microeconomics
    - ECON 1102.03: Principles of Macroeconomics
    - MGMT 1301.03: Interdisciplinary Management I
    - MGMT 1302.03: Interdisciplinary Management II
    - MGMT 1601.03: Management Software and Technology
    - MGMT 1101.03: Accounting I (Financial)
    - MGMT 2303.03: People, Work and Organizations: Micro Organizational Behaviour
    - MGMT 2304.03: People, Work and Organizations: Macro Aspects of Organizational Behaviour
    - MGMT 2305.03: Ethics and Social Responsibility
    - MGMT 2401.03: Introduction to Marketing
    - MGMT 2402.03: Marketing Applications in the Not-for-Profit Sectors
    - MGMT 2605.03: Working with Data
    - MGMT 2801.03: Government Structure
    - MGMT 2902.03: Innovation: Introduction to Design Thinking
    - MGMT 3001.03: Data Analytics and Applied Research
    - MGMT 3201.03: Financial Management
    - MGMT 3501.03: Operations Management
    - MGMT 3602.03: Professional Communications Skills
    - MGMT 4003.03: Strategic Management
    - MGMT 4004.03: Interdisciplinary Capstone
- Required Management electives
    - nine credit hours in management electives are required
    - six credit hours Writing Course (see Section C.)
- Open Electives
    - 45 credit hours, chosen from all courses offered in the University
    - A maximum of 18 credit hours at the 1000 level is permitted (Open and MGMT inclusive).
    - A maximum of 18 credit hours in Commerce is permitted.

Program Guide

Students will normally follow the courses as listed in the table below:

Year	Fall Sept - Dec (A)	Winter Jan - Apr (B)
Year One	Writing Requirement	Writing Requirement
	ECON 1101.03	ECON 1102.03
	MGMT 1101.03	MGMT 1302.03
	MGMT 1301.03	MGMT 2902.03
	MGMT 1601.03	Open Elective.03
Year Two	MGMT 2303.03 MGMT 2401.03 MGMT 2605.03 MGMT 2801.03 Open Elective.03	MGMT 2304.03 MGMT 2305.03 MGMT 2402.03 Open Elective.03 Open Elective.03

Writing Course

One of the first five credits chosen should be selected from a list of courses in which written work is considered frequently and in detail. These writing courses are approved by the Writing Across the Curriculum committee and are listed under Writing Courses of the academic calendar.

Courses which satisfy the Writing Requirement are identified by the following text in their formal description (under FORMAT): Meets Writing Requirement

Combined Degree

The School of Health and Human Performance and the Faculty of Management offer a five-year program in which a student graduates with both degrees, Bachelor of Science (Recreation)/Bachelor of Management. Please consult the School of Health and Human Performance section in the calendar for more information.

Majors

During their second and third year, students can continue to pursue a general program of study with electives that they can choose, or they can focus on one of the five majors.

Entrepreneurship and Innovation Major

Students must complete the following courses:

- MGMT 2902.03: Innovation: Introduction to Design Thinking*
- MGMT 3511.03: Management Information Systems
- MGMT 3907.03: New Venture Creation
- MGMT 4901.03: Applied Entrepreneurship and Innovation

*Students will receive credit for MGMT 2902 Innovation: Introduction to Design Thinking as their core requirement as well as the required class for the major in Entrepreneurship and Innovation

Students must choose four of the following:

- COMM 3310.03: Reflections on Leadership
- COMM 3401.03: Consumer Behaviour
- COMM 3402.03: Marketing Communications
- COMM 3405.03: Global Marketing
- COMM 3409.03: Sales Management
- COMM 3410.03: Service Marketing
- LEIS 4362.03: Recreational Entrepreneurship and Special Events
- MGMT 2200.03: Fundamentals of the Legal Environment of Management
- MGMT 3308.03: Managing the Family Enterprise
- MGMT 3309.03: Management Skills Development
- MGMT 3690.03: Managing Change, Information and Innovation
- MGMT 3902.03: Starting Lean
- MGMT 4333.03: Project Management

Leadership and Organizations Major

Students must complete the following courses:

- COMM 3303.03 Human Resource Management
- COMM 3310.03: Reflections on Leadership
- MGMT 3309.03: Management Skills Development
- MGMT 3320.03: Organizational Theory

Students must choose four of the following:

- COMM 4315.03: International/Cultural Management
- COMM 4510.03: Corporate Communications
- COMM 4701.03: International Business Strategy
- ECON 2217.03: Women and the Economy
- ECON 3319.03: Industrial Organization
- LEIS 2296.03: Leadership and Group Dynamic
- MGMT 2200.03: Fundamentals in the Legal Environment of Management
- MGMT 2805.03: Introduction to Indigenous Governance
- MGMT 3802.03: Public Policy
- MGMT 3810.03: Government Policy Towards Business
- MGMT 4333.03: Project Management

- MGMT 4340.03: Corporate Governance

Managing Data and Information
Students must complete the following courses:

- MGMT 3511.03: Management Information Systems

- MGMT 3601.03: Information in a Networked World
- MGMT 3603.03: Beyond Google
- MGMT 4620.03/INFO 6620.03: Web Design & Architecture

Students must choose four of the following:

- CSCI 1107.03: Social Computing
- CSCI 2141.03: Introduction to Database Systems
- CSCI 2201.03: Introduction to Information Security
- CSCI 2203.03: Data Science for Everyone
- MGMT 3605.03: Management of Knowledge and Innovation
- MGMT 4270.03/INFO 6270.03: Intro to Data Science
- MGMT 4300.03/INFO 6300.03: Government Information Resources
- MGMT 4370.03/INFO 6370.03: Records Management
- MGMT 4611.03/INFO 6610.03: Information Policy
- MGMT 4681.03/INFO 6681.03: Geospatial Information Management

Public Sector Management Major
Students must complete the following courses:

- MGMT 2200.03: Fundamentals of the Legal Environment of Management
- MGMT 2805.03: Introduction to Indigenous Governance
- MGMT 3802.03: Public Policy
- MGMT 3810.03: Government Policy Towards Business

Students must choose four of the following:

- CANA 2001.03: The Idea of Canada: Social and Political Perspectives
- CANA 2218.03/ECON 2218.03: Canadian Economy: Policy Issues
- CANA 3333.03: New Media and the Courts in Canada
- ECON 2212.03: Law and Economics
- ECON 2216.03: Economics of Global Warming
- ECON 2217.03: Women and the Economy
- ECON 2231.03: Perspective Health Economics
- ECON 2233.03: Canadian Economic History
- ECON 2334.03: Perspectives on Economic Development
- ECON 2336.03: Regional Development
- MGMT 4300.03/INFO 6300.03: Information Resources in Government
- POLI 2210.03: Unity and Diversity
- POLI 2215.03: Canadian Aboriginal Politics
- POLI 2220.03: Structures of Canadian Parliamentary Government
- POLI 2301.03: Comparative Politics I: Development Democracies Under Pressure

- POLI 3208.03: Canadian Provincial Politics
- POLI 3220.03: Intergovernmental Relations
- POLI 3224.03: Canadian Political Parties
- POLI 4561.03/5561.03/PUAD 6561.03: Security-Development Nexus

Environment, Sustainability and Society Major

Students must complete the following courses:

- SUST 1000.06: What is Sustainability? **OR** SUST 1001.06: A Sustainable Future*
- SUST 2000.06: Local Governance **OR** SUST 2001.06: Global Environmental Governance
- SUST 3000.03: Environmental Decision Making **OR** MGMT/SUST 3702.03: Sustainable Industries

Work-Integrated Learning Requirement

All BMgmt students with ESS as a Major subject must complete Work-Integrated Learning (WIL). This requirement may be satisfied with the following options:

- MGMT 4896.03: Management Internship I and MGMT 4897.03: Management Internship II. For details, visit dal.ca/mcs/internship **OR**
- SUST 4001.03: Environment, Sustainability and Society Capstone Part 1 and SUST 4002.03: Environment, Sustainability and Society Capstone Part 2** (SUST 4001 & 4002 also count below towards SUST Electives)

Students must complete the following electives:

- Six credit hours SUST at 2000 level or above
- Six credit hours SUST at 3000 level or above (satisfied with SUST 4001 & 4002)
- Three credit hours SUST/ESS electives at the 3000 level or above

* SUST 1000 or SUST 1001 satisfy the first year ESS Major requirement, however; SUST 1000 also satisfies the BMgmt writing requirement and can be more easily accommodated in the first year BMgmt schedule. SUST 1001 does not satisfy the BMgmt writing requirement.

**SUST 4001 and SUST 4002 must be completed in consecutive fall and winter terms. Credit will not be granted for SUST 4001 without successful completion of SUST 4002. If taken instead of the Management Internship, SUST 4001 & 4002 satisfy six credit hours of SUST at 3000 level or above.

Minors

For Bachelor of Management students

Bachelor of Management students can choose to complement their degree by declaring a minor in another subject area outside the Faculty of Management. Students should consult with thier Academic Advisor (UAO@dal.ca) concerning their degree requirements, and an Advisor from within the desired subject area for the minor requirement. For a current list of minors please see **"Minors"** of the Undergraduate Calendar.

Bachelor of Managment students are also eligible to declare the Minor in Entrepreneurship and Innovation.

The minor in management can be added to many 120 credit hour degree programs as Dalhousie. The requirements are the following courses:

- MGMT 1301.03: Interdisciplinary Management I
- MGMT 1302.03: Interdisciplinary Management II

Any 18 credit hours chosen from the below list, three credit hours of which must be at the 3000 level. Please note that some MGMT courses have additional prerequisite requirements:

- MGMT 2200.03: Fundamentals of the Legal Environment
- MGMT 2303.03: People, work and organizations: Micro Organizational Behaviour **(Not an option for BACS students)**

- MGMT 2304.03: People, work and organizations: Macro Organizational Behaviour
- MGMT 2401.03: Introduction to Marketing
- MGMT 2801.03: Government Structure
- MGMT 2805.03: Introduction to Indigenous Governance
- MGMT 3308.03: Managing the Family Enterprise
- MGMT 3309.03: Management Skills Development
- MGMT 3320.03: Organizational Theory
- MGMT 3601.03: Information in a Networked World

- MGMT 3603.03: Beyond Google
- MGMT 3701.03: The Community as a Living Laboratory
- MGMT 3702.03: Sustainable Industries
- MGMT 3802.03: Public Policy
- MGMT 3810.03: Government Policy Towards Business to the list below

Optional Internship

The Bachelor of Management (BMgmt) Internship Program offers a minimum 32 weeks (approximately eight months) work term of consecutive, full time paid work experience related to your studies. The work term can be completed with a large multi-national corporation, medium, or small business, at a not-for-profit organization or a government department. Management Career Services will support you in your work term job search.

Bachelor of Management students currently in the second year of their program are eligible to apply for the Internship Program and full details on the program can be found at www.dal.ca/mcs/internship. Please meet with your Academic Advisor to discuss your course plan first. With proper academic planning, students participating in the Internship Program are able to complete an eight-month internship and still graduate from the BMgmt Program in four years. In addition, participants in the Internship Program receive 1 full credit towards their program.

Acceptance to participate in the Internship Program will be assessed on the following:

Completed application submitted through Dalhousie's myCareer platform which includes:

1. a written statement of intent
2. a resume
3. reference information

2. An Interview with Management Career Services (to be arranged once completed application is reviewed), and
3. Full participation in the Internship Prep Seminar, MGMT 4895 held each fall,

Students must have a CGPA of 2.70 or a GPA of 2.70 or higher for the two terms prior to their application.

Internship Fee

Students accepted into the Internship Program are charged an Internship Fee. This fee is non-refundable after the last day to drop a course without a "W".

The Internship Fee covers administration of the Internship Program including, but not limited to:

- MGMT 4895, the Internship Prep Seminar
- Job search assistance (cover letters and resume building, interview preparation and debriefing, coaching for self-developed job search strategies)
- Networking opportunities with employers
- Development of job opportunities
- Access to on-line job posting site and job posting administration
- Interview space and co-ordination
- Facilitation of job offers
- Tracking of eligibility and job search activity
- Internship monitoring and mediation of unsatisfactory situations

- Marketing and communications tools and activities to promote the internship program to employers

Career Development Fee

Bachelor of Management students have access to specialized career development services through Management Career Services; this team is located directly within the faculty. This service is covered through the payment of a mandatory Career Development Fee. This fee is prorated for part-time students. The Management Career Services team provides the following services:

- Career Related Workshops including: Resumes, Interviewing, Job Search Strategies, Networking and more
- Individual coaching appointments (See below)
- Employer Information Sessions
- myCareer job postings
- On-campus and virtual grad recruitment
- Special Events (e.g. Sector specific Recruiting Events and Corporate Tours)

Career & Recruitment Specialists

There are six Career & Recruitment Specialists (CRS) and a Student Development Manager who oversees the team. In addition to the BMgmt Internship Coordinator, all CRS staff members can work with Bachelor of Management students across all majors (or undeclared). Career & Recruitment Specialists work with students to guide them through a process that provides the student with the ability and knowledge needed to develop their careers and conduct effective job searches. This set of skills will serve students well now, and in the future.

Career & Recruitment Specialists work with students individually or in group sessions to help with the following:

- Developing career research skills
- Planning a job search strategy
- Writing effective resumes and cover letters
- Building and interacting with a network of contacts
- Preparing for interviews
- Providing job search assistance

Courses

Courses

Course Descriptions

MGMT 1000 Managing Organizational Issues I
CREDIT HOURS: 3
This course is specially designed for Bachelor of Applied Computer Science students in the Dalhousie - Universal College Lanka (Dal-UCL) pathway program to introduce them to the complex social, economic, ecological, political and technological forces shaping 21st century leadership in the public, private and non-profit sectors.

MGMT 1001 Managing Organizational Issues II
CREDIT HOURS: 3
This course is specially designed for Bachelor of Applied Computer Science students in the Dalhousie - Universal College Lanka (Dal-UCL) pathway program to introduce them to the complex social, economic, ecological, political and technological forces shaping 21st century leadership in the public, private and non-profit sectors.
EXCLUSIONS: ASSC 1100.03, SCIE 1100.03

MGMT 1101 Introductory Accounting I (Financial)

CREDIT HOURS: 3
An introduction to the principles and practices used by accountants in processing and communicating data, both within and outside the organization. Emphasis is on financial accounting and reporting used in the measurement and reporting of an organization's operating, financing and investing activities to external users. Students will develop an understanding of basic financial accounting methodologies, and develop the analytical and procedural skills related thereto; as well as understand the information content of conventional financial statements, and the inherent limitations of accounting data. The organizational context includes business and not-for-profit settings. The coverage included an examination of the accounting process, basic issues in financial reporting, and the financial statement disclosure requirements.
CALENDAR NOTES: Students who have completed MGMT 2101.03 or COMM 1101.03 (COMM 2101.03) cannot also receive credit for MGMT 1101.03
EXCLUSIONS: COMM 1101.03
FORMATS: Lecture | Tutorial

MGMT 1102 Introductory Accounting II
CREDIT HOURS: 3
An introduction to the use of accounting information by managers, within the organization. This course examines how accounting can provide information to assist management in their planning, decision-making and performance evaluation. Both qualitative and quantitative information supports this decision-making. Emphasis is on management accounting and analysis, with the following objectives: To develop an understanding of the kinds of accounting information managers need; To examine managerial accounting methodologies and develop the analytical and procedural skills related thereto; To prepare accounting reports which are useful for management planning, control and decision making; To develop an awareness of the limitations of managerial accounting information.
CALENDAR NOTES: Students who have completed MGMT 2102.03 or COMM 1102.03 (COMM 2102.03) cannot also receive credit for MGMT 1102.03.
PREREQUISITES: MGMT 1101.03
CROSSLISTED: COMM 1102.03

MGMT 1301 Interdisciplinary Management I
CREDIT HOURS: 3
Management skills are essential, regardless of field or discipline. This course introduces foundational management concepts, exploring how people and processes are similar but vary across government, social enterprises, non-profits and business environments. Students will explore basic management issues of planning, organizing, leading and controlling to respond to internal and external pressures. Students will examine the interactions among the environment, technology, society, organizations and people, in a world with limited resources. The course introduces students to management issues with an emphasis on creativity, leadership and innovation, and is the starting point for the Management degree and minor, which are flexible programs that allow you to blend management skills with other fields and subjects you care about.
FORMATS: Lecture

MGMT 1302 Interdisciplinary Management II
CREDIT HOURS: 3
Management skills are essential, regardless of field or discipline. This course introduces foundational management concepts, exploring how people and processes are similar but vary across government, social enterprises, non-profits and business environments. Students will explore basic management issues of planning, organizing, leading and controlling to respond to internal and external pressures. Students will examine the interactions among the environment, technology, society, organizations and people, in a world with limited resources. The course introduces students to management issues with an emphasis on creativity, leadership and innovation, and is the starting point for the Management degree and minor, which are flexible programs that allow you to blend management skills with other fields and subjects you care about.
FORMATS: Lecture

MGMT 1601 Management Software and Technology
CREDIT HOURS: 3
This course will teach students how to use computer applications and systems essential to all management professions. Students will develop word processing, spreadsheet, and presentation software skills. They will also learn to manage web communications and emerging enterprise software technologies. Students should strongly consider completing this course in their first year of study.
CALENDAR NOTES: ASSC 1000 or CSCI 1200 will not be counted in the Bachelor of Management program.
EXCLUSIONS: ASSC 1000.03, CSCI 1200.03

MGMT 2105 Introductory Conflict Management for Sustainability
CREDIT HOURS: 3
Working towards sustainability requires collaboration between multiple individuals, groups, disciplines, and fields, which can lead us to disagreement and conflict. Working with conflict in a constructive way is therefore an important, complex, and ultimately positive component of the pursuit towards sustainability. In this course, we explore tools and models for developing interpersonal conflict management and communication skills so that we might transform our conflicts to opportunities for transformation and greater understanding. Our time is divided between in-person discussion and activity-based classes to allow you to put these skills into practice, and ongoing reflection, activities, and assessments. By the end of this course, you will be able to

implement improved conflict communication skills in sustainability contexts as well as in your day-to-day personal life.
CROSSLISTED: SUST 2105.03
RESTRICTIONS: Second year status or above
EXCLUSIONS: SUST 3952 (taken in Winter 2022
FORMATS: Lecture

MGMT 2106 Climate Change and Sustainability

CREDIT HOURS: 3
This course introduces quantitative methods for understanding our environment and calculating change. Our natural environment is influenced by multiple natural and anthropogenic factors that can influence the trajectory of our ecosystems through time. Fundamentally, we must understand the past such that we can compare and understand the current context of global warming into perspective. This course focuses on the quantitative science behind understanding the Quaternary period, which represents the last 2.6 million years of the earth's history. Topics will include the physical basis of climate change as well as the human activities that have influenced this change. A focus on research methods, including quantitative analysis of data, will enable students to understand how we know what we do about our past, and what it means for our future.
CROSSLISTED: SUST 2106
RESTRICTIONS: Second year status or above
FORMATS: Lecture | Tutorial

MGMT 2200 Fundamentals of the Legal Environment of Management

CREDIT HOURS: 3
This course provides an introduction to the legal setting of management in Canada. It examines the structure of the legal system and the machinery of justice. It considers the nature and application of various areas of law that are particularly relevant to management in the early 21st century, including administrative law, the law of torts, the law of contracts, principles from equity, organizational structures, employment and labour relations, insurance, the various areas of property law, privacy and freedom of information, and environmental protection.
CROSSLISTED: COMM 2603.03
RESTRICTIONS: At least second year standing
EXCLUSIONS: MGTA 2001.03
FORMATS: Online Delivery

MGMT 2205 Financial Skills for Success

CREDIT HOURS: 3
Financial literacy is crucial for making informed financial decision and achieving financial well-being. It empowers individuals to navigate the complexities of the financial world and make choices that align with their financial goals and values. It refers to the understanding of various financial concepts, including personal finance, budgeting, investing, saving, and managing money. It is the ability to make informed and effective decisions regarding money matters. In this course students will learn how to create and maintain a budget to manage income and expenses effectively and develop an understanding of different investment options, such as stocks, bonds, mutual funds, and real estate, and how they work. Additionally, topics such as debt management, retirement planning, risk management, taxes and setting financial goals will be covered in this course.
CALENDAR NOTES: No previous Finance knowledge required. Students will NOT receive credit for MGMT 2205.03 after receiving credit for COMM 3207.03
FORMATS: Lecture

MGMT 2303 People, Work, and Organizations: Micro Organizational Behaviour

CREDIT HOURS: 3
Organizational behavior and the study of work organizations and management draw on a number of disciplines within social sciences to help us to understand and make sense of individual behavior in groups and organizations. Through a combination of individual assessments, reflections, and assignments related to real-world application, this course will explore concepts and theories relating to micro aspects of organizational behavior. Topics include: individual motivation, personality, perception, attitudes, cultural values, and ethics in organizations. Links will also be made to practice and processes in organizations (for example: rewards, stress appraisal, trust and organizational commitment).
PREREQUISITES: MGMT 1302.03
EXCLUSIONS: COMM 2303.03*Students who have taken COMM 2303.03 Introduction to Managing People are currently required to take MGMT 3309.03 (Management Skills Development) for full exclusion to MGMT 2303.03 and MGMT 2304.03.
FORMATS: Online Delivery

MGMT 2304 People, Work and Organizations: Macro Aspects of Organizational Behaviour

CREDIT HOURS: 3
This course takes a macro perspective of organizational behavior (micro perspectives are covered in MGMT 2303) and focuses on how levels of commitment and performance are impacted by the relational aspects of organizations. It does so by examining how factors such as communication, team dynamics, and leadership contribute to and our influenced by organizational culture and structure. In addition, the course introduces the role of power within an

organizational setting and the challenges of change. To achieve a balance between theoretical and practical learning, the teaching methods will combine mini-lectures with in-class activities, simulations, cases, and discussions.
PREREQUISITES: MGMT 2303.03
EXCLUSIONS: COMM 2303.03 Please note: where a student is transferring from Commerce to Management and has taken COMM 2303.03, they will need to take the complementary course MGMT 3309.03 (Management Skills Development) to receive full credit for MGMT 2303.03 and MGMT 2304.03
FORMATS: Lecture

MGMT 2305 Ethics and Social Responsibility

CREDIT HOURS: 3
What is a good thing to do? What is the right thing to do? What ethical obligations do managers and decision-makers have to others, whether those be the user of their products and services, their community, their workplace, the environment, or humanity more broadly? In this course, students will explore the basics of ethical reasoning and learn how to apply it to the workplace. After establishing a framework with which to undertake ethical analysis, this course presents students with a series of controversial case studies that they will learn to evaluate critically. Students will learn how to compose the central format with which information is transmitted in a wide range of corporate and governmental environments, the brief. A secondary, but no less important, outcome of this course is that students will have a better understanding of their own ethical commitments in the workplace and in their personal lives. Through the tutorials, students will build skills in writing, facilitation, conflict resolution, and moral reasoning. Ultimately, this course aims for students to be equipped with a 'toolbox' to navigate ethical conundrums and commitments in their own professional and personal lives.
PREREQUISITES: MGMT 1302.03
EXCLUSIONS: PHIL 2081.03
FORMATS: Lecture | Lab

MGMT 2401 Introduction to Marketing

CREDIT HOURS: 3
The objective of this course is to familiarize you with marketing's mode of inquiry—the way marketers look at the world. As a marketer you should be able to: 1) ask the right questions about markets; 2) organize data into relevant information; 3) discover market opportunities; 4) set goals; 5) create a marketing plan that includes clear target markets, as well as product, price, distribution and communication strategies; and 6) implement and control a marketing program. A mixture of instructional methods will be used, including lectures, video cases, assignments, and current topics discussions. You are expected to prepare for class each week by prior reading of the assigned materials. Active participation is expected throughout the course. Students will work in teams and will be preparing a marketing plan to introduce a new product to the Canadian market.
PREREQUISITES: MGMT 1302.03
EXCLUSIONS: COMM 2401.03

MGMT 2402 Marketing Applications in the Not-for-Profit Sectors

CREDIT HOURS: 3
This course is intended to further the student's understanding of the ways in which the discipline of marketing can be applied to a number of public policy, environmental, professional and non-profit management areas. It will integrate the basic theory and concepts covered in the introductory marketing course with advanced theory and concepts in consumer psychology. Overall, the course will maintain a consumer behaviour perspective in examining the ways in which various constituencies fulfill their strategic organizational objectives through the application of marketing practices. Topic areas examined will be: micro-marketing (firm perspective) vs. macro-marketing (societal perspective); non-profit, cause-related, "green" and social marketing; de-marketing (e.g. anti-smoking, etc.); the use of marketing communications in the electoral and public policy-making process; ethics in marketing; marketing and development. The course may also examine the application of the discipline of marketing to a number of professional fields, such as sports/recreation and health sciences. Learning activities might include: lectures, videos, seminars, internet exercises, examinations and field assignments.
PREREQUISITES: MGMT 2401.03

MGMT 2605 Working with Data

CREDIT HOURS: 3
People and organizations are grappling with increasing amounts of data. Employees are now expected to collect, manage, evaluate, visualize, analyze, and apply data in a range of domains and challenges: in short, to be data literate. This course introduces this knowledge and skillset through online lectures and hands-on labs. Students will learn to use a variety of spreadsheets, data visualization, and data science tools to find, manage, assess, extract value from, and visualize raw data.
PREREQUISITES: MGMT 1601.03
FORMATS: Lecture | Lab | Online Delivery

MGMT 2801 Government Structure

CREDIT HOURS: 3
This course introduces students to the organizing principles and structures of governments in Canada, including federal, provincial, municipal and territorial governments. The course explores the role of the permanent public service and seeks to examine the relationship between the various public institutions in Canada, including the public service, political parties, advocacy groups, and the courts. For those interested in business this is an important course as it

provides an understanding of the core structures business must understand when dealing with government. As citizens this course provides a framework for understanding your rights and responsibilities.
PREREQUISITES: MGMT 1302.03
FORMATS: Lecture

MGMT 2805 Introduction to Indigenous Governance

CREDIT HOURS: 3
This course focuses on the traditional political cultures of Indigenous peoples within Canada as well as the fundamental issues facing Indigenous communities. This introductory course will provide students with the necessary background and conceptual framework that will equip them with a better understanding of Indigenous governance.
RESTRICTIONS: At least second year standing
FORMATS: Online Delivery

MGMT 2902 Innovation: An Introduction to Design Thinking

CREDIT HOURS: 3
Ever wonder how great ideas turn into innovative solutions people, organizations or communities want to adopt? In today's highly dynamic workplaces, innovation has become not only a priority, but a driving force in the pursuit of financial returns, competitive edge and social impact / social good. Moreover, employers such as Pixar, AirBnb, the Government of Canada and the United Nations, to name a few, have identified the ability to promote innovation and engage in creative practices as essential competencies for their employees and future leaders. Many of these organizations adopt an approach to innovative problem solving called Design Thinking. Design Thinking's mindset, process and rich collection of methods emphasize the importance of keeping an understanding of people and communities at the core of problem-solving efforts. A design thinking exercise offers the promise of producing ideas and solutions that are desirable for the user (of a product or service), customer or community. This course will explore what we mean when use the word innovation and its relevance to today's organizations and workforce. We will devote some time to understanding barriers to creativity, the impact of these barriers to innovative pursuits and how they might be overcome. Finally, we will take an in-depth look at Design Thinking – its foundations, methods, and challenges with execution. This course combines theory and application. It provides students with a hands-on practical learning experience in which they will experiment with how design thinking can be used to develop solutions to real-world problems.
FORMATS: Lecture

MGMT 3001 Research Methods and Applied Data Analytics

CREDIT HOURS: 3
Informed management decisions rely on high-quality knowledge, information, and data. This course will develop students' critical awareness of the principles,methods, tools, and techniques of ethical management research. It will enhance students' skills related to research assessment and synthesis, research design, research strategy, and qualitative, quantitative, and mixed methods. This course emphasizes critical thinking, applied skills, and evidence-informed decision-making to advance the field of management.
PREREQUISITES: MGMT 2605.03 or HAHP 3100.03 or HLTH 3010
FORMATS: Lecture

MGMT 3003 Tourism Management

CREDIT HOURS: 3
A multidisciplinary introduction to the concepts, methods, and practices of tourism management. Tourism is introduced within the context of leisure and recreation. It is described as a phenomenon that has social, economic, and environmental implications. Students are encouraged to think about the development of tourism in terms of the value of the experience created for the tourist. Emphasis is placed on a wholistic and sustainable perspective whereby the socioeconomic wellbeing of local people is paramount.
RESTRICTIONS: At least third year standing
FORMATS: Lecture

MGMT 3104 Sustainability and the Non-Profit Sector

CREDIT HOURS: 3
This course introduces the Canadian non-profit sector and its role in driving social change towards sustainability, equity and social justice at local, regional, national and international levels. It examines the important roles and contributions of NGOs in relation to state and private sector, in achieving social, economic and ecological sustainability. Students will gain valuable practical skills and work with/for non-profit organizations in their areas of interest.
PREREQUISITES: SUST 2000.06 or MGMT 2304.03 or INTD 2002.03 or permission of instructor
CROSSLISTED: SUST 3104.03
FORMATS: Online Delivery

MGMT 3108 Green Finance & Environment, Social, and Governance Investing

CREDIT HOURS: 3
This course explores rapidly growing markets Green Finance and Environmental, Social and Governance investing. The class begins with an overview of general approaches to financial investing, combined with an examination of how ESG investing fits into these markets. The course also explores project evaluation, allowing students to better understand which offer the best opportunities for investment while creating the greatest ESG impact. Students will then practically apply these skills in two semester long projects. The first is to design, implement and trade their own ESG investment portfolios. The second is to design, scope, outline, and budget an ESG project.
CROSSLISTED: SUST 3108.03
RESTRICTIONS: Third year status or above
EXCLUSIONS: SUST 3954.03 (taken in Winter 2022)

MGMT 3201 Financial Management

CREDIT HOURS: 3
This course provides a solid foundation in the principles and practices of financial management across corporate, not-for-profit, and public-sector organizations. Emphasis is placed on understanding finance within an integrated management framework. Topics include the time value of money, financial statement analysis, valuation, capital budgeting, capital structure, working capital management, risk management, and asset pricing. The course also addresses broader themes such as stakeholders analysis, financial planning, and sustainability through the triple bottom line approach.
RESTRICTIONS: At least second year standing
EXCLUSIONS: COMM 2202.03 and COMM 2203.03
FORMATS: Lecture

MGMT 3204 Risk Management

CREDIT HOURS: 3
This course is designed to be a holistic class on risk management. Risk is defined as "the possibility that bad or good things may happen". While centered on risk and uncertainty management in the context of business, it will cover a range of risk management ideas, tactics and strategies that are relevant to policy, environmental management, health care, media and communications management, development and other areas in which risk management plays a role.
PREREQUISITES: 2nd year standing
FORMATS: Online Delivery

MGMT 3308 Managing the Family Enterprise

CREDIT HOURS: 3
We explore the family system, the business system, the ownership system and their interactions - functional and dysfunctional. Specific topics, examined from the family business perspective, will include: the decision to join a family firm, management succession, ownership succession, the role of key non-family employees, strategic planning and other issues especially relevant for family firms. The course also addresses conflict and communication in the family and business. The course has two purposes. First, it provides an organized framework for students to understand the dynamics and special issues of family firms. Second, it is designed to allow students to explore their interest in joining a family firm. Therefore, the course will especially resonate with students who come from families which are in business or for students considering joining a family business. The material taught is also valuable to many students who will be employed by family businesses as employees, managers, or providers of professional services (e.g. accounting, finance, law). Others who wish to explore a key segment of Canadian business are also welcome.
PREREQUISITES: At least third-year standing, and MGMT 1302.03 or MGMT 3907.03
CROSSLISTED: COMM 3908.03
EXCLUSIONS: BUSI 6006.03
FORMATS: Lecture | Discussion | Experiential Learning

MGMT 3309 Management Skills Development

CREDIT HOURS: 3
As a professional course, students are asked to explore the theories and practices of management with an emphasis on skill development and the application of effective professional practices. Key topic areas include: the functions of management in the workplace, team collaboration and shared leadership, self-management practices, interpersonal communications, negotiations and conflict resolution, EDIAD, stakeholder and relationship management. Particular emphasis will be placed on management and leadership theories in practice through in-class exercises and a research project. In class, students will experience a combination of lectures, student presentations, group work, individual work, skill development practice session, in-class discussions, and experiential exercises.
PREREQUISITES: MGMT 2304.03 or COMM 2303.03 and at least third-year standing
CROSSLISTED: COMM 3309.03
FORMATS: Seminar

MGMT 3320 Organizational Theory

CREDIT HOURS: 3
If you want to know how to assess and create organizations that are adaptable, effective, and flexible in today's complex environments then this is the course

for you. The goal of this course is to prepare students to assess, design and structure organizations to be more effective. The interrelationships between strategy, technology, culture, and the organization's internal and external environments will be explored. An emphasis will be placed on change management practices and other frameworks that are useful for assessing and increasing organizational effectiveness. In class, students will experience a combination of lectures, student presentations, group work, individual work, in-class discussions, and the experiential exercises.
PREREQUISITES: MGMT 2304.03
CROSSLISTED: COMM 3320.03
EXCLUSIONS: COMM 4306.03
FORMATS: Lecture | Seminar | Discussion | Experiential Learning

MGMT 3450 Money, Power, and Bad Decisions: How we got it wrong, doing everything right

CREDIT HOURS: 3
This course explores the effects of advances in money and credit technology on our understanding of contemporary society. It will teach students about key moments in history, ranging from ancient Mesopotamia to the modern day, along with the consequences for human authority structures. The course argues that history is contingent and that the world we live in is the result of events that could have been otherwise, while also showing that there are timeless principles that are relevant to contemporary challenges and ideas. Students will finish the course having practiced constructing well-supported, historically-informed arguments about contemporary monetary and policy debates.
PREREQUISITES: 3rd year standing
FORMATS: Lecture

MGMT 3501 Operations Management

CREDIT HOURS: 3
This course introduces some of the standard techniques for managing operations in manufacturing and service sectors. Topics include capacity planning, forecasting, inventory, supply chains, production planning, project management, quality assurance, and queueing. Cases and class examples are used to build general skills and illustrate concepts and techniques to solve real-world problems in practice.
PREREQUISITES: MGMT 2605.03 or HLTH 3010.03
EXCLUSIONS: COMM 3501.03
FORMATS: Lecture

MGMT 3511 Management Information Systems

CREDIT HOURS: 3
Information is a key resource for organizations and professionals. Innovative uses of information are often keys to survival in an increasingly competitive and digital economy. Information systems enable these users and account for an increasing larger share of assets in most organizations. The ability to harness and manage these systems demands a sound understanding of a broad range of concepts, terms, and challenging issues dealing with technologies and strategies. This course is designed to help students acquire these essential skills and become an effective client, user, and manager of these systems. Specifically, the course will help students understand the fundamentals of what, how and why information systems are used in organizations and the technologies that enables them. In addition to lecture materials and theoretical frameworks, students will be exposed to real information systems such as SAP and Enterprise Resource Planning (ERP) systems and Business Analytics tools via hands-on lab work and exercises.
PREREQUISITES: MGMT 1302.03 and at least second-year standing
CROSSLISTED: COMM 3511.03
FORMATS: Lecture | Lab | Discussion | Experiential Learning

MGMT 3601 Information in a Networked World

CREDIT HOURS: 3
This course provides an introduction into information and knowledge exchange through political, societal, and social dimensions present in today's technological world. Throughout the course we will examine the historical development of information and knowledge production, debates on information control versus information freedom, and effective knowledge organisation for processing information that can be used for knowledge management and decision making.
RESTRICTIONS: At least third year standing
FORMATS: Lecture

MGMT 3602 Professional Communication Skills

CREDIT HOURS: 3
As a professional course, students will study and apply the broad range of written and oral communication skills needed by managers, paying particular attention to career development including writing resumes and cover letters, practicing professional interview skills, and researching a future career path. Topics include emails and professional correspondence, problem-solving using design thinking processes, group learning and team collaboration, persuasion and explanation as communication goals, extemporaneous communication, digital communication, writing reports, visual rhetoric, readability, and document design. Students will have the opportunity to practice their extemporaneous communication skills techniques in small groups during class, and on video through a group podcast.

CALENDAR NOTES: CSCI 2100 Workplace Communications for Computer Science - will not be counted towards the Bachelor of Management Program
PREREQUISITES: Writing Requirement (3 credit hours)
EXCLUSIONS: COMM 1702.03, ENGL 2100.03, ENGL 2110.03, EGLA 1003.03, (COMM 1710.03 and COMM 1720.03), (COMM 1711.03 and COMM 1712.03 and COMM 1715.03)
FORMATS: Lecture

MGMT 3603 Beyond Google

CREDIT HOURS: 3
In today's information-driven world, the ability to access and interpret contextually relevant data is essential for informed decision-making and strategic planning across individuals, teams, and organizations. This course provides a comprehensive exploration of information-seeking theory and practice, with a focus on developing the skills necessary for systematically and ethically retrieving, evaluating, and utilizing resources efficiently and effectively. Additionally, the course addresses contemporary challenges in information seeking, such as the spread of misinformation, the influence of social media, the implications of the Internet of Things (IoT), issues of accessibility, and the growing role of artificial intelligence. Emphasis will also be placed on leveraging technology to optimize search processes, alongside an exploration of the behavioral, emotional, and cognitive factors that influence how individuals engage with and consume information. Participants will gain an understanding of the complexities of modern information-seeking and be equipped to navigate these challenges in professional settings.
RESTRICTIONS: At least third year standing
FORMATS: Online Delivery

MGMT 3605 Management of Knowledge & Innovation

CREDIT HOURS: 3
This course focuses on the management of knowledge and innovation in organizations. In this course, we will explain the role that knowledge plays in the economy today and why it is essential to view knowledge as part of an "organization's stock of capital assets". We will survey theory and research on knowledge and innovation as an outcome (product, service, technology, practice), as well as examine and discuss the process of development and implementation of knowledge assets and innovation in organizations. We will also discuss the basic structures and designs that underlie an effective information or knowledge management system. Emphasis will be on the engagement of management and leadership in knowledge and innovation processes, particularly at the macro (strategy) level.
FORMATS: Lecture

MGMT 3690 Managing Change, Information & Innovation

CREDIT HOURS: 3
In today's rapidly evolving world, change is a constant force that shapes our lives. To succeed in this environment, individuals and organizations must become adaptable and comfortable with change. We face numerous global challenges, including rising international tensions, economic instability, political unrest, and growing income inequality. Additionally, concerns about climate change, such as extreme weather events, species extinctions, and rising sea levels, are placing pressure on governments and organizations to find sustainable solutions. Technological advances, particularly in artificial intelligence, further add to the sense of uncertainty and disruption in our world. Despite these challenges, there is growing public resolve to address environmental and social issues promptly, rather than postponing action. This willingness is supported by innovative technologies, the efforts of for-profit and non-profit organizations, and visionary leaders who are committed to creating positive change. Effective change management requires awareness of trends and crises in the environment, along with the ability to interpret these changes. Managers must be sensitive to both immediate events and long-term shifts and possess the skills to respond to challenges while staying focused on their vision for improvement. All managers, regardless of their position, need to embrace change leadership. Their role involves anticipating, encouraging, and responding to change, both within their organizations and in the broader world. Successful change management involves contributions from individuals at all levels, with key leaders playing a crucial role in guiding organizations through necessary transformations.
RESTRICTIONS: At least 2nd year standing

MGMT 3701 The Community as a Living Laboratory

CREDIT HOURS: 3
This course introduces students to research, concepts and methods for understanding community sustainability across a spectrum of perspectives. In this course, the Halifax community serves as a living laboratory for exploring environmental, social and economic challenges and solutions for community sustainability. Working in groups, students apply evidence-bases approaches to case-based projects using mixed (qualitative and quantitative) research methods to help community organizations (governmental and non-governmental) grapple with real world problems. A variety of tools may be used including systems analysis, environmental audits, field surveys, questionnaires, interviews, and statistical analysis. Students then draw conclusions and make recommendations for improvements on the basis of their analysis, and present them in a final report and powerpoint presentation.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 or SUST 2000.06 or SUST 2001.06 or MGMT 1702.03 and MGMT 2702.03 or MGMT 1301.03 and MGMT 1302.03
CROSSLISTED: SUST 3701.03
EXCLUSIONS: ENVS 3502.03, SUST 3502.03

MGMT 3702 Sustainable Industries

CREDIT HOURS: 3

The course introduces students to concepts and methods for analyzing industrial sustainability through an interdisciplinary lens that highlights the necessity of including economic, social and environmental considerations. It also intends to deepen their understanding of: a) the business case (short term and long term) for industrial/corporate sustainability; b) the tools, techniques and strategies necessary to decouple economic growth of our business sectors from resource use and environmental degradation; and c) the key role that business and industry play in the sustainable development agenda. Using examples from various industrial settings, a range of management and policy mechanisms for ensuring resource sustainability are explored.

PREREQUISITES: MGMT 1702.03 and MGMT 2702.03 or MGMT 1301.03 and MGMT 1302.03 or SUST 2000.06 or SUST 2001.06 or ENVS 1100.03 and ENVS 1200.03 or ENVS 1000.06

CROSSLISTED: ENVS 3702, SUST 3702

MGMT 3710 Doing Business in Emerging Markets

CREDIT HOURS: 3

This course is designed to give students an understanding of the traditional challenges and opportunities Canadian businesses face when expanding their business to emerging markets, including those in Africa, Asia, Latin America, and Eastern and Central Europe. Through this course, students will be expected to acquire a holistic understanding of the political, cultural, social, and economic challenges companies face when considering the benefits of expanding and conducting business in emerging markets.

PREREQUISITES: MGMT 2304 and MGMT 2401

CROSSLISTED: COMM 3710

FORMATS: Lecture

MGMT 3802 Public Policy

CREDIT HOURS: 3

This course serves as an introduction to the public policy process with an emphasis on the interplay between policy and the four thematic areas of study and professional practice upon which the Faculty of Management has been formed – the private sector, the environment, the public sector and information technology. Students assume the role of a policy analyst during the course and pursue a policy problem of their choosing through the policy process that culminates in a policy project briefing and paper.

PREREQUISITES: At least third year standing

RESTRICTIONS: At least third year standing

FORMATS: Lecture

MGMT 3810 Government Policy Toward Business

CREDIT HOURS: 3

The focus of this course is twofold: first, how governments shape business behaviour through policy, regulation, state ownership, and other forms of intervention; and secondly, why collaboration is a growing reality enjoining public sector and private sector organizations and the implications for each sector and society as a whole. The course aims to understand the fundamental difference between the public interest and the private interest and how such differences are sorted out through contemporary governance systems involving public, private and civic actors. While the emphasis will be on the Canadian environment, a comparative perspective will also be used in light of many issues that are increasingly transnational in scope. Students will be able to develop a critical view of government intervention and grow a sense of when and where government action is warranted and when and where it is not.

RESTRICTIONS: At least third year standing

FORMATS: Lecture

MGMT 3902 Starting Lean

CREDIT HOURS: 3

This course provides real-world, hands-on learning about what it is like to actually build a scalable startup. This is a lab providing experiential learning -- not a theory course. You will work in teams learning how to turn a great idea into a great enterprise. You will learn how to talk to customers, partners, and competitors, as you encounter the chaos and uncertainty of how a startup actually works. You will learn the importance of customer development and customer discovery to determine whether anyone other than you would want/use your product. Each day will be a new adventure outside the classroom as you test each part of your business model, then share your hard earned knowledge with the rest of the class.

RESTRICTIONS: At least third year standing

EXCLUSIONS: BUSI 5902.03

MGMT 3907 New Venture Creation Entrepreneurship

CREDIT HOURS: 3

This course looks under the hood of new venture creation through the lens of entrepreneurship. Entrepreneurship is the engine that drives new venture creation but it is also much more. Understanding entrepreneurship is understanding economics and social change. Entrepreneurship is a path to personal growth and fulfillment. In the course we use in class activities, experiential exercises, lecture, and Socratic discussion to learn about entrepreneurship and related topics such as types of entrepreneurship, innovation, culture, risk, business models, value creation, and etc.... The course is part of the university wide

entrepreneurship minor. As a result you will be learning with students who could come with a variety of knowledge and educational backgrounds. This gives us the opportunity to learn from each other and the need to help each other develop new knowledge and review things we sometimes take for granted.
CROSSLISTED: COMM 3907.03
RESTRICTIONS: At least third year standing
FORMATS: Lecture | Discussion | Experiential Learning

MGMT 4003 Strategic Management

CREDIT HOURS: 3
Strategic Management is about the sources of competitive advantage and how strategies are formulated and implemented to realize this advantage. Accordingly, this course examines the role of the general manager in the organization; environmental and industry factors; organizational resource and capability constraints; the creation of value through strategies at different organizational levels, and, finally, how an organization leverages its resources and capabilities to implement its strategies. In particular, the content and process of strategy formulation and implementation are examined in the context of the thematic areas of study and professional practice upon which the Faculty of Management is formed. Building upon this foundation, you will practice formulating and implementing well-thought-out strategy choices that are specific and actionable in the face of complexity and uncertainty.
PREREQUISITES: All required first, second and third year core classes for the Bachelor of Management
EXCLUSIONS: MGMT 4001 and MGMT 4002; COMM 4351 and COMM 4352

MGMT 4004 Interdisciplinary Management Capstone

CREDIT HOURS: 3
This capstone course will integrate management theory and learning across varies sectors of government, social enterprises, non-profits and business environments. Students will examine different means by which growth and the status of economic and social well-being are measured; market approaches to engage scarce resources; the interactions between market organizations where existing practices have been ineffective. The course examines innovation approaches and strategies in private and public sector organizations. Students will draw on their broadened awareness of interdisciplinary management to solve complex organizational problems.
PREREQUISITES: MGMT 4003

MGMT 4031 Ecological Economics

CREDIT HOURS: 3
Ecological economics is an emergent, transdisciplinary field of inquiry whose primary concern is to advance the body of theory and tools to understand and manage the environmental dimensions of economic activity. It is an explicitly normative field oriented towards environmental sustainability in economic organization. Ecological economics recognizes three conditions necessary to environmental sustainability: appropriate scale (relative to biocapacity), efficient allocation, and just distribution. Given the breadth of material encompassed within the scope of ecological economics, this class will explore a subset of possible topics including the basic principles and theory of scale, efficiency, and distributive justice. In addition, the class will look at how these apply to managing real world issues in environmental management and explore the tools used by ecological economists to quantify and interpret scale, efficiency, and distributive justice. This course is designed as a one-term introduction to ecological economics for graduate students in environmental studies and related programs with little or no prior exposure to economics.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from the School for Resource and Environmental Studies
EXCLUSIONS: ENVI 5031.03

MGMT 4041 Environmental Education

CREDIT HOURS: 3
Environmental education for all ages is a critical step in fostering sustainable behaviours and achieving higher level environmental goals. This course takes an interdisciplinary approach to studying environmental education, examining the cognitive and social science underpinnings of behaviour change. Through course readings and experiential "hands-on" learning opportunities, students are invited to critically evaluate how environmental educators create effective and authentically engaging programs. This course provides an overview of program evaluation techniques as well as environmental education in formal school settings, wilderness education, urban environmental education, how policy and mass media influence environmental behaviour.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from the School for Resource and Environmental Studies
PREREQUISITES: Permission of instructor
CROSSLISTED: ENVI 5041

MGMT 4047 Biodiversity Conservation System Design

CREDIT HOURS: 3
Biodiversity conservation systems are increasingly necessary as human activities dominate the landscape, seascape and freshwater ecosystmes. Precise prescriptions for conservation design are evolving. The theory and practice of conservation system design are explored through lectures, student presentations, discussions and exercises, as an active learning module involving the students, the instructor and the broader community. Topics include representation of ecological systems, focal species, population viability, habitat suitability, landscape ecology, connectivity, road ecology and planning for species shifts in response to climate change.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from the School for Resource and Environmental Studies

CROSSLISTED: SUST 4047.03
RESTRICTIONS: Restricted from 0-59 credit hours
EXCLUSIONS: ENVI 5047.03

MGMT 4050 Directed Reading and Research

CREDIT HOURS: 3
This course offers the student the opportunity to explore in greater detail a particular area of interest. The content of the course is negotiated with the individual instructor involved. The student and instructor must develop a proposal, and submit it to the Program Committee for approval. Guidelines are available from the Bachelor of Management Program Administrator.

MGMT 4125 Conflict Negotiation & Sustainability

CREDIT HOURS: 3
This course looks at local and global conflicts driven by: climate, politics, resource extraction, land use, and development. The class offers preparatory lectures followed by team-based simulated negotiations. Students learn techniques related to de-escalation, negotiation and debate tactics, through assuming and advocating various stakeholders' perspectives.
CROSSLISTED: PLAN 6125.03, SUST 4125.03, PLAN 4125.03
RESTRICTIONS: Must be third year status or above
FORMATS: Lecture | Discussion

MGMT 4145 Introduction to Public Law for Administrators

CREDIT HOURS: 3
This course examines the constitutional foundations and contemporary operation of the Canadian administrative state. It introduces students to the legal principles that structure public authority, constrain executive action, and shape institutional design in Canada. The course begins with the constitutional architecture of public power—constitutional supremacy, parliamentary sovereignty, federalism, and separation of powers—and then turns to the modern administrative state, focusing on delegation, discretion, procedural fairness, and judicial review. Particular attention is paid to how courts evaluate administrative decisions and how public actors can design and justify decisions that withstand legal scrutiny. Students will engage with leading Supreme Court of Canada decisions and consider how legality, legitimacy, and democratic accountability intersect in contemporary governance. No prior legal training is required.
RESTRICTIONS: Fourth year standing

MGMT 4270 Introduction to Data Science

CREDIT HOURS: 3
This course serves as an introduction to data science, and increasingly important set of skills and techniques for business intelligence, effective governance, and the research process. The amount of data we generate increases year on year. As computers have begun to play roles in many aspects of our daily life, our actions and interactions leave digital traces. This has led both to an explosion in the amount of data that we generate and an increased interest in analyzing and understanding that data. This class will give you an introduction to the skills you need to effectively collect, manipulate, and analyze data yourself. Rather than being constrained to using any specific data analysis software, we will focus on using the flexible programming language R. You will receive a thorough introduction to R, learning how to use a variety of its built-in capabilities as well as a number of available data analysis packages. By the course's end you should be capable enough that you will be able to begin teaching yourself and expanding your data science skills.
PREREQUISITES: At least third-year standing
CROSSLISTED: INFO 6270
FORMATS: Lecture | Lab

MGMT 4300 Government Info Resources

CREDIT HOURS: 3
This course will examine the ways in which various levels of government structure organize, produce, and disseminate information for a range of internal & external purposes. The emphasis will be on growing digital resources and approaches for accessing these types of material. There will be a focus on Canadian content with additional consideration of American, British, foreign and international resources, including specialized agencies such as the United Nations. The course will include a practical perspective for those seeking employment working with government information resources at provincial and/or federal levels.
CALENDAR NOTES: NOTE: MGMT classes cross listed with INFO graduate classes are restricted and require approval from the School of Information Management.
PREREQUISITES: INFO 5530.03 (recommended)
CROSSLISTED: INFO 6300.03
RESTRICTIONS: MI, MI/JD, MI/MPA, MI/MREM

MGMT 4333 Project Management

CREDIT HOURS: 3
Many organizations in the private sector and the public sector are now using projects as tools to implement and achieve strategic goals, to innovate and to respond to customers changing needs. This course will introduce students to the management of project portfolio, the project management methodology, the cross-cultural leadership skills, the concepts, the tools and techniques required to successfully manage a project. In this course, a practical and hands-on approach is used and involves several experiential exercises enabling the students to build an expertise in the process of managing projects.
PREREQUISITES: MGMT 3501.03 or COMM 3501.03
CROSSLISTED: COMM 4523.03

MGMT 4340 Corporate Governance

CREDIT HOURS: 3
The central focus of corporate governance is the relationship between the top management team (TMT), the board of directors (BoD), and other stakeholders, especially stockholders. The collapse of once successful, large corporations across the globe illustrates the prankishness of their board members and the degree of their lack of concern for stockholders' interests. The reputation of audit and consulting companies associated with these ill-fated corporations suffered a great setback, leaving stakeholders wondering whom to trust to safeguard their interests.Students will take an in-depth look at the corporate governance triad, as indicated above, that controls the modern corporation. Accordingly, this course will deal with the control, composition, functions, roles, and structure of boards; board responsibility and accountability, CEO tenure and compensation, shareholder and other stakeholder representation; corporate board's vis-à-vis social responsibility and ethics; and comparative corporate governance across North America, Europe, and selected Asian countries.
PREREQUISITES: MGMT 4001.03 or MGMT 4003.03
CROSSLISTED: COMM 4340.03
FORMATS: Lecture

MGMT 4370 Records Management

CREDIT HOURS: 3
This course provides a comprehensive introduction to the management of current records in contemporary environments in analog and digital form. Topics covered include: records creation, evaluation, maintenance and control; issues related to the maintenance, storage and disposition of records; electronic records management; legal and ethical compliance; recordkeeping and decolonization; and social justice issues in Archives & Records Management (ARM).
CALENDAR NOTES: MGMT classes cross-listed with INFO graduate classes require approval from the School of Information Management
PREREQUISITES: INFO 5515.03 (MI) or MGMT 5502.03 (MIM)
CROSSLISTED: MGMT 5012.03, INFO 6370.03

MGMT 4540 Data Management

CREDIT HOURS: 3
Introduces the theory and practice of managing data, covering technology-driven solutions to the challenges of storing, curating, and retrieving unstructured, semi-structured, and structured data. Topics include: tabular data, assessing data management requirements, data models and schemas, relational database management systems, SQL, post-relational DBMSs, Big Data, and visualization.
CALENDAR NOTES: MGMT classes cross-listed with INFO graduate classes require approval from the School of Information Management
PREREQUISITES: IT Competencies listed in Admission Requirements
CROSSLISTED: INFO 6540.03, BUSI 6516.03

MGMT 4611 Information Policy

CREDIT HOURS: 3
Explores a range of issues currently facing information professionals and the effect of these issues on policy development. Discusses the roles of all levels of government, the private and not-for-profit sectors, and key individuals in developing policies which affect information creation, control, access, and use. Focuses on Canadian issues, and includes international affairs as appropriate to the information society.
EXCLUSIONS: INFO 6610.03

MGMT 4620 Enterprise Web Applications

CREDIT HOURS: 3
Examines the theories, techniques and processes used to create, structure, and deliver electronic text. Topics include writing and design for the web, information architecture, and document analysis for digitization. Focuses on practical experience with HTML and CSS, TEI standards, XML, and XSLT.
CROSSLISTED: INFO 6620

MGMT 4681 Geospatial Info Management

CREDIT HOURS: 3
Spatial information is the air and water that makes mapping and spatial analysis possible. Mobile applications using maps are some of the most popular and often used web-based applications; they are also cloud based which added another layer of management issues. Maps, GIS and the use of spatial information

have never been more popular or public. This course addresses the effective management of spatial information. The course covers principles and practices associated with metadata, GIS, licensing, spatial information databases, map libraries and archives, spatial data infrastructures and web-based delivery of products and services, as well as distributed systems such as geolibraries, "digital earth" and the development of the "spatial cloud". This course is geared towards the manager who seeks to deploy services associated with spatial information and effectively develop an enterprise approach to managing spatial information. The course will also provide hands-on experience in using GIS and related technologies so as to be able to better understand how to deploy services, especially over the web.
CALENDAR NOTES: NOTE: MGMT classes cross listed with INFO graduate classes are restricted and require approval from the School of Information Management.
CROSSLISTED: INFO 6681.03

MGMT 4895 Internship Prep Seminar

CREDIT HOURS: 0
Upon acceptance into the Bachelor of Management Optional Internship Program (Winter Term), students must register for MGMT 4895 for the Fall Term. This course is designed to introduce internship students to aspects of career development and preparation for their internship experience. Students apply to the optional Internship Program through Management Career Services in their second year.
CALENDAR NOTES: This course is a Pass/Fail course and carries zero credit hours. Details on the Bachelor of Management Internship Program are available at www.dal.ca/mcs/internship
FORMATS: Seminar

MGMT 4896 Management Internship

CREDIT HOURS: 3
An optional eight or twelve month internship is offered between academic year 3 and the final academic year. The internship will apply a maximum six credit hours towards the Bachelor of Management degree. It is possible to complete an eight-month internship and still graduate on time. The internship option is viewed as a career investment, to build upon skills, professional experiences, and connections, and enhance employability after graduation. MGMT 4896 and MGMT 4897 are the two courses students completing the eight-month internship must enroll in. For any student completing a twelve month internship registration for MGMT 4898 is also required however, no credit value will be received for this course.
CALENDAR NOTES: Internship courses are Pass/Fail courses with a maximum of six credit hours to be applied to the Bachelor of Management degree. Achieving the six credit hours for the internship, requires both a satisfactory assessment of the student's work completed by their supervisor (coordinated by Management Career Services) and a passing grade on the academic internship report (assessed by a faculty member).
PREREQUISITES: Successful completion of 12 Core MGMT courses in addition to MGMT 3602 (Professional Communication Skills) and MGMT 4895 (Internship Prep Seminar)

MGMT 4897 Management Internship

CREDIT HOURS: 3
An optional eight or twelve month internship is offered between academic year 3 and the final academic year. The internship will apply a maximum of six credit hours towards the Bachelor of Management degree. It is possible to complete an eight-month internship and still graduate on time. The internship option is viewed as a career investment, to build upon skills, professional experiences, and connections, and enhance employability after graduation. MGMT 4896 and MGMT 4897 are the two courses students completing the eight month internship must enroll in. For any student completing a twelve month internship registration in MGMT 4898 is also required however, no credit value will be received for this course.

MGMT 4901 Applied Entrepreneurship and Innovation
CREDIT HOURS: 3
MGMT 4901 is the capstone undergraduate course in Entrepreneurship and Innovation. Linking theory and practice, students will practice learnings from prerequisite courses, while enhancing their understanding through an instructor led project. Working in groups, students will progress through an innovation management process consisting of secondary research, primary research, design thinking, refinement and implementation. As concepts are refined, students will work to establish the feasibility of their business model. This course will challenge students to identify opportunities; develop innovative concepts and manage the process for successful entrepreneurial outcomes. Students will learn how to manage innovation projects for both individual and corporate entrepreneurship. This course is a demanding, yet rewarding experience.
PREREQUISITES: MGMT 3907.03 or COMM 3307.03

Introduction

Epidemiology is the core science that underpins both public health and evidence-based clinical practice and health policy. Epidemiologic research targets factors that influence the development, mechanism, and outcomes of health conditions. Included among these factors are biological and social determinants of health as well as health services and systems.

Our faculty members are responsible for undergraduate courses offered in the Faculties of Science/Medicine, as part of the BSc

Medical Sciences Program. Our faculty members are also engaged in tutoring, teaching, research mentorship, and leadership within medical school. (Please see the Dentistry, Law and Medicine calendar for more information).

Degree Programs

The Department of Community Health & Epidemiology offers MSc and PhD programs in Epidemiology and Applied Health Research. Please see the Faculty of Graduate Studies calendar for more information.

Introduction

The Department of Medical Neuroscience fosters research and education in neuroscience and human anatomy to advance the understanding and treatment of diseases of the nervous system. Our faculty members contribute to undergraduate neuroscience courses in the Faculty of Science including NESC 3440: Human Neuroanatomy and NESC 4070: Chemical Neurobiology.

The Department of Medical Neuroscience is also the home for Anatomy at Dalhousie University, at the undergraduate level offering courses in human gross anatomy and histology.

Courses

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

ANAT 1010 Basic Human Anatomy

CREDIT HOURS: 3
This course is offered by the Department of Medical Neuroscience primarily to students in the Schools of Nursing (Section 01). A limited number of seats are available for Special Health Professions. Arts and Science, or Non-Degree students. Note that this course is also offered by DISTANCE EDUCATION (ANAT 1010.03, Section 02) during the Regular Term (Fall or Winter). Upon successful completion of the course, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. This course uses an online Virtual Anatomy Laboratory.
CALENDAR NOTES: Please note that the Distance Anat 1010 section 02 course is unrestricted and open to all students.
RESTRICTIONS: Section 01 is restricted to Nursing students and a limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students.
FORMATS: Lecture

ANAT 1020 Basic Human Anatomy

CREDIT HOURS: 3
This course is offered by the Department Medical Neuroscience primarily to student in Recreation, Physical and Health Education and Kinesiology. A limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students. Note that this course is also offered by DISTANCE EDUCATION (ANAT 1010.03, Section 02) during the Regular Term (Fall or Winter). Upon successful completion of this course, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. This course uses an online Virtual Anatomy Laboratory.
CALENDAR NOTES: This course is NOT offered during the summer term.
RESTRICTIONS: Restricted to student in Recreation, Physical and Health Education and Kinesiology. A limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students.
FORMATS: Lecture

ANAT 2160 Introduction to Human Histology

CREDIT HOURS: 3
Histology is the study of the structure of cells, tissue and organ systems, and it utilizes information derived from both light and electron microscopy. This course complements studies in anatomy, cell biology, physiology, and biochemistry, broadening the understanding of how organisms function.
PREREQUISITES: BIOL 2020.03 or permission of instructor

CROSSLISTED: BIOL 3430.03
FORMATS: Lecture | Lab

ANAT 3010 Introductory Human Anatomy

CREDIT HOURS: 3
This is a lecture-based course in human anatomy that provides an intermediate-level understanding of the human musculoskeletal, cardiovascular, respiratory, digestive, urinary, reproductive and nervous systems, and introduces key features associated with the formation of the human body. Restricted to students in the Bachelor of Science in Medical Science Program.
PREREQUISITES: BIOL 2020.03 or equivalent
RESTRICTIONS: Restricted to student in Bachelor of Science in Medical Sciences
FORMATS: Lecture

ANAT 4010 Advanced Human Anatomy

CREDIT HOURS: 3
This laboratory-centered course provides students with a high level of understanding of three-dimensional human anatomy. The course consists of hands-on study of functional anatomy through cadaver dissections and supplementary lectures and discussions. Restricted to fourth year students in the BSc in Medical Science program.
PREREQUISITES: ANAT 3010.03; Instructor permission required.
FORMATS: Lecture | Lab

Pathology

Pathology

Location:
Sir Charles Tupper Medical Building
5850 College Street
11th Floor
PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 494-2091
Fax Number: (902) 494-2519
Email Address: eileen.kaiser@dal.ca
Website: pathology.medicine.dal.ca

Introduction

The study of Pathology encompasses the understanding of basic responses of cells, tissues and organs to various injurious stimuli with particular emphasis on the role of such responses in the pathogenesis of inflammatory responses, neoplasia, fluid and hemodynamic derangements.

Course Descriptions

PATH 3000 Introduction to Pathology
CREDIT HOURS: 3
This course provides a general introduction into the science concerned with the basis of disease. The primary focus of the course is to highlight the basic concepts that underlie disease processes. These concepts are illustrated through a range of topics including: immunopathology, neoplasia, genetic disorder, neuropathology, hematopathology and cardiovascular pathologies.
CALENDAR NOTES:
PREREQUISITES: BIOL 1011.03 or equivalent, BIOL 2020.03 or equivalent
RESTRICTIONS: Restricted to students in the Bachelor of Science in Medical Sciences Program
FORMATS: Lecture

PATH 4100 Critical Thinking in Neuropathology
CREDIT HOURS: 3
This course focuses on breakthroughs in understanding human brain function. You will learn about the inspirations and acidents that lead to seminal discoveries. You wil be ale to understand the context of these breakthroughs. You will learn to ask better questions about the process of basic and applied research.
PREREQUISITES: NESC 2470 or PHYL 2041
FORMATS: Seminar

Pharmacology

Pharmacology

Location:
Sir Charles Tupper Medical Building
5850 College Street
6B3, 6th Floor (Temporary Administrative Office in room 1-C1 until Fall 2024)
PO BOX 15000
Halifax NS

Fax Number: (902) 494-1388
Email Address: phacad@dal.ca
Website: pharmacology.medicine.dal.ca/

Introduction

Pharmacology is the study of the actions and fates of drugs in biological systems. Studies of the interaction of drugs with their receptors and the elucidation of the cellular mechanisms underlying the resulting responses are central to Pharmacology. It is also important to understand how drugs are handled in the body, why they produce adverse effects, and how they interact with each other. In addition, scientists often use drugs as tools to determine the basic mechanisms that underlie both normal and pathological conditions in biology. A solid understanding of the principles of Pharmacology is essential for any scientist who wishes to use drugs as tools properly. The experimental approaches used in Pharmacology are varied, ranging from bioassay, electrophysiology, chemical and biochemical analyses to molecular biology.

Degree Programs

Students intending to pursue graduate training in Pharmacology are encouraged to study pharmacology at the undergraduate level. In addition, a solid background in pharmacology can open the door to employment in numerous sectors, most notably the pharmaceutical industry. The Department of Pharmacology does not offer an honours pharmacology degree program as such. However, it does provide courses that may be taken for credit within various other honours degree programs, including Biology, Biochemistry, Psychology (Neurosciences) and Microbiology and Immunology. In addition, students can conduct honours thesis research projects in the laboratories of Pharmacology faculty. Finally, undergraduate students may, with permission of their home department and the course instructor, take certain graduate specialty courses which are offered in the Department of Pharmacology.

Courses

Courses

Course Descriptions

PHAC 1471 Pharmacology for Pharmacy
CREDIT HOURS: 3
Part one of a two semester course providing an introduction to Pharmacology, emphasizing basic mechanisms of drug action and principals of drug-receptor interactions, pharmacokinetics, and drug metabolism.
CALENDAR NOTES: This course is restricted to students enrolled in the PharmD program at Dalhousie University.
RESTRICTIONS: This course is restricted to students enrolled in the PharmD program at Dalhousie University.
FORMATS: Lecture

PHAC 1472 Pharmacology for Pharmacy

CREDIT HOURS: 3
Part two of a two semester course providing an introduction to Pharmacology, emphasizing basic mechanisms of drug action and principals of drug-receptor interactions, pharmacokinetics, and drug metabolism.
CALENDAR NOTES: This course is restricted to students enrolled in the PharmD program at Dalhousie University.
RESTRICTIONS: This course is restricted to students enrolled in the PharmD program at Dalhousie University.
FORMATS: Lecture

PHAC 3000 Experiential Learning in Pharmacology

CREDIT HOURS: 3
This one semester course is intended to introduce students to outside-the-classroom learning experiences. Students will work closely with a supervisor to learn laboratory skills and expand their knowledge in Pharmacology. Course structure will vary, depending on the nature of the experience.
CALENDAR NOTES: To register for this class, students must find a supervisor in the Department of Pharmacology and complete a project description, including expectations/role of the student learning objectives and assessment components. The project outline, objectives and assessment must be approved by the course coordinator prior to registration
COREQUISITES: Phac 3001 or Phac 3030 or Phac 4403 or Phac 4409
RESTRICTIONS: Requires permission of coordinator and supervisor
EXCLUSIONS: Lab work that is part of another course or paid employment is not eligible. Cannot be taken concurrently with another Directed Research or Honours course. Only one experiential learning course per degree is permitted.
FORMATS: Experiential Learning

PHAC 3030 Pharmacology - The Drugs Around Us

CREDIT HOURS: 3
Using examples of drugs found in our environment and daily lives, this course will discuss subjects including drug regulations, how drugs affect us and modify our body, foods that are addictive; drugs in products you wouldn't suspect as well as the treacherous effects of common medications and environmental toxins.
RESTRICTIONS: 3rd year and above
FORMATS: Lecture | Discussion

PHAC 3333 Pharmacology of Medicinal Herbs and Fungi

CREDIT HOURS: 3
Natural products remain an important source for the development of new therapeutics. The course explores the uses of plants, herbs and fungi as medicine, ranging from traditional approaches for treating ailments to modern pharmaceuticals.
COREQUISITES: none
PREREQUISITES: PHAC 3030 or instructor’s approval
CROSSLISTED: n/a
RESTRICTIONS: third year or above, E1 and E2 registration exclusion
FORMATS: Lecture

PHAC 4000 Directed Research Project in Pharmacology

CREDIT HOURS: 3
This course is intended to introduce students to academic research in a laboratory environment. Students will work closely with a supervisor to develop a research question and project proposal to address this question. Students will learn laboratory skills and expand their knowledge in Pharmacology. It is expected that students will take 4000 & 4100 consecutively in Fall & Winter terms of the same academic year, unless otherwise agreed upon with the student, coordinator and supervisor.
CALENDAR NOTES: To register for this class, students must find a supervisor in the Department of Pharmacology and complete a project description, including expectations/role of the student learning objectives and assessment components. The project outline, objectives and assessment must be approved by the course coordinator prior to registration.
COREQUISITES: PHAC 3001 or PHAC 3030 or PHAC 4403 or PHAC 4409
RESTRICTIONS: Requires permission of coordinator and supervisor
EXCLUSIONS: Lab work that is part of another course or paid employment is not eligible. Cannot be taken concurrently with an Experiential Learning or Honours course.
FORMATS: Other (explain in comments)

PHAC 4100 Directed Research Project in Pharmacology

CREDIT HOURS: 3
This course is intended to introduce students to academic research in a laboratory environment. Students will work closely with a supervisor to develop a research question and project proposal to address this question. Students will learn laboratory skills and expand their knowledge in Pharmacology. It is expected that students will take 4000 & 4100 consecutively in Fall & Winter terms of the same academic year, unless otherwise agreed upon with the student,

coordinator and supervisor.
CALENDAR NOTES: To register for this class, students must find a supervisor in the Department of Pharmacology and complete a project description, including expectations/role of the student learning objectives and assessment components. The project outline, objectives and assessment must be approved by the course coordinator prior to registration.
COREQUISITES: PHAC 3001 or PHAC 3030 or PHAC 4403 or PHAC 4409
RESTRICTIONS: Requires permission of coordinator and supervisor
EXCLUSIONS: Lab work that is part of another course or paid employment is not eligible. Cannot be taken concurrently with an Experiential Learning or Honours course.
FORMATS: Other (explain in comments)

PHAC 4403 Systems Pharmacology I

CREDIT HOURS: 3
This course introduces pharmacology, the study of the interactions of drugs with the human body. Topics include drug receptors, drug metabolism, and drug distribution. Drugs acting on the autonomic nervous system, skeletal muscle, cardiovascular system, antimicrobial medications, plus anti-cancer drugs will be discussed. Content experts in pharmacology present different topics.
COREQUISITES: None
PREREQUISITES: BIOC 2300 or PHYL 2041 or NESC 2570 or Instructor's Permission
CROSSLISTED: None
RESTRICTIONS: Restricted to third year and above.
EXCLUSIONS: PHAC 3001
FORMATS: Lecture

PHAC 4409 Systems Pharmacology II

CREDIT HOURS: 3
This course is designed to complement Pharmacology I. It covers drug classes acting on various human body systems with emphasis on basic principles, mechanism of the drug action, therapeutic indications and adverse drug reactions. Topics include drugs acting on the central nervous system, drugs of abuse, local and general anesthetics, drugs acting on various endocrine glands, reproductive, immune, gastrointestinal and respiratory systems, anticancer drugs and drugs used in selected populations.
PREREQUISITES: BIOC 2300 or PHYL 2041 or NESC 2570 or Instructor's Permission
CROSSLISTED:
RESTRICTIONS: Restricted to third year and above.
EXCLUSIONS: PHAC 4001
FORMATS: Lecture

Physiology and Biophysics

Physiology and Biophysics

Introduction

The Department of Physiology and Biophysics offers a wide range of undergraduate courses in addition to those restricted to students in the faculties of Medicine, Dentistry and Health Professions. Students who have previously taken biology, chemistry, physics will be best equipped to study physiology.

The courses listed below are aimed at providing the student with an understanding of the functioning of the human body. The Distance Education course PHYL 1001.03/1002.03 is open to all students. PHYL 2041.03 and/or PHYL 2044.03 is/are the recommended prerequisite for science students interested in taking higher level physiology courses. Students wishing to enrol in other specialized courses require permission from the Course Director.

Staff

Dean
Anderson, D. R., MD, FRCPC, FACP

Head of Department
Cowley, E.A., PhD

Undergraduate Student Advisor
Krueger, S., PhD (Zurich)

Professors
Chappe, V., BSc (Univ Aix-Marseille), MSc, PhD (Université de Provence-Marseille, France). Structure, function, recycling and regulation of the CFTR chloride channels; Cystic Fibrosis causing mutations; second messengers; protein kineases; protein interations; receptors and signalling pathways.
Chauhan, B., PhD (Wales), major appointment Department of Ophthalmology and Visual Sciences. Experimental models of optic nerve and retinal damage, visual function in health and disease, structural and functional assessment of glaucoma, risk factors for the progression of glaucoma
Cowley, E. A., BSc (London), PhD (Leicester). Oxidative stress in lung disease. Role of K+ channels in transepithelial secretion
Dong, X., PhD (Univ Sci Tech, China). Lysosome physiology and lysosome-related diseases; lysosomal ion channels and transporters in calcium signaling, membrane trafficking, autophagy, lysosomal storage diseases, neurodegenerative diseases, and cancers
Fine, A., AB (Harvard), VMD, PhD (Penn). Neural plasticity; learning and memory, development and regeneration; optical monitoring of neural activity and plasticity; neural transplantation
Linsdell, P., BSc (London), PhD (Leicester). Ion channel biophysics; chloride channel structure and function; epithelial transport; cystic fibrosis
Pulinilkunnil, T., MSc (NIPER, Mohali, India), PhD (University of British Columbia, Vancouver, Canada). Metabolic regulation of Autophagy in health and disease. Nutrient regulation of lysosome function. Biology of amino acid metabolism and signaling. Role of alpha-mannosyltransferase in glycosylation disorders
Quinn, T. A., PhD (Columbia University, NY). Cardiovascular disease, with an emphasis on changes in cardiac mechanics, electrophysiology, and mechano-electric interactions leading to cardiac arrhythmias and heart failure; Cardiac regulation, with an emphasis on intrinsic autoregulatory mechanisms, including stretch and the intracardiac nervous system; Fluorescence-, optogenetic-, and computational modelling-based structure-function studies using whole animals to isolated cells. Primary appointment in the Department of Physiology and Biophysics
Sapp, J.L., BSc (Toronto), BSc Med, MD (Dalhousie), FRCP(C), major appointment with Department of Medicine. Ventricular tachycardia investigation and management. Intramyocardial needle ablation for treatment-refractory ventricular tachycardia; the role of catheter ablation for ischemic ventricular tachycardia; body surface mapping to derive an inverse solution and quantify its accuracy and the improvement of rapid mapping of ventricular tachycardia
Torkkeli, P. H., BSc, MSc, LcSc (Oulu), PhD (Alta). Mechanosensitive, voltage- and ligand-gated ion channels in mechanosensory neurons, central control of mechanosensation

Associate Professors
Anini, Y., PhD (Paris, France), Prohormones processing. Role of new enteric peptides and adipokines in the regulation of pancreatic secretions and adipogenesis. Hormonal regulation of energy homeostasis. Type 2 diabetes. Obesity
El Hiani, Y., BSc (Ibn Zohr, Morocco), MSc, PhD (UPJV, Amiens-France). Oxidative stress in breast cancer and opportunities for pharmacological intervention. Membrane electrophysiology, ion channel biophysics and structure function; transient receptor potential channels, calcium channels; calcium influx; calcium signaling)
Krueger, S., PhD (Zurich). Synaptic physiology; development and plasticity of synapses in the central nervous system; regulation of neurotransmitter release
Lomniczi, A., BSc, PhD (Universidad de Buenos Aires, Argentina). Neuroendocrine control of reproductive development and menopause, molecular determinants of dementia, epigenetic mechanisms of gene expression.
Siddiq, F., BSc (Dalhousie), MD (University of Toronto, TO, Canada), major appointment with Division of Endocrinology and Metabolism. Prevention of Diabetes complications; quality improvement initiatives in diabetes care.
Wells, S., PhD (Toronto), major appointment in the School of Biomedical Engineering. Structural-mechanical relations in

biopolymers such as elastin and collagen in order to determine the underlying mechanism(s) of elasticity of these materials-and thereby to understand the functioning of the arteries, ligaments, skin etc. which they make up. Structural remodeling of these structures during development and maturation from fetal to adult life

Assistant Professor

Chaudhary, K.R., BPharm (HNGU, Gujarat, India), PhD (University of Alberta, Edmonton, AB, Canada). Study of sex differences in right ventricular angiogenesis, right ventricular function, and pathophysiology of right (-sided) heart failure. Identification and characterization of cardiac vascular stem cells and their role in right ventricular adaptation to physiological and pathological stress.
Agosto, M. A., BS (M.I.T.), PhD (Harvard). Neurobiology of the retina; synaptic trafficking; synaptic protein interactions

Adjunct Professors

Höger, Ulli., MSc, PhD (Johann Wolfgang Goethe Univ, Germany)
Luhovyy, B., MS, BSc, PhD (Lviv Ivan Franko National Univ, Ukraine)

Senior Instructor

Beaudoin, M.-S., BSc (McGill), MSc, PhD (Guelph)

Instructor

Slysz, J., BSc and MSc (University of PEI), PhD (University of Guelph)

Certificate in Human Physiology

Offered by: Physiology & Biophysics, Psychology & Neuroscience, Biology, Kinesiology

Coordinators: Dr. Derek Kimmerly (Kinesiology students) dskimmerly@dal.Ca
Dr. Nathan Crowder (Neuroscience & Psychology) Nathan.Crowder@dal.ca
Dr. Marie-Soleil Beaudoin (Medical Sciences & Other Programs) marie-soleil.beaudoin@dal.ca

Eligibility: This certificate is open to currently registered in an undergraduate degree-conferring program (e.g., BSc, BA, BScMS, etc.) at Dalhousie University.

Overview: The Certificate in Human Physiology provides students with an opportunity to specialize in physiological studies through courses offered in the Medical Sciences, Biology, Neuroscience, and Kinesiology undergraduate programs, as well as experiential learning opportunities. The learning outcomes will vary between students and depend on their main area of undergraduate studies, as well as on individual interests. Concentrating on one or more cross-cutting themes, students enrolled in the certificate program may choose to:

- Examine the function and role of particular organ systems in human performance and disease.
- Analyze the function of the nervous and endocrine systems to appreciate how they regulate bodily functions and behaviour.
- Explore physiological mechanisms at molecular and cellular levels to develop a more thorough understanding of physiological and pathophysiological processes at a higher organizational level.

Admission to Certificate: Students should enrol in the Certificate Program in Human Physiology in their third year of studies. To enrol, students must declare the certificate through Dal Online (https://dalonline.ca >Web for Students>Admissions>Declare Major/Minor/Certificate) and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. A minimum grade of at least B- is required in 6 credit hours of the following core courses:

- PHYL 2041 Human Neurophysiology and PHYL 2044 Systems Physiology or
- BIOL 3370/MARI 3370 Animal Physiology and BIOL 3371/MARI 3371 Laboratory in Comparative Animal Physiology or
- BIOL 3078/MARI 3078 Animal Physiology I and BIOL 3079/MARI 3079 Animal Physiology II or
- NESC 2470 Systems Neuroscience and PHYL 2044 Systems Physiology or

- KINE 2310 Physiology of Exercise and KINE 2430 Motor Control & Learning

2. A grade of at least B- required in 15 elective credit hours chosen from the list of courses below. Courses from the list of core courses can be taken as electives if they are not already used to fulfill the core course requirements for this certificate. No more than one 2000-level course can be used towards elective credits. A maximum of 9 credit hours from any one stream (PHYL, NESC, BIOL, KINE) can be used.

- PHYL 3120 Exercise Physiology
- PHYL 3320 Human Cell Physiology
- PHYL 3520 Core Concepts in Medical Physiol
- PHYL 3620 Human Physiology Lab
- PHYL 4000 Synaptic Function
- PHYL 4324 Endocrine Function
- PHYL 4504 Respiratory Physiology
- PHYL 4680Cardiovascular Physiology

- NESC 2150 Perceptual Processes
- NESC 2570 Cellular Neuroscience
- NESC 3051 Methods in Sensation and Perception
- NESC 3170 Hormones & Behaviour
- NESC 3440 Human Neuroanatomy
- NESC 3670 Genes, Brain & Behaviour
- NESC 3970 Molecular Neuroscience
- NESC 4070 Chemical Neurobiology

- BIOL 3430 Intro Human Histology
- BIOL 4020 Advanced Cell Biology

- KINE 3419 Appl Physiology Principles Human Performance
- KINE 3250 Human Nutrition
- KINE 3440 Sensory and Motor Function
- KINE 4704 The Impact of Exercise and Physical Activity on Cardiovascular Health in Older Adults

3. At least 6 credit hours of experiential learning or independent research. Research projects have to be conceptually or methodologically related to Physiology and be approved by the certificate program committee. Suitable courses for this requirement include **PHYL 3600, PHYL 3601, NESC 3001, NESC 3002, NESC 3100, NESC 3101, NESC 4901, NESC 4902, SCIE 3100, SCIE 4101, SCIE 4102, SCIE 4901, SCIE 4902, BIOL 3800, BIOL 4806, BIOL 4807, BIOL 4901, BIOL 4902, KINE 4801, KINE 4802, KINE 4901, KINE 4902,** and **KINE 4900X/Y.**

Courses

Courses

Course Descriptions

PHYL 1001 Human Physiology 1
CREDIT HOURS: 3
This online distance course is the first of two that explore the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism to maintain health and homeostasis. The course is designed around physiology core concepts that include cell-cell communication, cell membrane, flow-down gradients, homeostasis, and mass balance. Specific topics in this course include cellular

physiology with an emphasis on transport, metabolism and communication, neural, endocrine, muscular, and sensory physiology. DIRECTORS: M.-S. Beaudoin and J. Slysz
CALENDAR NOTES: This course is normally given during the Fall Semester and meets the prerequisite requirement for PHYL 1002.03 (Human Physiology 2) and PHYL 1012.03. This course can not be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).
EXCLUSIONS: PHYL 1011.03
FORMATS: Online Delivery

PHYL 1002 Human Physiology 2

CREDIT HOURS: 3
This course is a continuation of PHYL 1001.03 and explores the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism to maintain health and homeostasis. The course is designed around physiology core concepts that include cell-cell communication, cell membrane, flow-down gradients, homeostasis, and mass balance. Specific topics in this course include immune, cardiovascular, respiratory, renal, acid-base, whole-body metabolism and reproduction physiology. DIRECTORS: M.-S. Beaudoin and J. Slysz
CALENDAR NOTES: This course is normally given during the Winter Semester. This course can not be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).
PREREQUISITES: PHYL 1001.03 or PHYL 1011.03 or permission of course director
EXCLUSIONS: PHYL 1012.03
FORMATS: Online Delivery

PHYL 1011 Human Physiology 1

CREDIT HOURS: 3
This course is the first of two that explore the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism to maintain health and homeostasis. The course is designed around physiology core concepts that include cell-cell communication, cell membrane, flow-down gradients, homeostasis, and mass balance. Specific topics in this course include cellular physiology with an emphasis on transport, metabolism and communication, neural, endocrine, muscular, and sensory physiology. DIRECTOR: M.-S. Beaudoin and J. Slysz
CALENDAR NOTES: This course is given in the Fall semester and meets the prerequisite requirement for PHYL 1012.03 (Human Physiology 2) and the online distance course PHYL 1002.03. This course cannot be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).
EXCLUSIONS: PHYL 1001.03
FORMATS: Other (explain in comments)

PHYL 1012 Human Physiology 2

CREDIT HOURS: 3
This course is a continuation of PHYL 1001.03 and explores the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism to maintain health and homeostasis. The course is designed around physiology core concepts that include cell-cell communication, cell membrane, flow-down gradients, homeostasis, and mass balance. Specific topics in this course include immune, cardiovascular, respiratory, renal, acid-base, whole-body metabolism and reproduction physiology. DIRECTOR: M.-S. Beaudoin and J. Slysz
CALENDAR NOTES: This course is given in the Winter Semester. This course can not be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).
PREREQUISITES: PHYL 1001.03 or PHYL 1011.03 or permission of course director
EXCLUSIONS: PHYL 1002.03
FORMATS: Other (explain in comments)

PHYL 2041 Human Neurophysiology

CREDIT HOURS: 3
The aim of this class is to understand the functional mechanisms of the human nervous system and its clinical significance. The course covers the electrical and chemical properties of neurons and glia, and how neurons communicate with one another and with muscle cells. It reviews the motor, sensory and higher integrative functions of the central nervous system, and the closely related autonomic nervous system. It also surveys the physiology and functional anatomy of the somatosensory, visual, auditory, vestibular and chemical senses. Both normal functions and selected pathologies of these systems will be discussed. The class also covers important investigative techniques in neuroscience. The overall objective is to provide a solid, factual foundation of knowledge in neurophysiology as well as its underlying principles.
CALENDAR NOTES: PHYL 2041, a core neurophysiology class for students in the Medical Sciences program, serves as equivalent to NESC 2470.03 as prerequisite for upper level NESC courses. Medical Sciences students intending to take NESC 2470.03 in place of PHYL 2041 are advised to also enroll in NESC 2570 as a Selective. Director: S. Krueger, M. Agosto, X. Dong
PREREQUISITES: (BIOL 1010.03 or BIOL 1020.03) and (BIOL 1011.03 or 1021.03) and (CHEM 1012.03 or CHEM 1022.03), or equivalent
EXCLUSIONS: NESC 2470.03
FORMATS: Lecture

PHYL 2044 Human Systems Physiology

CREDIT HOURS: 3

The human body consists of cells organized into a number of organ systems. The aim of this class is to explain how six organ systems (respiratory, cardiovascular, renal, gastrointestinal, endocrine, and reproductive) function to allow us to live and carry out our daily activities. Director: T. A. Quinn

PREREQUISITES: BIOL 1010.03 (or BIOL 1020.03) and BIOL 1011.03 (or BIOL 1021.03) and CHEM 1012.03 (or CHEM 1022.03) or equivalent(s)

FORMATS: Lecture

PHYL 2570 Cellular Neurophysiology

CREDIT HOURS: 3

This course provides an introduction to the function of the nerve cells of the brain, which forms the basis for explaining features of brain function in terms of activity of individual cells and their membrane properties, as well as small networks of neurons. The course is designed for all students wishing to take more advanced courses in, or to major in, Neuroscience. Although the course covers topics of neuroscience at all levels, the content is directed towards cellular neuroscience; detailed coverage of the strictly developmental systems or molecular levels of neuroscience is provided in other courses. DIRECTOR(S): N. Crowder, P. Cote, S. Krueger

PREREQUISITES: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03 or SCIE 1505.18 or SCIE 1515.36, SCIE 1520.30, 1540.27 or (BIOL 1010.03 or BIOL 1020.03 AND BIOL 1011.03 or BIOL 1021.03 with a grade of B- or better)

CROSSLISTED: NESC 2570.03, PSYO 2570.03

FORMATS: Lecture

PHYL 3120 Exercise Physiology in Health and Disease

CREDIT HOURS: 3

This course discusses the function and dysfunction of body organ systems and the short- and long-term responses of these systems to physical activity. The cellular and molecular mechanisms of action that underlie the relationships between exercise and the functioning of the human body are explored. Preventive and therapeutic use of exercise and physical activity for a wide range of clinical conditions is examined. DIRECTORS: M.-S. Beaudoin, J. Slysz

PREREQUISITES: PHYL 2041 or PHYL 2044 or BIOL 3371/MARI 3371 or KINE 2310

FORMATS: Other (explain in comments)

PHYL 3320 Human Cell Physiology

CREDIT HOURS: 3

Events at the cellular and molecular level underlie the functions of tissues, organs and systems. This course examines key physiological principles at the molecular level, and uses the understanding developed to describe important cell and tissue functions, as well as dysfunctions in human disease states. Lectures focus on membrane transport, electrical excitability and electrical signaling, epithelial transport, signaling within individual cells, intracellular organelle function, and ion channels. DIRECTOR: Y. El Hiani

PREREQUISITES: PHYL 2041.03 or permission of the course director

FORMATS: Lecture

PHYL 3520 Core Concepts in Medical Physiology

CREDIT HOURS: 3

Through didactic (lectures) and problem-solving (tutorial) sessions, students will gain a deeper understanding of the functions of various organ system physiologies. In addition, the integration of a number of organ system functions will also be discussed. Where appropriate, the physiology of disease processes will underscore the consequences of a malfunction of a physiological process. Organ systems covered include cardiovascular, renal, respiratory and gastrointestinal. A firm understanding of physiological principles is essential for any student contemplating a career in the health professions. DIRECTOR: Y. Anini

PREREQUISITES: PHYL 2044.03 or permission of course director

FORMATS: Lecture | Tutorial

PHYL 3600 Directed Project in Physiology

CREDIT HOURS: 3

The goal of this course is to provide advanced undergraduate students with the opportunity to conduct a research project under the supervision of a faculty member in the department of Physiology & Biophysics. Projects may cover a variety of experimental approaches and topics including, but not limited to, cardiovascular physiology, neurophysiology, respiratory physiology, endocrinology and neuroendocrinology, and molecular physiology. DIRECTOR: S. Krueger

PREREQUISITES: PHYL 2041.03 and PHYL 2044.03 or permission of the course director

FORMATS: Lab

PHYL 3601 Directed Project in Physiology II

CREDIT HOURS: 3
The goal of this course is to provide advanced undergraduate students with the opportunity to conduct a research project under the supervision of a faculty member in the department of Physiology & Biophysics. Projects may cover a variety of experimental approaches and topics including, but not limited to, cardiovascular physiology, neurophysiology, respiratory physiology, endocrinology and neuroendocrinology, and molecular physiology. DIRECTOR: S. Krueger
CALENDAR NOTES: Experiential learning/independent research project course
PREREQUISITES: PHYL 2041.03 and PHYL 2044.03 or permission of the course director
FORMATS: Lab

PHYL 3620 Human Physiology Lab

CREDIT HOURS: 3
This course expands on fundamental concepts of human physiology including neural, muscular, cardiovascular, metabolic, and respiratory physiology. Students will carry out experimental procedures such as measurement and analysis of EMG, ECG, blood pressure, pulmonary function, metabolic rate at rest and during exercise, and reflexes. The course integrates practical knowledge with theoretical background and clinical significance. Students have the opportunity to design, carry out, and analyze an experiment on a topic of their choice. Scientific communication skills are emphasized. DIRECTOR: M.-S. Beaudoin, J. Slysz
PREREQUISITES: PHYL 2044 or BIOL 3371/MARI 3371 or KINE 2310
EXCLUSIONS: PHYL 2031.03, PHYL 2032.03, PHYL 2030.06 X/Y
FORMATS: Lab

PHYL 4000 Current Advances in Synaptic Function and Plasticity

CREDIT HOURS: 3
Key recent research studies in cellular and systems neurophysiology are presented and discussed. Emphasis is placed on synaptic function and plasticity, excitability, dendritic integration, neural networks and relevant advances in experimental methods. Newly published papers within these areas are reviewed weekly, followed by a more extensive critique of two publications. DIRECTOR: S. Krueger, A. Fine
PREREQUISITES: NESC 2570.03/PHYL 2570.03 or PHYL 2041.03 or permission of course directors
CROSSLISTED: NESC 4185.03
FORMATS: Seminar

PHYL 4324 Endocrine Physiology

CREDIT HOURS: 3
This course is designed to provide intermediate and advanced undergraduates with a basic understanding of the function of the endocrine system. The course will progress from a consideration of basic concepts and mechanisms to the physiological function of specific endocrine systems. Interactions between organ systems will be emphasized.DIRECTOR: Y. Anini
PREREQUISITES: PHYL 2044.03 or permission of the class director
EXCLUSIONS: PHYL 5513
FORMATS: Lecture

PHYL 4504 Respiratory Physiology

CREDIT HOURS: 3
This class will provide a detailed overview of key concepts in respiratory physiology. Attention will be given to aspects of integrated physiology, as well as cellular and molecular concepts. Particular reference will be given to pulmonary diseases. Students will be expected to make presentations based on appropriate literature. Specific topics to be covered include: mechanics of breathing; gas exchange; gas transport; ventilation-perfusion ratios; pulmonary function testing; blood flow and metabolism; airway epithelial cells and transepithelial transport; mechanisms of airways host defence; control of ventilation; respiratory system under stress; cardiopulmonary response to aerobic exercise. Director: E.A. Cowley
PREREQUISITES: PHYL 2044.03 or KINE 2310.03 or permission of the course director
EXCLUSIONS: PHYL 5504.03
FORMATS: Lecture | Discussion

PHYL 4680 Cardiovascular Physiology

CREDIT HOURS: 3
This course provides a detailed overview of key concepts of cardiovascular physiology and disease, including discussion of current research in the field. Topics include: cardiac anatomy/structure; electrophysiology; excitation-contraction coupling; mechanics; metabolism; nervous system control; and vasculature function. Director: T. A. Quinn
PREREQUISITES: PHYL 2044.03 or permission of the course director
CROSSLISTED: PHYL 5568.03 Advanced Cardiovascular Physiology, BMNG 5270.03 Advanced Cardiovascular Physiology
FORMATS: Lecture | Discussion | Other (explain in comments)

Adult Learning and Skills

Adult learning and skills

Whether you're an experienced adult educator or just starting out, our courses help you build confidence. You'll sharpen your teaching skills and expand your career opportunities.

Certificate

Adult Education

This certificate consists of eight online courses and is designed to help learners gain a comprehensive introduction to the field of adult education and a widely recognized professional credential. It meets the requirements set out by the Government of Nova Scotia, which enables learners to teach in community college and business settings. All courses can be taken individually and in any order.

Courses:

- Theories of Adult Learning
- Understanding Diversity and Inclusion
- Program Design
- Instructional Methods

- Effective Facilitation
- Evaluating Learning
- Designing and Teaching Online
- Indigenous Teaching and Learning Perspectives

Standalone Courses

- Train the Trainer (Self-Paced)
In this course, you will build skills and confidence in designing and delivering dynamic, interactive, and effective training sessions.

- Online Design and Delivery (Self-Paced)
In this self-paced, eight-hour course, you will learn how to move teaching content online or develop new online courses.

Business and leadership

Learn about the critical role of business analysis in solving organizational problems. Earn a designation in benefits and pensions or discover how creativity is essential for innovative leadership. Maintain Continuing Education Unit (CEU) requirements with many of these courses and certificates.

Certificates

Business Analysis

Business analysts are in demand across many industries. They are critical in helping organizations improve their processes, decision-making, and best practices by analyzing data to identify areas that need improvement. This certificate will give you the knowledge to be successful.

Courses:

- Business Analysis Essentials
- Business Analysis in Practice
- Enterprise and Strategic Analysis
- Introduction to Business Data Analytics
- The Agile Business Analyst

Certificate in Human Resource Leadership

This certificate helps HR professionals strengthen their ability to coach employees, communicate effectively, and resolve workplace conflicts to foster stronger relationships and better results.

Courses:

- Coaching Skills for Leaders
- Strategic Communications
- Negotiation and Conflict Resolution

Certificate in Human Resource Management

Gain a valuable knowledge base and a range of strategies and skills to manage your organization's greatest asset – its people – responsively, fairly, and consistently.

Courses:

- Human Resource Management
- Interpersonal and Intercultural Communication
- Organizational Behaviour

Certificate in Lean Six Sigma Green Belt

Gain knowledge and tools to lead process improvement initiatives and drive measurable results within your organization.

Courses:

- Foundations of Lean Six Sigma and Define

- Lean Six Sigma ‘Measure’ Phase
- Lean Six Sigma ‘Analyze’ and ‘Improve’ Phases
- Lean Six Sigma ‘Control’ Phase
- Lean Six Sigma Green Belt Capstone

Certificate in Strategic Leadership

Gain the skills, strategies, and mindset needed to lead effectively in a complex, fast-changing environment. Learn to enhance your leadership capabilities, challenge the status quo, and inspire your teams toward success in an ever-changing world.

Courses:

- Risk Assessment and Management
- Leadership Essentials
- Management Essentials
- Interpersonal and Intercultural Communication

Professional Diploma in Management and Leadership Studies

This 24-month, non-credit program is designed to help you build leadership skills and gain hands-on work experience in high-demand Canadian industries. Learners who complete this full-time program are eligible to apply for a post-graduate work permit (PGWP).

Eligibility is determined solely by Immigration, Refugees and Citizenship Canada (IRCC), and is subject to its discretion and current policies.

Program details

Location: Halifax, Nova Scotia, Canada

Duration: 24 months

Program start dates: September and January

Application deadline: Rolling admission

Format: Hybrid - more than 50% of coursework will be completed in-person.

Time commitment: This is a full-time program (PGWP eligible). Students will be in class between 7-10 hours per week depending on the specialization, and should expect to spend a minimum of 30 hours per week engaged in courses, study, and experiential learning.

What you will learn

You'll complete foundational courses in leadership and human resource management. Then, you'll start one of the specialization courses of your choice in:

- Agricultural and Farming Operations Management (AFOM)
- Construction Site Management
- Sustainable Energy Technologies Management (SETM)
- Heating, Ventilation, and Air Conditioning (HVAC)
- Data Management for Professionals (DMP)
- English-Medium Instruction (EMI)

Once all your coursework is completed, you’ll start your Work Integrated Learning (WIL) Internship. You will receive support on your Canadian job search including personalized feedback on your cover letter, resume, and help with interview preparation.

Discover the benefits

- Receive targeted training designed to help you succeed in the Canadian workplace, including help with your Canadian job search and personalized feedback on your resume and cover letter.

- Take part in one-on-one career counseling from a career advisor with the Immigrant Services Association of Nova Scotia (ISANS), Nova Scotia's top immigrant-serving organization, to define and achieve your career goals.
- Apply your skills in a Canadian workplace by completing a four-month work term as part of your program.
- Customize your studies to align with your career path and professional goals by choosing one of our specializations.
- Learn from one of Canada's leading research institutions, located in one of its safest and friendliest cities.

Life as a student

What to expect

You will complete seven courses in leadership excellence and human resource management before starting courses in your chosen specialization.

Living and working in Canada

If you're coming to Canada with your family, there are many supports available to help you settle in. If your spouse is joining you, they may be eligible for a work permit while you complete your Master's or PhD program. If you have children under 18, they can attend public school for free while you're enrolled in your program.

You may also be able to work while studying—check the IRCC website for full details. Throughout your program, you'll work closely with the ISANS team to explore job opportunities, gain Canadian work experience, and apply for positions in your field. You'll receive plenty of guidance and support, but ultimately, finding a job or internship will be your responsibility.

Finishing your program

To be awarded the Non-Credit Diploma in Professional and Leadership Studies, you must:

- Successfully complete all mandatory leadership and human resource coursework and the coursework in your chosen specialization.
- A minimum grade of 70% is required for the assignment and participation components of each course unless otherwise specified.
- Complete your work term by achieving the required work hours, writing a final report, and receiving a positive evaluation from your supervisor.
- Upon completion of the program, you will be awarded the non-credit diploma and each certificate.

Your path to being accepted

The program welcomes two cohorts per year - in September and January. You can begin your application any time.

Applications are competitive and evaluated on a rolling basis so apply early.

Please note that it can take approximately five to six months to process your study permit and visa before travelling to Canada.

Step 1: Get your documents ready

As part of your application, you will need to submit the following:

- Unofficial university transcripts from your undergraduate degree translated into English*
- Proof of English language proficiency.
- Personal statement
- Résumé/CV
- Digital copy of your passport photo page.

*NOTE: Successful applicants will be required to submit official transcripts.

Step 2: Submit your application

You can begin your application now and come back to it later. However, all supporting documentation must be received within 30 days of the original application submission or the application will be cancelled. Once your application is complete and submitted, the Admissions Committee will review it.

Please note that during high-volume periods, application processing times may vary, but we aim to process applications within 15 business days. To check the status of your application, please email openlearning@dal.ca.

Step 3: Complete an interview

Shortlisted candidates to the program will be invited to a 30-minute virtual interview, where you'll be asked to respond to five structured questions related to your professional experience and goals.

Step 4: Receive your Letter of Offer
If you're successful, you will receive a Letter of Offer to the program. This document outlines the program's duration, total cost, policies and rules, and deposit instructions.

Once the deposit is received, you will receive the letter of acceptance (LOA), which is usually issued 4 to 5 months prior to the start date. The deposit is due within 21 days of your acceptance into the program.

Step 5: Secure your spot
To secure a place in the program, a non-refundable tuition deposit must be paid within 21 days of receiving the offer.

Step 6: Receive your letter of acceptance
After paying the deposit, the Letter of Acceptance (LOA) and Provincial Attestation Letter (PAL) will be issued.

The LOA is usually issued four to five months prior to the start date.

Step 7: Apply for your post-graduation work permit
Use your PAL before it expires (within 12 weeks of the issuance date), your acceptance letter, and other required documents to apply for your post-graduation work permit.

Please refer to the website for Immigration, Refugees and Citizenship Canada for the latest and most accurate information about eligibility requirements and the length of PGWPs.

Step 8: Before you start
The first tuition payment must be paid at least 30 days before the program start date to complete your enrollment in the program.

Certified Employee Benefit Specialist Program

The CEBS program offers three highly renowned designations in Canada covering all aspects of benefits and pensions:

- CEBS (Certified Employee Benefit Specialist) - The premier designation in benefits and pensions, considered the standard of excellence in the industry
- GBA (Group Benefits Associate) - a specialty designation focusing on life and health care and other group benefits
- RPA (Retirement Plans Associate) - a specialty designation focusing on all aspects of retirement plans

CEBS features a unique partnership with leading academic institutions. In Canada, the International Foundation shares the honour with Dalhousie University in Halifax, Nova Scotia. In the U.S., CEBS is cosponsored by the *International Foundation* and the *Wharton School of the University of Pennsylvania*.

Each course requires successful completion of an exam. All courses can be self-studied. Optional online classes are also available. Contact our Student Services team for more information at openlearning@dal.ca.

Credit Union Institute of Canada Program

The success of credit unions has been due largely to the dedication and commitment to service excellence of credit union management and staff. In a rapidly changing financial services environment, providing service excellence to members rests increasingly on the ability of employees to learn new skills and keep pace with changes in the financial services industry.

Many credit unions are finding that the best way to keep pace with change is to encourage their staff to broaden their knowledge and skills through continuing education programs offered by the Credit Union Institute of Canada (CUIC). The CUIC provides credit union employees with a challenging curriculum of study aimed at enhancing their job skills. These programs provide greater job satisfaction, and open doors to new career opportunities within the credit union system.

What is the Credit Union Institute of Canada?

The CUIC is an independent, national, educational association which is part of CUSOURCE, a provider of development and learning systems to Canada's credit unions. CUSOURCE is owned by the Canadian Credit Union Association. Established in 1972 and re-organized in 1990, the CCUA provides Canadian credit unions with professional development programs for their elected officials, management and staff.

Programs

The CUIC currently offers two professional studies programs that are co-sponsored by Dalhousie University's Faculty of Open Learning & Career Development. Each program comprises a series of courses leading to a professional designation recognized throughout the credit union system. Some courses may be taken at approved colleges, universities, professional associations or other institutions. Others are offered directly through CCUA.

The Faculty of Open Learning & Career Development and CUIC jointly determine the academic content and standards of the programs. The CUIC oversees all administration. Professional designations for each program are awarded jointly by CUIC and the Faculty of Open Learning & Career Development.

General Studies Program (GSP)

The GSP is a nine-course program that provides a general overview of credit union administration and management. This program is suitable for entry-level, supervisory and middle-management employees. GSP graduates are awarded the professional designation, "Fellow of the Credit Union Institute of Canada" (FCUIC). Introduced in July 1992, this program replaced the Canadian Credit Union Institute's longstanding Fellows' Program.

Management Studies Program (MSP)

The MSP is a twelve-course program that offers a mix of general and credit union-specific courses on credit union business management. This program is suitable for credit union employees in, or preparing for, middle-and upper-level management positions. MSP graduates are awarded the professional designation, "Associate of the Credit Union Institute of Canada" (ACUIC).

For more information, please contact our Student Services team at openlearning@dal.ca.

Standalone Courses

We offer a range of courses you can take individually without enrolling in a certificate.

- **Coaching Skills for Leaders**
Throughout your learning journey in this course, you will gain knowledge of theory, will be asked to apply that knowledge in a specific leadership context, and be offered the opportunity to practice.

- **Corporate Social Responsibility**
Learn about the exciting world of Corporate Social Responsibility (CSR) and the sustainable frameworks used by the world's largest tech, telecommunications, manufacturing, retail and mining companies.

- **Interpersonal and Intercultural Communication**
This 12-week course brings together the best theories and practices of communication between people in society.

- **Organizational Behaviour**
In this course, students explore frameworks used to study and predict what people think, feel and do in and around organizations.

-**Strategic Communications**
Study the foundational elements of public communications and its many facets. You'll cover everything from employee communication to media relations, to the changing nature of public communications in a digital landscape.

Management and Operations

Management and operations

Gain the skills and strategies to navigate today's constantly changing business environment. Learn how to manage change, finances, risk, data, projects and more. Maintain Continuing Education Units (CEU) requirements with many of these courses and certificates.

Certificates

Change Management

Learn practical change management techniques to help your organization adapt. This certificate teaches you how to navigate change as an individual, team member, and leader. You'll learn how to thrive in change and become a capable change management professional.

Courses:

- Being Agile and Choosing the Right Approach
- Change Management in Practice
- Change Management Foundation
- Influencing Without Authority
- Project Management Essentials
- Introduction to AI in Change Management

Data Management for Professionals

Build your data literacy and understand enterprise data management. This certificate connects business practices with technology to improve data strategies and decision-making. It focuses on information management systems across industries, including healthcare, manufacturing, and finance.

Courses:

- Introduction to Enterprise Data Management
- Data Governance
- Data Storage Technologies

Certificate in Human Resource Management

Gain a valuable knowledge base and a range of strategies and skills to manage your organization's greatest asset – its people – responsively, fairly, and consistently.

Courses:

- Human Resource Management
- Interpersonal and Intercultural Communication
- Organizational Behaviour

Principles of Professional Selling

This certificate is proudly developed in partnership with the Institute of Sales Professionals (ISP) Canada—the national certifying body for sales professionals. Participants will benefit from content aligned with professional standards in the field of sales and receive recognition that supports both career growth and professional credibility.

Courses:

- Consultative Selling
- Speak, Sell, Succeed: The Art and Science of Strategic Sales Pitches (In-development)
- Course III: Mastering Strategic Deal Structuring and Sales Negotiation (In-development)

Project Management

Aligned with PMBOK 7®, this certificate is ideal for beginners and experienced professionals looking to advance their project management skills. Project management is used across many industries and these courses can be used to maintain CEUs or pursue PMI® certifications.

Courses:

- Project Management Essentials
- Engaging Stakeholders: Communication Strategies for Managing Expectations
- Tracking and Forecasting Progress: Budgets, Baselines and Timelines

- Leading Project Driven Change
- Managing Uncertainty & Opportunities: Project Risk Management
- Project Delivery Principles
- Agile Bootcamp

Standalone Courses

- PMP® Exam Preparation
A four-week course designed with a proven, practical approach in preparing for the Project Management Professional (PMP®) Certification Exam. Delivered by experienced trainers.

- Project Management Essentials
A four-week online course covering key tools and techniques for successful project management.

- Interpersonal and Intercultural Communication
A 12-week course exploring effective communication theories and practices.

- Organizational Behaviour
Explore frameworks used to study and predict what people think, feel and do in and around organizations.

- Risk Assessment and Management
Explore various types of potential risk including financial, technological, operational, and reputational.

Corporate Solutions

Corporate learning solutions

We're committed to providing a superior learning experience, every step of the way. We believe in a collaborative, human-centered approach. We'll work with you to understand your business's unique challenges and design engaging learning experiences that meet your specific needs.

Choose the learning format that works best for you: in-person, online or a blend of both!

Experience you can trust

For more than 35 years, we've trained thousands of individuals across Canada. We've done this by delivering high-quality training that teams need for a constantly changing workplace.

You can rest assured knowing that your team is gaining the in-demand skills they need to succeed.

Explore our key training areas

Explore our diverse range of group training programs – over 200 workshops, courses, and certificates – customizable to give your team the edge they need. We're confident we have the perfect fit for your organization.

Academic training

- Certificate in Adult Education
- Certificate in English-Medium Instruction
- Certificate in Student Affairs Program Assessment

Business essentials

- Certificate in Business Analysis
- Certificate in Change Management
- Certificate in Human Resource Management

Equity, diversity, and inclusion

- Certificate in Equity, Diversity, and Inclusion
- Certificate in Inclusive Leadership
- Foundations of Diversity, Equity, and Inclusion in the Workplace (course)

- Certificate in Gaming Leadership
- Certificate in Human Resource Leadership
- Certificate in Strategic Leadership

Project management

- Certificate in Project Management
- Certificate in Systems Engineering and Complex Project Management
- Certificate in Technical Writing

Why choose Dalhousie?

We're not just trainers, we're your partners in success.

- **Customized solutions:** We tailor our programs to your team's specific needs and objectives, ensuring a high return on your training investment. Your goals are our goals.
- **World-renowned expertise:** Our team of certified facilitators brings a wealth of industry experience and a deep understanding of best practices in professional development. You'll learn from the best!
- **Flexible learning options:** We offer flexible learning options to fit your schedule, including in-person, online, and blended learning.
- **Personal service:** Experience world-class support from initial consultation to program completion. We're with you every step of the way.
- **Skills gap solutions:** Our courses address critical skill gaps, giving your organization a competitive edge in today's market.

What are the benefits of team training?

Investing in your team is investing in your future. Here's how team training can transform your organization:

- Increased productivity and efficiency: Empowered employees are productive employees. Giving your team the knowledge and skills they need boosts confidence, streamlines workflows, and reduces errors – all contributing to a more successful and efficient team.
- Enhanced employee engagement and retention: When employees feel valued and invested in, they're more engaged and motivated to stay. This translates to lower turnover costs and a more stable, committed workforce.
- Boosted innovation and adaptability: New skills and perspectives fuel innovation. Team training equips your employees to think outside the box, solve problems creatively, and embrace change with confidence.
- Stronger team development: Improved communication, collaboration, and a shared understanding of goals are the hallmarks of a high-performing team. Team training helps build these essential elements.

Ready for the next step?

We're ready to collaborate with you. Please contact us at openlearning@dal.ca.

EDI in the Workplace

EDI in the workplace

There are many faces, perspectives and histories reflected in our workplaces and in our communities. Explore our courses to uncover new ways to see and understand the world, your peers, your community and yourself.

Certificates

Equity, Diversity and Inclusion
Foster inclusive spaces for meaningful dialogue. This certificate explores policies on fairness, respect, and civility. You'll gain strategies to navigate sensitive EDI-related issues and build a more inclusive workplace.

Courses:

- Understanding EDI: An Organization Imperative
- Inclusive Communications in the Workplace
- Optimizing Diverse Team Performance
- Strategies for Implementing EDI Initiatives

Inclusive Leadership
This certificate empowers current and emerging leaders to lead with clarity, emotional intelligence, and purpose. By addressing bias, power, and privilege, you'll build the skills to make bold, inclusive decisions that inspire trust and drive change. You'll also gain the skills to foster equity, build stronger teams, and lead with lasting impact. Each course requires a minimum of 20 hours over three weeks.

Courses:

- Mind Matter: Being and Self-Awareness
- Cognitive Mastery and Emotional Insight
- Equity-Centred Leadership
- Decision-Making and Logic
- Action for Future Sustainability

Standalone Courses
- Foundations of Diversity, Equity and Inclusion in the Workplace
This eight-hour course will help you build knowledge on the topics of equity, diversity and inclusion. You will develop skills, confidence and the capacity to make intentional changes in your workplace communication. Learners will earn a microcredential.

- Understanding Diversity and Inclusion
Participants in this course will spend time discovering insights into their own values, beliefs, and behaviours with respect to diversity. The intention is that participants will examine diversity in adult education and develop competencies to integrate diversity into their practice.

Educator Training

Educator training

Gain in-demand skills taught by education experts. Whether you're working as an educator or seeking a new career, our courses and certificates can help enhance your skills.

Certificates

Academic Leadership (login required)
Join a select group of academic peers to develop your leadership skills. This certificate is designed for academic leaders at Dalhousie as well as those aspiring to academic leadership positions. It will help you become part of a nationwide community of visionary, collaborative, and effective leaders in the unique world of academia.

English-Medium Instruction
Improve your teaching and learning skills in an English-Medium Instruction (EMI) context. This certificate program can help you by developing knowledge of Content and Language Integrated Learning (CLIL) theory and strategies.

Courses:

- Introduction to CLIL in an EMI Context

- Language for Teaching in an EMI Context
- Classroom Management and Assessment in CLIL Pedagogy
- Implementation of CLIL Practices in an EMI Context

Student Affairs Assessment

Master the tools and strategies to assess and enhance the effectiveness of student programs. This certificate is designed to equip higher education professionals with the skills needed to evaluate student services. It will also give them the tools to ensure that student services are aligned with institutional goals and student success.

Courses (must be taken in order):

- Assessment Essentials for Student Affairs Professionals
- Methodolgies Part I: Intro and Design
- Ethical Research and Assessment
- Methodolgies Part II: Research Design, Data Collection, Data Analysis
- Actioning Assessment in Student Affairs

Standalone Courses

- Train the Trainer
In this online, self-paced course, you'll build skills and confidence in designing and delivering engaging, dynamic, interactive and effective training sessions.

- Online Design and Delivery
In this online, self-paced course, you'll learn how to move teaching content online or develop new online courses.

English Language Studies

Our English Language Studies Department offers dynamic English programs designed for students and educators.

Whether you're preparing for university, developing your teaching practice, or looking to explore new parts of the world, we have a program to support your goals.

English for Academic Purposes

Dalhousie University's English for Academic Purposes (EAP) Program is a full-time program that will help you improve your English for university study. It is designed for students who want to study at the undergraduate or graduate level.

With support from experienced teachers, you will build the English skills you need to succeed in an English-speaking university.

The EAP program will help you:

- Improve your English to meet university entrance requirements.
- Learn academic English, research skills, and study skills for success at Dalhousie University.
- Understand Canadian university culture and learn what is expected of students in Canada.

Levels of study

We offer four different levels of EAP study. Our levels of study are based on the Common European Framework of Reference for Languages (CEFR). When you apply to the EAP program, you'll submit test scores, and may also be required to write a placement test to determine what program is right for you.

EAP Foundations 1

This pre-intermediate-level course is designed for students at the A2 level of the CEFR.

This course offers you the opportunity to:

- Strengthen your ability to understand and express yourself clearly in both formal and informal university settings, and to comprehend short texts across a range of styles and disciplines;
- Expand your general and specialized vocabulary, and write clear, accurate sentences and paragraphs;
- Develop your English language proficiency while exploring the topics, practices, and behaviours associated with academic success at university.

NOTE: We also offer a Summer Special version of this course. For more information on this option, please contact openlearning@dal.ca or visit www.dal.ca/els.

EAP Foundations 2
EAP Foundations 2 is an intermediate-level course at the B1 level with a focus on building a solid foundation in English for academic purposes.

EAP Foundations 2 focuses on strengthening your English for academic success.

In this course, you will:

- Apply your English skills to academic tasks while deepening your understanding of how to use the language in a university context;
- Learn about the research process and write clear, well-structured essays and other academic texts;
- Develop strategies for reading and listening comprehension, and build confidence in speaking about your field of study and other topics;
- Explore the topics, practices, and habits that support academic achievement at university

NOTE: We also offer a Summer Special version of this course. For more information on this option, please contact openlearning@dal.ca or visit www.dal.ca/els.

EAP Level 1
EAP Level 1 is an upper-intermediate course at the B2 level of CEFR.

This course focuses on key spoken and written academic genres and gives you opportunities to:

- Develop a range of listening skills and strategies;
- Participate in a variety of academic speaking situations;
- Strengthen your academic reading skills;
- Improve your writing across a range of academic genres

The course also includes instruction in research and library skills, as well as academic behaviours such as time management, effective study strategies for independent learning, and understanding academic integrity.

NOTE: We also offer a Summer Special version of this course. For more information on this option, please contact openlearning@dal.ca or visit www.dal.ca/els.

EAP Level 2
EAP Level 2 is a C1 level course that prepares students for undergraduate or graduate-level study in English.

You will be automatically placed in this level if you have:

- An IELTS of 6.0, or
- TOEFL iBT of 60, or
- Pearson Academic score of 51, or
- CAEL CE 50
- Applied to Graduate Studies at Dalhousie and received 80% or above on the ECLC UAP 500

If you don’t have these scores, you will be required to take the EAP placement test.

This course will help you to:

- Develop the ability to read effectively and comprehend high-level academic texts;

- Acquire a rich academic vocabulary;
- Apply listening and note-taking strategies to lectures on a variety of academic topics.

Your writing and research skills will be honed by:

- Producing texts in several important written academic genres;
- Participating in presentations, discussions and debates

You will have the opportunity to delve into the vocabulary and genres associated with your discipline of study. Academic integrity, along with other academic behaviours, such as time-management, autonomous learning, and collaboration, are also taught and practiced.

Bridging program option

Some EAP 2 students may be eligible to take an undergraduate credit course as they complete their EAP studies.

To participate in the Bridging Program, you must:

- Be conditionally accepted to participating programs at Dalhousie;
- Enroll as a special student at Dalhousie;
- Choose a credit course that takes place outside of EAP 2 class hours.

For more information or to enroll in the EAP Level 2 Bridging Program option, please contact us at els@dal.ca and/or indicate this option when registering for EAP 2.

EAP 2 Academic Connections
Are you aiming to start your degree program in September, but do not have a high enough English level? This program will let you start your Dalhousie degree program in September.

Even if your English language score isn't high enough yet, the EAP 2 Academic Connections option lets you begin your degree this fall. You'll improve your academic English and take courses from your program at the same time.

If your IELTS score is 6.0 or higher

You can start your degree in September.

Pathway Timeline:

- July–August: Take EAP Level 2
- September–December: Complete EAP Level 2 and take up to four undergraduate courses

If your IELTS score is below 6.0

You'll begin your pathway earlier to build your academic English skills before starting your degree.

Pathway Timeline:

- January: Start EAP Foundations 2
- April: Take EAP Level 1
- July–August: Take EAP Level 2
- September–December: Complete EAP Level 2 and take up to four undergraduate courses

Academic courses

Dalhousie's English Language Studies Department offers courses for academic credit that you can apply to your university studies.

ENSL 0004: English Communication and Academic Skills

This course focuses on learning strategies, language skills, and communication skills that support academic success at university. It is designed to strengthen students' ability to interact effectively with course content, peers, and instructors. By the end of the course, students will demonstrate competence in key academic English language and communication skills.

Quick facts:

- Credit: This is a zero-credit course that will appear as Pass/Fail on students' transcripts.
- Time commitment: 6 hours per week
- Prerequisites: None
- Term(s) offered: Fall term only

For registration details, please visit the Dalhousie University academic timetable.

ENSL 0005: Academic Writing and Research Skills
This course is designed to strengthen the academic writing and research skills necessary for university success. It introduces the fundamentals of research writing, interpretive skills, and argument-based writing, helping students build clear reasoning and evidence-based arguments. Students develop their academic writing, research, and presentation skills, culminating in a final research paper presented at a student conference.

Quick facts:

- Credit: This is a zero-credit course that will appear as Pass/Fail on students' transcripts.
- Time commitment: 6 hours per week
- Prerequisites: ENSL 0004 is a prerequisite for Joint Program (China Program) students from Shandong University of Finance and Economics (SDUFE) and Renmin University of China (RUC). There are no prerequisites for all other students.
- Term(s) offered: Winter term only
- Cost: For students from the Joint Program (China Program), please consult your program directly regarding the applicable fees.

For registration details, please visit the Dalhousie University academic timetable.

English in Canada

This four-week program is an immersion experience that combines language classes and a robust sociocultural program. Improve your confidence and fluency in English, expand your knowledge of your discipline, and get to know the city of Halifax and the beautiful Atlantic coast.

Program highlights

Learn in English

Morning: Communication Skills
Boost fluency through podcasts, interviews, and discussions.

Afternoon: English in Use
Apply your skills in the community and experience Canadian culture.

Communicate better
Improve your real-life English skills., whether you're a beginner or an advanced learner. Classes are dynamic and focused on the communication skills you need to complete projects, work in groups, and express yourself.

Summer by the sea
Dalhousie University is located in the city of Halifax, on Canada's Atlantic coast. It's one of Canada's fastest-growing cities and features innovative tech and entrepreneurial communities, as well as thriving financial and ocean sectors.

For educators

Are you a professional in an academic setting looking to build confidence using English at work or in the classroom? Our programs are designed to support professionals and institutions in strategic enhancement of bilingual education, English Medium Instruction

(EMI), and internationalization.

Our courses can help you gain a competitive edge by:

- Improving your English proficiency
- Learning about Canadian academic culture
- Earning an official certificate and transcript from Dalhousie's Faculty of Open Learning & Career Development.

Certificate in English-Medium Instruction

This four-course certificate will help you improve teaching and learning in an English-Medium Instruction (EMI) context by developing knowledge of Content and Language Integrated Learning (CLIL) theory and strategies.

Certificate details:

- Program delivery: Online delivery is available
- Time Commitment: Each course is 22.5 hours. It is recommended that students spend an average of three hours per week on coursework.

Courses:

- Introduction to CLIL in an EMI Context
- Language for Teaching in an EMI Context
- Classroom Management and Assessment in CLIL Pedagogy
- Implementation of CLIL Practices in an EMI Context

For assistance or more information, please contact els@dal.ca.

Standalone courses

- Intercultural Communication in a Higher Education Context
This self-paced, 12-hour course will introduce you to the concepts of culture and intercultural communication, examine common challenges and provide some effective language use strategies for intercultural contexts.

- Skills and Strategies for Online Language Education
This course focuses on guiding educators to develop a range of skills and strategies for effective online, hybrid, or blended language education, including selecting online tools, establishing instructor presence, creating a community of learners, developing content presence, fostering engagement online, classroom management, and online language assessment.

- Technology in Language Education
This course examines the role of digital technology in supporting language education in both face-to-face (f2f) and online modalities. Participants will explore strategies and techniques to draw on technology to provide opportunities for input, output, feedback, motivation, and data collection—as well as develop capacity around the processes related to evaluation and implementation of technology in different educational contexts.

- Teaching English for Academic Purposes
This course is for language educators wanting to upskill in teaching English for Academic Purposes. English for Academic Purposes entails preparing students, usually in a higher education setting, to use English appropriately for study. It focuses instruction on specific skills required in an English-speaking academic context across core subject areas which are generally encountered in a university setting.

- Equity, Diversity, Inclusion and Access in Language Education
In this course, you will explore the knowledge, skills, and strategies necessary to foster EDIA principles in English Language Teaching. This course covers a range of topics under the EDIA principles including a practical hands-on awareness of doing and championing EDIA within your institution, gain a comprehensive understanding of universal design of learning and write a diversity statement for a call to action.

- Pedagogical Innovation: Content-Based Language Education
Content-based approaches to language education can increase student engagement and learning outcomes. This course focuses on expanding participants' knowledge of content-based approaches, and developing skills such as curriculum and materials design,

assessment for and of learning, and learner management within content-based pedagogies with a strong emphasis on the growing trends in internationalization of education.

- Global Competency Development
In order to gain maximum benefit from international education initiatives, both in international mobility and at-home internationalization activities, students must be equipped with a range of global competencies, such as intercultural communication, perspective taking, critical thinking, and others. This practical course allows participants to foster global competencies by developing skills and strategies to take part in international activities.

For inquiries, please contact els@dal.ca.

University Bridging Program

The University Bridging Program (UBP) is designed for students enrolled in a non-Canadian university who want to attend Dalhousie for a term. The program combines study in the English for Academic Purposes (EAP) program with regular undergraduate coursework at the university. Students take EAP Level 1 or 2 and one or two undergraduate courses in subjects chosen in consultation with the course's home faculty and the Dalhousie University Registrar's Office. After successfully completing their coursework, students can transfer course credits back to their home institutions.

Who is the UBP for?

This program is designed for students who:

- are currently enrolled in a non-Canadian university;
- want the opportunity to study at Dalhousie University during an academic term;
- aim to improve their English and academic skills;
- are seeking an EAP certificate and undergraduate course credit

Upon completion of the UBP, students will return to their home institution to complete their current program.

Program features

- Dalhousie is Atlantic Canada's leading research university and part of Canada's U15 group of top research universities, with a record of innovative teaching and learning in social science, computer science, management, sciences, and health.
- You'll receive three to six transfer credit hours to transfer to your home university or towards an academic degree.
- You'll have access to Dalhousie libraries, health clinics, and computer laboratories, as well as academic advising and international student advising.
- Successful completion of the UBP (EAP Level 2) program satisfies the language requirements for undergraduate and some graduate programs at Dalhousie University.

English requirements

EAP Level 1 + one credit course

- IELTS 5.5 (with no individual band below 5.0)
- TOEFL iBT 61 (with no individual skill below 15)
- Complete our internal placement test and interview, and be assessed at the B2 level

EAP Level 2 + two credit courses

- IELTS 6.0 (with no individual band below 5.5)
- TOEFL iBT 72 (with no individual skill below 18)
- Complete our internal placement test and interview, and be assessed at the C1 level

For details on the program schedule and application process, please contact els@dal.ca or visit www.dal.ca/els.

Health and Environment

Health and environment

Discover new ways to improve the well-being of your community by learning from experts in health and wellness. With our courses and certificates, you can gain valuable skills and knowledge to help others be healthy and productive.

Certificates

Building Positive Workplace Cultures

Learn how to actively enhance your workplace relationships and culture using the principles of Positive Psychology. Backed by the latest research, you'll gain the skills to influence change in your organization.

Required courses:

- Foundations of Positive Psychology
- Application of Positive Psychology Principles for Self-Awareness
- Application of Positive Psychology Principles to Influence Others
- Adaptation of Positive Psychology Principles in Organizations and Teams

Choose one of the following electives:

- Coaching Skills for Leaders
- Understanding EDI: An Organization Imperative
- Inclusive Communications in the Workplace
- Optimizing Diverse Team Performance
- Organizational Behaviour

Ergonomic Program Management

An ergonomic program for your workplace is a sound investment. If you're responsible for an occupational health and safety program or an ergonomics program, this online certificate is for you.

Courses:

- Ergonomics in the Workplace
- Office Ergonomics and Workplace Design
- Industrial Ergonomics and Workplace Design
- Ergonomic Program Design and Integration

Sustainable Energy Technologies

As the world fights the climate crisis, let's embrace renewable energy, smart cities and the clean technologies that are shaping our future. Taking three online self-paced courses, you'll learn how energy systems work and where they can be successfully deployed. You'll also explore the economic implications, policy directions, and how they will integrate with the Internet of Things (IoT).

Courses:

- Energy Fundamentals
- Wind Energy Developers
- Solar Energy Developers

Standalone courses

- Corporate Social Responsibility
This online, self-paced course will teach you what Corporate Social Responsibility (CSR) is and the growing importance and

expectations of corporate citizenship. You'll learn about responsible investing, sustainability reporting, benchmarking performance and factors to consider when creating a CSR that will work for your organization.

- Foundations in Sustainability
The overall goal of the course is to produce educated, engaged, and agentic global citizens. Learners will leave with an in-depth, comprehensive, thorough understanding of sustainability.

Environmental health and safety courses

- **Chemical Spill Response**
This course will cover responsibilities, prevention, spill kit contents, spill assessment, and spill response.

- **Biosafety Principles and Practices**
This course provides a foundation to understand the risks related to working with biohazardous materials, as well as an overview of the practices and procedures to work safely.

- Ergonomics
This interactive course presents and applies ergonomic fundamentals to empower learners to mitigate their exposure to ergonomic risk factors during participation in daily living activities, whether at work or away from work.

- **Fire Safety**
This course will provide the learner with an introduction to fire safety.

- **Incident Investigation**
This course covers essential techniques and methodologies for securing accident scenes, gathering crucial evidence, and identifying human errors.

- **Joint Occupational Health and Safety Committee Training**
This course will give participants the knowledge needed to successfully initiate the formation of a Joint Occupational Health and Safety Committee.

- **Laboratory Safety**
This course is designed for all individuals working in laboratories and will cover the major elements of laboratory safety, giving the participant a strong general foundation to understand the risks associated with working in a laboratory.

- **Occupational Health and Safety**
This course offers learners an overview of the Occupational Health and Safety (OHS) Act of Nova Scotia.

- Respiratory Protection
This course will introduce the learner to respiratory protection.

- Workplace Hazardous Materials Information System (WHMIS) 2015
This course will cover all the major elements of the WHMIS 2015 requirements giving the participant a strong general foundation to understand the risks associated with working with or around chemicals.

- **Workplace Inspections**
This course builds confidence and skills to plan and conduct thorough workplace inspections, helping managers, supervisors, and employees identify and mitigate hazards effectively.

For Dalhousie faculty, staff and students
Please see the courses offered by Dalhousie's Environmental Health and Safety (EH&S) Office (login required).

Courses for health providers

- **Emergency Medical Services System Design**
Get ready to take the lead in Emergency Medical Services (EMS) system management. In this course, you'll explore what drives effective system design, examine key internal and external factors, and learn how to manage people and evaluate performance. You'll also discover how to strengthen your system's readiness for disasters and emergency response.

- **Public Relations and Marketing in EMS**
In today's challenging EMS environments, you need strategies that go beyond simply reacting. This course helps you plan proactive public relations so you can turn crises into opportunities. You'll also learn essential marketing strategies to navigate market pressures and strengthen your organization's impact.

- **Medical Certificate of Death Form**
In Nova Scotia, only a physician or a nurse practitioner responsible for a patient's treatment and care may legally complete and submit a Medical Certificate of Death to the funeral director. Completion of this module will prepare nurse practitioners to complete a Medical Certificate of Death and help them identify situations in which completing the certificate falls under the jurisdiction of the Medical Examiner's Office.

Free courses for caregivers and seniors

One in four Canadians serves as a caregiver for family, making family caregivers the largest care arm in Canada. These two free competency-based courses are designed for health and social care providers who want to incorporate family caregivers into their practice, community, and network.

Free courses for caregivers:

- **Caregiver-Centered Care Level 1**
Directed primarily at those working in health settings, this course will introduce you to the importance of family caregivers in our system and challenge you to consider how you might partner with family caregivers in providing the needs for those receiving care.

- **Caregiver-Centered Care Level 2**
This course is designed for those who have completed the Level 1 course and want to learn more about the six domains of the caregiver-centered care competency framework.

Programs and courses for seniors:

- **Healthy Aging**
Designed for older Canadians and caregivers, our Healthy Aging course is free, online, and easy to navigate. This course offers trustworthy advice and best practices for healthy aging.

- **Seniors' College Association of Nova Scotia**
SCANS provides affordable learning opportunities for older adults who are 50+. Members can choose to attend an unlimited number of courses throughout the year on topics ranging from the Ukraine-Russia conflict to Scottish Gaelic for beginners. SCANS offers flexible hybrid courses, as well as in-person courses across Nova Scotia that promise an engaging learning environment for older adults.

Public service and safety

Explore programs which give you the latest skills and know-how to effectively serve and protect your community.

Fire leadership

The new Dalhousie Fire Leadership Program is now underway. After two years of development, we are proud to introduce a fully revamped slate of courses, certificates, and diplomas. This program equips those in the Canadian Fire Service with the most up-to-date, relevant, and important leadership skills and knowledge it takes to be the best.

How our fire leadership program works
Today's fire service needs leaders equipped to meet challenges and inspire change.

Offered 100% online, get in-demand skills that meet your professional certification requirements. Our certificates are stackable, so you can accelerate your learning.

Fire leadership: Step-by-step

- Step 1: Complete the certificates
- Step 2: Earn your diploma in general fire leadership
- Step 3: Take four executive leadership courses
- Step 4: Get your diploma in executive fire leadership

Accreditation

Along with meeting the high academic standards of Dalhousie University, our Fire Leadership Program meets the standards of important organizations in the fire service.

The job performance requirements of the National Fire Protection Association (NFPA 1021) form the basis for our Fire Officer III and Fire Officer IV designations.

Our program is audited by both of North America's fire service accrediting agencies - National Board on Fire Service Professional Qualifications (known as the Pro Board), and the International Fire Service Accreditation Congress (IFSAC).

This audit occurs every five years in agreement with the Nova Scotia Firefighters School and through our board membership on the Nova Scotia Fire Service Professional Qualifications Board.

Certificates

Built for members of modern fire services, our certificates give you the knowledge and skills to get ahead in your profession.

Fire Service Leadership

The Certificate in Fire Service Leadership (CFSL) provides fire service officers with opportunities to expand their knowledge of the fire service and add management education to their technical training. The CFSL is the most popular accreditation at Dal Fire and gives you the foundations needed to move onto more advanced courses in the program.

- Station Officer Essentials: People & Operations
- Fire Prevention and Suppression Management
- The Environment of the Fire Station

General Fire Service Administration

The Certificate in General Fire Service Administration (CGFSA) is designed to help fire service officers develop their administrative and managerial skills.

Required Courses:

- Fire Department Human Resource Management I
- Fire Service Strategic Planning
- Municipal Finance

Electives (choose one):

- Wildfire and Climate Change Adaptation Management
- Introduction to Occupational Stress and Resilience for First Responder Leaders

Specialized certificates

Advanced Fire Service Administration

Develop your administrative and managerial skills, while allowing the flexibility to choose courses that will be relevant to your own departments.

Required Course:

- Incident Command: Thinking, Acting, and Human Factors
- Organizational Behaviour

Electives (minimum requirement of 68 hours):

- Disaster Management and the Fire Department
- Emergency Medical Service Management and the Fire Department
- Wildfire and Climate Change Adaptation Management

- Indigenous Teaching and Learning Perspectives
- Understanding EDI: An Organization Imperative
- Municipal Law
- Leadership Essentials
- Introduction to Occupational Stress and Resilience for First Responder Leaders

Fire Service Human Resource Management

Identify human resource challenges faced by public service and public safety organizations.

Courses:

- Fire Department Human Resource Management II
- Incident Command: Thinking, Acting, and Human Factors
- Interpersonal and Intercultural Communication
- Organizational Behaviour

Operational Planning

Learn about the resources required for the effective management of a fire department, community emergency planning, and structured decision making.

Courses:

- Disaster Management and the Fire Department
- Incident Command: Thinking, Acting, and Human Factors
- Organizational Behaviour
- Negotiation and Conflict Resolution

Emergency Management for the Fire Service

This certificates focuses on incident command and disaster management systems in the fire service.

Courses:

- Disaster Management and the Fire Department
- Emergency Medical Service Management and the Fire Department
- Incident Command: Thinking, Acting, and Human Factors
- Organizational Behaviour

First Responder Health and Wellness

The Certificate in First Responder Health and Wellness is designed to help leaders in the fire service learn about occupational stress and trauma so they can address the mental health needs of emergency services personnel.

Courses:

- Incident Command: Thinking, Acting, and Human Factors
- Foundations of Positive Psychology
- Interpersonal and Intercultural Communication
- Organizational Behaviour
- Introduction to Occupational Stress and Resilience for First Responder Leaders

Wildfire and Climate Change Adaptation Management

Get equipped with planning, prevention, and response skills for the increasing threat of natural disasters.

Courses:

- Disaster Management and the Fire Department
- Wildfire and Climate Change Adaptation Management
- Incident Command: Thinking, Acting, and Human Factors
- Organizational Behaviour

Equity, Diversity, Inclusion, & Accessibility in the Fire Service

Dig into the importance of diversity and inclusion in the workplace, identify barriers to effective inclusive communications, and recognize ways to optimize diverse teams in your departments.

Required Courses:

- Incident Command: Thinking, Acting, and Human Factors
- Organizational Behaviour
- Understanding EDI: An Organization Imperative
- Inclusive Communications in the Workplace
- Optimizing Diverse Team Performance

Training Officer Education

This certificate is intended for any individuals training, facilitating, coaching, and/or mentoring those in the fire service, building on both theory and practice in adult education.

- Theories of Adult Learning
- Instructional Methods
- Effective Facilitation
- Incident Command: Thinking, Acting, and Human Factors
- Coaching Skills for Leaders
- Organizational Behaviour

Diplomas in fire leadership

Dalhousie's Diplomas in Fire Leadership are designed to give Fire Service Officers the knowledge and skills to become leaders and managers within their fire departments.

Diploma in General Fire Leadership

Completion of three certificates is required for the Diploma in General Fire Leadership. Graduates of the Diploma in General Fire Leadership who have also obtained their Fire Officer II certification will meet the criteria for Fire Officer III.

Diploma in Executive Fire Leadership

Successful completion of at least 144 hours of coursework is required for the Diploma in Executive Fire Leadership. The prerequisite for the Diploma in Executive Fire Leadership is the Diploma in General Fire Leadership. Graduates of the Diploma in Executive Fire Leadership who have also obtained their Fire Officer III certification will meet the criteria for Fire Officer IV.

Certifications

Fire Officer III Certification Track *

If you have obtained your Fire Officer II certification, you may apply for Fire Officer III certification by completing the required courses listed below and submitting the application.

Application process:

1. Complete required courses
2. Complete application
3. Program staff will then check your application for completeness. If gaps are found, you will be notified by Dalhousie University staff.
4. Once your application has been approved, your request will be submitted to the Nova Scotia Professional Qualifications Board.
5. After all requirements have been verified, you will receive Fire Officer III certification.

Fire Officer IV Accreditation Track *

If you have obtained your Fire Officer III certification, you may apply for Fire Officer IV certification by completing the required courses listed below and submitting the application.

Application process:

1. Complete required courses
2. Complete application
3. Program staff will then check your application for completeness. If gaps are found, you will be notified by Dalhousie University staff.
4. Once your application has been approved, your request will be submitted to the Nova Scotia Professional Qualifications Board.
5. After all requirements have been verified, you will receive Fire Officer IV certification.

* For Recognition of Prior Learning (RPL) applicants seeking NFPA 1021 Fire Officer III and IV credits within the fire leadership Program, specific conditions apply. Please contact rpl@dal.ca for more information.

Local Government

Develop the skills to navigate local government processes, improve service delivery, and support your community.

Certificates

Governance and Administration

Consisting of four fully online courses, this certificate is designed to help learners navigate local government processes, understand municipal authority, improve service delivery efficiency, and effectively serve council needs.

Courses:

- Local Government
- Municipal Law
- Parliamentary Governance, Management and Procedure
- Municipal Administration Essentials

Public Sector Leadership

This certificate provides an opportunity for learners to explore the fundamentals and theories of leadership, practice strategies for customizing their own presence in leadership scenarios and ensure that their leadership approach is one that values diversity, inclusion, and belonging. It consists of four fully online courses.

Required courses:

- Municipal Bylaws and Policies
- Understanding EDI: An Organization Imperative
- Leadership Essentials

Electives (minimum of 36 hours):

- Program Evaluation and Statistics
- Interpersonal and Intercultural Communication
- Organizational Behaviour

Local Government Finance

This three-course certificate is designed to help municipal government employees navigate the complexities of financial, technological, and organizational management and risk.

Courses:

- Property Taxation and Assessment
- Municipal Finance
- Risk Assessment and Management

Information and Communication
This four-course, online certificate focuses on critical communication and information management, building core competencies in communication, collaboration and engagement, information privacy and security, multistakeholder collaboration, and the impact and influence of strategic communication for public-facing contexts.

- Navigating Information Access and Privacy Protection
- Multi-Stakeholder Problem Solving
- Communication Skills and Public Presence
- Interpersonal and Intercultural Communication

Standalone Course/Workshop

- Navigating Information Access and Privacy Protection
In this workshop, participants from municipalities, regional centres for education, post-secondary institutions, and Nova Scotia Government Agencies, Boards and Commissions will examine key legislated Information Access and Privacy (IAP) requirements, as well as best practices and how to apply them.

- Program Evaluation and Statistics
Learn the concepts of program evaluation, including various methods for collecting information and analyzing programs, along with the pros and cons of each approach. This course also covers statistical analysis as it applies to program evaluation.

Police Leadership

Our courses and certificates are designed for police professionals to help you develop strategic skills to lead in high-pressure situations.

Certificates

Certificate in Gaming Leadership
This certificate provides a comprehensive overview of the skills and knowledge required for leaders in today's casino and iGaming environments. The two required courses cover essential topics in casino and iGaming compliance, as well as strategies for promoting responsible gaming and developing player protection measures. Participants can then explore other topics of interest for those in the industry with a choice of two electives.

Required courses:

- Responsible Gaming and Player Protection
- Casino Gaming Compliance and Investigations OR Casino Security and Surveillance Specialist

Electives (72 hours total):

- Corporate Social Responsibility
- Risk Assessment and Management
- Leadership Essentials
- Management Essentials
- Interpersonal and Intercultural Communication

Police Leadership
This six-course certificate is offered fully online. It will help you develop a range of strategies and skills to lead effectively in high-pressure situations. The certificate can be completed over several years, depending upon how many courses you take each term and year.

Required courses:

- Leadership Essentials
- Interpersonal and Intercultural Communication
- Risk Assessment and Management
- Evidence-Based Policing
- Policing the Modern Community

Electives (Choose from the options below to total at least 18 hours):

- Strategic Communications
- Introduction to Occupational Stress and Resilience for First Responder Leaders
- Casino Gaming Compliance and Investigations
- Financial Crime Investigation
- Program Evaluation and Statistics
- Municipal Finance

Certificate in Police Supervisory Skills

The certificate is offered fully online, with four required courses and a range of electives. With a wide range of courses, you can develop strategies and skills for managing people in unpredictable, high-pressure police work contexts.

Required courses:

- Human Resource Management
- Interpersonal and Intercultural Communication
- Coaching Skills for Leaders
- Negotiation and Conflict Resolution

Elective courses (72 hours total):

- Train the Trainer
- Foundations of Positive Psychology
- Understanding EDI: An Organization Imperative
- Inclusive Communications in the Workplace
- Optimizing Diverse Team Performance
- Foundations of Diversity, Equity and Inclusion in the Workplace
- Introduction to Occupational Stress and Resilience for First Responder Leaders

Standalone courses

- Financial Crime Investigation

Acquire the knowledge and analytical skills necessary to identify, assess, and investigate a wide range of financial crime.

- Program Evaluation and Statistics

Learn the concepts of program evaluation, including various methods for collecting information and analyzing programs, along with the pros and cons of each approach. This course also covers statistical analysis as it applies to program evaluation.

Tech and Industry Skills

Tech and industry skills

Set yourself apart from your peers and advance in your career with our certificates and courses designed for today's technical professionals.

Certificates

AutoCAD

Master the fundamentals of AutoCAD and gain the skills to produce professional engineering drawings with confidence. This three-course certificate is ideal for professionals who want to enter the drafting field or enhance their technical expertise.

Courses:

- Getting Started with AutoCAD

- Orthogonal Views, Sections, Dimensions, and Notes
- Essential Elements of Architectural Drawings

Construction Management

Acquire valuable skills in project planning, quality control, risk management, procurement, contracts, labour relations and more. This three-course certificate is perfect for professionals seeking management and leadership roles in the construction industry.

Courses:

- Construction Industry and Practice
- Methods in Project Management
- Business Methods in Managing Construction

Heating Ventilation and Air Conditioning (HVAC)

With this three-course certificate, you can develop a solid understanding of HVAC systems and requirements, including installation, balancing, maintenance and troubleshooting. Gain industry-relevant understanding of managing an active HVAC installation.

Courses:

- HVAC Basics
- Understanding HVAC
- Implementing HVAC

Home Inspection

Gain the technical skills and communication savvy to inspect all the key components of a home with confidence. Earn your full certificate by completing ten required courses and become eligible to challenge the National Home Inspectors exam administered by The Examination Board of Professional Home Inspectors.

Courses:

- Electrical Inspection
- Plumbing Inspection
- Communication and Professional Practice
- Heating I Inspection
- Heating II Inspection
- Insulation and Interior Inspection
- Air Conditioning and Heat Pump Inspection
- Roofing Inspection
- Exterior Inspection
- Structure Inspection

Maintenance Management

earn the elements of proper predictive and preventative maintenance in this three-course certificate. A powerful and specialized program for maintenance management professionals which will give you state-of-the-art knowledge to save organizations time and money.

Courses:

- Introduction to Maintenance Management
- Maintenance Planning and Scheduling
- Preventive and Predictive Maintenance

Systems Engineering and Complex Project Management

This certificate provides foundational skills and knowledge to enhance and improve system design and project management. Learn about the product lifecycle, cross-functional processes, systems thinking, models and tools, and the integration of multi-disciplinary teams.

Required courses:

- Systems Engineering Fundamentals

Choose (1) elective:

- Systems Engineering Advanced Concepts
- Model-Based Systems Engineering and Systems Analysis

Technical Writing

Develop a versatile set of writing skills by mastering best practices for writing clear, compelling reports and other technical documents.

Required course:

- Technical Writing Essentials

Choose three of the following electives:

- Grammar Tune-up
- Persuasive Writing
- Project Management Documents
- Writing Clear Technical Reports
- Writing Emails that Get Results

Standalone courses

- Incident Prevention and Investigation

Gain essential knowledge in accident prevention and investigation methodologies. Learn how to conduct thorough assessments and implement proactive safety measures.

- Communication Skills for Knowledge Mobilization

This course will help you develop skills in knowledge mobilization—the process of moving research from the lab or library to the rest of the world, where it can make an impact. We'll explore knowledge translation (KMb) from both a high-level, strategic view and a ground-level perspective.

University Pathways

University preparation and pathways

Not every journey to a university degree is linear. Our programs offer solutions to help you prepare for beginning your chosen undergraduate or graduate degree.

University Preparation

For over 20 years, our program has helped thousands of students reach their academic goals through high-quality upgrading courses taught by expert instructors.

Year-round, we offer a wide range of non-credit UPrep courses allowing you to:

- Upgrade your marks.
- Earn a prerequisite to enter a specific university program.
- Build your confidence before taking a university credit course.

Our courses are eight weeks long and offered in a self-paced format. This means that you can complete your coursework online at your own pace, but with scheduled due dates set by the instructor.

We offer courses in:

- Academic Math
  Academic Math has been developed to prepare you for the math involved in non-calculus courses. This course is neccessary for entrance to the Faculty of Arts, Bachelor of Commerce, Management and Nursing programs, this course is designed for you. Math 0009.00 is accepted by Dalhousie University in place of NS Math 12 Academic.

- Biology
  Gain a solid foundation in the subject by learning the major concepts of cell biology, genetics and evolution and how they relate to our society. Designed by Faculty in the Dalhousie Biology Department, Biology 0010.00 is accepted Dalhousie University (including Nursing) in place of NS Grade 12 Biology.

- Chemistry
  You will gain a solid foundation in the subject by learning the major concepts of Grade 11 and 12 Chemistry. This course is accepted by Dalhousie in place of NS Grade 12 Chemistry and may be used as the prerequisite for all Dalhousie first-year Chemistry classes.

- Physics
  Throughout the course, the emphasis will be on improving students' problem-solving skills. This course is accepted as the prerequisite for Physics 1100 or Physics 1300 by Dalhousie University. University Prep Physics is equivalent to Nova Scotia Grade 12 Physics.

- Pre-Calculus Plus
  Throughout the course, algebra and applied geometric problem-solving skills needed for calculus are emphasized. This course gains admittance to the Dalhousie B.Sc. program or as a preparation for Calculus 1000.

- Writing Skills for Academic Study
  Writing Skills for Academic Writing teaches the writing and composition skills needed for successful university study. This course is accepted by Dalhousie University in place of NS Grade 12 English to prepare you for the writing demands in all university-level courses.

Course format

UPrep courses let you work at your own pace. You get all the due dates upfront, so you can plan ahead and talk to your instructor if something comes up. Even though you work on your own, you can still connect with other students and your instructor through email, discussion boards, and group projects.

It's recommended that learners spend an average of 15 hours per week on coursework.

This setup works well for students in different time zones and places. It gives you structure while still being flexible. Unlike some courses where you can start and finish anytime, UPrep courses let you work independently while still getting help and guidance from your instructor.

Who can take UPrep courses?

Our UPrep courses are available for anyone to take. You don't need to be a Dalhousie student to take our UPrep courses.

You can apply to a degree program at Dalhousie while taking UPrep courses. Please let admissions know that you'll be taking these courses. The admissions team can often make a decision on an application with a mid-term grade pending receipt of a final.

It is recommended that you take no more than two UPrep courses at a time. Each UPrep course requires approximately 15 hours per week to complete coursework successfully, so you should consider your workload carefully when planning your term.

Academic Refresher Series

This is a series of three courses - one core course and two optional courses - that will help you refresh the key academic skills, math skills and/or English language skills you need to be successful in your university studies.

Who are these courses for?

These courses are for students who have been academically dismissed from their program.

If this applies to you, you may be able to return to your studies sooner — but only if:

- You get approval from your faculty advisor, and
- You successfully complete one or more courses in this series

Applications open in January and April each year.

If you have been academically dismissed, with approval from your faculty advisor, you can return to your studies sooner if you are successful in one or more courses in this series.

Courses available

Mandatory course

- Academic Skills Refresher

This online course is designed to help current and future students understand the nature of university learning and academic expectations. Students will increase self-awareness by exploring their learning styles, motivation and study habits. Topics will include time management, reading, note-taking, critical thinking, academic writing and preparing for exams.

Delivery format: Online- scheduled
Time commitment: 36 hours over 6 weeks

Optional Courses

Math Refresher

This online course is based on the Grade 12 pre-calculus math curriculum but tailored to the needs of the group following a diagnostic test that students would take in advance of the course.

The Math Refresher course is right for you if you have experienced challenges with any of the following math concepts:

- Performing algebraic equations
- Interpreting and performing operations with functions and relations
- Linear and quadratic functions
- Polynomial and rational functions
- Exponential and logarithmic functions
- Right angle trigonometry and trigonometric functions

Delivery format: Online- scheduled
Time commitment: 36 hours over 6 weeks (combination of self-paced and scheduled video sessions)

English Language Refresher

This online course is for students currently enrolled in a degree program and have been academically dismissed and are looking to improve their English language skills. Students will get training in writing assignments, understanding course materials including readings and lectures, and giving academic presentations. The course will also provide students an opportunity to practice English language from their discipline-specific perspective.

This course is right for you if you have experienced challenges with any of the following:

- Confidence in using English in class discussions
- Understanding and responding to your professors
- Comprehending information in your class lectures
- Understanding and using information from course readings
- Presenting or writing assignments in English
- Using discipline-specific language in spoken and written assignments

Delivery format: Online- scheduled
Time commitment: 36 hours over 6 weeks (combination of self-paced and scheduled video sessions)

Transition Year Program

Do you dream of earning a university degree, but worry you might not have what it takes?

The Transition Year Program (TYP) at Dalhousie University has been dedicated to supporting African Nova Scotian and Indigenous students in achieving academic and professional success. Our graduates have gone on to excel in fields like architecture, nursing, law, and social work.

With a team that includes members from the Dalhousie community as well as First Nations and Black Nova Scotian communities, TYP provides a welcoming, supportive environment where students can reach their full potential.

If you're an applicant who is African Nova Scotian or Indigenous, you may be eligible for this program.

The Transition Year Program is an eight-month, full-time program designed to prepare students for all aspects of academic life.

This program requires dedication and focus, but the rewards are life-changing. You'll be both challenged and supported as you build the skills and confidence to succeed.

Throughout the program, you will:

- Strengthen your foundational Math and English skills
- Learn about Indigenous and Black Studies
- Develop research and essay writing abilities
- Learn effective study strategies and workload management
- Build the confidence to thrive in an academic environment
- Learn about university-wide supports and services and how to navigate them

Upon completion of the program, students will earn four academic credits they can use toward their degree program of choice.

Students who complete the TYP program will be eligible for a tuition fee waiver which would cover tuition related expenses for their first undergraduate degree.

Selection process

Once you apply, we'll review your materials, including your resume and references. If you're selected, you may be invited to complete Math and English assessments and participate in a personal interview. We'll notify successful candidates once final decisions are made.

Admission requirements

To apply for the Transition Year Program (TYP), you'll need to submit several key documents to help us get to know you and assess your readiness for the program. Applications are due by April 30 each year.

Start by completing the official TYP application form and preparing a current resume that outlines your education, work experience, and any volunteer activities.

You'll also need to prepare a personal statement. This is your opportunity to tell us why you want to join TYP, what your academic goals are, how the program aligns with your long-term career aspirations, and how your community or volunteer experiences have shaped you.

Three references will also be part of your application.

Professional: A reference from a current or recent employer, or someone from an organization where you've volunteered or trained.

Personal: Someone outside of your family who can speak to your character, such as a clergy member, community leader, educator, elder, or chief.

Academic: A teacher who knows your academic strengths and potential.

If it's been more than five years since you were in school, you can submit two professional references and one personal reference instead.

The last piece to include are your academic transcripts from your most recent educational experience. This could be from high school, college, a GED program, or any job training program you've completed.

What you will learn

Our professors and instructors teach courses that are designed to give you the academic and life skills foundation you need for a successful transition to the academic university environment.

Required courses

- Academic Writing and Strategies for University Learning 1 and 2

The first course will help you develop university-level communication and composition skills, along with study skills to facilitate the transition to university. The second course will help you further develop university-level communication and composition skills, along with study skills to aid in the transition to university. These courses may not be used to satisfy the degree writing requirements.

- English 1 and 2

The first course covers grammar, basic essay writing, research, documentation, argumentative writing and a wide variety of writing skills. It includes literary material from current and historical essayists. The second course takes English 1 skills to an advanced level. It includes the study and analysis of literary material from current and historical essayists as well as contemporary Mi'kmaq and Black Nova Scotia authors. These courses may not be used to satisfy the degree writing requirements.

- Black Studies 1 and 2

The first course focuses on the history of Africa and the emergence of the African Diaspora, interweaving aspects of the African Nova Scotia experience. It provides an overview of African history and the African Diaspora: the integral contribution of African peoples to world history. The second course provides an historical survey of the Black Nova Scotian experience, covering its origins, socio-economic conditions, politics and evolution to the present. The people of African descent in Nova Scotia represent a particular aspect of the African Diaspora.

- Indigenous Studies 1 and 2

In the first course, we will learn about the history of Indigenous Peoples in what is now known as Canada. We'll move through the pre-contact era to the historical relationship between the British Crown and First Nations Peoples with an emphasis on Indigenous perspectives on history, land, treaties, self-government and oral traditions. The second course will have you delving into colonialism, imperialism and other key issues facing Aboriginal peoples, both historically and in present day.

- TYP Math 0034 and 0035

The first course covers signed numbers, order of operations, fractions, decimals, exponents, polynomials, equations, algebraic fractions, and graphing. Homework is checked regularly. Several tests and two major exams are given. The second course covers a diverse array of topics that include: fractions, decimals, exponents, polynomials, algebra, graphing, probability, and statistics. Homework is regularly assigned and marked, and several major exams are given during the year, including a three-hour final in April.

Introduction

Dalhousie's Faculty of Science is the primary centre in the region for science education and research. The principal mission of the Faculty is the discovery, organization, dissemination and preservation of knowledge and understanding of the natural world. The Faculty is dedicated to excellence in the pursuit of this mission. Students in the Faculty of Science develop a capacity for inquiry, logical thinking and analysis; cultivate an ability to communicate with precision and style; and acquire skills and attitudes for lifelong learning.

We offer students the opportunity to pursue undergraduate degrees in 16 different Science programs, including disciplines in the life sciences, physical sciences, and mathematical or economic sciences. In addition, students may combine studies across science disciplines, or with subject areas from other faculties, including the Faculty of Arts & Social Sciences, the Faculty of Computer Science or the College of Sustainability. Other opportunities include the Co-op Education in Science option, where paid work terms are integrated into academic programs, opportunities to participate in research projects led by internationally renowned scientists, and the chance to work toward Certificates that recognize particular skill sets or training obtained as part of a science undergraduate education.

Details concerning particular programs of study are found in the departmental and program entries.

Departments and Programs of the Faculty of Science

The Faculty of Science offers 16 undergraduate programs:

- Actuarial Science
- Biochemistry and Molecular Biology * [c]
- Biology [c]
- Chemistry [c]
- Earth Sciences [c]
- Economics [c]
- Environmental Science [c]
- Marine Biology [c]
- Mathematics [c]
- Medical Sciences **
- Microbiology and Immunology *[c]
- Neuroscience
- Ocean Sciences
- Physics [c]
- Psychology
- Statistics [c]

* Departments belong to the Faculty of Medicine
** Offered in cooperation with the Faculty of Medicine
[c] Co-operative Education option available

Staff

Dean

Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Associate Dean (Academic)

Walde, S., PhD (Calgary), Professor (Biology)

Associate Dean (Research)

Kreplak, L., MSc (Supelec, France), PhD (Universite Paris-sud), Professor (Physics & Atmospheric Science)

Assistant Dean (Student Affairs)

Laws, P., BSc (Acadia), MSc (Dalhousie), BEd (MSVU), Senior Instructor (Chemistry)

Assistant Dean (Finance and Administration)
Jackson, D., BSc, MSc, PhD (Dalhousie), Telephone: (902) 494-2713 (on secondment)

Finance Coordinator
Hanna-Shea, D., Telephone: (902) 494-1443

Executive Assistant to the Dean
Belliveau, D., Telephone: (902) 494-3540

Administrative Secretary
White, J., Telephone: (902) 494-2373
Wood, D., Telephone: (902) 494-2765

Communications Officer
MacQueen, C., Telephone: (902) 494-8443

Alumni & Donor Relations Officer
Adams, J., Telephone: (902) 483-7343

Certificates

Certificates in Science
Certificates are one way that the Faculty of Science recognizes graduating students who have achieved a level of proficiency or specialization in a particular area or subject. Certificates are awarded upon graduation from a degree program and will be recorded on the student's academic transcript.

Certificates vary in their goals and requirements. Many have a research or practicum component. Some are interdisciplinary, requiring work in more than one department, while others focus on a specialization within a single program. Some Certificates are designed for students enrolled in particular programs, while others are broadly applicable to students in any science program.

In Certificate programs, students enrol by applying to the Certificate Coordinator. Interested students are advised to enrol early in their programs of study, but enrolment is usually also permitted in the final year of study, provided requirements have been met. To be awarded a Certificate, students must notify the Coordinator of their intention to graduate, and provide evidence of completion of all Certificate requirements, prior to the end of the examination period of their final year. Some Certificate programs may require earlier notification; please check with your Coordinator.

Faculty of Science students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

The following Certificates are offered by the Faculty of Science. Students enrolled in one of the programs listed beside the Certificate are most likely to be able to meet the Certificate requirements within their programs. Specific Certificate requirements are described below.

- Certificate in Actuarial and Financial Mathematics (Mathematics, Statistics)
- Certificate in Animal Behaviour (Biology, Psychology and Neuroscience)
- Certificate in Applied and Computational Mathematics (Mathematics, Statistics)
- Certificate in Aquaculture and the Environment (Biology, Marine Biology)
- Certificate in Environmental Impact Assessment (Biology, Environmental Science)
- Certificate in Genetics (Biochemistry & Molecular Biology, Biology, Microbiology & Immunology)
- Certificate in Geographic Information Science (Biology, Earth Sciences, Environmental Science)
- Certificate in Information Technology (Earth Sciences, Physics)
- Certificate in Materials Science (Chemistry, Physics, Earth Sciences)

- Certificate in Medicinal Chemistry (Chemistry)
- Certificate in Neurotechnology Innovation (Psychology, Neuroscience)
- Certificate in Science Leadership and Communication(any 4-year Faculty of Science program)

Certificate in Actuarial and Financial Mathematics

Offered by: Mathematics & Statistics

Coordinator: Dr. Toby Kenney (tkenney@mathstat.dal.ca) Mathematics and Statistics

This program provides many of the learning objectives and fundamental mathematical and statistical skills required to complete the classes (and examinations) of the Society of Actuaries accreditation program. Students who are interested in a career in actuarial science should consult the Basic Education Catalogue on the Society of Actuaries web page (www.soa.org) or the Syllabus of Basic Education on the Casualty Actuaries website (www.casact.org). This program also prepares students for employment in general financial institutions where modelling, quantitative risk analysis, management of investment instruments, asset and liability management, life contingencies and insurance assessment, and other complex financial calculations are required.

Admission to Certificate

To enrol in the *Certificate in Actuarial and Financial Mathematics*, students must declare the certificate through Dal Online (https://dalonline.dal.ca>Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Completion of a 120 credit hour Major or Honours program in Mathematics and/or Statistics
2. Completion of the following mathematics courses: MATH 1000, MATH 1010, MATH 1030 or 2030, MATH 2001, MATH 2002, MATH 2600
3. Completion of the following statistics courses: STAT 2060, STAT 2080, STAT 2450, STAT 3340 and STAT 3360
4. Completion of either:

Financial Option: MATH 2120, MATH 3300, and MATH 3900

OR

Actuarial Option: STAT 3703, STAT 3720, and STAT 4390

Certificate in Animal Behaviour

Offered by: Biology, Psychology and Neuroscience

Coordinator: Dr. Simon Gadbois (Psychology and Neuroscience) simon.gadbois@dal.ca

The Certificate in Animal Behaviour provides students with an opportunity to specialize in Animal Behaviour through a set of courses and a research project.

Admission to Certificate

Students should enrol in the Certificate in Animal Behaviour in their third year of studies, when they are seeking approval from the Certificate Coordinator for the independent research component. To enrol, students must declare the certificate through Dal Online (https://dalonline.da >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. To qualify for this certificate, students must complete all course requirements, and must receive approval for the research component of the certificate prior to the start of the research course.

To graduate with the certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program

Certificate requirements:

1. A minimum grade of B- is required in each of four mandatory courses:

- PSYO 2160.03/NESC 2160.03: Animal Behaviour
- PSYO 2501.03: Statistical Methods or STAT 2080.03: Statistical Methods for Data Analysis Inference
- BIOL 3062.03: Behavioural Ecology or PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour
- BIOL 3630.03: Field Methods in Animal Behaviour or NESC 3161.03/PSYO 3161.03: Measuring Behaviour or NESC 3165.03/PSYO 3165.03: Neuroethology

2. A grade of at least B- in all of 12 additional credit hours of courses chosen from the following list. Courses taken as one of the four mandatory classes cannot also be used to fulfill this requirement. Six credit hours must be at the 3000/4000 level.

2000 level

- ANSC 2003.03: Companion Animal Behaviour
- PSYO 2140.03/NESC 2140.03: Learning
- PSYO 2470.03/NESC 2470.03: Systems Neuroscience

3000 level

- ANSC 3002.03: Domestic Animal Behaviour
- BIOL 3062.03: Behavioural Ecology (if not used to fulfill Requrement 1 above)
- BIOL 3080.03/MARI 3080.03: Ecology and Evolution of Fishes
- BIOL 3327.03: Entomology
- BIOL 3622.03: Ornithology
- BIOL 3626.03: Field Studies of Marine Mammals
- BIOL 3628.03/MARI 3628.03: Marine Ornithology
- BIOL 3630.03: Field Methods in Animal Behaviour (if not used to fulfill Requirement 1 above)
- BIOL 3640.06: Tropical Ecology and Biodiversity (with Animal Behaviour project: counts for three credit hours only)
- BIOL 3632.03: Applied Field Methods in Fish Ecology
- BIOL 3639.03: Herpetology
- MARI 3090.03: Marine Mammalogy
- PSYO 3000.06/NESC 3000.06: Independent Research in Modern Psychology (Animal Behaviour topic)
- PSYO 3001.03/NESC 3001.03: Directed Research Project in Psychology or Neuroscience (Animal Behaviour topic)
- PSYO 3043.03/NESC 3043.03: Neurobiology of Learning
- PSYO 3044.03/NESC 3044.03: Laboratory Methods of Learning and Conditioning
- PSYO 3161.03/NESC 3161.03: Measuring Behaviour
- PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour (if not used to fulfill Requirement 1 above)
- PSYO 3165.03/NESC 3165.03: Neuroethology (if not used to fulfill Requirement 1 above)
- PSYO 3170.03/NESC 3170.03: Hormones and Behaviour
- PSYO 3180.03/NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- PSYO 3670.03/NESC 3670.03: Genes, Brain and Behaviour

4000 level

- BIOL 4323.03/MARI 4323.03: Biologging in Ecology
- BIOL 4800.06: Special Topics (Animal Behaviour topic)
- BIOL 4806.03/MARI 4806.03, BIOL 4807.03/MARI 4807.03, BIOL 4808.03/MARI 4808.03, BIOL 4810.03: Special Topics (Animal Behaviour topic)
- BIOL 4510.03 Cultural Evolution
- BIOL/MARI 4900.06: Honours Research and Thesis or BIOL 4901.03/MARI 4901.03 BIOL 4902.03/MARI 4902.03: Honours Research and Thesis I and II (with approved Animal Behaviour topic)
- MARI 4090.03: Evolutionary Ecology of Marine Mammals
- PSYO 4140.03 or NESC 4140.03: Animal Learning Topics
- PSYO 4160.03/NESC 4160.03: Topics in Behavioural Biology
- PSYO 4500.06/NESC 4500.06: Honours Research (with approved Animal Behaviour topic)

3. A grade of B- in 3 credit hours or more of independent research in Animal Behaviour.

The course used to fulfil this requirement can also be counted toward the courses that fulfil Requirement 2 above.

Students must obtain approval of their research topic from a Certificate Coordinator prior to the start of the research course. Animal behaviour research projects may be completed through one or more of PSYO 3100.03/NESC 3100.03 or PSYO 3101.03/NESC 3101.03, PSYO 3001.03/NESC 3001.03, PSYO 4500.06/NESC 4500.06, BIOL 4800.06, BIOL 4806.03/MARI 4806.03, BIOL 4807.03/MARI 4807.03, BIOL 4808.03/MARI 4808.03 or BIOL 4900.06.

Honours students may fulfill this requirement by conducting their honours thesis research on a topic in Animal Behaviour. Students are encouraged to further develop their study design and analysis skills by taking additional courses such as BIOL 4061.03 (Design of Biological Experiments) or BIOL 4062.03 (Analysis of Biological Data).

Certificate in Applied and Computational Mathematics

Offered by: Mathematics & Statistics

Coordinator: Dr. P. Selinger mathdirector@mathstat.dal.ca

This program is concerned with the development of the core mathematical and computational skills required in science, government and industry. Areas of application include everything from mathematical modeling to operations research to cryptography to software development.

Admission to Certificate

To enrol in the ***Certificate in Applied and Computational Mathematics***, students must declare the certificate through Dal Online (https://dalonline.dal.ca >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Completion of the 120 credit hour Major or Honours program in Mathematics or an equivalent program

2. Completion of the following mathematics courses: MATH 1000, MATH 1010, MATH 1030 (or MATH 2030), MATH 2001, MATH 2002, MATH 2040, MATH 2110 (or MATH/CSCI 2112), MATH 2120

3. Completion of at least four of: MATH 3120, MATH 3210, MATH 3300, MATH 3330, MATH 3370

4. Completion of at least two of: MATH 4116, MATH 4220, MATH 4230, MATH 4250, MATH 4320

Additional recommended courses: MATH 2300, STAT 2060, STAT 2080

Certificate in Aquaculture and the Environment

Offered by: Faculty of Science

Coordinator: Dr. Diego Ibarra Diego.ibarra@dal.ca (Biology)

Eligibility: The certificate is open to any Dalhousie undergraduate student. Non-degree Dalhousie students may qualify for the certificate if they fulfill all course requirements at Dalhousie.

Overview: The *Certificate in Aquaculture and the Environment* consists of courses that include lectures, laboratories, and visits to coastal and land-based aquaculture sites. It is designed to provide students with knowledge of, and experience with general aspects of the cultivation of aquatic species. The emphasis is on understanding aquaculture - environment interactions, and acquiring the knowledge, skills and quantitative tools needed to assess and reduce the environmental footprint of aquaculture operations.

Admission to Certificate

To enrol in the *Certificate in Aquaculture and the Environment*, students must declare the certificate through Dal Online (https://dalonline.dal.ca >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. To qualify for the certificate, students must complete the course requirements, and have received approval from the Certificate Coordinator if a course other than MARI 3604 is used to fulfil subject area F.

To graduate with the Certificate, students must Apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

To obtain the *Certificate in Aquaculture and the Environment*, students must take one course from each of six subject areas (A to F), with a minimum of B- in each course. Note that most of these courses may also count toward a Major, Minor or Honours program in Biology or Marine Biology.

A. Introduction to aquaculture

- MARI 3602.03: Introduction to Aquaculture

B. Practical skills in aquaculture

- MARI 3603.03: Practical Aquaculture

C. Biology of aquatic organisms

One of

- MARI 3074.03 (or BIOL 3078.03): Physiology of Marine Animals Part I
- MARI 3076.03 (or BIOL 3079.03): Physiology of Marine Animals Part II
- MARI 3221.03 (or BIOL 3221.03): Diversity of Algae
- MARI 3301.03 (or BIOL 3301.03): Invertebrate Biology
- MARI 3370.03 (or BIOL 3370.03): Comparative Animal Physiology
- MARI 4080.03 (or BIOL 4080): Laboratory Studies of Fishes
- BIOL 4662.03/MARI 4662.03/OCEA 4230.03: Biology of Phytoplankton

D. Aquaculture and the environment

- MARI 4600.03: Ecosystem modelling for Aquaculture

E. Aquaculture management

One of

- OCEA 4401.03: Marine Management I
- OCEA 4402.03: Marine Management II
- BIOL 4001.03: Environmental Impact Assessment
- ENVS 3200.03: Introduction to Environmental Law
- ECON 3335.03: Environmental Economics
- SUST 3101.03: Food Systems and Sustainability: Feeding the 10 billion

F. Industry-relevant knowledge and experience

** One of

- MARI 3604.03: Field Aquaculture
- * MARI 3800.03 (or BIOL 3800.03): Experiential Learning
- * MARI 4806.03: Special Topics Independent Research
- * MARI 4901.03 and MARI 4902.03 (or MARI 4900.06): Honours Thesis
- * BIOL 4901.03 and BIOL 4902.03 (or BIOL 4900.06): Honours Thesis
- * MARI 8891.00 (or MARI 8892.00 or MARI 8893.00) Co-op work term
- * ENVS 3000.03: Environmental Science Internship
- * ENVS 8891.00 (or ENVS 8892.00 or ENVS 8893.00) Co-op work term
- * SUST 3002.03: ESS Engagement Project
- * SCIE 4701.03 and SCIE 4702.03 Science and Technology Innovation, Commercialization and Entrepreneurship I and II

* These courses must be pre-approved (prior to start of the course) by the certificate coordinator as having a focus on aquaculture

** Some alternatives used to fulfil **Requirement F** are not available to students in all programs. For example, MARI 4900 is open only to students in the Marine Biology Honours program, MARI 8891 and ENVS 8891 are open only to students in Marine Biology or Environmental Science Co-op programs.

Certificate in Data Analytics

Offered by: Faculty of Science

Coordinator: Dr. Theodore Kolokolnikov, Mathematics and Statistics (tkolokol@mathstat.dal.ca)

Eligibility: Open to Dalhousie undergraduate students

Overview: Data Analytics is an interdisciplinary field aimed at extracting knowledge from data of various forms. The techniques of data analytics draw heavily from the fields of statistics, computer science, and mathematics. Students completing the certificate will understand distinctions among data, information and knowledge, will be able to use the Structured Query Language (SQL) to manipulate relational databases, the R programming language to model data using a variety of machine learning and statistical models, and will able to assess the performance of predictive models.

Admission to Certificate

To enrol in the *Certificate in Data Analytics*, students must declare the certificate through Dal Online (https://dalonline.dal.ca>Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by email.

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate requirements:

- MATH 1000: Differential and Integral Calculus I (or MATH 1215 or MATH 1280)
- MATH 1030: Matrix Theory and Linear Algebra I
- MATH 2040: Matrix Theory and Linear Algebra II (or MATH 2135)
- STAT 1060: Introduction to Statistics (or STAT 2060)
- STAT 2450: Introduction to Data Mining with R
- CSCI 2202: Computer Modeling for Scientists (or CSCI 1105 or CSCI 1110)
- CSCI 2141: Introduction to Database Systems
- One of
    - BIOC 4010: Bioinformatics
    - BIOL 4062: Analysis of biological data
    - CHEM 4205: Chemometrics
    - CSCI 4146: The process of data science
    - ECON 4440: Time series analysis in economics
    - ENVS 3100: Environmental analytics
    - ERTH 4520: GIS applications
    - MARI 4600: Ecosystem modelling for aquaculture
    - MATH 3330: Applied graph theory
    - OCEA 4210/STAT 4390: Time series analysis in oceanography and meteorology
    - PHYC 3250: Computational methods in physics
    - PHYC 4250: Topics in numerical computing
    - STAT 4130: Bayesian data analysis
    - STAT 4350: Applied multivariate analysis
    - STAT 4550: Longitudinal data analysis
    - STAT 4620: Data analysis
    - STAT 4100: Survival analysis

Certificate in Data Science

Certificate in Data Science

This certificate is intended for students completing a Bachelor of Computer Science, Bachelor of Science in Computer Science, or a Bachelor of Science in Statistics, but is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take two required courses and four electives from a list of elective courses with at least a C in each of them. Required courses are:

- CSCI 3151: Foundations of Machine Learning or STAT 3450: Statistical learning with R
- CSCI 4146: The Process of Data Science

Elective courses are:

- CSCI 4125: High Performance Computing
- CSCI 4141: Information Retrieval
- CSCI 4144: Introduction to Data Mining and Data Warehousing
- CSCI 4152: Natural Language Processing
- CSCI 4155: Machine Learning
- CSCI 4156: Reinforcement Learning with Gaming Applications
- CSCI 4166: Visualization
- STAT 2080: Statistical methods for Data Analysis and Inference
- STAT 2430: Data Visualization
- STAT 2450: Introduction to Data Mining with R
- STAT 3340: Regression and Analysis of Variance
- STAT 3360: Probability
- STAT 3740: Predictive Analysis
- STAT 4066: Advanced Statistical Theory
- STAT 4130: Bayesian Anaylsis
- STAT 4350: Multivariate Analysis
- STAT 4370: Stochastic Processes
- STAT 4390: Time Series Analysis
- STAT 4620: Data Analysis
- STAT 4690: Computational Statistics

Requirements

Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Environmental Impact Assessment

Offered by: Faculty of Science

EIA Certificate Coordinator: Patricia Lane (Biology), patricia.lane@dal.ca

The **Certificate in Environmental Impact Assessment** is for students who are interested in or majoring in environmental areas and wish to pursue additional training in EIA. It is available to students currently working towards an undergraduate degree at Dalhousie.

Students will learn to:

1. Apply a Project EIA Framework in the preparation of a Nova Scotia-based EIA.
2. Demonstrate an understanding of relevant federal and provincial (Nova Scotia) legislation.
3. Design a meaningful stakeholder participation program.
4. Use environmental impact and risk methodologies to accurately predict project impacts.
5. Design an Environmental Management Plan that includes mitigation, enhancement, compensation, monitoring, residual impacts, and project accountability.
6. Critique an existing environmental assessment report.
7. Prepare a comprehensive project EIA for a physical project
8. Prepare a Strategic Environmental Assessment (SEA) for a federal policy.

Disclaimer: This EIA Certificate was developed within Dalhousie University and it is not designed to fulfill any governmental and/or professional requirements outside of the university, in Canada or abroad.

The Certificate requires a total of 24 credit hours as follows:

1. Required EIA course: BIOL 4001.03/ENVS 4001.03 (3 credit hours) to be taken in the fourth year. Note: transfer or online courses are not acceptable substitutes for this requirement.
2. Minimum of 3 credit hours from Table 1: Introductory Science, SUST, Agriculture, or FASS course
3. Minimum of 9 credit hours from Table 2: Environmental courses with theoretical content
4. Minimum of 3 credit hours from Table 3: Methods courses with field, laboratory, statistical, or modeling experience
5. Minimum of 6 credit hours from Table 4: Supplementary courses in Major or Related Disciplines

Students must obtain a minimum grade of B for all courses counted toward the certificate. Classes cannot be substituted from one table to another. Please note that many classes are cross-listed, but only listed once for the department offering the class below. Students can use any one of the cross-listings.

Table 1. Introductory Courses Checklist (minimum of 3 credit hours from the following list)

BIOL 2060.03: Introductory Ecology **OR** BIOA 3001.03: Ecology

ENVA 2000.03: Environmental Studies I

SUST 4001.03 and SUST 4002.03 Environment, Sustainability, Society (ESS) Capstone

Certificate in Genetics

Offered by: Biochemistry & Molecular Biology, Biology, Microbiology & Immunology

Coordinators:
Dr. Claudio Slamovits claudio.slamovits@dal.ca (Biochemistry & Molecular Biology)
Debra Grantham grantham@dal.ca (Biology)
Dr. Ian Weaver ian.weaver@dal.ca (Medical Sciences, Psychology & Neuroscience)
Dr. Lois Murray lois.murray@dal.ca (Microbiology & Immunology and Biochemistry & Molecular Biology)

The Certificate in Genetics provides students with an opportunity to complete a set of courses and research that will accord them recognition of specialization in genetics.

Admission to Certificate

This certificate is open to current Bachelor of Science and Bachelor of Science in Medical Sciences students and is intended to reflect specialization within the degree. Students completing Biology, Biochemistry and Molecular Biology, Microbiology and Immunology, and Medical Sciences degrees will find the most overlap with their program requirements, but the certificatr id open to all BSc and BScMS students.
Students should enrol in the Certificate in Genetics in their third year of studies, after they have sought approval of the independent research component from the Certificate Coordinator for their degree program. To enrol in the *Certificate in Genetics*, students must declare the certificate through Dal Online (https://dalonline.dal.ca >Web for Students>Admissions>Declare Major/Minor/Certificate) and notify the Certificate Coordinator. To qualify for the certificate students must complete all course requirements, ***and*** have received approval for the research component prior to the start of the research course.

To graduate with the Certificate, students must apply to graduate with the certificate at the time they apply to graduate from their degree program.

Certificate requirements:

1. A minimum grade of a B- in three mandatory courses:

- BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

2. Other required courses (prerequisites for BIOC 3400.03)

- CHEM 2441.03, or CHEM 2401.03 and CHEM 2402.03

3. A minimum grade of B- in 12 credit hours chosen from the following list (at least 6 credit hours must be at the 4000 level):

2000 level

- BIOL 2040.03: Evolution

3000 level

- BIOL 3037.03: Life Rewritten: Applications and Implications of Gene Editing and Synthetic Biology
- BIOL 3042.03/MARI 3042.03: Molecular Ecology
- BIOL 3044.03: Ecological Genetics
- BIOL 3046.03: Molecular Evolution
- MICI 3114.03: Virology
- NESC 3670.03/PSYO 3670.03: Genes, Brain and Behaviour

4000 level

- BIOC 4010.03: Bioinformatics

- BIOC 4027.03/MICI 4027.03: Molecular Mechanisms of Cancer
- MICI 4033.03: Advanced Microbial Genetics
- MICI 4114.03: Advanced Topics in Molecular and Medical Virology
- BIOC 4403.03: Genes and Genomes
- BIOC 4404.03: Gene Expression
- BIOC 4501.03: Medical Biotechnology
- BIOC 4835.03/BIOL 4035.03: Human Genetics
- NESC 4670.03: Behavorial Neuro(epi)genetics and Genomics

4. A minimum grade of B- in three credit hours (or more) of independent research on a topic involving microbial genetics, molecular genetics, transmission genetics or population genetics. Co-op Work Terms are not applicable. The research topic must be pre-approved by the Departmental Certificate Coordinator prior to the start of the research course. Choose the relevant course from the following list:

- BIOC 4001.03
- BIOC 4604.03
- BIOC 4605.03
- BIOL 4806.03/MARI 4806.03
- BIOL 4807.03/MARI 4807.03
- BIOL 4901.03/MARI 4901.03
- BIOL 4902.03/MARI 4902.03
- MICI 4703.03 and MICI 4704.03
- MICI 4701.03
- MICI 4702.03
- MICI 4901.03 and MICI 4902.03
- NESC 4501.03 and NESC 4502.03
- PSYO 4501.03 and PSYO 4502.03
- SCIE 4101.03 and SCIE 4102.03 (formerly SCIE 4100X/Y.06)
- SCIE 4901.03 and SCIE 4902.03 (formerly SCIE 4900X/Y.06)

Certificate in Geographic Information Science (GIS)

Offered by: Earth Sciences, Environmental Sciences, Biology

Coordinators:
Dr. C.S Greene csgreene@dal.ca (Earth and Environmental Sciences)
Dr. D. Tittensor Derek.Tittensor@dal.ca (Biology)
Dr. E. Rapaport eric.rapaport@dal.ca (School of Planning)

The GIS Certificate program provides training and experience in geographic information science as part of an undergraduate degree program, usually in Earth Sciences, Environmental Science or Biology, and prepares students for further study or employment in the area. The Certificate requires the completion of GIS-related courses and completion of a major project that involves work with geographic information systems and geomatics.

Admission to Certificate

It is recommended that students enrol in the GIS Certificate in their second or third year of studies, and that they contact the Certificate Coordinator at that time. To enrol, students must declare the Certificate through Dal Online (https://dalonline.dal.ca >Web for Students>Admissions>Declare Major/Minor/Certificate). To qualify for the Certificate, students must complete all course requirements, ***and*** have received approval for the research component (project) from the Certificate Coordinator if intending to use an alternative to the Geographic Information Science Research course to satisfy the research component of the certificate.

To graduate with the Certificate, students must apply to graduate with a certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. A minimum grade of B- in each of the following courses:

- ENVS 2850.03/ERTH 2850.03/GEOG 2850.03: Foundations of Geospatial Information Science and Technology or GEOG / PLAN 2006.03: Space, Place and GIS or ENVA 3005.03 Geographic Information Systems (GIS).
- ENVS 3850.03/ERTH 3850.03/GEOG 3850.03: Advanced Geospatial Information Science and Technology
- ENVS 4520.03 / ERTH 4520.03/GEOG 4520.03: GIS Applications in Earth and Environmental Sciences

1. A minimum grade of B- in at least one of the following courses:

- GEOG 2000.03: Cartography
- BIOL 3633.03/ENVS 3633.03/GEOG 3633.03: Spatial Information and GIS in Ecology
- ENVS 3400.03/GEOG 3400.03: Environment and Human Health
- ENVS/ERTH 4530.03/GEOG 4530.03: Environmental Remote Sensing
- ERTH 4320.03/OCEA 4320.03: Seafloor Mapping

1. Completion of a research project with an emphasis in geographic information science via one of the following sets of courses (minimum grade of B-). Set 1 research options are approved by the course instructor. Set 2 research options must be pre-approved by the Certificate Coordinator.

Set 1

- SCIE 4850.03/BIOL 4850.03/ENVS 4850.03/GEOG 4850.03: Geographic Information Science Research Project

Set 2

- SCIE 4851.00 Certificate in GIScience Set 2
    - Note: All Set 2 requirements will be managed through the **SCIE 4851.00** course code. Students wishing to use any course that is NOT from Set 1, must contact the course instructor for permission to register in SCIE 4851.00. Please include the course name and syllabus (or learning contract) for the course you are intending to use to fulfill this requirement (*i.e., completion of a research project with an emphasis in geographic information science*). Some examples of courses that may fulfil this requirement (depending on focus of project) are listed below. This list is not exhaustive, and courses are subject to review by coordinator to ensure they meet the necessary coverage.
        - BIOL 4901.03 and BIOL 4902.03 or MARI 4901.03 and MARI 4902.03: Honours Thesis (or the former BIOL 4900.06/MARI 4900.06)
        - BIOL 4806.03 or BIOL 4807.03 or BIOL 4809.03 or MARI 4806.03 or MARI 4807.03 or MARI 4809.03: Independent Research I, II, and III
        - ENVS 4901.03/ENVS 4902.03: Honours Thesis
        - ERTH 4101.03 and ERTH 4102.03: Research Project
        - ERTH 4201.03 and ERTH 4202.03: Honours Thesis
        - PLAN 4500.06: Thesis Project
        - SUST 4800.03: Independent Study
        - SUST 4901.03 and SUST 4902.03: Honours Thesis

Research Project Guidelines for the Certificate in Geographic Information Science

Students should learn how to design, manage and complete a research project that emphasizes the use of a geographic information system (GIS). Students will identify a suitable research problem and work to solve it through acquiring, organizing, analyzing and presenting data using GIS. A substantive analytical component involving GIS must be included. Projects should be undertaken after all or most of the coursework is completed, e.g. students should already be familiar with GIS concepts and functions, and be proficient in the use of at least one GIS package. Supervision and evaluation of research projects must include input from a professor or GIS technician competent in geographic information science, methods and technologies.

Students enrolled in an undergraduate program other than Biology, Environmental Science, Earth Sciences or the College of Sustainability, may be able to complete the project through a directed readings or honours thesis course listed within their home department. The project must be pre-approved by a Certificate Coordinator. Non-thesis students, or honours students who wish to

complete the certificate through a project that is not part of their thesis, who are in Biology, Earth Sciences or Environmental Science should complete the project through SCIE 4850: Geographic Information Science Research Project.

Certificate in Human Physiology

Offered by: Physiology & Biophysics, Psychology & Neuroscience, Biology, Kinesiology

Coordinators: Dr. Derek Kimmerly (Kinesiology students) dskimmerly@dal.Ca
Dr. Nathan Crowder (Neuroscience & Psychology) Nathan.Crowder@dal.ca
Dr. Marie-Soleil Beaudoin (Medical Sciences & Other Programs) marie-soleil.beaudoin@dal.ca

Eligibility: This certificate is open to currently registered in an undergraduate degree-conferring program (e.g., BSc, BA, BScMS, etc.) at Dalhousie University.

Overview: The Certificate in Human Physiology provides students with an opportunity to specialize in physiological studies through courses offered in the Medical Sciences, Biology, Neuroscience, and Kinesiology undergraduate programs, as well as experiential learning opportunities. The learning outcomes will vary between students and depend on their main area of undergraduate studies, as well as on individual interests. Concentrating on one or more cross-cutting themes, students enrolled in the certificate program may choose to:

- Examine the function and role of particular organ systems in human performance and disease.
- Analyze the function of the nervous and endocrine systems to appreciate how they regulate bodily functions and behaviour.
- Explore physiological mechanisms at molecular and cellular levels to develop a more thorough understanding of physiological and pathophysiological processes at a higher organizational level.

Admission to Certificate: Students should enrol in the Certificate Program in Human Physiology in their third year of studies. To enrol, students must declare the certificate through Dal Online (https://dalonline.ca >Web for Students>Admissions>Declare Major/Minor/Certificate) and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. A minimum grade of at least B- is required in 6 credit hours of the following core courses:

- PHYL 2041 Human Neurophysiology and PHYL 2044 Systems Physiology or
- BIOL 3370/MARI 3370 Animal Physiology and BIOL 3371/MARI 3371 Laboratory in Comparative Animal Physiology or
- BIOL 3078/MARI 3078 Animal Physiology I and BIOL 3079/MARI 3079 Animal Physiology II or
- NESC 2470 Systems Neuroscience and PHYL 2044 Systems Physiology or
- KINE 2310 Physiology of Exercise and KINE 2430 Motor Control & Learning

2. A grade of at least B- required in 15 elective credit hours chosen from the list of courses below. Courses from the list of core courses can be taken as electives if they are not already used to fulfill the core course requirements for this certificate. No more than one 2000-level course can be used towards elective credits. A maximum of 9 credit hours from any one stream (PHYL, NESC, BIOL, KINE) can be used.

- PHYL 3120 Exercise Physiology
- PHYL 3320 Human Cell Physiology
- PHYL 3520 Core Concepts in Medical Physiol
- PHYL 3620 Human Physiology Lab
- PHYL 4000 Synaptic Function
- PHYL 4324 Endocrine Function
- PHYL 4504 Respiratory Physiology
- PHYL 4680Cardiovascular Physiology

- NESC 2150 Perceptual Processes

- NESC 2570 Cellular Neuroscience
- NESC 3051 Methods in Sensation and Perception
- NESC 3170 Hormones & Behaviour
- NESC 3440 Human Neuroanatomy
- NESC 3670 Genes, Brain & Behaviour
- NESC 3970 Molecular Neuroscience
- NESC 4070 Chemical Neurobiology

- BIOL 3430 Intro Human Histology
- BIOL 4020 Advanced Cell Biology

- KINE 3419 Appl Physiology Principles Human Performance
- KINE 3250 Human Nutrition
- KINE 3440 Sensory and Motor Function
- KINE 4704 The Impact of Exercise and Physical Activity on Cardiovascular Health in Older Adults

3. At least 6 credit hours of experiential learning or independent research. Research projects have to be conceptually or methodologically related to Physiology and be approved by the certificate program committee. Suitable courses for this requirement include **PHYL 3600, PHYL 3601, NESC 3001, NESC 3002, NESC 3100, NESC 3101, NESC 4901, NESC 4902, SCIE 3100, SCIE 4101, SCIE 4102, SCIE 4901, SCIE 4902, BIOL 3800, BIOL 4806, BIOL 4807, BIOL 4901, BIOL 4902, KINE 4801, KINE 4802, KINE 4901, KINE 4902,** and **KINE 4900X/Y.**

Certificate in Information Technology

Offered by: Physics

Coordinator: Dr. Tim Bardouille (tim.bardouille@dal.ca)

The goal of this certificate is to recognize students who have completed courses with a substantial Information Technology (IT) component, and to provide these students with a document to present to potential employers who seek graduates with IT skills. Depending on the program of study, students may work with symbolic calculation packages such as MATLAB or MAPLE, statistical packages such as R or S-Plus, numerical computation or programming languages. Others develop proficiency in web design, or use of database, drawing (e.g. CAD) or GIS software. Experience with a variety of hardware and operating systems experience may further round out the set of skills.

The Certificate in IT is a discipline-based program available to students majoring in Physics.

Admission to Certificate

To enrol in the ***Certificate in Information Technology***, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements (Physics):

- Completion of a 120 credit hour Major or Honours degree program in Physics
- Two of PHYC 2050.03, PHYC 3250.03, PHYC 4250.03
- One additional course which may be a CSCI or INFX course, ENGM 1081.03 or MATH 2300.03

Certificate in Materials Science

Offered by: Faculty of Science

Coordinator: Dr. Mita Dasog (Chemistry) mita.dasog@dal.ca

The Certificate in Materials Science provides recognition for students who have had significant training in the breadth and depth of materials science within their 120 credit hour Honours or Major program. It is particularly suited for students in Chemistry, Earth Sciences and Physics programs.

Admission to Certificate

To enrol in the Certificate in Materials Science, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. Students may enrol in the second, third or fourth year of their programs, but early enrolment is advised.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

1. At least four of the following courses, with a minimum grade of B- in each:

CHEM 3305.03/PHYC 3303 (or CHEM 3303.03): Materials Science

CHEM 4302.03: Intro to Surface Science

CHEM 4502.03: Polymer Science

CHEM 4311.03: Fundamental and Applied Electrochemistry

CHEM 4105.03: Inorganic Materials Synthesis

ERTH 2001.03: Earth Materials Science I

ERTH 2002.03: Earth Materials Science II

PHYC 3900.03: Introduction to Soft Condensed Matter Physics

PHYC 4230.03: Introduction to Condensed Matter

BIOE 4391.03: Polymeric Biomaterials

BMNG 5110.03: Biocompatibility and Biomaterials Design

2. Students must complete a research project with a materials emphasis (pre-approved by the Certificate Coordinator) via one of the following sets of courses, with a minimum grade of B-:

- CHEM 4801.03 and CHEM 4802.03
- CHEM 4902.03 and CHEM 4903.03 (or CHEM 4901.06)
- ERTH 4201.03 and ERTH 4202.03 (or ERTH 4200.06)
- ERTH 4101.03 and ERTH 4102.03 (or ERTH 4100.06)
- PHYC 4800.03 and PHYC 4850.03

Certificate in Medicinal Chemistry

Offered by: Faculty of Science

Coordinator: Dr. Alison Thompson alison.thompson@dal.ca (Chemistry)

The Department of Chemistry offers a Certificate in Medicinal Chemistry in conjunction with its Major and Honours programs. This certificate is intended to reflect that the student has completed a course of study in chemistry that is appropriate for employment or further study related to pharmaceutical development and production.

Admission to Certificate

To enrol in the ***Certificate in Medicinal Chemistry***, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

- Completion of a 120 credit hour program in Chemistry (Honours, Combined Honours, Major, Double Major)
- CHEM 2101.03, CHEM 2201.03, CHEM 2301.03, CHEM 2304.03, CHEM 2401.03, CHEM 2402.03
- CHEM 3203.03, CHEM 3401.03, CHEM 3404.03, CHEM 3601.03
- CHEM 4401.03, CHEM 4601.03
- Any two of: CHEM 3301.03, CHEM 4205.03, CHEM 4206.03, CHEM 4301.03, CHEM 4402.03

Recommended Electives: BIOC 2300.03, BIOC 2610.03, BIOC 3700.03, BIOC 4701.03

Certificate in Neurotechnology Innovation

Offered by: Faculty of Science

Coordinator: Dr. Aaron Newman, Department of Psychology and Neuroscience (aaron.newman@dal.ca)

Overview Neurotechnology is an area of research and application involving technologies that measure and/or modulate brain function. Technologies include hardware, software, and drugs, and have applications in several areas including clinical diagnosis and treatment, health promotion and maintenance (including cognitive health), entertainment, and forensics. The undergraduate certificate in Neurotechnology Innovation is designed to provide foundational knowledge in this multi-disciplinary area. The certificate will also provide an understanding of how neurotechnologies can be translated into applications that are available to patients and consumers - through training in innovation, design, and commercialization. The Neurotechnology Innovation certificate provides students with knowledge in:

- Basic neuroscience
- Neurotechnology
- Clinical and cognitive neuroscience
- Computer science
- Entrepreneurship
- Innovation and product design
- Intellectual property

Eligibility The Certificate is oriented toward undergraduate students majoring in Neuroscience, but is open to students in other programs. Students from outside the Faculty of Science (Arts & Social Sciences, Computer Science, Engineering, Management) are welcome, but should consult with an advisor from their home program prior to enrolling.

Admission To enrol in the ***Certificate in Neurotechnology Innovation***, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

The certificate requires completion of 18 credit hours of coursework, in addition to the prerequisites that any of the required courses have. The certificate will be awarded based on successful completion of all of the student's degree requirements, as well as the following courses required for the certificate. Students should consult the University Calendar and departmental requirements for their major regarding the limitations that may be imposed upon the number of credit hours taken outside of the Faculty in which they are majoring, as well as prerequisites for the courses required for the certificate

1. Successful completion of courses from each of the three following sections, as detailed below (or courses deemed equivalent by the Certificate Coordinator):

(a) NESC 2470.03 Systems Neuroscience* or

PSYO 2770.03 Brain and Behaviour

*Note: Some offerings of NESC/PSYO 2470 may be restricted to students majoring in Psychology or Neuroscience. However, students from other programs seeking to take the course toward the Neurotechnology Innovation certificate may contact the certificate coordinator for assistance with registration. To be eligible, students must meet the prerequisites for NESC/PSYO 2470.

(b) At least one of

NESC 3505.03/PSYO 3505.03 Neural Data Science

CSCI 1105.03 Introduction to Programming

CSCI 1110.03 Introduction to Computer Science

CSCI 2202.03 Introduction to Programming with Applications for Scientists

CSCI 2203.03 Data Science for Everyone

PHYC 2050.03 Computer Simulation in Science

(c) SCIE 4701.03.03 and SCIE 4702 Applied Innovation in Science I and II

2. Completion of at least three credit hours (one course) from each of the two topic areas listed below. Courses used to satisfy the requirements below cannot also be used to satisfy Requirement 1 above. Note that many of these courses have additional prerequisites; students are responsible for identifying and fulfilling any such prerequisites and/or obtaining special permission from the instructor.

(a) Neuroscience/Neurotechnology

PHYC 2250.03 Physics of Biological and Medical Technology

NESC 3137.03/PSYO 3137.03 Research Methods in Cognitive Neuroscience

NESC 3227.03/PSYO 3227.03 Principles of Human Neuropsychology

NESC 3237.03/PSYO 3237.03 Drugs and Behaviour

NESC 4070.03 Chemical Neurobiology

NESC 4177.03 Theoretical Neuroscience

NESC 4185.03 Synaptic Function and Plasticity

PHAC 3001.03 Pharmacology I

PHAC 4403.03 Systems Pharmacology I

(b) Computer and Data Science

Note that not all courses are available to non-Computer Science majors every year. Please consult with the Faculty of Computer Science regarding enrolment in these courses

NESC 3505.03/PSYO 3505.03 Neural Data Science

CSCI 1107.03 Social Computing

CSCI 1108.03 Experimental Robotics

CSCI 1110.03 Introduction to Computer Science

CSCI 1120.03 Introduction to Computer Systems

CSCI 2110.03 Data Structures and Algorithms

CSCI 2134.03 Software Development

CSCI 2141.03 Intro to Database Systems

CSCI 2202.03 Introduction to Programming with Applications for Scientists

CSCI 2203.03 Data Science for Everyone

CSCI 3141.03 Foundations of Data Science Using R

PHYC 2050.03 Computer Simulation in Science

STAT 2450.03 Introduction to Data Mining Using R

Notes on the Computer Science course options:

- CSCI 1105.03 and 1110.03 are mutually-exclusive options for an introductory computer science course. You should take CSCI 1105.03 if you have no prior computer programming/coding experience, or CSCI 1110.03 if you have previous programming experience (e.g., a past high school or university class in programming, or independent programming experience). Students with some programming experience who are unsure which course to register for, should consult with an advisor in the Computer Science program.
- CSCI 2202.03 *Computer Modelling for Scientists* and CSCI 2203.03 *Data Science for Everyone* have no prerequisites, and do not assume prior programming experience. If you choose to take CSCI 2202.03 first, you should not take CSCI 1105.03 after, as the content will be redundant. However, taking both CSCI 2202.03 and CSCI 1110.03 in either order is acceptable.
- Likewise, if you take NESC 3505.03/PSYO 3505.03 first, you should not take CSCI 1105.03 after, as the content will be redundant.

Certificate in Science Communication

Offered by: Faculty of Science

Coordinator: Dr. Kerrianne Ryan (kerri.ryan@dal.ca)

Description: The focus of the Certificate in Science Communication is to develop the communication skills of science students, through courses focused on understanding the history of science in the media, ethics in science, and communicating science to non-scientists. This certificate is open to any student pursuing a Bachelor of Science degree (BSc or BSc(MedSci)) in the Faculty of Science.

Eligibility: Students currently registered in a Bachelor of Science degree offered by the Faculty of Science (BSc, BSc(Medical Sciences)).

Admission to Certificate: To enrol in the ***Certificate in Science Communication***, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate) and notify the Certificate Coordinator.

To qualify for the Certificate, students must complete all course requirements, and the Portfolio of Science Communication.

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

The certificate requires completion of 15 credit hours of coursework, in addition to the prerequisites that any of the required courses have. The certificate will be awarded based on successful completion of all the student's degree requirements, as well as the following courses (and portfolio) required for the certificate (all with minimum grades of B).

1) **Core requirements**: Students must complete all three core requirements (9 credit hours total), with a grade of B or better in each.

- HSTC 2400.03 /JOUR 2400.03 Science in the Media
- PHIL 2680.03/PHIL 1050.03 Ethics in Science (*preferred*) *Accepted alternates*: PHIL 2480.03 Environmental Ethics, PHIL 2810.03 Ethics in Health Care: Social Policy
- SCIE 3211.03 Communicating Science to Non-Scientists

2) **Topics in Communication**: Students must complete at least **6-credit hours** of communications-focused courses, with a grade of B or better in each, from the list below:

- ASSC 3150.03 Intercultural Communication I
- BIOL 4880.03 / MARI 4880.03 Communicating Science for Societal Impact
- CMMT 3000.03 Human Communication
- ENVS/ERTH 2410.03 Environmental Issues in Earth Sciences
- HSTC 2500.03 Science Fiction in Film
- HSTC 3403.03 Anti-Colonial Science
- INTD 3021.03 Communicating Development and Environment
- JOUR 1002.03 Foundations in Journalism I
- NESC 3011.03/NESC 3012.03 / PSYO 3011.03/PSYO 3012.03 Experiential Learning in Science Communication
- PHAC 3030.03 The Drugs Around Us
- PHAC 3333.03 Pharmacology of Medicinal Herbs and Fungi
- SCIE 3333.03 Science Education

3) **Portfolio in Science Communication** (SCIE 4211.03): Students are required to register for this zero-credit hour course in the semester that they are submitting their completed portfolio for evaluation (typically, the final semester of their degree).

The portfolio is a record that can be shared with future employers and built upon into the future. It will include and document, at a minimum:

i) Two exemplary pieces of science communication. These pieces can be in any format and from courses or extracurricular activities, but *cannot* be from any of the three required courses (HSTC 2400, PHIL 2680, or SCIE 3211): written, blog post, infographic, podcast, video, etc. Students must provide a reflection/explanation of the pieces and describe how they effectively communicate science.

ii) Evidence of at least one public engagement in science communication, paired with a short essay outlining skills used in the engagement, challenges faced, and solutions achieved, and constructive self-criticism of the student's performance. Examples include Soapbox Science, Let's Talk Science, Science Slam Canada, etc.

iii) Reflection and critique of the courses completed as part of the certificate – outlining how each course contributed to their learning, skills learned, and areas for further growth and development related to science communication.

OPTIONAL: Students who have completed the coursework for the Certificate in Science Communication (items 1 & 2 in Certificate Requirements), have the option to convert to the ***Certificate in Science Communication & Leadership***. Students wishing to switch to the Science Communication & Leadership certificate must consult with the coordinators for BOTH certificates. At least six additional credit hours must be completed, including the SCIE 4444.03 Science Leadership capstone course. Consult the Academic Calendar for more information and full details on the Science Communication & Leadership certificate.

NOTE: Students can only receive ONE of the Science Communication or Science Communication & Leadership certificates. The two certificates are considered exclusionary.

Certificate in Science Communication and Leadership

Offered by: Faculty of Science

Coordinator: asscdean.science@dal.ca

The focus of the Certificate in Science Communication and Leadership is to develop basic leadership and communication skills specifically in and through the sciences, to enable Dalhousie Science graduates to better understand the nature and context of science, to consider the process of change, and to have the skills to communicate and lead effectively. The Certificate is available to any undergraduate student in the Faculty of Science. **The Certificate in Science Communication and Leadership builds on the content of the Science Communication Certificate**: students can only receive credit for either the Science Communication Certificate or the Science Communication and Leadership Certificate, but not both.

The Certificate in Science Communication and Leadership replaces the Science Leadership and Communication Certificate. Students who enrolled in the Science Leadership and Communication Certificate prior to Fall 2022 should consult the Calendar for 2021-22 for details on completion of this Certificate.

Admission to the Certificate

Students may enroll in the Certificate in Science Communication and Leadership at any point during their undergraduate program. Students must contact the Certificate Coordinator when seeking permission to enroll in the Portfolio of Learning non-credit course

required for completion of this Certificate (SCIE 4445). To enroll in the Certificate, students must declare the Certificate through Dal Online and notify the Certificate Coordinator by email that they have done so.

To graduate with the Certificate, students must apply to graduate with the Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Leadership: Core required course

SCIE 4444.03: Leadership in Science

2. Communicating Science: Core required course

SCIE 3211.03: Communicating Science

3. Science communication elective: One and no more than 2 of the following Topics in Communication: with a grade of B or better

- ASSC 3150.03 Intercultural Communication I
- BIOL 4880.03/MARI 4880.03 Communicating Science for Societal Impact
- CMMT 3000.03 Human Communication
- HSTC 2500.03 Science Fiction in Film
- INTD 3021.03 Communicating Development and Environment
- JOUR 1002.03 Foundations in Journalism I
- MGMT 3602.03 Professional Communication Skills
- MGMT 4041.03 Environmental Education
- NESC 3011.03/NESC 3012.03 / PSYO 3011.03/PSYO 3012.03 Experiential Learning in Science Communication
- SCIE 3333.03 Science Education

4. Understanding the nature and context of science

HSTC 2400.03: Science and the Media

5. Ethics in Science: One of the following required courses

- PHIL 2680.03: Ethics in Science
- PHIL 1050:03: Ethics in Science
- (NOTE: CREDIT WILL NOT BE GIVEN FOR BOTH PHIL 2680 and PHIL 1050)
- PHIL 2480.03: Environmental Ethics
- PHIL 2810:03: Ethics in Health Care: Social Policy

6. Discipline-specific course: Note that one of these courses may replace the second Topics in Science Communication requirement (#3 above)

- BIOL 2040.03: Evolution
- ECON 2850.03/PHYC 2850.03: Science and Economics of Climate Change
- ENVS 3501.03: Environmental Problem-solving I
- ERTH 3001.03: Field school
- BIOL 4664.03/MARI 4664.03: History of Marine Science*
- NESC 2007.03: Neuroscience Principles and Methods
- PSYO 2000.03: Methods in Experimental Psychology
- PSYO 3581.03: History of Psychology I
- PSYO 3582.03: History of Psychology II
- BIOC 4501.03: Medical Biotechnology I
- MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I

Other courses may be considered. Please consult a coordinator.

* Cross-listed as OCEA 4331.03, HIST 3073.03, HSTC 3331.03, SCIE 4000.03

7. Portfolio of leadership development (SCIE 4445.00). Only register for this zero-credit hour course in the semester that you are submitting your completed portfolio for evaluation, once all other components are completed (or in the final stages of completion).

The portfolio is a record that can be shared with future employers, and built upon in the future. It will document, at a minimum:

- The activities undertaken in each of the above 6 components of the Certificate
- Evidence of your development as a leader and communicator in science throughout the Certificate
- Reflections on how each component fits into leadership and communication development in your discipline / science more broadly

Co-operative Education in Science

Co-operative Education in Science

The Co-op Program allows students to alternate three, career-focused work terms with study terms and receive a co-op degree designation upon graduation. Co-op enables students to apply what they learn in class to real-world work situations and then apply what they learn at work to their classroom studies, thereby enriching their learning. It also helps students to learn more about their career options by test-driving different work environments before they graduate.

Co-op is available to students in many of our BSc (120 credit hour) Honours or Major programs. Interested students normally apply to join Co-op at the end of their first year of study.

Further details are available from departmental Co-op Academic Advisors and from the Work Integrated Learning and Co-Operative Education website.

Introduction

Actuarial Science is the quantitative study of risk, particularly financial risk, and the methods for managing it. It is traditionally associated with insurance and pension plans, but can be applied to a wide range of other areas where there is need for assessment of risk. An Actuarial Science degree provides students with the background for a career in Actuarial Science. Course offerings provide the knowledge and techniques needed by students to prepare to write most of the Society of Actuaries preliminary examinations.

Students will learn the relevant mathematical and statistical techniques, with specific applications to Actuarial Science, and acquire a basic understanding of Economics and Business.

The Dalhousie Actuarial Science program is offered through the Department of Mathematics and Statistics.

Degree Programs

The Department of *Mathematics and Statistics* offers the following degree programs in *Actuarial Science*

- BSc (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- Minor in A*ctuarial Science*
- A post-baccalaureate diploma

* May be combined with Minor programs from other disciplines

Departmental Requirements for these programs are described below. In addition to departmental requirements, students must satisfy the requirements outlined in the **Academic Regulations** and the **College of Arts and Science Degree Requirements** sections of this calendar.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with the Actuarial Science undergraduate academic advisor.

Staff

Please refer to the Department of Mathematics and Statistics Staffpage for a full listing of the members of the Department.

BSc (120 credit hour) Concentrated Honours in Actuarial Science

Students who obtain an Honours degree will have covered the subject material required for sitting most of the Society of Actuaries examinations. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Actuarial Science with a grade of C or better and a minimum GPA of 3.0. Honours students are required to write a research-based Honours thesis. The research thesis and the Honours Qualifying Examination requirement are satisfied through completion of *STAT 4950.03/ACSC 4950.03*.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Actuarial science should consult with the Actuarial Science Honours Advisor early in their studies.

Departmental requirements

In addition to fulfilling the requirements outlined in the *Academic Regulations*and College of Arts and Science Degree Requirements sections of this calendar, students in a BSc **Concentrated Honours program in Actuarial science** must complete the following courses:

1000 level

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II or MATH 1500X/Y: Calculus
- MATH 1030.03 : Matrix Theory and Linear Algebra I
- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics

2000 level

- CSCI 2202.03: Computer modelling for scientists
- MATH 2001.03: Intermediate Calculus I
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 2600.03: Theory of Interest/MATH 2600.03: Theory of Interest

3000 level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I

4000 level

- ACSC 4950.03/STAT 4950.03: Honours Research Project

Choices

- Two of the following courses:

- ACSC 3740.03: Predictive Analytics
- ACSC 4703.03/STAT 4703.03: Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II

- One of the following courses:

  - STAT 3450.03: Statistical learning with R
  - STAT 4350.03: Applied Multivariate Analysis
  - STAT 4390.03: Time Series Analysis
  - STAT 4620.03: Data Analysis

Electives

- In addition to the above courses, you must take at least 2 additonal elective courses. The elective courses can be chosen from any of the courses listed above, or from the following courses, or any courses that are specified as Actuarial Science electives in any future version of the University Calendar prior to the time of your graduation.

  2000 level

  MATH 2052.03: Introduction to Numerical Programming
  MATH 2120.03: Methods of Ordinary DIfferential Equations
  MATH 2300.03: Mathematical Modelling
  MATH 2505.03: Introductory Analysis
  STAT 2430.03: Data Visualization

  3000 Level

  MATH 3120.03: Differnetial Equations

MATH 3210.03: Introduction to Numerical Analysis
MATH 3260.03: Applied Differential Equations
MATH 3300.03: Optimization
MATH 3400.03: Classical Game Theory
MATH 3501.03: Intermediate Analysis I
MATH 3502.03: Intermediate Analysis II
MATH 3900.03: Financial Mathematics

4000 Level

MATH 4010.03: Introduction to Measure Theory and Integration
MATH 4140.03: Introduction to Functional Analysis
MATH 4540.03: Applied Analysis
STAT 4100.03: Survival Analysis
STAT 4130.03: Bayesian Data Analysis
STAT 4370.03: Stochastic Processes
STAT 4390.03: Time Series Analysis
STAT 4620.03: Data Analysis
STAT 4690.03: Computational Statistics

BSc or BA (120 credit hour) Combined Honours in Actuarial Science and another subject

Students who wish to study *Actuarial Science* in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. *Actuarial Science* may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For *Actuarial Science*, this requirement is satisfied through ACSC 4950.03/STAT 4950.03.

Departmental requirements

Students in a BSc **Combined Honours program in Actuarial Science** and another subject must fulfill the requirements outlined in the *Academic Regulations*and *College of Arts and Science Degree Requirements* sections of this calendar.

The required actuarial science and statistics courses at or above the 2000 level with a grade of C or better in each are the following:

2000 Level

- CSCI 2202.03: Computer modelling for scientists
- MATH 2001.03: Intermediate Calculus
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 2600/MATH 2600.03: Theory of Interest

3000 Level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory

- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I

Choices

You must also complete two of the following courses:

- ACSC 3740.03: Predictive Analytics
- ACSC 4703.03/STAT 4703.03; Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II

Electives

The requirements for combined honours degrees include:

Minimum of 66, maximum of 84 credit hours beyond the 1000 level in two subjects, not more than 54 credit hours nor fewer thatn 30 credit hours being in either, including at least 18 credit hours above the 2000 level in each subject. Grades in honours subject courses must be C or better.

If there is no overlap in required courses between Actuarial Science and your other honours subject, then the above requirements will satisfy this condition. If the other honours subject has some overlap in required courses, you may need to take some additional elective courses. For this purpose , the following courses can count as Actuarial Science Electives.

2000 Level

- MATH 2052.03: Introduction to Numerical Programming
- MATH 2120.03: Methods for Ordinary Differential Equations
- MATH 2300.03: Mathematical Modelling
- MATH 2505.03: Introductory Analysis
- STAT 2430.03: Data Visualization

3000 Level

- MATH 3120.03: Differential Equations
- MATH 3210.03: Introduction to Numerical Analysis
- MATH 3260.03: Applied Differential Equations
- MATH 3300.03: Optimization
- MATH 3400.03: Classical Game Theory
- MATH 3501.03: Intermediate Analysis I
- MATH 3502.03: Intermediate Analysis II
- MATH 3900.03: Financial Mathematics
- STAT 3450.03: Statistical learning with R

4000 Level

- MATH 4010.03: Introduction to Measure Theory and Integration
- MATH 4140.03: Introduction to Functional Analysis
- MATH 4540.03: Applied Analysis
- STAT 4100.03: Survival Analysis
- STAT 4130.03: Bayesian Data Analysis
- STAT 4350.03: Applied Multivariate Analysis
- STAT 4370.03: Stochastic Processes
- STAT 4390.03: Time Series Analysis
- STAT 4620.03: Data Analysis
- STAT 4690.03: Computational Statistics

BSc (120 credit hour) Major in Actuarial Science

The 120 credit hour major is suited to students who want to focus on *Actuarial Science* and prepare for sitting the Society of Actuaries examinations, but wish to have a program that is somewhat less constrained than the Honours program.

Departmental requirements

In addition to fulfilling the requirements outlined in the *Academic Regulations*and College of Arts and Science Degree Requirements sections of the calendar, students in a BSc **Major program in Actuarial science** must complete the following courses:

1000 level

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II or MATH 1500X/Y: Calculus
- MATH 1030.03: Matrix Theory and Linear Algebra
- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics

2000 level

- CSCI 2202.03: Computer modelling for scientists
- MATH 2001.03: Intermediate Calculus I
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 2600.03 Theory of Interest/MATH 2600.03: Theory of Interest

3000 level

- STAT 3340.03: Regression Analysis
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I

Choices

Two of the following courses:

- ACSC 3740.03: Predictive Analysis
- ACSC 4703.03/STAT 4703.03: Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II

One of the following course:

- STAT 3450.03: Statistical learning with R
- STAT 4350.03: Applied Multivariate Analysis
- STAT 4390.03: Time Series Analysis
- STAT 4620.03: Date Analysis

BSc or BA (120 credit hour) Double Major in Actuarial Science and another subject

The Double Major degree program allows students to combine a study of *Actuarial Science* with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. *Actuarial Science* may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

Departmental requirements

Students in a BSc or BA **Double Major in Actuarial Science** and another subject must fulfill the requirements outlined in the *Academic Regulations* and *College of Arts and Science Degree Requirements* sections of this calendar.

The required actuarial science and statistics courses at or above the 2000 level are the following:

2000 Level

- CSCI 2202.03: Computer modelling for scientists
- MATH 2001.03: Intermediate Calculus I
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 2600.03: Theory of Interest/MATH 2600.03: Theory of Interest

3000 Level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I

Choices

Two of the following courses:

- ACSC 3740.03: Predictive Analytics
    - ACSC 4703.03/STAT 4703.03: Actuarial Models II
    - ACSC 4720.03/STAT 4720.03: Life Contingencies II

One of the following courses:

- STAT 3450.03: Statistical learning with R
- STAT 4350.03: Applied Multivariate Analysis
- STAT 4390.03: Time Series Analysis
- STAT 4620.03: Data Analysis

Electives

In addition to the above courses, you must take ACSC courses satisfying the following requirements:

- 60-84 credit hours at or above the 2000 level between the two majors subjects, with 30-48 in each subject.

If there is overlap between your other subject, you may need to take additional elective courses in Actuarial Science. The elective courses can be chosen from any of the courses listed above, or from the following courses, or any courses that are specified as Actuarial Science electives in any future version of the University Calendar prior to the time of your graduation.

2000 Level

- MATH 2052.03: Introduction to Numerical Programming
- MATH 2120.03: Methods for Ordinary Differential Equations
- MATH 2300.03: Mathematical Modelling
- MATH 2505.03: Introductory Analysis
- STAT 2430.03: Data Visualization

3000 Level

- MATH 3120..03: Differential Equations
- MATH 3210.03: Introduction to Numerical Analysis
- MATH 3260.03: Applied Differential Equations
- MATH 3300.03: Optimization
- MATH 3400.03: Classical Game Theory
- MATH 3501.03: Intermediate Analysis I
- MATH 3502.03: Intermediate Analysis II
- MATH 3900.03: Financial Mathematics

4000 Level

- MATH 4010.03: Introduction to Measure Theory and Integration
- MATH 4140.03: Introduction to Functional Analysis
- MATH 4540.03: Applied Analysis
- STAT 4100.03: Survival Analysis
- STAT 4130.03: Bayesian Data Analysis
- STAT 4370.03: Stochastic Processes
- STAT 4390.03: Time Series Analysis
- STAT 4620.03: Data Analysis
- STAT 4690.03: Computational Statistics

Minor in Actuarial Science

(for students in 120 credit hour programs other than Actuarial science)

Students in other 120 credit hour degree programs may choose to include a Minor in *Actuarial science* in their program. Students taking a Minor in *Actuarial science* may also consider to take the Certificate in Actuarial and Financial Mathematics.

Departmental Requirements

A minimum of 18 credit hours in *Actuarial Science* courses at the 2000 level or higher. It is possible to count Mathematics or Statistics courses towards these requirements, so long as they are not counted towards a candidate's Major or Honours subject.

A minor degree in Actuarial Science must include the following courses:

- STAT 2600.03/MATH 2600.03: Theory of Interest
- STAT 3360.03/MATH 3360.03: Probability

Plus at least two of

- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I
- ACSC 4703.03/STAT 4703.03: Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II

The remaining credit hours can be chosen from any ACSC, STAT or MATH courses at or above the 2000 level.

Diploma in Actuarial Science

(30 credit hours)

Students with a general 90 credit hour BSc degree in Mathematics, Statistics, Economics, or another quantitative discipline, may apply for admission into a Diploma in Actuarial Science program, provided they have completed the appropriate Mathematics and Statistics courses. A strong background in Mathematics and Statistics is necessary, and courses taken should cover multidimensional calculus (equivalent to MATH 2001: Intermediate Calculus I), matrix theory (equivalent to MATH 2030: Matrix Theory and Linear Algebra I), basic probability theory (equivalent to STAT 2060: Introduction to Probability and Statistics) and introductory R programming (equivalent to STAT 2450: Introduction to Data mining with R).

Departmental requirements

- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2600.03/MATH 2600.03: Theory of Interest
- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I
- Two of the following courses:

  - ACSC 3740.03/STAT 3740.03: Predictive Analytics
  - ACSC 4703.03/STAT 4703.03: Actuarial Models II
  - ACSC 4720.03/STAT 4720.03: Life Contingencies II

- One of the following courses:

  - STAT 3450.03: Statistical learning with R
  - STAT 4350.03: Applied Multivariate Analysis
  - STAT 4390.03: Times Series Analysis
  - STAT 4620.03: Date Analysis

In cases that students have already taken some of the above courses prior to entering the program, in consultation with the Actuarial Science undergraduate academic advisor, students can choose other same level ACSC, STAT or MATH courses as substitute courses to fulfil the total credit hour requirement.

After completion of the diploma program, students will be prepared to write most of the Society of Actuarial examinations.

Minors and Certificates for Actuarial Science Students

Minors available to students in Actuarial Science

Minor programs allow students to develop subject specialities in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs. Students in a BSc or BA (120 credit hour) program in ***Actuarial Science*** may choose to include a Minor selected from the list of approved *Minors* in this Calendar. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program. Minor subjects in Economics or Commerce are highly recommended subjects for Actuarial Science major students.

Certificates

In combination with a BSc or BA in Actuarial Science, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the **Certificate Coordinator** to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found in *the Faculty of Science* section of this calendar. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to student enrolled in a BSc or BA in Actuarial science include:

- Certificate in Applied and Computational Mathematics

- Certificate in Data Science

Courses

Courses

Course Descriptions

ACSC 3703 Actuarial Models I
CREDIT HOURS: 3
This class builds on the material in STAT 3360 to develop the theoretical basis for construction and evaluation of actuarial models. Topics covered include survival models, probability distributiolns, deductibles and limits, and aggregate loss models, with application to insurance.
PREREQUISITES: STAT 3360.03 OR MATH 3360.03 or permission of instructor
CROSSLISTED: STAT 3703.03
EXCLUSIONS: STAT 4701.03

ACSC 3720 Life Contingencies I
CREDIT HOURS: 3
This course introduces the student to the mathematical models for valuation of life contingencies (e.g. life insurance policies). The course covers both the statistical aspects of modelling survival data, and the financial aspects of valuing uncertain future cash-flows.
PREREQUISITES: STAT 3360.03/MATH 3360.03 and STAT 2600.03/MATH 2600.03
CROSSLISTED: STAT 3720.03

ACSC 3740 Predictive Analytics
CREDIT HOURS: 3
This course teaches students to analyze data in a real-world context, going through all stages of the data analysis: problem formulation; initial data exploration; model selection and validation; and communication of results. It is intended that this course should prepare students for the Society of Actuaries Predictive Analytics examination.
COREQUISITES: Stat/Math 3340
PREREQUISITES: STAT 2450
CROSSLISTED: STAT 3740
FORMATS: Lecture

ACSC 3750 Credibility Theory
CREDIT HOURS: 3
Credibility theory deals with the difficulty in combining information from two samples, one of which is small ver relevant, the other is large but less relevant. In this course, we will study different approaches to dealing with this problem.
COREQUISITES: STAT 3703.03/ACSC 3703.03
PREREQUISITES: STAT 3360.03 or MATH 3360.03
CROSSLISTED: STAT 3750.03

ACSC 4703 Actuarial Models II
CREDIT HOURS: 3
This course focuses on the development of statistical methods for the estimation and validation of actuarial models. Topics to be discussed include: methods of estimation, properties of estimators, goodness of fit, credibility theory, survival estimators, measures of risk, estimation of severity.
PREREQUISITES: STAT 3703.03 or ACSC 3703.03
CROSSLISTED: STAT 4703.03

ACSC 4720 Life Contingencies II

CREDIT HOURS: 3
STAT 3720.03 covers the basics of life contingencies in a simple standard situation. In this course we extend this to deal with a number of common additional features that affect life insurance policies. We introduce multiple-state models, pensions, and profit testing.
PREREQUISITES: STAT 3720.03 or ACSC 3720.03
CROSSLISTED: STAT 4720.03
FORMATS: Lecture

ACSC 4950 Honours Research Project
CREDIT HOURS: 3
A requirement for the actuarial science honours degree, this course consists of a research project under the supervision of a faculty member in the department. The project will be submitted as a written report. Students wishing to enroll in this class must obtain permission from the Actuarial Science honours advisor.

Biochemistry and Molecular Biology

Biochemistry and Molecular Biology

Location:
Sir Charles Tupper Medical Building
5850 College Street
9th Floor
PO BOX 15000
Halifax NS

Phone Number: (902) 494-6436
Fax Number: (902) 494-1355
Email Address: bioc@dal.ca
Website: biochem.dal.ca

Introduction

Biochemistry is the study of biological function at the molecular level. Although biochemical processes follow the basic laws of physics and chemistry, living organisms, because of their complexity, operate on a set of distinct principles that are not found in simple isolated chemical systems. The goal of biochemistry is to elucidate these principles. The department offers an integrated series of courses that will provide students with an up-to-date view of modern biochemistry and molecular biology ranging from evolution of genomes to structure-function relationships in macromolecules to the dynamic aspects of metabolism. The core programs can be adapted to emphasize different biochemical specialties such as structural biology, metabolism, molecular biology and cell signaling. Students wishing to pursue advanced studies in related sciences can include courses in Physiology, Pharmacology and/or Pathology in their programs. Greater flexibility is available in combined degree programs of Biochemistry and Molecular Biology with another subject; most often with Chemistry, Microbiology, Biology, Neuroscience, Psychology or Environment, Sustainability and Society. Specific programs developed with the Department of Microbiology and Immunology provide coordinated studies of metabolism, enzymology and molecular biology with bacteriology, virology and immunology. These programs provide the foundation for molecular genetics, genetic engineering, biotechnology, biomedical research and medicine.

Laboratory Exercises: Some of the courses offered by the Department of Biochemistry and Molecular Biology include a laboratory component. The laboratory exercises provide an opportunity to develop laboratory skills, as well as to illustrate the theoretical principles taught in course. This process culminates in fourth year, with a supervised research project required for Honours Biochemistry and Molecular Biology students. Although no exercise involves live animals, experiments may use materials derived from animal sources, as well as from plants and micro-organisms. Laboratory experiments will often be performed in groups, but writing of reports is expected to be an individual effort, meeting the guidelines on plagiarism set out in the University Regulations in the Calendar and the Department Policy on Plagiarism.

Degree Programs

The Department offers the following degree programs in Biochemistry and Molecular Biology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- BSc (90 credit hour) Minor in Biochemistry and Molecular Biology
- Minor in Biochemistry and Molecular Biology

* BSc Co-op option available (see below)
* May be combined with Minors from other disciplines

Departmental Requirements for each degree program can be seen by following the links in the menu to the right and in the Undergraduate Handbook, available on the departmental website https://medicine.dal.ca/departments/department-sites/biochemistry-molecular-biology/programs/undergraduate.html. In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully. It is recommended that students considering an Honours or Major program consult with a Biochemistry and Molecular Biology Academic Advisor prior to registering for second year classes.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Biochemistry and Molecular Biology program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1540.27
- SCIE 1505.18

Staff

Dean
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Head of Department
Karten, B.

Program Advisors
Rainey, J, Undergraduate Coordinator
Bigelow, B.
Davey, J. A.
Ewart, K.V.
Langelaan, D.
Ro, H-S., Co-op Academic Advisor
Slamovits, C.
Xiong, S.

Graduate inquiries: roisin.mcdevitt@dal.ca
Kramer, J., Graduate Coordinator

Professors Emeriti
Doolittle, W. F., AB (Harv), PhD (Stan)
Gray, M. W., BSc, PhD (Alta)

Professors

Archibald, J. M., BSc, PhD (Dalhousie), cross appointment in Microbiology & Immunology
Bearne, S. L., BSc (Acadia), PhD (Toronto), MD CM (McGill), cross appointment in Chemistry
Dellaire, G., BSc (UBC), PhD (McGill), major appointment in Pathology
Doolittle, W. F., AB (Harv), PhD (Stan), Post-Retirement
Duncan, R., BSc (Guelph), MSc (Queen's), PhD (Guelph), major appointment in Microbiology & Immunology
Fairn, G. D., BSc (Dalhousie), PhD (Dalhousie), major appointment in Pathology
Gray, M. W., BSc, PhD (Alta), Post-Retirement
Karten, B., MSc (Hamburg), PhD (Karl-Franzens, Austria)
Kienesberger, P. C., MSc, PhD (Graz, Austria)
Kramer, J. M., BSc (Guelph), PhD (Memorial)
Liu, P. X. -Q., BSc (Wuhan), PhD (Cornell), Post-Retirement
Marignani, P. A., BSc (Windsor), MSc (Western), PhD (McMaster), EMBA (Western), cross appointment in Pathology
McMaster, C. R., BSc, PhD (Man), major appointment in Pharmacology
Pulinilkunnil, T., MSc (India), PhD (UBC), cross appointment in Physiology & Biophysics
Rainey, J. K., BSc (Guelph), MSc, PhD (Toronto), cross appointments in Chemistry and School of Biomedical Engineering
Ridgway, N. D., BSc, MSc (Dalhousie), PhD (UBC), joint appointment with Pediatrics
Ro, H-S., BSc, PhD (McMaster)
Roger, A. J., BSc (UBC), PhD (Dalhousie)
Rosen, K. V., BSc, MSc, PhD (Moscow), joint appointment with Pediatrics
Slamovits, C. H., BSc, PhD (Buenos Aires, Argentina)
Waisman, D. M., BSc (Brandon), PhD (Manitoba), joint appointment in Pathology

Associate Professor
Frampton, J. P., PhD (Albany, New York), major appointment in School of Biomedical Engineering
Langelaan, D. N., BSc (Acadia), PhD (Dalhousie)

Assistant Professors
Davey, J. A., BSc, MSc (Carleton), PhD (Ottawa)
Poursharifi, P., BSc, MSc (Iran), PhD (Laval)
Van der Spoel, A. C., MSc (Erasmus, The Netherlands), PhD (Utrecht, The Netherlands), major appointment in Pediatrics

University Teaching Fellow
Ewart, K. V., BSc (Moncton), PhD (Memorial), cross appointment in Biology

Instructor
Xiong, S., BSc (Manitoba), PhD (Toronto)

Adjunct Professor
Hesketh, G. G., BSc (Queen's), PhD (Johns Hopkins)

BSc (120 credit hour) Concentrated Honours in Biochemistry and Molecular Biology

Students who want a challenging program that results in a broad and in-depth background in Biochemistry and Molecular Biology, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Biochemistry and Molecular Biology subject courses, with a minimum GPA of 3.0, and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of BIOC 4604.03/BIOC 4605.03. Because Biochemistry and Chemistry are closely interwoven both conceptually and experimentally, the list of required courses includes both subjects. Additional chemistry courses beyond those required for the honours degree may be taken as electives.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Biochemistry and Molecular Biology. See Co-operative Education Program.

Admission to Honours
Students who wish to enrol in a Biochemistry and Molecular Biology Honours program should apply for admission after their second year Fall term grades are in. To be admitted, students must have

- Consulted with a Departmental Academic advisor

Departmental Requirements

In addition to fulfilling the requirements outlined in Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Concentrated Honours program in Biochemistry and Molecular Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- CHEM 1011.03 Concepts in Chemistry/CHEM 1012.03: Concepts in Chemistry: Structure and Reactivity
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or MATH 1030: Matrix Theory/Linear Algebra I or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program

2000 level

- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- CHEM 2201.03: Introductory Analytical Chemistry

3000 level

- BIOC 3300.03: Intermediary Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- CHEM 3601.03: Chemistry of Living Systems or one course in Biochemistry at or above the 3000 level
- BIOC 3700.03: Biomolecular Chemistry

4000 level

- BIOC 4604.03: Research Project I and BIOC 4605.03: Research Project II (Honours Thesis)
- Nine credit hours from BIOC 40XX, 43XX, 44XX, 45XX, 47XX
- Six additional credit hours of BIOC at the 4000 level

Other requirements:

A pass is required in the Honours Qualifying examination. Students should ensure that they enrol in any 2000 or 3000 level courses that are prerequisites for advanced courses they intend to take (see calendar entries).

BSc (120 credit hour) Combined Honours in Biochemistry and Molecular Biology and another subject

Students who wish to study Biochemistry and Molecular Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Biochemistry and Molecular Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Biochemistry and Molecular Biology, this requirement is satisfied through BIOC 4604.03/BIOC 4605.03: Research Project.

A Co-op option is available for students enrolled in BSc Combined Honours with Biochemistry and Molecular Biology as the primary subject. See Co-operative Education Program below.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Combined Honours program in Biochemistry and Molecular Biology and another subject must complete the following:

Biochemistry and Molecular Biology as the primary or secondary subject

1000 level

- 1000 level as for Concentrated Honours, except MATH 1000: Differential and Integral Calculus I and MATH 1010: Differential and Integral Calculus II required if Chemistry is the other subject

2000 level

- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- BIOC 3300.03: Intermediary Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- BIOC 3700.03: Biomolecular Chemistry
- Three additional credit hours of BIOC at or above the 3000 level if Biochemistry & Molecular Biology is the second subject

4000 level

- Six credit hours from BIOC 40XX, 43XX, 44XX, 45XX, 47XX
- BIOC 4604.03: Research Project I and BIOC 4605.03: Research Project II (if Honours thesis and qualifying exam are in Biochemistry)

Consult an Undergraduate advisor for recommended courses of study.

BSc (120 credit hour) Major in Biochemistry and Molecular Biology

The 120 credit hour Major is suited to students who want to focus on Biochemistry and Molecular Biology, but wish to have a program that is somewhat less constrained than the Honours program. Biochemistry and Molecular Biology Majors complete a minimum of 45 credit hours in program courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories, and through direct research and experiential classes. Although Dalhousie University does not require formal application for its 120 credit hour Major programs, this Department requires that all those registering with a view to completing such a degree must first consult with an undergraduate advisor from the Department of Biochemistry and Molecular Biology.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Biochemistry and Molecular Biology. See Co-operative Education Program.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Major program in Biochemistry and Molecular Biology must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or MATH 1030: Matrix Theory/Linear Algebra I or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program

2000 level

- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- CHEM 2201.03: Introductory Analytical Chemistry

3000 level

- BIOC 3300.03: Intermediary Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- BIOC 3700.03: Biomolecular Chemistry
- Nine additional credit hours in BIOC at or above the 3000 level

4000 level

- Six credit hours in BIOC at the 4000 level

BSc (120 credit hour) Double Major in Biochemistry and Molecular Biology and another subject

The Double Major degree program allows students to combine a study of Biochemistry and Molecular Biology with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Biochemistry and Molecular Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program seek advice from advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Biochemistry and Molecular Biology as the primary subject. See Co-operative Education Program.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Double Major program in Biochemistry and Molecular Biology and another subject must complete the following set of core courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or MATH 1030: Matrix Theory/Linear Algebra I or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program

2000 level

- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- BIOC 3300.03: Intermediary Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- BIOC 3700.03: Biomolecular Chemistry
- Three additional credit hours of BIOC at or above the 3000 level

4000 level

- Six credit hours of BIOC at the 4000 level

The same set of core courses is required in a Double Major with Biochemistry and Molecular Biology as the primary or secondary subject.

BSc (90 credit hour) Minor in Biochemistry and Molecular Biology

The 90 credit hour degree with Minor in Biochemistry and Molecular Biology is appropriate for students who want to study some Biochemistry and Molecular Biology but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Biochemistry and Molecular Biology. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

See the **Minor in Biochemistry and Molecular Biology**section of this Calendar.

Minor in Biochemistry and Molecular Biology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

- A minimum of 18 credit hours in Biochemistry (BIOC) courses at the 2000 level or higher to a maximum of 36 credit hours.

Please note that there are prerequisite requirements for entry into upper level Biochemistry (BIOC) courses. Some non-BIOC courses such as BIOL 2020.03: Cell Biology, BIOL 2030.03: Genetics and Molecular Biology, CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups are required for the Biochemistry and Molecular Biology degree programs. These non-BIOC courses cannot be counted as part of the 18 credits hours in BIOC required for a minor.

Contact Biochemistry and Molecular Biology for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Biochemistry and Molecular Biology

Co-op Academic Advisor: Dr. H-S. Ro, Email: Hyo-Sung.Ro@dal.ca

The Science Co-op degree option enables students to apply their academic knowledge directly while providing them with work experience that assists in making educated career choices. Science Co-op is available to students in BSc (120 credit hour) Honours or

Major programs in Biochemistry and Molecular Biology, or in Combined Honours or Double Major programs with Biochemistry and Molecular Biology as the primary subject. Further information details on Science Co-op can be found in the academic calendar under Work-Integrated Learning & Co-operative Education and the Co-op office's website at dal.ca/wil.

Minors available to students in Biochemistry and Molecular Biology

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour programs (including Co-op).

Students in a BSc (120 credit hour) program in Biochemistry and Molecular Biology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Biochemistry and Molecular Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at Faculty of Science - Certificates. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a Major or Honours program in Biochemistry and Molecular Biology include:

- Certificate in Data Analytics
- Certificate in Genetics
- Certificate in Medicinal Chemistry

Courses

Courses

Course Notes

The Department also teaches students in Dentistry, Medicine and Nursing; these courses are described in the appropriate sections of the Calendar.

Biochemistry and Molecular Biology-Approved Courses

The following courses offered by other departments are approved as Biochemistry and Molecular Biology courses toward BSc Biochemistry and Molecular Biology degrees.

Chemistry - CHEM 3601.03, CHEM 4601.03

Microbiology - MICI 4033.03

Pathology - PATH 4035.03

Pharmacology - PHAC 4403.03

Note: CHEM 3601.03 is considered to be BIOC 3000-level courses, and CHEM 4601.03, MICI 4033.03, PATH 4035.03 and PHAC 4403.03 to be BIOC 4000-level courses when taken as part of Biochemistry and Molecular Biology Major and Honours degree programs. These courses, in addition to required non-BIOC 2000-level courses (BIOL 2020, BIOL 2030, CHEM 2401, CHEM 2402), cannot be counted towards the 18 credit hours in BIOC required for a Minor in Biochemistry and Molecular Biology.

Course Descriptions

BIOC 1420 Introductory Biochemistry for Nursing Students

CREDIT HOURS: 3
Topics discussed include the structure, biosynthesis and functions of biologically important compounds, enzymes, control of metabolism, genetic engineering and nutrition. Medical aspects are stressed.
CALENDAR NOTES: This course cannot be used as a prerequisite for any other biochemistry course and is not normally accepted by Faculties of Dentistry or Medicine in fulfilment of the requirement of a biochemistry course for admission.
RESTRICTIONS: This class is restricted to students in the BScN and BHSc programs.
FORMATS: Lecture

BIOC 2300 Introduction to Biochemistry

CREDIT HOURS: 3
This course surveys basic topics and concepts of Biochemistry. The structures, properties and metabolic inter-relations of proteins, carbohydrates and lipids are considered together with an introduction to nutrition and metabolic control. Although mammalian examples predominate some consideration of special aspects of biochemistry of microbes and plants is included.
CALENDAR NOTES: Students are advised to also take CHEM 2401.03 and CHEM 2402.03
PREREQUISITES: BIOL 1010.03 (or equivalent), CHEM 1011.03 (or equivalent) and CHEM 1012.03 (or equivalent); all with grades of C or higher, or instructor's consent.
EXCLUSIONS: BIOC 2200.03
FORMATS: Lecture

BIOC 2610 Biochemistry Laboratory Methods & Techniques

CREDIT HOURS: 3
An introduction to fundamental techniques in Biochemistry through the exploration of the properties of essential biomolecules. This course is intended for students in Biochemistry & Molecular Biology and Microbiology & Immunology Programs.
COREQUISITES: BIOC 2300.03 and CHEM 2401.03 and CHEM 2402.03 or instructor's consent
PREREQUISITES: BIOL 1010.03 and 1011.03 (or equivalent), CHEM 1011.03 and 1012.03 (or equivalent), all with grades of B- or higher; or instructor's consent. CHEM 2201.03 is recommended but not required.
EXCLUSIONS: BIOC 2200.03
FORMATS: Lab

BIOC 3300 Cellular and Integrated Metabolism

CREDIT HOURS: 3
This course covers carbohydrate, lipid and nitrogen metabolism, emphasizing metabolic regulation and integration in an interconnected network to achieve cell and organism-level homeostasis. Aspects of organelle biochemistry pathway compartmentalization, and cell signalling are considered. Tutorials develop data analysis skills and use case studies to demonstrate physiological roles of metabolic pathways. COORDINATOR: B. Karten
PREREQUISITES: BIOC 2300.03 (with grades of B- or higher) and BIOL 2020.03 and BIOL 2030.03 and CHEM 2401.03 and CHEM 2402.03, or instructor’s consent
FORMATS: Other (explain in comments)

BIOC 3400 Nucleic Acid Biochemistry and Molecular Biology

CREDIT HOURS: 3
This course focuses on the relationship of structure to function in RNA and DNA. Methods for studying the primary, secondary, and tertiary structures of nucleic acids are explored in lectures and in the laboratory. Topics covered include enzymic mechanisms for biosynthesis, rearrangement, degradation, and repair of nucleic acid molecules, and processes of replication, transcription, and translation. Nucleic acid biochemistry is emphasized as a basis for understanding storage and transfer of biological information. COORDINATOR: P. Liu
PREREQUISITES: BIOL 2020.03 and BIOL 2030.03 (both with grades of B- or higher); CHEM 2401.03 and CHEM 2402.03; BIOC 2300.03 and BIOC 2610.03; or instructor’s consent
FORMATS: Lecture | Lab

BIOC 3501 Introduction to Biotechnology

CREDIT HOURS: 3
Topics covered include (1) the history and scope of biotechnology, (2) genetic, molecular and analytical approaches central to biotechnology, (3) production of macromolecules and small molecules using cells or biological materials, (4) detection of molecules using cells or biological materials, (5) biotechnology in Atlantic Canada, and (6) responsibilities in biotechnology.
COREQUISITES: N/A

PREREQUISITES: BIOC 2300 AND BIOL 2020 AND BIOL 2030; or Instructor's permission
CROSSLISTED: N/A
EXCLUSIONS: None
FORMATS: Lecture

BIOC 3610 Research Methods in Biomedical Sciences

CREDIT HOURS: 3
An introduction to key laboratory methods in biochemistry is presented, along with relevant theory and applications. Topics include liquid handling, protein chemistry, small molecule assays, data analysis and data management. Current context and emerging methodologies are introduced by guest speakers.
CALENDAR NOTES: This course does not count as a Biochemistry & Molecular Biology credit towards any degree with a Major or Honours in Biochemistry & Molecular Biology, but it can be counted towards a Minor In Biochemistry & Molecular Biology. Priority for enrollment will be given to students registered in the B.Sc. (Medical Sciences) program
PREREQUISITES: CHEM 2401.03, CHEM 2402.03, BIOC 2300.03, BIOL 2020.03 and BIOL 2030.03, all with grades of B- or higher; or instructor's permission.
FORMATS: Lecture | Lab

BIOC 3620 Experiential Learning in Biochemistry and Molecular Biology

CREDIT HOURS: 3
This course is an outside the classroom learning experience in which the student works in a research laboratory an average of one day per week acquiring biochemistry or molecular biology knowledge and skills. COORDINATOR: H-S. Ro
CALENDAR NOTES: To register in this course, students must first find a faculty member from the Department of Biochemistry & Molecular Biology willing to supervise the work experience and sign a learning agreement with the supervisor.
PREREQUISITES: BIOC 2300.03, BIOC 2610.03, BIOL 2020.03, BIOL 2030.03, CHEM 2401.03 and CHEM 2402.03 (all with a grade of B- or higher).
EXCLUSIONS: The following may not be used towards BIOC 3620: lab work that is part of another scheduled course at a learning institution, study that would qualify for Special Topics courses, co-op work terms, and paid work. The class is only open to students registered in Biochemistry & Molecular Biology Degree programs, either Major or Honours, combined or concentrated. Students may not take BIOC 3620 concurrently with BIOC 4604 or BIOC 4605.
FORMATS: Lab

BIOC 3700 Biomolecular Chemistry

CREDIT HOURS: 3
This course covers structural and functional properties of biomolecules, including the physical bases for their characterization, thermodynamic principles of protein folding and biomolecular interactions, and the kinetics and mechanisms of enzyme catalysis.
PREREQUISITES: BIOC 2300.03, BIOC 2610.03, CHEM 2401.03 and CHEM 2402.03 (all with a grade of B- or higher), AND MATH 1000.03 or MATH 1215.03; or, instructor's consent. CHEM 2201.03 is highly recommended but not required.
EXCLUSIONS: BIOC 3200.03
FORMATS: Lecture | Lab

BIOC 4001 Special Topics in Biochemistry

CREDIT HOURS: 3
Students interested in topics not covered in formal courses may ask the department for special courses to meet their needs. An Undergraduate Advisor will assist students to ascertain if faculty expertise is available to direct reading and the preparation of papers and seminars in a particular subject area.
COORDINATOR: J. Rainey
PREREQUISITES: BIOC 3300.03, BIOC 3400.03, and BIOC 3700.03 (average of B or higher and consent of coordinator)

BIOC 4010 Bioinformatics

CREDIT HOURS: 3
This course presents the theory and practice of bioinformatics. Topics include: rate of mutation, sequence alignment, database searching, phylogenetic analysis, bioinformatic tools for analyzing genes, genomes and proteins.
PREREQUISITES: BIOC 3400.03 or instructor’s consent
CROSSLISTED: BIOC 5010.03
FORMATS: Lecture | Lab

BIOC 4027 Molecular Mechanisms of Cancer

CREDIT HOURS: 3
The multi-step nature of ‘carcinogenesis’ is the focus of this course. This course dissects the role of oncogenes, tumor suppressors, cell death and survival,

differentiation, angiogenesis, metastasis, inflammation, and anticancer immunity in cancers. Major research techniques routinely used in cancer research are discussed to fully understand the process of cancer development, progression and persistence.
PREREQUISITES: Minimum grades of B+ in a 3000 level Biochemistry class and another 3000 level Biochemistry, Microbiology or Pathology class. Permission of instructor required
CROSSLISTED: PATH 5027.03 and MICI 5027.03/4027.03
FORMATS: Lecture | Discussion

BIOC 4302 Biochemistry and cell biology of lipids and membranes

CREDIT HOURS: 3
This course discusses (1) how lipids influence membrane structure and function, (2) lipid metabolism and inborn errors that cause human diseases, (3) the intra- and extra-cellular transport of lipids and contribution to cell physiology and (4) the role of lipids in specialized physiological and cell signaling pathways.
PREREQUISITES: BIOC 3300.03
FORMATS: Lecture

BIOC 4302 Biomembranes and Organelles

CREDIT HOURS: 3
The course focuses on lipid and cell and organelle membrane properties and metabolism, emphasizing lipid physiological function, synthesis, and assembly in both cell membrane and organellar contexts. The biophysical properties of lipids and biomembranes are explored as are their interactions with enzymes and other proteins.
PREREQUISITES: BIOC 3300.03
FORMATS: Lecture

BIOC 4305 Mechanisms of Signal Transduction

CREDIT HOURS: 3
The goal of this course is to introduce key concepts of signal transduction. Topics include receptors and their ligands, signaling mechanisms regulating the activity of protein kinases, transcription factors, protein stability, cell-extracellular matrix interactions as well as cell growth and survival. Signaling mechanisms of disease, including cancer, are discussed.
PREREQUISITES: BIOC 3300.03 or instructor's consent
EXCLUSIONS: BIOC 4301.03
FORMATS: Lecture

BIOC 4306 Nutritional Biochemistry

CREDIT HOURS: 3
Appropriate nutrition is essential for health and reflects the basic biochemistry of the organism. Changes in the human diet can impact health and disease. This course considers the principles of optimal nutrition in a biochemical context and the role of nutrition in disease etiology and treatment.
PREREQUISITES: BIOC 3300.03, BIOC 3400.03, BIOC 3700.03 or instructor's permission
FORMATS: Lecture | Other (explain in comments)

BIOC 4310 Advanced Subcellular Biochemistry

CREDIT HOURS: 3
This course explores structure-function relationships and biochemical processes integral to subcellular organelles, including the endoplasmic reticulum, mitochondria, lysosomes, peroxisomes, Golgi apparatus, lipid droplet, and nucleus. The course will cover organelle architecture, composition, contact sites, metabolism, signaling pathways, and physiological roles.
PREREQUISITES: BIOC 3300.03 or instructor's consent
FORMATS: Lecture

BIOC 4403 Genes and Genomes

CREDIT HOURS: 3
This course discusses the organization of genes into genomes. It deals with (i) compartmentalization of genetic material in nuclear and organellar genomes, (ii) the structure, behaviour and origins of components of both nuclear and organellar genomes which are not genes (transposable and other repetitive elements, introns), (iii) genetic and physical methods for mapping genomes, and (iv) the significance of genetic organization and higher order chromosomal structure and function. The methodology and prospects of genomics are discussed at some length.
PREREQUISITES: BIOC 3400.03 or BIOL 3046.03 or instructor's consent
CROSSLISTED: BIOC 5403.03
FORMATS: Lecture

BIOC 4404 Gene Expression
CREDIT HOURS: 3
This course is centered around the central dogma that genetic information is passed from DNA to RNA to protein. We focus on the different mechanisms that regulate this flow of information in prokaryotic and eukaryotic cells. Specific topics include transcription, translation, chromatin, epigenetics, and non-coding RNA.
PREREQUISITES: BIOC 3400.03 or instructor’s consent
EXCLUSIONS: BIOC 5404.03
FORMATS: Lecture

BIOC 4501 Medical Biotechnology
CREDIT HOURS: 3
This course covers fundamental principles of biotechnology from a medical perspective. Topics discussed include: recombinant DNA technology, polymerase-chain reaction-based applications, DNA microarrays, DNA sequencing, immunochemical techniques and applications, production of transgenic organisms, potential applications for embryonic stem cell and nuclear transfer cloning, business and legal aspects of biotechnology.
PREREQUISITES: BIOC 3400.03 or instructor's consent
EXCLUSIONS: BIOC 5501.03
FORMATS: Lecture | Discussion

BIOC 4604 Research Project I
CREDIT HOURS: 3
This course requires original biochemical research in the laboratory of a faculty member, and requires the equivalent of at least one day per week to be spent in the laboratory. A report is submitted at the end of the term. COORDINATOR: Stephen Bearne
CALENDAR NOTES: This course is intended to be taken in conjunction with BIOC 4605.03 and no credit can be given for one course without the other. The work undertaken in BIOC 4605.03 should be a continuation of that initiated in BIOC 4604.03 and hence the report submitted for BIOC 4605.03 may include data and analysis incorporated in the BIOC 4604.03 report. In exceptional cases, the research project can be done outside the Department of Biochemistry and Molecular Biology. Prior approval must be obtained from the course coordinator.
PREREQUISITES: Permission of coordinator and a member of the Department who will serve as supervisor. At least a B average for BIOC 3300.03, BIOC 3400.03 and BIOC 3700.03.
FORMATS: Lab

BIOC 4605 Research Project II
CREDIT HOURS: 3
This course requires original biochemical research in the laboratory of a faculty member, and requires the equivalent of at least one day per week to be spent in the laboratory. A report is submitted at the end of the term. COORDINATOR: Stephen Bearne
CALENDAR NOTES: This course is intended to be taken in conjunction with BIOC 4604.03 and no credit can be given for one class without the other. The work undertaken in BIOC 4605.03 should be a continuation of that initiated in BIOC 4604.03 and hence the report submitted hence the report submitted for BIOC 4605.03 may include data and analysis incorporated in the BIOC 4604.03 report. In exceptional cases the research project can be done outside the Department of Biochemistry & Molecular Biology. Prior approval must be obtained from the course coordinator.
PREREQUISITES: BIOC 4604.03
FORMATS: Lab

BIOC 4700 Proteins: Form and Function
CREDIT HOURS: 3
Different classes of proteins are surveyed to understand the relationship between form and function. The effects of natural and synthetic modifications to proteins are examined. Key experimental methods to correlate protein structure and function are covered. Expertise is developed in modern computational tools used to study proteins.
PREREQUISITES: BIOC 3700.03 or CHEM 3601.03 or instructor's consent.
CROSSLISTED: BIOC 5700.03
FORMATS: Lecture

BIOC 4701 Enzymes
CREDIT HOURS: 3
Fundamental principles of enzyme catalysis and its regulation are examined. Topics include enzyme kinetics, enzyme inhibition and inactivation, isotope effect measurements, site-directed mutagenesis, and the active site architecture and transition state stabilization of selected enzymes. Classic and current papers in the literature are reviewed and the experimental and conceptual approaches are critically appraised.

PREREQUISITES: BIOC 3700.03; or (CHEM 3601 AND CHEM 2301 AND CHEM 2304), or instructor's consent.
CROSSLISTED: BIOC 5701.03
FORMATS: Lecture

BIOC 4702 Biophysical Characterization of Macromolecules

CREDIT HOURS: 3
This course covers methods allowing determination of sub-molecular and atomic-level structure and dynamics of biomacromolecules in physiological settings (e.g. solution-state or lipid bilayers) including: fluorescence, electronic and vibrational circular dichroism and NMR spectroscopy; light vs. X-ray vs. neutron scattering; and, single molecule methods.
PREREQUISITES: BIOC 3700.03; or (CHEM 3601 AND CHEM 2301 AND CHEM 2304), or instructor's consent. Recommended: PHYC 1190.03 and 1290.03, or 1310.03 and 1320.03
CROSSLISTED: CHEM 4602.03
EXCLUSIONS: BIOC 5702.03, CHEM 5602.03
FORMATS: Lecture

BIOC 4703 Structural Biology

CREDIT HOURS: 3
This course covers theoretical and practical aspects of determining and assessing the quality of atomic resolution biomolecular structures. The underlying theory and applications of X-ray diffraction, NMR spectroscopy, and cryo-electron microscopy are discussed in detail.
PREREQUISITES: BIOC 3700 or CHEM 3601 or instructor's consent.
CROSSLISTED: CHEM 4603.03
EXCLUSIONS: BIOC 5703.03, CHEM 5603.03
FORMATS: Lecture

BIOC 4813 Biochemistry of Clinical Disorders

CREDIT HOURS: 3
This course is an introduction to the pathophysiology of disease. It provides the clinical and biochemical background to disease groups and system disorders and the laboratory approach to their diagnosis. Topics include cardiovascular, renal, gastrointestinal and hepatobiliary disorders, addiction, and acid-base, carbohydrate, lipid and amino acid disorders; endocrine and rheumatological diseases, as well as tumor markers and toxicology, blood and immune abnormalities.
PREREQUISITES: BIOC 3300.03 or consent of instructor
EXCLUSIONS: BIOC 4811.03 and BIOC 4812.03 PATH 5013.03, BIOC 5813.03
FORMATS: Lecture | Discussion

BIOC 8891 Co-op work term 1

CREDIT HOURS: 0

BIOC 8892 Co-op work term 2

CREDIT HOURS: 0

BIOC 8893 Co-op work term 3

CREDIT HOURS: 0

BIOC 8894 Co-op work term 4

CREDIT HOURS: 0

Bioinformatics

Bioinformatics

Much of the current research in the biological sciences today requires the handling of "Big Data". Nowhere is this need more apparent than in the area of genomics, where next generation sequencing techniques are capable of producing, at a relatively low cost, hundreds of gigabytes and even terabytes of DNA sequence data. There is a need for people who have an understanding of molecular and evolutionary genomics (the structure and function of genes and genomes) and the skill set needed to analyze the data. A **Minor in Bioinformatics** provides students with an introduction to molecular genomics and to some of the informatics tools currently available.

Coordinator: Dr. Daniel Ruzzante (daniel.ruzzante@dal.ca)

Minor in Bioinformatics

This minor is available to students registered in a 120 credit hour Bachelor of Science or Bachelor of Science (Computer Science) program.

Much of the current research in the biological sciences today requires the handling of "Big Data". Nowhere is this need more apparent than in the area of genomics, where next generation sequencing techniques are capable of producing, at a relatively low cost, hundreds of gigabytes and even terabytes of DNA sequence data. There is a need for people who have an understanding of molecular and evolutionary genomics (the structure and function of genes and genomes) and the skill set needed to analyze the data. A **Minor in Bioinformatics** provides students with an introduction to molecular genomics and to some of the informatics tools currently available.

To qualify for a Minor in Bioinformatics, students must take **all Required Courses** and enough courses from the **Selectives** list to total 18 credit hours above the 2000 level that count uniquely toward the Minor (e.g. do not also count toward a Major or Honours degree). In addition all students must complete the prerequisite 1000-level courses.

Pathways to obtaining the Minor in Bioinformatics have been designed for students majoring in Computer Science, Biochemistry & Molecular Biology, Biology, Marine Biology, Statistics and Neuroscience. Students in other programs may obtain the Minor by fulfilling the general requirements below, but should be aware that most of the courses listed have prerequisites, and that they may need to complete a number of courses in addition to the required and selective courses.

Irrespective of path, students with a Bioinformatics Minor will end up having taken a common set of courses in Computer Science, Calculus, Statistics, Genetics, and Molecular Biology or Biochemistry. All students will also receive training in use of ACENET.

Minor in Bioinformatics – General requirements

Coordinator: Dr. Daniel Ruzzante (daniel.ruzzante@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor)

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 3046.03: Molecular Evolution or BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

Selectives

- CSCI 2134.03: Software Development (Highly recommended)

- STAT 2080.03/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- BIOL 2040.03: Evolution
- BIOL 3101.03/MARI 3101.03: Microbial Ecology
- BIOL 3042.03/MARI 3042.03: Molecular Ecology
- CSCI 3110.03: Design and Analysis of Algorithms I
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics
- CSCI 4181.03: Bioinformatics Algorithms
- BIOC 4010.03: Bioinformatics
- BIOC 4403.03: Genes and Genomes (Highly recommended)

PATHWAY for Biochemistry & Molecular Biology students

Coordinator: Dr. Claudio Slamovits (claudio.slamovits@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required course:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics

Selectives:

- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- CSCI 2134.03: Software Development (Highly recommended)
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics
- CSCI 4181.03: Bioinformatics Algorithms
- BIOL 3046.03: Molecular Evolution
- BIOC 4010.03: Bioinformatics *
- BIOC 4403.03: Genes and Genomes (Highly recommended) *

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree

PATHWAY for Biology or Marine Biology students

Coordinator: Dr. Daniel Ruzzante (daniel.ruzzante@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 3046.03: Molecular Evolution * or BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology *

Selectives:

- CSCI 2134.03: Software Development (Highly recommended)
- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
    - BIOL 3101/MARI 3101.03: Microbial Ecology *
    - BIOL 3042/MARI 3042.03: Molecular Ecology *
    - BIOL 3046.03: Molecular Evolution *
    - BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology *
    - CSCI 4180.03: Intro to Computational Biology and Bioinformatics
    - CSCI 4181.03: Bioinformatics Algorithms
    - BIOC 4010.03: Bioinformatics *
    - BIOC 4403.03: Genes and Genomes (Highly recommended) *

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree

PATHWAY for Computer Science students

Coordinator: Dr. Robert Beiko (beiko@cs.dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics *
    - BIOL 2030.03: Genetics and Molecular Biology
    - BIOL 2040.03: Evolution
    - BIOL 3046.03: Molecular Evolution

Selectives:

- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- CSCI 2134.03: Software Development *
- CSCI 3110.03: Design and Analysis of Algorithms I *
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics *
    - CSCI 4181.03: Bioinformatics Algorithms *
    - BIOC 4403.03: Genes and Genomes (Highly recommended)

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree

PATHWAY for Statistics or Mathematics students

Coordinator: Dr. Hong Gu (hgu@mathstat.dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology
- MATH 1000.03: Differential and Integral Calculus I or MATH 1500.06 X/Y: Calculus)

Required courses

- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 3046.03: Molecular Evolution

Selectives

- CSCI 2134.03: Software Development (Highly recommended)
- CSCI 4180.03 :Intro to Computational Biology and Bioinformatics
- CSCI 4181.03 :Bioinformatics Algorithms
- BIOC 4403.03: Genes and Genomes (Highly recommended)

PATHWAY for Neuroscience students

Coordinator: Dr. Tamara Franklin (tamara.franklin@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don't count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 3046.03: Molecular Evolution or BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

Selectives:

- CSCI 2134.03: Software Development (Highly recommended)
- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- BIOL 2040.03: Evolution
- BIOL 3101/MARI 3101.03: Microbial Ecology
    - BIOL 3042/MARI 3042.03: Molecular Ecology
    - CSCI 3110.03: Design and Analysis of Algorithms I
    - CSCI 4180.03: Intro to Computational Biology and Bioinformatics
    - CSCI 4181.03: Bioinformatics Algorithms
    - BIOC 4010.03: Bioinformatics
    - BIOC 4403.03: Genes and Genomes (Highly recommended)

Introduction

Welcome to the Department of Biology. It has been said that the 21st century will be the century of Biology. We are inclined to agree. Biologists study the entire hierarchy of living systems from molecules, cells, organelles and organs to individuals, populations, and ecosystems. Increasingly, the focus of biological inquiry has shifted from reducing living systems into their parts to investigating how these parts interact in complex systems from which novel and unique properties emerge.

The Department of Biology offers both undergraduate and graduate students a wide range of learning experiences and training in the biological sciences. The undergraduate core introduces the student to the whole biological hierarchy and provides an excellent introduction to the biodiversity of species and their habitats. There are multiple avenues for more tailored learning as well, including independent research opportunities, special topics courses, experiential learning, specialty certificates, and honours research. State of the art laboratories provide experience in current technology and experimental design. Our Seaside Program includes a large number of summer field courses covering freshwater, marine, and terrestrial ecosystems. We excel in Marine Biology as proximity to the Atlantic Ocean gives us the capacity to provide hands-on marine training. In 2014, the Department of Biology began participating in a unique Medical Sciences program that was developed collaboratively by the Faculty of Science and the Faculty of Medicine.

There has never been a more exciting time to be a Biologist, nor has the need to understand the intricacies of nature been more urgent. Our comprehensive programs prepare students for a wide range of career options, including research and education, field and laboratory positions, environmental management and conservation, medical sciences and biotechnology, bioengineering, industry, and business. Not every student will use this degree to be a biologist but each one will have the opportunity to participate in and contribute to one of the most worthwhile endeavors in humanity's near future: understanding nature and how humanity can live better without endangering the multitude of living systems around us, and in turn, ourselves.

Degree Programs

The Department of Biology offers the following degree programs in Biology

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Biology
- Minor in Biology

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Biology undergraduate academic advisor.

Prospective Biology students should be aware that to advance to second year Biology courses, they must achieve at least a C grade in the prerequisite first year Biology courses. Students with exceptional extenuating circumstances may appeal this requirement to the Biology Undergraduate Curriculum Committee. Students should go to the Biology Main Office for further details.

Staff

Dean
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chair
Côté, P. D., BSc (Ottawa), PhD (McGill)

Biology Program Advisors
For Biology program advising, please email biology.advising@dal.ca for an auto-reply with advisors' office hours.

Professors Emeriti
Hall, B. K., DSc (UNE), LLD (Calgary), PhD (UNE), FRSC, University Research Professor Emeritus
Johnston, M. O., PhD (Chicago), Campbell Chair, Professor Emeritus
Meinertzhagen, I. A., PhD, DSc (St. Andrews), FRSC, Professor Emeritus

Professors
Adamo, S., BSc (Toronto), PhD (McGill), major appointment in Psychology
Bentzen, P., MSc (UBC), PhD (McGill), Killam Professor
Bielawski, J. P., PhD (Texas A & M Univ)
Budge, S., PhD (Memorial), major appointment in Process Engineering
Burton, D. L., BSc (Dalhousie), MSc (Guelph), PhD (Alberta), major appointment in Plant, Food, and Environmental Sciences (Agr)
Croll, R., PhD (McGill), major appointment in Physiology/Biophysics (Medicine)
Crossin, G. T., BA (Maine), BSc (New Hampshire), MSc, PhD (UBC)
Cutler, C., BSc Hons (Memorial), MPM (SFU), PhD (Guelph), major appointment in Plant, Food and Environmental Sciences (Agr)
Duston, J., major appointment in Faculty of Agriculture
Fredeen, A., BSA (Saskatoon), MSc (Guelph), PhD (California), major appointment in Animal Science and Aquaculture (Agr)
Gunawardena, A., BSc (Hons) (Peradeniya), PhD (Oxford Brookes)
Hutchings, J. A., MSc, PhD (Memorial)
Iverson, S. J., PhD (Maryland)
Lada, R., BSc, MSc (Hort) (TNAU), PhD (Adelaide), major appointment in Plant, Food, and Environmental Sciences (Agr)
Lane, P. A., MSc (SUNY Binghamptom), PhD (SUNY Albany)
La Roche, J., BSc (McGill), PhD (Dalhousie)
Leonard, M. L., PhD (Ottawa)
Lotze, H. K., BSc (Gottingen), MSc, PhD (Kiel)
Lynch, D. H., BSc, MSc (Agr) (McGill), PhD (Guelph), major appointment in Plant, Food and Environmental Sciences (Agr)
MacLaren, L., major appointment in Faculty of Agriculture
MacNeil, M. A., BSc (Hons) (Dalhousie) MSc (Georgia), PhD (Newcastle)
Metaxas, A., BSc (McGill), MSc (UBC), PhD (Dalhousie), major appointment in Oceanography
Miar, Y., major appointment in Faculty of Agriculture
Nams, V. O., BSc (Toronto), MSc (Alberta), PhD (Victoria), major appointment in Environmental Sciences (Agr)
Percival, D. C., BSc (Agr), MSc, PhD (Guelph), major appointment in Environmental Sciences (Agr)
Prithiviraj, B., BSc (Agr) (Annamalai), MSc, PhD (BHU)
Rathgeber, B., major appointment in Faculty of Agriculture
Rupasinghe, H. P. V., BSc (Peredenyia), MSc (Iowa), PhD (Guelph), major appointment in Plant, Food and Environmental Sciences (Agr)
Ruzzante, D. E., PhD (Dalhousie), Killam Professor
Simpson, A. G. B., BSc, PhD (Sydney Australia)
Stewart-Clark, S., major appointment in Faculty of Agriculture
Stone, S. L., PhD (York)
Tittensor, D. P., BSc (Aberdeen), MSc (Memorial), PhD (Dalhousie)
Walde, S. J., PhD (Calgary)
Wang-Pruski, G., BSc (China), PhD (Alberta), major appointment in Plant and Animal Science (Agr)
Whitehead, H., MA, PhD (Cambridge)
Worm, B., PhD (Kiel)

Associate Professors
Bertrand, E., BSc (Bates College), PhD (MIT/WHOI)
Filgueira, R., major appointment in Marine Affairs
Gujar, S., DVM (Marathwarda), PhD (Memorial), MHA (Dalhousie), major appointment in Pathology and Microbiology & Immunology (Medicine)
Lennox, R., PhD (Carleton)

Myles, S. A., BA (St. Thomas), MSc (Oxford), PhD (Max Planck), major appointment in Plant, Food and Environmental Sciences (Agr)

Assistant Professors

Carvajal-Quintero, J., PhD (Univ of Toulouse)
Côté, P. D., BSc (Ottawa), PhD (McGill)
El Hiani, Y., PhD (Université de Picardie Jules Verne), major appointment in Physiology and Biophysics (Medicine)
Ferrier, J., PhD (Ottawa)
Gonzales-Morales, N., BSc (Universidad Autónoma de Querétaro) PhD (Université de Nice Sophia-Anpolis)
McLean, N. L., BSc (Agri), MSc (McGill), PhD (Dalhousie), major appointment in Plant, Food and Environmental Sciences (Agr)
Schmidt, C., PhD (U Manitoba)

Summer Education and Applied Science Institute at Dalhousie in Ecology (S.E.A.S.I.D.E.)

Frail-Gauthier, J., BSc, PhD (Dalhousie)

Adjunct

Baillie, S., BSc (Acadia), MSc (Memorial), PhD (New Zealand)
Benoit, H., BSc (Calgary), MSc (Memorial), PhD (Dalhousie)
Bowen, W. D., PhD (UBC), B.I.O.
Bowlby, H., BSc (Victoria), MSc (Dalhousie), PhD (Memorial)
Bradbury, I. R., BSc, BEd, MSc (Memorial), PhD (Dalhousie)
Cameron, R., BScF (New Brunswick), MSc (Acadia)
Cerchio. S., BSc (Tufts), MSc (San Jose State), PhD (Michigan)
Cinner, J., BA (Colorado), MA (Rhode Island), PhD (James Cook)
Devillers, R., BSc (Lyon), MSc (Montreal), PhD (Morne-La-Vallee)
Franz-Odendaal, T., BSc (Hons), MSc, PhD (Cape Town)
Gero, S., BSc, MSc, PhD (Dalhousie)
Guderley, H., BA (Indiana), PhD (UBC)
Hardie, D., BSc (Guelph), MSc (Guelph), PhD (Dalhousie)
Harvey-Clark, C., BSc (Univ of Victoria), DVM (Saskatoon)
Hess, S., PhD (Cologne)
Herbinger, C. M., PhD (Dalhousie)
Horn, A., BSc (Cornell), PhD (Toronto)
Jabado, R., BA (Concordia), MSc (James Cook), PhD (United Arab Emirates)
Keith, D., BSc, MSc (Calgary), PhD, BEng (Dalhousie), DEng (Cape Breton)
Kuparinen, A., MSc, PhD (Helsinki)
LaCroix, C., BSc, MSc (McGill), PhD (Guelph)
Lee, R. W., BSc, MA (UMass Amherst), PhD (Stoney Brook)
Mallory, M., BSc (Queens), MSc, PhD (Carleton)
Moors-Murphy, H., BSc, MSc (UNB), PhD (Dalhousie)
Qaderi, M. M., MSc, PhD (Western)
Rossolimo, T., MSc (Moscow State Univ), PhD (Russian Academy of Science)
Runions, A., PhD (Calgary)
Shackell, N. L., BSc (McGill), PhD (Dalhousie)
Salomon, A., BSc (Queens), MSc (UBC), PhD (Washington)
Skinner, M. A., BSc (CBU), MSc (UNB), PhD (UNB)
Staicer, C. A., MSc (Northern Arizona), PhD (UMass Amherst)
Trudel, M., BSc (Montreal), MSc (Montreal), PhD (Montreal)
Weir, L., BSc (Concordia), MSc, PhD (Dalhousie)
Whoriskey, F. G., PhD (Laval)

University Teaching Fellows

Bishop, T., BSc, MSc (Memorial)
Cooper, M., PhD (Dalhousie), BEd (Ottawa)
Ewart, K. V., PhD (Memorial), major appointment in Biochemistry & Molecular Biology
Gass, G., PhD (Toronto)
Gibson, L., BSc (Victoria), MSc (Dalhousie)

Grantham, D., BSc (Hons), MSc (Dalhousie)
McCarville, M., BSc, MSc (Dalhousie)
Rajaselvam, R. J., BSc (Hons), MPhil (Peradeniya), MSc (Oxford), MScF (Toronto)
Schmidt, A., MSc, PhD (Dalhousie)
Van Dommelen, J., MSc (Dalhousie)

Senior Instructors

Aubé, C. I., BSc (Hons, Co-op) (Dalhousie), MSc (UNBSJ)
Frail-Gauthier, J., BSc, PhD (Dalhousie)
Ibarra, D., BEng (ITESM), MSc (Dalhousie), PhD (Dalhousie)
Thompkins, G., BSc (Hons) (StFX), PhD (U of Alberta)

Instructors

Post Doctoral Fellows

Anderlini, T.
Boerder, K. BSc (Germany), MSc (Germany), PhD (Dalhousie)
Cooke, E.
Edwards, J.

Halloran, K.
Kho, J.
Lax, G.
Parrondo Lombardia, M.
Piczak, M.
Schiller, L.
Roman Del Valle, S.

BSc or BA (120 credit hour) Concentrated Honours in Biology

Students who want a challenging program resulting in a broad background in Biology, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours.

To graduate with Honours, students must complete a minimum of 54 credit hours above the 1000 level in Biology. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the core Biology courses. Students must also have a cumulative B average (GPA of 3.0) in courses in the honours subject at the time of graduation. Students write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of BIOL 4901.03 AND BIOL 4902.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Biology. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours should consult with a Biology Honours Advisor early in their studies. To be admitted, students must:

- Have a minimum B+ average (GPA of 3.3) in the core Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the honours subject.
- Identify and gain the support of a thesis supervisor during their third year of studies (see Honours webpage for supervisor eligibility).
- With the supervisor's input, draft and submit a thesis proposal to the Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Biology Honours webpage https://www.dal.ca/faculty/science/biology/honours.html

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science IIor equivalent)
- An additional 3 credit hours in MATH or STAT (BSc)
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Recommended:

- PHYC 1310.03/PHYC 1320.03 (or PHYC 1300X/Y.06): Physics In and Around You
- MATH 1215.03: Life Sciences Calculus or MATH 1000.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level
Core Biology courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plant and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

3000/4000 level
A minimum of 30 additional credit hours in BIOL or BIOL-approved courses at or above the 2000 level, of which at least 18 credit hours must be at or above the 3000 level. The following course options must be included:

Core Biology Courses

- BIOL 3872.03: The Biologist's Toolkit

And one of the following:

- BIOL 3050.03: Developmental Biology
  OR
- BIOL 3371.03/MARI 3371.03: Laboratory in Comparative Animal Physiology
  OR
- BIOL 3078.03: Principles of Animal Physiology Part I AND BIOL 3079.03: Principles of Animal Physiology Part II

In addition, students must complete an Honours Thesis:

- BIOL 4901.03: Honours Research and Thesis I and BIOL 4902.03: Honours Research and Thesis II

Students are encouraged to consult the sections on Course Selection Guidelines and BIOL-approved Courses when selecting their 3000 and 4000 level courses.

BSc or BA (120 credit hour) Combined Honours in Biology and another subject

Students who wish to study Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science (other than Marine Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students planning to enroll in a Combined Honours

program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas.

To graduate with Honours, students must complete a minimum of 36 credit hours above the 1000 level in BIOL or BIOL-approved courses, whether Biology is the primary or the secondary subject. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the core Biology courses. Students must also have a cumulative B average (GPA of 3.0) at the time of graduation. Students write a research-based Honours thesis and complete an Honours Qualifying Examination in their primary subject area. For Biology, this requirement is satisfied through BIOL 4901.03 AND BIOL 4902.03.

A Co-op option is available for students enrolled in a BSc Combined Honours in Biology. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. To be admitted to the Biology Honours program, students must:

- Have a minimum B+ average (GPA of 3.3) in core 2nd year Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the Honours subject.
    - If Biology is to be the primary subject area, students must
        - Identify and gain the support of a thesis supervisor during their third year of studies (see Biology Honours webpage for supervisor eligibility).
        - With the supervisor's input, draft and submit a thesis proposal to the Biology Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Biology Honours webpage https://www.dal.ca/faculty/science/biology/honours.html

Course Requirements

In addition to fulfilling the requirements outlined in theAcademic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Combined Honours program in Biology and another subject must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18: Integrated Scienceor SCIE 1506.09 Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science IIor equivalent)
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Recommended:

- PHYC 1310.03/PHYC 1320.03 (or PHYC 1300X/Y.06): Physics In and Around You or equivalent
- MATH 1215.03: Life Sciences Calculus or MATH 1000.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level

Core Biology Courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

3000/4000 level

If Biology is the primary subject, students must complete 12 additional credit hours in BIOL or BIOL-approved courses at the 3000/4000 level. If Biology is the secondary subject, you must complete 18 additional credit hours in BIOL or BIOL-approved courses at the 3000/4000 level. In either case, the following course options must be included:

Core Biology Courses

- BIOL 3872.03: The Biologist's Toolkit

And one of the following:

- BIOL 3050.03: Developmental Biology
  OR
- BIOL 3371.03/MARI 3371.03: Laboratory in Comparative Animal Physiology
  OR
- BIOL 3078.03: Principles of Animal Physiology Part I AND BIOL 3079.03: Principles of Animal Physiology Part II

In addition, if Biology is the primary subject, students will also complete:

- BIOL 4901.03: Honours Research and Thesis I and BIOL 4902.03: Honours Research and Thesis II

Students are encouraged to consult the sections on Course Selection Guidelines, and BIOL-approved Courses when selecting their 3000 and 4000 level courses.

BSc or BA (120 credit hour) Major in Biology

The Major degree program is suited to students who want to focus on Biology but wish to have a program that is somewhat less constrained than the Honours program. It provides a four-year survey of Biology and is designed for students not anticipating subsequent experimental graduate-level training in Biology or related disciplines. Biology Majors complete a minimum of 42 credit hours in BIOL or BIOL-approved courses above the 1000 level. Biology Majors do not have thesis (or related) requirements. Research and other experiential learning opportunities are available through laboratories, independent research courses, special topics courses and experiential learning courses. Students should plan their programs carefully and obtain advice from an academic advisor in the Biology Department.

A Science Co-op option is available for students enrolled in a Major program in Biology. See Co-operative Education Program.

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- An additional three credit hours in MATH or STAT (BSc)
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

2000 level

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology

- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

3000/4000 level

- BIOL 3872.03: The Biologist's Toolkit
- A minimum of 21 additional credit hours, of which at least 3 credit hours must be at the 4000 level, of BIOL or BIOL-approved courses.

Students are encouraged to consult Course Selection Guidelines and BIOL-approved Courses when selecting their 3000 and 4000 level courses.

BSc or BA (120 credit hour) Double Major in Biology and another subject

The Double Major degree program allows students to combine a study of Biology with another subject. The other subject may be any discipline from the Faculty of Science (other than Marine Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Regardless of whether Biology is the primary or secondary subject, the Biology departmental requirements are the same (see below). Students must complete a minimum of 33 credit hours in BIOL or BIOL-approved courses above the 1000 level. It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Science Co-op option is available for students enrolled in BSc Double Major with Biology as the primary subject. See Co-operative Education Program.

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Double Major program in Biology and another subject must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18: or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent) (if planning to take BIOL 2060.03: Introductory Ecology)
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- An additional three credit hours of MATH or STAT (BSc)

2000 level

- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- Any TWO of
    - BIOL 2003.03: Animal Diversity
    - BIOL 2004.03: Diversity of Plants and Microorganisms
    - BIOL 2060.03: Introductory Ecology
- Three additional credit hours in BIOL or BIOL-approved courses at or above the 2000 level

3000/4000 level

- BIOL 3872.03: The Biologist's Toolkit
- A minimum of an additional 15 credit hours of BIOL or BIOL-approved courses at or above the 3000 level whether Biology is the primary or the secondary subject

Please note that a double major in Biology and Marine Biology is not offered.

Students are encouraged to consult the sections on Course Selection Guidelines and BIOL-approved Courses when selecting their 3000 and 4000 level courses.

BSc or BA (90 credit hour) Minor in Biology

The 90 credit hour degree with Minor in Biology is appropriate for students who want to study some Biology but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Biology. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Biology is usually the preferred option for students who wish to combine studies in Biology with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

Requirements

- A minimum of 18 credit hours in Biology (BIOL) and/or Marine Biology (MARI) courses at the 2000 level or higher to a maximum of 36 credit hours. A maximum of 6 credit hours may be from the list of BIOL-approved courses.

Please note that upper level Biology (BIOL) and Marine Biology (MARI) courses have prerequisite requirements.

A BSc or BA (120 credit hour) degree program with a **Minor in Biology** is also available to students in the Faculty of Science.

Minor in Biology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

This minor is not available to students majoring in Marine Biology.

Requirements

- A minimum of 18 credit hours in Biology (BIOL) and/or Marine Biology (MARI) courses at the 2000 level or higher to a maximum of 36 credit hours. A maximum of 6 credit hours may be BIOL-approved.

Please note that upper level Biology (BIOL) and Marine Biology (MARI) courses have prerequisite requirements.

A BSc or BA (90 credit hour) degree program with a Minor in Biology is also available to students in the Faculty of Science.

Contact Biology for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Biology

Co-op Academic Advisor: Mindy McCarville mindy.mccarville@dal.ca

The Science Co-op degree option enables students to apply their academic knowledge directly while providing them with work experience that assists in making educated career choices. Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Biology, or in Combined Honours or Double Major programs with Biology as the primary subject. Further

information details on Science Co-op can be found in the academic calendar under Work-Integrated Learning & Co-operative Education and the Co-op office's website at dal.ca/wil.

Minors available to students in Biology

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Biology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to student enrolled in a BSc or BA in Biology include:

- Certificate in Animal Behaviour
- Certificate in Aquaculture and the Environment
- Certificate in Environmental Impact Assessment
- Certificate in Genetics
- Certificate in Geographic Information Science
- Certificate in Science Leadership and Communication

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Biology with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Biology and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Biology and from the Faculty of Engineering in their first year of study.

Required Biology courses for a BSc/BEng or BA/BEng program in Biology

- A minimum of 18 credit hours in BIOL above the 1000 level

Note that there are prerequisite requirements for entry into upper level Biology courses.

Course Selection Guidelines

Biology is a large and diverse field, and students enroll in Biology programs with a corresponding diversity of interests and goals. While we encourage students to sample broadly across the various biological disciplines during their undergraduate years, we recognize that many students wish to emphasize one or more general areas within Biology. To help students select courses that fit their interests and goals, we have identified three general areas in Biology:
A. Ecology and Evolution,
B. Organismal Biology,
C. Cell/Molecular Biology.

Below, we list courses associated with each area, and provide recommendations for designing individual programs at the third and fourth year levels.

IMPORTANT: Students should choose 2000 level courses in their second year with care, so that they will have the necessary pre-requisites to enroll in third and fourth year courses in their interest areas.

NOTE: These are not requirements. Students may select courses from any or all areas, provided they meet requirements for their degree program.

Ecology and Evolution

Ecology and Evolution (E&E) spans a broad range of concepts and applications from ecosystem ecology through population ecology to molecular evolution. A well-rounded course of study in Ecology or Evolution or both will include some courses in basic principles applicable to all organisms and habitats/ecosystems, as well as more specific courses on the details of how these principles play out in particular situations (e.g. taxa, habitats), and how these principles are applied to real world problems. In addition, a well-trained student in E&E should have both well-developed numerical skills as well as exposure to the application of E&E in broader society. Students wishing to emphasize E&E in their degree program should select courses from the following:

Principles: BIOL 3042, BIOL 3044, BIOL 3046, BIOL 3061, BIOL 3062, BIOL 3065, BIOL 3101, BIOL 4500

Biodiversity: BIOL 3080, BIOL 3221, BIOL 3301, BIOL 3322, BIOL 3327, BIOL 3620, BIOL 3622, BIOL 3626, MARI 3090

Ecosystems: BIOL 3101, BIOL 3623, BIOL 3624, BIOL 3664, BIOL 3761, BIOL 4002, BIOL 4323, BIOL 4370, BIOL 4661, BIOL 4666, OCEA 3001, OCEA 3002, OCEA 3003, OCEA 3004

Evolution: BIOL 3102, BIOL 3326, BIOL 4500, ERTH 2205, ERTH 2420, MARI 4090

Applications: BIOL 3060, BIOL 3063, BIOL 3225, BIOL 3226, BIOL 3328, BIOL 3329, BIOL 3580, BIOL 3601, BIOL 3623, BIOL 3624, BIOL 3634, BIOL 4001, BIOL 4065, BIOL 4160, BIOL 4335, BIOL 4369, BIOL 4500, HSTC 2204, MARI 3602, MARI 3603, MARI 3604

Methods and Data Skills: BIOL 3633, BIOL 3664, BIOL 3680, BIOL 4061, BIOL 4062, BIOL 4323, MARI 4600

Organismal Biology

Organismal biology includes areas such as development, physiology and anatomy, as well the study of particular taxonomic groups. Students interested in organismal biology are encouraged to select courses from the following:

Developmental Biology: BIOL 3050

Physiology/Anatomy: BIOL 3078, BIOL 3079, BIOL 3326, BIOL 3336, BIOL 3421, BIOL 3430, PHYL 3120

Microbes: BIOL 2004, BIOL 3101, BIOL 3102

Algae/plants: BIOL 3221, BIOL 3225, BIOL 3226

Animals: BIOL 3080, BIOL 3301, BIOL 3322, BIOL 3326, BIOL 3327, BIOL 3336, BIOL 3622, BIOL 3626, BIOL 4080, ERTH 2420, MARI 3090, MARI 3627, MARI 4090

Organisms in the environment: BIOL 3062, BIOL 3101, BIOL 3620, BIOL 3623, BIOL 3630, BIOL 3664, BIOL 4323, BIOL 4369, BIOL 4370

General: BIOL 3024, BIOL 3503, BIOL 3580, BIOL 4061, BIOL 4062, BIOL 4664

Cell/Molecular Biology

Cell/molecular biology includes areas such as cell biology, molecular biology, genetics, biochemistry, microbiology, development, evolution and biotechnology. Students interested in cell/molecular biology are encouraged to consider the courses listed below. Note that Biology credit can be obtained for Microbiology, Biochemistry and Physiology courses above the 2000 level.

Biology: BIOL 3037, BIOL 3046, BIOL 3102, BIOL 4020, BIOL 4035

Microbiology: all MICI courses 2000 level or higher

Biochemistry: all BIOC courses 2000 level or higher

Neuroscience: NESC 2570, NESC 3970

Physiology: all PHYL courses 2000 level or higher

BIOL-Approved Courses

Several other Dalhousie departments offer courses in one or more areas of Biology. Students enrolled in a 120 credit hour BSc or BA program in Biology may count any of the following courses toward their Biology program course requirements:

Please note that **two** (2) BIOL-approved courses can count towards a minor program in Biology.

Any course cross-listed as a BIOL course

Agriculture (AGRI)	
^A	AGRI 1000
Anatomy (ANAT)	All ANAT courses 2000 level or higher
Animal Science (ANSC)	ANSC 2002, ANSC 2005, , ANSC 3000, ANSC 3001,

Courses

Courses

Course Notes

The normal entry requirement for admission to upper level courses in Biology is a grade of C or better in each of BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03 or in SCIE 1505.18. Students with a lower grade and extenuating circumstances may appeal to the department Undergraduate Curriculum committee. Students should go to the Biology Main Office for further details.

Consult the Biology Department's website for updates on new courses and suggested course combinations.

Course Descriptions

BIOL 1010 Principles of Biology Part I

CREDIT HOURS: 3
This course, which prepares students for more advanced courses in biology and allied subjects, surveys the fundamental principles of biology with an emphasis on those features common to all organisms. Topics covered include cell and molecular biology, genetics, and evolution. Knowledge of high school mathematics, chemistry and biology is recommended.
CALENDAR NOTES: Students wishing to continue as biology or marine biology majors should complete BIOL 1010 (or BIOL 1020) and BIOL 1011 (or BIOL 1021) in the first year of study. Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees.
EXCLUSIONS: BIOL 1020.03, SCIE (15XX), BIOA 1002.03
FORMATS: Lecture | Lab

BIOL 1011 Principles of Biology Part II

CREDIT HOURS: 3
Biology 1011 broadens the background laid down in BIOL 1010 to include plant and fungi form and function, animal form and function, and ecology. Knowledge of high school mathematics, chemistry and biology is recommended
CALENDAR NOTES: Students wishing to continue as biology or marine biology majors should complete BIOL 1010 (BIOL 1020) and BIOL 1011 (BIOL 1021) in the first year of study. Students planning to take further courses in Biology or Marine Biology should read the Program Requirements
EXCLUSIONS: BIOL 1021.03, SCIE 15XX, BIOA 1003.03
FORMATS: Lecture | Lab

BIOL 1020 Introductory Biology I: Cells, Genetics & Evolution

CREDIT HOURS: 3
Biology 1020.03 is the equivalent of BIOL 1010.03, and is offered primarily online. Topics include cell and molecular biology, genetics, and evolution. High school mathematics, chemistry, and biology is recommended. Learning activities include readings, quizzes, interactive multimedia, online labs, home labs, recorded lectures, and synchronous help sessions.
CALENDAR NOTES: Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees. Exams must be written on a Dalhousie campus.
EXCLUSIONS: BIOL 1010.03, SCIE 15XX, BIOA 1002.03
FORMATS: Online Delivery

BIOL 1021 Introductory Biology II: Organismal Biology & Ecology

CREDIT HOURS: 3
Biology 1021.03 is the equivalent of BIOL 1011.03, and is offered primarily online. Topics include diversity of eukaryotic life, ecology, and plant and animal biology. High school mathematics, chemistry, and biology are recommended. Learning activities include readings, quizzes, interactive multimedia, online labs, home labs, recorded lectures, and synchronous help sessions.
CALENDAR NOTES: Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees. Exams must be written on a Dalhousie campus.
EXCLUSIONS: BIOL 1011.03, SCIE 15XX, BIOA 1003.03
FORMATS: Online Delivery

BIOL 1050 Biology and Society

CREDIT HOURS: 3
Health, climate change, genetically modified organisms, species and the evolution of disease. Designed for non-majors this course introduces the basics of cell biology, genetics and evolution and how they affect our society. Students acquire a foundation for life-long learning and critical thinking in biology through lectures, independent study and lab activities. NOTE: This course is for students in an Arts program or program other than Biology.
PREREQUISITES: None
EXCLUSIONS: BIOL 1010.03, BIOL 1020.03, SCIE 15XX
FORMATS: Lecture | Lab

BIOL 1501 Integrated Introductory Biology I

CREDIT HOURS: 3
This course explores the fundamental principles of biology, with an emphasis on those features common to all organisms. Topics covered include cell and molecular biology, genetics, and evolution. These topics are explored through an integrated lens using real-world applications and connections to other fields of study (Neuroscience, Statistics, Earth & Environmental Sciences, Psychology, and Ethics).
CALENDAR NOTES: This course is restricted to students in the Dalhousie Integrated Science Program only.
RESTRICTIONS: Restricted to students in DISP only
EXCLUSIONS: Equivalent to: BIOL 1010, BIOL 1020, BIOA 1002 Exclusion with: SCIE 1506, SCIE 1507
FORMATS: Lecture | Lab

BIOL 1502 Integrated Introductory Biology II

CREDIT HOURS: 3
Biology 1502 expands on the foundation of BIOL 1501 to include plant and fungi form and function, animal form and function, and ecology. These topics are explored through an integrated lens using real-world applications and connections to other fields of study (Neuroscience, Statistics, Earth & Environmental Sciences, Psychology, and Ethics).
CALENDAR NOTES: This course is restricted to students in the Dalhousie Integrated Science Program only.
RESTRICTIONS: Restricted to students in DISP only
EXCLUSIONS: Equivalent to: BIOL 1011.03, BIOL 1021.03, BIOA 1003.03 Exclusion with: SCIE 1506.03, SCIE 1507.03
FORMATS: Lecture | Lab

BIOL 2003 Animal Diversity

CREDIT HOURS: 3
Surveys the diversity of forms and functions of invertebrate and vertebrate animals. The course takes a phylogenetic approach, exploring the evolutionary relationships and key transitions between metazoan taxa. Examples of the different life forms are introduced.
PREREQUISITES: A grade of C or higher in BIOL 1011.03 or (BIOL 1021.03, BIOL 1031.03, BIOA 1003.03, SCIE 1506.09).
FORMATS: Lecture | Lab

BIOL 2004 Diversity of Plants and Microorganisms

CREDIT HOURS: 3

Introduces the main domains of plant, fungal and microbial life, based on modern phylogenetic taxonomy. Examines the diversity, structure, physiology and ecology of non – animal life forms. Reviews the origins of the main lineages of living things - Archaea, Eubacteria and Eukaryota, as well as the main groups of eukaryotes.

PREREQUISITES: A grade of C or higher in BIOL 1010.03 or (BIOL 1020.03, BIOL 1030.03, BIOA 1002.03, SCIE 1507.09) and BIOL 1011.03 or (BIOL 1021.03, BIOL 1031.03, BIOA 1003.03, SCIE 1506.09).

FORMATS: Lecture | Lab

BIOL 2020 Cell Biology

CREDIT HOURS: 3

An introduction to the eukaryotic cell. Major cell components and activities are described at ultrastructural and molecular levels with emphasis on mammalian systems. The concept of the cell as an integrated structural, functional unit is developed.

PREREQUISITES: A grade of C or higher in BIOL 1010.03 or (BIOL 1020.03, BIOL 1030.03, BIOA 1002.03, SCIE 1507.09). RECOMMENDED: CHEM 1011.03 and CHEM 1012.03

EXCLUSIONS: BIOA 2001.03

FORMATS: Lecture | Lab

BIOL 2030 Genetics and Molecular Biology

CREDIT HOURS: 3

The power and prominence of modern genetics are emphasized through a blend of classical and molecular approaches. Topics: Mendelian, population and quantitative genetics; chromosome structure and variation; structure and function of nucleic acids; DNA replication, transcription and translation; gene expression; gene mutations; and genetic engineering. Course-based authentic research in lab.

PREREQUISITES: A grade of C or higher in BIOL 1010.03 or (BIOL 1020.03, BIOL 1030.03, BIOA 1002.03, SCIE 1507.09). RECOMMENDED: CHEM 1011.03 and CHEM 1012.03

EXCLUSIONS: GENE 2000.03

FORMATS: Lecture | Lab | Tutorial

BIOL 2040 Evolution

CREDIT HOURS: 3

A thorough overview of the process of evolution. Genetic variation and changes in genetic composition of populations, the relationship between genetic and phenotypic change. Adaptation at various levels of organization (DNA to species), speciation, phylogeny, and macroevolutionary patterns. Introduces the full breadth of evolutionary concepts, preparatory to more advanced courses.

CALENDAR NOTES: Recommended: SCIE 1111.03 Writing for the Sciences.

PREREQUISITES: A grade of C or higher in BIOL 1010.03 or BIOL 1020.03 or BIOL 1031.03 or BIOA 1002.03 and BIOA 1003.03, or SCIE 1506.09 and SCIE 1507.09 or equivalent.

EXCLUSIONS: none

FORMATS: Lecture | Lab

BIOL 2060 Introductory Ecology

CREDIT HOURS: 3

Ecology examines interactions of plants and animals, including humans, with each other and with their non-living world. Topics include population growth, competition, predation, food webs, metapopulation dynamics, biodiversity and ecosystem function. The course has a quantitative approach providing a foundation for further work in ecology, marine biology and environmental science.

PREREQUISITES: A grade of C or higher in BIOL 1011.03 or (BIOL 1021.03, BIOL 1031.03, BIOA 1003.03, ENVS 1100.03, ENVS 1000.06, SCIE 1506.09); and a grade of D or higher in MATH 1060.03 or (STAT 1060.03, MATH 2080.03, STAT 2080.03).

EXCLUSIONS: BIOA 3001.03

FORMATS: Lecture | Lab | Tutorial

BIOL 2111 Dalhousie Science Scholars and Leaders: Becoming a Scientist I

CREDIT HOURS: 0

This course examines the structure of science and situates science majors in the context of the scientific process. The course de-mystifies the language and culture of science. Students will develop skills to help them progress towards a science career. The course also explores the translation of science to society.

CALENDAR NOTES: BIOL 2111.00 and BIOL 2112.03 must be taken in consecutive fall/winter terms.

CROSSLISTED: SCIE 2111

RESTRICTIONS: E1. The course requires permission of instructor. Preference will be given to students in the Dalhousie Science Scholars & Leaders Program. BIOL 2111 will be open to Biology majors. SCIE 2111 will be open to students from other units within the Faculty of Science.

FORMATS: Lecture | Experiential Learning | Other (explain in comments)

BIOL 2112 Dalhousie Science Scholars and Leaders: Becoming a Scientist II

CREDIT HOURS: 3
This course examines the structure of science and situates science majors in the context of the scientific process. The course de-mystifies the language and culture of science. Students will develop skills to help them progress towards a science career. The course also explores the translation of science to society.
CALENDAR NOTES: BIOL 2111.00 and BIOL 2112.03 must be taken in consecutive fall/winter terms.
PREREQUISITES: Pass grade in BIOL 2111 (or SCIE 2111)
CROSSLISTED: SCIE 2112
RESTRICTIONS: E1. The course requires permission of instructor. Students must have been enrolled in BIOL/SCIE2111 in the Fall term. BIOL 2112.03 will be open to Biology majors. SCIE 2112.03 will be open to students from other units within the Faculty of Science.
FORMATS: Lecture | Experiential Learning | Other (explain in comments)

BIOL 2601 The Flora of Nova Scotia

CREDIT HOURS: 3
Introduction to the biodiversity of flowering plants (Angiosperms) found in Nova Scotia. A wide range of plant communities are visited on several day-long field trips. A focus on plant identification is supplemented with lessons in plant ecology, floral biology, pollination mechanisms, natural history, and human uses (e.g., edible, poisonous, medicinal).
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: One year of university courses
EXCLUSIONS: BIOL 3219.03
FORMATS: Lecture | Lab

BIOL 2605 Introduction to Marine Life of Nova Scotia

CREDIT HOURS: 3
Introduction to the variety of marine life found in Nova Scotia. The diversity and zonation of invertebrates and macroalgae is explored on field trips to different shore environments, including a salt marsh, rocky shore and sandy beach. Lectures and laboratory-based investigations on live marine organisms complement the field trips.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Marine Biology students may NOT use this course as part of their major degree requirements. This course is aimed at non-majors who have completed at least one year of university.
PREREQUISITES: One year of university courses
FORMATS: Lecture | Lab

BIOL 3003 Introduction to Field Oceanography

CREDIT HOURS: 3
See course description for OCEA 3003.03 in the Oceanography section of the calendar.

BIOL 3024 Microscopy

CREDIT HOURS: 3
See course description for MICI 3024.03 in the Microbiology and Immunology section of the calendar.

BIOL 3037 Life Rewritten: Applications and Implications of Gene Editing and Synthetic Biology

CREDIT HOURS: 3
This course introduces students to gene editing and synthetic biology tools (eg.CRISPR) as well as both current and future applications of those tools for conservation, medicine, and food production. This course empowers students to develop informed opinions about the ethics of using such tools in science and society.
PREREQUISITES: A mark of B- or better in both BIOL 2020 (Cell Biology) and BIOL 2030 (Genetics and Molecular Biology) or instructor's consent.
RESTRICTIONS: E1 and E2. Reservation for Biology majors to register first.
FORMATS: Lecture | Discussion | Other (explain in comments)

BIOL 3042 Molecular Ecology

CREDIT HOURS: 3
We survey techniques of molecular genetic analysis and consider how they can be used to identify species, populations, sexes, individuals and family

relationships, and study population attributes such as historical dispersal, contemporary connectivity, mating behaviour and effective population size. Evaluation is based on assignments, a test and a final exam.
PREREQUISITES: A grade of B- or better in each of BIOL 2030.03 (or GENE 2000.03), BIOL 2040.03, and BIOL 2060.03.
CROSSLISTED: MARI 3042.03
EXCLUSIONS: BIOL 4042.03
FORMATS: Lecture

BIOL 3044 Ecological Genetics

CREDIT HOURS: 3
An advanced examination of genetic variation in ecologically important (especially quantitative) traits. Topics will include determining whether a trait is inherited; natural selection in the wild; specialist vs. generalist strategies; how variation is maintained in the face of selection; trade-offs between competing selective pressures and selection for diversification.
PREREQUISITES: BIOL 2040.03 or BIOL 3041.03
EXCLUSIONS: BIOL 4044.03
FORMATS: Lecture

BIOL 3046 Molecular Evolution

CREDIT HOURS: 3
This course examines the process of evolutionary change at the molecular level. It begins with the sources of mutation, and moves on to dynamics of population variation. The course culminates with a macro-evolutionary perspective on topics such as adaptive evolution and genetic co-option. This course is complementary to BIOC 4010.03 (Bioinformatics).
PREREQUISITES: BIOL 2030.03 (or GENE 2000.03) and BIOL 2040.03
FORMATS: Lecture

BIOL 3050 Developmental Biology

CREDIT HOURS: 3
Lectures describe development as a sequence of processes and events, in which 'simple' structures such as fertilized eggs are progressively transformed into complex organisms. These events are governed by developmental 'rules' which have been determined through experimental study of animal and plant model organisms. Laboratories use live material whenever possible.
PREREQUISITES: BIOL 2020.03 (or BIOA 2001.03) and BIOL 2030.03 (or GENE 2000.03)
FORMATS: Lecture | Lab | Discussion

BIOL 3060 Environmental Ecology

CREDIT HOURS: 3
The ecological effects of pollution, disturbance, and other stressors, both anthropogenic and natural. Major subject areas are air pollutants, toxic metals, acidification, eutrophication, oil spills, pesticides, forestry, warfare, urban ecology, risks to biodiversity, and resource degradation. The overarching context of the course is ecological sustainability of the human economy.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) (or see instructor)
FORMATS: Lecture | Tutorial

BIOL 3061 Communities and Ecosystems

CREDIT HOURS: 3
Life exists and evolves in ecosystems which are complex systems. This class studies ecosystems and their food webs from a systems theory approach with an emphasis on network theory and qualitative analysis. Life itself is a networked process. Ecosystems are approached holistically to discover a new set of system properties.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) or INTD 2001.03 or INTD 2002.03
RESTRICTIONS: E1, E2
FORMATS: Lecture

BIOL 3062 Behavioral Ecology

CREDIT HOURS: 3
This course examines animal behaviour from an evolutionary perspective. Using the theory of natural selection as a basis, we will examine foraging, grouping patterns, territorial behaviour, parenting, mating behaviour, social organization, aggression and cooperation. There will be tutorials and essay assignments.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03)
FORMATS: Lecture

BIOL 3063 Resource Ecology

CREDIT HOURS: 3
This course considers the ecology, utilization, and management of natural resources in fisheries, wildlife and forest management, agriculture and aquaculture. Topics include population dynamics, community interactions, and ecosystem support of resources as well as the history of resource utilization, practices of controlling production, pests, and predators, and sustainable management strategies.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and MATH 1000.03 (or MATH 1215.03 or SCIE 1505.18) and STAT 1060.03 (or SCIE 1505.18)
CROSSLISTED: MARI 3063.03
FORMATS: Lecture | Tutorial

BIOL 3065 Conservation Biology

CREDIT HOURS: 3
This course offers an introduction to conservation biology: the science of understanding and conserving biodiversity on Earth. Students learn how biodiversity change is assessed and what tools are used to prevent the extinction of species and the disruption of ecosystems. Tutorials involve oral presentations as well as a written essay, and an in-depth discussion of controversial topics.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03
FORMATS: Lecture | Tutorial

BIOL 3073 Plant Physiology

CREDIT HOURS: 3
Plant structure and function is explored in relation to growth, survival and adaptation to the environment. Molecular and genetic approaches integrate events at the cellular level with whole-plant processes. Topics include morphology, physiology, hormones and signaling, photomorphogenesis, roles of vegetative and reproductive organs, plant/environment interactions. Laboratories use live plants.
PREREQUISITES: BIOL 2004.03, BIOL 2020.03, and BIOL 2030.03. RECOMMENDED: CHEM 1011.03 and CHEM 1012.03
FORMATS: Lecture | Lab

BIOL 3078 Principles of Animal Physiology Part I

CREDIT HOURS: 3
Lectures on the mechanisms which coordinate the activities of cells within multicellular organisms and permit such organisms to remain in homeostatic balance. The emphasis is on the mechanisms most widely distributed throughout the animal kingdom. The laboratories are designed to illustrate these principles in a variety of organisms.
CALENDAR NOTES: Students must complete 3078.03 before 3079.03
PREREQUISITES: BIOL 2003.03, and BIOL 2020.03 (or BIOA 2001.03)
CROSSLISTED: MARI 3074.03
FORMATS: Lecture | Lab

BIOL 3079 Principles of Animal Physiology Part II

CREDIT HOURS: 3
This course is a continuation of a discussion of the mechanisms which coordinate the activities of cells within multicellular organisms which began in BIOL 3078.03. This term emphasizes the urinary, cardiovascular and respiratory systems. The laboratories reflect the approaches taken to study these systems in a variety of organisms.
PREREQUISITES: BIOL 3078.03 or MARI 3074.03
CROSSLISTED: MARI 3076.03
EXCLUSIONS: BIOA 3005.03
FORMATS: Lecture | Lab

BIOL 3080 The Ecology and Evolution of Fishes

CREDIT HOURS: 3
The class examines selected topics on the ecology and evolution of marine and freshwater fishes. Topics include: phylogeny and systematics; functional morphology and physiology; population biology; life-history evolution; behavior; fisheries science; and conservation biology.
PREREQUISITES: A cumulative GPA of 2.7 (B-) or better in BIOL 2003.03, BIOL 2040.03, BIOL 2060.02 (or BIOA 3001.03)
CROSSLISTED: MARI 3080.03
EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03
FORMATS: Lecture

BIOL 3101 Microbial Ecology
CREDIT HOURS: 3
Lectures on the ecology of bacteria, viruses and protists. Community structure, food web nutrient cycling, biogeochemical cycles, competition, succession and symbiosis are discussed with examples from marine, fresh-water and soil habitats. There is an emphasis on marine organisms.
PREREQUISITES: BIOL 2004.03 (or MICI 2100.03), and BIOL 2060.03 (or BIOA 3001.03)
CROSSLISTED: MARI 3101.03
FORMATS: Lecture

BIOL 3102 Microbial Eukaryotes: Biodiversity and Evolution
CREDIT HOURS: 3
Microbial eukaryotes are of tremendous ecological, evolutionary and medical/veterinary importance. This course provides a comprehensive understanding of the biodiversity and evolution of both algal and protozoan eukaryotes, and examines important aspects of their organismal biology, including cell and genome organization, life histories, trophic strategies, locomotion and symbiosis.
PREREQUISITES: BIOL 2020.03 (or BIOA 2001.03) and BIOL 2004.03 (or MICI 2100.03)
FORMATS: Lecture | Lab

BIOL 3219 Flora of Nova Scotia
CREDIT HOURS: 3
Hands-on introduction to the plants of Nova Scotia, with an emphasis on taxonomy and a focus on the flowering plants. Includes identification, morphology, distribution, habitat, and ecology. Takes several day-long and half-day field trips. Evaluation includes a plant collection, field notebook, field report, presentation, and lecture and lab exams.
CALENDAR NOTES: Instructor approval required. Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses.
PREREQUISITES: BIOL 2004.03, and 2060.03, or equivalents
EXCLUSIONS: BIOL 2601.03
FORMATS: Lecture | Lab | Other (explain in comments)

BIOL 3221 Diversity of Algae
CREDIT HOURS: 3
This is a taxonomic introduction to the major algal groups (macrophytic and microscopic) with an emphasis on the marine seaweeds. Basic taxonomic differences are covered, along with an introduction to macrophyte ecology, human uses and symbioses. Laboratory sessions focus on morphology and reproduction.
CALENDAR NOTES: Also offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see http://www.seaside.science.dal.ca
PREREQUISITES: BIOL 2004.03 or equivalent
CROSSLISTED: MARI 3221.03
EXCLUSIONS: BIOL 3212.03, MARI 3212.03
FORMATS: Lecture | Lab

BIOL 3225 Plants in the Human Landscape
CREDIT HOURS: 3
The use of plants for human recreation and aesthetic purposes in gardens, public parks, suburban and urban landscapes. Topics include: history of gardens, garden design, plant materials, edible landscaping, plants and human health. The course includes field trips and group work and students complete a design project.
PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 (C+ or better) and BIOL 1011.03 or BIOL 1021.03 (C+ or better); or SCIE 1505.18 (C+ or better) or PLAN 2001.03 (C+ or better) or instructor permission
CROSSLISTED: ENVS 3225, PLAN 3225
FORMATS: Lecture | Tutorial

BIOL 3226 Economic Botany: Plants & Civilization
CREDIT HOURS: 3
The story of the human use of plants for food, fibre and fuel including the botany, domestication, development, distribution, production, processing, history, economic and social impacts of the major world crops (cereals, fruits, vegetables, flowers and industrial crops) and the importance of plants in medicine and conservation.
PREREQUISITES: A grade of B- or higher in BIOL 1010.03 or (BIOL 1020.03 or BIOA 1002.03 or BIOL 1030.03) and BIOL 1011.03 or (BIOL 1021.03, BIOA 1003.03, or BIOL 1031.03); or SCIE 1505.18
CROSSLISTED: ENVS 3226.03
FORMATS: Lecture | Tutorial

BIOL 3301 Invertebrate Biology
CREDIT HOURS: 3
A survey of the diversity, ecology and evolutionary history of the major invertebrate groups. Lectures will emphasize phylogenetics and diversity of body plans. Labs will emphasize identification and anatomy through dissections and observations.
PREREQUISITES: BIOL 2003.03
CROSSLISTED: MARI 3301.03
EXCLUSIONS: BIOL 3321X/Y.06
FORMATS: Lecture | Lab

BIOL 3322 Parasitology
CREDIT HOURS: 3
The course emphasizes the parasite-host relationships, evolution of the parasites and adaptations to the host, modifications of physiology, structure and life cycle for a parasitic existence. Since the most extensive research pertains to parasites of man, the emphasis is on human parasites.
CALENDAR NOTES: Students who took a Biology 1000 level prerequisite prior to September 2013 and did not get a grade of C+ or higher should contact an advisor in the Biology Department preferably before registration begins.
PREREQUISITES: A grade of C+ or higher in BIOL 1010 (or BIOL 1020.03 or BIOA 1002.03) and BIOL 1011.03 (or BIOL 1021.03 or BIOA 1003.03) or SCIE 1505.18
FORMATS: Lecture | Lab

BIOL 3326 Vertebrate Design: Evolution and Function
CREDIT HOURS: 3
Vertebrate Design explores 600 million years of vertebrate evolution and phylogenetic relationships, with particular attention to origins of major groups and the anatomical and functional innovations associated with their rise and diversification. Functional morphology and physiology of swimming, flying and terrestrial locomotion is also covered.
PREREQUISITES: BIOL 2003.03 and BIOL 2040.03
FORMATS: Lecture

BIOL 3327 Entomology
CREDIT HOURS: 3
The course is an introduction to the study of insects. Topics include insect classification, evolutionary diversity, biology, ecology, behaviour, and various applied aspects. Through this survey of the insects, students will gain an appreciation of insect biodiversity as well as their economic and ecological importance.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03
EXCLUSIONS: BIOA 3000.03
FORMATS: Lecture | Lab

BIOL 3328 Medical Entomology
CREDIT HOURS: 3
Medical Entomology covers direct injuries caused by arthropods such as phobias, annoyance, allergies, toxins, venoms and myiasis, arthropod transmission of vertebrate parasites, epidemiology of arthropod-borne diseases. Students study transmission of diseases, methods of surveillance of diseases, management by vector control and other methods of arthropod-borne diseases.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For date, times and special registration procedures, see seaside.science.dal.ca
PREREQUISITES: BIOL 2003.03 or permission of instructor
FORMATS: Lecture | Lab

BIOL 3329 Applied Entomology
CREDIT HOURS: 3
Insects not only comprise more than half of the world's biodiversity, but influence human health and economic well-being in many ways. In this course students are introduced to insect pest management, agricultural, forest and medical entomology, forensic entomology, and insects in food science, beneficial and harmful insects.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: A grade of C+ or higher in BIOL 1010 (or BIOL 1020.03 or BIOA 1002.03) and BIOL 1011.03 (or BIOL 1021.03 or BIOA 1003.03) or SCIE 1505.18
FORMATS: Lecture | Lab

BIOL 3330 Marine Parasitology

CREDIT HOURS: 3
The course is divided into two modules: foundational and practical knowledge. Under foundational knowledge, we will cover 1. Foundations of marine parasitology (introduction and host-parasite relationships), 2. Parasite ecology and evolution (ecological roles, transmission and dispersal), and 3. Parasitic groups and host interactions (diversity of parasites, taxonomy). Under practical knowledge, we will cover 4. Parasitic impacts and host responses (effect of parasitism, aquaculture and fisheries impact, climate change) and 5. Applied marine parasitology (conservation, bioindicators, emerging diseases).
CALENDAR NOTES: Cross-listed with MARI 3330, available to be delivered online upon request.
PREREQUISITES: BIOL 2003 and, EITHER BIOL 2040 or BIOL 2060. (BIOL 3322 is recommended but not required.)
CROSSLISTED: MARI 3330
FORMATS: Lecture | Lab | Seminar | Discussion | Online Delivery

BIOL 3336 Vertebrate Functional Morphology

CREDIT HOURS: 3
Vertebrates are mechanical machines that move through the environment in a wide variety of ways. We use simple physics and mathematics to explore the mechanics and energetics of various modes of terrestrial locomotion, swimming, and flying, and the materials from which vertebrates are built.
PREREQUISITES: BIOL 2003.03 AND MATH 1000.03 or MATH 1215.03
RESTRICTIONS: E1
FORMATS: Lecture

BIOL 3370 Comparative Animal Physiology

CREDIT HOURS: 3
Lecture course examining principles of animal physiology, with emphasis on the coordination of metabolism, neural and sensory function, muscular function, stress, and reproduction, all within the context of ecology and evolution.
PREREQUISITES: BIOL 2003.03, BIOL 2020.03 (or BIOA 2001.03)
CROSSLISTED: MARI 3370
EXCLUSIONS: BIOL 3078, BIOL 3079, MARI 3074, MARI 3076
FORMATS: Lecture

BIOL 3371 Laboratory in Comparative Animal Physiology

CREDIT HOURS: 3
This laboratory intensive course will provide opportunities for students to experience firsthand the role that experimentation, and data collection, interpretation, and communication plays in our understanding of how animals function. Vertebrate and invertebrate examples are used, in a comparative approach, to study a variety of physiological processes.
CALENDAR NOTES: Laboratory experiments involve live invertebrates and/or vertebrate tissues. Students are required to handle live invertebrates during the lab.
PREREQUISITES: BIOL 3078 or MARI 3074 or BIOL 3370 or MARI 3370; CHEM 1011 and CHEM 1012; STAT 1060 or STAT 2060
CROSSLISTED: MARI 3371
EXCLUSIONS: BIOL 3079, MARI 3076
FORMATS: Lecture | Lab | Tutorial

BIOL 3430 Introduction to Human Histology

CREDIT HOURS: 3
See course description for ANAT 2160.03 in the Anatomy and Neurobiology section of the calendar.

BIOL 3580 Philosophy of Biology

CREDIT HOURS: 3
See course description for PHIL 3420.03 in the Philosophy section of this calendar.

BIOL 3601 Nature Conservation

CREDIT HOURS: 3
This interdisciplinary course explores relationships between humans and the natural world, including damage caused to species and ecosystems. The course looks at environmental ethics and world views, environmental philosophy, sustainability, the cultural expression of natural values (literature, music, art) and conservation science and actions, including the establishment of protected areas.
PREREQUISITES: BIOL 1010.03 (orBIOL 1020.03 or BIOA 1002.03) and BIOL 1011.03 (or BIOL 1021.03 or BIOA 1003.05); or SCIE 15XX, or permission of instructor
FORMATS: Lecture | Tutorial

BIOL 3602 History of Biology

CREDIT HOURS: 3
What was life? This course explores a wide range of human attempts to understand the living world, from ancient accounts of spontaneous generation to atomic-age genetics and ecology.
CROSSLISTED: HSTC 3302
RESTRICTIONS: E1
FORMATS: Lecture | Seminar

BIOL 3614 Field Ecology

CREDIT HOURS: 3
This course provides practical experience in field ecology by collecting, analysing, and interpreting field data and preparing formal reports. Class research projects address questions in animal or plant ecology within intertidal, freshwater or forest ecosystems. Instruction includes data analysis and scientific writing skills. Evaluation is based on individual written papers.
CALENDAR NOTES: Includes several weekend field trips, some overnight camping; contact instructor for details and application; auxilliary fee charged to cover costs of field expenses; course aimed at 4th year majors and 3rd year honours students. Signature required.
PREREQUISITES: BIOL 2060.03 and STAT 1060.03; STAT 2080.03 recommended
RESTRICTIONS: E1, E2
EXCLUSIONS: BIOL 3615.03
FORMATS: Lecture | Lab | Other (explain in comments)

BIOL 3620 Field Survey of Terrestrial Biodiversity

CREDIT HOURS: 3
Measuring and interpreting trends in the biodiversity of organisms in terrestrial environments. Field-intensive, with one week spent camping at a field station. Techniques for identification of major groups (lichens, mosses, higher plants, insects, amphibians, birds, mammals), sampling presence and abundance of species, and relating trends to natural and anthropogenic variation.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03) or permission of instructor
FORMATS: Lecture | Lab

BIOL 3622 Ornithology

CREDIT HOURS: 3
Overview of avian biology and techniques for the scientific study of bird populations, including identification by sight and sound. Field-intensive, with 8 days in the field, including one week camping at a field station in southwestern Nova Scotia to conduct research on birds in their natural habitats.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03 or BIOL 2060.03 or BIOA 3001.03, or permission of instructor
FORMATS: Lecture | Lab

BIOL 3623 Applied Coastal Ecology

CREDIT HOURS: 3
Applied Coastal Ecology explores impacts of anthropogenic inputs on structure and function of coastal ecosystems. Through field trips, laboratories and guest demonstrations, students examine ecosystem health, e.g. communities on rocky shores, salt marshes and sandy shores and learn experimental design, principles of environmental assessment and monitoring, and coastal habitat remediation.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Not offered every year.
PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03)
CROSSLISTED: ENVS 3623.03, MARI 3623.03
FORMATS: Lecture | Lab

BIOL 3624 Urban Freshwater Systems

CREDIT HOURS: 3
Ecology of urban freshwater systems with a focus on understanding how they respond to human-caused stresses within their watersheds. Students conduct case studies at nearby lakes and/or streams to monitor water quality and characterize resident communities of plants and animals. Evaluation is based on individual and group research reports.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03 and MATH 1060.03 (or STAT 1060.03 or DISP) or permission of instructor
CROSSLISTED: ENVS 3624.03
FORMATS: Lecture | Lab

BIOL 3626 Field Studies of Marine Mammals

CREDIT HOURS: 3
Hands-on introduction to research on marine mammals. Lectures provide an overview of marine mammal adaptations, evolution, population biology, social organization, conservation, and management. Labs include a necropsy and techniques of photographic identification of individuals. On a several-day camping trip, students observe marine mammals from whale-watch boats and conduct research projects.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and BIOL 3062.03 (or BIOL 3630.03 or PSYO 2160.03), and MATH 1060.03/STAT 1060.03
CROSSLISTED: MARI 3626.03
FORMATS: Lecture | Lab

BIOL 3628 Marine Ornithology

CREDIT HOURS: 3
Overview of the biology of birds in marine environments. Seabird ecology, evolution, adaptations, identification, and natural history. Tools and techniques for studying their behaviour, diet, and populations in the field. Lectures, exercises, and a week-long field trip to Maritime seabird breeding colonies. Student team and independent research projects and presentations.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.
PREREQUISITES: BIOL 1010 or BIOL 1020 or equivalent, and BIOL 1011 or BIOL 1021 or equivalent, or SCIE 15XX, one of BIOL 2003 or BIOL 2004, and BIOL 2060, or instructor's permission. Knowledge of statistics, Geographic Information Systems (GIS), and familiarity with Excel spreadsheets are helpful, but not required, for research projects.
CROSSLISTED: MARI 3628.03

BIOL 3630 Field Methods in Animal Behaviour

CREDIT HOURS: 3
First-hand experience in studying animal behaviour in the field. Day-long field exercises teach basic methods, then students plan, conduct, write up, and orally present a 5-day project of their own.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 3062.03 or PSYO 2160.03 or PSYO 3160X/Y.06 or permission of instructor
FORMATS: Lecture | Lab

BIOL 3632 Applied Field Methods in Fish Ecology

CREDIT HOURS: 3
Practical experience conducting field research on fishes with field trips to streams and shallow water marine/freshwater habitats. Techniques include collecting fish, designing and conducting surveys, studying behaviour, measuring phenotypic variability, quantifying temporal and spatial variation, planning for statistical analysis, and weighing tradeoffs between data quality, quantity, costs and ethical/environmental considerations.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and STAT 1060.03 (or MATH 1060.03 or SCIE 1505), or their equivalents, or permission of instructor. STAT 2080 is recommended.
CROSSLISTED: MARI 3632.03, ENVS 3632.03
FORMATS: Lecture | Lab

BIOL 3633 Spatial Information and GIS in Ecology

CREDIT HOURS: 3
A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.
CALENDAR NOTES: Offered in the summer through **SEASIDE**. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03
CROSSLISTED: ENVS 3633.03, GEOG 3633.03, MARI 3633.03
EXCLUSIONS: PLAN 2006.03, GEOG 2006.03
FORMATS: Lecture | Lab

BIOL 3634 Agroforestry

CREDIT HOURS: 3
Agroforestry is a land-use system in which trees or shrubs are grown in association with agricultural crops or livestock. As practiced in the tropics, agroforestry generates numerous ecological, environmental and economic benefits. This hands-on, field-intensive course provides a foundation for understanding this traditional practice and its applications in North America.
CALENDAR NOTES: Offered in summer through **SEASIDE**. an auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures, see seaside.science.dal.ca
PREREQUISITES: BIOL 2060.03 or AGRI 1000.03 or BIOA 3001.03 or permission of the Instructor. An addditional class on the biology, ecology, diversity or physiology of plants is recommended.

BIOL 3635 Species at Risk Field Course

CREDIT HOURS: 3
This course provides practical field experience in the biology of Species at Risk (SAR). Students learn through lectures, presentations, field work, and writing a formal report. On a week-long field trip to Southwestern Nova Scotia, students learn from SAR biologists how to conduct field surveys, document data, and recover SAR.
CALENDAR NOTES: Intensive summer field course. Field trip to Southwestern NS for 7-9 days. Auxiliary fee charged to cover field expenses. Application and deposit required for permission to register. See www.seaside.science.dal.ca for details.
PREREQUISITES: BIOL 2003.03 or BIOL 2004.03; and BIOL 2060.03. BIOL 3065.03 is recommended.
CROSSLISTED: MARI 3635.03
RESTRICTIONS: Requires permission of instructor
FORMATS: Lecture | Lab | Other (explain in comments)

BIOL 3639 Herpetology

CREDIT HOURS: 3
Through a combination of lectures, labs and field activities, this course provides an overview of the global diversity, evolution, ecology and conservation of herpetofauna (amphibians and reptiles), and the natural history and identification of Nova Scotian herpetofauna. Students gain experience with common field research and monitoring techniques for herpetofauna.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca
PREREQUISITES: BIOL 2060.03, BIOL 2003.03
FORMATS: Lecture | Lab | Other (explain in comments)

BIOL 3640 Tropical Ecology and Biodiversity Field Class

CREDIT HOURS: 6
Hands-on introduction to tropical ecology, biodiversity, and conservation. Includes an 18-day field trip to Sri Lanka to visit a variety of tropical terrestrial and aquatic ecosystems, quantify habitats, identify species, and study agroforestry, ecological interactions and animal behavior. Evaluation includes lecture tests, field notebooks, class research projects, presentations and reports.
CALENDAR NOTES: Offered in summer through SEASIDE. Special application procedure. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03 and BIOL 2004.03 or equivalent and BIOL 2060 or equivalent or instructor's permission. An introductory course in statistics (STAT 1060.03 or similar) is recommended.

BIOL 3664 Intertidal Ecology and Diversity

CREDIT HOURS: 3
Hands-on, intensive introduction to ecological research on rocky shores, tidal flats, and sandy beaches. Relevant ecological concepts, sampling techniques for flora and fauna, and statistical skills are learned. Field sampling on day and camping trips is followed by lab work (e.g., identification of seaweeds,

invertebrates), statistical analysis, and report preparation.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), and STAT 1060.03 (or MATH 1060.03 or SCIE 15xx), and BIOL 2003.03
CROSSLISTED: ENVS 3664.03, MARI 3664.03
EXCLUSIONS: BIOL 3662.03, BIOL 3663.03
FORMATS: Lecture | Lab

BIOL 3680 Scientific Diving Methods for Marine Ecology

CREDIT HOURS: 3
This course introduces students that are certified divers to the practice of underwater research using SCUBA. It combines lectures with supervised dives in various marine habitats to demonstrate the application of standard sampling and experimental procedures in marine ecology, with an emphasis on logistical considerations and diving safety.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03, BIOL 2060.03 or BIOA 3001.03, STAT 1060.03 or DISP, internationally recognized diving certification, diving physical; recommended: BIOL 3321.03, BIOL 3301.03
CROSSLISTED: MARI 3680.03
FORMATS: Lecture | Lab

BIOL 3761 Marine Ecology

CREDIT HOURS: 3
Building upon an understanding of basic ecological and evolutionary principles, and a familiarity with the major marine invertebrate and algal taxa, this course examines patterns and processes at the organismal, population and community levels that determine the diversity and distribution of life in the sea.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and (BIOL 2003.03 or BIOL 2004.03), and OCEA 2000X/Y.06 or (OCEA 2001.03 and OCEA 2002.03)
CROSSLISTED: MARI 3761.03
RESTRICTIONS: This course is restricted to 3rd and 4th year students.
FORMATS: Lecture

BIOL 3762 Terrestrial Ecology

CREDIT HOURS: 3
This course provides a conceptual framework for understanding the function of terrestrial ecosystems. One week at a field station in Nova Scotia provides practical experience with forest, bog and agroecosystems. Topics include soil profiles and nutrients; plant productivity and interactions; and ecological roles of microorganisms, lichens, fungi, insects, and vertebrates.
CALENDAR NOTES: Offered in summer through **SEASIDE**. An auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures see seaside.science.dal.ca
PREREQUISITES: BIOL 2003.03 or BIOL 2004.03 , and BIOL 2060.03 (or BIOA 3001.03), or instructor's permission.
FORMATS: Lecture | Lab

BIOL 3800 Experiential Learning

CREDIT HOURS: 3
Experiential Learning recognizes the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and a timetable.
CALENDAR NOTES: To register in this course, a student must first find a suitable supervisor and sign a learning agreement between the course coordinator, the student and the supervisor.
PREREQUISITES: Students must be registered in a Biology or Marine Biology program, have completed a minimum of 18 credit hours in Biology above the 1000 level and have a minimum cumulative GPA of 2.4 or permission of course coordinator.
CROSSLISTED: MARI 3800.03
EXCLUSIONS: Scheduled courses at a learning institution, study that would qualify for a Special Topics course, an Honours project, co-op work terms and paid work. Student may only complete one experiential learning course within the department.

BIOL 3872 Scientific Computing for Biologists

CREDIT HOURS: 3
Best practices for scientific computing and data handling, theory of visualisation, and scripting, teaching students how to create, store, and manipulate data using the object-oriented programming language R. Examples and projects will be drawn from a wide variety of biological areas, covering typical problems encountered with computer use.

CALENDAR NOTES: This course is aimed at biology and marine biology majors who are looking to pursue future research in any discipline.
PREREQUISITES: BIOL 2030.03 or BIOL 2040.03 or BIOL 2060.03 or permission of Instructor
FORMATS: Lecture | Lab

BIOL 4001 Environmental Impact Assessment

CREDIT HOURS: 3
This course serves as the capstone to the EIA certificate. It is a hands-on training course that guides students through a nine-step framework for preparing individual EIAs on a physical project as well as a Strategic Environmental Assessment on a policy. International, national, provincial examples illustrate the framework.
CALENDAR NOTES: All students taking BIOL 4001.03 or ENVS 4001.03 must have completed 90 credit hours and be in their fourth year of study, or have permission of instructor.
PREREQUISITES: ENVS 1100.03 and 1200.03 (or ENVS 1000X/Y.06) or BIOL 2060.03 (or BIOA 3001.03) or ERTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or INTD 2002.03 or OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) or SUST 2000.06 or SUST 2001.06
CROSSLISTED: ENVS 4001.03
RESTRICTIONS: E1, E2, and E3 This course is open to all students with the necessary prerequisites regardless of whether they are applying for the EIA certificate or not.
FORMATS: Lecture | Tutorial

BIOL 4002 The Science of Wetland Ecosystems

CREDIT HOURS: 3
See ENVS 4002.03 in the Environmental Science section of the calendar.

BIOL 4003 Indigenous perspectives in conservation biology

CREDIT HOURS: 3
This two week field course takes a holistic approach to conservation biology. Paradigms and frameworks in native science are discussed in conservation study hotspots, in outdoor and indoor classrooms, and laboratories in First Nations' territories. Native knowledge systems from Turtle Island are explored to highlight the roles and duties indigenous peoples have with attention to Canada's colonial framework and the treaties.
CALENDAR NOTES: Intensive summer field course. Multiple overnight trips. Auxiliary fee charged to cover field expenses. Application and deposit required for permission to register. See www.seaside.science.dal.ca for details.
CROSSLISTED: INDG 4003
RESTRICTIONS: Requires permission of instructor
EXCLUSIONS: E1, E2
FORMATS: Lecture | Lab | Experiential Learning | Other (explain in comments)

BIOL 4004 Principles of Indigenous Medicine

CREDIT HOURS: 3
A holistic, two-eyed seeing course highlighting indigenous medicine's principles in ceremony, concepts of health and wellness, biochemistry, ethnopharmacology, practice and discovery. This course introduces indigenous ways of knowing medicine, important natural products, their biosynthesis, the drug discovery process, synthetic biology and indigenous style formulations and medicine practices.
PREREQUISITES: Recommend that students have completed the second year requirements of a degree program. Override permitted with instructor permission.
CROSSLISTED: Grad
EXCLUSIONS: E1: 30 Credit hours
FORMATS: Lecture | Discussion | Experiential Learning

BIOL 4020 Advanced Cell Biology

CREDIT HOURS: 3
This advanced class focuses on how the animal cell interacts with its environment and integrates information to proceed with an appropriate course of action. Consequences of disrupting signaling pathways are also examined. Lectures are supplemented with assigned readings of original research articles for discussion in class.
PREREQUISITES: BIOL 2020.03 or BIOA 2001.03 with a minimum grade of B- or instructor's consent.
EXCLUSIONS: BIOL 3020.03
FORMATS: Lecture | Discussion

BIOL 4039 Special Topics

CREDIT HOURS: 3
Enables students to study an area of Biology or Marine Biology not covered in other courses. Students should consult with the faculty member to arrange the topic of study and develop an outline of course content, which must be approved by the Chair of the Biology Undergraduate Curriculum Committee.
CALENDAR NOTES: Registration in Special Topics can only be approved by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html

BIOL 4061 Design of Biological Experiments

CREDIT HOURS: 3
This course introduces students with previous training in univariate statistics to the practice and pitfalls of experimental design and data analysis in biology. Lectures and take-home exams are used to demonstrate the fundamentals of design and analysis, with emphasis on potential problems and how they are overcome.
PREREQUISITES: MATH 2080.03 or STAT 2080.03 or ECON 2280.03 (Grade of B+ or higher); offered to well prepared honours students as well as graduate students
FORMATS: Lecture

BIOL 4062 Analysis of Biological Data

CREDIT HOURS: 3
The course introduces students to techniques available for the analysis of biological data, including regression, general linear models and multivariate methods. Emphasis is on the practical use of these techniques rather than derivations. Students analyze real and realistic data sets, and are assessed on write-ups of these analyses.
PREREQUISITES: (STAT 2080.03 or MATH 2080.03) and BIOL 3872.03

BIOL 4065 Sustainability and Complexity

CREDIT HOURS: 3
Sustainability is a transdisciplinary area integrating equitable societies, protected environments, and robust economies. Achieving sustainability is a challenge that has only had limited success in our complex world. Complexity studies offer new approaches for achieving sustainability beyond the traditional ones mostly focused upon reducing unsustainability.
CALENDAR NOTES: Course open to students in: Faculty of Science, College of Sustainability, and International Development students in FASS
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) or ERTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or INTD 2002.03 or OCEA 2001.03/2002.03 (or OCEA 2000X/Y.06) or SUST 2000.06 or SUST 2001.06
RESTRICTIONS: E1, E2, E3 Restricted to students in: Faculty of Science, College of Sustainability and International Development students in FASS
FORMATS: Lecture | Tutorial | Discussion

BIOL 4069 Statistical Rethinking: Applied Bayesian Statistics

CREDIT HOURS: 3
This course, which uses Richard McElreath's popular 'Statistical Rethinking' book as a foundation, provides a broad introduction to applied Bayesian models using R or Python. Examples are drawn from Biology and Social Science, in contexts designed to be widely applicable to analysis of observational data across disciplines.
CALENDAR NOTES: Course is aimed at non-stats majors seeking to do applied statistical work, primarily in Biology but including other disciplines; Students majoring in statistics (including Honours, Majors, Combined Honours and Double Majors programs) cannot receive STAT course credit for this course. Students Minoring in Statistics can count this as a 3000 level STAT course credit.
PREREQUISITES: STAT 2060.03 OR STAT 2080.03 AND One of: STAT 2450.03, CSCI 2202.03, BIOL 3872.03, MARI 4600.03
CROSSLISTED: STAT 3069.03
FORMATS: Lecture

BIOL 4071 Ecology & Evolution of Birds

CREDIT HOURS: 3
This course will provide a current and comprehensive account of avian biology – encapsulating their evolution, ecology, life-history variation, behaviour, reproduction, physiology, morphology, flight, and conservation.
PREREQUISITES: A grade of B- or higher in BIOL 2003.03 (Diversity of Animals), BIOL 2040.03 (Evolution), and BIOL 2060.03 (Ecology).
FORMATS: Lecture

BIOL 4080 Laboratory Studies of Fishes

CREDIT HOURS: 3
Through a series of laboratory exercises, the course provides students with practical experience on various topics related to the study of ichthyology. Topics

shall include the following: species identification; meristics and morphometrics; use of dichotomous keys; internal and external morphology; ageing and growth determination; ecomorphological attributes; data collection and analysis.
PREREQUISITES: BIOL 3080.03 or MARI 3080.03
CROSSLISTED: MARI 4080.03
EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03
FORMATS: Lab

BIOL 4141 Advances in Biological Oceanography

CREDIT HOURS: 3
This course explores major advances in biological oceanography through analysis and discussion of influential historical and recent cutting-edge papers from the scientific literature. The course will be delivered through a combination of student presentations, class discussions, and invited speakers.
CALENDAR NOTES: BIOL 4141 can be taken after or concurrently with OCEA 4140.03 or (OCEA 5140.03 or BIOL 4661.03 or MARI 4661.03)
COREQUISITES: OCEA 4140.03 or permission of instructor.
CROSSLISTED: OCEA 4141.03
RESTRICTIONS: E3
EXCLUSIONS: MARI 4141.03, BIOL 5141.03
FORMATS: Seminar

BIOL 4160 Political Ecology

CREDIT HOURS: 3
Political ecology (PE) examines the politics of the environment but not on specific policies, political theories, or ideologies. PE considers an interacting array of political and socio-economic forces that shape human-environmental relationships. International case studies will be evaluated using several PE tools. Discussion format with Blackboard Learning/Internet assignments.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), and one of BIOL 3003.03, BIOL 3060.03, BIOL 3061.03, BIOL 3062.03, BIOL 3063.03, BIOL 3065.03, BIOL 3067.03, BIOL 3069.03, BIOL 3101.03, BIOL 3601.03, BIOL 3623.03, BIOL 3624.03, BIOL 3761.03, BIOL 3762.03, or INTD 2001 or INTD 2002 or permission of instructor
FORMATS: Discussion

BIOL 4220 Plant Cell Biology

CREDIT HOURS: 3
This course covers the structure, function, and dynamic properties of plant cellular components including constituent organelles, cytoskeleton, and the cell wall. Current areas of research such as programmed cell death, cell signalling and cellular trafficking are discussed in depth. The course consists of lectures, student seminars, and report writing.
PREREQUISITES: BIOL 2020.03 (or BIOA 2001.03) and BIOL 2004.03 or permission of the instructor
FORMATS: Lecture

BIOL 4302 Clinical and Molecular Immunology

CREDIT HOURS: 3
See course description for MICI 4302.03 in the Microbiology and Immunology section of this calendar.

BIOL 4323 Movement and Spatial Ecology

CREDIT HOURS: 3
How animals use their three-dimensional habitat impacts their life history. Spatial ecology, the study of animal location, and movement ecology, the study of the drivers of movement, are fields of inquiry that are relied upon to inform management decision making. Movement ecology, animal tracking, and methods for testing hypotheses using statistical programming will be covered.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), or PSYO/NESC 2160.03 or permission of the instructor.
CROSSLISTED: MARI 4323.03
FORMATS: Lecture | Lab

BIOL 4335 Environmental Impacts in Marine Ecosystems

CREDIT HOURS: 3
See course description for OCEA 4335.03, in the Oceanography section of this calendar.

BIOL 4369 Fisheries Oceanography

CREDIT HOURS: 3
See course description for OCEA 4160.03 in the Oceanography section of this calendar.

BIOL 4370 Deep Sea Biology

CREDIT HOURS: 3
See course description for MARI 4370.03 in the Marine Biology section or OCEA 4370.03 in the Oceanography section of this calendar.
PREREQUISITES: (BIOL 2060 or BIOA 3001) and OCEA 2000 or (OCEA 2001 and OCEA 2002)

BIOL 4500 The Evolution of Life Histories

CREDIT HOURS: 3
Life history describes how reproductive effort changes with age to create strategies that influence survival and reproduction. Life-history research is fundamental to population ecology, evolutionary biology, sustainable harvesting, and conservation biology. Life-history theory provides an explanatory/predictive framework for understanding why organisms differ in how they propagate genes to future generations.
CALENDAR NOTES: This course is restricted to 4th year students
PREREQUISITES: Minimum of B- in each of BIOL 2003.03, BIOL 2040.03, and BIOL 2060.03 or Instructor's approval. One of BIOL 3044.03, BIOL 3060.03, or BIOL 3080.03 is strongly recommended.
RESTRICTIONS: E1, E2, E3
FORMATS: Lecture

BIOL 4510 Cultural Evolution

CREDIT HOURS: 3
Culture is socially learned and group-specific information or behaviour. This course explores the nature of culture across the animal kingdom, how it evolves, and its relationship to ecology, genetic evolution and conservation. Students consider and discuss the controversies and uncertainties as to the role of culture in biology.
PREREQUISITES: BIOL 2040.03, and BIOL 3062.03 or PSYO 3162.03
FORMATS: Lecture | Discussion | Other (explain in comments)

BIOL 4661 Biological Oceanography

CREDIT HOURS: 3
See course description for OCEA 4140.03, in the Oceanography section of this calendar.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); or permission of instructor
CROSSLISTED: OCEA 5140.03, BIOL 5661.03, MARI 4661.03

BIOL 4662 Biology of Phytoplankton

CREDIT HOURS: 3
This is an upper-division course on the phytoplankton in the context of their evolutionary history and ecological diversity, with an emphasis on their adaptations and acclimation to different environments and their role in food webs and in biogeochemical cycling.
PREREQUISITES: MATH 1000.03 (or MATH 1215.03) and MATH 1010.03 or equivalent, and OCEA 2001.03 and OCEA 2002.03; or permission of Instructor
CROSSLISTED: OCEA 4230, OCEA 5230, MARI 4662
EXCLUSIONS: E1, E2
FORMATS: Lecture | Discussion

BIOL 4664 History of Marine Sciences

CREDIT HOURS: 3
See course description for MARI 4664.03 in the Marine Biology section, or SCIE 4001.03 in the Science, Interdisciplinary section of this calendar.

BIOL 4666 Benthic Ecology

CREDIT HOURS: 3
See course description for OCEA 4330.03 in the Oceanography section of the calendar.
PREREQUISITES: OCEA 2001.03, OCEA 2002.03, and BIOL 2060.03, or permission of instructor.
CROSSLISTED: OCEA 4330.03, MARI 4666.03
FORMATS: Lecture | Lab

BIOL 4802 Special Topics: Classic Papers in Biology

CREDIT HOURS: 3
In this class, we'll work together to identify, read, discuss, and write about a set of classic papers from a chosen area of biology. Along the way we'll consider concepts, methods, biology education, historical contexts, science communication, and what it means for a paper to be a classic in biology.
PREREQUISITES: BIOL 3602/HSTC 3302 (History of Biology) or BIOL 4664/MARI 4664/OCEA 4331/SCIE 4001/HSTC 3331/HIST 3073 (History of the Marine Sciences)
RESTRICTIONS: E3
FORMATS: Seminar | Studio

BIOL 4806 Independent Research I

CREDIT HOURS: 3
Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.
CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see
https://www.dal.ca/faculty/science/biology/programs/undergraduate.html
PREREQUISITES: Signature required
FORMATS: Other (explain in comments)

BIOL 4807 Independent Research II

CREDIT HOURS: 3
Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.
CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see
https://www.dal.ca/faculty/science/biology/programs/undergraduate.html
PREREQUISITES: Signature required
FORMATS: Other (explain in comments)

BIOL 4809 Independent Research III

CREDIT HOURS: 3
Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.
CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For more information see
https://www.dal.ca/faculty/science/biology/programs/undergraduate.html
PREREQUISITES: Signature required
FORMATS: Other (explain in comments)

BIOL 4811 Special Topics

CREDIT HOURS: 3
Enables students to study an area of Biology or Marine Biology not covered in other courses. Students should consult with the faculty member to arrange the topic of study and develop an outline of course content, which must be approved by the Chair of the Biology Undergraduate Curriculum Committee.
CALENDAR NOTES: Registration in Special Topics can only be approved by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html
PREREQUISITES: Signature required

BIOL 4850 Geographic Information Science Research Project

CREDIT HOURS: 3
Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.
COREQUISITES: ERTH 4520.03/GEOG 4520.03
PREREQUISITES: ENVS 3500 or ERTH3500 or GEOG 3500
CROSSLISTED: ENVS 4850/ERTH 4850/GEOG 4850/SCIE 4850
RESTRICTIONS: This course is restricted to 3rd and 4th year students.

BIOL 4880 Communicating science for societal impact

CREDIT HOURS: 3
This class is for students interested in communicating scientific content with relevance to society, contributing to positive change. We aim to build skills to reach media, decision makers, regulators, and the public. The emphasis will be on communicating findings effectively and developing critical skills in science communication and scientific leadership.
CROSSLISTED: MARI 4880
RESTRICTIONS: E3
FORMATS: Lecture | Tutorial | Experiential Learning

BIOL 4901 Honours Research and Thesis I

CREDIT HOURS: 3
This course is required of, and restricted to, all Biology Honours programs in which Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (BIOL 4901.03 and BIOL 4902.03) are taken in the students' final year.
CALENDAR NOTES: BIOL 4901.03 and BIOL 4902.03 must be taken in consecutive fall/winter terms, or winter/fall terms (co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated.
RESTRICTIONS: Students in the Biology Honours Programme, normally in their final year of study.
EXCLUSIONS: BIOL 4900.06, MARI 4900.06
FORMATS: Other (explain in comments)

BIOL 4902 Honours Research Thesis II

CREDIT HOURS: 3
This course is required of, and restricted to, all Biology Honours programs in which Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (BIOL 4901.03 and BIOL 4902.03) are taken in the students' final year.
CALENDAR NOTES: BIOL 4901.03 and BIOL 4902.03 must be taken in consecutive fall/winter terms, or winter/fall terms (co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated.
RESTRICTIONS: Students in the Biology Honours Programme, normally in their final year of study.
EXCLUSIONS: BIOL 4900.06, MARI 4900.06
FORMATS: Other (explain in comments)

BIOL 8891 Co-op Work Term I

CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.03

BIOL 8892 Co-op Work Term II

CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.03, BIOL 8891.00

BIOL 8893 Co-op Work Term III

CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.03, BIOL 8892.00

BIOL 8894 Co-op Work Term IV
CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.03, BIOL 8893.00

Introduction

Chemistry is often called the central science because of its relevance to so many other disciplines. Understanding the composition and properties of matter, as well as the manner in which one substance is transformed into another, is essential to the study of our physical and natural worlds. As such, chemistry is often a starting point for many different careers in science. A variety of programs are available, ranging from focused studies to interdisciplinary options to suit the interests of the student.

A chemistry degree involves considerable breadth of training in the major branches of chemistry. These include organic, inorganic, physical, analytical and biological chemistry. In addition to establishing a solid foundation in the fundamental principles of chemistry, students who undertake a chemistry degree develop essential skills that include problem solving, critical thinking, organization, data analysis, and written and oral communication. The laboratories associated with courses develop the necessary experience with laboratory procedures, equipment and safety, and serve to reinforce the concepts learned in lecture.

Degree Programs

The Department of Chemistry offers the following degree programs in Chemistry

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Chemistry
- Minor in Chemistry

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment in the Faculty of Science, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects; otherwise the student should consult the calendar of the appropriate year.

The 120 credit hour Concentrated Honours and Major degrees, as well as corresponding Co-op programs, are accredited by the Canadian Society for Chemistry (CSC). CSC accreditation ensures that graduates of these programs have met certain criteria concerning the quantity and quality of their instruction. It qualifies such graduates for membership in the CSC and to practice chemistry as professionals.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Chemistry undergraduate academic advisor.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies.

Staff

Dean

Macdonald, C. L. B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry).

Chairperson of Department

Andreas, H. A., BSc, PhD (Calgary).

Undergraduate Advising

To contact a Chemistry academic advisor, please go to the Chemistry Main Office (Chemistry Room 212), phone 902-494-3305 or visit the Chemistry Website (www.dal.ca/faculty/science/chemistry.html)

Professors Emeriti

Aue, W. A., PhD (Vienna). FCIC**.**
Boyd, R. J., BSc (UBC), PhD (McGill). FCIC.
Burnell, D. J., BSc, MSc (Carleton), PhD (UNB).
Kwak, J. C. T., BSc, MSc, PhD (Amsterdam). FCIC.
White, M.A., BSc (Western), PhD (McMaster). OC, FRSC, Harry Shirreff Professor of Chemical Research (Emerita) and cross-appointment with Physics and Atmospheric Science.

Professors

Andreas, H. A., BSc, PhD (Calgary).
Bearne, S. L., BSc (Acadia), PhD (Toronto), MDCM (McGill). Cross-appointment from Biochemistry and Molecular Biology.
Dasog, M., BSc (Saskatchewan), PhD (Alberta). Cross-appointment with Engineering. Izaak Walton Killam Memorial Research Chair and Tier 1 CRC in Advanced Design for Water-Energy Sustainability.
Doucette, A. A., BSc (Dalhousie), PhD (Alberta).
Freund, M., BSc, PhD (Florida). Cross-appointments with Physics and Atmospheric Science and Electrical and Computer Engineering. Harry Shirreff Chair of Chemical Research & Director of the Clean Technologies Research Institute.
Jakeman, D. L., BSc, PhD (Sheffield). Cross-appointment from College of Pharmacy.
Johnson, E. R., BSc (Carleton), PhD (Queen's). Cross-appointment with Physics and Atmospheric Science. Herzberg-Becke Chair in Theoretical Chemistry.
Macdonald, C. L. B., BSc, PhD (Dalhousie). Dean, Faculty of Science.
Obrovac, M. N., BSc (Simon Fraser), MSc, PhD (Dalhousie). Cross-appointment with Physics and Atmospheric Science.
Rainey, J. K., BSc (Guelph), MSc, PhD (Toronto). Cross-appointment from Biochemistry and Molecular Biology.
Speed, A. W., BSc (Dalhousie), PhD (Harvard)**.**
Stradiotto, M., BSc, PhD (McMaster). FRSC, Arthur B. MacDonald Research Chair (CRC Tier-I Equivalent) and Alexander McLeod Professor of Chemistry.
Thompson, A., BSc (Leicester), PhD (Sheffield). Tier 1 Canada Research Chair in Pyrrole Chemistry for Chemical Biology and Energy.
Turculet, L., BSc (MIT), PhD (Berkeley). Faculty of Science Killam Professorship.
Zhang, P., BSc, MSc (Jilin Univ., China), PhD (Western). Cross-appointment with School of Biomedical Engineering. Faculty of Science Killam Professorship.
Zwanziger, J. W., BA (Chicago), PhD (Cornell). Cross-appointment with Physics and Atmospheric Science.

Associate Professors

Charron, C. L., BSc (Dalhousie), PhD (Western).
Cozens, F. L., BSc (York), PhD (Toronto).

Assistant Professors

Adibnia, V., BEc (Univ. of Tehran, Iran), PhD (McGill). Cross-appintment from School of Biomedical Engineering. Tier II Canada Research Chair in Functional Polymeric Biomaterials.
Baker, A., BSc (Dalhousie), PhD (Toronto).
Chisanga, M., BSc (Copperbelt Univ., Zambia), MSc, PhD (Manchester).
MacDonell, R. J., BSc (Carleton), PhD (Ottawa). Cross-appointment with Physics and Atmospheric Science.
Metzger, M., BSc, PhD (Technical Univ. of Munich, Germany). Cross-appointment from Physics and Atmospheric Science. Herzberg-Dahn Chair for Advanced Battery Research.
Veinot, A., BSc (Acadia), MSc (SMU), PhD (Queen's).
Xiao, P., BSc (Beihang Univ., China), PhD (Univ. of Texas at Austin). Cross-appointment from Physics and Atmospheric Science.
Yang, C., BSc (Nanjing Univ., China), MSc, PhD (Chinese Academy of Science). Cross-appointment from Physics and Atmospheric Science. Tesla Canada Chair.

University Teaching Fellows

Alemán Milán, G., BEng (Superior Polytechnic Institute of Havana, Cuba), MSc, PhD (Dalhousie).
Crane, A. K., BSc (Memorial), PhD (UBC).
MacDonald, J. L., BSc, BTech (Cape Breton Univ.), PhD (Dalhousie).
Moya Barrios, R., BSc (Univ. of Havana, Cuba), MSc, PhD (Dalhousie).

Senior Instructors

Aish, G. A., ACBT dip. (Camosun College), BSc, MSc (Dalhousie).
Bates, J. I., BSc (Queen's), PhD (UBC).
Snitynsky, R., BSc, BEd (Saskatchewan), MSc (Alberta).
Whalen, J. M., BSc (Dalhousie), PhD (McMaster)**.**

Instructors

Wall, M., BTech (CBU), PhD (Dalhousie).

Adjunct (FGS)

Boyd, R. J., BSc (UBC), PhD (McGill). FCIC.
Chitnis, S. S., BASc (McMaster), PhD (Victoria)**.**
Grindley, T. B., BSc, MSc, PhD (Queen's). FCIC.
Land, M. A., BSc, MSc (SMU), PhD (Carleton).
Matta, C., BPharm Sci (Alexandria Univ., Egypt), Graduate Diploma in Health and Hospital Administration (National Institute of Management, Egypt), PhD (McMaster). Mount Saint Vincent University.
Mutus, B., BSc, MSc (Waterloo), PhD (Manitoba).
Pinto, D. M., BSc (McGill), PhD (Alberta). Institute for Marine Biosciences.
Ramaley, L., BA (Colorado), MA, PhD (Princeton). FCIC.
Werner-Zwanziger, U., Vordiplom, Diploma, PhD (Westfälische Wilhelms-Universität Münster, Germany).

Adjunct (Retired)

Dahn, J. R., BSc (Dalhousie), MSc, PhD (UBC). Cross-appointment from Physics and Atmospheric Science. Principle Investigator - NSERC/Teslsa Canada/Dalhousie Alliance Grant.
Schepp, N. P., BSc, PhD (Toronto).
Wentzell, P. D., BSc (Dalhousie), PhD (Michigan State).
White, M. A., BSc (Western), PhD (McMaster). Cross-appointment with Physics and Atmospheric Science. OC, FRSC, Harry Shirreff Professor of Chemical Research (Emerita).

BSc or BA (120 credit hour) Concentrated Honours in Chemistry

Students who want a challenging program resulting in a broad and in-depth background in Chemistry that includes an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are

particularly encouraged to consider the Honours program. Honours students complete a minimum of 54 credit hours above the 1000 level in Chemistry with a minimum GPA of 3.0 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of CHEM 4902.03 and CHEM 4903.03. The Honours program is accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Chemistry. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Chemistry should consult with a Chemistry Academic Advisor early in their studies.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Concentrated Honours program in Chemistry must complete the following courses:

1000 level

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You, or equivalent

2000 level

- CHEM 2101.03: Introductory Inorganic Chemistry
- CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I and CHEM 2304.03: Introductory Physical Chemistry II
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- CHEM 3103.03: Intermediate Inorganic Chemistry
- CHEM 3203.03: Advanced Analytical Laboratory
- CHEM 3301.03: Quantum Mechanics and Chemical Bonding
- CHEM 3401.03: Intermediate Organic Chemistry or CHEM 3404.03: Intermediate Organic Chemistry - Physical Organic and Spectroscopy
- CHEM 3601.03: Chemistry of Living Systems

4000 level

- CHEM 4902.03: Honours and Major Research Project I and CHEM 4903.03: Honours and Major Research Project II (minimum grade of B-)

Additional Requirements

- MATH 1030.03 (or MATH 2030.03): Matrix Theory and Linear Algebra I and MATH 2001.03: Intermediate Calculus
- A minimum of 15 additional credit hours in CHEM courses at or above the 2000 level
- Combined lab hours across CHEM 3XXX and 4XXX must be >190.
- Minimum grade of C in all Honours subject courses (except CHEM 4902.03 and CHEM 4903.03, which require a minimum grade of B-)

BSc or BA (120 credit hour) Combined Honours in Chemistry and another subject

Students who wish to study Chemistry in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer

Science, or the College of Sustainability. Chemistry may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. The Combined Honours program is not accredited by the Canadian Society for Chemistry.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Chemistry, this requirement is satisfied through CHEM 4902.03 and CHEM 4903.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Chemistry as the primary subject. See Co-operative Education Program.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Combined Honours program in Chemistry and another subject must complete the following:

Chemistry as the primary subject

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- CHEM 2101.03: Introductory Inorganic Chemistry
- CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I and CHEM 2304.03: Introductory Physical Chemistry II
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- A minimum of 18 additional CHEM credit hours above the 2000 level (including CHEM 4902.03 and CHEM 4903.03 if applicable).

Chemistry as the secondary subject

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- A minimum of 30 CHEM credit hours above the 1000 level, including at least 18 CHEM credit hours above the 2000 level.

BSc or BA (120 credit hour) Major in Chemistry

The 120 credit hour Major is suited to students who want to focus on Chemistry, but wish to have a program that is somewhat less constrained than the Honours program. Chemistry Majors complete a minimum of 45 credit hours in Chemistry courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories and research project classes. Like the Honours degree, the 120 credit hour Major program is accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Chemistry. See Co-operative Education Program.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Major program in Chemistry must complete the following courses:

1000 level

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- PHYC 1190.03/PHYC 1290.03: Introduction to Physics, or PHYC 1310.03/PHYC 1320.03: Physics In and Around You, or equivalent

2000 level

- CHEM 2101.03: Introductory Inorganic Chemistry
- CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I and CHEM 2304.03: Introductory Physical Chemistry II
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- CHEM 3103.03: Intermediate Inorganic Chemistry
- CHEM 3203.03: Advanced Analytical Laboratory
- CHEM 3305.03: Materials Science
- CHEM 3401.03: Intermediate Organic Chemistry or CHEM 3404.03: Intermediate Organic Chemistry - Physical Organic and Spectroscopy
- CHEM 3601.03: Chemistry of Living Systems

Additional Requirements

- Six additional hours from a combination of MATH 1030.03, MATH 2XXX, any STAT course, CSCI 1100.03, CSCI 1101.01, CSCI 1105.03, CSCI 1110.03
- A minimum of 12 additional CHEM credit hours at or above the 2000 level, including at least 3 credit hours at or above the 3000 level
- Combined lab hours across CHEM 3XXX and 4XXX must be >190.

BSc or BA (120 credit hour) Double Major in Chemistry and another subject

The Double Major degree program allows students to combine a study of Chemistry with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Chemistry may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA. The Double Major program is not accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in BSc Double Major with Chemistry as the primary subject. See Co-operative Education Program.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Chemistry and another subject must complete the following:

Chemistry as the primary subject

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I or MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 2101.03: Introductory Inorganic Chemistry and CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I or CHEM 2304.03: Introductory Physical Chemistry II
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy
- A minimum of 18 additional CHEM credit hours above the 2000 level.

Chemistry as the secondary subject

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I

- MATH 1010.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I or MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences
- A minimum of 30 CHEM credit hours above the 1000 level, including at least 18 CHEM credit hours above the 2000 level.

BSc or BA (90 credit hour) Minor in Chemistry

The 90 credit hour degree with Minor in Chemistry is appropriate for students who want to study some Chemistry but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Chemistry. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies and is not accredited by the Canadian Society for Chemistry. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Chemistry is usually the preferred option for students who wish to combine studies in Chemistry with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

See Minor in Chemistry section.

Minor in Chemistry

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Chemistry is available to students in the Faculty of Science.

Requirements

- A minimum of 18 credit hours in Chemistry (CHEM) courses at the 2000 level or higher to a maximum of 36 credit hours, not including any course that cannot be used toward a Chemistry degree

Please note that entry into upper level Chemistry (CHEM) courses requires completion of six credit hours at the first year level (CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium)

Contact Chemistry for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Chemistry

Co-op Academic Advisor: Dr. Mark Whalen (marc.whalen@dal.ca)

The Science Co-op degree option enables students to apply their academic knowledge directly while providing them with work experience that assists in making educated career choices. Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Chemistry, or in Combined Honours or Double Major programs with Chemistry as the primary subject. Further information details on Science Co-op can be found in the academic calendar under Work-Integrated Learning & Co-operative Education and the Co-op office's website at dal.ca/wil.

For more information on Co-op Education in Chemistry please see the departmental page
www.dal.ca/faculty/science/chemistry/programs/undergraduate-studies/degree-programs/co-operative-education.html

Minors available to students in Chemistry

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Chemistry may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Chemistry, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements is available. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to student enrolled in a BSc or BA in Chemistry include:

- Certificate in Materials Science
- Certificate in Medicinal Chemistry
- Certificate in Science Leadership and Communication

BSc/BEng Concurrent Program (Chemistry)

Chemistry is known as the central science because its main theme is transformations of matter and energy that are at the core of many fields of science and engineering. A strong background in Chemistry has direct relevance to fields such as biological/biomedical engineering, chemical engineering, environmental and resource engineering, food science technology, materials engineering, mining/petroleum engineering and process engineering. Following is the recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Chemistry. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Chemistry. A concurrent BEng/BSc Major or Honours in Chemistry (120 credit hours) can be designed for interested candidates.

	Fall	Winter
Registered in BEng		
Year 1	CHEM 1021 *Engineering Chemistry I*	CHEM 1022 *Engineering Chemistry II*
	MATH 1280 *Engineering Math I*	MATH 1290 *Engineering Math II*
	ENGI 1103 *Engineering Design I*	ENGI 1203 *Engineering Mechanics I: Statics*
	PHYC 1190 *Physic I*	PHYC 1290 *Physics II*
	ENGM 1081 *Computer Programming*	ENGM 1041 *Applied Linear Algebra*
	CPST 1103 *Technical Communications I*	CPST 1203 *Technical Communications II*
Apply for admission into concurrent BEng/BSc [a]		
Year 2	ENGM 2101 *Applied Vector Calculus*	ENGM 2022 *Applied Differential Equations*
	ENGM 2032 *Applied Probability & Statistics*	HSTC 1801 *History of Engineering II*
	[b] Writing course (Humanities)	[d] One Engineering elective
	Two of CHEM 2201, CHEM 2301, CHEM 2401	**Two of CHEM 2101, CHEM 2304, CHEM 2402**
	One social science course[c]	**One social science or humanitiescourse**[c]
Year 3	IENG 2005 *Engineering economics*	ENGI 2203 *Engineering design II*

ECED 2000 *Electric circuits*	[d] Two Engineering electives
ENGI 2102 *Thermo-Fluid Engineering I*	**One 2000 level (or higher) CHEM course**
One 2000 level (or higher) CHEM course	**One Science/FASS course (may be CHEM)**
One Science/FASS course (may be CHEM)	

Graduate with Diploma in Engineering and BSc 90 credit degree

Year 4 Continue in BEng program

Year 5 Complete BEng program

[a] To meet the BSc 90 credit hour Minor in Chemistry requirements, students complete 30 credit hours in addition to their Engineering requirements: a minimum of 18 credit hours of CHEM courses at or above the 2000 level, 6 credit hours of social science/humanities courses, and 6 additional credit hours in Science/FASS courses (which may be CHEM). Students may not select CHEM courses that cannot be counted toward a Chemistry Major degree.

[b] Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements [College of Arts and Science]

[c] Choose from CANA, CTMP, ECON, EMSP, EURO, GWST, HIST, HSTC, INTD, POLI, PSYO, SOSA, SUST for social science courses. Choose from ARBC, CANA, CHIN, CLAS, CTMP, CRWR, EMSP, EURO, SWST, GERM, HIST, HTSC, ITAL, PERF, PHIL, RELS, RUSN, SPAN and THEA for humanities courses

[d] See Engineering section of the calendar for details

Courses

Courses

Course Notes

Undergraduate courses that are regularly offered by the Chemistry Department are briefly described in this section. More detailed information can be found on the departmental web site at http://chemistry.dal.ca. Students should note the following.

- Not all courses are offered every year. Please consult the Academic Timetable for the details of courses offered in a particular academic year.
- The first digit of the course number is the year of a student's program that a course would typically be taken, but this is not meant to be restrictive if a student has the necessary prerequisites or permission of the instructor. For example, a 3000 level course can be taken in the fourth year and 4000 level course can be taken in the third year.
- The second digit of the course number defines the general sub-discipline:

0 = General Chemistry

1 = Inorganic Chemistry	5 = Interdisciplinary
2 = Analytical Chemistry	6 = Biological Chemistry
3 = Physical Chemistry	8,9 = Research Classes
4 = Organic Chemistry	

- The extension following the course number (e.g. XXXX.03) indicates the number of credit hours assigned to the course (e.g. three credit hours). Note that six credit hours are equivalent to one credit.
- All chemistry courses, unless stated otherwise, have a minimum grade requirement of C- for their prerequisite chemistry courses. Students with grades below C- in the prerequisite chemistry courses can only register with the permission of the instructor for the course.
- Unless stated otherwise, the minimum grade requirement for credit in a chemistry course is a D, except for Honours programs, where the minimum grade requirement for chemistry credit is a C (B- for Honours Qualifying Examination).

Chemistry Resource Centres

First-Year and Advanced Chemistry Resource Centres are located in Rooms 122 and 115, respectively. The former is staffed with advanced undergraduate and graduate students to help with both lab and course material. First-year students are encouraged to make use of the Concept Room, which is located in the First-Year Resource Centre. Here, first-year Instructors will be available at regularly scheduled times to provide aid with course material in a small group or one-on-one atmosphere.

The First-Year Chemistry Resource Centre also houses a number of computers with chemistry-specific programs for students to use. Additionally, there is a selection of resource materials such as molecular model kits and reference texts available to students.

Course Descriptions

CHEM 1001 The Chemical World

CREDIT HOURS: 3
This class is intended for students who wish to improve their scientific literacy. The class will provide a non-mathematical introduction to some fundamental concepts of chemistry and will explore various relevant topics (e.g., environment, energy, health) to make connections to the chemical world around us.
CALENDAR NOTES: This course is intended for non-Chemistry majors. CHEM 1001 does not serve as a prerequisite for any other chemistry class, nor does it count as a chemistry credit towards any degree that requires CHEM 1011/1021 or 1012/1022.
EXCLUSIONS: Ordered exclusion with CHEM 1011/1021 and/or 1012/1022. Students CAN take CHEM 1011/1021 and/or CHEM 1012/1022 AFTER having completed CHEM 1001, but cannot take CHEM 1001 for credit after having completed CHEM 1011/1021 and/or CHEM 1012/1022.
FORMATS: Lecture | Tutorial

CHEM 1011 Concepts in Chemistry: Structure and Reactivity

CREDIT HOURS: 3
The electronic structures of atoms and molecules are used to explain the reactivity and properties of chemicals. Topics include atomic structure, bonding models, structure and shape of molecules and ions, and an introduction to reactivity and equilibrium. It is strongly recommended that students have Nova Scotia grade 12 chemistry or equivalent before taking this course. COORDINATOR: A. Crane
EXCLUSIONS: CHEM 1021.03
FORMATS: Lecture | Lab

CHEM 1012 Concepts in Chemistry: Energy and Equilibrium

CREDIT HOURS: 3
Continuing from Chem 1011, the principles of thermodynamics and kinetics are used to explain chemical reactivity and the principles of organic chemistry are used to develop an understanding of organic synthesis. COORDINATOR: A. Crane
PREREQUISITES: CHEM 1011.03 or equivalent
EXCLUSIONS: CHEM 1022.03
FORMATS: Lecture | Lab

CHEM 1021 Engineering Chemistry I

CREDIT HOURS: 3
The electronic structures of atoms and molecules are used to explain the reactivity and properties of chemicals. Topics include atomic structure, bonding models, structure and shape of molecules and ions, and an introduction to reactivity and equilibrium. It is strongly recommended that students have Nova Scotia grade 12 chemistry or equivalent before taking this course. COORDINATOR: A. Crane
EXCLUSIONS: CHEM 1011.03
FORMATS: Lecture | Lab

CHEM 1022 Engineering Chemistry II

CREDIT HOURS: 3
Continuing from Chem 1021, the principles of thermodynamics and kinetics are used to explain chemical reactivity and the principles of organic chemistry

are used to develop an understanding of organic synthesis. COORDINATOR: A. Crane
PREREQUISITES: CHEM 1021.03 or equivalent
EXCLUSIONS: CHEM 1012.03
FORMATS: Lecture | Lab

CHEM 2101 Introductory Inorganic Chemistry

CREDIT HOURS: 3
The fundamentals of inorganic chemistry are covered. Specific topics include ionic bonding and the nature of solids, the structure of atoms and simple bonding theory, coordination chemistry of the transition metals, and selected topics in main group chemistry. The preparation, analysis and observation of inorganic compounds are the laboratory assignments.
PREREQUISITES: CHEM 2401.03 or equivalent (grade of C+ or better); or permission of the instructor.
FORMATS: Lecture | Lab

CHEM 2201 Introductory Analytical Chemistry

CREDIT HOURS: 3
The basic principles of analytical chemistry are presented, including chemical and instrumental methods of analysis. Topics include chemical equilibria, spectroscopy, electrochemistry and chromatography. Laboratory experiments explore all of these topics, and illustrate the techniques with practical examples.
PREREQUISITES: CHEM 1011.03 and CHEM 1012.03 or equivalent (grade of C- or better)
FORMATS: Lecture | Lab

CHEM 2301 Introduction to Physical Chemistry I

CREDIT HOURS: 3
The physical principles underlying chemical systems and reactivity are explored, with an emphasis on the forces between molecules and the properties of matter. Principles of thermodynamics are presented, including thermochemistry, entropy and free-energy relationships. Applications include phase equilibria, chemical equilibria, solutions, colligative properties and electrochemistry.
PREREQUISITES: [CHEM 1011.03 and CHEM 1012.03 or equivalents] and [MATH 1000.03 and MATH 1010.03 or equivalent] and [PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03] (all grade of C+ or better)
FORMATS: Lecture | Lab

CHEM 2304 Introductory Physical Chemistry II

CREDIT HOURS: 3
The physical properties of chemical systems at the level of atoms and molecules are examined. Topics include the quantum mechanical description of atoms and molecules, chemical bonding, experimental and computational methods for studying molecular systems, and the kinetics of chemical processes.
PREREQUISITES: [CHEM 1011.03 and CHEM 1012.03 or equivalents] and [MATH 1000.03 and MATH 1010.03 or equivalent] and [PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03] (all grade of C+ or better)
FORMATS: Lecture | Lab

CHEM 2401 Introductory Organic Chemistry: Structure, Stereochemistry, Concepts of Reactions and Mechanisms

CREDIT HOURS: 3
Organic chemistry is introduced through an examination of bonding, hybridization, structure, conformation and stereochemistry. Introduction to alkanes, alkenes, alkynes, alkyl halides and alcohols is discussed. Reactions of alkenes, alkynes and alkyl halides will be examined with an emphasis on mechanisms. Early synthetic sequences will be introduced, in multistep synthetic sequences.
PREREQUISITES: CHEM 1011.03 and CHEM 1012.03 or equivalents (grade of C+ or better).
FORMATS: Lecture | Lab

CHEM 2402 Introductory Organic Chemistry: Reactivity of Functional Groups and Spectroscopy

CREDIT HOURS: 3
Building on CHEM2401 the properties and reactions of alcohols, ethers, amines, nitriles, carbonyls and aromatic compounds are examined. The reactions are used in synthetic sequences, and reaction mechanisms are stressed. Spectroscopic methods (MS, IR, 1H and 13C NMR) are introduced and used to determine the structures of organic compounds.
PREREQUISITES: CHEM 2401.03 (grade of C+ or better)
FORMATS: Lecture | Lab

CHEM 2488 Our Organic World

CREDIT HOURS: 3
Pharmaceuticals, plastics, and some fuels are organic compounds with dramatic roles in our health and economy. Drugs or poisons? Caraway or spearmint? Bendable or stiff? Aspects of organic chemistry are surveyed so that issues such as these can be debated and the chemical facts applied to the world around us.
PREREQUISITES: CHEM 1011.03 or equivalent
EXCLUSIONS: CHEM 2488.03 does not serve as a prerequisite for any other chemistry class nor does it count as a chemistry credit towards any degree with a major in chemistry.
FORMATS: Lecture

CHEM 3103 Intermediate Inorganic Chemistry

CREDIT HOURS: 3
Modern bonding theories are developed using symmetry concepts. These are applied to understanding the molecular structure, reactivity and spectroscopic properties of inorganic compounds, including coordination compounds and organometallic complexes. The compounds prepared in the laboratory introduce more advanced synthetic procedures for the preparation of inorganic compounds.
PREREQUISITES: CHEM 2101.03 (grade of C- or better). Recommended: CHEM 2402.03.
EXCLUSIONS: CHEM 3101.03, CHEM 3102.03
FORMATS: Lecture | Lab

CHEM 3201 Analytical Mass Spectrometry and Separations

CREDIT HOURS: 3
The most commonly employed instrumental techniques in chemical analysis use spectroscopy in some form or involve separations. Qualitative and quantitative analysis and the instrumentation involved are discussed in some detail for mass spectrometry. Methods of separation including solvent extraction and the various types of chromatography are presented. Laboratory experiments illustrate the above techniques with practical examples.
PREREQUISITES: CHEM 2201.03 (grade of C- or better)
EXCLUSIONS: CHEM 3203
FORMATS: Lecture | Lab

CHEM 3203 Advanced Analytical Laboratory

CREDIT HOURS: 3
An introduction to the fundamentals of instrumental chemical analysis is presented in a laboratory environment, with emphasis on selection of appropriate analytical techniques, sample treatment, data handling, and communication of experimental results. Instrumental techniques include chromatography, spectrophotometry, mass spectrometry, and electrochemistry, with applications in biological, environmental, forensic and health-related areas.
PREREQUISITES: CHEM 2201.03 (grade of C- or better)
EXCLUSIONS: CHEM 3201
FORMATS: Lecture | Lab | Tutorial

CHEM 3301 Quantum Mechanics and Chemical Bonding

CREDIT HOURS: 3
The fundamentals and postulates of quantum mechanics are developed from first principles, with applications to illustrative model systems, vibrations, rotations, atoms, and molecules.
PREREQUISITES: MATH 1030.03, MATH 2001.03 and CHEM 2304.03 (all grade of C+ or better), and (PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03) grade C+ or better.
FORMATS: Lecture

CHEM 3305 Materials Science

CREDIT HOURS: 3
This course emphasizes understanding the principles behind materials' physical properties, such as thermal and mechanical stability, and electrical and optical properties. Materials discussed include liquid crystals, perfect crystals, defective solids, polymers and glasses. Applications, such as the use of materials in displays, gas sensors, and lasers, are discussed.
CALENDAR NOTES: This course is the same as PHYC 3303, except CHEM 3305 has a lab and PHYC 3303 has a major term paper.
PREREQUISITES: CHEM 1012.03, CHEM 2301.03, and CHEM 2304.03 (all grade C+ or better), or PHYC 3200.03 (PHYC 3200.03 can be a co-requisite) AND PHYC 1190.03 and PHYC 1290.03 (or PHYC 1310.03 and PHYC 1320.03), both with a grade of C+ or better.
EXCLUSIONS: PHYC 3303.03, CHEM 3303.03
FORMATS: Lecture | Lab

CHEM 3306 Introduction to Quantum Chemistry

CREDIT HOURS: 3
The fundamentals of quantum chemistry are presented, with an emphasis on covalently bound molecules and their physical properties. Practical quantum chemistry tools are discussed. Lectures are supplemented by laboratory exercises with an introduction to modern computer codes.
CALENDAR NOTES: Can be used for the 3rd year physical chemistry requirement for both the BSc and Honours chemistry degrees.
COREQUISITES: None
PREREQUISITES: CHEM 2304 with C+ or better.
CROSSLISTED: None
EXCLUSIONS: None
FORMATS: Lecture | Lab

CHEM 3401 Intermediate Organic Chemistry

CREDIT HOURS: 3
Topics presented include aromatics, heterocycles, amines, enolate anions and other methods for forming C-C bonds, concerted reactions, carbohydrates and some heteroatom chemistry. There is a continuing emphasis on the principles of mechanistic organic chemistry. Students work independently in the laboratory on the preparation of organic compounds.
PREREQUISITES: CHEM 2402.03 (grade of C+ or better)
FORMATS: Lecture | Lab

CHEM 3404 Intermediate Organic Chemistry - Physical Organic and Spectroscopy

CREDIT HOURS: 3
This course provides an introduction to concepts in physical organic chemistry that are used to explain structure reactivity relationships. Spectroscopic techniques are also described with an emphasis on NMR spectroscopy. The organic laboratory will focus on organic compound separation and identification.
PREREQUISITES: CHEM 2402.03 (grade of C+ or better)
EXCLUSIONS: CHEM 3402.03
FORMATS: Lecture | Lab

CHEM 3601 Chemistry of Living Systems

CREDIT HOURS: 3
The chemical principles governing a wide variety of biological processes are discussed. Structure and mechanism are emphasized in explanations and predictions of the behavior of organic compounds in nature. Specific topics include proteins, activation of carboxyl groups, peptide synthesis and biosynthesis, enzyme catalysis, coenzymes and prochirality.
PREREQUISITES: CHEM 2402.03 (grade of C+ or better)
FORMATS: Lecture | Lab

CHEM 3801 Experiential Learning in Chemistry

CREDIT HOURS: 3
This is an outside-the classroom learning experience in which students work to acquire knowledge and skills relevant to chemistry under the direction of a supervisor. Suitable work environments can be located at Dalhousie or in a commercial/industrial setting.
CALENDAR NOTES: To register for this course, each student must first find a supervisor willing to supervise the chemistry work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator.
PREREQUISITES: At least four of the following courses: CHEM 2101.03, CHEM 2201.03, CHEM 2301.03, CHEM 2304.03, CHEM 2401.03 and CHEM 2402.03.
RESTRICTIONS: Restricted to students in third year and above.
EXCLUSIONS: The following may not be used towards CHEM 3801: work that is part of another scheduled course at a learning institution; study that would qualify for Special Topics course; co-op work terms; and paid work.

CHEM 4101 Advanced Main Group Chemistry

CREDIT HOURS: 3
Following a brief overview of the fundamental aspects of preparation, structure and bonding for familiar systems, selected topics are examined in some detail. An emphasis is placed on novel structure and bonding arrangements in comparison with carbon chemistry.
PREREQUISITES: CHEM 3103.03 (grade of C- or better)
CROSSLISTED: CHEM 5101.03
FORMATS: Lecture

CHEM 4102 Advanced Transition Metal Chemistry

CREDIT HOURS: 3
Various themes of modern transition metal chemistry are examined, including but not restricted to: fundamental structure and bonding; spectroscopic characterization methods; as well as reactivity and reaction mechanisms.
PREREQUISITES: CHEM 3103.03 (grade of C- or better)
EXCLUSIONS: CHEM 5102.03
FORMATS: Lecture

CHEM 4105 Inorganic Materials Synthesis

CREDIT HOURS: 3
Preparation of advanced functional inorganic materials for energy, optoelectronics, catalysis and other applications are presented. Topics in the course include solid-state chemistry, sol-gel synthesis, nucleation and growth of nanoparticles, thin film fabrication, and soft lithography.
PREREQUISITES: CHEM 2101 and CHEM 2301
EXCLUSIONS: E1 and E2
FORMATS: Lecture

CHEM 4120 Advanced Organometallic Chemistry

CREDIT HOURS: 3
Catalytic and stoichiometric transition metal mediated reactions of fundamental significance in synthetic chemistry are surveyed. Molecular orbital theory is used to understand structure and bonding in metal complexes and the reactivity properties of these species. Relevant examples from the current chemical literature are introduced.
PREREQUISITES: CHEM 3103.03 (grade of C- or better)
FORMATS: Lecture

CHEM 4201 Advanced Topics in Separations

CREDIT HOURS: 3
Classical methods (solvent extraction and ion exchange) are reviewed for pre-concentration of metal ions prior to their determination by spectroscopic methods. Chromatographic topics include gas, liquid, and supercritical chromatography with emphasis on multidimensional techniques. Examples in environmental and biological analysis are drawn from the current literature.
PREREQUISITES: CHEM 2201.03
CROSSLISTED: CHEM 5201.03
FORMATS: Lecture

CHEM 4205 Chemometrics

CREDIT HOURS: 3
The application of statistical tools to univariate and multivariate chemical measurements is explored. Topics include descriptive statistics, probability and probability distributions, propagation of errors, hypothesis testing, analysis of variance, experimental design, univariate and multivariate calibration, pattern recognition, exploratory data analysis and mixture analysis. Students are introduced to programming in MatLab.
PREREQUISITES: CHEM 2201.03 (grade of C- or better)
CROSSLISTED: CHEM 5205.03
FORMATS: Lecture

CHEM 4206 Analytical Mass Spectrometry

CREDIT HOURS: 3
This course offers a thorough treatment of modern analytical mass spectrometry instrumentation, with applications towards chemical and biochemical analysis. Specific examples include characterization of pharmaceuticals and biomolecules (proteins, carbohydrates), and discussion of field portable instruments. Reaction mechanisms and spectral interpretation are discussed, but are not emphasized in this applied course.
PREREQUISITES: CHEM 2201.03 (grade of C- or better)
EXCLUSIONS: CHEM 5206.03
FORMATS: Lecture

CHEM 4301 Theory of Chemical Bonding

CREDIT HOURS: 3
This course develops molecular orbital theory from both qualitative and quantitative perspectives. Topics include the basic principles of the LCAO (Linear Combination of Atomic Orbitals) MO method, qualitative understanding of MOs in simple molecules, orbital symmetries, through to state-of-the-art techniques for computer computations of molecular properties.
PREREQUISITES: CHEM 3301.03 (grade of C- or better)

CROSSLISTED: CHEM 5301.03
FORMATS: Lecture

CHEM 4302 Introduction to Surface Science

CREDIT HOURS: 3
The fundamental theory and principles of surface science are introduced. Topics include the atomic structure of solid surfaces, thermodynamic and kinetic properties of surfaces, electronic and bonding behavior of surfaces, catalytic processes by surfaces, and typical surface analysis techniques.
PREREQUISITES: CHEM 2301.03 and CHEM 2304 or PHYC 3200.03 and PHYC 3640.03
CROSSLISTED: CHEM 5302.03
FORMATS: Lecture

CHEM 4311 Fundamental and Applied Electrochemistry

CREDIT HOURS: 3
This course provides a broad introduction to the fundamentals of electrochemistry, including electrochemical theory, double layer modelling and electrochemical methods. Additionally, important electrochemical applications are discussed, including corrosion, energy production and energy storage (fuel cells, batteries and supercapacitors).
PREREQUISITES: CHEM 2301.03, CHEM 2304.03 and PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03 (grade of C- or better).
EXCLUSIONS: CHEM 5311.03
FORMATS: Lecture

CHEM 4401 Synthesis in Organic Chemistry

CREDIT HOURS: 3
A number of important organic reactions are examined in depth with particular attention to regioselectivity and the development of relative or absolute stereochemistry. Applications of these reactions in the synthesis of complex molecules are illustrated with recent examples from the literature.
PREREQUISITES: CHEM 3401.03 (grade of C+ or better)
CROSSLISTED: CHEM 5401.03
FORMATS: Lecture

CHEM 4402 Organic Structure Determination

CREDIT HOURS: 3
Nuclear magnetic resonance spectroscopy and mass spectrometry are emphasized in solving structural problems. Topics include 2D NMR, correlation of structure with chemical shifts and coupling constants, operation of NMR spectrometers, NMR relaxation, analysis of spectral patterns, the vector model of 1D and 2D experiments and ionization methods in mass spectrometry.
PREREQUISITES: CHEM 3404.03 (grade of C+ or better)
CROSSLISTED: CHEM 5402.03
FORMATS: Lecture

CHEM 4502 Polymer Science

CREDIT HOURS: 3
Aspects of synthesis, analysis, characterization, structure and uses of synthetic and naturally occurring macromolecules are explored. Emphasis is on the application of standard methods of organic synthesis, analytical separations, and physico-chemical characterization. There is no laboratory, but students will do an independent literature project.
PREREQUISITES: CHEM 2201.03 and CHEM 2301.03 and CHEM 2304.03 and CHEM 2402.03 (grade of C- or better)
FORMATS: Lecture

CHEM 4504 Diffraction Techniques in Solid State Chemistry

CREDIT HOURS: 3
All chemical elements and compounds can exist as crystalline solids. This course studies the arrangements of atoms and molecules in such solids and examines the methods used to determine these structures. Particular emphasis is placed on the techniques of X-ray crystallography.
PREREQUISITES: CHEM 2101.03 (grade of C- or better) and MATH 2001.03 and MATH 1030.03
FORMATS: Lecture | Lab

CHEM 4595 Atmospheric Chemistry

CREDIT HOURS: 3
Fundamental introduction to the physical and chemical processes determining the composition of the atmosphere and its implications for climate, ecosystems, and human welfare. Origin of the atmosphere. Nitrogen, oxygen, carbon, sulfur cycles. Atmospheric transport and turbulence. Stratospheric ozone. Oxidizing power of the atmosphere. Regional air pollution: aerosols, smog, acid rain.
PREREQUISITES: MATH 1000.03, PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03, and CHEM 1012.03 (grade of C- or better)
CROSSLISTED: PHYC 4595.03, OCEA 4595.03,
EXCLUSIONS: OCEA 5595.03
FORMATS: Lecture

CHEM 4601 Principles of Biomolecular and Drug Molecule Design

CREDIT HOURS: 3
The course covers both general principles and biochemical considerations in drug design. The fundamental goal is to give students the necessary tools to design new chemical structures as putative therapeutics for a human or veterinarian pathological problem.
PREREQUISITES: CHEM 3601.03 (grade of C+ or better) or BIOC 3700.03 (grade of C+ or better).
CROSSLISTED: CHEM 5601
FORMATS: Lecture

CHEM 4602 Biophysical Characterization of Macromolecules

CREDIT HOURS: 3
Covers methods allowing determination of sub-molecular and atomic-level structure and dynamics of biomacromolecules in physiological settings (e.g. solution-state or lipid bilayers) including: fluoroescence, electronic and vibrational circular dichroism and NMR spectroscopy; light vs. X-ray vs. neutron scattering; and, single molecule methods.
PREREQUISITES: BIOC 3700.03 or (CHEM 3601.03 and CHEM 2301.03 and CHEM 2304.03), all with grades of B or higher, or permission of instructor. Recommended: PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03.
CROSSLISTED: BIOC 4702.03, CHEM 5602.03, BIOC 5702.03
FORMATS: Lecture

CHEM 4603 Structural Biology

CREDIT HOURS: 3
This course covers theoretical and practical aspects of determining and assessing the quality of atomic-resolution biomolecular structures. The underlying theory and applications of X-ray diffraction, NMR spectroscopy, and cryo-electron microscopy are discussed in detail.
PREREQUISITES: BIOC 3700.03 or CHEM 3601.03
CROSSLISTED: BIOC 4703.03
FORMATS: Lecture

CHEM 4801 Research Project in Chemistry I

CREDIT HOURS: 3
Students carry out research projects under the supervision of a faculty member, and submit a report and make an oral presentation.
PREREQUISITES: CHEM 2101.03, 2201.03, 2301.03, 2304.03, 2401.03 and 2402.03 plus at least one full credit at the 3000 or 4000 level in the area of interest with an average grade of at least B-, or permission of instructor; GPA 3.0

CHEM 4802 Research Project in Chemistry II

CREDIT HOURS: 3
Students carry out research projects under the supervision of a faculty member and submit a report and make an oral presentation. This course is intended for those students in the Major program who wish greater exposure to independent scientific research.
PREREQUISITES: CHEM 4801.03

CHEM 4902 Honours and Major Research Project I

CREDIT HOURS: 3
Together with CHEM 4903.03, this is an honours program requirement to develop research skills. Research is carried out under the direction of a faculty member and evaluated through supervisor assessment, a written report and oral presentation.
CALENDAR NOTES: Students should apply for this course in the winter term prior to their final year by contacting the Honours Coordinator. A grade will not be assigned for CHEM 4902.03 until both CHEM 4902.03 and CHEM 4903.03 have been completed. To receive credit, CHEM 4902.03 and 4903.03 must be completed in the same academic year.
PREREQUISITES: Minimum GPA of 3.0 and permission of Honours Coordinator.
EXCLUSIONS: CHEM 4901.06

FORMATS: Experiential Learning

CHEM 4903 Honours and Major Research Project II
CREDIT HOURS: 3
Together with CHEM 4902.03, this is an honours program requirement to develop research skills. Research is carried out under the direction of a faculty member and evaluated through supervisor assessment, an honours thesis and oral presentation.
CALENDAR NOTES: To receive credit, CHEM 4902.03 and 4903.03 must be completed in the same academic year.
PREREQUISITES: Completion of CHEM 4902.03 and permission of Honours Coordinator.
EXCLUSIONS: CHEM 4901.06
FORMATS: Experiential Learning

Introduction

Earth Science is a holistic discipline whose focus of study is the Earth System. It includes the geosciences which address the solid earth, but necessarily also extends to study of the atmosphere, hydrosphere, oceans and biosphere. Broadly, Earth scientists work to understand

1. how the Earth System works;
2. how it evolved to its current state;
3. the processes for and distribution of Earth's physical resources such as fossil fuels, minerals, and water; and
4. limits to and consequences of the use of physical resources by humans.

Examples of specific questions within Earth Sciences include: How was the Earth formed? What is its composition? Where do we look for oil? Where do we look for reliable water supplies? What are the relationships between glaciers, rivers, and climate, both now and in the deep past? To answer questions such as these, Earth scientists typically use methods from the foundation sciences -- physics, chemistry, biology, mathematics - along with discipline-specific methods and modern tools including computing and satellite mapping. Some Earth scientists also consider or draw expertise from the social sciences, particularly as humans collectively become a significant agent in modifying components of the Earth System.

Career paths

Earth Science is of tremendous importance to Canadians and can be an immensely satisfying profession. Earth scientists are employed in universities, government agencies, the oil, gas and mineral industries, environmental consulting, and beyond. The Earth Sciences

department offers programs and courses designed to meet the needs of students with varying goals for her/his undergraduate education. In general, the following summary recommendations can be made:

- To prepare to become a professional geoscientist, students should enroll in a 120 credit hour BSc or BA degree (Major, Honours or Combined) and meet the knowledge requirements for professional registration by following the Geoscience Knowledge and Experience handbook available at https://geoscientistscanada.ca.
- To prepare for postgraduate study (MSc or PhD) in Earth Sciences or a related field, students should pursue a BSc Concentrated Honours in Earth Sciences or Combined Honours with a related subject, and consider meeting requirements of professional registration (above).
- Students seeking an undergraduate preparation for Law, Education, or another professional program outside of Earth Sciences, or to complement another subject, should consider a BSc or BA Major or Double Major.
- Electives courses and Minors: Earth Sciences is about understanding how the Earth 'works'. As such it makes an excellent general education subject. Several ERTH courses that may be suitable electives are listed below.

General interest courses

These courses are designed to be accessible to students who want to know something about the Earth, but whose major field of study is not Earth Sciences. For example, the course may be of interest to an economics student concerned with resources, a history student interested in the role played by Canada's geological framework in the development of transportation, a biology student interested in faunal environments on the seafloor.

Courses without prerequisites

- ERTH 1030.03: Introduction to Physical Geography
- ERTH 1060.03: Earthquakes, Volcanoes and Natural Disasters
- ERTH 1080.03: Geology I (lab course)

Courses with prerequisites

- ERTH 1090.03: Geology II (with lab)
- ERTH 1091.03: Geology II (non-lab course)
- ERTH 2020.03: Journey Through the Solar System
- ERTH 2410.03: Environmental Issues in Earth Sciences
- ERTH 2420.03: Dinosaurs
- ERTH 3440.03: Geomorphology

High School Preparation

Students in high school who plan a career in Earth Sciences, should have Advanced Math or Pre-calculus Math, plus Chemistry and Physics. Note that only Mathematics is required as a prerequisite, but the others are strongly recommended. A student should ideally aim to make up deficiencies in high school preparation in the first year at Dalhousie.

Degree Programs

The Department of Earth Sciences offers the following degree programs in Earth Sciences

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Earth Sciences
- Minor in Earth Sciences

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Departmental Requirements for these programs are described below. In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Earth Sciences undergraduate academic advisor.

Core Requirements for all BSc and BA (120 credit hour) Degrees

All 120 credit hour degrees in Earth Sciences (Concentrated Honours, Combined Honours, Major, Double Major) share the following required courses:

1000 level

- ERTH 1080.03: Geology I and ERTH 1090.03 (recommended) or ERTH 1091.03: Geology II
- MATH 1000.03: Differential and Integral Calculus I (recommended) or MATH 1215.03: Life Sciences Calculus or equivalent
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity AND CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Students in the Integrated Science Program should contact the department regarding first year equivalencies.

2000 level

- ERTH 2001.03: Mineralogy
- ERTH 2002.03: Introduction to Petrology
- ERTH 2110.03: Field Methods and Geological Maps
- ERTH 2203.03: Sediments and Sedimentary Rocks
- ERTH 2380.03: Geochemistry

3000 level

- ERTH 3002.03: Introductory Field School
- ERTH 3140.03: Structural Geology
- ERTH 3303.03: Stratigraphy

Field Work

Many Earth Sciences courses have a regular field excursion component that are typically conducted when classes are in regular session, although some excursions may occur on weekends or following exams. Course syllabi wlll provide specific for each course's field excurisons each term, and whether trips are mandatory for the course.

Note that ERTH 3002.03 : Introductory Field School is required for all 120 credit hour degree programs in Earth Sciences and is typically held over 12-14 days in late August, just before the start of the University fall term.

BSc or BA (120 credit hour) Concentrated Honours in Earth Sciences

Students who want a challenging program that includes an in-depth background in Earth Sciences and an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Earth Sciences with a minimum GPA of 3.5 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of ERTH 4201.03/ ERTH 4202.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Earth Sciences.

Admission to Honours

Students must apply for admission to Honours programs, usually by the end of their third year. Students considering Honours in Earth Sciences should consult with an Earth Sciences Academic Advisor early in their studies.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in the Concentrated Honours program in Earth Sciences must complete the following:

Core Requirements (Section A)

1000 level

- MATH 1010.03: Differential and Integral Calculus II, or MATH 1030.03: Matrix Theory and Linear Algebra I, or MATH 2300.03: Mathematical Modelling, or STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introduction to Probability and Statistics
- PHYC 1190.03: Introduction to Physics and PHYC 1290.03: Introduction to Physics (recommended), or PHYC 1310.03: Physics In and Around You I and PHYC 1320.03: Physics In and Around You II

2000 level and higher

- ERTH 2270.03: Introduction to Applied Geophysics
- ERTH 4005.03: Advanced Field School
- ERTH 4201.03 and ERTH 4202.03: Honours Thesis
- Minimum of 18 additional credit hours of ERTH courses at or above the 2000 level, of which at least 12 credit hours must be at or above the 3000 level

Additional Requirements

- Minimum GPA of 3.5 in Honours subject courses, with no grade less than a C
- First-class Honours; Minimum GPA of 3.7 in Honours subject courses, with at least an A- in ERTH 4200.06

BSc or BA (120 credit hour) Combined Honours in Earth Sciences and another subject

Students who wish to study Earth Sciences in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Earth Sciences may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an

Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Earth Sciences, this requirement is satisfied through ERTH 4201.03/ERTH 4202.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Earth Sciences as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirementssections, students in a Combined Honours program in Earth Sciences and another subject must complete the following:

Earth Sciences as primary subject

- Core requirements (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2040.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03
- PHYC 1190.03 and PHYC 1290.03 or PHYC 1310.03 and PHYC 1320.03

2000 level and higher

- ERTH 2270.03: Introduction to Applied Geophysics
- ERTH 4201.03 and ERTH 4202.03: (Honours Thesis)
- A minimum of three additional ERTH credit hours at 3000 level or above

Students in Combined Honours should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student's particular subject combination.

Earth Sciences as secondary subject

- Core requirements (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2040.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03
- PHYC 1190.03 and PHYC 1290.03 or PHYC 1310.03 and PHYC 1320.03

2000 level and higher

- ERTH 2270.03: Introduction to Applied Geophysics
- A minimum of nine additional credit hours in ERTH at or above the 3000 level

Students in Combined Honours should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student's particular subject combination.

BSc or BA (120 credit hour) Major in Earth Sciences

The 120 credit hour Major is suited to students who want to focus on Earth Sciences, but wish to have a program that is somewhat less constrained than the Honours program.

Earth Sciences Majors complete a minimum of 42 credit hours in Earth Sciences courses above the 1000 level.

Research and other experiential learning opportunities are available through laboratories and research project classes.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Earth Sciences.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Earth Sciences must complete the following courses:

- Core requirements (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2040.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03 (BSc only)

2000 level and higher

- An additional 18-credit hours of Earth Sciences courses, of which a minimum of 15-credit hours must be at the 3000- or 4000-level

BSc or BA (120 credit hour) Double Major in Earth Sciences and another subject

The Double Major degree program allows students to combine a study of Earth Sciences with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Earth Sciences may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Earth Sciences as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Earth Sciences and another subject must complete the following:

Earth Sciences as the primary or secondary subject

- Core requirements (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2040.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03

2000 level and higher

- A minimum of nine additional credit hours in ERTH at or above the 3000 level

Students in Double Major programs should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student's particular subject combination.

BSc or BA (90 credit hour) Minor in Earth Sciences

The 90 credit hour degree with Minor in Earth Sciences is appropriate for students who want to study some Earth Sciences but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Earth Sciences. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Earth Sciences is usually the preferred option for students who wish to combine studies in Earth Sciences with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

See Minor in Earth Sciences section.

Minor in Earth Science

Minor in Earth Sciences

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Earth Sciences is available to students in the Faculty of Science.

Requirements

- ERTH 1080.03: Geology I and ERTH 1090.03 or ERTH 1091.03: Geology II
- A minimum of 18 credit hours in Earth Sciences courses at the 2000 level or higher, must include at least six credit hours at the 3000 level or higher

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Earth Sciences

Co-op Academic Advisor: Dr. Tarah Wright

The Science Co-op degree option enables students to apply their academic knowledge directly while providing them with work experience that assists in making educated career choices. Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Earth Sciences, or in Combined Honours or Double Major programs with Earth Sciences as the primary subject. Further information details on Science Co-op can be found in the academic calendar under Work-Integrated Learning & Co-operative Education and the Co-op office's website at dal.ca/wil

Minors available to students in Earth Sciences

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Earth Sciences may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Earth Sciences, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a BSc or BA program in Earth Sciences include:

- Certificate in Environmental Impact Assessment (EIA) (contact: Dr. Patricia Lane, Biology, patricia.lane@dal.ca)
- Certificate in Geographic Information Science (GIS) (contact: Dr. Chris Greene, Earth Sciences, csgreene@dal.ca)
- Certificate in Materials Science (contact: Dr. Mita Dasog, Chemistry, mita.dasog@dal.ca)
- Certificate in Science Leadership and Communication (contact: Dr. Anne-Marie Ryan, Earth Sciences, AMRyan@dal.ca)

Knowledge Requirements for Professional Practice as a Geoscientist

Geoscience is a regulated profession in most of Canada. Individual provinces and territories have acts that restrict the practice of geoscience to individuals who are registered members of professional associations. In Nova Scotia, the Association of Professional Geoscientists of Nova Scotia (APGNS) is the licensing body which fulfils this mandate. APGNS and other provincial geoscience associations, under the guidance of Geoscientists Canada, ensure high standards of geoscience practice and education.

Students who intend to pursue geoscience as a profession, or simply want the most in-depth education in geoscience, should follow the guidelines laid out in the Geoscience Knowledge and Experience handbook provided by Geoscientists Canada. The Geoscience Knowledge and Experience handbook outlines comprehensive sequences of courses intended to prepare a student for professional practice in modern geoscience, and to meet formal requirements for registration in the Geology and Environmental Geoscience streams.

Professional geoscience knowledge requirements are more specific and stringent than degree requirements in terms of the courses required in Earth Sciences and in the Foundation Sciences (mathematics and physics in particular). Earth Science students can meet the knowledge requirements within a 120 credit hour degree by careful selection of ERTH courses and Foundation Science courses, and this should begin in the first year. Less than judicious course selection, and/or combining Earth Science with another subject which also has numerous specific course requirements, may result in a student needing extra courses (beyond the 120 credit hours) in order to meet knowledge requirements for registration. Consult the professional associations -- Geoscientists Canada and APGNS - for additional information on registration.

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Program with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Earth Sciences and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see undergraduate advisors from Earth Sciences and from the Faculty of Engineering in their first year of study.

Field Work

Field excursions are part of many courses and are conducted at appropriate times during the session. In addition, some optional field excursions may be held each year. Note that some mandatory field trips may be held on Saturdays or Sundays. Introductory Field School, ERTH 3002, which is required for most degree programs, is offered for about 12-14 days in late August, just before the start of the University fall term. Advanced Field School, ERTH 4005, is required for concentrated BSc Honours and BSc Majors. It is recommended for all students and especially those pursuing Professional Geoscience Registration.

Courses

Courses

Course Notes

NOTE: Some mandatory field trips may be held on Saturdays or Sundays. Check with Instructor.

Course Descriptions

ERTH 1030 Introduction to Physical Geography

CREDIT HOURS: 3
This science course examines the nature of weather and climate, Earth's surface features and processes, and internal processes that contribute to landform development. An integral component of the course is an exploration of the representation and interpretation of physical geographic data through the examination of a variety maps.
CALENDAR NOTES: There are no pre-requisites for this course, and students may take this course in addition to any other first year Earth Science course.
CROSSLISTED: GEOG 1030.03
FORMATS: Lecture | Tutorial

ERTH 1060 Earthquakes, Volcanoes and Natural Disasters

CREDIT HOURS: 3
Earthquakes, meteorite impacts, rapid climate change, volcanic eruptions, hurricanes, landslides, solar flares, and floods are natural disasters that affect our economy, public policy, and safety. Where, why and how frequently do natural disasters occur? Are predictions possible? Are media portrayals of risk and damage realistic? This course, aimed at the nonspecialist, investigates these intriguing questions. Excerpts of “disaster films”, in conjunction with lectures and discussions are used to identify the causes, consequences and sometimes erroneous perceptions of natural hazards. Examples from Atlantic Canada and contemporary disasters are used to assess local risk and real-time events worldwide.

CROSSLISTED: GEOG 1060.03
FORMATS: Lecture

ERTH 1080 Geology I

CREDIT HOURS: 3
This course focuses on the solid earth (geosphere) and how it evolved throughout earth's vast history, and continues to evolve today. The processes involved are recorded in the rocks and minerals of our earth, and we explore these natural processes and materials as a way to understanding our earth.The course meets the needs of students who require a science course with a lab component, is a required prerequisite course for all Earth Science majors, and serves as an introduction for all those interested in Earth Science. No previous knowledge of geology is required.
FORMATS: Lecture | Lab

ERTH 1090 Geology II

CREDIT HOURS: 3
Earth systems introduced in Geology I are explored in greater detail, with an emphasis on change through time, earth resources, and on geologic systems that are connected to human actions. This course provides a strong background to pursue further work in the environmental sciences and is the required course for Earth Sciences majors.
PREREQUISITES: ERTH 1080.03. Concurrent enrolment in ERTH 1080.03 and ERTH 1090.03 is by permission of instructor.
EXCLUSIONS: Credit will only be given for one of ERTH 1091.03 or ERTH 1090.03
FORMATS: Lecture | Lab

ERTH 1091 Geology II

CREDIT HOURS: 3
ERTH 1091 builds on the earth systems introduced in Geology I and explores them in greater detail. The emphasis is on change through time, earth resources, and on geologic systems that are connected to human actions. This non-lab course provides a strong background to pursue further work in the environmental sciences and is the required course for earth sciences majors.
PREREQUISITES: ERTH 1080.03. Concurrent enrolment with 1080.03 is by permission of instructor.
EXCLUSIONS: Credit will be given for only one of ERTH 1091.03 or ERTH 1090.03.
FORMATS: Lecture

ERTH 1501 Integrated Introductory Geology I

CREDIT HOURS: 3
This course focuses on the solid earth (geosphere) and how it evolved throughout earth's vast history and continues to evolve today. The processes involved are recorded in the rocks and minerals of our earth, and we explore these natural processes and materials as a way to understanding our earth. These topics are explored through an integrated lens using real-world applications and connections to other fields of study (Biology, Statistics, Chemistry, Psychology, Physics, and Ethics).
CALENDAR NOTES: This course is restricted to students in the Dalhousie Integrated Science Program (DISP) only.
EXCLUSIONS: Equivalent to: ERTH 1080.03 Exclusion with: SCIE 1506.03, SCIE 1507.03
FORMATS: Lecture | Lab

ERTH 2001 Mineralogy

CREDIT HOURS: 3
Earth Materials Science I ERTH 2001 introduces the chemical/physical properties of minerals, their origins and distribution. Labs include mineral indentification, crystal chemistry, crystallography, and optical mineralogy. X-ray diffraction and electron microprobe methods are introduced.
PREREQUISITES: ERTH 1080.03 (or SCIE 1505) and (ERTH 1090.03 or ERTH 1091.03 or permission of instructor) (or SCIE 1515 or SCIE 1530) and CHEM 1011.03/CHEM 1012.03 or CHEM 1021.03/CHEM 1022.03: Chemistry majors should consult the department. Students who have not taken CHEM 1010.03 (or equivalent) are encouraged to take this concurrently.
FORMATS: Lecture | Lab

ERTH 2002 Introduction to Petrology

CREDIT HOURS: 3
Through a thorough and systematic examination of hand specimens and thin sections, and the detailed description of mineral assemblages and textures, students will be able to formally classify a wide range of igneous, metamorphic and sedimentary rock types. Case studies representing the geology of Nova Scotia will also be presented.
PREREQUISITES: ERTH 2001.03 and CHEM 1011.03/CHEM 1012.03 or CHEM 1021.03/CHEM 1022.03
FORMATS: Lecture | Lab

ERTH 2020 Journey Through The Solar System

CREDIT HOURS: 3
An introduction to the geological features of the planets, asteroid belt, and major satellites of our solar system, and the current understanding as to their formation. The course uses the earth as an analog to compare the landforms, and both the measured and inferred geology of the solar system.
PREREQUISITES: There are no prerequisites, however a basic understanding of mathematics and the physical sciences is required.
RESTRICTIONS: Restricted from students in first year.
FORMATS: Lecture

ERTH 2110 Field Methods and Geological Maps

CREDIT HOURS: 3
This is intended as an introduction to field techniques and geological mapping useful to the practicing geologist, particularly those concepts essential for the accurate field description of rocks applied to the use and construction of geological maps. Digital field data collection and compilation techniques and elementary structural geology are also considered.
PREREQUISITES: ERTH 1080.03 (or SCIE 1506.09 and SCIE 1507.09) and (permission of instructor or ERTH 1090.03 or ERTH 1091.03)
FORMATS: Lecture | Lab

ERTH 2203 Sediments and Sedimentary Rocks

CREDIT HOURS: 3
The course deals with physical, chemical and biological processes that generate modern sediments, and their conversion to sedimentary rocks through time. Labs provide a practical introduction to sediment analysis and to a range of sedimentary structures and rock types. Fieldwork may include description of beaches and bedrock in Nova Scotia.
PREREQUISITES: ERTH 1080.03 (or SCIE 1506.09/ SCIE 1507.09) and (ERTH 1090.03 or ERTH 1091.03 or permission of instructor)
FORMATS: Lecture | Lab

ERTH 2270 Introduction to Applied Geophysics

CREDIT HOURS: 3
An Introduction to using physical principles to explore the Earth's subsurface, with an emphasis on near-surface applications. Topics include seismic, gravity, magnetic, electrical, and electromagnetic surveying techniques, and their application in prospecting, hydrogeology, environmental assessments, and well-logging. The geophysics field school, normally conducted during the last week of April, is an integral part of this course.
PREREQUISITES: ERTH 1080.03 or (SCIE 1506.03/SCIE 1507.03) and (MATH 1000.03 or MATH 1215.03) and (PHYC 1190.03/ PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03 X/Y)
CROSSLISTED: PHYC 2270.03
FORMATS: Lecture | Lab | Experiential Learning

ERTH 2380 Geochemistry

CREDIT HOURS: 3
An introduction to the principles of chemistry applied to geologic systems, including an overview of the chemistry of rocks and minerals, isotopes in the geologic environment, processes that control the mobility of elements in geologic environments, and the use of geochemical data in solving geological and paleo- environmental problems.
PREREQUISITES: ERTH 2001.03 or permission of the instructor
FORMATS: Lecture | Tutorial

ERTH 2410 Environmental Issues in Earth Sciences

CREDIT HOURS: 3
Geology underlies many of the environmental problems facing humans today. Topics include environmental aspects of energy and mineral resource, geologic hazards, geologic connections to pollution and waste disposal, and the role that water plays in its various guises. Canadian examples are incorporated where appropriate. Approved with Canadian Studies.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: One of: ERTH 1080, ERTH/GEOG 1030, ERTH/GEOG 1060, ENVS 1000 or ENVS 1100 or ENVS 1200, SUST 1001 with a grade of B or above, or DISP with Earth Sciences
CROSSLISTED: ENVS 2410
EXCLUSIONS: This class does not count toward a Major or Honours in Earth Sciences
FORMATS: Lecture

ERTH 2420 Dinosaurs

CREDIT HOURS: 3
Students will consider the origin, evolution and extinction of non-avian dinosaurs. What are dinosaurs? Why were some dinosaurs so big? What did dinosaurs eat? How fast could dinosaurs run? Were dinosaurs good parents? To answer these questions, we will examine the nature of evidence gathered from dinosaur fossils and their surrounding rocks.
CALENDAR NOTES: This course may not be offered every year. Please consult spring timetable or Department on whether course will be offered.
PREREQUISITES: ERTH 1080.03 or any two of ERTH 1060.03, ERTH 1090.03, ERTH 1091.03, or permission of instructor
FORMATS: Lecture

ERTH 2430 Forensic and Medical Geology

CREDIT HOURS: 3
Designed for non-earth sciences majors, this course explores the evolving fields within the realm of geosciences. Forensic and medical geology share a common thread in that both depend upon identifying potential geologic and geoenvironmental sources of evidence, and applying this information to solve a larger problem, either legal or health-related.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: ERTH 1080 and one other Earth Sciences course or instructor's permission.
FORMATS: Lecture | Tutorial

ERTH 2850 Foundations of Geospatial Information Science and Technology

CREDIT HOURS: 3
Geographic Information Science (GIS) focuses on the principles of geographic data acquisition, storage, management, processing, visualization, and analysis, and covers fundamental elements of spatial modeling, cartography, geovisualization, spatial data sources and collection methods. Laboratory exercises emphasize the creation, management, and visualization of geographic data drawing from a range of disciplines.
CROSSLISTED: ENVS 2850.03; GEOG 2850.03; ENVA 3005.03
EXCLUSIONS: PLAN 2006.03; ENVS 2006.03; GEOG 2006.03
FORMATS: Lecture | Lab

ERTH 3001 Field School

CREDIT HOURS: 3
This field-intensive course provides two weeks of geological mapping in northern Nova Scotia and entails: (1) identifying, measuring and localizing rocks and geological structures; (2) drawing geological maps from field observations and (3) writing a report describing and interpreting the data.
CALENDAR NOTES: The class is held for two weeks at the end of summer just prior to the start of the fall term and is required for the Major and Honours programs. It can be a physically demanding course involving day-long traverses - prior consultation with instructors is required
PREREQUISITES: ERTH 2002.03, ERTH 2110.03, ERTH 2203.03 and permission of the instructor.
FORMATS: Experiential Learning

ERTH 3002 Introductory Field School

CREDIT HOURS: 3
This class provides concentrated experiential learning in geological field techniques. Foundational field skills include rock and mineral identification, field notes and sketching, the safe and proper use of field equipment, basic geological map making and report writing. A wide variety of rock types are examined using traverses, viewing cliff sections and outcrops.
CALENDAR NOTES: Daily field work 12 to 14 continuous days. Daily field trips based out of Halifax.
PREREQUISITES: ERTH 2110.03
RESTRICTIONS: Course open only to Earth Sciences majors
EXCLUSIONS: ERTH 3001
FORMATS: Experiential Learning | Other (explain in comments)

ERTH 3010 Igneous Petrology

CREDIT HOURS: 3
Igneous petrology is the study of the field relations, mineralogy, texture, and geochemistry of volcanic and plutonic rocks. Lectures discuss the classification and graphical representation of igneous rocks; the production, differentiation, and emplacement of magma in different tectonic environments. Practical work consists of laboratory petrographic examination and weekend field trips.
PREREQUISITES: ERTH 2002.03 and ERTH 2380.03
FORMATS: Lecture | Lab

ERTH 3011 Theoretical Foundations of Igneous Petrology

CREDIT HOURS: 3
Igneous petrology is an online class that introduces students to the variety of volcanic and plutonic rocks, their field relations, textures, mineralogical and geochemical features. The class examines the production, differentiation, and emplacement of magma in different tectonic environments using thermodynamics, geochemical methods, virtual field trips, and projects-based studies
CALENDAR NOTES: Cannot receive credit for ERTH 3011 after receiving credit for ERTH 3010
PREREQUISITES: ERTH 2002.03 and ERTH 2380.03
EXCLUSIONS: ERTH 3010
FORMATS: Online Delivery

ERTH 3012 Practicum on petrography of igneous rocks

CREDIT HOURS: 1
This course complements the "Theoretical Foundations of Igneous Petrology" course by providing students with in-depth training using petrographic microscope for studies of plutonic and volcanic rocks. The course consists of eight lab sessions followed by an exam completed over one week (5 days).
CALENDAR NOTES: Cannot receive credit for ERTH 3012 after receiving credit for ERTH 3010
PREREQUISITES: ERTH 2002, ERTH 3011
EXCLUSIONS: ERTH 3010

ERTH 3020 Metamorphic Petrology

CREDIT HOURS: 3
Metamorphic petrology is the study of the way in which pre-existing igneous, sedimentary, and metamorphic rocks respond to changes in pressure, temperature, and geochemical environment. Metamorphic reactions, deformation and recrystallization, the stability relations of minerals and mineral assemblages under various physical and chemical conditions, and the concept of metamorphic facies are discussed. The relationship of metamorphism to other geological processes is considered. In the labs, microscopic mineralogy and texture are used to decipher the metamorphic history of rocks.
PREREQUISITES: ERTH 3010.03
FORMATS: Lecture | Lab

ERTH 3140 Structural Geology

CREDIT HOURS: 3
Introduction to the behaviour of rocks during deformation, stressing the geometrical aspects of rock structures. Students learn: (a) geometrical principles to identify, describe, and interpret common types of structures in outcrop and hand sample; (b) to interpret the mechanical properties of rocks based on their microstructure; (c) construction techniques to calculate and interpret stress and strain in deformed rocks.
PREREQUISITES: ERTH 2002.03, ERTH 2110.03, ERTH 2203.03
FORMATS: Lecture | Lab

ERTH 3205 Paleobiology

CREDIT HOURS: 3
This course examines fossil plants and animals and their interactions with the physical world throughout Earth's history. Lectures and lab encompass the concepts of fossil preservation, fossil morphology, fossil identification, systematics, evolution, extinction, paleoecology and biostratigraphy.
PREREQUISITES: ERTH 2203.03 or permission of the instructor.
EXCLUSIONS: ERTH 2205.03
FORMATS: Lecture | Lab

ERTH 3270 The Solid Earth

CREDIT HOURS: 3
This course aims to understand the structures and dynamics of the Solid Earth system from the surface to the inner core and from the ocean to the continent. Topics covered will include the internal structure of the Earth, plate tectonics, earthquakes, seismology, gravity, magnetic field, heat flow, and mantle convection.
PREREQUISITES: MATH 1000 or MATH 1215, and MATH 1010 AND PHYC 1190 and 1290 (preferred) or PHYC 1310 and 1320
CROSSLISTED: PHYC 3270.03, OCEA 3270.03
FORMATS: Lecture | Tutorial

ERTH 3302 Quaternary Sedimentary Environments

CREDIT HOURS: 3
The student is exposed to fluvial, alluvial, subglacial, glaciolacustrine, hillslope, eolian, coastal, shallow marine, rift, wedge top, retroarc, and foreland basin environments. Field trips and labs provide experience in methods used to distinguish the environments, including sedimentology, geomorphology, geochronology and thermochronology, and analysis of soils, cores, pebble fabrics, and section-scale non-petroleum sedimentary facies. Quaternary

paleoclimatology and tectonic controls on weathering and deposition are discussed and debated.
PREREQUISITES: ERTH 2203.03
CROSSLISTED: GEOG 3302
FORMATS: Lecture | Lab

ERTH 3303 Stratigraphy

CREDIT HOURS: 3
Stratigraphy is the backbone of the geological sciences; it brings together sedimentology, paleontology, petrology and structural geology to reconstruct Earth history. We survey the impact of sea-level change, tectonics and climate on sediment accumulation, with emphasis on seismic and sequence stratigraphy. Case studies focus on sedimentary basins across Canada, and practical work includes laboratory and class exercises, as well as field excursions.
PREREQUISITES: ERTH 2203.03
RESTRICTIONS: Approval from the instructor for a specialized circumstance.
FORMATS: Lecture | Lab

ERTH 3401 Hydrogeology

CREDIT HOURS: 3
Hydrogeology examines the space-time characteristics of groundwater quantity and quality. It includes physical processes occurring in natural groundwater systems and the governing relations for flow and transport; emphasizing Darcy's Law, steady state and transient flow. It provides an overview of groundwater resource development, evaluation, contamination, and remediation.
PREREQUISITES: ERTH/ENVS 3701 or permission of instructor
FORMATS: Lecture | Lab

ERTH 3420 Geochemistry of Aquatic Environments

CREDIT HOURS: 3
Given the abundance of water at the earth's surface and the wide use both humans and other organisms make of aqueous environments, it becomes imperative for environmentally-oriented scientists to understand the chemistry of natural bodies of water. In particular, we need to comprehend the processes that lead to the observed composition of groundwaters, lakes, rivers and oceans. We also need to be aware of how man's activities can alter these natural systems. Water is also an agent for geologic and environmental change, both on short and long time-scales. Earth and environmental scientists should have an appreciation of these processes (sources, sinks and transport mechanisms) and the resulting geological cycles. This course is an introduction to the governing principles and processes of aquatic geochemistry. Specific topics will include physical chemistry of natural waters, kinetics (mechanisms & rates) of geochemical reactions, the hydrologic cycle, the dissolved carbonate system and pH controls, redox reactions and the influence of life, rainwater and acid rain, weathering and the formation of soils, mineral-solution equilibria, controls on the composition of rivers, lakes and oceans, sediments and their after-burial changes, and the global cycles of carbon, nitrogen, and sulfur. Students will be taught to approach problems quantitatively through the principles of mass action (Eh-pH and activity-diagrams) and of mass balance (box models and conservation equations).
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: CHEM 1011.03/CHEM 1012.03 or equivalent and ERTH 1080/(ERTH 1090 or ERTH 1091) or ERTH 1010/ERTH 1020
CROSSLISTED: OCEA 3420.03
FORMATS: Lecture

ERTH 3440 Geomorphology

CREDIT HOURS: 3
Geomorphology is the quantitative study of Earth's surface processes and landforms with applications in geology, civil engineering, hydrogeology, and environmental management. We investigate slope stability, weathering and soils, sediment production, wind-driven and coastal environments, tectonic landforms, and river, glacial and permafrost processes.
PREREQUISITES: ERTH 1080 (or SCIE 1506.09/SCIE 1507.09) and (ERTH 1090.03 or ERTH 1091.03); OR completion of (or concurrent enrolment in) a 1000-level mathematics class, a 1000-level physics class, a 1000-level chemistry class AND permission of instructor
CROSSLISTED: GEOG 3440.03
FORMATS: Lecture

ERTH 3500 Geographic Information Science & Spatial Data

CREDIT HOURS: 3
Geographic Information Systems (GISystems) provide a powerful platform to process and analyze data with locational information. This course introduces theoretical concepts in Geographic Information Science (GIScience) that provide the foundation for the creation, management, and visualization of geospatial data for a range of disciplines (e.g., Earth Sciences, Environmental Science, Biology, Planning). Topics include principles of spatial object types, spatial data models, concepts of error and uncertainty, overlay, and the integration of satellite derived data (GPS, Remote Sensing Imagery) in spatial projects. Laboratory exercises emphasize how these principles are put into practice in the use of Geographic Information Systems.
CALENDAR NOTES: This course is intended for entry level users of Geographic Information Systems and is a required class for the Certificate in Geographic Information Science.

PREREQUISITES: Two years of university study or equivalent or instructor's permission
CROSSLISTED: ERTH 5600, GEOG 3500, ENVS 3500
EXCLUSIONS: Credit will only be given for one of ERTH 3500.03, ERTH 5600.03, GEOG 3500.03, SCIE 3600.03 or ENVS 3500
FORMATS: Lecture | Lab

ERTH 3601 Fundamentals of Biogeochemistry

CREDIT HOURS: 3
An interdisciplinary course that covers the basic principles of water, carbon, nitrogen, and phosphorus cycling, and human impacts on these cycles, through the biosphere, atmosphere, hydrosphere, and geosphere. This course involves discussion of the latest developments in this rapidly changing field focusing on climate change and global change.
PREREQUISITES: CHEM 1011.03/ CHEM 1012.03 or equivalent, and one of ENVS 1100.03, SUST 1001.03, ERTH 1080.03, or (SCIE 1506.09 or SCIE 1507.09) and completion of 2 years of an undergraduate degree.
CROSSLISTED: ENVS 3601.03

ERTH 3700 Earth Resources, Sustainability, and Society

CREDIT HOURS: 3
This course addresses the question: What do we need to know and understand about the nature and distribution of geologic resources to optimally reconcile mineral extraction with society's needs, considerations of the environment, and the sustainable development goals in a more sustainable, geoethical, and balanced approach, through the 21st century.
CALENDAR NOTES: Aimed as an elective course for majors in Earth Sciences and in Environmental Sciences. Must be third year students.
PREREQUISITES: ERTH 1080
CROSSLISTED: GEOG 3700 ENVS 3700
RESTRICTIONS: E1 and E2
FORMATS: Lecture | Seminar | Discussion | Other (explain in comments)

ERTH 3701 Fundamentals of Hydrology

CREDIT HOURS: 3
This course is an introduction to hydrology, emphasizing surface processes and watershed responses. In this course we learn about both the pure and applied uses of hydrology. The course is quantitative and introduces hydrologic processes in the atmosphere, on the land surface, in groundwater and in stream channels.
PREREQUISITES: MATH 1000.03 or MATH 1215.03, AND one of ENVS 1100.03/ENVS 1200.03 , SUST 1001.06, ERTH 1080.03, SCIE 1506.09/SCIE 1507.09, AND completion of 2 years of an undergraduate degree. PHYC 1190.03 and PHYC 1290.03 (or PHYC 1310.03/PHYC 1320.03) are recommended.
CROSSLISTED: ENVS 3701.03
RESTRICTIONS: E1 and E2
FORMATS: Lecture | Lab

ERTH 3850 Advanced Geospatial Information Science and Technology

CREDIT HOURS: 3
This course builds upon the foundations of ENVS/ERTH/GEOG 2850 by introducing advanced theoretical concepts in GIScience for commonly used spatial analysis methods. Topics include error and uncertainty, data overlay and constraint mapping, spatial statistics, spatial modeling, and ethical issues as they relate to professional practice relevant codes of conduct.
PREREQUISITES: ENVS / ERTH / GEOG 2800.03 or ENVA 3005.03 or PLAN / GEOG 2006.03
CROSSLISTED: ENVS 3850, GEOG 3850
EXCLUSIONS: ENVS / ERTH / GEOG 3500.03
FORMATS: Lecture | Lab

ERTH 4001 Sponsored Geologic Experience

CREDIT HOURS: 1.5
These Field Trips &/or Laboratory Sessions Introduce students to some of the following: Practical exploration techniques, field and laboratory skills, familiarization with deposit models, related economic and environmental geology, and the business side of Earth-science industries.
FORMATS: Lab

ERTH 4002 Advanced Field School

CREDIT HOURS: 3
This application of the principles of field geology is a comprehensive and intellectually challenging program designed to provide pre-professional field training for senior BSc geoscience students. Multiple field-based projects challenge students to synthesize field observations and solve geological and

environmental geoscience problems to gain training that is otherwise difficult to obtain in the classroom or laboratory.
CALENDAR NOTES: The field camp is usually offered in May at selected international settings, and involves mapping exercises and camping over a wide range of climate and topography.
PREREQUISITES: ERTH 3001.03, ERTH 3140.03 and permission from instructor

ERTH 4003 Advanced Field Geology Orientation

CREDIT HOURS: 1.5
This course covers geological and logistical preparation for the month-long Advanced Field Geology course. The course will examine the geology of southwestern North America, as well as geological processes and field techniques relevant to the Field School projects. Discussion topics will also include field safety, group dynamics, travel logistics, and travel grant proposals and fundraising.
CALENDAR NOTES: This is a compulsory course for students taking ERTH 4004: Advanced Field Geology. Credit can only be given for this course if ERTH 4003.015 and 4004.045 are completed in consecutive terms. No grade is assigned for ERTH 4003 until ERTH 4004 has also been completed.
COREQUISITES: ERTH 3140.03
PREREQUISITES: ERTH 3001.03 and permission from instructor
EXCLUSIONS: ERTH 4002
FORMATS: Seminar

ERTH 4004 Advanced Field Geology

CREDIT HOURS: 4.5
This application of the principles of field geology is a comprehensive and intellectually challenging program designed to provide pre-professional field training for senior BSc geoscience students. Multiple field-based projects challenge students to synthesize field observations and solve geological and environmental geoscience problems to gain training that is otherwise difficult to obtain in the classroom or laboratory
CALENDAR NOTES: The field camp is usually offered in May at selected international settings and involves mapping exercises and camping over a wide range of climate and topography. Credit can only be given for this course if ERTH 4003.015 and 4004.045 are completed in consecutive terms.
PREREQUISITES: ERTH 4003.015 and permission of instructor
RESTRICTIONS: Requires an application and permission of instructor
EXCLUSIONS: ERTH 4002
FORMATS: Experiential Learning

ERTH 4005 Advanced Field School

CREDIT HOURS: 3
This course is a field-based learning experience focused on applying field and mapping methods to create geological maps and reconstruct geological histories from collected and interpreted data. Students will practice independent mapping, utilizing skills developed in earlier years. The primary goal is to reconstruct the geological history of a studied area by integrating field data with published peer-reviewed literature. This exercise fully integrates theoretical knowledge of Earth processes acquired during the first three years of the program.
CALENDAR NOTES: Daily independent field work 12 to 14 continuous days along the coast of the Northumberland straight in Antigonish County (Nova Scotia).
PREREQUISITES: ERTH 2110.03, ERTH2002, ERTH2203, ERTH3002, ERTH3140
RESTRICTIONS: Course mandatory for Earth Sciences Majors and Honors, opened to other students with prerequisites.
FORMATS: Experiential Learning | Other (explain in comments)

ERTH 4010 Advanced Topics in Petrology and Geochemistry

CREDIT HOURS: 3
This course advances students' knowledge of modern aspects of petrology, volcanology, and geochemistry, chosen to reflect instructor and students interests. The focus is on learning thermodynamic and computational methods as well as advanced petrographic work and field mapping for interpretation of igneous and metamorphic rocks.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: ERTH 3010, ERTH 3020, ERTH 3001
CROSSLISTED: ERTH 5010

ERTH 4040 Integrated Field Studies

CREDIT HOURS: 3
A field-based course, of up to 2 weeks, which includes detailed exercises in geological mapping integrated with advanced concepts in mineralogy, petrology, economic geology, structural geology and tectonics. Students are based for the entire duration of the course off-campus, at an international location, or within Canada.
CALENDAR NOTES: This course will not be offered every year (please consult timetable and/or Department) and will run only if there is a minimum number of 8 students registered. There is a cap of 12 students and priority will be given to students in their final year of study.
PREREQUISITES: ERTH 3001.03, ERTH 3140.03, ERTH 3303.03 and one of ERTH 3010.03 or ERTH 3020.03, as well as permission of the instructor.

FORMATS:

ERTH 4101 Research Project

CREDIT HOURS: 3
This course allows students who are not in an Honours program to do a research project. See course description for ERTH 4201.03/ERTH 4202.03.
CALENDAR NOTES: Credit can only be given for this course if ERTH 4101.03 and 4102.03 are completed in consecutive terms. No grade is assigned for ERTH 4101.03 until both ERTH 4101.03 and 4102.03 have been completed.
EXCLUSIONS: ERTH 4100.06
FORMATS: Lecture

ERTH 4102 Research Project

CREDIT HOURS: 3
This course allows students who are not in an Honours program to do a research project. See course description for ERTH 4201.03/ERTH 4202.03.
CALENDAR NOTES: Credit can only be given for this course if ERTH 4101.03 and 4102.03 are completed in consecutive terms. Credit cannot be given for a single term.
PREREQUISITES: ERTH 4101.03
EXCLUSIONS: ERTH 4100.06
FORMATS: Lecture

ERTH 4110 Geological Oceanography

CREDIT HOURS: 3
This course provides a broad survey of geology and geophysics as they apply to the oceans. The course content covers methods and observations with quantitative applications to an understanding of marine geophysical and geological processes. The topics covered include the origin of ocean basins, plate tectonics, heat flow, gravity, and magnetics (1/3 of the course); patterns and processes of sediment transport and deposition, and the paleoceanographic reconstruction of and past climates (2/3 of the course).
CALENDAR NOTES: Some training in calculus and statistics will prove to be advantageous to the student's outcome.
PREREQUISITES: OCEA 2001.03/OCEA 2002.03 (or OCEA 2000.06); OCEA 2020.03; OCEA 2021.03; ERTH 1080.03 or equivalent; or permission of instructor.
CROSSLISTED: OCEA 5110.03; OCEA 4110.03
EXCLUSIONS: Students in third year and above.
FORMATS: Lecture

ERTH 4131 Advanced Petroleum Geoscience

CREDIT HOURS: 3
This is an advanced course in petroleum geoscience applications and interpretations for basin/prospect evaluation. Students work in a team interpreting industry data, including well logs and reflection seismic, in a competitive environment. The team submits its findings and recommendations in written and oral presentations.
PREREQUISITES: ERTH 3303.03, ERTH 4153.03, or permission of the instructor
CROSSLISTED: ERTH 5131.03
FORMATS: Lecture

ERTH 4151 Mineral Deposits

CREDIT HOURS: 3
This course is an introduction to the geology of metallic ore and some industrial mineral deposits. Emphasis is given to the ore formation processes that lead to the economic concentrations of commodities. The course integrates many Earth Science disciplines. Laboratory work introduces ore study in reflected light microscopy.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: ERTH 3010.03, 3140.03
CROSSLISTED: ERTH 5151.03
FORMATS: Lecture | Lab

ERTH 4153 Petroleum Geology and Energy Systems

CREDIT HOURS: 3
The course provides an introduction to petroleum geology (gas and oil) with some discussion of alternative energy sources. The course provides an introduction to petroleum geology and petroleum systems with discussion of basin analysis, source rock evaluation, seismic and well log sequence stratigraphy, core and outcrop description, depositional facies analysis, oil sands geology, biostratigraphy, drilling and completions, petrophysics and well log

analysis in addition to other topics.
PREREQUISITES: ERTH 2270.03, ERTH 3140.03, ERTH 3303.03
RESTRICTIONS: Approval from the instructor for a specialized circumstance.
FORMATS: Lecture | Lab

ERTH 4201 Honours Thesis

CREDIT HOURS: 3
This course covers many aspects of written and oral communication of scientific material. In particular, it covers the scientific method, the elements of scientific style, the logical organization and development of ideas and scientific writing. Individual research presentations form a key component.
CALENDAR NOTES: This is a compulsory course for students writing an Honours thesis in Earth Sciences, but is open to students from other disciplines. Field work may be part of thesis research. Credit can only be given for this course if ERTH 4201.03 and ERTH 4202.03 are completed in consecutive terms. No grade is assigned for ERTH 4201.03 until ERTH 4202.03 has also been completed.
EXCLUSIONS: ERTH 4200.06
FORMATS: Lecture

ERTH 4202 Honours Thesis

CREDIT HOURS: 3
This course covers many aspects of written and oral communication of scientific material. In particular, it covers the scientific method, the elements of scientific style, the logical organization and development of ideas and scientific writing. Individual research presentations form a key component.
CALENDAR NOTES: This is a compulsory course for students writing an Honours thesis in Earth Sciences, but is open to students from other disciplines. Field work may be part of thesis research. Credit can only be given for this course if ERTH 4201.03 and ERTH 4202.03 are completed in consecutive terms.
EXCLUSIONS: ERTH 4200.06
FORMATS: Lecture

ERTH 4320 Seafloor Mapping

CREDIT HOURS: 3
A fourth-year undergraduate course on ocean mapping technologies and techniques for study of the seabed environment. Acoustic remote sensing technologies, ground-validation techniques, and data processing and integration methods using geospatial software are covered. The focus of the course is on how these approaches are used to study and map the geology and biology of the ocean floor.
PREREQUISITES: ERTH 3500.03
CROSSLISTED: OCEA 4320.03
EXCLUSIONS: OCEA 5320.03
FORMATS: Lecture | Lab

ERTH 4350 Tectonics

CREDIT HOURS: 3
This course is intended to synthesize the various aspects of geology covered in the third year core program. The focus of the course is on tectonic processes and the ways in which these processes create and modify the Earth's crust. We cover the fundamental geological, geophysical, and geochemical controls that operate today, including pate tectonics, and the ways in which these might have differed in the geological past. The tectonic evolution of specific orogenic belts is discussed, including both modern and ancient examples in Canada and other parts of the world.
PREREQUISITES: ERTH 2270.03, 3140.03
CROSSLISTED: ERTH 5350.03
FORMATS: Lecture

ERTH 4410 Environmental Geoscience

CREDIT HOURS: 3
Environmental geoscience integrates various aspects of earth sciences to critically examine the interaction between humans and the geologic environment. Topics include:environmentally sensitive elements and minerals, geologic hazards, water, soil, mineral and energy issues, use of isotopes as tracers, as well as waste management, radioactivity, and the urban environment.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
COREQUISITES: ERTH 2380.03
PREREQUISITES: ERTH 2380.03, ERTH 3303.03 and two additional ERTH courses at the 3000 level or above, or permission of instructor
RESTRICTIONS: Restricted to students in third year or above.
FORMATS: Lecture | Tutorial

ERTH 4460 Geochronology and Thermochronology

CREDIT HOURS: 3
Earth and Planetary Sciences extensively use the radioactive decay and growth of naturally occurring nuclides to quantify the timing and rates of geological processes. This course introduces the fundamentals of Geochronology and Thermochronology including the principles, analytical methods and application of several of the most widely applied geo- and thermochronometers.
PREREQUISITES: ERTH 2380.03, ERTH 2002.03 and one course out of MATH 1000.03, PHYC 1190.03 or PHYC 1290.03.
CROSSLISTED: ERTH 6400.03
FORMATS: Lecture

ERTH 4470 Introduction to Seismic Imaging

CREDIT HOURS: 3
This course teaches the basic techniques of the reflection seismic method for imaging of earth structures such as those used in hydrocarbon exploration. Lectures introduce concepts and techniques that are applied in computer lab to the processing of a multi-channel seismic dataset. Concepts covered include: source and receiver geometry, digital filtering, deconvolution, velocity analysis, stacking, and migration.
PREREQUISITES: ERTH 2270.03 or permission of instructor
CROSSLISTED: ERTH 5470.03, OCEA 4470.03, PHYC 4470.03, PHYC 5470.03
FORMATS: Lecture | Lab

ERTH 4510 Directed Reading

CREDIT HOURS: 3
NOTE: Course Details listed here also apply to ERTH 4511.
PREREQUISITES: Permission of Department

ERTH 4511 Directed Readings

CREDIT HOURS: 3
See ERTH 4510.
PREREQUISITES: Permission of Department

ERTH 4520 GIS Applications to Environmental and Geological Sciences

CREDIT HOURS: 3
The integration of geographic information systems (GIS) across a suite of disciplines has expanded the application of spatial analysis to varied and complex problems . This course builds on the foundations of GIS taught in ENVS / ERTH / GEOG 3850.03 to explore analytical tools that test hypotheses and aid in decision-making in both the sciences and digital humanities . Topics covered in lecture and lab include advanced methods such as spatial cluster analysis, linear regression, and network analysis.
PREREQUISITES: ENVS / ERTH / GEOG 3850.03 or ENVS / ERTH / GEOG 3500.03
CROSSLISTED: ENVS 4520.03; GEOG 4520.03; ERTH 5520.03 (Co-located)
FORMATS: Lecture | Lab

ERTH 4530 Environmental Remote Sensing

CREDIT HOURS: 3
This course introduces students to remote sensing methods and their use in extracting thematic information for a widening suite of disciplines. Course topics incorporate the fundamentals of remote sensing (e.g., EMR, image evaluation, enhancement, classification, accuracy), focusing on contemporary optical multispectral systems. In the lab setting students use image processing techniques to evaluate, classify, and estimate uncertainty in remote sensor data.
PREREQUISITES: ENVS / ERTH / GEOG 2850.03, or ENVA 3005.03 or PLAN 2006.03, or ENVS / ERTH / GEOG 3500.03
CROSSLISTED: GEOG 4530.03, ENVS 4530.03, ERTH 5520.03 (Co-located)
FORMATS: Lecture | Lab

ERTH 4601 Advanced Global Biogeochemical Cycles and Climate Change

CREDIT HOURS: 3
This course encompasses advanced topics in biogeochemistry with a focus on biogeochemical cycles at the global scale, planetary boundaries, nature-based solutions, other geoengineering approaches to climate change mitigation, and climate change projections and policy.
PREREQUISITES: ERTH/ENVS 3601
CROSSLISTED: ENVS 4601
EXCLUSIONS: E1, E2, and E3
FORMATS: Lecture | Lab

ERTH 4850 Geographic Information Science Research Project
CREDIT HOURS: 3
Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.
COREQUISITES: ERTH 5420.03/GEOG 4520.03/ERTH4520.03
PREREQUISITES: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03
CROSSLISTED: SCIE 4850.03, ENVS 4850,03, ERTH 4850.03, GEOG 4850.03
EXCLUSIONS: Restricted to 3rd and 4th year students
FORMATS: Lecture

Economics

Introduction

Economics is a social science - a science because it involves a rigorous intellectual effort to derive logical conclusions from basic facts and propositions; a social science because it has human beings and their welfare as its ultimate concern. The basic facts of Economics cannot be knowable and measurable with the same precision as those of the physical sciences - human society and its motivations are far too complex to permit this - but none of the sciences surpasses economics in its relevance to our needs, problems and goals.

Economics analyzes the equity, efficiency, and sustainability of human behavior in the production, distribution, and consumption of commodities. Economics is not an easy science; indeed, it is one of the most complex, difficult (and fascinating) areas of study when you pursue it beyond its elementary levels, but some basic knowledge of economics is essential for any educated person. A more extensive knowledge of the subject is an invaluable complement to other fields of specialization such as law, commerce, politics and other studies in social sciences or humanities, and a specialization in the field can lead to a variety of interesting career opportunities.

Degree Programs

The Department of Economics offers the following degree programs in Economics

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Economics
- Minor in Economics

* May be combined with Minor programs from other disciplines

Departmental Requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Economics undergraduate academic advisor.

Staff

Dean
Macdonald, C., BA (Hons), PhD (Dalhousie), Professor (Chemistry)

Chairperson of Department
Cyrus, T., BA (UCLA), PhD (Berkeley)

Faculty Advisors
Giusto, A., Graduate Coordinator (MA/PhD), econgrad@dal.ca
Okoye, D., Graduate Coordinator (MDE/PhD), econgrad@dal.ca
Shamsuddin, M., Co-op Academic Advisor and Undergraduate Advisor, econadvisor@dal.ca

Professors Emeritus
Lesser, B. BComm (Dalhousie), MA, PhD (Cornell)

Professors
Akbulut-Yuksel, M., BS (Middle East Tech), MA, PhD (Houston), Killam Professor and Maxwell Chair of Economics
Iscan, T., BA (Middle East Tech), MA, PhD (Cornell)
Okoye, D., BA Hons, PhD (UWO)
Osberg, L., BA (Hons) (Queen's), MPhil, PhD (Yale), McCulloch Professor of Economics
Rosenblum, D., BA (Williams College), MA, MPhil, PhD (Yale)
Tumennasan, N., BA (Univ of Mongolia), MA (Colorado-Denver), AM, PhD (Brown)
Warman, C., BA (Combined Hons), MA, PhD (Carleton)
Yuksel, M., BSc (METU), MA, PhD (Houston)

Associate Professors
Cyrus, T., BA (UCLA), PhD (Berkeley)
Giusto, A., Laurea in Economics (Bologna), PhD (Oregon)
Kotlyarova,Y., Dip. Software Eng (Lviv Poly Inst), MSc (Univ of Illinois - Urbana), PhD (McGill)
McNeil, J., BA Hons (Carleton), MA, PhD (Queen's)
Zhou, W., BE, MA (Tokyo Inst of Technology), PhD (UBC)

Assistant Professors
Lawson, N., BA, MA (Queen's), MA, PhD (Princeton)
Parra, Á, BA, MA (Pontificia Universidad Católica de Chile), MA, PhD (Northwestern)

University Teaching Fellow
Boulatoff, C., MS (Universite Catholique de l'Ouest), PhD (Utah State)

Senior Instructor
Forsdyke, R., BSc (Hons) Biochemistry, BEd, MA (Queen's), PhD (Simon Fraser)

Instructors
Ntantamis, C., Dip. Naval Architecture & Marine Eng. (Athens), MSc (Piraeus), PhD (McGill)
Shamsuddin, M., BA (Lafayette), PhD (Georgetown)

Adjunct Professors

Cross, M.L., AA (Dawson College), BA (Montana), MA (SFU), PhD (Texas A&M)
Dasgupta, S., BA (Calcutta), MA (Delhi), MA, PhD (Rochester)
Li, W., BMgmt (Shandong), BSc (Shandong), MA (Dalhousie), PhD (Dalhousie)
McAllister, R.I., MA (Oxon), MA (Cantab), LLD (Dalhousie)
Rankaduwa, W., BA, MSc (Sri Lanka), MA, PhD (Dalhousie), UPEI
Yu, W., BSc (Shandong), MA (UNB), PhD (Simon Fraser)

Cross Appointed Faculty

Hajizadeh, M., BSc, MSc (Iran), PhD (University of Queensland, Australia)

BSc or BA (120 credit hour) Concentrated Honours in Economics

Students who want a challenging program that results in a broad background in Economics and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Economics with a minimum GPA of 3.3 and write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of ECON 4201.03 / ECON 4202 : Honours Thesis I and II.

Students interested in eventually pursuing a Masters in Economics are advised to choose the BSc Honours option in order to acquire the needed analytical skills. In contrast, the the BA Honours program provides a broad background in Economics which is excellent prepation for a wide variety of other post-graduate programs.

Admission to Concentrated Honours

Students must apply for admission to Honours programs. Students considering Honours in Economics should consult with an Economics Undergraduate Advisor early in their studies.

To be admitted to the **BSc Concentrated Honours program**, students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I, and ECON 3700.03: Mathematics for Economists
- It is highly recommended that BSc students complete ECON3339.03: Econometrics II prior to applying to Honours
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

To be admitted to the **BA Concentrated Honours program**, students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I
- Have completed at least 12 credit hours of additional advanced Economics courses including 3000-level courses.
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Concentrated Honours program in Economics must complete the following courses:

BSc Concentrated Honours Requirements:

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I

- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 3338.03: Econometrics I/ECON 3339.03: Econometrics II
- ECON 3700.03: Mathematics for Economists
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- ECON 4420.03: Microeconomic Theory/ECON 4421.03: Macroeconomic Theory
- ECON 4201.03: Honours Thesis I/ ECON 4202.03: Honours Thesis II
- An additional 24 credit hours in Economics at or above the 2000 level

Additional Requirements

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BA Concentrated Honours Requirements:

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 3338.03: Econometrics I
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- ECON 4201.03: Honours Thesis I/ ECON 4202.03: Honours Thesis II
- An additional 36 advanced credit hours in Economics of which 12 credit hours must be at the 3000-level or higher

Additional Requirements

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BSc or BA (120 credit hour) Combined Honours in Economics and another subject

Students who wish to study Economics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Economics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Economics, this requirement is satisfied through ECON 4201.03/ECON 4202.03: Honours Thesis.

Students are required to complete a minimum of 33 credit hours in Economics courses above the 1000 level if Economics is their primary subject, and a minimum of 30 credit hours in Economics courses above the 1000 level if Economics is their secondary subject.

Combined Honours students interested in eventually pursuing a Masters in Economics, are advised to choose the BSc option (with Economics as the primary subject) in order to acquire the needed analytical skills. To contrast, the BA Combined Honours program or BSc or BA (with Economics as a secondary subject) provides a broad background in Economics and another subject which is excellent preparation for a wide variety of other post-graduate programs.

Admission to Combined Honours

Students must apply for admission to Combined Honours programs. Students considering Combined Honours in Economics should consult with an Economics Undergraduate Advisor early in their studies.

To be admitted to the **BSc Combined Honours program (Economics as primary subject)**, students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I, and ECON 3700.03: Mathematics for Economists
- It is highly recommended that BSc students complete ECON 3339.03: Econometrics II prior to applying to Combined Honours
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

To be admitted to the **BA Combined Honours program (Economics as primary subject) or BA/BSc Combined Honours program (Economics as secondary subject)** students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Combined Honours program in Economics and another subject must complete the following:

BSc Combined Honours Requirements:

Economics as primary subject

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 3338.03: Econometrics I/ECON 3339.03: Econometrics II
- ECON 3700.03: Mathematics for Economists
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- ECON 4420.03: Microeconomic Theory/ECON 4421.03: Macroeconomic Theory
- ECON 4201.03: Honours Thesis I/ ECON 4202.03: Honours Thesis II
- An additional 3 credit hours in Economics at or above the 2000 level

Additional Requirement

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

Economics as secondary subject

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/ MATH 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 3338.03: Econometrics I
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- An additional 18 credit hours in Economics at or above the 2000-level, 12 of which must be at or above the 3000-level if (ECON 3310.03 or ECON 3349.03) is chosen or 15 of which must be at or above the 3000-level if (ECON 2233.03 or ECON 2239.03) is chosen.

Additional Requirement

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BA Combined Honours Requirements:

Economics as primary subject

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level and higher

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 3338.03: Econometrics I
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- ECON 4201.03: Honours Thesis I/ ECON 4202.03: Honours Thesis II
- An additional 15 advanced credit hours in Economics of which 12 credit hours must be at the 3000-level or higher

Additional Requirement

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

Economics as secondary subject

- Same requirements as for BSc. Combined Honours with Economics as a secondary subject

BSc or BA (120 credit hour) Major in Economics

The 120 credit hour Major is suited to students who want to focus on Economics, but wish to have a program that is somewhat less constrained than the Honours program. BSc Economics Majors complete a minimum of 42 credit hours in Economics courses above

the 1000 level; BA Economics majors complete a minimum of 36 credit hours in Economics courses above the 1000 level. Research and other experiential learning opportunities are available through special topics and experiential classes.

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

BSc Major requirements:

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- An additional 12 credit hours in Economics at or above the 2000 level

3000 level and higher

- ECON 3338.03: Econometrics I
- An additional 21 credit hours in Economics at or above the 3000 level

Additional Requirements

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BA Major requirements:

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 level

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- An additional 12 credit hours in Economics at or above the 2000 level

3000 level and higher

- An additional 18 credit hours in Economics at or above the 3000 level

BSc or BA (120 credit hour) Double Major in Economics and another subject

The Double Major degree program allows students to combine a study of Economics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Economics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA. Students are required to complete a minimum of 30 credit hours in Economics courses above the 1000 level.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

BSc requirements (Economics as primary or secondary subject)

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- An additional 6 credit hours in Economics at or above the 2000 level

3000 level and higher

- ECON 3338.03:Econometrics I
- An additional 15 credit hours in Economics at or above the 3000 level

Additional Requirements

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BA requirements (Economics as primary or secondary subject)

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 level

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- An additional 6 credit hours in Economics at or above the 2000 level

3000 level and higher

- An additional 18 additional credit hours in Economics at or above the 3000 level

BSc or BA (90 credit hour) Minor in Economics

The 90 credit hour degree with Minor in Economics is appropriate for students who want to study some Economics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general arts or science degree with some specialization in Economics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Economics is usually the preferred option for students who wish to combine studies in Economics with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

See the Minor in Economics section of this Calendar.

Minor in Economics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Economics is available to students in the Faculty of Science and in the Faculty of Arts and Social Sciences.

Requirements

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- Must complete between 18 and 36 credit hours in Economics courses at the 2000 level or higher

Contact Economics for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Economics

Co-op Academic Advisor: Dr. Christos Ntantamis (econadvisor@dal.ca)

The Science Co-op degree option enables students to apply their academic knowledge directly while providing them with work experience that assists in making educated career choices. Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Economics, or in Combined Honours or Double Major programs with Economics as the primary subject. Further information and details on Science Co-op can be found in the academic calendar under Work-Integrated Learning & Co-operative Education and the Co-op office's website at dal.ca/wil.

Minors available to students in Economics

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Economics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Economics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section of this calendar. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to students enrolled in a BSc or BA in Economics include:

Certificate in Data Analytics

Certificate in Environmental Impact Assessment

Certificate in Science Leadership and Communication

BEng/BSc (90 credit hour) concurrent degree (Economics)

This degree prepares students for careers in engineering by providing students with a better understanding of: the costs and benefits of projects (including externalities and opportunity costs), the business side of projects and financing, and economic policy frameworks. Following is a recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Economics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Economics. A concurrent BEng/BSc Major in Economics (120 credit hours) can be designed for interested candidates.

	Fall	Winter

Co-operative Education Program in Economics

Co-op Academic Advisor: Dr. C. Ntantamis (econadvisor@dal.ca)

Co-operative Education in Science is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in **BSc (120 credit hour) Honours or Major programs** in Economics, or in Combined Honours (with Economics as the primary subject) or Double Major programs. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is strongly recommended that interested students meet with their Department Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Co-operative Education office dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Economics, please see the Department webpage dal.ca/faculty/science/economics/programs/undergraduate-programs/Co-operative-education.html.

Minors available to students in Economics

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Economics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Economics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section of this calendar. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to students enrolled in a BSc or BA in Economics include:

Certificate in Data Analytics

Certificate in Science Leadership and Communication

BEng/BSc (90 credit hour) concurrent degree (Economics)

This degree prepares students for careers in engineering by providing students with a better understanding of: the costs and benefits of projects (including externalities and opportunity costs), the business side of projects and financing, and economic policy frameworks. Following is a recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Economics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Economics. A concurrent BEng/BSc Major in Economics (120 credit hours) can be designed for interested candidates.

Graduate Studies

The Department offers a graduate program leading to the MA, MDE and PhD degrees. Details of these programs, including a list of graduate courses, are given in the Calendar of the Faculty of Graduate Studies. Senior undergraduates may be admitted to some graduate courses at the discretion of the instructors concerned.

Courses

Courses

Course Notes

Recent course outlines are available on the department's website (http://economics.dal.ca)

All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

Course Descriptions

ECON 1101 Principles of Microeconomics

CREDIT HOURS: 3
How do you decide whether or not to go to university? Why does the price of pizza change so much less than the price of oil? What will better help prevent climate change: a carbon tax, or a cap-and-trade system? Microeconomic analysis, which considers the behaviour of individuals and businesses, can answer questions like these.
FORMATS: Lecture

ECON 1102 Principles of Macroeconomics

CREDIT HOURS: 3
Why are some countries rich and others poor? If high oil prices cause the loonie to rise, how are Ontario manufacturers affected? Why were mortgage interest rates above 20% in 1981 but below 5% in 2013? Macroeconomic analysis, which considers the behaviour of the entire economy, can answer questions like these.
CALENDAR NOTES: ECON 1101.03 is not required before taking ECON 1102.03. ECON 1101.03 and ECON 1102.03 (together) satisfy the Principles of Economics requirement for Economics majors and for Bachelor of Commerce and Bachelor of Management students.
FORMATS: Lecture

ECON 1214 Economics of Food and Food Systems

CREDIT HOURS: 3
This course uses food and food systems to introduce, explore, and understand a range of economic themes and concepts using both historical and contemporary contexts. The economic themes include the demand for food, the supply of food, economic policies that affect both the demand for and supply of food, and climate change and biodiversity loss.
FORMATS: Lecture

ECON 2064 Economic History of the Early Modern West 1500 - 1800

CREDIT HOURS: 3
The course provides an overview of Europe's growing economic power - agriculture, manufacturing, commerce, consumption and fiscality - in the centuries between the first overseas exploration and the onset of the Industrial Revolution. Along with the lectures, students are introduced to a variety of period sources, transcribed and translated.
CALENDAR NOTES: This class cannot be used to meet the life or physical science subject requirement for the BA degree.
CROSSLISTED: HIST2064.03
FORMATS: Lecture | Seminar

ECON 2200 Intermediate Microeconomics

CREDIT HOURS: 3
This course covers consumer behaviour, the theory of the firm, factor markets, and general equilibrium welfare analysis. The course serves as the microeconomic prerequisite for higher-level courses in economics.
CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: ECON 1101.03 with a minimum grade of C.
EXCLUSIONS: ECON 2220.03, ECON 2210.03
FORMATS: Lecture

ECON 2201 Intermediate Macroeconomics

CREDIT HOURS: 3
An extension of macroeconomic theory of income, unemployment, the exchange rate, inflation and financial markets that satisfies the minimum macroeconomic theory requirement for majors in economics. Serves as the macroeconomic prerequisite for higher-level courses in economics.
CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: ECON 1102.03 with a minimum grade of C.
FORMATS: Lecture

ECON 2210 Managerial Microeconomics

CREDIT HOURS: 3
An extension of microeconomic theory and its applications that satisfies the minimum microeconomic theory requirements for Majors in economics. Especially of interest to Commerce students or others not majoring in economics, it pays particular attention to applications of theory in a practical context. Serves as the microeconomic prerequisite for higher-level classes in economics.
CALENDAR NOTES: Credit cannot be received for BOTH ECON 2200.03 and ECON 2210.03.
PREREQUISITES: ECON 1101.03 or ECOA 1000.03 with minimum grade of C
EXCLUSIONS: ECON 2200.03, ECON 2220.03
FORMATS: Lecture

ECON 2211 Economics of Innovation

CREDIT HOURS: 3
Innovation involves the creation and diffusion of new products, processes and methods that drive productivity increases and sustainable growth. This course uses microeconomics to examine the public sector's role in promoting innovation and firms' receptor capacity to recognize and address productivity gaps with investments in innovative products, processes and methods.
PREREQUISITES: ECON 1101 or ECON 1102 with minimum grade of C
FORMATS: Lecture

ECON 2212 Law and Economics

CREDIT HOURS: 3
Law and Economics is the study of optimal legal frameworks. This course uses microeconomic theory to study the efficiencies of property, contract, tort, criminal, and antitrust law. A critical analysis of the role of the Competition Bureau in Canadian markets is presented, along with the tools used to evaluate transactions.
PREREQUISITES: ECON 1101 with minimum grade of C
FORMATS: Lecture

ECON 2213 Emerging Giants: The Economic Rise of China and India

CREDIT HOURS: 3
This course examines the economic history, current issues, and future trends of China and India, answering such questions as: What explains China's and India's growth? How is climate change affected by this growth? How are global labour markets affected? Must growth lead to rising inequality? Is democracy required for development?
CALENDAR NOTES: The student is recommended to have some knowledge of Statistics prior to taking this course.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
CROSSLISTED: CHIN 2290.03
FORMATS: Lecture

ECON 2216 Economics of Global Warming

CREDIT HOURS: 3
This course uses economic principles to investigate such questions as: What are the benefits and costs of various time paths for abating emissions? How do we value the well-being of future generations? How do we balance helping the poor with environmental sustainability? What policies can align incentives with environmental sustainability?
PREREQUISITES: ECON 1101.03 with minimum grade of C
EXCLUSIONS: ECON2850.06, PHYC2850.06
FORMATS: Lecture

ECON 2217 Women and the Economy

CREDIT HOURS: 3
This course studies questions such as: Have economic conditions improved for women in Canada over the past 30 years? Is there gender discrimination in the Canadian labour market? What are the economic consequences of divorce? Are women more likely than men to be poor? Are there inequalities within families?
CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
CROSSLISTED: GWST 2217.03
FORMATS: Lecture

ECON 2218 Canadian Economy: Policy Issues

CREDIT HOURS: 3
Canada's economy today faces many problems: unemployment, productivity, income distribution, environmental protection, trade relations, federal-provincial fiscal relations, maintenance of social programs, etc. What are the most important economic policy issues that Canada now faces? What is the appropriate policy role for government?
CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 1101.03, ECON 1102.03, with minimum grades of C
CROSSLISTED: CANA 2218.03
FORMATS: Lecture

ECON 2219 Euros and Cents: From Common Market to European Union

CREDIT HOURS: 3
The European Union is a grand experiment to unite countries in a single market. The stepwise evolution from customs union to common market to economic and monetary union with a single currency, the Euro, is reviewed and analyzed. Learn more about an economic integration that is unparalleled in history.
CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
FORMATS: Lecture

ECON 2220 Microeconomic Theory

CREDIT HOURS: 3
This course covers the economic behaviour of individual decision makers, such as a consumer, a worker or a firm. Emphasis is on theoretical ideas, while applications of these ideas are also considered. Of particular interest to those planning to major or to do honours in economics.
CALENDAR NOTES: Students may not receive credit for both 2200.03 and 2220.03. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: Econ 1101.03, MATH 1000.03 (or equivalent) with minimum grades of C
EXCLUSIONS: Credit cannot be received for BOTH ECON 2200.03 and ECON 2210.03.
FORMATS: Lecture

ECON 2231 Perspectives in Health Economics

CREDIT HOURS: 3
This course introduces students to the economics of health, health care, and health policy. It surveys major topics in health economics and the ongoing debate over health care policy. Topics include the economic determinants of health, markets for medical care and health insurance and the government's role in health care.
PREREQUISITES: ECON 1101.03 and any MATH or STAT course with minimum grades of C
FORMATS: Lecture

ECON 2233 Canadian Economic History

CREDIT HOURS: 3
An examination of the economic history of Canada from the time of Confederation to WWI. Major topics explored include: the economic reasons for Confederation, the building of the CPR, the Wheat Boom, foreign trade and investment and the roots of regional disparities.
CALENDAR NOTES: Approved with Canadian Studies. The student is recommended to have some knowledge of history prior to taking this course.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
CROSSLISTED: CANA 2233.03
FORMATS: Lecture

ECON 2239 European Economic History

CREDIT HOURS: 3
This course examines the contrasting development patterns of various industrialized European countries during and after their respective industrial revolutions, their association to the European colonial expansion taking place at the same time, and the economic impact on the rest of the world with reference to the turbulent 20th century.
CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
FORMATS: Lecture

ECON 2300 Psychology and Economics

CREDIT HOURS: 3
Psychology & Economics (aka Behavioural Economics) is a growing subfield of economics that explores how psychological insights contribute to the understanding of economic behaviour. We examine how cognitive biases, heuristics, emotions, and social factors shape decision-making and market behaviour, contrasting traditional economic models with findings from psychology and behavioural economics. Applications will cover a wide range of fields, including labor and public economics.
PREREQUISITES: Econ1101.03 with minimum grade of C, OR Permission from the Instructor
FORMATS: Lecture

ECON 2326 Money and Banking

CREDIT HOURS: 3
The course concerns the nature and operation of the financial system with particular reference to the Canadian experience. It investigates financial instruments (including money) and institutions and the social control of the supply of money and credit.
CALENDAR NOTES: Approved with Canadian Studies
PREREQUISITES: ECON1101.03, ECON1102.03 with minimum grades of C
EXCLUSIONS: ECON3326.03
FORMATS: Lecture

ECON 2334 Perspectives on Economic Development

CREDIT HOURS: 3
Economists have long debated whether the task of development should be entrusted largely to market forces, or whether there is a role for the state in directing a nation's economic affairs. These debates continue. We assess critiques of economic analysis of development and students are encouraged to debate these issues.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
FORMATS: Lecture

ECON 2336 Regional Development

CREDIT HOURS: 3
Why are some countries or regions poor? Why have the relative positions of different countries and regions shifted over the last several decades? Economic development issues, policies, and theories are analyzed to answer these questions.
PREREQUISITES: ECON 1101.03, 1102.03 with minimum grades of C
CROSSLISTED: GEOG 2336.03
FORMATS: Lecture

ECON 2400 Economic Demography

CREDIT HOURS: 3
This course investigates the economic determinants and consequences of the size, growth, and age structure of human populations. Topics include: why and how households save for retirement and related policy; how age structure affects the employment and well-being of particular generations; and how demographic change and economic growth interact.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
FORMATS: Lecture

ECON 2850 The Science and Economics of Climate Change

CREDIT HOURS: 6
This course examines how climate change will impact the environment and human activities, and how to formulate and implement economically realistic solutions. It integrates the physical and biological science with economics in order to analyze the response options as we move towards a carbon-neutral society.
PREREQUISITES: ECON 1101.03 or ECON 1102.03 or any First year MATH or STAT course

CROSSLISTED: PHYC 2850.06
EXCLUSIONS: PHYC 2800.03, ECON 2216.03
FORMATS: Lecture

ECON 3111 Writing in Economics

CREDIT HOURS: 3
This course provides instruction in principles and practice of good writing about economics. Students read and examine writing samples and practice writing for various venues (such as government, firms, and news media) in various formats (such as opinion editorials, government policy papers, proposal writing and journal articles).
PREREQUISITES: ECON 2200.03 or (ECON 2210.03 or ECON 2220.03) witha minimum grade of C

ECON 3231 Topics in Health Economics

CREDIT HOURS: 3
This course comprises a survey of major topics in health economics and introduces the issues, theory and practice of health economics. The course frames health care as an input into the production of health. It thus differentiates the concepts of healthcare and health addressing both throughout the term.
CALENDAR NOTES: ECON 2231.03 is a recommended prerequisite
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON 2280.03/STAT 2080.03/MATH 2080.03, with minimum grades of C
FORMATS: Lecture

ECON 3310 Economic Growth in Historical Perspective

CREDIT HOURS: 3
This course examines the sources of long-run economic growth and development in a historical perspective. Topics covered include invention, innovation, culture, legal institutions governing access to resources, demography, fertility, mortality, and alternative modes of production.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) and ECON 2201.03 with minimum grades of C
FORMATS: Lecture

ECON 3315 Labour Economics

CREDIT HOURS: 3
This course considers the theory, evidence and policy of labour economics from a Canadian perspective. Topics include: How does EI affect the Canadian labour market? Do minimum wages reduce employment? What is economic discrimination and does it exist in Canada? How well do immigrants fare in the Canadian labour market?
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON 2201.03 with minimum grades of C
FORMATS: Lecture

ECON 3319 Industrial Organization

CREDIT HOURS: 3
The course provides an overview of the organization of production. Market structure, firm conduct, and performance affect each other in complex ways; the degree of horizontal and vertical integration affects the ability to set prices, for example. Governments regulate firms in order to reduce socially harmful anticompetitive behaviour.
CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with minimum grade of C
FORMATS: Lecture

ECON 3320 The Economics of Professional Sports

CREDIT HOURS: 3
This course applies microeconomic theory to explain the peculiar nature of professional sports. Topics may include the organization of leagues, ticket pricing, advertising, competitive balance, franchise valuation, stadium financing, broadcasting and sports labour markets. “Controversial” topics, such as gambling, cheating, performance enhancing drugs (PEDs) and discrimination may also be covered.
PREREQUISITES: ECON1102.03, ECON 2200.03 (or ECON2210.03 or ECON2220.03) and (STAT1060.03/MATH1060.03 or STAT2060.03/MATH2060.03) each with minimum grades of C.
FORMATS: Lecture

ECON 3325 The Economics of Racism

CREDIT HOURS: 3
This course examines race and discrimination through the lens of economics. We cover economic theories of discrimination, empirical evidence of discrimination based on race, and government policies meant to reduce discrimination as well as the many policies that exacerbate it, e.g., slavery, red-lining, and segregation.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with minimum grade of C
FORMATS: Lecture

ECON 3330 International Trade

CREDIT HOURS: 3
This course examines the theory and empirics of international trade, including standard historical trade theories, more recent theories, and evidence regarding these theories. The course investigate factor movements, the welfare effects of trade policies in both industrial and developing countries, and the institutions that have developed to regulate those policies.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with minimum grade of C
FORMATS: Lecture

ECON 3331 International Finance

CREDIT HOURS: 3
This course covers the theory and empirics of international macroeconomics. It examines the determination of exchange rates, international capital flows, and risk; the effectiveness of fiscal and monetary policy in an open economy; modern international policy coordination; and the determination of the current account and net foreign assets.
PREREQUISITES: ECON 2201.03 with minimum of grade C
FORMATS: Lecture

ECON 3332 Resource Economics

CREDIT HOURS: 3
This course focuses on intertemporal economics and the economics of market failure as they pertain to the use of natural resources. A selection of resource sectors will also be discussed. Fisheries, agriculture, forestry, and energy represent possibilities, but this will vary from year to year.
CALENDAR NOTES: Approved with Canadian Studies. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), MATH 1000.03 or equivalent with minimum grades of C
FORMATS: Lecture

ECON 3333 Economic Development

CREDIT HOURS: 3
This course surveys current applications of economic theory to the problem of economic development. Topics covered include recent advances in theory of economic growth, theories of poverty and inequality and their relation to economic performance, theories of fertility and population growth, and the microeconomics of peasant agriculture.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, with minimum grades of C
FORMATS: Lecture

ECON 3335 Environmental Economics

CREDIT HOURS: 3
This course serves as an introduction to environmental economics. Topics include social decision making, externalities and public goods, regulatory approaches (standards, charges, tradable permits), forms of value derived from the environment and measurement techniques.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with minimum grade of C
FORMATS: Lecture

ECON 3338 Econometrics I

CREDIT HOURS: 3
The theory of some quantitative methods commonly used by economists is discussed in the context of the classical linear model. Estimation problems caused by violations of the assumptions of the classical model are studied including heteroscedasticity and autocorrelation.
PREREQUISITES: MATH 1000.03 (or equivalent) and STAT 2060.03/MATH 2060.03 with minimum grades of C
FORMATS: Lecture

ECON 3339 Econometrics II
CREDIT HOURS: 3
This course is an extension of ECON 3338.03 and covers a range of econometric methods that are used in economic research. The topics for this course include: panel data, binary-choice models, instrumental variables, time series and forecasting.
PREREQUISITES: ECON 3338.03 with minimum grade of C
FORMATS: Lecture

ECON 3345 Public Finance
CREDIT HOURS: 3
This class studies the economics of taxes and transfers. Equity and efficiency effects of both are considered. Approved with Canadian Studies.
CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) and ECON 2201.03 with minimum grades of C

ECON 3349 History of Economic Thought
CREDIT HOURS: 3
This course will examine theories of value, production, distribution, and growth as developed in classical political economy and neoclassical economics. Theories of equilibrium and stability, the links between classical political economy and macroeconomic theory, and reactions to classical and neoclassical economics will be considered as time permits.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) and ECON 2201.03 with minimum grades of C
FORMATS: Lecture

ECON 3350 Social Cost Benefit Analysis
CREDIT HOURS: 3
Social cost benefit analysis is used to evaluate public projects and private sector regulations. It is similar to the revenue cost accounting used by firms but takes into account external costs and benefits such as environmental damages. This course explains the methodology in the context of case studies after which students apply the method to evaluate a public policy problem.
CALENDAR NOTES: It is strongly recommended for students to have taken one welfare analysis course such as ECON2216.03, ECON3335.03, ECON3345.03, ECON3330.03 or ECON3319.03 prior to registering for the course.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with a minimum grade of C
RESTRICTIONS: Registration exclusion = E2
EXCLUSIONS: ECON 4350
FORMATS: Lecture

ECON 3400 The Economics of Competitive Strategy
CREDIT HOURS: 3
How do firms achieve their goals in competitive markets? We answer this question by applying microeconomic theory to real-world case studies. We will analyze the fundamentals of market power, apply bargaining theory to understand value capture, determine the optimal boundaries and scope of firms, and design compensation to align worker incentives with the firm's objectives.
PREREQUISITES: ECON2200 with minimum grade of C, OR Permission from the Instructor
FORMATS: Lecture

ECON 3426 Monetary Policy
CREDIT HOURS: 3
Assuming a basic knowledge of monetary institutions and macroeconomics, a critical analysis of the objectives and effectiveness of monetary policy is developed. Particular attention is given to the Canadian experience and the effectiveness of Canadian policy.
CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 2201.03 and ECON 2326.03 with minimum grades of C
EXCLUSIONS: ECON4426
FORMATS: Lecture

ECON 3500 Public Economics
CREDIT HOURS: 3
Analyzes the role of government in problems of resource allocation due to market failure. Concentrates on theories of public goods, collective choice, potential of conflict and cooperation in individually-motivated actions, incentive structures capable of realizing rational, cooperative, group outcomes. Provides theoretical underpinnings of many applied fields. Involves mathematical methods.
CALENDAR NOTES: While a background of ECON 3700 is helpful, it is not a prerequisite.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and MATH 1000.03 or equivalent with minimum grades of C or instructor permission
FORMATS: Lecture

ECON 3600 Strategic Behaviour in Economics

CREDIT HOURS: 3
Many economic questions (such as price competition, tax policy, research and development decision, bargaining) can be interpreted as games, in which each player's action affects payoffs of other players. The students learn how to recognize various strategic interactions in economics, and how to evaluate the outcomes of such interactions.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), MATH 1000.03 or equivalent with minimum grades of C
FORMATS: Lecture

ECON 3700 Mathematics for Economists

CREDIT HOURS: 3
This course presents mathematical methods used in modern economics. The lectures concentrate on the basic concepts of analysis, comparative statics and optimization theory. Topics include an introduction to set theory and matrix algebra, the implicit function theorem, unconstrained optimization, constrained optimization with equality and inequality constraints, and intertemporal choice.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, and MATH 1000.03 or equivalent with minimum grades of C or permission of the instructor
CROSSLISTED: MATH 3700.03
FORMATS: Lecture

ECON 3800 Financial Economics

CREDIT HOURS: 3
This course is an introduction to decision making by investors under uncertainty, portfolio theory, asset pricing, financial markets, and instruments. The course covers both the theoretical and practical aspects of investment, surveys the techniques available for economists, and emphasizes “hands-on” learning using Canadian and international case studies.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03 with minimum grades of C
CROSSLISTED: MATH 3800.03
FORMATS: Lecture

ECON 3900 Financial Mathematics

CREDIT HOURS: 3
See course description for MATH 3900.03 in the Mathematics section of this calendar.
PREREQUISITES: MATH 2060.03 and (MATH 2120.03 or MATH 3110.03 or MATH 2135.03) with minimum grades of C or instructor's permission
CROSSLISTED: MATH 3900.03
FORMATS: Lecture

ECON 4002 Experiential Learning (in Economics)

CREDIT HOURS: 3
Experiential learning recognized the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and timetable.
PREREQUISITES: ECON 1101.03, ECON 1102.03, ECON 2200.03 (or ECON 2210.03 or ECON 2220.03(, ECON 2201.03, ECON 3338.03, ECON 3339.03 with minimum grades of C. To be eligible, students should have a minimum average GPA of 3.0 in Economics.
EXCLUSIONS: Scheduled classes at a learning institution, study that would qualify for co-op work terms and paid work. Only one experiential learning class per degree is permitted.

ECON 4201 Honours Thesis I

CREDIT HOURS: 3
This course is required for honours students, and helps students define, research, and write an original research project under the supervision of an economics faculty member. Students develop a topic, critique current literature, run statistical tests, or research and write a policy paper, and present results in a public conference.
CALENDAR NOTES: Students must complete both ECON4201.03 and 4202.03 in the same academic year, and are assigned a common grade for both courses after both have been completed. To be given permission to take the Honours Thesis courses, students should have completed the Dalhousie writing requirement, with a grade of B or higher in at least one Dalhousie writing course. ECON3339.03 is a recommended prerequisite for B.Sc. students.

PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, ECON 3338.03, with minimum grades of C and permission of instructor
EXCLUSIONS: ECON4200.06
FORMATS: Seminar

ECON 4202 Honours Thesis II

CREDIT HOURS: 3
This course is required for honours students, and helps students define, research, and write an original research project under the supervision of an economics faculty member. Students develop a topic, critique current literature, run statistical tests, or research and write a policy paper, and present results in a public conference.
CALENDAR NOTES: Students must complete both ECON4201.03 and ECON4202.03 in the same academic year, and are assigned a common grade for both courses after both have been completed. To be given permission to take the Honours Thesis course, students should have completed the Dalhousie writing requirement, with a grade of B or higher in at least one Dalhousie writing course. ECON3339.03 is a recommended prerequisite for B.Sc. students.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, ECON 3338.03, ECON4201.03, all with minimum grades of C, and permission of instructor
EXCLUSIONS: ECON4200.06
FORMATS: Seminar

ECON 4317 Poverty and Inequality

CREDIT HOURS: 3
Why are some people poor, while others are rich? Why do some nations have more poverty or inequality than others? What can or should be done? This course examines the extent of poverty and inequality in contemporary societies, and the theories underlying alternative measures and explanations.
CALENDAR NOTES: Approved with Canadian Studies. The student is advised to take ECON 3315 before taking ECON 4317.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON2201.03, with minimum grades of C.
EXCLUSIONS: ECON 3317.03; ECON 5317.03
FORMATS: Lecture

ECON 4360 Ethics, Justice, and Economics

CREDIT HOURS: 3
Assumptions of Neoclassical economic theory are critically examined with a focus on the ethical and distributional consequences of using markets as an allocation mechanism. We discuss the major conceptions of economic justice, including utilitarianism and social choice theory, Rawlsian egalitarianism Nozickian libertarianism, Sen's capabilities approach and equality of opportunity.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON 2201.03, with minimum grades of C
CROSSLISTED: PHIL 4360.03
EXCLUSIONS: ECON 3360.03, ECON 5360.03, PHIL 3361.03
FORMATS: Lecture

ECON 4420 Microeconomic Theory

CREDIT HOURS: 3
In-depth study of outcomes of decision-making by agents, individually, collectively or as an interdependent system. Selects topics from: linear and non-linear optimization and applications to theory of consumers and firms, general equilibrium, game theory, alternative solution concepts, comparative statics, stability, welfare, market failures, collective choice, intertemporal economics, uncertainty.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 3700.03, MATH 1000.03 or equivalent, MATH 1010.03 with minimum grades of C
FORMATS: Lecture

ECON 4421 Macroeconomic Theory

CREDIT HOURS: 3
Students are introduced to contemporary issues in macroeconomics including aggregate growth accounting; neoclassical growth models; monetary policy, inflation and unemployment; theories of consumption and investment; and trade and exchange rates. Mathematical methods are applied extensively and their application to economic problems will be stressed at both the theoretical and intuitive levels.
PREREQUISITES: ECON 2201.03, ECON 3700.03, MATH 1000.03 (or equivalent), MATH 1010.03 with minimum grades of C
FORMATS: Lecture

ECON 4427 Market Design

CREDIT HOURS: 3
The course studies how the organization of centrally administered markets affects their performance. Students learn several mechanisms that are currently used, and evaluate their properties. The course has a strong emphasis on applications, e.g., the allocation of students to public schools, interns to hospitals or organ donors to recipients.
PREREQUISITES: ECON3700 or MATH 2001 with a minimum grade of C
EXCLUSIONS: Econ 5427.03
FORMATS: Lecture

ECON 4440 Time Series in Economics
CREDIT HOURS: 3
This is a course in econometrics that focuses on time series models. The topics cover estimation and inference procedures for univariate and multivariate time series models with stationary and nonstationary data, including vector autoregressive models and Markov switching models.
PREREQUISITES: (ECON 3339.03 with minimum grade of C) OR (ECON 3338.03 OR STAT 3340.03 with minimum grade of B+) OR Permission from the Instructor.
EXCLUSIONS: ECON 5440.03
FORMATS: Lecture

ECON 4450 Causal Machine Learning for Economics Analysis
CREDIT HOURS: 3
This course bridges machine learning (ML) techniques and causal inference methods to address primarily economic questions. It explores key ML concepts (penalized regression, regularization, cross-validation, and hyperparameter tuning), along with tree-based methods, and study their implementation in economic research. R-based labs allow students to combine ML with standard econometric tools for robust causal analysis and informed decision-making in economic applications.
PREREQUISITES: ECON 3339.03 with minimum grade of C OR ECON 3338.03 OR STAT 3340.03 with minimum grades of B+ AND Permission from the Instructor.
EXCLUSIONS: ECON 5450
FORMATS: Lecture | Lab

ECON 4700 Advanced Mathematics for Economists
CREDIT HOURS: 3
The course emphasizes abstract analytical methods via a selection of topics in mathematics which prepares the advanced undergraduate student for pursuing graduate studies in economics. Topics include elements of mathematical logic, sets and correspondence, vector spaces, metric spaces, topological concepts, fundamentals of analysis, multivariate calculus, fixed point theorems, dynamic optimization.
PREREQUISITES: ECON 3700.03 with minimum grade of C
FORMATS: Lecture

ECON 8891 Co-op Work-Term I
CREDIT HOURS: 0

ECON 8892 Co-op Work-Term II
CREDIT HOURS: 0

ECON 8893 Co-op Work-Term III
CREDIT HOURS: 0

Environment, Sustainability and Society

Environment, Sustainability and Society

Location:
College of Sustainability
1459 LeMarchant Street
Suite 1401
PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 943-2193
Fax Number:
Email Address: sustainability@dal.ca
Website: www.ess.dal.ca

Academic Programs

The College of Sustainability offers undergraduate programs in Environment, Sustainability, and Society (ESS). For students in the Faculty of Science, ESS can be a Major or Honours subject in a BSc or BA Double Major or Combined Honours degree with an Allied Subject from the Faculty of Science or the Faculty of Computer Science. Sustainability Work-Integrated Learning options (Co-op and Work Experience Program) are available with this degree.

ESS can be added as a Minor to any 120 credit hour BSc degree.

The College of Sustainability also offers Undergraduate Certificate programs:

- Certificate in Environment, Sustainability and Society
- Certificate in Communicating Sustainability
- Certificate in Food, Agriculture, and Sustainability
- Sustainability Leadership Certificate (non-credit Certificate)

For complete details about the College, its programs and courses please see the College of Sustainability.

BSc Combined Honours, Environment, Sustainability and Society

The BSc Combined Honours degree program allows students to combine a study of Environment, Sustainability and Society (ESS) with another subject (Allied Subject). The Allied Subject may be any Honours subject from the Faculty of Science or the Faculty of Computer Science. An Honours Thesis is completed in either ESS or in the Allied Subject. Students intending to complete a Combined Honours program must consult with academic advisors in both subject areas. This degree may also be combined with Minor(s) and Certificate(s).

Work-Integrated Learning options (Sustainability Co-op, Sustainability Work Experience Program, and Science Co-op) are available with this degree.

In addition to fulfilling the College of Arts and Science requirements for the 120 credit-hour degree, students in a BSc Combined Honours program in ESS and another subject must complete the following:

ESS Requirements

1000-level requirements

Minimum 6 credit hours SUST at 1000 level

With completion of Foundation Year Program (FYP) or Dalhousie Integrated Science Program (DISP): Minimum 3 credit hours SUST at 1000 level

Upper-level requirements

- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
- SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision Making*
- 3 more credit hours SUST at 3000 level or above
- 6 more credit hours SUST or ESS Electives at 3000 level or above

ESS as primary subject in BA Combined Honours:

  - 6 more credit hours SUST or ESS Electives at **2000 level or above**
  - SUST 4901.03 and SUST 4902.03: *ESS Honours Thesis* (see below for admission requirements)

ESS as secondary subject in BA Combined Honours:

  - 6 more credit hours SUST or ESS Electives at **3000 level or above**

- Students may take no more than 48 credit hours in SUST/ESS Electives at 2000-level or above

Allied Subject Requirements

Please consult the Academic Calendar and Academic Advisor for your Allied Subject. If ESS is the secondary subject, the Honours Thesis is typically completed in the Allied (primary) Subject. Even if ESS is the primary subject, there may be additional course and GPA requirements for the Allied Subject to satisfy their Combined Honours degree requirements.

Admission to ESS Honours Thesis

Students wishing to complete the Honours Thesis in ESS must apply for admission to the ESS Honours Thesis by completing the "Intent to Register for ESS Honours Thesis" form before the end of the winter term prior to starting the ESS Honours Thesis course. A cumulative GPA of 3.3 is required in all SUST and ESS Elective courses at 2000 level or above, with no individual grade less than C. Students must also complete the Dalhousie Honours Application Form before the deadline in September of their graduating year.

BSc Combined Honours Graduation Requirements

Students must fulfill the College of Arts and Science requirements for the 120 credit hour BSc Combined Honours degree. A cumulative GPA of 3.0 is required in all Honours Subject courses at 2000 level or above, with no individual grade less than C.

General Degree Requirements satisfied by SUST courses

- SUST 1000.06 satisfies the 6 credit hours writing requirement (SUST 1400.03 and SUST 1001.06 do not satisfy the Writing Requirement).
- For BSc students either SUST 1000.06 or SUST 1001.06 satisfy the Social Science requirement.
- For BA students either SUST 1000.06 or SUST 1001.06 satisfy the Life and Physical Sciences requirement.
- For all General Degree Requirements please see College of Arts and Science General Degree Requirements.

BSc Double Major, Environment, Sustainability and Society

The BSc Double Major degree program allows students to combine a study of Environment, Sustainability and Society (ESS) with another subject (Allied Subject). The Allied Subject may be any Major subject from the Faculty of Science or the Faculty of Computer Science. It is recommended that students enrolled in a Double Major program consult with academic advisors in both subject areas. This degree may also be combined with Minor(s) and Certificate(s).

Work-Integrated Learning options (Sustainability Co-op, Sustainability Work Experience Program, and Science Co-op) are available with this degree.

In addition to fulfilling the College of Arts and Science requirements for the 120 credit-hour degree, students in a BSc Double Major program in ESS and another subject must complete the following:

ESS Requirements

1000-level requirements

Minimum 6 credit hours SUST at 1000 level

With completion of Foundation Year Program (FYP) or Dalhousie Integrated Science Program (DISP): Minimum 3 credit hours SUST at 1000 level

Upper-level requirements

- SUST 2000.06: *Local Governance, Citizen Engagement and Sustainability*
- SUST 2001.06: *Global Environmental Governance*
- SUST 3000.03: *Environmental Decision Making*
- SUST 4001.03: *Environment, Sustainability and Society Capstone Part 1**
- SUST 4002.03: *Environment, Sustainability and Society Capstone Part 2**
- 3 more credit hours SUST at 3000 level or above
- 6 more credit hours SUST or ESS Electives at 3000 level or above

  * SUST 4001 and SUST 4002 must be taken in consecutive Fall and Winter terms. Credit will not be granted for SUST 4001 until completion of SUST 4002.

  * Students who complete at least one Sustainability or Science Co-op Work term or Sustainability Work Experience Program work term may replace SUST 4001.03 and SUST 4002.03 *ESS Capstone* with 6 credit hours SUST at 3000-level or above.

- The courses listed above fulfill the minimum requirements of 30 credit hours at 2000-level or above and 18 credit hours at 3000-level or above
- Students may take up to 18 more credit hours in SUST/ESS Electives at 2000-level or above, to a maximum of 48 credit hours

Allied Subject Requirements

Please consult the Calendar and Academic Advisor for your Allied Subject.

General Degree Requirements satisfied by SUST courses

- SUST 1000.06 satisfies the 6 credit hours Writing Requirement (SUST 1400.03 and SUST 1001.06 do not satisfy the Writing Requirement).
- For BA students either SUST 1000.06 or SUST 1001.06 satisfies the Life and Physical Sciences requirement.
- For BSc students either SUST 1000.06 or SUST 1001.06 satisfies the Social Science requirement.
- For all General Degree Requirements please see College of Arts and Science General Degree Requirements.

Minor in Environment, Sustainability and Society

The Environment, Sustainability and Society (ESS) Minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Science, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Applied Computer Science, Bachelor of Management, Bachelor of Music, Bachelor of Journalism, or Bachelor of Science (Medical Sciences) program.

Also available with a Minor in Environment, Sustainability and Society (ESS):

- BA (90 credit hour) Degree
- BEng/BA Concurrent Degree

Requirements for Minor in ESS:

- any 1000-level SUST course (minimum 3 credit hours)
- a minimum of 18 credit hours and a maximum of 27 credit hours at the 2000 level or above in SUST courses.

Introduction

Environmental Science in the Department of Earth and Environmental Sciences offers several programs. These include a BSc Honours/Major in Environmental Science, a Minor in Environmental Science, a Double Major in Environmental Science and Community Design, and a BSc or BA Double Major or Combined Honours in Environmental Science and any Major/Honours subject in the Faculty of Science, Faculty of Arts and Social Sciences (FASS) or with the College of Sustainability. The Faculty of Arts and Social Sciences (FASS), the Faculty of Science, the Faculty of Computer Science and the Faculty of Architecture and Planning also offer a Minor in Environmental Studies which is administered through Environmental Science.

Environmental Science applies the findings and principles from multiple disciplines to environmental questions and problems. Environmental Science, by nature, is multidisciplinary and interdisciplinary. Most environmental scientists develop expertise in a particular discipline, and work co-operatively with specialists in other disciplines to solve environmental problems. They work in a variety of institutions in both the public and private sectors: municipal, provincial and federal government departments, consulting and engineering companies, development aid organizations in the non-governmental sector and activist community organizations. In all of these institutions they must integrate their scientific knowledge into the prevailing political, economic and legal systems.

The courses required for the BSc Environmental Science stress the links among the fields of study that the students acquire. Thus, students graduate with a combination of depth and breadth of knowledge and the ability to solve problems in the real world.

Degree Programs

The Faculty of Science offers the following degree programs in Environmental Science

- BSc (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- Minor in Environmental Science (120 hour and 90 hour)
- Minor in Environmental Studies

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Program Requirements can be seen by following the links to the right. In addition to the program requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with the Environmental Science undergraduate academic advisor.

Staff

Dean
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chair of Earth and Environmental Sciences
Nedimovic, M., BSc (Belgrade), MSc, PhD (Toronto)

Graduate Program Coordinator (Earth Sciences)
Sherwood, O., BSc, MSc (McMaster), PhD (Dalhousie)

Undergraduate Program Coordinator (Earth Sciences)
Coutand, L., BSc, PhD, (Univ of Rennes, France)

Undergraduate Program Coordinator (Environmental Science)
Gass, S., PhD (Open Univ, UK)

Undergraduate Advisor (Earth Sciences)
Young, M., BSc (Dalhousie), MSc (Queen's)

Undergraduate Advisor (Environmental Science)
Gass, S., PhD (Open Univ, UK)
Mui, A., BSc (Guelph), MSc (Sydney), PhD (Toronto)

Co-op Academic Advisor (EES)
Wright, T., PhD (Alberta)

Faculty
Arnott, A., BSc (Acadia), PhD (Dalhousie)
Brenan, J. M., BSc Honours (McGill), PhD (Rensselaer)
Coutand, L., BSc, PhD, (Univ of Rennes, France)
Cox, R., BSc Hons, MSc (Glasgow Univ), PhD (Memorial)
Fedortchouk, Y., MSc (Mosow State Univ), PhD (Victoria)
Franklin, C., BSc Honours (Toronto), MSc (Saint Mary's), PhD (Alberta)
Gass, S., PhD (Open Univ, UK)
Gosse, J. C., BSc Honours (Memorial), PhD (Lehigh)
Green, C., BSc Honours (Acadia), MES (York), MSA, PhD (Ryerson)
Grek Martin, J., BA, MSc (Wisconsin-Madison), MLIS (Dalhousie)
Grujic, D., BSc (Belgrade), PhD (ETH Zurich)
Mui, A., BSc (Guelph), MSc (Sydney), PhD (Toronto)
Nedimovic, M., BSc (Belgrade), MSc, PhD (Toronto)
Schwab, M., BSc (Ruprecht Karl), MSc, PhD (ETH Zurich)
Sherwood, O., BSc, MSc (McMaster), PhD (Dalhousie)
Sterling, S., PhD (Duke Univ)
Wach, G. D., BA (Hons) (Western Ontario), MSc (South Carolina), DPhil (Oxford)
Wright, T., PhD (Alberta)
Young, M., BSc (Dalhousie), MSc (Queen's)
Zhang, M., BSc (Henan Normal University), PhD (University of Science and Technology of China)

Professors Emeriti
Gibling, M. R., BA (Oxon), PhD (Ottawa)
Jamieson, R. A., BSc (Dalhousie), PhD, (Memorial)
Zentilli, M., BSc (Chile), PhD (Queen's), PGeo

Adjunct Faculty
Adlakha, E., PhD (Ottawa)
Atkins, J., BSc, BScH (Dalhousie), MSc (Saint Mary's), PhD (Carleton), Joggins Fossil Institute
Berndt, C., MSc (Kiel), Phd (Oslo), GEOMAR
Brown, D., BSc (Dalhousie) Canada-NS Offshore Petroleum Board (CNSOPB)
Brushett, D., BSc (Dalhousie), MSc (Memorial), DNRR

Butler, J., BSc, PhD (Dalhousie)
Cairns, G., BASc, PhD (Toronto)
Campbell, C., BSc Honours (SMU), PhD (Dalhousie), Geological Survey of Canada Atlantic
Chinn, I., BSc Honours (Natal), PhD (Cape Town), De Beers
Curasi, S., BSc Honours (Colgate), PhD (Notre Dame)
Dickie, J., BSc Honours and MSc (Dalhousie), BEd (University of Toronto/ OISE), MBA (Sobey School of Business, SMU)
Eamer, J., BSc Honours, MSc, PhD (Victoria), GSC
Fedak, T. J., BA (NSCAD), PhD (Dalhousie), Fundy Geological Museum
Fong, K., BSc Honours (Toronto), MSc (ETH Zurich), PhD (Harvard), George Washington University
Forbes, D., BA Honours (Carleton), MA (Toronto), PhD (UBC), GSC Atlantic
Gibling, M., BA (Oxon), PhD (Ottawa)
Hanley, J., BASc Honours, MSc, PhD (Toronto)
Holz, S., PhD (Technische Universität)
Iacopini, D., PhD (Universita degli Studi di Pisa), Università degli Studi di Napoli Federico II
Jamieson, R. A., BSc (Dalhousie), PhD, (Memorial)
Kellet, D., BSc (UBC), MSc (Queen's), PhD (Dalhousie), GSC
Kelly, N., PhD (Dalhousie), Fisheries and Oceans Canada
Kettanah, Y., BSc (Baghdad Univ), PhD (Southampton Univ, UK)
Kopp, H., BSc, MSc, PhD (Kiel), GEOMAR
Kou-Giesbrecht, S., BSc (McGill), MA, MPhil (Columbia), PhD (Columbia)
Lambiv Dzemua, G., BSc (University of Buea), MSc (Ghent), PhD (Alberta), Government of the Northwest Territories
Martel, T., BSc Honours, PhD (Dalhousie), Corridor Resources Inc.
Maselli, V., BSc (Bologna), MSc (Trieste), PhD (Bologna)
Mudie, P. J., BSc (Cape Town), BSc (Leicester), PhD (Dalhousie), National Research Council
Murphy, J. B., BSc (Dublin), MSc (Acadia), PhD (McGill), St. Francis Xavier University
Normandeau, A., BSc, MSc, PhD (Laval), GSC
Parsons, M., BSc (Dalhousie), PhD (Stanford), GSC Atlantic
Pearson, G., BSc (Imperial College), PhD (Leeds), University of Alberta
Piro, M., BSc, MSc, PhD (Montreal), University of Alberta
Plourde, A., PhD (University of British Columbia), GSC Atlantic
Reynolds, P., BSc, MSc (Calgary)
Reynolds, D., BA (Princeton), MS (Duke), PhD (Columbia), ExxonMobil
Richards, F., BSc Honours (Bristol), MSc (Imperial College)
Waldron, J., BA Honours (Emmanuel College), PhD (Edinburgh)
Zentilli, M., BSc (Univ of Chile), PhD (Queen's)

BSc (120 credit hour) Major in Environmental Science

The 120 credit hour Major is suited to students who want to focus on Environmental Science, but wish to have a program that is somewhat less constrained than the Honours program. Environmental Science Majors complete 36 credit hours in Environmental Science courses. Research and other experiential learning opportunities are available through laboratories, field, special topics and internship courses.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Environmental Science. See Co-operative Education Program.

Program requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Major program in Environmental Science must complete the 1000 level courses (listed below) and the Common Core courses - Majors (also listed below).

1000 Level Courses (to be taken in first year, if possible)

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

Or

- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- ERTH 1080.03: Geology I
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement in their first year.

Also required but usually taken in the second year:

- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics*

Common Core Courses - Majors

To be completed over the course of a four year degree program: Common Core Courses introduce students to the scope and magnitude of Environmental Science and are designed to provide students with an appreciation of the scientific, historic, legal and social aspects of environmental issues.

- STAT 2080.03: Statistical Methods of Data Analysis and Inference*
- BIOL 2060.03: Introductory Ecology
- PHIL 2480.03: Environmental Ethics**
- ENVS 2100.03: Environmental Informatics
- ENVS 2310.03: Energy and the Environment
- ENVS 3100.03: Environmental Analytics
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3500.03: Geoscience Information Management
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3601.03: Global Biogeochemical Cycles
- ENVS 4001.03: Environmental Impact Assessment
- ENVS 4100.03: Environmental Science Capstone
- ENVS Majors are required to take 2 field courses. Student have the option to take two ENVS field schools (chosen from ENVS 2000, ENVS 2500, ENVS 3001) or to take one ENVS field school (chosen from ENVS2000, ENVS2500, or ENVS3001) and one ENVS-approved field course (contact an ENVS Advisor to discuss)

*STAT 2080.03: Statistical Methods of Data Analysis and Inference and ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics together satisfy the College of Arts and Science requirement for six credit hours in Social Science.

**PHIL 2480.03: Environmental Ethics satisfies half of the College of Arts and Science requirement for six credit hours in Languages and Humanities.

BA (120 credit hour) Major in Environmental Science

BA Major in Environmental Science

1000 Level

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a single first year science subject chosen from BIOL, CHEM, PHYC, ERTH, ECON
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 Level

- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- Six credit hours chosen from:
    - BIOL 2003.03: Diversity of Life I
    - BIOL 2004.03: Diversity of Life II
    - BIOL 2060.03: Introductory Ecology
    - GEOG 2800.03: Climate Change
    - CHEM 2505.03
    - OCEA 2001.03: The Blue Planet 1
    - OCEA 2002.03: The Blue Planet 2
    - ECON 2216.03: Economics of Global Warming
    - ERTH 2410.03: Environmental Issues in Earth Sciences
    - ENVS 2310.03: Energy and the Environment

- PHIL 2480.03: Environmental Ethics
- Any additional ENVS 2000- level course. Please note this may include ENVS 2000 or ENVS 2500.

3000 and 4000 Level

- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II*
- ENVS 4001.03: Environmental Impact Assessment
- At least six additional credit hours from:
  - Any additional 3000 or 4000 level ENVS courses
  - BIOL 3060.03: Environmental Ecology
  - BIOL 3061.03: Communities and Ecosystems
  - BIOL 4160.03: Political Ecology

BSc Double Major in Environmental Science and Community Design

BSc Double Major in Environmental Science (primary subject) and Community Design

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Double Major program in Environmental Science and Community Design must complete the following:

1000 Level

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)
- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics
- PLAN 1001.03: Introduction to Community Design I and PLAN 1002.03: Introduction to Community Design II

OR

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity and CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- ERTH 1030.03: Introduction to Physical Geography
- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics
- PLAN 1001.03 and PLAN 1002.03
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability and ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions

Common Core Courses - as listed for BSc Major, except:

- ENVS 2310.03: Energy and the Environment not required
- Choice of ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science or ENVS 3001.03: Environmental Science Field School

Community Design Courses

- PLAN 2006.03: Space, Place and GIS
- PLAN 2009.03: Introduction to Policy-making
- PLAN 2101.03: Data, Probability and Planning

- PLAN 2201.03: Introduction to Environmental Planning
- PLAN 3030.03: Site Planning
- PLAN 3100.03: Transportation and Land Use Planning
- An additional six credit hours in PLAN

BSc or BA (120 credit hour) Double Major in Environmental Science and another subject

The Double Major degree program allows students to combine a study of Environmental Science with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, the College of Sustainability or Community Design in the Faculty of Architecture and Planning. Environmental Science may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Environmental Science as the primary subject. See Co-operative Education Program.

Program Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc or BA Double Major program in Environmental Science and another subject must complete the following (BSc requirements are listed first followed by those for a BA):

BSc Double Major, ENVS as primary or secondary subject

Students must complete the following:

1000 Level (to be taken the first year, if possible)

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

OR

- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement in their first year.

Also required but usually taken in the second year:

- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics*

Common Core Courses as listed for BSc Major except:

- ENVS 2310.03: Energy and the Environment is not required
- Choice of ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science or ENVS 3001.03: Environmental Science Field School

BA Double Major, ENVS as primary or secondary subject

1000 Level

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a first year science subject chosen from BIOL, CHEM, PHYC, ERTH, ECON
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 Level

- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- Six credit hours chosen from:
    - BIOL 2003.03: Diversity of Life I
    - BIOL 2004.03: Diversity of Life II
    - BIOL 2060.03: Introductory Ecology
    - GEOG 2800.03: Climate Change
    - CHEM 2505.03
    - OCEA 2001.03: The Blue Planet I
    - OCEA 2002.03: The Blue Planet II
    - ECON 2216.03: Economics of Global Warming
    - ERTH 2410.03: Environmental Issues in Earth Sciences
    - ENVS 2310.03: Energy and the Environment
    - PHIL 2480.03: Environmental Ethics

3000 and 4000 Level

- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 4001.03: Environmental Impact Assessment
- At least six additional credit hours from:
    - Any additional 3000 or 4000 level ENVS courses
    - BIOL 3060.03: Environmental Ecology
    - BIOL 3061.03: Communities and Ecosystems
    - BIOL 4160.03: Political Ecology

BSc or BA (120 credit hour) Combined Honours in Environmental Science and another subject

Students who wish to study Environmental Science in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Environmental Science may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Environmental Science, this requirement is satisfied through ENVS 4901.03 and ENVS 4902.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Environmental Science as the primary subject. See Co-operative Education Program.

Program Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc or BA Combined Honours program in Environmental Science and another subject must complete the following (BSc requirements are listed first followed by those for a BA):

BSc Combined Honours in Environmental Science and another subject

ENVS as primary or secondary subject

1000 Level (to be taken in first year, if possible)

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

OR

- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement and/or their writing requirement in their first year.

Also required but normally taken in the second year:

- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics

Common Core Courses as listed for BSc Concentrated Honours except:

- ENVS 2310.03: Energy and the Environment not required
- Choice of ENVS 2000.03: Urban Field School or or ENVS 2500.03 Field Methods in Environmental Science or ENVS 3001.03: Environmental Science Field School

If ENVS is the primary subject: a minimum of six additional credit hours of ENVS or ENVS-equivalent courses, which may be ENVS 4901.03/ENVS 4902.03 (Honours Thesis and Qualifying Exam).

BA Combined Honours in Environmental Science and another subject

Requirements are the same for ENVS as primary or secondary subject. Students must complete the following:

1000 Level

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a single first-year science subject chosen from BIOL, CHEM, PHYC, ERTH, ECON
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 Level

- ENVS 2000.03: Urban Field School or ENVS 2500.03: Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- Six credit hours chosen from:
    - BIOL 2003.03: Diversity of Life
    - BIOL 2004.03: Diversity of Life II
    - BIOL 2060.03: Introductory Ecology
    - GEOG 2800.03: Climate Change
    - CHEM 2505.03
    - OCEA 2000.06: The Blue Planet
    - ECON 2216.03: Economics of Global Warming
    - ERTH 2410.03: Environmental Issues in Earth Sciences
    - ENVS 2310.03: Energy and the Environment
    - PHIL 2480.03: Environmental Ethics

3000 and 4000 Level

- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 4001.03: Environmental Impact Assessment
- At least six additional credit hours from:
    - Any ENVS course
    - BIOL 3060.03: Environmental Ecology
    - BIOL 3061.03: Communities and Ecosystems
    - BIOL 4160.03: Political Ecology

If ENVS is the primary subject, a minimum of six additional credit hours of ENVS or ENVS equivalent courses, which may be ENVS 4901.03, ENVS 4902.03 (Honours Thesis and Qualifying Exam).

BSc (120 credit hour) Concentrated Honours in Environmental Science

Students who want a challenging program resulting in a broad background in Environmental Science, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Environmental Science or Environmental Science Equivalent Courses with a minimum GPA of 3.0, and each ENVS and ENVS Equivalent Course above the 1000-level must be passed with a grade of "C" or better. Honours students write a research-based Honours thesis and the Honours Qualifying Examination requirement is satisfied through completion of ENVS 4901.03 and ENVS 4902.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Environmental Science. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Environmental Science should consult with an Environmental Science Advisor early in their studies. To be admitted, students must have a minimum GPA of 3.5 in all ENVS courses. More information on applying to the Environmental Science Honours program can be found at www.dal.ca/environmentalscience.

Program Requirements

In addition to fulfilling the requirements outline in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Concentrated Honours program in Environmental Science must complete the following:

1. 1000 level courses (below)
2. Common Core courses (Honours) (below)
3. ENVS 4901.03 and ENVS 4902.03 (Honours thesis and Qualifying Exam)
4. An additional 12 credit hours of ENVS or ENVS-equivalent courses at or above the 2000 level

1000 Level

- SCIE 1505.18: Integrated Science or Integrated Science I and II (SCIE 1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

OR

- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- ERTH 1080.03: Geology I
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement and/or their writing requirement in their first year.

The courses listed above should be taken in the first year, if possible, if ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability and ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions are not taken in the first year, it should be taken in the second year.

Also required but usually taken in the second year.

- ECON 1101.03: Principles of Microeconomics* or ECON 1102.03: Principles of Macroeconomics*

Common Core Courses
Completed at various times over a four year degree program, the Common Core Courses introduce students to the scope and magnitude of Environmental Science and are designed to provide students with an appreciation of the scientific, historic, legal and social aspects of environmental issues.

- STAT 2080.03: Statistical Methods for Data Analysis and Inference*
- BIOL 2060.03: Introductory Ecology
- PHIL 2480.03: Environmental Ethics**
- ENVS 2100.03: Environmental Informatics
- ENVS 2310.03: Energy and the Environment
- ENVS 3100.03: Environmental Analytics
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3500.03: Geoscience Information Management
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3601.03: Global Biogeochemical Cycles
- ENVS 4001.03: Environmental Impact Assessment
- ENVS 4100.03: Environmental Science Capstone
- ENVS Majors are required to take 2 field courses. Student have the option to take two ENVS field schools (chosen from ENVS 2000, ENVS 2500, ENVS 3001) or to take one ENVS field school (chosen from ENVS2000, ENVS2500, or ENVS3001) and one ENVS-approved field course (contact an ENVS Advisor to discuss)

*STAT 2080.03: Statistical Methods for Data Analysis and Inference and ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics together satisfy the College of Arts and Science requirement for six credit hours in social science.

**PHIL 2480.03: Environmental Ethics satisfies half of the College of Arts and Science requirement for six credit hours in Language and Humanities.

BA (120 credit hour) Concentrated Honours in Environmental Science

BA Concentrated Honours in Environmental Science

Students who want a challenging program resulting in a broad background in Environmental Science, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Environmental Science or Environmental Science Equivalent Courses with a minimum GPA of 3.0, and each ENVS and ENVS Equivalent Course above the 1000-level must be passed with a grade of "C" or better. Honours students write a research-based Honours thesis and the Honours Qualifying Examination requirement is satisfied through completion of ENVS 4901.03 and ENVS 4902.03.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Environmental Science should consult with an Environmental Science Advisor early in their studies. To be admitted, students must have a cumulative GPA of 3.5 in the first two years of study. More information on applying to the Environmental Science Honours program can be found at www.dal.ca/environmentalscience.

1000 Level

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a single first year science subject chosen from BIOL, CHEM, PHYC, ERTH, ECON
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 Level

- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- Six credit hours chosen from:
    - BIOL 2003.03: Diversity of Life I
    - BIOL 2004.03: Diversity of Life II
    - BIOL 2060.03: Introductory Ecology
    - GEOG 2800.03: Climate Change
    - CHEM 2505.03
    - OCEA 2001.03: The Blue Planet 1
    - OCEA 2002.03: The Blue Planet 2
    - ECON 2216.03: Economics of Global Warming
    - ERTH 2410.03: Environmental Issues in Earth Sciences
    - ENVS 2310.03: Energy and the Environment
    - PHIL 2480.03: Environmental Ethics

3000 and 4000 Level

- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II*
- ENVS 4001.03: Environmental Impact Assessment
- At least six additional credit hours from:
    - Any additional 3000 or 4000 level ENVS courses
    - BIOL 3060.03: Environmental Ecology
    - BIOL 3061.03: Communities and Ecosystems
    - BIOL 4160.03: Political Ecology

*If ESS is the A subject ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory is waived, and should be replaced with another ENVS course at or above the 3000 level.

Minor in Environmental Science

This Minor is available to students registered in a 120-credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA 90-credit hour degree with Minor in Environmental Science is appropriate for students who want to study some Environmental Science but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Environmental Science. A 90-credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120-credit hour Major or Honours degree at a later date.

The 90-credit hour BSc or BA in Environmental Science is usually the preferred option for students who wish to combine studies in Environmental Science with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

Minor requirements:

- ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- A minimum of 18 credit hours in Environmental Science (ENVS) courses at the 2000 level or higher to a maximum of 36 credit hours. A maximum of 6 credit hours may be ENVS-equivalent.

*Please note that upper level Environmental Science (ENVS) courses have prerequisite requirements.

Minor in Environmental Studies

BSC or BA (120 Credit Hour) Minor in Environmental Studies

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

BA Minor

BA students must take 12 credit hours of required courses and 18 elective credit hours from the list of approved courses below. The following rules apply to the selection of courses for the Minor:

- A maximum of three credit hours in the Major subject (e.g. a course beyond those required for the Major) can count instead toward the Minor.
- At least six credit hours from the Approved Electives list must be in FASS courses and at least six credit hours must be from Science Approved Electives courses.
- In addition to ENVS 3200.03: Introduction to Environmental Law, at least nine credit hours must be at the 3000 level or above.

Required Courses:

- ENVS 1000X/Y.06: Introduction to Environmental Science or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3200.03: Introduction to Environmental Law

BA Approved Electives in Environmental Studies:
Additions to the following lists will be made, as relevant courses become available.

Faculty of Science:

- BIOL 2060.03: Introductory Ecology
- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction to Marine Life in Nova Scotia
- BIOL 3060.03: Environmental Ecology
- BIOL 3061.03: Communities and Ecosystems
- BIOL 3225.03: Plants in the human landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3615.03: Methods in Ecology
- BIOL 4065.03: Sustainability and Global Change
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ERTH 2410.03: Environmental and Resource Geology I
- ERTH 3500.03: Geoscience Information Management
- GEOG 2800.03: Climate Change
- MARI 4665.03: Hacking the Blue Planet
- OCEA 2001.03: The Blue Planet I
- OCEA 2002.03: The Blue Planet II
- OCEA 2800.03: Climate Change
- PHYC 2451.03: Astronomy I: The Sky and Planets
- PHYC 2800.03: Climate Change
- ENVS 2100.03: Environmental Informatics

- ENVS 2310.03: Energy and the Environment
- ENVS 3000.03: Environmental Science Internship
- ENVS 3100.03: Environmental Analytics
- ENVS 3210.03: Environmental Law II: Natural Justice and Unnatural Acts
- ENVS 3220.03: International Environmental Law for Scientists
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3400.03: Human Health and Sustainability
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory
- ENVS 3702.03: Sustainable Industries
- ENVS 4001.03: Environmental Impact Assessment
- ENVS 4004.03: Pathways to Sustainable Energy
- ENVS 4100.03: Environmental Science Capstone

Faculty of Arts and Social Sciences (FASS):

- CTMP 3000.06: Science and Culture
- CTMP 3150.03: Nature and History
- CTMP 3210.03: Intersecting Bodies, Selves and Environments
- CTMP 3411.03: Studies in Contemporary Science and Technology
- EMSP 2310.03: Women and Gender in Early Modern Science
- EMSP 2330.03: Nature Imagined
- EMSP 3000.06: The Study of Nature in Early Modern Europe
- ENGL 4005.03: Green Reading: Nature, Culture, Canada
- ENGL 4400.03: Nature of America
- HSTC 3000.03: The Scientific Revolution
- HSTC 3202.03: Ecology and Religion
- HSTC 4000.06: Science and Nature in the Modern Period
- HSTC 4300.03: Nature and Romanticism
- HIST 3073.03: History of Marine Sciences
- HIST 3210/CANA 3020/GEOG 3020.03: Canadian Cultural Landscapes
- HIST 3302.03: Technology and History in North America
- HIST 3370.03: North American Landscapes
- HIST 3750.03: History of Seafaring
- HIST 4271.03: The Fisheries of Atlantic Canada - Society and Ecology in Historical Perspective
- HIST 4350.03: People and Things - Material Culture
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- INTD 3002.03: Seminar in Development: Development Practice
- INTD 3114.03: Environment and Development
- INTD 3304.03: Sustainable Development in Cuba
- INTD 4013.03: Environmental Conflict & Security
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2485.03: Technology and the Environment
- PHIL 3670.03: Philosophy of Science
- PHIL 4120.03: Theory of Rational Decision-Making
- POLI 3585.03: Politics of the Environment
- POLI 4228.03: Interest Groups
- POLI 4380.03: Politics of Climate Change
- RELS 3211.03, Ecology and Religion
- SOSA 2100.06: Environment and Culture
- SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America
- SOSA 3190.03: Social Movements
- SOSA 3200.03: Environment and Society
- SOSA 3220.03: Coastal Communities

- SOSA 4210.03: Tourism and Development
- SPAN 2070.03: Area Studies on Mexico and Central America
- GWST 3310.03: Gender and Development in Africa

Other Electives

- PLAN 2001.03: Landscape Analysis
- PLAN 3001.03: Landscape Ecology
- PLAN 3002.03: Reading the City
- PLAN 3005.03: Cities and the Environment in History
- PLAN 3010.03: Urban Ecology
- PLAN 3020.03: Landscape Design
- PLAN 4106.03: Transportation Planning

BACSc, BSc, BCSc, BInf, BComm, BMgmt Minor

Students in these programs must take 18 credit hours of required courses, plus 12 credit hours from the approved list of elective courses below. Note: In planning their programs students must take into account the prerequisites which apply to many of the elective courses listed below. The following rules apply to the selection of courses for the Minor:

- No course can fulfill a requirement of both the Major or Honours subject and the Minor.
- A maximum of three credit hours in the Major/Honours subject (e.g. a course beyond those required for the Major/Honours) can count toward the Minor.
- At least three credit hours beyond the required courses must be at the 3000 level or above.

Additions to the Electives list will be made as relevant courses become available.

Required Courses:

- ENVS 1000X/Y.06: Introduction to Environmental Science or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3200.03: Introduction to Environmental Law

Electives (12 credit hours from the list):

- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction the Marine Life of Nova Scotia
- BIOL 3063.03 Resource Ecology
- BIOL 3225.03: Plants in the Human Landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3xxx.03: Any ecology-related course at 3000-level or above
- BIOL 4065.03: Sustainability and Global Change
- BIOL 4104.03: Environmental Microbiology
- BIOL 4160.03: Political Ecology
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- CHEM 4595.03: Atmospheric Chemistry
- CTMP 3210.03: Intersecting Bodies, Selves and Environment
- CTMP 3220.03: The Aesthetics of Nature
- ERTH 2203.03: Sediments and Sedimentary Rocks
- ERTH 2410.03: Environmental and Resource Geology I
- ERTH 3302.03: Quaternary Sedimentary Environments
- ERTH 3400.03: Fundamentals of Hydrogeology
- ERTH 3402.03: Practical Hydrogeology

- ERTH 3410.03: Environmental Geology 2
- ERTH 3420.03: Geochemistry of Aquatic Environments
- ERTH 3440.03: Geomorphology
- ERTH 3500.03: Geoscience Information Management
- ERTH 4450.03: Introduction to Landscape Simulation
- ERTH 4502.03: Micropaleontology and Global Change
- ERTH 4520.03: GIS Applications to Environmental and Geological Sciences
- ERTH 4530.03: Environmental Remote Sensing
- ECON 2210.03: Emerging Giants: the Economic Rise of China and India
- ECON 2216.03: Economics of Global Warming
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ENVS 2100.03: Environmental Informatics
- ENVS 2310.03: Energy and the Environment
- ENVS 3000.03: Environmental Science Internship
- ENVS 4210.03: Administrative Environmental Law: Natural Justice and Unnatural Acts
- ENVS 3220.03: International Law for Environmental Scientists
- ENVS 3225.03: Plants in the Human Landscapes
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3301.03: Enterprise Sustainability
- ENVS 3400.03: Human Health and Sustainability
- ENVS 3500.03: Geoscience Information Management
- ENVS 3615.03: Methods in Ecology
- ENVS 3632.03: Applied Field Methods in Fish Ecology
- ENVS 3801.03: Directed Readings in Environmental Science
- ENVS 3702.03: Sustainable Industries
- ENVS 4001.03: Environmental Impact Assessment
- ENVS 4100.03: Environmental Science Capstone
- ENVS 4004.03: Pathways to Sustainable Energy
- GEOG 2800.03: Climate Change
- HIST 3370.03: North American Landscapes
- HSTC 3202.03:Ecology and Religion
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- INTD 3304.03: Sustainable Development in Cuba
- MARI 4665.03: Hacking the Blue Planet
- MICI 4104.03: Environmental Microbiology
- OCEA 2001.03: The Blue Planet I
- OCEA 2002.03: The Blue Planet II
- OCEA 2800.03: Climate Change
- OCEA 4110.03: Introduction to Geological Oceanography
- OCEA 4120.03: Introduction to Physical Oceanography
- OCEA 4130.03: Introduction to Chemical Oceanography
- OCEA 4140.03: Introduction to Biological Oceanography
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2485.03: Technology and the Environment
- PHYC 2310.03: Energy and the Environment
- PHYC 2451.03: Astronomy I: The Sky and Planets

- SOSA 3220.03: Coastal Communities in the North Atlantic

BCD Minor

The Minor in Environmental Studies is a 30 credit hour Minor taken in conjunction with the Bachelor of Community Design Honours (It is not available within the three year BCD program). The Minor in Environmental Studies provides a student with an appreciation of the scientific, cultural, economic, historic, legal and social aspects of environmental issues. The student will have the opportunity to earn an additional credential on the degree to recognize the special concentration of courses in environmental studies. Approval for the program is required from the School of Planning and from the Coordinator of Environmental Programs. Students complete all requirements for their Honours Major in addition to these required courses for the minor. Students may count the course ENVS 1000 towards both the BCD requirements and towards the requirement for the Minor. Other courses cannot be counted towards both sets of requirements.

Required Courses:

- ENVS 1000.06: Introduction to Environmental Studies (or DISP) or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3200.03: Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03 Environmental Problem Solving II

Elective requirements:

12 credit hours of courses from the following list:

- BIOL 2605.03: Introduction to Marine Life of Nova Scotia
- BIOL 3601.03: Nature Conservation
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- ECON 2216.03: Economics of Global Warming
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ENVS 3000.03: Environmental Science Internship
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3301.03: Enterprise Sustainability
- ENVS 3220.03: International Environmental Law for Scientists
- ENVS 3400.03: Environment and Human Health
- ENVS 3500.03: Exploring Geographic Information Systems
- ENVS 4001.03: Environmental Impact Assessment
- ESMP 2330.03: Nature Imagined
- ESMP 3000.06: The Study of Nature in Early Modern Europe
- ERTH 3302.03: Quaternary Sedimentary Deposits
- ERTH 3440/GEOG 3440: Geomorphology
- HIST 3370.03: North American Landscapes
- HSTC 3202.03: Ecology and Religion

- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- MARI 4665.03: Hacking the Blue Planet
- OCEA 2001.03: The Blue Planet I
- OCEA 2002.03: The Blue Planet II
- OCEA 2800.03: Climate Change
- OCEA 3001.03: Introduction to Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- PHIL 2485.03: Technology and the Environment
- POLI 3385.03: Politics of the Environment
- POLI 3589.03: Politics of the Sea I
- RELS 3211.03: Ecology and Religion
- SOSA 2100.06: Environment and Culture
- SOSA 3200.03: Environment and Society
- SOSA 3211.03: Continuity and Change in Rural Society
- SOSA 3220.03: Coastal Communities in the North Atlantic
- SOSA 4072.03: Naturalistic Approaches to the Social Sciences
- STAT 3345.03: Environmental Risk Assessment

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Environmental Science

Co-op Academic Advisor: Dr. Tarah Wright (tarah.wright@dal.ca)

The Science Co-op degree option enables students to apply their academic knowledge directly while providing them with work experience that assists in making educated career choices. Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Environmental Science, or in Combined Honours or Double Major programs with Environmental Science as the primary subject. Further information details on Science Co-op can be found in the academic calendar under Work-Integrated Learning & Co-operative Education and the Co-op office's website at dal.ca/wil For more information on Co-op Education in Environmental Science, please see www.dal.ca/environment.

Minors available to students in Environmental Science

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Environmental Science may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Environmental Science, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements.

Certificates of particular interest to student enrolled in a BSc or BA in Environmental Science include:

- Certificate in Animal Behaviour
- Certificate in Environmental Impact Assessment
- Certificate in Geographic Information Science
- Certificate in Science Leadership and Communication

Environmental Science Approved Courses from other departments

Agriculture

- AGRI 4001: Agriculture, Food and Well-being
- APSC 4005: Watershed Management & Environmental Restoration
- SOIL 2000: Introduction to Soil Science

Biology

- BIOL 2060: Intro Ecology
- BIOL 3036: Transgenic Organism
- BIOL 3060: Environmental Ecology
- BIOL 3061: Communities and Ecosystems
- BIOL 3063: Resource Ecology
- BIOL 3065: Conservation Biology
- BIOL 3329: Applied Entomology
- BIOL 3602: Introduction to Aquaculture
- BIOL 3601: Nature Conservation
- BIOL 3620: Field Survey of Terrestrial Biodiversity
- BIOL 3623: Applied Coastal Ecology
- BIOL 3640: Tropical Ecology and Biodiversity Field Class
- BIOL 3666: Species Invasions
- BIOL 4065: Sustainability and Global Change
- BIOL 4160: Political Ecology
- BIOL 4664: History of Marine Science

Chemical Engineering

- ENVE 4772: Environmental Assessment and Management

Chemistry

- CHEM 4595: Atmospheric Chemistry

Contemporary Studies

- CTMP 2203: Bio-Politics: Human Nature in Contemporary Thought
- CTMP 3000.06: Science and Culture

Economics

- ECON 2216: The Economics of Climate Change
- ECON 2334: Perspectives in Economic Development
- ECON 2850: The Science and Economics of Climate Change
- ECON 3332: Resource Economics
- ECON 3335: Environmental Economics
- ECON 4350: Social Cost Benefit Analysis

Early Modern Studies

- EMSP 3000.06: The Study of Nature in Early Modern Europe

Earth Sciences

- ERTH 2380: Geochemistry
- ERTH 2410: Environmental Issues in Earth Sciences
- ERTH 3302: Quaternary Sedimentary Environments
- ERTH 3400: Fundamentals of Hydrogeology
- ERTH 3402: Practical Hydrogeology
- ERTH 3420: Geochemistry of Aquatic Environments
- ERTH 3440: Geomorphology
- ERTH 4410: Environmental Geoscience
- ERTH 4520: GIS Applications to Environmental and Geological Sciences
- ERTH 4530: Environmental Remote Sensing

Environmental Science (Agriculture)

- ENVA 2003: Introduction to Urban and Peri-Urban Agriculture
- ENVA 3021: Ecohydrology
- ENVS 4006: Air, Climate, and Climate Change

Environmental Engineering

- ENVE 3452: Soil and Conservation Engineering
- ENVE 3461: Environment Measurement and Analysis
- ENVE 3500: Air Quality

History of Science and Technology

- HSTC 4000: Science and Nature in the Modern Period

Indigenous Studies

- INDG 3052: Indigenous Social Health and Environmental Issues

Interdisciplinary Studies

- IDIS 2000: Fundamentals of Environmental Engineering

International Development Studies

- INTD 3012: Sustainability, Development in Cuba
- INTD 3114: Environment and Development
- INTD 4013: Environmental Conflict and Security

Marine Biology

- MARI 4665: Hacking the Blue Planet

Ocean Sciences

- OCEA 2800: Climate Change
- OCEA 4160: Fisheries Oceanography
- OCEA 4331: History of Marine Science
- OCEA 4335: Environmental Impacts in Marine Ecosystems

Philosophy

- PHIL 2480: Environmental Ethics
- PHIL 2485: Technology and the Environment

Physics

- PHYC 2310: Energy and the Environment
- PHYC 2800: Climate Change
- PHYC 4595: Atmospheric Chemistry

Planning

- PLAN 2010: Sustainable Community Design
- PLAN 3001: Landscape Ecology
- PLAN 3005: Cities and the Environment in History
- PLAN 3010: Urban Ecology
- PLAN 3015: Site Infrastructure
- PLAN 4131: Planning of Coastal Communities and Regions

Political Science

- POLI 3385: Politics of the Environment
- POLI 3589: Politics of the Sea

Sociology and Social Anthropology

- SOSA 2101: Environment and Culture
- SOSA 3052: Indigeneous Social Health and Environmental Issues
- SOSA 3200: Environment and Society

Statistics

- STAT 3345: Environmental Risk Assessment

Sustainability

- SUST 2106: Climate Change and Sustainability

ENVS and ENVS Approved Field Courses

- ENVS 2000: Urban Field School
- ENVS 2500: Field Methods in Environmental Science
- ENVS 3001: Environmental Science Field School
- ENVS 3073: Ecology and Environmental Issues in the Bahamas
- ENVS/MARI 4005: Coral Reefs and Environmental Change with Field Trip
- Any SEASIDE course (see Advisor for details)

Courses

Courses

Course Descriptions

ENVS 1100 Foundations of Environmental Science: Ecosphere, Resources & Sustainability

CREDIT HOURS: 3
This course introduces students to key topics in Environmental Science including science literacy, environmental ethics, principles of ecology, evolution, biodiversity, human population growth, soil, agriculture, forestry, and oceans and freshwater systems. Tutorials reinforce and supplement lectures and allow for small group discussion and debate.
EXCLUSIONS: ENVI 1100.06, ENVS 1000.06, MGMT 1702.03
FORMATS: Lecture | Tutorial

ENVS 1200 Current Environmental Challenges: Analysis and Solutions

CREDIT HOURS: 3
This course introduces current issues and challenges in Environmental Science including air pollution and climate change, non-renewable and renewable energy, waste, urbanization, environmental law, and sustainability and education. Tutorials reinforce and supplement lectures and allow for small group discussion and debate.
EXCLUSIONS: ENVI 1100.06, ENVS 1000.06, MGMT 1702.03
FORMATS: Lecture | Tutorial

ENVS 2000 Urban Field School

CREDIT HOURS: 3
This field course offers an introduction to urban environmental science by examining the role of humans in ecosystems and how humans change ecosystem processes and functions within urban areas. Students gain hands-on experience in environmental science techniques during excursions in different urban settings within the Halifax Regional Municipality.
CALENDAR NOTES: Offered in early May. Daily field trips and/or labs. An auxiliary fee is charged to cover field expenses.
PREREQUISITES: ENVS 1000.06 or SCIE 1505.18 or ENVS 1100.03 and ENVS 1200.03, or equivalent and open only to students in the BSc or BA Environmental Science Programs
FORMATS: Lecture | Lab

ENVS 2100 Environmental Informatics

CREDIT HOURS: 3
Environmental Informatics is the knowledge, skills and tools which enable information to be collected, managed and disseminated to support research in environmental science. Students develop analytical skills using a variety of software including spatial querying in GIS. Identification of fallacies in the media and effective science communication are introduced and applied to current environmental issues.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03, and STAT 1060.03
FORMATS: Lecture | Lab

ENVS 2310 Energy and the Environment

CREDIT HOURS: 3
The physical principles and limitations of renewable energy source utilization and energy conversion. A quantitative introduction to energy conversion and storage systems, including solar power and heating, wind, tidal, geothermal, hydroelectric, nuclear power, hydrogen technology, electrical and mechanical energy storage. The input of these energy options on the global climate and environment will be discussed.
PREREQUISITES: PHYC 1190.03/1290.03 or PHYC 1300X/Y.06 or CHEM 1011.03/1012 and MATH 1000.03 or MATH 1215.03 or permission of the instructor.
CROSSLISTED: PHYC 2310.03
EXCLUSIONS: Students who have previously taken PHYC 3330 can not take PHYC 2310.
FORMATS: Lecture

ENVS 2410 Environmental Issues in Earth Sciences

CREDIT HOURS: 3
Geology underlies many of the environmental problems facing humanity today. Topics include environmental aspects of energy and mineral resource, geologic hazards, geologic connections to pollution and waste disposal, and the role that water plays in its various guises. Canadian examples are incorporated where appropriate. Approved with Canadian Studies.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: One of: ERTH 1080, ERTH/GEOG 1030, ERTH/GEOG 1060, ENVS 1100.03 and ENVS 1200.03, or ENVS 1000.06, SUST 1001 with a

grade of B or above, or DISP with Earth Sciences
CROSSLISTED: CANA 2410.03, ERTH 2410.03
EXCLUSIONS: This class does not count toward a Major or Honours in Earth Sciences
FORMATS: Lecture

ENVS 2500 Field Methods in Environmental Science

CREDIT HOURS: 3
A field-based immersion into environmental field sampling methods. Students gain skills in flora and fauna identification and inventory, assessment of ecosystem health, and sampling methods for air and soil. GPS, GIS, and basic remote sensing skills are utilized in sampling design, collection and visualization of results.
CALENDAR NOTES: Includes a number of field trips. An auxiliary fee is charged to cover field expenses.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03, (or ENVS 1000.06)
RESTRICTIONS: Restricted to students in BSc and BA Environmental Science programs
FORMATS: Lab

ENVS 2850 Foundations of Geospatial Information Science and Technology

CREDIT HOURS: 3
Geographic Information Science (GIS) focuses on the principles of geographic data acquisition, storage, management, processing, visualization, and analysis, and covers fundamental elements of spatial modeling, cartography, geovisualization, spatial data sources and collection methods. Laboratory exercises emphasize the creation, management, and visualization of geographic data drawing from a range of disciplines.
CROSSLISTED: ERTH 2850.03; GEOG 2850.03; ENVA 3005.03
EXCLUSIONS: PLAN 2006.03; ENVS 2006.03; GEOG 2006.03
FORMATS: Lecture | Lab

ENVS 3000 Environmental Science Internship

CREDIT HOURS: 3
This course allows students to gain hands-on experience while addressing a question of personal and academic interest relevant to the field of environmental science by working as interns for 8 hours a week over a twelve-week period on a specific project at a sponsoring agency.
CALENDAR NOTES: It is the student's responsibility to consult with Environmental Program at least 3 weeks prior to the term in which the internship will take place to arrange for a placement and to make sure that the details of the internship are in accordance with university standards.
PREREQUISITES: Open ONLY to students in Minor in Environmental Studies, Honours/Major/Double Major/Combined Honours in Environmental Science. Minimum GPA of 3.0 or permission of instructor required to register.

ENVS 3001 Environmental Science Field School

CREDIT HOURS: 3
Daily field trips introduce methods used in environmental science and environmental processes at diverse sites within Nova Scotia. Involves full-day trips from Halifax and a multi-day camping trip away from Halifax. Offered during the last 2 weeks before Labour Day.
PREREQUISITES: ENVS 2100 and must be an ENVS student

ENVS 3073 Ecology and Environmental Issues in the Bahamas

CREDIT HOURS: 3
This applied field course includes introductory lectures in Canada followed by a place-based field trip to the Cape Eleuthera Institute, Bahamas. Students will collect and analyze a wide spectrum of data related to environmental problems on the island and will consider and problematize various environmental solutions.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 (with a grade of B- or higher in each) or SUST 1000.06 or SUST1001.06(with a grade of B- or higher), An introductory course in statistics (STAT 1060.03 or similar) is recommended. Must be at least a 2nd year student OR have permission of the instructor.
RESTRICTIONS: E1 and E2
FORMATS: Lecture | Experiential Learning | Other (explain in comments)

ENVS 3100 Environmental Analytics

CREDIT HOURS: 3
This course takes a hands-on approach to data analysis to support environmental conservation. Topics include experimental design, spatial pattern analysis, visualization of 3D data, ecological modelling, and animated mapping of time series data. Emphasis is placed on learning skills directly applicable to conducting environmental research in a variety of settings.
PREREQUISITES: ENVS 2100.03 and STAT 2080.03

FORMATS: Lecture | Tutorial

ENVS 3200 Introduction to Environmental Law

CREDIT HOURS: 3
This course will take a look at how environmental law operates in Nova Scotia within the Federal framework and it will illustrate some of the multi-disciplinary aspects which make this area of law part science, part art and part soothsaying.
PREREQUISITES: Must be a third year student
FORMATS: Lecture

ENVS 3225 Plants in the Human Landscape

CREDIT HOURS: 3
The use of plants for human recreation and aesthetic purposes in gardens, public parks, suburban and urban landscapes. Topics include: history of gardens, garden design, plant materials, edible landscaping, plants and human health. The course includes field trips and group work and students complete a design project.
PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 (C+ or better) and BIOL 1011.03 or BIOL 1021.03 (C+ or better)or DISP or PLAN 2001.03
CROSSLISTED: PLAN 3225, BIOL 3225
FORMATS: Lecture | Tutorial

ENVS 3226 Economic Botany, Plants and Civilization

CREDIT HOURS: 3
The story of the human use of plants for food, fibre and fuel including the botany, domestication, development, distribution, production, processing, history, economic and social impacts of the major world crops (cereals, fruits, vegetables, flowers and industrial crops) and the importance of plants in medicine and conservation.
PREREQUISITES: A grade of C+ or higher in BIOL 1010.03 or (BIOL 1020.03 or BIOA 1002.03 or BIOL 1030.03) and BIOL 1011.03 or (BIOL 1021.03, BIOA 1003.03, or BIOL 1031.03); or SCIE 1505.18
CROSSLISTED: BIOL 3226.03
FORMATS: Lecture | Lab

ENVS 3300 Contaminated Site Management

CREDIT HOURS: 3
Scientists, engineers and planners should have a basic understanding of the issues surrounding environmental site assessment given the potential environmental and socio-economic impacts. Topics include phased assessments, risk assessment, remediation and monitoring. Case studies, projects, guest speakers and field trips augment the class.
PREREQUISITES: CHEM 1011.03 and 1012.03 (or equivalent) AND ERTH 1080.03; OR permission of the instructor
RESTRICTIONS: Restricted to 3rd year students and above or permission of instructor.
FORMATS: Lecture

ENVS 3400 Environment and Human Health

CREDIT HOURS: 3
This course examines the relationships between the health of populations and health determinants in the context of environmental sustainability. Weekly laboratory exercises will teach students how geomatics (GIS, GPS, and remote sensing technologies) and epidemiological tools can be used to assess the links between the health of human populations and the health of the environment, and how to use these tools for environmental health research.
PREREQUISITES: Must be a third year student or have permission of instructor
CROSSLISTED: GEOG 3400.03
FORMATS: Lecture | Lab

ENVS 3500 Geographic Information Science & Spatial Data

CREDIT HOURS: 3
See course description for ERTH 3500 in the Earth Sciences section of the calendar.
CALENDAR NOTES: This course is intended for entry level users of Geographic Information Systems and is a required class for the Certificate in Geographic Information Science.

ENVS 3501 Environmental Problem Solving I

CREDIT HOURS: 3
This course introduces students to concepts and methods for analyzing environmental problems. Students will learn analytical approaches for problem solving that are appropriate for a wide range of environmental issues and apply these to the analysis of case studies.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 (with a grade of B- or higher in each) or SUST 1000.06 or SUST 1001.06(with a grade of B- or higher). Must be a 3rd year student OR have permission of instructor.

ENVS 3502 Environmental Problem Solving II: The Campus as a Living Laboratory

CREDIT HOURS: 3
In this course the campus serves as a living laboratory for identifying, evaluating and assessing indicators of progress toward greater campus sustainability. Working in groups, students apply problem solving models to case studies using qualitative and quantitative research methods and make recommendations for improvements on campus based on their analyses.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 (with a grade of B- or higher in each) or SUST 2000.06 or SUST 2001.06. Must be a 3rd year student OR have permission of instructor.
CROSSLISTED: SUST 3502.03
EXCLUSIONS: MGMT 3701.03 SUST 3701.03

ENVS 3601 Fundamentals of Biogeochemistry

CREDIT HOURS: 3
An interdisciplinary course that covers the basic principles of water, carbon, nitrogen, and phosphorus cycling, and human impacts on these cycles, through the biosphere, atmosphere, hydrosphere, and geosphere. This course involves discussion of the latest developments in this rapidly changing field focusing on climate change and global change.
PREREQUISITES: CHEM 1011.03/ CHEM 1012.03 or equivalent, and one of ENVS 1100.03, SUST 1001.03, ERTH 1080.03, or (SCIE 1506.09 or SCIE 1507.09) and completion of 2 years of an undergraduate degree.
CROSSLISTED: ERTH 3601.03

ENVS 3615 Methods in Ecology

CREDIT HOURS: 3
See course description for BIOL 3615 in the Biology section of the calendar.

ENVS 3623 Applied Coastal Ecology

CREDIT HOURS: 3
See course description for BIOL 3623 in the Biology section of the calendar.

ENVS 3624 Urban Freshwater Systems

CREDIT HOURS: 3
See course description for BIOL 3624 in the Biology section of the calendar.

ENVS 3632 Applied Field Methods in Fish Ecology

CREDIT HOURS: 3
See course description for BIOL 3632 in the Biology section of the calendar.
FORMATS: Lecture | Lab

ENVS 3633 Spatial Information and GIS in Ecology

CREDIT HOURS: 3
A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.
CALENDAR NOTES: Offered in the summer through SEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03
CROSSLISTED: BIOL 3633.03, GEOG 3633.03, MARI 3633.03

ENVS 3664 Intertidal Ecology and Diversity

CREDIT HOURS: 3
See course description for BIOL 3664 in the Biology section of the calendar.

ENVS 3700 Earth Resources, Sustainability, and Society

CREDIT HOURS: 3
This course addresses the question: What do we need to know and understand about the nature and distribution of geologic resources to optimally reconcile mineral extraction with society's needs, considerations of the environment, and the sustainable development goals in a more sustainable, geoethical, and balanced approach, through the 21st century.
CALENDAR NOTES: Aimed as an elective course for majors in Earth Sciences and in Environmental Sciences. Must be third year students.
PREREQUISITES: ERTH 1080
CROSSLISTED: GEOG 3700 ERTH 3700
RESTRICTIONS: E1 and E2
FORMATS: Lecture | Seminar | Discussion | Other (explain in comments)

ENVS 3701 Fundamentals of Hydrology

CREDIT HOURS: 3
This course is an introduction to hydrology, emphasizing surface processes and watershed responses. In this course we learn about both the pure and applied uses of hydrology. The course is quantitative and introduces hydrologic processes in the atmosphere, on the land surface, in groundwater and in stream channels.
PREREQUISITES: MATH 1000.03 or MATH 1215.03 and one of ENVS 1000.06 or ENVS 1100.03 and ENVS 1200.03, SUST 1001.06, ERTH 1080.03, or ERTH 1090.03 or one of SCIE 1515X/Y.21, SCIE 1530.27, SCIE 1540X/Y.33 and completion of 2 years of an undergraduate degree. PHYC 1280 and PHYC 1290.03 (or PHYC 1300X/Y.06) and MATH 1010.03 are recommended.
CROSSLISTED: ERTH 3701.03
FORMATS: Lecture | Tutorial

ENVS 3702 Sustainable Industries

CREDIT HOURS: 3
This course introduces concepts and methods for analyzing industrial sustainability through an interdisciplinary lens including economic, social and environmental considerations. The business case for industrial sustainability, the tools necessary to decouple economic growth of our business sectors from resource use and environmental degradation, and the role of sustainable industries in the sustainable development agenda are explored.
PREREQUISITES: (ENVS 1100.03 and ENVS 1200.03) or MGMT 1700.06 or ENVI 1100.06 or ENVS 1000.06 or SUST 2000.06 or SUST 2001.06 or (MGMT 1702.03 and MGMT 2702.03)
CROSSLISTED: MGMT 3702.03
FORMATS: Lecture

ENVS 3801 Directed Readings in Environmental Science

CREDIT HOURS: 3
This course is intended for third and fourth-year students who wish to study in an area of environmental science not covered in other courses offered at the university. It involves independent study supervised by a faculty member. Class content and marking scheme must be approved by the Director of Environmental Programs during the first week of the academic term in which the credit is being sought. It is the student's responsibility to consult with Environmental Programs at least 2 weeks prior to the term in which the Directed Readings course will take place.
PREREQUISITES: ENVS 1000X/Y.06 or ENVS 2001.03 or (ENVS 1100.03 and ENVS 1200.03) and third year student status.

ENVS 3850 Advanced Geospatial Information Science and Technology

CREDIT HOURS: 3
This course builds upon the foundations of ENVS/ERTH/GEOG 2850 by introducing advanced theoretical concepts in GIScience for commonly used spatial analysis methods. Topics include error and uncertainty, data overlay and constraint mapping, spatial statistics, spatial modeling, and ethical issues as they relate to professional practice relevant codes of conduct.
PREREQUISITES: ENVS / ERTH / GEOG 2800.03 or ENVA 3005.03 or PLAN / GEOG 2006.03
CROSSLISTED: ERTH3850; GEOG3850
EXCLUSIONS: ENVS / ERTH / GEOG 3500.03
FORMATS: Lecture | Lab

ENVS 4001 Environmental Impact Assessment

CREDIT HOURS: 3
This courses provides an opportunity to explore all aspects of environmental impact assessment (EIA) as practiced in Canada and in other countries. The courss traces the development of EIA over the past 30 years and critically examines the scientific, procedural and political dimensions.
CALENDAR NOTES: All students taking BIOL 4001.03 or ENVS 4001.03 must have completed 90 credits and be in their fourth year of study or have permission of instructor.
PREREQUISITES: ENVS 1000X/Y.06 or ENVS 1100.03 and ENVS 1200.03 or BIOL 2060.03 or ERTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or INTD 2002.03 or OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) or SUST 2000.06 or SUST 2001.06.
CROSSLISTED: BIOL 4001.03
FORMATS: Lecture | Tutorial

ENVS 4002 The Science of Wetland Ecosystems

CREDIT HOURS: 3
An interdisciplinary introduction to wetland ecosystems, with emphasis on the relationship between wetlands and the surrounding watershed. This relationship determines wetland type, function and in developed landscapes, wetland health. Inversely, wetland type, function and health can affect the developed landscapes. Students will gain an appreciation of the physical relationship through an examination of wetland hydrology, chemical cycling, and ecology. Management of wetlands in the landscape through policy and engineering will also be studied.
PREREQUISITES: CHEM 1011.03/1012.03 or CHEM 1021.03/1022.03 and BIOL 2060.03
CROSSLISTED: BIOL 4002.03
FORMATS: Lecture

ENVS 4003 Coral Reefs and Environmental Change

CREDIT HOURS: 3
Coral reefs are iconic marine ecosystems both biologically and economically. This class introduces students to the biology of both tropical and cold-water corals, key characteristics of their abiotic environments, human impacts at both local and global scales, and management options for sustainable resource use and the the protection of biodiversity.
PREREQUISITES: Chem 1011/Chem 1012 and Biol 2060. Also restricted to students with 6 credit hours in Environmental Science or Biology or Marine Biology at or above the 3000 level.
CROSSLISTED: MARI 4003
RESTRICTIONS: Restricted to exclude E1, E2, E3.

ENVS 4004 Pathways to Sustainable Energy

CREDIT HOURS: 3
Students gain a practical understanding of how to move towards a low-carbon energy future. Students learn about international, national, and subnational policies that drive adoption of renewable energy, energy efficiency, and carbon capture and storage technologies and how the technologies work. The technological barriers to their widespread adoption and how to overcome these barriers are also discussed.
PREREQUISITES: 4th year student, or have permission of instructor.
CROSSLISTED: SUST 4004.03
EXCLUSIONS: E1, E2, E3
FORMATS: Lecture

ENVS 4005 Coral Reefs and Environmental Change with Field Trip

CREDIT HOURS: 3
Coral reefs are iconic marine ecosystems both biologically and economically. This class introduces students to the biology of both tropical and cold-water corals, key characteristics of their abiotic environments, human impacts at both local and global scales, and management options for sustainable resource use and the the protection of biodiversity. This course runs parallel with ENVS 4003 but includes the addition of a 5-day field trip to the Bermuda Institute of Ocean Science.
PREREQUISITES: Chem 1011/Chem 1012 and Biol 2060. Also restricted to students with 6 credit hours in Environmental Science or Biology or Marine Biology at or above the 3000 level. Permission of Instructor Required
CROSSLISTED: MARI 4005
RESTRICTIONS: Restricted to exclude E1, E2, E3, permission of instructor required
EXCLUSIONS: ENVS 4003
FORMATS: Lecture | Lab | Discussion | Experiential Learning

ENVS 4100 Environmental Science Capstone

CREDIT HOURS: 3
Students apply the multidisciplinary knowledge they have acquired during their program of study to real world environmental issues. Students work individually and in groups in preparation towards a formal debate. They evaluate evidence from science, economics, philosophy and other ways of understanding the world to develop mastery and nuance among current environmental topics.

PREREQUISITES: (ECON 1101.03 or ECON 1102.03), PHIL 2480.03, STAT 2080.03, ENVS 2100.03, ENVS 3200.03, and ENVS 3501. Must be a fourth year student.
RESTRICTIONS: E1, E2, E3
FORMATS: Seminar | Discussion

ENVS 4520 GIS Applications in Earth and Environmental Sciences

CREDIT HOURS: 3
The integration of geographic information systems (GIS) across a suite of disciplines has expanded the application of spatial analysis to varied and complex problems . This course builds on the foundations of GIS taught in ENVS / ERTH / GEOG 3850.03 to explore analytical tools that test hypotheses and aid in decision-making in both the sciences and digital humanities . Topics covered in lecture and lab include advanced methods such as spatial cluster analysis, linear regression, and network analysis.
PREREQUISITES: ENVS / ERTH / GEOG 3850.03 or ENVS / ERTH / GEOG 3500.03
CROSSLISTED: ERTH 4520.03; GEOG 4520.03; ERTH 5520.03 (Co-located)
FORMATS: Lecture | Lab

ENVS 4530 Environmental Remote Sensing

CREDIT HOURS: 3
This course introduces students to remote sensing methods and their use in extracting thematic information for a widening suite of disciplines. Course topics incorporate the fundamentals of remote sensing (e.g., EMR, image evaluation, enhancement, classification, accuracy), focusing on contemporary optical multispectral systems. In the lab setting students use image processing techniques to evaluate, classify, and estimate uncertainty in remote sensor data.
PREREQUISITES: ENVS / ERTH / GEOG 2850.03, or ENVA 3005.03 or PLAN 2006.03, or ENVS / ERTH / GEOG 3500.03
CROSSLISTED: GEOG 4530.03, ERTH 4530.03, ERTH 5520.03 (Co-located)
FORMATS: Lecture | Lab

ENVS 4601 Advanced Global Biogeochemical Cycles and Climate Change

CREDIT HOURS: 3
This course encompasses advanced topics in biogeochemistry with a focus on biogeochemical cycles at the global scale, planetary boundaries, nature-based solutions, other geoengineering approaches to climate change mitigation, and climate change projections and policy.
PREREQUISITES: ERTH/ENVS 3601
CROSSLISTED: ERTH 4601
EXCLUSIONS: E1, E2, and E3
FORMATS: Lecture | Lab

ENVS 4850 Geographic Information Science Research Project

CREDIT HOURS: 3
Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.
COREQUISITES: ERTH 5420.03/GEOG 4520.03/ERTH 4520.03
PREREQUISITES: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03
CROSSLISTED: BIOL 4850.03, SCIE 4850,03, ERTH 4850.03, GEOG 4850.03
EXCLUSIONS: Restricted to 3rd and 4th year students.
FORMATS: Lecture

ENVS 4901 Honours Thesis Part A

CREDIT HOURS: 3
Mastery of the basic skills of problem definition, proposal preparation and project implementation is the key to dealing with a wide range of "real-life" situations, both on and off the career path. Includes lectures and tutorials on proposal writing, research design and methodologies, and an independent environmental science research project carried out under the supervision of an approved faculty member.Required for Honours Environmental Science.
CALENDAR NOTES: Multi-term course; final grades will be posted only after both courses (ENVS 4901 and 4902) have been completed. Same final grade will be applied to both courses.
PREREQUISITES: Fourth year Environmental Science and permission of Instructor/Director
FORMATS: Lecture | Seminar

ENVS 4902 Honours Thesis Project Part B

CREDIT HOURS: 3
Independent research project carried out under the supervision of an approved faculty member or affiliated research scientists.Required for Honours Environmental Science.
PREREQUISITES: ENVS 4901.03 with a grade of B+ or higher

ENVS 4950 Advanced Topics in Environmental Science

CREDIT HOURS: 3
This course will address current interdisciplinary issues in environmental science with topics varying each semester. Details as to the content of the course will be announced by Environmental Programs at least one month in advance of the course offering. The course will be taught by Dalhousie faculty, and/or visiting scholars.
PREREQUISITES: This class is restricted to students in the Honours/Major/Double Major in Environmental Science, or permission of the Director of Environmental Programs.
FORMATS: Lecture | Seminar

ENVS 8891 Co-op Work Term I

CREDIT HOURS: 0
Co-op Work Term I. See Environmental Programmes for details.

ENVS 8892 Co-op Work Term II

CREDIT HOURS: 0
See Environmental Programmes for details.

ENVS 8893 Co-op Work Term III

CREDIT HOURS: 0
See Environmental Programmes for details.

ENVS 8894 Co-op Work Term IV

CREDIT HOURS: 0
See Environmental Programmes for details.

First Year Interest Groups (FIGs)

First Year Interest Groups (FIGs)

First Year Interest Groups (FIGs) for Science Students

a start for university success

What is a FIG and why sign up?

A First Year Interest Group, or FIG, is a group of students who meet weekly for an hour during the fall term of their first year at Dal. Groups are composed of about 15 students who have similar academic interests or goals, and who are enrolled in one or more of the same first year courses.

FIGs are designed to complement the classroom experience. It's a place to meet other first year students, and to discuss some of the big ideas emerging in your future field of study. Signing up for a FIG can help you get involved, meet people, and maybe even form lasting friendships. FIGs are free, informal, interactive groups that will help you make the most out of your first year at Dal.

What will you do in a FIG?

- Get to know other first year students with similar interests (maybe you'll find a study partner)
- Meet Dal faculty or professionals who work in your area of interest
- Find out how to get involved (volunteer opportunities, events, clubs)
- Learn about future opportunities for students with your interests (scholarships, summer research, co-op, study abroad)
- Talk!

Who should enrol in a FIG?
Any student in the Faculty of Science who has been accepted as an undeclared Science student and is in their first year of studies can enrol in a FIG.

How do I enrol in a FIG?
You enroll in a FIG when you registered for your regular courses, using the same registration procedure. First, make sure that the time slot of the FIG doesn't conflict with the lecture, lab or tutorial times of your other courses. Then register for the appropriate FIG section (FIGS 0001, 0002, etc.).

Does a FIG count toward my degree?
The FIG will appear on your academic transcript – it can be seen by future employers along with the credit courses you complete. However, because it is not for credit, a FIG does not count as part of the 90 or 120 credit hours you must complete for a BSc degree.

Will I receive a grade for my FIG?
If you complete the FIG, it will appear on your academic transcript with Pass noted beside it. Letter grades are not given for FIGs, and FIGs are not included in calculation of your GPA. However, to receive a Pass you must participate in the FIG sessions.

What if I don't like my FIG?
We expect that most students will enjoy their FIG, and will feel that the time has been well spent. However, if for some reason you find that you do not want to participate in your FIG, you may withdraw. The FIG will then not appear on your transcript.

Can I sign up for more than one FIG?
No. We want to offer the opportunity to participate in a FiG to as many students as possible, and so students may not register in more than one FIG.

FIG options for science students

Courses

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

FIGS 0001 Psychology and Human Behaviour

CREDIT HOURS: 0
Psychology & Human Behaviour is a group for first year science students with interests in psychology, the brain, human behaviour and mental health. In this FIG, you will meet other first year students and will be able to explore your interests and learn about academic and extra-curricular opportunities. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science. FIGS courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0002 Neuroscience and the Brain

CREDIT HOURS: 0
Neuroscience and the Brain is a group for first year science students who are coming to Dal to learn about how the brain works and why that matters. In this FIG, you will meet other first year students and will be able to explore your interests and learn about academic and extra-curricular opportunities. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science. FIGS courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0003 Health and Medicine

CREDIT HOURS: 0
Health & Medicine is a group for first year science students who are coming to Dal to learn about human biology, physiology and/or disease and are interested in pursuing a career in medicine, medical research or another health profession. In this FIG, you will meet other first year students and will be able to explore your interests and learn about academic and extra-curricular opportunities. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science. FIGS courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0004 Oceans

CREDIT HOURS: 0
Oceans is a group for first year science students who are coming to Dal to learn more about oceans and ocean life, including marine conservation, climate change, ocean research, and the living organisms found in ocean environments. In this FIG, you will meet other first year students and will be able to explore your interests and learn about academic and extra-curricular opportunities. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science. FIG courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0005 Climate Change and Biodiversity

CREDIT HOURS: 0
Overview: Climate Change and Biodiversity is a group for first-year science students who are coming to Dal to learn more about environmental science, climate change, species conservation, and efforts to explore and address these wicked problems. Relevant Science programs: Environmental Sciences, Earth Sciences, Economics, Psychology, Sustainability, Marine Biology, Biology, Oceanography, Statistics.
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science as Undeclared Science majors or as BSc students in the College of Sustainability. FIG courses are zero credit hours, but will appear on the academic transcript if completed.
COREQUISITES: One Science course or SUST 1000

RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0007 Innovation and Entrepreneurship in Science

CREDIT HOURS: 0
Innovation and Entrepreneurship is a group for first year students with an interest in how design thinking and innovation can lead to science or technology-based solutions for real world problems. In this FIG, you will meet other first year students and will have opportunities to explore your interests and opportunities together. We will talk about the creative process and design testing, and about opportunities to get involved in SURGE, Dalhousie's Science sandbox, as well as the larger innovation ecosystem on campus. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.
CALENDAR NOTES: For first year students enrolled in the Faculty of Science or Computer Science. FIG courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0008 The Science of Economics in Daily Life

CREDIT HOURS: 0
Who should register: You are coming to Dalhousie with the ambition to learn how to change and make the world a better place. You can start by trying to understand decisions made by you or others that affect your day-to-day life. Economics is a big part of nearly everything you do! This group will explore how "big ideas" from economics relate to real-life examples you have directly experienced or encountered in the media. In this FIGS, you will meet first-year students with similar interests. You will have the opportunity to explore your interests and the options for shaping your academic pathway, with senior peers and with experts, all in a small group setting.
CALENDAR NOTES: Note: FIGS courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) students or Bachelor of Arts students planning to pursue a science program (Economics or Psychology) who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0011 Science2Health: Pharmacy

CREDIT HOURS: 0
Who should register: You are interested in pursuing Pharmacy as a career, or would like to learn more about the Pharmacy program, course selection, admissions, and more. In this FIGS, you will meet first-year students with similar interests, have the opportunity to hear from current Pharmacy students, Pharmacy advisors, members of the admissions team, local pharmacists, and more.
CALENDAR NOTES: For first year students enrolled in the Faculty of Science (Bachelor of Science (BSc) and Medical Sciences (BScMS)) .FIGS courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King's Foundation Year) who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0012 Medical Sciences

CREDIT HOURS: 0
This First Year Interest Group in Science (FIGS) is for students enrolled in the Medical Sciences program.
CALENDAR NOTES: Restricted to students in the BScMS Medical Sciences program with fewer than 16 credit hours
RESTRICTIONS: Restricted to students in Medical Sciences (BScMS) with fewer than 16 credit hours
FORMATS: Seminar

FIGS 0021 Science for Everyone

CREDIT HOURS: 0
Our goal is to affirm and support historically excluded and underrepresented students in STEM. If you have the passion for science but you are bewildered by the many unwritten rules of science, we can help! Are you wondering how to plan your STEM degree? Are you interested in becoming part of a more inclusive science community? Are you uncertain about how to access all the tools you can use to succeed in STEM? Do you want to know where to find support? We will help you with these and other challenges. We will work as a group to address these topics and learn how to support each other's success. There will be group work, hands-on activities, and guest speakers. This is a fall-term learning module offered as part of the Dalhousie Science Scholars and Leaders Program.
CALENDAR NOTES: For first year students in the Faculty of Science
RESTRICTIONS: BSc or BSc (Medical Sciences) students with fewer than 30 credit hours
FORMATS: Seminar

FIGS 0022 Science for Everyone II

CREDIT HOURS: 0
This course is a continuation of the FIGS 0021.00 from the fall term. The goal is to affirm and support historically excluded and underrepresented students in STEM. If you have the passion for science but you are bewildered by the many unwritten rules of science, we can help! Are you wondering how to plan your STEM degree? Are you interested in becoming part of a more inclusive science community? Are you uncertain about how to access all the tools you can use to succeed in STEM? Do you want to know where to find support? We will help you with these and other challenges. We will work as a group to address these topics and learn how to support each other's success. There will be group work, hands-on activities, and guest speakers. This is a winter-term learning module offered as part of the Dalhousie Science Scholars and Leaders Program.
PREREQUISITES: FIGS 0021.00 or instructor permission
FORMATS: Discussion

FIGS 0101 FIG Action: Climate change

CREDIT HOURS: 0
In this First year Interest Group you will have the opportunity to work on a project together with other students where you explore CLIMATE CHANGE from the perspective of your interests in oceans, ecosystems, earth, energy, economics, innovation or research. Groups will be mentored by a faculty member and a senior student. These one hour Lunch and Learn sessions will run weekly, and are offered at no cost. They require no homework and are not for credit, but will appear as a PASS on your transcript if completed. A minimum of 5 students must register for the session to run.
CALENDAR NOTES: Can be taken together with FIGS 0009
RESTRICTIONS: restricted to Faculty of Science students with less than 30 earned credit hours
FORMATS: Seminar

FIGS 0102 FIG Action: Stress

CREDIT HOURS: 0
In this First year Interest Group you will have the opportunity to work on a project together with other students where you explore STRESS from the perspective of your interests in mental health, cardiovascular health, gut health, immunology, epidemiology, learning and memory, behaviour, drugs or research. Groups will be mentored by a faculty member and a senior student. These one hour Lunch and Learn sessions will run weekly, and are offered at no cost. They require no homework and are not for credit, but will appear as a PASS on your transcript if completed. A minimum of 5 students must register for the session to run.
CALENDAR NOTES: Can be taken together with FIGS 0009
RESTRICTIONS: Restricted to Faculty of Science students with less than 30 earned credit hours
FORMATS: Seminar

FIGS 0201 BSc Truro Start I

CREDIT HOURS: 0
This is a not-for-credit course for first year students starting their Science (BSc) program on the Truro campus. The class meets weekly throughout the fall semester. In this FIG, you will meet other first year students and will start to explore your interests, and academic goals. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science. The one-hour meetings will consist of discussions, activities and short excursions, and brief information sessions, where you will learn about science-related academic and extra-curricular opportunities.
CALENDAR NOTES: For first year students enrolled in the Faculty of Science. FIGS courses are zero credit hours and will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students who have fewer than 30 credit hours and are starting their BSc program on the Truro campus.
FORMATS: Seminar

FIGS 0202 BSc Truro Start II

CREDIT HOURS: 0
This is a not-for-credit course for first year students starting their BSc program on the Truro campus. The class meets weekly throughout the winter semester. You will learn about future academic opportunities available in a BSc program, including research, honours, and co-op. You will explore the various Science Majors and get help choosing the best fit for you. The meetings will consist of discussions, activities and an opportunity for a one-day visit to the Halifax campus.
CALENDAR NOTES: For first year students enrolled in the Faculty of Science. FIG courses are zero credit hours and will appear as a PASS grade on your academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students who have fewer than 30 credit hours and are starting their BSc program on the Truro campus.
FORMATS: Seminar

FIGS 0203 Truro Start: Health & Medicine I

CREDIT HOURS: 0
Truro Start: Health & Medicine FIGS is a group for first year students who are interested in human biology, physiology and/or disease and are interested in pursuing a career health-related areas (e.g., medicine, pharmacy, dentistry, occupational therapy, physiotherapy, etc.). In this FIGS, you will meet other first year students and will be able to explore your interests and learn about academic and extra-curricular opportunities.
CALENDAR NOTES: FIGS are restricted to Truro Start students in their first year of study only.
RESTRICTIONS: Restricted to Truro Start students in their first year of study

FIGS 0204 Truro Start: Health & Medicine II

CREDIT HOURS: 0
Truro Start: Health & Medicine II FIGS is a group for first year students who are interested in human biology, physiology and/or disease and are interested in pursuing a career health-related areas (e.g., medicine, pharmacy, dentistry, occupational therapy, physiotherapy, etc.). In this FIGS, you will meet other first year students and will be able to explore your interests and learn about academic and extra-curricular opportunities.
CALENDAR NOTES: Restricted to Truro Start students in their first year of study, only
RESTRICTIONS: Restricted to Truro Start students in their first year of study

Geography

Geography

Note: There is no Geography program at Dalhousie; however, several courses taught in various departments are commonly recognized as Geography courses. Only courses which are cross-listed in Science departments may be used to meet the life or physical science subject requirement for the BA degree.

Staff

Deans

Macy, C., BA (Arch) (Calif. At Berkeley), MArch (MIT)
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)
Gantar, J., BA, MA (University of Ljubljana), PhD (University of Toronto) (Acting Dean)

Geography Coordinators

Architecture and Planning: **Manuel, P.,** BA (Carleton), MSc (McGill), PhD (Dalhousie), MCIP, LPP (patricia.manuel@dal.ca)
Arts and Social Sciences: **TBD**
Science: **Cray, H.,** BA Hon (McGill), MSc (McGill), PhD (Waterloo) (hcray@dal.ca)

Minor in Geography

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

To fulfill the requirements for a Minor in Geography, students must complete 24 credit hours, including the following:

- GEOG 1030.03/ERTH 1030.03: Introduction to Physical Geography
- GEOG 1035.03: Introduction to Human Geography
- GEOG 2000.03: Cartography

Additional 15 credit hours from the following list: at least 6 of which must be at the 3000 level or higher.

- GEOG/ERTH/ENVS 2850.03: Foundations of Geospatial Information Science and Technology OR GEOG 2006.03/PLAN 2006.03: Space, Place, and Geographic Information Systems

- GEOG 2070.03: Area Studies on Mexico and Central America, HIST 2383.03: Mexico and Central America since 1979: The Search for Stability and SPAN 2070.03: Mexico and Central America since: From Revoluation to Drug Wars
- GEOG 2101.03/SOSA 2101.03: Environment and Culture
- GEOG 2201.03/INTD 2001.03: Global Justice and Development I
- GEOG 2202.03/INTD 2002.03: Global Justice and Development II
- GEOG 2206.03/INTD 2106.03: Africa: An Introduction
- GEOG 2336.03/ECON 2336.03: Regional Development
- GEOG 2800.03/PHYC 2800.03/OCEA 2800.03: Climate Change
- GEOG 3102.03/SUST 3102.03: Coastal Change and Adaptation
- GEOG 3106.03/SUST 3106.03: The Canadian North: Environmental Change and Challenges
- GEOG 3165.03/SOSA 3165.03: Peoples and Cultures of the World: Selected Area Studies
- GEOG 3110.03/INTD 3110.03: Migration and Development
- GEOG 3284.03/SOSA 3284.03: Living in cities
- GEOG 3302.03/ERTH 3302.03: Quaternary Sedimentary Environments
- GEOG 3400.03/ENVS 3400.03: Human Health and Sustainability
- GEOG 3440.03/ERTH 3440.03: Geomorphology
- GEOG 3633.03/ENVS 3633.03/BIOL 3633.03: Spatial Information and GIS in Ecology
- GEOG 3700.03/ERTH 3700.03/ENVS 3700.03: Earth resources, sustainability, and society
- GEOG 3850.03/ENVS 3850.03/ERTH 3850.03: Advanced Geospatial Information Science and Technology
- GEOG 4520.03/ERTH 4520.03: GIS Applications in Earth and Environmental Sciences
- GEOG 4530.03/ERTH 4530.03: Environmental Remote Sensing
- GEOG 4850.03/SCIE 4850.03/BIOL 4850.03/ENVS 4850.03/ERTH 4850.03: Geographic Information Science Research Project
- INTD 3114.03: How to (Not) Feed the World: Agricultural Development
- SOSA 3168.03: Issues in Latin American Society
- SOSA 3211.03: Rural Society: Life Outside the City

Note that the following courses are not offered in upcoming terms, but may be counted toward the Minor in Geography if taken previously:

- GEOG 2001.03/PLAN 2001.03: Landscape analysis
- GEOG 3001.03/PLAN 3001.03: Landscape Ecology
- GEOG 3002.03/PLAN 3002.03: Reading the City
- GEOG 3005.03/PLAN 3005.03: Cities and the Environment
- GEOG 3006.03/PLAN 3006.03: Reading the Landscape
- GEOG 3110.03/INTD 3110.03: Migration and Development
- GEOG 3114.03/INTD 3114.03: Agriculture and Development
- GEOG 3210.03/HIST 3210.03/CANA 3020.03: Canadian Cultural Landscapes
- GEOG 3220.03/SOSA 3220.03: Coastal Communities in the North Atlantic
- GEOG 3370.03/HIST 3370.03: North American Landscapes
- GEOG 3500.03/ERTH 3500.03/ENVS 3500.03/ERTH 5600.03: Geographic Information Science & Spatial Data

NOTE: Students in the BCD program may not select PLAN cross-listed courses that are required courses for their degree program

Contact Geography for more information.

Courses

Courses

Course Descriptions

GEOG 1030 Introduction to Physical Geography

CREDIT HOURS: 3
This non-lab science course examines the nature of weather and climate, earth's surface features and processes, and internal processes that contribute to landform development. An integral component of the course is an exploration of the representation and interpretation of physical geographic data through the examination of a variety of maps.
CALENDAR NOTES: There are no pre-requisites for this course and students may take this class in addition to any other first year Earth Sciences class.
CROSSLISTED: ERTH 1030.03
FORMATS: Lecture | Tutorial

GEOG 1035 Introduction to Human Geography

CREDIT HOURS: 3
Human geography examines the ways that people perceive, use, and alter the landscapes they occupy. This course considers aspects of culture that characterize different social groups, as well as the systems of production, livelihood, spatial organization, and administration that societies erect. The class introduces the principal tools of human geographers: maps, demography, and analysis of cultural patterns.
CALENDAR NOTES: This class cannot be used to meet the life or physical science subject requirement for the BA degree.
FORMATS: Lecture

GEOG 1060 Earthquakes, Volcanoes and Natural Disasters

CREDIT HOURS: 3
Earthquakes, meteorite impacts, rapid climate change, volcanic eruptions, hurricanes, landslides, solar flares, and floods are natural disasters that affect our economy, public policy, and safety. Where, why and how frequently do natural disasters occur? Are predictions possible? Are media portrayals of risk and damage realistic? This course, aimed at the nonspecialist, investigates these intriguing questions. Excerpts of “disaster films”, in conjunction with lectures and discussions are used to identify the causes, consequences and sometimes erroneous perceptions of natural hazards. Examples from Atlantic Canada and contemporary disasters are used to assess local risk and real-time events worldwide.
CROSSLISTED: ERTH 1060.03
FORMATS: Lecture

GEOG 2000 Cartography

CREDIT HOURS: 3
Maps, are essential aids to disciplines that span archaeology to zoology. Navigation is the art and science of finding one's way through both natural and built landscapes. This class investigates how maps are constructed and interpreted, how maps can distort perceptions, and can influence one's decisions.
PREREQUISITES: ERTH/GEOG 1030, or ERTH 1080
FORMATS: Lecture

GEOG 2001 Landscape Analysis

CREDIT HOURS: 3
Designers and planners need to understand the influence of physical, biological, and cultural systems in landscape evolution, and the relevance of that information in analyzing land capability. Students develop inventory and analysis tools for understanding environmental processes and their implications for design and planning. There will be field trips and a lab component.
CROSSLISTED: PLAN 2001.03
FORMATS: Lecture | Lab

GEOG 2006 Space, Place and Geographic Information Systems

CREDIT HOURS: 3
Planners use Geographical Information systems (GIS) for data collection, coordination, and analysis. Properly interpreted, GIS data contribute to informed decision-making. this course explores the application of GIS in planning within a project-centred setting. Students learn to use GIS to address and use and site planning issues. The course also considers mapping standards used within the field of planning, and examines legal, privacy, and ethical implications of using GIS data in the public realm.
CROSSLISTED: PLAN 2006.03
FORMATS: Lecture | Lab

GEOG 2070 Area Studies on Mexico and Central America

CREDIT HOURS: 3
Following an examination of the indigenous heritage, and the colonial legacy of the conquistadors, the class deals principally with the contemporary period, examining the Mexican Revolution and its aftermath, the Somoza dynasty, Nicaragua under the Sandinistas, the U.S. role in the region, the human rights situation in Central America, and probable developments in the region. The class is designed to provide an understanding of the contemporary reality of this volatile region, in many ways a microcosm of the crucial situation of Latin America as a whole.
PREREQUISITES: No prerequisites. Open to students in all departments. No knowledge of Spanish necessary
CROSSLISTED: HIST 2383.03. SPAN 2070.03
FORMATS: Lecture | Discussion

GEOG 2100 Environment and Culture

CREDIT HOURS: 6
Concern about the environment is a widespread phenomenon as virtually everyone is confronted by environmental issues -- be they global warming, the depletion of the ozone layer or the continuing problems of water pollution and solid waste disposal. Furthermore, we are becoming increasingly aware of that environmental issues often have global implications. The efforts of cities in Canada to deal with environmental pollution, for example, may lead to conflicts with rural regions. Similarly, rural regions, in their use of various chemical agents, may find themselves affecting the lives of city dwellers. This class will explore key relationships between human culture and the physical environment. Topics to be examined include: historical, social, and legal aspects of contemporary environmentalism, food and agriculture, environmental ethics, health, traditional ecological knowledge, sustainable forestry, waste management, public participation and environmental movements.
CALENDAR NOTES: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: One of SOSA 1000X/Y.06, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200 X/Y.06
CROSSLISTED: SOSA 2100.06
FORMATS: Lecture

GEOG 2201 Global Justice and Development I

CREDIT HOURS: 3
Poverty, inequality and injustice are widespread throughout the contemporary developing world. This course will examine how this situation came to be. It begins by analyzing the different meanings of the term “development” and then examines the major approaches that have shaped practical development initiatives on the ground in the Global South over the past 60 years. The course also examines the legacies of history for contemporary development efforts in the Global South through specific case studies.
PREREQUISITES: Completion of five full credits at the 1000 level or permission of the instructor
CROSSLISTED: INTD 2001.03
FORMATS: Lecture | Tutorial

GEOG 2202 Global Justice and Development II

CREDIT HOURS: 3
This course builds upon the core concepts and approaches studied in INTD 2001 (i.e. different theoretical approaches to development and the historical creation of underdevelopment). The course examines key contemporary issues in the field of development and analyses the connections between them: debt, global trade rules, foreign aid, hunger and malnutrition, rural and urban livelihoods, population growth. The course also examines the principle actors involved in development and the strategies they have used to promote and resist development, including: governments, non-governmental organizations (NGOs), the World Bank and IMF, and popular social movements in the Global South and North.
PREREQUISITES: Completion of five credits at the 1000 level or permission of the instructor
CROSSLISTED: INTD 2002.03
FORMATS: Lecture | Tutorial

GEOG 2206 Africa: An Introduction

CREDIT HOURS: 3
This course will focus on contemporary Africa. Sterotypical portrayals of Africa will be examined and critiqued with the goal of emphasizing the immensity, diversity and complexity of the continent in order to better understand the opportunities and challenges of African development in the twenty-first century.
CROSSLISTED: INTD 2106.03
FORMATS: Lecture | Tutorial

GEOG 2336 Regional Development

CREDIT HOURS: 3
Most countries have richer and poorer regions. Economic development issues, policies, and theories facing more industrialized nations are analyzed with particular focus on Canada (especially the Atlantic region), the European Economic Community, U.S.A., Japan, and Australia. Approved with Canadian Studies. In addition to the prerequisites, the student is advised to take one class in Political Science and one class in Canadian History before taking ECON 3336.

PREREQUISITES: ECON 1101.03 and 1102.03
CROSSLISTED: ECON 2336.03
FORMATS: Tutorial | Seminar

GEOG 2800 Climate Change

CREDIT HOURS: 3
Most models of the atmosphere predict that increasing concentrations of greenhouse gases will continue to warm the surface of the earth and the oceans in the twenty-first century. The magnitude of the warming and its consequences are still very controversial. This class will discuss, mainly from a nonmathematical viewpoint, the reasons for the greenhouse effect, the current warming in the context of the historical record of climate change, and sources of natural climate variability such as the El Nino Southern Oscillation. It will also review arguments that attribute the warming that has occurred in the Twentieth century to natural variability, and those that attribute the warming to increased human emission of greenhouse gases.
CROSSLISTED: PHYC 2800.03 and OCEA 2800.03
EXCLUSIONS: ECON2850.06, PHYC2850.06

GEOG 2850 Foundations of Geospatial Information Science and Technology

CREDIT HOURS: 3
Geographic Information Science (GIS) focuses on the principles of geographic data acquisition, storage, management, processing, visualization, and analysis, and covers fundamental elements of spatial modeling, cartography, geovisualization, spatial data sources and collection methods. Laboratory exercises emphasize the creation, management, and visualization of geographic data drawing from a range of disciplines.
CROSSLISTED: ERTH 2850.03; ENVS 2850.03; ENVA 3005.03
EXCLUSIONS: PLAN 2006.03; ENVS 2006.03; GEOG 2006.03
FORMATS: Lecture | Lab

GEOG 3001 Landscape Ecology

CREDIT HOURS: 3
Landscapes reflect the interaction of natural and cultural processes. This course introduces the principles of ecology to landscape analysis. It explores relationships between environmental components in the landscape to inform community design and land use planning applications.
PREREQUISITES: PLAN 2001.03 or GEOG 2001.03 or permission of the instructor
CROSSLISTED: PLAN 3001.03
FORMATS: Lecture | Lab

GEOG 3002 Reading the City

CREDIT HOURS: 3
Any city reflects the history of its topography, cultural traditions, and design interventions. This course introduces the principles, theories, and methods of urban form analysis in the local urban context. Students explore the local urban environment to interpret what the city means, and how it comes to take the shape it does.
CROSSLISTED: PLAN 3002.03
FORMATS: Lecture | Lab

GEOG 3005 Cities and the Environment

CREDIT HOURS: 3
The contemporary landscape reflects a long history of human activities on the land and design and planning interventions through time. Civilizations rise and fall, often because of their degradation of the ecosystems that support them. This course examines the relationship of cities with the environment to enhance our understanding of landscape change, urban form and patterns in human settlements through the ages.
CROSSLISTED: PLAN 3005.03
FORMATS: Lecture | Seminar

GEOG 3006 Reading the Landscape

CREDIT HOURS: 3
Any landscape reflects its natural and cultural history. This course explores principles, theories, and methods of landscape interpretation. These approaches will be applied to community design problems in local landscapes.
PREREQUISITES: PLAN 3001.03, 3002.03, or GEOG 3001.03, 3002.03
CROSSLISTED: PLAN 3006.03
FORMATS: Lecture | Lab

GEOG 3102 Coastal Change and Adaptation

CREDIT HOURS: 3
Human activities alter coastal environments directly and by influencing natural processes. We analyze the drivers of change and impacts on environment, economy and society. Mitigation and management strategies for sustainable adaptation are investigated. Lectures are integrated with student presentations, guest lectures and discussion of current coastal and marine research.
PREREQUISITES: Must be third year standing or above
CROSSLISTED: SUST 3102.03
EXCLUSIONS: SUST 3952.03 (winter 2016 and winter 2017)

GEOG 3106 The Canadian North

CREDIT HOURS: 3
This course introduces the Canadian North through an examination of the challenges faced by northern peoples. Emphasis is placed on the causes and consequences of global environmental change, and interactions with ecological processes and challenges for the human environment. Inuit perspectives of ecological knowledge will complement discussions on planning and development in a warming future. Principles of ecosystem management and emergent challenges for a sustainable future will also be addressed.
PREREQUISITES: Third year status or above, or permission of instructor.
CROSSLISTED: SUST 3106.03
EXCLUSIONS: SUST 3956.03 (offered in Winter 2019) ENVI 5106.03
FORMATS: Lecture

GEOG 3110 Migration and Development

CREDIT HOURS: 3
The purpose of this course is to explore and better understand the connections between migration and development in contemporary societies. Classes will introduce or further explore one main theme or issue, such as development-induced displacement, labour migration, and HIV/AIDS and migration. Each class will centre on one or more discussion questions, exchange insights from relevant experiences of class participants or focus on a case study
CROSSLISTED: INTD 3110.03
FORMATS: Lecture | Seminar

GEOG 3114 Environment and Development

CREDIT HOURS: 3
This course will examine the interconnections between the natural environment and different forms of social and economic development with a specific focus on developing countries. Various perspectives will be used to analyze the links between environmental issues and poverty, inequality, wealth, economic globalization and the ways in which different cultures understand and interact with the environment.
CROSSLISTED: INTD 3114.03
FORMATS: Lecture | Seminar

GEOG 3165 Peoples and Cultures of the World: Selected Area Studies

CREDIT HOURS: 3
This class examines a specific geographic and/or culture area. The class begins with background material on geography and history. Its focus is on the people themselves, their social organization and political, economic, and cultural systems. How they relate to globalization and development will also be examined. Consult the Department to find which region is to be covered in a particular year. **Approved with International Development Studies.**
PREREQUISITES: SOSA 1000X/Y.06; 1050X/Y.06; 1100X/Y.06; 1200X/Y.06
CROSSLISTED: SOSA 3165.03
EXCLUSIONS: SOSA 2370.03
FORMATS: Lecture

GEOG 3210 Canadian Cultural Landscapes

CREDIT HOURS: 3
This course explores the origins of one "signature" landscape in each province. Contact with different geographies shaped distinctive regional histories; but at the same time, the story of each place is tied to the national narrative. These landscapes also illuminate how nature has been understood, used, and transformed since the fifteenth century.
CROSSLISTED: HIST 3210.03, CANA 3020.03
FORMATS: Lecture | Discussion

GEOG 3220 Coastal Communities in the North Atlantic

CREDIT HOURS: 3
Coastal communities as a social/ecological type are examined as populations, and social structures (territorial, economic, occupational, political) as they have developed in response to particular ecological and social circumstances. Various perspectives which have been applied to coastal communities are examined with regard to the contribution they may make to understanding the dynamics of these communities. The focus is on North Atlantic communities.
PREREQUISITES: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06
CROSSLISTED: SOSA 3220.03
FORMATS: Lecture

GEOG 3284 Living in Cities

CREDIT HOURS: 3
2008 marked the first time in history that more of the global population lived in cities than in rural areas. What perspectives to anthropology and sociology offer on cities and their inhabitants? This course explores the social dynamics that constitute 'the city' and surveys how social scientists have studied and engaged with cities and city-dwellers. It approached 'the city' both as a whole and through its constituent parts: people and places. Examples may be drawn from cities large and small, near and far - including Halifax.
PREREQUISITES: One of SOSA 1000.06, SOSA 1050.06, SOSA 1100.06 SOSA 1200.06 FYP or PLAN 2005.06
CROSSLISTED: SOSA 3284.03
FORMATS: Lecture | Seminar

GEOG 3302 Quaternary Sedimentary Environments

CREDIT HOURS: 3
The student is exposed to fluvial, alluvial, subglacial, glaciolacustrine, hillslope, eolian, coastal, shallow marine, rift, wedge top, retroarc, and foreland basin environments. Field trips and labs provide experience in methods used to distinguish the environments, including sedimentology, geomorphology, geochronology and thermochronology, and analysis of soils, cores, pebble fabrics, and section-scale non-petroleum sedimentary facies. Quaternary paleoclimatology and tectonic controls on weathering and deposition are discussed and debated.
PREREQUISITES: ERTH 2203.03
CROSSLISTED: ERTH 3302.03
FORMATS: Lecture | Lab

GEOG 3370 North American Landscapes

CREDIT HOURS: 3
Landscapes are the product of human culture ordering nature for economic, social, political, religious, recreational, and artistic purposes. Landscape history analyzes and interprets the use and design of such features as fields and woodlands, roads and waterways, settlements and buildings, towns and suburbs, and parks and cities. This class examines the use and meaning of the spatial environment among the various societies in North America from the sixteenth to the twentieth centuries. Among the topics are the meaning of area resources for indigenous peoples, the occupation and settlement of colonial populations, transportation and continental expansion, town planning, the politics of water and land in the West, preservation movements, scenic tourism, and the literary and artistic stylization of landscapes. The class welcomes non-history students with an interdisciplinary interest in issues regarding planning and design, cultural ecology, and the governance of resources.
CROSSLISTED: HIST 3370.03
FORMATS: Lecture | Discussion

GEOG 3400 Human Health and Sustainability

CREDIT HOURS: 3
This course examines the relationships between the health of populations and health determinants in the context of environmental sustainability. Weekly laboratory exercises will teach students how geomatics (GIS, GPS, and remote sensing technologies) and epidemiological tools can be used to assess the links between the health of human populations and the health of the environment, and how to use these tools for environmental health research.
PREREQUISITES: Must be a third year student or have permission of instructor
CROSSLISTED: ENVS 3400.03
FORMATS: Lecture | Lab

GEOG 3440 Geomorphology

CREDIT HOURS: 3
Geomorphology is the quantitative study of Earth’s surface processes and landforms applies to geology, civil engineering, hydrogeology, and environmental management. We investigate slope stability, weathering and soils, sediment production, wind-driven and coastal environments, tectonic landforms, and river, glacial and permafrost processes.
PREREQUISITES: ERTH 1080.03 (or SCIE 1506.09/SCIE 1507.09) and (ERTH 1090.03 or ERTH 1091.03); OR completion of (or concurrent enrolment in) a 1000-level mathematics class, a 1000-level physics class, a 1000-level chemistry class AND permission of instructor
CROSSLISTED: ERTH 3440.03
FORMATS: Lecture | Lab

GEOG 3500 Geographic Information Science & Spatial Data

CREDIT HOURS: 3
Geographic Information Systems (GISystems) provide a powerful platform to process and analyze data with locational information. This course introduces theoretical concepts in Geographic Information Science (GIScience) that provide the foundation for the creation, management, and visualization of geospatial data for a range of disciplines (e.g., Earth Sciences, Environmental Science, Biology, Planning). Topics include principles of spatial object types, spatial data models, concepts of error and uncertainty, overlay, and the integration of satellite derived data (GPS, Remote Sensing Imagery) in spatial projects. Laboratory exercises emphasize how these principles are put into practice in the use of Geographic Information Systems.
CALENDAR NOTES: This course is intended for entry level users of Geographic Information Systems and is a required class for the Certificate in Geographic Information Science.
PREREQUISITES: Two years of university study or equivalent or instructor's permission
CROSSLISTED: ERTH 3500, ERTH 5600, ENVS 3500
EXCLUSIONS: Credit will only be given for one of GEOG 3500, SCIE 3600, ERTH 3500, ERTH 5600, ENVS 3500
FORMATS: Lecture | Lab

GEOG 3633 Spatial Information and GIS in Ecology

CREDIT HOURS: 3
A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.
CALENDAR NOTES: Offered in the summer through SEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03
CROSSLISTED: ENVS 3633.03, BIOL 3633.03

GEOG 3700 Earth Resources, Sustainability, and Society

CREDIT HOURS: 3
This course addresses the question: What do we need to know and understand about the nature and distribution of geologic resources to optimally reconcile mineral extraction with society's needs, considerations of the environment, and the sustainable development goals in a more sustainable, geoethical, and balanced approach, through the 21st century.
CALENDAR NOTES: Aimed as an elective course for majors in Earth Sciences and in Environmental Sciences. Must be third year students.
PREREQUISITES: ERTH 1080
CROSSLISTED: ERTH 3700 ENVS 3700
RESTRICTIONS: E1 and E2
FORMATS: Lecture | Seminar | Discussion | Other (explain in comments)

GEOG 3850 Advanced Geospatial Information Science and Technology

CREDIT HOURS: 3
This course builds upon the foundations of ENVS/ERTH/GEOG 2850 by introducing advanced theoretical concepts in GIScience for commonly used spatial analysis methods. Topics include error and uncertainty, data overlay and constraint mapping, spatial statistics, spatial modeling, and ethical issues as they relate to professional practice relevant codes of conduct.
PREREQUISITES: ENVS / ERTH / GEOG 2800.03 or ENVA 3005.03 or PLAN / GEOG 2006.03
CROSSLISTED: ERTH 3850, ENVS 3850
EXCLUSIONS: ENVS / ERTH / GEOG 3500.03
FORMATS: Lecture | Lab

GEOG 4520 GIS Applications to Environmental and Geological Sciences

CREDIT HOURS: 3
Geographic information systems (GIS) provide a rich set of new tools to the geologist and environmental scientist, not only to solve conventional problems, but also to explore transdisciplinary questions not readily answered by other means. This class builds on the fundamentals of GIS taught in ERTH 3500.03 to explore analytical tools that aid in decision-making processes encountered in mineral exploration, hydrogeology, site selection, environmental assessment, and global change analysis. The class concentrates on case studies and problem solving, including those requiring multi-criteria and multi-objective decision making processes.
PREREQUISITES: GEOG 3500.03, ENVS 3500, ERTH 3500.03; ERTH 5600, or SCIE 3600.03; STAT 1060.03
CROSSLISTED: ERTH 4520.03
FORMATS: Lecture | Lab

GEOG 4530 Environmental Remote Sensing

CREDIT HOURS: 3
This course introduces students to remote sensing methods and their use in extracting thematic information for a widening suite of disciplines. Course topics incorporate the fundamentals of remote sensing (e.g., EMR, image evaluation, enhancement, classification, accuracy), focusing on contemporary optical multispectral systems. In the lab setting students use image processing techniques to evaluate, classify, and estimate uncertainty in remote sensor data.
PREREQUISITES: ENVS / ERTH / GEOG 2850.03, or ENVA 3005.03 or PLAN 2006.03, or ENVS / ERTH / GEOG 3500.03
CROSSLISTED: ERTH 4530.03, ENVS 4530.03, ERTH 5520.03 (Co-located)
FORMATS: Lecture | Lab

GEOG 4850 Geographic Information Science Research Project

CREDIT HOURS: 3
Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.
COREQUISITES: ERTH 5420.03/GEOG 4520.03/ERTH 4520.03
PREREQUISITES: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03
CROSSLISTED: BIOL 4850.03, ENVS 4850,03, SCIE 4850.03, ERTH 4850.03
EXCLUSIONS: Restricted to 3rd and 4th year students
FORMATS: Lecture

Humanistic Studies in Science

Humanistic Studies in Science

Attention is drawn to the following courses, offered in several departments. All of these courses are concerned with the humanistic aspects of scientific thought and its development. For complete course descriptions please consult the appropriate department listing in this calendar.

NOTE: Not all courses are offered every year. Please consult the current timetable for this year's offerings.

History of the Sciences

- BIOL 3503.06, HSTC 2200.06, SCIE 2000.06: Introduction to the History of Science
- BIOL 4664.03/OCEA 4331.03/SCIE 4001.03/HIST 3073.03/HSTC 3331.03: History of Marine Sciences

Philosophy of the Sciences

- PHIL 3420.03, BIOL 3580.03: Philosophy of Biology
- PHIL 2560.03: Minds & Machines: Introduction to cognitive Science
- PHIL 2660.03 Logic: Understanding Scientific Reasoning
- BIOL 3601.03: Nature Conservation
- PHIL 2130.03: Logic
- PHIL 3051.03: Epistemology
- PHIL 3670.03: Philosophy of Science

Integrated Science Program

Integrated Science Program

Location:
Life Sciences Centre
1355 Oxford Street
Room 827
PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 494-2765
Fax Number: (902) 494-1123
Email Address: disp@dal.ca
Website: disp.science.dal.ca

Introduction

Dalhousie's Integrated Science Program is a unique and engaging way for a serious and well-prepared student to complete the first year of a BSc degree. In addition to learning the core material of several first-year science subjects, students gain an interdisciplinary perspective, develop transferrable skills, and conduct research, all in their first year. The goals of the program are:

1. To engage students in the process of scientific inquiry with hands-on experience in scientific research skills.
2. To provide a strong academic background for second-year courses in the subjects covered by the program.
3. To identify links among the science disciplines.
4. To learn effective team skills.
5. To explore the relevance of science for society at large.

The Integrated Science program exposes first year students to a broad range of science disciplines in an integrated manner, and provides a strong foundation for most BSc programs. Students learn from a team of instructors with expertise in particular subject areas, who also highlight the natural links among disciplines. Integrated Science students are members of a small cohort (maximum 80) who take the majority of their lectures, labs and field trips together.

The Integrated Science program has a strong emphasis on research-relevant training. Students study experimental design, collect and analyze data in the laboratory and during field trips, work on communication skills, including scientific writing, and are introduced to some of the ethical questions that arise in the practice of science. In the winter term, students undertake an independent research project under the supervision of a Dalhousie-affiliated researcher, which culminates in a presentation at a conference-style event.

Integrated Science consists of a core program taken only by IS students, and auxiliary courses taken together with other first year BSc students. The core program covers Biology, Psychology, Earth Sciences, Statistics, and Ethics in Science. Auxiliary courses include Chemistry, Math and Physics (optional). Exposure to multiple science disciplines can also be helpful for students who are unsure which subjects interest them most, and early training in research is especially valuable for those considering an Honours program. Integrated Science is also excellent preparation for professional graduate programs, such as Law or Medicine.

Integrated Science candidates should be highly-motivated, have a strong interest in science, and be willing to think across discipline boundaries. They should be enthusiastic about being part of a small cohort of students intent on learning how to work and think like scientists; they should want to learn to be cooperative and effective team members; they should have good study, work, and time-management skills; and they should welcome the challenge to work hard, to think critically, and to solve problems.

Students wishing to enter this program normally must have a minimum Grade 12 average of 80%, with a minimum of 80% in Mathematics and 70% English, and a minimum of 75% in two of Grade 12 Chemistry, Biology or Physics. The average high school mark of incoming Integrated Science students is around 90%. Students must be accepted to the Integrated Science Program as well as be accepted to the BSc at Dalhousie University.

Choosing an Integrated Science Option

Course selection in Integrated Science

Integrated Science is a full-time, first-year program designed to prepare BSc students for second year courses in multiple science programs. The IS program emphasizes the connections among the different science disciplines, and provides students with research training and experience. Students take the core program as a cohort (max 80 students).

The core consists of two 9-credit-hour courses, Integrated Science I (SCIE 1506.09), and Integrated Science II (SCIE 1507.09), as well as Ethics in Science (PHIL 1050.03). In the fall, students have lectures, laboratories and field trips in Biology, Psychology and Statistics, and receive training in research skills (experimental design, analysis, scientific writing). The winter term consists of lectures and laboratories in Biology, Psychology and Earth Sciences, and students conduct a 10-week independent research project in a Dalhousie or Dalhousie-affiliated research lab. Students present the results of their research at a conference-style event.

Integrated Science I and II are equivalent to two terms of Biology and Psychology, and one term of Earth Sciences and Statistics. Together with PHIL 1050: Ethics in Science, the core fulfills the writing requirement for BSc students.

Students also register for several auxiliary or co-requisite courses; these are taken along with other BSc students, typically in larger classes. Students take a full year of Chemistry (CHEM 1011.03/CHEM 1012.03) and a half year of Calculus (MATH 1000.03 or MATH 1215.03). Students have the option to enroll in a second term of Calculus (MATH 1010.03) and to take Physics (full year or half year). See co-requisite details below:

Fall term* co-requisite courses taken at the same time as Integrated Science I (SCIE 1506.09)

Required:

1. Ethics in Science (PHIL 1050.03)
2. Concepts in Chemistry: Structure and Reactivity (CHEM 1011.03)
3. Differential and Integral Calculus I (MATH 1000.03) ***OR*** Life Sciences Calculus (MATH 1215.03)

Optional:

1. Introduction to Physics I (PHYC 1190.03) ***OR*** Physics in and Around You I (PHYC 1310.03)

Winter term co-requisite courses taken at the same time as Integrated Science II (SCIE 1507.09)**

Required:

1. Concepts in Chemistry: Energy and Equilibrium (CHEM 1012.03)

Optional:

1. Differential and Integral Calculus II (MATH 1010.03).
2. Introduction to Physics II (PHYC 1290.03) ***OR*** Physics in and Around You II (PHYC 1320.03)

**In the fall term Integrated Science students take a course overload with 18-21 credit hours (21 credit hours if Physics is included). 15 credit hours is a full course load for regular BSc students. Students enrolling in 21 credit hours can expect a significantly heavier*

work load. Students planning to take only one term of calculus have the option of taking MATH 1000.03 in the winter to lighten their fall course load.

***In the winter term, Integrated Science students may take an overload (18 credit hours), a regular full course load (15 credit hours,) or a lighter course load of 12 credit hours (if they choose not to take MATH or PHYSICS in winter).*

Choice of Math and Physics courses

Prior to selecting Math or Physics courses please consult the course descriptions in the Dalhousie Academic Calendar.

- PHYC 1190/PHYC 1290 is designed for students in Physical Sciences and Engineering, and PHYC 1310/ PHYC 1320 is designed for students in Life Sciences.
- MATH 1000 should be taken by students interested in math, economics or the physical sciences, while MATH 1215 is designed for life sciences students.
- One calculus course (MATH 1000.03 or MATH 1215.03) together with SCIE 1506.09 (Statistics) satisfies the full math requirement for BSc students. Students who do not require MATH 1010 for their programs have the option to take only one calculus course.

BSc Programs	First year Math courses	First year Physics courses
Actuarial Science	MATH 1000/MATH 1010	
Biochemistry & Molecular Biology	MATH 1000 (or MATH 1215) MATH1010 (recommended)	
Biology	MATH 1215 (or MATH1000)	
Chemistry	MATH 1000/MATH 1010	PHYC 1190/PHYC 1290 or PHYC 1310/PHYC 1320
Economics	MATH 1000/MATH 1010	
Earth Science	MATH 1000 (or MATH 1215) and MATH 1010	PHYC 1190/PHYC 1290 or PHYC 1310/PHYC 1320 *
Environmental Science	MATH 1215 (or MATH 1000)	
Mathematics	MATH 1000/MATH 1010	
Marine Biology	MATH 1215 (or MATH 1000)	PHYC 1310/PHYC 1320** or PHYC 1190/PHYC 1290 (recommended)
Microbiology & Immun.	MATH 1215 (or MATH 1000)	
Medical Sciences	MATH 1215	PHYC 1310 (required), PHYC 1320 recommended
Neuroscience	MATH 1000 (or MATH 1215)	
Ocean Sciences	MATH 1000/MATH 1010	PHYC 1190/PHYC 1290 or PHYC 1310/PHYC 1320
Physics	MATH 1000/MATH 1010	PHYC 1190/PHYC 1290
Psychology	MATH 1215 (or MATH 1000)	
Statistics	MATH 1000/MATH 1010	

** Physics is required for all Earth Science Honours programs. PHYC 1190/PHYC 1290 is recommended, as PHYC 1310/PHYC 1320 may not be recognized for PGeo (Professional Geologist) certification. Physics is not required for Earth Sciences Major programs.*

*** Marine Biology students who wish to include 2nd year courses in Ocean Sciences (other than OCEA 2001/OCEA 2002: The Blue Planet) in their programs should take PHYC 1310/PHYC 1320 (or PHYC 1190/PHYC 1290).*

BSc degree requirements and the Integrated Science program

The Integrated Science program core satisfies the Writing requirement, the Social Science and Science subject requirements, and with MATH 1000 or MATH 1215, the Math requirement for BSc students at Dalhousie. It satisfies *half* of the Humanities/Language requirement; another Humanities or Language course is needed before graduation.

Courses

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

SCIE 1506 Integrated Science I

CREDIT HOURS: 9
This course comprises the first half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1506 consists of lectures, laboratories, and field trips in Biology, Psychology and Statistics, as well as integrated lectures and workshops that cut across disciplines. It also has an interdisciplinary Writing in Science component that prepares students for research projects in SCIE 1507. Together, SCIE 1506 and SCIE 1507 provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science I must also register for CHEM 1011.03 and PHIL 1050.03 (Ethics in Science). Registration in PHYC 1190.03 or PHYC 1310.03 is recommended for students considering programs that require Physics. For calculus, students register in MATH 1000.03 (fall or winter) or MATH 1215.03 (fall or winter). Students taking MATH 1010.03 in fall term have the option to additionally take MATH 1010.03 in winter term.
CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).
COREQUISITES: PHIL 1050.03, CHEM 1011.03
RESTRICTIONS: Registration is restricted to Integrated Science students.
EXCLUSIONS: BIOL 1011.03, BIOL 1021.03, PSYO 1011.03, STAT 1060.03
FORMATS: Lecture | Lab

SCIE 1507 Integrated Science II

CREDIT HOURS: 9
This course comprises the second half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1507 consists of lectures, laboratories, and field trips in Biology, Psychology and Earth Sciences, as well as integrated lectures and workshops that cut across disciplines. The Writing in Science component, continued from Integrated Science I, includes a 10-week research project in which students apply the research design concepts and statistical analyses covered in Integrated Science I. Together, SCIE 1506 and SCIE 1507 provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science II must also register for CHEM 1012.03. Registration in MATH 1010.03 and in one of PHYC 1290.03 or PHYC 1320.03 is recommended for students considering programs with those requirements. For calculus, students must register in either MATH 1000 (fall or winter) or MATH 1215 (fall or winter).
CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).
COREQUISITES: CHEM 1012.03
PREREQUISITES: SCIE 1506.09, CHEM 1011.03, PHIL 1050.03
RESTRICTIONS: Registration is restricted to Integrated Science students

EXCLUSIONS: BIOL 1010.03, BIOL 1020.03, PSYO 1012.03, ERTH 1080.03, SCIE 1111.03
FORMATS: Lecture | Lab

Introduction

The Marine Biology Program offers students the opportunity to study and experience marine life, from the tiny plankton that drive ocean ecosystems to the sharks and marine mammals at the top of the food chain. In the first two years of the program, Marine Biology students obtain a basic grounding in Biology and start to learn the basics of how the ocean works. They then use their third and fourth years to study in greater depth the diversity, physiology, ecology, and evolution of marine animals and plants. Many students combine their studies of marine biology with courses in the chemistry or physics of the ocean. Marine Biology students are offered a Co-op option, where three work terms in industry, government or university laboratories, or ecotourism are included within the program.

The Biology department is located adjacent to the sea in the Life Sciences Centre. All eight floors have running sea water, and we have a 15m pool tank and a 10m deep tower tank. Within a 30 km radius there are salt marshes, rocky shores, estuaries, and sand beaches for field work.

Our students have many opportunities to participate in marine-related research; examples can be viewed on our website. "Ocean studies" is an area of special emphasis for Dalhousie University, and thus many faculty members have active research programs in marine science. In addition, many marine scientists at local research institutions, including the Bedford Institute of Oceanography and the Institute for Marine Biosciences serve as supervisors for our Honours students.

An undergraduate major in Marine Biology at Dalhousie qualifies you for technical positions in places like government fisheries laboratories, aquaculture farms, and consulting firms. In the Marine Biology program's summer field courses or in the honours research courses, you'll get plenty of hands-on opportunities to explore the ocean—preparing you for the exciting challenges of diverse marine-related careers.

Degree Programs

The Department of Biology offers the following degree programs in Marine Biology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- Minor in Marine Biology

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu at the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Marine Biology undergraduate academic advisor.

Prospective Marine Biology students should be aware that to advance to the second year Biology courses in the Marine Biology program, they must achieve at least a C grade in the prerequisite first year Biology courses. Students with exceptional extenuating circumstances may appeal this requirement to the Biology Undergraduate Curriculum Committee. Students should go to the Biology Main Office for further details.

Staff

Dean
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Program Advisors
For Marine Biology program advising, please email biology.advising@dal.ca and indicate whether you are interested in Majors or Honours advising.

BSc or BA (120 credit hour) Concentrated Honours in Marine Biology
Students who want a challenging program resulting in a broad background in Marine Biology, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours.

To graduate with Honours, students must complete a minimum of 54 credit hours with a grade of C or better above the 1000 level in Marine Biology/Biology. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the Core Biology and Core Marine Biology courses. Students must also have a cumulative B average (GPA of 3.0) in courses in the honours subject at the time of graduation. Students write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of MARI 4901.03 AND MARI 4902.03.

A Science Co-op option is available for students enrolled in a BSc Concentrated Honours in Marine Biology. See Co-operative Education Program.

Admission to Honours
Students must apply for admission to Honours programs. Students considering Honours should consult with a Marine Biology Honours Advisor early in their studies. To be admitted, students must:

- Have a minimum B+ average (GPA of 3.3) in Core Biology and Core Marine Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the honours subject.
- Identify and gain the support of a thesis supervisor during their third year of studies (see Honours webpage for supervisor eligibility)
- With the supervisor's input, draft and submit a thesis proposal to the Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Marine Biology/Biology Honours webpage https://www.dal.ca/faculty/science/biology/honours.html

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Marine Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra 1
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Note: Marine Biology students wishing to incorporate **Ocean Sciences** into their program should include MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus and PHYC 1190.03/PHYC 1290.03 Introduction to Physics (or PHYC 1310.03/PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

2000 level
Core Biology courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

Other required courses

- OCEA 2000.06: The Blue Planet or OCEA 2001.03: The Blue Planet I and OCEA 2002.03: The Blue Planet II
- MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference

3000/4000 level
Core Biology/Core Marine Biology Courses

- BIOL 3872.03 The Biologist's Toolkit
- BIOL 3101.03/MARI 3101.03 OR BIOL 3761.03/MARI 3761.03

Students must choose **15** credit hours from any of the following courses:

- BIOL 3042.03/MARI 3042.03 Molecular Ecology
- BIOL 3063.03/MARI 3063.03 Resource Ecology
- MARI 3074.03 Physiology of Marine Animals Part I
- MARI 3076.03 Physiology of Marine Animals Part II
- BIOL 3370.03/MARI 3370.03 Comparative Animal Physiology
- BIOL 3371.03/MARI 3371.03 Laboratory in Comparative Animal Physiology
- BIOL 3080.03/MARI 3080.03 The Ecology and Evolution of Fishes
- MARI 3090.03 Marine Mammalogy OR BIOL 3626.03/MARI 3626.03 Field Studies of Marine Mammals
- BIOL 3101.03/MARI 3101.03 Microbial Ecology
- BIOL 3221.03/MARI 3221.03 Diversity of Algae
- BIOL 3301.03/MARI 3301.03 Invertebrate Biology
- MARI 3602.03 Introduction to Aquaculture
- BIOL 3761.03/MARI 3761.03 Marine Ecology
- MARI 4003.03/ENVS 4003.03 Coral Reefs and Environmental Change OR MARI 4005.03/ENVS 4005.03 Coral Reefs and Environmental Change with Field Trip

- BIOL 4323.03/MARI 4323.03 Movement and Spatial Ecology
- MARI 4350.03 Cutting Edge in Marine Science
- MARI 4665.03 Hacking the Blue Planet
- Any two MARI SEASIDE course
- Any two OCEA course cross-listed as MARI

In addition, students must complete an Honours Thesis:

- MARI 4901.03: Honours Research and Thesis I and MARI 4902.03: Honours Research and Thesis II

In addition, students must complete at least another **9** credits hours in MARI or MARI-approved courses to achieve the minimum of 54 credit hours in their honours subject above the 1000 level. This may include additional SEASIDE courses or any courses cross-listed as MARI.

BSc or BA (120 credit hour) Combined Honours in Marine Biology and another subject

Students who wish to study Marine Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science (other than Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Marine Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas.

To graduate with Honours, students must complete a minimum of 36 credit hours above the 1000 level in Marine Biology/Biology, whether Marine Biology is the primary or the secondary subject. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the Core Biology/Core Marine Biology courses. Students must also have a cumulative B average (GPA of 3.0) in courses in the honours subject at the time of graduation. Students write a research-based Honours thesis and complete an Honours Qualifying Examination in their primary subject area. For Marine Biology, this requirement is satisfied through MARI 4901.03/MARI 4902.03.

A Co-op option is available for students enrolled in a BSc Combined Honours in Marine Biology. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours should consult with a Marine Biology Honours Advisor early in their studies. To be admitted, students must:

- Have a minimum B+ average (GPA of 3.3) in Core Biology/Core Marine Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the honours subject.
- If Marine Biology is to be the primary subject area, students must
    - Identify and gain the support of a thesis supervisor during their third year of studies (see Honours webpage for supervisor eligibility)
    - With the supervisor's input, draft and submit a thesis proposal to the Honours Committee preferably no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Marine Biology/Biology Honours webpage https://www.dal.ca/faculty/science/biology/honours.html

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Marine Biology and another subject must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)

- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra 1
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Note: Marine Biology students wishing to incorporate **Ocean Sciences** into their program should include MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus and PHYC 1190.03/PHYC 1290.03 Introduction to Physics (or PHYC 1310.03/PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

2000 level

Core Biology courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

Other recommended courses

- OCEA 2000.06: The Blue Planet or OCEA 2001.03: The Blue Planet I and OCEA 2002.03: The Blue Planet II
- MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference

3000 and 4000 levels

Core Biology/Core Marine Biology Courses

- BIOL 3872.03 The Biologist's Toolkit
- BIOL 3101.03/MARI 3101.03 OR BIOL 3761.03/MARI 3761.03

If Marine Biology is the primary subject, students must choose an additional **6** credit hours from any of the following courses. If Marine Biology is the secondary subject, you must choose an additional **12** credit hours from any of the following courses:

- BIOL 3042.03/MARI 3042.03 Molecular Ecology
- BIOL 3063.03/MARI 3063.03 Resource Ecology
- MARI 3074.03 Physiology of Marine Animals Part I
- MARI 3076.03 Physiology of Marine Animals Part II
- BIOL 3370.03/MARI 3370.03 Comparative Animal Physiology
- BIOL 3371.03/MARI 3371.03 Laboratory in Comparative Animal Physiology
- BIOL 3080.03/MARI 3080.03 The Ecology and Evolution of Fishes
- MARI 3090.03 Marine Mammalogy OR BIOL 3626/MARI 3626 Field Studies of Marine Mammals
- BIOL 3101.03/MARI 3101.03 Microbial Ecology
- BIOL 3221.03/MARI 3221.03 Diversity of Algae
- BIOL 3301.03/MARI 3301.03 Invertebrate Biology
- MARI 3602.03 Introduction to Aquaculture
- BIOL 3761.03/MARI 3761.03 Marine Ecology
- MARI 4003.03/ENVS 4003.03 Coral Reefs and Environmental Change OR MARI 4005/ENVS 4005 Coral Reefs and Environmental Change with Field Trip
- BIOL 4323.03/MARI 4323.03 Movement and Spatial Ecology
- MARI 4350.03 Cutting Edge in Marine Science
- MARI 4665.03 Hacking the Blue Planet
- Any two MARI SEASIDE courses
- Any two OCEA courses cross-listed as MARI

If Marine Biology is the primary subject, students will also complete

- MARI 4901.03: Honours Research and Thesis I and MARI 4902.03: Honours Research and Thesis II

BSc or BA (120 credit hour) Major in Marine Biology

The 120 credit hour Major is suited to students who want to focus on Marine Biology, but wish to have a program that is more flexible than the Honours program. It provides a four-year survey of Marine Biology, and is designed for students not anticipating subsequent experimental graduate-level training in Marine Biology or related disciplines. Marine Biology Majors complete a minimum of 42 credit hours in Marine Biology courses above the 1000 level and do not have thesis (or related) requirements. Research and other experiential learning opportunities are available through laboratories, independent research courses, special topics courses and experiential learning courses. Students should plan their programs carefully and obtain advice from an academic advisor in the Biology Department.

A Science Co-op option is available for students enrolled in a Major program in Marine Biology. See Co-operative Education Program.

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Marine Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra I
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Note: Marine Biology students wishing to incorporate **Ocean Sciences** into their program should include MATH 1000.03: Differential and Integral Calculus I (or MATH 1215.03: Life Sciences Calculus) and PHYC 1190 and PHYC 1290.03 Introduction to Physics (or PHYC 1310.03 and PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

2000 level

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology
- OCEA 2000.06: The Blue Planet or OCEA 2001.03: The Blue Planet I and OCEA 2002.03: The Blue Planet II

3000/4000 level

- BIOL 3872.03: The Biologist's Toolkit
- A minimum of an additional 21 credit hours, of which at least 3 credit hours must be at the 4000 level, of Marine Biology (MARI) or MARI-approved courses. This may include any MARI SEASIDE courses or any courses cross-listed as MARI.

BSc or BA (120 credit hour) Double Major in Marine Biology and another subject

BSc or BA (120 credit hour) Double Major in Marine Biology and another subject

The Double Major degree program allows students to combine a study of Marine Biology with another subject. The other subject may be any discipline from the Faculty of Science (other than Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Marine Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Regardless of whether Marine Biology is the primary or secondary subject, the Biology departmental requirements are the same (see below). Students must complete a minimum of 33 credit hours in Marine Biology/Biology courses above the 1000 level. It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Science Co-op option is available for students enrolled in a Double Major with Marine Biology as the primary subject. See Co-operative Education Program.

Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Marine Biology and another subject must complete the following:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra I
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Note: Marine Biology students wishing to incorporate **Ocean Sciences** into their program should include MATH 1000.03: Differential and Integral Calculus I (or MATH 1215.03: Life Sciences Calculus) and PHYC 1190 and PHYC 1290.03 Introduction to Physics (or PHYC 1310.03 and PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

2000 level

- BIOL 2003.03: Animal Diversity
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

3000/4000 level

- BIOL 3872.03: The Biologist's Toolkit
- A minimum of an additional **15** credit hours of Marine Biology (MARI) or MARI-approved courses at or above the 3000 level whether Marine Biology is the primary or secondary subject. This may include any MARI SEASIDE courses or any courses cross-listed as MARI.

Please note that a double major in Biology and Marine Biology is not offered.

Minor in Marine Biology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Marine Biology (MARI) courses at the 2000 level or higher. A maximum of 6 credit hours may be from the list of MARI-approved courses.

Contact Marine Biology for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Marine Biology

Co-op Academic Advisor: Dr. Jen Frail-Gauthier (jfrail@dal.ca)

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in **BSc (120 credit hour) Honours or Major programs** in Marine Biology, or in Combined Honours or Double Major programs with Marine Biology as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. For entry into Marine Biology Co-op, a minimum grade of B+ in BIOL 1010.03 is required. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is recommended that interested students meet contact their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Marine Biology/Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Marine Biology, please see the Departmental webpage www.dal.ca/academics/programs/undergraduate/marinebio/what_will_I_learn/coop_work_terms.html

Minors available to students in Marine Biology

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Marine Biology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Marine Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to student enrolled in a BSc in Marine Biology include:

- Certificate in Animal Behaviour
- Certificate in Aquaculture and the Environment
- Certificate in Environmental Impact Assessment
- Certificate in Genetics
- Certificate in Geographic Information Science
- Certificate in Science Leadership and Communication

MARI-Approved Courses

The following courses given by other departments may be taken as a Marine Biology course toward a BA, BSc and BSc (Honours) Marine Biology degrees.

Please note that up to 6 credit hours of MARI-approved courses may be used toward a minor program in Marine Biology.

Aquaculture (AQUA)[A]	AQUA 2000, AQUA 3000, AQUA 4000, AQUA 4001
Biochemistry (BIOC)	BIOC 2300
Biology (BIOA)[A]	BIOA 3006
Biology (BIOL)	BIOL 2003, BIOL 3061, BIOL 3062, BIOL 3065, BIOL 3102, BIOL 3336, BIOL 3326, BIOL 3614, BIOL 3615, BIOL 3622, BIOL 3635, BIOL 3639, BIOL 3665, BIOL 3872, BIOL 4001, BIOL 4003, BIOL 4061, BIOL 4062, BIOL 4500, BIOL 4510, BIOL 4850
Engineering Mathematics (ENGM)	ENGM 4680
Nutrition (NUTR)[A]	NUTR 3002
Oceanography	OCEA 4401, OCEA 4402, OCEA 4680

(...)[A] indicates courses taught at the Agricultural Campus in Truro.

Courses

Courses

Course Notes

The normal entry requirement for upper level courses in Biology and Marine Biology is a grade of C or better in BOTH terms of first year Biology or in SCIE 1506.09 and SCIE 1507.09. Students with extenuating circumstances may appeal to the departmental Undergraduate curriculum committee. Students should go to the Biology Main Office for further details.

Course Descriptions

MARI 3003 Introduction to Field Oceanography
CREDIT HOURS: 3
See course description for OCEA 3003.03 in the Oceanography section of the calendar.

MARI 3042 Molecular Ecology

CREDIT HOURS: 3
We survey techniques of molecular genetic analysis and consider how they can be used to identify species, populations, sexes, individuals and family relationships, and study population attributes such as historical dispersal, contemporary connectivity, mating behaviour and effective population size. Evaluation is based on assignments, a test and a final exam.
PREREQUISITES: A grade of B- or better in each of BIOL 2030.03 (or GENE 2000.03), BIOL 2040.03, and BIOL 2060.03
CROSSLISTED: BIOL 3042.03
EXCLUSIONS: BIOL 4042.03
FORMATS: Lecture

MARI 3063 Resource Ecology

CREDIT HOURS: 3
This course considers the ecology, utilization, and management of natural resources in fisheries, wildlife and forest management, agriculture and aquaculture. Topics include population dynamics, community interactions, and ecosystem support of resources as well as the history of resource utilization, practices of controlling production, pests, and predators, and sustainable management strategies.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), MATH 1000.03 (or MATH 1215.03 or SCIE 15xx), STAT 1060.03 (or SCIE 15xx)
CROSSLISTED: BIOL 3063.03
FORMATS: Lecture | Tutorial

MARI 3074 Physiology of Marine Animals, Part I

CREDIT HOURS: 3
Animals in a marine environment are quite different from those found in air or fresh water, but the “physiological principles” are similar. This course deals with the same principles as BIOL 3078, but emphasizes the special characteristics of marine animals and the techniques necessary to study them in laboratories. Note: Students must complete MARI 3074.03 before MARI 3076.03
PREREQUISITES: BIOL 2003.03 and BIOL 2020.03 (or BIOA 2001.03)
CROSSLISTED: BIOL 3078.03
FORMATS: Lecture | Lab

MARI 3076 Physiology of Marine Animals Part II

CREDIT HOURS: 3
Animals in a marine environment are quite different from those found in air or fresh water, but the “physiological principles” are similar. This course deals with the same principles as BIOL 3079, but emphasizes the special characteristics of marine animals and the techniques necessary to study them in laboratories.
PREREQUISITES: MARI 3074.03 OR BIOL 3078.03
CROSSLISTED: BIOL 3079.03
RESTRICTIONS: BIOA 3005.03
FORMATS: Lecture | Lab

MARI 3080 The Ecology and Evolution of Fishes

CREDIT HOURS: 3
The course examines selected topics on the ecology and evolution of marine and freshwater fishes. Topics include: phylogeny and systematics; functional morphology and physiology; population biology; life-history evolution; behavior; fisheries science; and conservation biology.
PREREQUISITES: A grade of B- or better in: BIOL 2003.03, BIOL 2040.03, and BIOL 2060.03 (or BIOA3001.3)
CROSSLISTED: BIOL 3080.03
EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03
FORMATS: Lecture

MARI 3090 Marine Mammalogy

CREDIT HOURS: 3
This course examines the characteristics of marine mammals, the roles of marine mammals in oceanic ecosystems and general principles of marine mammal population biology. Students use information on the biology of marine mammals to explore conservation/management issues. They learn of these animals and explore how they interact with humans.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03
EXCLUSIONS: BIOL 4060.03, MARI 4060.03
FORMATS: Lecture

MARI 3101 Microbial Ecology

CREDIT HOURS: 3
Lectures on the ecology of bacteria, viruses, protists. Community structure, food web nutrient cycling, biogeochemical cycles, competition, succession and symbiosis are discussed with examples from marine, fresh-water and soil habitats. There is an emphasis on marine organisms.
PREREQUISITES: BIOL 2004.03 (or MICI 2100.03) and BIOL 2060.03 (or BIOA 3001.03)
CROSSLISTED: BIOL 3101.03
FORMATS: Lecture

MARI 3221 Diversity of Algae

CREDIT HOURS: 3
This course is a taxonomic introduction to the major algal groups (marcophytic and microscopic) with an emphasis on the marine seaweeds. Basic taxonomic differences are covered, along with an introduction to macrophyte ecology, human uses and symbioses. Laboratory sessions focus on morphology and reproduction.
CALENDAR NOTES: Also offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures, see http://www.seaside.science.dal.ca
PREREQUISITES: BIOL 2004.03 or equivalent
CROSSLISTED: BIOL 3221.03
EXCLUSIONS: BIOL 3212.03, MARI 3212.03

MARI 3301 Invertebrate Biology

CREDIT HOURS: 3
A survey of the diversity, ecology and evolutionary history of the major invertebrate groups. Lectures will emphasize phylogenetics and diversity of body plans. Labs will emphasize identification and anatomy through dissections and observations.
PREREQUISITES: BIOL 2003.03
CROSSLISTED: BIOL 3301.03
RESTRICTIONS: This course is restricted to MARI majors.
EXCLUSIONS: BIOL 3321X/Y.06
FORMATS: Lecture | Lab

MARI 3330 Marine Parasitology

CREDIT HOURS: 3
The course is divided into two modules: foundational and practical knowledge. Under foundational knowledge, we will cover 1. Foundations of marine parasitology (introduction and host-parasite relationships), 2. Parasite ecology and evolution (ecological roles, transmission and dispersal), and 3. Parasitic groups and host interactions (diversity of parasites, taxonomy). Under practical knowledge, we will cover 4. Parasitic impacts and host responses (effect of parasitism, aquaculture and fisheries impact, climate change) and 5. Applied marine parasitology (conservation, bioindicators, emerging diseases).
CALENDAR NOTES: Cross-listed with BIOL 3330, available to be delivered online upon request.
PREREQUISITES: BIOL 2003 and, EITHER BIOL 2040 or BIOL 2060. (BIOL 3322 is recommended but not required.)
CROSSLISTED: BIOL 3330
FORMATS: Lecture | Lab | Seminar | Discussion | Online Delivery

MARI 3370 Comparative Animal Physiology

CREDIT HOURS: 3
Lecture course examining principles of animal physiology, with emphasis on the coordination of metabolism, neural and sensory function, muscular function, stress, and reproduction, all within the context of ecology and evolution.
PREREQUISITES: BIOL 2003.03, BIOL 2020.03 (or BIOA 2001.03)
CROSSLISTED: BIOL 3370
EXCLUSIONS: BIOL 3078, BIOL 3079, MARI 3074, MARI 3076
FORMATS: Lecture

MARI 3371 Laboratory in Comparative Animal Physiology

CREDIT HOURS: 3
This laboratory intensive course will provide opportunities for students to experience firsthand the role that experimentation, and data collection, interpretation, and communication plays in our understanding of how animals function. Vertebrate and invertebrate examples are used, in a comparative approach, to study a variety of physiological processes.
CALENDAR NOTES: Laboratory experiments involve live invertebrates and/or vertebrate tissues. Students are required to handle live invertebrates during the lab.
PREREQUISITES: BIOL 3078 or MARI 3074 or BIOL 3370 or MARI 3370; CHEM 1011 or CHMA 1000 and CHEM 1012 or CHMA 1001; STAT 1060 or STAT 2060 or SCIE 1506 or STAT 1501
CROSSLISTED: BIOL 3371

EXCLUSIONS: BIOL 3079, MARI 3076
FORMATS: Lecture | Lab

MARI 3602 Introduction to Aquaculture

CREDIT HOURS: 3
This course offers an introductory overview of aquaculture, the culturing of aquatic plants and animals. The following topics are covered with both a Maritimes and global perspective: overview physico-chemistry of water, engineering, culture techniques, health, nutrition, genetics, environmental and socio-economic considerations.
PREREQUISITES: BIOL 2003.03
EXCLUSIONS: BIOL 3600.03, MARI 3600.03
FORMATS: Lecture

MARI 3603 Practical Aquaculture

CREDIT HOURS: 3
This course provides students with aquaculture practical experience. The laboratories involve finfish, shellfish and live feed, and help students acquire skills useful for conducting experiments with aquatic animals (e.g. marking, measuring, anaesthesia, etc.). Students collect real data and learn to conduct exploratory graphical and statistical analyses.
COREQUISITES: MARI 3602.03
PREREQUISITES: STAT 1060.03 and BIOL 2003.03
EXCLUSIONS: BIOL 3600.03, MARI 3600.03, BIOL 5603
FORMATS: Lab

MARI 3604 Field Aquaculture

CREDIT HOURS: 3
Hands-on learning of aquaculture techniques through field trips to several aquaculture-related facilities (e.g. farms, hatcheries, research institutes, government offices) in the Maritimes and through laboratory exercises in water quality analysis, necropsies, fish processing, knots/rope handeling, and culturing of artemia, rotifers, microalgae and other species in the Aquatron's on-going research.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxillary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Not offered every year.
PREREQUISITES: BIOL 2003.03 or Instructor's approval. MARI 3602.03 is recommended.
RESTRICTIONS: Restricted from students with fewer than 60 credit hours.
FORMATS: Lecture | Lab

MARI 3623 Applied Coastal Ecology

CREDIT HOURS: 3
Coastal Ecology explores anthropogenic impacts on the structure and function of coastal ecosystems. Through field trips, laboratories and guest demonstrations, students examine ecosystem health, e.g. communities on rocky shores, salt marshes and sandy shores, and will learn basic experimental design, principles of environmental assessment and monitoring, and coastal habitat remediation.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca
PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03)
CROSSLISTED: BIOL 3623.03, ENVS 3623.03
FORMATS: Lecture | Lab

MARI 3626 Field Studies of Marine Mammals

CREDIT HOURS: 3
Hands-on introduction to research on marine mammals. Lectures provide an overview of marine mammal adaptations, evolution, population biology, social organization, conservation, and management. Labs include a necropsy and techniques of photographic identification of individuals. On a several-day camping trip, students observe marine mammals from whale-watch boats and conduct research projects.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BI0L 2060.03 (or BIOA 3001.03), and BIOL 3062.03 (or BIOL 3630.03 or PSYO 2160.03), and STAT 1060.03 (or equivalent)
CROSSLISTED: BIOL 3626.03
FORMATS: Lecture | Lab

MARI 3627 Biology and Conservation of Sharks, Skates and Rays

CREDIT HOURS: 3
This course offers a combination of lectures, labs, and field trips that explore the elementals of elasmobranches (shark, skate and ray) biology and conservation. Students are introduced to current methods used in shark research, such as tagging, and learn about the role of sharks in ecosystems.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and BIOL 2003.03
FORMATS: Lecture | Lab

MARI 3628 Marine Ornithology

CREDIT HOURS: 3
Overview of the biology of birds in marine environments. Seabird ecology, evolution, adaptations, identification, and natural history. Tools and techniques for studying their behaviour, diet, and populations in the field. Lectures, exercises, and a week-long field trip to Maritime seabird breeding colonies. Student team and independent research projects and presentations.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.
PREREQUISITES: BIOL 1010 or BIOL 1020 or equivalent, and BIOL 1011 or BIOL 1021 or equivalent, or SCIE 15XX, one of BIOL 2003 or BIOL 2004, and BIOL 2060, or instructor's permission. Knowledge of statistics, Geographic Information Systems (GIS), and familiarity with Excel spreadsheets are helpful, but not required, for research projects.
CROSSLISTED: BIOL 3628.03
FORMATS: Lecture | Lab

MARI 3632 Applied Field Methods in Fish Ecology

CREDIT HOURS: 3
Practical experience conducting field research on fishes with field trips to streams and shallow water marine/freshwater habitats. Techniques include collecting fish, designing and conducting surveys, studying behaviour, measuring phenotypic variability, quantifying temporal and spatial variation, planning for statistical analysis, and weighing tradeoffs between data quality, quantity, costs and ethical/environmental considerations.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 or BIOL 2003.03 or BIOA 3001.03 and STAT 1060.03 or their equivalents or permission of instructor. STAT 2080 is recommended.
CROSSLISTED: BIOL 3632.03, ENVS 3632.03
FORMATS: Lecture | Lab

MARI 3633 Spatial Information and GIS in Ecology

CREDIT HOURS: 3
A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.
CALENDAR NOTES: Offered in the summer through **SEASIDE**. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03
CROSSLISTED: ENVS 3633.03, GEOG 3633.03, BIOL 3633.03
EXCLUSIONS: PLAN 2006.03, GEOG 2006.03
FORMATS: Lecture | Lab

MARI 3635 Species at Risk Field Course

CREDIT HOURS: 3
This course provides practical field experience in the biology of Species at Risk (SAR). Students learn through lectures, presentations, field work, and writing a formal report. On a week-long field trip to Southwestern Nova Scotia, students learn from SAR biologists how to conduct field surveys, document data, and recover SAR.
CALENDAR NOTES: Intensive summer field course. Field trip to Southwestern NS for 7-9 days. Auxiliary fee charged to cover field expenses. Application and deposit required for permission to register. See www.seaside.science.dal.ca for details.
PREREQUISITES: BIOL 2003.03 or BIOL 2004.03; and BIOL 2060.03. BIOL 3065.03 is recommended.
CROSSLISTED: BIOL 3635.03
RESTRICTIONS: Requires permission of instructor
FORMATS: Lecture | Lab | Other (explain in comments)

MARI 3650 Ocean Technology for the Observation and Conservation of Marine Species

CREDIT HOURS: 3
This course offers lectures, labs, and field trips that explore the emerging field of ocean technology and observation efforts that are applied to the conservation of marine species. Students learn about applications of ocean technology, including remotely operated vehicles, acoustic receivers, and other tools used to track and manage species.
CALENDAR NOTES: Auxiliary fee charged to cover field expenses. Application and deposit required for permission to register. See www.seaside.science.dal.ca for details. This course is envisioned to be three weeks August 2nd - 15th, 2021.
PREREQUISITES: BIOL 2060.03 and BIOL 2003.03
RESTRICTIONS: Course open to all Marine Biology majors; Requires permission of instructor; (preference given to Co-op students).
EXCLUSIONS: E1 and E2
FORMATS: Lecture | Lab | Experiential Learning | Other (explain in comments)

MARI 3664 Intertidal Ecology and Diversity

CREDIT HOURS: 3
Hands-on, intensive introduction to ecological research on rocky shores, tidal flats, and sandy beaches. Relevant ecological concepts, sampling techniques for flora and fauna, and statistical skills are learned. Field sampling on day and camping trips is followed by lab work (e.g., identification of seaweeds, invertebrates), statistical analysis, and report preparation.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and BIOL 2003.03 and (MATH 1060.03/STAT 1060.03 or SCIE 15xx)
CROSSLISTED: BIOL 3664.03, ENVS 3664.03
EXCLUSIONS: BIOL 3662.03, BIOL 3663.03
FORMATS: Lecture | Lab

MARI 3680 Scientific Diving Methods for Marine Ecology

CREDIT HOURS: 3
This course introduces students that are certified divers to the practice of underwater research using SCUBA. It combines lectures with supervised dives in various marine habitats to demonstrate the application of standard sampling and experimental procedures in marine ecology, with an emphasis on logistical considerations and diving safety.
CALENDAR NOTES: Offered every other summer through the SEASIDE program. An auxiliary fee is charged to cover costs of dive trips. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03) and STAT 1060.03 or SCIE 15xx, and an internationally recognized diving certification, and a diving physical. Recommended: BIOL 3221.03/MARI 3221.03, BIOL 3301.03
CROSSLISTED: BIOL 3680.03
FORMATS: Lecture | Lab

MARI 3682 Tropical Marine Biology

CREDIT HOURS: 3
This course provides a practical introduction to tropical marine biology, including a multi-day field trip to tropical marine ecosystems (reef, mangrove, seagrass). Identification of species, ecological interactions and tropical marine conservation will be discussed. Evaluation includes, but is not limited to, lecture and field tests, presentations, field observations and reports.
CALENDAR NOTES: Field work involves snorkeling; students must be comfortable swimming for extended periods in open water. Offered in summer through SEASIDE. Special application procedure. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 or equivalent courses; or Instructor's permission. An introductory course in statistics and familiarity with spreadsheets (e.g. Excel) will be useful.
FORMATS: Lecture | Lab

MARI 3685 The Gulf of Eilat Ecosystem: Coral Reef and Subtropical Sea

CREDIT HOURS: 3
Introductin to physical, chemical, and biological ocenography, marine geology, biogeochemistry, and coral-reef biology. Focus is on subtropical seas, the coral reef ecosystem, and the unique characteristics of the Gulf of Eilat. Lectures, laboratories, demonstrations, field trips, exam, group field research projects in the sea, oral presentation, and scientific research paper.
CALENDAR NOTES: This is a field course given at the Eilat Ocean Studies Centre in Isreal. Entry is restricted and requires submissionof an application form
PREREQUISITES: OCEA 2000, STAT 1060 or permissin of instructor
CROSSLISTED: OCEA 3685.03
FORMATS: Lecture | Lab

MARI 3761 Marine Ecology
CREDIT HOURS: 3
Building upon an understanding of basic ecological and evolutionary principles, and a familiarity with the major marine invertebrate and algal taxa, this course examines patterns and processes at the organismal, population and community levels that determine the diversity and distribution of life in the sea.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), and (BIOL 2003.03 or BIOL 2004.03) and OCEA 2000X/Y.06 or (OCEA 2001.03 and OCEA 2002.03)
CROSSLISTED: BIOL 3761.03
RESTRICTIONS: This course is restricted to 3rd and 4th year students.
FORMATS: Lecture | Lab

MARI 3800 Experiential Learning
CREDIT HOURS: 3
Experiential Learning recognizes the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and a timetable.
CALENDAR NOTES: To register in this course, a student must first find a suitable supervisor and sign a learning agreement between the course coordinator, the student and the supervisor.
PREREQUISITES: Students must be registered in a Biology or Marine Biology program, have completed a minimum of 18 credit hours in Biology or Marine Biology above the 1000 level and have a minimum cumulative GPA of 2.4 or permission of the course coordinator.
CROSSLISTED: BIOL 3800.03
EXCLUSIONS: Scheduled courses at a learning institution, study that would qualify for a Special Topics class, an Honours project, co-op work terms and paid work. Student may only complete one experiential learning course within the department.

MARI 4003 Coral Reefs and Environmental Change
CREDIT HOURS: 3
Coral reefs are iconic marine ecosystems both biologically and economically. This course introduces students to the biology of both tropical and cold-water corals, key characteristics of their abiotic environments, human impacts at both local and global scales, and management options for sustainable resource use and the protection of biodiversity.
PREREQUISITES: CHEM 1011.03/CHEM 1012.03 and BIOL 2060.03 and 6 credit hours in ENVS or BIOL or MARI at or above the 3000 level.
CROSSLISTED: ENVS 4003
RESTRICTIONS: This course is restricted to fourth year students.

MARI 4005 Coral Reefs and Environmental Change with Field Trip
CREDIT HOURS: 3
Coral reefs are iconic marine ecosystems both biologically and economically. This class introduces students to the biology of both tropical and cold-water corals, key characteristics of their abiotic environments, human impacts at both local and global scales, and management options for sustainable resource use and the the protection of biodiversity. This course runs parallel with ENVS 4003 but includes the addition of a 5-day field trip to the Bermuda Institute of Ocean Science.
PREREQUISITES: Chem 1011/Chem 1012 and Biol 2060. Also restricted to students with 6 credit hours in Environmental Science or Biology or Marine Biology at or above the 3000 level. Permission of Instructor Required
CROSSLISTED: ENVS 4005
RESTRICTIONS: Restricted to exclude E1, E2, E3, permission of instructor required
EXCLUSIONS: MARI 4003
FORMATS: Lecture | Lab | Discussion | Experiential Learning

MARI 4080 Laboratory Studies of Fishes
CREDIT HOURS: 3
Through a series of laboratory exercises, the course provides students with practical experience on various topics related to the study of ichthyology. Topics shall include the following: species identification; meristics and morphometrics; use of dichotomous keys; internal and external morphology; ageing and growth determination; ecomorphological attributes; data collection and analysis.
PREREQUISITES: BIOL 3080.03 or MARI 3080.03
CROSSLISTED: BIOL 4080.03
EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03
FORMATS: Lab

MARI 4090 Evolutionary ecology of marine mammals
CREDIT HOURS: 3
Mammals evolved on land and then made their way into the ocean. The course considers how marine mammals adapted to this major change in habitat, so

that they are now highly successful participants in the marine ecosystem. Students examine adaptations ranging from the cellular to social structure.
PREREQUISITES: One of MARI 3090.03, BIOL 3626.03, MARI 3626.03, BIOL 4060.03, MARI 4060.03 or permission of Instructor
EXCLUSIONS: BIOL 5651
FORMATS: Lecture

MARI 4141 Advances in Biological Oceanography

CREDIT HOURS: 3
This course explores major advances in biological oceanography through analysis and discussion of influential historical and recent cutting-edge papers from the scientific literature. The course will be delivered through a combination of student presentations, class discussions, and invited speakers.
CALENDAR NOTES: MARI 4141 can be taken after or concurrently with OCEA 4140.03 or (OCEA 5140.03 or BIOL 4661.03 or MARI 4661.03).
COREQUISITES: OCEA 4140.03 or permission of instructor.
CROSSLISTED: OCEA 4141.03
RESTRICTIONS: E3
EXCLUSIONS: BIOL 4141.03, BIOL 5141.03
FORMATS: Seminar

MARI 4215 Marine Plants in the 21st Century

CREDIT HOURS: 3
This course focuses on the growing importance of habitat-forming marine plants, including mangroves, saltmarshes, seagrass meadows, kelp forests and other seaweed beds. We cover issues around wild harvesting, aquaculture, blue carbon storage, bioprospecting, habitat restoration, ecosystem-based management, and climate change. Class format includes overview lectures, case-studies, discussions, and interactive work.
PREREQUISITES: BIOL 2060.03 and OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) and two of any of the following: MARI 3063.03/BIOL 3063.03 or BIOL 3065.03 or MARI 3221.03/BIOL 3221.03 or MARI 3602.03 or MARI 3623.03/BIOL 3623.03/ENVS 3623.03 or MARI 3664.03/BIOL 3664.03 /ENVS 3664.03 or BIOL 3761.03/MARI 3761.03.
EXCLUSIONS: MARI 5215
FORMATS: Lecture | Tutorial

MARI 4323 Movement and Spatial Ecology

CREDIT HOURS: 3
How animals use their three-dimensional habitat impacts their life history. Spatial ecology, the study of animal location, and movement ecology, the study of the drivers of movement, are fields of inquiry that are relied upon to inform management decision making. Movement ecology, animal tracking, and methods for testing hypotheses using statistical programming will be covered.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03 or PSYO/NESC 2160.03 or permission of the instructor.
CROSSLISTED: BIOL 4323.03
FORMATS: Lecture | Lab

MARI 4335 Environmental Impacts in Marine Ecosystems

CREDIT HOURS: 3
See course description for OCEA 4335.03, in the Oceanography section of this calendar.

MARI 4350 Cutting Edge in Marine Science

CREDIT HOURS: 3
This course focuses on current, often hotly debated topics in marine science. We discuss recently published papers and current research initiatives on urgent issues, including biodiversity, fisheries, conservation, management, climate change, and human-ocean interactions. Class format includes lectures, case-studies, as well as active discussion, debates, group work and hands-on assignments.
PREREQUISITES: BIOL 2060.03 and OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) and one of any of the following; BIOL 3065.03, MARI 3063.03, BIOL 3067.03, MARI 3067.03, MARI 3080.03, BIOL 3600.03, MARI 3600.03, MARI 3602.03 or MARI 3761.03.
CROSSLISTED: MARI 5350.03
FORMATS: Lecture | Tutorial

MARI 4369 Fisheries Oceanography

CREDIT HOURS: 3
See course description for OCEA 4160.03, in the Oceanography section of this calendar.

MARI 4370 Deep Sea Biology
CREDIT HOURS: 3
See course description for OCEA 4370.03, in the Oceanography section of this calendar.

MARI 4600 Ecosystem Modelling for Aquaculture
CREDIT HOURS: 3
Learn a collection of tools for the sustainable utilization of aquatic resources. Emphasis is on bilateral interactions between aquaculture and the environment. Topics include water/sediment/biota variability, carrying capacity, invasive species, habitat destruction/creation, ecosystem functions/services, climate changes, etc. Tools include data analysis/modelling/visualization/mapping using Python™ (prior programming experience is not required).
PREREQUISITES: MARI 3602.03 or Instructor's approval
RESTRICTIONS: Restricted from students with fewer than 60 credit hours
FORMATS: Lecture

MARI 4661 Biological Oceanography
CREDIT HOURS: 3
See course description for OCEA 4140.03, in the Oceanography section of this calendar.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); or permission of instructor
CROSSLISTED: OCEA 5140.03, BIOL 4661.03, 5661.03

MARI 4662 Biology of Phytoplankton
CREDIT HOURS: 3
This is an upper-division course on the phytoplankton in the context of their evolutionary history and ecological diversity, with an emphasis on their adaptations and acclimation to different environments and their role in food webs and in biogeochemical cycling.
PREREQUISITES: MATH 1000.03 (or MATH 1215.03) and MATH 1010.03 or equivalent, and OCEA 2001.03 and OCEA 2002.03; or permission of Instructor
CROSSLISTED: OCEA 4230, OCEA 5230, BIOL 4662
EXCLUSIONS: E1, E2
FORMATS: Lecture | Discussion

MARI 4664 History of Marine Sciences
CREDIT HOURS: 3
In this course, we will trace the history of marine sciences from the ancients to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped human understanding of the oceans.
PREREQUISITES: Instructor's consent
CROSSLISTED: BIOL 4664.03, OCEA 4331.03/5331.03, HIST 3073.03, HSTC 3331.03, SCIE 4001.03
FORMATS: Lecture

MARI 4665 Hacking the blue planet: The scientific and social dimensions of ocean fertilization
CREDIT HOURS: 3
This course explores the biology, ecology, biogeochemistry and ethical and legal dimensions of purposeful ocean fertilization. Through lectures, discussion, case studies, and group projects, students consider the biological and oceanographic basis of ocean fertilization and its use as a 1) scientific tool and 2) controversial geoengineering strategy for climate change mitigation.
PREREQUISITES: One of the BIOL 3101.03, OCEA 2000X/Y.06, ERTH 3601.03, BIOL 3060.03 or instructor's permission
CROSSLISTED: OCEA 4665.03
EXCLUSIONS: BIOL 5665.03, OCEA 5665.03
FORMATS: Lecture | Discussion

MARI 4666 Benthic Ecology
CREDIT HOURS: 3
See course description for OCEA 4330.03, in the Oceanography section of this calendar.
PREREQUISITES: OCEA 2001.03, OCEA 2002.03, and BIOL 2060.03, or permission of instructor.
CROSSLISTED: OCEA 4330.03, BIOL 4666.03
FORMATS: Lecture | Lab

MARI 4806 Independent Research I

CREDIT HOURS: 3
Students conduct supervised, independent research in Marine Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.
CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see
https://www.dal.ca/faculty/science/biology/programs/undergraduate.html
PREREQUISITES: Signature required
FORMATS: Other (explain in comments)

MARI 4807 Independent Research II

CREDIT HOURS: 3
Students conduct supervised, independent research in Marine Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the class coordinator before the student is permitted to register.
CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see
https://www.dal.ca/faculty/science/biology/programs/undergraduate.html
PREREQUISITES: Signature required
FORMATS: Other (explain in comments)

MARI 4809 Independent Research III

CREDIT HOURS: 3
Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.
CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For more information see
https://www.dal.ca/faculty/science/biology/programs/undergraduate.html
PREREQUISITES: Signature required
FORMATS: Other (explain in comments)

MARI 4880 Communicating science for societal impact

CREDIT HOURS: 3
This class is for students interested in communicating scientific content with relevance to society, contributing to positive change. We aim to build skills to reach media, decision makers, regulators, and the public. The emphasis will be on communicating findings effectively and developing critical skills in science communication and scientific leadership.
CROSSLISTED: BIOL 4880
RESTRICTIONS: E3
FORMATS: Lecture | Tutorial | Experiential Learning

MARI 4901 Honours Research and Thesis I

CREDIT HOURS: 3
This course is required for, and restricted to, all Marine Biology Honours programs in which Marine Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (MARI 4901.03 and MARI 4902.03) are normally taken in the students' final year. See Marine Biology and Biology Honours webpage for more details
(https://www.dal.ca/faculty/science/biology/honours.html).
CALENDAR NOTES: MARI 4901.03 and MARI 4902.03 must be taken in consecutive fall/winter or winter/fall terms (Co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated.
PREREQUISITES: Permission of Honours Coordinator
CROSSLISTED: BIOL 4901.03
RESTRICTIONS: Students in the Marine Biology Honours Programme
EXCLUSIONS: BIOL 4900.06 and MARI 4900.06
FORMATS: Other (explain in comments)

MARI 4902 Honours Research and Thesis II
CREDIT HOURS: 3
This course is required of, and restricted to, all Marine Biology Honours programs in which Marine Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (MARI 4901.03 and MARI 4902.03) are normally taken in the students' final year.
CALENDAR NOTES: MARI 4901.03 and MARI 4902.03 must be taken in consecutive fall/winter or winter/fall terms (Co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated. See Biology Honours homepage for more details (https://www.dal.ca/faculty/science/biology/honours.html). https://www.dal.ca/faculty/science/biology/honours.html
PREREQUISITES: Permission of Honours Coordinator
CROSSLISTED: BIOL 4902.03
RESTRICTIONS: Students in the Marine Biology Honours Programme, normally in their final year of study.
EXCLUSIONS: BIOL 4900.06 and MARI 4900.06
FORMATS: Other (explain in comments)

MARI 8891 Co-op Workterm I
CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.03

MARI 8892 Co-op Workterm 2
CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.03, MARI 8891.00

MARI 8893 Co-op Workterm 3
CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.03, MARI 8892.00

MARI 8894 Co-op Workterm 4
CREDIT HOURS: 0

PREREQUISITES: MARI 8893.00 and SCIE 2800.03

Mathematics and Statistics

Mathematics and Statistics

More Info

For information concerning programs and courses in Mathematics, please refer to the Mathematics section of this calendar. For Statistics, please refer to the Statistics section.

Staff

Dean
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Department Chair
Chisholm, S. BSc (Dalhousie), MSc, PhD (Univ of Calgary)

Mathematics Director
Selinger, P., PhD (Univ Pennsylvania)

Statistics Director
Smith, B., MSc (Calgary), PhD (Berkeley)

Undergraduate Programs Advisors
For a list of current Undergraduate Programs Advisors and their contact information please visit the Department of Mathematics and Statistics website at: www.dal.ca/mathstat

Professors Emeriti
Dilcher, K., PhD (Queen's)
Field, C. A., MSc, PhD (Northwestern)
Fillmore, P. A., MSc, PhD (Minn), FRSC
Grunenfelder, L., PhD (ETH Zurich)
Hamilton, D., MA, PhD (Queen's)
Johnson, K.P., MSc (Toronto), PhD (Brandeis)
Nowakowski, R. J., MSc, PhD (Calgary)
Paré, R., MSc, PhD (McGill)
Radjavi, H., MA, PhD (Minn)
Swaminathan, S., MA, MSc, PhD (Madras)
Taylor, K., BSc (St. FX), PhD (Alberta)
Thompson, A. C., PhD (Newcastle upon Tyne)
Wood, R. J., MSc (McMaster), PhD (Dalhousie)

Professors
Beiko, R., PhD (Ottawa), joint appointment with Computer Science
Bielawski, J., MA, PhD (Texas A&M Univ), joint appointment with Biology
Brown, J., MSc, PhD (Toronto)
Coley, A. A., PhD (London)
Dowd, M., MBA, MES, PhD (Dalhousie)
Faridi, S., MA (Brandeis), PhD (Michigan)
Feng, C., MSc. & PhD (Simon Fraser U.) cross appointment with Community Health and Epidemiology
Gu, H., MSc (Peking), PhD (Hong Kong)
Ho, L., MSc (Orleans, France), PhD (Wisconsin), Canada Research Chair
Iron, D., MSc, PhD (UBC)
Irwin, A., MSc (UBC), PhD (Queen's)
Janssen, J., MSc (Eindhoven), PhD (Lehigh)
Kolokolnikov, T., MSc, PhD (UBC)
Mills Flemming, J., MSc (TUNS), PhD (Dalhousie)
Milson, R., MSc, PhD (McGill)
Pronk, D., MSc, PhD (Utrecht)
Selinger, P., PhD (Univ Pennsylvania)
Smirnov, R., BSc (Kyiv), PhD (Queen's)

Smith, B., MSc (Calgary), PhD (Berkeley)
Susko, E., PhD (Waterloo)
Zhao, Y., MSC (Western Kentucky), PhD (UBC), joint appointment with Management

Associate Professors
Eswarathasan, S., PhD (Rochester)
Fraser, A. J., MSc (Toronto), PhD (Princeton)
Kenney, T., BA (Hons), MMath, PhD (Cambridge), Honours and Undergraduate Advisor, Actuarial Science
Ross, N.J., PhD (Dalhousie), Undergraduate and Honours Advisor, Mathematics

Assistant Professors
Johnson-Freyd, T., BSc (Stanford), PhD (Berkeley)
Michelot, T., MSc (Rouen), PhD (Sheffield)
Murphy, O., MSc & PhD (McGill)

University Teaching Fellows
Sarhan, A., PhD (Ghansk)
Chisholm, S., BSc (Dalhousie), MSc, PhD (Univ of Calgary)

Senior Instructors

Noble, R., MSc (UBC), PhD (Dalhousie)
Surovell, A., MA (Univ Mass), AB (Boston)

Introduction

The Mathematics division offers a full range of programs aimed at students of diverse interests and levels. This includes honours, major, minor and joint degree programs. We work closely with students to choose a program that is the right fit for their interests and goals. Mathematics is a creative activity with its own intrinsic value and beauty. Mathematics also provides a solid foundation for every scientific field. A degree in mathematics can prepare students for a career in academia, industry, management, information technology, banking, teaching, and other areas.

General Interest Courses

We offer a number of courses for students not majoring in Mathematics:

- MATH 1000.03/MATH 1010.03: These core calculus courses are the starting point for any degree program in the sciences.
- MATH 1030.03/MATH 2040.03 : These courses serve as introductions to matrix theory, linear equations and linear algebra, topics of importance in many fields.
- MATH 1060.03: This course serves as an introduction to the basic ideas of statistics, through examples drawn from a wide variety of disciplines.
- MATH 1215.03: This course emphasizes the application of calculus to the life sciences.
- MATH 2110.03: This course is concerned with the foundations of mathematics, including logic, set theory, and proof techniques.
- MATH 2300.03: Topics from science and technology are used to motivate and illustrate basic mathematical tools of linear algebra and calculus. Mathematical software such as Matlab and Maple is also introduced.

Six credit hours of Mathematics or Statistics are required for a BSc degree. The following courses may not be used to satisfy this requirement: MATH 1001.03, MATH 1002.03, MATH 1003.03, MATH 1115.03, MATH 1315.03.

Degree Programs

The Department of Mathematics and Statistics offers the following degree programs in Mathematics :

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc (90 credit hour) Minor in Mathematics
- Minor in Mathematics (added to a 120 credit hour degree)

* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A BSc degree is the choice of most students in Mathematics; however, a BA degree option is also available for each of the programs listed below. The Departmental requirements for each BA degree program are the same as those of the corresponding BSc degree program; however, students are advised that some of the general College of Arts and Science requirements differ for the BA and BSc degrees. Minors and certificates that can be combined with a BSc degree can also be combined with a BA degree.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Mathematics undergraduate academic advisor. Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies.

Students in any Mathematics program are strongly encouraged to include CSCI 1105.03 and CSCI 1110.03 in their programs.

Staff

Please refer to the Department of Mathematics and Statistics Staffpage for a full listing of the members of the Department.

BSc (120 credit hour) Concentrated Honours in Mathematics

An Honours degree offers an in-depth preparation in undergraduate mathematics, including an independent research experience. This degree option is recommended for students interested in eventually pursuing graduate studies in mathematics. Honours students complete a minimum of 54 credit hours above the 1000 level in Mathematics with a minimum GPA of 3.0 and write an Honours Comprehensive Examination.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Mathematics should consult with a Mathematics Honours Advisor early in their studies to have their programs approved.

Departmental requirements

The Department offers two Honours streams in Mathematics: (A) Pure Mathematics and (B) Applied Mathematics. Stream A emphasizes the power and beauty of mathematics as an independent academic discipline. Stream B emphasizes the connections between mathematics and other scientific disciplines. Both streams follow the same courses for the first two years. Students decide which stream to pursue during their second year.

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc Concentrated Honours program in Mathematics must complete the following courses:

1000 level

- MATH 1000.03/MATH 1010.03 (or equivalent)
- MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level

- MATH 2001.03: Intermediate Calculus I/MATH 2002.03: Intermediate Calculus II
  MATH 2135.03: Linear Algebra and MATH 2505.03: Introductory Analysis
- Fifteen additional credit hours in mathematics at or above the 2000 level - not including courses listed below

3000 level

- MATH 3031.03: Abstract Algebra I and MATH 3501.03: Intermediate Analysis I
- Students in Stream A are required to take MATH 3032.03: Abstract Algebra II and MATH 3502.03: Intermediate Analysis II
- Students in Stream B are required to take MATH 3080.03: Introduction to Complex Variables and (MATH 3120.03: Differential Equations or MATH 3260.03: Applied Differential Equations)

4000 level

- MATH 4950.03: Honours Research Project
- Twelve additional credit hours at or above the 4000 level

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03

Programming requirement

- Students must complete a 3-credit course that incorporates computer programming. Suggested course is one of CSCI 2202.03, MATH 2300.03/STAT 2300.03, PHYC 2050.03/MATH 2052.03, or permission of advisor.

Students in Stream A are advised to include a selection of courses from the following list in their programs:

- MATH 2051.03: Problems in Geometry
- MATH 2113.03: Discrete Structures
- MATH 3045.03: Curves and Surfaces
- MATH 3070.03: Theory of Numbers
- MATH 3080.03: Introduction to Complex Variables
- MATH 3120.03: Differential Equations
- MATH 3330.03: Applied Graph Theory
- MATH 3360.03: Probability

Students in Stream B are advised to include a selection of courses from the following list in their programs:

- MATH 2060.03: Introduction to Probability and Statistics

- MATH 2300.03: Mathematical Modelling
- MATH 3032.03: Abstract Algebra II
- MATH 3045.03: Curves and Surfaces
- PHYC 3050.03: Introduction to Numerical Programming
- MATH 3300.03: Optimization
- MATH 3330.03: Applied Graph Theory
- MATH 3360.03: Probability
- MATH 3400.03: Classical Game Theory
- MATH 3502.03: Intermediate Analysis II
- MATH 3900.03: Financial Mathematics

Honours Comprehensive Examination

The Honours Comprehensive Examination in mathematics consists of a written paper of about 20-30 pages researched and prepared by the student. The topic is decided on in conjunction with the Honours advisor. The paper is also presented to the honours seminar. The work for this paper is done as part of the required course MATH 4950.03: Honours Research Project.

BSc (120 credit hour) Combined Honours in Mathematics and another subject

Students who wish to study Mathematics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Mathematics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students contemplating a Combined Honours program in Mathematics and another subject should bear in mind, however, that the work in either subject may be insufficient for admission to a regular graduate program.

Students planning to enrol in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Mathematics, this requirement is satisfied through MATH 4950.03.

Departmental Requirements

Students in a BSc Combined Honours program in Mathematics and another subject must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. A combined total of 66 credit hours above the 1000 level must be completed in two subjects, with a minimum of 30 credit hours above the 1000 level in each subject. In addition, students must complete a minimum of 18 credit hours at the 3000 level or above in each of the primary and secondary subjects.

Students in a BSc Combined Honours program in Mathematics, with Mathematics either as the primary subject or as the secondary subject, must complete the following courses. The program must be approved by a Mathematics Honours Advisor and an Honours advisor from the other subject.

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2002.03: Intermediate Calculus II
- MATH 2135.03: Linear Algebra
- MATH 2505.03: Introductory Analysis

3000 level

- At least two of MATH 3031.03: Abstract Algebra I, MATH 3032.03: Abstract Algebra II, MATH 3080.03: Introduction to Complex Variables, (MATH 3120.03: Differential Equations or MATH 3260.03: Applied Differential Equations), MATH 3501.03: Intermediate Analysis I, MATH 3502.03: Intermediate Analysis II

4000 level

- Six additional credit hours in MATH at the 4000 level

If Mathematics is the primary subject, students must also complete:

- MATH 4950.03: Honours Research Project

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03

BSc (120 credit hour) Major in Mathematics

The 120 credit hour Major is suited to students who want to focus on Mathematics, but wish to have a program that is somewhat less constrained than the Honours program. Students in a Major program normally choose to concentrate in Pure Mathematics, Applied Mathematics or Mathematics Education.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc Major program in Mathematics must complete the following courses:

1000 level

- MATH 1000.03/MATH 1010.03 (or equivalent)
- MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level

- MATH 2001.03: Intermediate Calculus I/MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II (or MATH 2135.03: Linear Algebra)
- At least one of MATH 2110.03: Logic and set theory (or MATH 2112.03 : Discrete Structures I), MATH 2051.03: Problems in Geometry or MATH 2505.03: Introductory Analysis
- Six additional credit hours in MATH at or above 2000 level
- Three credit hours in a STAT course at or above 2000 level

3000 level

- 24 additional credit hours in MATH at or above the 3000 level. This selection may not include MATH 3700.03: Mathematics for Economists, MATH 3800.03: Financial Economics.

Programming requirement

- Students must complete a 3-credit course that incorporates computer programming. Suggested course is one of CSCI 2202, MATH 2300/STAT 2300, PHYC 2050/MATH 2052, or permission of advisor.

Students wishing to concentrate in Applied Mathematics should choose the additional MATH courses from

- MATH 2060.03: Introduction to Probability and Statistics/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- MATH 2120.03: Methods for Ordinary Differential Equations/MATH 3120.03: Differential Equations
- MATH 2300.03: Mathematical Modelling
- MATH 3120.03: Differential Equations
- MATH 3210.03: Introduction to Numerical Analysis
- MATH 3300.03: Optimization
- MATH 3330.03: Applied Graph Theory
- MATH 3400.03: Classical Game Theory

Students wishing to concentrate in Pure Mathematics should choose the additional MATH courses from

- MATH 2060.03: Introduction to Probability and Statistics/MATH 2080.03
- MATH 2120.03: Methods for Ordinary Differential Equations/MATH 3120.03: Differential Equations
- MATH 3031.03: Abstract Algebra I/MATH 3032.03: Abstract Algebra II
- MATH 3045.03: Curves and Surfaces
- MATH 3070.03: Theory of Numbers
- MATH 3080.03: Introduction to Complex Variables

Students contemplating a career in Mathematics Education should choose the additional MATH courses from

- MATH 2051.03: Problems in Geometry
- MATH 2060.03: Introduction to Probability and Statistics/MATH 2080.03
- MATH 2110.03: Logic and set theory
- MATH 2113.03: Discrete Structures
- MATH 2300.03: Mathematical Modelling
- MATH 3031.03: Abstract Algebra I/MATH 3032.03: Abstract Algebra II
- MATH 3070.03: Theory of Numbers
- MATH 3080.03: Introduction to Complex Variables
- MATH 3140.03: Introduction to Wavelets
- MATH 3300.03: Optimization
- MATH 3330.03: Applied Graph Theory
- MATH 3400.03: Classical Game Theory

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03

BSc or BA (120 credit hour) Double Major in Mathematics and another subject

The Double Major degree program allows students to combine the study of Mathematics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Mathematics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program are advised to review their proposed program of study with advisors in both subject areas.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Double Major program in Mathematics and another subject must complete the following:

Mathematics as the primary subject

Student completing a double major with Mathematics as the primary subject can fulfill the Mathematics requirements by following one of two programs below.

Pure Mathematics

1000 level

MATH 1000.03/MATH 1010.03 (or equivalent)

2000 level

- MATH 2001.03: Intermediate Calculus I and MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II (or MATH 2135.03: Linear Algebra)
- At least two of MATH 2110.03: Logic and set theory (or MATH 2112.03: Discrete Structures I), MATH 2051.03: Problems in Geometry, MATH 2505.03: Introductory Analysis

3000 level

- 18 additional MATH credit hours at or above the 3000 level. This selection may not include MATH 3700.03: Mathematics for Economists, MATH 3800.03: Financial Economics.

Programming requirement

- Students must complete a 3-credit course that incorporates computer programming. Suggested course is one of CSCI 2202.03, MATH 2300.03/STAT 2300.03, PHYC 2050.03/MATH 2052.03, or permission of advisor.

Applied Mathematics

1000 level

- MATH 1000.03/MATH 1010.03 (or equivalent)

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2040.03: Matrix Theory and Linear Algebra II (or MATH 2135.03: Linear Algebra)
- MATH 2120.03: Methods for Ordinary Differential Equations and MATH 2002.03: Intermediate Calculus II
- MATH 2060.03: Introduction to Probability and Statistics or MATH 2080.03: Statistical Methods for Data Analysis and Inference

3000 and 4000 level

- MATH 3120.03 or MATH 3260.03
- At least 15 credit hours selected from : MATH 3045.03, MATH 3080.03, MATH 3210.03, MATH 3300.03, MATH 3330.03, MATH 3340.03, MATH 3360.03, MATH 3400.03, MATH 3900.03, MATH 4190.03, MATH 4220.03, MATH 4230.03, MATH 4250.03, MATH 4320.03, MATH 4370.03, MATH 4540.03.

Programming requirement

- Students must complete a 3-credit course that incorporates computer programming. Suggested course is one of CSCI 2202.03, MATH 2300.03/STAT 2300.03, PHYC 2050.03/MATH 2052.03, or permission of advisor.

Mathematics as the secondary subject

A student enrolled in a Double Major with Mathematics as the secondary subject also fulfills the Mathematics requirements by following one of the programs listed above for a Double Major with Mathematics as the primary subject.

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03.

BSc (90 credit hour) Minor in Mathematics

The 90 credit hour Minor in Mathematics is appropriate for students who want to study some Mathematics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Mathematics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc in Mathematics is usually the preferred option for students who wish to combine studies in Mathematics with a degree in Engineering (see BSc/BEng Concurrent Program).

See the Minor in Mathematics section of this Calendar.

Minor in Mathematics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

BA or BSc (90 credit hour) degree program with a Minor in Mathematics is also available.

Requirements

* A minimum of 18 credit hours in MATH courses at the 2000 level or higher to a maximum of 36 credit hours.

* It is recommended that students take MATH 1010 and MATH 1030. These are prerequisites for many other upper-level MATH courses.

Contact Mathematics and Statistics for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Mathematics

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Mathematics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Mathematics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to students enrolled in a BSc in Mathematics include:

- Certificate in Actuarial and Financial Mathematics
- Certificate in Applied and Computational Mathematics

BSc/BEng Concurrent Program

BEng/BSc (90 credit hour) concurrent degree (Mathematics)

This degree combines an engineering degree with a deeper knowledge of mathematics, and provides a strong foundation for students interested in areas such as robotics, telecommunications, systems analysis and modelling. Following is the recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Mathematics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Mathematics and Statistics. A concurrent BEng/BSc Honours Mathematics program can be designed for interested candidates.

	Fall	Winter
Registered in BEng		
Year 1	CHEM 1021 *Chemistry I*	CHEM 1022 *Chemistry II*
	MATH 1280 *Engineering Math I*	MATH 1290 *Engineering Math II*
	ENGI 1103 *Engineering Design I*	ENGI 1203 *Engineering Mechanics I: Statics*
	PHYC 1190 *Physic I*	PHYC 1290 *Physics II*
	ENGM 1081 *Computer Programming*	ENGM 1041 *Applied Linear Algebra*
	CPST 1103 *Technical Communications I*	CPST 1203 *Technical Communications II*
Apply for admission into concurrent BEng/BSc		
Year 2[a]	ENGM 2101 *Applied Vector Calculus*	ENGM 2022 *Applied Differential Equations*

	ENGM 2032 *Applied Probability & Statistics*	HSTC 1801 *History of Engineering II*
	[b] Writing course (Humanities)	[d] One Engineering elective
	Two 2000 level (or higher) MATH courses (may not be MATH 2001 or MATH 2120)	**Two 2000 level (or higher) MATH courses (may not be MATH 2001 or MATH 2120)**
	One social science course [c]	**One social science or humanities course [c]**
Year 3 [a]	IENG 2005 *Engineering economics*	ENGI 2203 *Engineering design II*
	ECED 2000 *Electric circuits*	[c] Two Engineering electives
	ENGI 2102 *Thermo-Fluid Engineering I*	**One 3000 level (or higher) MATH [c] course (may not be MATH 2001 or MATH 2120)**
	One 3000 level (or higher) MATH [c] course (may not be MATH 2001 or MATH 2120)	**One Science/FASS course (may be MATH)**
	One Science/FASS course (may be MATH)	

Graduate with Diploma in Engineering and BSc 90 credit degree

Year 4 Continue in BEng program

Year 5 Complete BEng program

[a] To meet the BSc 90 credit hour Minor in Mathematics requirements, students complete 30 credit hours in addition to their Engineering requirements: 12 credit hours of MATH courses at or above the 2000 level, as specified above, 6 MATH credit hours at or above the 3000 level, 6 credit hours of social science/humanities courses, and 6 credit hours in Science/FASS courses (which may be MATH)

[b] Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements [College of Arts and Science]

[c] Choose from CANA, CTMP, ECON, EMSP, EURO, GWST, HIST, HSTC, INTD, POLI, PSYO, SOSA, SUST for social science courses. Choose from ARBC, CANA, CHIN, CLAS, CTMP, CRWR, EMSP, EURO, SWST, GERM, HIST, HTSC, ITAL, PERF, PHIL, RELS, RUSN, SPAN and THEA for humanities courses

[d] See Engineering section of the calendar for details

[e] Upper level courses that may be of particular interest to Engineering students include MATH 4220, MATH 4230 and MATH 4165

Notes:

- For a BEng/BSc with Minor in Math, students will not receive credit for MATH 1030, MATH 2001 or MATH 2120
- Completion of ENGM 2101, ENGM 2022 and ENGM 2032 fulfill the Math Minor requirements for MATH 2001 and MATH 2120
- ENGM 1041 fulfills the MATH 1030 requirement for the Math minor

Courses

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Notes

Course descriptions for Statistics can be found in the calendar under Statistics.

Credit may not be obtained twice for the same course even if the numbers have been changed.

Courses with the designation (MLC) are supported by the tutorial services of the Math Learning Centre.

The following three courses below the 1000 level are offered by the College of Continuing Education. Students register and pay for them at the College of continuing Education located at 1220 LeMarchant Street, 2nd Floor or by calling (902) 494-2375 (see College of Continuing Education for more details).

Course Descriptions

MATH 0009 Academic Math

CREDIT HOURS: 0
Academic Math has been developed to prepare you for the math involved in non-calculus courses. If you have solid math skills (at least grade 11 academic level) and want to develop them to the university level necessary for entrance to the Faculty of Arts, Bachelor of Commerce, Management, or Nursing programs, this course is designed for you. MATH 0009.00 is accepted by Dalhousie University in place of NS Math 12 Academic.
PREREQUISITES: At least grade 10 academic math or equivalent
FORMATS: Lecture | Tutorial

MATH 0010 Pre-Calculus Accelerated

CREDIT HOURS: 0
This single-term accelerated course has been designed for calculus bound students, who have a firm grasp of grade 11 and 12 math skills. Focus is placed on pre-calculus key concepts, assuming students have current knowledge of grade 11 and 12 math concepts. Students requiring review of grade 11 and 12 concepts should take Pre-Calculus Plus (MATH 0011.00). Topics are explored in class following a clear, logical progression, with mastery generally occurring after assignments are completed.
PREREQUISITES: Recommend at least 80% in grade 11 and 12 math
FORMATS: Lecture | Tutorial

MATH 0011 Pre-Calculus Plus

CREDIT HOURS: 0
This full year course has been designed for the majority of students either requiring pre-calculus to gain admittance to the Dalhousie BSc program or as preparation for MATH 1000.03. This course provides a more in depth coverage of math concepts than found in the accelerated 1 term class, and adds a review of relevant 11 and 12 material, as well as a study of area under a curve. Students who have been away from math for 2 or more years, or have a heavy schedule, will find this course a better fit than the accelerated MATH 0010.00. Throughout the course, algebra, and applied geometric problem solving skills needed for calculus, are emphasized.
PREREQUISITES: Grade 11 and 12 math or equivalent
FORMATS: Lecture | Tutorial

MATH 1000 Differential and Integral Calculus I

CREDIT HOURS: 3
This course offers a self-contained introduction to differential and integral calculus. The topics include functions, limits, differentiation of polynomial, trigonometric, exponential and logarithmic functions, product, quotient and chain rules, applications of differentiation, antiderivatives and definite integrals, integration by substitution. A sequel to this course is MATH 1010.03. or MATH 1290.03.
CALENDAR NOTES: MATH 1000.03. is equivalent to MATH 1280.03.

PREREQUISITES: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus. Pre-calculus is highly recommended.
EXCLUSIONS: MATH 1215.03.
FORMATS: Lecture

MATH 1010 Differential and Integral Calculus II

CREDIT HOURS: 3
A continuation of the study of calculus with topics including: Riemann sums, techniques of integration, elementary differential equations and applications, parametric equations and polar coordinates, sequences and series, Taylor series.
CALENDAR NOTES: MATH 1010.03. is equivalent to MATH 1290.03.
PREREQUISITES: MATH 1000.03, or MATH 1215.03, or MATH 1280.03.
FORMATS: Lecture | Tutorial

MATH 1030 Matrix Theory and Linear Algebra I

CREDIT HOURS: 3
This course is a self-contained introduction to Matrix Theory and Linear Algebra. Topics include: systems of linear equations, vectors in R^n, matrices, spans, linear independence, bases, dimension, linear transformations in R^n, determinants, eigenvalues and eigenvectors, diagonalization, applications.
PREREQUISITES: Nova Scotia Advanced Mathematics 11 or 12 (or equivalent)
EXCLUSIONS: MATH 2030.03
FORMATS: Lecture

MATH 1060 Introductory Statistics for Science and Health Sciences

CREDIT HOURS: 3
See course description for STAT 1060.03 in the Statistics section of this calendar.

MATH 1215 Life Sciences Calculus

CREDIT HOURS: 3
This course emphasizes the application of calculus to the life sciences. The concepts and content studied include derivatives, techniques of differentiation, logarithmic and exponential functions, optimization, basic ordinary differential equations, integration, and techniques and applications of integration.
CALENDAR NOTES: Students who have already received credit for MATH 1215.03 cannot subsequently receive credit for MATH 1115.03.
PREREQUISITES: Nova Scotia Mathematics 11 and 12 or pre-calculus is highly recommended.
EXCLUSIONS: MATH 1000.03, MATH 1280.03, MATH 1500.06
FORMATS: Lecture | Tutorial

MATH 1280 Engineering Mathematics I

CREDIT HOURS: 3
See course description for MATH 1000.03. in the Mathematics section of this calendar.
CALENDAR NOTES: MATH 1000.03. is equivalent to MATH 1280.03.
PREREQUISITES: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus. Pre-calculus is highly recommended.
EXCLUSIONS: MATH 1215.03.
FORMATS: Lecture | Tutorial

MATH 1290 Engineering Mathematics II

CREDIT HOURS: 3
See course description for MATH 1010.03. in the Mathematics section of this calendar.
CALENDAR NOTES: MATH 1010.03. is equivalent to MATH 1290.03.
PREREQUISITES: MATH 1000.03. or MATH 1280.03. or MATH 1215.03.
FORMATS: Lecture | Tutorial

MATH 1315 Discrete Mathematics for Computer Science

CREDIT HOURS: 3
This course is an introduction to formal reasoning and discrete mathematics with applications to computer science. Students will be introduced to formal notation and reasoning about problems and algorithms. Topics include: sets, sequences, and summations, simple proof techniques, elementary number theory, back-of-the-envelope approximations, combinatorial objects. Applications and relevance of these concepts in computer science will be emphasized.
EXCLUSIONS: CSCI 1315.03, MATH 2112.03

FORMATS: Lecture

MATH 2001 Intermediate Calculus I

CREDIT HOURS: 3
Topics include review of parametric equations, polar coordinates, conic sections, coordinate systems and vectors, dot product and cross product, vector functions, derivatives and integrals of vector functions, arc length and curvature, functions of several variables and partial derivatives, directional derivatives and double and triple integrals.
PREREQUISITES: MATH 1010.03
FORMATS: Lecture

MATH 2002 Intermediate Calculus II

CREDIT HOURS: 3
Topics include multiple integrals and changes of variables, and vector calculus, with an emphasis on Green's and Stokes' theorems. The course also includes an introduction to second order ordinary differential equations.
PREREQUISITES: MATH 2001.03
FORMATS: Lecture

MATH 2040 Matrix Theory and Linear Algebra II

CREDIT HOURS: 3
This course is a continuation of MATH 1030.03. Topics include: vector spaces and linear transformations, complex numbers, real and complex inner product spaces, orthogonal and orthonormal bases, Gram-Schmidt procedure, orthogonal projections, generalized Fourier series, orthogonal and unitary transformations, diagonalization of symmetric and hermitian matrices, quadratic forms, least squares approximation and curve fitting, applications.
PREREQUISITES: MATH 1030.03 or 2030.03, and MATH 1000.03 or MATH 1215.03
EXCLUSIONS: MATH 2135.03
FORMATS: Lecture

MATH 2051 Problems in Geometry

CREDIT HOURS: 3
This is a basic course for all students interested in geometry. Topics from Euclidean and non-Euclidean geometry may include: transformation geometry, symmetry groups, frieze groups, wallpaper groups and the crystallographic restrictions, similarities; projective geometry and the classical theorems of Menelaus, Ceva, Desargues, Pappus, Pascal; hyperbolic geometry.
PREREQUISITES: MATH 1010.03
FORMATS: Lecture

MATH 2052 Introduction to Numerical Programming

CREDIT HOURS: 3
See PHYC 2050
PREREQUISITES: PHYC 1190.03/1290.03 or equivalent , or MATH 1010.03 or equivalent
CROSSLISTED: PHYC 2050.03
EXCLUSIONS: MATH 2400.03
FORMATS: Lecture

MATH 2060 Introduction to Probability and Statistics

CREDIT HOURS: 3
See course description for STAT 2060.03 in the Statistics section of this calendar.
PREREQUISITES: Math 1000 or Math 1215 or Math 1500 or 1500X/Y

MATH 2080 Statistical Methods For Data Analysis and Inference

CREDIT HOURS: 3
See course description for STAT 2080.03 in the Statistics section of this calendar.

MATH 2110 Logic and Set Theory
CREDIT HOURS: 3
This course is an introduction to the foundations of modern mathematics, including basic set theory, proof techniques, and programming. Topics include: set-theoretic encoding of mathematical entities: tuples, relations, numbers, sequences, families; set comprehension; cardinality; sets and classes; proof techniques; existential and universal quantifiers; induction; proof by contradiction; programming as a tool for problem solving.
EXCLUSIONS: MATH 2112.03
FORMATS: Lecture

MATH 2113 Discrete Structures
CREDIT HOURS: 3
This course continues CSCI 2112.03/MATH 2112.03. This course covers some basic concepts in discrete mathematics which are of particular relevance to students of computer science, engineering, and mathematics. The topics to be covered will include solution of recurrence relations, generating functions, number theory, Chinese remainder theorem, trees and graphs, finite state machines, abstract algorithms, Boolean algebra.
PREREQUISITES: MATH 1315.03 or MATH 2110.03 or MATH 2112.03
CROSSLISTED: CSCI 2113.03
FORMATS: Lecture

MATH 2120 Methods for Ordinary Differential Equations
CREDIT HOURS: 3
A comprehensive introduction to the theory of ordinary differential equations (ODEs), which is a broad field in pure and applied mathematics with numerous applications in other sciences. The topics include: special types of ODEs of 1st order, homogeneous and inhomogeneous linear ODEs with constant coefficients, Laplace transforms, systems of ODEs.
COREQUISITES: MATH 1030.03 or 2030.03
PREREQUISITES: MATH 1010.03 or permission of the instructor
FORMATS: Lecture

MATH 2135 Linear Algebra
CREDIT HOURS: 3
This course is a continuation of MATH 1030.03 or 2030.03 with an emphasis on foundations and the theory of vector spaces and linear transformations. Additional topics include inner product spaces, symmetric and orthogonal transformations, bilinear forms, similarity and diagonalization, the solution of linear differential equations, and various applications in mathematics, physics and computer science.
PREREQUISITES: MATH 1030.03 (or MATH 2030.03) and MATH 1000.03
EXCLUSIONS: MATH 2040.03
FORMATS: Lecture

MATH 2300 Mathematical Modelling
CREDIT HOURS: 3
By using fundamental calculus concepts in a modelling framework, the student investigates practical problems chosen from common experiences encompassing many academic disciplines, including the mathematical sciences, operations research, engineering and the management and life sciences. A significant part of the course is learning to use MAPLE as a mathematical tool.
COREQUISITES: MATH 1030.03 or 2030.03
PREREQUISITES: MATH 1000.03
CROSSLISTED: STAT 2300.03
FORMATS: Lecture

MATH 2505 Introductory Analysis
CREDIT HOURS: 3
This course is for honours students and other serious students of mathematics. Topics include: the axioms for the real number system, geometry and topology of Euclidean space, limits, continuity, differentiability, the inverse and implicit function theorems.
PREREQUISITES: MATH 2001.03
FORMATS: Lecture

MATH 2600 Theory of Interest and Life Contingencies
CREDIT HOURS: 3
Simple and compound interest are covered in detail. Topics include: nominal and effective rates of interest/discount, force of interest, annuities, perpetuities, and bonds.

PREREQUISITES: MATH 1010.03, MATH 1115.03 or MATH 1215.03
CROSSLISTED: STAT 2600.03
FORMATS: Lecture

MATH 3031 Abstract Algebra I

CREDIT HOURS: 3
Groups, subgroups, permutation groups, cosets, direct products, fundamental theorem of finitely generated abelian groups, simple groups, group homomorphisms, factor groups, isomorphism theorems of groups, series of groups, Sylow theorems and applications. Additional topics may include free groups, group actions, and groups in Topology.
PREREQUISITES: MATH 2040.03 or MATH 2135.03
EXCLUSIONS: MATH 3030X/Y.06
FORMATS: Lecture

MATH 3032 Abstract Algebra II

CREDIT HOURS: 3
Rings, fields, integral domains, Fermat's theorem, Euler's theorem, ideals, quotient rings, prime and maximal ideals, factorization of polynomials, Gröbner bases, Unique Factorization Domains, Euclidean Domains and Gaussian integers, and applications as time allows.
PREREQUISITES: MATH 3031.03
EXCLUSIONS: MATH 3030X/Y.06
FORMATS: Lecture

MATH 3045 Curves and Surfaces

CREDIT HOURS: 3
The course is designed as an introduction to differential geometry, the study of geometric objects by means of analysis. It presents a comprehensive study of curves and surfaces in Euclidean space. Topics include: Frenet frame and equations, curvature, torsion, first and second fundamental forms, shape operator, Gauss-Weingarten equations.
PREREQUISITES: MATH 2002.03 and (MATH 2040.03 or MATH 2135.03) or consent of instructor
FORMATS: Lecture

MATH 3070 Theory of Numbers

CREDIT HOURS: 3
Topics include: congruences and residues; elementary properties of congruences, linear congruences, theorems of Fermat, Euler and Wilson, Chinese remainder theorem, quadratic residues, law of quadratic reciprocity, Legendre, Jacobi and Kronecker symbols, arithmetic functions, algebraic fields, algebraic numbers and integers, uniqueness of factorization, elementary properties of ideals, and class number.
PREREQUISITES: MATH 2040.03 (or MATH 2135.03)
FORMATS: Lecture

MATH 3080 Introduction to Complex Variables

CREDIT HOURS: 3
An introduction to the basic elements of complex analysis. Topics include: complex numbers, functions, differentiation and integration in the complex plane, some special mappings, series in general, Taylor and Laurent Series, residues, some principles of conformal mapping theory.
PREREQUISITES: MATH 2002.03
FORMATS: Lecture

MATH 3120 Differential Equations

CREDIT HOURS: 3
The topics discussed are of great importance to any student interested in applied mathematics. Areas include Fourier series, orthogonal polynomials, Sturm-Liouville problems, the classical partial differential equations, and some applications to physics, chemistry and engineering.
PREREQUISITES: MATH 2120.03 or MATH 2135.03 or PHYC 2140.03
FORMATS: Lecture

MATH 3140 Introduction to Wavelets

CREDIT HOURS: 3
Wavelet analysis provides an extremely powerful and highly flexible tool for the compression, denoising, and recognition of both audio and image signals.

This course will develop many of the essential mathematical ideas behind Fourier analysis and wavelets. Many applications will also be discussed and examined.
PREREQUISITES: MATH 2002.03, and MATH 1030.03 (or MATH 2030.03)
FORMATS: Lecture

MATH 3210 Introduction to Numerical Analysis

CREDIT HOURS: 3
This course covers the practice as well as theory of basic numerical techniques. Topics may include: root finding, interpolation, integration, initial value problems, linear and nonlinear fitting, boundary value problems. We will emphasize error analysis and stability of methods, as well as practical implementation on a computer.
PREREQUISITES: MATH 2001.03 or (MATH 2120.03 and one of MATH 1030.03 or MATH 2030.03)

MATH 3300 Optimization

CREDIT HOURS: 3
An introduction to the concepts and applications of linear programming. Topics include the simplex method for linear programming, duality and sensitivity analysis. Some of these topics are illustrated by means of interactive computer packages.
PREREQUISITES: MATH 1030.03 or 2030.03
FORMATS: Lecture

MATH 3330 Applied Graph Theory

CREDIT HOURS: 3
An introduction to graph theory and the analysis of networked data. The course covers logical reasoning about graph concepts including: paths and cycles, shortest route problem, connectivity, minimum spanning trees, network flow, matchings, graph colouring. The course also teaches computational analysis of networks and concepts such as: clustering coefficient, centrality, communities, modularity.
CALENDAR NOTES: This course uses computational tools to analyze graphs, and logical reasoning to deduce properties of graphs. Basic familiarity with mathematical reasoning and with computer programming will be assumed.
PREREQUISITES: MATH 1030.03

MATH 3340 Regression and Analysis of Variance

CREDIT HOURS: 3
See course description for STAT 3340.03 in the Statistics section of this calendar.
COREQUISITES: STAT 2450.03 (if not taken as a prerequisite)
PREREQUISITES: MATH 1030.03 AND STAT 2060.03 or MATH 2060.03 AND STAT 2080.03 or MATH 2080.03 or ECON 3338.03 AND STAT 2450.03.
CROSSLISTED: STAT 3340.03
FORMATS: Lecture

MATH 3350 Design of Experiments

CREDIT HOURS: 3
See course description for STAT 3350.03 in the Statistics section of this calendar.

MATH 3360 Probability

CREDIT HOURS: 3
See course description for STAT 3360.03 in the Statistics section of this calendar.

MATH 3370 Combinatorics: Techniques and Structures

CREDIT HOURS: 3
We introduce counting techniques and combinatorial structures, and show their application and use in all branches of mathematics. Counting techniques include combinations and permutations, the pigeonhole principle, inclusion/exclusion. Other topics include recurrence relations, generating functions and power series. Structures include partial orders, set systems and transversals, and simplicial complexes
PREREQUISITES: MATH 2110.03 or MATH 2113.03
RESTRICTIONS: E1
EXCLUSIONS: MATH 4370.03
FORMATS: Lecture

MATH 3380 Sample Survey Methods
CREDIT HOURS: 3
See course description for STAT 3380.03 in the Statistics section of this calendar.

MATH 3460 Intermediate Statistical Theory
CREDIT HOURS: 3
See course description for STAT 3460.03 in the Statistics section of this calendar.

MATH 3501 Intermediate Analysis I
CREDIT HOURS: 3
MATH 3501.03 continues the analysis sequence begun in MATH 2505.03. Topics include: Metric spaces, point-set topological notions, sequences, completeness, separability, compactness (Heine-Borel, Bolzano-Weierstrass, Finite Intersection, complete and totally bounded), limits and continuity, continuity in topological terms, connectedness, path and local-path connectedness, homeomorphisms, uniform continuity, Lipschitz continuity, contractions, contraction principle, sequences of functions, uniform convergence. Further topics may include: Arzela-Ascoli theorem, Stone-Weierstrass theorem.
PREREQUISITES: (MATH 2040 or MATH 2135.03) and MATH 2505.03
EXCLUSIONS: MATH 3500X/Y.06
FORMATS: Lecture

MATH 3502 Intermediate Analysis II
CREDIT HOURS: 3
Topics include: The full derivative for functions between Euclidean spaces, directional derivatives, Jacobian matrix, differentiability, C&sup1 functions, multilinear maps, higher derivatives, Taylor's theorem, extrema, inverse and implicit function theorems, extrema subject to constraints, Lagrange multipliers. Further topics may include: normed vector spaces and basic functional analysis, basic theory of manifolds in R&supn Fourier series.
PREREQUISITES: MATH 3501.03
EXCLUSIONS: MATH 3500X/Y.06

MATH 3700 Mathematics for Economists
CREDIT HOURS: 3
See course description for ECON 3700 in the Economics section of this calendar.

MATH 3790 Mathematical Problem Solving: Techniques & Methods
CREDIT HOURS: 3
This class will provide an introduction to techniques for solving mathematical problems of the sort encountered in competitions (such as the Mathematical Olympiad or the William Putnam competition). There will be self-contained modules developing techniques from several branches of mathematics including number theory, combinatorics, geometry and analysis. The majority of the class time, however, will be devoted to examining examples. Students will be expected to prepare and present in class solutions to assigned problems.
CALENDAR NOTES: Students are required to teach two sessions on problem solving techniques to junior high or high school students, either through the Dalhousie Math Club or the NS Math Circles program, and observe each other’s sessions, for a total of four sessions.
COREQUISITES: MATH 1030.03 or 2030.03
PREREQUISITES: MATH 1000.03, MATH 1010.03 or equivalent, and consent of instructor.

MATH 3800 Financial Economics
CREDIT HOURS: 3
See course description for ECON 3800.03 in the Economics section of this calendar.

MATH 3900 Financial Mathematics
CREDIT HOURS: 3
This course is an introduction to derivative pricing. Topics include: binomial tree model, stochastic calculus, Itô calculus, Black-Scholes model, market price of risk, log-normal models.
PREREQUISITES: MATH 2060.03 and (MATH 2120.03 or MATH 2135.03), or permission of the instructor

CROSSLISTED: ECON 3900.03

MATH 4001 AARMS Summer School I

CREDIT HOURS: 3
A Topics class given by leading researchers in the precise field, which varies from year to year. Consult the Department for current details.
PREREQUISITES: Permission of the Honours Advisor
CROSSLISTED: STAT 4001.03
FORMATS: Lecture

MATH 4002 AARMS Summer School II

CREDIT HOURS: 3
A Topics class given by leading researchers in the precise field, which varies from year to year. Consult the Department for current details.
PREREQUISITES: Permission of the Honours Advisor
CROSSLISTED: STAT 4002.03
FORMATS: Lecture

MATH 4010 Introduction to Measure Theory and Integration

CREDIT HOURS: 3
Lebesgue's theory of measure and integration. The topics include: sigma-algebras, measures, construction of measures,Lebesgue measure on the real line, measurable functions, the Lebesgue integral and convergence theorems, Lp spaces, product measures and the Fubini-Tonelli theorem.
PREREQUISITES: MATH 3501.03
EXCLUSIONS: MATH 5010.03
FORMATS: Lecture

MATH 4020 Analytic Function Theory

CREDIT HOURS: 3
Topics include: review of analytic complex functions including topological properties of the plane, Mobius mappings, exponential, logarithmic, trigonometric and related functions, integration and the Cauchy theorem. Cauchy's integral formula, residues, harmonic functions, analytic continuation, entire and meromorphic functions, some results of conformal mapping, including the Riemann mapping theorem.
PREREQUISITES: MATH 2002.03 (MATH 3080.03 recommended)
CROSSLISTED: MATH 5020.03

MATH 4025 Commutative Algebra I

CREDIT HOURS: 3
This introduction to commutative algebra includes a selection of the following topics: prime and maximal ideals, primary decomposition, Noetherian rings, Hilbert's Basis Theorem and the Nullstellensatz.
PREREQUISITES: MATH 3032.03
CROSSLISTED: MATH 5025.03
FORMATS: Lecture

MATH 4035 Topics in Commutative Algebra

CREDIT HOURS: 3
This course covers special topics in commutative algebra.
PREREQUISITES: MATH 4045.03 or permission of the instructor
CROSSLISTED: MATH 5035.03
FORMATS: Lecture

MATH 4045 Advanced Algebra I

CREDIT HOURS: 3
Introduction to module theory: modules, submodules, quotient modules, module homomorphisms, generators for modules, direct sums, free modules, tensor products, exact sequences, projective modules, injective modules, and flat modules. Modules over principal ideal domains. Additional topics may include homological algebra, Ext and Tor functors, symmetric and exterior algebras.
PREREQUISITES: MATH 3032.03
EXCLUSIONS: MATH 5045.03

FORMATS: Lecture

MATH 4055 Advanced Algebra II
CREDIT HOURS: 3
Field theory, field extensions, Galois theory and applications.
PREREQUISITES: MATH 3032.03
CROSSLISTED: MATH 5055.03
FORMATS: Lecture

MATH 4057 Lie Theory
CREDIT HOURS: 3
Introduction to Lie algebras and Lie groups: linear groups; universal enveloping algebras; Lie's three theorems; classification of semisimple Lie algebras. Additional topics may include: Lie algebra cohomology; representation theory of semisimple Lie groups; Tannaka-Krein duality; Clifford algebras; Bruhat and Shubert decompositions.
PREREQUISITES: MATH 3031.03 and MATH 4045.03
EXCLUSIONS: MATH 5057
FORMATS: Lecture

MATH 4065 Algebraic Geometry
CREDIT HOURS: 3
This is a first course in algebraic geometry and will introduce students to the basic properties of affine and projective varieties. Topics covered will include a selection from: local properties of plane curves, elliptic curves, Bezout's Theorem, Riemann-Roch Theorem.
PREREQUISITES: MATH 3032.03
CROSSLISTED: MATH 5065.03
FORMATS: Lecture

MATH 4066 Advanced Statistical Theory I
CREDIT HOURS: 3
See course description for STAT 4066.03 in the Statistics section of this calendar.

MATH 4070 Algebraic Number Theory
CREDIT HOURS: 3
An introduction to algebraic number theory, with special emphasis on quadratic and cyclotomic fields. A more general study of rings of integers of algebraic number fields focuses on divisibility properties. Other topics include Dedekind domains, ideals and their factorization into prime ideals, and class groups and class numbers.
PREREQUISITES: MATH 3032.03 (MATH 3070.03 recommended)
CROSSLISTED: MATH 5070.03
FORMATS: Lecture

MATH 4116 Cryptography
CREDIT HOURS: 3
This course is an introduction to modern cryptographic techniques and its mathematical foundations. The material covered includes: elementary number theory and algebra, classical cryptosystems, probability, the Data Encryption Standard, prime number generation and primality tests, public key cryptosystems, and further applications, such as digital signatures and identification.
PREREQUISITES: MATH 1000.03, MATH 1010.03, MATH 1030.03 (or MATH 2030.03), and at least six additional credit hours in Mathematics beyond the first year, or permission of the instructor.
CROSSLISTED: CSCI 4116.03

MATH 4130 Design and Analysis of Algorithms II
CREDIT HOURS: 3
See course description for CSCI 4113.03 in the Computer Science section of this calendar.

MATH 4135 Introduction to Category Theory
CREDIT HOURS: 3
Categories, functors, natural transformations and adjointness are introduced with emphasis on examples drawn from undergraduate Mathematics and theoretical Computer Science. The calculus of diagram chasing, limits, colimits and Kan extensions is explored in detail.
PREREQUISITES: MATH 3031.03 and MATH 3501.03 or permission of the instructor.
CROSSLISTED: MATH 5135.03
FORMATS: Lecture

MATH 4136 Topics in Category Theory
CREDIT HOURS: 3
Topics of current interest in category theory will be discussed with an emphasis on open problems. No previous knowledge of category theory is required. The necessary concepts will be discussed in the context of their applications. However, a certain familiarity with the basic concepts of modern mathematics such as found in courses on algebra and topology would be an asset.
PREREQUISITES: MATH 3031.03 and consent of instructor
CROSSLISTED: MATH 5136.03

MATH 4140 Introduction to Functional Analysis
CREDIT HOURS: 3
An introduction to the basic principles of functional analysis including the following topics: infinite dimensional vector spaces, normed spaces, inner-product spaces, Banach and Hilbert spaces, linear and continuous linear functionals, the Hahn-Banach Theorem, the principle of uniform boundedness, dual spaces, weak* topology, and the Alaoglu theorem, the open mapping and closed graph theorems, and consequences and applications.
PREREQUISITES: MATH 3502.03
CROSSLISTED: MATH 5140.03
FORMATS: Lecture

MATH 4160 Operator Theory
CREDIT HOURS: 3
This course explores the algebraic and functional analytic properties of operator algebras, focusing on C*-algebras and von Neumann algebras. Topics include: bounded operators on a Hilbert space; the spectrum of an operator; unitary and self adjoint operators; polar decomposition; Gelfand's representation theorem for commutative C*-algebras; classification of Von Neumann algebras; factors. Additional topics may include: the Gelfand-Naimark-Segal construction; the Gelfand-Naimark theorem; bimodules; Connes fusion.
RESTRICTIONS: Instructor Permission Required
EXCLUSIONS: MATH 5160.03
FORMATS: Lecture

MATH 4165 Mathematical Methods in Physics
CREDIT HOURS: 3
Topics discussed include: complex variable theory, Fourier and Laplace transform techniques, special functions, partial differential equations.
PREREQUISITES: MATH 3120.03 or MATH 3260.03 or permission of instructor.
CROSSLISTED: PHYC 4160.03
EXCLUSIONS: PHYC 5160.03, MATH 5165.03
FORMATS: Lecture

MATH 4170 General Topology
CREDIT HOURS: 3
An introduction to topological spaces that includes the following topics: classification in terms of cardinality of bases, separation, etc., product spaces, Tychonoff theorem, compactness, compactifications, Tychonoff spaces, metrization.
PREREQUISITES: MATH 3502.03
CROSSLISTED: MATH 5170.03
FORMATS: Lecture

MATH 4175 Topics in Mathematical Physics
CREDIT HOURS: 3
This course is a continuation of MATH 4165.03 and deals with special topics in mathematical physics selected from areas such as the Green's function technique for solving ordinary and partial differential equations, scattering theory and phase shift analysis, diffraction theory, group theory, tensor analysis and general relativity.

PREREQUISITES: MATH 4165.03
CROSSLISTED: PHYC 4170.03, PHYC 5170.03

MATH 4180 Introduction to Algebraic Topology

CREDIT HOURS: 3
An introduction to algebraic topology including the following topics: the definitions, properties and methods of computation of the fundamental group of a topological space; simplicial, singular and cellular homology groups; basic properties and methods of computation of homology groups; a selection of application such as the classification of surfaces and fixed point theorems.
PREREQUISITES: MATH 2505.03, MATH 4170.03
CROSSLISTED: MATH 5180.03
FORMATS: Lecture

MATH 4200 Ordinary Differential Equations - Qualitative Theory

CREDIT HOURS: 3
Qualitative theory is concerned with determining the behaviour of solutions of differential equations without finding explicit solutions. Topics are selected from Liapunov stability theory, stable and unstable manifolds of singular points and periodic solutions, classification of plane singular points, structural stability and Hamiltonian systems. Other topics at the instructor's discretion.
PREREQUISITES: MATH 4190.03
EXCLUSIONS: MATH 5200.03
FORMATS: Lecture

MATH 4220 Introduction to Partial Differential Equations

CREDIT HOURS: 3
This course is a basic introduction to the theory of partial differential equations. Topics covered include: modelling physical systems, method of characteristics, Laplace, wave and heat equations, separation of variables, eigenfunction expansions, integral transforms, maximum principles and Ritz Raleigh theory.
PREREQUISITES: MATH 3120.03 or MATH 3260.03 or permission of instructor
CROSSLISTED: MATH 5220.03
FORMATS: Lecture

MATH 4230 Partial Differential Equations

CREDIT HOURS: 3
This course will provide students with an introduction to advanced topics in partial differential equations in a variety of settings. Topics may include: reaction diffusion systems, pattern formation, numerical methods, applications to physical sciences, variational methods, Sobolev Theory.
PREREQUISITES: MATH 3120.03 or MATH 3260.03 or permission of the instructor
CROSSLISTED: MATH 5230.03
FORMATS: Lecture

MATH 4250 Asymptotic Analysis

CREDIT HOURS: 3
Most mathematical models of physical systems cannot be solved exactly. Often such systems have a naturally occurring small parameter which may be exploited using asymptotic analysis techniques. In this course, we will study a variety of physical systems which illustrate many of the common approaches used in asymptotic analysis. Focus will be on applications to ordinary and partial differential equations.
PREREQUISITES: (MATH 1030.03 or MATH 2030.03) and (MATH 3120.03 or MATH 3260.03), or permission of the instructor
CROSSLISTED: MATH 5250.03
FORMATS: Lecture

MATH 4330 Topics in Graph Theory

CREDIT HOURS: 3
This course covers current research topics in graph theory. Items are selected from the following topics: graph colourings, combinatorial optimization, random graphs, network analysis, graph clustering, processes on graphs.
PREREQUISITES: MATH 3330.03 or CSCI 3110.03 or permission of the instructor
CROSSLISTED: CSCI 4115.03
EXCLUSIONS: MATH 5330.03
FORMATS: Lecture

MATH 4331 Topics in Combinatorics
CREDIT HOURS: 3
This course covers current research in combinatorics. Selected topics may include: graph polynomials, simplicial complexes, partial orders, enumeration problems, and algebraic methods in combinatorics.
PREREQUISITES: MATH 2113.03 or MATH 3330.03 or MATH 3370.03
FORMATS: Lecture

MATH 4340 Discrete Random Structures
CREDIT HOURS: 3
This course covers basics of probability and stochastic processes, and then focuses on areas where probability and combinatorics interact. Topics include: probabilistic method, stochastic graph models for complex networks, probabilistic algorithms. Probabilistic techniques include: expectation and concentration of random variables, stochastic processes, conditional expectation, Markov chains, martingales, branching processes.
PREREQUISITES: MATH 2110.03 or MATH 2113.03 or STAT 3360.03
CROSSLISTED: MATH 5340.03
FORMATS: Lecture

MATH 4360 Combinatorial Modelling
CREDIT HOURS: 3
This course introduces a common framework for combinatorial structures (graphs, digraphs, hypergraphs, posets, preorders, lattices, finite topologies, simplicial complexes), with an emphasis on how to model these structures with other fields of mathematics, such as matrix theory and linear algebra, commutative algebra, topology, analysis, probability and logic.
PREREQUISITES: MATH 2060.03 and MATH 3032.03 or permission of the instructor.
CROSSLISTED: MATH 5360.03
FORMATS: Lecture

MATH 4410 Cosmology
CREDIT HOURS: 3
A self-contained introduction to cosmology will be given and no prior knowledge of differential geometry or general relativity will be assumed (although some knowledge of elementary differential equations will be useful). A cosmological model is a model of the universe, as a whole, on the largest scales; the emphasis of the course will be on the modelling aspects of cosmology.
PREREQUISITES: Instructor's permission
CROSSLISTED: MATH 5410.03, PHYC 4660.03/PHYC 5660.03
FORMATS: Lecture

MATH 4500 Introduction to Harmonic Analysis
CREDIT HOURS: 3
This course covers the basic elements of L^p-spaces, convolution, interpolation, maximal functions, Fourier analysis of functions, and the theory of generalized functions, or distributions. Further topics may include L&sup2 -Sobolev spaces, boundary values of harmonic functions, spherical harmonics, singular integral operators, or multipliers.
PREREQUISITES: MATH 4010.03/MATH 5010.03, or MATH 3502.03 with permission of instructor
EXCLUSIONS: MATH 5500.03
FORMATS: Lecture

MATH 4530 Differential Geometry
CREDIT HOURS: 3
This course is a self-contained introduction to manifold theory. Topics include: elements of surface theory, the tangent space, vector fields, differential forms and more general tensors, the Lie derivative, connections, Riemannian geometry, applications in mechanics and general relativity.
PREREQUISITES: MATH 3045.03 or MATH 3502.03 or permission of the instructor
CROSSLISTED: MATH 5530.03
FORMATS: Lecture

MATH 4540 Applied Analysis

CREDIT HOURS: 3
This course is an introduction to the methods of modern applied analysis. This course is suitable for advanced undergraduate and graduate students. The topics include classification of planar dynamical systems, nonlinear dynamics, and equilibria, global nonlinear techniques, closed orbits and limit cycles. Calculus of Variations: first and second variations, symmetries, conservation laws and Noether's theorem, Hamiltonian formalism. Time permitting, other topics in Applied Analysis such as tensor calculus will be covered.
PREREQUISITES: (MATH 3120.03 or MATH 3260.03) and MATH 3501.03, or consent of instructor
EXCLUSIONS: MATH 5540.03
FORMATS: Lecture

MATH 4650 General Relativity

CREDIT HOURS: 3
A review of differential geometry will be given followed by an introduction to the general theory of relativity. Various topics will be discussed, including: linearized theory and gravitational radiation, spherically symmetric metrics and the Schwarzchild solution, gravitational collapse, black holes, and cosmology.
PREREQUISITES: MATH 3045.03 or permission of the instructor
CROSSLISTED: MATH 5650.03, PHYC 4650.03/PHYC 5650.03
FORMATS: Lecture

MATH 4660 Theory of Computation

CREDIT HOURS: 3
See course description for CSCI 4112.03 in the Computer Science section of this calendar.

MATH 4680 Topics in Logic and Computation

CREDIT HOURS: 3
This course covers topics of current interest in logic and/or the foundations of computation. Suitable topics include: formal logic, soundness and completeness, Gödel's incompleteness theorem, formal set theory, the Zermelo-Fraenkel axioms, non-standard models, independence of axioms, lambda calculus and foundations of functional programming languages, proof theory, semantics.
CALENDAR NOTES: Please consult the instructor for the topics offered in a particular year. This course is suitable for advanced undergraduates and graduate students from both mathematics and computer science.
COREQUISITES:
Suggested prerequisites for math students are algebra or analysis at honours undergraduate level. Students from computer science should be familiar with formal language theory and concepts of programming languages. All students should be comfortable with writing mathematical proofs. When in doubt about prerequisites, please consult the instructor.
CROSSLISTED: MATH 5680.03
FORMATS: Lecture

MATH 4681 Topics in Logic

CREDIT HOURS: 3
This course covers topics of current interest in logic. Suitable topics include: formal logic, soundness and completeness, Gödel's incompleteness theorems; model theory, compactness; set theory, non-standard models; categorical logic; proof theory; type theory, proof assistants.
CALENDAR NOTES: Please consult the instructor for the topics offered in a particular year. This course is suitable for advanced undergraduates and graduate students from both mathematics and computer science.
PREREQUISITES: MATH 3032.03, or MATH 3502.03, or MATH 3031.03 and MATH 3501.03, or CSCI 3110.03 and CSCI 3136.03, or permission of the instructor.
CROSSLISTED: MATH 5681.03
FORMATS: Lecture

MATH 4682 Topics in Computation

CREDIT HOURS: 3
This course covers topics of current interest in the mathematical study of computation. Suitable topics include: the lambda calculus and foundations of functional programming languages; the Curry-Howard correspondence; denotational and operational semantics; complexity theory; quantum information and computation.
CALENDAR NOTES: Please consult the instructor for the topics offered in a particular year. This course is suitable for advanced undergraduates and graduate students from both mathematics and computer science.
PREREQUISITES: MATH 3032.03, or MATH 3502.03, or MATH 3031.03 and MATH 3501.03, or CSCI 3110.03 and CSCI 3136.03, or permission of the instructor.
CROSSLISTED: MATH 5682.03
FORMATS: Lecture

MATH 4900 Combinatorial Game Theory
CREDIT HOURS: 3
This course looks at 2-player games of strategy where there are no chance devices and both players have perfect information. The surprising mathematical structure underlying these games will be introduced along with the evaluation scheme and its application to specific hot, all-small and impartial games.
PREREQUISITES: (MATH 2040.03 or MATH 2135.03) and MATH 2002.03
CROSSLISTED: MATH 5900.03

MATH 4950 Honours Research Project
CREDIT HOURS: 3
A requirement for the mathematics honours degree, this course consists of a supervised research project culminating in a written report and an oral presentation in the honours seminar. Enrolment must be approved by the mathematics honours coordinator.
CALENDAR NOTES: Students are required to take twelve additional credit hours at or above the 4000-level in addition to this one.

MATH 8891 Co-op Work-Term I
CREDIT HOURS: 0

PREREQUISITES: SCIE 2700.03

MATH 8892 Co-op Work-Term II
CREDIT HOURS: 0

PREREQUISITES: MATH 8891.00

MATH 8893 Co-op Work-Term III
CREDIT HOURS: 0

PREREQUISITES: MATH 8892.00

MATH 8894 Co-op Work-Term IV
CREDIT HOURS: 0

PREREQUISITES: MATH 8893.00

Introduction

The Medical Sciences program is a 4-year Bachelor of Science aimed at students who wish to initiate studies in medical science as undergraduates. The program will introduce students to subjects such as human anatomy, physiology, neuroscience, epidemiology, and health ethics.

In the first two years of the program, students take core courses in Biology, Chemistry, Mathematics, Statistics, Psychology, Microbiology, Epidemiology, Neuroscience, Biochemistry, and Physiology. These courses will not only provide a solid background in basic sciences, but will prepare students for admission tests for various medical sciences disciplines (such as the MCAT, DAT, OAT, GRE), meet (or exceed) the early prerequisites for acceptance into medically related professional programs (such as Medicine, Dentistry, Pharmacy, Nursing, Physiotherapy, Optometry, Ultrasound Technology, Radiological Therapy etc.) locally and across the country, and meet (or exceed) the early prerequisites required for acceptance into biomedical sciences graduate programs at Dalhousie and across the country. In their third and fourth years, students take core and selective courses in various subjects within the medical sciences. These courses come from Pharmacology, Microbiology & Immunology, Physics, Anatomy, Pathology, Philosophy, and Community Health & Epidemiology departments. In fourth year, students will either pursue an Honours, with an associated research project, or a one-term case-based Capstone course.

Career path advising and the course selection process are critical to the success of the Medical Sciences undergraduate program. In addition to guidance with respect to health-related programs and their entry requirements, academic advising is provided so that students are aware of what courses are required should they want to enter graduate programs in the various biomedical science disciplines. Opportunities are available to concentrate in areas of special interest, explore scientific curiosities further, or fulfil professional school prerequisites. Students will graduate with a broad biomedical science background that will prepare them for a variety of clinical professional programs, graduate school, employment in the biotechnology industry, health administration, and in government.

Degree Programs

The curriculum offers core courses from 14 different departments, providing a broad background in biomedical science and a guided learning experience throughout the program. Students are also required to take a minimum of 21 credit-hours in “Selective” courses (chosen from a predetermined list provided by the program) in relevant medical sciences fields. These selective courses allow students to focus their interests in a particular area (including advanced courses in year 4), explore their interests further, and fulfil professional school prerequisites. Furthermore, for those interested, selectives will aptly prepare students in pursuit of senior research projects, subsequently providing the necessary groundwork to be excellent candidates for graduate programs in a specialized field at Dalhousie or elsewhere in Canada.

NOTE: Most second and third year core courses in the Medical Sciences curriculum have prerequisites with minimum grade requirements in those prerequisite courses. Please consult the appropriate calendar section for these requirements.

The program also offers 21 credit hours in open "Electives", which allows students to take any course offered at Dalhousie (at the appropriate level). Students are encouraged to fulfil the Writing requirement using one or both Electives in the first year and it is recommended that students take the writing course from the English department, since some professional schools require six credit hours in ENGL courses.

Students can choose to do a concentrated Honours in their fourth year, where they have the option of completing the research project at any Dalhousie research site, provided the Medical Sciences Honours Committee approves the project and supervisor. Despite the research site where students complete the project, they will still receive an Honours degree in Medical Sciences. If students do not choose Honours, they will take a case-based Capstone course that integrates multiple medical sciences disciplines by examining 5 medically-related cases, through expert lectures, group discussions, and student presentations.

The Medical Sciences program offers the following degree options:

- BSc (Medical Sciences) Honours - 120 credit hour
- BSc (Medical Sciences) - 120 credit hour

Students also have the option of doing a Minor. Core courses and required selectives may not be double-counted as Minor courses; extra selectives and electives may be used towards the minor. If a minor is added, students may find that they need to take more than 120 credit hours to complete all of their degree requirements.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Medical Sciences undergraduate academic advisor.

Students who are accepted into another program before completing their full degree, or, who need to exit the program early, may be eligible to exit with a 90-credit hour General Bachelor of Sciences in Medical Sciences credential. For more information, speak with the Medical Sciences Advisor or Assistant Dean Student Affairs in Science.

Program requirements can be seen by following the links to the right. In addition, students must satisfy the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections of this calendar.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Staff

Dean
Macdonald, C. L. B., BSc (Hons) (Dalhousie), PhD (Dalhousie), Professor (Chemistry)

Assistant Dean
Wells, S. M., BSc (Western), PhD (Toronto), Associate Professor (Biomedical Engineering), joint appointment in Physics & Atmospheric Sciences

Program Manager
Crepinsek, A., BA (Hons) (St. Francis Xavier), MPH (Toronto)

Medical Sciences Instructor & Honours Coordinator
Naeimeh, J., BSc (Shahid Beheshti), PhD (McMaster)

Medical Sciences Academic Advisor
Strapps, K., BSc (Dalhousie)

Medical Sciences Indigenous Cohort Advisor
Lickers, K., BSc (Dalhousie)

Medical Sciences African Nova Scotian Cohort Advisor
Borden, V.

Medical Sciences Clerk
Haq-Montford, A. U., BA (Hons) (Dalhousie)

BSc (Medical Sciences)
The Bachelor of Science (Medical Sciences) degree is a 120 credit hour program, typically completed in 4 years. It will provide an educational experience that offers a broad, interdisciplinary background in all relevant subjects in biomedical sciences. The degree also meets the general degree requirements for the Faculty of Science. This program may fulfill the Dalhousie Faculty of Graduate Studies requirements for graduate school, but may not satisfy department-specific or other school-specific graduate school entry requirements.

Requirements
In addition to the courses listed below, students must ensure that they satisfy the requirements outlined in the "Degree Requirements" section for the College of Arts and Science. For the required Writing class, students can choose from the list of approved writing classes in the Academic Calendar. Before selecting a writing course, students are encouraged to consult the advising sheet available on the Medical Sciences program website, as some professional schools require an ENGL course as a prerequisite for entry.

- BIOC 2300.03: Introduction to Biochemistry
- PHYL 2044.03: Human Systems Physiology
- MICI 2100.03: Introductory Microbiology and Immunology (in-class or distance)
- PHYL 2041.03: Human Neurophysiology
- PHIL 2805.03: Ethics and Health Care: Patient Care *or* PHIL 2810.03: Ethics and Health Care: Social Policy
- EPAH 2010.03: Social Determinants of Health

3000 and 4000 Level

- MICI 3115.03: Immunology *or* PHYL 3520.03: Core Concepts in Medical Physiology *or* NESC 3180.03/PSYO 3180.03: Psychoneuroimmunology/Ecological Immunology *or* BIOC 3501.03: Introduction to Biotechnology
- PHAC 3030.03: Pharmacology - The Drugs Around Us
- ANAT 3010.03: Introductory Human Anatomy
- PATH 3000.03: Introduction to Pathology
- EPAH 4010.03: Epidemiology Principles
- SCIE 4005.03: Medical Sciences Capstone

24 credit hours of Selectives, including at least 3 credit hours of Advanced Selectives

List of Selectives and Advanced Selectives

*See Writing Course Requirements. Before selecting a writing course, students are encourged to consult the Medical Sciences program website, as some professional schools require an ENGL course as a prerequisite for entry.

BSc (Medical Sciences) Honours

Students who want a challenging program resulting in a broad background in medical sciences, including independent research experience, may want to enrol in the Honours program. An Honours degree in the Medical Sciences program aims to prepare students for future thesis-based graduate studies in a number of medically related fields. In addition to specific core course requirements with a minimum GPA of 3.0, students must identify a faculty member who has agreed to be their research supervisor. Students will have the flexibility to do their Honours research at a Dalhousie Research site of their choice (Faculty of Science, Faculty of Medicine, Faculty of Arts & Social Sciences, or other), subject to the approval of the Honours class coordinator. All students conduct an independent research project in their final year under the supervision of a faculty member. Students must attend weekly classes, submit a satisfactory Interim Report and thesis, and deliver a satisfactory symposium presentation of the thesis research in a Medical Sciences student research forum.

Students should consult with an advisor and choose their electives and selectives carefully in their second, third and fourth years to ensure that they are prepared for Honours and potentially graduate studies in their field of interest. Students with an Honours degree will also be well prepared for entry into professional schools.

Requirements

1000 Level

- BIOL 1010.03: Principles of Biology Part I *or* BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution *with* BIOL 1011.03: Principles of Biology Part II *or* BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology *or* SCIE 1506.09 + SCIE 1507.09: Integrated Science
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity *and* CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Sciences Calculus *or* MATH 1000.03: Differential and Integral Calculus I
- STAT 1060.03: Introductory Statistics for Science and Health Sciences *or* SCIE 1506.09 + SCIE 1507.09: Integrated Science
- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person *or* PSYO 1031.03: Introduction to Psychology and Neuroscience I: From Neuron to Person *with* PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology *or* PSYO 1032.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology, *or* SCIE 1506.09 + SCIE 1507.09: Integrated Science
- PHYC 1310.03: Physics In and Around You I
- Writing course (6 credit hours)*

2000 Level

- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy *and* CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- BIOC 2300.03: Introduction to Biochemistry
- PHYL 2044.03: Human Systems Physiology
- PHYL 2041.03: Human Neurophysiology
- MICI 2100.03: Introductory Microbiology and Immunology (in-class or distance)
- PHIL 2805.03: Ethics and Health Care: Patient Care *or* PHIL 2810.03: Ethics and Health Care: Social Policy
- EPAH 2010.03: Social Determinants of Health

3000 and 4000 Level

- MICI 3115.03: Immunology
- PHAC 3030.03: Pharmacology - The Drugs Around Us
- ANAT 3010.03: Introductory Human Anatomy
- PATH 3000.03: Introduction to Pathology
- EPAH 4010.03: Epidemiology Principles
- SCIE 4901.03 + SCIE 4902.03: Medical Sciences Honours Research and Thesis I and II

21 credit hours of Selectives, including at least 6 credit hours at the 3000/4000 level, 3 of which must be Advanced Selectives

Required standing for graduation:
GPA 3.0 in core courses
GPA 3.70 in core and selective courses for first class

List of Selectives and Advanced Selectives

*See Writing Course Requirements. Before selecting a writing course, students are encourged to consult the Medical Sciences program website, as some professional schools require an ENGL course as a prerequisite for entry.

List of Selectives and Advanced Selectives

Medical Sciences Honours students must include in their program at least 21 credit hours in the following courses. Students not in the honours program must include at least 24 credit hours of these courses. In both cases, at least one of the Selectives must be an Advanced Selective.

Note that a Selective is a course from a predetermined list, provided by the program, whereas an Elective is any course at Dalhousie University. In cases where prerequisites for Selectives are not offered as Medical Sciences core courses, Elective space can be used to fulfill these prerequisites. If a course does not appear on the academic timetable, it is not offered that year.

Selectives:

Biochemistry and Molecular Biology

- BIOC 2610.03: Introductory Biochemistry Lab
- BIOC 3300.03: Intermediary Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry & Molecular Biology
- BIOC 3501.03: Introduction to Biotechnology
- BIOC 3610.03: Research Methods in Biomedical Sciences (replaced by 3501 in 2024/25)
- BIOC 3700.03: Biomolecular Chemistry

Biology

- BIOL 2003.03: Animal Diversity
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology
- BIOL 3046.03: Molecular Evolution
- BIOL 3050.03: Developmental Biology
- BIOL 3322.03: Parasitology
- BIOL 3326.03: Vertebrate Functional Morphology
- BIOL 3328.03: Medical Entomology (only offered in Summer)
- BIOL 3421.03/ANAT 3421.03: Comparative Vertebrate Histology
- BIOL 3430.03/ANAT 2160.03: Introduction to Human Histology

Biomedical Engineering

- BMNG 3000.03: Technology in Medicine

Chemistry

- CHEM 2301.03: Introduction to Physical Chemistry I
- CHEM 2304.03: Introduction to Physical Chemistry II
- CHEM 3601.03: Chemistry of Living Systems

Disability Management

- DISM 3010.03: Introduction to Disability and Disability Management

Economics

- ECON 2231.03: Perspectives in Health Economics
- ECON 3231.03: Topics in Health Economics

Environmental Science

- ENVS 3400.03: Environment and Human Health

Health

- HLTH 2000.03: Centring Black Canadian Health

- HLTH 2201.03: Introduction to Aboriginal Peoples' Health & Healing

Humanities and Social Sciences

- CLAS 2888.03: Greek and Latin Terminology for the Medical Sciences
- ENGL 2030.03: Literature, Health, and Healing
- ENGL 3320.03: Literature and the History of Medicine
- HIST 3916.03: Health and Disease in Medieval Society
- HSTC 2102.03: Origins of Modern Medicine
- HSTC 2202.03: The Beginnings of Western Medicine: The Birth of the Body
- HSTC 2206.03/CTMP 2203.03: Biopolitics: Human Nature In Contemporary Thought
- HSTC 2211.03: Introduction to History of Science I: From the Ancients to the Birth of the Modern
- HSTC 2212.03: Introduction to History of Science II: From the Birth of Modern to the Present
- HSTC 2350.03: The Body in Early Modern Europe
- HSTC 3101.03/CTMP 3204.03: Human Experiments
- HSTC 3102.03: Plagues and People
- HSTC 3103.03: Medicine in the 20th and 21st Centuries
- HSTC 3121.03: In Search of the Philosopher's Stone: The History of European Alchemy
- INTD 3115.03: Global Health in the 21st Century
- PHIL 2805.03: Ethics and Health Care: Patient Care (can only take one of 2805 or 2810 as selective, other as core)
- PHIL 2810.03: Ethics and Health Care: Social Policy (can only take one of 2805 or 2810 as selective, other as core)
- PHIL 3800.03: Philosophy of Medicine
- SOSA 2502.03: Biomedicine and the Illness Experience
- SOSA 3135.03: The Social Organization of Health Care
- SOSA 3143.03: Health, Illness, and the World System
- SOSA 3145.03/GWST 3800.03: Gender and Health
- SOSA 3147.03: Aging Cross Culturally
- SOSA 3148.03: The Sociology of Addiction/Drugs, Health, and Society
- SOSA 3403.03: Qualitative and Field Methods

Kinesiology

- KINE 2465.03: Introductory Biomechanics (exclusion with PHYC 2610.03)
- KINE 3485.03: Psychology of Sport & Physical Activity

Mathematics

- MATH 1010.03: Differential and Integral Calculus II

Medical Neuroscience

- ANAT 2160.03/BIOL 3430.03: Introduction to Human Histology
- ANAT 3421.03/BIOL 3421.03: Comparative Vertebrate Histology

Microbiology and Immunology

- MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- MICI 3114.03: Virology
- MICI 3119.03: Physiology of Prokaryotic Cell
- MICI 4115.03: Medical Immunology
- MICI 4218.03: Clinical Microbiology

Neuroscience

- NESC 2130.03/PSYO 2130.03: Introduction to Cognitive Psychology
- NESC 2570.03/PSYO 2570.03/PHYL 2570.03: Cellular Neuroscience
- NESC 3043.03/PSYO 3043.03: Neurobiology of Learning

- NESC 3170.03/PSYO 3170.03: Hormones and Behaviour
- NESC 3227.03/PSYO 3227.03: Principles of Human Neuropsychology
- NESC 3271.03/PSYO 3271.03: Developmental Origins of Health & Disease
- NESC 3670.03: Genes, Brain and Behaviour

Pharmacology

- PHAC 3333.03: Pharmacology of Medicinal Herbs and Fungi

Physics

- PHYC 1290.03: Introduction to Physics (exclusion with PHYC 1320.03)
- PHYC 1320.03: Physics In and Around You II (exclusion with PHYC 1290.03)
- PHYC 2250.03: Physics of Biological and Medical Technology
- PHYC 2610.03: Introduction to Biomechanics (exclusion with KINE 2465.03)

Physiology and Biophysics

- PHYL 2570.03/NESC 2570.03/PSYO 2570.03: Cellular Neurophysiology
- PHYL 3120.03: Exercise Physiology in Health & Disease
- PHYL 3320.03: Human Cell Physiology
- PHYL 3420.03: Sensory Physiology
- PHYL 3520.03: Core Concepts in Medical Physiology (exclusion with PHYL 4504.03)
- PHYL 3600.03: Directed Project in Physiology
- PHYL 3601.03: Directed Project in Physiology
- PHYL 3620.03: Human Physiology Lab

Psychology

- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03/NESC 2130.03: Introduction to Cognitive Psychology
- PSYO 2220.03: Adult Psychopathology
- PSYO 2444.03: Forensic Psychology
- PSYO 2570.03/NESC 2570.03/PHYL 2570.03: Cellular Neuroscience
- PSYO 2770.03: Brain & Behaviour
- PSYO 3043.03/NESC 3043.03: Neurobiology of Learning
- PSYO 3129.03: Childhood Psychopathology
- PSYO 3170.03/NESC 3170.03: Hormones and Behaviour
- PSYO 3227.03/NESC 3227.03: Principles of Human Neuropsychology
- PSYO 3271.03/NESC 3271.03: Developmental Origins of Health & Disease

Science

- SCIE 2111.00 (0 credit) & SCIE 2112.03: Becoming a Scientist I & II
- SCIE 3100.03: Experiential Learning in Medical Sciences
- SCIE 3211.03: Communicating Science to Non-Scientists

Advanced Selectives:

Biochemistry and Molecular Biology

- BIOC 4010.03: Bioinformatics
- BIOC 4302.03: Biochemistry of Lipids
- BIOC 4305.03: Mechanisms of Signal Transduction
- BIOC 4403.03: Genes and Genomes
- BIOC 4404.03: Gene Expression

- BIOC 4501.03: Medical Biotechnology I
- BIOC 4700.03: Proteins
- BIOC 4701.03: Enzymes
- BIOC 4813.03: Biochemistry of Clinical Disorders

Biology

- BIOL 4020.03: Advanced Cell Biology

Computer Science

- CSCI 4180.03: Introduction to Computational Biology and Bioinformatics
- CSCI 4181.03: Algorithms in Bioinformatics

Humanities and Social Sciences

- PHIL 4801.03: Topics in Ethics and Healthcare (offered every 3-4 years)
- POLI 4260.03: The Politics of Health Care

Medical Neuroscience

- ANAT 4010.03: Advanced Human Anatomy

Microbiology and Immunology

- MICI 4027.03: Molecular Mechanisms of Cancer
- MICI 4033.03: Advanced Microbial Genetics
- MICI 4100.03: Processes & Mediators of Inflammation
- MICI 4114.03: Advanced Topics in Molecular & Medical Virology
- MICI 4116.03: Current Topics in Mucosal Immunology
- MICI 4302.03: Clinical and Molecular Immunology

Neuroscience

- NESC 3180.03/PSYO 3180.03: Psychoneuroimmunology/Ecological Immunology
- NESC 3970.03/PSYO 3970.03: Molecular Neuroscience
- NESC 4185.03/PHYL 4000.03: Current Advances in Synaptic Function or Plasticity

Pathology

- PATH 4035.03: Human Genetics
- PATH 4100.03: Critical Thinking in Neuropathology

Pharmacology

- PHAC 4001.03: Pharmacology II (not offered anymore)
- PHAC 4403.03: Systems Pharmacology I
- PHAC 4409.03: Systems Pharmacology II

Physiology and Biophysics

- PHYL 4000.03/NESC 4185.03: Current Advances in Synaptic Function and Plasticity
- PHYL 4324.03: Endocrine Physiology
- PHYL 4504.03: Respiratory Physiology (exclusion with PHYL 3520.03)
- PHYL 4680.03: Cardiovascular Physiology

Psychology

- PSYO 3180.03/NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- PSYO 3970.03/NESC 3970.03: Molecular Neuroscience

Science

- SCIE 4101.03 & SCIE 4102.03: Directed Project in Medical Sciences I & II
- SCIE 4444.03: Leadership in Science (practicum must be health-related)

Microbiology and Immunology

Microbiology and Immunology

Introduction

Microbiologists study small cells (microorganisms) and viruses. Among other things, immunologists want to know how larger organisms (such as humans) respond to foreign objects, many of which are very small. These two disciplines are thus inextricably linked, and when taken together comprise a major strength of the Dept. Another focus of the department is cancer biology, a natural fit with other interests, as cancers can be thought of as foreign objects, and many are caused by bacteria and viruses.

Degree programs in Microbiology and Immunology at Dalhousie focus on education and training in bacteriology, virology and immunology, with an understanding that biochemistry, genetics, and cell and molecular biology are also essential elements of a comprehensive academic program. A degree in Microbiology and Immunology provides a firm foundation for future employment in a variety of laboratory environments, for the pursuit of an advanced post- graduate degree, and/or for entry into the health professions (e.g. medicine).

Degree Programs

The Department offers the following degree programs in Microbiology and Immunology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- BSc (90 credit hour) Minor in Microbiology and Immunology

* BSc Co-op option available
* May be combined with Minors from other disciplines.

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully. It is recommended that students considering an Honours or Major program consult with a Microbiology and Immunology Academic Advisor prior to registering for second year classes.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Microbiology and Immunology program:

- SCIE 1515.36

- SCIE 1520.30
- SCIE 1540.27
- SCIE 1505.18
- SCIE 1506.09 and SCIE 1507.09

Staff

Head of Department
Johnston, B., PhD (Calgary) (Inflammation and Immune Response)

Professors
Duncan, R., PhD (Guelph) (Molecular Virology)

Kelvin, **D**., PhD (Toronto) (Immunology)

Kollmann, T. R., Phd (Albert of Einstein College of Medicine) (Immunity, Vaccinology, Adverse Pregnancy Outcomes)

Makrigiannis, A. P., PhD (Dalhousie) (Natural Killer Cells in Infection and Cancer)

Marshall, J. S., PhD (Manchester) (Mast Cells in Inflammation and Cancer)

McCormick, C., PhD (UBC) (Viral Oncology)

Richardson, C. D., PhD (UBC) (Molecular Virology)

Stadnyk, A. W., PhD (McMaster) (Intestinal Inflammation, Cytokines)

Wang, J., PhD (McMaster) (Host Defense Mechanisms Against Infection and Cancer, Vaccine Development)

Associate Professors
Boudreau, J., PhD (McMaster) (Natural Killer Cell Immunogenetics)

Cheng, Z., PhD (Waterloo) (Host-bacterial Interactions, Cancer Biology)

Rohde, J., PhD (British Columbia) (Bacterial Pathogenesis and Ubiquitin)

Thomas, N., PhD (Queen's) (Molecular Bacterial Pathogenesis)

Assistant Professors
DiCara, F., PhD (Naples) (Role of Peroxisome Biogenesis in Innate Immunity)

Khasperskyy, D., PhD (State University of New York, Buffalo) (Host Pathogen Interaction, Influenza A virus, Cellular Stress Responses)

Sokke Umeshappa, C., PhD (Saskatchewan) (Autoimmunity, Cancer, Immunotherapies)

Senior Instructor
Murray, L. E., PhD (Dalhousie) (Molecular Genetics)

Micihelp@dal.ca

BSc (120 credit hour) Concentrated Honours in Microbiology and Immunology

Students who want a challenging program that results in a broad and in-depth background in Microbiology and Immunology, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Microbiology and Immunology subject courses, with a minimum GPA of 3.0 and write a research-based Honours thesis.

The Honours thesis and Qualifying Examination requirements are satisfied through completion of MICI 4901/4902.06. Certain specified courses from other departments (BIOC, BIOL, CHEM, NESC) count as MICI-subject courses (see below).

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Microbiology and Immunology.

Admission to Honours

Students who wish to enrol in a Microbiology and Immunology Honours program should apply for admission after receiving their 2nd year Fall term grades. To be admitted, students must have:

- Consulted with a departmental academic advisor
- Completed the required 1000 level classes
- A GPA of B+ at the time of application

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc Concentrated Honours program in Microbiology and Immunology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

2000 level

- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology
- MICI 3115.03: Immunology
- MICI 3119.03: Physiology of the Prokaryotic Cell

4000 level

- MICI 4901/4902.06: Honours Research and Thesis*
- One additional 4000-level MICI course
- A minimum of three additional courses from the list below, at least one of which is at the 4000 level
    - MICI 2115.03: Human Organs and Tissues, MICI 3620.03: Experiential Learning in Microbiology and Immunology, MICI 4027.03: Molecular Mechanisms of Cancer, MICI 4033.03: Advanced Microbial Genetics, MICI 4100.03: Processes and Mediators of Inflammation, MICI 4114.03: Advanced Topics in Molecular and Medical Virology, MICI 4115.03: Immunology of the Host Resistance, MICI 4116.03: Current Topics in Mucosal Immunology, MICI 4118.03: Molecular Bacterial Pathogenesis, MICI 4119.03: Host Pathogen Interactions, MICI 4218.03: Clinical Microbiology,
    - BIOC 4010.03: Bioinformatics, BIOC 4403.03: Genes and Genomes, BIOC 4404.03: Gene Expression, BIOC 4501.03: Medical Biotechnology, BIOC 4835.03/BIOL 4035.03: Human Genetics

- BIOL 2004.03: Diversity of Life II,BIOL 3037.03 Gene Editing, and Synthetic Biology, BIOL 3101.03: Microbial Ecology, BIOL 3102.03: Microbial Eukaryotes, BIOL 3322.03: Parasitology, BIOL 4020.03 Advanced Cell Biology
- PSYO 3180.03/NESC 3180.03: Psychoneuroimmunology/Ecological Immunology

* The Honours research thesis (MICI 4901/4902.06) is normally supervised by a faculty member from Microbiology and Immunology or from Biochemistry and Molecular Biology (including joint and cross appointments). Students who wish to undertake their honours research project in another department must first have the project approved by the Microbiology and Immunology Undergraduate Studies Committee.

Grade requirements for Honours:

- In the following core courses, MICI 2100.03: Introductory Microbiology and Immunology, MICI 2400.03: Laboratory Methods in Microbiology and Immunology, MICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell and MICI 4901/4902.06: Honours Research and Thesis, a minimum grade of B in five and a minimum grade of B- in the sixth course. In the other MICI or required courses a grade of C or greater is required.

BSc (120 credit hour) Combined Honours in Microbiology and Immunology and another subject

Students who wish to study Microbiology and Immunology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Microbiology and Immunology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Microbiology and Immunology, this requirement is satisfied through MICI 4901/4902.06.

A Co-op option is available for students enrolled in BSc Combined Honours with Microbiology and Immunology as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Microbiology and Immunology and another subject must complete the following:

Microbiology and Immunology as the primary subject

- 1000-level as for Concentrated Honours (above)
- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell
- MICI 4901/4902.06: Honours Research and Thesis
- One additional MICI course at the 4000 level

Requirements for a Combined Honours with Biochemistry & Molecular Biology as the secondary subject can be met by completing the following courses in addition to the above list:

- BIOC 3300.03: Intermediate Metabolism, BIOC 3700.03: Biomolecular Chemistry
- Two courses from BIOC 40XX, 43XX, 44XX, 45XX, or 47XX
- Three additional MICI or BIOC courses at or above the 2000 level

Microbiology & Immunology as the secondary subject

- 1000-level as for Concentrated Honours (above)
- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introduction Biochemistry Lab
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular BiologyMICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell
- One additional MICI or MICI-approved course at or above the 3000 level.
- One additional MICI course at the 4000 level

Grade requirements for Combined Honours:

In the following core courses, MICI 2100.03: Introductory Microbiology and Immunology, MICI 2400.03: Laboratory Methods in Microbiology and Immunology, MICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell and MICI 4901/4902.06: Honours Research and Thesis, a minimum of B in five and a minimum of B- in the sixth course. In the other MICI or required courses a grade of C or greater is required.

BSc (120 credit hour) Major in Microbiology and Immunology

The 120 credit hour Major is suited to students who want to focus on Microbiology and Immunology, but wish to have a program that is somewhat less constrained than the Honours program. Microbiology and Immunology Majors complete a minimum of 42 credit hours in program courses above the 1000 level. Certain specified courses from other departments (BIOC, BIOL, CHEM, NESC) count as program courses (see below). Research and other experiential learning opportunities are available through laboratories, and through direct research and experiential classes.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Microbiology and Immunology.

It is required that a student consult with a MICI departmental advisor.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Microbiology and Immunology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

2000 level

- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000 level

- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology
- MICI 3115.03: Immunology
- MICI 3119.03: Physiology of the Prokaryotic Cell

4000 level

- One of the following courses: MICI 4033.03: Advanced Microbial Genetics, MICI 4100.03: Processes and Mediators of Inflammation, MICI 4114.03: Advanced Topics in Molecular and Medical Virology, MICI 4115.03: Immunology of the Host Resistance, MICI 4116.03: Current Topics in Mucosal Immunology, MICI 4118.03: Molecular Bacterial Pathogenesis, MICI 4119.03: Host Pathogen Interactions, MICI 4218.03: Clinical Microbiology
- Three additional credit hours in MICI-approved courses at or above the 3000 level

Grade requirements for Majors:

For all MICI or required courses you must obtain a grade of C- or better. In some cases, you will need a grade of B- as a prerequisite for entry into 3000 or 4000 level courses.

BSc (120 credit hour) Double Major in Microbiology and Immunology and another subject

The Double Major degree program allows students to combine a study of Microbiology and Immunology with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Microbiology and Immunology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Microbiology and Immunology as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Microbiology and Immunology and another subject must complete the following set of core courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

2000 level

- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups

3000/4000 level

- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology
- MICI 3115.03: Immunology
- MICI 3119.03: Physiology of the Prokaryotic Cell
- MICI 3XXX-4XXX (or MICI approved): one course or 6 credit hours if the second subject is Biochemistry
- One of MICI 4033.03: Advanced Microbial Genetics, MICI 4100.03: Processes and Mediators of Inflammation, MICI 4114.03: Advanced Topics in Molecular and Medical Virology, MICI 4115.03: Immunology of the Host Resistance, MICI 4116.03: Current Topics in Mucosal Immunology, MICI 4118.03: Molecular Bacterial Pathogenesis, MICI 4119.03: Host Pathogen Interactions, or MICI 4218.03: Clinical Microbiology

The same set of core courses is required in a Double Major with Microbiology and Immunology as the primary or secondary subject.

Grade requirements for Double Major:

For all MICI or required courses you must obtain a grade of C- or better. In some cases, you will need a grade of B- as a prerequisite for entry into 3000 or 4000 level courses.

Minor in Microbiology and Immunology

BSc (90 credit hours) Minor in Microbiology and Immunology

The 90 credit hour degree is suited to students who want to focus on Microbiology and Immunology, but wish to graduate in three years rather than four in the event of acceptance into a professional school that has the prerequisite of an undergraduate degree. Students will complete a minimum of 18 credit hoursin Microbiology and Immunology above the 1000 level. Certain specified courses from other departments (BIOC, CHEM) are also required.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a 90 credit BSc Minor program in Microbiology and Immunology must complete the following courses:

1000 level

BIOL 1010 and 1011 or BIOL 1020 and 1021

CHEM 1011 and 1012

2000 level and above

MICI 2100.03: Introductory Microbiology and Immunology, and MICI 2400.03: Laboratory Methods in Microbiology and Immunology, plus 12 additional credit hours in MICI (or MICI-approved) courses above the 1000 level. Note that 3000 level MICI courses will, for the most part, require certain prerequisite grades within courses provided by other departments, such as BIOL 2020, BIOL 2030 and BIOC 2300.

It is required that a student considering the 90 credit hour degree consult with a MICI departmental advisor.

Contact Microbiology and Immunology for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Microbiology and Immunology

Co-op Academic Advisor: Dr. Craig McCormick (craig.mccormick@dal.ca)

The Science Co-op degree option enables students to apply their academic knowledge directly while providing them with work experience that assists in making educated career choices. Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Microbiology and Immunology, or in Combined Honours or Double Major programs with Microbiology and Immunology as the primary subject. Further information details on Science Co-op can be found in the academic calendar under Work-Integrated Learning & Co-operative Education and the Co-op office's website at dal.ca/wil. For more information on Co-op Education in Microbiology and Immunology, please see the Department webpage www.dal.ca/academics/programs/undergraduate/mbim/what_will_I_learn/coop_work_terms.html

Minors available to students in Microbiology and Immunology

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally embedded within 120 credit hour programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Microbiology and Immunology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Microbiology and Immunology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a Microbiology and Immunology Major or Honours program include:

- Certificate in Genetics
- Certificate in Medicinal Chemistry

Courses

Courses

Course Notes

For more detailed information on the following courses please see the departmental webpage http://microbiology.medicine.dal.ca

NOTE: Owing to the combined pressures of student numbers and a dearth of available space, the names of students absent from the first day of course may be deleted from course lists; students are therefore advised that being signed into a course is no guarantee of continued registration.

Course Descriptions

MICI 1100 Health Science Microbiology
CREDIT HOURS: 3
An introduction to microbiology and infectious diseases only for healthcare professionals. It includes a study of the structure and physiology of microorganisms, the ways microorganisms cause disease in humans and the way they affect human's well being.
CALENDAR NOTES: This course is also offered by distance education to all students.
RESTRICTIONS: This course is restricted to Nursing and Kinesiology students. It is not for students registered in the Faculty of Science.
FORMATS: Lecture

MICI 2100 Introductory Microbiology and Immunology

CREDIT HOURS: 3
An introduction to the basic concepts of microbiology and immunology. Topics include structure, genetics and biology of microorganisms; structure and replication of viruses; and basic immunology and host defense mechanisms. The class is designed to interrelate the major research themes within the Department (microbiology, molecular biology, virology, cancer biology and immunology).
CALENDAR NOTES: This class offered in person in Fall and Winter terms and by distance education in the Summer term.
PREREQUISITES: Grade of B- or better in BIOL1010.03, BIOL1011.03, CHEM1011.03 and CHEM1012.03 (or equivalents), or instructor's consent
FORMATS: Lecture | Online Delivery

MICI 2115 Human Organs and Tissues

CREDIT HOURS: 3
Using a histology approach, students learn how tissues and organs are constructed and function at the cellular level normally and in disease. The course does not cover all histology topics. Instead, the subject matter has been selected for its relevance and potential for complementing advanced courses in microbiology, immunology, physiology, and pathology.
PREREQUISITES: Grade of B- or better in BIOL 1010.03 and BIOL 1011.03 (or BIOL 1020.03 and BIOL 1021.03)
CROSSLISTED: PATH 2115.03
RESTRICTIONS: Bachelor of Medical Sciences students cannot take this course
EXCLUSIONS: ANAT 2160.03/BIOL 3430.03, PATH 3000.03
FORMATS: Lecture

MICI 2400 Laboratory Methods in Microbiology and Immunology

CREDIT HOURS: 3
An introduction to techniques in Microbiology and Immunology through a rigorous wet laboratory experience that includes training in how to explore safely and effectively the properties of viruses, bacteria and immune cells. This course is directed to students in Microbiology and Immunology, Biochemistry & Molecular Biology, and Biology programs.
COREQUISITES: BIOL 2020.03 and BIOL 2030.03
PREREQUISITES: Grade of B- or better in MICI 2100 or instructor's consent
FORMATS: Lab

MICI 3114 Virology

CREDIT HOURS: 3
Viruses are submicroscopic infectious agents that infect all life forms, from animals and plants to unicellular eukaryotes and prokaryotes. This course is primarily focused on the molecular aspects of virology, including virus structure and discrete steps of viral replication inside host cells, including entry, macromolecular synthesis, and assembly and release of viral progeny. There is also a focus on virus-host interactions relevant to disease pathogenesis, viral evolution and pandemics, as well as interventions like antivirals and vaccines.
PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOL 2020.03 and BIOL 2030.03 (a minimum of B- in each of these courses). BIOC 3400.03 should be taken either prior to or concurrently with this course; the same grade requirement applies.
FORMATS: Lecture | Tutorial

MICI 3115 Immunology

CREDIT HOURS: 3
An introduction to cellular and molecular immunology and impacts on human health. Topics include: cells, tissues, and mediators of the immune system, the structure and synthesis of antibodies, complement pathways, inflammation, lymphocyte subsets and their functions, the genetics of the immune response and the immunologic contributions to human disease.
PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOL 2020.03 and BIOL 2030.03 (a minimum of B- in each of these courses)
FORMATS: Lecture | Tutorial

MICI 3119 Physiology of the Prokaryotic Cell

CREDIT HOURS: 3
An introduction to the bacterial physiological processes required for interactions with other organisms and the environment. Topics include: molecular architecture and assembly of bacterial cell components, metabolism and energy production, utilization of energy, genomics and genetics, responses to host and environmental challenges, and host-pathogen interactions.
PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOL 2020.03 and BIOL 2030.03, (a minimum of B- in each of these courses).
FORMATS: Lecture

MICI 3620 Experiential Learning in Microbiology and Immunology

CREDIT HOURS: 3
This lab-based course is designed to give students an introduction to general lab procedures, molecular and cell biological techniques in bacterial pathogenesis, cancer cell biology, immunology, molecular genetics, or virology. In collaboration with the research supervisor, students will draft a learning agreement specifying learning outcomes and how these will be achieved. Students are expected to work an average of 7-10 hours per week in the laboratory of their research supervisor (minimum 72 hours per term). Lab research may be conducted in any laboratory that focuses on microbiology and immunology or a related discipline (e.g. cell biology, pharmacology), however the research supervisor or co-supervisor must be a member of the Department of Microbiology and Immunology.
CALENDAR NOTES: To register in this course, students will need to find a research supervisor and receive approval from the coordinator.
PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOC 2610.03, BIOL 2020.03 and BIOL 2030.03 (a minimum of B- in each of these courses). Permission of instructor required.
RESTRICTIONS: Normally restricted to students registered in a Majors or Honours degree in Microbiology and Immunology; any other students interested should consult the course coordinator.
EXCLUSIONS: The following may not be used towards MICI 3620: lab work that is part of another scheduled class, co-op workterms, and paid employment. Only one experiential learning course per degree is permitted. Students may not take MICI 3620 concurrently with MICI 4900, MICI 4700, MICI 4901, MICI 4902, or a co-op work term.

MICI 4033 Advanced Microbial Genetics

CREDIT HOURS: 3
This advanced course focuses on select aspects of bacterial gene regulation including bacterial viruses. Topics include gene transfer, transposon biology, bacterial cell signaling, activators and repressors, molecular and chemical approaches to genetic analysis and regulation of bacterial gene expression.
PREREQUISITES: Grade of B- or better in MICI 3119.03 or instructor's consent.
EXCLUSIONS: MICI 5033.03
FORMATS: Lecture

MICI 4100 Processes and Mediators of Inflammation

CREDIT HOURS: 3
This advanced course focuses on the cellular and molecular mechanisms of inflammation and consists of lectures and student presentations based on review articles and current research papers. Topics include: inflammatory mediators and receptors, complement, steroids, tissue remodeling. Current research questions and emerging treatments are emphasized.
PREREQUISITES: Grade of B+ or better in MICI 3115.03 and instructor’s consent
EXCLUSIONS: MICI 5100.03, PATH 5100.03
FORMATS: Lecture | Discussion

MICI 4114 Advanced Topics in Molecular and Medical Virology

CREDIT HOURS: 3
This advanced course focuses on selected aspects of virology and consists of lectures and student presentations based on current research papers. Topics may include: viruses and innate immunity, virus interactions with host cells, zoonotic viruses, vaccines and antiviral drugs. Exact topics change from year to year. Students who consider future graduate studies and/or intend to do Honours research in virology or closely related themes (e.g. host-pathogen interactions, innate immunity) will benefit the most from taking this course.
PREREQUISITES: Students enrol in the Fall semester, but must attend the first class where final admittance is determined. Restricted enrollment based on performance in MICI 3114.03 (minimum A- or instructor's consent)
CROSSLISTED: MICI 5114.03
FORMATS: Lecture | Discussion

MICI 4115 Medical Immunology

CREDIT HOURS: 3
This advanced course focuses on vaccinology, immunotherapies, and enhanced understanding of immune mechanisms to vaccines, pathogens, tumour cells and therapeutic agents. The course consists of lectures and/or student presentations based on review articles and current research papers.
PREREQUISITES: Minimum grade of B in MICI 3115.03 or instructor's consent
FORMATS: Lecture | Discussion

MICI 4116 Current Topics in Mucosal Immunology

CREDIT HOURS: 3
This advanced course focuses on the mucosal immune system, which maintains a state of tolerance to environmental antigens while mounting a strong immune response to infectious agents. The course consists of lectures and student presentations based on review articles and research papers. Topics include: immune mechanisms in the gastrointestinal tract and respiratory and genitourinary systems.
PREREQUISITES: MICI 3115.03 with a grade of B or better or instructor’s consent
CROSSLISTED: MICI 5116.03

MICI 4118 Molecular Bacterial Pathogenesis

CREDIT HOURS: 3
This advanced course focuses on the molecular basis of bacterial pathogenesis and consists of lectures and student presentations based on landmark articles and current research papers. Topics include: the regulation of genes encoding virulence factors, the function of these factors in surface colonization, invasion, intracellular growth and toxin production.
PREREQUISITES: Grade of B or better in MICI 3119.03 or instructor's consent
EXCLUSIONS: MICI 5118.03

MICI 4119 Host Pathogen Interactions

CREDIT HOURS: 3
This is an advanced undergraduate course, focusing on how pathogens modify, disrupt or utilize cellular functions for their own purposes and the significance of these interactions in both pathogenesis and host defense. It will help students critically evaluate the scientific literature, develop hypotheses and design experiments to test these hypotheses.
PREREQUISITES: Students must have taken 2 out of 3 of the following: MICI 3114, MICI 3115, MICI 3119, or receive permission from the instructor. Students require a B average in these classes, with a minimum B- in any one.
FORMATS: Lecture

MICI 4218 Clinical Microbiology

CREDIT HOURS: 3
This advanced course covers all aspects of clinical microbiology including bacteriology, virology, parasitology, mycology and molecular diagnostics. The emphasis will be placed on bacteriology. Topics include epidemiology and transmission, laboratory management and identification, antimicrobial testing and resistance, treatment and prevention of infectious diseases.
PREREQUISITES: Grade of B- or better in MICI 3119.03 or instructor's consent
FORMATS: Lecture

MICI 4701 Advanced Topics in Microbiology and Immunology

CREDIT HOURS: 3
This is an advanced literature review course that is not part of the regular BSc program. Approval is required from the departmental undergraduate committee.
PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will supervise the independent study program.

MICI 4702 Advanced Topics in Microbiology and Immunology

CREDIT HOURS: 3
This is an advanced literature review course that is not part of the regular BSc program. Approval is required from the departmental undergraduate committee.
PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will supervise the independent study program.

MICI 4703 Directed Research Project 1

CREDIT HOURS: 3
Students spend at least one day per week performing laboratory research in the lab of approved departmental faculty. This course is not for students in a regular BSc Honours program. Approval is required from the departmental undergraduate committee.
CALENDAR NOTES: Credit can only be given for this course if MICI 4703.03 and MICI 4704.03 are completed in consecutive terms, and partial credit cannot be given for a single term.
PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will serve as a supervisor. At least a B average for MICI 3114.03, MICI 3115.03 and MICI 3119.03.
EXCLUSIONS: MICI 4700.06

MICI 4704 Directed Research Project 2

CREDIT HOURS: 3
Students spend at least one day per week performing laboratory research in the lab of approved departmental faculty. This course is not for students in a regular BSc Honours program. Approval is required from the departmental undergraduate committee.
CALENDAR NOTES: Credit can only be given for this course if MICI 4703.03 and MICI 4704.03 are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will serve as supervisor. At least a B average for MICI 3114.03, MICI 3115.03, and MICI 3119.03.

EXCLUSIONS: MICI 4700.06

MICI 4901 Honours Research and Thesis 1

CREDIT HOURS: 3
MICI 4901 is followed by MICI 4902, both being required for completion of the Honours. While typically requiring original research conducted under the supervision of a faculty member, in the period of the pandemic and ahead, Honours can be conducted in 1 of 3 options: 1) If the student is permitted into the supervisor's laboratory beginning with 4901, for both terms (e.g. 4902), the project should be original research conducted at the bench. 2) If the student is not in the laboratory or conducting in silico analyses for both 4901 and 4902, (for example, not on campus) a written project will be based on research of the literature on a problem related to the supervisor's research, in consultation with the supervisor. 3) If the student is permitted into the laboratory in the (second, i.e. 4902) only, the project could be a "hybrid" of a literature review.
CALENDAR NOTES: This course must be taken consecutively with MICI 4902.03. No grade is provided until both MICI 4901.03 and MICI 4902.03 are completed.
PREREQUISITES: B average in at least three of MICI 3114.03, MICI 3115.03, MICI 3119.03 and BIOC 3400.03 with no grade lower than B- (AND instructor's permission); and a member of the department who will serve as a supervisor. Students must have completed all second year course requirements, and preferably all third year course requirements, although there may be exceptions in which one required third year course is deferred to fourth year.
EXCLUSIONS: MICI 4900.06

MICI 4902 Honours Research and Thesis 2

CREDIT HOURS: 3
MICI 4902 is a continuation of MICI 4901. While typically requiring original research conducted under the supervision of a faculty member, in the period of the pandemic and ahead, Honours can be conducted in 1 of 3 options: 1) If the student is permitted into the supervisor's laboratory beginning in fall term, for both terms, the project should be original research conducted at the bench. 2) If the student is not in the laboratory or conducting in silico analyses for both terms, a written project will be based on research of the literature on a problem related to the supervisor's research, in consultation with the supervisor. 3) If the student is permitted into the laboratory in the (second, 4902) winter term only, the project could be a "hybrid" of a literature review
CALENDAR NOTES: This course must be taken consecutively with MICI 4901.03. No grade is provided until both MICI 4901.03 and MICI 4902.03 are completed.
PREREQUISITES: B average in at least three of MICI 3114.03, MICI 3115.03, MICI 3119.03 and BIOC 3400.03 with no grade lower than B- (AND instructor's permission); and a member of the department who will serve as a supervisor. Students must have completed all second year course requirements.
EXCLUSIONS: MICI 4900.06

MICI 8891 Co-op Work Term I

CREDIT HOURS: 0

MICI 8892 Co-op Work Term II

CREDIT HOURS: 0

MICI 8893 Co-op Work Term III

CREDIT HOURS: 0

Introduction

The primary goal of the field of Neuroscience is to understand the brain. Neuroscientists examine all aspects of the structure and function of nervous systems and use a variety of experimental strategies to understand them, including molecular, biochemical, behavioural, anatomical, physiological, and developmental approaches. The programs outlined below represent all of these approaches, with an emphasis on behaviour as the adaptive product of neural activity and neuroplasticity. Knowledge obtained from research in Neuroscience may be applied to a variety of human health problems, including Alzheimer's disease, Parkinson's disease, and a variety of drug- or injury-induced behavioural disorders.

A. Enrolment Limitations

Neuroscience is a popular program, and we have a high enrolment of students. Potential Major and Honours students should note that there are limitations on the number of students that can be taught in these programs in any given year. Passing introductory courses with the required grade of B- and declaring an intent to Major in Neuroscience does not guarantee a spot in any particular course. We do our best to provide spots in core required courses to students in the program; however, students are advised to register as early as possible for required courses to secure a space.

There are strict size restrictions on individual courses. Lecture courses are limited by room size. Enrolment in laboratory courses is further restricted because of equipment limitations and requirements for supervision. All Major and Honours students should carefully review program requirements and choose prerequisite courses accordingly. Laboratory courses fill rapidly, and not all laboratory courses are offered every year.

B. Enrolment of Other Students

Only Major and Honours students in Neuroscience or Psychology may enrol in NESC 2000.03, NESC 2470.03, and PSYO 2501.03, and such students are given preference in other second-year courses. All students must have at least a B- in both the introductory psychology and neuroscience courses, or a B- in the psychology and neuroscience component of the Integrated Science Program, to register in any second-year course in Neuroscience.

C. Laboratories

Neuroscience laboratory courses typically involve data collection and interpretation, and writing reports on the results. All Major and Honours students must take the second-year research methods course (NESC 2000.03) and at least two 3000-level research laboratory courses (six credit hours).

Degree Programs

The Department of Psychology and Neuroscience offers the following degree programs in Neuroscience:

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- Minor in Neuroscience

* May be combined with Minor programs from other disciplines (except Psychology).

Departmental requirements for each degree program can be seen by following the links in the menu at the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Neuroscience undergraduate academic advisor.

A detailed description of the Neuroscience programs is available in a guidebook titled "A Student's Guide to Neuroscience at Dalhousie University." The guidebook is available on the Department's website (www.dal.ca/psychandneuro) and at the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263).

Staff

Dean

Macdonald, C.L.B. BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chairperson of Department

Newman, A. J., BA (Winnipeg), MSc, PhD (Oregon)

Academic Advisors

To contact an academic advisor, please visit the Psychology and Neuroscience website.

Professors Emeriti

Brown, R. E., BSc (Victoria), MA, PhD (Dalhousie)
Klein, R. M., BA (SUNY), MA, PhD (Oregon)
LoLordo, V. M., AB (Brown), PhD (Penn)
Meinertzhagen, I. A., BSc (Aberdeen), PhD, DSc (St. Andrews)
Mitchell, D. E., BSc, MAppSc (Melb), PhD (Berkeley)
Rusak, B., BA (Toronto), PhD (Berkeley), FRSC

Professors

Abbass, A., BSc (Ottawa), MD (Dalhousie), FRCPC (Toronto), major appointment in Psychiatry
Adamo, S., BSc (Toronto), PhD (McGill)
Campbell-Yeo, M., BSc, MScN (Dalhousie), PhDN (McGill),major appointment in the School of Nursing
Chambers, C. T., BSc (Dalhousie), MA, PhD (UBC), joint appointment in Pediatrics, Faculty of Science Killam Professor in Psychology
Corkum, P. V., BSc (Dalhousie), MA, PhD (OISE at Toronto)
Crowder, N. A., BSc, PhD (Alberta)
Deacon, S. H., BSc (UPEI), PhD (Oxon)
Duffy, K., BA (St. Thomas), PhD (McMaster)
Finley, G. A., BSc, MD (Dalhousie), FRCPC, major appointment in Anaesthesia
Good, K., BSc (UNB), MSc, PhD (UBC), major appointment in Psychiatry
Kiefte, M., BA (Memorial), MSc, PhD (Alberta), major appointment in the School of Human Communication Disorders
Moore, C.L., BA, PhD (Cantab)
Newman, A. J., BA (Winnipeg), MSc, PhD (Oregon)
Perrot, T. S., BSc, PhD (Western)
Phillmore, L., BA (UWO), MA, PhD (Queen's)
Rosen, N. O., BA (Queen's), PhD (McGill)
Semba, K., BEd, MA (Tokyo), PhD (Rutgers), major appointment in Medical Neuroscience
Sherry, S. B., BA (York), MA (UBC), PhD (Saskatchewan)
Smith, I. M., BA (Dalhousie), MSc (Brown), PhD (Dalhousie), major appointment in Pediatrics, Joan and Jack Craig Chair in Autism Research
Stewart, S., BSc (Dalhousie), PhD (McGill), joint appointment in Psychiatry
Taylor-Helmick, T. L., BA (Calgary), MSc, PhD (Dalhousie)
Tibbo, P., BSc Hons. (Mt Allison), B.MEd.Sc, MD (Memorial), FRCPC, AHRMR (Alberta), major appointment in Psychiatry
Uher, R., MRCPsych (Royal College of Psychiatrists), CCT (London Deanery, UK), PhD, MUDr. (Charles Univ), major appointment in Psychiatry
Ungar, M., BA, BSW, MSW (McGill), PhD (Wilfrid Laurier), major appointment in the School of Social Work
Westwood, D. A., BSc, MA, PhD (Waterloo), major appointment in the School of Health and Human Performance

Associate Professors

Aiken, S., BA, MSc (Western), PhD (Toronto), major appointment in the School of Human Communication Disorders
Bardouille, T., BSc (Queen's), MSc (Dalhousie), PhD (Toronto) major appointment in Psychiatry

Blais, J., BA/MA/PhD (Carleton)
Bombay, A., BSc (Ottawa), MSc, PhD (Carleton), major appointment is held jointly with the School of Nursing and Psychiatry
Chorney, J., BSc (Dalhousie), MA, PhD (West Virginia), major appointment in Anesthesiology
Fisher, D., BSc (Ottawa), MSc, PhD (Carleton), major appointment in Psychiatry
Fisk, J., BSc, MA, PhD (Western), major appointment in Psychiatry
Franklin, T., BSc (King's), MSc (Dalhousie), PhD (Swiss Federal Institute of Technology), Graduate Coordinator
Jacques, S., BA (McGill), MA, PhD (Toronto)
Johnson, S., BA (Kalamazoo), MSc, PhD (Victoria), Clinical PhD Program Director of Training
Meier, S., BSc, MSc (Universitat Basel, Switzerland), PhD (Ruprecht Karls Universitat, Germany), major appointment in Psychiatry
Neyedli, H., BSc Hons (Dalhousie), MSc, PhD (Toronto), major appointment in Health and Human Performance
Robinson, L., BSc (Victoria), MA, PhD (Simon Fraser), major appointment in the School of Health and Human Performance
Robinson, M., BA (SMU), MA, PhD (Toronto), major appointment in English
Weatherhead, D., COGS-P-BCH (Queen's). PhD (Waterloo)
Weaver, I. C. G., BSc (Aberdeen), MSc (Bristol), PhD (McGill)

Assistant Professors

Cloutier, A., BA, MA (Carleton), PhD (Queens) major appointment in Rowe School of Business
Conrad, C., BA, MEC, PhD (Dalhousie), MA (Queens) major appointment in Infomation Management
Dithurbide, L., BA (St. Mary's), MA (Brock), PhD (Michigan State), major
Filliter, J., BSc, MSc, PhD (Dalhousie) major appointment in Pediatrics
Ghanouni, P., BSc/MSc (SBUMS), PhD (UBC) major appointment in Occupational Therapy
Hashimi, J., BSc (Punjab), MSc (Western), PhD (Toronto), major appointment in Anesthesia
Hernandez Castillo, C., PhD (Veracruz), major appointment in Computer Science
Ilie, G., BSc, MA (York), PhD (Toronto), major appointment in Community Health and Epidemiology
Jafari, Z., BSc, MSc (TUMS), PhD (Ottawa), major appointment in Communication Sciences and Disorders
Jopling, E., BA Hons (Queen's), MA, PhD (UBC)
Lee-Bagley, D. BSc (Calgary), MSc, PhD (UBC), major appointment in Family Medicine
Lovas, D., BSc, MD (Dalhousie), major appointment in Psychiatry
McManus, J., BA (Carleton), MSc (Guelph), PhD (Dalhousie), major appointment in Rowe School of Business
Pavlova, B., MSc (Palacky Univ., Czech Republic), PhD (Charles Univ., Czech Republic), DClinPsy (Inst. of Psychiatry, King's College)
Thomas, M., BSc (St. Andrew's), MBChB (Mancester), DRCOG/MRCP-UK (Glasgow), PhD (Central Lancashire) FRCPCH FRCP, major appointment in Pediatrics
Town, J., BSc (York), DClinPsy (Univ of Sheffield), major appointment in Psychiatry

University Teaching Fellows

Borycz, J., PhD (Inst. of Pharmacology, Krakow, Poland)
Gadbois, S., BP, MAPs (Moncton), PhD (Dalhousie)
Mackinnon, S., BA(H) (UCCB), MSc (Wildred Laurier), PhD (Dalhousie)
Pencer, A., BSc (St. FX), MSc, PhD (Calgary)
Stamp, J., BSc (Dalhousie), PhD (Cambridge)
Stevens, L., BSc (Acadia), MSc, PhD (Dalhousie), Undergraduate Program Coordinator

Senior Instructors

Caceres, L., BSc (Alberta), PhD (McGill)
Christie, J., BSc, MSc, PhD (Dalhousie)
LeBlanc, K. BA Hons, (Mount Allison), MSc, PhD (Dalhousie)
Juckes, T., BA, MA (Natal), PhD (Dalhousie)
Sparks, E., BA (Hons) Queen's, MSc, PhD (Dalhousie), Undergraduate Program Coordinator
Stratton, N., BA (Concordia), MA/PhD (Ryerson)

Instructors

Tucker, R. BA Hons, PhD (Dalhousie)

Adjunct Professors

Asp, E., BA (Glendon), MA, PhD (York), English Language and Literature/Saint Mary's
Barresi, J., BSc (Brown), MA (S Calif), MS, PhD (Wisc), Psychology and Neuroscience/Dalhousie
Birnie, K., BA (Calgary), PhD (Dalhousie), Cummings School of Medicine/Univ. of Calgary
Boe, S., BPhEd (Brock), PhD, MPT (Western), Faculty of Health Sciences, Western University
Cawley, E., BA (Hons) Ottawa, MSc, PhD (McGill), National Mental Health Strategy
Champod, A.S., BSc (Montreal), PhD (McGill) Psychology/Acadia
Chipman, K., BA (UPEI), MA, PhD (Western), Neuropsychology Service/Nova Scotia Hospital
Cohen, A., BA (McGill), MSc, PhD (Queen's), Psychology/UPEI
Conrad, N., BA (St. Mary's), PhD (McMaster), Psychology/Saint Mary's
Corbit, J., BSc (Dalhousie), BSc Hons (St. FX) MA (Concordia), PhD (SFU), Psychology/St. FX
Courteau, E., BSc, MSc, PhD (Montréal), Psychology and Neuroscience/Dalhousie
Ezekiel, R., BA, MSc (Western), PhD (Toronto), Vice-Provost, Student Affairs, Dalhousie
Flanagan, H., BA, BSc (McMaster), MA, PhD (York), Psychology IWK Health Centre
Garland, S., BA, MSc, PhD (Calgary), Psychology/Memorial University
Hill, T., BA (Saint Mary's), MA (Wildred Laurier), PhD (Dalhousie), Psychology/University of Dundee
Ivanoff, J., BSc, MA (Guelph), PhD (Dalhousie), Psychology/Saint Mary's
Keys, E., BSc, BN, PhD (Calgary) Nursing, UBC
Khoury, J., BSc (Toronto), MA, PhD (Ryerson), Psychology/Mount Saint Vincent
Lackner, C., MSc (Queen's) PhD (Brock), Psychology/Mount Saint Vincent
Lambe, L., BSc (Dalhousie), MSc, PhD (Queen's), Psychology/St. FX
Marchand, Y., MCS (Univ of Paris), PhD (Compiegne)
Mazerolle, E., BSc, MSc, PhD (Dalhousie), Psychology/St. FX
McLaughlin, P., BSc (Toronto), MA, PhD (York) Nova Scotia Health
Mitchell, D. E., BSc, MAppSc (Melb), PhD (Berkeley), Psychology and Neuroscience/Dalhousie
Olthuis, J., BA (Smith College), PhD (Dalhousie), Psychology/UNB
Omisade, A., BA (York), PhD (Dalhousie), Neuropsychology/QEII Health Sciences Centre
Redden, R.J., BA, MSc, PhD (Dalhousie), Psychology/Univ. of Alberta
Rigney, G., BHons, PhD (South Australia) Psychology/CQUniversity Adelaide
Robertson, E., BA (Mt. A), MA, PhD (Western), Psychology/Cape Breton Univ
Roy-Charland, A., BPs, MAPs and PhD (Moncton), Psychologie/Univ. de Moncton
Saint-Aubin, J., BA (Sherbrooke), MPs, PhD (Laval), École de psychologie/ Université de Moncton
Schellinck, H., BSc, MSc, PhD (Dalhousie), Psychology and Neuroscience/Dalhousie
Shaw, S. R., BSc (London), PhD (St. Andrews), Psychology and Neuroscience/Dalhousie
Simonelli, G., MD (Buenos Aries), MSc (Montréal) Medicine, Université de Montréal
Smith, S. M., BA (Bishop's), MA, PhD (Queen's), Psychology/Saint Mary's
Stephens, S., BA Hons (York), MA, PhD (Toronto) Psychology Department, Saint Mary's
Vallis, T. M., BSc (Dalhousie), MA, PhD (Western), Psychology/QEII Health Sciences Centre
VanNoordt, S., BA Hons, MA, PhD (Brock), Psychology Department, Mount Saint Vincent
Watt, M., BA (St. FX), PhD (Dalhousie), Psychology/St. Francis Xavier
Yakovenko, I., BSc (Toronto), MSc (Calgary), PhD (Yale), University of Calgary
Yunus, F., MBBS (Dhaka), MPH (BRAC), MSc, PhD (Saskatchewan), Psychology and Neuroscience/Dalhousie)

BSc (120 credit hour) Concentrated Honours in Neuroscience

The Honours program is intended to serve as a preparation for graduate work in Neuroscience, biological psychology, medicine, human communication disorders and related fields. Its interdisciplinary nature is reflected in the participation of faculty from several departments in the program. In the first year of study, students take courses which provide a firm grounding in the physical and biological sciences. In subsequent years, the program includes credits in courses drawn from Neuroscience, Psychology and Biology. These include a number of required core courses that emphasize the acquisition and application of laboratory skills.

Honours students complete a minimum of 54 (and a maximum of 66) credit hours above the 1000 level in Neuroscience, with a minimum GPA of 3.0, and write a research-based Honours thesis. The Honours Thesis and Qualifying Examination requirements, outlined in the College of Arts and Science Honours Program Requirements, are satisfied through completion of NESC 4901.03 and NESC 4902.03.

Admission to Honours

Students must apply for admission to Honours programs. Students wishing to enroll in Honours in Neuroscience should consult with the Neuroscience Honours Advisor. Students may not apply for Honours before April of their third year of studies. A detailed description of the Honours application process can be found on the departmental website, www.dal.ca/psychandneuro. Admission requirements include:

- A grade of B+ (or higher) in NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent)
- An average of A- (or higher) in the last six completed Neuroscience courses (excluding 1000-level courses and NESC 2000.03)
- A confirmed, eligible supervisor who has agreed to supervise the student's honours thesis

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. In addition, students in a Concentrated Honours program in Neuroscience must complete the following:

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
- BIOL 1010.03: Principles of Biology I (or equivalent) with a grade of B- or better
- BIOL 1011.03: Principles of Biology II (or equivalent) with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics (STAT 1060.03 recommended)

Note that, together, SCIE 1506.03 and SCIE 1507.03 are considered equivalent to all of the above.

2000 level

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent) with a grade of B+ or better
- PSYO 2501.03: Statistical Methods I
- NESC 2470.03: Systems Neuroscience (or equivalent)
- NESC 2570.03: Cellular Neuroscience (or equivalent)
- BIOL 2020.03: Cell Biology

Plus an additional six credit hours, selected from:

- NESC 2130.03: Introduction to Cognitive Psychology
- NESC 2140.03: Learning: Conditioning & Motivation
- NESC 2150.03: Perceptual Processes
- NESC 2160.03: Animal Behaviour
- BIOC 2300.03: Introduction to Biochemistry
- BIOL 2030.03: Genetics and Molecular Biology

3000 level

Six credit hours of designated lab courses, selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Psycholinguistic Methods Across the Lifespan
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill **three-credit hours of 'laboratory courses'**)

An additional six credit hours, selected from:

- NESC 3162.03: Advanced Animal Behaviour
- NESC 3170.03: Hormones and Behaviour
- NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- NESC 3190.03: Psycholinguistics
- NESC 3227.03: Principles of Human Neuropsychology
- NESC 3237.03: Drugs and Behaviour
- NESC 3264.03: The Science of Sleep
- NESC 3270.03: Developmental Neuroscience
- NESC 3271.03: Developmental Origins of Health and Disease
- NESC 3670.03: Genes, Brain and Behaviour
- NESC 3770.03: Behavioural Neuroscience
- NESC 3970.03: Molecular Neuroscience
- BIOL 3020.03: Advanced Cell Biology
- PATH 4100.03: Critical Thinking in Neuropathology
- PHAC 3001.03: Pharmacology I *(discontinued 21/22)*
- PHAC 3030.03: Pharmacology: The Drugs Around Us
- PHAC 4001.03: Pharmacology I *(discontinued 21/22)*
- PHAC 4403.03: Systems Pharmacology I
- PHAC 4409.03: Systems Pharmacology II
- PHYL 3420.03: Sensory Physiology

4000 level

- NESC 4901.03: Honours Foundation (a grade of B- or better is required to continue to NESC 4902.03)
- NESC 4902.03: Honours Thesis
- PSYO 3502.03: Statistical Methods II
- Six credit hours of 4000-level NESC or PSYO seminar courses (the following courses may also count toward this requirement: BIOC 4301.03, BIOL 4510.03, PATH 4100.03, PHAC 4403.03, PHAC 4409.03)

Plus six additional credit hours of 3000/4000-level NESC courses (the following courses may also count toward this requirement: PHAC 3001.03, PHAC 3030.03, PHAC 4403.03, PHAC 4409.03, PHYL 3420.03)

Other regulations

- Courses that are counted towards the Honours program requirements must have a minimum grade of C.

BSc (120 credit hour) Combined Honours in Neuroscience and another subject

Students who wish to study Neuroscience in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be from any discipline in the Faculty of Science (other than Psychology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Neuroscience may be the primary subject (with a minimum of 42, and a maximum of 54, credit hours above the 1000 level), or the secondary subject (minimum 33 credit hours above the 1000 level). The student's primary subject is defined as the subject with the larger number of credit hours.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. As outlined in the College of Arts and Science Honours Program Requirements, students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Neuroscience, this requirement is satisfied through completion of NESC 4901.03 and NESC 4902.03.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Neuroscience and another subject must complete the following:

1000 level (same whether Neuroscience is primary or secondary):

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
- BIOL 1010.03: Principles of Biology I (or equivalent) with a grade of B- or better
- BIOL 1011.03: Principles of Biology II (or equivalent) with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics (STAT 1060.03 recommended)

Note that, together, SCIE 1506.03 and SCIE 1507.03 are considered equivalent to all of the above.

Neuroscience as the primary subject

2000 level

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent) with a grade of B+ or better
- PSYO 2501.03: Statistical Methods I
- NESC 2470.03: Systems Neuroscience (or equivalent)
- NESC 2570.03: Cellular Neuroscience (or equivalent)
- BIOL 2020.03: Cell Biology (if the student's primary or secondary degree also requires BIOL 2020.03, the student must take an alternative three credit hour NESC elective at the 2000 level in place of this requirement)
- An additional three credit hours of NESC courses at the 2000-level or above

3000 level

Six credit hours of designated lab courses, selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Psycholinguistic Methods Across the Lifespan
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill **three-credit hours of 'laboratory courses'**)

An additional three credit hours, selected from:

- NESC 3162.03: Advanced Animal Behaviour
- NESC 3170.03: Hormones and Behaviour
- NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- NESC 3190.03: Psycholinguistics
- NESC 3227.03: Principles of Human Neuropsychology
- NESC 3237.03: Drugs and Behaviour
- NESC 3264.03: The Science of Sleep
- NESC 3270.03: Developmental Neuroscience
- NESC 3271.03: Developmental Origins of Health and Disease
- NESC 3670.03: Genes, Brain and Behaviour
- NESC 3770.03: Behavioural Neuroscience

- NESC 3970.03: Molecular Neuroscience
- BIOL 3020.03: Advanced Cell Biology
- PATH 4100.03: Critical Thinking in Neuropathology
- PHAC 3001.03: Pharmacology I *(discontinued 21/22)*
- PHAC 3030.03: Pharmacology: The Drugs Around Us
- PHAC 4001.03: Pharmacology I *(discontinued 21/22)*
- PHAC 4403.03: Systems Pharmacology I
- PHAC 4409.03: Systems Pharmacology II
- PHYL 3420.03: Sensory Physiology

4000 level

- NESC 4901.03: Honours Foundation (a grade of B- or better is required to continue to NESC 4902.03)
- NESC 4902.03: Honours Thesis
- PSYO 3502.03: Statistical Methods II
- Six credit hours of 4000-level NESC or PSYO seminar courses (the following courses may also count toward this requirement: BIOC 4301.03, BIOL 4510.03, PATH 4100.03, PHAC 4403.03, PHAC 4409.03)

Neuroscience as the secondary subject

2000 level

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent) with a grade of B+ or better
- PSYO 2501.03: Statistical Methods I
- NESC 2470.03: Systems Neuroscience (or equivalent)
- NESC 2570.03: Cellular Neuroscience (or equivalent)
- BIOL 2020.03: Cell Biology (if the student's primary or secondary degree also requires BIOL 2020.03, the student must take an alternative three credit hour NESC elective at the 2000 level in place of this requirement)

3000/4000 level

Six credit hours of designated lab courses, selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Psycholinguistic Methods Across the Lifespan
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill **three-credit hours of 'laboratory courses'**)

Plus 12 additional credit hours of 3000/4000-level NESC courses (the following courses may also count toward this requirement: BIOL 3020.03, PATH 4100.03, PHAC 3001.03, PHAC 3030.03, PHAC 4001.03, PHAC 4403.03, PHAC 4409.03, PHYL 3420.03)

Other regulations

- Courses that are counted towards the Honours program requirements must have a minimum grade of C.

BSc (120 credit hour) Major in Neuroscience

The 120 credit hour Major is suited to students who want to focus on Neuroscience, but wish to have a program that is somewhat less constrained than the Honours program. It provides a four-year survey of Neuroscience, and is designed for students not anticipating subsequent graduate-level training in Neuroscience or related disciplines. Neuroscience Majors complete a minimum of 45 (and a maximum of 60) credit hours in Neuroscience courses above the 1000 level and do not have thesis (or related) requirements. Research and other experiential learning opportunities are available through laboratories and research project classes.

Students should plan their programs carefully and, if required, obtain advice from an academic advisor. Advisors can be consulted by visiting the Psychology and Neuroscience website or by contacting the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263 or 902-494-3417).

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections of this calendar. In addition, students in a Major program in Neuroscience must complete the following:

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
- BIOL 1010.03: Principles of Biology I (or equivalent) with a grade of B- or better
- BIOL 1011.03: Principles of Biology II (or equivalent) with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics (STAT 1060.03 recommended)

Note that, together, SCIE 1506.03 and SCIE 1507.03 are considered equivalent to all of the above.

2000 level

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent)
- PSYO 2501.03: Statistical Methods I
- NESC 2470.03: Systems Neuroscience (or equivalent)
- NESC 2570.03: Cellular Neuroscience (or equivalent)
- BIOL 2020.03: Cell Biology

Plus an additional six credit hours, selected from:

- NESC 2130.03: Introduction to Cognitive Psychology
- NESC 2140.03: Learning: Conditioning & Motivation
- NESC 2150.03: Perceptual Processes
- NESC 2160.03: Animal Behaviour
- BIOC 2300.03: Introduction to Biochemistry
- BIOL 2030.03: Genetics and Molecular Biology

3000/4000 level

Six credit hours of designated lab courses, selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Psycholinguistic Methods Across the Lifespan
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology

- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill **three-credit hours of 'laboratory courses'**)

An additional six credit hours, selected from:

- NESC 3162.03: Advanced Animal Behaviour
- NESC 3170.03: Hormones and Behaviour
- NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- NESC 3190.03: Psycholinguistics
- NESC 3227.03: Principles of Human Neuropsychology
- NESC 3237.03: Drugs and Behaviour
- NESC 3264.03: The Science of Sleep
- NESC 3270.03: Developmental Neuroscience
- NESC 3271.03: Developmental Origins of Health and Disease
- NESC 3670.03: Genes, Brain and Behaviour
- NESC 3770.03: Behavioural Neuroscience
- NESC 3970.03: Molecular Neuroscience
- BIOL 3020.03: Advanced Cell Biology
- PATH 4100.03: Critical Thinking in Neuropathology
- PHAC 3001.03: Pharmacology I *(discontinued 21/22)*
- PHAC 3030.03: Pharmacology: The Drugs Around Us
- PHAC 4001.03: Pharmacology I *(discontinued 21/22)*
- PHAC 4403.03: Systems Pharmacology I
- PHAC 4409.03: Systems Pharmacology II
- PHYL 3420.03: Sensory Physiology

An additional 12 credit hours of 3000/4000-level NESC courses. The following courses may also be used toward this requirement:

- BIOL 3020.03: Advanced Cell Biology
- PATH 4100.03: Critical Thinking in Neuropathology
- PHAC 3001.03: Drugs and Society
- PHAC 3030.03: Pharmacology: The Drugs Around Us
- PHAC 4403.03: Pharmacology I
- PHAC 4409.03: Pharmacology II
- PHYL 3420.03: Sensory Physiology
- BIOL 4510.03: Cultural Evolution

BSc (120 credit hour) Double Major in Neuroscience and another subject

The Double Major degree program allows students to combine the study of Neuroscience with another subject. The other subject may be from any discipline in the Faculty of Science (other than Psychology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Neuroscience may be the primary subject (with a minimum of 36, and a maximum of 54, credit hours above the 1000 level), or the secondary subject (minimum 36 credit hours above the 1000 level).

The student's primary subject is defined as the subject with the larger number of credit hours. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections of this calendar. In addition, students in a Double Major program in Neuroscience and another subject must complete the following:

1000 level (same whether Neuroscience is primary or secondary):

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
- BIOL 1010.03: Principles of Biology I (or equivalent) with a grade of B- or better
- BIOL 1011.03: Principles of Biology II (or equivalent) with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics (STAT 1060.03 recommended)

Note that, together, SCIE 1506.03 and SCIE 1507.03 are considered equivalent to all of the above.

2000 level (same whether Neuroscience is primary or secondary):

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent)
- PSYO 2501.03: Statistical Methods I
- NESC 2470.03: Systems Neuroscience (or equivalent)
- NESC 2570.03: Cellular Neuroscience (or equivalent)
- BIOL 2020.03: Cell Biology (if the student's primary or secondary degree also requires BIOL 2020.03, the student must take an alternative three credit hour NESC elective at the 2000 level in place of this requirement)
- An additional three credit hours of NESC courses at the 2000-level or above

Neuroscience as the PRIMARY subject

3000/4000 level
Six credit hours of designated lab courses, selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Psycholinguistic Methods Across the Lifespan
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill **three-credit hours of 'laboratory courses'**)

An additional six credit hours, selected from:

- NESC 3162.03: Advanced Animal Behaviour
- NESC 3170.03: Hormones and Behaviour
- NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- NESC 3190.03: Psycholinguistics
- NESC 3227.03: Principles of Human Neuropsychology
- NESC 3237.03: Drugs and Behaviour
- NESC 3264.03: The Science of Sleep
- NESC 3270.03: Developmental Neuroscience
- NESC 3271.03: Developmental Origins of Health and Disease
- NESC 3670.03: Genes, Brain and Behaviour
- NESC 3770.03: Behavioural Neuroscience

- NESC 3970.03: Molecular Neuroscience
- BIOL 3020.03: Advanced Cell Biology
- PATH 4100.03: Critical Thinking in Neuropathology
- PHAC 3001.03: Pharmacology I *(discontinued 21/22)*
- PHAC 3030.03: The Drugs Around Us
- PHAC 4001.03: Pharmacology I *(discontinued 21/22)*
- PHAC 4403.03: Systems Pharmacology I
- PHAC 4409.03: Systems Pharmacology II
- PHYL 3420.03: Sensory Physiology

An additional six credit hours of 3000/4000-level NESC courses (the following courses may also count toward this requirement: PHAC 3001.03, PHAC 3030.03, PHAC 4403.03, PHAC 4409.03, PHYL 3420.03)

Neuroscience as the SECONDARY subject

3000/4000 level
Six credit hours of designated lab courses, selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Psycholinguistic Methods Across the Lifespan
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill **three-credit hours of 'laboratory courses'**)

Plus 12 additional credit hours of 3000/4000-level NESC courses (the following courses may also count toward this requirement: BIOL 3020.03, PATH 4100.03, PHAC 3001.03, PHAC 3030.03, PHAC 4001.03, PHAC 4403.03, PHAC 4409.03, PHYL 3420.03)

Minor in Neuroscience

This Minor is available to non-Neuroscience/Psychology students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science, or Bachelor of Science (Medical Science) program. A 90-credit hour Minor (BSc only) is also available.

Requirements

- A minimum of 18, to a maximum of 36, credit hours in Neuroscience courses at the 2000 level or higher, with a maximum of 6 credit hours from NESC-approved courses (e.g., BIOC 2300.03, BIOL 2030.03).
- Note that NESC 2000.03: Methods in Experimental Psychology and Neuroscience, NESC 2470.03: Systems Neuroscience, and PSYO 2501.03: Statistical Methods I, are restricted to students in a Major/Honours program in Neuroscience or Psychology. However, if a student has completed these courses and switches from a major to a minor, these credits can be used to fulfill the requirements of the minor.

Please note that entry into upper-level Neuroscience courses (at the 2000 level or higher) requires completion of six credit hours at the first year level:

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better

- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
  OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

Contact Neuroscience for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Neuroscience

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Neuroscience may choose to include a Minor selected from the list of approved Minors (except Psychology). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Neuroscience, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a BSc in Neuroscience include:

- Certificate in Animal Behaviour
- Certificate in Science Leadership and Communication
- Certificate in Neurotechnology

BSc/BEng Concurrent Program

Students wishing to combine their interest in Neuroscience with a degree in Engineering may choose a BSc/BEng Concurrent Program. Students take courses toward, and complete the requirements for a BSc 120 credit hour Major in Neuroscience, at the same time as they fulfill their BEng requirements. Such a program normally takes 5 years (or longer) to complete. Interested students should see undergraduate advisors from Neuroscience and from the Faculty of Engineering in their first year of study.

Courses

Courses

Course Notes

4000-Level Seminars

These seminars are intended for fourth-year Honours students in Neuroscience or Psychology. Third-year students may be eligible provided they obtain permission from the instructor, and the needs of all the Honours students have been met. Seminar courses

offered, and the topics covered, vary from year to year. Go to the departmental website (www.dal.ca/psychandneuro) for more detail about course offerings and the topics to be covered in the current academic year.

Course Descriptions

NESC 2000 Methods in Experimental Psychology and Neuroscience

CREDIT HOURS: 3
This course provides a thorough grounding in scientific research methods used by experimental psychologists and neuroscientists. Lectures explore concepts, methods, and analytic tools employed to investigate human and animal behaviour and neurophysiology. Students also complete assignments and write reports on a series of supervised laboratory experiments to illustrate concepts presented in lectures.
CALENDAR NOTES: Restricted to students registered in Neuroscience Major or Honours programs. It is highly recommended that students take PSYO 2501.03, Statistical Methods I, concurrently with NESC 2000.03. Students must attend the first lecture section.
PREREQUISITES: (PSYO 1011.03 or PSYO 1031.03 or equivalent) and(PSYO 1012.03 or PSYO 1032.03 or equivalent) with a grade of B- or better, OR SCIE 1506.09/1507.09 or equivalent with a grade of B- or better in the Psychology portion.
CROSSLISTED: PSYO 2000.03
RESTRICTIONS: Neuroscience Majors
EXCLUSIONS: NESC 2007.03
FORMATS: Lecture | Lab

NESC 2130 Introduction to Cognitive Psychology

CREDIT HOURS: 3
Lectures focus on the processes involved in transforming sensory information into the meaningful everyday world that we know. Initially, emphasis is on the visual system, and how information within that system is structured and organized, followed by a consideration of the character of internal representations used in thinking and remembering.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: PSYO 2130.03
FORMATS: Lecture

NESC 2140 Learning: Conditioning and Motivation

CREDIT HOURS: 3
Lectures focus on several goals: (1) providing general principles of learning; (2) understanding the behaviour of particular species; (3) direct application to human problems. Emphasis is on understanding why researchers in animal learning do what they are currently doing (given the goals and the historical context).
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: PSYO 2140.03
FORMATS: Lecture

NESC 2150 Perceptual Processes

CREDIT HOURS: 3
Perception deals with the way in which our senses provide us with information about our environment. This course focuses on the process by which sensory experiences are coded, how they are interpreted by the nervous system, and how experience modifies perception.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18) OR BIOL 1010.03 (or BIOL 1020.03) and BIOL 1011.03 (or BIOL 1021.03). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: PSYO 2150.03
EXCLUSIONS: NESC/PSYO 3005.03
FORMATS: Lecture

NESC 2160 Animal Behaviour

CREDIT HOURS: 3
Using concepts from behavioural biology and psychology, animal behaviourists attempt to explain why animals behave the way they do. The course examines topics such as mating and social systems, mate choice, the evolution of behaviour, and animal communication. The behaviour of a wide range of animals is studied.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03), each with a grade of B- or better; OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18), each with a grade of B- or better; OR BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, each with a grade of C or better.
CROSSLISTED: PSYO 2160.03

FORMATS: Lecture

NESC 2470 Systems Neuroscience

CREDIT HOURS: 3
This lecture class examines the brain's role in controlling experience and behaviour in both animals and humans. The course will focus on the functional anatomy of several psychological systems, in particular the brain pathways involved in sensation, perception, movement, motivation, mood, memory, sleep, emotion, and language. There will be emphasis on recent research findings and understanding methodology for asking questions in neuroscience.
CALENDAR NOTES: Restricted to students registered in Neuroscience or Psychology Major or Honours programs.
PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better or SCIE 1505X/Y.18 with a grade of B- or better.
CROSSLISTED: PSYO 2470.03
RESTRICTIONS: Restricted to students registered in Neuroscience or Psychology Major or Honours programs.
EXCLUSIONS: PSYO 2770.03, PHYL 2041.03
FORMATS: Lecture

NESC 2570 Cellular Neuroscience

CREDIT HOURS: 3
This course explores the brain at the neuronal level. Material covered includes: the ionic basis of resting potentials; the electrical activity of neurons; synaptic transmission and plasticity; synthesis and action of synaptic transmitters; and drug actions. Cellular phenomena relevant to healthy and neurologically-dysfunctional systems are also discussed.
PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, or Principles of Biology I (BIOL 1010.03 or BIOL 1020.03) and Principles of Biology II (BIOL 1011.03 or BIOL 1021.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better, or SCIE 1505X/Y.18 with a grade of B- or better.
CROSSLISTED: PSYO 2570.03, PHYL 2570.03
FORMATS: Lecture

NESC 3001 Directed Research in Neuroscience

CREDIT HOURS: 3
Students work on single-term project under the supervision of faculty advisor. Requirements include a minimum grade of B in NESC 2000.03 (or PSYO 2000.03), an overall B+ (GPA 3.30) average in all other Psychology courses, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. Coordinator permission required - contact: pnistud@dal.ca
CALENDAR NOTES: This course provides 3-credit hours of directed research. Students wanting a full-year research experience in a single lab with single project, should register for NESC 3100.03 / NESC 3101.03.
PREREQUISITES: NESC 2000.03 or PSYO 2000.03, AND PSYO 2501.03 and previous or concurrent enrolment in two other 3000-level courses.
CROSSLISTED: PSYO 3001.03
EXCLUSIONS: NESC 3000.06, PSYO 3000.06, NESC 3100.03, NESC 3101.03, PSYO 3100.03, PSYO 3101.03
FORMATS: Lab

NESC 3002 Directed Research in Neuroscience

CREDIT HOURS: 3
Students work on single-term project under the supervision of faculty advisor. Requirements include a minimum grade of B in NESC 2000.03, an overall B+ (GPA 3.30) average in all other Neuroscience courses, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. Coordinator permission required - contact: pnistud@dal.ca
CALENDAR NOTES: This course provides 3-credit hours of directed research. Students wanting a full-year research experience in a single lab with single project, should register for PSYO 3100.03 and PSYO 3101.03.
PREREQUISITES: NESC 2000.03 or PSYO 2000.03, PSYO 2501.03, previous or concurrent enrolment in two other Psychology or Neuroscience 3000-level courses, and Coordinator's consent.
EXCLUSIONS: PSYO 3000.06, NESC 3000.06, PSYO 3100.03, PSYO 3101.03, NESC 3100.03, NESC 3101.03
FORMATS: Lab

NESC 3011 Experiential Learning in Science Communication I

CREDIT HOURS: 3
An experiential learning class for suitably-qualified senior students. This is a fundamentally 'learn by doing' course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO 1011.03 and PSYO 1012.03 lab groups (approx. 25 students). SIGNATURE REQUIRED.

CALENDAR NOTES: This course must be taken in the same academic year as NESC 3012.03 and no credit can be given for one course without the other. A grade will be given for NESC 3011.03 only after NESC 3012.03 is completed.
PREREQUISITES: B+ or better in NESC 2007.03 (or equivalent), advanced courses in Psychology or Neuroscience, and Instructor's consent.
CROSSLISTED: PSYO 3011.03
EXCLUSIONS: PSYO 3010.06
FORMATS: Lecture | Lab | Seminar

NESC 3012 Experiential Learning in Science Communication II

CREDIT HOURS: 3
An experiential learning class for suitably-qualified senior students. This is a fundamentally 'learn by doing' course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO1011.03 and PSYO1012.03 lab groups (approx. 25 students). SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken after, and in conjunction with, NESC 3011.03 in the same academic year and no credit can be given for one course without the other. A grade will be given for PSYO 3011.03 only after PSYO 3012.03 is completed.
PREREQUISITES: NESC 3011.03
CROSSLISTED: PSYO 3012.03
EXCLUSIONS: NESC 3010.06
FORMATS: Lecture | Lab | Seminar

NESC 3051 Research Methods in Sensation and Perception

CREDIT HOURS: 3
A hands-on course that explores sensory perception with an emphasis on data collection, analysis, and interpretation. Several methodologies are used across the different senses to study perception and its neural underpinnings.
CALENDAR NOTES: Students should be aware that some data collection may occur outside of class time.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, NESC 2470.03/PSYO 2470.03, and NESC 2150.03/PSYO 2150.03
CROSSLISTED: PSYO 3051.03
FORMATS: Lecture | Lab

NESC 3100 Independent Research in Neuroscience I

CREDIT HOURS: 3
For upper-year students who wish to gain research experience. Requirements include a minimum grade of B in NESC 2000.03/PSYO 2000.03, a high level of performance in other Neuroscience courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED. Contact: pnistud@dal.ca
CALENDAR NOTES: This course must be taken in the same academic year as NESC 3101.03 and no credit can be given for one course without the other. The work undertaken in NESC 3101.03 should be a continuation of that initiated in NESC 3100.03. A grade will be given for NESC 3100.03 only after NESC 3101.03 is completed.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, previous or concurrent enrolment in two other Psychology or Neuroscience 3000-level courses, and Coordinator's consent.
CROSSLISTED: PSYO 3100.03
RESTRICTIONS: Restricted to Neuroscience Majors and Honours Students
EXCLUSIONS: NESC 3001.03, NESC 3000.06
FORMATS: Lab | Experiential Learning

NESC 3101 Independent Research in Neuroscience II

CREDIT HOURS: 3
For upper-year students who wish to gain research experience. Requirements include a minimum grade of B in NESC 2000.03/PSYO 2000.03, a high level of performance in other Neuroscience courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED. Contact: pnistud@dal.ca
CALENDAR NOTES: This course must be taken in the same academic year as NESC 3100.03 and no credit can be given for one course without the other. The work undertaken in NESC 3101.03 should be a continuation of that initiated in NESC 3100.03. A grade will be given for NESC 3101.03 only after NESC 3100.03 is completed.
PREREQUISITES: NESC 3100.03 and Coordinator's consent
CROSSLISTED: PSYO 3101.03
RESTRICTIONS: Restricted to Neuroscience Majors and Honours Students
EXCLUSIONS: NESC 3001.03, NESC 3000.06
FORMATS: Lab | Experiential Learning

NESC 3131 Research Methods in Attention

CREDIT HOURS: 3

The methods, findings, and theories that underpin our understanding of attention (alertness, preparation, selection, and control of information processing) are covered. Behavioural and neuroscientific evidence as well as computational models are examined in the lectures. Laboratories emphasize behavioural methods used to isolate and reveal the components of attention.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03 or NESC 2150.03/PSYO 2150.03

CROSSLISTED: PSYO 3131.03

EXCLUSIONS: NESC 3130.06/PSYO 3130.06

FORMATS: Lecture | Lab

NESC 3132 Research Methods in Visual Cognition

CREDIT HOURS: 3

Visual cognition is the study of how we extract meaning from our visual environment and use it to direct our behaviour. Emphasis is placed on object, face, and word recognition as revealed by normal behaviour, and by neuroimaging techniques and neuropsychological studies of brain-damaged individuals who have lost these recognition abilities.

PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03 or NESC 2150.03/PSYO 2150.03

CROSSLISTED: PSYO 3132.03

EXCLUSIONS: NESC 3130.03/PSYO 3130.06

FORMATS: Lecture | Lab

NESC 3133 Research Methods in Memory

CREDIT HOURS: 3

This course examines human memory from the perspective of cognitive psychology and, to a lesser extent, cognitive neuroscience. Lectures emphasize cognitive approaches to the study of memory with an explicit focus on empirical research methods, data, and interpretation of results.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03

CROSSLISTED: PSYO 3133.03

EXCLUSIONS: NESC 3130.03/PSYO 3130.06

FORMATS: Lecture | Lab

NESC 3134 Psycholinguistic Methods Across the Lifespan

CREDIT HOURS: 3

This course provides a survey of research methods for studying language at various points in development. It explores topics in infant through adult language, introducing students to behavioural and neuroimaging techniques. Knowledge of basic research methodology and design is assumed. Students complete exercises to gain experience conducting language research.

PREREQUISITES: NESC 2000.03/PSYO 2000.03, NESC 2470.03/PSYO 2470.03 (or equivalent), and one of PSYO 2090.03 or NESC 2130.03/PSYO 2130.03

CROSSLISTED: PSYO 3134.03

EXCLUSIONS: NESC 3130.06/PSYO 3130.06

FORMATS: Lecture | Lab

NESC 3137 Research Methods in Cognitive Neuroscience

CREDIT HOURS: 3

An overview of neuroimaging and other techniques of cognitive neuroscience (including fMRI, ERP, and others) focusing on how they work, how they are applied, and their inherent limitations. Labs include experience collecting and analyzing ERP data, demonstrations of fMRI scanning, and analysis of fMRI data.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03

CROSSLISTED: PSYO 3137.03

FORMATS: Lecture | Lab

NESC 3161 Measuring Behaviour

CREDIT HOURS: 3

Measuring behaviour is essential in the study of ethology, behavioural neuroscience, developmental, social and clinical psychology. The function of this laboratory course is to teach methods of observing and scoring behavior using qualitative and quantitative methods. Sampling methods, behaviour description and analysis will be done in laboratory and naturalistic settings.

PREREQUISITES: PSYO 2000.03 or NESC 2000.03

CROSSLISTED: PSYO 3161.03

FORMATS: Lab

NESC 3162 Advanced Animal Behaviour: Theories and Applications

CREDIT HOURS: 3
This course focuses on advanced theories and applications of animal behaviour, with a focus on proximate, integrative and applied questions. It offers a more in-depth analysis of topics covered in NESC/PSYO 2160.03 and explores trends and issues in contemporary ethology, animal psychology and behavioural ecology.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03 or BIOL 3062.03 or BIOL 3630.03, and NESC 2160.03/PSYO 2160.03
CROSSLISTED: PSYO 3162.03
FORMATS: Lecture

NESC 3165 Neuroethology

CREDIT HOURS: 3
Neuroethology explores how assemblies of neurons work together to produce behaviour. The course typically uses a mix of simple model systems, including live animals (e.g., earthworms), virtual systems, and robotics to examine how nervous systems produce behaviour.
CALENDAR NOTES: All experiments in the accompanying lab involve invertebrates. Students are required to handle invertebrates during the lab.
PREREQUISITES: NESC 2570.03/PSYO 2570.03, and either PSYO 2000.03 or NESC 2000.03 or BIOL 2020.03
CROSSLISTED: PSYO 3165.03
FORMATS: Lab

NESC 3170 Hormones and Behaviour

CREDIT HOURS: 3
This course examines how chemical signals of the neural, endocrine, and immune systems interact to influence the brain and behaviour and how neurotransmitters, cytokines, and hormones control neural and behavioural development, sexual, aggressive, and maternal behaviour. Hormone receptors in the brain, reproduction, puberty, brain sex differences, and stress are also examined.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PHYL 2041.03
CROSSLISTED: PSYO 3170.03
EXCLUSIONS: NESC 2170.03/PSYO 2170.03

NESC 3180 Psychoneuroimmunology/Ecological Immunology

CREDIT HOURS: 3
Our behaviour can influence how well we resist disease, and infection can alter behaviour. This course examines how immune systems and nervous systems interact in both vertebrates and invertebrates. Evolutionary forces that have led to the existence of these interactions are also examined.
PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, and one of NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03 or MICI 2100.03; or BIOL 2020.03
CROSSLISTED: PSYO 3180.03
FORMATS: Lecture

NESC 3190 Psycholinguistics

CREDIT HOURS: 3
Explores the cognitive and neural bases of human language processing. Topics include: human language and other communication systems; phonology; morphology; semantics; syntax; discourse; first and second language acquisition; relationship of language to general cognitive functions such as music and mathematics; signed languages such as American Sign Language, and non-linguistic gesture.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, and NESC 2130.03/PSYO 2130.03
CROSSLISTED: PSYO 3190.03
EXCLUSIONS: NESC 2190.03/PSYO 2190.03
FORMATS: Lecture

NESC 3227 Principles of Human Neuropsychology

CREDIT HOURS: 3
Clinical neuropsychologists study the organization of cognitive, emotional, and social functions in the brain to understand how brain damage alters human behaviour across the lifespan. We examine how clinicians diagnose and rehabilitate persons with brain diseases and disorders. Assignments emphasize application of textbook/lecture-based knowledge, critical thinking, and group presentation skills.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03, NESC/PSYO 2130 is recommended
CROSSLISTED: PSYO 3227.03
FORMATS: Lecture

NESC 3237 Drugs and Behaviour

CREDIT HOURS: 3
An introduction to behavioural psychopharmacology. The lectures involve basic anatomy, physiology, and chemistry of the nervous system. Behavioural effects and underlying mechanisms of various psychoactive drugs are discussed. Specific topics covered are alcohol, tobacco, amphetamines, cocaine, opiates, hallucinogens, tranquilizers, and antipsychotic drugs.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, and one of NESC 2470.03/PSYO 2470.03 or NESC 2570.03/PSYO 2570.03
CROSSLISTED: PSYO 3237.03
FORMATS: Lecture

NESC 3264 The Science of Sleep

CREDIT HOURS: 3
This course reviews the history, methods and results of the scientific study of sleep. Topics include: circadian and homeostatic regulation; developmental and cultural impacts; normal and abnormal function of neural and other control mechanisms; effects of sleep loss on performance and health; theories of the functions of sleep.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03 and NESC 2470.03/PSYO 2470.03 or BIOL 2020.03
CROSSLISTED: PSYO 3264.03
FORMATS: Lecture

NESC 3270 Developmental Neuroscience

CREDIT HOURS: 3
This course presents the fundamentals of development in complex and simple nervous systems. Cell differentiation, pattern regulation, proliferation, migration, and circuit development are discussed. Special attention is given to later developmental events such as neuronal growth cones, cell death, growth factors, neuron-target interactions, and synapse formation.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2470.03/NESC 2470.03 and PSYO 2570.03/NESC 2570.03
CROSSLISTED: PSYO 3270.03
FORMATS: Lecture

NESC 3271 Developmental Origins of Health and Disease

CREDIT HOURS: 3
This course explores the role that developmental events (internal and external) play in health and disease, emphasizing their role in programming stress responding and metabolic processes across the lifespan. Students learn about underlying epigenetic mechanisms, environmental/sociocultural influences, disease processes impacted (e.g., stress-related and metabolic-related diseases), societal implications, and prevention/mitigation strategies.
PREREQUISITES: NESC 2000.03 or PSYO 2000.03 AND NESC 2470.03 or PSYO 2470.03
CROSSLISTED: PSYO 3271.03
FORMATS: Lecture

NESC 3370 Advanced Methods in Neurobiology

CREDIT HOURS: 3
Introduction to several neurophysiological techniques used in contemporary neuroscience, employing extracellular and intracellular electrical recording and stimulation methods on nervous system preparations, both sensory and motor. After introductory instruction, students in groups of 2 or 3 get to perform quite sophisticated practical experiments themselves, enabled by computer-based data acquisition.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03
CROSSLISTED: PSYO 3370.03
FORMATS: Lab

NESC 3371 Neuronal Organization Laboratory

CREDIT HOURS: 3
Introduction to several techniques used in contemporary neuroscience. Students work under supervision in groups of 2 or 3 in regular labs that introduce neuroanatomical analyses using the following: Golgi impregnation, immunocytochemistry, dye-tracing of connections, electronmicroscopy of the retina, and neurotransmitter determinations using HPLC.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03
CROSSLISTED: PSYO 3371.03
FORMATS: Lab

NESC 3440 Neuroanatomy
CREDIT HOURS: 3
This is a survey of the structure and function of the human central nervous system (CNS, the brain and spinal cord). The laboratory component provides the opportunity to dissect the human brain and to study the microscopic anatomy of the CNS. This course provides the lecture and laboratory component for the graduate course ANAT 5100 Human Neuroanatomy. ORGANIZER: W. Baldridge
PREREQUISITES: BIOL 2020.03 or permission of the instructor
FORMATS: Lecture | Lab

NESC 3505 Neural Data Science
CREDIT HOURS: 3
An introduction to data management, manipulation, visualization, and analysis for neuroscience. Students learn scientific programming in Python, and use this to work with example data from areas such as single-cell recording, EEG, structural and functional MRI, and confocal microscopy. Basic signal processing techniques including filtering are covered.
PREREQUISITES: PSYO 2501.03 with a grade of B or higher, and NESC 2000.03 or PSYO 2000.03, and NESC 2470.03 or PSYO 2470.03
CROSSLISTED: PSYO 3505.03
FORMATS: Lab | Online Delivery

NESC 3670 Genes, Brain and Behaviour
CREDIT HOURS: 3
The application of genetic techniques to the study of cognitive abilities, psychopathology, personality disorders, stress-related illnesses, and ethical issues in genetic research. The role of genetic factors in eating and drug abuse problems, as well as methods used to study gene-environment interactions are explored.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03, AND BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, or SCIE 1505X/Y.18, SCIE 1515X/Y.36, SCIE 1520X/Y.30 or SCIE 1540.27 (with a grade of B- or better); BIOL 2020.03 and BIOL 2030.03 are recommended
CROSSLISTED: PSYO 3670.03
EXCLUSIONS: NESC 2670.03/PSYO 2670.03
FORMATS: Lecture

NESC 3770 Behavioural Neuroscience
CREDIT HOURS: 3
Behavioural neuroscience explores the neural and hormonal mechanisms underlying a variety of behavioural phenomena. The course focuses on neural correlates of social and emotional behaviour, motor behaviour and patterns, and behavioural toxicology processes (neurotoxins and endocrine disruptors).
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, and NESC 2470.03/PSYO 2470.03 or PSYO 2770.03
CROSSLISTED: PSYO 3770.03
FORMATS: Lecture

NESC 3970 Molecular Neuroscience
CREDIT HOURS: 3
This course examines the development, function, and pathology of the brain at the molecular level. A particular focus will be placed upon the molecular mechanisms thought to contribute to neurological disease. The basic molecular neuroscience tools used to study these mechanisms are emphasized.
PREREQUISITES: NESC 2570.03/PSYO 2570.03 or BIOL 2020.03 or BIOL 2030.03
CROSSLISTED: PSYO 3970.03
FORMATS: Lecture

NESC 4000 Directed Reading Project
CREDIT HOURS: 3
An individually tailored reading or study course designed to allow Honours students to focus on a particular issue, or a set of related issues, that are not part of the regular program. Enrolment is contingent upon securing a faculty member to supervise the study program. This course will count as a seminar class.
SIGNATURE REQUIRED Contact pnistud@dal.ca for details.
CROSSLISTED: PSYO 4000.03
RESTRICTIONS: Restricted to Neuroscience Majors and Honours Students
FORMATS: Seminar

NESC 4007 Contemporary Issues in Neuroscience
CREDIT HOURS: 3
This is a seminar course that focuses on a significant theme or topic in the research literature in Neuroscience. Topics vary from year to year. Consult the

department for the details about course content. **SIGNATURE REQUIRED**
PREREQUISITES: NESC Honours student, permission of the instructor.
FORMATS: Seminar

NESC 4008 Topics in Neuroscience

CREDIT HOURS: 3
This is a seminar course that focuses on a significant theme or topic in the research literature in neuroscience. Topics vary from year to year. Consult the department for details about course content. SIGNATURE REQUIRED.
CALENDAR NOTES: Instructor Permission Required.
RESTRICTIONS: Neuroscience Honours Student, permission of the instructor.
FORMATS: Seminar

NESC 4050 Topics in Perception

CREDIT HOURS: 3
SIGNATURE REQUIRED
PREREQUISITES: NESC 3051.03/PSYO 3051.03 or instructor's consent
CROSSLISTED: PSYO 4050.03
FORMATS: Seminar

NESC 4070 Chemical Neurobiology

CREDIT HOURS: 3
The goal is to acquaint the student with neurotransmitters (excitatory amino acids, acetylcholine, monoamines, neuropeptides). Anatomical, biochemical, physiological, pharmacological, behavioral, and clinical aspects of individual neurotransmitter systems are discussed. Lectures are given by the instructors. Students are expected to write an examination and a review, and give a presentation.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03, or instructor's consent
CROSSLISTED: NESC 5070.03
FORMATS: Seminar

NESC 4130 Topics in Cognition

CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: PSYO 4130.03
FORMATS: Seminar

NESC 4140 Animal Learning Topics

CREDIT HOURS: 3
SIGNATURE REQUIRED
CALENDAR NOTES: PSYO 2140.03/NESC 2140.03 recommended
CROSSLISTED: PSYO 4140.03
FORMATS: Seminar

NESC 4160 Topics in Behavioural Biology

CREDIT HOURS: 3
>b>SIGNATURE REQUIRED>/b>
CROSSLISTED: PSYO 4160.03
FORMATS: Seminar

NESC 4170 Topics in Behavioural Neuroendocrinology

CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: PSYO 4170.03
RESTRICTIONS: Restricted to NESC/PSYO Honours Students
FORMATS: Seminar

NESC 4177 Theoretical Neuroscience

CREDIT HOURS: 3
An introduction to basic concepts and research questions in computational neuroscience. This includes cellular mechanisms such as spike generation and synaptic plasticity, network-level concepts such perceptrons and associative attractor networks, and system-level concepts such as memory, learning and anticipation. This course includes an introduction to MATLAB programming. **SIGNATURE REQUIRED**
PREREQUISITES: Intended for third- or fourth-year Neuroscience students.
FORMATS: Seminar

NESC 4185 Synaptic Function and Plasticity

CREDIT HOURS: 3
Key recent research studies in cellular and system neurophysiology are presented and critically discussed. Emphasis is placed on plasticity, synaptic function, excitability, dendritic integration, neural networks and relevant advances in experimental methods. Newly published papers within these areas are reviewed weekly, followed by a more extensive critique of two publications.
PREREQUISITES: NESC 2570/PHYL 2570 or permission of course instructors
CROSSLISTED: PHYL 4000.03
FORMATS: Seminar

NESC 4225 The Science of Mindfulness

CREDIT HOURS: 3
This seminar focuses on the scientific literature relating to the concept, and practice of, mindfulness. Topics explore the effects of mindfulness practice on the brain, cognition, the immune system, addiction, emotion regulation, interpersonal relations, pain, and stress. Critical evaluation of the literature is emphasized.
CROSSLISTED: PSYO 4225
RESTRICTIONS: Requires permission of instructor
EXCLUSIONS: PSYO 6225.03, PSYO 4001.03 (offered in 2017/18, 18/19, 19/20)
FORMATS: Seminar

NESC 4230 Human Performance Topics

CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: PSYO 4230.03
FORMATS: Seminar

NESC 4501 Honours Thesis I

CREDIT HOURS: 3
Under a staff member’s supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as NESC 4502.03 and no credit can be given for one course without the other. The work undertaken in NESC 4502.03 should be a continuation of that initiated in NESC 4501.03. A grade will be given for NESC 4501.03 only after NESC 4502.03 is completed.
PREREQUISITES: PSYO 2000.03 or equivalent with a grade of B+ or higher, PSYO 3502.03, admission to the honours program, and instructor's consent.
CROSSLISTED: PSYO 4501.03
RESTRICTIONS: Restricted to Honours Neuroscience students in their graduating year.
EXCLUSIONS: NESC 4500.06
FORMATS: Lecture | Lab | Experiential Learning

NESC 4502 Honours Thesis II

CREDIT HOURS: 3
Under a staff member’s supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as NESC 4501.03 and no credit can be given for one course without the other. The work undertaken in NESC 4502.03 should be a continuation of that initiated in NESC 4501.03. A grade will be given for NESC 4501.03 only after NESC 4502.03 is completed.
PREREQUISITES: PSYO 2000.03 or equivalent with a grade of B+ or higher, PSYO 3502.03, admission to the honours program, and instructor's consent.

CROSSLISTED: PSYO 4502.03
RESTRICTIONS: Restricted to Honours Neuroscience students in their graduating year.
EXCLUSIONS: NESC 4500.06
FORMATS: Lecture | Lab | Experiential Learning

NESC 4587 Topics in the History of Neuroscience

CREDIT HOURS: 3
This course examines the history of the attempts to find the neurobiological basis for human thought and behaviour. This involves the examination of the theories, methods and experimental data which have attempted to link neural activity with thought and behaviour. Historical documents and web-based resources are used to examine original sources.
PREREQUISITES: PSYO 1011.03 or PSYO 1012.03 or equivalent, or instructor's consent
EXCLUSIONS: HSTC 4301.03
FORMATS: Seminar

NESC 4670 Behavioural Neuro(epi)genetics and Genomics

CREDIT HOURS: 3
This senior seminar course examines the primary scientific literature on the use of (epi)genetic techniques to study the molecular and cellular bases of behaviour. Transgenic-technology is discussed combined with recent advances in next-generation biological techniques (e.g., DNA/RNA methylome sequencing, optogenetics) and genome editing (e.g., CRISPR/Cas9) tools for investigation of neural circuits underlying brain function.
CALENDAR NOTES: Course aimed at NESC Honours students
RESTRICTIONS: NESC Honours student, Instructor permission required.
FORMATS: Seminar

NESC 4705 Neurotechnology Innovation, Commercialization, and Entrepreneurship

CREDIT HOURS: 3
An introduction to neurotechnology, clinical neuroscience, and commercialization. Topics include neuroimaging methods; diagnosis, assessment, and treatment of nervous system-related disorders; the process of innovation; and business fundamentals. Features guest lectures by successful scientists and entrepreneurs, as well as hands-on workshops and lab exercises on business and neurotechnology topics **SIGNATURE REQUIRED**
PREREQUISITES: Two full years of undergraduate University study, plus instructor's consent.
CROSSLISTED: PSYO 4705.03, SCIE 4705
EXCLUSIONS: PSYO 7705.06
FORMATS: Lecture

NESC 4740 Topics in the Neurobiology of Learning and Memory

CREDIT HOURS: 3
SIGNATURE REQUIRED
PREREQUISITES: NESC 2470.03/PSYO 2470.03, NESC 2140.03/PSYO 2140.03
CROSSLISTED: PSYO 4740.03
FORMATS: Seminar

NESC 4901 Honours Foundation

CREDIT HOURS: 3
Under a faculty member’s supervision, each student conducts original research in Neuroscience. Students meet as a class to describe their proposed research and progress. A presentation of the research proposal and formal written report are both required. Students are expected to begin their project during fall term and final grade will reflect presentation, written proposal and lab work/skills development. Students must receive a grade of B- or higher in 4901 in order to continue into 4902. Students who do not receive a B- or higher in 4901 will be removed from the Honours degree.
CALENDAR NOTES: This course must be taken in the same academic year as NESC 4902.03. A minimum grade of B- or higher is required in NESC 4901.03 to continue on in NESC 4902.03. Student who do not achieve the minimum grade in NESC 4901.03 will be removed from NESC 4902.03 and not permitted to continue in the Honours program. The work undertaken in NESC 4902.03 should be a continuation of that initiated in NESC 4901.03.
COREQUISITES: PSYO 3502.03
PREREQUISITES: Instructor Approval (see Academic Calendar for Honours Admission Requirements)
CROSSLISTED: PSYO 4901.03
RESTRICTIONS: NESC and PSYO majors only
EXCLUSIONS: NESC 4501.03, PSYO 4501.03, NESC 4500.06, PSYO 4500.06
FORMATS: Seminar

NESC 4902 Honours Thesis
CREDIT HOURS: 3
Under a faculty member's supervision, each student conducts original research in psychology. Students meet as a class to describe their research projects and ongoing progress. A formal written report of the completed thesis is required. Final grade will reflect written thesis and lab work/skills development. Students must receive a grade of B- or higher in 4901 in order to continue into 4902. Students who do not receive a B- or higher in 4901 will be removed from the Honours degree.
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4901.03. A minimum grade of B- or higher is required in PSYO 4901.03 to continue on in PSYO 4902.03. Student who do not achieve the minimum grade in PSYO 4901.03 will be removed from PSYO 4902.03 and not permitted to continue in the Honours program. The work undertaken in PSYO 4902.03 should be a continuation of that initiated in PSYO 4901.03.
PREREQUISITES: NESC 4901.03 with B- or higher and Instructor Approval (see Academic Calendar for Honours Admission Requirements)
CROSSLISTED: PSYO 4902.03
RESTRICTIONS: NESC and PSYO majors only
EXCLUSIONS: NESC 4502.03, PSYO 4502.03, NESC 4500.06, PSYO 4500.06

Ocean Sciences

Ocean Sciences

Location:
Life Sciences Centre
Department of Oceanography
1355 Oxford Street
PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 494-3557
Fax Number: (902) 494-3877
Email Address: oceanography@dal.ca
Website: www.dal.ca/oceanography

Introduction

Ocean Sciences includes the study of the physics, biology, geology, chemistry, and meteorology of the marine environment. Topic areas include ocean currents, waves, tides, marine sediments, oceanic crustal structure, nutrient cycling, acoustics, ocean-atmosphere coupling, biological production, marine biodiversity, and seawater properties, among others. Students enrolled in the Ocean Sciences program will be educated in the core oceanographic sub-disciplines of physical, geological, chemical, and biological oceanography, while also being exposed to issues in marine policy, law, and management. Graduates of the Ocean Sciences program will have gained an appreciation of the interdisciplinary and collaborative approaches often required to arrive at effective solutions to environmental problems relating to the oceans. They will have developed strong quantitative and practical skills, as well as a breadth of knowledge across ocean science disciplines. Ocean scientists are employed in research laboratories, universities, government agencies, and private industry. Career paths include environmental prediction, environmental monitoring and assessment, marine technology, marine surveying, marine resource use and extraction, and marine conservation.

NOTE: Not all courses are offered every year. Please consult the current timetable for this year's offerings.

Degree Programs

The Department of Oceanography offers the following degree programs in Ocean Sciences:

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- Minor in Ocean Sciences

* May be combined with Minor programs from other disciplines

NOTE: There is no 90 credit hour (3 year) degree program in Ocean Sciences.

Departmental Requirements for these programs are described below. In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Ocean Sciences undergraduate academic advisor.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Ocean Sciences program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1530.27
- SCIE 1540.27, MATH 1000.03/MATH 1010.03 and PHYC 1300.06 or PHYC 1310.03/PHYC 1320.03
- SCIE 1505.18, Option A or B (MATH 1000.03/MATH 1010.03, PHYC 1300.06 or PHYC 1310.03/PHYC 1320.03)

Oliver, E., BSc (Acadia), MSc (Ottawa), PhD (Dalhousie)

Assistant Professors
Evans, N., BSc (Harvey Mudd), PhD (USC), Canada Research Chair in Observational Chemical Oceanography
Fortune, S., BAH (Queen's), MSc, PhD (UBC), Canadian Wildlife Federation Chair in Large Whale Conservation
Musgrave, R., BSc (Melbourne), BSc (Hons) (Monash), PhD (Scripps)

Instructor
deGelleke, L., BS (Univ of Hawaii at Manoa), MSc (Dalhousie)

Adjunct (FGS)
Azetsu-Scott, K., BSc, MSc (Japan), PhD (Dalhousie)
Burt, W., BSc (UVic), PhD (Dalhousie)
Dale, A., BSc (Birmingham), MSc, PhD (Plymouth)
Davies, K., BSc (UVic), PhD (Dalhousie)
Dosso, S., BSc, MSc (UVic), PhD (UBC)
Ellis, D., BSc (Mt. A), MSc, PhD (McMaster)
Fortin, M.-J., BSc, MSc (Montreal), PhD (New York)
Greenberg, D., MMath (Waterloo), PhD (Liverpool)
Hatcher, B., BSc, MSc (Dalhousie), PhD (University of Sydney)
Lu, Y., BEng (Tsinghua), MSc (Qingdao), MSc (Memorial), PhD (Victoria)
Martin, S. B., BSc (Royal Military College), MSc, PhD (Dalhousie)
McGinn, P., BSc (Acadia), BSc (St. F.X.), MSc (Queen's), PhD (Australian National University)
Milligan, T., BSc, MSc (Dalhousie)
Perrie, W., BSc (Toronto), MSc (California), PhD (Massachusetts Institute of Technology)
Richards, C., BSc (New Brunswick), MSc (Memorial), PhD (Dalhousie)
Ritchie, H., BSc (Mt. A), BA (Oxford), MSc, PhD (McGill)
Segre, P., BSc (Illinois), MSc (Montana), PhD (UBC)
Vanderlaan, A., BSc (Dalhousie), MSc (UVic), PhD (Dalhousie)
Wu, Y., BEng (Petroleum Univ of China), MEng, PhD (Tianjin Univ)
Zedel,L., BSc (Victoria), PhD (UBC)

Adjunct (Retired)
Beaumont, C., BSc (Sussex), PhD (Dalhousie)
Lewis, M. R., BS, MS (UMd), PhD (Dalhousie)

BSc (120 credit hour) Concentrated Honours in Ocean Sciences
Students who want a challenging program that results in a broad and in-depth background in Ocean Sciences, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Ocean Sciences with a minimum GPA of 3.3 and write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of OCEA 4201.03 and OCEA 4202.03.

Admission to Honours
Students considering Honours should consult with an Ocean Sciences Honours Advisor early in their studies.

Departmental Requirements

In addition to fulfilling the requirements outline in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Concentrated Honours program in Ocean Sciences must complete the following courses:

1000 level

- PHYC 1190.03 and PHYC 1290.03: Introduction to Physics or PHYC 1310.03 and PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I and MATH 1010.03: Differential and Integral Calculus II
- STATS 1060.03: Introductory Statistics for Science and Health Sciences or STATS.03 2060.03: Introduction to Probability and Statistics
- Any two of the following three introductory course sequences: BIOL 1010.03/BIOL 1011.03: Principles of Biology, CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, ERTH 1080.03: Geology I/ERTH 1090.03: Geology II

OR Integrated Science Program (see overall Degree Programs description for Ocean Sciences)

A "B+" average (3.3) must be attained in the following 2000, 3000, and 4000 level courses.

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet (minimum grade of "B")
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I and OCEA 2021.03: Tools and Concepts in Ocean Sciences II (minimum grade of "B")

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- OCEA 3001.03: Introduction to Physical Oceanography or OCEA 4120.03: Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography or OCEA 4130.03: Chemical Oceanography
- OCEA 4110.03: Geological Oceanography
- OCEA 4140.03: Biological Oceanography
- OCEA 4000.03: Oceans and Global Change
- OCEA 4201.03 and OCEA 4202.03: Honours Research
- A minimum of eighteen (18) credit hours from the Ocean Science Electives (Areas). See Ocean Science Electives (Areas).

BSc (120 credit hour) Combined Honours in Ocean Sciences and another subject

Students who wish to study Ocean Sciences in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Ocean Sciences may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Ocean Sciences, this requirement is satisfied through OCEA 4201.03 and OCEA 4202.03.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc or BA Combined Honours program in Ocean Sciences and another subject must complete the following:

Ocean Sciences as the primary subject

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03 Physics In and Around You (or PHYC 1300.06)

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or MATH 2060.03/STAT 2060.03: Introductory Probability & Statistics
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03: Principles of Biology, CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, ERTH 1080.03: Geology I/ERTH 1090.03: Geology II

OR Integrated Science Program (see overall Degree Programs description for Ocean Sciences)

A "B+" average (3.3) must be attained in the following 2000-, 3000- and 4000- courses.

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet (minimum grade of "B")
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I/OCEA 2021.03: Tools and Conceptsin Ocean Sciences II (minimum grade of "B")

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- OCEA 3001.03: Introduction to Physical Oceanography or OCEA 4120.03: Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography or OCEA 4130.03: Chemical Oceanography
- OCEA 4110.03: Geological Oceanography
- OCEA 4140.03: Introduction to Biological Oceanography
- OCEA 4000.03: Oceans and Global Change
- OCEA 4201.03 and OCEA 4202.03: Honours Research
- A minimum of twelve (12) credit hours from the Ocean Science Electives (Areas). See Ocean Science Electives (Areas).

Ocean Sciences as the secondary subject

1000 level

- PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03 (or PHYC 1300.06)
- MATH 1000.03/MATH 1010.03
- MATH 1060.03/STAT 1060.03 or MATH 2060.03/STAT 2060.03
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03, CHEM 1011.03/CHEM 1012.03, ERTH 1080.03/ERTH 1090.03

OR Integrated Science Program (see overall Degree Programs description for Ocean Sciences)

A "B+" average (3.3) must be attained in the following 2000-, 3000- and 4000- courses.

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I/OCEA 2021.03: Tools and Concepts in Ocean Sciences II

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- OCEA 3001.03: Introduction to Physical Oceanography or OCEA 4120.03: Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography or OCEA 4130.03: Chemical Oceanography
- OCEA 4110.03: Geological Oceanography
- OCEA 4140.03: Introduction to Biological Oceanography
- OCEA 4000.03: Oceans and Global Change
- A minimum of six credit hours from the Ocean Sciences areas. See Ocean Sciences Electives (Areas).

BSc (120 credit hour) Major in Ocean Sciences

The 120 credit hour Major is suited to students who want to focus on Ocean Sciences, but wish to have a program that is somewhat less constrained than the Honours program. Ocean Science Majors complete a minimum of 42 credit hours in OCEA courses. Research and other experiential learning opportunities are available through laboratories, special topics and experiential courses.

Departmental Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Major program in Ocean Sciences must complete the following courses:

1000 level

- PHYC 1190.03 and PHYC 1290.03: Introduction to Physics or PHYC 1310.03 and PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I and MATH 1010.03: Differential and Integral Calculus II
- STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introductory Probability & Statistics
- Any two of the following three introductory course sequences: BIOL 1010.03/BIOL 1011.03: Principles of Biology, CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, ERTH 1080.03: Geology I/ERTH 1090.03: Geology II

OR Integrated Science Program (see overall Degree Programs description for Ocean Sciences)

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I and OCEA 2021.03: Tools and Concepts in Ocean Sciences II

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- OCEA 3001.03: Introduction to Physical Oceanography or OCEA 4120.03: Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography or OCEA 4130.03 Chemical Oceanography
- OCEA 4110.03: Geological Oceanography
- OCEA 4140.03: Biological Oceanography
- A minimum twelve (12) credit hours from the Ocean Science areas. See Ocean Science Electives (Areas).
- OCEA 4000.03: Oceans and Global Change

BSc or BA (120 credit hour) Double Major in Ocean Sciences and another subject

The Double Major degree program allows students to combine a study of Ocean Sciences with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Ocean Sciences may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Double Major program in Ocean Sciences must complete the following courses:

1000 level

- PHYC 1190.03 and PHYC 1290.03: Introduction to Physics or PHYC 1310.03 and PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I and MATH 1010.03: Differential and Integral Calculus II
- STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introductory Probability & Statistics

- Any two of the following three introductory course sequences: BIOL 1010.03/BIOL 1011.03: Principles of Biology, CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, ERTH 1080.03: Geology I/ERTH 1090.03: Geology II

OR Integrated Science Program (see overall Degree Programs description for Ocean Sciences)

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I and OCEA 2021.03: Tools and Concepts in Ocean Sciences II

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- OCEA 3001.03: Introduction to Physical Oceanography or OCEA 4120.03: Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography or OCEA 4130.03: Chemical Oceanography
- OCEA 4110.03: Geological Oceanography
- OCEA 4140.03: Biological Oceanography
- OCEA 4000.03: Oceans and Global Change
- A minimum twelve (12) credit hours from the Ocean Science Electives (Areas). See Ocean Science Electives (Areas).

Minor in Ocean Sciences

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Ocean Sciences courses at the 2000 level or higher.

Please note that there are prerequisite requirements for entry into upper level Ocean Sciences courses (see Department of Oceanography course listings).

Contact Ocean Sciences for more information.

Ocean Science Areas

Ocean Science Electives

The following is a list of courses that satisfy the Ocean Science Electives (Areas) requirement:

OCEA 3001.03: Introduction to Physical Oceanography (if not taken to fulfill another requirement)
OCEA 3002.03: Introduction to Chemical Oceanography (if not taken to fulfill another requirement)
OCEA 3004.03: The Last Billion Years
OCEA 3420.03: Geochemistry of Aquatic Environments
OCEA 3270.03: The Solid Earth
OCEA 4120.03: Physical Oceanography (if not taken to fulfill another requirement)
OCEA 4130.03: Chemical Oceanography (if not taken to fulfill another requirement)
OCEA 4141.03: Advances in Biological Oceanography
OCEA 4230.03: Biology of Phytoplankton

OCEA 4301.01: Special Topics in Ocean Sciences
OCEA 4302.03: Independent Research in Ocean Sciences
OCEA 4330.03: Benthic Ecology
OCEA 4331.03: History of Marine Sciences
OCEA 4370.03: Deep Sea Biology
OCEA 4380.03: Marine Modelling
OCEA 4401.03: Marine Management I (if not taken to fulfill another requirement)
OCEA 4402.03: Marine Management II (if not taken to fulfill another requirement)
OCEA 4665.03: Hacking the Blue Planet

The following are advanced courses, which also satisfy the Ocean Science Electives (Areas) requirement, and are typically oriented towards primarily graduate students. The typical Ocean Science undergraduate program may not provide the required pre-requisite knowledge without taking additional courses. We suggest you speak with the course instructor before registering for any of these. Also note that these courses may not be offered every year.

OCEA 4160.03: Fisheries Oceanography
OCEA 4210.03: Time Series Analysis
OCEA 4220.03: Numerical Modelling
OCEA 4221.03: Ocean Dynamics
OCEA 4222.03: Estuary, Coast and Shelf Dynamics
OCEA 4250.03: Acoustical Oceanography
OCEA 4290.03: Advanced Chemical Oceanography
OCEA 4311.03: Fluid Dynamics I

The following are courses offered outside the Department of Oceanography, cross-listed as OCEA, and which also satisfy the Ocean Science Electives (Areas) requirement. As with the advanced courses, the typical Ocean Science undergraduate program may not provide the required pre-requisite knowledge without taking additional courses. We suggest you speak with the course instructor before registering for any of these.

OCEA 4411.03: Atmospheric Dynamics I
OCEA 4412.03: Atmospheric Dynamics II
OCEA 4470.03: Introduction to Seismic Imaging
OCEA 4505.03: Atmospheric Physics
OCEA 4520.03: Introduction to Atmospheric Science
OCEA 4541.03: Synoptic Meteorology I
OCEA 4550.03: Synoptic Meteorology II
OCEA 4595.03: Atmospheric Chemistry

See Oceanography section for course descriptions.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Ocean Sciences

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc programs

Students in a BSc program in Ocean Sciences may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Ocean Sciences, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirementssection.

Courses

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

OCEA 1001 Conversations with Ocean Scientists: Part I

CREDIT HOURS: 3
Students engage with working ocean scientists about their research, its relevance, and how to communicate science to different audiences. In addition to regular writing exercises that include journaling, blogging, and lab reporting, students compose a research paper and follow it through the process of submission and peer-review for an in-class journal.
CALENDAR NOTES: College of Arts & Science writing requirement fulfilled if OCEA 1001.03 and OCEA 1002.03 are completed in the same academic year. Credit will not be granted if courses are not completed consecutively.
COREQUISITES: MATH 1000.03 or MATH 1215.03 or MATH 1060.03/STAT 1060.03
EXCLUSIONS: OCEA 1000.06
FORMATS: Lecture | Tutorial

OCEA 1002 Conversations with Ocean Scientists: Part II

CREDIT HOURS: 3
Students engage with working ocean scientists about their research, its relevance, and how to communicate science to different audiences. In addition to regular writing exercises that include journaling, blogging, and lab reporting, students compose a research paper and follow it through the process of submission and peer-review for an in-class journal.
CALENDAR NOTES: College of Arts & Science writing requirement fulfilled if OCEA 1001.03 and OCEA 1002.03 are completed in the same academic year. Credit will not be granted if courses are not completed consecutively.
PREREQUISITES: OCEA 1001.03 (must have been taken in same academic year)
EXCLUSIONS: OCEA 1000.06
FORMATS: Lecture | Tutorial

OCEA 2001 The Blue Planet I

CREDIT HOURS: 3
This course provides a general survey of oceanography. It is designed to develop an understanding of the ocean and of the science of oceanography. Students learn about the geological, chemical, physical and biological processes at work in the sea.
EXCLUSIONS: OCEA 2000.06, OCEA 2850.06, OCEA 2851.03/OCEA 2852.03
FORMATS: Lecture

OCEA 2002 The Blue Planet II

CREDIT HOURS: 3
This course provides a general survey of biological oceanography. Students learn about marine biology and marine ecosystems. Consideration is also given to human impacts.
PREREQUISITES: OCEA 2001.03
EXCLUSIONS: OCEA 2000.06, OCEA 2850.06, OCEA 2851.03/OCEA 2852.03
FORMATS: Lecture

OCEA 2020 Tools and Concepts in Ocean Sciences I

CREDIT HOURS: 3
Students gain practical insights into oceanographic concepts introduced in OCEA 2001.03/2002.03 through lab exercises. Labs focus on navigation and position, instruments and calibration, ocean optics and acoustics, water movement, and basic marine chemistry. Labs involve data acquisition and analyses to develop quantitative skills. Students will become familiar with the 'R' programming language.
COREQUISITES: OCEA 2001.03; or permission of instructor.
PREREQUISITES: MATH 1000.03 OR MATH 1215.03; MATH 1060.03/STAT 1060.03 (or MATH 2060.03/STATS 2060.03); PHYC 1190/1290.03 (or PHYC 1310.03/1320.03 or PHYC 1300.06); at least one of: CHEM 1011.03/1012.03, ERTH 1080.03/1090.03, or BIOL 1010/1011 or (BIOL 1020.03/1021.03); or permission of instructor.
FORMATS: Lab

OCEA 2021 Tools and Concepts II

CREDIT HOURS: 3
Students gain practical insights into oceanographic concepts introduced in OCEA 2001/2002 through lab exercises. Labs focus on particle dynamics and life in the ocean and involve data acquisition and analysis to develop quantitative skills. At the end of the course, students observe a mesocosm to synthesize concepts from both OCEA 2020.03 and OCEA 2021.03. Students will continue to use the 'R' programming language.
COREQUISITES: OCEA 2002.03; or permission of instructor
PREREQUISITES: OCEA 2020.03
FORMATS: Lab

OCEA 2800 Climate Change

CREDIT HOURS: 3
See course description for PHYC 2800.03 in the Physics and Atmospheric Science section of this calendar.
CROSSLISTED: PHYC 2800.03, GEOG 2800.03
EXCLUSIONS: ECON2850.06, PHYC2850.06

OCEA 3001 Introduction to Physical Oceanography

CREDIT HOURS: 3
This course introduces Ocean Physics, focusing on issues of interest to undergraduates in ocean-related disciplines. The approach is to bind facts together with ideas, often starting with thought experiments and proceeding to simple mathematical models.
PREREQUISITES: MATH 1000.03 or permission of Instructor
FORMATS: Lecture

OCEA 3002 Introduction to Chemical Oceanography

CREDIT HOURS: 3
This course provides students with a basic understanding of the composition of seawater and the processes that leads to this composition. This understanding is both qualitative and quantitative through the use of thermodynamic, kinetic and box models to describe the balances that produce the observed chemical distributions.
PREREQUISITES: CHEM 1011.03 and CHEM 1012.03 (or equivalent), OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); OCEA 2020.03 and OCEA 2021.03; or permission of instructor
EXCLUSIONS: OCEA 3170
FORMATS: Lecture

OCEA 3003 Introduction to Field Oceanography

CREDIT HOURS: 3
This course explores interrelationships between living organisms in the sea and the ocean environment. Biological processes are introduced in the context of the physical and chemical oceanography. The emphasis is on sea-going field work on day trips in local marine waters and hands-on laboratory investigation.
CALENDAR NOTES: The OCEA 3003 requirement could be waived in light of equivalent course workload at another institution.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06)

CROSSLISTED: MARI 3003.03, BIOL 3003.03
FORMATS: Lecture

OCEA 3004 The Last Billion Years

CREDIT HOURS: 3
This course examines major events in Earth history. The geological and geochemical evidence will be described, and the hypothesized causes of the events will be examined. The goal of this course is to develop an understanding of the functioning of the earth/ocean/atmosphere system, how it has reacted to perturbations in the past and how it will react to current perturbations in the future.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); or ERTH 1080.03
FORMATS: Lecture

OCEA 3101 Microbial Ecology

CREDIT HOURS: 3
See course description for MARI 3101.03 in the Marine Biology section of this calendar.
CROSSLISTED: BIOL 3101.03, MARI 3101.03
FORMATS: Lecture

OCEA 3270 The Solid Earth

CREDIT HOURS: 3
This course aims to understand the structures and dynamics of the Solid Earth system from the surface to the inner core and from the ocean to the continent. Topics covered will include the internal structure of the Earth, plate tectonics, earthquakes, seismology, gravity, magnetic field, heat flow, and mantle convection.
PREREQUISITES: MATH 1000.03 (or MATH 1215.03) and MATH 1010.03 AND PHYC 1190.03 and 1290.03 (preferred) or PHYC 1310.03 and 1320.03
CROSSLISTED: ERTH 3270.03, PHYC 3270.03
FORMATS: Lecture | Tutorial

OCEA 3420 Geochemistry of Aquatic Environments

CREDIT HOURS: 3
This course is an introduction to the governing principles and processes of aquatic geochemistry. Specific topics will include physical chemistry of natural waters, kinetics of geochemical reactions, the hydrologic cycle, the carbonate system and pH, redox reactions, weathering and mineral-solution equilibria, controls on the composition of rainwater, rivers, and oceans.
PREREQUISITES: CHEM 1011.03/1012.03 or equivalent and ERTH 1080.03/1090.03
CROSSLISTED: ERTH 3420.03
FORMATS: Lecture

OCEA 4000 Oceans and Global Change

CREDIT HOURS: 3
This course examines the role and response of the Oceans to global change, including alterations in currents and circulation, increases in sea level and storm surges, changes in ocean chemistry, modification to the types and patterns of sediment deposition, alterations in the abundances and distributions of organisms, and overall productivity. The course will discuss means of predicting these changes and their effects.
PREREQUISITES: OCEA 3001.03, OCEA 3002.03, OCEA 4110.03, OCEA 4140.03 or permission of Instructor
FORMATS: Lecture

OCEA 4110 Geological Oceanography

CREDIT HOURS: 3
This course provides a broad survey of geology and geophysics as they apply to the oceans. The course content covers methods and observations with quantitative applications to an understanding of marine geophysical and geological processes. The topics covered include the origin of ocean basins, plate tectonics, heat flow, gravity, and magnetics (1/3 of the course); patterns and processes of sediment transport and deposition, and the paleoceanographic reconstruction of past climates (2/3 of the course).
CALENDAR NOTES: Training in calculus and statistics will prove to be advantageous to the student’s outcome.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06), OCEA 2020.03, OCEA 2021.03, and ERTH 1080.03; or permission of instructor.
CROSSLISTED: OCEA 5110.03, ERTH 4110.03
FORMATS: Lecture

OCEA 4120 Physical Oceanography
CREDIT HOURS: 3
This course introduces undergraduate students to the physical properties and dynamics of the oceans. Topics range from global circulation down to the small scales of turbulence. Fact and theory are blended throughout. Quantitative problem solving is emphasized in assignments.
PREREQUISITES: MATH 1000.03, MATH 1010.03, classic calculus or equivalent, and permission of the instructor
RESTRICTIONS: Third- and fourth-year students only
EXCLUSIONS: OCEA 5120.03
FORMATS: Lecture

OCEA 4130 Chemical Oceanography
CREDIT HOURS: 3
This course covers the major and minor constituents of sea water, the controls on its chemical composition, nutrient cycling, gas exchange and the influence of the oceans on atmospheric chemistry. Other topics included are chemical tracers, and radiochemical dating methods, stable isotope studies, chemical speciation and chemical models of sea water.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06), and OCEA 3002.03, or instructor's consent
EXCLUSIONS: OCEA 5130.03
FORMATS: Lecture | Lab

OCEA 4140 Biological Oceanography
CREDIT HOURS: 3
The goal is to describe how physical, chemical and biological processes interact to determine the species composition, biogeochemical activities, and trophic structure of marine communities. Outstanding problems currently facing biological oceanographers and earth systems scientists are discussed, as are current attempts and methodologies to address them.
CALENDAR NOTES: Biological oceanography is a quantitative science and extensive problem solving is required. Students should be competent in mathematics through calculus. Permission of instructor is required.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); or permission of instructor
CROSSLISTED: OCEA 5140.03, BIOL 4661.03, 5661.03, MARI 4661.03
FORMATS: Lecture

OCEA 4141 Advances in Biological Oceanography
CREDIT HOURS: 3
This course explores major advances in biological oceanography through analysis and discussion of influential historical and recent cutting-edge papers from the scientific literature. The course will be delivered through a combination of student presentations, class discussions, and invited speakers.
CALENDAR NOTES: OCEA 4140 may be completed either before, or concurrently with, OCEA 4141
COREQUISITES: OCEA 4140.03 or BIOL 4661.03 or MARI 4661.03
PREREQUISITES: 4th year standing or permission of the instructor
CROSSLISTED: BIOL 4141.03, MARI 4141.03
EXCLUSIONS: OCEA 5140.03
FORMATS: Lecture

OCEA 4201 Honours Research - Part I
CREDIT HOURS: 3
This course is required for students enrolled in the Concentrated Honours in Ocean Sciences, and certain streams of the Combined Honours in Oceanography program. It consists of a research project under the supervision of a faculty member, and should include an original component in oceanography. Students are required to participate in weekly meetings of the class and make a presentation (oral or poster) at the annual CDOGS meeting in March.
CALENDAR NOTES: Credit can only be given for this course if OCEA 4201.03 and OCEA 4202.03 are completed in consecutive terms. Partial credit cannot be given for a single term.
PREREQUISITES: Permission given by instructor.
EXCLUSIONS: OCEA 4200.06

OCEA 4202 Honours Research - Part II
CREDIT HOURS: 3
This course is required for students enrolled in the Concentrated Honours in Ocean Sciences, and certain streams of the Combined Honours in Oceanography program. It consists of a research project under the supervision of a faculty member, and should include an original component in oceanography. Students are required to participate in weekly meetings of the class and make a presentation (oral or poster) at the annual CDOGS meeting in March.
CALENDAR NOTES: Credit can only be given for this course if OCEA 4201.03 and OCEA 4202.03 are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Permission given by instructor.

EXCLUSIONS: OCEA 4200.06

OCEA 4210 Time Series Analysis in Oceanography and Meteorology

CREDIT HOURS: 3
See course description for STAT 4390.03 in the Statistics section of this calendar.
PREREQUISITES: Instructor's consent
CROSSLISTED: STAT 4390.03
EXCLUSIONS: STAT 5390.03, OCEA 5210.03
FORMATS: Lecture

OCEA 4220 Numerical Modelling of Atmospheres and Oceans

CREDIT HOURS: 3
This course discusses numerical modelling techniques for simulating atmospheric and oceanic circulations. Material includes: review of governing equations; finite difference, finite element, and spectral methods; Eulerian, semi-implicit and semi-Lagrangian time integration techniques; accuracy and stability analyses; data assimilation and ensemble prediction methods; and boundary treatment for ocean models.
PREREQUISITES: 1000-level calculus course and instructor's consent
CROSSLISTED: OCEA 5220.03
FORMATS: Lecture

OCEA 4221 Ocean Dynamics

CREDIT HOURS: 3
An advanced course for students in Physical Oceanography and Atmospheric Science that studies the basic equations governing rotating geophysical flows, plus applications. Topics include geostrophy, conservation of potential vorticity, quasi-geostrophic dynamics, geostrophic adjustment, response to surface forcing (steady and unsteady).
CALENDAR NOTES: Fluid dynamics recommended
PREREQUISITES: Permission of instructor
CROSSLISTED: OCEA 5221.03
FORMATS: Lecture

OCEA 4222 Estuary, Coast and Shelf Dynamics

CREDIT HOURS: 3
This course discusses the physical processes that operate on continental shelves to create long waves, tides, tidal mixing, themohaline circulation, wind forcing, upwelling, etc. Both observations and models for these processes are discussed.
PREREQUISITES: OCEA 4120.03
CROSSLISTED: OCEA 5222.03
FORMATS: Lecture

OCEA 4230 Biology of Phytoplankton

CREDIT HOURS: 3
This is an upper-division course on the phytoplankton in the context of their evolutionary history and ecological diversity. It has an emphasis on their adaptations and acclimation to different environments and their role in food webs and biogeochemical cycling.
PREREQUISITES: MATH 1000.03 and 1010.03 or MATH 1215.03, OCEA 2001.03 and 2002.03; or permission of Instructor.
CROSSLISTED: BIOL 4662.03, OCEA 5230.03, MARI 4662.03
FORMATS: Lecture

OCEA 4250 Acoustical Oceanography

CREDIT HOURS: 3
This class covers the basic theory of sound propagation and scattering in the ocean environment, and the applications to acoustic remote sensing of the ocean interior. Topics include: normal modes; ray theory; scattering from particles, bubbles and biota; sonar theory and operation.
PREREQUISITES: MATH 2001.03 and 2002.03 or equivalent and instructor's consent
CROSSLISTED: OCEA 5250.03
FORMATS: Lecture

OCEA 4290 Advanced Chemical Oceanography

CREDIT HOURS: 3
This course presents research topics in chemical oceanography, taught as 3-4 self-contained modules. Examples include, the oceanic C02 system and its relation to climate change, chemical reactions in sediments, photochemistry in the upper ocean, and inferring the chemistry of ancient oceans through the isotope record in sediments.
PREREQUISITES: Students will have completed all required 3000 level courses in Oceanography, OCEA 4130, and have the consent of the instructor of this course.
CROSSLISTED: OCEA 5290.03
RESTRICTIONS: Open only to students enrolled in the combined Honours in Chemistry and Oceanography

OCEA 4301 Special Topics in Ocean Science

CREDIT HOURS: 3
This course provides upper level undergraduate students with the opportunity to study an area of Ocean Science that is not offered through the existing curriculum. Students consult with a faculty member to arrange the topic of study and together develop course proposal. The course proposal must be approved by the course coordinator before the student is permitted to register.
CALENDAR NOTES: Instructors are regular faculty members in the Department of Oceanography and serve as supervisors of the Special Topics course. A maximum of 3 credit hours can be taken as a Special Topics course. The Special Topics course cannot replace one of the required core OCEA courses. The course coordinator is the Chair of the Curriculum Committee or designate. The student, with approval from the instructor, must submit the the Registration Form and other documents to the course coordinator no later than 3 days after the start of the term in which the student wishes to register. For Registration Form and more information, please visit www.dal.ca/faculty/science/oceanography/programs.html
PREREQUISITES: OCEA 2001.03, OCEA 2002.03, OCEA 2020.03, OCEA 2021.03, and at least two 3000-level OCEA course. An average grade of 'B' (GPA 3) must be attained in these OCEA courses. Signature required from the course coordinator.
RESTRICTIONS: Material produced during a Special Topics course cannot fulfill the requirements for an Honours thesis. For additional restrictions, please see http://
EXCLUSIONS: E3
FORMATS: Other (explain in comments)

OCEA 4302 Independent Research in Ocean Science

CREDIT HOURS: 3
Students in their 3rd or 4th year of study conduct supervised, independent research in Ocean Science. The student and a faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. The course outline must be approved by the course coordinator before the student is permitted to register. The course coordinator is the Chair of the Curriculum Committee or designate.
CALENDAR NOTES: This course builds on field work, lab experiment(s) or measurements, literature meta-analysis, and/or modeling exercise(s). The course is to be started and completed within one term. Supervisors are regular faculty in the department of Oceanography who conduct research in an area related to the course. A maximum of 3 credit hours can be taken as an Independent Research course. The Independent Research course cannot replace one of the required core OCEA courses. The student, with approval from the supervisor, must submit the the Registration Form and other documents to the course coordinator no later than 3 days after the start of the term in which the student wishes to register. For Registration Form and more information, please visit www.dal.ca/faculty/science/oceanography/programs.html
PREREQUISITES: OCEA 2001.03, OCEA 2002.03, OCEA 2020.03, OCEA 2021.03, and at least one 3000-level OCEA course. An average grade of 'B' average (GPA 3) must be attained in these OCEA courses. Signature required from the course coordinator.
RESTRICTIONS: Material prepared for an Independent Research course cannot be used in an Honours thesis. Students cannot take OCEA 4302.03 and the Honours course (OCEA 4201.03 and OCEA 4202.03) in the same academic year. For additional restrictions, please see http://
EXCLUSIONS: E2
FORMATS: Other (explain in comments)

OCEA 4311 Fluid Dynamics I

CREDIT HOURS: 3
An introduction to the theory of fluid dynamics, with some emphasis on geophysically important aspects. Contents: tensor mathematics, flow kinematics, equations of motion, viscous flow, potential flow, convection, turbulence, and basic aerodynamics. Occasional reference will be made to current research topics, especially those in Physical Oceanography.
PREREQUISITES: Intended for first-year graduate students in physical oceanography, but graduate students or senior undergraduates in Mathematics or Physics are invited to take it (subject to instructor approval)
CROSSLISTED: PHYC 4311.03,
EXCLUSIONS: PHYC 5311.03, OCEA 5311.03
FORMATS: Lecture

OCEA 4320 Seafloor Mapping

CREDIT HOURS: 3
A fourth-year undergraduate course on ocean mapping technologies and techniques for the study of the seabed environment. Acoustic remote sensing technologies, ground-validation techniques, and data processing and integration methods using geospatial software are covered. The focus of the course is on how these approaches are used to study and map the geology and biology of the ocean floor.
PREREQUISITES: ENVS 3500.03/ERTH 3500.03./GEOG 3500.03, or permission of instructor

CROSSLISTED: ERTH 4320.03
EXCLUSIONS: OCEA 5320.03
FORMATS: Lecture | Lab

OCEA 4330 Benthic Ecology

CREDIT HOURS: 3
A fourth year undergraduate course on major topics of benthic ecology, such as animal-sediment relationships, ecosystem processes and geospatial patterns of structure and dynamics of benthic communities. Courses consist of two lectures per week and one journal discussion session. The last three weeks are devoted to a class research project.
PREREQUISITES: OCEA 2001.03, OCEA 2002.03, and BIOL 2060.03, or permission of instructor
CROSSLISTED: BIOL 4666.03, MARI 4666.03
FORMATS: Lecture

OCEA 4331 History of Marine Sciences

CREDIT HOURS: 3
In this course, we will trace the history of marine sciences from the ancients to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped human understanding of the oceans.
PREREQUISITES: Instructor’s consent
CROSSLISTED: BIOL 4664.03, OCEA 5331.03, SCIE 4001.03, HIST 3073.03, HSTC 3331.03, MARI 4664.03
FORMATS: Lecture

OCEA 4360 Sea Ice

CREDIT HOURS: 3
This course is an advanced undergraduate course that will provide an overview of the physics of sea ice, notably those aspects which relate importantly to oceanography. Topics will include polar oceanography; sea ice composition, growth, mechanics and dynamics; ice features including polynyas, leads, the marginal ice zone, and landfast ice; spatio-temporal variability and trends in sea ice; observing and modelling sea ice; Indigenous perspectives on sea ice; and biogeochemistry of sea ice.
CALENDAR NOTES: Recommended familiarity with calculus, differential equations, and intro physical oceanography
PREREQUISITES: (OCEA 3001 or OCEA 4120) and (MATH 2002 or MATH 2120), or permission of instructor
EXCLUSIONS: OCEA 5360
FORMATS: Lecture

OCEA 4370 Deep Sea Biology

CREDIT HOURS: 3
We focus on the biology of organisms inhabiting the deep sea: physiological adaptations to the physicochemical and geological environment; spatial and temporal distributions of biological assemblages; and regulatory factors of these assemblages, such as currents, food availability, reproduction and recruitment. Also, we delve into unique habitats, such as hydrothermal vents.
PREREQUISITES: BIOL 2060.03, OCEA 2001.03 and OCEA 2002.03
CROSSLISTED: BIOL 4370.03, MARI 4370.03,
EXCLUSIONS: OCEA 5370.03

OCEA 4380 Marine Modelling

CREDIT HOURS: 3
This course provides an overview of modelling techniques applied to biological and biogeochemical topics in oceanography, including the philosophy of modelling, population dynamics, linear and non-linear regression analysis, Principal Component Analysis, numerical approaches to solving differential equations, and visualization. All techniques are introduced with concrete examples and applied to specific problems.
PREREQUISITES: MATH 1000.03; MATH 1010.03; OCEA 2020.03; OCEA 2021.03; or permission of instructor.
CROSSLISTED: OCEA 5380.03
FORMATS: Lecture

OCEA 4401 Marine Management I

CREDIT HOURS: 3
This course exposes students with a marine science background to the increasing need for marine scientists and ocean managers and policy makers to work collaboratively to address the interdisciplinary nature of the problems confronting the world's oceans. This course is restricted to 4th year students with a marine science background.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06)

RESTRICTIONS: Restricted to 4th year students
FORMATS: Lecture

OCEA 4402 Marine Management II

CREDIT HOURS: 3
Students focus on the linkages between ocean governance and ocean science to understand the role of marine science in informing and influencing decisions affecting coastal and marine space and resources at multiple geographic and jurisdictional scales. This course is restricted to 4th year students with a marine science background.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.6); OCEA 4401.03
RESTRICTIONS: Restricted to 4th year students
FORMATS: Lecture

OCEA 4411 Atmospheric Dynamics I

CREDIT HOURS: 3
See course description for PHYC 4411.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: PHYC 2140.03, or instructor's consent
CROSSLISTED: PHYC 4411.03
EXCLUSIONS: OCEA 5411.03.PHYC 5411.03

OCEA 4412 Atmospheric Dynamics II

CREDIT HOURS: 3
See course description for PHYC 4412.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: OCEA 4411.03/5411.03 or PHYC 4411.03/5411.03, or instructor's consent
CROSSLISTED: OCEA 5412.03, PHYC 4412.03/ PHYC 5412.03

OCEA 4470 Introduction to Seismic Imaging

CREDIT HOURS: 3
See course description for ERTH 4470.03 in the Earth Sciences section of this calendar.
PREREQUISITES: ERTH 2270.03, or instructor's consent
CROSSLISTED: OCEA 5470.03, ERTH 4470.03/5470.03

OCEA 4505 Atmospheric Physics

CREDIT HOURS: 3
See course description for PHYC 4505.03 in the Physics & Atmospheric Science section of this calendar.
CROSSLISTED: OCEA 5505, PHYC 4505/5505

OCEA 4520 Introduction to Atmospheric Science

CREDIT HOURS: 3
See course description for PHYC 4520.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: PHYC 2140.03, or instructor's consent
CROSSLISTED: OCEA 5520.03, PHYC 4520.03/5520.03

OCEA 4541 Synoptic Meteorology I

CREDIT HOURS: 3
See course description for PHYC 4540.03 in the Physics and Atmospheric Science section of this calendar.
COREQUISITES: OCEA 4411.03
PREREQUISITES: At least one third-year Physics course
CROSSLISTED: PHYC 4541.03
EXCLUSIONS: OCEA 5541.03 PHYC5541.03

OCEA 4550 Synoptic Meteorology II

CREDIT HOURS: 3
See course description for PHYC 4550.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: OCEA 4541.03, or PHYC 4540
CROSSLISTED: OCEA 5550.03, PHYC 4550.03/5550.03

OCEA 4595 Atmospheric Chemistry
CREDIT HOURS: 3
See course description for PHYC 4595.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: PHYC 2140.03 and a first-year chemistry course
CROSSLISTED: PHYC 4595.03,, CHEM 4595.03
EXCLUSIONS: OCEA 5595.03, PHYC 5595.03

OCEA 4665 Hacking the blue planet: The scientific and social dimensions of ocean fertilization
CREDIT HOURS: 3
See course description for MARI 4665.03 in the Marine Biology section of this calendar.
PREREQUISITES: One of the BIOL 3101.03, OCEA 2000X/Y.06, ERTH 3601.03, BIOL 3060.03 or instructor's permission
CROSSLISTED: MARI 4665.03
EXCLUSIONS: BIOL 5665.03, OCEA 5665.03
FORMATS: Lecture | Discussion

Introduction

How does the world work? What are the rules that govern how things happen? These are the questions that intrigue physicists who try to explain the great diversity of nature with the fewest and simplest hypotheses. They discover that there are underlying similarities between things that look very different on the surface. Good physicists have the imagination to see these similarities, coupled with the understanding of the fundamentals of their science to determine the rules that govern the universe. Our programs are designed to allow you to learn physics in a systematic manner and understand how physics applies to the world around us.

Physicists are employed in many areas in universities, government departments and industry and are valued for their ability to discover and apply fundamental insights to a variety of situations.

This intellectual rigor can be applied in many fields beyond physics including meteorology, engineering, education, law, medicine, dentistry, health sciences, and business. Because practicing physicists often have knowledge of several fields, we have a number of combined programs with other science disciplines to provide that broader approach.

Our Honours program is our most comprehensive program aimed at those intending to become career physics specialists. Our various major and combined programs described below provide the opportunity to pursue a broad education in both physics and other areas.

First Year Courses

PHYC 1400 is a general interest course and is not acceptable as a prerequisite for further courses in physics. PHYC 1190/PHYC 1290, and PHYC 1310/PHYC 1320 both give a general introduction to physics, but each has its own particular approach and selection of topics.

PHYC 1190/PHYC 1290 is primarily for students intending to make a study of a physical science or engineering; it has regular labs, occasional tutorials, uses calculus, and is accepted as a prerequisite for advanced physics courses. Nova Scotia Grade XII Physics or its equivalent is a prerequisite. It is recommended that PHYC 1190/PHYC 1290 be taken consecutively, but PHYC 1190 is not a prerequisite for PHYC 1290.

PHYC 1310/PHYC 1320 is an algebra-based introduction to physics that is oriented towards the life and health sciences (e.g., biology, neuroscience, kinesiology, pre-medicine, pre-dentistry and health sciences). Although this course is intended for students requiring a Physics credit but who are not advancing in Physics, it is accepted as a prerequisite for advanced physics courses when MATH 1000.03 and MATH 1010.03 are taken concurrently. It is a good preparation for the Medical College Admission Test (MCAT). The course incorporates labs and tutorials. Nova Scotia Grade 12 Physics or its equivalent is highly recommended.

Students who are participating in the Integrated Science Program, and are interested in continuing in Physics, should consult the Undergraduate Advisor.

Second Year Courses

There are five 2nd year core physics courses (PHYC 2050, PHYC 2060, PHYC 2150, PHYC 2510, PHYC 2515). These courses are also suitable for students in other disciplines who would like to enhance their knowledge of physics. In particular, PHYC 2150 provides an opportunity to gain more laboratory experience, which is extremely valuable in many jobs.

Third and Fourth Year Courses

Not all courses are offered each year. Students should take careful note of the year in which each of these courses is planned to be offered. This information can be found at the department website dal.ca/physics

Prizes are awarded to the top students in each year of the program. Please refer to Awards.

Degree Programs

The Department of Physics and Atmospheric Science offers the following degree programs in Physics

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Major combined with a Diploma in Meteorology*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit) Minor in Physics
- Minor in Physics
- One year Diploma in Meteorology

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Physics undergraduate academic advisor.

Staff

Dean
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chair of Department and George Munro Professor of Physics
Hill, Ian. (902) 494-3897 ian.hill@dal.ca

Undergraduate Advisor Coordinator
Bennett, P. (902) 494-2313 philip.bennett@dal.ca

Coordinator, Atmospheric Science
Folkins, I. (902) 494-1292 ian.folkins@dal.ca

Coordinator, Diploma in Meteorology
Folkins, I. (902) 494-1292 ian.folkins@dal.ca

Graduate Coordinator
Duck, T. (902) 494-1456 tduck@dal.ca

Co-op Academic Advisor
Labrie, D. (902) 494-2322 daniel.labrie@dal.ca

Professors Emeriti
Dahn, J. R., BSc (Dalhousie), MSc, PhD (UBC), FRSC, O.C., Principle Investigator-NSERC/Tesla Canada/Dalhousie Alliance Grant
Drummond, J. R., BA, MA, PhD (Oxford), FRSC, Canada Research Chair, Remote Sounding of Atmospheres
Jericho, M. H., BSc, MSc (Dalhousie), PhD (Cantab), FRSC
Rotermund, H. H., PhD(Berlin)
Stroink, G., BSc, MSc (Delft), PhD (McGill), PEng

Professors Research
Dunlap, R. A., BS (Worcester), AM (Dart), PhD (Clark), Research
Geldart, D. J. W., BSc (Acadia), PhD (McMaster), FRSC, Research
Kreuzer, H. J., MSc, DSc (Bonn), FRSC, A.C. Fales Professor of Theoretical Physics

Professors
Beyea, S., PhD (UNB), primary appointment with Diagnostic Radiology
Chapman, S. C., BSc, MSc, PhD (UBC)
Hall, K. C., MSc, PhD (Toronto), Canada Research Chair, Ultrafast Science
Hewitt, K., BSc (Toronto), PhD (SFU), PPhys
Hill, I. G., BSc, PhD (Queen's), George Munro Professor of Physics
Johnson, E.R. BSc (Carleton, PhD (Queen's)
Kreplak, L., MSc (Supelec), PhD (Univ Paris XI), cross appointment with Biomedical Engineering
Monchesky, T., BASc (Toronto), PhD (SFU)
Robar, J., MSc (McGill), PhD (UBC), primary appointment with Radiation Oncology
Rutenberg, A. D., BSc (Toronto), PhD (Princeton)
Zwanziger, J. W., BA (Chicago), PhD (Cornell), Canada Research Chair in NMR Studies of Materials, primary appointment with Chemistry

Associate Professors
Bardouille, T., BSc (Queens), MASc (Dalhousie), PhD (Toronto)
Duck, T., BSc, PhD (York)
Chang, R. Y. -W., BASc, MASc, PhD (Toronto), Canada Research Chair in Atmospheric Science
Folkins, I., BSc (Dalhousie), MSc, PhD (Toronto)
Kyriakidis, J., BSc, MSc (Dalhousie), PhD (Basel)
Labrie, D., BSc (Montreal), MSc, PhD (McMaster)
Maksym, G. N., PhD (McGill), primary appointment in the School of Biomedical Engineering
Maassen, J., BEng, MASc (Ecole Polytechnique de Montreal), PhD (McGill)
Obrovac, M., PhD (Dalhousie), primary appointment in Chemistry

Assistant Professors
Bennett, P., PhD (UBC), St. Mary's
Brewer, K., PhD (Dalhousie), Primary appointment with Department of Diagnostic Radiology
Chang, R. Y. -W., BASc, MASc, PhD (Toronto), Canada Research Chair in Atmospheric Science
Cherpak, A., PhD (Carleton), Primary appointment with Department of Radiation Oncology
Chytyk-Praznik, K., PhD (Manitoba), Primary appointment with Department of Radiation Oncology
Hashmi, J., PhD (Toronto), Primary appointment with Department of Anesthesia, Pain Management and Perioperative Medicine
Helbig, M., BSc (Univerity of Freiburg), MSc (University of Hamburg), PhD (Universite de Montreal)
Maassen, J., BEng, MASc (Ecole Polytechnique de Montreal), PhD (McGill)
Metzger, M., MSc (Technical University of Munich), PhD (Technical University of Munich)
Syme, A., PhD (Alberta), Primary appointment with Department of Radiation Oncology
Thomas, C., BSc (St. Mary's), MSc (Dalhousie), PhD (Western), Primary appointment with Department of Radiation Oncology
Xiao, P., BSc (Beihang University), PhD (University of Texas)
Yang, C., BSc (Nanjing), PhD (Chinese Academy of Sciences), Tesla Canada Chair
Yewondwossen, M., PhD (Dalhousie), Primary appointment with Department of Radiation Oncology

Instructors
de Vet, S. J., MSc (Dalhousie), PhD (Western) (Senior Instructor)
Hartery, S., BSc (Dalhousie), PhD (Canterbury)
Payne, S. H., BSc, PhD (Canterbury) (Senior Instructor)

Adjunct Professors
Bennett, J. C., PhD (Waterloo), Physics, Acadia
***Dahn, J. R.,** BSc (Dalhousie), MSc, PhD (UBC), FRSC, O.C., Principle Investigator-NSERC/Tesla Canada/Dalhousie Alliance Grant
Grabtchak, S., PhD (UPEI)
Hayes, P., PhD (Northwestern)
Isaac, G., BSc, MSc, PhD (McGill)
***Lesins, G. B.,** PhD (Toronto)
Nadeau, D., PhD (EPFL) Environmental Fluid Mechanics
Pierce, J., BS (Northeastern), PhD (Carnegic Mellon), Colorado State
Plumer, M. B.Sc. (St. Francis Xavier), M.Sc. (Dalhousie), Ph.D (Toronto**.)**
Lemmon, M., BSc (Mount Allison), MSc (Dalhousie)
***White, M. A**., BSc (Univ Western Ontario), PhD (McMaster), OC, FRSC, Harry Shirreff Professor of Chemical Research (Emerita)

*Retired

Postdoctoral Fellows/Research Associates
Abeysooriya, S., PhD (Deakin)
Aynehband, S., PhD (Sharif)
Bunyanidhi, P., PhD (Vidyasirimedhi)
Hebri, D., PhD (IAS)
Singh, P., PhD (Punjabi)

Zhang, L., PhD (Texas)

BSc or BA (120 credit hour) Concentrated Honours in Physics
Students who want a challenging program resulting in a broad and in-depth background in Physics, including an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in the Physics courses listed below with a minimum GPA of 3.0, and write a research-based Honours thesis. The thesis requirement is satisfied through completion of PHYC 4800.03/PHYC 4850.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Physics.

Admission to Honours
Students must apply for admission to Honours programs. Students considering Honours in Physics should consult with a Physics Undergraduate Advisor early in their second year.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Physics must complete the following courses:

1000 level

- PHYC 1190.03 Introduction to Physics or PHYC 1310.03 Physics In and Around You I
- PHYC 1290.03: Introduction to Physics or PHYC 1320.03: Physics In and Around You II
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Or Integrated Science Program (options above)

2000 level

- PHYC 2060.03: Oscillations and Waves
- PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics
- PHYC 2050.03: Computer Simulation in Science
- PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I
- MATH 2120.03: Methods for Ordinary Differential Equations

3000 and 4000 level

- PHYC 3000.03: Experimental Physics I
- PHYC 3010.03: Experimental Physics II
- PHYC 3640.03: Quantum Physics I
- PHYC 3590.03: Advanced Classical Mechanics
- PHYC 3200.03: Thermodynamics
- PHYC 3210.03: Statistical Mechanics
- PHYC 3100.03: Electrodynamics
- MATH 3120.03: Differential Equations
- PHYC 4151.03: Quantum Physics II
- PHYC 4160.03: Mathematical Methods of Physics
- PHYC 4800.03: Honours Research Project I
- PHYC 4850.03: Honours Research Project II
- An additional six credit hours of 3000 or 4000 level PHYC courses, other than PHYC 4540.03: Synoptic Meteorology I and PHYC 4550.03: Synoptic Meteorology II

* Up to 30 credit hours of general electives may be chosen from the Faculty of Engineering.

Honours Qualifying Exam

The Honours Qualifying Exam grade is the average of best ten grades obtained in 3000 and 4000 level Honours courses.

BSc or BA (120 credit hour) Combined Honours in Physics and another subject

Students who wish to study Physics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Physics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. In recent years, students have combined Physics with

- Mathematics
- Biology

- Earth Sciences
- Chemistry
- Computer Science
- History of Science and Technology
- Contemporary studies

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Physics, this requirement is satisfied through PHYC 4800.03/PHYC 4850.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Physics as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Physics and another subject must complete the courses listed below. Elective Physics courses should be chosen in consultation with a Physics undergraduate advisor. If courses are not selected carefully, students in a Combined Honours program may not be qualified to enter a regular graduate program in Physics after graduation.

Physics as the primary or secondary subject

1000 level

- PHYC 1190.03 Introduction to Physics or PHYC 1310.03 Physics In and Around You I
- PHYC 1290.03: Introduction to Physics or PHYC 1320.03: Physics In and Around You II
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus II
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Or Integrated Science Program (options above)

2000 level

- PHYC 2060.03: Oscillations and Waves
- PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics
- PHYC 2050.03: Computer Simulation in Science
- PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I
- MATH 2120.03: Methods for Ordinary Differential Equations

3000 and 4000 levels

- A minimum of 18 credit hours in PHYC courses at or above the 3000 level

If Physics is the primary subject

- An additional six credit hours at or above the 3000 level, which may be PHYC 4800.03 and PHYC 4850.03: Honours Research Project
- Note: PHYC 3000.03 Experimental Physics I and PHYC 3010.03 Experimental Physics II are pre-requisites for PHYC 4800.03 and 4850.03 Honours

BSc or BA (120 credit hour) Major in Physics

The 120 credit hour Major is suited to students who want to focus on *Physics*, but wish to have a program that is somewhat less constrained than the Honours program. Physics Majors complete a minimum of 42 credit hours in Physics courses past the 1000 level

as listed below. Research and other experiential learning opportunities are available through laboratories, special topics and experiential classes.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Physics.

Departmental requirements

In addition to fulfilling the requirements outline in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Physics must complete the following courses:

1000 level

- PHYC 1190.03 Introduction to Physics or PHYC 1310.03 Physics In and Around You I
- PHYC 1290.03: Introduction to Physics or PHYC 1320.03: Physics In and Around You II
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus II
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Or Integrated Science Program (options above)

2000 level

- PHYC 2060.03: Oscillations and Waves
- PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics
- PHYC 2050.03: Computer Simulation in Science
- PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I
- MATH 2120.03: Methods for Ordinary Differential Equations
- Six additional physics credit hours at or above the 2000 level

3000 and 4000 level

- A minimum of 21 additional physics credit hours at or above the 3000 level

BSc (120 credit hour) Major in Physics combined with a Diploma in Meterology

This is an integrated Physics/Meteorology program. In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students must complete the following courses:

1000 level

- PHYC 1190.03 Introduction to Physics or PHYC 1310.03 Physics In and Around You I
- PHYC 1290.03: Introduction to Physics or PHYC 1320.03: Physics In and Around You II
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Or Integrated Science Program (options above)

2000 level

- PHYC 2060.03: Oscillations and Waves
- PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics

- PHYC 2050.03: Computer Simulation in Science
- PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I
- MATH 2120.03: Methods for Ordinary Differential Equations
- Three additional physics credit hours at or above the 2000 level

3000 level

- PHYC 3100.03 or PHYC 3210.03: Statistical Mechanics or PHYC 3250.03: Computational Methods in Physics or PHYC 3590.03: Advanced Classical Mechanics or PHYC 4311.03: Fluid Dynamics I
- PHYC 3200.03: Thermodynamics

4000 level: Meteorology course requirements

- PHYC 4505.03: Atmospheric Physics
- PHYC 4570.03: Light Scattering, Radiative Transfer, and Remote Sensing
- PHYC 4540.03: Synoptic Meteorology I
- PHYC 4550.03: Synoptic Meteorology II
- PHYC 4411.03: Atmospheric Dynamics I
- PHYC 4412.03: Atmospheric Dynamics II
- PHYC 4520.03: Introduction to Atmospheric Science
- PHYC 4595.03: Atmospheric Chemistry
- OCEA 4120.03: Physical Oceanography
- OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans (OR another three credit hour course approved by Program Coordinator)

Students are encouraged to ensure that their program meets the requirements for the 90 credit hour BSc by the end of Year 3.

After completion of the Major in Physics and Diploma in Meteorology program, students are eligible to be considered for admission to a graduate program in Atmospheric Science at Dalhousie.

BSc or BA (120 credit hour) Double Major in Physics and another subject

The Double Major degree program allows students to combine a study of Physics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Physics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Physics as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Physics and another subject must complete the following:

Physics as the primary or secondary subject

1000 level

- PHYC 1190.03 Introduction to Physics or PHYC 1310.03 Physics In and Around You I
- PHYC 1290.03: Introduction to Physics or PHYC 1320.03: Physics In and Around You II
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus II
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Or Integrated Science Program (options above)

2000 level

- PHYC 2060.03: Oscillations and Waves
- PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics
- PHYC 2050.03: Computer Simulation in Science
- PHYC 2510.03: Electricity and Magnetism

3000 and 4000 levels

- A minimum of 18 credit hours in PHYC courses at or above the 3000 level

BSc or BA (90 credit hour) Minor in Physics

The 90 credit hour degree with Minor in Physics is appropriate for students who want to study some Physics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Physics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc in Physics is usually the preferred option for students who wish to combine studies in Physics with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program below). Students with a 90 credit hour BSc in Physics may also want to consider the one year Diploma in Meteorology program.

See the Minor in Physics section of this Calendar.

Diploma in Meteorology

Students with a general 90 credit hour BSc degree in Physics, Mathematics, Chemistry, or other quantitative disciplines, may apply for admission into a one year Diploma in Meteorology program, provided they have completed the appropriate Physics and Mathematics courses. A strong background in Physics and Mathematics is necessary, and courses taken should cover Vector Calculus and differential equations. More information on the Diploma in Meteorology program is available at http://atm.dal.ca/Diploma_in_meteorology/.

Course requirements

- PHYC 4505.03: Atmospheric Physics/PHYC 4570.03: Light Scattering, Radiative Transfer, and Remote Sensing
- PHYC 4540.03: Synoptic Meteorology I/PHYC 4550.03: Synoptic Meteorology II
- PHYC 4411.03: Atmospheric Dynamics I/PHYC 4412.03: Atmospheric Dynamics II
- PHYC 4520.03: Introduction to Atmospheric Science/PHYC 4595.03: Atmospheric Chemistry
- OCEA 4120.03:Physical Oceanography
- OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans or another three credit hour course approved by Program Coordinator

After completion of the Diploma program, students are eligible to be considered for admission to a graduate program in Atmospheric Science at Dalhousie.

Minor in Physics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Physics is available to students in the Faculty of Science.

Departmental Requirements

A minimum of 18 credit hours in Physics (PHYC) courses at the 2000 level or higher, to a maximum of 36 credit hours, not including Physics (PHYC) courses that do not count toward a 120 credit hour degree in Physics.

Contact Physics and Atmospheric Science for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Physics

Co-op Academic Advisor: Dr. D. Labrie (daniel.labrie@dal.ca) & Dr. Chongyin Yang (c.yang@dal.ca)

The Science Co-op degree option enables students to apply their academic knowledge directly while providing them with work experience that assists in making educated career choices. Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Physics, or in Combined Honours or Double Major programs with Physics as the primary subject. Further information details on Science Co-op can be found in the academic calendar under Work-Integrated Learning & Co-operative Education and the Co-op office's website at dal.ca/wil For more information on Co-op Education in Physics, please see the departmental webpage www.dal.ca/academics/programs/undergraduate/pas/what_will_I_learn/coop_work_term.html.

Minors available to students in Physics

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Physics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Physics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to student enrolled in a BSc or BA in Physics include:

- Certificate in Information Technology
- Certificate in Materials Science
- Certificate in Science Leadership and Communication

BSc/BEng or BA/BEng Concurrent Program

BEng/BSc (90 credit hour) concurrent degree (Physics)

This degree prepares students for research and development careers in a broad range of sectors such as materials engineering, optoelectronics and clean technologies. Following is the recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Physics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Physics. A concurrent BEng/BSc Honours Physics program can be designed for interested candidates.

	Fall	Winter
Registered in BEng		
Year 1	CHEM 1021 *Chemistry I*	CHEM 1022 Chemistry II
	MATH 1280 *Engineering Math I*	MATH 1290 Engineering Math II

	ENGI 1103 *Engineering Design I*	ENGI 1203 Engineering Mechanics I: Statics
	PHYC 1190 *Physic I*	PHYC 1290 Physics II
	ENGM 1081 *Computer Programming*	ENGM 1041 Applied Linear Algebra
	CPST 1103 *Technical Communications I*	CPST 1203 Technical Communications II

Apply for admission into concurrent BEng/BSc Minor in Physics

Year 2 [a]	ENGM 2101 *Applied Vector Calculus*	ENGM 2022 Applied Differential Equations
	ENGM 2032 Applied Probability & Statistics	HSTC 1801 History of Engineering II
	[b] Writing course (Humanities)	[d] One of PEAS 2202 MINE 2200
	Two 2000 level (or above) PHYC courses	ENGI 2400 BIOL 1030
	One Social science course [c]	ENGI 2204
		Two 2000 level (or above) PHYC courses
		One Social science or Humanities course [c]

Year 3 [a]	IENG 2005 Engineering economics	ENGI 2203 Engineering design II
	ECED 2000 Electric circuits	[d] Two of PEAS 2201 ECED 2001
	ENGI 2102 Thermo-Fluid Engineering I	PEAS 2202 ECED 2200
	One 2000 level (or above) PHYC course	BIOL 1030 ENGI 2400
	One Science/FASS elective course (may be PHYC)	MINE 2200 ENGI 2103
		Humanities ENGI 2204
		One 2000 level (or above) PHYC course
		One Science/FASS elective course (may be PHYC)

Graduate with Diploma in Engineering and BSc 90 credit Minor in Physics degree

Year 4 Continue in BEng program

Year 5 Complete BEng program

[a] To meet the BSc 90 credit hour Minor in Physics requirements, students complete 30 credit hours in addition to their Engineering requirements: 18 credit hours of PHYC courses at or above the 2000 level (excluding any PHYC course that does not count toward a 120 credit hour degree in Physics), 6 credit hours of social science/humanities courses, and 6 credit hours of elective courses from Science or FASS (may be additional PHYC courses)

[b] Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements.

[c] Choose from CANA, CTMP, ECON, EMSP, EURO, GWST, HIST, HSTC, INTD, POLI, PSYO, SOSA, SUST for social science courses. Choose from ARBC, CANA, CHIN, CLAS, CTMP, CRWR, EMSP, EURO, SWST, GERM, HIST, HTSC, ITAL, PERF, PHIL, RELS, RUSN, SPAN and THEA for humanities courses

[d] Selection of engineering electives depends on engineering discipline. See Engineering section of the calendar for details.

Notes:

- ENGM 2101 and 2022 fulfill the MATH 2001/2002 requirement for the Physics Minor
- ENGM 1081 fulfills the PHYC 2050 requirement for the Physics Minor

Geophysics

For students interested in Geophysics, two options are recommended:

- Combined Honours program in Physics and Earth Sciences,

OR

- Concentrated Honours in Physics
- Elective courses: ERTH 2270.03, ERTH 3270.03, ERTH 4470.03, ERTH 4480.03.

PHYC-Equivalent Courses

Other Dalhousie departments offer courses in one or more areas of Physics. Students enrolled in a 120 credit hour BSc or BA program in Physics may count any of the following courses toward their Physics program course requirements:

Please note that PHYC-equivalent courses will not count towards a minor program in Physics.

Any course cross-listed as a PHYC course

Department	Courses
Electical and Computer Engineering	ECED 4350

Courses

Courses

Course Descriptions

PHYC 0010 University Prep Physics

CREDIT HOURS: 0

This course can be used as a prerequisite for PHYC 1100X/Y.06 and PHYC 1300X/Y.06. The course will develop problem-solving techniques in preparation for topics to be covered in PHYC 1100X/Y.06 and PHYC 1300X/Y.06. This course is offered by the College of Continuing Education. Students may register and pay for this course at the College of Continuing Education located at 1220 LeMarchant Street, 2nd Floor or by calling (902) 494-2375. This course is offered in the Fall and Summer sessions only (see College of Continuing Education for more details http://collegeofcontinuinged.dal.ca).

PREREQUISITES: Grade 12 Pre-Calculus Math

PHYC 1190 Introduction to Physics

CREDIT HOURS: 3
This course concentrates on mechanics (forces and motion). Primarily for students interested in Physical Sciences and Engineering. Students entering this course must be familiar with algebra, graphs, and trigonometry, and should be taking calculus (MATH 1000.03/1010.03 or MATH 1280.03/1290.03) concurrently. Ideas are introduced through in-class demonstrations enabling students to relate physical theory to events in the real world. Students explore many concepts via hands-on labs.
PREREQUISITES: High School Physics equivalent to the Nova Scotia 12 level. Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term. See the College of Continuing Education at: http://collegeofcontinuinged.dal.ca.
EXCLUSIONS: Credit will be given for only one of PHYC 1190.03 or PHYC 1310.03.
FORMATS: Lecture | Lab

PHYC 1290 Introduction To Physics

CREDIT HOURS: 3
This course concentrates on oscillations and waves, optics, electricity and magnetism. Primarily for students interested in Physical Sciences and Engineering. This course is required for all Engineering programs. Students entering this course must be familiar with algebra, graphs, and trigonometry, and should be taking calculus (MATH 1000.03/1010.03 or MATH 1280.03/1290.03) concurrently. Ideas are introduced through in-class demonstrations enabling students to relate physical theory to events in the real world. Students explore many concepts via hands-on labs.
PREREQUISITES: High School Physics equivalent to the Nova Scotia 12 level. Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term. See the College of Continuing Education at: http://collegeofcontinuinged.dal.ca.
EXCLUSIONS: Credit will be given for only one of PHYC 1290.03 or PHYC 1320.03.
FORMATS: Lecture | Lab

PHYC 1310 Physics in and Around You I

CREDIT HOURS: 3
This an algebra-based introduction to physics for students in Life Sciences, Psychology, Arts and Environmental Sciences, Health Professions, and allied Health Sciences and for students preparing for MCAT, Medicine, and Dentistry. It is accepted as a prerequisite to advanced courses in physics when combined with PHYC 1320.03, MATH 1000.03, and MATH 1010.03. Basic concepts in mechanics, waves, sound, and fluids are applied, where possible, to realistic biological models, e.g., the biomechanics of muscles and joints.
CALENDAR NOTES: This course is not acceptable for the Engineering program
PREREQUISITES: High School Physics equivalent to the Nova Scotia 12 level is strongly recommended. Students not having this equivalence are strongly advised to take PHYC 0010.00. See the College of Continuing Education at: http://collegeofcontinuinged.dal.ca. EXCLUSIONS: Credit will be given for only one of PHYC 1190.03 or PHYC 1310.03.
EXCLUSIONS: Credit will be given for only one of PHYC 1190.03 or PHYC 1310.03.
FORMATS: Lecture | Lab | Tutorial

PHYC 1320 Physics in and Around You II

CREDIT HOURS: 3
This is a continuation of the introduction to physics presented in PHYC 1310.03. The course is designed for students in Life Sciences, Psychology, Arts and Environmental Sciences, Health Professions, and allied Health Sciences and for students preparing for MCAT, Medicine and Dentistry. It is accepted as a prerequisite to advanced courses in physics when combined with PHYC 1310.03, MATH 1000.03, and MATH 1010.03. Topics include optics, electricity, atomic and nuclear physics with applications to vision, cellular activity, imaging, and radiation treatment.
CALENDAR NOTES: This course is not acceptable for the Engineering program.
PREREQUISITES: PHYC 1310.03 or PHYC 1190.03
EXCLUSIONS: Credit will be given for only one of PHYC 1290.03 or PHYC 1320.03.
FORMATS: Lecture | Lab | Tutorial

PHYC 1400 Life in the Universe

CREDIT HOURS: 3
This course provides an overview of the night sky, solar system and stellar astronomy. The focus is on conditions necessary for life, the requirements of extrasolar planetary systems to support Earth-like environments, and the development of life on the Earth.
CALENDAR NOTES: Suitable as science elective for non-science majors.
EXCLUSIONS: PHYC 1451.03, PHYC 1452.03
FORMATS: Lecture | Lab | Tutorial

PHYC 1600 Understanding Weather

CREDIT HOURS: 3
The changing weather is a topic of almost universal interest. This course provides an introductory explanation for the basic processes that comprise the day to day weather changes in a non-mathematical way. Topics include weather maps and the wide range of atmospheric phenomena.
FORMATS: Lecture

PHYC 2050 Computer Simulations in Science

CREDIT HOURS: 3
Computer simulation plays an essential role in all fields of science. This class introduces techniques in computer simulation, including finite-difference calculations, Monte Carlo methods, and scientific visualization. A modern programming language and practical tools will be used. The course is suitable for students in Science, Computer Science and Engineering.
PREREQUISITES: PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03, and MATH 1000.03/MATH 1010.03

PHYC 2060 Oscillations and Waves

CREDIT HOURS: 3
Oscillations and waves occur in a wide range of physical, chemical and biological systems. The objective of this course is to quantitatively explore the physics of oscillation and waves in a variety of classical systems such as mechanical and electrical oscillators, sound, and electromagnetic waves.
CALENDAR NOTES: This course replaces PHYC 2140.
PREREQUISITES: PHYC 1190/1290 or PHYC 1310/1320, and MATH 1000/1010 or MATH 1280/1290
EXCLUSIONS: PHYC 2140
FORMATS: Lecture | Tutorial

PHYC 2150 Physics Tools: Experiment

CREDIT HOURS: 3
Introducing experimental tools and techniques within a theoretical framework, this course explores concepts in oscillations, waves, electricity and magnetism. The aim is to learn and apply techniques commonly used in Physics research. The following experimental tools and techniques are explored: Instrumentation; Fourier series; Data analysis; building AC and DC circuits; Detection and production of ultrasonic, acoustic, visible, microwaves; Mechanical systems. For example, the concept of resonance is applied to electronic (e.g. Radio), optical, acoustic (e.g. Music), mechanical and nuclear (e.g. MRI) systems in the lab.
Textbook: An Introduction to Error Analysis, John R. Taylor.
PREREQUISITES: PHYC 1190.03/1290.03 or 1300X/Y.06 or SCIE 1500X/Y.30 and a 1000-level calculus course, or permission of instructor
FORMATS: Lecture | Lab

PHYC 2250 Physics of Biological and Medical Technology

CREDIT HOURS: 3
This course focuses on the nature of different forms of radiation and their interactions with living organisms. Particular attention is given to imaging techniques for the examination of internal organs, and the resulting effects of radiation. Topics may include ultrasound, nuclear medicine, X-ray tomography, magnetic resonance imaging, and exposure to ultraviolet and nuclear radiation.
PREREQUISITES: PHYC 1190.03/1290.03 or 1300X/Y.06: MATH 1000.03/1010.03 or SCIE 1500X/Y.30, 1501X/Y.30, 1501X/Y.27, 1502X/Y.21 1503X/Y.21, 1504X/Y.27, or 1510X/Y.33 or permission of the instructor.
FORMATS: Lecture

PHYC 2270 Introduction to Applied Geophysics

CREDIT HOURS: 3
An Introduction to using physical principles to explore the Earth's subsurface, with an emphasis on near-surface applications. Topics include seismic, gravity, magnetic, electrical, and electromagnetic surveying techniques, and their application in prospecting, hydrogeology, environmental assessments, and well-logging. The geophysics field school, normally conducted during the last week of April, is an integral part of this course.
PREREQUISITES: ERTH 1080.03 or (SCIE 1506.03/SCIE 1507.03) and MATH 1000.03 and (PHYC 1190.03/ PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03 X/Y)
CROSSLISTED: ERTH 2270.03
FORMATS: Lecture | Lab | Experiential Learning

PHYC 2310 Energy and the Environment

CREDIT HOURS: 3
The physical principles and limitations of renewable energy source utilization and energy conversion. A quantitative introduction to energy conversion and storage systems, including solar power and heating, wind, tidal, geothermal, hydroelectric, nuclear power, hydrogen technology, electrical and mechanical energy storage. The input of these energy options on the global climate and environment will be discussed.

PREREQUISITES: PHYC 1190.03/1290.03 (or PHYC 1310/1320), CHEM 1011.03/1012.03, and MATH 1000.03 (or MATH 1215.03), or permission of the instructor.
CROSSLISTED: ENVS 2310.03
EXCLUSIONS: Students who have previously taken PHYC 3330 can not take PHYC 2310.
FORMATS: Lecture

PHYC 2451 Solar System Astronomy & the Night Sky

CREDIT HOURS: 3
An introduction to solar system astronomy and the night sky for science students. The historical development of astronomy, and celestial coordinate systems are discussed, with focus on the planets and satellites of our solar system. Planetarium sessions are included, as are opportunities to observe the night sky through small telescopes.
PREREQUISITES: A first year science course
EXCLUSIONS: PHYC 1400, PHYC 1451
FORMATS: Lecture

PHYC 2452 Stellar & Galactic Astrophysics

CREDIT HOURS: 3
This companion course to PHYC 2451 will serve as a general introduction to the astrophysics of stars and galaxies for science students. The basic properties of stars, star formation, stellar evolution, stellar populations, star clusters, and the late stages of stellar evolution will be discussed. The course will examine the interstellar medium, and galactic structure and evolution, and compact objects (neutron stars, black holes, quasars) at an introductory level. The role of dark matter and dark energy in the formation of the universe, and in establishing the present-day large scale structure of the universe will be reviewed.
PREREQUISITES: A first year science course, and one of MATH 1000, 1215, 1500, or 1280
EXCLUSIONS: PHYC 1452, PHYC 2450
FORMATS: Lecture

PHYC 2510 Electricity and Magnetism

CREDIT HOURS: 3
The course will develop the vector calculus needed for the description of electric and magnetic fields. Other topics include scalar and vector potentials, forces on charges, magnetic induction and Maxwell's equations. The course will give students the necessary foundation for an understanding of more advanced topics in electricity and magnetism.
PREREQUISITES: PHYC 2140.03 or PHYC 2060.03, MATH 2001.03 and MATH 2120.03 (which can be taken concurrently), or permission of the instructor.
FORMATS: Lecture | Tutorial

PHYC 2515 Modern Physics

CREDIT HOURS: 3
This course introduces two physics revolutions: Einstein's theory of special relativity and the theory of quantum mechanics. Important early experiments are considered throughout the course. We consider length contraction, time dilation, and relativistic kinematics. Then, to account for wave-like properties of matter, we introduce complex wave functions in one-dimension and show how they lead to energy quantization, Schrodinger's equation, and penetration into classically forbidden regions. Other topics of modern physics, such as random walks (transport theory) may be introduced.
PREREQUISITES: PHYC 1190.03/1290.03 or PHYC 1300.06 or SCIE 1500.03, and a 1000 level calculus course
FORMATS: Experiential Learning

PHYC 2610 Introduction to Biomechanics

CREDIT HOURS: 3
This course provides an introduction to mechanical and analytical concepts applied to the study of biological systems, particularly human movements and tissues. It expands on the knowledge acquired in PHYC 1310, the mechanics as it applies to the human body. It deals with the muscle forces required for the different tasks, the role of the centre of mass in balance and motion and the stresses and strains endured by the different biological tissues.The primary goal of the course is to learn to apply basic mechanical concepts to human movements.
PREREQUISITES: PHYC 1310.03 or PHYC 1190.03 or permission of the instructor
EXCLUSIONS: KINE 2465.03
FORMATS: Lecture

PHYC 2800 Climate Change

CREDIT HOURS: 3
The workings of the Earth's climate system are examined and then applied to help understand contemporary climate change. The role of numerical climate

models is discussed with the aim of interpreting climate change predictions for the coming decades. Finally the impacts of climate change are studied with a focus on the various mitigation and adaptation strategies needed.
CROSSLISTED: GEOG 2800.03, OCEA 2800.03
EXCLUSIONS: ECON2850.06, PHYC2850.06

PHYC 2850 The Science and Economics of Climate Change

CREDIT HOURS: 6
This course examines how climate change will impact the environment and human activities, and how to formulate and implement economically realistic solutions. It integrates the physical and biological science with economics in order to analyze the response options as we move towards a carbon-neutral society.
PREREQUISITES: ECON 1101.03 or ECON 1102.03 or any first year science or math course or permission of the instructor.
CROSSLISTED: ECON 2850.03
EXCLUSIONS: PHYC 2800, ECON 2216
FORMATS: Lecture

PHYC 3000 Experimental Physics I

CREDIT HOURS: 3
This course introduces students to electronics and measuring techniques. Topics include digital electronics: logic gates, clocks, shift registers, counters, memory; analog electronics; R.C.L. circuits, operational amplifiers; electronic systems: A/D and D/A chips, computer chips, and displays. The course also introduces students to modern data acquisition methods (including LabVIEW), skills which will be applied in the design and execution of experiments that illustrate fundamental concepts in physics. This course is open to Honours students only.
CALENDAR NOTES: This course has no final examination. Student evaluation is through performance on assignments and projects, and evaluation of written lab reports.
PREREQUISITES: PHYC 2150.03 and PHYC 2515.03, or permission of the instructor.
FORMATS: Lecture | Lab

PHYC 3010 Experimental Physics II

CREDIT HOURS: 3
Designed to give the students a chance to do non-set experiments and thereby encounter and solve the problems of experimentation. Original approaches by the students are encouraged. As the number of experiments is small (three) students should achieve a real understanding of a few physical phenomena. Lecture topics include data& analysis as encountered in the different areas of physics.
PREREQUISITES: PHYC 3000.03 with a minimum grade of B, or permission of the instructor
FORMATS: Lecture | Lab

PHYC 3100 Electrodynamics

CREDIT HOURS: 3
Topics include electrostatics and magnestostatics, boundary value problems, fields in matter, time-dependent phenomena, Maxwell's equations, electromagnetic waves, radiation and special relativity.
PREREQUISITES: PHYC 2510.03 and either 2060.03 or PHYC 2140.03
EXCLUSIONS: PHYC 4100.03
FORMATS: Lecture

PHYC 3180 Contemporary Physics

CREDIT HOURS: 3
This course covers a variety of current research topics in physics within a format that introduces students to the learning techniques used in research in academic or industrial settings. Through this course, students will: (i) learn how to read and digest current physics topics using the standard presentation in physics journals; (ii) develop skills required to communicate topics of current interest in physics to classmates through written summaries and oral presentations; and (iii) develop skills required for collaborative discussion to solve research problems.
PREREQUISITES: MATH 2001.03 and at least one of PHYC 2515.03 or PHYC 2150.03 or permission of the instructor
FORMATS: Lecture

PHYC 3200 Thermodynamics

CREDIT HOURS: 3
An introduction to the basic concepts and laws of thermodynamics. There will be a short survey of required Mathematics (partial derivatives). Topics include: thermometry, equations of state, energy and entropy, thermodynamic potentials, heat engines, thermodynamic efficiency and phase transitions.
PREREQUISITES: PHYC 2140.03 or PHYC 2060.03, MATH 2001.03 and MATH 2120.03, or permission of the instructor.

FORMATS: Lecture | Tutorial

PHYC 3210 Statistical Mechanics

CREDIT HOURS: 3
Using statistical entropy, we will explore how macroscopic thermodynamic behavior emerges from microscopic models. We will consider the microanonical, canonical, and the grand canonical statistical ensembles. We will examine two-state systems as well as non-interacting Fermionic and Bosonic systems. Finally, we will learn about deceptively simple interacting systems such as the Ising model.
PREREQUISITES: PHYC 3200.03 or equivalent; MATH 2001.03, MATH 2120.03

PHYC 3250 Computational Methods in Physics

CREDIT HOURS: 3
The objective of this course is to teach students the use of computers in physical analysis. The UNIX operating system will be introduced and used throughout the course. A modern programming language will be applied to a selection of problems drawn from physical theory and experiment. This is a hands-on, practical, and interactive class with an emphasis on the development of computational skills that scientists use.
PREREQUISITES: PHYC 1190.03/1290.03 or equivalent, MATH 1010.03 or equivalent, PHYC 2050.03 or equivalent

PHYC 3270 The Solid Earth

CREDIT HOURS: 3
This course aims to understand the structures and dynamics of the Solid Earth system from the surface to the inner core and from the ocean to the continent. Topics covered will include the internal structure of the Earth, plate tectonics, earthquakes, seismology, gravity, magnetic field, heat flow, and mantle convection.
PREREQUISITES: MATH 1000 or MATH 1215, and MATH 1010 AND PHYC 1190 and 1290 (preferred) or PHYC 1310 and 1320
CROSSLISTED: ERTH 3270, OCEA 3270
FORMATS: Lecture | Tutorial

PHYC 3303 Materials Science

CREDIT HOURS: 3
This course emphasizes understanding the principles behind materials' physical properties, such as thermal and mechanical stability, and electrical and optical properties. Materials discussed include liquid crystals, perfect crystals, defective solids, polymers and glasses. Applications, such as the use of materials in displays, gas sensors, and lasers, are discussed.
CALENDAR NOTES: This course holds lectures together with CHEM 3305. CHEM 3305 has a lab and PHYC 3303 has a major term paper.
PREREQUISITES: CHEM 1012.03, and PHYC 3200.03 (can be co-requisite) or (CHEM 2301.03 and CHEM 2304.03) or (ERTH 2001.03 and ERTH 2002.03)
EXCLUSIONS: CHEM 3305.03
FORMATS: Lecture

PHYC 3340 Electronics

CREDIT HOURS: 3
Topics include digital electronics: logic gates, clocks, shift registers, counters, memory; analog electronics: R.C.L. circuits, operational amplifiers; electronic systems: A/D and D/A chips, computer chips, and displays.
CALENDAR NOTES: Credit cannot be given for both PHYC 3000.03 and PHYC 3340.03
PREREQUISITES: PHYC 2150.03; or ENGI 2001.03
FORMATS: Lecture | Lab

PHYC 3400 Introduction to Stellar Astrophysics

CREDIT HOURS: 3
A survey of stellar astrophysics for physics majors. Topics discussed include some fundamentals of atomic physics, radiative transitions, radiative transfer, spectral line formation in gaseous media, the interstellar medium, exoplanets, and an overview of galactic structure. The focus will be on the formation, atmospheres, structure, and evolution of stars.
CALENDAR NOTES: Suitable for major or honours physics credit.
PREREQUISITES: PHYC 2515 AND one of PHYC 2140 or PHYC 2060
EXCLUSIONS: Exclusion with PHYC 4099 if PHYC 4099 completed first
FORMATS: Lecture | Tutorial

PHYC 3540 Optics and Photonics
CREDIT HOURS: 3
Topics in physical and geometrical optics will be covered. Selected applications will be presented in certain areas of photonics, including micro-optic sensors, semiconductor lasers and detectors, optical waveguides and fibres, optical signal processing and telecommunications.
PREREQUISITES: PHYC 2150.03 and PHYC 2510.03, MATH 2001.03, MATH 2120.03
FORMATS: Lecture

PHYC 3590 Advanced Classical Mechanics
CREDIT HOURS: 3
Topics include: central force motion, the principle of virtual work, Lagrange's equations, the principle of least action, Hamilton's equations, canonical transformations, Hamilton-Jacobi equation.
PREREQUISITES: PHYC 2140.03 or PHYC 2060.03, MATH 2120.03
FORMATS: Lecture

PHYC 3640 Quantum Physics I
CREDIT HOURS: 3
This course introduces the formal structure of quantum mechanics as well as quantum mechanical calculations. The emphasis is on problem solving. The course starts with quantum measurement, then considers particles in a box and the quantum harmonic oscillator. The course starts with one-dimensional quantum mechanics and ends with higher dimensional problems. The course introduces quantum mechanical operators, time-evolution, quantum angular momentum, and the solution of the hydrogen atom.
PREREQUISITES: PHYC 2515.03 and PHYC 2140.03 or PHYC 2060.03, MATH 1030.03 and MATH 2120.03
FORMATS: Lecture

PHYC 3710 Experiential Learning in Physics
CREDIT HOURS: 3
This is an outside-the classroom learning experience in which students work to acquire knowledge and skills relevant to physics under the direction of a supervisor. Suitable work environments can be located at Dalhousie or in a commercial/industrial/government/non-governmental organization setting.
PREREQUISITES: PHYC2050 AND PHYC2060 AND PHYC2150 AND PHYC2510
EXCLUSIONS: The following may not be used towards this class: work that is part of another scheduled course at a learning institution; study that would qualify for Special Topics course; co-op work terms; and paid work.
FORMATS: Experiential Learning

PHYC 3810 Microcomputers and the Real World
CREDIT HOURS: 3
Subject material: measurement theory, modern sensors, microcomputer architecture, and software simulation of digital electronic circuits. Interfacing techniques including serial, parallel USB and GPIB ports. The graphical programming language is used throughout.
PREREQUISITES: PHYC 2150.03, PHYC 3340.03
CROSSLISTED: CSCI 3122.03
FORMATS: Lecture | Lab

PHYC 3900 Introduction to Soft Condensed Matter Physics
CREDIT HOURS: 3
The aim of this course is to provide an introduction to some concepts used in soft condensed matter physics through the study of three systems, polymers, colloids and liquid crystals.The course will be divided in four modules:I) Brownian dynamics and diffusionII) Polymers shape, molecular mass distribution, osmotic pressure, gel, entropic elasticityIII) Colloids: van der Waals and electrostatic interactions, Hamaker constant, DLVO theory, polymer layers (brushes), gel electrophoresisIV) Liquid crystals: order parameter, optical properties of nematics (birefringence), phase transitions, LCD
PREREQUISITES: MATH 2001.03, MATH 2120.03
FORMATS: Lecture

PHYC 4098 The Physical Cosmology
CREDIT HOURS: 3
The course is intended to provide a sound physical foundation to modern cosmology and the formation and evolution of the Universe. The course introduces the principles of geometrical and astrophysical cosmologh and emphasizes the direct confrontation of observational data with contemporary theories.
PREREQUISITES: PHYC 2515, PHYC 2140 or PHYC 2060, or permission of instructor
FORMATS: Lecture

PHYC 4099 Stellar Structure and Evolution

CREDIT HOURS: 3
This course expands on concepts in stellar astronomy, building on an understanding of stellar physics, to probe the evolution of stars. Topics covered include stellar timescales, energy generation, and derivation of equations of stellar structure, evolution of stars from the pre-main sequence, through the main sequence hydrogen burning, and beyond.
PREREQUISITES: PHYC 3400 or permission of instructor
EXCLUSIONS: Exclusion with PHYC 3400, only if PHYC 4099 is completed first
FORMATS: Lecture

PHYC 4151 Quantum Physics II

CREDIT HOURS: 3
This course builds on the concepts and theory of quantum mechanics presented in "Quantum Physics I" (PHYC 3640) by introducing additional topics of fundamental importance, including: spin, identical particles, time-independent perturbation theory, variational approach, WKB approximation, time-dependent perturbation theory, and scattering theory.
PREREQUISITES: PHYC 3640.03
EXCLUSIONS: PHYC 5151.03
FORMATS: Lecture

PHYC 4160 Mathematical Methods of Physics

CREDIT HOURS: 3
Topics discussed include: complex variable theory, Fourier and Laplace transform techniques, special functions, partial differential equations.
PREREQUISITES: MATH 2001.03, MATH 2120.03, PHYC 2140.03 or PHYC 2060.03
EXCLUSIONS: PHYC 5160.03, MATH 5165.03
FORMATS: Lecture

PHYC 4180 Nuclear and Particle Physics

CREDIT HOURS: 3
This is an introductory course in nuclear physics. Topics discussed include: nucleon-nucleon interactions, nuclear structure, gamma transitions, alpha decay, beta decay, nuclear reactions and elementary particle physics, with applications to the interior of stars and the earlier universe.
PREREQUISITES: PHYC 3640.03
CROSSLISTED: PHYC 5180.03
FORMATS: Lecture

PHYC 4230 Introduction to Solid State Physics

CREDIT HOURS: 3
An introduction to the basic concepts of solid state physics which are related to the periodic nature of the crystalline lattice. Topics include crystal structure, X-ray diffraction, phonons and lattice vibrations, the free electron theory of metals, energy bands, magnetism and superconductivity.
PREREQUISITES: PHYC 3640.03 and 3210.03 which may be taken concurrently, or permission of instructor
EXCLUSIONS: PHYC 5230.03
FORMATS: Lecture

PHYC 4250 Topics in Numerical Computing

CREDIT HOURS: 3
This class focuses on discrete and stochastic techniques of computational physics. Topics may include stochastic methods, global optimisation techniques, spectral methods, linear algebra, correlations, and computational modelling.
PREREQUISITES: PHYC 1280.03/1290.03 or equivalent, MATH 1010.03 / PHYC 2050 or equivalent
FORMATS: Lecture

PHYC 4311 Fluid Dynamics I

CREDIT HOURS: 3
An introduction to the theory of fluid dynamics with some emphasis on geophysically important aspects. Contents: tensor mathematics, flow kinematics, equations of motion, viscous flow, potential flow, convection, turbulence, and basic aerodynamics.
PREREQUISITES: Subject to instructor approval

CROSSLISTED: OCEA 4311.03/
EXCLUSIONS: PHYC 5311.02,OCEA5311.01
FORMATS: Lecture

PHYC 4411 Atmospheric Dynamics I

CREDIT HOURS: 3
The basic laws of fluid dynamics are applied to studies of atmospheric motion, including the atmospheric boundary layer and synoptic scale weather disturbances (the familiar highs and lows on weather maps). Emphasis will be placed on the blend of mathematical theory and physical reasoning which leads to the best understanding of the dominant physical mechanisms.
PREREQUISITES: PHYC 2140.03 or PHYC 2060.03 or permission of the instructor
CROSSLISTED: OCEA 4411.03/
EXCLUSIONS: PHYC 5411.03, OCEA5411.03.
FORMATS: Lecture

PHYC 4412 Atmospheric Dynamics II

CREDIT HOURS: 3
The approach is the same as for PHYC 4411.03, with emphasis on synoptic-scale wave phenomena, frontal motions and the global circulation. Additional topics including tropical meteorology, middle atmospheric dynamics, severe storms, mesoscale meteorology and numerical weather prediction may be included.
PREREQUISITES: PHYC 4411.03 or permission of the instructor.
CROSSLISTED: PHYC 5412.03, OCEA 4412.03/5412.03
FORMATS: Lecture

PHYC 4460 Photons and Atoms

CREDIT HOURS: 3
This class covers a selection of topics in advanced optics, that may include: a quantum treatment of light-matter interactions, strong field effects, quantum optics, nonlinear optics, optical resonators, laser physics, laser dynamics, and photonic devices.
PREREQUISITES: PHYC 3640.03
CROSSLISTED: PHYC 5460.03
FORMATS: Lecture

PHYC 4505 Atmospheric Physics

CREDIT HOURS: 3
Moist thermodynamics is applied to a variety of atmospheric phenomeon. These include aerosols, cloud droplets, precipitation formation, convection, supercells, hurricanes, lightning, and the boundary layer. We also discuss the radar equation and the interpretation of radar images.
PREREQUISITES: PHYC 2060 and PHYC 4520, or permission of the instructor
CROSSLISTED: PHYC 5505, OCEA 4505/5505
FORMATS: Lecture

PHYC 4520 Introduction to Atmospheric Science

CREDIT HOURS: 3
The general overview of the atmosphere provides the student with an understanding of the composition and thermal structure of the atmosphere, air mass and frontal theory and weather generating physical processes and their consequences. Other topics include atmospheric radiation, dynamic meteorology, climatology and the physics of clouds and storms.
PREREQUISITES: PHYC 2060.03 or permission of instructor
CROSSLISTED: OCEA 4520.03/
EXCLUSIONS: PHYC 5520.03, OCEA5520.03
FORMATS: Lecture

PHYC 4540 Synoptic Meteorology I

CREDIT HOURS: 3
This course introduces the practical skills of meteorological observation and analysis. Emphasis is on developing skills in drawing and interpreting weather maps, and on studying the three-dimensional structure of weather systems. Satellite and radar remote sensing of the atmosphere is also introduced. Case studies of atmospheric systems and processes are carried out during the tutorial-laboratory period.
COREQUISITES: PHYC 4411.03
PREREQUISITES: At least one third-year physics course

CROSSLISTED: PHYC 5540.03,OCEA 4541.03/5541.03
FORMATS: Lecture | Lab | Tutorial

PHYC 4550 Synoptic Meteorology II

CREDIT HOURS: 3
This course extends the analysis and diagnosis of atmospheric dynamics and weather processes introduced in PHYC 4540.03. Emphasis is on the practical application of meteorological theory, particularly in the area of diagnosing the cases of weather events. Modern computer and statistical methods are discussed, and students receive an introduction to weather forecasting.
PREREQUISITES: PHYC 4540.03
CROSSLISTED: PHYC 5550.03, OCEA 4550.03/5550.03
FORMATS: Lecture | Lab | Tutorial

PHYC 4570 Light Scattering, Radiative Transfer, and Remote Sensing

CREDIT HOURS: 3
The equations of radiative transfer through the atmosphere will be developed and used. Special topics include transfer of infrared radiation. Mie scattering, absorption by atmospheric gases and aerosols, transfer through clear and cloudy atmospheres. Also remote sensing techniques and radiative transfer models are covered.
PREREQUISITES: PHYC 2140.03 or PHYC 2060.03, PHYC 2510.03
CROSSLISTED: PHYC 5570.03, OCEA 5570.03
FORMATS: Lecture

PHYC 4595 Atmospheric Chemistry

CREDIT HOURS: 3
A fundamental introduction to the physical and chemical processes determining the composition of the atmosphere and its implications for climate, ecosystems, and human welfare. Origin of the atmosphere. Nitrogen, oxygen, carbon, sulfur cycles. Climate and the greenhouse effect. Atmospheric transport and turbulence. Stratospheric ozone. Oxidizing power of the atmosphere. Regional air pollution: aerosols, smog, acid rain.
PREREQUISITES: MATH 1000.03, PHYC 1190.03/1290.03 (or PHYC 1310.03/1320.03 or 1300.06) and CHEM 1011.03/1012.03
CROSSLISTED: CHEM 4595.03, OCEA 4595.03
EXCLUSIONS: PHYC 5595.03, OCEA 5595.03
FORMATS: Lecture

PHYC 4650 General Relativity

CREDIT HOURS: 3
A review of differential geometry will be given followed by an introduction to the general theory of relativity. Various topics will be discussed, including: linearized theory and gravitational radiation, spherically symmetric metrics and the Schwarzchild solution, gravitational collapse, black holes, and cosmology.
PREREQUISITES: MATH 3045.03 or permission of the instructor
CROSSLISTED: PHYC 5650.03, MATH 4650.03/5650.03
FORMATS: Lecture

PHYC 4660 Cosmology

CREDIT HOURS: 3
A self-contained introduction to cosmology will be given and no prior knowledge of differential geometry or general relativity will be assumed (although some knowledge of elementary differential equations will be useful). A cosmological model is a model of the universe, as a whole, on the largest scales; the emphasis of the course will be on the modeling aspects of cosmology.
PREREQUISITES: Instructor's permission
CROSSLISTED: PHYC 5660.03, MATH 4410.03/5410.03
FORMATS: Lecture

PHYC 4710 Experiential Learning in Atmospheric Science

CREDIT HOURS: 3
This is an outside-the classroom learning experience in which students work to acquire knowledge and skills relevant to atmospheric science under the direction of a supervisor. Suitable work environments can be located at Dalhousie or in a commercial/industrial/government/non-governmental organization setting.
PREREQUISITES: At least two of the following courses: PHYC4520.03, PHYC4595.03, PHYC4411.03, PHYC4540.03.
EXCLUSIONS: The following may not be used towards this class: work that is part of another scheduled course at a learning institution; study that would qualify for Special Topics course; co-op work terms; and paid work.

FORMATS: Experiential Learning

PHYC 4800 Honours Research Project I
CREDIT HOURS: 3
Students in the honours stream in Physics and Atmospheric Science will do a research project under the direction of a faculty member. A research plan, interim progress reports and a formal final report are required. The final grade will be based on an evaluation of the reports and an oral presentation. Students in the major stream can apply to the department to take this course.
PREREQUISITES: PHYC 3010 and permission of the coordinator and supervisor.

PHYC 4850 Honours Research Project II
CREDIT HOURS: 3
Students in the honors stream will do a second research project or continue the project started in PHYC 4800 under the direction of a faculty member. A research plan, interim progress reports and a formal, final report are required. The final grade will be based on an evaluation of the reports and an oral presentation.

PREREQUISITES: PHYC 4800 and permission of the coordinator and supervisor.

PHYC 8891 Co-op Work-Term I
CREDIT HOURS: 0

PREREQUISITES: SCIE 2800.00

PHYC 8892 Co-op Work-Term II
CREDIT HOURS: 0

PHYC 8893 Co-op Work-Term III
CREDIT HOURS: 0

PHYC 8894 Co-op Work-Term IV
CREDIT HOURS: 0

Professors Emeriti

Adamo, S., BSc (Toronto), PhD (McGill)
Brown, R. E., BSc (Victoria), MA, PhD (Dalhousie)
Klein, R. M., BA (SUNY), MA, PhD (Oregon)
LoLordo, V. M., AB (Brown), PhD (Penn)
Meinertzhagen, I. A., BSc (Aberdeen), PhD, DSc (St. Andrews)
Mitchell, D. E., BSc, MAppSc (Melb), PhD (Berkeley)
Rusak, B., BA (Toronto), PhD (Berkeley), FRSC

Professors

Abbass, A., BSc (Ottawa), MD (Dalhousie), FRCPC (Toronto), major appointment in Psychiatry
Campbell-Yeo, M., BSc, MScN (Dalhousie), PhDN (McGill),major appointment in the School of Nursing
Chambers, C. T., BSc (Dalhousie), MA, PhD (UBC), joint appointment in Pediatrics, Faculty of Science Killam Professor in Psychology
Corkum, P. V., BSc (Dalhousie), MA, PhD (OISE at Toronto)
Crowder, N. A., BSc, PhD (Alberta)
Deacon, S. H., BSc (UPEI), PhD (Oxon)
Duffy, K., BA (St. Thomas), PhD (McMaster)
Finley, G. A., BSc, MD (Dalhousie), FRCPC, major appointment in Anaesthesia
Good, K., BSc (UNB), MSc, PhD (UBC), major appointment in Psychiatry
Kiefte, M., BA (Memorial), MSc, PhD (Alberta), major appointment in the School of Human Communication Disorders
Moore, C. L., BA, PhD (Cantab)
Newman, A. J., BA (Winnipeg), MSc, PhD (Oregon)
Perrot, T. S., BSc, PhD (Western)
Phillmore, L., BA (UWO), MA, PhD (Queen's)
Rosen, N. O., BA (Queen's), PhD (McGill)
Semba, K., BEd, MA (Tokyo), PhD (Rutgers), major appointment in Medical Neuroscience
Sherry, S. B., BA (York), MA (UBC), PhD (Saskatchewan)
Smith, I. M., BA (Dalhousie), MSc (Brown), PhD (Dalhousie), major appointment in Pediatrics, Joan and Jack Craig Chair in Autism Research
Stewart, S., BSc (Dalhousie), PhD (McGill), joint appointment in Psychiatry
Taylor-Helmick, T. L., BA (Calgary), MSc, PhD (Dalhousie)
Tibbo, P., BSc Hons. (Mt Allison), B.MEd.Sc, MD (Memorial), FRCPC, AHRMR (Alberta), major appointment in Psychiatry
Uher, R., MRCPsych (Royal College of Psychiatrists), CCT (London Deanery, UK), PhD, MUDr. (Charles Univ), major appointment in Psychiatry

Ungar, M., BA, BSW, MSW (McGill), PhD (Wilfrid Laurier), major appointment in the School of Social Work
Westwood, D. A., BSc, MA, PhD (Waterloo), major appointment in the School of Health and Human Performance

Associate Professors

Aiken, S., BA, MSc (Western), PhD (Toronto), major appointment in the School of Human Communication Disorders
Bardouille, T., BSc (Queen's), MSc (Dalhousie), PhD (Toronto) major appointment in Psychiatry
Blais, J., BA/MA/PhD (Carleton)
Bombay, A., BSc (Ottawa), MSc, PhD (Carleton), major appointment is held jointly with the School of Nursing and Psychiatry
Chorney, J., BSc (Dalhousie), MA, PhD (West Virginia), major appointment in Anesthesiology
Fisher, D., BSc (Ottawa), MSc, PhD (Carleton), major appointment in Psychiatry
Fisk, J., BSc, MA, PhD (Western), major appointment in Psychiatry
Franklin, T., BSc (King's), MSc (Dalhousie), PhD (Swiss Federal Institute of Technology) Graduate Coordinator
Jacques, S., BA (McGill), MA, PhD (Toronto)
Johnson, S., BA (Kalamazoo), MSc, PhD (Victoria), Clinical PhD Program Director of Training
Meier, S., BSc, MSc (Universitat Basel, Switzerland), PhD (Ruprecht Karls Universitat, Germany), major appointment in Psychiatry
Neyedli, H., BSc Hons (Dalhousie), MSc, PhD (Toronto), major appointment in Health and Human Performance
Robinson, L., BSc (Victoria), MA, PhD (Simon Fraser), major appointment in the School of Health and Human Performance
Robinson, M., BSc (SMU), MA (Toronto), PhD (Toronto), major appointment in English
Weatherhead, D., COGS-P-BCH (Queen's). PhD (Waterloo)
Weaver, I. C. G., BSc (Aberdeen), MSc (Bristol), PhD (McGill)

Assistant Professors

Cloutier, A., BA, MA (Carleton), PhD (Queens) major appointment in Rowe School of Business
Conrad, C., BA, MEC, PhD (Dalhousie), MA (Queens) major appointment in Infomation Management
Dithurbide, L., BA (St. Mary's), MA (Brock), PhD (Michigan State), major appointment in Health and Human Performance
Filliter, J., BSc, MSc, PhD (Dalhousie) major appointment in Pediatrics
Ghanouni, P., BSc/MSc (SBUMS), PhD (UBC) major appointment in Occupational Therapy
Hashimi, J., BSc (Punjab), MSc (Western), PhD (Toronto), major appointment in Anesthesia
Hernandez Castillo, C., PhD (Veracruz), major appointment in Computer Science
Ilie, G., BSc, MA (York), PhD (Toronto), major appointment in Community Health and Epidemiology
Jafari, Z., BSc, MSc (TUMS), PhD (Ottawa), major appointment in Communication Sciences and Disorders
Jopling, E., BAHons (Queens), MSc, PhD (UBC)
Lee-Bagley, D. BSc (Calgary), MSc, PhD (UBC), major appointment in Family Medicine
Lovas, D., BSc, MD (Dalhousie), major appointment in Psychiatry
McManus, J., BA (Carleton), MSc (Guelph), PhD (Dalhousie), major appointment in Rowe School of Business
Pavlova, B., MSc (Palacky Univ., Czech Republic), PhD (Charles Univ., Czech Republic), DClinPsy (Inst. of Psychiatry, King's College)
Thomas, M., BSc (St. Andrew's), MBChB (Mancester), DRCOG/MRCP-UK (Glasgow), PhD (Central Lancashire) FRCPCH FRCP, major appointment in Pediatrics
Town, J., BSc (York), DClinPsy (Univ of Sheffield), major appointment in Psychiatry

University Teaching Fellows

Borycz, J., PhD (Inst. of Pharmacology, Krakow, Poland)
Gadbois, S., BP, MAPs (Moncton), PhD (Dalhousie)
Pencer, A., BSc (St. FX), MSc, PhD (Calgary)
Stamp, J., BSc (Dalhousie), PhD (Cambridge)
Stevens, L., BSc (Acadia), MSc, PhD (Dalhousie), Undergraduate Program Coordinator

Senior Instructors

Caceres, L., BSc (Alberta), PhD (McGill)
Christie, J., BSc, MSc, PhD (Dalhousie)
Juckes, T., BA, MA (Natal), PhD (Dalhousie)
Mackinnon, S., BA(H) (UCCB), MSc (Wildred Laurier), PhD (Dalhousie)
Sparks, E., BA (Hons) Queen's, MSc, PhD (Dalhousie), Undergraduate Program Coordinator
Stratton, N., BA (Concordia), MA/PhD (Ryerson)

Instructors

LeBlanc, K. BA Hons, (Mount Allison), MSc, PhD (Dalhousie)
Tucker, R. BA Hons, PhD (Dalhousie)

Adjunct Professors

Asp, E., BA (Glendon), MA, PhD (York), English Language and Literature/Saint Mary's
Barresi, J., BSc (Brown), MA (S Calif), MS, PhD (Wisc), Psychology and Neuroscience/Dalhousie
Birnie, K., BA (Calgary), PhD (Dalhousie), Cummings School of Medicine/Univ. of Calgary
Boe, S., BPhEd (Brock), PhD, MPT (Western),Faculty of Health Sciences, Western University
Cawley, E., BA (Hons) Ottawa, MSc, PhD (McGill), National Mental Health Strategy
Champod, A.S., BSc (Montreal), PhD (McGill) Psychology/Acadia
Chipman, K., BA (UPEI), MA, PhD (Western), Neuropsychology Service/Nova Scotia Hospital
Cohen, A., BA (McGill), MSc, PhD (Queen's), Psychology/UPEI
Conrad, N., BA (St. Mary's), PhD (McMaster), Psychology/Saint Mary's
Corbit, J., BSc (Dalhousie), BSc Hons (St. FX) MA (Concordia), PhD (SFU), Psychology/St. FX
Courteau, E., BSc, MSc, PhD (Montréal), Psychology and Neuroscience/Dalhousie
Ezekiel, R., BA, MSc (Western), PhD (Toronto), Vice-Provost, Student Affairs, Dalhousie
Flanagan, H., BA, BSc (McMaster), MA, PhD (York), Psychology IWK Health Centre
Garland, S., BA, MSc, PhD (Calgary), Psychology/Memorial University
Hill, T., BA (Saint Mary's), MA (Wildred Laurier), PhD (Dalhousie), Psychology/University of Dundee
Ivanoff, J., BSc, MA (Guelph), PhD (Dalhousie), Psychology/Saint Mary's
Keys, E., BSc, BN, PhD (Calgary) Nursing, UBC
Khoury, J., BSc (Toronto), MA, PhD (Ryerson), Psychology/Mount Saint Vincent
Lackner, C., MSc (Queen's) PhD (Brock), Psychology/Mount Saint Vincent
Lambe, L., BSc (Dalhousie), MSc, PhD (Queen's), Psychology/St. FX
Marchand, Y., MCS (Univ of Paris), PhD (Compiegne)
Mazerolle, E., BSc, MSc, PhD (Dalhousie), Psychology/St. FX
McLaughlin, P., BSc (Toronto), MA, PhD (York) Nova Scotia Health
Mitchell, D. E., BSc, MAppSc (Melb), PhD (Berkeley), Psychology and Neuroscience/Dalhousie
Olthuis, J., BA (Smith College), PhD (Dalhousie), Psychology/UNB
Omisade, A., BA (York), PhD (Dalhousie), Neuropsychology/QEII Health Sciences Centre
Redden, R.J., BA, MSc, PhD (Dalhousie), Psychology/Univ. of Alberta
Rigney, G., BHons, PhD (South Australia) Psychology/CQUniversity Adelaide
Robertson, E., BA (Mt. A), MA, PhD (Western), Psychology/Cape Breton Univ
Roy-Charland, A., BPs, MAPs and PhD (Moncton), Psychologie/Univ. de Moncton
Saint-Aubin, J., BA (Sherbrooke), MPs, PhD (Laval), École de psychologie/ Université de Moncton
Schellinck, H., BSc, MSc, PhD (Dalhousie), Psychology and Neuroscience/Dalhousie
Shaw, S. R., BSc (London), PhD (St. Andrews), Psychology and Neuroscience/Dalhousie
Simonelli, G., MD (Buenos Aries), MSc (Montréal) Medicine, Université de Montréal
Smith, S. M., BA (Bishop's), MA, PhD (Queen's), Psychology/Saint Mary's
Stephens, S., BA Hons (York), MA, PhD (Toronto) Psychology Department, Saint Mary's
Vallis, T. M., BSc (Dalhousie), MA, PhD (Western), Psychology/QEII Health Sciences Centre
VanNoordt, S., BA Hons, MA, PhD (Brock), Psychology Department, Mount Saint Vincent
Watt, M., BA (St. FX), PhD (Dalhousie), Psychology/St. Francis Xavier
Yakovenko, I., BSc (Toronto), MSc (Calgary), PhD (Yale), University of Calgary

Introduction

Psychology is an experimental science: Its purpose is to discover the conditions that control the activities of animals and people, to measure these conditions and the responses they produce, and to use this knowledge to predict and change behaviour. It is a subject for inventive but also scientifically rigorous people, better suited to those who want to find out for themselves than to those who want to be told what to believe.

Psychology at Dalhousie treats behaviour as a natural phenomenon, and in that sense shares much with the other life sciences. The boundaries that historically separated psychology from zoology, physiology, and cellular biology are blurred. As well, important ties are being made to such disciplines as anthropology, sociology, and philosophy. The student will find that the diverse subject matter includes three major levels of analysis: the organism, the organism's biological machinery, and the broader social-environmental context in which particular behaviour patterns are expressed. Meaningful integration of these diverse levels and forms of analysis is an intellectual challenge of major proportions. Similarly, the time perspectives of immediate causation, development, evolution, and function all contribute to the modern approach to behavioural science and each must be evaluated in relation to the others.

A. Enrolment Limitations

Psychology is a popular program, and we have a high enrolment of students. Potential Major and Honours students, and those intending to enrol in the 90 credit hour Minor in Psychology, should note that there are limitations on the number of students that can be taught in these programs in any given year. Passing introductory psychology courses with the required grade of B- and declaring an intent to Major in Psychology does not guarantee a spot in any particular course. We do our best to provide spots in core required courses to students in the program; however, students are advised to register as early as possible for required courses to secure a space.

There are strict size restrictions on individual courses. Lecture courses are limited by room size. Enrolment in laboratory courses is further restricted because of equipment limitations and requirements for supervision. All Major and Honours students, and those enrolled in a 90 credit hour program, should carefully review program requirements and choose prerequisite courses accordingly. Laboratory courses fill rapidly, and not all laboratory courses are offered every year.

B. Enrolment of Other Students

Only Major and Honours students in Psychology or Neuroscience may enrol in PSYO 2000.03, PSYO 2470.03, and PSYO 2501.03, and such students are given preference in other second-year courses. All students must have at least a B- in both the introductory psychology courses, or a B- in the psychology component of the Integrated Science Program, to register in any second-year course in Psychology.

C. Laboratories

Psychology laboratory courses typically involve data collection and interpretation, and writing reports on the results. All Major and Honours students must take the second-year research methods course (PSYO 2000.03) and at least one 3000-level research laboratory course (for Honours students, the requirement is two laboratory courses, for a minimum of six credit hours).

Degree Programs

The Department of Psychology and Neuroscience offers the following degree programs in Psychology:

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Psychology
- Minor in Psychology

* May be combined with Minor programs from other disciplines (except Neuroscience).

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ between the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Psychology undergraduate academic advisor.

A detailed description of the Psychology programs is available in a guidebook titled "A Student's Guide to Psychology at Dalhousie University." The guidebook is available on the Department's website (www.dal.ca/psychandneuro) and at the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263).

BSc or BA (120 credit hour) Concentrated Honours in Psychology

Students who want a challenging program resulting in a broad background in Psychology, including independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours.

Honours students complete a minimum of 54 (and a maximum of 66) credit hours above the 1000 level in Psychology, with a minimum GPA of 3.0, and write a research-based Honours thesis. The Honours Thesis and Qualifying Examination requirements, outlined in the College of Arts and Science Honours Program Requirements, are satisfied through completion of PSYO 4901.03 and PSYO 4902.03.

Admission to Honours

Students must apply for admission to Honours programs. Students wishing to enroll in Honours in Psychology should consult with an Honours Advisor. Students may not apply for Honours before April of their third year of studies. A detailed description of the Honours application process can be found on the departmental website, www.dal.ca/psychandneuro. Admission requirements include:

- A grade of B+ (or higher) in PSYO 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent)
- An average of A- (or higher) in the last six completed Psychology courses (excluding 1000-level PSYO courses and PSYO 2000.03)
- A confirmed, eligible supervisor who has agreed to supervise the student's honours thesis

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ between the BA and BSc degrees. In addition, students in a Concentrated Honours program in Psychology must complete the following:

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
  OR

- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

2000 level

- PSYO 2000.03: Methods in Experimental Psychology & Neuroscience (with a grade of B+ or better)
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)

Plus an additional nine credit hours, selected from:

- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning: Conditioning and Motivation
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2220.03: Adult Psychopathology
- PSYO 2444.03: Forensic Psychology
- PSYO 2570.03: Cellular Neuroscience

Care should be taken in selecting second-year courses to ensure they provide the necessary prerequisites for courses intended to be taken in third and fourth years of study.

3000 level

Six credit hours of designated lab courses, selected from:

- PSYO 3051.03: Research Methods in Sensation and Perception
- PSYO 3082.03: Experimental Social Psychology
- PSYO 3091.03: Methods in Developmental Psychology
- PSYO 3122.03: Methods in Experimental Clinical Psychology
- PSYO 3131.03: Research Methods in Attention
- PSYO 3133.03: Research Methods in Memory
- PSYO 3134.03: Psycholinguistic Methods Across the Lifespan
- PSYO 3137.03: Research Methods in Cognitive Neuroscience
- PSYO 3161.03: Measuring Behaviour
- PSYO 3165.03: Neuroethology
- PSYO 3370.03: Advanced Methods in Neurobiology
- PSYO 3371.03: Neuronal Organization Laboratory
- PSYO 3505.03: Neural Data Science
- PSYO 3511.03: Data Communication and Visualization in Psychology
- PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill **3 credit hours of lab course requirement**)

Plus an additional nine credit hours of 3000/4000-level PSYO courses

4000 level

- PSYO 4901.03: Honours Foundation (a grade of B- or better is required to continue to PSYO 4902.03)
- PSYO 4902.03: Honours Thesis

- PSYO 3502.03: Statistical Methods II
- Six credit hours of 4000-level PSYO or NESC seminar courses (the following courses may also count toward this requirement: BIOC 4301.03, BIOL 4510.03, PATH 4100.03, PHAC 4001.03, PHAC 4403.03, PHAC 4409.03)

Plus six additional credit hours of 3000/4000-level PSYO courses

Other regulations

- Laboratory courses focusing on human psychology typically require students to serve as participants and/or as experimenters in course projects. Students who do not wish to participate in such projects should ensure that they have the prerequisites necessary to register in alternative laboratory courses.
- Courses that are counted towards the Honours program requirements must have a minimum grade of C.

BSc or BA (120 credit hour) Combined Honours in Psychology and another subject

Students who wish to study Psychology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be from any discipline in the Faculty of Science (other than Neuroscience), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Psychology may be the primary subject (with a minimum of 45, and a maximum of 54, credit hours above the 1000 level), or the secondary subject (minimum 36 credit hours above the 1000 level). The student's primary subject is defined as the subject with the larger number of credit hours.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. As outlined in the College of Arts and Science Honours Program Requirements, students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Psychology, this requirement is satisfied through completion of PSYO 4901.03 and PSYO 4902.03.

Departmental requirements

All students must fulfill the requirements outlined in theAcademic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ between the BA and BSc degrees. In addition, students in a Combined Honours program in Psychology and another subject must complete the following program requirements:

Psychology as the PRIMARY subject

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
  OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

2000 level

- PSYO 2000.03: Methods in Experimental Psychology & Neuroscience (with a grade of B+ or better)
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)

Plus an additional nine credit hours, selected from:

- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning: Conditioning and Motivation
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2220.03: Adult Psychopathology
- PSYO 2444.03: Forensic Psychology
- PSYO 2570.03: Cellular Neuroscience

Care should be taken in selecting second-year courses to ensure they provide the necessary prerequisites for courses intended to be taken in third and fourth years of study.

3000 level

Six credit hours of designated lab courses, selected from:

- PSYO 3051.03: Research Methods in Sensation and Perception
- PSYO 3082.03: Experimental Social Psychology
- PSYO 3091.03: Methods in Developmental Psychology
- PSYO 3122.03: Methods in Experimental Clinical Psychology
- PSYO 3131.03: Research Methods in Attention
- PSYO 3133.03: Research Methods in Memory
- PSYO 3134.03: Psycholinguistic Methods Across the Lifespan

- PSYO 3137.03: Research Methods in Cognitive Neuroscience
- PSYO 3161.03: Measuring Behaviour
- PSYO 3165.03: Neuroethology
- PSYO 3370.03: Advanced Methods in Neurobiology
- PSYO 3371.03: Neuronal Organization Laboratory
- PSYO 3505.03: Neural Data Science
- PSYO 3511.03: Data Communication and Visualization in Psychology
- PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill **3 credit hours of lab course requirement**)

Plus an additional six credit hours of 3000/4000-level PSYO courses

4000 level

- PSYO 4901.03: Honours Foundation (a grade of B- or better is required to continue to PSYO 4902.03)
- PSYO 4902.03: Honours Thesis
- PSYO 3502.03: Statistical Methods II
- Six credit hours of 4000-level PSYO or NESC seminar courses (the following courses may also count toward this requirement: BIOC 4301.03, BIOL 4510.03, PATH 4100.03, PHAC 4001.03, PHAC 4403.03, PHAC 4409.03)

Psychology as the SECONDARY subject

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
  OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

2000 level

- PSYO 2000.03: Methods in Experimental Psychology & Neuroscience (with a grade of B+ or better)
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)

Plus an additional nine credit hours, selected from:

- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning: Conditioning and Motivation
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2220.03: Adult Psychopathology
- PSYO 2444.03: Forensic Psychology
- PSYO 2570.03: Cellular Neuroscience

Care should be taken in selecting second-year courses to ensure they provide the necessary prerequisites for courses intended to be taken in third and fourth years of study.

3000/4000 level
Three credit hours of designated lab courses, selected from:

- PSYO 3051.03: Research Methods in Sensation and Perception
- PSYO 3082.03: Experimental Social Psychology
- PSYO 3091.03: Methods in Developmental Psychology
- PSYO 3122.03: Methods in Experimental Clinical Psychology
- PSYO 3131.03: Research Methods in Attention
- PSYO 3133.03: Research Methods in Memory
- PSYO 3134.03: Psycholinguistic Methods Across the Lifespan

- PSYO 3137.03: Research Methods in Cognitive Neuroscience
- PSYO 3161.03: Measuring Behaviour
- PSYO 3165.03: Neuroethology
- PSYO 3370.03: Advanced Methods in Neurobiology
- PSYO 3371.03: Neuronal Organization Laboratory
- PSYO 3505.03: Neural Data Science
- PSYO 3511.03: Data Communication and Visualization in Psychology
- PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill **3 credit hours of lab course requirement**)

Plus an additional 15 credit hours of 3000/4000-level PSYO courses

Other regulations

- Laboratory courses focusing on human psychology typically require students to serve as participants and/or as experimenters in course projects. Students who do not wish to participate in such projects should ensure that they have the prerequisites necessary to register in alternative laboratory courses.
- Courses that are counted towards the Honours program requirements must be a minimum grade of C.

BSc or BA (120 credit hour) Major in Psychology

The 120 credit hour Major is suited to students who want to focus on Psychology, but wish to have a program that is somewhat less constrained than the Honours program. Psychology Majors complete a minimum of 42 (and a maximum of 60) credit hours in Psychology courses above the 1000 level and do not have thesis (or related) requirements. Research and other experiential learning opportunities are available through laboratories and research project classes.

Students should plan carefully and, if required, obtain advice from an academic advisor. Advisors can be consulted by visiting the Psychology and Neuroscience website or by contacting the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263 or 902-494-3417).

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections of this calendar. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Major program in Psychology must complete the following:

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
  OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

2000 level

- PSYO 2000.03: Methods in Experimental Psychology & Neuroscience
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)

Plus an additional nine credit hours, selected from:

- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning: Conditioning and Motivation
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2220.03: Adult Psychopathology
- PSYO 2444.03: Forensic Psychology
- PSYO 2570.03: Cellular Neuroscience

3000/4000 level

Three credit hours of designated lab courses, selected from:

- PSYO 3051.03: Research Methods in Sensation and Perception
- PSYO 3082.03: Experimental Social Psychology
- PSYO 3091.03: Methods in Developmental Psychology
- PSYO 3122.03: Methods in Experimental Clinical Psychology
- PSYO 3131.03: Research Methods in Attention
- PSYO 3133.03: Research Methods in Memory
- PSYO 3134.03: Psycholinguistic Methods Across the Lifespan

- PSYO 3137.03: Research Methods in Cognitive Neuroscience
- PSYO 3161.03: Measuring Behaviour
- PSYO 3165.03: Neuroethology
- PSYO 3370.03: Advanced Methods in Neurobiology
- PSYO 3371.03: Neuronal Organization Laboratory
- PSYO 3505.03: Neural Data Science
- PSYO 3511.03: Data Communication and Visualization in Psychology
- PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill **3 credit hours of lab course requirement**)

An additional 21 credit hours of 3000/4000-level PSYO courses

BSc or BA (120 credit hour) Double Major in Psychology and another subject

The Double Major degree program allows students to combine the study of Psychology with another subject. The other subject may be from any discipline in the Faculty of Science (other than Neuroscience), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Psychology may be the primary subject (with a minimum of 36, and a maximum of 54, credit hours above the 1000 level), or the secondary subject (minimum 36 credit hours above the 1000 level).

The student's primary subject is defined as the subject with the larger number of credit hours. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections of this calendar. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Double Major program in Psychology and another subject must complete the following:

Psychology as the PRIMARY or SECONDARY subject (same requirements for both options)

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
  OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

2000 level

- PSYO 2000.03: Methods in Experimental Psychology & Neuroscience
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)

Plus an additional nine credit hours, selected from:

- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning: Conditioning and Motivation
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2220.03: Adult Psychopathology
- PSYO 2444.03: Forensic Psychology
- PSYO 2570.03: Cellular Neuroscience

3000/4000 level

Three credit hours of designated lab courses, selected from:

- PSYO 3051.03: Research Methods in Sensation and Perception
- PSYO 3082.03: Experimental Social Psychology
- PSYO 3091.03: Methods in Developmental Psychology

- PSYO 3122.03: Methods in Experimental Clinical Psychology
- PSYO 3131.03: Research Methods in Attention
- PSYO 3133.03: Research Methods in Memory
- PSYO 3134.03: Psycholinguistic Methods Across the Lifespan
- PSYO 3137.03: Research Methods in Cognitive Neuroscience
- PSYO 3161.03: Measuring Behaviour
- PSYO 3165.03: Neuroethology
- PSYO 3370.03: Advanced Methods in Neurobiology
- PSYO 3371.03: Neuronal Organization Laboratory
- PSYO 3505.03: Neural Data Science
- PSYO 3511.03: Data Communication and Visualization in Psychology
- PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill **3 credit hours of lab course requirement**)

An additional 15 credit hours of 3000/4000-level PSYO courses

BSc or BA (90 credit hour) Minor in Psychology

The 90 credit hour degree with a Minor in Psychology is appropriate for students who want to study some Psychology but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general Science degree with some specialization in Psychology. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Psychology is usually the preferred option for students who wish to combine studies in Psychology with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program below).

See the Minor in Psychology section of this Calendar.

Minor in Psychology

This Minor is available to non-Psychology/Neuroscience students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science, or Bachelor of Science (Medical Science) program.

A BSc or BA (90 credit hour) degree program with a Minor in Psychology is also available.

Requirements

- A minimum of 18, to a maximum of 36, credit hours in Psychology courses at the 2000 level or higher.
- Note that PSYO 2000.03: Methods in Experimental Psychology and Neuroscience, PSYO 2470.03: Systems Neuroscience, and PSYO 2501.03: Statistical Methods I, are restricted to students in a Major/Honours program in Psychology or Neuroscience. However, if a student has completed these courses and switches from a major to a minor, these credits can be used to fulfill the requirements of the minor.

Please note that entry into upper-level Psychology courses (at the 2000 level or higher) requires completion of six credit hours at the first year level:

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
  OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

Contact Psychology for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Psychology

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Psychology may choose to include a Minor selected from the list of approved Minors (except Neuroscience). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Psychology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to student enrolled in a BSc or BA in Psychology include:

- Certificate in Animal Behaviour (Biology, Psychology and Neuroscience)
- Certificate in Science Leadership and Communication
- Certificate in Neurotechnology

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Psychology with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Psychology and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Psychology and from the Faculty of Engineering in their first year of study.

Required Psychology courses for a BSc/BEng or BA/BEng program in Psychology:

1000 level

- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person (or equivalent) with a grade of B- or better
- PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (or equivalent) with a grade of B- or better
  OR
- A grade of B- or better in the Psychology component of SCIE 1506.09 and SCIE 1507.09: Integrated Science Program I and II (or equivalent)

2000 level or higher

- A minimum of 18 credit hours in Psychology courses at the 2000 level or higher, other than PSYO 2000.03, PSYO 2470.03, and PSYO 2501.03, which are restricted to students in the Major and Honours programs in Psychology or Neuroscience.

Courses

Courses

Course Notes

4000-Level Seminars

These seminars are intended for Honours students in Psychology or Neuroscience. Third-year students may be eligible provided they obtain permission from the instructor, and the needs of all the Honours students have been met. Seminar courses offered, and the topics covered, vary from year to year. Go to the departmental website (www.dal.ca/psychandneuro) for more detail about course offerings and the topics to be covered in the current academic year.

Course Descriptions

PSYO 1011 Introduction to Psychology and Neuroscience I: From Neuron to Person

CREDIT HOURS: 3

Material covered includes historical background, research methodology, neural mechanisms that underlie behaviour, sensory and perceptual processes, states of consciousness, learning, and memory. The course is taught by several different instructors with expertise in the topics covered. Biweekly labs add depth to the material covered in lectures.

CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03). COORDINATOR: L. Stevens

EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1021.03, PSYO 1031.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1505X/Y.18, SCIE 1506.03 and SCIE 1507.03

FORMATS: Lecture | Lab

PSYO 1012 Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology

CREDIT HOURS: 3

This course extends the coverage offered in PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and includes material on development, cognition, intelligence, motivation, personality, social behaviour, and psychopathology. The course is taught by several different instructors with expertise in the topics covered. Biweekly labs add depth to the material covered in lectures.

CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) COORDINATOR: L. Stevens

EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1022.03, PSYO 1032.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1505X/Y.18, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1506.03 and SCIE 1507.03

FORMATS: Lecture | Lab

PSYO 1021 Introduction to Psychology and Neuroscience I: From Neuron to Person

CREDIT HOURS: 3

Material covered includes historical background, research methodology, neural mechanisms that underlie behaviour, sensory and perceptual processes, states of consciousness, learning, and memory. The course is taught by one or two different instructors with expertise in the topics covered. This course has no accompanying laboratory/tutorial.

CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).

EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1011.03, PSYO 1031.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1505X/Y.18, SCIE 1506.03 and SCIE 1507.03

FORMATS: Lecture

PSYO 1022 Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology

CREDIT HOURS: 3

This course extends the coverage offered in PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and includes material on development, cognition, intelligence, motivation, personality, social behaviour, and psychopathology. The course is taught by one or two different instructors with expertise in the

topics covered. This course has no accompanying laboratory/tutorial.
CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).
EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1012.03, PSYO 1032.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1505X/Y.18, SCIE 1506.03, SCIE 1507.03
FORMATS: Lecture

PSYO 1031 Introduction to Psychology and Neuroscience I: From Neuron to Person

CREDIT HOURS: 3
PSYO 1031 is the online distance education equivalent of PSYO 1011. Material covered includes historical background, research methodology, neural mechanisms that underlie behaviour, sensory and perceptual processes, states of consciousness, learning, and memory. Recorded lectures, lab activities and write-ups, quizzes, and class discussions will be delivered through the University's learning management system.
CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).
EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1011.03, PSYO 1021.03, SCIE 1500X/Y.30 SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1505X/Y.18, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.03, SCIE 1540X/Y.27, SCIE 1506.03 and SCIE 1507.03
FORMATS: Online Delivery

PSYO 1032 Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology

CREDIT HOURS: 3
PSYO 1032 is the online distance education equivalent of PSYO 1012. Material covered includes psychological development, problem solving, reasoning, intelligence, motivation and emotion, social behaviour, personality, health psychology, psychological disorders, and treatment. Recorded lectures, lab activities and write-ups, quizzes, and discussion will be delivered through the University's learning management system.
CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).
EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1012.03, PSYO 1022.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1505X/Y.18, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.03, SCIE 1540X/Y.27, SCIE 1506.03 and SCIE 1507.03
FORMATS: Online Delivery

PSYO 1501 Integrated Introductory Psychology I

CREDIT HOURS: 3
This course explores research methodology, neural mechanisms that underlie behaviour, sensory and perceptual processes, states of consciousness, learning, and memory. These topics are explored through an integrated lens using real-world applications and connections to other fields of study (Biology, Chemistry, Statistics, Earth & Environmental Sciences, Physics, and Ethics).
CALENDAR NOTES: This course is restricted to students in the Dalhousie Integrated Science Program (DISP) only.
RESTRICTIONS: Restricted to students in DISP only
EXCLUSIONS: Equivalent to: PSYO 1011.03, PSYO 1031.03 Exclusion with: SCIE 1506.03, SCIE 1507.03
FORMATS: Lecture | Lab

PSYO 1502 Integrated Introductory Psychology II

CREDIT HOURS: 3
This course builds on the foundation of PSYO 1501.03 and includes material on development, cognition, intelligence, motivation, personality, social behaviour, neurodiversity, and psychopathology. These topics are explored through an integrated lens using real-world applications and connections to other fields of study (Biology, Chemistry, Statistics, Earth & Environmental Sciences, Physics, and Ethics).
CALENDAR NOTES: This course is restricted to students in the Dalhousie Integrated Science Program (DISP) only.
RESTRICTIONS: This course is restricted to DISP students only
EXCLUSIONS: Equivalent to: PSYO 1012.03, PSYO 1032.03 Exclusion with: SCIE 1506.03, SCIE 1507.03
FORMATS: Lecture | Lab

PSYO 2000 Methods in Experimental Psychology and Neuroscience

CREDIT HOURS: 3
This course provides a thorough grounding in scientific research methods used by experimental psychologists and neuroscientists. Lectures explore concepts, methods, and analytic tools employed to investigate human and animal behaviour and neurophysiology. Students also complete assignments and write reports on a series of supervised laboratory experiments to illustrate concepts presented in lectures.
CALENDAR NOTES: Restricted to students registered in Psychology programs. It is highly recommended that students take PSYO 2501.03, Statistical

Methods I, concurrently with PSYO 2000.03. Students must attend the first lecture session.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: NESC 2000.03
EXCLUSIONS: NESC 2007.03
FORMATS: Lecture | Lab

PSYO 2080 Social Psychology

CREDIT HOURS: 3
The course undertakes a critical analysis of social theory and research promoting a close and skeptical evaluation of our knowledge, our obedience and rebellion, our affections and hostilities, our willingness to help and injure, our attempts to explain ourselves and others, our erotic orientations, and our gender roles.
PREREQUISITES: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03, OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
FORMATS: Lecture

PSYO 2090 Developmental Psychology

CREDIT HOURS: 3
People change with age. This course examines the changes that occur in humans from conception through adolescence. Biological, social, cognitive, and linguistic aspects of development are considered. Theory, research, and practical implications are integrated throughout the course.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
FORMATS: Lecture

PSYO 2130 Introduction to Cognitive Psychology

CREDIT HOURS: 3
Lectures focus on the processes involved in transforming sensory information into the meaningful everyday world that we know. Initially, emphasis is on the visual system, and how information within that system is structured and organized, followed by a consideration of the character of internal representations used in thinking and remembering.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: NESC 2130.03
FORMATS: Lecture

PSYO 2140 Learning: Conditioning and Motivation

CREDIT HOURS: 3
Lectures focus on several goals: (1) providing general principles of learning; (2) understanding the behaviour of particular species; (3) direct application to human problems. Emphasis is on understanding why researchers in animal learning do what they are currently doing (given the goals and the historical context).
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: NESC 2140.03
FORMATS: Lecture

PSYO 2150 Perceptual Processes

CREDIT HOURS: 3
Perception deals with the way in which our senses provide us with information about our environment. This course focuses on the process by which sensory experiences are coded, how they are interpreted by the nervous system, and how experience modifies perception.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18) OR BIOL 1010.03 (or BIOL 1020.03) and BIOL 1011.03 (or BIOL 1021.03). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: NESC 2150.03
EXCLUSIONS: PSYO 3005.03/NESC 3005.03
FORMATS: Lecture

PSYO 2160 Animal Behaviour

CREDIT HOURS: 3
Using concepts from behavioural biology and psychology, animal behaviourists attempt to explain why animals behave the way they do. The course examines topics such as mating and social systems, mate choice, the evolution of behaviour, and animal communication. The behaviour of a wide range of animals is studied.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03), each with a grade of B- or better; OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18), each with a grade of B- or better; OR BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, each with a grade of C or better.
CROSSLISTED: NESC 2160.03
FORMATS: Lecture

PSYO 2220 Adult Psychopathology

CREDIT HOURS: 3
This course provides an introduction to adult psychopathology. Diagnostic criteria and evidence on etiology and treatment of the major mental health disorders within adulthood are discussed. Historical, social, cultural, and contextual aspects of adult psychopathology are examined and current research in the field is highlighted.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
FORMATS: Lecture

PSYO 2444 Forensic Psychology

CREDIT HOURS: 3
This course provides an introduction to the application of psychology to the various areas of the criminal justice system (i.e., court, corrections, policing). In addition, consideration is given to the professional and ethical issues that arise when psychological knowledge is applied in forensic contexts.
PREREQUISITES: PSYO 1011.03 (or equivalent) and PSYO 1012.03 (or equivalent) with grade of B- or higher in both
EXCLUSIONS: PSYO 3224
FORMATS: Lecture

PSYO 2470 Systems Neuroscience

CREDIT HOURS: 3
This course provides an introduction to the functional systems of the brain. We examine neural systems (e.g., the sensory systems, motor system, neurotransmitter-specific systems) individually. We explore their anatomy and function, neurobiological properties that make each unique, and factors that are common to all neural systems (e.g., development and plasticity).
CALENDAR NOTES: Restricted to students registered in Psychology or Neuroscience Major or Honours programs.
PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better, or SCIE 1505X/Y.18 with a grade of B- or better.
CROSSLISTED: NESC 2470.03
RESTRICTIONS: Restricted to students registered in Psychology or Neuroscience Major or Honours programs.
EXCLUSIONS: PHYL 2041.03, PSYO 2770.03
FORMATS: Lecture

PSYO 2501 Statistical Methods I

CREDIT HOURS: 3
This course provides an introduction to research design and statistics within Neuroscience and Psychology. Particular emphasis is placed on conducting and interpreting various statistical procedures, including descriptive and inferential statistics (z-test, t-test, ANOVA, chi-square tests), frequently used in these fields.
CALENDAR NOTES: Only students undertaking a Major or Honours degree in Psychology or Neuroscience are eligible for enrolment. This course does not fulfil any part of the Faculty of Science Mathematics requirement.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
EXCLUSIONS: PSYO 3501.03
FORMATS: Lecture

PSYO 2570 Cellular Neuroscience

CREDIT HOURS: 3
This course explores the brain at the neuronal level. Material covered includes: the ionic basis of resting potentials; the electrical activity of neurons; synaptic transmission and plasticity; synthesis and action of synaptic transmitters; and drug actions. Cellular phenomena relevant to healthy and neurologically-dysfunctional systems are also discussed.

PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, or Principles of Biology I (BIOL 1010.03 or BIOL 1020.03) and Principles of Biology II (BIOL 1011.03 or BIOL 1021.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better, or SCIE 1505X/Y.18 with a grade of B- or better.
CROSSLISTED: NESC 2570.03, PHYL 2570.03
FORMATS: Lecture

PSYO 3001 Directed Project in Psychology

CREDIT HOURS: 3
Students work on single-term project under the supervision of faculty advisor. Requirements include a minimum grade of B in PSYO 2000.03, an overall B+ (GPA 3.30) average in all other Psychology courses, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. Coordinator permission required - contact: pnistud@dal.ca
CALENDAR NOTES: This course provides 3-credit hours of directed research. Students wanting a full-year research experience in a single lab with single project, should register for PSYO 3100.03 and PSYO 3101.03.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, previous or concurrent enrolment in two other Psychology or Neuroscience 3000-level courses, and Coordinator's consent.
CROSSLISTED: NESC 3001.03
EXCLUSIONS: PSYO 3000.06, NESC 3000.06, PSYO 3100.03, PSYO 3101.03, NESC 3100.03, NESC 3101.03
FORMATS: Lab

PSYO 3002 Directed Research in Psychology

CREDIT HOURS: 3
Students work on single-term project under the supervision of faculty advisor. Requirements include a minimum grade of B in PSYO 2000.03 (or NESC 2000.03), an overall B+ (GPA 3.30) average in all other Psychology courses, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. Coordinator permission required - contact: pnistud@dal.ca
CALENDAR NOTES: This course provides 3-credit hours of directed research. Students wanting a full-year research experience in a single lab with single project, should register for PSYO 3100.03 and PSYO 3101.03.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, previous or concurrent enrolment in two other Psychology or Neuroscience 3000-level courses, and Coordinator's consent.
CROSSLISTED: NESC 3002.03
EXCLUSIONS: PSYO 3000.06, NESC 3000.06, PSYO 3100.03, PSYO 3101.03, NESC 3100.03, NESC 3101.03
FORMATS: Lab

PSYO 3011 Experiential Learning in Science Communication I

CREDIT HOURS: 3
An experiential learning class for suitably-qualified senior students. This is a fundamentally ‘learn by doing’ course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO 1011.03 and PSYO 1012.03 lab groups (approx. 25 students). SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 3012.03 and no credit can be given for one course without the other. A grade will be given for PSYO 3011.03 only after PSYO 3012.03 is completed.
PREREQUISITES: B+ or better in PSYO 2000.03 (or equivalent), advanced courses in Psychology or Neuroscience, and Instructor’s consent.
CROSSLISTED: NESC 3011.03
EXCLUSIONS: NESC 3010.06
FORMATS: Lecture | Lab | Seminar

PSYO 3012 Experiential Learning in Science Communication II

CREDIT HOURS: 3
An experiential learning class for suitably-qualified senior students. This is a fundamentally ‘learn by doing’ course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO 1011.03 and PSYO 1012.03 lab groups (approx. 25 students). SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken after, and in conjunction with, PSYO 3011.03 in the same academic year and no credit can be given for one course without the other. A grade will be given for PSYO 3011.03 only after PSYO 3012.03 is completed.
PREREQUISITES: PSYO 3011.03
CROSSLISTED: NESC 3012.03
EXCLUSIONS: PSYO 3010.06
FORMATS: Lecture | Lab | Seminar

PSYO 3051 Research Methods in Sensation and Perception

CREDIT HOURS: 3
A hands-on course that explores sensory perception with an emphasis on data collection, analysis, and interpretation. Several methodologies are used across the different senses to study perception and its neural underpinnings.
CALENDAR NOTES: Students should be aware that some data collection may occur outside of class time.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2470.03/NESC 2470.03, and PSYO 2150.03/NESC 2150.03
CROSSLISTED: NESC 3051.03
FORMATS: Lecture | Lab

PSYO 3060 Psychological Perspectives of Sex & Gender

CREDIT HOURS: 3
Students will explore how the different areas of psychology understand, inform, and at times contradict, knowledge of and diversity in sex and gender.
PREREQUISITES: PSYO 1011.03 and PSYO 1012.03
FORMATS: Lecture | Discussion

PSYO 3082 Experimental Social Psychology

CREDIT HOURS: 3
This course attempts to develop students' skill level in empirical analysis of social psychology phenomena. Students complete two research projects during the term. The projects involve testing subjects, coding data, computer data analysis, and report writing. Familiarity with computer-based statistical analysis and text processing is strongly recommended.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and PSYO 2080.03
FORMATS: Lecture | Lab

PSYO 3091 Methods in Developmental Psychology

CREDIT HOURS: 3
This course provides a survey of research methods in developmental psychology. It assumes knowledge of basic methodology and design, and concentrates on methods of relevance to the study of human development. In addition to lectures, students conduct a number of research exercises to gain experience in conducting research with children.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and PSYO 2090.03
FORMATS: Lecture | Lab

PSYO 3093 Development of Language and Literacy Abilities

CREDIT HOURS: 3
This course examines the cognitive and linguistic processes underlying language acquisition and how they interact in influencing the development of language and literacy abilities.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, and PSYO 2090.03
FORMATS: Lecture

PSYO 3100 Independent Research in Psychology I

CREDIT HOURS: 3
For upper-year students who wish to gain research experience. Requirements include a minimum grade of B in PSYO 2000.03/NESC 2000.03, a high level of performance in other Psychology courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED. Contact: pnistud@dal.ca
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 3101.03 and no credit can be given for one course without the other. The work undertaken in PSYO 3101.03 should be a continuation of that initiated in PSYO 3100.03. A grade will be given for PSYO 3100.03 only after PSYO 3101.03 is completed.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03 and PSYO 2501.03
CROSSLISTED: NESC 3100.03
RESTRICTIONS: Restricted to Psychology Majors and Honours Students
EXCLUSIONS: PSYO 3001.03, PSYO 3000.06
FORMATS: Lab | Experiential Learning

PSYO 3101 Independent Research in Psychology II

CREDIT HOURS: 3
For upper-year students who wish to gain research experience. Requirements include a minimum grade of B in PSYO 2000.03/NESC 2000.03, a high level of performance in other Psychology courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE

REQUIRED. Contact: pnistud@dal.ca
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 3100.03 and no credit can be given for one course without the other. The work undertaken in PSYO 3101.03 should be a continuation of that initiated in PSYO 3100.03. A grade will be given for PSYO 3100.03 only after PSYO 3101.03 is completed.
PREREQUISITES: PSYO 3100.03 and Coordinator's consent
CROSSLISTED: NESC 3101.03
RESTRICTIONS: Restricted to Psychology Majors and Honours Students
EXCLUSIONS: PSYO 3000.06, PSYO 3001.03
FORMATS: Lab | Experiential Learning

PSYO 3122 Methods in Experimental Clinical Psychology

CREDIT HOURS: 3
Students learn how to conduct research on topics in applied clinical psychology. Students conduct a series of research projects in the laboratory by serving both as subjects and experimenters, and analyze the results of these studies in written lab reports. Research studies serve to illustrate concepts discussed in class.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and PSYO 2220.03
FORMATS: Lecture | Lab

PSYO 3129 Childhood Psychopathology

CREDIT HOURS: 3
This course examines a wide range of mental health disorders in children (e.g., reading disability, autism, ADHD). The goal is to gain a better understanding of the nature of these disorders, to learn about evidence-based assessment and treatment, and to review research findings in relation to children's mental health.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03; PSYO 2220.03 is recommended
FORMATS: Lecture

PSYO 3131 Research Methods in Attention

CREDIT HOURS: 3
The methods, findings, and theories that underpin our understanding of attention (alertness, preparation, selection, and control of information processing) are covered. Behavioural and neuroscientific evidence as well as computational models are examined in the lectures. Laboratories emphasize behavioural methods used to isolate and reveal the components of attention.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, PSYO 2501.03, and PSYO 2130.03/NESC 2130.03 or PSYO 2150.03/NESC 2150.03
CROSSLISTED: NESC 3131.03
EXCLUSIONS: PSYO/NESC 3130.06
FORMATS: Lecture | Lab

PSYO 3132 Research Methods in Visual Cognition

CREDIT HOURS: 3
Visual cognition is the study of how we extract meaning from our visual environment and use it to direct our behaviour. Emphasis is placed on object, face, and word recognition as revealed by normal behaviour, and by neuroimaging techniques and neuropsychological studies of brain-damaged individuals who have lost these recognition abilities.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and PSYO 2130.03/NESC 2130.03 or PSYO 2150.03/NESC 2150.03
CROSSLISTED: NESC 3132.03
EXCLUSIONS: PSYO 3130.06/NESC 3130.06
FORMATS: Lecture | Lab

PSYO 3133 Research Methods in Memory

CREDIT HOURS: 3
This course examines human memory from the perspective of cognitive psychology and, to a lesser extent, cognitive neuroscience. Lectures emphasize cognitive approaches to the study of memory with an explicit focus on empirical research methods, data, and interpretation of results.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2501.03, and PSYO 2130.03/NESC 2130.03
CROSSLISTED: NESC 3133.03
EXCLUSIONS: PSYO 3130.06/NESC 3130.06
FORMATS: Lecture | Lab

PSYO 3134 Psycholinguistic Methods Across the Lifespan

CREDIT HOURS: 3
This course provides a survey of research methods for studying language at various points in development. It explores topics in infant through adult language, introducing students to behavioural and neuroimaging techniques. Knowledge of basic research methodology and design is assumed. Students complete exercises to gain experience conducting language research.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, PSYO 2470.03/NESC 2470.03 (or equivalent), and one of PSYO 2090.03 or PSYO 2130.03/NESC 2130.03
CROSSLISTED: NESC 3134.03
EXCLUSIONS: PSYO 3130.06/NESC 3130.06
FORMATS: Lecture | Lab

PSYO 3137 Research Methods in Cognitive Neuroscience

CREDIT HOURS: 3
An overview of neuroimaging and other techniques of cognitive neuroscience (including fMRI, ERP, and others) focusing on how they work, how they are applied, and their inherent limitations. Labs include experience collecting and analyzing ERP data, demonstrations of fMRI scanning, and analysis of fMRI data.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, PSYO 2501.03, and PSYO 2130.03/NESC 2130.03
CROSSLISTED: NESC 3137.03
FORMATS: Lecture | Lab

PSYO 3161 Measuring Behaviour

CREDIT HOURS: 3
Measuring behaviour is essential in the study of ethology, behavioural neuroscience, developmental, social and clinical psychology. The function of this laboratory course is to teach methods of observing and scoring behaviour using qualitative and quantitative methods. Sampling methods, behaviour description and analysis will be done in laboratory and naturalistic settings.
PREREQUISITES: PSYO 2000.03/NESC 2000.03
CROSSLISTED: NESC 3161.03
FORMATS: Lab

PSYO 3162 Advanced Animal Behaviour: Theories and Applications

CREDIT HOURS: 3
This course focuses on advanced theories and applications of animal behaviour, with a focus on proximate, integrative and applied questions. It offers a more in-depth analysis of topics covered in PSYO 2160.03/NESC 2160.03 and explores trends and issues in contemporary ethology, animal psychology and behavioural ecology.
PREREQUISITES: PSYO 2000.03/NESC 2000.03 or BIOL 3062.03 or BIOL 3630.03, and PSYO 2160.03/NESC 2160.03
CROSSLISTED: NESC 3162.03
FORMATS: Lecture

PSYO 3165 Neuroethology

CREDIT HOURS: 3
Neuroethology explores how assemblies of neurons produce behaviour. The course typically uses a mix of simple model systems, including live animals (e.g., earthworms), visual systems, and robotics to examine how nervous systems produce behaviour.
CALENDAR NOTES: All experiments in the accompanying lab involve invertebrates. Students are required to handle invertebrates during the lab.
PREREQUISITES: PSYO 2570.03/NESC 2570.03, and either PSYO 2000.03 or NESC 2000.03 or BIOL 2020.03
CROSSLISTED: NESC 3165.03
FORMATS: Lab

PSYO 3170 Hormones and Behaviour

CREDIT HOURS: 3
This course examines how chemical signals of the neural, endocrine, and immune systems interact to influence the brain and behaviour and how neurotransmitters, cytokines, and hormones control neural and behavioural development, sexual, aggressive, and maternal behaviour. Hormone receptors in the brain, reproduction, puberty, brain sex differences, and stress are also examined.
PREREQUISITES: PSYO 2470.03/NESC 2470.03 or PHYL 2041.03
CROSSLISTED: NESC 3170.03
EXCLUSIONS: PSYO 2170.03/NESC 2170.03

PSYO 3180 Psychoneuroimmunology/Ecological Immunology

CREDIT HOURS: 3
Our behaviour can influence how well we resist disease, and infection can alter behaviour. This course examines how immune systems and nervous systems interact in both vertebrates and invertebrates. Evolutionary forces that have led to the existence of these interactions are also examined.
PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, and one of PSYO 2770.03 or PSYO 2470.03/NESC 2470.03 or PHYL 2041.03 or MICI 2100.03; OR BIOL 2020.03
CROSSLISTED: NESC 3180.03
FORMATS: Lecture

PSYO 3190 Psycholinguistics

CREDIT HOURS: 3
Explores the cognitive and neural bases of human language processing. Topics include: human language and other communication systems; phonology; morphology; semantics; syntax; discourse; first and second language acquisition; relationship of language to general cognitive functions such as music and mathematics; signed languages such as American Sign Language; and non-linguistic gesture.
PREREQUISITES: PSYO 2000.03/NESC 2000.03 and PSYO 2130.03/NESC 2130.03
CROSSLISTED: NESC 3190.03
EXCLUSIONS: PSYO/NESC 2190.03
FORMATS: Lecture

PSYO 3220 Clinical Psychology

CREDIT HOURS: 3
A survey of professional issues relevant to the practice of clinical psychology in hospitals, private practice, schools, the court system, and the community. Students gain knowledge about psychological services, and an understanding of the training, ethics, and expertise that clinical psychology brings to the delivery of mental health and healthcare.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2220.03
EXCLUSIONS: PSYO 2120.03
FORMATS: Lecture

PSYO 3225 Health Psychology

CREDIT HOURS: 3
A study of psychological influences on how people stay healthy and how they respond when they become ill. Using a biopsychosocial model, this course examines topics such as health behaviours and prevention, stress and coping, the patient in treatment settings, and management of chronic and terminal illness.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2220.03
FORMATS: Lecture

PSYO 3227 Principles of Human Neuropsychology

CREDIT HOURS: 3
Clinical neuropsychologists study the organization of cognitive, emotional, and social functions in the brain to understand how brain damage alters human behaviour across the lifespan. We examine how clinicians diagnose and rehabilitate persons with brain diseases and disorders. Assignments emphasize application of textbook/lecture-based knowledge, critical thinking, and group presentation skills.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03, NESC/PSYO 2130.03 is recommended
CROSSLISTED: NESC 3227.03
FORMATS: Lecture

PSYO 3237 Drugs and Behaviour

CREDIT HOURS: 3
An introduction to behavioural psychopharmacology. The lectures involve basic anatomy, physiology, and chemistry of the nervous system. Behavioural effects and underlying mechanisms of various psychoactive drugs are discussed. Specific topics covered are alcohol, tobacco, amphetamines, cocaine, opiates, hallucinogens, tranquilizers, and antipsychotic drugs.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2470.03/NESC 2470.03 or PSYO 2570.03/NESC 2570.03
CROSSLISTED: NESC 3237.03
FORMATS: Lecture

PSYO 3264 The Science of Sleep

CREDIT HOURS: 3
This course reviews the history, methods and results of the scientific study of sleep. Topics include: circadian and homeostatic regulation; developmental and

cultural impacts; normal and abnormal function of neural and other control mechanisms; effects of sleep loss on performance and health; theories of the functions of sleep.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2470.03/NESC 2470.03; OR BIOL 2020.03
CROSSLISTED: NESC 3264.03
FORMATS: Lecture

PSYO 3270 Developmental Neuroscience

CREDIT HOURS: 3
This course presents the fundamentals of development in complex and simple nervous systems. Cell differentiation, pattern regulation, proliferation, migration, and circuit development are discussed. Special attention is given to later developmental events such as neuronal growth cones, cell death, growth factors, neuron-target interactions, and synapse formation.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2470.03/NESC 2470.03 and PSYO 2570.03/NESC 2570.03
CROSSLISTED: NESC 3270.03
FORMATS: Lecture

PSYO 3271 Developmental Origins of Health and Disease

CREDIT HOURS: 3
This course explores the role that developmental events (internal and external) play in health and disease, emphasizing their role in programming stress responding and metabolic processes across the lifespan. Students learn about underlying epigenetic mechanisms, environmental/sociocultural influences, disease processes impacted (e.g., stress-related and metabolic-related diseases), societal implications, and prevention/mitigation strategies.
PREREQUISITES: NESC 2000.03 or PSYO 2000.03 AND NESC 2470.03 or PSYO 2470.03
CROSSLISTED: NESC 3271.03
FORMATS: Lecture

PSYO 3280 Personality

CREDIT HOURS: 3
Personality deals with questions such as: Is a science of persons possible? Are there types of personalities, or is each individual's personality unique? Is an individual's life history an expression of his or her personality, or is personality description merely a summary statement of behaviour whose cause lies elsewhere?
PREREQUISITES: PSYO 2000.03/NESC 2000.03, and one of PSYO 2080.03 or PSYO 2090.03 or PSYO 2220.03
FORMATS: Lecture

PSYO 3370 Advanced Methods in Neurobiology

CREDIT HOURS: 3
Introduction to several neurophysiological techniques used in contemporary neuroscience, employing extracellular and intracellular electrical recording and stimulation methods on nervous system preparations, both sensory and motor. After introductory instruction, students in groups of 2 or 3 get to perform quite sophisticated practical experiments themselves, enabled by computer-based data acquisition.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, PSYO 2470.03/NESC 2470.03 and PSYO 2570.03/NESC 2570.03
CROSSLISTED: NESC 3370.03
FORMATS: Lab

PSYO 3371 Neuronal Organization Laboratory

CREDIT HOURS: 3
Introduction to several techniques used in contemporary neuroscience. Students work under supervision in groups of 2 or 3 in regular labs that introduce neuroanatomical analyses using the following: Golgi impregnation, immunocytochemistry, dye-tracing of connections, electronmicroscopy of the retina, and neurotransmitter determinations using HPLC.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, PSYO 2470.03/NESC 2470.03 and PSYO 2570.03/NESC 2570.03
CROSSLISTED: NESC 3371.03
FORMATS: Lab

PSYO 3444 Criminal Behaviour

CREDIT HOURS: 3
This course provides a theoretical and practical understanding of the causes and correlates of criminal behaviour. Topics include biological and social theories of crime, risk assessment, rehabilitation, and the application of each topic to the study of different populations involved in the justice system (youth, women, Indigenous peoples, etc.).
PREREQUISITES: PSYO 2000 or NESC 2000 (or equivalent), and students must have completed at least 30 credit hours toward their degree.

RESTRICTIONS: E1
FORMATS: Lecture

PSYO 3502 Statistical Methods II

CREDIT HOURS: 3
This course is the continuation of PSYO 2501.03, with the examination of more complex, but commonly used, inferential statistics. Topics include factorial ANOVA, ANCOVA, and multiple regression. This course is for Honours students in Psychology or Neuroscience. Class work includes computer-based assignments.
CALENDAR NOTES: PSYO 3502.03 is to be taken concurrently with PSYO 4901.03/NESC 4901.03. Permission for registration is dependent upon admission to the Honours program.
COREQUISITES: NESC 4901.03/PSYO 4901.03
RESTRICTIONS: Restricted to PSYO and NESC Honours students only. Permission by instructor REQUIRED.
FORMATS: Lecture | Lab

PSYO 3505 Neural Data Science

CREDIT HOURS: 3
An introduction to data management, manipulation, visualization, and analysis for neuroscience. Students learn scientific programming in Python, and use this to work with example data from areas such as single-cell recording, EEG, structural and functional MRI, and confocal microscopy. Basic signal processing techniques including filtering are covered.
PREREQUISITES: PSYO 2501.03 with a grade of B or higher, and NESC 2000.03 or PSYO 2000, and NESC 2470.03 or PSYO 2470.03
CROSSLISTED: NESC 3505.03
FORMATS: Lab | Online Delivery

PSYO 3511 Data Communication and Visualization in Psychology

CREDIT HOURS: 3
The history, psychology, and practical guidance in data visualization and reporting are covered. Open source statistics software will be used and so some coding will be done. The format will be lecture and lab.
PREREQUISITES: PSYO 2000.03, PSYO 2501.03
FORMATS: Lecture | Lab

PSYO 3581 History of Psychology I

CREDIT HOURS: 3
Drawing on writings from antiquity to the early years of the 20th century, we explore the nature of historical explanation, explanation in science, knowledge and truth, life, human nature, the domains of animal and man, neuroscience, and personality. Usually offered in the Fall term.
PREREQUISITES: PSYO 1011.03 or PSYO 1012.03 or equivalent, or Instructor's consent
EXCLUSIONS: PSYO 3580.06
FORMATS: Lecture

PSYO 3582 History of Psychology II

CREDIT HOURS: 3
Drawing on writings from antiquity to the early years of the 20th century, we explore the nature of learning, thinking, memory, intelligence, mental illness and treatment, the unconscious, dreams, development, and the self. Usually offered in the Winter term. Familiarity with ideas developed in PSYO 3581 is helpful.
PREREQUISITES: PSYO 1011.03 or PSYO 1012.03 or equivalent, or instructor's consent
EXCLUSIONS: PSYO 3580.06
FORMATS: Lecture

PSYO 3670 Genes, Brain and Behaviour

CREDIT HOURS: 3
The application of genetic techniques to the study of cognitive abilities, psychopathology, personality disorders, stress-related illnesses, and ethical issues in genetic research. The role of genetic factors in eating and drug abuse problems, as well as methods used to study gene-environment interactions are explored.
PREREQUISITES: PSYO 2470.03/NESC 2470.03 or PSYO 2770.03 or PHYL 2041.03, AND BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, or SCIE 1505X/Y.18, SCIE 1515.X/Y36, SCIE 1520X/Y.30, or SCIE 1540X/Y.27 (with a grade of B- or better); BIOL 2020.03 and BIOL 2030.03 are recommended.
CROSSLISTED: NESC 3670.03
EXCLUSIONS: PSYO/NESC 2670.03
FORMATS: Lecture

PSYO 3770 Behavioural Neuroscience
CREDIT HOURS: 3
Behavioural neuroscience explores the neural and hormonal mechanisms underlying a variety of behavioural phenomena. The course focuses on neural correlates of social and emotional behaviour, motor behaviour and patterns, and behavioural toxicology processes (neurotoxins and endocrine disruptors).
PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2470.03/NESC 2470.03
CROSSLISTED: NESC 3770.03
FORMATS: Lecture

PSYO 3970 Molecular Neuroscience
CREDIT HOURS: 3
This course examines the development, function, and pathology of the brain at the molecular level. A particular focus will be placed upon the molecular mechanisms thought to contribute to neurological disease. The basic molecular neuroscience tools used to study these mechanisms are emphasized.
PREREQUISITES: PSYO 2570.03/NESC 2570.03 or BIOL 2020.03 or BIOL 2030.03
CROSSLISTED: NESC 3970.03
FORMATS: Lecture

PSYO 4000 Directed Reading Project
CREDIT HOURS: 3
An individually tailored reading or study course designed to allow Honours students to focus on a particular issue, or a set of related issues, that are not part of the regular program. Enrollment is contingent upon securing a faculty member to supervise the study program. This course can count as a seminar class.
SIGNATURE REQUIRED
Contact: pnistud@dal.ca
CROSSLISTED: NESC 4000.03
FORMATS: Seminar

PSYO 4001 Contemporary Issues in Psychology
CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4002 Topics in Experimental Psychology
CREDIT HOURS: 3
This seminar explores select topics in experimental psychology. Students develop in-depth knowledge of a specific area of research through critical evaluation of the scientific literature. Topics vary from year to year; please consult the department for information on this year's focus.
CALENDAR NOTES: This is a fourth-year seminar for students completing an Honours degree in Psychology or Neuroscience.
RESTRICTIONS: Instructor permission required
FORMATS: Seminar

PSYO 4040 Learning Applications in Clinical and Social Psychology
CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4050 Topics In Perception
CREDIT HOURS: 3
SIGNATURE REQUIRED
PREREQUISITES: PSYO 3051.03/NESC 3051.03
CROSSLISTED: NESC 4050.03
FORMATS: Seminar

PSYO 4060 Contemporary Issues in Human Sexuality

CREDIT HOURS: 3
This course examines human sexuality from a psychological perspective. Theory, research, and clinical issues are covered, emphasizing critical evaluation of the empirical literature. Rather than cover the breadth of human sexuality, this seminar examines key issues in depth. Topics are chosen to stimulate thinking and discussion about sexuality and research.
CALENDAR NOTES: This is a fourth-year seminar for students completing an Honours degree in Psychology or Neuroscience. It is expected that students will possess sound foundational knowledge relating to the science of human behaviour. The course will include a combination of lecture, in-class discussion, and student-led presentations.
RESTRICTIONS: Instructor permission required
EXCLUSIONS: PSYO 4120 (in Winter 2015; Winter 2022)
FORMATS: Seminar

PSYO 4080 Topics in Social Psychology and Personality

CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4090 Development of Social Behaviour

CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4091 Social Determinants of Health and Child Development

CREDIT HOURS: 3
This course focuses on the impacts of social determinants of health on child and adolescent development. Different social determinants of health are explored in relation to development (e.g., income, food insecurity, social safety network, social exclusion, education/literacy, childhood trauma, access to health services, sexual orientation, gender, disability, culture, racism, etc.).
CALENDAR NOTES: This is a fourth-year course for students completing an Honours degree in Psychology. It is expected that students will possess sound foundational knowledge relating to the science of human behaviour.
PREREQUISITES: PSYO 2090
RESTRICTIONS: Instructor Permission Required
EXCLUSIONS: PSYO 6091
FORMATS: Seminar

PSYO 4092 Topics in Developmental Psychology

CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4120 Topics in Clinical Psychology

CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4130 Topics in Cognition

CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: NESC 4130.03
FORMATS: Seminar

PSYO 4140 Animal Learning Topics

CREDIT HOURS: 3
SIGNATURE REQUIRED

CALENDAR NOTES: PSYO 2140.03/NESC 2140.03 recommended
CROSSLISTED: NESC 4140.03
FORMATS: Seminar

PSYO 4160 Topics in Behavioural Biology
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: NESC 4160.03
FORMATS: Seminar

PSYO 4170 Topics in Behavioural Neuroendocrinology
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: NESC 4170.03
RESTRICTIONS: Restricted to PSYO/NESC Honours Students
FORMATS: Seminar

PSYO 4196 Quantitative Intros & Meta Analyses
CREDIT HOURS: 3
Introduction to the quantitative introduction, meta analyses and, preeminently, meta analytic thinking primarily through exercises tailored to student interests, when possible.
PREREQUISITES: Advanced statistics classes or experience are expected (e.g., PSYO 3502 or PSYO 6001)
RESTRICTIONS: Instructor permission required
FORMATS: Seminar

PSYO 4224 Topics in Forensic Psychology
CREDIT HOURS: 3
SIGNATURE REQUIRED
RESTRICTIONS: Restricted to Psychology Honours students
FORMATS: Seminar

PSYO 4225 The Science of Mindfulness
CREDIT HOURS: 3
This seminar focuses on the scientific literature relating to the concept, and practice of, mindfulness. Topics explore the effects of mindfulness practice on the brain, cognition, the immune system, addiction, emotion regulation, interpersonal relations, pain, and stress. Critical evaluation of the literature is emphasized.
CROSSLISTED: NESC 4225.03
RESTRICTIONS: Requires permission of instructor
EXCLUSIONS: PSYO 6225.03, PSYO 4001.03 (in 2017/18, 18/19, 19/20)
FORMATS: Seminar

PSYO 4227 Neurobiological Basis of Psychopathology
CREDIT HOURS: 3
This seminar will focus on biological foundations of the etiology, maintenance, and treatment of various forms of psychopathology. Topics will include: evolutionary, genetic and neurobiological foundations of psychopathology; as well as how various therapeutic approaches (e.g. diet, exercise, psychotherapy, medication) impact neurobiological processes.
RESTRICTIONS: Signature required
EXCLUSIONS: PSYO 6804.03
FORMATS: Seminar

PSYO 4230 Human Performance Topics
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: NESC 4230.03
FORMATS: Seminar

PSYO 4501 Honours Thesis I

CREDIT HOURS: 3
Under a staff member's supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4502.03 and no credit can be given for one course without the other. The work undertaken in PSYO 4502.03 should be a continuation of that initiated in PSYO 4501.03. A grade will be given for PSYO 4501.03 only after PSYO 4502.03 is completed.
PREREQUISITES: PSYO 2000.03 or equivalent with a grade of B+ or higher, PSYO 3502.03, admission to the honours program, and instructor's consent.
CROSSLISTED: NESC 4501.03
RESTRICTIONS: Restricted to Honours Psychology students in their graduating year.
EXCLUSIONS: PSYO 4500.06
FORMATS: Lecture | Lab | Experiential Learning

PSYO 4502 Honours Thesis II

CREDIT HOURS: 3
Under a staff member's supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4501.03 and no credit can be given for one course without the other. The work undertaken in PSYO 4502.03 should be a continuation of that initiated in PSYO 4501.03. A grade for 4501.03 will only be given when 4502.03 is complete.
PREREQUISITES: PSYO 2000.03 or equivalent with a grade of B+ or higher, PSYO 3502.03, and PSYO 4501.03 admission to the honours program, and instructor's consent.
CROSSLISTED: NESC 4502.03
RESTRICTIONS: Restricted to Honours Psychology students in their graduating year.
EXCLUSIONS: PSYO 4500.06
FORMATS: Lecture | Lab | Experiential Learning

PSYO 4581 Topics in the History of Psychology

CREDIT HOURS: 3
This course will cover in depth a particular topic in Psychology as it changes through history, from conception, development, and study, including important figures and historical context. Topic changes from year to year.
PREREQUISITES: PSYO 1011.03 or PSYO 1012.03 or equivalent, or instructor's consent.
FORMATS: Seminar

PSYO 4705 Neurotechnology Innovation, Commercialization, and Entrepreneurship

CREDIT HOURS: 3
Intensive 2-week course in neurotechnology, clinical neuroscience, and commercialization. Topics include neuroimaging methods; diagnosis, assessment, and treatment of nervous system-related disorders; the process of innovation; and business fundamentals. Features guest lectures by successful scientists and entrepreneurs, as well as hands-on workshops and lab exercises on business and neurotechnology topics.
PREREQUISITES: Two full years of undergraduate University study, plus instructor's consent
CROSSLISTED: NESC 4705.03
EXCLUSIONS: PSYO 7705.06
FORMATS: Lecture

PSYO 4740 Topics in the Neurobiology of Learning and Memory

CREDIT HOURS: 3
SIGNATURE REQUIRED
PREREQUISITES: PSYO 2470.03/NESC 2470.03, PSYO 2140.03/NESC 2140.03
CROSSLISTED: NESC 4740.03
FORMATS: Seminar

PSYO 4901 Honours Foundation

CREDIT HOURS: 3
Under a staff member's supervision, each student conducts original research in psychology and/or neuroscience. Students meet weekly as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on presentation, written proposal report, and lab work/skills Please note: admission requires that the student has secured a willing supervisor in addition to meeting grade requirements.
SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4902.03. A minimum grade of B- or higher is required in PSYO 4901.03 to continue on in PSYO 4902.03. Student who do not achieve the minimum grade in PSYO 4901.03 will be removed from PSYO 4902.03 and not permitted to continue in the Honours program. The work undertaken in PSYO 4902.03 should be a continuation of that initiated in PSYO 4901.03.
COREQUISITES: PSYO 3502.03
PREREQUISITES: Instructor Approval (see Academic Calendar for Honours Admission Requirements)
CROSSLISTED: NESC 4901.03
RESTRICTIONS: PSYO and NESC Honours students only
EXCLUSIONS: PSYO 4501.03, NESC 4501.03, PSYO 4500.06, NESC 4500.06
FORMATS: Seminar

PSYO 4902 Honours Thesis
CREDIT HOURS: 3
Under a faculty member's supervision, each student conducts original research in psychology. Students meet as a class to describe their research projects and ongoing progress. A formal written report of the completed thesis is required. Final grade will reflect written thesis and lab work/skills development. Students must receive a grade of B- or higher in 4901 in order to continue into 4902. Students who do not receive a B- or higher in 4901 will be removed from the Honours degree.
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4901.03. A minimum grade of B- or higher is required in PSYO 4901.03 to continue on in PSYO 4902.03. Student who do not achieve the minimum grade in PSYO 4901.03 will be removed from PSYO 4902.03 and not permitted to continue in the Honours program. The work undertaken in PSYO 4902.03 should be a continuation of that initiated in PSYO 4901.03.
PREREQUISITES: PSYO 4901.03 with B- or higher and Instructor Approval (see Academic Calendar for Honours Admission Requirements)
CROSSLISTED: NESC 4902.03
RESTRICTIONS: PSYO and NESC majors only
EXCLUSIONS: PSYO 4502.03, NESC 4502.03, PSYO 4500.06, NESC 4500.06
FORMATS: Seminar

Science, Interdisciplinary

Courses
Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department.

Course Descriptions

SCIE 1010 Science2Health I
CREDIT HOURS: 0
This 0-credit course is for students following the Science2Health pathway programming. Students will receiving advising support, learn about opportunities for professional development, explore real-world connections between science and health, and more.
CALENDAR NOTES: This class is for students in their first semester of studies who have completed fewer than 16 credit hours.
RESTRICTIONS: Restricted to students in the BSc program
FORMATS: Discussion

SCIE 1020 Science2Health II

CREDIT HOURS: 0
This 0-credit course is for students following the Science2Health pathway programming. Students will receiving advising support, learn about opportunities for professional development, explore real-world connections between science and health, and more.
CALENDAR NOTES: This class is for students in their second semester of studies who have completed fewer than 32 credit hours.
RESTRICTIONS: Restricted to students in the BSc program
FORMATS: Discussion

SCIE 1030 Science2Health III

CREDIT HOURS: 0
This 0-credit course is for students following the Science2Health pathway programming. Students will receiving advising support, learn about opportunities for professional development, explore real-world connections between science and health, and more.
CALENDAR NOTES: This class is for students in their third semester (fall, 2nd year) of studies who have completed fewer than 46 credit hours.
RESTRICTIONS: Restricted to students in the BSc program
FORMATS: Discussion

SCIE 1040 Science2Health IV

CREDIT HOURS: 0
This 0-credit course is for students following the Science2Health pathway programming. Students will receiving advising support, learn about opportunities for professional development, explore real-world connections between science and health, and more.
CALENDAR NOTES: This class is for students in their fourth semester of studies who have completed fewer than 61 credit hours.
RESTRICTIONS: Restricted to students in the BSc program
FORMATS: Discussion

SCIE 1111 Writing for the Sciences

CREDIT HOURS: 3
This course satisfies the Faculty of Science Writing Requirement. The course covers communication theory; scientific style; grammar and punctuation; words, sentences, and paragraphs; the scientific process and scientific communication; research proposals; graphics; sections of the scientific paper; citations and references; posters; and ethics. Weekly assignments/quizzes apply writing skills introduced in lectures and small weekly tutorials further develop skills.
FORMATS: Lecture | Tutorial

SCIE 1506 Integrated Science I

CREDIT HOURS: 9
This course comprises the first half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1506 consists of lectures, laboratories, and field trips in Biology, Psychology and Statistics, as well as integrated lectures and workshops that cut across disciplines. It also has an interdisciplinary Writing in Science component that prepares students for research projects in SCIE 1507. Together, SCIE 1506 and SCIE 1507 provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science I must also register for CHEM 1011.03 and PHIL 1050.03 (Ethics in Science). Registration in PHYC 1190.03 or PHYC 1310.03 is recommended for students considering programs that require Physics. For calculus, students register in MATH 1000.03 (fall or winter) or MATH 1215.03 (fall or winter). Students taking MATH 1010.03 in fall term have the option to additionally take MATH 1010.03 in winter term.
CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).
COREQUISITES: PHIL 1050.03, CHEM 1011.03
RESTRICTIONS: Registration is restricted to Integrated Science students.
EXCLUSIONS: BIOL 1011.03, BIOL 1021.03, PSYO 1011.03, STAT 1060.03
FORMATS: Lecture | Lab

SCIE 1507 Integrated Science II

CREDIT HOURS: 9
This course comprises the second half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1507 consists of lectures, laboratories, and field trips in Biology, Psychology and Earth Sciences, as well as integrated lectures and workshops that cut across disciplines. The Writing in Science component, continued from Integrated Science I, includes a 10-week research project in which students apply the research design concepts and statistical analyses covered in Integrated Science I. Together, SCIE 1506 and SCIE 1507 provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science II must also register for CHEM 1012.03. Registration in MATH 1010.03 and in one of PHYC 1290.03 or PHYC 1320.03 is recommended for students considering programs with those requirements.

For calculus, students must register in either MATH 1000 (fall or winter) or MATH 1215 (fall or winter).
CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).
COREQUISITES: CHEM 1012.03
PREREQUISITES: SCIE 1506.09, CHEM 1011.03, PHIL 1050.03
RESTRICTIONS: Registration is restricted to Integrated Science students
EXCLUSIONS: BIOL 1010.03, BIOL 1020.03, PSYO 1012.03, ERTH 1080.03, SCIE 1111.03
FORMATS: Lecture | Lab

SCIE 1551 Integrated Science Writing & Research

CREDIT HOURS: 3
This integrated course focuses on the foundations of scientific writing, from the basics (e.g., grammar) to the applied (e.g., writing scientific reports and proposals). Topics will range across those included in the Integrated Science Program (Biology, Neuroscience, Statistics, Psychology, Earth & Environmental Sciences, and Ethics) and related fields of study (e.g., Chemistry, Genetics, Microbiology, Physics, Atmospheric Sciences, etc.).
CALENDAR NOTES: This course fulfills 3 credit hours of the writing requirement for students in the BSc (or BA) program. This course is restricted to students in the Dalhousie Integrated Science Program (DISP) only.
RESTRICTIONS: This course is restricted to DISP students only
EXCLUSIONS: Exclusion with: SCIE 1506.03, SCIE 1507.03
FORMATS: Lecture | Tutorial

SCIE 1552 Integrated Science Communications & Research

CREDIT HOURS: 3
This integrated course builds upon the foundations of scientific writing from SCIE 1551 and expands to include alternate forms of scientific communication, including presentations, posters, and more. Topics will range across those included in the Integrated Science Program (Biology, Neuroscience, Statistics, Psychology, Earth & Environmental Sciences, and Ethics) and related fields of study (e.g., Chemistry, Genetics, Microbiology, Physics, Atmospheric Sciences, etc.), with a focus on Integrated Science Program research projects in the winter term.
CALENDAR NOTES: This course is restricted to students in the Dalhousie Integrated Science Program (DISP) only. This course does NOT fulfill the writing requirement.
EXCLUSIONS: Exclusion with: SCIE 1506.03, SCIE 1507.03
FORMATS: Lecture | Tutorial

SCIE 2001 Introduction to the History of Science I

CREDIT HOURS: 3
This course covers the historical foundations of science, from ancient Babylonia to the Enlightenment. Open to first-year students and above, it can be taken as a humanities or a science course and serves as preparation for its modern counterpart, HSTC 1202.03 / HSTC 2212.03 / HIST 2076.03 / SCIE 2002.03
CALENDAR NOTES: Credit can only be given for this course if SCIE 2001.03 and SCIE 2002.03 are completed in consecutive terms and partial credit cannot be given for a single term.
CROSSLISTED: HSTC 1201.03
EXCLUSIONS: HSTC 2201.03, BIOL 3502.03, HIST 3072.03, SCIE 4000.03, HIST 3074X/Y.06, HIST 2074X/Y.06, HSTC 1200.06, HSTC 2200.06, SCIE 2000.06
FORMATS: Lecture | Tutorial

SCIE 2002 Introduction to the History of Science II

CREDIT HOURS: 3
This course covers the creation of modern science, from the radical changes of the Enlightenment to contemporary notions of technoscience and our place in nature and the cosmos. It follows the themes and contexts introduced in HSTC 1201.03/HSTC 2211.03/ HIST 2075.03/SCIE 2001.03. Open to first-year students and above, it can be taken as a humanities or science credit.
CALENDAR NOTES: Credit can only be given for this course if SCIE 2001.03 and SCIE 2002.03 are completed in consecutive terms and partial credit cannot be given for a single term.
CROSSLISTED: HSTC 1202.03
EXCLUSIONS: HSTC 2201.03, BIOL 3502.03, HIST 3072.03, SCIE 4000.03, HIST 3074X/Y.06, HIST 2074X/Y.06, HSTC 1200.06, HSTC 2200.06, HSTC 1200.06, SCIE 2000.06
FORMATS: Lecture | Tutorial

SCIE 2111 Dalhousie Science Scholars and Leaders: Becoming a Scientist I

CREDIT HOURS: 0
This course examines the structure of science and situates science majors in the context of the scientific process. The course de-mystifies the language and culture of science. Students will develop skills to help them progress towards a science career. The course also explores the translation of science to society.

CALENDAR NOTES: BIOL 2111.03 and BIOL 2112.03 must be taken in consecutive fall/winter terms.
CROSSLISTED: BIOL 2111.00
RESTRICTIONS: E1. The course requires permission of instructor. Preference will be given to students in the Dalhousie Science Scholars & Leaders Program. BIOL 2111 will be open to Biology majors. SCIE 2111 will be open to students from other units within the Faculty of Science.
FORMATS: Experiential Learning

SCIE 2112 Dalhousie Science Scholars and Leaders: Becoming a Scientist II

CREDIT HOURS: 3
This course examines the structure of science and situates science majors in the context of the scientific process. The course de-mystifies the language and culture of science. Students will develop skills to help them progress towards a science career. The course also explores the translation of science to society.
CALENDAR NOTES: BIOL/SCIE 2111.00 and BIOL/SCIE 2112.03 must be taken in consecutive fall/winter terms.
PREREQUISITES: BIOL/SCIE 2111.00 or Permission of instructor
CROSSLISTED: BIOL 2112.03
RESTRICTIONS: E1. The course requires permission of instructor. Students must have been enrolled in BIOL/SCIE2111 in the Fall term. BIOL 2112.03 will be open to Biology majors. SCIE 2112.03 will be open to students from other units within the Faculty of Science.
FORMATS: Other (explain in comments)

SCIE 2800 Science Co-op Seminar Orientation

CREDIT HOURS: 0
This course is designed to introduce Science Co-op students to aspects of career development and preparation for their work terms. This course is a prerequisite to the first work term and is a mandatory component of the Science-Cooperative Education program; all Science Co-operative Education students are required complete this course at least four months prior to the first workterm. A grade of Pass is required before students undertake the first work term experience.
FORMATS: Seminar

SCIE 3100 Experiential Learning in Medical Sciences

CREDIT HOURS: 3
This is an outside-the-classroom learning experience in which the student works to acquire knowledge and skills relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty. This course is intended for students with no prior research experience.
CALENDAR NOTES: Open only to students in the Bachelor of Science Medical Sciences Program. Students are advised to take SCIE 3100 prior to SCIE 4901/4902 (Honours Project) or SCIE 4101/4102 (Directed Project). Students must gain permission from coordinator before registering. To gain permission for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator.
PREREQUISITES: Permission of course coordinator required. To register for this class, a student must find a supervisor willing to supervise the work experience. This course is intended for students in their third year with no prior research experience. It is strongly recommended that students take SCIE 3100 prior to SCIE 4901/4902 or SCIE 4101/4102.
RESTRICTIONS: Open only to students in the Bachelor of Science Medical Sciences Program.
EXCLUSIONS: Lab work that is part of another scheduled class or paid employment cannot be used towards SCIE 3100. Only one experiential learning course per degree is permitted. Cannot be taken concurrently with PHYL 3600, SCIE 4901/4902 (Honours Project) or SCIE 4101/4102 (Directed Project).
FORMATS: Other (explain in comments)

SCIE 3111 Communicating Science

CREDIT HOURS: 3
A course for senior science students to hone communication skills. Students (1) learn to communicate scientific information to various non-specialist audiences, and (2) prepare and deliver tutorials to small groups of SCIE 1111.03 students. The course allows students to use different communication styles and topics to build a portfolio.
PREREQUISITES: Permission of instructor

SCIE 3211 Communicating Science to Non-Scientists

CREDIT HOURS: 3
In this course, science students learn and practice core concepts of communicating science to a non-scientist audience. Multiple forms of delivery are discussed, practiced, and critiqued, including written, oral, and visual. The impact of social media on the ways in which scientists communicate with the public are also explored.
CALENDAR NOTES: Course is open to students in the Bachelor of Science and Bachelor of Science (MedSci) programs, only. Instructor permission required.
PREREQUISITES: Instructor permission required. Students must be enrolled in a Bachelor of Science (BSc) program and have completed at least 60 credit hours towards their degree.

RESTRICTIONS: Course is restricted to students enrolled in a Bachelor of Science degree in the Faculty of Science (BSc or BSc(Medical Sciences)).
FORMATS: Lecture

SCIE 3333 Science Education: Introduction to Principles and Practices

CREDIT HOURS: 3
Students investigate and apply key principles related to teaching and learning in sciences. Emphasized are: (1) conveying how science works; (2) the nature of learning; (3) the science-society connection; (4) teaching concepts that cross the sciences such as patterns, scale, visualization, complexity, uncertainty, bias, and multiple perspectives. Experiential learning is an integral component.
PREREQUISITES: Minimum of 4 courses at or above the second year level AND permission of the Instructor.
RESTRICTIONS: E1 and E2
FORMATS: Tutorial | Seminar | Experiential Learning

SCIE 3600 Exploring Geographic Information Systems

CREDIT HOURS: 3
This course provides a general overview of Geographic Information Systems (GIS), examining what GIS is, what it can do, and how it works. The course is aimed at students studying in all disciplines and will involve creating, understanding, manipulating and displaying geographic data. Topics will include data models, analysis of vector and raster data, creation of spatial databases, the Global Positioning System and other aspects of spatial data. Lectures (3 per week) will explore basic aspects of GIS in detail and introduce material to be covered in the labs. Labs are held once per week and will provide practical experience in data manipulation and problem solving.
PREREQUISITES: Two years of university study
EXCLUSIONS: ERTH 3500.03, ENVS 3500.03, GEOG 3500.03, ERTH 5600.03

SCIE 4001 History of Marine Sciences

CREDIT HOURS: 3
In this course, we will trace the history of marine sciences from the ancients to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped human understanding of the oceans.
PREREQUISITES: Instructor's consent
CROSSLISTED: BIOL 4664.03, OCEA 4331.03/5331.03, HIST 3073.03, HSTC 3331.03, MARI 4664.03
FORMATS: Lecture

SCIE 4005 Major Capstone Course in Medical Sciences

CREDIT HOURS: 3
Integration of multiple Medical Sciences disciplines through in-depth analysis of a series of 5 medical "cases" through expert lectures, group discussion, and small group presentations. Cases are selected from across all biomedical disciplines (Medicine, Dentistry, Nursing, Physiotherapy, Occupational Therapy, etc), reflecting a wide range of patient ages and demographics. This course is required by Medical Sciences students not pursuing Honours. Medical Science Honours students take SCIE 4901 & 4902 instead. This course cannot be taken at the same time as the Medical Sciences Honours courses SCIE 4901 & 4902.
PREREQUISITES: Writing requirement, PHAC 3030.03 , ANAT 3010.03 , PATH 3000.03 , one of: PHIL 2805.03 or PHIL 2810.03, and one of: MICI 3115.03 , NESC/PSYO 3180.03 , BIOC 3501.03 or PHYL 3520.03.
RESTRICTIONS: Open only to fourth year Major students in the Bachelor of Sciences Medical Sciences Program
EXCLUSIONS: This course cannot be taken at the same time as the Medical Sciences Honours courses SCIE 4901 & 4902.
FORMATS: Lecture

SCIE 4100 Directed Project in Medical Sciences

CREDIT HOURS: 6
This is an outside-the-classroom learning experience in which the student works on a research project relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty.
CALENDAR NOTES: To register for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator.
PREREQUISITES: Permission of coordinator required. Students are advised to have at least 2 senior (3000- or 4000-level) courses on topics relevant to the research area, including SCIE3100 (Research Skills in Medical Sciences). Minimum B average (GPA 3.0) in at least three of the following Medical Sciences 3rd Year core courses (PHAC 3001, MICI 3115, ANAT 3010, PATH 3000, PHIL 2810).
RESTRICTIONS: Open only to Major students in the Bachelor of Science Medical Sciences Program.
EXCLUSIONS: Lab work that is part of another scheduled class or paid employment cannot be used towards SCIE 4100X/Y. Cannot be taken concurrently with SCIE3100. Cannot be taken with SCIE 4900X/Y.
FORMATS: Other (explain in comments)

SCIE 4101 Directed Project in Medical Sciences I

CREDIT HOURS: 3
This is the first half of an outside-the-classroom learning experience in which the student works on a research project relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty.
CALENDAR NOTES: Open only to students in the Bachelor of Science Medical Sciences Program. To register for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator. This course must be taken in the same academic year as SCIE 4102.03 and no credit can be given for one course without the other. Grades will not be assigned for SCIE 4101.03 until SCIE 4102.03 has also been completed.
PREREQUISITES: Permission of coordinator required. Students are advised to have at least 2 senior (3000- or 4000-level) courses on topics relevant to the research area, including SCIE 3100.03 (Experiential Learning in Medical Sciences). Minimum B average (GPA 3.0) in at least three of the following Medical Sciences 3rd year core courses (PHAC 3030.03, MICI 3115.03, ANAT 3010.03, PATH 3000.03, PHIL 2805.03 or PHIL 2810.03).
EXCLUSIONS: Open only to students in the Bachelor of Science Medical Sciences Program. Research work that is part of another scheduled class or paid employment cannot be used towards SCIE 4101.03. Cannot be taken concurrently with SCIE 3100.03. Cannot be taken with SCIE 4901.03 or SCIE 4902.03.
FORMATS: Other (explain in comments)

SCIE 4102 Directed Project in Medical Sciences II

CREDIT HOURS: 3
This is an outside-the-classroom learning experience in which the student works on a research project relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty.
CALENDAR NOTES: Open only to students in the Bachelor of Science Medical Sciences Program. To register for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator. This course must be taken in the same academic year as SCIE 4101.03 and no credit can be given for one course without the other. No grade will appear for SCIE 4101.03 until SCIE 4102.03 has also been completed.
PREREQUISITES: Permission of coordinator required. Students are advised to have at least 2 senior (3000- or 4000-level) courses on topics relevant to the research area, including SCIE 3100.03 (Experiential Learning in Medical Sciences). Minimum B average (GPA 3.0) in at least three of the following Medical Sciences 3rd year core courses (PHAC 3030.03, MICI 3115.03, ANAT 3010.03, PATH 3000.03, PHIL 2805.03 or PHIL 2810.03).
EXCLUSIONS: Open only to students in the Bachelor of Science Medical Sciences Program. Research work that is part of another scheduled class or paid employment cannot be used towards SCIE 4101.03. Cannot be taken concurrently with SCIE 3100.03. Cannot be taken with SCIE 4901.03 or SCIE 4902.03.
FORMATS: Other (explain in comments)

SCIE 4211 Portfolio in Science Communication

CREDIT HOURS: 0
Students completing the Science Communication certificate are required to register for this zero-credit hour course in the semester in which they are submitting their completed portfolio for evaluation (typically, the final semester of their degree). The portfolio is a record that can be shared with future employers and built upon into the future. More details about the requirements for the portfolio itself, are available from the certificate coordinator.
CALENDAR NOTES: Restricted to students registered in the Science Communication Certificate. Permission of Coordinator required.
PREREQUISITES: Permission of Coordinator
RESTRICTIONS: Restricted to students enrolled in the Science Communication Certificate.

SCIE 4444 Leadership in Science

CREDIT HOURS: 3
Students will develop leadership skills and build confidence while applying their scientific knowledge. Through in-class activities and a science-based practicum, students gain experience with various aspects of leadership, allowing for integration and application of their expertise.
PREREQUISITES: Instructor permission. Students should have completed at least three (3) third year courses in their declared major and have a minimum of B+ average in their major.

SCIE 4445 Science Leadership and Communication Portfolio

CREDIT HOURS: 0
This zero-credit course is the final component of the Science Leadership and Communication Certificate requirement. Students should only register for this course in the semester that they are submitting their completed portfolio for evaluation. The portfolio represents an opportunity for you to highlight and synthesize your learning about leadership and communication in science throughout your undergraduate years in a concise package, and includes reflection on each of the required Certificate courses, their interconnections, and the practica involved.
CALENDAR NOTES: 1. This is a zero-credit course, carrying a pass-fail grading scheme. 2. Deadline for submission of the portfolio is 6 weeks prior to graduation.
PREREQUISITES: Registration in the Science Leadership and Communication Certificate. Completion or co-completion of the required Certificate courses.
FORMATS: Other (explain in comments)

SCIE 4500 BIOS Internship

CREDIT HOURS: 0
This course is a zero credit hour course for students engaging in the internship program at the Bermuda Institute of Ocean Sciences (BIOS). This course is not open for general registration.
CALENDAR NOTES: Restricted to students participating in BIOS internships only.
RESTRICTIONS: Instructor permission required.
FORMATS: Experiential Learning

SCIE 4701 Applied Innovation in Science I

CREDIT HOURS: 3
Hands-on experience in using scientific training and knowledge to create innovative solutions to real-world problems. Topics include stakeholder discovery, problem-solution fit, brainstorming, project management, pitching, and business models (including entrepreneurship and not-for-profits). Experiential learning format, including data acquisition and analysis, team work, case studies, and guest presentations.
CALENDAR NOTES: This course must be taken in the same academic year as SCIE 4702.03 and no credit can be given for one course without the other.
PREREQUISITES: Undergraduates should have completed at least three full years (90 credit hours) of university study.
RESTRICTIONS: Registration by instructor's permission.
EXCLUSIONS: NESC 4705.03/PSYO 4705.03, SCIE 5701.06
FORMATS: Lecture | Lab | Tutorial | Experiential Learning

SCIE 4702 Applied Innovation in Science II

CREDIT HOURS: 3
Hands-on experience in using scientific training and knowledge to create innovative solutions to real world problems. Topics include stakeholder discovery, problem-solution fit, brainstorming, project management, pitching, and business models (including entrepreneurship and not-for-profits). Experiential learning format, including data acquisition and analysis, team work, case studies, and guest presentations.
CALENDAR NOTES: This course must be taken in the same academic year as SCIE 4701.03 and no credit can be given for one course without the other.
PREREQUISITES: SCIE 4701.03
RESTRICTIONS: Registration by instructor's permission
EXCLUSIONS: NESC 4705.03/PSYO 4705.03, SCIE 5701.06
FORMATS: Lecture | Lab | Tutorial | Experiential Learning

SCIE 4705 Neurotechnology Innovation, Commercialization, and Entrepreneurship

CREDIT HOURS: 3
An introduction to neurotechnology, clinical neuroscience, and commercialization. Topics include neuroimaging methods; diagnosis, assessment, and treatment of nervous system-related disorders; the process of innovation; and business fundamentals. Features guest lectures by successful scientists and entrepreneurs, as well as hands-on workshops and lab exercises on business and neurotechnology topics **SIGNATURE REQUIRED**
PREREQUISITES: Two full years of undergraduate University study, plus instructor's consent.
CROSSLISTED: PSYO 4705.03, NESC 4705.03
EXCLUSIONS: PSYO 7705.06
FORMATS: Lecture

SCIE 4850 Geographic Information Science Research Project

CREDIT HOURS: 3
Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.
COREQUISITES: ERTH 5420.03/GEOG 4520.03/ERTH4520.03
PREREQUISITES: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03
CROSSLISTED: BIOL 4850.03, ENVS 4850,03, ERTH 4850.03, GEOG 4850.03
EXCLUSIONS: Restricted to 3rd and 4th year students
FORMATS: Lecture

SCIE 4851 Certificate in GIScience Research Project Set 2

CREDIT HOURS: 0
A 0 credit hour portfolio course that is used to manage a range of project alternatives listed in Set 2 of the Certificate in GIScience.
RESTRICTIONS: Requires Permission of a GIS Certificate Coordinator
FORMATS: Other (explain in comments)

SCIE 4901 Medical Sciences Honours Research & Thesis I

CREDIT HOURS: 3
The course is required of, and restricted to, students in the Medical Sciences Honours program. Students conduct a research project in the laboratory or research site of an approved faculty member and attend weekly meetings of the class. Students have the flexibility to undertake their research in a department of their choice, subject to the approval of the Honours Committee. Class participation, an interim report, a written thesis, and a presentation at the Annual Medical Sciences Symposium are required for completion. No grade will appear for the course in the Fall term; grade for the course will appear in the Winter term.
CALENDAR NOTES: This course must be taken in the same academic year as SCIE 4902.03 and no credit can be given for one course without the other. Students will not receive a grade for SCIE 4901.03 until both SCIE 4901.03 and SCIE 4902.03 have been completed.
PREREQUISITES: An approved research project supervisor (as determined by the Medical Sciences Honours Committee) and minimum average GPA of 3.0 calculated from the following core courses: BIOL 2020.03, BIOL 2030.03, PHYL 2041.03, PHYL 2044.03, MICI 2100.03, BIOC 2300.03, EPAH 2010.03, PHIL 2810.03 or PHIL 2805.03, PHAC 3001.03, MICI 3115.03, ANAT 3010.03, PATH 3000.03, CHEM 2401.03, and CHEM 2402.03. At the time of application, you are unlikely to have completed all the listed core courses; therefore, your GPA of the completed courses at the time of application must be equal to or greater than 3.0 (B average). A GPA of at least 3.0 is also required for all core courses at the time of graduation.
EXCLUSIONS: SCIE 4900.06
FORMATS: Other (explain in comments)

SCIE 4902 Medical Sciences Honours Research & Thesis II

CREDIT HOURS: 3
The course is required of, and restricted to, students in the Medical Sciences Honours program. Students conduct a research project in the laboratory or research site of an approved faculty member and attend weekly meetings of the class. Students have the flexibility to undertake their research in a department of their choice, subject to the approval of the Honours Committee. Class participation, an interim report, a written thesis, and a presentation at the Annual Medical Sciences Symposium are required for completion. No grade will appear for the course in the Fall term; grade for the course will appear in the Winter term.
CALENDAR NOTES: This course must be taken in the same academic year as SCIE 4901.03 and no credit can be given for one course without the other. A cumulative grade for SCIE 4901.03 & SCIE 4902.03 will be granted in the Winter term, once SCIE 4902.03 has been completed.
PREREQUISITES: An approved research project supervisor (as determined by the Medical Sciences Honours Committee) and minimum average GPA of 3.0 calculated from the following core courses: BIOL 2020.03, BIOL 2030.03, PHYL 2041.03, PHYL 2044.03, MICI 2100.03, BIOC 2300.03, EPAH 2010.03, PHIL 2810.03 or PHIL 2805.03, PHAC 3001.03, MICI 3115.03, ANAT 3010.03, PATH 3000.03, CHEM 2401.03, and CHEM 2402.03. At the time of application, you are unlikely to have completed all the listed core courses; therefore, your GPA of the completed courses at the time of application must be equal to or greater than 3.0 (B average). A GPA of at least 3.0 is also required for all core courses at the time of graduation.
EXCLUSIONS: SCIE 4900.06
FORMATS: Other (explain in comments)

Introduction

It doesn't matter if you want to design computer games, study the safety of nuclear power plants, analyze the stock market or conduct political polls: scientists of all kinds work with numbers to measure and explore the world. That's where statistics comes in. Statistics

is the study of the collection, organization, analysis, interpretation and presentation of data. Extracting knowledge from data helps us plan for the future and improve our quality of life.

The Dalhousie Statistics program is the only program in the Maritimes that offers a full range of undergraduate and graduate programs. Our undergraduate courses are also approved by the accreditation committee of the Statistics Society of Canada, so that our graduates can apply for the Associate Statistician designation.

Statistics makes a great undergraduate degree with wide applicability and is an essential component of any program in the sciences or social sciences.

Degree Programs

The Department of Mathematics and Statistics offers the following degree programs in Statistics

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Statistics
- Minor in Statistics

* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Statistics undergraduate academic advisor.

Staff

Please refer to the Department of Mathematics and Statistics Staff page for a full listing of the members of the Department.

BSc or BA (120 credit hour) Concentrated Honours in Statistics

Students who want a challenging program resulting in comprehensive knowledge of both theoretical and applied Statistics may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students must write a research-based Honours thesis. The research thesis and the Honours Qualifying Examination requirement are satisfied through completion of STAT 4950.03.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Statistics should consult with a Statistics Honours Advisor early in their studies.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirementssections, students in a BSc or BA Concentrated Honours program in Statistics must complete the following courses:

1000 level

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II
- STAT 1060.03: Introductory Statistics for Science and Health Sciences[1]

- MATH 1030.03: Matrix Theory and Linear Algrbra I

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2002.03: Intermediate Calculus II or MATH 2505: Introductory Analysis
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference[2]

- STAT 2450.03 Introduction to Data Mining with R
- CSCI 2202.03: Computer modelling for scientists
- At least two additional statistics[3] courses at or above the 2000 level (6 credit hours)

3000 level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- At least two mathematics[4] courses at the 3000 level (6 credit hours)
- Two of STAT 3350.03: Design of Experiments, STAT 3380.03: Sample Survey Methods, STAT 3450.03: Statistical Learning with R, STAT 3740.03: Predictive Analytics

4000 level

- STAT 4066.03: Advanced Statistical Theory I
- One of STAT 4130.03: Bayesian Data Analysis, STAT 4350.03: Applied Multivariate Analysis, STAT 4390.03: Time Series Analysis, STAT 4620.03; Data Analysis, STAT 4690.03: Computational Statistics.
- STAT 4950.03: Honours Research Project

[1]The requirement to take STAT 1060.03: Introductory Statistics for Science and Health Sciences may be waived for students entering the program in their second year.

[2]Some students may take STAT 2080.03 in the first year of their degree program.

[3]Statistics courses are any courses listed or cross-listed as STAT (with the exception of STAT 3069)

[4]3000 level mathematics courses can be chosen from the following list, and count toward the required credit hours in statistics:

- MATH 3045: Curves and Surfaces
- MATH 3080: Introduction to Complex Variables
- MATH 3120: Differential Equations
- MATH 3140: Introduction to Wavelets
- MATH 3210: Introduction to Numerical Analysis
- MATH 3260: Applied Differential Equations
- MATH 3300: Optimization
- MATH 3330: Applied Graph Theory
- MATH 3400: Classical Game Theory
- MATH 3500X/Y.06: Intermediate Analysis
- MATH 3501: Intermediate Analysis I
- MATH 3502: Intermediate Analysis II
- MATH 3900: Financial Mathematics

BSc or BA (120 credit hour) Combined Honours in Statistics and another subject

Students who wish to study Statistics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Statistics may be the primary subject (defined as the subject with the larger number of credits at the second year or above), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students must complete a research thesis and an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Statistics, this requirement is satisfied through STAT 4950.03.

Departmental requirements

Students in a BSc or BA Combined Honours program in Statistics and another subject must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections.

- Courses must include:
- Math 1030.03: Matrix Theory and Linear Algebra I
- MATH 2001.03: Intermediate Calculus I
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- At least one STAT course at the 4000 level (3 credit hours)

If Statistics is the primary subject, students will also complete

- One Statistics[3] course at or above the 2000 level (3 credit hours)
- One Mathematics[4] course at the 3000 level (3 credit hours)
- STAT4950.03 : Honours Research Project

If Statistics is the secondary subject, students will also complete

- One Statistics[3] course at or above the 3000 level (3 credit hours)
- One Statistics[3] or Mathematics[4] course at or above the 3000 level (3 credit hours)

[3]Statistics courses are any courses listed or cross-listed as STAT. (with the exception of STAT 3069) The following can also be counted towards statistics credit hours:

- MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II or Math 2135.03 Linear Algebra

[4]3000 level mathematics courses can be chosen from the following list, and count toward the required credit hours in statistics:

- MATH 3045: Curves and Surfaces
- MATH 3080: Introduction to Complex Variables
- MATH 3120: Differential Equations
- MATH 3140: Introduction to Wavelets
- MATH 3210: Introduction to Numerical Analysis
- MATH 3260: Applied Differential Equations
- MATH 3300: Optimization
- MATH 3330: Applied Graph Theory
- MATH 3400: Classical Game Theory
- MATH 3500X/Y.06: Intermediate Analysis
- MATH 3501: Intermediate Analysis I
- MATH 3502: Intermediate Analysis II

- MATH 3900: Financial Mathematics

BSc or BA (120 credit hour) Major in Statistics

The 120 credit hour Major is suited to students who want to focus on Statistics, but wish to have a program that is somewhat less constrained than the Honours program.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Major program in Statistics must complete the following courses:

1000 level

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II
- STAT 1060.03: Introductory Statistics for Science and Health Sciences[1]

- Math 1030.03: Matrix Theory and Linear Algebra I

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2002.03: Intermediate Calculus II or MATH 2505: Introductory Analysis
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- CSCI 2202.03: Computer modelling for scientists
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference[2]
- STAT 2450.03: Introduction to Data Mining with R

3000 level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- One Statistics course (3 credit hours) at or above the 3000 level.
- One Statistics course (3 credit hours) at the 4000 level
- One of STAT 3350: Design of Experiments, STAT 3380: Sample Survey Methods, STAT 3450: Statistical Learning with R, STAT 3740: Predictive Analytics

[1]The requirement to take STAT 1060.03: Introductory Statistics for Science and Health Sciences may be waived for students entering the program in their second year.

[2]Some students may take STAT 2080.03 in the first year of their degree program.

[3]Statistics courses are any courses listed or cross-listed as STAT (with the exception of STAT 3069)

BSc or BA (120 credit hour) Double Major in Statistics and another subject

The Double Major degree program allows students to combine a study of Statistics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Statistics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

Departmental requirements

Students in a BSc or BA Double Major in Statistics and another subject must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections.

- Courses must include:
- Math 1030.03: Matrix Theory and Linear Algebra I
- MATH 2001.03: Intermediate Calculus I
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03 Introduction to Data Mining with R
- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- One Statistics[3] course at or above the 3000 level (3 credit hours)
- Two Statistics[3] or Mathematics[4] course at or above the 3000 level (6 credit hours).

[3]Statistics courses are any courses listed or cross-listed as STAT (with the exception of STAT 3069)

[4]3000 level mathematics courses can be chosen from the following list, and count toward the required credit hours in statistics:

- MATH 3045: Curves and Surfaces
- MATH 3080: Introduction to Complex Variables
- MATH 3120: Differential Equations
- MATH 3140: Introduction to Wavelets
- MATH 3210: Introduction to Numerical Analysis
- MATH 3260: Applied Differential Equations
- MATH 3300: Optimization
- MATH 3330: Applied Graph Theory
- MATH 3400: Classical Game Theory
- MATH 3500X/Y.06: Intermediate Analysis
- MATH 3501: Intermediate Analysis I
- MATH 3502: Intermediate Analysis II
- MATH 3900: Financial Mathematics

BSc or BA (90 credit hour) Minor in Statistics

The 90 credit hour Minor in Statistics is appropriate for students who want to study some Statistics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Statistics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Statistics is usually the preferred option for students who wish to combine studies in Statistics with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

See the Minor in Statistics section of this Calendar.

Minor in Statistics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a minor in Statistics is also available.

Requirements

A minimum of 18 to a maximum of 36 credit hours in Statistics, which must include:

- MATH 1030.03: Matrix Theory and Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics

- STAT 2080.03: Statistical Methods for Data Analysis and Inference
  STAT 2450.03: Introduction to Data Mining with R
- STAT 3340.03: Regression and Analysis of Variance
- At least one additional statistics[1] course at the 2000 level or above (3 credit hours)
- At least one additional statistics course at the 3000 level or above (3 credit hours)

[1]Statistics courses are any courses listed or cross-listed as STAT, (including STAT 3069). The following can also be counted as 2000 level statistics credit hours:

- MATH 2001.03: Intermediate Calculus
- MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II or Math 2135.03 Linear Algebra
- BIOL 4062.03: Analysis of Biological Data

Contact Statistics for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Statistics

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs.

Students in a BSc or BA (120 credit hour) program in Statistics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Statistics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student's academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to student enrolled in a BSc or BA in Statistics include:

- Certificate in Actuarial and Financial Mathematics
- Certificate in Applied and Computational Mathematics
- Certificate in Data Analytics

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Program with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Statistics and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Statistics and from the Faculty of Engineering in their first year of study.

Required Statistics courses for a BSc/BEng or BA/BEng program in Statistics

- A minimum of 18 credit hours in Statistics courses at the 2000 level or higher, which must include STAT 2060.03, STAT 2080.03, STAT 3340.03 and at least one other STAT course[4] at or above the 3000 level

[4]Statistics courses are any courses listed or cross-listed as STAT. The following can also be counted towards statistics credit hours:

- MATH 2001.03
- MATH 2002.03
- MATH 2030.03
- MATH 2040.03 or Math 2135.03

Courses

Courses

Course Descriptions

Course Notes

Certain courses have been approved for use in fulfilling the educational requirements of the Associate Statistician (A.Stat.) designation of the Statistical Society of Canada (SSC). See the Department or the SSC website (http://ssc.ca/en/accreditation/apply/suggested-courses-use-towards-astat-designation) for details.

Credit may not be obtained twice for the same course even if the numbers have been changed.

Statistics

STAT 1060 Introductory Statistics for Science and Health Sciences

CREDIT HOURS: 3
This course gives an introduction to the basic concepts of statistics through extensive use of examples. The topics include experimental design, descriptive statistics, simple linear regression and the basics of statistical inference. Students will learn to use the statistical package MINITAB. NOTE: Students who have already taken university level Calculus should consider taking STAT 2060.03 instead of STAT 1060.03.
CALENDAR NOTES: Students will not receive credit for taking STAT 1060.03 after receiving credit for STAT 2060.03.
PREREQUISITES: Academic or advanced Grade 12 Mathematics (or pre-calculus) or equivalent
CROSSLISTED: MATH 1060.03
EXCLUSIONS: COMM 2501.03, MGMT 1501.03, DISP, STAA 2000.03
FORMATS: Lecture | Tutorial

STAT 1501 Integrated Introductory Statistics

CREDIT HOURS: 3
This course introduces students to the basic concepts of statistics through use of integrated examples, application to real-world scenarios, and connections to student's proposed research projects. The topics include experimental design, descriptive statistics, simple linear regression and the basics of statistical inference. Students will learn to use and work with R.
CALENDAR NOTES: This course is restricted to students in the Dalhousie Integrated Science Program (DISP) only.
RESTRICTIONS: Restricted to students in DISP only
EXCLUSIONS: Equivalent to: STAT 1060.03, MATH 1060.03 Exclusion with: SCIE 1506.03, SCIE 1507.03
FORMATS: Lecture | Tutorial

STAT 2060 Introduction to Probability and Statistics

CREDIT HOURS: 3
Rigorous introduction to probability and statistical theory. Topics covered include elementary probability, random variables, distributions, estimation and hypothesis testing. Estimation and testing are introduced using maximum likelihood and the generalized likelihood ratio. Natural sequels for this course are STAT 2080.03 and 3360.03
PREREQUISITES: MATH 1000.03 or MATH 1215.03 or CSCI 1300 with a minimum grade of C
CROSSLISTED: MATH 2060.03

EXCLUSIONS: ENGM 2032.03, ECON 2260.03
FORMATS: Lecture

STAT 2080 Statistical Methods for Data Analysis and Inference

CREDIT HOURS: 3
The usual sequel to STAT 1060.03 or STAT 2060.03. This course introduces a number of techniques for data analysis and inference commonly used in the experimental sciences. Topics covered include two-sample inference one-way and two-way analysis of variance, correlation, linear regression, and the analysis of categorical and count data. A natural sequel for this course is STAT 3340.03.
PREREQUISITES: STAT 1060.03 or STAT 2060.03 or DISP
CROSSLISTED: MATH 2080.03
EXCLUSIONS: COMM 2502.03, MGMT 2502.03, ECON 2280.03
FORMATS: Lecture

STAT 2300 Introduction to Mathematical Modelling I

CREDIT HOURS: 3
See course description for MATH 2300.03 in the Mathematics section of this calendar.

STAT 2430 Data Visualization

CREDIT HOURS: 3
Data visualization is the art and science of turning data into readable graphics. We will explore how to design and create data visualizations based on data available and tasks to be achieved. This course aims to introduce students to data visualization, including both the principles and techniques. Students will learn the value of visualization, specific techniques and understand the best visualization method.
PREREQUISITES: At least one MATH or STAT course at or above the 1000 level
FORMATS: Lecture

STAT 2450 Introduction to Data Mining with R

CREDIT HOURS: 3
This course provided as introduction to data mining and R programming, suited for science students. Data mining methods include a vast set of tools developed in different areas for identifying the patterns in data. Students will learn programming methods for manipulating and exploring data through learning the basic ideas of some clustering, regression and classification methods. No prior programming knowledge is assumed.
PREREQUISITES: MATH 1000.03 or MATH 1215.03 or CSCI 1300.03 and either (STAT 1060.03 or MATH 1060.03) or (STAT 2060.03 or MATH 2060.03
FORMATS: Lecture

STAT 2600 Theory of Interest

CREDIT HOURS: 3
See course description for MATH 2600.03 in the Mathematics section of this calendar.

STAT 3069 Statistical Rethinking: Applied Bayesian Statistics

CREDIT HOURS: 3
This course, which uses Richard McElreath's popular 'Statistical Rethinking' book as a foundation, provides a broad introduction to applied Bayesian models using R or Python. Examples are drawn from Biology and Social Science, in contexts designed to be widely applicable to analysis of observational data across disciplines.
CALENDAR NOTES: Course aimed at non-stats majors seeking to do applied statistical work, primarily in Biology but including other disciplines; Students majoring in statistics (including Honours, Majors, Combined Honours and Double Major programs) cannot receive STAT course credit for this course. Students Minoring in Statistics can count this as a 3000 level STAT course credit.
PREREQUISITES: STAT 2060.03 OR STAT 2080.03 AND One of: STAT 2450.03, CSCI 2202.03, BIOL 3872.03, MARI 4600.03
CROSSLISTED: BIOL 4069.03
FORMATS: Lecture

STAT 3340 Regression and Analysis of Variance

CREDIT HOURS: 3
A thorough treatment of the theory and practice of regression analysis. Topics include: fitting general linear models using matrices, optimality of least squares estimators (Gauss-Markov theorem), inferences, simple and partial correlation, analysis of residuals, case-deletion diagnostics, polynomial regression,

transformations, use of indicator variables for analysis of variance and covariance problems, model selection, and an introduction to nonlinear least squares. This course makes extensive use of computer packages.
COREQUISITES: Stat 2450.03 (if not taken as a prerequisite)
PREREQUISITES: Math 1030.03 AND STAT 2060.03 or MATH 2060.03 AND STAT 2080.03 or MATH 2080.03 or ECON 2280.03 or 3338.03, AND STAT 2450.03
CROSSLISTED: MATH 3340.03
FORMATS: Lecture

STAT 3345 Environmental Risk Assessment

CREDIT HOURS: 3
Statistical methods for assessing risk are discussed, including dose-response models, survival analysis, relative risk analysis, bioassay, estimating methods for zero risk trend analysis and association risks. Case studies are used to illustrate the methods.
PREREQUISITES: MATH 1000.03 or MATH 1215.03, STAT 2080.03 or equivalent

STAT 3350 Design of Experiments

CREDIT HOURS: 3
The aim of the course is to develop the fundamental statistical concepts required for designing efficient experiments to answer real questions. The first main subject is unit variation and control. The basic concepts of replication, blocking and randomization are each examined. The second main subject is treatment questions and structure. The ideas of factorial designs, split-plot and incomplete plot designs are presented. We conclude with a look at response surface methodology.
PREREQUISITES: STAT 2080.03, MATH 2030.03 OR MATH 1030.03, and one of MATH 1010.03, STAT 2060.03 or DISP (except SCIE 1540X/Y.27)
CROSSLISTED: MATH 3350.03
FORMATS: Lecture

STAT 3360 Probability

CREDIT HOURS: 3
The concepts and application of probability. Topics include the classical discrete and continuous distributions, including the binomial, hypergeometric, multinomial, Poisson, uniform, exponential and normal; definitions and properties of random variables; independence; sums of independent random variables, including the law of large numbers and central limit theorem; conditional probability; and the bivariate normal distribution. Examples will be taken from the natural and physical sciences.
PREREQUISITES: STAT 2060.03 and MATH 2001.03
CROSSLISTED: MATH 3360.03
FORMATS: Lecture

STAT 3380 Sample Survey Methods

CREDIT HOURS: 3
The development of design and analysis techniques for sample surveys. Topics include simple, stratified and systematic random sampling, ratio and regression estimation, sub-sampling with units of equal and unequal size, double-multistage and multiphase sampling, non-sample errors and non-respondents.
PREREQUISITES: STAT 2060.03
CROSSLISTED: MATH 3380.03
FORMATS: Lecture

STAT 3450 Statistical learning with R

CREDIT HOURS: 3
This course teachesstudents how to use the R software environment to analyze data of various types. Students will be given the opportunity to write their own programs to explore data and solve meaningful problems. Emphasis will be given to a good understanding of supervised/unsupervised learning models, their founding principles, and to data processing and interpretation.
PREREQUISITES: STAT 2450
FORMATS: Lecture

STAT 3460 Intermediate Statistical Theory

CREDIT HOURS: 3
This course provides an intermediate level coverage of statistical theory to provide a framework for valid inferences from sample data. The methods developed are based on the likelihood function and are discussed from the frequentist, likelihood, and Bayesian approaches. The problems of point estimation, interval estimation and hypothesis testing and the related topics of sampling distributions, sufficiency, and Fisher Information are discussed.

PREREQUISITES: STAT 3360.03
CROSSLISTED: MATH 3460.03
FORMATS: Lecture

STAT 3703 Actuarial Models I

CREDIT HOURS: 3
This class builds on the material in STAT 3360 to develop the theoretical basis for construction and evaluation of actuarial models. Topics covered include survival models, probability distributions, deductibles and limits, and aggregate loss models, with application to insurance. This course covers the part of the syllabus for the professional actuarial examination concerned with the Construction and Evaluation of Actuarial Models.
PREREQUISITES: STAT 3360.03 OR MATH 3360.03
CROSSLISTED: ACSC 3703.03
EXCLUSIONS: STAT 4701.03
FORMATS: Lecture

STAT 3720 Life Contingencies I

CREDIT HOURS: 3
This course introduces the student to the mathematical models for valuation of life contingencies (e.g. life insurance policies). The course covers both the statistical aspects of modelling survival data, and the financial aspects of valuing uncertain future cash-flows.
PREREQUISITES: STAT 3360.03, STAT 2600.03
CROSSLISTED: ACSC 3720.03
FORMATS: Lecture

STAT 3740 Predictive Analytics

CREDIT HOURS: 3
This course teaches students to analyse data in a real-world context, going through all stages of the data analysis: problem formulation; initial data exploration; model selection and validation; and communication of results. It is intended that this course should prepare students for the Society of Actuaries Predictive Analytics examination.
PREREQUISITES: STAT 2450, STAT 3340
CROSSLISTED: ACSC 3740
FORMATS: Lecture

STAT 3750 Credibility Theory

CREDIT HOURS: 3
Credibility theory deals with the difficulty in combining information from two samples, one of which is small but very relevant, the other is large but less relevant. In this course, we will study different approaches to dealing with this problem.
COREQUISITES: ACSC 3703.03
PREREQUISITES: STAT 3360.03
CROSSLISTED: ACSC 3750.03

STAT 4001 AARMS Summer School I

CREDIT HOURS: 3
A Topics class given by leading researchers in the precise field, which varies fro year to year. Consult the Department for current details.
PREREQUISITES: Permission of the Honours Advisor
CROSSLISTED: MATH 4001.03

STAT 4002 AARMS Summer School II

CREDIT HOURS: 3
A Topics class given by leading researchers in the precise field, which varies fro myar to year. Consult the Department for current details.
PREREQUISITES: Permission of the Honours Advisor
CROSSLISTED: MATH 4002.03

STAT 4066 Advanced Statistical Theory I

CREDIT HOURS: 3
This course, together with STAT 5067.03 provides a solid basis in the theory of statistical inference. After a review of some probability and distribution

theory, the Bayesian and classical theories of estimation and testing are introduced.
PREREQUISITES: STAT 3460.03 or instructor's consent
CROSSLISTED: MATH 4066.03/
EXCLUSIONS: MATH5066.03, STAT 5066.03
FORMATS: Lecture

STAT 4100 Survival Analysis

CREDIT HOURS: 3
This course is an introduction to survival analysis methods and will cover both the statistical theory behind the methods, and the application of various techniques. Topics to be discussed include survivorship and hazard functions and their relationship to lifetime distributions and densities; modes of censoring; the Kaplan-Meier estimate of the survivor function; parametric survival time distributions; proportional hazard models and their semi-parametric estimation; accelerated life models, log rank tests, including the Mantel-Haenszel test; and goodness of fit measures.
PREREQUISITES: STAT 3340.03 and STAT 3460.03, or equivalent
CROSSLISTED: STAT 5100.03
FORMATS: Lecture

STAT 4130 Bayesian Data Analysis

CREDIT HOURS: 3
This course introduces the student to the Bayesian methods in applied statistics. The course covers all the fundamental concepts of Bayesian methods, and works from the simplest ideas (characterizations of probability; comparative inference; prior, posterior and predictive distributions) up through hierarchical modes applied to various data. Computational methods include MCMC for posterior simulation.
PREREQUISITES: MATH 2030.03 or Math 1030.03, and STAT 3460.03
EXCLUSIONS: STAT 5130.03
FORMATS: Lecture

STAT 4300 Topics in Statistics and Probability

CREDIT HOURS: 3

CROSSLISTED: STAT 5300.03

STAT 4350 Applied Multivariate Analysis

CREDIT HOURS: 3
The course deals with the stochastic behaviour of several variables in systems where their interdependence is the object of analysis. Greater emphasis is placed on practical application than on mathematical refinement. Topics include classification, cluster analysis, categorized data, analysis of interdependence, structural simplification by transformation or modelling and hypothesis construction and testing.
PREREQUISITES: STAT 3340.03 and MATH 2135.03 or 2040.03
EXCLUSIONS: STAT 5350.03
FORMATS: Lecture

STAT 4360 Robust Statistics

CREDIT HOURS: 3
Robust statistics are those which provide protection against violation of assumptions underlying the statistical procedure. We will develop basic concepts including sensitivity, influence and breakdown of estimates and tests. Classical procedures will be evaluated in terms of robustness and alternate techniques developed based on weighted least squares and/or median based generalizations. We will also consider robust techniques in time series.
PREREQUISITES: STAT 3340.03 and STAT 3460.03
CROSSLISTED: STAT 5360.03

STAT 4370 Stochastic Processes

CREDIT HOURS: 3
The theory and application of stochastic processes. Topics to be discussed include the Poisson process, renewal theory, discrete and continuous time Markov processes, and Brownian motion. Applications will be taken from the biological and physical sciences, and queueing theory.
PREREQUISITES: STAT 3360.03 or instructor's consent
CROSSLISTED: STAT 5370.03
FORMATS: Lecture

STAT 4390 Time Series Analysis
CREDIT HOURS: 3
Time series analysis in both the time and frequency domain is introduced. The course is applied and students are required to develop their own computer programs in the analysis of real time series with an emphasis on oceanographic data. Topics to be discussed include the nature of time series, stationarity, auto and cross covariance, ARMA models, spectral analysis, and state space models (the Kalman filter and the particle filter).
PREREQUISITES: STAT 3340.03, 3360.03, STAT 3460.03, or instructor's consent
CROSSLISTED: OCEA 4210.03
EXCLUSIONS: OCEA 5210.03, STAT 5390.03
FORMATS: Lecture

STAT 4570 Statistical Genetics
CREDIT HOURS: 3
Statistical aspects of several ideas in genetics are discussed. Topics of some or all the following: gene frequency estimation, Hardy-Weinberg equilibrium, linkage analysis, association studies, quantitative traits, microarrays.
PREREQUISITES: STAT 3460 or permission of instructor
CROSSLISTED: STAT 5570
FORMATS: Lecture

STAT 4620 Data Analysis
CREDIT HOURS: 3
A variety of statistical models which are useful for the analysis of real data are discussed. Topics include: generalized linear models, such as logistic regression and Poisson regression, models for multidimensional contingency tables, ordered categories and survival data.
PREREQUISITES: STAT 3340.03, 3460.03, or instructor's consent
CROSSLISTED: STAT 5620.03
FORMATS: Lecture

STAT 4690 Computational Statistics
CREDIT HOURS: 3
The advances in computing over the past decades have opened up possibilities for statistical analyses that were not previously possible. However, increasing model complexity can exceed even todays huge computational resources. This course covers techniques for handling computationally intensive tasks arising from statistical analysis of data.
PREREQUISITES: STAT 2450.03, STAT 3460.03
EXCLUSIONS: STAT 5690.03
FORMATS: Lecture

STAT 4701 Actuarial Models I
CREDIT HOURS: 3
This course develops the theoretical basis of a number of probabilistic models useful for the study of life contingencies, including survival models, Markov chains, Poisson processes, with application to life insurances and annuities.
PREREQUISITES: STAT 3360.03
FORMATS: Lecture

STAT 4703 Actuarial Models II
CREDIT HOURS: 3
This course focuses on the development of statistical methods for the estimation and validation of actuarial models. Topics to be discussed include: methods of estimation, properties of estimators, goodness of fit, credibility theory, survival estimators, measures of risk, estimation of severity and ruin models.
PREREQUISITES: STAT 3703 or ACSC3703
CROSSLISTED: ACSC 4703.03
FORMATS: Lecture

STAT 4720 Life Contingencies II
CREDIT HOURS: 3
STAT 3720.03 covers the basics of life contingencies in a simple standard situation. In this course we extend this to deal with a number of common additional

features that afect life insurance policies. We introduce multiple-state models, pensions, interest rate risk and profit testing.
PREREQUISITES: STAT 3720.03
CROSSLISTED: ACSC 4720.03
FORMATS: Lecture

STAT 4950 Honours Research Project
CREDIT HOURS: 3
This course is required for students in the honours program. It will consist of a research project carried out under the supervision of a faculty member. The results of the research will be submitted to the statistics honours advisor as a written report. Students wishing to enroll in this course must have a suitable background in statistics, and must meet with, and obtain the approval of, the statistics honours co-ordinator before undertaking their project.

Centres and Institutes

Centres and Institutes

Introduction

A number of centres and institutes for study and research in specific fields are based at the University. These are:

Atlantic Institute of Criminology

Director: D.H. Clairmont, BA, MA, PhD

The Atlantic Institute of Criminology (AIC) is a research institute that is heavily policy-oriented in the field of crime and the criminal justice system. Its mandate is to foster the exchange of information among researchers and policy makers in those areas. Consultative services are provided to fellow scholars and researchers, including graduate students and visiting professors, with respect to the planning and execution of research projects and related undertakings. The AIC is an entity that itself conducts extensive research in criminology, especially with respect to policing, the administration of justice, youth justice issues, race, ethnic and equity issues in justice. It has produced a significant body of policy-oriented research on Aboriginal and African-Canadian justice issues. The AIC Dalhousie website (Dalhousie - SOSA-AIC), which is regularly updated, provides a clear indication of the research products of recent years even though the website is largely restricted to research output that does not include articles in professional journals or edited books available elsewhere.

Atlantic Research Centre (ARC)

Director: Neale Ridgway
Phone: (902) 494-7133
Website: http://arc.medicine.dal.ca/

Established in 1967, the ARC conducts basic biomedical research in the fields of lipid metabolism and cell signalling, areas of fundamental importance to a variety of disorders including cancer, neurological, heart and infectious diseases. It also provides education and expertise in these fields to undergraduate and graduate students, other researchers, and the general public. The ARC houses state-of-the-art facilities for biochemical and molecular biological research. The Centre's staff hold appointments in the Departments of Pediatrics and Biochemistry and Molecular Biology in the Faculty of Medicine. Research at the ARC is supported by agencies such as the CIHR, NSERC, CFI, Heart and Stroke Foundation, National Cancer Institute, Atlantic Innovation Fund, and the IWK Health Centre.

Beatrice Hunter Cancer Research Institute

Director: Dr. Gerry Johnston
Administrative Director: Cindy Pettipas
Telephone: 902 494-4513
Fax: 902 494-8472
Email: cpettipas@dal.ca
Website: www.bhcri.ca

In 1999, Beatrice Hunter bequeathed $12.5 million to the Dalhousie Medical Research Foundation for cancer research, in memory of her parents, Dr. Owen and Mrs. Pearle Cameron. The bequest was placed in the Cameron Endowment Fund, with the annual earnings supporting cancer research at Dalhousie Faculty of Medicine. Early on, Beatrice Hunter's generosity sparked the creation of the Dalhousie Cancer Research Program (DCRP) that united key players within charitable, University and government sectors to create and support a thriving cancer research community. Over a short period of time, talented researchers and trainees were recruited to the region and collectively now secure millions of dollars of cancer research funding from outside granting agencies.

In 2009, the DCRP and its funding partners took the next bold step to become the Beatrice Hunter Cancer Research Institute (BHCRI), which was created to foster a more powerful, productive and collaborative cancer research environment throughout Atlantic Canada. The Institute provides regular workshops, lectures and symposia that serve as a common forum for researchers to share ideas and forge new collaborations within Atlantic Canada and beyond. The Institute also provides a key entry point for members of the public who want to learn more about cancer research in the region. The Institute represents the major resource within our region for those seeking training and careers in cancer research as well as those interested in supporting cancer research. The BHCRI has over 300 active members (both principal investigators and trainees at all career stages) throughout Atlantic Canada. BHCRI is supported by advisory committees populated by cancer experts and informed members of the public that provide advice on all aspects of cancer research and training. BHCRI receives financial support from a broad range of local and national organizations and the Institute takes responsibility for allocation of financial resources that support all aspects of cancer research and training, with funds allocated through peer-review processes that meet international standards.

Researchers within the Beatrice Hunter Cancer Research Institute share a collective vision and work toward the same goal: to save lives and ease the burden of cancer on individuals, families and society. Even though our funding comes from many sources, all of this funding stays in Atlantic Canada to build and support cancer research within our own region.

The Beatrice Hunter Cancer Research Institute was approved as an institution by Dalhousie on November 29, 2017.

Brain Repair Centre

Chair: Dr. Victor Rafuse, Director
Website: http://www.brainrepair.ca/

The Brain Repair Centre (BRC) is a collaboration of Dalhousie University, the Capital District Health Authority and the IWK Health Centre. The BRC is a multi-disciplinary unit focusing on research that can lead to the diagnosis, treatment, and repair of the brain to overcome the effects of neurological and psychiatric disorders such as Parkinson's disease, Huntington's disease, Amyotrophic Lateral Sclerosis (ALS), Epilepsy, Muscular Sclerosis (MS), stroke and spinal cord injury. The BRC grew out of the clinical Neural Transplantation Program, collaboration between basic neuroscientists and clinicians interested in treating Parkinson's disease. The success of the Neural Transplantation Program led clinical and basic neuroscientists to decide to form the Brain Repair Centre. The BRC was formed in 1999 and has focused on stem cell transplantation, Parkinson's disease, spinal cord injury, psychotic disorders, stroke and neuroimaging as areas of innovation at Dalhousie University, Capital Health and the IWK Health Centre.

Examples of BRC achievements include:

- Attracted capital funding from private donors, institutions and the public sector to support construction and fit-up of the new Life Sciences Research Institute. When the LSRI is completed, the Brain Repair Centre will become the anchor tenant of this new research and commercialization building with state-of-the-art research, equipment and facilities.
- Establishment of collaboration agreements with research teams at McLean Hospital/Harvard University; Jilin University, China; Cardiff University, Wales; and Neurodyn, Inc.
- Establishment of a $12 million magnetic resonance imaging facility with the national Research council's Institute for Biodiagnostics (NRC-IBD).
- In 2006, the BRC was awarded $5.5 million for infrastructure from the Canadian Foundation for Innovation, the largest such award to date in Atlantic Canada. Also in 2006, BRC received a $3 million Atlantic Innovation Fund award for research, a follow-on to an earlier $3 million research award.
- Dr. David Clarke, a member of the Brain Repair Centre used a virtual model of a patient's brain to remove a simulated brain tumour before removing the actual tumour the following morning. Developed by a partnership of the National Research Council and a team of about 50 people in 10 Centres across Canada, this was the first such surgery performed in the world.
- Medtronic Canada, Capital District Health Authority, QEII Foundation, and the Brain Repair Centre established a Canadian Centre of Excellence and Training at the Halifax Infirmary. This new $3.5 million centre provides important new clinical facilities for training and development in imaging, spinal cord and neuromodulation.
- In the neurotransplantation field, the BRC is unique in Canada and one of only four centres worldwide involved in clinical application of neural transplantation, with the "Halifax Protocol" accepted as the world gold standard.
- The BRC is an innovative collaboration that integrates its research expertise with pioneers in the fields of imaging, neurology, stem cell neurobiology, vision, molecular neurobiology, pharmacology, psychiatry, clinical trials and cognitive neuroscience.
- The BRC brings together the expanding fields of neuroimaging and stem cell technologies with application to the treatment of neurological and psychiatric disorders.
- The BRC is the Atlantic Canada presence in the Stem Cell Network, a National Centre of Excellence in stem cell research.

The BRC places emphasis on moving basic science research from the bench to the clinical bedside and from the bedside back to the bench. A key objective of the BRC is to produce innovative technologies that will be commercialized.

Canadian Center for Vaccinology

Director:	Scott Halperin, MD
Associate Directors:	Robert Anderson, MD
	Joanne Langley, MD
	Janice Graham, PhD

Vision

CCfV is an integrated collaborative multidisciplinary vaccine research team committed to excellent research. CCfV unites the biomedical and clinical sciences with the social sciences and humanities to effectively span the research continuum from basic discovery to translation into useful vaccines to prevent disease in humans and to change population and public health outcomes.

Organization

Activity within CCfV is organized into three groups

- Vaccine Discovery Group
- Vaccine Evaluation Group
- Health Policy & Translation Group

An **Advisory Committee** of CCfV investigators and external advisors provides counsel on the strategic direction and objectives of CCfV research.

Members

Anyone with an interest in vaccine-related research may apply for membership at http://www.centerforvaccinology.ca/about-ccfv/join-us/

For a list of current members go to http://www.centerforvaccinology.ca/about-ccfv/members/

CCfV is made possible by a continuing collaboration of Dalhousie University, the IWK Health Centre, and Capital Health. The CCfV's 20,000 square foot facility in the IWK Health Centre includes laboratories for microbiological and molecular research, ambulatory and inpatient clinical trial facilities, data analysis, training and conference space. It was founded in 2007 with financial assistance from the Canada Foundation for Innovation, the Nova Scotia Research and Innovation Trust, and the Government of Nova Scotia's Department of Economic Development, among others. The Clinical Research/Vaccine Challenge Unit, which opened in 2009, was made possible by additional funding from Sanofi Pasteur.

Canadian Institute of Fisheries Technology (CIFT)

Director: A. T. Paulson, PhD
Phone: (902) 494-3280
Fax: (902) 420-0219
Website: http://cift.engineering.dal.ca

CIFT was established in 1979 at the former Nova Scotia Technical College (later TUNS). The federal Department of Fisheries and Oceans provided much of its early specialized laboratory and seafood pilot scale processing equipment, and Industry Canada provided start-up funding and designated CIFT a centre of excellence. As a government-approved laboratory for advanced technology, it also provides R&D services on a cost-recovery basis to industry and to various governmental agencies. The Institute promotes technology transfer and the development of advanced technologies aimed at more effective commercial utilization of both marine and terrestrial resources in Canada and throughout the world.

In addition, CIFT offers unique opportunities for post-graduate training and research through the Food Science program. Major areas of emphasis are: food biochemistry and microbiology; fats, oils, nutraceuticals and other bioactives; physical properties of foods; fish/food process engineering; food safety and preservation; food rheology, food fermentation and beverage science.

Facilities

CIFT is located in the MacDonald Building of Sexton Campus at 1360 Barrington Street in downtown Halifax. The Institute's facilities include:

- fats and oils laboratory
- food chemistry laboratory
- food development laboratory
- sensory evaluation laboratory
- food process engineering pilot plant
- low temperature storage facility
- food physical properties laboratory
- food microbiology laboratory

These areas contain specialized instrumentation and food processing equipment to enable experimental processing, laboratory analysis, and product storage evaluation. In addition to a computer- controlled cold-storage facility, the pilot plant is equipped for experimental processing including freezing, chilling, thermal processing, drying, centrifugal separation, and meat-bone separation.

The pilot plant is well equipped for thermal processing with an automated retort capable of steam, steam-air, or water immersion processing research. The specially designed cold-storage facility is computer controlled and particularly useful for the study of changes in foods as a result of frozen storage history. The pilot plant is also equipped with a custom-built computer-controlled heat pump dryer that is used in food dehydration experiments.

Specialized laboratory equipment includes: automated high performance and fast protein liquid chromatography systems, gas chromatography/mass spectroscopy system, preparative ultracentrifuge, multi-purpose refrigerated centrifuge, microtube centrifuge,

analytical and preparative electrophoretic/isoelectric focusing equipment, pulsed field electrophoresis system, thermocycler, DNA gel electrophoresis, Hoefer Daltsix for 2D eletrophoresis, Image Master 2D elite software, capillary electrophoresis system, ultra-low temperature freezer, universal texture testing machine, various colorimeters, U.V. and visible spectrophotometer, spectrofluorometer, electrokinetic analyzer, workstation for mathematical modelling and computer simulation, Linkham shearing stage/microscope, Nikon microscope (various attachments), controlled stress rheometer with a high temperature/pressure attachment, controlled rate rheometer, Viscomat, and a rolling ball viscometer.

Educational Opportunities
Graduate (MSc and PhD) programs are available through the Food Science and Technology program. Also post-doctoral research opportunities are offered. Graduate level class work and research opportunities relate to food science, seafood processing technology, marine oils, engineering design, packaging technology, fish post-mortem biochemistry, food microbiology, food rheology and food process science. Students with degrees in food science, engineering, chemistry/biochemistry, microbiology or biology are invited to apply.

Centre for African Studies

Phone: (902) 494-3814/494-1377
Fax: (902) 494-2105
Director: Theresa Ulicki, PhD

The mandate for this Centre is under review.

This centre, established in 1975, advances instruction, publication, research and development education programs in African Studies. Associated faculty offer classes through the Departments History, International Development Studies, Political Science, French, Sociology and Social Anthropology and Philosophy. The Centre organizes academic and informal seminars and public policy conferences on Africa and encourages interdisciplinary interaction at all levels on African subjects and issues. It co-operates with the International Development Studies department and with the International Research and Development office.

Centre for Comparative Genomics and Evolutionary Bioinformatics

Centre for Comparative Genomics and Evolutionary Bioinformatics (CGEB)

Director:	Andrew J. Roger, PhD
Coordinator:	Wanda Danilchuk
Phone:	(902 494-2620
Fax:	(902) 494-1355
Website:	http://www.cgeb.dal.ca

The Centre for Comparative Genomics and Evolutionary Bioinformatics (CGEB) at Dalhousie University encompasses an interdisciplinary group of researchers in the Faculties of Medicine, Science and Computer Science. Although microbial genome evolution and diversity is at the heart of many of the CGEB researchers' activities, our work spans computational biology, computer science, statistical modeling and comparative genomics, with a strong focus on method and theory. The application of DNA sequencing technologies to characterize the genomes of a wide diversity of microbes has generated vast quantities of genome sequence data. Now the intellectual challenge is to develop from this enormous resource more comprehensive and theoretically robust phylogenetic, genetic and ecological models to further our understanding of the many roles of microbes in the biological world.

CGEB researchers are united by the common goal of using this vast resource of genomic information to elucidate evolutionary patterns and processes: the pathways by which microbial organisms have diversified over the last 3.5 billion years of Earth's history and through which they continue to shape the global environment. Only through the integration of experimental genomic approaches and sophisticated bioinformatic modeling will we be able to achieve this goal.

CGEB researchers and trainees are supported by grants from the Canadian Institutes for Health Research (CIHR), Natural Sciences and Engineering Research Council (NSERC), and the Nova Scotia Health Research Foundation (NSHRF). The Centre itself is

supported by funding from the Tula Foundation (http://www.tula.ca), the Faculties of Medicine, Science, and Computer Science, and the Provost and Vice President Academic. CGEB is also supported by a large grant from the Tula Foundation (http://www.tula.ca) that provides funds for training top-notch postdoctoral and graduate trainees in the CGEB research specialties. CGEB also has a regular seminar series that brings world renowned scientists to speak at Dalhousie University and interact with faculty members and trainees.

Centre for Environmental and Marine Geology

Contact: Ann Bannon, Administrator

This Centre was originally founded as the Centre for Marine Geology in 1983 to promote interdisciplinary studies of various types of problems in marine Geology, capitalizing on our unique position in Canada with links to related departments such as Oceanography, Physics, Biology, the Bedford Institute of Oceanography and our hosting of the Canadian office of the Ocean Drilling Program. Since 1983 the role of the Centre has changed, reflected in the new name, which better describes the work being done now where marine geology is combined with environmental problems. We have three new faculty that expand our expertise into new chronological techniques and permafrost as well as strengthening our capacity in the petroleum-related environmental geology. Some of the objectives of the Centre are to: 1) continue to expand our participation in a revitalized east coast offshore energy related problems; 2) continue our climate-change work with a variety of approaches both offshore and on land; 3) expand into Arctic regions both with major oceanographic and shore-based programs; and 4) expand our capacity to help solve some of the many environmental geology problems associated with urbanization.

Centre for European Studies

Director: Jerry White (Canada Research Chair in European Studies)
Email: jerry.white@dal.ca

The Centre for European Studies was established in 2007 to promote research on all aspects of European society and its relations with the rest of the world. The Centre facilitates the work of Europeanist scholars at Dalhousie, including the participating Canada Research Chairs in European Studies, enables research collaboration with scholars from Canada and around the world on projects related to Europe and the European Union.

Centre for Innovation in Infrastructure

Director:	John Newhook, PhD, PEng
Location:	Room B233, Sexton Campus
	1360 Barrington Street
	PO Box 1000
	Halifax, NS B3J 2X4
Phone:	(902) 494-2847
Email:	forgeron@dal.ca

The Centre for Innovation in Infrastructure is an industry-oriented research centre with the Faculty of Engineering and with strong affiliations with the Department of Civil and Resource Engineering. Established in 1983 as the Nova Scotia CAD/CAM Centre, the Centre originally focussed on assisting Atlantic Canadian industry with the integration of computer added manufacturing and computer aided design technology in their operations. Since the 1990's the Centre has continued to evolve to meet the needs of industry in other areas and to take a more active role in research and development in civil infrastructure.

Today the Centre act as a focal point for research, innovation and technology transfer in Civil Infrastructure related areas. The major funding partnerships are with the Atlantic Canadian departments of transportation, industries related to bridge and structural engineering and with companies developing new materials and products for infrastructure.

Our combined areas of expertise and research interests include:

- Structural Analysis and Design
- Structural Health monitoring
- Bridge engineering and innovations
- Soil-steel structures
- Fibre reinforced polymers
- Fibre reinforced concrete

- NDT of bridge decks and pavements
- Sustainable asphalt technology

The Centre has acquired and maintains significant testing equipment related to these research areas and contributes to the maintenance and operation of the research facilities within the Department of Civil and Resource Engineering.

Centre for Research in Sustainable Supply Chain Analytics (CRSSCA)

Location:	6100 University Avenue, Room 4065
	PO Box 15000
	Halifax, NS B3H 4R2
Director:	Dr. M. Ali Ülkü
Phone:	(902) 494-3848
Email:	crssca@dal.ca
Fax:	(902) 494-1107
Website:	www.dal.ca/crssca

The Centre for Research in Sustainable Supply Chain Analytics (CRSSCA), housed in the Faculty of Management, is the supply chain research hub in Eastern Canada. We conduct interdisciplinary research that sheds light on complex issues in supply chain management. Focusing on social, environmental, economic and cultural sustainability, CRSSCA aims to create new knowledge in prescribing solution models for data-driven industrial problems, devise analytical tools for better decision-making, and develop insights into the intricate relationships between supply chain operations, green logistics (global trade, inventory, process and product design, procurement, manufacturing, transportation), and sustainable consumption. CRSSCA supports annual workshops on Supply Chain and Logistics Management (SC&LM), Bachelor of Commerce Major in SC&LM, and involvement of students in research activities.

Centre for Management Research and Innovation (CMRI)

CONTACT INFO: Dominika Wranik, Associate Dean of Research, Faculty of Management

CONTACT EMAIL: cmri@dal.ca

MISSION: To activate, support, accelerate, and promote interdisciplinary management research that meaningfully impacts our knowledge, economy, workplaces, institutions, and communities.

Centre for Marine Vessel Development and Research (CMVDR)

Contact: Josh Leon, Dean of Engineering

The mandate for this Centre is under review.

Centre for the Study of Security and Development

Director: Brian Bow

Established in 1971 the Centre is concerned with teaching, research, publication, policy advice and other professional activities in the various aspects of foreign policy, security studies, development studies, and international politics.

The Centre's work is concentrated in the areas of Canadian and comparative maritime security and oceans policy, Canadian and American foreign and security policies, and global security and international development. Its geographical specializations include Canada, North America, Europe, and the South (especially Africa, Asia, and the Caribbean). The Centre encourages activities in these areas by Faculty, Research, and Doctoral Fellows, and advances communication among local and international communities in these fields through seminars, workshops conferences and colloquia, often in collaboration with local, national, and/or international

organizations. It publishes occasional papers and monographs on Maritime Security, Canadian Defence and Security, and Global Security issues.

The Centre is an integral part of the Department of Political Science. Centre faculty offer classes through the Department in foreign and defence policy, international relations and development, and maritime affairs at both undergraduate (majors and honours) and graduate (MA and PhD) levels. They also supervise masters and doctoral theses in these fields.

For further information, consult the Centre's website: dal.ca/sites/cssd.html.

Centre for Transformative Nursing and Health Research

Director: Dr. Ruth Martin-Misener
Research Coordinator: Julie Barry
Location: School of Nursing, 5869 University Avenue, Halifax NS B3H 4R2
Phone: (902) 494-6125

The Centre for Transformative Nursing and Health Research is a designated Research Centre at Dalhousie University. The vision of the Centre is to undertake collaborative research that develops, enhances, expands and disseminates evidence and knowledge to inform ways to improve and sustain people's health and wellbeing. The mission of the Centre is to generate nursing research and inspire discovery that is methodologically sound, actionable, and dedicated to improving outcomes for those requiring health care, their providers and the overall system. Through strong research partnerships and extensive research capacity building initiatives, the Research Centre will be acknowledged as a key resource for health system planning. This collective strength creates a more research-intensive environment, transforming the culture of health research within and beyond the School so that evidence and the quest for new knowledge are well integrated into teaching and clinical practice. The overall improved scholarly environment ensures graduates engage in original research, advance professional knowledge and are well positioned to be leaders in practice and health system change.

In concert with the School of Nursing's transformation strategy, Academic Plan and Research Strategy and informed by Boyer's Model of Scholarship, the Centre's activities will focus on four research pillars: the health needs of people, health workforce and health systems planning, marginalized populations and health equity, and knowledge translation.

Centre for Water Resources Studies

Director:	Graham Gagnon, PhD, PEng
Location:	Office D-514
	1360 Barrington Street
Phone:	(902) 494-3268
Email:	cwrs@dal.ca

The Centre for Water Resources Studies was established in December 1981, by a resolution of the Board of Governors (TUNS). The objectives of the Centre are to carry out applied research which contributes to the effective and sustainable protection of water resources in Atlantic Canada, nationally and internationally, and to facilitate the transfer of new knowledge to potential users. Research programs directed by the Centre address the design of cost-effective on-site wastewater systems, soil erosion processes, drinking water treatment, the use of roofwater cisterns for domestic water supply, eutrophication, watershed management and the computer modeling of hydrodynamic and hydrochemical processes. The Centre also has a number of research advisory panels, which involve professionals from industry, government and academia in applied research related to water use and water management.

Facilities

The Centre for Water Resources Studies is located on the fifth floor of "D" Building on Sexton Campus. Laboratory and office space is available for specific graduate research topics, as well as ongoing research carried out by Centre personnel. Analytical equipment includes instrumentation for determining low levels of major ions and nutrients, as well as trace quantities of metal ions in water. The Centre has apparatus for laboratory investigation and pilot scale testing of innovative water treatment methods using Dissolved Air Floatation (DAF) and ozonation and has worked with local consultants and municipalities to develop new applications of the technologies. The Centre is a North American leader in the development of on-site sewage disposal and has had an active research program in this area since 1987. In conjunction with the Faculty of Agriculture, the Centre has a field laboratory investigating sloping sand filters and septic disposal.

Educational Opportunities

The Centre co-operates with academic units in the training of undergraduate and graduate students who have an interest in water resources. The Centre also participates in the program leading to a dual degree in water resources engineering and planning, in conjunction with the School of Planning into the Faculty of Architecture and Planning.

Children and Youth in Challenging Contexts Institute

Director: Dr. Michael Ungar

The Children and Youth in Challenging Contexts (CYCC) Institute is an interdisciplinary research initiative and a network of Canadian and international researchers committed to making a lasting difference in the lives of vulnerable children and youth. CYCC Institute researchers examine the political, social, psychological and biological factors that pose serious risks to children and youth exposed to adversity across contexts and cultures. Through interdisciplinary collaboration and innovation, the Institute promotes change at the program and policy level that will improve the protection and well-being of young people around the world. More than 200 policy makers, mental health practitioners, directors of local and international NGOs, law enforcement officers, Aboriginal child welfare advocates, national defence personnel, and researchers are among the community partners who provide leadership to, and benefit from, the work of the Institute.

Clean Technologies Research Institute

Director:	Daniel Boyd, PhD
Administrative Offices:	6414 Coburg Road
	PO Box 15000
	Halifax, NS B3H 4R2
Phone:	(902) 494-6373
Fax:	(902) 494-8016
Website:	http://irm.dal.ca

Established in 2002, Clean Technologies Research Institute is made up of over 90 faculty members in six faculties (Science, Engineering, Dentistry, Medicine, Architecture and Planning and Health). The goals of the Institute include advancing the collective interdisciplinary research efforts in materials science and engineering at Dalhousie University, facilitating interdisciplinary teaching in materials science within the existing discipline structure, and enhancing interactions between materials researchers at Dalhousie University with relevant government laboratories and industry, especially within the region. The Institute leads collaboration within the university on interdisciplinary applications to funding agencies for major equipment and research infrastructure, and collaborates with external organizations to pursue research opportunities.

All Dalhousie University faculty members carrying out research in the area of materials are eligible to be Members of Clean Technologies Research Institute. Postdoctoral fellows and graduate students associated with these research groups are invited to become Associate Members of Clean Technologies Research Institute.

In addition to equipment operated by individual members of the Institute, Clean Technologies Research Institute has established (2003) the Facilities for Materials Characterization, an $11 million suite of instruments managed by the Institute.

The equipment includes:

- High-field solid-state NMR spectrometer (managed by the Nuclear Magnetic Resonance Research Resource)
- Scanning electron microscope
- Focused ion beam
- X-ray photoelectron spectrometer (XPS)
- Secondary ion mass spectrometer (SIMS)
- Physical property measurement system (PPMS)
- Scanning thermal microscope (SThM)
- Hot press
- Grindo Sonic
- High-speed motion recorder/analyzer
- FT-Raman spectrometer

These facilities are open to external users. Please contact IRM@dal.ca for details.

Dalhousie Institute for Society and Culture (DISC)

Director: Associate Dean, Research in the Faculty of Arts and Social Sciences
Email: discfass@dal.ca
Website: http://arts.dal.ca/Research

Established in 2008, the Dalhousie Institute on Society and Culture serves as the virtual home for the many divergent research activities and initiatives within the Faculty of Arts and Social Sciences. Its primary function is to support research within the Faculty through various fellowship programs, publicity and fund raising initiatives, publishing ventures, conferences and lecture series, and cross-disciplinary exchanges.

The Institute encompasses two broad and overlapping research clusters: *Societies in Local, National, and Global Contexts,* and *Cultural Representations and Presentations*. The former cluster aims to develop new knowledge about political, social, and economic transformations, about national and regional identities, and about global relations, whereas the latter seeks to investigate and preserve cultural traditions, literatures, and languages, to foster studies and theories of cultural identity, to stimulate artistic innovation, to examine the shaping influence of beliefs and religions, and to contribute to the cultural life and profile of the province. These two clusters, with a flexibility and breadth unequalled in Eastern Canada, are uniquely equipped to analyze social and cultural change.

Global Health Office

Director: Shawna O'Hearn
Location: C-241, 5849 University Avenue
PO Box 15000
Halifax, NS B3H 4R2
Phone: (902) 494-1965
Fax: (902) 494-2799
Email: gho@dal.ca
Website: http://dal.ca/globalhealth

Working through an interprofessional lens, the Global Health Office is committed to training global health leaders who strengthen health systems for vulnerable populations in Canada and abroad. The office prepares students, residents and faculty doing clinical electives, training or research with our international partners as well as leads local and global electives.

- Events focusing on relevant and timely global health issues are organized through the office including global health rounds, speaker series, conferences.
- Opportunities to become involved in research and mentorship.
- A certificate in “Advocates in Global Health”.
- Annual awards are presented to a student, resident and faculty member who demonstrate leadership in global health
- Partnerships with organizations strengthen the global reach including CSIH (Canadian Society for International Health), CCGHR (Canadian Coalition for Global Health Research), National Network on MNCH (Maternal, Newborn and Child Health), ACIC (Atlantic Council for International Cooperation), GHEC (Global Health Education Consortium), and International Centre (Dalhousie)

Health Law Institute

Health Justice Institute

Director: Sheila Wildeman
Location: Dalhousie University
6061 University Avenue
PO Box 15000
Halifax, NS B3H 4R2
Phone: 902 494-6881

Email: dhji@dal.ca

Website: http://www.dal.ca/dhji

An Interdisciplinary Institute of the Faculties of Law, Medicine, Health, and Dentistry, the Institute is committed to the advancement of health law and policy and the improvement of health care practice and health systems through scholarly analysis, professional education, and public service. Its objectives are:

To foster strong and innovative health law and policy scholarship by:

cultivating interdisciplinary health law and policy research networks

engaging in principled analysis of both recognized and emerging areas of health law and policy

enabling knowledge transfer

To advance health law and policy education by:

designing and implementing education programs for law, medicine, health professions and dentistry students

providing continuing education opportunities for health professionals and legal practitioners

To serve the public in our areas of expertise by:

contributing to the societal understanding of health law and policy issues

providing expertise and consulting to organizations in the public sector

engaging in and supporting the policy-making process at local, regional, provincial,?national and international levels.

Healthy Populations Institute

Managing Director:	Maureen Summers, MSc
Scientific Director:	Lois Jackson, PhD
Other:	Project Coordinators, Research Scholars, Research Assistants, and students
Phone:	(902) 494-2240
Fax:	(902) 494-3594
Website:	www.dal.ca/hpi

The Healthy Populations Institute or HPI (formerly Atlantic Health Promotion Research Centre, AHPRC) is a leading Canadian health promotion research centre based at Dalhousie University. HPI was established in 1993 to conduct interdisciplinary, collaborative population health and prevention research that informs policies and programs to improve the health and well-being of Canadians.

The centre is conducting research on health services and health systems, healthy eating and physical activity, knowledge translation, prevention of chronic illness and disability, oral health of seniors, youth obesity, aboriginal health, and harm reduction.

The HPI is currently supported by the Faculties of Health, Dentistry, and Medicine, and the Office of the Provost and Vice President Academic at Dalhousie University. Support for specific research projects comes from agencies such as Canadian Institutes for Health Research, Social Sciences and Humanities Research Council of Canada, Nova Scotia Health Research Foundation, and charitable sector research institutes, and private foundations.

Our research associates hold appointments in the Faculties of Health, Architecture, Management, Medicine, Dentistry and Science.

Institute for Big Data Analytics at Dalhousie University

Director: Dr. Stan Matwin

Location: Goldberg Computer Science Building
6500 University Avenue
PO Box 15000
Halifax, NS B3H 4R2

Phone: (902) 494-4320

Email: bigdata@cs.dal.ca

Website: https://bigdata.cs.dal.ca

Big data is not a single breakthrough invention, but rather a coming together and maturing of several technologies: huge, inexpensive data harvesting tools and databases, efficient, fast data analytics and data mining algorithms, the proliferation of user-friendly data visualization methods and the availability of affordable, massive and non-proprietary computing. Using these technologies in a knowledgeable way allows us to turn the masses of data that are created daily by businesses and government into an important asset that will result in better, more informed decisions. This could lead, for an example, to intelligent, personalized electric power pricing for consumers, to optimized port traffic management or to the discovery of interesting patterns of migrations in marine life.

The Institute for Big Data Analytics (Big Data @ Dal) acts as a catalyst and a container in which a number of Dalhousie researchers and internationally renowned experts in all of the above areas can work together on Big Data.

The Institute has three main goals. Firstly, we want to become an international hub of excellence in big data research - a place to which scientists will come to work on interesting problems, but also in search of interesting, real-life applications. Our second goal is to make the Institute very relevant to local industries in Nova Scotia, and in Canada. To achieve this goal, we want to focus - for example - on becoming a world leader in the analytics of marine data and all aspects relating to marine biology, fisheries and shipping. Thirdly, we will develop a focused and advanced training program that covers all aspects of big data, preparing our next generation of researchers and practitioners for this important field of study.

Law and Technology Institute

Director: Lucie Guibault, LLB, LLM, PhD

Associate Director: vacant

Location: Schulich School of Law
6061 University Avenue
PO Box 15000
Halifax, NS B3H 4R2

Phone: 902 494-1469

Fax: 902 494-1316

Email: lynda.corkum@dal.ca

Website: www.dal.ca/faculty/law/LATI.html

The Law and Technology Institute was established at the Schulich School of Dalhousie in 2001 to provide teaching, research, and continuing education on technology law issues to students, faculty members, and the practicing Bar. The Institute participates, with the faculties of Computer Science and Management, in Dalhousie's Master of Digital Innovation Program, and has been involved in collaborative projects with the private sector and governments on information technology issues. Also, in conjunction with Dalhousie's Industry Liaison and Innovation Office, the Institute sometimes offers a student placement program in intellectual property and commercialization. Its faculty members provide graduate supervision to students interested in the developing field of technology law, and are active in law and technology organizations. The Institute hosts an Eminent Speakers Series, which brings leading IT lawyers and academics to Dalhousie to share their expertise. The Institute is home to the Canadian Journal of Law and Technology, co-edited by Professors Guibault and Dugas. The CJLT is the pre-eminent technology law review in Canada.

Classes Offered:

- Law and Technology
- Internet and Media Law
- Privacy Law
- Intellectual Property Law
- Information Technology Transactions
- Entertainment Law
- Intellectual Property and Commercialization Placement
- Special Topics on Intellectual Property (IPII)
- Copyright Law
- Patent law
- Science and the Law
- Technology & Innovation Law Clinic: Clinical Advocacy
- Harold G. Fox Intellectual Property Moot

Students also have the opportunity to pursue specialized interests in fields such as criminal law, health law and alternate dispute resolution, as they relate to law and technology.

MacEachen Institute for Public Policy and Governance

Scholarly Director: Kevin Quigley, PhD

The MacEachen Institute for Public Policy and Governance at Dalhousie University is a nationally-focused, non-partisan, interdisciplinary institute designed to support the development of progressive public policy and encourage greater citizen engagement. The MacEachen Institute is named in honour of Allan J. MacEachen, retired federal cabinet minister and senator and one of Nova Scotia's most accomplished political leaders.

The MacEachen Institute is a collaboration between Dalhousie's Faculties of Arts & Social Sciences, Law, Health and Management, as well as the Office of the Vice-President, Research & Innovation. It stimulates debate, discussion and research by engaging thought leaders from across Canada and internationally.

The Institute builds on Allan J. MacEachen's legacy and passion by promoting vigorous debate on progressive public policy issues, ranging from community and neighbourhood issues to those of national concern.

Marine & Environmental Law Institute

Location:	Schulich School of Law
	6061 University Avenue
	PO Box 15000
	Halifax, NS B3H 4R2
Phone:	902 494-1988
Fax:	902 494-1316
Email:	MELAW@dal.ca
Website:	http://www.dal.ca/law/MELAW

The Institute, which is housed in the Schulich School of Law, carries out teaching, research capacity-building and consultancy activities and also directs the MELP academic specialization in marine and/or environmental law for JD students. In addition to their scholarly research and publication activities, MELAW faculty and associates carry out research projects and provide advisory services to agencies of the United Nations, international non-governmental organizations, and regional organizations as well as assisting government departments, private sector institutions and non-governmental organizations in Canada and internationally.

The Marine & Environmental Law Institute is home to the editorial office of the Ocean Yearbook (OYB). The OYB is a major international interdisciplinary annual, devoted to ocean affairs, published in collaboration with the International Ocean Institute (IOI) in Malta. MELP law students have the chance to gain experience working as research assistants on the Institute's research projects and workshops and assisting with editing the Ocean Yearbook.

MELAW supports student collaboration in addressing environmental issues through the Environmental Law Students' Society (ELSS) and the East Coast Environmental Law Association (ECEL), a non-governmental organization dedicated to environmental law education, law reform, and community support. MELAW encourages interdisciplinary collaborations within the Dalhousie University community including the School for Resource and Environmental Studies (SRES), the Marine Affairs Program (MAP), the College of Sustainability (CoS), the International Development Studies Program (IDS), the Ocean Frontier Institute (OFI), the Ocean Tracking Network (OTN) led by the Department of Oceanography and the Institute for Ocean Research Enterprise (IORE). MELAW also participates in national collaborations such as, the OceanCanada Partnership. International linkages include: the Global Forum on Oceans, the IUCN Academy of Environmental Law, the Australia Canada Ocean Research Network (ACORN) as well as numerous other partner institutions in Asia, the Caribbean, Europe, South America, Africa, and the United States.

Minerals Engineering Centre

Director: Josh Leon, PhD, PEng
Location: G Building, Sexton Campus
1360 Barrington Street
PO Box 15000
Halifax, NS B3H 4R2
Phone: (902) 494-3955
Fax: (902) 494-3506
Email: mec@dal.ca
Website: http://minerals.engineering.dal.ca

The Minerals Engineering Centre was established from the Laboratory for the Investigation of Minerals. The Minerals Engineering Centre provides research, analytical and advisory services to industries, universities, and government bodies in Atlantic Canada, Canada and International. The Centre is located in G Building on Sexton Campus and is affiliated with the Materials Engineering program. The services offered include:

- Sample preparation of ores, soils, silts, rocks, cores, clay fraction and wood pellets
- Size analysis, including screening, sieving, and sub-sieve analysis
- Minerals separation using dense liquids
- Physical and chemical analytical methods using atomic adsorption, XRD, ICP-OES, AA, x-ray fluorescence spectographic, wet chemical techniques and carboy/sulphur analysis
- Analysis of samples including geological, metalliferous ores, industrial minerals, coals, metals, alloys and water
- Mineral processing test work covering the whole range of investigative techniques from bench scale to pilot plant, including crushing, grinding, classification, gravity separation, dense medium separation, magnetic separation, electrostatic separation, flotation, flocculation, thickening, filtration, and drying
- Evaluation of biomass fuels calositic value of raw material and wood pellet.

The Minerals Engineering Centre provides opportunities for undergraduate and graduate students to learn various analytical and testing techniques applicable in their course of studies. It also offers services to faculty members to assist in their teaching and research activities.

Further information may be obtained from the Director of the Centre.

Neuroscience Institute

Contact: neuroscience.institute@dal.ca
Website: http://www.neuroscience.dal.ca

The Neuroscience Institute was founded in 1990 to promote and coordinate research in neuroscience, the modern interdisciplinary study of the brain and nervous system.

It serves as an umbrella organization to foster research and training in neuroscience at Dalhousie. A major objective is to increase understanding of the functions of the nervous system in health and disease. To this end, the Institute coordinates the activities of neuroscientists in the Faculty of Medicine, the Faculty of Science, the Faculty of Computer Science and the School of Biomedical Engineering, facilitating collaboration between clinical and basic scientists in these Faculties. Some foci of current research activity

include: development and plasticity of the nervous system; cognitive neuroscience; motor control; autonomic function; synaptic function; and sensory physiology. The Institute also provides a vehicle to seek new sources of funding, and encourages new initiatives in all areas of neuroscience research at Dalhousie. In addition, the Institute promotes and coordinates training programs in neuroscience currently offered through its constituent departments at both the undergraduate and graduate levels. It sponsors seminar series annually, and coordinates a variety of community outreach events.

Nuclear Magnetic Resonance Research Resource (NMR3)

Director: J. K. Rainey, BSc, MSc, PhD
Facility Coordinator: M. D. Lumsden, BSc, PhD
Solid-state NMR Coordinator: U. Werner-Zwanziger, BSc, PhD

Established in 1982 with assistance from the Natural Sciences and Engineering Research Council, the Resource is located in the Department of Chemistry and is used by faculty, researchers and graduate students in all Maritime universities, the NRC, local industry and many Dalhousie Departments. It is concerned with applications of magnetic resonance spectroscopy to problems in chemistry, materials science, biology, biochemistry and related areas. Its current instrumentation includes Bruker, Avance 300 and Avance 500 NMR spectrometers for liquids and Bruker Avance DSX 400 and Avance 700 NMR spectrometers for solids. NMR^3 users also have direct access to a Bruker Avance III 700 NMR spectrometer with cryoprobe capabilities for liquids experiments. The Avance 500 and Avance 700 NMR spectrometers were installed in 2003 with funding from NSERC, the Canadian Foundation for Innovation and the Atlantic Innovation Fund. The cryoprobes on the Avance III 700 were purchased in 2009 by Dalhousie University through an Atlantic Canada Opportunities Agency Grant. The Resource offers facilities for hands-on use by researchers and also provides NMR spectra and expertise to scientists throughout the Atlantic Region and beyond.

For more information see: http://nmr3.chemistry.dal.ca.

Trace Analysis Research Centre

Director: A. Doucette, BSc, PhD

The Trace Analysis Research Centre (TARC) was established in 1971 with the assistance of a grant from the National Research Council. Its mission is to train analytical chemists and, through research, to contribute to the advancement of analytical chemistry. Members of TARC from Dalhousie and associated institutions comprise a group with expertise in a wide range of chemical analysis techniques in areas such as spectroscopy, chromatography, mass spectrometry, electrochemistry, and nuclear analytical chemistry.

Awards

Awards

Scholarships, Bursaries, Awards, and Prizes

The Registrar's Office is responsible for:

- Undergraduate Scholarships
- Undergraduate Bursaries
- Undergraduate Awards and Prizes
- Convocation Medals

IMPORTANT NOTE: The University regularly reviews the policy governing undergraduate awards. Consequently, portions of the following statement of policy may be modified or altered and may be implemented during the course of the academic year of this Calendar.

Helpful Terms

Admissions Average

This is the average of the subjects which were used for entry to the Dalhousie academic program and is governed by admission requirements for the degree/diploma selected.

Adjusted Average
This number is the sum of the Admissions Average, plus points which are assigned to the level of course difficulty (for AP and IB courses) and the number of university-preparatory subjects beyond the minimum five.

Faculty Groupings
There are eight: agriculture; architecture and planning; arts and social sciences; computer science; engineering; health professions; management; and science.

Types of Awards

- Scholarships: A monetary award, at the entrance, in-course and/or graduating level, based on academic performance (in specific subject or group of subjects).
- Awards: A monetary award, at the entrance, in-course and/or graduating level, based on academic performance (in specific subject or group of subjects) and on the recognition of additional relevant attributes.
- Bursary: An award granted on the basis of financial need.
- Medal: An award based on recognition of an outstanding academic record at Dalhousie for a specific degree program in a particular subject.
- Prize: A monetary award of any value, or a non-monetary award, based on general academic excellence, or proficiency in a specific area of study or competition.
- External Award: An award given to the student of the university by an external agency. The University may share in the selection, administration and/or payment of such an award.

General Policy
Applicable to those awards administered by the Registrar's Office. Selection criteria may be different for those awards administered by individual faculties/schools/departments.

Where Dalhousie Scholarships can be Used
Dalhousie University scholarships can be used only at Dalhousie unless the Will or Trust Deed should otherwise permit. The University of King's College has its own scholarship program. Insofar as scholarships, bursaries, awards, prizes, and governmental student loans are concerned, Dalhousie and King's are separate. In order to receive Dalhousie funds you must be a registered Dalhousie University student.

Changing Degree Programs or Faculties
Changing degree/diploma programs or faculties can have implications for scholarship retention. Scholarship holders considering degree or faculty changes should consult the Awards Office prior to making the change.

Scholarship Payments and Rebates
To receive scholarship funds, a student must be registered at least as a full-time student (minimum nine credit hours for degree students, six credit hours for technical students) at Dalhousie during the term(s) in which they are receiving the funds. Students registered in Graduate Studies, Medicine, Law and Dentistry (with the exception of Dental Hygiene students), are ineligible to receive in-course scholarships or renew an existing scholarship. These faculties have their own awards programs.

- Payments: Dalhousie University scholarships are credited towards students' accounts in two equal installments first and second term. Awards are applied first to tuition and prescribed fees, and secondly for residence fees.
- Rebates: The portion of scholarship money in excess of the above charges will be refunded to the student. Refunds are made by the Student Accounts Office in October and February upon request.

Entrance Awards
Entrance awards are available to students applying to Dalhousie directly from high school. Transfer students are not eligible for entrance awards, with the exception of the First Nations and Indigenous Black Students Scholarships. Entrants coming from Year II of a CEGEP program are considered to be transfer students. Students entering the third year of engineering (including students entering from Associated Universities) should review the In-Course Awards (Engineering) section of this Calendar for award opportunities.

Dalhousie offers both renewable and non-renewable entrance awards. Non-renewable awards are held for one year. Renewable entrance awards are typically renewable for a maximum of four years. To be considered for entrance awards, applicants must submit a complete Dalhousie application for admission, a scholarship application, and an official transcript, to the Registrar's Office by March 15. Students must be admitted with a minimum 80% average (26 predicted points for IB diploma candidates) for entrance award consideration. Achieving the minimum academic average does not guarantee that an applicant will receive an award.

Applicants will be evaluated for entrance awards based on some or all of the following criteria: academic merit, extracurricular involvement, financial need, initiative to fund their own education, ancestry, and leadership. A DalOnline application is available for accepted applicants in December. A paper-based application is available for applicants yet to be accepted the following February. Visit http://www.dal.ca/scholarships for more information.

Eligible Courses for Scholarship Assessment

The Registrar's Office (Awards) considers all those Dalhousie courses which are taken for credit in a designated degree/diploma program during the academic year (or term in the Co-op program) as eligible courses for scholarship assessment.

Correspondence courses are considered for scholarship purposes.

Unless taken on Letter of Permission, transfer credits do not count towards the credit hours reviewed for scholarship assessment.

Please note that courses taken at other institutions are counted, to a maximum of one course per term, for scholarship assessment if such courses are taken on Letter of Permission towards an eligible degree/diploma at Dalhousie.

Scholarship GPA (SGPA) Calculation

The scholarship GPA (SGPA) will be calculated for students who have completed a minimum of 30 credit hours of work over two terms within the preceding academic year. The SGPA will include all eligible courses attempted during this time period. Please note that the scholarship GPA and the sessional GPA normally differ. The scholarship GPA, expressed to two decimal places, does not show on a student's transcript.

Renewable Scholarships

Unless otherwise advised, an SGPA of 3.70 is required to maintain a renewable scholarship. Students must also complete a full course load (a minimum of 30 credit hours) over two terms within the previous academic year to be eligible for renewal. Co-op students who are on a work term during the calendar year must also complete 30 credit hours over two terms to be eligible. Students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term and achieve a minimum term GPA of 3.70 to be considered. In those cases where students have taken more than 30 credit hours, assessment is based on all courses taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment. Holders of renewable awards are notified of either the renewal or the non-renewal of their awards annually, via Dalhousie email.

Holders of renewable scholarships are not also entitled to hold Dalhousie in-course scholarships. Students registered in Graduate Studies, Medicine, Dentistry (with the exception of Dental Hygiene students), or Law are ineligible to receive in-course scholarships or renew an existing scholarship.

In-Course Scholarships

All undergraduate Dalhousie students not on a renewable scholarship, in eligible programs in the faculties of Architecture & Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management and Science, who have completed a full course load (a minimum of 30 credit hours) over two terms within the previous academic year and achieved a minimum SGPA of 3.70 will be eligible for in-course scholarship consideration. Co-op students who are on a work term during the calendar year must also complete 30 credit hours over two terms and achieve a passing grade in the work term to be eligible for consideration. Students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term, achieve passing grades in both work terms, and achieve a minimum term GPA of 3.70 to be considered eligible for consideration. In those cases where students have taken more than 30 credit hours, assessment is based on all courses taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment. In-course scholarship recipients are notified of their award over the summer, via Dalhousie email.

Students registered in Graduate Studies, Medicine, Dentistry (with the exception of Diploma in Dental Hygiene students), or Law are ineligible to receive in-course scholarships or renew an existing scholarship.

Bursaries

The University's bursary program is intended as possible supplementary assistance to help qualifying students with a portion of their educational costs.

The University has funds for the purpose of assisting its students who may face certain types of financial situations. These bursaries are awarded primarily on the basis of demonstrable need as determined by the appropriate University office or committee, satisfactory academic standing (see as defined in Academic Regulations) is also expected. Students whose financial needs are exceptionally large and/or students whose academic standing is unsatisfactory may not be assisted. Normally, bursaries will be awarded only to students

who have availed themselves of assistance under the Canada Student Loan Program and/or corresponding provincial or territorial loan programs or bank loans. Normally, receipt of the first installment of such funding is a prerequisite to the University's consideration of an application for bursary assistance. Students may access the bursary program for a maximum of five years.

International Exchanges

Students who have permission to study for one or two terms outside of Canada in an approved exchange program, and are considered to be full-time (normally 30 credit hours), can be considered eligible for in-course or renewable scholarship assessment. Students who hold a Dalhousie scholarship and are planning to study abroad are advised to contact the Assistant Registrar (Awards) prior to departure to discuss their funding schedule.

Scholarship Assessment

Students who hold renewable scholarships will be assessed for renewal in either June or September depending on completion of two academic terms. If a student has previously failed to renew their scholarship and subsequently achieves the required 3.70 SGPA in the next academic year, or in any academic year within four of the original offer, the scholarship may be reinstated.

All other undergraduate students are assessed for in-course scholarships in June or September depending on completion of two academic terms.

Reduced Course Load and Retention of Scholarship

Scholarship holders considering taking a reduced course load should consult the Registrar's Office - Awards before dropping courses. Students must complete a minimum of 30 credit hours over two terms within the academic year to qualify for renewal of their scholarships or an in-course scholarship.

Record of Scholarships

Scholarships, awards, and prizes are recorded on academic transcripts. The University retains the right to reassign the source funding of a student's scholarship as circumstances may warrant (but there would be no reduction in the amount).

Graduation and Renewable or In-Course Scholarships

Students holding a renewable scholarship who choose to graduate earlier than originally expected, and later decide to return to upgrade their degree to a four-year degree, must submit a request to access their scholarship for the final year. In addition, if a student graduates and then decides to upgrade their degree, they cannot be assessed for an in-course scholarship until a further 30 credit hours over two terms within the same academic year are completed and a minimum SGPA of 3.70 is achieved.

Taxation

Students registered as full or part-time students are not required to claim financial awards (e.g. scholarships, bursaries) as income on their taxes.

Withdrawing

Award funds are credited to a student's account with the expectation that they will remain registered at Dalhousie at least as a full-time student (minimum nine credit hours for degree students or six credit hours for technical students) within the applicable term. Therefore, if a student reduces their course load or withdraws, these funds are expected to be returned to the University. However, depending on the time of the withdrawal, a student may be entitled to retain a prorated portion of the scholarship. Students in this situation are advised to contact the Assistant Registrar - Awards prior to withdrawing.

Scholarship Appeals

The deadline to appeal a scholarship decision for an entrance/in-course/renewable scholarship or entrance bursary is September 30.

Students may appeal under the following grounds:

- extraordinary or compassionate circumstances;
- unfair scholarship decision under the circumstances; and/or,
- inconsistent scholarship decision compared to other offers/decisions (compared to other Dalhousie scholarships)

Students must submit their appeal, in written form, to the Assistant Registrar, Awards, in the Registrar's Office, by the deadline noted above. The letter should clearly outline the grounds for appeal and the remedy being sought. Students should include documentation, if applicable, to support the basis of their appeal. The decision of the Appeals Committee is final.

Convocation Awards

The Governor General's Silver Medal, Governor General's Bronze Medal, University Silver Medal, Avery Prize, and University Medals are administered by the Registrar's Office (Awards) and are awarded at convocation. For the aforementioned medals and prize, a student who is completing a second Dalhousie degree will have only those courses required for the second degree used when calculating their cumulative average. Students graduating in the fall convocation are eligible for consideration for the aforementioned medals and prizes in the following spring convocation. In addition, any disciplinary action by the Senate Discipline Committee shall be deemed sufficient cause for any student to be ineligible.

In the College of Pharmacy, the School of Health and Human Performance, the School of Health Sciences, and the School of Nursing, a University medal is awarded annually at the spring convocation to a graduating student who demonstrates the following criteria have been met:

- The candidate has successfully completed the equivalent of three full-time years in their respective baccalaureate program (90 credit hours) at Dalhousie.
- Has met the FHP cumulative GPA requirement or better on courses taken at Dalhousie towards the degree.
- Of those eligible, has the highest GPA.

All credits taken towards the degree at Dalhousie will be used in the calculations. Transfer credits taken prior to entry into the program are not counted towards either the 90 credit hours criterion, or towards the cumulative GPA requirement. Classes taken on Letter of Permission, while registered in the program, are included in the 90 credit hours criterion and calculated as part of the cumulative GPA requirement. As the School of Social Work does not offer a three year (90 credit hour) BSW degree, it is not eligible for the University Medal.

Entrance Awards

Robert J Chadwick Scholarship
This entrance scholarship will support an entering student into the Bachelor of Commerce or Bachelor of Management program at the Rowe School of Business who demonstrates academic merit, community involvement and athletic interest. Eligible students will contribute to and gain value from the Dalhousie experience through their activities and interests.
Eligibility: The eligible student will be entering first year of a Bachelor of Commerce or Bachelor of Management program. They will demonstrate academic merit, community involvement, and an interest in athletics.
Application Type: General Entrance Award Application
Application Deadline: March 1 - check dal.ca/scholarships

Shana Keay Memorial Scholarship
This scholarship was established by the family of Shana Keay in her memory. Shana received her bachelor's degree in pharmacy in May 2015 from Dalhousie University and joined Lawton's on July 15th that same year. Shana was promoted to the Pharmacy Manager Long Term Care with Lawton's in July 2018 and loved working side by side with her colleagues whose friendships she treasured.
Eligibility: Available to students entering the first year of the Doctor of Pharmacy (Pharm D) program with demonstrated strong academic achievement. Preference will be for a student coming from Pictou or Antigonish County, or Rural Nova Scotia. Preference will also be given to a student with a background in music.
Application Type: Contact the Department, School, or College for more information
Application Deadline: n/a

Clarence and Marjorie Anderson Scholarship
Established by Clarence and Marjorie Anderson to support students entering any undergraduate degree program at Dalhousie University.
Application Type: Automatic Consideration – No Application Required

Julius D. Solomon Scholarship
This scholarship provides support for one of more students entering first year of study in the Faculty of Engineering.
Eligibility: For students entering their first year of Engineering. Preference will be given to students with demonstrated leadership abilities in extra-curricular and/or community activities.
Application Type: General Entrance Award Application
Application Deadline: March 1 - check dal.ca/scholarships

The Harold Sawler Scholarship
Born in 1917, Harold Sawler was raised and educated in the north end of Dartmouth. Harold went on to graduate from Dalhousie with a Masters of Arts and Harvard University with a Masters of Education. Harold returned to the Dartmouth schools' system where he would eventually serve as principal of Bicentennial Junior High School from 1951 to 1982. Harold Sawler was dedicated to providing a quality education for his students; this scholarship aspires to further this legacy.

Eligibility: First preference for graduates of Dartmouth High School or Prince Andrew High School. If there are no applicants from either of these schools, the scholarship may go to a student entering from another Dartmouth high school. Recipient must have high academic achievement and engagement with their community. Recipient must be a Canadian citizen.
Application Type: General Entrance Award Application
Application Deadline: Mar 1

Shoppers Drug Mart Entrance Scholarship
These 3 scholarships are presented annually to students enrolled in the College of Pharmacy at Dalhousie University who self-identify as belonging to historically underrepresented groups and are enrolled in the College of Pharmacy. Second preference is for student(s) from New Glasgow and/or North Sydney, then any other rural areas.
Eligibility: Available to students in College of Pharmacy, at Dalhousie University. Preference to students who self-identify as a member of equity groups (Black Nova Scotian or Indigenous) including students who have self-identified as African Nova Scotian, Mik'kmaw &/or any other Black or Indigenous community anywhere in Canada. Second preference for students from New Glasgow and/or North Sydney, then any other rural areas (as defined by the gift agreement).
Application Type: Contact the Department, School, or College for more information

Joyce Family Foundation Student Success Award (Renewable)
This bursary was created through the generosity of members of The Joyce Family Foundation. It is intended to provide financial support for students entering Dalhousie University with demonstrated financial need. Recipients are encouraged to participate in a mentorship program or type of activity.
Eligibility: Available to undergraduate students at the Halifax Campus with preference to first year students who have graduated from a high school in Nova Scotia within the previous five years. The student will have demonstrated financial need and maintain good academic standing.
Application Type: General Entrance Award Application
Application Deadline: February 15

Eldon Gunn Memorial Scholarship
This fund was established in memory of our colleague and friend, Dr. Eldon Gunn. The Eldon Gunn Memorial Scholarship is awarded to students who have completed their second year of engineering at any Canadian university, and who show outstanding academic ability and the potential to be an outstanding professional engineer. The scholarship is tenable at Dalhousie University in years three, four or five of the Industrial Engineering program.
Eligibility: Student entering Year 3 of the Bachelor of Engineering: Industrial Engineering program at Dalhousie.
Application Type: Contact the Faculty for more information
Application Deadline: April 30

Barry & Sue Hurndall Scholarship
Barry Hurndall, BSc (Hons), P.Eng, C.Eng, MICE, is a Civil Engineer with over 45 years' of Canadian and International experience. Barry is a graduate of City, University of London, UK where he was awarded a full scholarship at the university. Without this scholarship it would not have been possible for him to complete his degree studies. The purpose of this scholarship is to provide financial assistance to students so that they can complete the courses required to receive a degree in Civil Engineering.
Eligibility: Recipient(s) must be enrolled in their third year of the Bachelor of Engineering program. Recipient(s) must be a Canadian citizen from the Atlantic Region. Recipient(s) must be majoring in Civil Engineering. Recipient(s) must be in good academic standing and have a strong personal and ethical character.
Application Type: Contact the Faculty for more information
Notes: Faculty of Engineering: Year 3 Entrance Scholarship Application

54th Avenue Capital Corporation Bursary
A bursary to provide financial assistance to a student with demonstrated financial need and good academic standing entering university directly from high school.
Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Entrance Award Application
Application Deadline: February 15

Albion Mines Scholarship
Awarded to a student based on academic achievement, community involvement and financial need.
Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants must be permanent residents of Pictou County, Nova Scotia.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $1,000

Aldous Bachelor of Commerce Bursary
The Aldous BCOM Bursary is intended to provide financial support to a new Commerce student, and may be renewable annually.
Eligibility: Awarded to a Canadian student entering the Bachelor of Commerce program directly from high school with a minimum 80% average and demonstrated financial need.
Application Type: General Entrance Award Application

Application Deadline: March 1
Value: $1,000

Suddy and Barbara Bill Ashfield Bursary
This endowment provides renewable bursaries annually to students entering Dalhousie with permanent disabilities and demonstrated financial need. The number and value of bursaries may vary from year to year. To be considered, students must submit medical documentation regarding the nature of their disability, and a complete General Entrance Award Application.
Eligibility: Available to students entering any program at Dalhousie University directly from high school with a documented permanent disability.
Application Type: General Entrance Award Application
Application Deadline: March 1

Atlantic Scholars Award
Atlantic Scholars Awards will provide tuition and residence costs (at shared-room rate, for as long as the recipient chooses to live in residence) for the length of the recipient's first diploma (up to two years) or degree (up to four years). The scholarship does not cover meals, books, and student fees. Only those applicants who have achieved a minimum average of 85% on the courses required for admission shall be considered. Selection criteria include academic performance, geographic distribution, and extracurricular activity.
Eligibility: Available to students entering any program at the Faculty of Agriculture directly from high school.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $40,000

Marjorie Ball Scholarship
Marjorie Ball was born in Newfoundland in 1912 and attended Dalhousie University in 1934. This scholarship was established by a bequest from the Estate of Marjorie Ball to the Dalhousie University Alumni Association.
Eligibility: Available to entering and current undergraduate students.
Application Type: Automatic Consideration – No Application Required

The Annie L. Beer Prize
Under the Will of the late Mrs. Thomas (Annie L.) Beer of Charlottetown a bequest was established at Dalhousie University. The net income from the fund provides for a prize which is to be awarded to the youngest student from Prince Edward Island who enters this University in each year.
Eligibility: Available to an entering undergraduate student from Prince Edward Island.
Application Type: Automatic Consideration – No Application Required

The Francis Hugh Bell Entrance Scholarship in Science
This scholarship was established by a bequest from the estate of Barbara Bell who attended Dalhousie in 1923 as a music student. This scholarship is awarded annually to honour her father, the late Mr. Francis Hugh Bell who was one of Dalhousie's earliest graduates.
Eligibility: Available to students entering any program in the Faculty of Science at Dalhousie University directly from high school.
Application Type: General Entrance Award Application
Application Deadline: March 1

Beta Sigma Phi Scholarship
The Halifax-Dartmouth City Council of Beta Sigma Phi sorority has established an endowment of $2,000 whereby the annual income will provide for a scholarship. The successful candidate will be selected from the following categories, listed preferentially: first, an active Member; secondly, a daughter, son or spouse of an active Member; and thirdly, some other student chosen by the Registrar's Office. Applications are available from sorority members.
Eligibility: Available to students entering any program at Dalhousie University, with preference to an active member of the sorority or the child or spouse of an active sorority member.
Application Type: See dal.ca/scholarships for more information
Application Deadline: July 31

The Bissett Scholarship
A scholarship valued at $24,000 ($6,000 per year) was established by Mr. David Bissett with the intention of encouraging scholastic achievement by providing an incentive to capable high school students. A nomination for a Bissett Scholarship will not interfere with consideration of the nominee for other University scholarships. A student may not, however, hold a Bissett Scholarship and another Dalhousie scholarship at the same time. Students must be nominated by their school to be considered for this scholarship, and should contact the Guidance Office for more information.
Eligibility: Available to students entering any program at Dalhousie University directly from Cole Harbour District High School. Applicants must be attending university as full-time students.
Application Type: See dal.ca/scholarships for more information
Value: $24,000

Black and Gold Awards
Each year the Dalhousie Black and Gold Club funds a number of awards that recognize outstanding student athletes and the contribution they make to university life. Returning students must have been a full time student for at least two semesters in an academic year at Dalhousie with a minimum GPA of 2.0

in three full year courses or the equivalent. Entering candidates must have an average of 80% or higher. Participation on a varsity team is a requirement. Applicants should apply through the head coach of their respective varsity teams. Eligibility is verified by the Registrar's Office.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture). See award description for specific eligibility requirements.
Application Type: Contact the Department of Athletics for more information

Jeff Bredin Memorial Scholarship in Men's Volleyball
This scholarship was established in memory of Jeff Bredin who graduated from Dalhousie in May, 1985 with a Bachelor of Physical Education. While at Dalhousie, Jeff was a member of the varsity volleyball team for two years and was the recipient of numerous awards for his contribution to the University's volleyball team. One or more scholarships will be awarded to entering or continuing student athletes on the Dalhousie men's volleyball team who demonstrate excellence in volleyball, sportsmanship and community service.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture). See award description for specific eligibility requirements.
Application Type: Contact the Department of Athletics for more information

Robert Bruce Scholarships
The University is a beneficiary of a bequest from the late Robert Bruce of Quebec whereby a portion of the annual income is to be used for both entrance and in-course scholarships, and for bursaries.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture)
Application Type: Automatic Consideration – No Application Required

Dr. John Bubar Scholarship
After graduating in 1950, John Bubar returned to former NSAC in 1967 to become the first department head of Plant Science Department. By the time John relinquished the chair more than a decade later, it had grown to a professional group of dozen accomplished scientists and teachers. John Bubar loved to teach and share his love of plants and agriculture in general. He was affectionately known by many students as "Johnny Plant." In turn he knew every students name and, by the time he retired in 1987, he had taught three generations of students at the former NSAC. John is a friend of the Agricultural Campus, and a strong proponent of practical learning. He has left an indelible mark on NSAC and the students who have passed through his doors.
Eligibility: Available to students entering the Bachelor of Science (Agriculture) program at Dalhousie University. Applicants must be permanent residents of New Brunswick. Selection criteria will include academic performance and financial need. Recipients cannot have received other significant awards.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $4,000

George Burris Scholarship
The scholarship was established by Mary Burris and Grace Burris in memory of their father, George Burris, to support Dalhousie students wishing to study in England as part of their academic program. Scholarships are awarded on the basis of academic and extracurricular excellence, financial need, and international experience. Open to Dalhousie University upper year Canadian students who have applied for admission to participate in an International Program/Placement in England. Value: up to $5,000 each. Students must submit application a minimum of one month before departure.
Eligibility: Available to students participating in a study abroad or exchange program in England.
Application Type: Contact the International Centre for more information
Value: $5,000

George H. Campbell Memorial Scholarship
In 1917 Mr. and Mrs. G. S. Campbell established the George H. Campbell Scholarship Fund to provide annual scholarships in memory of their late son, George Henderson Campbell.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture)
Application Type: Automatic Consideration – No Application Required

Cobequid Salmon Association Scholarship
The Cobequid Salmon Association (CSA) provides this scholarship to support incoming Faculty of Agriculture students who have an interest in wild fish ecology, conservation, or habitat restoration.
Eligibility: Students must be entering Aquaculture, Environmental Sciences, or Engineering. Eligible students will have graduated from a high school in Colchester County.
Application Type: General Entrance Award Application
Application Deadline: March 1- check dal.ca/scholarships
Value: 750

Cochrane Fry Leadership Bursary
This family bursary was created to honour the generosity of others. Frank Godfrey, Ralph Cochrane's maternal grandfather, was the first member of the family to attend Dalhousie. He was sponsored by Walter Scott from Loggieville NB, to attend, and graduated from the Pharmacy program in 1923. Frank won the Frank W. Horner Medal for the highest standing in Practical Dispensing. Fry family Dalhousie graduates: Jennifer (BCOM '93), her mother (Catherine Fry nee Isnor BA '65) and sister Stefanie Fry (BA '96). Cochrane family Dalhousie graduates: Ralph (BA '90), his brother Russ (BA '93) and sister's children (Max Vermeir BA Candidate '16, Ella Vermeir BSc '14, MA Candidate '16). Jennifer and Ralph met at Dalhousie and 23 years later reconneded through a

good friend and Dalhousie alumnus. Jennifer and Ralph were married in 2012.
Eligibility: Awarded to a student from Atlantic Canada beginning their studies at Dalhousie who have demonstrated leadership in a volunteer capacity in their community. The recipient will demonstrate financial need and be in good academic standing.
Application Type: General Entrance Award Application
Value: $6,000

Dr. Garth Coffin Scolarship
This scholarship is established in honour of, Dr. Garth Coffin, who served as principal at the Nova Scotia College of Agriculture from 1997-2003. This entrance award will recognize an academically strong student who is beginning post-secondary studies at the Faculty of Agriculture.
Eligibility: Available to a student with strong academic standing entering their first year of an undergraduate degree or diploma program in the Fauclty of Agriculture, with preference to a student in the Bachelor of Science (Agr.) in Business or Bachelor of Science (Agr.) in Economics programs.
Application Type: General Entrance Award Application
Application Deadline: Visit dal.ca/scholarships

H Reuben Cohen Scholarship
Created by Dr. H Reuben Cohen, CC, QC, to provide an anuual scholarship to a top academic student entering Dalhousie from Moncton High School (New Brunswick). Reuben attended Moncton High School, Dalhousie University and after completing his law degree, began his career as a lawyer in Moncton. To name a few of his many accomplishments, he was awarded the Companion of the Order of Canada, the Order of New Brunswick, the Order of Moncton, the Fellowship of Honor with the YMCA, Prix Lescarbot Award, Paul Harris Fellow Award, District Governor of Rotary, Queen's Golden and Diamond Jubilee Medals, was a past Chancellor of Dalhousie University and a founding member of The Friends of The Moncton Hospital Foundation.
Eligibility: Available to graduates of Moncton High School entering any program at Dalhousie University directly from high school.
Application Type: General Entrance Award Application
Application Deadline: March 1

The Bert and Betty Collins Bursary
An endowment has been established to award an annual bursary to a deserving pharmacy student from New Brunswick who demonstrates financial need and who has attained a satisfactory academic standing.
Eligibility: Available to current students in the Bachelor of Science - Pharmacy program at Dalhousie. Applicants will have demonstrated financial need, have satisfactory academic standing, and be a resident of New Brunswick.
Application Type: Contact the Department, School, or College for more information

Corpfinance International Limited (Kevin Andrews) Indian Bursary
This bursary is a gift made possible by the generous contribution of Kevin Andrews.
Eligibility: Awarded to a student entering the Bachelor of Commerce program directly from high school. Applicants must be from India, and must demonstrate financial need. Preference will be given to a female student from the State of Gujarat who is entrepreneurial minded, intends to return to India after completing their studies, and who exhibits an interest in athletics.
Application Type: General Entrance Award Application
Application Deadline: March 1

Costco Undergraduate Bursary
Provided by Costco Wholesale Canada Ltd. to support a student entering the Commerce or Management program.
Eligibility: Available to a student entering the Bachelor of Commerce or Bachelor of Management program directly from a high school in the Halifax Regional Municipality.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $1,000

DSU Accessibility Bursary
The Dalhousie Student Union established this $1,000 renewable bursary assistance for an entering student with a permanent disability and demonstrated financial need. This bursary is administered and awarded in combination with the Johnson Foundation Bursary. The recipient will typically receive $1,000 from the DSU Bursary and an additional $1,500 annually from the Johnson Foundation Bursary for a combined annual amount of $2,500. To be considered, students must submit medical documentation regarding the nature of their disability.
Eligibility: Available to students entering any program at Dalhousie University directly from high school with a documented permanent disability.
Application Type: General Entrance Award Application
Application Deadline: March 1

Blair Eavis Scholarships
Blair Eavis, who received his early education in Cape Breton, graduated from Dalhousie University with a B.A. in 1986. During his time on campus he was actively involved in student organizations and intramural sports. He credits much of his later success as a naval officer and layer to experiences at Dalhousie.
Eligibility: Enrolled full-time in an undergraduate degree
Application Type: General Entrance Award Application
Application Deadline: see Dal.ca/entranceawards

Jeff D and Martha Edwards Scholarship
Hugh Maccagno established this scholarship in 2007 in memory of Jeff and Martha Edwards. As a young child living in the village of Lac La Biche in northeast Alberta, Hugh Maccagno clearly recalls his father speaking to Mr. Edwards and afterwards commenting *"What a fine gentleman he is."* Mr. Edwards, a black man dressed in a suit, tie, and hat, was in Lac La Biche coaching his baseball team from Amber Valley, Alberta. His father's words continue to inspire Hugh as they were voiced at a time when black people were subjected to so much discrimination in the US and Canada. Jeff Edwards was 21 when

he and many other blacks left Oklahoma for Canada in 1910 seeking an escape from segregation and prejudice in the American South. He and his wife Martha homesteaded as pioneers at Amber Valley, raised 10 children, and contributed enormously to the community. Mr. Edwards embraced his new citizenship with pride, and when he died in 1973 at the age of 90, was remembered as a proud Canadian citizen who epitomized the spirit of black pioneers who settled the Canadian West. It is with these sentiments that Hugh Maccagno established this scholarship, which serves to provide post-secondary education to many from the large and long-established Black community of Nova Scotia.
Eligibility: Available to Black students entering any program at Dalhousie University directly from high school, with preference given to Canadian students of Black African descent, followed by native Black Bermudian students.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $12,000

DA Eisenhauer Memorial Scholarship
This fund was created in honour of the life and career of Daniel Andrew Eisenhauer. It will aim to support engineering students from the South Shore of Nova Scotia and give them an opportunity to be inspired and accomplish their goals while studying Engineering at Dalhousie
Eligibility: This award is for students in Engineering. Preference is given for students in their first year. Preference is also given for students from the South Shore of Nova Scotia, with second preference for students from Nova Scotia at large.
Application Type: General Entrance Award Application
Application Deadline: see Dal.ca/entranceawards

Edward A. Perkins Memorial Bursary
Florence Perkins established this renewable bursary assistance in memory of her son, Edward A. Perkins. This bursary is available to an entering Dalhousie student with a permanent disability and demonstrated financial need. This bursary is administered and awarded in combination with the Johnson Foundation Bursary. To be considered, students must submit medical documentation regarding the nature of their disability.
Eligibility: Available to students entering any program at Dalhousie University directly from high school with a documented permanent disability.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $4,000

Reverend Trevor Phillips Memorial Scholarship
Revd. Trevor A. Phillips was born in Jamaica on March 5, 1941. He received his early education at Kingston College and Union Theological Seminary in Kingston. He was an Ordained Minister at Mount Zion United Church in Jamaica before migrating to Canada. From 1969-72 he continued his pastoral work in Prince Edward Island. Revd. Phillips moved to Nova Scotia and worked at St. Paul's United Church in Halifax from 1973-1981, and then Sambro-Parkhill-Jollymore Pastoral Charge from 1981 until his passing in 2008. He obtained degrees at the University of Prince Edward Island (BSc), St. Mary's University (MEd) and Dalhousie University (BEd 1975 & MA Education 1980) Science, Education, Educational Psychology, Counselling, Educational Administration and Supervision. During his career he was a teacher and guidance counsellor at several schools within the Halifax Regional School Board and a member of their Crisis Intervention Team. He was also a presenter at several national and provincial conferences delivering workshops on multi-culturalism, human rights, curriculum reform and discipline strategies. Revd. Phillips was a man of excellence with great passion for life. He was an avid sportsman who enjoyed badminton (at Dalplex with the "Silver Tigers" Table Tennis), cricket and jogging. His compassion and dedication to Christian Ministry, counselling within the community and caring for people in need was extensive and extraordinary. His amazing laughter and sense of humour brought joy to many lives. He was a legend in his time. On Eagles' Wings is an autobiographical account of his life and faith. The Revd. Trevor Phillips Memorial Scholarship was established as a "living" memorial so that his name and his excellence will be remembered in a significant way.
Eligibility: Awarded to students beginning their studies in any program directly from high school who are either Nova Scotia residents of Caribbean descent, or applying from the Caribbean.
Application Type: General Entrance Award Application
Application Deadline: March 15

The Hugh J. Potter Scholarship
An endowment has been established to provide a scholarship to a student who has demonstrated a high level of academic achievement. The scholarship

honours the memory of Joseph Hugh Potter, a native of Digby County, who showed himself to be an exceptional initiator and developer of financial and commercial activity throughout this province in the fields of insurance, securities, shipbuilding, transportation and manufacturing.
Eligibility: Available to students entering the Bachelor of Commerce program at Dalhousie University directly from high school, with preference given to permanent residents of Digby County, Nova Scotia.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $5,000

Gordon S. Rankin Memorial Scholarship
Gordon Rankin, born in Halifax in 1933, graduated from Dalhousie in 1957 with a Bachelor of Commerce degree. He played both varsity football and basketball, holding the position of Captain for a period of time on both teams. As a continuing tribute to Gord, this scholarship was formed to assist athletes in financing their studies while attending Dalhousie University.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

The Harold A. Renouf Scholarship
An endowment has been established to provide an annual scholarship.
Eligibility: Available to students entering the Bachelor of Commerce program directly from high school.
Application Type: Automatic Consideration – No Application Required

Residence Scholarships
Awarded to outstanding applicants applying to a program on the Halifax campus, based on academic merit, leadership and extracurricular involvement.
Eligibility: Available to students entering any program at Dalhousie University directly from high school.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $6,000

Residence Scholarships (Agriculture)
Awarded to outstanding applicants applying to a program on the Truro campus, based on academic merit, leadership and extracurricular involvement.
Eligibility: Available to students entering any program at the Faculty of Agriculture directly from high school.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $4,500

Richardson Family Awards
This gift is intended to provide entrance scholarships and bursaries annually with preference for students who participated in the Catapult program.
Eligibility: Students must be enrolled full-time at Dalhousie University. For scholarships, students must demonstrate academic excellence; for bursaries, students must demonstrate financial need. First preference for students who participated in the Catapult program. Second preference for students from Nova Scotia who have demonstrated involvement in community or extracurricular.
Application Type: General Entrance Award Application
Application Deadline: see Dal.ca/entranceawards

Lawrence and Mildred Ridgway Scholarship
This scholarship is awarded on the basis of performance excellence to a student entering university for the first time directly from high school into a course of study leading to an undergraduate degree in music performance. It was established by Karen Woolhouse and Judith Wells in memory of their parents, who lived in Halifax for many years, enjoyed music, and were proud that their two daughters graduated from Dalhousie.
Eligibility: Available to students entering first year of the Bachelor of Music program at Dalhousie.
Application Type: Contact the Department, School, or College for more information

Cicero T. Ritchie and Hazel Robertson Scholarship
This scholarship was created at the bequest of Hazel Robertson in memory of her husband, a Dalhousie graduate. This entrance renewable scholarship is awarded each year.
Eligibility: Available to full-time students entering the Bachelor of Science program at Dalhousie University directly from high school. Applicants must be graduates of Dartmouth High School, Nova Scotia.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $6,000

The Lois J. Robertson Scholarships
The University received a generous bequest from the Estate of the late Lois Robertson.
Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

The Effie May Ross Scholarships in Music
An endowment fund, established under the will of the late Effie May Ross, supports scholarships to outstanding vocalists or instrumentalists with 'advanced standing' in degree programs in Music. Scholarships range in value and number and are awarded at the discretion of the School.
Application Type: Automatic Consideration – No Application Required

The S & L Bursary
This bursary was established to provide financial assistance for a student with demonstrated financial need who is entering Dalhousie directly from high school. Students must be graduates of a high school in one of the following counties: 1) Colchester; 2) Guysborough; 3) Cumberland; or Pictou County.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program entering directly from high school. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: General Online Bursary Application
Application Deadline: October 15

Seymour Schulich Scholarships in Computer Science
Seymour Schulich, one of Canada's leading philanthropists, established this scholarship fund in 2008 to honour his wife Tanna Goldberg Schulich and her family. The fund provides four renewable scholarships; two based on academic achievement and two based on community involvement. In addition, several one-time scholarships are awarded to students based on academic achievement and community involvement.
Eligibility: Available to students entering any program in the Faculty of Computer Science at Dalhousie University directly from high school.
Application Type: General Entrance Award Application
Application Deadline: March 1

Shad Scholarships
Two renewable scholarships are offered to top high school applicants who have participated in Shad Valley.
Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants must have participated in Shad Valley.
Application Type: General Entrance Award Application
Application Deadline: March 1

Shatford Memorial Trust Scholarships
The J. D. Shatford Memorial Trust established a scholarship endowment fund in 1976 to provide assistance with the costs of attendance at Dalhousie University. The University's fund is independent of any other such trusts. Candidates must fulfill the following conditions: a) be coming directly to Dalhousie from high school, b) be undertaking studies leading to their first baccalaureate degree and c) be a bona fide resident of the bequest area (in Hubbards, Nova Scotia area) for at least three years prior to applying to Dalhousie. A candidate's satisfaction of the residency requirement is confirmed by the J. D. Shatford Trust Advisory Committee in Hubbards.
Eligibility: Available to current undergraduate students and students entering directly from high school who live in the Shatford Trust Area as defined by the Trust.
Application Type: Automatic Consideration – No Application Required

Sigma Chi Leadership Award
The Sigma Chi Leadership Award recognizes the qualities of entering students who meet the standards of Sigma Chi membership, as described by the Jordan Standard: being of high character, a student of fair ability, with ambitious purposes, a congenial disposition, possessed of good morals, having a high sense of honour, and a deep sense of personal responsibility.
Eligibility: Available to students entering any program at Dalhousie University directly from high school.
Application Type: General Entrance Award Application
Application Deadline: March 15
Value: $1,000

Alexander Sinclair Scholarship
Under the Will of the late Evangeline Marion Winn, the University received an endowment for the purpose of providing scholarship awards to qualifying students from St. Mary's Municipality, Guysborough County, Nova Scotia.
Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants must be graduates of St. Mary's Rural High School, Nova Scotia.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $16,000

The Slaight Family Foundation Scholarship for African Students
The Slaight Family Foundation Scholarship for African Students is a renewable scholarship valued at $25,000 per year and is funded by a very generous gift by the Slaight Family Foundation. The scholarship will be awarded annually to a full-time undergraduate student who resides in Africa and is either entering into their first year or returning (current) year of studies in any program at Dalhousie University. To be eligible, candidates must demonstrate financial need,

hold good academic standing, and demonstrate involvement in their community.
Eligibility: Available to entering and current undergraduate students who are permanent residents of Africa.
Application Type: Automatic Consideration – No Application Required

Lenore Smith Cumming Bursary
From the Estate of Charles Gordon Cumming came a bequest of $10,000 US to endow a bursary fund to assist needy students.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program entering directly from high school. App
Application Type: General Online Bursary Application
Application Deadline: October 15

The Ross Stewart Smith Scholarships
A significant bequest established these memorial scholarships for students who excel in the sciences or mathematics.
Eligibility: Available to current undergraduate students in the Faculty of Science.
Application Type: Automatic Consideration – No Application Required

Dr. David M. Soloan Scholarship
Under the Will of the late Dr. David M. Soloan the University received a sum of money. The Board of Governors decided that the gift be used to provide one or more entrance scholarships in the College of Arts and Science.
Eligibility: Available to entering students in the Faculty of Arts & Social Sciences or the Faculty of Science.
Application Type: Automatic Consideration – No Application Required

Katherine (Norman) Spavold Scholarship
In honour of the memory of Katherine (Norman) Spavold, and to recognize academic and other achievements of students.
Eligibility: Available to students entering the Bachelor of Arts program in the Faculty of Arts and Social Sciences at Dalhousie University directly from high school. Applicants must have graduated from a rural high school in Nova Scotia.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $2,000

Stanley William Spavold Scholarship
The purpose of this scholarship is to honour the memory of Stanley William Spavold (BA 1951, MA 1953) and recognize the achievements of students entering Dalhousie from Halifax West High School.Mr. Spavold became head of the Social Science Department at Halifax West in 1968 and was later named Vice Principal. This scholarship is awarded to a student who has demonstrated high academic achievement and a well-rounded approach to their academic and extracurricular activities.
Eligibility: Awarded to a student entering the Faculty of Arts & Social Sciences or the Faculty of Management directly from Halifax West High School.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $1,500

Betty Spencer Scholarship
Betty Spencer was born in Saint John, New Brunswick in 1916. She graduated from Saint John Vocational School and worked for a time at Wasson's Pharmacy where she met her husband. They retired in Bangor, Maine and later in St. Andrews, New Brunswick. Although Betty had no specific connection to Dalhousie, she generously bequeathed this endowment through her Will. Preference is given to students from the Atlantic provinces.
Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

The I. C. Stewart Trust Fund
From the Estate of Georgie M. Stewart came a trust fund, the annual income from which is to be used for I. C. Stewart Scholarships to qualifying students from St. Mary’s District in the County of Guysborough, Nova Scotia.
Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants must be graduates of St. Mary’s Rural High School, Nova Scotia.
Application Type: General Entrance Award Application
Application Deadline: March 1

Joseph Duncan Stewart Scholarships
A bequest under the Will of the late Joseph Duncan Stewart has made possible the funding of undergraduate scholarships.
Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Whit Strickland Aquaculture Scholarship
This scholarship is established in honour of Thomas 'Whit' Strickland, a Nova Scotia aquaculture producer, who would often tour Faculty of Agriculture students through his production facility. Thomas Whitman 'Whit' Strickland, was a leading contributor of the Nova Scotia aquaculture industry and the key innovator and developer of his salmon hatchery in Little Harbour since he sta1ted the business in the early 1980s. Whit was passionate about living off the land and enjoyed the outdoors. He especially enjoyed spending time with his five beautiful granddaughters.
Eligibility: Enrolled in Bachelor of Science (Agr.) in Aquaculture, Faculty of Agriculture. Student must be strong academically. Preference given to female students. Preference also given to students in their second year of study.
Application Type: Faculty of Agriculture In-Course Award Application

The Terry and Marion Poole Scholarship
The Terry and Marion Poole Scholarship is funded by a generous annual gift from the charitable foundation established by Mr. Terry Poole, BCom 1965 who now resides in Calgary, Alberta. To be eligible, candidates must demonstrate financial need and scholarship standing.
Eligibility: Available to full-time students entering any program at Dalhousie University directly from high school, with preference given to candidates who reside in Newfoundland and Labrador, Atlantic Canada, and Alberta.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $20,000

L. A. and Edith Upham Scholarship
A renewable scholarship has been established to recognize the long association of the Upham family with Dalhousie University.
Eligibility: Available to students entering any program in the Faculty of Arts and Social Sciences at Dalhousie University directly from high school. Applicants must be graduates of a high school in Nova Scotia.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $20,000

The J. Douglas Vair Scholarship
This scholarship is available to students entering the University for the first time from Pictou County, Queen's County, and rural Halifax County. Failing a candidate from these areas, a student from other areas of Nova Scotia may be selected at the discretion of the Scholarship Committee. The award shall be based on scholarship and need, making it possible for a promising student to obtain a university education.
Eligibility: Available to an entering undergraduate student from Nova Scotia (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Marguerite I. Vernon Scholarship
A trust has been established under the Will of the late Marguerite Vernon whereby, from time to time, a scholarship will be assigned to Dalhousie University for an entering student.
Eligibility: Available to an entering undergraduate student from Nova Scotia (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

The Walker Wood Foundation established this bursary in support of a student with demonstrated financial need.
Eligibility: Available to students entering the Bachelor of Science program in the Faculty of Science at Dalhousie University directly from high school, with preference given to students from high schools within Atlantic Canada.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $16,000

F. W. Walsh Memorial Scholarship
Frederick Waldemar (Waldo) Walsh (1897-1984) was born in Moncton, New Brunswick, and spent his boyhood in Coverdale, New Brunswick, on the family farm. He attended the Nova Scotia Agricultural College (now Dalhousie University, Faculty of Agriculture) (Class of '17) and O.A.C. (Class of '22) and worked as Superintendent of Agriculture for the C.N.R. until 1934 when he became senior agriculturalist with the Nova Scotia Department of Agriculture, until his retirement as Deputy Minister in 1962. After his passing, his three sons Robert, Jack, and Fred set aside money, the interest of which would provide a memorial scholarship for a deserving young man or women entering the degree course at the Faculty of Agriculture.
Eligibility: Available to students entering first year of any undergraduate degree program at the Faculty of Agriculture. Selection is based primarily on academic performance. Financial need and participation in school and community affairs will also be considered.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $500

F. Hume Wells Scholarship
This scholarship is awarded on the basis of performance excellence to a student entering university for the first time directly from high school into a course of study leading to an undergraduate degree in music performance. It was established by Judith Wells and Karen Woolhouse in memory of F. Hume Wells, a businessman in Halifax, who was interested in music and thought university education was important.

Eligibility: Available to students entering first year of the Bachelor of Music program at Dalhousie.
Application Type: Contact the Department, School, or College for more information

The Women's Division of the Dalhousie Alumni Association Scholarships
This fund provides two entrance scholarships; one is named the Margaret Florence Newcombe Scholarship, which commemorates the 100th anniversary of the graduation of the first woman graduate of Dalhousie University in 1885. The second scholarship is named the Ruth Skaling Murray Scholarship, in memory of a dedicated alumna of the Dalhousie Women's Division.
Eligibility: Available to entering undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Don Wright Scholarship of Excellence
This annual scholarship funded by the Lillian and Don Wright Foundation, supports outstanding students who are entering the Fountain School of Performing Arts in a Music degree program. While preference shall be given to awarding the scholarship to one student per year, if no one student merits the awarding of the scholarship, the awarding committee has the authority to award two scholarships to students who have applied and been accepted to study Music within the School. Where there is more than one eligible candidate, first preference shall be given to the candidate deemed to have the most merit as judged by a majority of the Fountain School of Performing Arts scholarships committee.
Eligibility: Available to students entering first year of the Bachelor of Music program at Dalhousie.
Application Type: Contact the Department, School, or College for more information

Sir William Young Scholarship
This fund was left by Sir William Young for the purpose of endowing scholarships.
Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Christine Zinck Scholarships
Four scholarships awarded annually in each of the four streams of Theatre: Acting, Costume Studies, Scenography and Technical Theatre and Stage Design and Theatre Studies.
Application Type: Automatic Consideration – No Application Required

In-Course Awards

In-Course Awards

How to use this Section
The term 'awards' in this section is a general term encompassing scholarships, bursaries, awards, prizes, medals, fellowships, and studentships. To see a list of awards that you may be eligible for, select your Faculty or College from the list on the right. You may also have the option to select a department within a faculty. Students who have yet to choose a major or belong to a Faculty of College that does not have Departments should select their Faculty or College, and then 'All Faculty Awards'.

The awards listed under the Department and 'All Awards' pages include those administered centrally (by the Registrar's Office, International Centre, and other units) as well as those administered within faculties and departments.

General Information
Dalhousie In-Course Scholarships
All undergraduate Dalhousie students not on a renewable scholarship, in eligible programs in the Faculties of Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management, and Science, and the Dental Hygiene program, who have completed a full course load (a minimum of 30 credit hours) over two terms within the previous academic year and achieved a minimum SGPA of 3.70 will be considered eligible for in-course scholarships. Co-op students who are on a work term during the calendar year must also complete 30 credit hours over two terms and achieve a passing grade in their work term to be eligible. Co-op students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term, achieve a minimum term GPA of 3.70, and achieve passing grades in both work terms, to be considered eligible. In those cases where students have taken more than 30 credit hours, assessment is based on all courses taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment. In-Course Scholarship assessment takes place over the summer months. Scholarship recipients will be notified by Dalhousie email.

Students registered in Graduate Studies, Medicine, Dentistry (with the exception Dental Hygiene Students), or Law are ineligible to receive incourse scholarships or renew an existing scholarship.

Dalhousie Undergraduate Bursary Program
The University's bursary program is intended as possible supplementary assistance to help qualifying students with a portion of their educational costs.

The University has funds for the purpose of assisting its students who may face certain types of financial situations. These bursaries are awarded primarily on the basis of demonstrable need as determined by the appropriate University office or committee, satisfactory academic standing (see as defined in Academic Regulations) is also expected. Students whose financial needs are exceptionally large and/or students whose academic standing is unsatisfactory may not be assisted. Normally, bursaries will be awarded only to students who have availed themselves of assistance under the Canada Student Loan Program and/or corresponding provincial or territorial loan programs or bank loans. Normally, receipt of the first installment of such funding is a prerequisite to the University's consideration of an application for bursary assistance. Students may access the bursary program for a maximum of five years.

Faculty of Agriculture In-Course Awards Program
The Faculty of Agriculture has its own in-course award program (including bursaries), typically due in the fall term. Most Faculty of Agriculture awards require a single application. More information is available at dal.ca/scholarships.

College of Sustainability

Introduction

This Calendar is prepared some months before the year for which it is intended to provide guidance. The policies, procedures, and awards listed in this section are subject to continuing review and revision. Not all awards listed will be offered in any given year. Additionally, the number of awards offered, values of awards, and selection criteria may change without notice.

Note to ESS Students

Students in any Environment, Sustainability and Society (ESS) Major program are eligible for awards from the list linked below. This list includes all awards that are exclusive to ESS students as well as all university-wide awards. More information about College of Sustainability awards that require an application can be found on the College of Sustainability website.

ESS double major students are also eligible for awards from their other major subject. Please refer to the appropriate department list, grouped by Faculty, on the right side menu.

Bachelor of Management students in the ESS Major are also eligible for awards from the Faculty of Management.

All College of Sustainability Awards

College of Sustainability Second Year Scholarship
The College of Sustainability offers a scholarship to an ESS student who has completed the first year of their ESS Major/Honours and intends on continuing their studies into their second year of an ESS Major/Honours. The student awarded the scholarship will have achieved outstanding academic performance in their first ESS year and also demonstrated an engagement in activities that furthers the cause of sustainability, diversity and equity in their community during the past several years. Community can include the College of Sustainability, Dalhousie University or the student's residential community.
Eligibility: Eligibility ESS student who has completed the first year of their ESS Major/Honours and intends on continuing their studies into their second year of an ESS Major/Honours
Application Type: Contact the Department, School, or College for more information
Application Deadline to Apply: June 1st

Isaac MacDonald Memorial Bursary
This fund will provide an annual bursary to an undergraduate student who self-identifies as a person with Dyslexia.
Application Type: General Online Bursary Application

Advancement Bursary for Black Canadian or Indigenous Students
This bursary was created through the generosity of members of the staff of the Office of Advancement. The bursary is intended to alleviate financial difficulties for Black Canadian and Indigenous students.
Eligibility: Available to an undergraduate Black/African Canadian student or Indigenous student. The student will have demonstrated financial need.
Application Type: Automatic Consideration – No Application Required
Application Deadline to Apply: November 15

Aramark Leadership Award
This award provides scholarships for returning undergraduate students at Dalhousie registered in the Faculty of Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Diploma of Dental Hygiene who show leadership in the community. Eligible students must have been full-time Dalhousie students during the previous academic year, be currently registered as a full-time undergraduate student, be in good academic standing, and demonstrate involvement and dedication to the Dalhousie community through leadership, citizenship and/or sportsmanship. Applications are available through DalOnline - Student Awards and Financial Aid section.
Eligibility: Available to current Dalhousie undergraduate students in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Aramark Leadership Award Application

Value: $4,000

Helen Archibald Memorial Bursary
To provide one or more bursaries for undergraduate students from Cape Breton, Nova Scotia, with preference given to students from Richmond County.
Eligibility: Available to full-time undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and be a resident of Cape Breton.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

The Eva and David Ashkins Memorial Bursary
The donors established this fund for the purpose of assisting pupils who have matriculated from selected high schools to enter Dalhousie. These high schools are (first) North Queen's Rural High School or Bridgewater High School, and (secondly) other high schools in the province of Nova Scotia. The recipient may be considered in subsequent years for further assistance.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Helen Mary and Earl Atkins Memorial Bursary
A trust from the estate of Helen Mary and Earl Atkins to provide bursaries for those who might other wise be unable to attend university.
Eligibility: Available to first and second year undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and be residents of rural Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Avery Prize
This prize, bequeathed by J. F. Avery, MD, will be awarded on graduation to the student standing highest among graduates of the general degree program. The recipient cannot have received the Governor General's Silver Medal or University Silver Medal. For the aforementioned medals and prize, a student who is completing a second Dalhousie degree will have only those courses required for a second degree used when calculating their cumulative average. In addition, any disciplinary action by the Senate Discipline Committee shall be deemed sufficient cause for any student to be ineligible. For more information on deadlines and application procedures, please visit: www.dal.ca/scholarships.
Application Type: Automatic Consideration – No Application Required

The Avie Bennett Prize
This prize is one of six established by Mr. Avie Bennett, former Chairman and President of McClelland and Stewart to mark the company's 90th anniversary and the 40th anniversary of the New Canadian Library, of which the founding general editor was Dalhousie Professor Emeritus Dr. Malcolm M. Ross. It is awarded each year for the best essay on Canadian literature submitted from an undergraduate course at Dalhousie during the current academic year. Essays may have been written for courses in any department, but they should focus explicitly on a Canadian literary topic and not on history or culture more generally, and they must be written in English. Essays should be nominated by instructors; clean copies should be submitted by the specified date.
Eligibility: Available to any undergraduate student.
Application Type: Automatic Consideration – No Application Required

Harry and Kaye Bernstein Bursary
A bursary to an undergraduate student born and living in Halifax from a low income family, who shows financial need.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Beta Sigma Phi Scholarship to Dalhousie University
The Halifax-Dartmouth City Council of Beta Sigma Phi sorority has established an endowment of $2,000 whereby the annual income will provide for a scholarship. The successful candidate will be selected from the following categories, listed preferentially: first, an active Member; secondly, a daughter, son or spouse of an active Member; and thirdly, some other student chosen by the Registrar's Office. Applications are available from sorority members.
Eligibility: Available to students entering any program at Dalhousie University, with preference to an active member of the sorority or the child or spouse of an active sorority member.
Application Type: See dal.ca/scholarships for more information
Application Deadline to Apply: July 31

Black and Gold Awards
Each year the Dalhousie Black and Gold Club funds a number of awards that recognize outstanding student athletes and the contribution they make to university life. Returning students must have been a full time student for at least two semesters in an academic year at Dalhousie with a minimum GPA of 2.00 in three full year courses (18 credit hours) or the equivalent. Entering candidates must have an average of 80% or higher. Participation on a varsity team is a requirement. Applicants should apply through the head coach of their respective varsity teams. Eligibility is verified by the Registrar's Office.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture). See award description for specific eligibility requirements.
Application Type: Contact the Department of Athletics for more information

The Jotham Blanchard Scholarship
The New Glasgow Literary and Historical Society in 1912 established this scholarship in memory of Jotham Blanchard. The scholarship will be awarded to a student of meritorious standing who is in the second year of an undergraduate program.
Eligibility: Available to a second year undergraduate student (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

George Boyd Bursary
The income from the George Boyd Trust will provide a bursary to a student who demonstrates financial need.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing, with preference given to applicants from the Sydney area, Cape Breton.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Jeff Bredin Memorial Scholarship in Men's Volleyball
This scholarship was established in memory of Jeff Bredin who graduated from Dalhousie in May, 1985 with a Bachelor of Physical Education. While at Dalhousie, Jeff was a member of the varsity volleyball team for two years and was the recipient of numerous awards for his contribution to the University's volleyball team. One or more scholarships will be awarded to entering or continuing student athletes on the Dalhousie men's volleyball team who demonstrate excellence in volleyball, sportsmanship and community service.
Eligibility: Available to student athletes in any program (excluding the Faculty of Agriculture). See award description for specific eligibility requirements.
Application Type: Contact the Department of Athletics for more information

Ernest Brehaut Memorial Bursaries
This bursary is available to students if they maintain creditable academic standing and show genuine need.
Eligibility: These bursaries were established by the gift of Mrs. Ernest Brehaut of Colorado Springs, USA, in memory of her husband, a distinguished graduate of Dalhousie, Harvard and Columbia. Preference is to be given to relatives of the late Dr. Brehaut.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

The Lt. (E) Harry J. Brewer, MBE, CD, RCN (Ret.), Memorial Bursary
A memorial bursary fund has been established to provide financial assistance to a full-time student who is enrolled in a degree or diploma program.
Eligibility: Available to full-time undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

The Isabel Brown Scholarship
The scholarship was endowed in 1982 by the Brown family under the auspices of the Women's Division of the Dalhousie Alumni Association. The interest provides an annual scholarship ordinarily to a student who is entering the final undergraduate year.
Eligibility: Available to a final year undergraduate student (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Robert Bruce Scholarships
The University is a beneficiary of a bequest from the late Robert Bruce of Quebec whereby a portion of the annual income is to be used for both entrance and in-course scholarships, and for bursaries.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture)
Application Type: Automatic Consideration – No Application Required

Minnie F. Burbidge Scholarships
In her Will the late Minnie F. Burbidge bequeathed the residue of her Estate to Dalhousie University. In 1945 the sum of $16,000 was endowed to provide undergraduate, usually in-course, scholarships.
Eligibility: Available to a current undergraduate student (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

George Burris Scholarship
The scholarship was established by Mary Burris and Grace Burris in memory of their father, George Burris, to support Dalhousie students wishing to study in England as part of their academic program. Scholarships are awarded on the basis of academic and extracurricular excellence, financial need, and international experience. Open to Dalhousie University upper year Canadian students who have applied for admission to participate in an International Program/Placement in England. Students must submit application a minimum of one month before departure.
Eligibility: Available to upper-year Dalhousie students participating in a study abroad or exchange program in England.
Application Type: Contact the International Centre for more information
Value: $5,000

George H. Campbell Memorial Scholarship
In 1917 Mr. and Mrs. G. S. Campbell established the George H. Campbell Scholarship Fund to provide annual scholarships in memory of their late son, George Henderson Campbell.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture)
Application Type: Automatic Consideration – No Application Required

Howard C. Clarke International Study Award
An endowment fund to assistance a Dalhousie student who is participating in a recognized study abroad or exchange program for academic credit. Student must demonstrate great financial challenges.
Eligibility: Available to an undergraduate Dalhousie student participating in a study abroad or exchange program.
Application Type: Contact the International Centre for more information

The Rebecca Cohn Bursary Fund
A gift of $4,000 by the executors of the Estate of the late Rebecca Cohn provides an endowed bursary fund for needy students.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dorothy Macdonald Crummey Memorial Bursary
This bursary was established by the family of the late Dorothy Macdonald Crummey (1912-2005) who was born in Little Harbour, Pictou County. She attended Halifax Ladies College (an affiliate of Dalhousie University) and graduated with a diploma in Household Science in 1932. Like many educated women of her generation, Dorothy did not work outside the home after marriage to Dr. Clarence Crummey (MD 1932). Nevertheless, she actively supported university students remembering her own efforts to fund her education during “The Great Depression”. Bursaries will be available to students enrolled in any undergraduate degree program from Nova Scotia with a preference for students from Pictou County. Apply through the general online bursary program.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and preferably graduated from a high school in Pictou County, Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dalhousie Leadership Bursaries
A limited number of bursaries are available annually to students who have exhibited a record of considerable leadership achievement. Candidates must also demonstrate consistent satisfactory academic accomplishment. The Selecting Committee may consider such other matters as financial need, service to the University and the community, and character. Submit completed forms to the Department of Athletics and Recreation, which will forward your application with supplementary information.
Application Type: Contact the Department, School, or College for more information

Dalhousie Memorial Bursary Fund
From time to time at Dalhousie contributions have been made to the University as a memorial subscription in honour of some student or former student. Until now there has been no proper place into which these funds could be channeled. Because of these occurrences a Dalhousie Memorial Bursary Fund has been established. The existence of the fund will be commemorated by a book of remembrance to be located in a prominent place in the Killam Library. Names of persons in whose memory contributions have been made by relatives, friends, individuals or groups, to the Memorial Fund will be recorded in the book, along with the date of their birth and death. The pages will be turned on a regular basis. All money contributed to the Fund will be invested by the Board of Governors and only the investment income will be awarded. The award will be available to any full-time Dalhousie student, already registered and in attendance at courses, who can show a need for additional support.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application

Application Deadline to Apply: October 15

Dalhousie Student Union Student Accessibility Award
This award is open to Dalhousie students with a permanent disability (physical, mental or learning impairment). Applicants must apply by writing, taping or filming a personal statement on why they could benefit from this award. Interested students should contact the Vice-President, Internal, Dalhousie Student Union for additional details and application deadline.
Eligibility: Available to current students in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture). Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: See dal.ca/scholarships for more information

Dalhousie Student Union Student Wise Health Plan Bursary
To provide financial aid to an undergraduate student or students who are covered by the DSU health care plan.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program entering directly from high school. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dalhousie University Undergraduate Bursaries
Students who are registered in six credit hours per term will be considered for bursaries.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15 (fall), February 15 (winter), June 15 (spring and summer)

Alfred George Darville Memorial Bursary
This fund provides one bursary to a qualifying Dalhousie student.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program entering directly from high school. Applicants will have demonstrated financial need, have satisfactory academic standing, and have graduated from Halifax West High School, Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Frank R. Davis Memorial Scholarships
These scholarships are made possible by a fund established by Mrs. Davis in memory of her late husband, the Hon. Frank R. Davis, Minister of Public Health in the government of Nova Scotia and a graduate of this University. The scholarship will be awarded to deserving graduates of Bridgewater High School, on the nomination of the Supervisor of Schools and the Senior High School Staff. In selecting candidates, the governing considerations will be scholastic standing, unselfishness of purpose, and interest in the common good.
Eligibility: Available to entering students from Bridgewater Jr./Sr. High School.
Application Type: Automatic Consideration – No Application Required

The Honourable W. H. Dennis Memorial Prizes for Literary Compositions in English
Two prizes known as the Joseph Howe Prizes are offered each year. First prize $250, second prize $150, for a poem or collection of poems of any length greater than one hundred lines. Two prizes known as the James DeMille Prizes are offered each year, one of $250 for an essay, the other of $250 for a prose short story.
Eligibility: Available to any full-time undergraduate or graduate Dalhousie student who submits the best essay, short story, or collection of poems.
Application Type: Contact the Department, School, or College for more information

Dharma Master Chuk Mor Memorial Scholarship
Tin Yick Lung established this scholarship in memory of Buddhist monk Chuk Mor (1913-2002) who was an educator and artist well known in the fields of Chinese poetry, Chinese painting and Chinese calligraphy. This in-course scholarship is available to a full-time undergraduate student who has attained a high standard of academic achievement and who has completed a minimum of one year in any undergraduate degree program.
Eligibility: Available to a current full-time undergraduate student.
Application Type: Automatic Consideration – No Application Required

Charles Robert Raefe Douthwaite Memorial Bursary
To honour the memory of Charles Robert Raefe Douthwaite, an endowment was established to provide bursaries for students graduating from Nova Scotia high schools.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and have graduated from a high school in Nova Scotia.

Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

The John Dunlop Memorial Bursary
An endowment to provide a bursary to an academically sound student from a rural area.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and be a resident of a rural area.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

This prize was established in memory of Shawn Dupuis of Dartmouth, Nova Scotia who was a member of the varsity swim team. This prize will be awarded at the first AUS meet of the season held at Dalhousie to a Dartmouth Crusader Swimmer entering his/her first year of study at Dalhousie University. Preference will be given to students who are enrolled in a class from the Bachelor of Commerce program or the Spanish and Latin American Studies Department, Faculty of Arts and Social Sciences.
Eligibility: Available to a former member of the Dartmouth Crusaders Swim Team entering an undergraduate program at Dalhousie.
Application Type: Contact the Department of Athletics for more information
Value: $300

Marjorie F. Ellis Scholarships
The late Marjorie F. Ellis bequeathed one-half of the remainder of her estate to Dalhousie University for scholarships to worthy students.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Environment, Sustainability and Society Academic Improvement Prize
This prize is awarded annually at spring convocation to an ESS Major/Honours student convocating in spring or the previous fall who has shown the most academic improvement throughout the degree.
Application Type: Automatic Consideration – No Application Required

Environment, Sustainability and Society First-year Prize
This prize is awarded annually to an ESS Major student completing their first year of study who had the highest GPA in their first year courses at Dalhousie.
Application Type: Automatic Consideration – No Application Required

Environment, Sustainability and Society Honours Thesis Prize
This prize is awarded annually at Spring Convocation to the student convocating in spring or the previous fall that is judged to have submitted and defended the best ESS Honours thesis.
Application Type: Automatic Consideration – No Application Required

Environment, Sustainability and Society Second-year Prize
This prize is awarded annually to an ESS Major student completing their second year of study who had the highest GPA in their second year courses at Dalhousie.
Application Type: Automatic Consideration – No Application Required

Environment, Sustainability and Society Student Travel Award
A fund has been established to support ESS students for travel with small grants. Application information is available on the College of Sustainability website. Students submit a cover letter and budget to the College of Sustainability Awards Committee. The cover letter should explain how the proposed travel will contribute to research experiences or to the application or expansion of the undergraduate academic experience. The budget should include all expected sources of income (including other successful and unsuccessful grant applications) and a list of expected experiences.
Eligibility: Available to current students at the College of Sustainability at Dalhousie.
Application Type: Contact the Department, School, or College for more information
Application Deadline to Apply: March 15 and October 31
Value: $100-$300

Environment, Sustainability and Society SUST-star Prize
This prize is awarded annually at Spring Convocation to the ESS Major/Honours student graduating with the highest grade-point average (GPA) in all SUST courses.
Application Type: Automatic Consideration – No Application Required

Environment, Sustainability and Society Rookie-of-the-year Prize
This prize is awarded annually to a first-year SUST student who has contributed significantly to life in the College of Sustainability. Faculty and staff members nominate students to the College of Sustainability Awards Committee.
Application Type: Automatic Consideration – No Application Required

European Union Centre of Excellence (EUCE) Prize
Prize awarded by EUCE for the best essay on Europe and the European Union.
Eligibility: Available to any Dalhousie student.
Application Type: Contact the Department, School, or College for more information
Value: $100

Adrian Facca Leadership Fund
The Adrian Facca Leadership Fund has been established in Memory of Adrian Facca. Adrian graduated from Dalhousie University with Bachelor's degrees in both Arts (1980) and Commerce (1982). He proudly wore number 19 for the Dalhousie Tigers hockey team for five seasons, starting in 1977. He exemplified leadership both on and off the ice and was an important contributor to his team and to Dalhousie.
Eligibility: Awarded to students on the Tigers men's hockey and women's volleyball teams.
Application Type: Contact the Department of Athletics for more information

Ross Faulkner Scholarships
The University received from the Estate of Julia L. Faulkner a bequest to provide scholarships in memory of her husband, Dr. Ebenezer Ross Faulkner.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

The SLT Bruce Galloway Memorial Prize
Friends, family and shipmates of Sub-Lieutenant Bruce David Galloway, a member of the Ship's Company of H.M.C.S. Fraser and a 1983 Arts graduate of Dalhousie, have established a memorial fund. The prize is to be awarded to the student, male or female, attending Dalhousie University on the Regular Officer Training Plan who attained the highest academic standing (not less than a passing standing) in the program in which he or she is enrolled. A prize is to be awarded in each year in which there is a student attending Dalhousie on the Regular Officer Training Plan who achieves a passing standing.
Eligibility: Available to a current undergraduate student (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Vince Ginley Scholarships
The Vince Ginley fund provides one or more annual scholarships to students who are entering their third year and fourth year registered in the ESS Major/Honours program. The recipients are selected based on their cumulative grade point average (GPA) by the ESS Awards Committee and funds are awarded in the Spring for the subsequent academic year.
Application Type: Automatic Consideration – No Application Required

The Irving and Jeanne Glovin Award
The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying "good human conduct". Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.
Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.
Application Type: Contact the Faculty for more information
Application Deadline to Apply: mid-February

Governors' Awards
In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students' contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors' Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.
Application Type: Contact the Department, School, or College for more information

Governor General's Silver Medal
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of baccalaureate programs.
Application Type: Automatic Consideration – No Application Required

The Graham Family Athletic Awards
John and Lina Graham have established the Graham Family Athletic Awards, which recognize the contributions that varsity student athletes make in enriching the quality of life at Dalhousie University. Awards are available to entering and continuing varsity athletes. Award recipients should demonstrate positive attributes in the areas of citizenship, sportsmanship, and community service.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

MacCallum S. Grant Charitable Foundation Bursary
The MacCallum S. Grant Charitable Foundation supports a number of bursaries for Dalhousie University students each year. First priority will be given to students who have lived in Halifax County, Guysborough County and Preston for a period of at least two years immediately prior to receiving a bursary. Students from the former City of Halifax, Dartmouth and the town of Bedford are not eligible to receive a bursary.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Enid Hager Clarke Textbook Fund
A bequest from the Estate has set up an endowment from which to award bursaries to assist students from certain geographic areas of New Brunswick. Students who are domiciled in King's and Saint John counties are eligible under the terms of the bequest.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Halifax Youth Foundation Bursaries
The Halifax Youth Foundation established this bursary to support Nova Scotia undergraduate students in their educational pursuits by reducing financial barriers they face.
Eligibility: Available to an undergraduate student enrolled in any degree program at Dalhousie University. The student must be a resident of Nova Scotia, have demonstrated financial need and be twenty-four years of age or younger.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Frances Hamilton Grant Bursaries
An endowed bursary fund was established under the will of the late Constance Patricia Hamilton in the amount of $18,900, the income to be used to assist students.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

W. L. Harper Scholarship
From the Estate of Arta Falconer Harper a bequest to the University makes possible the provision of a number of awards from the annual income.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Under the Will of the late E. John Jordan a bequest was left to the University for the purpose of funding entrance and in-course scholarships.
Eligibility: Available to entering or current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Nimmi and Teji Kanwal Bursary
Mr. Tejinder (Teji) and Mrs. Nirmal (Nimmi) Kanwal have cared and impacted numerous lives over the years. Although now retired, both were successful and beloved teachers for over 30 years. They grew up in India where their parents were strong believers in education and supported their schooling. Teji came to Canada in 1962 and Nimmi joined him in 1967. Travelling around the world twice, their love of adventure and travel continued throughout their lives. Both received Masters degrees from Dalhousie. They are supports of equal rights for all, which includes their support for equal opportunities for teachers in Nova Scotia. As Teji puts it "If you can't do something for someone, you are a no one."
Eligibility: Awarded to an undergraduate Dalhousie student who is in good academic standing and demonstrates financial need, with preference to a female student.
Application Type: General Entrance Award Application
Application Deadline to Apply: October 15

The Khaki University Scholarships
From the Khaki University of Canada and the Young Men's Christian Association Memorial Scholarship Fund, the trustees of Khaki University made a gift to Dalhousie University in 1921 of $6,500 to endow scholarships.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

This endowment, established in memory of Isaac Walton Killam, provides entrance and in-course scholarships to citizens of the United States who are enrolled in undergraduate programs at Dalhousie University.
Eligibility: Available to entering and current undergraduate students who are US citizens (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

Kostman Family Bursary
An endowment has been established in memory of Harry Kostman to provide a four-year renewable bursary for an undergraduate student of Indigenous or African-Canadian descent. Harry Kostman had an enduring passion for education, and generously provided for his children and grandchildren while they attended university. Through this bursary, they strive to continue his legacy of support.
Eligibility: Earnings from the fund will provide a four-year renewable bursary for an undergraduate student who is of Indigenous or African-Canadian descent, and is in their first year of full-time studies at Dalhousie. Preference will be given to students who have completed the Transition Year Program, or successor program. The recipient will have demonstrated financial need and satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Ann Lavers Howe Hall Bursary
The Ann Lavers How Hall Bursary was founded, by alumni and friends of Howe Hall, to provide financial assistance to a Dalhousie student who is a current Howe Hall resident. It is named in honour of Ann Lavers, staff member of Howe Hall from 1967-1994, who befriended many residents over her term of employment, in a variety of positions, at Howe Hall. The recipient must have made a positive contribution to the residence community at Howe Hall. Application information is posted within the residence each January.
Eligibility: Available to a Dalhousie student who is a current resident of Howe Hall, who is in good academic standing, and has demonstrated financial need.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Annie E. Longard Memorial Bursary
An endowment has been established to provide an annual bursary in memory of an accomplished alumna and long-time participant in the Women's Division of the Dalhousie Alumni Association.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

The Robert and Katherine MacDonald Award
An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students' Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.
Eligibility: Available to an undergraduate Chinese student who is a member of the Dalhousie Chinese Students and Scholars Association.
Application Type: Automatic Consideration – No Application Required

The W. Andrew MacKay Alumni Scholarship
The Dalhousie Alumni Association established an annual scholarship in honour of Dr. W. A. MacKay, a former president of the University. The scholarships are available to students who have demonstrated high academic standing (GPA of at least 3.30) and who have shown an excellence in qualities of leadership, citizenship and sportsmanship. Candidates are considered by nomination by their Department or School in the fall of each year.
Eligibility: Available to current undergraduate students in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: See dal.ca/scholarships for more information

MacKean Athletic Scholarship
The Margaret Louise MacKean Scholarships were established through the estate of Charlotte Louise MacKean. Through a bequest in her will, the Margaret Louise MacKean Scholarships will eternally benefit Dalhousie student athletes who have demonstrated athletic, academic and citizenship excellence.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

Applicants will have demonstrated financial need, have satisfactory academic standing, and be residents of Springhill, Cumberland County, Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dr. Carolyn Savoy Award of Excellence
In March of 2009, Dr. Carolyn Savoy announced her retirement from coaching, after a 32-year career of outstanding service to Dalhousie University and its women's basketball program. Carolyn continues to work as an Associate Professor in the School of Health and Human Performance at Dalhousie. Dr. Savoy came to Dalhousie in 1977 as head coach of the women's basketball team, following seven years in the same capacity at St. FX. In over three decades of coaching, Coach Savoy posted very impressive results, including an 858-292 CIS win-loss record for a 74.5 winning percentage. A four-time AUS Coach of the Year, she led the Tigers to the national final in 1980, the semifinals in 1982, to a fourth place CIS finish in 2007 and placed sixth at nationals in 1986, 1996 and 2001. Coach Savoy's teams won nine regular season AUS titles and five AUS championships. Academically, her teams had a 100% graduation record for those playing three to five years in the program. As a Level 4 basketball master course conductor, Carolyn has coached at the national and international level as an assistant with the Canadian national team program and also served as head coach of the 2001 Nova Scotia Canada Games team. She completed her BPE degree in 1969 at the University of New Brunswick. She enjoyed an outstanding athletic career at UNB, where she was a star volleyball, basketball (she played on a team that compiled a 93-game winning streak) and field hockey player. She began her coaching career at St. FX (1969-77), where she transformed both the basketball and field hockey teams into winning programs. Carolyn has been honoured with a number of prestigious awards including the 2002 Women of Excellence award in the health, sport and fitness category. In 2005 she received the Frank Baldwin award for her contribution to the development of basketball in Nova Scotia. She was also inducted to the Saint John Sport Hall of Fame as a builder in 2003.
Eligibility: Available to athletes in the women's basketball program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

Leslie Shaw Bursary
This bursary was established by Allan, Gabrielle, and Sarah Shaw for Leslie Shaw to honour her and to celebrate her 60th birthday. Leslie Shaw dedicates her professional and volunteer life to the betterment of our society. Application Deadline to Apply: October 15

South House Sexual and Gender Resource Centre Bursary
The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women's Centre, was founded in recognition of women and trans people's common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between $25 and $250. Available funds are split between applicants. See http://southhousehalifax.ca/ for an application form.
Application Type: Contact the Department, School, or College for more information

Betty Spencer Scholarship
Betty Spencer was born in Saint John, New Brunswick in 1916. She graduated from Saint John Vocational School and worked for a time at Wasson's Pharmacy where she met her husband. They retired in Bangor, Maine and later in St. Andrews, New Brunswick. Although Betty had no specific connection to Dalhousie, she generously bequeathed this endowment through her Will. Preference is given to students from the Atlantic provinces.
Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Faculty of Agriculture

Faculty of Agriculture

Introduction

This Calendar is prepared some months before the year for which it is intended to provide guidance. The policies, procedures, and awards listed in this section are subject to continuing review and revision. Not all awards listed will be offered in any given year. Additionally, the number of awards offered, values of awards, and selection criteria may change without notice.

All Faculty of Agriculture Awards

Dr. Stewart R. Keddy Memorial Scholarship
Dr. Stewart Keddy graduated from the Nova Scotia Agricultural College in 1967. He credited the AC as giving him a strong academic start. This award is in his honor and recognizes the academic skill of a student interested in agriculture.
Eligibility: This award is for students enrolled in the Faculty of Agriculture who are studying on a full-time basis. Students must be in their second year (or later) of an undergraduate program (including technical or degree programs). They will have strong academic standing and demonstrate financial need. Preference will be given to a student who attended high school in the Annapolis Valley.
Application Type: Faculty of Agriculture In-Course Award Application

CMM & PHP Natural Resource Bursary
The purpose of the CMM & PHP Natural Resource Bursary is to encourage First Nation/Aboriginal student interest in the environment and natural resource stewardship. PHP, along with CMM has recognized the need to support students in their endeavors to protect the environment and its resources.
Eligibility: Students enrolled full time at the Faculty of Agriculture. Preference is given for a student who demonstrates an interest in environmental protection or natural resource sustainability.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships

Friends of Alex Taylor Memorial Award
To honour the memory of Alexander Taylor, the Friends of Alex Taylor Memorial Award will provide an annual award to a student with an interest in plant science and its relation to sustainability.
Eligibility: A full or part-time student enrolled in an undergraduate program at the Faculty of Agriculture in their second, third or fourth year, with a minimum GPA of 3.0. Preference is given to students that have taken courses related to plant science or agriculture and have demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships

Valacta Dairy Scholarship
Valacta, the dairy production centre of expertise for Quebec and Atlantic Canada, offers the Valacta Dairy Scholarship which recognizes and supports students with a demonstrated interest in the dairy industry.
Eligibility: Available to one student enrolled in an undergraduate or diploma program at the Faculty of Agriculture that demonstrates a genuine interest in the dairy industry by program, course, or project work.

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Avery Prize
This prize, bequeathed by J. F. Avery, MD, will be awarded on graduation to the student standing highest among graduates of the general degree program. The recipient cannot have received the Governor General's Silver Medal or University Silver Medal. For the aforementioned medals and prize, a student who is completing a second Dalhousie degree will have only those courses required for a second degree used when calculating their cumulative average. In addition, any disciplinary action by the Senate Discipline Committee shall be deemed sufficient cause for any student to be ineligible. For more information on deadlines and application procedures, please visit: www.dal.ca/scholarships.
Application Type: Automatic Consideration – No Application Required

Paul Babineau Memorial Scholarship
The Paul Babineau Memorial Scholarship was established by the Atlantic Farm Mechanization Show in memory of Paul, a former Director of the Atlantic Farm Mechanization Show. Paul was the owner and operator of Babineau Equipment Ltd, he was a 4-Wheeler enthusiast, and a director with the Atlantic Farm Mechanization Show.
Eligibility: Available to students from Atlantic Canada who have completed at least one year in the Diploma of Engineering or Bachelor of Science (Agriculture) Integrated Environmental Managament programs in the Faculty of Agriculture. Selection is based on academic performance and the demonstrated potential for a career in the area of mechanization of agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Dr. Roger S. Bacon Scholarship in Agriculture
Dr. Roger S. Bacon was a dairy farmer and blueberry producer from Cumberland County, Nova Scotia. He was also a long standing MLA from this area. During his political career, he was a well-respected and long serving Minister of Agriculture and for a time Premier of Nova Scotia. In keeping with his lifetime interest and service to Agriculture, Dr. Bacon has made a donation to establish an endowed fund to support a new scholarship at the Faculty of Agriculture.
Eligibility: Awarded to a Nova Scotia student entering the final year of any program at the Faculty of Agriculture who has plans to pursue a long term career in agriculture. Selection criteria include career plans, academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Doug Bailey Memorial Bursary
Doug Bailey had a lengthy and successful career at Farmers Dairy (now Agropur). It began at what is now known as the Middleton Spreads Plant in 1968 when Twin Cities Dairy acquired J.D. MacKenzie's Limited. Doug held many managerial positions over the years, including General Manger of the Truro Cheese Plant and Vice-President and General Manager of Central Dairies in Newfoundland. He was appointed President and Chief Executive Officer of Farmers Dairy (now Agropur) in 1987, a position he held until his death in 1996. One of Doug's greatest strengths was his leadership ability, which he demonstrated not only with Farmers Dairy (now Agropur) but also throughout the industry. The Farmers Dairy (now Agropur) Board of Directors established this Bursary in memory of Doug.
Eligibility: Awarded to a technical, undergraduate, or graduate student at the Faculty of Agriculture who is a family member of an Agropur shareholder or employee. Selection criteria include leadership, extracurricular and community activities, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: $2,000

A. B. Banks Memorial Scholarship
This scholarship is given by friends and family in memory of A.B. Banks, a former Director of Livestock Services Branch, Nova Scotia Department of Agriculture and Marketing. Mr. Banks was highly dedicated to the agricultural industry throughout his 35 year career in Nova Scotia and elsewhere in Atlantic Canada. He was born and raised in the Annapolis Valley and graduated from the former Nova Scotia Agricultural College and the Ontario Agricultural College. His career included service with the Canada Department of Agriculture, the Newfoundland Department of Agriculture and Forestry and the Nova Scotia Department of Agriculture and Marketing. As one of the first agricultural representative in Nova Scotia, he served the counties of Colchester, Halifax, and Cumberland. He was a strong advocate of improved farm management skills and believed this to be an important key to improving agricultural production.
Eligibility: Awarded to the second year BSc(Agr) Animal Science student with the highest average from the first year of study.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Bible Hill Garden Club Scholarship
The Bible Hill Garden Club, originally referred to as Hillcrest Landscape Club was first organized in January of 1947. The group was created to promote the improvement of home grounds, assist in the beautification of community grounds, local parks and schools. Over the years, the group has gained popularity and has grown from 17 members to over 60, mostly women who range in age of 50-60. The group contributes to the Faculty of Agriculture through help supporting students with the bursary they have created.
Eligibility: Available to current students who are permanent residents of the Truro area, in any undergraduate program at the Faculty of Agriculture, with preference given to students in at least the second year of study in Horticulture, preferably a landscape program. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Ali Brown Scholarship in Food Science
This scholarship is established to honour the memory of Ali Brown. Ali spent approximately 15 years of her life working towards improving and implementing food safety standards within the dairy industry. It was with a strong sense of ethics and determination that she had to walk the line between industry's goals and food safety for the public. This award salutes her dedication, determination, well rounded qualities and the spirit to succeed.
Eligibility: Recipient will be enrolled as a student at the Faculty of Agriculture, studying in any program in the Plant, Food and Environmental Science department. Recipients will have shown academic excellence. Preference for students with an interest in food science and/or food safety as demonstrated by having completed at least one food science or food safety course. Preference for students from Atlantic Canada as determined by where they attended high school. Preference for a student who identifies as female.
Application Type: Faculty of Agriculture In-Course Award Application

David W. Brown Memorial Scholarship
The David W. Brown bursary is an ongoing demonstration of appreciation to the foundation of the David Brown United Limited by Atlantic Poultry Incorporated formerly ACA Cooperative Limited. Initiated in November 25, 1976; the company has continued to fund an annual memorial scholarship.
Eligibility: Available to students who have graduated from a high school in Atlantic Canada and who are entering the second year of a technical program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, an interest in farming, and an interest in the poultry industry.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Edward Brown Memorial Undergraduate Bursary
The Edward Brown Memorial Undergraduate Scholarship was created in memory of Edward Brown under the estate of his wife, Dorothy Aveleigh Brown. Edward attended the Agricultural Campus and graduated in 1954.
Eligibility: Available to a Bachelor of Science (Agriculture) student, with preference to a student in the fourth year of study from Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Merle Cail Memorial Scholarship
The Merle Cail Memorial Scholarship Fund was created by Merle’s wife, Faye Cail in memory of Merle’s dedication to organic agriculture. Born in Rexton, New Brunswick, Merle was heavily involved in his community. He attended Zion Presbyterian Church, was director of Northumberland Co-operative and Cartier Co-operative, member of the Kent Agriconservation club, Moncton Holstien Association, Kent Farmers Association, Dairy Farmers of NB, and many more. Merle also had a dedicated career as a farmer.
Eligibility: Awarded to a senior undergraduate or graduate student from Atlantic Canada studying in the Faculty of Agriculture whose course and project work reflect an interest in organic agriculture. Selection criteria include academic performance, financial need and commitment to organic agriculture.

Donald E. Clark Memorial Scholarship
Professor Clark was born in Luchow, China in 1923 and came to Canada at the age of 15 months. In 1951 he graduated from the Ontario Agricultural College, B.S.A. (Honours). In 1962 while a member of the teaching staff at O.A.C. he received his M.S.A. from the University of Toronto. In 1968 he accepted a position with the NSAC as an Associate Professor and Head of the Agricultural Engineering Department. Donald was well known for his work with sprayers and zero tillage for corn production. He also served with distinction on such committees as the Canada Weed Committee, the Atlantic Herbicide Committee and the Atlantic Agricultural Engineering Committee. As a Professional Engineer and Agrologist, Donald was a charter member of the Canadian Society of Agricultural Engineers and in 1976 was elected President of this organization. As a result of Professor Donald E. Clark's sincere commitment to his chosen field of study, and his lifetime of contributions to both the NSAC and the Engineering community, a scholarship has been created in his memory.
Eligibility: Available to current students in their final year of the Diploma of Engineering program in the Faculty of Agriculture. Selection criteria include academic performance, interest, and aptitude in the engineering field.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check moneymatters.dal.ca for application deadline
Value: $500

Class of 1950 Award Fund
The Class of '50 Award was first established in 2000 at the Class of 1950, 50th anniversary weekend celebration. President, Don Young and Vice-President, Jack Johnson spearheaded the campaign to get their classmates involved in their commitment to help future AC students. The group recognizes the difficulty that young students face to finance their post-secondary education, as they too faced similar challenges. After a great deal of preparatory work from Don, Jack and Cliff McIsaac, a proposal was created for the Class of '50 Award fund of to assist deserving students to "stick with it." The group of classmates have made and continue to make significant contributions to the campus and students.
Eligibility: Available to current students in financial need in any technical or undergraduate program in the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Class of 1960 Memorial Bursary
In recognition of their 50th reunion, classmates established the Class of 1960 Memorial Bursary. Classmates contributed generously to this fund, with the intention of supporting an AC student. Their wish is to honour their deceased classmates who contributed to this fund, and who valued the experience and education they received at the Nova Scotia Agricultural College.
Eligibility: Awarded to a full-time technical or undergraduate student enrolled in any program at the Faculty of Agriculture who has demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application

Colonel Charles Coll Memorial Scholarship
The Colonel Charles Coll Memorial was established in memory of Col. Charles Coll Sr. He was the inventor, owner and president of Muskol Enterprises Limited. He manufactured and sold Muskol insect repellent first from his basement in his Truro, Nova Scotia home and later from his manufacturing plant in Hilden, just outside of Truro. In 1957 Charles concocted a perfume to apply to clothing while deer hunting and later registered a company. The deer lure was used by regular deer hunters, bow hunters, wildlife photographers and naturalists. Charles named the ingredient "Muskol" which derives from musk, an ingredient in the lure and the phonetic last name Coll. Federal and Provincial Departments of Fisheries, Resources, Mines, as well as many sportsmen and outdoors people still continue to use the Muskol Insect Repellent.
Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) Animal Science program. Selection criteria include academic performance, involvement and interest in poultry, and achievement and contribution to 4-H.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Charles M. Collins Memorial Scholarship
The scholarship is in memory of Charles McKittrick Collins who spent the years 1936-1962 working in various positions in the agricultural industry in Nova Scotia, including teaching at Dalhousie's Agricultural Campus for twenty-five years. Collins Horticultural Building on the Dal-AC campus is named in his honour as well.
Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in the Bachelor of Technology program in Environmental Landscape Horticulture who have not qualified for other significant awards.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,200

George and Lottie Cook Memorial Scholarship
Lottie Cook first developed her passion for agriculture on her family farm on Cape Breton Island. Lottie's parents were pioneers in the agricultural industry, and her father a renowned farmer. At a young age Lottie became involved in 4-H where she achieved some of the club's top honours. She later graduated from the former Nova Scotia Agricultural College and worked as an assistant agricultural representative to J.C.F MacDonnell for many years. In 1943 Lottie married George Cook and the pair later opened a chick hatchery in Truro and became one of the foremost producers of high quality chicks in the Maritime Provinces. After the passing of her husband in 1954, Lottie continued to operate the family business. Due to Lottie's involvement in the agricultural industry and former NSAC community from both herself and family business, a scholarship has been created in her and her husband's name.
Eligibility: Available to students from Nova Scotia in the first or second year of a technical or undergraduate program at the Faculty of Agriculture. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Cooke Aquaculture Scholarship
Cooke Aquaculture Inc. created this award to support students studying Aquaculture at Dalhousie University. Cooke Aquaculture is a vertically integrated corporation headquartered in Black's Harbour, NB, with aquaculture operations in Atlantic Canada, the United States, Chile, Spain, and Scotland.
Eligibility: Students in 2nd, 3rd, or 4th year of the Bachelor of Science (Aquaculture) program who demonstrate high academic achievement and leadership in a volunteer, community, sports, or work activity.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships
Value: $2000
Year of Study: 2, 3, 4

Country Ribbon Agricultural Award
Country Ribbon established this scholarship to recognize and support students from Atlantic Canada with a demonstrated interest in pursuing a career in agriculture.
Eligibility: Must be enrolled in an undergraduate degree or diploma program at the Faculty of Agriculture, who plans to pursue a career in agriculture, preferably in Newfoundland and Labrador. Preference given to a student who attended high school in Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Renée Covill Scholarships
The Renée Covill Scholarship was established by Dennis Covill and Renée Covill in their estate. Dennis and Renee Covill, immigrated to Canada from England in 1955. Building on his experience working on the development of Colossus, the world's first electronic computer, Dennis went on to establish Nautel Limited in Hacketts Cove, N.S. Under his leadership and expertise, Nautel created the world's first high-powered solid state radio beacon – a technology now used around the world. Nautel, a partner in UNB's wireless research program, designs and manufactures high power solid state radio transmitters for AM and FM radio stations, navigation radio beacons and other applications.
Eligibility: Available to current students studying in the Bachelor of Science (Agriculture) Plant Science, Environmental Science, or Integrated Environmental Management programs at the Faculty of Agriculture. Preference will be given to students who have demonstrated an interest in sustainable agriculture, organic agriculture or environmental issues. Selection criteria are academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $3,000

Dr. Kenneth Cox Memorial Scholarship
The Dr. Kenneth Cox Scholarship was created by the class of 1964 as a tribute for the retiring Principal of the former Nova Scotia Agricultural College. Dr. Kenneth Cox followed a very distinguished career in the Maritime agricultural industry. His early training was at the former NSAC, now known as the Faculty of Agriculture, where he graduated with the Class of 1921. He continued his studies at the Ontario Agricultural College graduating in 1924 with a Bachelor of Science in Agriculture.
Eligibility: Available to students entering the final year of the Bachelor of Science (Agriculture) program or a diploma program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Dorothy Creelman Cox Memorial Scholarship
The Dorothy Creelman Cox Scholarship was created by Dorothy's husband, Kenneth Cox in memory of his wife. Dorothy Cox passed away on December 24th, 1992. She was a retired teacher and a secretary of University Club of Montreal. She was also an active member of the St. Andrews United Church and was mainly involved in choir and Sunday school.
Eligibility: Available to female students entering second year of the Bachelor of Science (Agriculture) Plant Science program. Selection criteria include academic performance and contribution to the university community.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Dairy Farmers of Nova Scotia Award
The Dairy Farmers of Nova Scotia organization was created through legislation enacted in 2001, and replaces the former Nova Scotia Dairy Commission. The organization exists under the umbrella of the Natural Products Marketing Council of the Department of Agriculture. The Dairy Farmers of Nova Scotia bursary has been active since 1989 and continues to help support students with their post-secondary education.
Eligibility: Available to a third or fourth year Bachelor of Science (Agriculture) student or a graduate student from Nova Scotia undertaking course or project work related to the dairy industry. Selection criteria include proven interest and experience in the dairy industry, the potential beneficial impact of study on the Nova Scotia dairy industry, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application

Value: $1,000

Dartmouth Horticultural Society Scholarships
The Dartmouth Horticultural Society is a gardening club whose aim is to promote, enrich and expand the practice of amateur gardening. Monthly meetings are held where their guest speakers from inside and outside the Society share their knowledge. In addition club experts are available for formal and informal exchange of ideas. Some of the club's activities include a plant sale, a flower show, the planting and maintaining of a raised bed in Leighton Dillman Park, plant exchanges, and garden tours
Eligibility: Available to upper-year students in any plant-related undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to students from the Halifax Regional Municipality, followed by all Nova Scotia residents, followed by residents of other Canadian provinces. Selection criteria include financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Dalhousie Agricultural Students' Association Awards
Dalhousie Agricultural Students' Association (DASA) is the student association for all students at the Dalhousie Agricultural Campus. DASA is the official voice of the student body, and provides leadership and vision for the students of the Agricultural Campus. DASA promotes student engagement and leadership through various campus activities including Orientation, Shinerama, College Royal and Winter Carnival. DASA also promotes student engagement within the surrounding communities of Truro and Bible Hill. DASA works closely with Student Services and Administration to collectively provide a welcoming community dedicated to higher learning and service to the community.
Eligibility: Awarded to students enrolled in the Faculty of Agriculture who have demonstrated, in the current academic year, exceptional school spirit and involvement in any or all of the following: DASA sponsored events, volunteering, campus community leadership.
Application Type: Automatic Consideration – No Application Required
Value: 2 @ $300

K. de Geus Memorial Prize for Plant Science
The K de Geus Memorial Prize was created in memory of Klaus de Geus. Klaus, met his wife, Christina "Tina" de Geus, in DeBeemster, The Netherlands. Klaus and Tina immigrated to Canada in 1957 with their three children, Gram, Louise, and Tineke. When they arrived in Canada, they decided to settle in Nova Scotia where they made a new life for their family, including setting up and running a successful flower shop and landscaping business in Bridgetown. Tina took great pleasure in her work as a floral designer. Over the years, she gave many demonstrations on all aspects of floral designing. This lead to a career in teaching floral design in the continuing education department of the former Nova Scotia Agricultural College.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture, based on high standing in course work, with preference to students in the Horticultural field.
Application Type: Automatic Consideration – No Application Required

The Honourable W. H. Dennis Memorial Prizes for Literary Compositions in English
Two prizes known as the Joseph Howe Prizes are offered each year. First prize $250, second prize $150, for a poem or collection of poems of any length greater than one hundred lines. Two prizes known as the James DeMille Prizes are offered each year, one of $250 for an essay, the other of $250 for a prose short story.
Eligibility: Available to any full-time undergraduate or graduate Dalhousie student who submits the best essay, short story, or collection of poems.
Application Type: Contact the Department, School, or College for more information

Dr. Donald Young Plant Science Award
Created in memory of Dr. Donald Young, fund establishes an annual award for an undergraduate degree student studying Plant Science.
Eligibility: Upper year plant science

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships
Year of Study: 2, 3, 4

CA Douglas Bursary
The CA Douglas Bursary was originally established in 1984 in recognition of the impact of Charles Allan Douglas on the Agriculture industry in Nova Scotia. Charles held positions at Scotsburn Creamery, Avon Valley Greenhouse Farm and had a 35 year career with the Department of Agriculture and Marketing. Charles had a unique ability to inspire leadership and confidence in those around him, as he was very conscious of the importance of the individual. He devoted untiring energy to supporting rural youth and community development. As a result of his dedication and commitment to new technology, and his leadership and desire to relate to the individual Charles was inducted into the Atlantic Agricultural Hall of Fame in 1979 and honored with a bursary in his memory.
Eligibility: Awarded to a BSc(Agr) student enrolled full-time in the third or fourth year of study who has demonstrated financial need. Preference is given to students majoring in Animal Science.
Application Type: Faculty of Agriculture In-Course Award Application

Eastern Veterinary Technicians Association Bursary
The Eastern AHT Association represents AHTs and similar persons especially those working in the field of veterinary practice in the four Atlantic Provinces. Formed in 1989 it now numbers approximately 55 members including over 20 students enrolled in the AHT program at the Agricultural Campus. The EHTA Bursary is awarded annually to an AHT student entering the third year of the program based upon all-around performance, but with special reference to clinical ability.
Eligibility: Awarded to a student who best demonstrates proficiency in veterinary clinical skills during their first year and externship at the Atlantic Veterinary College as part of the Veterinary Technology program. Students must be in good academic standing and demonstrate financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $200

Paul C Eaton Memorial Scholarship
Paul C. Eaton was an alumnus, Class of ’48, at the former Nova Scotia Agricultural College. Growing up on a dairy and apple farm, Mr. Eaton understood the importance of agriculture, and devoted his life to this passion. Mr. Eaton spent the majority of his career working in Extension Services on the Agricultural Campus.
Eligibility: Awarded to a full-time student from Atlantic Canada in the second year or higher of the BSc(Agr) program majoring in Environmental Sciences or Plant Science. Recipients must have a background in agriculture or come from a family farm. Selection is made on the basis of academic merit.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least $2,500

Ernest L. Eaton Memorial Scholarship
Throughout Mr. Eaton’s lifetime he maintained a keen interest in scientific agriculture, and the education and development of the interested young people. He personally established the Ernest L. Eaton Scholarships, and made provision for them to continue in perpetuity. Although none of his children are directly active in farming, they all are interested in, and support, the fine work being done at present at the Agricultural Campus. The hope for the recipient of the Ernest L. Eaton Scholarship is to encourage the pursuit of excellence in both academic and scientific activities.
Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program based on performance in second year. Recipient cannot have received another scholarship of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Egg Farmers of Newfoundland and Labrador Scholarship
The Egg Farmers of Newfoundland and Labrador (formerly the Egg Producers of Newfoundland and Labrador) is a commodity board governing the production of eggs.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program. Applicants must be permanent residents of Newfoundland and Labrador.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Noel Enman Memorial Award
To honor the memory of Noel Enman, a former Agricultural Campus Animal Science Technician-Agricultural Technology student, 1979-1982, the Alumni Association has established a fund for the Noel Enman Memorial Award.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture whose personality and fellowship have contributed to student life and activities, thereby gaining the respect of the students and faculty.
Application Type: Automatic Consideration – No Application Required

Faculty of Agriculture Mature Student Bursary
