Information is a key resource for organizations and professionals. Innovative uses of information are often keys to survival in an increasingly competitive and digital economy. Information systems enable these users and account for an increasing larger share of assets in most organizations. The ability to harness and manage these systems demands a sound understanding of a broad range of concepts, terms, and challenging issues dealing with technologies and strategies. This course is designed to help students acquire these essential skills and become an effective client, user, and manager of these systems. Specifically, the course will help students understand the fundamentals of what, how and why information systems are used in organizations and the technologies that enables them. In addition to lecture materials and theoretical frameworks, students will be exposed to real information systems such as SAP ERP systems and Business Analytics tools via hands-on lab work and exercises.
PREREQUISITES: MGMT 1302.03 and at least second-year standing
CROSSLISTED: COMM 3511.03
FORMATS: Lecture | Lab | Discussion | Experiential Learning

MGMT 3601 Information in a Networked World
CREDIT HOURS: 3
This course provides an introduction to the economic, political, and social dimensions of today’s networked information economy. It considers the historical development of information and knowledge production, issues related to control versus the free flow of information, the ethical and legal aspects of information management, and organizational use of information management for storing and processing information, managing knowledge, and making decisions.
PREREQUISITES: At least third year standing
FORMATS: Lecture

MGMT 3602 Professional Communication Skills
CREDIT HOURS: 3
This course will introduce students to the broad range of written and oral communication skills needed by managers, including how to adapt a document or presentation for a particular audience and purpose, how to select a suitable method of organization, how to make good use of graphics, how to work effectively as part of a collaborative project team. Students will have the opportunity to practice their communication skills and techniques in small groups,
MGMT 3603 Beyond Google
CREDIT HOURS: 3
The ability to find contextually relevant information is essential to support decision making and strategic planning by individuals, groups and organizations. This course discusses the theory and practice of information seeking while developing key skills for systematically accessing, gathering and evaluating resources efficiently, effectively and ethically. In addition, this course explores contemporary information-seeking behavior issues including fake news and the Internet of Things. The use of technologies to streamline search processes will be emphasized, as well as the behavioral, affective and cognitive aspects of human information behavior that influences how we find and consume digital content.
PREREQUISITES: At least third year standing
FORMATS: Online Delivery

MGMT 3605 Management of Knowledge & Innovation
CREDIT HOURS: 3
This course focuses on the management of knowledge and innovation in organizations. In this course, we will explain the role that knowledge plays in the economy today and why it is essential to view knowledge as part of an “organization’s stock of capital assets”. We will survey theory and research on knowledge and innovation as an outcome (product, service, technology, practice), as well as examine and discuss the process of development and implementation of knowledge assets and innovation in organizations. We will also discuss the basic structures and designs that underlie an effective information or knowledge management system. Emphasis will be on the engagement of management and leadership in knowledge and innovation processes, particularly at the macro (strategy) level.
FORMATS: Lecture

MGMT 3701 The Community as a Living Laboratory
CREDIT HOURS: 3
This course introduces students to research, concepts and methods for understanding community sustainability across a spectrum of perspectives. In this course, the Halifax community serves as a living laboratory for exploring environmental, social and economic challenges and solutions for community sustainability. Working in groups, students apply evidence-based approaches to case-based projects using mixed (qualitative and quantitative) research methods to help community organizations (governmental and non-governmental) grapple with real world problems. A variety of tools may be used including systems analysis, environmental audits, field surveys, questionnaires, interviews, and statistical analysis. Students then draw conclusions and make recommendations for improvements on the basis of their analysis, and present them in a final report and powerpoint presentation.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 or SUST 2000.06 or SUST 2001.06 or MGMT 1702.03 and MGMT 2702.03 or MGMT 1301.03 and MGMT 1302.03
CROSSLISTED: SUST 3701.03
EXCLUSIONS: ENVS 3502.03, SUST 3502.03

MGMT 3702 Sustainable Industries
CREDIT HOURS: 3
The course introduces students to concepts and methods for analyzing industrial sustainability through an interdisciplinary lens that highlights the necessity of including economic, social and environmental considerations. It also intends to deepen their understanding of: a) the business case (short term and long term) for industrial/corporate sustainability; b) the tools, techniques and strategies necessary to decouple economic growth of our business sectors from resource use and environmental degradation; and c) the key role that business and industry play in the sustainable development agenda. Using examples from various industrial settings, a range of management and policy mechanisms for ensuring resource sustainability are explored.
PREREQUISITES: MGMT 1702.03 and MGMT 2702.03 or MGMT 1301.03 and MGMT 1302.03 or SUST 2000.06 or SUST 2001.06 or ENVS 1100.03 and ENVS 1200.03 or ENVS 1000.06
CROSSLISTED: ENVS 3702, SUST 3702

MGMT 3710 Doing Business in Emerging Markets
CREDIT HOURS: 3
This course is designed to give students an understanding of the traditional challenges and opportunities Canadian businesses face when expanding their business to emerging markets, including those in Africa, Asia, Latin America, and Eastern and Central Europe. Through this course, students will be expected to acquire a holistic understanding of the political, cultural, social, and economic challenges companies face when considering the benefits of expanding and conducting business in emerging markets.
PREREQUISITES: MGMT 2304 and MGMT 2401
CROSSLISTED: COMM 3710
FORMATS: Lecture
MGMT 3802 Public Policy
CREDIT HOURS: 3
This course serves as an introduction to the public policy process with an emphasis on the interplay between policy and the four thematic areas of study and professional practice upon which the Faculty of Management has been formed – the private sector, the environment, the public sector and information technology. Students assume the role of a policy analyst during the course and pursue a policy problem of their choosing through the policy process that culminates in a policy project briefing and paper.
PREREQUISITES: At least third year standing
FORMATS: Lecture

MGMT 3810 Government Policy Toward Business
CREDIT HOURS: 3
The focus of this course is twofold: first, how governments shape business behaviour through policy, regulation, state ownership, and other forms of intervention; and secondly, why collaboration is a growing reality enjoining public sector and private sector organizations and the implications for each sector and society as a whole. The course aims to understand the fundamental difference between the public interest and the private interest and how such differences are sorted out through contemporary governance systems involving public, private and civic actors. While the emphasis will be on the Canadian environment, a comparative perspective will also be used in light of many issues that are increasingly transnational in scope. Students will be able to develop a critical view of government intervention and grow a sense of when and where government action is warranted and when and where it is not.
PREREQUISITES: At least third year standing
FORMATS: Lecture

MGMT 3902 Starting Lean
CREDIT HOURS: 3
This course provides real-world, hands-on learning about what it is like to actually build a scalable startup. This is a practical course - essentially a lab, not a theory course providing experiential learning. You will work in teams learning how to turn a great idea into a great enterprise. You will learn how to talk to customers, partners, and competitors, as you encounter the chaos and uncertainty of how a startup actually works. You will learn the importance of customer development and customer discovery to determine whether anyone other than you would want/use your product. Each day will be a new adventure outside the classroom as you test each part of your business model, then share your hard earned knowledge with the rest of the class.
PREREQUISITES: At least third year standing
CROSSLISTED: BUSI 5902.03

MGMT 3905 Indigenous Business Studies
CREDIT HOURS: 3
Over 370 million Indigenous people are living in over 70 countries (United Nations, 2019), and the Indigenous populations in Canada are growing. An understanding of Indigenous business has become essential to the business professions. Highly relevant to all Canadians, including the First Nations, Métis, and Inuit of present-day Canada and Mi’kma’ki, the course addresses the impacts history and policy have had on Indigenous business relations. Through an exploration of Indigenous ways of knowing and the practice of two-eyed seeing, students will move toward reconciliation through an appreciation of the challenges and successes of Indigenous businesses. The course is open to both Indigenous and non-Indigenous students.
PREREQUISITES: MGMT 1302.03 and 3rd year standing
CROSSLISTED: COMM 3905.03

MGMT 3907 New Venture Creation Entrepreneurship
CREDIT HOURS: 3
This course is about entrepreneurial thinking and acting on it. By linking theory and practice, the course will expose students to the issues, problems and challenges of developing new ventures and provide students with the opportunity, within the framework of a formal class, to explore and develop venture ideas, testing their ideas assumptions, and most importantly how to act on ideas with the resources you have on hand. Experiential exercises enable the students to build their personal entrepreneurial strategy. Identify an innovative idea, build their business model, gather resources, and present their business idea. The purpose of the course is to provide students a foundation from which they can act entrepreneurially for themselves or for the organization they work for.
PREREQUISITES: MGMT 2902.03
CROSSLISTED: COMM 3307.03
FORMATS: Lecture | Discussion | Experiential Learning

MGMT 4001 Strategy Formulation
CREDIT HOURS: 3
This is a capstone course which draws upon all previous courses in the Bachelor of Management Program. The course introduces students to different theoretical frameworks for the analysis and development of strategy. Moving through an analysis of the external and competitive environment of the
organization and its resources and capabilities, students' progress to the formulation phase of strategy-making through lectures, case studies, and experiential exercises. Strategy is examined in the context of the four thematic areas of study and professional practice upon which the Faculty of Management has been formed. In addition to other requirements, student knowledge is consolidated through the preparation of a major individual project on a real organization.

**PREREQUISITES:** All required first, second, and third year core courses for the Bachelor of Management program.

**EXCLUSIONS:** COMM 4351.03

**FORMATS:** Lecture

---

**MGMT 4002 Strategy Implementation**

**CREDIT HOURS:** 3

This course is the second capstone course in the Bachelor of Management Program and is a continuation of MGMT 4001.03. The course is about strategy implementation. Through the course, students learn to discern and manage four important variables on the way to effectively implementing a chosen strategy: organizational structure, control systems, people management systems, and organizational culture. In addition, students learn about leadership and management in the context of creating organizational change. The course entails lecture case discussions, individual assignments, and a major team project on strategy implementation within an existing organization. Finally, the course draws on, and applies to, the four thematic areas of study and professional practice upon which the Faculty of Management was formed: the private sector, the environment, the public sector and information technology.

**PREREQUISITES:** MGMT 4001.03

**EXCLUSIONS:** COMM 4352.03

**FORMATS:** Lecture

---

**MGMT 4003 Strategic Management**

**CREDIT HOURS:** 3

This is a “capstone” style course that attempts to utilize all business disciplines (management, marketing, finance, accounting, etc.) to identify, diagnose, and recommend appropriate action for real managerial problems. It is hoped that through this course, students will gain a better understanding of the complexity and interrelationship of modern managerial decision-making. It is also hoped that this exposure will facilitate the students’ ability to analyze complex problem situations.

**PREREQUISITES:** All required first, second and third year core classes for the Bachelor of Management

**EXCLUSIONS:** MGMT 4001 and MGMT 4002; COMM 4351 and COMM 4352

---

**MGMT 4004 Interdisciplinary Management Capstone**

**CREDIT HOURS:** 3

The Bachelor of Management program is intended to be an interdisciplinary program with participation from the four schools (Rowe School of Business, the School of Resources and Environmental Studies, the School of Public Administration and the School of Information Management). This capstone course will integrate management theory and learning from the 4 disciplines (Business, Information Management, Public Sector Management & Environmental Management). Students will draw on their broadened awareness of interdisciplinary management to solve complex organizational problems.

**PREREQUISITES:** MGMT 4003

---

**MGMT 4031 Ecological Economics**

**CREDIT HOURS:** 3

Ecological economics is an emergent, transdisciplinary field of inquiry whose primary concern is to advance the body of theory and tools to understand and manage the environmental dimensions of economic activity. It is an explicitly normative field oriented towards environmental sustainability in economic organization. Ecological economics recognizes three conditions necessary to environmental sustainability: appropriate scale (relative to biocapacity), efficient allocation, and just distribution. Given the breadth of material encompassed within the scope of ecological economics, this class will explore a subset of possible topics including the basic principles and theory of scale, efficiency, and distributive justice. In addition, the class will look at how these apply to managing real world issues in environmental management and explore the tools used by ecological economists to quantify and interpret scale, efficiency, and distributive justice. This course is designed as a one-term introduction to ecological economics for graduate students in environmental studies and related programs with little or no prior exposure to economics.

**CALENDAR NOTES:** MGMT classes cross-listed with ENVI graduate classes require approval from the School for Resource and Environmental Studies

**CROSSLISTED:** ENVI 5031.03

---

**MGMT 4041 Environmental Education**

**CREDIT HOURS:** 3

Environmental education for all ages is a critical step in fostering sustainable behaviours and achieving higher level environmental goals. This course takes an interdisciplinary approach to studying environmental education, examining the cognitive and social science underpinnings of behaviour change. Through course readings and experiential "hands-on" learning opportunities, students are invited to critically evaluate how environmental educators create effective and authentically engaging programs. This course provides an overview of program evaluation techniques as well as environmental education in formal school settings, wilderness education, urban environmental education, how policy and mass media influence environmental behaviour.

**CALENDAR NOTES:** MGMT classes cross-listed with ENVI graduate classes require approval from the School for Resource and Environmental Studies

**CROSSLISTED:** ENVI 5041
MGMT 4047 Biodiversity Conservation System Design
CREDIT HOURS: 3
Biodiversity conservation systems are increasingly necessary as human activities dominate the landscape, seascape, and freshwater ecosystems. Precise prescriptions for conservation design are evolving. The theory and practice of conservation system design are explored through lectures, student presentations, discussions, and exercises, as an active learning module involving the students, the instructor, and the broader community. Topics include representation of ecological systems, focal species, population viability, habitat suitability, landscape ecology, connectivity, road ecology, and planning for species shifts in response to climate change.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from the School for Resource and Environmental Studies.
CROSSLISTED: ENVI 5047.03

MGMT 4050 Directed Reading and Research
CREDIT HOURS: 3
This course offers the student the opportunity to explore in greater detail a particular area of interest. The content of the course is negotiated with the individual instructor involved. The student and instructor must develop a proposal, and submit it to the Program Committee for approval. Guidelines are available from the Bachelor of Management Program Administrator.

MGMT 4125 Conflict Negotiation & Sustainability
CREDIT HOURS: 3
This course looks at local and global conflicts driven by climate, politics, resource extraction, land use, and development. The course offers preparatory lectures followed by team-based simulated negotiations. Students learn techniques related to de-escalation, negotiation, and debate tactics, through assuming and advocating various stakeholders’ perspectives.
CROSSLISTED: SUST 4125.03, PLAN 4125.03
RESTRICTIONS: Must be third year status or above
EXCLUSIONS: PLAN 6125.03
FORMATS: Lecture | Discussion

MGMT 4205 Law and Policy for Resource and Environmental Management
CREDIT HOURS: 3
This course provides students with an overview of substantive and procedural aspects of Canadian law and policy related to natural resources and the environment. The course will involve lectures, guest speakers, seminar discussions, and class participation. Strong emphasis is placed on the Canadian legislative and regulatory frameworks and the unique character of the regulated subject areas such as toxic substances, air and water quality, fisheries, forests, agriculture, minerals, parks, and biodiversity. The role of the common law in preventing or redressing environmental degradation will also be addressed.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from Environmental Studies.
CROSSLISTED: ENVI 5205.03

MGMT 4300 Government Info Resources
CREDIT HOURS: 3
This course will examine the ways in which various levels of government structure organize, produce, and disseminate information for a range of internal and external purposes. The emphasis will be on growing digital resources and approaches for accessing these types of material. There will be a focus on Canadian content with additional consideration of American, British, foreign, and international resources, including specialized agencies such as the United Nations. The course will include a practical perspective for those seeking employment working with government information resources at provincial and/or federal levels.
CALENDAR NOTES: MGMT classes cross-listed with INFO graduate classes are restricted and require approval from the School of Information Management.
PREREQUISITES: INFO 5530.03 (recommended)
CROSSLISTED: INFO 6300.03
RESTRICTIONS: MI, MI/JD, MI/MPA, MI/MREM

MGMT 4333 Project Management
CREDIT HOURS: 3
Many organizations in the private sector and the public sector are now using projects as tools to implement and achieve strategic goals, to innovate and to respond to customers changing needs. This course will introduce students to the management of project portfolio, the project management methodology, the cross-cultural leadership skills, the concepts, the tools, and techniques required to successfully manage a project. In this course, a practical and hands-on approach is used and involves several experiential exercises enabling the students to build an expertise in the process of managing projects.
PREREQUISITES: MGMT 3501.03 or COMM 3501.03
CROSSLISTED: COMM 4523.03
MGMT 4340 Corporate Governance
CREDIT HOURS: 3
The central focus of corporate governance is the relationship between the top management team (TMT), the board of directors (BoD), and other stakeholders, especially stockholders. The collapse of once successful, large corporations across the globe illustrates the prankishness of their board members and the degree of their lack of concern for stockholders' interests. The reputation of audit and consulting companies associated with these ill-fated corporations suffered a great setback, leaving stakeholders wondering whom to trust to safeguard their interests. Students will take an in-depth look at the corporate governance triad, as indicated above, that controls the modern corporation. Accordingly, this course will deal with the control, composition, functions, roles, and structure of boards; board responsibility and accountability; CEO tenure and compensation, shareholder and other stakeholder representation; corporate board’s vis-à-vis social responsibility and ethics; and comparative corporate governance across North America, Europe, and selected Asian countries.
PREREQUISITES: MGMT 4001.03 or MGMT 4003.03
CROSSLISTED: COMM 4340.03
EXCLUSIONS: BUSI 6315.03
FORMATS: Lecture

MGMT 4370 Records Management
CREDIT HOURS: 3
A comprehensive introduction to the field of records and information management. Topics covered include: records creation, evaluation, maintenance and control; issues relating to the maintenance, storage and disposition of records; and electronic records management.
CALENDAR NOTES: MGMT classes cross-listed with INFO graduate classes require approval from the School of Information Management
PREREQUISITES: INFO 5515.03 (MI) or MGMT 5502.03 (MIM)
CROSSLISTED: MGMT 5012.03, INFO 6370.03

MGMT 4500 Socio-political Dimensions of Resource and Environmental Management
CREDIT HOURS: 3
The goal of this course is to introduce students to the social, cultural, and political dimensions regarding resource and environmental management. Key objectives are to introduce, analyze, and utilize a range of frameworks for understanding the human dynamics of resource and environmental management decision-making. Because this course is integrated with ENVI5205 (biophysical dimensions of resource and environmental management) and ENVI5505 (law/policy dimensions of resource and environmental management) in the same term as required for the MREM program, there is a focus on common case studies to demonstrate the interconnectedness of these dimensions. Student groups in this course undertake in-depth investigation of the socio-political elements of resource and environmental management cases in Atlantic Canada.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from the School for Resource and Environmental Studies.
CROSSLISTED: ENVI 5500.03

MGMT 4504 Management of Resources and the Environment
CREDIT HOURS: 3
Students explore key management concepts applied in managing natural resources and the environment. Topics include management paradigms, systems, principles, approaches, tools and institutions associated with a wide range of sectors such as fisheries, forests, agriculture, the coastal zone, oceans, parks and protected areas, energy, water, and others. Case studies complement lectures, seminars and field trips.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from Environmental Studies.
CROSSLISTED: ENVI 5504.03

MGMT 4505 Biophysical Dimensions of Resource and Environmental Management
CREDIT HOURS: 3
This course will introduce students to techniques and tools employed in natural resource and environmental management programs and projects and engage students in case-based problem solving learning intended to understand how biophysical information is utilized in assessing resource and environmental issues and contributing to effective decision-making. Some of the tools that will be reviewed are environmental impact assessment, environmental site assessment, life cycle analysis, environmental monitoring and adaptive environmental assessment and management.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from Environmental Studies.
CROSSLISTED: ENVI 5505.03

MGMT 4507 Environmental Informatics
CREDIT HOURS: 3
This course introduces students to geospatial information management, including the nature of geospatial data; access, representation, and communication of data and information; and relevant tools and materials such as census data, spreadsheets, and geographic information systems. Special topics may include privacy, health, citizen science, or the humanities.
CALENDAR NOTES: MGMT classes cross-listed with ENVI graduate classes require approval from Environmental Studies.
EXCLUSIONS: ENVI 5507.03, INFO 6681.03
FORMATS: Lecture | Lab | Discussion

**MGMT 4540 Database Management Systems**
CREDIT HOURS: 3
Introduces the theory and practice of managing data, covering technology-driven solutions to the challenges of storing, curating, and retrieving unstructured, semi-structured, and structured data. Topics include: tabular data, assessing data management requirements, data models and schemas, relational database management systems, SQL, post-relational DBMSs, Big Data, and visualization.
CALENDAR NOTES: MGMT classes cross-listed with INFO graduate classes require approval from the School of Information Management
PREREQUISITES: IT Competencies listed in Admission Requirements
CROSSLISTED: INFO 6540.03, BUSI 6516.03

**MGMT 4611 Information Policy**
CREDIT HOURS: 3
Explores, in a graduate seminar setting, a range of issues currently facing information professionals and the effect of these issues on policy development. Discusses the roles of all levels of government, the private and not-for-profit sectors, and key individuals in developing policies which affect information creation, control, access, and use. Focuses on Canadian issues, and includes international affairs as appropriate to the information society.
EXCLUSIONS: INFO 6610.03

**MGMT 4620 Web Design and Architecture**
CREDIT HOURS: 3
Examines the theories, techniques and processes used to create, structure, and deliver electronic text. Topics include: writing and design for the web, information architecture, and document analysis for digitization. Focuses on practical experience with HTML and CSS, TEI standards, XML, and XSLT.
CALENDAR NOTES: MGMT classes cross-listed with INFO graduate classes require approval from the School of Information Management
CROSSLISTED: INFO 6620

**MGMT 4681 Geospatial Info Management**
CREDIT HOURS: 3
Spatial information is the air and water that makes mapping and spatial analysis possible. Mobile applications using maps are some of the most popular and often used web-based applications; they are also cloud based which added another layer of management issues. Maps, GIS and the use of spatial information have never been more popular or public. This course addresses the effective management of spatial information. The course covers principles and practices associated with metadata, GIS, licensing, spatial information databases, map libraries and archives, spatial data infrastructures and web-based delivery of products and services, as well as distributed systems such as geolibraries, “digital earth” and the development of the “spatial cloud”. This course is geared towards the manager who seeks to deploy services associated with spatial information and effectively develop an enterprise approach to managing spatial information. The course will also provide hands-on experience in using GIS and related technologies so as to be able to better understand how to deploy services, especially over the web.
CALENDAR NOTES: NOTE: MGMT classes cross listed with INFO graduate classes are restricted and require approval from the School of Information Management.
CROSSLISTED: INFO 6681.03

**MGMT 4705 Environmental Impact Assessment**
CREDIT HOURS: 3
Students explore all aspects of environmental impact assessment (IA) from scientific, legal, and political dimensions, with a focus on Canadian IA projects and regulations. The course explores the procedural dimensions of IA, such as law creation and Indigenous consultation, as well as substantive dimensions of IA, such as biophysical impacts to marine and terrestrial systems, gender-based impacts, economic impacts, and more. Students will learn the materials through seminars (including guest lectures from experts), seminars and research papers, with the option of participating in concurrent real-world IA processes.
CROSSLISTED: ENVI 5001.03

**MGMT 4895 Internship Prep Seminar**
CREDIT HOURS: 0
Upon acceptance into the Bachelor of Management Optional Internship Program (Winter Term), students must register for MGMT 4895 for the Fall Term. This course is designed to introduce internship students to aspects of career development and preparation for their internship experience. Students apply to the Internship Program through Management Career Services in their second year.
CALENDAR NOTES: This course is a Pass/Fail course and carries zero credit hours. Details on the Bachelor of Management Internship Program are available at www.dal.ca/mcs/internship
FORMATS: Seminar
MGMT 4896 Management Internship  
CREDIT HOURS: 3  
The optional internship will take place between academic year 3 and the final academic year. It is designed to offer the opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.  
CALENDAR NOTES: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree.  
PREREQUISITES: Successful completion of 12 Core MGMT courses in addition to MGMT 3602 (Professional Communication Skills) and MGMT 4895 (Internship Prep Seminar)  

MGMT 4897 Management Internship  
CREDIT HOURS: 3  
The optional internship will take place between academic year 3 and the final academic year. It is designed to offer the opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.  
CALENDAR NOTES: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree.  
PREREQUISITES: Successful completion of 12 Core MGMT courses in addition to MGMT 3602 (Professional Communication Skills) and MGMT 4895 (Internship Prep Seminar)  

MGMT 4898 Management Internship  
CREDIT HOURS: 0  
The optional internship will take place between academic year 3 and the final academic year. It is designed to offer the opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.  
CALENDAR NOTES: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree.  
PREREQUISITES: Successful completion of 12 Core MGMT courses in addition to MGMT 3602 (Professional Communication Skills) and MGMT 4895 (Internship Prep Seminar)  

MGMT 4901 Applied Entrepreneurship and Innovation  
CREDIT HOURS: 3  
MGMT 4901 is the capstone undergraduate course in Entrepreneurship and Innovation. Linking theory and practice, students will practice learnings from prerequisite courses, while enhancing their understanding through an instructor led project. Working in groups, students will progress through an innovation management process consisting of secondary research, primary research, design thinking, refinement and implementation. As concepts are refined, students will work to establish the feasibility of their business model. This course will challenge students to identify opportunities; develop innovative concepts and manage the process for successful entrepreneurial outcomes. Students will learn how to manage innovation projects for both individual and corporate entrepreneurship. This course is a demanding, yet rewarding experience.  
PREREQUISITES: MGMT 3907.03 or COMM 3307.03  
CROSSLISTED: COMM 4301.03

About Us  
At the Faculty of Open Learning & Career Development, we offer more than 500 courses that can be taken individually or as part of a certificate. We are focused on offering courses that support you in that next step in your career or academic journey. If you’re preparing for entry into a degree program or applying for a new job, we have courses to get you ready.
Our Guiding Light
At the Faculty of Open Learning & Career Development, every day is guided by our commitment to facilitate transformative learner-focused journeys for an evolving world.

Our Values
Woven throughout our work across the Faculty are our four key values:

- Pursuing being better through constant learning
- Working collaboratively to anticipate and respond to community needs
- Committing to action and holding ourselves accountable
- Demonstrating accessibility and inclusion in everything we do

Our Areas of Focus
Supported by our values and our guiding light, the Faculty will be sharply focused on three main areas of growth and refinement:

- Providing a superior learning experience
- Thriving financially
- Continuously improving our internal and external user experiences

Staff

Dean
Tyers, D., MA (Queensland), MBA (Western), PhD (Toronto)

Associate Professors
Doyle-Bedwell, P., BA (Hons), JD, LLM (Dalhousie)

University Teaching Fellow
Saney, I., BA, MA, J.D., PhD

Senior Instructor
Farrimond, M., MA (Hons.), PGCE, MA, PhD

Adult Learning & Teaching

Meet the challenges of today’s learning environment with our adult learning and teaching program. Whether you’re currently working as an educator or are looking to expand your knowledge of the field, our courses will help expand and strengthen your skills.

Certificates

Adult Learning Fundamentals

This five-course certificate enables learners to confidently and competently design and facilitate learning experiences in various contexts. Learners will explore foundational theories and principles of adult learning, reflect on questions of diversity and inclusion, examine the stages of program design, identify appropriate instructional methods for a given context, and practice their facilitation skills.

Courses

- Theories of Adult Learning
- Understanding Diversity and Inclusion
- Program Design
- Instructional Methods
- Effective Facilitation
Advanced Certificate in Adult Learning and Teaching

To enrol in this certificate, you must first complete the Certificate in Adult Learning Fundamentals. Three additional electives are required in order to achieve the Advanced Certificate in Adult Learning and Teaching.

You may choose three of the following courses:

- Neurodiversity and Mental Health in the Workplace and Community
- Mindfulness at Work
- Designing and Teaching Online
- Indigenous Teaching and Learning Perspectives
- Understanding EDI: An Organization Imperative
- Inclusive Communications in the Workplace
- Optimizing Diverse Team Performance
- Strategies for Implementing EDI Initiatives

Standalone Courses & Workshops

Train the Trainer (Two Options Available: Online Workshop or Self-Paced)
In this course, you will build skills and confidence in designing and delivering dynamic, interactive, and effective training sessions.

Online Design and Delivery (Self-paced)
In this self-paced, 8-hour course, you will learn how to move teaching content online or develop new online courses.

Interrupting Unconscious Bias (Self-paced)
In this self-paced, 12-hour course, you will look inwards and dig deep into your beliefs. By bringing them to the forefront, you can explore the ways in which your biases impact your interactions with others.

Workplace Diversity and Inclusion
In this 36-hour course, you will explore the concepts of diversity and inclusion, reflect on your own lived experience, and draw connections between diversity and inclusion and the success of businesses and their employees. Content is asynchronous with weekly live sessions.

Business Operations & Management
Effective operations and process management can dramatically increase productivity within a business. Learn how to improve your planning, strategy, and day-to-day production.

Certificates

Leadership Excellence
This certificate is offered fully online and is issued in partnership with the Business Excellence Institute, an international organization specializing in leadership and strategy. It provides a robust foundation for current and aspiring leaders to develop an authentic, flexible and adaptable leadership style for today’s complex, dynamic organizations and landscapes. Take one course or more to upskill your leadership competencies and build confidence in your leadership capabilities.

Required Courses:

- Leadership Dynamics
- Ethics in Action
- Mastering Strategy

Business Management
This certificate is offered fully online, with three required courses and three elective choices. The practical focus of the courses help you develop a knowledge base and a range of strategies and skills to manage effectively and successfully in complex, dynamic organizational contexts, including for-profit and non-profit environments. It can be completed over several years, depending upon how many courses you take each term and year.

Required Courses:
Human Resource Management
This certificate is offered fully online, with three required courses and three or more elective choices. The practical focus of the courses in this certificate equips you with a knowledge base and a range of strategies and skills to manage your organization's greatest asset -- its people -- responsively, fairly and consistently. The certificate can be completed over several years, depending upon how many courses you take each term and year.

Required Courses:

- Human Resources Management
- Organizational Behavior
- Interpersonal & Intercultural Communication

Choose three of the following electives:

- Coaching Skills for Leaders
- Negotiation and Conflict Resolution
- Train the Trainer
- Workplace Diversity and Inclusion
- Leadership Dynamics
- Mastering Strategy
- Business Law Essentials for Leaders
- Strategic Public Communications: Building Impact & Influence
- Ethics in Action
- Neurodiversity and Mental Health in the Workplace and Community
- Mindfulness at Work
- Theory of Total Health and Wellness
- Developing a Game Plan for a Total Health and Wellness Strategy
- Foundations of Positive Psychology

Business Analysis
Our certificate program will equip you with the analytical skill set required for gathering, validating, communicating, documenting, and testing business requirements as well as the effective development and implementation of business processes. To earn the certificate, you must complete three required courses and one elective within four years of your start date.

Required Courses:

- Enterprise and Strategic Analysis
- Business Analysis: Planning and Communication
- Business Requirements: Elicitation, Documentation and Analysis

Choose one of the following electives:

- Technical Writing Essentials
- Project Management Essentials

Choose three of the following electives:

- Principles of Marketing
- Strategic Public Communications: Building Impact & Influence
- Microeconomic Decision-Making for Leaders
- Business Law Essentials for Leaders
- Critical Thinking, Decision-Making and Problem-Solving for Leaders
- Project Management Essentials
- Finance Essentials for Private Sector Leaders

Choose one of the following electives:

- Coaching Skills for Leaders
- Negotiation and Conflict Resolution
- Train the Trainer
- Workplace Diversity and Inclusion
- Leadership Dynamics
- Mastering Strategy
- Business Law Essentials for Leaders
- Strategic Public Communications: Building Impact & Influence
- Ethics in Action
- Neurodiversity and Mental Health in the Workplace and Community
- Mindfulness at Work
- Theory of Total Health and Wellness
- Developing a Game Plan for a Total Health and Wellness Strategy
- Foundations of Positive Psychology

Choose one of the following electives:

- Technical Writing Essentials
- Project Management Essentials
- Certified Agile Project Management

**Project Management**
In consultation with the PMBOK 7, this certificate is ideal for those who are relatively new to the world of project management as well as for those with project management experience who wish to consolidate and advance their skills and knowledge.

**Required Courses:**
- Project Management Essentials
- Engaging Stakeholders: Communication Strategies for Managing Expectations
- Tracking and Forecasting Progress: Budgets, Baselines and Timelines
- Being Agile: Understanding the Agile Mindset and Team Dynamics
- Doing Agile: Understanding Agile Processes
- Strategies for Effectively Leading Through Change
- Managing Uncertainty & Opportunities: Project Risk Management
- Project Management Principles
- Choosing the Right Approach

**Customized Lean Six Sigma Offerings**
We are pleased to offer this custom three-course *Certificate in Lean Six Sigma*, which will provide you with an advanced set of quality tools to be applied in a structured way to improve your organization’s processes and the services or products produced by those processes. For more information, please contact openlearning@dal.ca.

**Courses:**
- Lean Six Sigma: DMAIC, Define Phase, and Organization Deployment
- Lean Six Sigma: Measure Phase and Value Stream Analysis
- Lean Six Sigma: Analyze (Part II), Improve, and Control

**Courses & Certification**
We offer a range of courses you can take individually without enrolling in a certificate.

**Strategic Public Communications: Building Impact & Influence**
Study the foundational elements of public communications and its many facets. You'll cover everything from employee communication to media relations, to the changing nature of public communications in a digital landscape.

**Change Management Foundation Plus Practitioner (CMP) Certification**
This Change Management course will prepare you to challenge two certification programs available through APMG International. It will provide practical knowledge on change management techniques, as well as the Foundation™ and Practitioner™ certifications (two exams and two certifications both included in the cost). In order to obtain your Change Management Professional (CMP) designation, you must successfully pass both exams.

**Corporate Social Responsibility**
Learn about the exciting world of Corporate Social Responsibility (CSR) and the sustainable frameworks used by the world’s largest tech, telecommunications, manufacturing, retail and mining companies.

**Economics for Business**
This course is designed for non-economics majors to learn about fundamental economic principles through thoughtful and engaging scenarios that we encounter every day, such as Taylor Swift’s decision to forgo school and Uber’s surge pricing to better understand how limited resources drive the decision-making process.

**Business Law Essentials for Leaders**
This 12-week course will give you practical knowledge that can be used in the business world. The course covers topics such as: contract law, negligence, legislation applicable to the workplace, employment law, setting up a business, intellectual property and electronic commerce.

**Principles of Marketing**
This 12-week course will teach you how to write a marketing plan from start to finish. Learn what makes marketing a critical activity in business growth by exploring the broad principles and practices of marketing from a practical perspective.
PMP® Exam Preparation
This 4-week course is specifically designed to provide participants with a proven, practical approach to preparing for the Project Management Professional (PMP®) Certification Exam from the Project Management Institute (PMI). The course is delivered by trainers who have had extensive experience in professional project management and a long history of successfully preparing people for the PMP® exam.

Project Management Essentials
This 4-week, online course provides new project managers and project team members the essential tools they need to deliver successful projects. It consists of four weeks of self-directed, online learning, including four online live sessions.

Technical Writing Essentials
This four-week, online course provides you with the tools to communicate complex and technical projects in clearer and simpler ways. You will discover communication strengths and learn how to build on them to become a more capable, confident writer.

Career Essentials
Don't miss out on our hottest courses in leadership, organizational behaviour, and other essential skills.

Courses Not To Miss

Strategic Public Communications: Building Impact & Influence
This course examines the foundational elements of communication and its many facets. You'll cover everything from employee communication to media relations, to the changing nature of communication in a digital landscape.

Business Law Essentials for Leaders
This course is designed to provide participants with practical knowledge that can be used in the business world. The course covers topics such as: contract law, negligence, legislation applicable to the workplace, employment law, setting up a business, intellectual property and electronic commerce.

Coaching Skills for Leaders
Throughout your learning journey in this course you will gain knowledge of theory, you will be asked to apply that knowledge in a specific leadership context, and you will be offered the opportunity to practice.

Critical Thinking, Decision-Making and Problem-Solving for Leaders
The course is a practical introduction to critical thinking, decision-making and problem-solving as needed for leaders in today’s complex and rapidly changing contexts.

Ethics in Action
This highly interactive course includes journaling, teamwork, and online discussions to enable active learning. It requires deep thinking in order to help you become consciously aware of and articulate clearly about ethics.

Finance Essentials for Public Sector Leaders
The course will teach you to interpret and apply financial information for short, medium and long-term decisions. The course is practical, using case studies to explore the financial information of different types of real organizations.

Human Resources Management
This course will introduce contemporary human resources (HR) practices. Human resources have become critical to organizational, team and individual successes.

Interpersonal and Intercultural Communication
This 12-week course brings together the best theories and practices of communication between people in society.

Leadership Dynamics
This course will challenge you to question your fundamental assumptions, beliefs, and values regarding leading people. You will be asked to look closely at who you are as a leader today, and who you would like to become in the future.

Mastering Strategy
This course has been designed to have you learn both about strategy and how to be strategic, providing learners with the knowledge needed to understand strategy as well as the opportunity to build the skills and competencies required to leverage this understanding.

Microeconomic Decision-Making for Leaders
This course is designed for non-economics majors to learn about fundamental economic principles through thoughtful and engaging scenarios that we encounter every day.
Organizational Behaviour

In this course, students explore frameworks used to study and predict what people think, feel and do in and around organizations.

Customized Training

Do you have a team in need of custom training?

Consider a solution from Dalhousie carefully crafted around your organization’s needs. We will actively listen, consult with industry professionals, and pull in the most current market research to make sure you and your team get the training you're looking for.

Why Choose Us?

- We offer world-renowned expertise in a wide range of areas.
- We provide customized training solutions to meet your unique needs.
- We ensure flexible program delivery that can be online or in-person.

DalOpen

A new way to learn at Dalhousie University

Earn an academic credit anytime and anywhere with courses that give you the flexibility to study on a schedule that fits your life.

Accessible, flexible and convenient

- Take a course for fun, for professional development, or just to try out university education.
- Learn when it's best for you and at your own pace.
- Enjoy the same learning experience as regular Dalhousie students.
- Avoid registration frustration – it takes just a few minutes to enroll in a course.
- Receive an official transcript and academic credit that can be applied towards the requirements of a degree program.

Data, Risk & Emerging Technologies

The development of new technologies is expected to change the world as we know it. Learn how to adopt emerging technologies and navigate new risks around data privacy.

Certificates

Blockchain, Bitcoin and Cryptocurrency

This technology spans many industries from banking to healthcare, entertainment, supply chain management and more. Get trained in blockchain and cryptocurrency with our certificate program that includes three 6-week courses that can be taken individually.

Courses:

- Introduction to Blockchain, Bitcoin, and Cryptocurrency
- Introduction to Blockchain Platforms, Cryptocurrencies and the Digital Economy
- The Future of Blockchain: Challenges, Opportunities and Introduction to Blockchain Use Cases

JavaScript Coding Fundamentals: Preparing for Professional Engagements

Develop JavaScript coding skills and cultivate good programming practices that are transferable to other software development languages and environments. Connecting real-world examples to coding theory, this certificate will provide a solid skills foundation for participants interested in developing JavaScript programs in professional environments.

Courses:

- JavaScript Coding 1: Building Foundational Skills
- JavaScript Coding 2: Developing Software of Medium
Sustainable Energy Technologies
As the world fights the effects of the climate crisis, let’s embrace renewable energy, smart cities and the clean technologies that are shaping our future. Taking three 6-week courses, you’ll learn how energy systems work, where they can be successfully deployed, the economic implications, policy directions, and how they will integrate with the Internet of Things (IoT).

Courses:
- Energy Fundamentals
- Wind Energy Developers
- Solar Energy Developers

Standalone Course

Corporate Social Responsibility
A fully asynchronous, 42-hour course that will teach you what Corporate Social Responsibility (CSR) is and the growing importance and expectations of corporate citizenship. You will learn about responsible investing, sustainability reporting, benchmarking performance and what factors to consider when creating a CSR that will work for your organization.

English Language Studies
We offer a range of English language programs accredited by Languages Canada and designed for students and professionals at all levels of proficiency.

We also offer professional development for teachers and faculty in English-medium instruction, language education, and internationalization.

Explore our programs and courses designed for Students and for Professionals and Educators.

For Students
We offer a wide range of English Language Studies programs, online and face-to-face, accredited by Languages Canada and designed for students at all levels of their English language learning.

Our programs focus on developing the English skills needed for success in university. Improve academic reading, writing, speaking and listening skills while also learning how to do research and gaining an introduction to Canadian academic culture.

English for Academic Purposes
EAP could be right for you if you're planning to take a bachelor's, master's or doctorate, if you've been conditionally accepted to an academic program, but do not meet English language requirements, or if you want to improve your English language skills.

Online and face-to-face delivery options are available.

English in Canada
We offer the four-week English in Canada program in person. This four-week program is available in February, June, July and August, and uniquely combines English language study with university courses in different subject areas.

We are planning to offer this face-to-face in 2022.

Applied Language Courses

For Professionals and Educators
Gain an international perspective, build intercultural competence, and boost your employability by studying online with us.

This is your opportunity to invest in your future, gain competitive advantages by improving English proficiency, learn about Canadian academic culture and receive an official certificate and transcript from the Faculty of Open Learning & Career Development.

Certificate in English-Medium Instruction
This four-course certificate will help you improve teaching and learning in an English-Medium Instruction (EMI) context by developing knowledge of Content and Language Integrated Learning (CLIL) theory and strategies.

Online delivery is available.

**Professional Development Courses**
The Department of English Language Studies will be introducing courses for people who are involved in internationalization of the curriculum initiatives. The courses are all offered in English and one is offered in both English and Spanish.

All courses are 20 hours each and are fully online. All of these courses can be customized for cohorts or groups.

**Leadership of Internationalization of the Curriculum Initiatives**
You will focus on practical leadership and implementation of the theoretical and pedagogical principles driving such aspects of internationalization of the curriculum as English-medium instruction, internationalization at home, and teaching and learning in diverse classrooms.

**Innovación pedagógica en contextos de internacionalización**
Este curso tiene como objetivo apoyar a los docentes universitarios a capitalizar las diversas formas de diversidad —cultural, lingüística, de género, regional, entre otras— para incrementar el aprendizaje de los estudiantes.

**Pedagogical Innovation in Context of Internationalization**
In this course, you will learn about supporting university academic staff to capitalize on the various forms of diversity—cultural, linguistic, gender, regional, amongst others—to increase student learning.

**Leading Professional Learning in International Higher Education**
In this train the trainer course, you will develop your capacity to design and lead effective, dynamic peer training programs to support internationalization of the curriculum or EMI at their institution.

**Equity, Diversity and Inclusion**
There are many faces, perspectives and histories reflected in our workplaces and in our communities. Explore our courses to uncover new ways to see and understand the world, your peers, your community, and yourself.

**Certificate**

**Equity, Diversity and Inclusion**
This explores the struggles organizations face in achieving equity, inclusion, and harmonious environments. Through participation in the certificate, learners will explore ways to create safe spaces to engage in real dialogue, policies around fairness, respect and civility, and strategies for navigating sensitive issues related to diversity and inclusion.

**Required courses:**
Understanding EDI: An Organization Imperative
Inclusive Communications in the Workplace
Optimizing Diverse Team Performance
Strategies for Implementing EDI Initiatives
Standalone Courses

**Foundations of Diversity, Equity and Inclusion in the Workplace**
This eight-hour course will help you build knowledge on the topics of equity, diversity and inclusion. You will develop skills, confidence and the capacity to make intentional changes in your workplace communication. Learners will earn a microcredential in Inclusive Communication Strategies.

**Workplace Diversity & Inclusion**
In this 12-week course, you will explore the concepts of diversity and inclusion, reflect on your own lived experience, and draw connections between diversity and inclusion and the success of businesses and their employees.

**Interrupting Unconscious Bias**
This 12-hour course can be taken at your own pace. It will have you looking inwards and digging deep into your beliefs, bringing them to the forefront so you can explore the ways in which your biases impact how you interact with others.

**Understanding Diversity and Inclusion**
Participants in this course will spend time discovering insights into their own values, beliefs, and behaviours with respect to diversity. The intention is that participants will examine diversity in adult education and develop competencies to integrate diversity into their practice.

**Neurodiversity and Mental Health in the Workplace and Community**
This four-week course will teach you what you need to know about mental health from the patient's perspective as it pertains to the workplace and the psychiatric institution, and what you need to know about barriers for people with learning disabilities.

**Health & Wellness**
A healthy organization is made up of healthy individuals. Positive mental health and well-being can help everyone cope with challenges and improve focus and productivity at work. Learning strategies to sustain and improve your own mental health, in addition to those that you interact with on a regular basis, will create a healthier environment for all to flourish. Through our certificates and courses, you will learn new skills and perspectives to guide you and your organization through everyday challenges, as well as those that go beyond the ordinary.

Certificates

**Certificate in Developing Organizational Health and Wellness Strategies**
Have you been tasked with creating a wellness plan for your organization that goes beyond the occasional fun activity or fitness challenge? This certificate is offered fully online in partnership with Vendura Wellness, a company setting the industry standard for workplace health and wellness. By taking this five-course certificate, you will learn how to use an innovative, multidisciplinary, evidence-based approach to enact sustainable and holistic change in your workplace. Upon completion of the certificate, you will have a well-defined *Total Health and Wellness Plan* that will help create an environment in which employees are physically, mentally and psychologically thriving, leading to a healthier organization overall. Each of the five online courses requires approximately 15 learner hours.

**Required Courses:**
- Theory of Total Health and Wellness
- Developing a Game Plan for a Total Health and Wellness Strategy
- Key Components in a Total Health and Wellness Plan
- Building and Buy-in for Your Total Health and Wellness Plan
- Appraising Your Total Health and Wellness Plan

**Building Positive Workplace Cultures**
Do you want to influence how your workplace looks and feels by developing a more positive culture? This certificate will empower participants to uncover ways to enhance their workplace relationships using the principles of Positive Psychology. Learn how to become a “positive” leader through the implementation of positively strategic approaches. A positive lens has been demonstrated to foster confidence, promote enthusiasm and broaden resilience.

Using a scaffolding approach to the required courses, learners will explore how Positive Psychology can help optimize self, others, and entire organizations. When we want to influence change in any setting, we must first start with a clear awareness of our own contributions and presence. The certificate has been designed to foster the exploration of these principles as they relate to ourselves, our relationships with others, and finally with our workplaces.
Upon completion of this certificate, you will have a “positive plan” to use in your professional, as well as your personal life. Each of the four required courses requires approximately 15 learner hours. An elective course must also be taken.

**Required courses:**

- Foundations of Positive Psychology
- Application of Positive Psychology Principles for Self-Care
- Application of Positive Psychology Principles to Influence Others
- Adaptation of Positive Psychology Principles in Policies and Procedures

Choose one of the following electives:

- Neurodiversity and Mental Health in the Workplace and Community
- Mindfulness at Work
- Theory of Total Health and Wellness
- Leadership Dynamics
- Coaching Skills for Leaders
- Understanding EDI: An Organization Imperative
- Inclusive Communications in the Workplace
- Optimizing Diverse Team Performance
- Organizational Behaviour

**Ergonomic Program Management**
If you are responsible for an occupational health and safety program or the creation and management of an ergonomics program for your company or organization, this certificate is for you. You will learn how to develop an ergonomic program appropriate for your workplace, identify risk factors, and assess its effectiveness at your place of work.

**Required Courses:**

- Ergonomics in the Workplace
- Office Ergonomics and Workplace Design
- Industrial Ergonomics and Workplace Design (100% Online)
- Ergonomic Program Design and Integration

**Courses**

**Neurodiversity and Mental Health in the Workplace and Community**
This 15-hour course will help you to see the talents and opportunities, and not just the challenges, that the neurodiverse and those with a mental health history can bring to the workplace. Learn about mental health from the patient’s perspective and about barriers for people with learning disabilities.

**Mindfulness at Work**
This 15-hour course provides sustainable techniques and practices to reduce your stress levels, refocus your attention, and increase your productivity in your professional, as well as your personal life. If you have tried some form of mindfulness practice before but have given up because it was “too hard,” consider this course - it's different.

**Professional Designations & Accreditations**
We offer a range of credentials and certifications that can help you move up in your career.

**Career Practitioners**

**Certificate of Professional and Leadership Studies in Career Development**
This certificate has been designed in partnership with the *Nova Scotia Career Development Association (NSCDA).* It provides an opportunity for both new and experienced practitioners to deepen and refresh their knowledge, in line with the Career Development Professional (CDP) Canadian Competency Framework (2021) from the Canadian Career Development Foundation (CCDF). Participants emerge with the knowledge, skills, and confidence to manage effective employment services for a wide range of clients and employers.

**Required courses:**
Career Transition Management
Theories, Models & Strategies for Career Development
Career Decision-Making
Supporting Career Searches
Workplace Diversity and Inclusion

And one of the following advanced skill courses:

- Supporting Career Practice for Employers
- Supporting Military Members in Career Transition
- Supporting Career Goals for Individuals with Disabilities & Diverse Needs
- Supporting Career Goals for Indigenous Clients & Communities

Certified Employee Benefit Specialist
The CEBS program offers three highly renowned designations in Canada covering all aspects of benefits and pensions:

- CEBS (Certified Employee Benefit Specialist) - The premier designation in benefits and pensions, considered the standard of excellence in the industry
- GBA (Group Benefits Associate) - a specialty designation focusing on life and health care and other group benefits
- RPA (Retirement Plans Associate) - a specialty designation focusing on all aspects of retirement plans

CEBS features a unique partnership with leading academic institutions. In Canada, the International Foundation shares the honour with Dalhousie University in Halifax, Nova Scotia. In the U.S., CEBS is cosponsored by the International Foundation and the Wharton School of the University of Pennsylvania.

Each course requires successful completion of an exam. All courses can be self-studied. Optional online classes are also available. Contact our Student Services team for more information at openlearning@dal.ca.

Credit Union Institute of Canada Program
The success of credit unions has been due largely to the dedication and commitment to service excellence of credit union management and staff. In a rapidly changing financial services environment, providing service excellence to members rests increasingly on the ability of employees to learn new skills and keep pace with changes in the financial services industry.

Many credit unions are finding that the best way to keep pace with change is to encourage their staff to broaden their knowledge and skills through continuing education programs offered by the Credit Union Institute of Canada (CUIC). The CUIC provides credit union employees with a challenging curriculum of study aimed at enhancing their job skills. These programs provide greater job satisfaction, and open doors to new career opportunities within the credit union system.

What is the Credit Union Institute of Canada?
The CUIC is an independent, national, educational association which is part of CUSOURCE, a provider of development and learning systems to Canada’s credit unions. CUSOURCE is owned by the Canadian Credit Union Association. Established in 1972 and re-organized in 1990, the CCUA provides Canadian credit unions with professional development programs for their elected officials, management and staff.

Programs
The CUIC currently offers two professional studies programs that are co-sponsored by Dalhousie University’s Faculty of Open Learning & Career Development. Each program comprises a series of courses leading to a professional designation recognized throughout the credit union system. Some courses may be taken at approved colleges, universities, professional associations or other institutions. Others are offered directly through CCUA.

The Faculty of Open Learning & Career Development and CUIC jointly determine the academic content and standards of the programs. The CUIC oversees all administration. Professional designations for each program are awarded jointly by CUIC and the Faculty of Open Learning & Career Development.

General Studies Program (GSP)
The GSP is a nine-course program that provides a general overview of credit union administration and management. This program is suitable for entry-level, supervisory and middle-management employees. GSP graduates are awarded the professional designation,
"Fellow of the Credit Union Institute of Canada" (FCUIC). Introduced in July 1992, this program replaced the Canadian Credit Union Institute's longstanding Fellows' Program.

Management Studies Program (MSP)

The MSP is a twelve-course program that offers a mix of general and credit union-specific courses on credit union business management. This program is suitable for credit union employees in, or preparing for, middle- and upper-level management positions. MSP graduates are awarded the professional designation, "Associate of the Credit Union Institute of Canada" (ACUIC).

For more information, please contact our Student Services team at openlearning@dal.ca.

Fire Service Leadership

Today’s fire service needs leaders—professionals equipped to meet challenges and inspire change. Get what you need to step into a more advanced role through Dalhousie’s internationally recognized Fire Service Leadership Program.

Our courses build on your technical knowledge. You’ll develop administrative, leadership and critical thinking skills that will make an immediate difference to your job and career. You’ll be ready to navigate obstacles and create strategic plans to bring your organization into the future.

Dalhousie University has been a leader in fire service leadership and management development for more than 25 years. Offered 100% online, you’ll have access to leading experts and resources when and where it works best for you. Our program offers:

- access to experienced fire officials and experts
- actionable learning for immediate impact on your job
- the knowledge you need to take on more senior roles
- the courses required to gain professional certification

Certificates

Built for members of modern fire services, our certificates give you the knowledge and skills to get ahead in your profession.

- **Fire Service Leadership (Prerequisite to the Certificate in Fire Service Administration)**
  The Certificate in Fire Service Leadership (CFSL) provides fire service officers with opportunities to expand their knowledge of the fire service and add management education to their technical training. The CFSL has been offered across Canada since 1996. It is a prerequisite for the Certificate in Fire Service Administration (CFSA) and includes three required courses:
  - Station Officer: Dealing with People
  - Station Officer: Dealing with New Operations
  - The Environment of the Fire Station

- **Incident Command**
  The first course in this two-course certificate introduces research theory that attempts to explain how the size up is conducted through recognition-primed decision making. The second course introduces the more social and political aspects of incident command research and builds on the psychological aspects developed in the first course.
  - Theoretical Foundations of Incident Command: Thinking
  - Theoretical Foundations of Incident Command: Acting

- **Fire Service Administration**
  To obtain the Certificate in Fire Service Administration, students must complete nine courses (six required courses and three electives). Students are required to obtain some breadth of understanding in fire service administration.

Required Courses:

- Fire Department Human Resource Management
- Municipal Finance
- Fire Service Law
- Program Evaluation and Statistics
- Fire Service Strategic Planning I
- Fire Suppression Management OR Fire Prevention Management
Electives:

- Disaster Management and the Fire Department
- Emergency Medical Service Management and the Fire Department
- Fire Department Human Resource Management II
- Fire Service Strategic Planning II
- Municipal Government and Service Delivery
- Theoretical Foundations of Incident Command: Acting
- Theoretical Foundations of Incident Command: Thinking
- Coaching Skills for Leaders
- Leadership Dynamics
- Organizational Behaviour
- Negotiation and Conflict Resolution
- Advanced Certificate in Fire Service Administration

Choose three courses from the following list:

- Fire Prevention Management
- Emergency Medical Service Management and the Fire Department
- Theoretical Foundations of Incident Command: Thinking
- Fire Department Human Resource Management II
- Fire Suppression Management
- Municipal Government and Service Delivery
- Disaster Management and the Fire Department
- Negotiation and Conflict Resolution
- Interpersonal and Intercultural Communication

Concentrations for Fire Service Administration

The Certificate in Fire Service Administration: Emergency Management is an advanced Certificate that will focus on emergency and disaster management systems. Content includes building professional competency, a look at delivery models, and working in a Canadian context. One must complete three of the following electives in order to receive this concentration:

- Emergency Medical Service Management and the Fire Department
- Disaster Management and the Fire Department
- Theoretical Foundations of Incident Command: Acting
- Theoretical Foundations of Incident Command: Thinking

The Certificate in Fire Service Administration: Human Resource Management is an advanced Certificate that will identify human resource challenges faced by public organizations, discuss the importance of evaluating recruitment and other HR processes, and explain key features and benefits of mentoring and succession planning. One must complete these three electives in order to receive this concentration:

- Fire Department Human Resource Management II
- Negotiation and Conflict Resolution
- Coaching Skills for Leaders

The Certificate in Fire Service Administration: Operational Planning is an advanced Certificate that will focus on resources required for the effective management of a fire department, community engagement, and structured decision making. Content includes technical fire prevention planning, working with political leadership in a municipal context, and public relations in emergencies. One must complete three of the following electives in order to receive this concentration:

- Fire Suppression Management
- Fire Prevention Management
• Disaster Management and the Fire Department
• Emergency Medical Service Management and the Fire Department
• Negotiation and Conflict Resolution

The Certificate in Fire Service Administration: Strategic Planning is an advanced Certificate that will focus on big picture planning and issues management in a fire department context. Content includes a review of strategic planning models, identifying strengths and weakness of the internal environment, and creating applicable strategies for organizational success.

Required Course:

• Fire Service Strategic Planning II

Electives:

• Municipal Government and Service Delivery
• Disaster Management and the Fire Department
• Negotiation and Conflict Resolution

The Certificate in Fire Service Administration: Advanced Leadership will focus on identifying the characteristics of effective and ineffective leaders, applying leadership theory and strategy to a professional context and understanding cultural approaches to conflict in diverse settings. One must complete three of the following electives in order to receive this concentration:

• Leadership Dynamics
• Coaching Skills for Leaders
• Negotiation and Conflict Resolution
• Interpersonal & Intercultural Communication

After completing the Certificate in Fire Administration in one area of concentration, you can apply to the Advanced Certificate in Fire Service Administration by completing three additional courses from the options in this certificate. Email openlearning@dal.ca to request enrolment in this certificate.

• Advanced Certificate in Fire Service Administration

Choose three courses from the following list:

• Fire Prevention Management
• Emergency Medical Service Management and the Fire Department
• Theoretical Foundations of Incident Command: Thinking
• Fire Department Human Resource Management II
• Fire Suppression Management
• Municipal Government and Service Delivery
• Disaster Management and the Fire Department
• Negotiation and Conflict Resolution
• Interpersonal and Intercultural Communication

Certification

• Fire Officer III Accreditation Track

If you have obtained your Fire Officer II accreditation, you may apply for Fire Officer III Certification upon successful completion of 10 courses and by submitting the application. In order to qualify for Fire Officer III certification, students must receive at least 70% on each of the 10 courses taken for the certification. The program staff will then check your application for completeness. If gaps are found, you will be notified by Dalhousie University staff. Once your application has been approved, your request will be submitted to the Nova Scotia Fire Marshall’s office. After all requirements have been verified you will receive Fire Officer III Certification.
Required Courses:

- Station Officer: Dealing with People
- Station Officer: Dealing with New Operations
- The Environment of the Fire Station
- Fire Prevention Management
- Fire Department Human Resource Management I
- Municipal Finance
- Fire Service Strategic Planning I
- Organizational Behavior
- Fire Suppression Management

Electives (choose 1 course):

- Disaster Management and Fire Management
- Theoretical Foundations of Incident Command: Thinking

Fire Officer IV Accreditation Track
This four-course certificate will track completion of the following Dalhousie University Faculty of Open Learning & Career Development courses (or their *equivalent), at least one of which must have been taken in the fall 2013 term or later. All must have received a grade of 70% or higher.

Required Courses:

- Municipal Government and Service Delivery
- Fire Department Human Resource Management II
- Emergency Medical Service Management and the Fire Department
- Program Evaluation and Statistics

Local Government
Master the fundamentals of how local governments work and propel your community and career forward, whether you’re new to the municipal landscape or seeking to advance your current position. Our online certificate programs boost your confidence, broaden your knowledge of civic affairs, prepare you for professional designations, and—perhaps most importantly—equip you to better serve your community.

Certificates

- **Associate Certificate in Local Government**
  This associate certificate will be a prerequisite for all concentrations and is the entry-level certificate for the Local Government Program. On its own, it would be beneficial for those who work in the technical fields of local government to gain a working knowledge of the history, organization, challenges, and opportunities for local government.

- **Local Government Administration**
  Completion of this six-course certificate will enable students to better serve the needs of their municipal council, manage service delivery more efficiently, improve their opportunities for advancement and generally conduct themselves with a high degree of professionalism.

- **Law & Ethics (Concentration)**
  Gain an appreciation of the legal framework within which municipal government must operate and to help students understand when there is a need to seek the advice of a legal professional. It also includes a course on freedom of information and privacy foundations.

- **Financial Administration (Concentration)**
  Gain the foundational skills you need to budget and administer tax-payer funds wisely. This certificate can be completed in under two years and consists of six courses.
• **Citizen Engagement & Consultation (Concentration)**
  This certificate will provide an intellectual overview of why citizen engagement represents the foundation of democracy and how it can be implemented in a practical way in local government.

• **Community Economic Development (Concentration)**
  This certificate will equip students with the necessary skills and knowledge to provide leadership in community economic development within a local government setting.

• **Human Resource Administration (Concentration)**
  Learn how to make good hires and develop peak performance in your organization. Designing appropriate jobs, making good hires and developing peak performance is more likely when the municipality has someone dedicated to this effort that has the knowledge, skills and mandate to perform this function.

**Police Leadership**
The demanding schedule of police work can make professional development difficult. But to stay on top of your fast-moving profession—and ready yourself for the next step in your career—you need to build your skillset and strategic perspectives.

**Certificates**

• **Police Leadership**
  This six-course certificate is offered fully online. It will help you develop a range of current, theory-based strategies and skills to lead effectively and successfully in high-pressure, high-stakes, publicly visible and rapidly evolving situations while holding true to your organization’s foundational principles. The certificate can be completed over several years, depending upon how many courses you take each term and year. The cost of the certificate varies according to the degree of interactivity and corresponding course hours.

• **Police Supervisory Skills**
  The certificate is offered fully online, with four required courses and a range of electives. The certificate offers a wide range of courses to help you develop strategies and skills for managing people in the unpredictability of a high-pressure, high-stakes police work context. The Certificate can be completed over several years, depending upon how many courses you take each term and year.

**Courses**
We offer a broad range of courses in specific aspects of police leadership. You can register for them individually or as part of a certificate.

• **Evidence-Based Policing**
  Learn to use research evidence strategically to inform management and decision-making. This is a 12-week course.

• **Leadership Dynamics (Replaces Police Leadership and Management Development)**
  Develop your leadership skills by examining the five practices of ‘exemplary leadership’ and explore the concept of credibility and its role in leadership and development of relationships. This is a 12-week course.

• **Ethics in Action (Replaces Ethics for Police Leaders)**
  Examine how professional ethics apply to individuals and organizations and its role in leadership. This is a 12-week course.

• **Global & Domestic Terrorism**
  Draw on the latest terrorism thinking and research from a variety of academic and other sources to develop a broad understanding of terrorism as a complex social phenomenon and a challenging domestic and global security problem. This is a 12-week course.
• **Interpersonal & Intercultural Communication (Replaces Communication Skills for Police Personnel)**
  This 12-week course brings together the best theories and practices of communication between people in society.

• **Coaching Skills for Leaders (Replaces Managing Police Performance)**
  Coaching is comprised of a set of skills and a series of steps that help others become better at their jobs. There are many leadership styles that experts cite and describe; this course specifically examines the coaching leadership style. This is a 12-week course.

  **Public Safety Communicator Leadership**
  Public safety communicators occupy a crucial position between emergency responders and the people they serve. You make decisions that save lives—ones that require up-to-date expertise in leadership, communication, negotiation and conflict resolution.

**Certificate**

• **Public Safety Communicator Leadership Certificate**
  This certificate is designed for individuals in a leadership role or aspiring to a leadership role in a high-pressure public safety communicator context. As public safety communicators, you occupy a crucial position between emergency responders and the people you serve. You make fast-paced decisions that save lives. Leading in this crucial, dynamic environment requires up-to-date expertise in communication, critical thinking, problem-solving, negotiation and conflict resolution, skills that are acquired through this certificate.

**Required Courses:**

• Interpersonal & Intercultural Communication
• Negotiation and Conflict Resolution
• Critical Thinking and Problem-Solving for Leaders

You may be required to take up to five of the following electives, depending on the course length and the CEUs required to complete the certificate:

• Train the Trainer
• Workplace Diversity and Inclusion
• Neurodiversity and Mental Health in the Workplace and Community
• Mindfulness at Work
• Psychological Health in the Workplace: Managing Stress and Emotions
• Coaching Skills for Leaders
• Leadership Dynamics
• Ethics in Action
• Mastering Strategy
• Strategic Public Communications: Building Impact & Influence
• Organizational Behaviour
• Human Resources Management
• Project Management in Practice
• Business Law Essentials for Leaders
• Foundations of Positive Psychology

**Other Certifying Programs**

**Medical Certificate of Death**

Completion of this module will prepare nurse practitioners to complete a Medical Certificate of Death. It will assist the nurse practitioner to identify instances when completion of the certificate falls under the jurisdiction of the Medical Examiners Office.

**Standalone Course**
Strategic Public Communications: Building Impact & Influence
Study the foundational elements of public communications and its many facets. You'll cover everything from employee communication to media relations, to the changing nature of public communications in a digital landscape.

Technical & Engineering Training
Set yourself apart from your peers and advance in your career with our certificates and courses designed for today’s technical professionals.

Certificates

Advanced Process Automation
Master this highly specialized field and be awarded the Advanced Certificate in Process Automation by successfully completing three related certificates in Process Instrumentation & Control, Process Engineering for Control Practitioners and Electrical and Electronic Circuits.

Required Courses:

- Sensors and Symbology
- Control Functions
- Installation and Engineering Functions
- Process Industries
- Process Control
- Safety Devices
- Electrical Principles and Theories
- Electrical and Electronic Equipment
- Electrical Systems and Implementation

AutoCAD
Master the basics of producing professional engineering drawings with AutoCAD. For professionals wanting to enter the drafting world.

Required Courses:

- Getting Started with AutoCAD
- Orthogonal Views, Sections, Dimensions, and Notes
- Blocks, Attributes, Xrefs, Plotting, and Architectural Drawings

Chemical Engineering for Non-Chemical Engineers
Expand your opportunities by learning the basic concepts, designs and practices of chemical and process engineering in a condensed timeframe.

Required Courses:

- Chemical Engineering and Process Plants
- Process Engineers’ Assets: Concepts, Skills, Deliverables, Codes, and Standards
- Unit Operations, Process Units, and Plant Design
- Health, Safety, and Profitability of Process Plants

Construction Management
Acquire valuable skills in project planning, quality control, risk management, procurement, contracts, labour relations and more.

Required Courses:

- Construction Industry and Practice
- Methods in Project Management
- Business Methods in Managing Construction
Electrical Essentials for Control Practitioners
Gain theoretical and practical knowledge in electrical engineering thorough an academic and practical approach.

Required Courses:

- Electrical Principles and Theories
- Electrical and Electronic Equipment
- Electrical Systems and Implementation

Electrical Engineering for Non-Electrical Engineers
Master the practical and theoretical basics of electrical engineering, from equipment to power systems and design to implementation.

Required Courses:

- Electrical Engineering Basics
- Electrical Equipment
- Electrical Power Systems
- Engineering Design and Implementation

Heating Ventilation and Air Conditioning (HVAC)
Develop a solid understanding of HVAC systems and requirements, including installation, balancing, maintenance and troubleshooting.

Required Courses:

- HVAC Basics
- Understanding HVAC
- Implementing HVAC

Home Inspection
Gain the technical skills and communication savvy to inspect all the key components of a home with confidence. To earn the full certificate, you must complete ten required courses.

Required Courses:

- Electrical Inspection
- Plumbing Inspection
- Communication and Professional Practice
- Heating I Inspection
- Heating II Inspection
- Insulation and Interior Inspection
- Air Conditioning and Heat Pump Inspection
- Roofing Inspection
- Exterior Inspection
- Structure Inspection

Maintenance Management
Learn the elements of proper predictive and preventative maintenance. A powerful and specialized program for maintenance management professionals.

Required Courses:

- Introduction to Maintenance Management
- Maintenance Planning and Scheduling
- Preventive and Predictive Maintenance

Mechanical Engineering for the Non-Mechanical Engineers
Study the fundamental theories and relevant applications of mechanical engineering and mechanical equipment.
Required Courses:

- Mechanical Engineering Basics
- Material, Machines, Fuel, and Power
- Transportation, Building, and Rotating Equipment
- Manufacturing, Environment, Refrigeration, Cryogenics, and Optics

Process Engineering for Control Practitioners
Master basic concepts, as well as the engineering and functioning of systems—and gain more advanced insight into process engineering. For instrumentation and control practitioners.

Required Courses:

- Process Industries
- Process Control
- Safety Devices

Process Instrumentation and Control
Learn about the field of instrumentation and control and develop a working knowledge of the basic concepts, engineering and installation of control equipment.

Required Courses:

- Sensors and Symbology
- Control Functions
- Installation and Engineering Functions

Process Instrumentation—Advanced Process Control
Take your skill set to the next level through three modules focused on advanced control strategies, loop performance assessment, troubleshooting and optimization.

Required Courses:

- Processes, Controllers, and Tuning
- Loop Performance Assessment and Troubleshooting
- Advanced Control Strategies and Optimization

Production Planning and Control
Develop skills in supply chain management, material planning and production control—everything you need to work effectively in a manufacturing environment.

Required Courses:

- Planning in a Manufacturing Environment
- Capacity and Material Planning and Production Control
- The Management of Supply Chain

Reliability, Maintainability and Safety Engineering
The program covers different areas of Reliability, Availability, Maintainability and Safety (RAMS) from basic knowledge to application.

Required Courses:

- Reliability Engineering Basics
- System Reliability
- Reliability Methods and Applications
- Reliability, Maintainability, and Safety Implementation
Structural Engineering for Architects and Non-Structural Engineers
Understand structures, whether made of steel, wood, reinforced concrete or masonry; and communicate successfully with structural design experts.

Required Courses:

- Introduction to Structural Elements and Steel
- Steel Continued, Meet Wood
- Wood Continued, Introducing Reinforced Concrete
- Reinforced Concrete Continued, All About Masonry

Technical Writing
Develop a versatile set of writing skills by mastering best practices for writing clear, compelling reports and other technical documents.

Required Course:

- Technical Writing Essentials

Choose three of the following electives:

- Grammar Tune-up
- Persuasive Writing
- Project Management Documents
- Writing Clear Technical Reports
- Writing Emails that Get Results

Individual Courses

Accident Investigation
You will gain the necessary background, understanding, and innovative methods required to conduct a thorough and effective accident investigation.

University Access Programs
Not every journey to a university degree is linear. Our programs offer solutions to help you prepare for beginning your chosen undergraduate or graduate degree.

University Preparation
Our University Preparation courses have been designed to give you a solid foundation in a subject area before going to university or, if you are currently in university, to help you get the prerequisite you need for the program you want.

We offer courses in:

- Biology
- Canadian Studies
- Chemistry
- Academic Math
- Pre-Calculus Plus
- Physics
- Writing Skills for Academic Study

Transition Year Program
Do you dream of earning a university degree, but worry you might not have what it takes? Dalhousie’s Transition Year Program (TYP) might be exactly what you’re looking for—this eight-month program is designed to prepare you for all aspects of academic life. Students receive university credit for the TYP courses.

You will develop essay writing and research skills, gain (or re-gain) foundational math and English skills, learn to study effectively and manage your workload, and earn the confidence to succeed in an academic environment. Please contact us for an application form.
The TYP launched in 1970 with the goal of increasing the successful participation of Black and Indigenous students at Dalhousie University. The program has been helping students successfully prepare for university ever since.

The Transition Year Program is welcoming and accessible to students who are ready to make a commitment to learning. Financial support, including living allowance, is available to qualified applicants. When you successfully complete the eight-month program, you receive a tuition fee waiver for your undergraduate degree.

Our Courses

We offer courses that are designed to give you the academic and life skills foundation you need for a successful transition to the academic university environment.

Required courses include:

- **Academic Writing and Strategies for University Learning 1 and 2**
  The first course will help you develop university-level communication and composition skills, along with study skills to facilitate the transition to university. The second course will help you further develop university-level communication and composition skills, along with study skills to aid in the transition to university. These courses may not be used to satisfy the degree writing requirements.

- **English 1 and 2**
  The first course covers grammar, basic essay writing, research, documentation, argumentative writing and a wide variety of writing skills. It includes literary material from current and historical essayists. The second course takes English 1 skills to an advanced level. It includes the study and analysis of literary material from current and historical essayists as well as contemporary Mi'kmaq and Black Nova Scotia authors. These courses may not be used to satisfy the degree writing requirements.

- **Black Studies 1 and 2**

- **Indigenous Studies 1 and 2**
  In the first course, we will learn about the history of Indigenous Peoples in what is now known as Canada. We'll move through the pre-contact era to the historical relationship between the British Crown and First Nations Peoples with an emphasis on Indigenous perspectives on history, land, treaties, self-government and oral traditions. The second course will have you delving into colonialism, imperialism and other key issues facing Aboriginal peoples, both historically and in present day.

- **TYP Math 0034 and 0035**
  The first course covers signed numbers, order of operations, fractions, decimals, exponents, polynomials, equations, algebraic fractions, and graphing. Homework is checked regularly. Several tests and two major exams are given. The second course covers a diverse array of topics that include: fractions, decimals, exponents, polynomials, algebra, graphing, probability, and statistics. Homework is regularly assigned and marked, and several major exams are given during the year, including a three-hour final in April.

Contact the TYP
Address: 1400 LeMarchant Street, PO Box 15000, Halifax, NS B3H 4R2
Phone: (902) 494-3730
Fax: (902) 494-2135

Writing & Communications
Effective communication is key to a successful business. Develop the skills you need to communicate with style and confidence in the workplace.

Certificates

Customer Service Specialization
With robotics in artificial intelligence, customer service is a fast-changing industry and it is vital to stay on top of the most current market trends. Looking at real-world examples and case studies, this certificate program covers the different phases of implementing a customer service plan. We will also examine operations, management techniques, and data reporting methods that all support customer success management (CSM) program implementation.

Required Courses:

- Understanding the Value of Customer Success
- Implementing Customer Success Strategies
- Refining, Measuring, and Improving Customer Success Strategies

Technical Writing
You're interested in this certificate because you're looking for a grammar refresh or strategies to write concise and informative technical reports and proposals. This certificate is intended for professionals working in a technical field such as engineering, technology, or science. To earn the certificate, you need to take four courses. These courses can also be taken individually.

Required Course:

- Technical Writing Essentials

Electives (Three Required):

- Grammar Tune-up
- Writing Clear Technical Reports
- Writing Emails that Get Results
- Project Management Documents
- Persuasive Writing

Standalone Courses

Accident Investigation
In this nine-week course, you will gain the necessary background, understanding, and innovative methods required to conduct a thorough and effective accident investigation.

Clinical & Basic Science Departments
Dalhousie Medical School is the cornerstone of quality health care in Maritime Canada. Whether in the classroom, in the lab, or at the bedside, the Medical School works to improve patient care and advance medical research, while reflecting the values and character of the Maritime people we serve.
Our **departments and academic units** provide opportunities for intellectual and personal growth. We celebrate the individual as well as the team.

For information about the Doctor of Medicine degree, visit the [Dentistry Law Medicine academic calendar](#).

Introduction
Epidemiology is the core science that underpins both public health and evidence-based clinical practice and health policy. Epidemiologic research targets factors that influence the development, mechanism, and outcomes of health conditions. Included among these factors are biological and social determinants of health as well as health services and systems.

Our faculty members are responsible for an undergraduate course, CH&E 4010.03 Principles of Epidemiology and Research Methods. This course is offered in the Faculties of Science/Medicine, as part of the BSc Medical Sciences Program. Our faculty members are also engaged in tutoring, teaching, research mentorship, and leadership within the medical school (please see the Faculty of Medicine calendar for more information).

Degree Programs
The Department of Community Health & Epidemiology offers MSc and PhD programs in Epidemiology and Applied Health Research. Please see the Faculty of Graduate Studies calendar for more information.

Introduction
The Department of Medical Neuroscience fosters research and training in neuroscience that advances the understanding and treatment of diseases of the nervous system. Our faculty members contribute to undergraduate neuroscience courses in the Faculty of Science including NESC 3440: Human Neuroanatomy and NESC 4070: Chemical Neurobiology.

The Department of Medical Neuroscience is also the home for Anatomy at Dalhousie University, at the undergraduate level offering courses in human gross anatomy and histology.
Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the department’s website.
Course Descriptions

ANAT 1010 Basic Human Anatomy
CREDIT HOURS: 3
This course is offered by the Department of Medical Neuroscience primarily to students in the Schools of Nursing (Section 01). A limited number of seats are available for Special Health Professions, Arts and Science, or Non-Degree students. Note that this course is also offered by DISTANCE EDUCATION (ANAT 1010.03, Section 02) during the Regular Term (Fall or Winter). Upon successful completion of the course, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. This course uses an online Virtual Anatomy Laboratory.
CALENDAR NOTES: Please note that the Distance Anat 1010 section 02 course is unrestricted and open to all students.
RESTRICTIONS: Section 01 is restricted to Nursing students and a limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students.
FORMATS: Lecture

ANAT 1020 Basic Human Anatomy
CREDIT HOURS: 3
This course is offered by the Department Medical Neuroscience primarily to student in Recreation, Physical and Health Education and Kinesiology. A limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students. Note that this course is also offered by DISTANCE EDUCATION (ANAT 1010.03, Section 02) during the Regular Term (Fall or Winter). Upon successful completion of this course, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. This course uses an online Virtual Anatomy Laboratory.
CALENDAR NOTES: This course is NOT offered during the summer term.
RESTRICTIONS: Restricted to student in Recreation, Physical and Health Education and Kinesiology. A limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students.
FORMATS: Lecture

ANAT 2160 Introduction to Human Histology
CREDIT HOURS: 3
Histology is the study of the structure of cells, tissue and organ systems, and utilized information derived from both light and electron microscopy. This course complements studies in anatomy, cell biology, physiology, and biochemistry, broadening the understanding of how organisms function.
PREREQUISITES: BIOL 2020.03 or permission of instructor
CROSSLISTED: BIOL 3430.03
FORMATS: Lecture | Lab

ANAT 3010 Introductory Human Anatomy
CREDIT HOURS: 3
This is a lecture-based course in human anatomy that provides an intermediate-level understanding of the human musculoskeletal, cardiovascular, respiratory, digestive, urinary, reproductive and nervous systems, and introduces key features associated with the formation of the human body. Restricted to students in the Bachelor of Science in Medical Science Program.
PREREQUISITES: BIOL 2020.03 or equivalent
RESTRICTIONS: Restricted to student in Bachelor of Science in Medical Sciences
FORMATS: Lecture

ANAT 3421 Comparative Vertebrate Histology
CREDIT HOURS: 3
An advanced histology course surveying the whole range of vertebrate tissues and organs. The material is approached from a comparative perspective, considering tissue and organ histology throughout the major vertebrate courses.
PREREQUISITES: BIOL 3430.03 or ANAT 2160.03 or equivalent
CROSSLISTED: BIOL 3421.03
FORMATS: Lecture | Lab

ANAT 4010 Advanced Human Anatomy
CREDIT HOURS: 3
This laboratory-centered course provides students with a high level of understanding of three-dimensional human anatomy. The course consists of hands-on study of functional anatomy through cadaver dissections and supplementary lectures and discussions. Restricted to fourth year students in the BSc in Medical Science program.
PREREQUISITES: ANAT 3010.03; Instructor permission required.
FORMATS: Lecture | Lab
Introduction

The study of Pathology encompasses the understanding of basic responses of cells, tissues and organs to various injurious stimuli with particular emphasis on the role of such responses in the pathogenesis of inflammatory responses, neoplasia, fluid and hemodynamic derangements.

Lecturer
Moore, D.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the Psychology and Neuroscience website.

Course Descriptions

PATH 3000 Introduction to Pathology
This course provides a general introduction into the science concerned with the basis of disease. The primary focus of the course is to highlight the basic concepts that underlie disease processes. These concepts are illustrated through a range of topics including: immunopathology, neoplasia, genetic disorder, neuropathology, hematopathology and cardiovascular pathologies.

**CALENDAR NOTES:**

**PREREQUISITES:** BIOL 1011.03 or equivalent, BIOL 2020.03 or equivalent

**RESTRICTIONS:** Restricted to students in the Bachelor of Science in Medical Sciences Program

**FORMATS:** Lecture

---

**PATH 4100 Critical Thinking in Neuropathology**

**CREDIT HOURS:** 3

This course focuses on breakthroughs in understanding human brain function. You will learn about the inspirations and accidents that lead to seminal discoveries. You will be able to understand the context of these breakthroughs. You will learn to ask better questions about the process of basic and applied research.

**PREREQUISITES:** NESC 2470 or PHYL 2041

**FORMATS:** Seminar

---

**Pharmacology**

**Location:**
Sir Charles Tupper Medical Building
5850 College Street
6B3, 6th Floor
PO BOX 15000
Halifax NS
B3H 4R2

**Phone Number:** (902) 494-3435

**Fax Number:** (902) 494-1388

**Email Address:** pharmacology@dal.ca

**Website:** pharmacology.medicine.dal.ca/

---

**Introduction**

Pharmacology is the study of the actions and fates of drugs in biological systems. Studies of the interaction of drugs with their receptors and the elucidation of the cellular mechanisms underlying the resulting responses are central to Pharmacology. It is also important to understand how drugs are handled in the body, why they produce adverse effects, and how they interact with each other. In addition, scientists often use drugs as tools to determine the basic mechanisms that underlie both normal and pathological conditions in biology. A solid understanding of the principles of Pharmacology is essential for any scientist who wishes to use drugs as tools properly. The experimental approaches used in Pharmacology are varied, ranging from bioassay, electrophysiology, chemical and biochemical analyses to molecular biology.

---

**Degree Programs**

Students intending to pursue graduate training in Pharmacology are encouraged to study pharmacology at the undergraduate level. In addition, a solid background in pharmacology can open the door to employment in numerous sectors, most notably the pharmaceutical industry. The Department of Pharmacology does not offer an honours pharmacology degree program as such. However, it does provide courses that may be taken for credit within various other honours degree programs, including Biology, Biochemistry, Psychology (Neurosciences) and Microbiology and Immunology. In addition, students can conduct honours thesis research projects in the laboratories of Pharmacology faculty. Finally, undergraduate students may, with permission of their home department and the course instructor, take certain graduate specialty courses which are offered in the Department of Pharmacology.

**Staff**

**Dean**
Anderson, D., MD

---

**Professors Emeriti**
Gray, J. D., BSc, MD (Alta), FRCP(c)
Renton, K. W., BSc (Sir Geo Wms), PhD (McGill)
Robertson, H. A., BA, MSc (Western), PhD (Cantab)
Ruedy, J., MD, MSc (Queen’s), FRCP(c), FACP
White, T. D., BSc, MSc (UWO), PhD (Bristol)

**Professor and Head of Department**
Sinal, C.J., BSc, (McMaster), PhD (Western)

**Professors**
Denovan-Wright, E. M., BSc, PhD (Dalhousie)
Dupré, D. J., BSc, PhD (Sherbrooke)
Fawcett, J., BSc, MSc, MSc (T) (McMaster), PhD (McGill)
Howlett, S. E., BSc (Concordia), MSc, PhD (Memorial)
Kelly, M. E. M., BSc, PhD (Southampton)
McDougall, J. J., BSc (Hons), PhD (Glasgow Univ Scotland)
McMaster, C.R., BSc (Hons), PhD (Manitoba)
Pasumarthi, K. B. S., DVM (India), PhD (Manitoba)
Robertson, G. S., BSc, PhD (Dalhousie)
Sawynok, J., BSc, MSc (Melb), PhD (Queen’s)
Sinal, C.J., BSc, (McMaster), PhD (Western)

**Associate Professors**
Brunt, K. R., BSc (Hons) (Saskatchewan), PhD (Queen’s)
Herder, M., BSc (Hons) (Memorial), LLB, LLM (Dalhousie), JSM (Stanford)
Langille, M. G., BSc (New Brunswick), PhD (Simon Fraser Univ)

**Assistant Professors**
Karakach, T., MSc, PhD, (Dalhousie)

**Cross Appointments/Adjunct**
Delbridge, L., PhD (Melbourne), major appointment in Physiology, Univ of Melbourne
Ellis, L., BSc (Hons), MSc (Guelph), PhD (McGill), major appointment in NRC
Goralski, K., BSc (Hons), PhD (Manitoba), major appointment in College of Pharmacy
Grandy, S. A., BScK, MSc, PhD (Dalhousie), major appointment in School of Health and Human Performance
Hoffman, E., major appointment at Center for Genetic Medicine Research, Children's National Medical Center in Washington, DC
Hung, O. R., BSc Pharm, MD (Dalhousie) FRCP (C), major appointment in Department of Anesthesia
Laprairie, R. B., BSc (Hons) (Saskatchewan), MSc, PhD (Dalhousie), major appointment in Pharmacy and Nutrition, Univ of Saskatchewan
Lehmann, C., MD (Humboldt U Berlin), major appointment in Anesthesia
Lynch, M., BSc, MD (Dalhousie), major appointment in Anesthesia
Manchia, M., MD, PhD (Cagliari, Italy), major appointment in Psychiatry
Pollak, P. T., MD, PhD (Western Ontario), major appointment in Pharmacology and Cardiac Services, Univ of Calgary
Top, D., BSc (Hons) (Toronto), PhD (Dalhousie), major appointment in Pediatrics

**Instructor**
Farrell, S. R., BSc (Hons), PhD (Dalhousie)

**Course Descriptions**

**PHAC 1471 Pharmacology for Pharmacy**
CREDIT HOURS: 3
Part one of a two semester course providing an introduction to Pharmacology, emphasizing basic mechanism of drug action and principals of drug-receptor interactions, pharmacokinetics, and drug metabolism.
CALENDAR NOTES: This course is restricted to students enrolled in the PharmD program at Dalhousie University.
RESTRICTIONS: This course is restricted to students enrolled in the PharmD program at Dalhousie University.
FORMATS: Lecture

**PHAC 1472 Pharmacology for Pharmacy**
CREDIT HOURS: 3
Part two of a two semester course providing an introduction to Pharmacology, emphasizing basic mechanism of drug action and principals of drug-receptor interactions, pharmacokinetics, and drug metabolism.
CALENDAR NOTES: This course is restricted to students enrolled in the PharmD program at Dalhousie University.
RESTRICTIONS: This course is restricted to students enrolled in the PharmD program at Dalhousie University.
FORMATS: Lecture

**PHAC 3000 Experiential Learning in Pharmacology**
CREDIT HOURS: 3
This one semester course is intended to introduce students to outside-the-classroom learning experiences. Students will work closely with a supervisor to learn laboratory skills and expand their knowledge in Pharmacology. Course structure will vary, depending on the nature of the experience.
CALENDAR NOTES: To register for this class, students must find a supervisor in the Department of Pharmacology and complete a project description, including expectations/role of the student learning objectives and assessment components. The project outline, objectives and assessment must be approved by the course coordinator prior to registration.
COREQUISITES: Phac 3001 or Phac 3030 or Phac 4403 or Phac 4409
RESTRICTIONS: Requires permission of coordinator and supervisor
FORMATS: Experiential Learning

**PHAC 3001 Pharmacology I**
CREDIT HOURS: 3
This course introduces students to pharmacology, the study of the interaction of drugs and toxins with the human body. Topics include drug receptors, metabolic transformation and distribution of drugs. Lectures explore the action of clinical agents used to treat cardiovascular diseases, neurological diseases, pain, and cancer. Experts in the various fields of pharmacology present the different topics.
RESTRICTIONS: Restricted to third year and above
FORMATS: Lecture

**PHAC 3030 Pharmacology - The Drugs Around Us**
CREDIT HOURS: 3
Using examples of drugs found in our environment and daily lives, this course will discuss subjects including drug regulations, how drugs affect us and modify our body, foods that are addictive; drugs in products you wouldn't suspect as well as the treacherous effects of common medications and environmental toxins.
RESTRICTIONS: 3rd year and above
FORMATS: Lecture | Discussion

**PHAC 4000 Directed Research Project in Pharmacology**
CREDIT HOURS: 3
This course is intended to introduce students to academic research in a laboratory environment. Students will work closely with a supervisor to develop a
research question and project proposal to address this question. Students will learn laboratory skills and expand their knowledge in Pharmacology. It is expected that students will take 4000 & 4100 consecutively in Fall & Winter terms of the same academic year, unless otherwise agreed upon with the student, coordinator and supervisor.

CALENDAR NOTES: To register for this class, students must find a supervisor in the Department of Pharmacology and complete a project description, including expectations/role of the student learning objectives and assessment components. The project outline, objectives and assessment must be approved by the course coordinator prior to registration.

COREQUISITES: PHAC 3001 or PHAC 3030 or PHAC 4403 or PHAC 4409

RESTRICTIONS: Requires permission of coordinator and supervisor

EXCLUSIONS: Lab work that is part of another course or paid employment is not eligible. Cannot be taken concurrently with an Experiential Learning or Honours course.

FORMATS: Other (explain in comments)

PHAC 4100 Directed Research Project in Pharmacology
CREDIT HOURS: 3
This course is intended to introduce students to academic research in a laboratory environment. Students will work closely with a supervisor to develop a research question and project proposal to address this question. Students will learn laboratory skills and expand their knowledge in Pharmacology. It is expected that students will take 4000 & 4100 consecutively in Fall & Winter terms of the same academic year, unless otherwise agreed upon with the student, coordinator and supervisor.

CALENDAR NOTES: To register for this class, students must find a supervisor in the Department of Pharmacology and complete a project description, including expectations/role of the student learning objectives and assessment components. The project outline, objectives and assessment must be approved by the course coordinator prior to registration.

COREQUISITES: PHAC 3001 or PHAC 3030 or PHAC 4403 or PHAC 4409

RESTRICTIONS: Requires permission of coordinator and supervisor

EXCLUSIONS: Lab work that is part of another course or paid employment is not eligible. Cannot be taken concurrently with an Experiential Learning or Honours course.

FORMATS: Other (explain in comments)

PHAC 4403 Systems Pharmacology I
CREDIT HOURS: 3
This course introduces pharmacology, the study of the interactions of drugs with the human body. Topics include drug receptors, drug metabolism, and drug distribution. Drugs acting on the autonomic nervous system, skeletal muscle, cardiovascular system and antimicrobials, plus over-the-counter medications will be discussed. Content experts in pharmacology present different topics.

COREQUISITES: None

PREREQUISITES: BIOC 2300 or PHYL 2041 or NESC 2570 or Instructor's Permission

CROSSLISTED: None

RESTRICTIONS: Restricted to third year and above.

EXCLUSIONS: PHAC 3001

FORMATS: Lecture

PHAC 4409 Systems Pharmacology II
CREDIT HOURS: 3
This course is designed to complement Pharmacology I. It covers drug classes acting on various human body systems with emphasis on basic principles, mechanism of the drug action, therapeutic indications and adverse drug reactions. Topics include drugs acting on the central nervous system, drugs of abuse, local and general anesthetics, drugs acting on various endocrine glands, reproductive, immune, gastrointestinal and respiratory systems, anticancer drugs and drugs used in selected populations.

PREREQUISITES: BIOC 2300 or PHYL 2041 or NESC 2570 or Instructor's Permission

CROSSLISTED: None

RESTRICTIONS: Restricted to third year and above.

EXCLUSIONS: PHAC 4001

FORMATS: Lecture

Physiology and Biophysics

Location:
Sir Charles Tupper Medical Building
5850 College Street
3rd Floor
PO BOX 15000
Halifax NS
B3H 4R2
Introduction
The Department of Physiology and Biophysics offers a wide range of undergraduate courses in addition to those restricted to students in the faculties of Medicine, Dentistry and Health Professions. Students who have previously taken biology, chemistry, physics will be best equipped to study physiology.

The courses listed below are aimed at providing the student with an understanding of the functioning of the human body. The Distance Education course PHYL 1000X/Y.06 is open to all students. PHYL 2041.03 and/or PHYL 2044.03 is/are the recommended prerequisite for science students interested in taking higher level physiology courses. Students wishing to enrol in other specialized courses require permission from the Course Director.

Staff

Dean
Anderson, D. R., MD, FRCPC, FACP

Head of Department
Cowley, E.A., PhD

Undergraduate Student Advisor
Krueger, S., PhD (Zurich)

Professors
Brown, R. E., BSc (Victoria), MA, PhD (Dalhousie), major appointment in Department of Psychology and Neuroscience. Olfaction; hormones, parental behaviours; learning and memory; developmental psychobiology; psychopharmacology
Chappe, V., BSc (Univ Aix-Marseille), MSc, PhD (Université de Provence-Marseille, France). Structure, function, recycling and regulation of the CFTR chloride channels; Cystic Fibrosis causing mutations; second messengers; protein kinases; protein interactions; receptors and signalling pathways.
Chauhan, B., PhD (Wales), major appointment Department of Ophthalmology and Visual Sciences. Experimental models of optic nerve and retinal damage, visual function in health and disease, structural and functional assessment of glaucoma, risk factors for the progression of glaucoma
Cowley, E. A., BSc (London), PhD (Leicester). Oxidative stress in lung disease. Role of K+ channels in transepithelial secretion
Croll, R. P., BSc (Tufts), PhD (McGill). Physiology and functional anatomy of invertebrate nervous systems; analyses of motor program generation; regeneration, development, and evolution of identified neurons
Fine, A., AB (Harvard), VMD, PhD (Penn). Neural plasticity; learning and memory, development and regeneration; optical monitoring of neural activity and plasticity; neural transplantation
French, A. S., MSc, PhD (Essex). Sensory transduction and adaptation; epithelial ion transport; ion channel biophysics
Lehmann, C., MD, PhD (Humboldt-Univ, Germany), FRCDC (Dalhousie), major appointment with Department of Anesthesia, Pain Management and Perioperative Medicine
Linsdell, P., BSc (London), PhD (Leicester). Ion channel biophysics; chloride channel structure and function; epithelial transport; cystic fibrosis
Sapp, J.L., BSc (Toronto), BSc Med, MD (Dalhousie), FRCP(C), major appointment with Department of Medicine. Ventricular tachycardia investigation and management. Intramyocardial needle ablation for treatment-refractory ventricular tachycardia; the role of catheter ablation for ischemic ventricular tachycardia; body surface mapping to derive an inverse solution and quantify its accuracy and the improvement of rapid mapping of ventricular tachycardia
Torkkeli, P. H., BSc, MSc, LeSc (Oulu), PhD (Alta). Mechanosensitive, voltage- and ligand-gated ion channels in mechanosensory neurons, central control of mechanosensation

Associate Professors
Anini, Y., PhD (Paris, France), Prohormones processing. Role of new enteric peptides and adipokines in the regulation of pancreatic secretions and adipogenesis. Hormonal regulation of energy homeostasis. Type 2 diabetes. Obesity
Dong, X., PhD (Univ Sci Tech, China). Lysosome physiology and lysosome-related diseases; lysosomal ion channels and transporters in calcium signaling, membrane trafficking, autophagy, lysosomal storage diseases, neurodegenerative diseases, and cancers
El Hiani, Y., BSc (Ibn Zohr, Morocco), MSc, PhD (UPJV, Amiens-France). Oxidative stress in breast cancer and opportunities for
pharmacological intervention. Membrane electrophysiology, ion channel biophysics and structure function; transient receptor potential channels, calcium channels; calcium influx; calcium signaling)

**Krueger, S., PhD (Zurich).** Synaptic physiology; development and plasticity of synapses in the central nervous system; regulation of neurotransmitter release

**Quinn, T. A., PhD (Columbia University, NY).** Cardiovascular disease, with an emphasis on changes in cardiac mechanics, electrophysiology, and mechanoelectric interactions leading to cardiac arrhythmias and heart failure; Cardiac regulation, with an emphasis on intrinsic autoregulatory mechanisms, including stretch and the intracardiac nervous system; Fluorescence-, optogenetic-, and computational modelling-based structure-function studies using whole animals to isolated cells. Primary appointment in the Department of Physiology and Biophysics

**Siddiq, F., BSc (Dalhousie), MD (University of Toronto, TO, Canada), major appointment with Division of Endocrinology and Metabolism.** Prevention of Diabetes complications; quality improvement initiatives in diabetes care.

**Wells, S., PhD (Toronto), major appointment in the School of Biomedical Engineering.** Structural-mechanical relations in biopolymers such as elastin and collagen in order to determine the underlying mechanism(s) of elasticity of these materials-and thereby to understand the functioning of the arteries, ligaments, skin etc. which they make up. Structural remodeling of these structures during development and maturation from fetal to adult life

**Assistant Professor**

**Chaudhary, K.R., BP Pharm (HNGU, Gujarat, India), PhD (University of Alberta, Edmonton, AB, Canada).** Study of sex differences in right ventricular angiogenesis, right ventricular function, and pathophysiology of right (-sided) heart failure. Identification and characterization of cardiac vascular stem cells and their role in right ventricular adaptation to physiological and pathological stress.

**Agosto, M. A., BS (M.I.T.), PhD (Harvard).** Neurobiology of the retina; synaptic trafficking; synaptic protein interactions

**Adjunct Professors**

**Höger, Ulli., MSc, PhD (Johann Wolfgang Goethe Univ, Germany)**

**Luhovyy, B., MS, BSc, PhD (Lviv Ivan Franko National Univ, Ukraine)**

**Meinertzhagen, L., DSc (University of St. Andrews), FRSC**

**Pavlov, E., MSc (Moscow State Univ), PhD (Inst. of Theor. & Exp. Biophysics, Russia)**

**Rose, R., PhD (Univeristy of Calgary)**

**Senior Instructor**

**Beaudoin, M.-S., BSc (McGill), MSc, PhD (Guelph)**

**Instructor**

**Slysz, J., BSc and MSc (University of PEI), PhD (University of Guelph)**

**Certificate in Human Physiology**

**Offered by:** Physiology & Biophysics, Psychology & Neuroscience, Biology, Kinesiology

**Coordinators:** Dr. Derek Kimmerly (Kinesiology students) dskimmerly@dal.ca
Dr. Nathan Crowder (Neuroscience & Psychology) Nathan.Crowder@dal.ca
Dr. Stefan Krueger (Medical Sciences & other programs) stefan.krueger@dal.ca

**Eligibility:** This certificate is open to currently registered Dalhousie students.

**Overview:** The Certificate in Human Physiology provides students with an opportunity to specialize in physiological studies through courses offered in the Medical Sciences, Biology, Neuroscience, and Kinesiology undergraduate programs, as well as experiential learning opportunities. The learning outcomes will vary between students and depend on their main area of undergraduate studies, as well as on individual interests. Concentrating on one or more cross-cutting themes, students enrolled in the certificate program may choose to:

- Examine the function and role of particular organ systems in human performance and disease.
- Analyze the function of the nervous and endocrine systems to appreciate how they regulate bodily functions and behaviour.
- Explore physiological mechanisms at molecular and cellular levels to develop a more thorough understanding of physiological and pathophysiological processes at a higher organizational level.

**Admission to Certificate:** Students should enrol in the Certificate Program in Human Physiology in their third year of studies. To enrol, students must declare the certificate through Dal Online ([https://dalonline.ca](https://dalonline.ca)) Web for Students>Admissions>Declare Major/Minor/Certificate) and notify the Certificate Coordinator by e-mail.
To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

**Certificate Requirements:**

1. A minimum grade of at least B- is required in 6 credit hours of the following core courses:
   - PHYL 2041 Human Neurophysiology and PHYL 2044 Systems Physiology or
   - BIOL 3078/MARI 3078 Animal Physiology I and BIOL 3079/MARI 3079 Animal Physiology II or
   - NESC 2470 Systems Neuroscience and PHYL 2044 Systems Physiology or
   - KINE 2310 Physiology of Exercise and KINE 2430 Motor Control & Learning

2. A grade of at least B- required in 15 elective credit hours chosen from the list of courses below. Courses can only be counted towards elective credits if they have not been used to fulfill core course requirements. No more than one 2000-level course can be used towards elective credits. A maximum of 9 credit hours from any one stream (PHYL, NESC, BIOL, KINE) can be used.
   - PHYL 3120 Exercise Physiology
   - PHYL 3320 Human Cell Physiology
   - PHYL 3520 Core Concepts in Medical Physiology
   - PHYL 3620 Human Physiology Lab
   - PHYL 4000 Synaptic Function
   - PHYL 4324 Endocrine Function
   - PHYL 4504 Respiratory Physiology
   - PHYL 4680 Cardiovascular Physiology
   - NESC 2150 Perceptual Processes
   - NESC 2570 Cellular Neuroscience
   - NESC 3051 Methods in Sensation and Perception
   - NESC 3170 Hormones & Behaviour
   - NESC 3670 Genes, Brain & Behaviour
   - NESC 3970 Molecular Neuroscience
   - NESC 4070 Chemical Neurobiology
   - BIOL 3430 Intro Human Histology
   - BIOL 4020 Advanced Cell Biology
   - KINE 3419 Appl Physiology Principles Human Performance
   - KINE 3250 Human Nutrition
   - KINE 3440 Sensory and Motor Function
   - KINE 4704 Cardiorespiratory Dynamics in Exercise

3. At least 6 credit hours of experiential learning or independent research. Research projects have to be conceptually or methodologically related to Physiology and be approved by the certificate program committee. Suitable courses for this requirement include PHYL 3600, NESC 3001, NESC 3100, NESC 3101, NESC 4501, NESC 4502, SCIE 3100, SCIE 4101, SCIE 4102, SCIE 4901, SCIE 4902, BIOL 3800, BIOL 4806, BIOL 4807, BIOL 4901, BIOL 4902, KINE 4801, KINE 4802, and KINE 4900X/Y.

**Courses**

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above
are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the department’s website.

**Course Descriptions**

**PHYL 1001 Human Physiology 1**
CREDIT HOURS: 3
This online distance course is the first of two that explore the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism. Specific topics in this course include Cellular Physiology with an emphasis on Transport, Metabolism and Communication, the Immune System, Neural, Muscle and Sensory Physiology and Control of Body Movement. DIRECTORS: M.-S. Beaudoin and J. Slysz
CALENDAR NOTES: This course is normally given during the Fall Semester and meets the prerequisite requirement for PHYL 1002.03 (Human Physiology 2) and PHYL 1012.03. This course can not be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).
EXCLUSIONS: PHYL 1001.03
FORMATS: Online Delivery

**PHYL 1002 Human Physiology 2**
CREDIT HOURS: 3
This course is a continuation of PHYL 1001.03 and explores the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism. Specific topics in this course include Endocrine, Cardiovascular, Respiratory, Renal, Acid-Base, Whole Body Metabolism and Reproductive Physiology. DIRECTORS: M.-S. Beaudoin and J. Slysz
CALENDAR NOTES: This course is normally given during the Winter Semester. This course can not be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).
PREREQUISITES: PHYL 1001.03 or PHYL 1011.03 or permission of course director
EXCLUSIONS: PHYL 1012.03
FORMATS: Online Delivery

**PHYL 1011 Human Physiology 1**
CREDIT HOURS: 3
This course is the first of two that explore the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism. Specific topics in this course include Cellular Physiology with an emphasis on Transport, Metabolism and Communication, the Immune System, Neural, Muscle and Sensory Physiology and Control of Body Movement. DIRECTOR: M.-S. Beaudoin and J. Slysz
CALENDAR NOTES: This course is given in the Fall semester and meets the prerequisite requirement for PHYL 1012.03 (Human Physiology 2) and the online distance course PHYL 1002.03. This course cannot be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).
EXCLUSIONS: PHYL 1001.03
FORMATS: Other (explain in comments)

**PHYL 1012 Human Physiology 2**
CREDIT HOURS: 3
This course is a continuation of PHYL 1011.03 and explores the organization and function of the human body from the level of molecules to organ systems and the integration of systems within the whole organism. Specific topics in this course include Endocrine, Cardiovascular, Respiratory, Renal, Acid-Base, Whole Body Metabolism and Reproductive Physiology. DIRECTOR: M.-S. Beaudoin and J. Slysz
CALENDAR NOTES: This course is given in the Winter Semester. This course can not be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).
PREREQUISITES: PHYL 1001.03 or PHYL 1011.03 or permission of course director
EXCLUSIONS: PHYL 1002.03
FORMATS: Other (explain in comments)

**PHYL 2041 Human Neurophysiology**
CREDIT HOURS: 3
The aim of this class is to understand the functional mechanisms of the human nervous system and its clinical significance. The course covers the electrical and chemical properties of neurons and glia, and how neurons communicate with one another and with muscle cells. It reviews the motor, sensory and higher integrative functions of the central nervous system, and the closely related autonomic nervous system. It also surveys the physiology and functional anatomy
of the somatosensory, visual, auditory, vestibular and chemical senses. Both normal functions and selected pathologies of these systems will be discussed. The class also covers important investigative techniques in neuroscience. The overall objective is to provide a solid, factual foundation of knowledge in neurophysiology as well as its underlying principles.

CALENDAR NOTES: PHYL 2041, a core neurophysiology class for students in the Medical Sciences program, serves as equivalent to NESC 2470.03 as prerequisite for upper level NESC courses. Medical Sciences students intending to take NESC 2470.03 in place of PHYL 2041 are advised to also enroll in NESC 2570 as a Selective. Director: S. Krueger

PREREQUISITES: (BIOL 1010.03 or BIOL 1020.03) and (BIOL 1011.03 or 1021.03) and (CHEM 1012.03 or CHEM 1022.03), or equivalent

EXCLUSIONS: NESC 2470.03

FORMATS: Lecture

PHYL 2044 Human Systems Physiology
CREDIT HOURS: 3
The human body consists of cells organized into a number of organ systems. The aim of this class is to explain how six organ systems (respiratory, cardiovascular, renal, gastrointestinal, endocrine, and reproductive) function to allow us to live and carry out our daily activities. Director: T. A. Quinn

PREREQUISITES: BIOL 1010.03 (or BIOL 1020.03) and BIOL 1011.03 (or BIOL 1021.03) and CHEM 1012.03 OR CHEM 1022.03 or equivalent

FORMATS: Lecture

PHYL 2570 Cellular Neurophysiology
CREDIT HOURS: 3
This course provides an introduction to the function of the nerve cells of the brain, which forms the basis for explaining features of brain function in terms of activity of individual cells and their membrane properties, as well as small networks of neurons. The course is designed for all students wishing to take more advanced courses in, or to major in, Neuroscience. Although the course covers topics of neuroscience at all levels, the content is directed towards cellular neuroscience: detailed coverage of the strictly developmental systems or molecular levels of neuroscience is provided in other courses. DIRECTOR(S): N. Crowder

PREREQUISITES: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03 or SCIE 1505.18 or SCIE 1515.36, SCIE 1512.30, 1540.27 or (BIOL 1010.03 or BIOL 1020.03 AND BIOL 1011.03 or BIOL 1021.03 with a grade of B- or better)

CROSSTagged: NESC 2570.03, PSYO 2570.03

FORMATS: Lecture

PHYL 3120 Exercise Physiology in Health and Disease
CREDIT HOURS: 3
The function and dysfunction of body organ systems are reviewed, and the short- and long-term responses of these systems to physical exercise are analyzed. Factors affecting physical performance are considered, and the preventive and therapeutic use of exercise for a wide range of clinical conditions is examined.

DIRECTOR: M.-S. Beaudoin.

PREREQUISITES: PHYL 2041.03 or PHYL 2044.03 or permission of the class director

FORMATS: Lecture | Tutorial

PHYL 3320 Human Cell Physiology
CREDIT HOURS: 3
Events at the cellular and molecular level underlie the functions of tissues, organs and systems. This course examines key physiological principles at the molecular level, and uses the understanding developed to describe important cell and tissue functions, as well as dysfunctions in human disease states. Lectures focus on membrane transport, electrical excitability and electrical signaling, epithelial transport, signaling within individual cells, intracellular organelle function, and ion channels. DIRECTOR: Y. El Hiani

PREREQUISITES: PHYL 2041.03

FORMATS: Lecture

PHYL 3520 Core Concepts in Medical Physiology
CREDIT HOURS: 3
Through didactic (lectures) and problem-solving (tutorial) sessions, students will gain a deeper understanding of the functions of various organ system physiologies. In addition, the integration of a number of organ system functions will also be discussed. Where appropriate, the physiology of disease processes will underscore the consequences of a malfunction of a physiological process. Organ systems covered include cardiovascular, renal, respiratory and gastrointestinal. A firm understanding of physiological principles is essential for any student contemplating a career in the health professions. DIRECTOR: Y. Anini

PREREQUISITES: PHYL 2044.03 or permission of course director

EXCLUSIONS: PHYL 4504.03

FORMATS: Lecture | Tutorial
PHYL 3600 Directed Project in Physiology
CREDIT HOURS: 3
The goal of this course is to provide advanced undergraduate students with the opportunity to conduct a research project under the supervision of a faculty member in the department of Physiology & Biophysics. Projects may cover a variety of experimental approaches and topics including, but not limited to, cardiovascular physiology, neurophysiology, respiratory physiology, endocrinology and neuroendocrinology, and molecular physiology. DIRECTOR: S. Krueger
PREREQUISITES: PHYL 2041.03 and PHYL 2044.03
FORMATS: Lab

PHYL 3620 Human Physiology Lab
CREDIT HOURS: 3
This course offers fundamental concepts of human physiology including neural, muscular, cardiovascular, respiratory, renal, gastrointestinal, endocrine and sensory systems. Students will learn to carry out experimental procedures such as measurement and analysis of ECG, EEG, blood pressure, pulmonary function, senses and reflexes, integrating practical knowledge with theoretical background and clinical significance. DIRECTOR: M.-S. Beaudoin
PREREQUISITES: PHYL 2044.03 or permission of course director
EXCLUSIONS: PHYL 2031.03, PHYL2032.03, PHYL 2030.06 X/Y
FORMATS: Lab

PHYL 4000 Current Advances in Synaptic Function and Plasticity
CREDIT HOURS: 3
Key recent research studies in cellular and systems neurophysiology are presented and discussed. Emphasis is placed on synaptic function and plasticity, excitability, dendritic integration, neural networks and relevant advances in experimental methods. Newly published papers within these areas are reviewed weekly, followed by a more extensive critique of two publications. DIRECTOR: S. Krueger
PREREQUISITES: NESC 2570.03/PHYL 2570.03 or PHYL 2041.03 or permission of course directors
CROSSLISTED: NESC 4185.03
FORMATS: Seminar

PHYL 4324 Endocrine Physiology
CREDIT HOURS: 3
This course is designed to provide intermediate and advanced undergraduates with a basic understanding of the function of the endocrine system. The course will progress from a consideration of basic concepts and mechanisms to the physiological function of specific endocrine systems. Interactions between organ systems will be emphasized. DIRECTOR: Y. Anini
PREREQUISITES: PHYL 2044.03 or permission of the class director
FORMATS: Lecture

PHYL 4504 Respiratory Physiology
CREDIT HOURS: 3
This class will provide a detailed overview of key concepts in respiratory physiology. Attention will be given to aspects of integrated physiology, as well as cellular and molecular concepts. Particular reference will be given to pulmonary diseases. Students will be expected to make presentations based on appropriate literature. Specific topics to be covered include: mechanics of breathing; gas exchange; gas transport; ventilation-perfusion ratios; pulmonary function testing; blood flow and metabolism; airway epithelial cells and transepithelial transport; mechanisms of airways host defence; control of ventilation; respiratory system under stress; cardiopulmonary response to aerobic exercise. Director: E.A. Cowley
PREREQUISITES: PHYL 2044.03
EXCLUSIONS: PHYL 5504.03
FORMATS: Lecture | Discussion

PHYL 4680 Cardiovascular Physiology
CREDIT HOURS: 3
This course provides a detailed overview of key concepts of cardiovascular physiology and disease, including discussion of current research in the field. Topics include: cardiac anatomy/structure; electrophysiology; excitation-contraction coupling; mechanics; metabolism; nervous system control; and vasculature function. Director: T. A. Quinn
PREREQUISITES: PHYL 2044.03 or permission of the course director
CROSSLISTED: PHYL 5568.03 Advanced Cardiovascular Physiology, BMNG 5270.03 Advanced Cardiovascular Physiology
FORMATS: Lecture | Discussion | Other (explain in comments)

Introduction
Dalhousie’s Faculty of Science is the primary centre in the region for science education and research. The principal mission of the Faculty is the discovery, organization, dissemination and preservation of knowledge and understanding of the natural world. The Faculty is dedicated to excellence in the pursuit of this mission. Students in the Faculty of Science develop a capacity for inquiry, logical thinking and analysis; cultivate an ability to communicate with precision and style; and acquire skills and attitudes for lifelong learning.

We offer students the opportunity to pursue undergraduate degrees in 16 different Science programs, including disciplines in the life sciences, physical sciences, and mathematical or economic sciences. In addition, students may combine studies across science disciplines, or with subject areas from other faculties, including the Faculty of Arts & Social Sciences, the Faculty of Computer Science or the College of Sustainability. Other opportunities include the Co-op Education in Science option, where paid work terms are integrated into academic programs, opportunities to participate in research projects led by internationally renowned scientists, and the chance to work toward Certificates that recognize particular skill sets or training obtained as part of a science undergraduate education.

Details concerning particular programs of study are found in the departmental and program entries.

Departments and Programs of the Faculty of Science
The Faculty of Science offers 16 undergraduate programs:

- Actuarial Science
- Biochemistry and Molecular Biology *
- Biology ♦
- Chemistry ♦
- Earth Sciences ♦
- Economics ♦
- Environmental Science ♦
- Marine Biology ♦
- Mathematics ♦
- Medical Sciences **
- Microbiology and Immunology *♦
- Neuroscience
- Ocean Sciences
- Physics ♦
- Psychology
- Statistics ♦

* Departments belong to the Faculty of Medicine
** Offered in cooperation with the Faculty of Medicine
♦ Co-operative Education option available

Dean
Certificates in Science

Certificates are one way that the Faculty of Science recognizes graduating students who have achieved a level of proficiency or specialization in a particular area or subject. Certificates are awarded upon graduation from a degree program and will be recorded on the student’s academic transcript.

Certificates vary in their goals and requirements. Many have a research or practicum component. Some are interdisciplinary, requiring work in more than one department, while others focus on a specialization within a single program. Some Certificates are designed for students enrolled in particular programs, while others are broadly applicable to students in any science program.

In Certificate programs, students enrol by applying to the Certificate Coordinator. Interested students are advised to enrol early in their programs of study, but enrolment is usually also permitted in the final year of study, provided requirements have been met. To be awarded a Certificate, students must notify the Coordinator of their intention to graduate, and provide evidence of completion of all Certificate requirements, prior to the end of the examination period of their final year. Some Certificate programs may require earlier notification; please check with your Coordinator.

Faculty of Science students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

The following Certificates are offered by the Faculty of Science. Students enrolled in one of the programs listed beside the Certificate are most likely to be able to meet the Certificate requirements within their programs. Specific Certificate requirements are described below.

- **Certificate in Actuarial and Financial Mathematics** (Mathematics, Statistics)
- **Certificate in Animal Behaviour** (Biology, Psychology and Neuroscience)
- **Certificate in Applied and Computational Mathematics** (Mathematics, Statistics)
- **Certificate in Aquaculture and the Environment** (Biology, Marine Biology)
- **Certificate in Environmental Impact Assessment** (Biology, Environmental Science)
- **Certificate in Genetics** (Biochemistry & Molecular Biology, Biology, Microbiology & Immunology)
- **Certificate in Geographic Information Science** (Biology, Earth Sciences, Environmental Science)
- **Certificate in Information Technology** (Earth Sciences, Physics)
Certificate in Actuarial and Financial Mathematics
Offered by: Mathematics & Statistics
Coordinator: Dr. Toby Kenney (tkenney@mathstat.dal.ca) Mathematics and Statistics

This program provides many of the learning objectives and fundamental mathematical and statistical skills required to complete the classes (and examinations) of the Society of Actuaries accreditation program. Students who are interested in a career in actuarial science should consult the Basic Education Catalogue on the Society of Actuaries web page (www.soa.org) or the Syllabus of Basic Education on the Casualty Actuaries website (www.casact.org). This program also prepares students for employment in general financial institutions where modelling, quantitative risk analysis, management of investment instruments, asset and liability management, life contingencies and insurance assessment, and other complex financial calculations are required.

Admission to Certificate

To enrol in the Certificate in Actuarial and Financial Mathematics, students must declare the certificate through Dal Online (https://dalonline.dal.ca>Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Completion of a 120 credit hour Major or Honours program in Mathematics and/or Statistics
2. Completion of the following mathematics courses: MATH 1000, MATH 1010, MATH 1030 or 2030, MATH 2001, MATH 2002, MATH 2600
3. Completion of the following statistics courses: STAT 2060, STAT 2080, STAT 2450, STAT 3340 and STAT 3360
4. Completion of either:
   Financial Option: MATH 2120, MATH 3300, and MATH 3900
   OR
   Actuarial Option: STAT 3703, STAT 3720, and STAT 4390

Certificate in Animal Behaviour
Offered by: Biology, Psychology and Neuroscience
Coordinator: Dr. Simon Gadbois (Psychology and Neuroscience) simon.gadbois@dal.ca

The Certificate in Animal Behaviour provides students with an opportunity to specialize in Animal Behaviour through a set of courses and a research project.

Admission to Certificate

Students should enrol in the Certificate in Animal Behaviour in their third year of studies, when they are seeking approval from the Certificate Coordinator for the independent research component. To enrol, students must declare the certificate through Dal Online (https://dalonline.dal.ca>Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. To qualify for this certificate, students must complete all course requirements, and must receive approval for the research component of the certificate prior to the start of the research course.

To graduate with the certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program

Certificate requirements:
1. A minimum grade of B- is required in each of four mandatory courses:
- PSYO 2160.03/NESC 2160.03: Animal Behaviour
- PSYO 2501.03: Statistical Methods or STAT 2080.03: Statistical Methods for Data Analysis Inference
- BIOL 3062.03: Behavioural Ecology or PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour
- BIOL 3630.03: Field Methods in Animal Behaviour or NESC 3161.03/PSYO 3161.03: Measuring Behaviour or NESC 3165.03/PSYO 3165.03: Neuroethology

2. A grade of at least B- in all of 12 additional credit hours of courses chosen from the following list. Courses taken as one of the four mandatory classes cannot also be used to fulfill this requirement. Six credit hours must be at the 3000/4000 level.

**2000 level**

- ANSC 2003.03: Companion Animal Behaviour
- PSYO 2140.03/NESC 2140.03: Learning
- PSYO 2470.03/NESC 2470.03: Systems Neuroscience

**3000 level**

- ANSC 3002.03: Domestic Animal Behaviour
- BIOL 3062.03: Behavioural Ecology (if not used to fulfill Requirement 1 above)
- BIOL 3080.03/MARI 3080.03: Ecology and Evolution of Fishes
- BIOL 3327.03: Entomology
- BIOL 3622.03: Ornithology
- BIOL 3626.03: Field Studies of Marine Mammals
- BIOL 3628.03/MARI 3628.03: Marine Ornithology
- BIOL 3630.03: Field Methods in Animal Behaviour (if not used to fulfill Requirement 1 above)
- BIOL 3640.06: Tropical Ecology and Biodiversity (with Animal Behaviour project: counts for three credit hours only)
- BIOL 3632.03: Applied Field Methods in Fish Ecology
- BIOL 3639.03: Herpetology
- MARI 3090.03: Marine Mammalogy
- PSYO 3000.06/NESC 3000.06: Independent Research in Modern Psychology (Animal Behaviour topic)
- PSYO 3001.03/NESC 3001.03: Directed Research Project in Psychology or Neuroscience (Animal Behaviour topic)
- PSYO 3043.03/NESC 3043.03: Neurobiology of Learning
- PSYO 3044.03/NESC 3044.03: Laboratory Methods of Learning and Conditioning
- PSYO 3161.03/NESC 3161.03: Measuring Behaviour
- PSYO 3162.03/NESC 3162.03: Advanced Animal Behaviour (if not used to fulfill Requirement 1 above)
- PSYO 3165.03/NESC 3165.03: Neuroethology (if not used to fulfill Requirement 1 above)
- PSYO 3170.03/NESC 3170.03: Hormones and Behaviour
- PSYO 3180.03/NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- PSYO 3670.03/NESC 3670.03: Genes, Brain and Behaviour

**4000 level**

- BIOL 4323.03/MARI 4323.03: Biologging in Ecology
- BIOL 4800.06: Special Topics (Animal Behaviour topic)
- BIOL 4806.03/MARI 4806.03, BIOL 4807.03/MARI 4807.03, BIOL 4808.03/MARI 4808.03, BIOL 4810.03: Special Topics (Animal Behaviour topic)
- BIOL 4510.03 Cultural Evolution
- BIOL/MARI 4900.06: Honours Research and Thesis or BIOL 4901.03/MARI 4901.03 BIOL 4902.03/MARI 4902.03: Honours Research and Thesis I and II (with approved Animal Behaviour topic)
- MARI 4090.03: Evolutionary Ecology of Marine Mammals
- PSYO 4140.03 or NESC 4140.03: Animal Learning Topics
- PSYO 4160.03/NESC 4160.03: Topics in Behavioural Biology
- PSYO 4500.06/NESC 4500.06: Honours Research (with approved Animal Behaviour topic)

3. A grade of B- in 3 credit hours or more of independent research in Animal Behaviour.

The course used to fulfill this requirement can also be counted toward the courses that fulfill Requirement 2 above.
Students must obtain approval of their research topic from a Certificate Coordinator prior to the start of the research course. Animal behaviour research projects may be completed through one or more of PSYO 3100.03/NESC 3100.03 or PSYO 3101.03/NESC 3101.03, PSYO 3001.03/NESC 3001.03, PSYO 4500.06/NESC 4500.06, BIOL 4800.06, BIOL 4806.03/MARI 4806.03, BIOL 4807.03/MARI 4807.03, BIOL 4808.03/MARI 4808.03 or BIOL 4900.06.

Honours students may fulfill this requirement by conducting their honours thesis research on a topic in Animal Behaviour. Students are encouraged to further develop their study design and analysis skills by taking additional courses such as BIOL 4061.03 (Design of Biological Experiments) or BIOL 4062.03 (Analysis of Biological Data).

**Certificate in Applied and Computational Mathematics**

Offered by: Mathematics & Statistics

Coordinator: Dr. P. Selinger mathdirector@mathstat.dal.ca

This program is concerned with the development of the core mathematical and computational skills required in science, government and industry. Areas of application include everything from mathematical modeling to operations research to cryptography to software development.

**Admission to Certificate**

To enrol in the **Certificate in Applied and Computational Mathematics**, students must declare the certificate through Dal Online (https://dalonline.dal.ca >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

**Certificate Requirements:**

1. Completion of the 120 credit hour Major or Honours program in Mathematics or an equivalent program

2. Completion of the following mathematics courses: MATH 1000, MATH 1010, MATH 1030 (or MATH 2030), MATH 2001, MATH 2002, MATH 2040, MATH 2110 (or MATH/CSCI 2112), MATH 2120

3. Completion of at least four of: MATH 3120, MATH 3210, MATH 3260, MATH 3300, MATH 3330, MATH 3400

4. Completion of at least two of: MATH 4116, MATH 4220, MATH 4230, MATH 4250, MATH 4320

Additional recommended courses: MATH 2300, STAT 2060, STAT 2080

**Certificate in Aquaculture and the Environment**

Offered by: Faculty of Science

Coordinator: Dr. Diego Ibarra Diego.ibarra@dal.ca (Biology)

**Eligibility:** The certificate is open to any Dalhousie undergraduate student. Non-degree Dalhousie students may qualify for the certificate if they fulfill all course requirements at Dalhousie.

**Overview:** The **Certificate in Aquaculture and the Environment** consists of courses that include lectures, laboratories, and visits to coastal and land-based aquaculture sites. It is designed to provide students with knowledge of, and experience with general aspects of the cultivation of aquatic species. The emphasis is on understanding aquaculture - environment interactions, and acquiring the knowledge, skills and quantitative tools needed to assess and reduce the environmental footprint of aquaculture operations.

**Admission to Certificate**

To enrol in the **Certificate in Aquaculture and the Environment**, students must declare the certificate through Dal Online (https://dalonline.dal.ca >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. To qualify for the certificate, students must complete the course requirements, and have received approval from the Certificate Coordinator if a course other than MARI 3604 is used to fulfil subject area F.

To graduate with the Certificate, students must Apply to Graduate with a Certificate at the time they apply to graduate from their degree program.
Certificate Requirements

To obtain the Certificate in Aquaculture and the Environment, students must take one course from each of six subject areas (A to F), with a minimum of B- in each course. Note that most of these courses may also count toward a Major, Minor or Honours program in Biology or Marine Biology.

A. Introduction to aquaculture

- MARI 3602.03: Introduction to Aquaculture

B. Practical skills in aquaculture

- MARI 3603.03: Practical Aquaculture

C. Biology of aquatic organisms

One of

- MARI 3074.03 (or BIOL 3078.03): Physiology of Marine Animals Part I
- MARI 3076.03 (or BIOL 3079.03): Physiology of Marine Animals Part II
- MARI 3221.03 (or BIOL 3221.03): Diversity of Algae
- MARI 3301.03 (or BIOL 3301.03): Invertebrate Biology
- MARI 4080.03 (or BIOL 4080): Laboratory Studies of Fishes
- BIOL 4662.03/MARI 4662.03/OCEA 4230.03: Biology of Phytoplankton

D. Aquaculture and the environment

- MARI 4600.03: Ecosystem modelling for Aquaculture

E. Aquaculture management

One of

- OCEA 4401.03: Marine Management I
- OCEA 4402.03: Marine Management II
- BIOL 4001.03: Environmental Impact Assessment
- ENVS 3200.03: Introduction to Environmental Law
- ECON 3335.03: Environmental Economics
- SUST 3101.03: Food Systems and Sustainability: Feeding the 10 billion

F. Industry-relevant knowledge and experience

** One of

- MARI 3604.03: Field Aquaculture
- * MARI 3800.03 (or BIOL 3800.03): Experiential Learning
- * MARI 4806.03: Special Topics Independent Research
- * MARI 4901.03 and MARI 4902.03 (or MARI 4900.06): Honours Thesis
- * BIOL 4901.03 and BIOL 4902.03 (or BIOL 4900.06): Honours Thesis
- * MARI 8891.00 (or MARI 8892.00 or MARI 8893.00) Co-op work term
- * ENVS 3000.03: Environmental Science Internship
- * ENVS 8891.00 (or ENVS 8892.00 or ENVS 8893.00) Co-op work term
- * SUST 3002.03: ESS Engagement Project
- * SCIE 4701.03 and SCIE 4702.03 Science and Technology Innovation, Commercialization and Entrepreneurship I and II

* These courses must be pre-approved (prior to start of the course) by the certificate coordinator as having a focus on aquaculture

** Some alternatives used to fulfil Requirement F are not available to students in all programs. For example, MARI 4900 is open only to students in the Marine Biology Honours program, MARI 8891 and ENVS 8891 are open only to students in Marine Biology or Environmental Science Co-op programs.
Certificate in Data Analytics

Offered by: Faculty of Science

Coordinator: Dr. Theodore Kolokolnikov, Mathematics and Statistics (tkolokol@mathstat.dal.ca)

Eligibility: Open to Dalhousie undergraduate students

Overview: Data Analytics is an interdisciplinary field aimed at extracting knowledge from data of various forms. The techniques of data analytics draw heavily from the fields of statistics, computer science, and mathematics. Students completing the certificate will understand distinctions among data, information and knowledge, will be able to use the Structured Query Language (SQL) to manipulate relational databases, the R programming language to model data using a variety of machine learning and statistical models, and will be able to assess the performance of predictive models.

Admission to Certificate

To enrol in the Certificate in Data Analytics, students must declare the certificate through Dal Online (https://dalonline.dal.ca>Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by email.

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate requirements:

- MATH 1000: Differential and Integral Calculus I (or MATH 1215 or MATH 1280)
- MATH 1030: Matrix Theory and Linear Algebra I
- MATH 2040: Matrix Theory and Linear Algebra II (or MATH 2135)
- STAT 1060: Introduction to Statistics (or STAT 2060)
- STAT 2450: Introduction to Data Mining with R
- CSCI 2202: Computer Modeling for Scientists (or CSCI 1105 or CSCI 1110)
- CSCI 2141: Introduction to Database Systems
- One of
  - BIOC 4010: Bioinformatics
  - BIOL 4062: Analysis of biological data
  - CHEM 4205: Chemometrics
  - CSCI 4146: The process of data science
  - ECON 4440: Time series analysis in economics
  - ENVS 3100: Environmental analytics
  - ERTH 4520: GIS applications
  - MARI 4600: Ecosystem modelling for aquaculture
  - OCEA 4210/STAT 4390: Time series analysis in oceanography and meteorology
  - PHYC 3250: Computational methods in physics
  - PHYC 4250: Topics in numerical computing
  - STAT 4130: Bayesian data analysis
  - STAT 4350: Applied multivariate analysis
  - STAT 4550: Longitudinal data analysis
  - STAT 4620: Data analysis
  - STAT 4100: Survival analysis

Certificate in Data Science

This certificate is intended for students completing a Bachelor of Computer Science, Bachelor of Science in Computer Science, or a Bachelor of Science in Statistics, but is open to currently registered Dalhousie students in all Faculties; it will not be open for direct application.

This certificate requires a student to take two required courses and four electives from a list of elective courses with at least a C in each of them. Required courses are:
• CSCI 3151: Foundations of Machine Learning or STAT 3450: Statistical learning with R
• CSCI 4146: The Process of Data Science

Elective courses are:
• CSCI 4125: High Performance Computing
• CSCI 4141: Information Retrieval
• CSCI 4144: Introduction to Data Mining and Data Warehousing
• CSCI 4152: Natural Language Processing
• CSCI 4155: Machine Learning
• CSCI 4156: Reinforcement Learning with Gaming Applications
• CSCI 4166: Visualization
• STAT 2080: Statistical methods for Data Analysis and Inference
• STAT 2430: Data Visualization
• STAT 2450: Introduction to Data Mining with R
• STAT 3340: Regression and Analysis of Variance
• STAT 3360: Probability
• STAT 3740: Predictive Analysis
• STAT 4130: Advanced Statistical Theory
• STAT 4350: Multivariate Analysis
• STAT 4370: Stochastic Processes
• STAT 4390: Time Series Analysis
• STAT 4620: Data Analysis
• STAT 4690: Computational Statistics

Requirements
Note that to obtain a certificate, the degree requirements must be satisfied. To be awarded a Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate in Environmental Impact Assessment
Offered by: Faculty of Science

EIA Certificate Coordinator: Patricia Lane (Biology), patricia.lane@dal.ca

The Certificate in Environmental Impact Assessment is for students who are interested in, or majoring in environmental areas, and who wish to pursue additional training in EIA. This certificate is available to students in the Faculty of Science, Faculty of Agriculture, Faculty of Arts and Social Sciences, Faculty of Management, and the College of Sustainability.

Students will learn to:

1. Apply a Project EIA Framework in the preparation of a Nova Scotia-based EIA.
2. Demonstrate an understanding of relevant federal and provincial (Nova Scotia) legislation.
3. Design a meaningful stakeholder participation program.
4. Use environmental impact and risk methodologies to accurately predict project impacts.
5. Design an Environmental Management Plan that includes: mitigation, enhancement, compensation, monitoring, residual impacts and project accountability.
6. Critique an existing environmental assessment report.
7. Prepare a comprehensive project EIA for a physical project
8. Prepare a Strategic Environmental Assessment (SEA) for a federal policy.

Disclaimer: This EIA Certificate was developed within Dalhousie University and it is not designed to fulfill any governmental and/or professional requirements outside of the university, in Canada or abroad.

The Certificate requires a total of 24 credit hours as follows:

1. Required EIA course: BIOL 4001.03/ENVS 4001.03 (3 credit hours) to be taken in fourth year. Note: transfer or online courses are not acceptable substitutes for this requirement.
2. Introductory Science, SUST, Agriculture, or FASS course (minimum 3 credit hours) from Table 1.
3. Environmental courses with theoretical content from Table 2 (minimum 9 credit hours).
4. Methods courses with field, laboratory, statistical, or modelling experience from Table 3 (minimum 3 credit hours).
5. Supplementary courses in Major or Related Disciplines from Table 4 (minimum 6 credit hours).

Students must obtain a minimum grade of B for all courses counted toward the certificate. Classes cannot be substituted from one table to another. Please note that many classes are cross-listed, but only listed once for the department offering the class below. Students can use any one of the cross-listings.

Table 1. Introductory Courses Checklist (minimum of 3 credit hours from following list)

- BIOL 2060.03: Introductory Ecology OR BIOA 3001.03: Ecology
- ENVA2000.03/APSC2012.03: Environmental Studies I
- ENVA2001.03: Environmental Studies II

Certificate in Genetics
Offered by: Biochemistry & Molecular Biology, Biology, Microbiology & Immunology

Coordinators:
Dr. Claudio Slamovits claudio.slamovits@dal.ca (Biochemistry & Molecular Biology)
Debra Grantham grantham@dal.ca (Biology)
Dr. Ian Weaver ian.weaver@dal.ca (Medical Sciences, Psychology, Neuroscience)
Dr. Zhenyu Cheng zhenyu.cheng@dal.ca (Microbiology & Immunology - Until December 2020)
Dr. Lois Murray lois.murray@dal.ca (Microbiology & Immunology - As of January 2021)

The Certificate in Genetics provides students with an opportunity to complete a set of courses and research that will accord them recognition of specialization in genetics.

Admission to Certificate
Students should enrol in the Certificate in Genetics in their third year of studies, when they are seeking approval of the independent research component from the Certificate Coordinator for their degree program. To enrol in the Certificate in Genetics, students must declare the certificate through Dal Online (https://dalonline.dal.ca >Web for Students>Admissions>Declare Major/Minor/Certificate), and notify the Certificate Coordinator. To qualify for the certificate students must complete all course requirements, and have received approval for the research component prior to the start of the research course.

To graduate with the Certificate, students must apply to graduate with a certificate at the time they apply to graduate from their degree program.

Certificate requirements:
1. A minimum grade of a B- in four mandatory courses:
   - BIOL 2020.03: Cell Biology
   - BIOL 2030.03: Genetics and Molecular Biology
   - BIOC 2300.03: Introduction to Biochemistry
   - BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

2. A minimum grade of B- in 12 credit hours chosen from the following list. At least 6 credit hours must be at the 4000 level.

2000 level
   - BIOL 2040.03: Evolution

3000 level
   - BIOL 3036.03: Transgenic Organisms
   - BIOL 3037.03: Life Rewritten: Applications and Implications of Gene Editing and Synthetic Biology
   - BIOL 3042.03/MARI 3042.03: Molecular Ecology
   - BIOL 3044.03: Ecological Genetics
   - BIOL 3046.03: Molecular Evolution
   - BIOL 3102.03: Microbial Eukaryotes: Biodiversity and Evolution
   - MICI 3114.03: Virology
   - MICI 3119.03: Physiology of the Prokaryotic Cell
   - NESC 3670.03/PSYO 3670.03: Genes, Brain and Behaviour

4000 level
   - BIOC 4010.03: Bioinformatics
   - BIOC 4027.03/MICI 4027.03: Molecular Mechanisms of Cancer
   - MICI 4033.03: Advanced Microbial Genetics
   - MICI 4114.03: Advanced Topics in Molecular and Medical Virology
   - BIOC 4403.03: Genes and Genomes
• BIOC 4404.03: Gene Expression
• BIOC 4501.03: Medical Biotechnology
• BIOC 4835.03/BIOL 4035.03: Human Genetics
• NESC 4670.03: Behavioral Neuro(epi)genetics and Genomics

3. Other required courses (prerequisites for BIOC 3400.03)

• CHEM 2441.03, or CHEM 2401.03 and CHEM 2402.03

4. A minimum grade of B- in three credit hours or more of independent research on a topic involving microbial genetics, molecular genetics, transmission genetics or population genetics. Co-op Work Terms are not applicable. The research topic must be pre-approved by the Department's Certificate Coordinator prior to the start of the research course.

• BIOC 4001.03
• BIOC 4604.03
• BIOC 4605.03
• BIOL 4806.03/MARI 4806.03
• BIOL 4807.03/MARI 4807.03
• BIOL 4900.06/MARI 4900.06
• BIOL 4901.03/MARI 4901.03
• BIOL 4902.03/MARI 4902.03
• MICI 4703.03 and MICI 4704.03 (or MICI 4700X/Y.06)
• MICI 4701.03
• MICI 4702.03
• MICI 4901.03 and MICI 4902.03 (or MICI 4900X/Y.06)
• MICI 4901.03
• MICI 4902.03
• NESC 4501.03 and NESC 4502.03 OR PSYO 4501.03 and PSYO 4502.03 (or NESC 4500X/Y.06/PSYO 4500X/Y.06)
• SCIE 4101.03 and SCIE 4102.03 (or SCIE 4100X/Y.06)
• SCIE 4901.03 and SCIE 4902.03 (or SCIE 4900X/Y.06)

Certificate in Geographic Information Science (GIS)
Offered by: Earth Sciences, Environmental Sciences, Biology

Coordinators:
Dr. C.S Greene csgreene@dal.ca (Earth and Environmental Sciences)
Dr. D. Tittensor Derek.Tittensor@unep-wcmc.org (Biology)
Dr. E. Rapaport eric.rapaport@dal.ca (School of Planning)

The GIS Certificate program provides training and experience in geographic information science as part of an undergraduate degree program, usually in Earth Sciences, Environmental Science or Biology, and prepares students for further study or employment in the area. The Certificate requires the completion of GIS-related courses and completion of a major project that involves work with geographic information systems and geomatics.

Admission to Certificate

It is recommended that students enrol in the GIS Certificate in their second or third year of studies, and that they contact the Certificate Coordinator at that time. To enrol, students must declare the Certificate through Dal Online (https://dalonline.dal.ca >Web for Students>Admissions>Declare Major/Minor/Certificate). To qualify for the Certificate, students must complete all course requirements, and have received approval for the research component (project) from the Certificate Coordinator prior to the start of the research course.

To graduate with the Certificate, students must apply to graduate with a certificate at the time they apply to graduate from their degree program.

Certificate Requirements:
1. A minimum grade of B- in each of the following courses:

• ENVS 3500.03/ERTH 3500.03/GEOG 3500.03: Geoscience Information Management
2. A minimum grade of B- in a minimum of two of the following courses:

- GEOG 2000.03: Cartography
- GEOG 2006.03: Space, Place and GIS
- BIOL 3633.03/ENVS 3633.03/GEOG 3633.03: Spatial Information and GIS in Ecology
- ERTH 4530.03/GEOG 4530.03: Environmental Remote Sensing
- ENVS 2100.03: Environmental Informatics
- ENVS 3100.03: Environmental Analytics
- ENVS 3400.03/GEOG 3400.03: Environment and Human Health

3. Completion of a research project with an emphasis in geographic information science via one of the following sets of courses (minimum grade of B-). Research topics must be pre-approved by the Certificate Coordinator

Set 1

- BIOL 4901.03 and BIOL 4902.03 or MARI 4901.03 and MARI 4902.03: Honours Thesis (or the former BIOL 4900.06/MARI 4900.06)
- ENVS 4901.03/ENVS 4902.03: Honours Thesis
- ERTH 4101.03 and ERTH 4102.03: Research Project (or ERTH 4100.06)
- ERTH 4201.03 and ERTH 4202.03: Honours Thesis (or ERTH 4200.06)
- SUST 4800.03: Independent Study
- SUST 4901.03 and SUST 4902.03: Honours Thesis (or SUST 4900.06)

Set 2

- SCIE 4850.03/BIOL 4850.03/ENVS 4850.03/GEOG 4850.03: Geographic Information Science Research Project

Research Project Guidelines for the Certificate in Geographic Information Science

Students should learn how to design, manage and complete a research project that emphasizes the use of a geographic information system (GIS). Students will identify a suitable research problem and work to solve it through acquiring, organizing, analyzing and presenting data using GIS. A substantive analytical component involving GIS must be included. Projects should be undertaken after all or most of the coursework is completed, e.g. students should already be familiar with GIS concepts and functions, and be proficient in the use of at least one GIS package. Supervision and evaluation of research projects must include input from a professor or GIS technician competent in geographic information science, methods and technologies.

Students enrolled in an undergraduate program other than Biology, Environmental Science, Earth Sciences or the College of Sustainability, may be able to complete the project through a directed readings or honours thesis course listed within their home department. The project must be pre-approved by a Certificate Coordinator. Non-thesis students, or honours students who wish to complete the certificate through a project that is not part of their thesis, who are in Biology, Earth Sciences or Environmental Science should complete the project through SCIE 4850: Geographic Information Science Research Project.

Certificate in Human Physiology

Offered by: Physiology & Biophysics, Psychology & Neuroscience, Biology, Kinesiology

Coordinators:  Dr. Derek Kimmerly (Kinesiology students) dskimmerly@dal.ca
Dr. Nathan Crowder (Neuroscience & Psychology) Nathan.Crowder@dal.ca
Dr. Stefan Krueger (Medical Sciences & other programs) stefan.krueger@dal.ca

Eligibility: This certificate is open to currently registered Dalhousie students.

Overview: The Certificate in Human Physiology provides students with an opportunity to specialize in physiological studies through courses offered in the Medical Sciences, Biology, Neuroscience, and Kinesiology undergraduate programs, as well as experiential learning opportunities. The learning outcomes will vary between students and depend on their main area of undergraduate studies, as well as on individual interests. Concentrating on one or more cross-cutting themes, students enrolled in the certificate program may choose to:

- Examine the function and role of particular organ systems in human performance and disease.
• Analyze the function of the nervous and endocrine systems to appreciate how they regulate bodily functions and behaviour.
• Explore physiological mechanisms at molecular and cellular levels to develop a more thorough understanding of physiological and pathophysiological processes at a higher organizational level.

**Admission to Certificate:** Students should enrol in the Certificate Program in Human Physiology in their third year of studies. To enrol, students must declare the certificate through Dal Online (https://dalonline.ca >Web for Students>Admissions>Declare Major/Minor/Certificate) and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

**Certificate Requirements:**

1. A minimum grade of at least B- is required in 6 credit hours of the following core courses:
   • PHYL 2041 Human Neurophysiology and PHYL 2044 Systems Physiology or
   • BIOL 3078/MARI 3078 Animal Physiology I and BIOL 3079/MARI 3079 Animal Physiology II or
   • NESC 2470 Systems Neuroscience and PHYL 2044 Systems Physiology or
   • KINE 2310 Physiology of Exercise and KINE 2430 Motor Control & Learning

2. A grade of at least B- required in 15 elective credit hours chosen from the list of courses below. Courses can only be counted towards elective credits if they have not been used to fulfill core course requirements. No more than one 2000-level course can be used towards elective credits. A maximum of 9 credit hours from any one stream (PHYL, NESC, BIOL, KINE) can be used.
   • PHYL 3120 Exercise Physiology
   • PHYL 3320 Human Cell Physiology
   • PHYL 3520 Core Concepts in Medical Physiology
   • PHYL 3620 Human Physiology Lab
   • PHYL 4000 Synaptic Function
   • PHYL 4324 Endocrine Function
   • PHYL 4504 Respiratory Physiology
   • PHYL 4680 Cardiovascular Physiology
   • NESC 2150 Perceptual Processes
   • NESC 2570 Cellular Neuroscience
   • NESC 3051 Methods in Sensation and Perception
   • NESC 3170 Hormones & Behaviour
   • NESC 3670 Genes, Brain & Behaviour
   • NESC 3970 Molecular Neuroscience
   • NESC 4070 Chemical Neurobiology
   • BIOL 3430 Intro Human Histology
   • BIOL 4020 Advanced Cell Biology
   • KINE 3419 Appl Physiology Principles Human Performance
   • KINE 3250 Human Nutrition
   • KINE 3440 Sensory and Motor Function
   • KINE 4704 Cardiorespiratory Dynamics in Exercise

3. At least 6 credit hours of experiential learning or independent research. Research projects have to be conceptually or methodologically related to Physiology and be approved by the certificate program committee. Suitable courses for this requirement include PHYL 3600, NESC 3001, NESC 3100, NESC 3101, NESC 4501, NESC 4502, SCIE 3100, SCIE 4101, SCIE 4102, SCIE 4901, SCIE 4902, BIOL 3800, BIOL 4806, BIOL 4807, BIOL 4901, BIOL 4902, KINE 4801, KINE 4802, and KINE 4900X/Y.
Certificate in Information Technology
Offered by: Physics

Coordinator: Dr. Philip Bennett philip.bennett@dal.ca

The goal of this certificate is to recognize students who have completed courses with a substantial Information Technology (IT) component, and to provide these students with a document to present to potential employers who seek graduates with IT skills. Depending on the program of study, students may work with symbolic calculation packages such as MATLAB or MAPLE, statistical packages such as R or S-Plus, numerical computation or programming languages. Others develop proficiency in web design, or use of database, drawing (e.g. CAD) or GIS software. Experience with a variety of hardware and operating systems experience may further round out the set of skills.

The Certificate in IT is a discipline-based program available to students majoring in Physics.

Admission to Certificate

To enrol in the Certificate in Information Technology, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements (Physics):

- Completion of a 120 credit hour Major or Honours degree program in Physics
- Two of PHYC 2050.03, PHYC 3250.03, PHYC 4250.03
- One additional course which may be a CSCI or INFX course, ENGM 1081.03 or MATH 2300.03

Certificate in Materials Science
Offered by: Faculty of Science

Coordinator: Dr. Mita Dasog (Chemistry) mita.dasog@dal.ca

The Certificate in Materials Science provides recognition for students who have had significant training in the breadth and depth of materials science within their 120 credit hour Honours or Major program. It is particularly suited for students in Chemistry, Earth Sciences and Physics programs.

Admission to Certificate

To enrol in the Certificate in Materials Science, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail. Students may enrol in the second, third or fourth year of their programs, but early enrolment is advised.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements

1. At least four of the following courses, with a minimum grade of B- in each:
   
   - CHEM 3305.03/PHYC 3303 (or CHEM 3303.03): Materials Science
   - CHEM 4302.03: Intro to Surface Science
   - CHEM 4502.03: Polymer Science
   - CHEM 4311.03: Fundamental and Applied Electrochemistry
   - CHEM 4105.03: Inorganic Materials Synthesis
   - ERTH 2001.03: Earth Materials Science I
ERTH 2002.03: Earth Materials Science II

PHYC 3900.03: Introduction to Soft Condensed Matter Physics

PHYC 4230.03: Introduction to Condensed Matter

BIOE 4391.03: Polymeric Biomaterials

BMNG 5110.03: Biocompatibility and Biomaterials Design

2. Students must complete a research project with a materials emphasis (pre-approved by the Certificate Coordinator) via one of the following sets of courses, with a minimum grade of B-:

- CHEM 4801.03 and CHEM 4802.03
- CHEM 4902.03 and CHEM 4903.03 (or CHEM 4901.06)
- ERTH 4201.03 and ERTH 4202.03 (or ERTH 4200.06)
- ERTH 4101.03 and ERTH 4102.03 (or ERTH 4100.06)
- PHYC 4800.03 and PHYC 4850.03

 Certificate in Medicinal Chemistry
 Offered by: Faculty of Science

Coordinator: Dr. Alison Thompson alison.thompson@dal.ca (Chemistry)

The Department of Chemistry offers a Certificate in Medicinal Chemistry in conjunction with its Major and Honours programs. This certificate is intended to reflect that the student has completed a course of study in chemistry that is appropriate for employment or further study related to pharmaceutical development and production.

Admission to Certificate

To enrol in the Certificate in Medicinal Chemistry, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate), and notify the Certificate Coordinator by e-mail.

To graduate with the Certificate, students must apply to graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

- Completion of a 120 credit hour program in Chemistry (Honours, Combined Honours, Major, Double Major)
- CHEM 2101.03, CHEM 2201.03, CHEM 2301.03, CHEM 2304.03, CHEM 2401.03, CHEM 2402.03
- CHEM 3203.03, CHEM 3401.03, CHEM 3404.03, CHEM 3601.03
- CHEM 4401.03, CHEM 4601.03
- Any two of: CHEM 3301.03, CHEM 4205.03, CHEM 4206.03, CHEM 4301.03, CHEM 4402.03

Recommended Electives: BIOC 2300.03, BIOC 2610.03, BIOC 3700.03, BIOC 4701.03

Certificate in Neurotechnology Innovation
Offered by: Faculty of Science

Coordinator: Dr. Aaron Newman, Department of Psychology and Neuroscience (aaron.newman@dal.ca)

Overview Neurotechnology is an area of research and application involving technologies that measure and/or modulate brain function. Technologies include hardware, software, and drugs, and have applications in several areas including clinical diagnosis and treatment, health promotion and maintenance (including cognitive health), entertainment, and forensics. The undergraduate certificate in Neurotechnology Innovation is designed to provide foundational knowledge in this multi-disciplinary area. The certificate will also provide an understanding of how neurotechnologies can be translated into applications that are available to patients and consumers - through training in innovation, design, and commercialization. The Neurotechnology Innovation certificate provides students with knowledge in:

- Basic neuroscience
Eligibility  The Certificate is oriented toward undergraduate students majoring in Neuroscience, but is open to students in other programs. Students from outside the Faculty of Science (Arts & Social Sciences, Computer Science, Engineering, Management) are welcome, but should consult with an advisor from their home program prior to enrolling.

Admission  To enrol in the Certificate in Neurotechnology Innovation, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate).

To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

Certificate Requirements
The certificate requires completion of 18 credit hours of coursework, in addition to the prerequisites that any of the required courses have. The certificate will be awarded based on successful completion of all of the student's degree requirements, as well as the following courses required for the certificate. Students should consult the University Calendar and departmental requirements for their major regarding the limitations that may be imposed upon the number of credit hours taken outside of the Faculty in which they are majoring, as well as prerequisites for the courses required for the certificate.

1. Successful completion of courses from each of the three following sections, as detailed below (or courses deemed equivalent by the Certificate Coordinator):
   (a) NESC 2470 Systems Neuroscience or
   PSYO 2770 Brain and Behaviour
   (b) At least one of
   NESC/PSYO 3505 Neural Data Science
   CSCI 1105 Introduction to Programming
   CSCI 1110 Introduction to Computer Science
   CSCI 2202 Computer Modelling for Scientists
   CSCI 2203 Data Science for Everyone
   PHYC 2050 Computer Simulation in Science
   (c) SCIE 4701 and SCIE 4702 Science and Technology Innovation, Commercialization and Entrepreneurship

2. Completion of at least three credit hours (one course) from each of the two topic areas listed below. Courses used to satisfy the requirements below cannot also be used to satisfy Requirement 1 above. Note that many of these courses have additional prerequisites; students are responsible for identifying and fulfilling any such prerequisites and/or obtaining special permission from the instructor.
   (a) Neuroscience/Neurotechnology
   PHYC 2250 Physics of Biological and Medical Technology
   NESC/PSYO 3137 Research Methods in Cognitive Neuroscience
   NESC/PSYO 3227 Principles of Human Neuropsychology
   NESC/PSYO 3237 Drugs and Behaviour
   NESC 4070 Chemical Neurobiology
NESC 4177 Theoretical Neuroscience
NESC 4185 Synaptic Function and Plasticity
PHAC 3001 Pharmacology I

(b) Computer and Data Science

Note that not all courses are available to non-Computer Science majors every year. Please consult with the Faculty of Computer Science regarding enrolment in these courses

NESC/PSYO 3505 Neural Data Science
CSCI 1107 Social Computing
CSCI 1108 Experimental Robotics
CSCI 1110 Introduction to Computer Science
CSCI 1120 Introduction to Computer Systems
CSCI 2110 Data Structures and Algorithms
CSCI 2134 Software Development
CSCI 2141 Intro to Database Systems
CSCI 2202 Introduction to Programming with Applications for Scientists
CSCI 2203 Data Science for Everyone
PHYC 2050 Computer Simulation in Science

Notes on the Computer Science course options:

• CSCI 1105 and 1110 are mutually-exclusive options for an introductory computer science course. You should take CSCI 1105 if you have no prior computer programming/coding experience, or CSCI 1110 if you have previous programming experience (e.g., a past high school or university class in programming, or independent programming experience). Students with some programming experience who are unsure which course to register for, should consult with an advisor in the Computer Science program.
• CSCI 2202 Computer Modelling for Scientists and CSCI 2203 Data Science for Everyone have no prerequisites, and do not assume prior programming experience. If you choose to take CSCI 2202 first, you should not take CSCI 1105 after, as the content will be redundant. However, taking both CSCI 2202 and CSCI 1110 in either order is acceptable.
• Likewise, if you take NESC/PSYO 3505 first, you should not take CSCI 1105 after, as the content will be redundant.

Certificate in Science Communication
Offered by: Faculty of Science

Coordinator: Dr. Leanne Stevens, Leanne.stevens@dal.ca

Description: The focus of the Certificate in Science Communication is to develop the communication skills of science students, through courses focused on understanding the history of science in the media, ethics in science, and communicating science to non-scientists. This certificate is open to any student pursuing a Bachelor of Science degree (BSc or BSc(MedSci)) in the Faculty of Science.

Eligibility: Students currently registered in a Bachelor of Science degree offered by the Faculty of Science (BSc, BSc(Medical Sciences)).

Admission to Certificate: To enrol in the Certificate in Science Communication, students must declare the certificate through Dal Online (https://dalonline.dal.ca > Web for Students > Admissions > Declare Major/Minor/Certificate) and notify the Certificate Coordinator.

To qualify for the Certificate, students must complete all course requirements, and the Portfolio of Science Communication.
To graduate with the Certificate, students must apply to Graduate with a Certificate at the time they apply to graduate from their degree program.

**Certificate Requirements**

The certificate requires completion of 15 credit hours of coursework, in addition to the prerequisites that any of the required courses have. The certificate will be awarded based on successful completion of all the student's degree requirements, as well as the following courses (and portfolio) required for the certificate (all with minimum grades of B).

1) **Core requirements**: Students must complete all three core requirements (9 credit hours total), with a grade of B or better in each.

- HSTC 2400.03 /JOUR 2400.03 Science and the Media
- PHIL 2680.03/PHIL 1050.03 Ethics in Science *(preferred)* Accepted alternates: PHIL 2480.03 Environmental Ethics, PHIL 2810.03 Ethics in Health Care: Social Policy
- SCIE 3211.03 Communicating Science to Non-Scientists

2) **Topics in Communication**: Students must complete at least 6-credit hours of communications-focused courses, with a grade of B or better in each, from the list below:

- ASSC 3150.03 Intercultural Communication I
- BIOL 4880.03 / MARI 4880.03 Communicating Science for Societal Impact
- CMMT 3000.03 Human Communication
- HSTC 2500.03 Science Fiction in Film
- INTD 3021.03 Communicating Development and Environment
- JOUR 1002.03 Foundations in Journalism I
- MGMT 3602.03 Professional Communication Skills
- MGMT 4041.03 Environmental Education
- NESC 3011.03/NESC 3012.03 / PSYO 3011.03/PSYO 3012.03 Experiential Learning in Science Communication
- SCIE 3333.03 Science Education

3) **Portfolio in Science Communication** (SCIE 4211.03): Students are required to register for this zero-credit hour course in the semester that they are submitting their completed portfolio for evaluation (typically, the final semester of their degree).

The portfolio is a record that can be shared with future employers and built upon into the future. It will include and document, at a minimum:

i) Two exemplary pieces of science communication. These pieces can be in any format and from courses or extracurricular activities, but *cannot be* from any of the three required courses (HSTC 2400, PHIL 2680, or SCIE 3211): written, blog post, infographic, podcast, video, etc. Students must provide a reflection/explanation of the pieces and describe how they effectively communicate science.

ii) Evidence of at least one public engagement in science communication, paired with a short essay outlining skills used in the engagement, challenges faced, and solutions achieved, and constructive self-criticism of the student's performance. Examples include Soapbox Science, Let’s Talk Science, Science Slam Canada, etc.

iii) Reflection and critique of the courses completed as part of the certificate – outlining how each course contributed to their learning, skills learned, and areas for further growth and development related to science communication.

**OPTIONAL**: Students who have completed the coursework for the Certificate in Science Communication (items 1 & 2 in Certificate Requirements), have the option to ‘upgrade’ to the Certificate in Science Communication & Leadership. Students wishing to switch to the Science Communication & Leadership certificate must consult with the coordinators for BOTH certificates. At least six additional credit hours must be completed, including the SCIE 4444.03 Science Leadership capstone course. Consult the Academic Calendar for more information and full details on the Science Communication & Leadership certificate.

**NOTE**: Students can only receive ONE of the Science Communication or Science Communication & Leadership certificates. The two certificates are considered exclusionary.

**Certificate in Science Communication and Leadership**

Offered by: Faculty of Science

Coordinator: asscdean.science@dal.ca
The focus of the Certificate in Science Communication and Leadership is to develop basic leadership and communication skills specifically in and through the sciences, to enable Dalhousie Science graduates to better understand the nature and context of science, to consider the process of change, and to have the skills to communicate and lead effectively. The Certificate is available to any undergraduate student in the Faculty of Science. The Certificate in Science Communication and Leadership builds on the content of the Science Communication Certificate: students can only receive credit for either the Science Communication Certificate or the Science Communication and Leadership Certificate.

The Certificate in Science Communication and Leadership replaces the Science Leadership and Communication Certificate. Students who enrolled in the Science Leadership and Communication Certificate prior to Fall 2022 should consult the Calendar for 2021-22 for details on completion of this Certificate.

Admission to the Certificate

Students may enroll in the Certificate in Science Communication and Leadership at any point during their undergraduate program. Students must contact the Certificate Coordinator when seeking permission to enroll in the Portfolio of Learning non-credit course required for completion of this Certificate (SCIE 4445). To enroll in the Certificate, students must declare the Certificate through Dal Online and notify the Certificate Coordinator by email that they have done so.

To graduate with the Certificate, students must apply to graduate with the Certificate at the time they apply to graduate from their degree program.

Certificate Requirements:

1. Leadership: Core required course
   SCIE 4444.03: Leadership in Science

2. Communicating Science: Core required course
   SCIE 3211.03: Communicating Science

3. Science communication elective: One and no more than 2 of the following Topics in Communication: with a grade of B or better
   - ASSC 3150.03 Intercultural Communication I
   - BIOL 4880.03/MARI 4880.03 Communicating Science for Societal Impact
   - CMMT 3000.03 Human Communication
   - HSTC 2500.03 Science Fiction in Film
   - INTD 3021.03 Communicating Development and Environment
   - JOUR 1002.03 Foundations in Journalism I
   - MGMT 3602.03 Professional Communication Skills
   - MGMT 4041.03 Environmental Education
   - NESC 3011.03/NESC 3012.03 / PSYO 3011.03/PSYO 3012.03 Experiential Learning in Science Communication
   - SCIE 3333.03 Science Education

4. Understanding the nature and context of science
   HSTC 2400.03: Science and the Media

5. Ethics in Science: One of the following required courses
   - PHIL 2680.03: Ethics in Science
   - PHIL 1050:03: Ethics in Science
   - (NOTE: CREDIT WILL NOT BE GIVEN FOR BOTH PHIL 2680 and PHIL 1050)
   - PHIL 2480.03: Environmental Ethics
   - PHIL 2810:03: Ethics in Health Care: Social Policy

6. Discipline-specific course: Note that one of these courses may replace the second Topics in Science Communication requirement (#3 above)
   - BIOL 2040.03: Evolution
   - ECON 2850.03/PHYC 2850.03: Science and Economics of Climate Change
ENVS 3501.03: Environmental Problem-solving I
ERTH 3001.03: Field school
BIOL 4664.03/MARI 4664.03: History of Marine Science*
NESC 2007.03: Neuroscience Principles and Methods
PSYO 2000.03: Methods in Experimental Psychology
PSYO 3581.03: History of Psychology I
PSYO 3582.03: History of Psychology II
BIOC 4501.03: Medical Biotechnology I
MICI 2400.03: Laboratory Methods in Microbiology and Immunology
OCEA 2020.03: Tools and Concepts in Ocean Sciences I

Other courses may be considered. Please consult a coordinator.

* Cross-listed as OCEA 4331.03, HIST 3073.03, HSTC 3331.03, SCIE 4000.03

7. Portfolio of leadership development (SCIE 4445.00). Only register for this zero-credit hour course in the semester that you are submitting your completed portfolio for evaluation, once all other components are completed (or in the final stages of completion).

The portfolio is a record that can be shared with future employers, and built upon in the future. It will document, at a minimum:

- The activities undertaken in each of the above 6 components of the Certificate
- Evidence of your development as a leader and communicator in science throughout the Certificate
- Reflections on how each component fits into leadership and communication development in your discipline / science more broadly

Co-operative Education in Science

The Co-op Program allows students to alternate three, career-focused work terms with study terms and receive a co-op degree designation upon graduation. Co-op enables students to apply what they learn in class to real-world work situations and then apply what they learn at work to their classroom studies, thereby enriching their learning. It also helps students to learn more about their career options by test-driving different work environments before they graduate.

Co-op is available to students in many of our BSc (120 credit hour) Honours or Major programs. Interested students normally apply to join Co-op at the end of their first year of study.

Further details are available from departmental Co-op Academic Advisors and from S.I.T.E.

Actuarial Science

Location:

Fax Number: (902) 494-5130
Email Address: info@mathstat.dal.ca
Website: www.dal.ca/mathstat

Introduction

Actuarial Science is the quantitative study of risk, particularly financial risk, and the methods for managing it. It is traditionally associated with insurance and pension plans, but can be applied to a wide range of other areas where there is need for assessment of risk. An Actuarial Science degree provides students with the background for a career in Actuarial Science. Course offerings provide
the knowledge and techniques needed by students to prepare to write most of the Society of Actuaries preliminary examinations. Students will learn the relevant mathematical and statistical techniques, with specific applications to Actuarial Science, and acquire a basic understanding of Economics and Business.

The Dalhousie Actuarial Science program is offered through the Department of Mathematics and Statistics.

**Degree Programs**

The Department of *Mathematics and Statistics* offers the following degree programs in *Actuarial Science*.

- BSc (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- Minor in *Actuarial Science*
- A post-baccalaureate diploma

* May be combined with Minor programs from other disciplines

Departmental Requirements for these programs are described below. In addition to departmental requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections of this calendar.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with the Actuarial Science undergraduate academic advisor.

**BSc (120 credit hour) Concentrated Honours in Actuarial Science**

Students who obtain an Honours degree will have covered the subject material required for sitting most of the Society of Actuaries examinations. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Actuarial Science with a grade of C or better and a minimum GPA of 3.0. Honours students are required to write a research-based Honours thesis. The research thesis and the Honours Qualifying Examination requirement are satisfied through completion of STAT 4950.03/ACSC 4950.03.

**Admission to Honours**

Students must apply for admission to Honours programs. Students considering Honours in Actuarial science should consult with the Actuarial Science Honours Advisor early in their studies.

**Departmental requirements**

In addition to fulfilling the requirements outlined in the *Academic Regulations* and the [College of Arts and Science Degree Requirements](#) sections of this calendar, students in a BSc *Concentrated Honours program in Actuarial science* must complete the following courses:

**1000 level**

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II or MATH 1500X/Y: Calculus
- MATH 1030.03: Matrix Theory and Linear Algebra I
- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics

**2000 level**

- CSCI 2202.03: Computer modelling for scientists
- MATH 2001.03: Intermediate Calculus I
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
• STAT 2080.03: Statistical Methods for Data Analysis and Inference
• STAT 2450.03: Introduction to Data Mining with R
• STAT 2600.03: Theory of Interest/MATH 2600.03: Theory of Interest

3000 level

• STAT 3340.03: Regression and Analysis of Variance
• STAT 3360.03: Probability
• STAT 3460.03: Intermediate Statistical Theory
• ACSC 3703.03/STAT 3703.03: Actuarial Models I
• ACSC 3720.03/STAT 3720.03: Life Contingencies I

4000 level

• ACSC 4950.03/STAT 4950.03: Honours Research Project

Choices

• Two of the following courses:
  - ACSC 3740.03: Predictive Analytics
  - ACSC 4703.03/STAT 4703.03: Actuarial Models II
  - ACSC 4720.03/STAT 4720.03: Life Contingencies II

• One of the following courses:
  - STAT 3450.03: Statistical learning with R
  - STAT 4350.03: Applied Multivariate Analysis
  - STAT 4390.03: Time Series Analysis
  - STAT 4620.03: Data Analysis

Electives

• In addition to the above courses, you must take at least 2 additional elective courses. The elective courses can be chosen from any of the courses listed above, or from the following courses, or any courses that are specified as Actuarial Science electives in any future version of the University Calendar prior to the time of your graduation.

2000 level

MATH 2052.03: Introduction to Numerical Programming
MATH 2120.03: Methods of Ordinary Differential Equations
MATH 2300.03: Mathematical Modelling
MATH 2505.03: Introductory Analysis
STAT 2430.03: Data Visualization

3000 Level

MATH 3120.03: Differential Equations
MATH 3210.03: Introduction to Numerical Analysis
MATH 3260.03: Applied Differential Equations
MATH 3300.03: Optimization
MATH 3400.03: Classical Game Theory
MATH 3501.03: Intermediate Analysis I
MATH 3502.03: Intermediate Analysis II
MATH 3900.03: Financial Mathematics

4000 Level

MATH 4010.03: Introduction to Measure Theory and Integration
MATH 4140.03: Introduction to Functional Analysis
MATH 4540.03: Applied Analysis
STAT 4100.03: Survival Analysis
STAT 4130.03: Bayesian Data Analysis
STAT 4370.03: Stochastic Processes
STAT 4390.03: Time Series Analysis
STAT 4620.03: Data Analysis
STAT 4690.03: Computational Statistics

BSc or BA (120 credit hour) Combined Honours in Actuarial Science and another subject

Students who wish to study Actuarial Science in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Actuarial Science may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. For Actuarial Science, this requirement is satisfied through ACSC 4950.03/STAT 4950.03.

Departmental requirements

Students in a BSc Combined Honours program in Actuarial Science and another subject must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections of this calendar.

The required actuarial science and statistics courses at or above the 2000 level with a grade of C or better in each are the following:

2000 Level

- CSCI 2202.03: Computer modelling for scientists
- MATH 2001.03: Intermediate Calculus
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 2600/MATH 2600.03: Theory of Interest

3000 Level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I

Choices

You must also complete two of the following courses:
Electives

The requirements for combined honours degrees include:

Minimum of 66, maximum of 84 credit hours beyond the 1000 level in two subjects, not more than 54 credit hours nor fewer than 30 credit hours being in either, including at least 18 credit hours above the 2000 level in each subject. Grades in honours subject courses must be C or better.

If there is no overlap in required courses between Actuarial Science and your other honours subject, then the above requirements will satisfy this condition. If the other honours subject has some overlap in required courses, you may need to take some additional elective courses. For this purpose, the following courses can count as Actuarial Science Electives.

2000 Level

- MATH 2052.03: Introduction to Numerical Programming
- MATH 2120.03: Methods for Ordinary Differential Equations
- MATH 2300.03: Mathematical Modelling
- MATH 2505.03: Introductory Analysis
- STAT 2430.03: Data Visualization

3000 Level

- MATH 3120.03: Differential Equations
- MATH 3210.03: Introduction to Numerical Analysis
- MATH 3260.03: Applied Differential Equations
- MATH 3300.03: Optimization
- MATH 3400.03: Classical Game Theory
- MATH 3501.03: Intermediate Analysis I
- MATH 3502.03: Intermediate Analysis II
- MATH 3900.03: Financial Mathematics
- STAT 3450.03: Statistical learning with R

4000 Level

- MATH 4010.03: Introduction to Measure Theory and Integration
- MATH 4140.03: Introduction to Functional Analysis
- MATH 4540.03: Applied Analysis
- STAT 4100.03: Survival Analysis
- STAT 4130.03: Bayesian Data Analysis
- STAT 4350.03: Applied Multivariate Analysis
- STAT 4370.03: Stochastic Processes
- STAT 4390.03: Time Series Analysis
- STAT 4620.03: Data Analysis
- STAT 4690.03: Computational Statistics

BSc (120 credit hour) Major in Actuarial Science

The 120 credit hour major is suited to students who want to focus on Actuarial Science and prepare for sitting the Society of Actuaries examinations, but wish to have a program that is somewhat less constrained than the Honours program.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections of the calendar, students in a BSc Major program in Actuarial science must complete the following courses:

1000 level
• MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II or MATH 1500X/Y: Calculus
• MATH 1030.03: Matrix Theory and Linear Algebra
• ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics

2000 level

• CSCI 2202.03: Computer modelling for scientists
• MATH 2001.03: Intermediate Calculus I
• MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
• STAT 2060.03: Introduction to Probability and Statistics
• STAT 2080.03: Statistical Methods for Data Analysis and Inference
• STAT 2450.03: Introduction to Data Mining with R
• STAT 2600.03 Theory of Interest/MATH 2600.03: Theory of Interest

3000 level

• STAT 3340.03: Regression Analysis
• STAT 3360.03: Probability
• STAT 3460.03: Intermediate Statistical Theory
• ACSC 3703.03/STAT 3703.03: Actuarial Models I
• ACSC 3720.03/STAT 3720.03: Life Contingencies I

Choices

Two of the following courses:

• ACSC 3740.03: Predictive Analysis
• ACSC 4703.03/STAT 4703.03: Actuarial Models II
• ACSC 4720.03/STAT 4720.03: Life Contingencies II

One of the following course:

• STAT 3450.03: Statistical learning with R
• STAT 4350.03: Applied Multivariate Analysis
• STAT 4390.03: Time Series Analysis
• STAT 4620.03: Date Analysis

BSc or BA (120 credit hour) Double Major in Actuarial Science and another subject

The Double Major degree program allows students to combine a study of *Actuarial Science* with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. *Actuarial Science* may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

**Departmental requirements**

Students in a BSc or BA *Double Major in Actuarial Science* and another subject must fulfill the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections of this calendar.
The required actuarial science and statistics courses at or above the 2000 level are the following:

2000 Level

- CSCI 2202.03: Computer modelling for scientists
- MATH 2001.03: Intermediate Calculus I
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 2600.03: Theory of Interest/MATH 2600.03: Theory of Interest

3000 Level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I

Choices

Two of the following courses:

- ACSC 3740.03: Predictive Analytics
- ACSC 4703.03/STAT 4703.03: Actuarial Models II
- ACSC 4720.03/STAT 4720.03: Life Contingencies II

One of the following courses:

- STAT 3450.03: Statistical learning with R
- STAT 4350.03: Applied Multivariate Analysis
- STAT 4390.03: Time Series Analysis
- STAT 4620.03: Data Analysis

Electives

In addition to the above courses, you must take ACSC courses satisfying the following requirements:

- 60-84 credit hours at or above the 2000 level between the two majors subjects, with 30-48 in each subject.

If there is overlap between your other subject, you may need to take additional elective courses in Actuarial Science. The elective courses can be chosen from any of the courses listed above, or from the following courses, or any courses that are specified as Actuarial Science electives in any future version of the University Calendar prior to the time of your graduation.

2000 Level

- MATH 2052.03: Introduction to Numerical Programming
- MATH 2120.03: Methods for Ordinary Differential Equations
- MATH 2300.03: Mathematical Modelling
- MATH 2505.03: Introductory Analysis
- STAT 2430.03: Data Visualization

3000 Level

- MATH 3120.03: Differential Equations
- MATH 3210.03: Introduction to Numerical Analysis
- MATH 3260.03: Applied Differential Equations
- MATH 3300.03: Optimization
• MATH 3400.03: Classical Game Theory
• MATH 3501.03: Intermediate Analysis I
• MATH 3502.03: Intermediate Analysis II
• MATH 3900.03: Financial Mathematics

4000 Level

• MATH 4010.03: Introduction to Measure Theory and Integration
• MATH 4140.03: Introduction to Functional Analysis
• MATH 4540.03: Applied Analysis
• STAT 4100.03: Survival Analysis
• STAT 4130.03: Bayesian Data Analysis
• STAT 4370.03: Stochastic Processes
• STAT 4390.03: Time Series Analysis
• STAT 4620.03: Data Analysis
• STAT 4690.03: Computational Statistics

Minor in Actuarial Science
(for students in 120 credit hour programs other than Actuarial science)

Students in other 120 credit hour degree programs may choose to include a Minor in Actuarial science in their program. Students taking a Minor in Actuarial science may also consider to take the Certificate in Actuarial and Financial Mathematics.

Departmental Requirements
A minimum of 18 credit hours in Actuarial Science courses at the 2000 level or higher. It is possible to count Mathematics or Statistics courses towards these requirements, so long as they are not counted towards a candidate's Major or Honours subject.

A minor degree in Actuarial Science must include the following courses:

• STAT 2600.03/MATH 2600.03: Theory of Interest
• STAT 3360.03/MATH 3360.03: Probability

Plus at least two of

• ACSC 3703.03/STAT 3703.03: Actuarial Models I
• ACSC 3720.03/STAT 3720.03: Life Contingencies I
• ACSC 4703.03/STAT 4703.03: Actuarial Models II
• ACSC 4720.03/STAT 4720.03: Life Contingencies II

The remaining credit hours can be chosen from any ACSC, STAT or MATH courses at or above the 2000 level.

Diploma in Actuarial Science
(30 credit hours)

Students with a general 90 credit hour BSc degree in Mathematics, Statistics, Economics, or another quantitative discipline, may apply for admission into a Diploma in Actuarial Science program, provided they have completed the appropriate Mathematics and Statistics courses. A strong background in Mathematics and Statistics is necessary, and courses taken should cover multidimensional calculus (equivalent to MATH 2001: Intermediate Calculus I), matrix theory (equivalent to MATH 2030: Matrix Theory and Linear Algebra I), basic probability theory (equivalent to STAT 2060: Introduction to Probability and Statistics) and introductory R programming (equivalent to STAT 2450: Introduction to Data mining with R).

Departmental requirements

• STAT 2080.03: Statistical Methods for Data Analysis and Inference
• STAT 2600.03/MATH 2600.03: Theory of Interest
• STAT 3340.03: Regression and Analysis of Variance
• STAT 3360.03: Probability
• STAT 3460.03: Intermediate Statistical Theory
- ACSC 3703.03/STAT 3703.03: Actuarial Models I
- ACSC 3720.03/STAT 3720.03: Life Contingencies I
- Two of the following courses:
  - ACSC 3740.03/STAT 3740.03: Predictive Analytics
  - ACSC 4703.03/STAT 4703.03: Actuarial Models II
  - ACSC 4720.03/STAT 4720.03: Life Contingencies II
- One of the following courses:
  - STAT 3450.03: Statistical learning with R
  - STAT 4350.03: Applied Multivariate Analysis
  - STAT 4390.03: Times Series Analysis
  - STAT 4620.03: Date Analysis

In cases that students have already taken some of the above courses prior to entering the program, in consultation with the Actuarial Science undergraduate academic advisor, students can choose other same level ACSC, STAT or MATH courses as substitute courses to fulfil the total credit hour requirement.

After completion of the diploma program, students will be prepared to write most of the Society of Actuarial examinations.

**Minors and Certificates for Actuarial Science Students**

**Minors available to students in Actuarial Science**

Minor programs allow students to develop subject specialities in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs. Students in a BSc or BA (120 credit hour) program in *Actuarial Science* may choose to include a Minor selected from the list of approved *Minors* in this Calendar. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program. Minor subjects in Economics or Commerce are highly recommended subjects for Actuarial Science major students.

**Certificates**

In combination with a BSc or BA in Actuarial Science, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the *Certificate Coordinator* to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.

A complete list of *Faculty of Science Certificates* and requirements can be found in the *Faculty of Science* section of this calendar. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the *College of Arts and Science Degree Requirements* section of the calendar.

Certificates of particular interest to student enrolled in a BSc or BA in Actuarial science include:

- Certificate in Applied and Computational Mathematics
- Certificate in Data Science

**Courses**

**Course Descriptions**

**ACSC 3703 Actuarial Models I**

*CREDIT HOURS: 3*

This class builds on the material in STAT 3360 to develop the theoretical basis for construction and evaluation of actuarial models. Topics covered include survival models, probability distributions, deductibles and limits, and aggregate loss models, with application to insurance.

**PREREQUISITES:** STAT 3360.03 OR MATH 3360.03 or permission of instructor

**CROSSLISTED:** STAT 3703.03

**EXCLUSIONS:** STAT 4701.03
ACSC 3720 Life Contingencies I
CREDIT HOURS: 3
This course introduces the student to the mathematical models for valuation of life contingencies (e.g. life insurance policies). The course covers both the statistical aspects of modelling survival data, and the financial aspects of valuing uncertain future cash-flows.
PREREQUISITES: STAT 3360.03/MATH 3360.03 and STAT 2600.03/MATH 2600.03
CROSSLISTED: STAT 3720.03

ACSC 3740 Predictive Analytics
CREDIT HOURS: 3
This course teaches students to analyze data in a real-world context, going through all stages of the data analysis: problem formulation; initial data exploration; model selection and validation; and communication of results. It is intended that this course should prepare students for the Society of Actuaries Predictive Analytics examination.
COREQUISITES: Stat/Math 3340
PREREQUISITES: STAT 2450
CROSSLISTED: STAT 3740
FORMATS: Lecture

ACSC 3750 Credibility Theory
CREDIT HOURS: 3
Credibility theory deals with the difficulty in combining information from two samples, one of which is small and relevant, the other is large but less relevant. In this course, we will study different approaches to dealing with this problem.
COREQUISITES: STAT 3703.03/ACSC 3703.03
PREREQUISITES: STAT 3360.03 or MATH 3360.03
CROSSLISTED: STAT 3750.03

ACSC 4703 Actuarial Models II
CREDIT HOURS: 3
This course focuses on the development of statistical methods for the estimation and validation of actuarial models. Topics to be discussed include: methods of estimation, properties of estimators, goodness of fit, credibility theory, survival estimators, measures of risk, estimation of severity.
PREREQUISITES: STAT 3703.03 or ACSC 3703.03
CROSSLISTED: STAT 4703.03

ACSC 4720 Life Contingencies II
CREDIT HOURS: 3
STAT 3720.03 covers the basics of life contingencies in a simple standard situation. In this course we extend this to deal with a number of common additional features that affect life insurance policies. We introduce multiple-state models, pensions, and profit testing.
PREREQUISITES: STAT 3720.03 or ACSC 3720.03
CROSSLISTED: STAT 4720.03
FORMATS: Lecture

ACSC 4950 Honours Research Project
CREDIT HOURS: 3
A requirement for the actuarial science honours degree, this course consists of a research project under the supervision of a faculty member in the department. The project will be submitted as a written report. Students wishing to enroll in this class must obtain permission from the Actuarial Science honours advisor.

Biochemistry and Molecular Biology
Location:
Sir Charles Tupper Medical Building
5850 College Street
9th Floor
PO BOX 15000
 Halifax NS
B3H 4R2
Introduction
Biochemistry is the study of biological function at the molecular level. Although biochemical processes follow the basic laws of physics and chemistry, living organisms, because of their complexity, operate on a set of distinct principles that are not found in simple isolated chemical systems. The goal of biochemistry is to elucidate these principles. The department offers an integrated series of courses that will provide students with an up-to-date view of modern biochemistry and molecular biology ranging from evolution of genomes to structure-function relationships in macromolecules to the dynamic aspects of metabolism. The core programs can be adapted to emphasize different biochemical specialties such as structural biology, metabolism, molecular biology and cell signaling. Students wishing to pursue advanced studies in related sciences can include courses in Physiology, Pharmacology and/or Pathology in their programs. Greater flexibility is available in combined degree programs of Biochemistry and Molecular Biology with another subject; most often with Chemistry, Microbiology, Biology, Neuroscience, Psychology or Environment, Sustainability and Society. Specific programs developed with the Department of Microbiology and Immunology provide coordinated studies of metabolism, enzymology and molecular biology with bacteriology, virology and immunology. These programs provide the foundation for molecular genetics, genetic engineering, biotechnology, biomedical research and medicine.

Laboratory Exercises: Some of the courses offered by the Department of Biochemistry and Molecular Biology include a laboratory component. The laboratory exercises provide an opportunity to develop laboratory skills, as well as to illustrate the theoretical principles taught in course. This process culminates in fourth year, with a supervised research project required for Honours Biochemistry and Molecular Biology students. Although no exercise involves live animals, experiments may use materials derived from animal sources, as well as from plants and micro-organisms. Laboratory experiments will often be performed in groups, but writing of reports is expected to be an individual effort, meeting the guidelines on plagiarism set out in the University Regulations in the Calendar and the Department Policy on Plagiarism.

Degree Programs
The Department offers the following degree programs in Biochemistry and Molecular Biology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- BSc (90 credit hour) Minor in Biochemistry and Molecular Biology
- Minor in Biochemistry and Molecular Biology

* BSc Co-op option available (see below)
* May be combined with Minors from other disciplines

Departmental Requirements for each degree program can be seen by following the links in the menu to the right and in the Undergraduate Handbook, available on the departmental website https://medicine.dal.ca/departments/department-sites/biochemistry-molecular-biology/programs/undergraduate.html. In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully. It is recommended that students considering an Honours or Major program consult with a Biochemistry and Molecular Biology Academic Advisor prior to registering for second year classes.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Biochemistry and Molecular Biology program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1540.27
- SCIE 1505.18
Staff

Dean
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Head of Department
Bearne, S. L.

Program Advisors
Too, C.K.L., Undergraduate Coordinator
Bigelow, B.
Ewart, K.V.
Langelaan, D.

Karten, B., Graduate Coordinator

Professors Emeriti
Doolittle, W. F., AB (Harv), PhD (Stan)
Gray, M. W., BSc, PhD (Alta)

Professors
Archibald, J. M., BSc, PhD (Dalhousie)
Bearne, S. L., BSc (Acadia), PhD (Toronto), MD CM (McGill), cross appointment in Chemistry
Dellaire, G., BSc (UBC), PhD (McGill), major appointment in Pathology
Doolittle, W. F., AB (Harv), PhD (Stan), Post-Retirement
Duncan, R., BSc (Guelph), MSc (Queen’s), PhD (Guelph), major appointment in Microbiology and Immunology
Gray, M. W., BSc, PhD (Alta), Post-Retirement
Karten, B., MSc (Hamburg), PhD (Karl-Franzens, Austria)
Liu, P. X. -Q., BSc (Wuhan), PhD (Cornell)
Marignani, P., BSc (Windsor), MSc (Western), PhD (McMaster), EMBA (Western), cross appointment in Pathology
McLeod, R., BSc, PhD (UBC)
McMaster, C. R., BSc, PhD (Man), major appointment in Pharmacology
Rainey, J. K., BSc (Guelph), MSc, PhD (Toronto), cross appointments in Chemistry and School of Biomedical Engineering
Ridgway, N. D., BSc, MSc (Dalhousie), PhD (UBC), joint appointment with Pediatrics
Ro, H-S., BSc, PhD (McMaster)
Roger, A. J., BSc (UBC), PhD (Dalhousie)
Rosen, K. V., BSc, MSc, PhD (Moscow), joint appointment with Pediatrics
Too, C. K. L., BSc, MSc (Malaya), PhD (Hawaii)
Waisman, D. M., BSc (Brandon), PhD (Manitoba), joint appointment in Pathology

Associate Professor
Frampton, J., PhD (Albany, New York), major appointment in School of Biomedical Engineering
Kienesberger, P., MSc, PhD (Graz, Austria)
Kramer, J., BSc (Guelph), PhD (Memorial)
Pulinilkunnil, T., MSc (India), PhD (UBC)
Slamovits, C., BSc, PhD (Buenos Aires, Argentina)

Assistant Professors
Langelaan, D., BSc (Acadia), PhD (Dalhousie)
Van der Spoel, A. C., MSc (Erasmus, The Netherlands), PhD (Utrecht, The Netherlands), major appointment in Pediatrics

Senior Instructor
Ewart, K. V., BSc (Moncton), PhD (Memorial)

Instructor
BSc (120 credit hour) Concentrated Honours in Biochemistry and Molecular Biology

Students who want a challenging program that results in a broad and in-depth background in Biochemistry and Molecular Biology, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Biochemistry and Molecular Biology subject courses, with a minimum GPA of 3.0, and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of BIOC 4604.03/BIOC 4605.03. Because Biochemistry and Chemistry are closely interwoven both conceptually and experimentally, the list of required courses includes both subjects. Additional chemistry courses beyond those required for the honours degree may be taken as electives.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Biochemistry and Molecular Biology. See Co-operative Education Program.

Admission to Honours

Students who wish to enrol in a Biochemistry and Molecular Biology Honours program should apply for admission after their second year Fall term grades are in. To be admitted, students must have

- Consulted with a Departmental Academic advisor
- Minimum grades of B- in BIOL 1010, BIOL 1011, CHEM 1011 and CHEM 1012 (or equivalents)

Departmental Requirements

In addition to fulfilling the requirements outlined in Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Concentrated Honours program in Biochemistry and Molecular Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology (minimum grade of "B-")
- CHEM 1011.03 Concepts in Chemistry/CHEM 1012.03: Concepts in Chemistry: Structure and Reactivity (minimum grade of "B-")
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or MATH 1030: Matrix Theory/Linear Algebra I or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program

2000 level

- BIOC 2300.03: Introduction to Biochemistry AND BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2201.03: Introductory Analytical Chemistry

3000 level

- BIOC 3300.03: Intermediary Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- CHEM 3601.03: Chemistry of Living Systems or one course in Biochemistry at or above the 3000 level
• BIOC 3700.03: Biomolecular Chemistry

4000 level

• BIOC 4604.03: Research Project I and BIOC 4605.03: Research Project II (Honours Thesis)
• Nine credit hours from BIOC 40XX, 43XX, 44XX, 45XX, 47XX
• Six additional credit hours of BIOC at the 4000 level

Other requirements:
A pass is required in the Honours Qualifying examination. Students should ensure that they enrol in any 2000 or 3000 level courses that are prerequisites for advanced courses they intend to take (see calendar entries).

BSc (120 credit hour) Combined Honours in Biochemistry and Molecular Biology and another subject

Students who wish to study Biochemistry and Molecular Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Biochemistry and Molecular Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Biochemistry and Molecular Biology, this requirement is satisfied through BIOC 4604.03/BIOC 4605.03: Research Project.

A Co-op option is available for students enrolled in BSc Combined Honours with Biochemistry and Molecular Biology as the primary subject. See Co-operative Education Program below.

Departmental Requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Combined Honours program in Biochemistry and Molecular Biology and another subject must complete the following:

Biochemistry and Molecular Biology as the primary or secondary subject

1000 level

• 1000 level as for Concentrated Honours, except MATH 1000: Differential and Integral Calculus I and MATH 1010: Differential and Integral Calculus II required if Chemistry is the other subject

2000 level

• BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
• BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology

3000 level

• BIOC 3300.03: Intermediary Metabolism
• BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
• BIOC 3700.03: Biomolecular Chemistry
• Three additional credit hours of BIOC at or above the 3000 level if Biochemistry & Molecular Biology is the second subject

4000 level

• Six credit hours from BIOC 40XX, 43XX, 44XX, 45XX, 47XX
- BIOC 4604.03: Research Project I and BIOC 4605.03: Research Project II (if Honours thesis and qualifying exam are in Biochemistry)

Consult an Undergraduate advisor for recommended courses of study.

**BSc (120 credit hour) Major in Biochemistry and Molecular Biology**

The 120 credit hour Major is suited to students who want to focus on Biochemistry and Molecular Biology, but wish to have a program that is somewhat less constrained than the Honours program. Biochemistry and Molecular Biology Majors complete a minimum of 45 credit hours in program courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories, and through direct research and experiential classes. Although Dalhousie University does not require formal application for its 120 credit hour Major programs, this Department requires that all those registering with a view to completing such a degree must first consult with an undergraduate advisor from the Department of Biochemistry and Molecular Biology.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Biochemistry and Molecular Biology. See Co-operative Education Program.

**Departmental Requirements**

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#), students in a Major program in Biochemistry and Molecular Biology must complete the following:

### 1000 level

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology (minimum grade of "B-"
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or MATH 1030: Matrix Theory/Linear Algebra I or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program

### 2000 level

- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- CHEM 2201.03: Introductory Analytical Chemistry

### 3000 level

- BIOC 3300.03: Intermediary Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- BIOC 3700.03: Biomolecular Chemistry
- Nine additional credit hours in BIOC at or above the 3000 level

### 4000 level

- Six credit hours in BIOC at the 4000 level

**BSc (120 credit hour) Double Major in Biochemistry and Molecular Biology and another subject**
The Double Major degree program allows students to combine a study of Biochemistry and Molecular Biology with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Biochemistry and Molecular Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program seek advice from advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Biochemistry and Molecular Biology as the primary subject. See Co-operative Education Program.

**Departmental Requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Double Major program in Biochemistry and Molecular Biology and another subject must complete the following set of core courses:

**1000 level**

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology (minimum grade of "B-")
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium (minimum grade of "B-")
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or MATH 1030: Matrix Theory/Linear Algebra I or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program

**2000 level**

- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology

**3000 level**

- BIOC 3300.03: Intermediary Metabolism
- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- BIOC 3700.03: Biomolecular Chemistry
- Three additional credit hours of BIOC at or above the 3000 level

**4000 level**

- Six credit hours of BIOC at the 4000 level

The same set of core courses is required in a Double Major with Biochemistry and Molecular Biology as the primary or secondary subject.

**BSc (90 credit hour) Minor in Biochemistry and Molecular Biology**

The 90 credit hour degree with Minor in Biochemistry and Molecular Biology is appropriate for students who want to study some Biochemistry and Molecular Biology but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Biochemistry and Molecular Biology. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

See the Minor in Biochemistry and Molecular Biology section of this Calendar.
Minor in Biochemistry and Molecular Biology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

- A minimum of 18 credit hours in Biochemistry (BIOC) courses at the 2000 level or higher to a maximum of 36 credit hours.

Please note that there are prerequisite requirements for entry into upper level Biochemistry (BIOC) courses. Some non-BIOC courses such as BIOL 2020.03: Cell Biology, BIOL 2030.03: Genetics and Molecular Biology, CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy and CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups are required for the Biochemistry and Molecular Biology degree programs. These non-BIOC courses cannot be counted as part of the 18 credits hours in BIOC required for a minor.

Contact Biochemistry and Molecular Biology for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Biochemistry and Molecular Biology

Co-op Academic Advisor: Dr. H-S. Ro, Email: Hyo-Sung.Ro@dal.ca

Cooperative Education (Co-op) is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Biochemistry and Molecular Biology, or in Combined Honours or Double Major programs with Biochemistry and Molecular Biology as the primary subject. The number of students admitted into Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) in the Fall term of the year they join.

Details are available from the Biochemistry and Molecular Biology Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Biochemistry and Molecular Biology, please see the Departmental webpage https://www.dal.ca/faculty/site/disciplines/science/biochemistry_molecular_biology.html.

Minors available to students in Biochemistry and Molecular Biology

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour programs (including Co-op).

Students in a BSc (120 credit hour) program in Biochemistry and Molecular Biology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Biochemistry and Molecular Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.
A complete list of Faculty of Science Certificates and requirements can be found at Faculty of Science - Certificates. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a Major or Honours program in Biochemistry and Molecular Biology include:

- Certificate in Data Analytics
- Certificate in Genetics
- Certificate in Medicinal Chemistry

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the department's website.

Course Notes

The Department also teaches students in Dentistry, Medicine and Nursing; these courses are described in the appropriate sections of the Calendar.

Other Courses

The following courses given by other departments may be taken as a Biochemistry and Molecular Biology course toward BSc Biochemistry and Molecular Biology degrees. See course descriptions in relevant section of this calendar.

Chemistry - CHEM 3601.03, CHEM 4601.03

Microbiology - MICI 4033.03

Pharmacology - PHAC 4403.03 as BIOC 4XXX, PHAC 4409.03 as an elective only.

Note: CHEM 3601.03 is considered to be BIOC 3000-level courses, and CHEM 4601.03, MICI 4033.03 and PHAC 4403.03 to be BIOC 4000-level courses when taken as part of Biochemistry and Molecular Biology Major and Honours degree programs. These courses, in addition to required non-BIOC 2000-level courses (BIOL 2020, BIOL 2030, CHEM 2401, CHEM 2402), cannot be counted towards the 18 credit hours in BIOC required for a Minor in Biochemistry and Molecular Biology.

Course Descriptions

**BIOC 1420 Introductory Biochemistry for Nursing Students**
CREDIT HOURS: 3
Topics discussed include the structure, biosynthesis and functions of biologically important compounds, enzymes, control of metabolism, genetic engineering and nutrition. Medical aspects are stressed.
CALENDAR NOTES: This course cannot be used as a prerequisite for any other biochemistry course and is not normally accepted by Faculties of Dentistry or Medicine in fulfillment of the requirement of a biochemistry course for admission.
RESTRICTIONS: This class is restricted to students in the BScN and BHSc programs.
FORMATS: Lecture

**BIOC 2300 Introduction to Biochemistry**
CREDIT HOURS: 3
This course surveys basic topics and concepts of Biochemistry. The structures, properties and metabolic inter-relations of proteins, carbohydrates and lipids are considered together with an introduction to nutrition and metabolic control. Although mammalian examples predominate some consideration of special
aspects of biochemistry of microbes and plants is included. COORDINATOR: B. Karten

CALENDAR NOTES: Students are advised to also take CHEM 2401.03 and CHEM 2402.03

PREREQUISITES: BIOL 1010.03 and 1011.03 (or equivalent), CHEM 1011.03 and 1012.03 (or equivalent), all with grades of C or higher, or instructor's consent.

EXCLUSIONS: BIOC 2200.03

FORMATS: Lecture

BIOC 2610 Introductory Biochemistry Lab
CREDIT HOURS: 3
An introduction to fundamental techniques in Biochemistry through the exploration of the properties of essential biomolecules. This course is intended for students in Biochemistry & Molecular Biology and Microbiology & Immunology Programs.

COREQUISITES: BIOC 2300.03 and CHEM 2401.03 and CHEM 2402.03 or instructor's consent

PREREQUISITES: BIOL 1010.03 and 1011.03 (or equivalent), CHEM 1011.03 and 1012.03 (or equivalent), all with grades of B- or higher, or instructor's consent.

EXCLUSIONS: BIOC 2200.03

FORMATS: Lab

BIOC 3300 Intermediary Metabolism
CREDIT HOURS: 3
This course covers synthesis and catabolism of carbohydrates, lipids and some nitrogen compounds. Metabolic regulation is emphasized, including factors influencing the rate at which compounds flow through selected pathways. Compartmentalization of, inter-relationships between and environmental impact on metabolic pathways are considered. Laboratory exercises examine the techniques used to study metabolic pathways. COORDINATOR: C. Too

PREREQUISITES: BIOC 2300.03 and BIOC 2610.03 (both with grades of B- or higher) and BIOL 2020.03 and BIOL 2030.03 and CHEM 2401.03 and CHEM 2402.03, or instructor’s consent

FORMATS: Lecture | Lab

BIOC 3400 Nucleic Acid Biochemistry and Molecular Biology
CREDIT HOURS: 3
This course focuses on the relationship of structure to function in RNA and DNA. Methods for studying the primary, secondary, and tertiary structures of nucleic acids are explored in lectures and in the laboratory. Topics covered include enzymic mechanisms for biosynthesis, rearrangement, degradation, and repair of nucleic acid molecules, and processes of replication, transcription, and translation. Nucleic acid biochemistry is emphasized as a basis for understanding storage and transfer of biological information. COORDINATOR: J. Archibald

PREREQUISITES: BIOL 2020.03 and BIOL 2030.03 (both with grades of B- or higher); CHEM 2401.03 and CHEM 2402.03; BIOC 2300.03; or instructor’s consent

FORMATS: Lecture | Lab

BIOC 3610 Laboratory Research Techniques in Biomedical Sciences
CREDIT HOURS: 3
An introduction to key laboratory methods in biochemistry is presented, along with relevant theory and applications. Topics include liquid handling, protein chemistry, small molecule assays, data analysis and data management. Current context and emerging methodologies are introduced by guest speakers.

CALENDAR NOTES: This course does not count as a Biochemistry & Molecular Biology credit towards any degree with a Major or Honours in Biochemistry & Molecular Biology, but it can be counted towards a Minor In Biochemistry & Molecular Biology. Priority for enrollment will be given to students registered in the B.Med.Sci. degree program.

PREREQUISITES: CHEM 2401.03 and CHEM 2402.03; BIOC 2300.03; BIOL 2020.03 and BIOL 2030.03; all with grades of B- or higher, or instructor's permission.

FORMATS: Lecture | Lab

BIOC 3620 Experiential Learning in Biochemistry and Molecular Biology
CREDIT HOURS: 3
This course is an outside the classroom learning experience in which the student works in a research laboratory an average of one day per week acquiring biochemistry or molecular biology knowledge and skills. COORDINATOR: H-S. Ro

CALENDAR NOTES: To register in this course, students must first find a faculty member from the Department of Biochemistry & Molecular Biology willing to supervise the work experience and sign a learning agreement with the supervisor.

PREREQUISITES: BIOC 2300.03, BIOC 2610.03, BIOL 2020.03, BIOL 2030.03 (all with a grade of B- or higher), CHEM 2401.03 and CHEM 2402.03.

EXCLUSIONS: The following may not be used towards BIOC 3620: lab work that is part of another scheduled course at a learning institution, study that would qualify for Special Topics courses, co-op work terms, and paid work. Only one experiential learning course per degree is permitted. The class is only open to students registered in Biochemistry & Molecular Biology Degree programs, either Major or Honours, combined or concentrated. Students may not take BIOC 3620 concurrently with BIOC 4604 or BIOC 4605.

FORMATS: Lab
BIOC 3700 Biomolecular Chemistry
CREDIT HOURS: 3
This course covers structural and functional properties of biomolecules, including the physical bases for their characterization, thermodynamic principles of protein folding and biomolecular interactions, and the kinetics and mechanisms of enzyme catalysis.
PREREQUISITES: BIOC 2300.03, 2610.03, CHEM 2401.03, and CHEM 2402.03 (all with a grade of B- or higher); MATH 1000.03 or 1215.03, or instructor's consent
EXCLUSIONS: BIOC 3200.03
FORMATS: Lecture | Lab

BIOC 4001 Special Topics in Biochemistry
CREDIT HOURS: 3
Students interested in topics not covered in formal courses may ask the department for special courses to meet their needs. An Undergraduate Advisor will assist students to ascertain if faculty expertise is available to direct reading and the preparation of papers and seminars in a particular subject area.
COORDINATOR: C. Too
PREREQUISITES: BIOC 3300.03, BIOC 3400.03, and BIOC 3700.03 (average of B or higher and consent of coordinator)

BIOC 4010 Bioinformatics
CREDIT HOURS: 3
This course presents the theory and practice of bioinformatics. Topics include: rate of mutation, sequence alignment, database searching, phylogenetic analysis, bioinformatic tools for analyzing genes, genomes and proteins.
PREREQUISITES: BIOC 3400.03 or instructor’s consent
CROSSLISTED: BIOC 5010.03
FORMATS: Lecture | Lab

BIOC 4027 Molecular Mechanisms of Cancer
CREDIT HOURS: 3
The multi-step nature of ‘carcinogenesis’ is the focus of this course. This course dissects the role of oncogenes, tumor suppressors, cell death and survival, differentiation, angiogenesis, metastasis, inflammation, and anticaner immunity in cancers. Major research techniques routinely used in cancer research are discussed to fully understand the process of cancer development, progression and persistence.
PREREQUISITES: Minimum grades of B+ in a 3000 level Biochemistry class and another 3000 level Biochemistry, Microbiology or Pathology class.
Permission of instructor required
CROSSLISTED: PATH 5027.03 and MICI 5027.03/4027.03
FORMATS: Lecture | Discussion

BIOC 4302 Biochemistry and Cell Biology of Lipids and Membranes
CREDIT HOURS: 3
This course discusses (1) the influence of lipids on membrane structure and function, (2) lipid metabolism and inborn errors that cause human disease, (3) the intra- and extra-cellular transport of lipids and contribution to cell physiology and (4) the role of lipids in specialized physiological and cell signaling pathways.
PREREQUISITES: BIOC 3300.03
FORMATS: Lecture

BIOC 4305 Mechanisms of Signal Transduction
CREDIT HOURS: 3
The emphasis of this course is to introduce concepts and key mediators of signal transduction. Topics include protein kinases, tumour suppressors, oncogenes, G-protein coupled receptors, calcium signalling, lipids in signalling, integration of signalling cascades, cytoskeletal reorganization, cellular metastasis, apoptosis, anoikis, genomic stability, and stem cell biology.
PREREQUISITES: BIOC 3300.03 or instructor's consent
EXCLUSIONS: BIOC 4301.03
FORMATS: Lecture

BIOC 4306 Nutritional Biochemistry
CREDIT HOURS: 3
Appropriate nutrition is essential for health and reflects the basic biochemistry of the organism. Changes in the human diet can impact health and disease. This
course considers the principles of optimal nutrition in a biochemical context and the role of nutrition in disease etiology and treatment.

PREREQUISITES: BIOC 3300.03, BIOC 3400.03, BIOC 3700.03 or instructor's permission
FORMATS: Lecture | Other (explain in comments)

BIOC 4403 Genes and Genomes
CREDIT HOURS: 3
This course discusses the organization of genes into genomes. It deals with (i) compartmentalization of genetic material in nuclear and organelar genomes, (ii) the structure, behaviour and origins of components of both nuclear and organelar genomes which are not genes (transposable and other repetitive elements, introns), (iii) genetic and physical methods for mapping genomes, and (iv) the significance of genetic organization and higher order chromosomal structure and function. The methodology and prospects of genomics are discussed at some length.
PREREQUISITES: BIOC 3400.03 or BIOL 3046.03 or instructor's consent
CROSSLISTED: BIOC 5403.03
FORMATS: Lecture

BIOC 4404 Gene Expression
CREDIT HOURS: 3
This course is centered around the central dogma that genetic information is passed from DNA to RNA to protein. We focus on the different mechanisms that regulate this flow of information in prokaryotic and eukaryotic cells. Specific topics include transcription, translation, chromatin, epigenetics, and non-coding RNA.
PREREQUISITES: BIOC 3400.03 or instructor’s consent
CROSSLISTED: BIOC 5404.03
FORMATS: Lecture

BIOC 4501 Medical Biotechnology
CREDIT HOURS: 3
This course covers fundamental principles of biotechnology from a medical perspective. Topics discussed include: recombinant DNA technology, polymerase-chain reaction-based applications, DNA microarrays, DNA sequencing, immunochemical techniques and applications, production of transgenic organisms, potential applications for embryonic stem cell and nuclear transfer cloning, business and legal aspects of biotechnology.
PREREQUISITES: BIOC 3400.03 or instructor’s consent
CROSSLISTED: BIOC 5501.03
FORMATS: Lecture | Discussion

BIOC 4604 Research Project I
CREDIT HOURS: 3
This course requires original biochemical research in the laboratory of a faculty member, and requires the equivalent of at least one day per week to be spent in the laboratory. A report is submitted at the end of the term. COORDINATOR: Stephen Beame
CALENDAR NOTES: This course is intended to be taken in conjunction with BIOC 4605.03 and no credit can be given for one course without the other. The work undertaken in BIOC 4605.03 should be a continuation of that initiated in BIOC 4604.03 and hence the report submitted for BIOC 4605.03 may include data and analysis incorporated in the BIOC 4604.03 report. In exceptional cases, the research project can be done outside the Department of Biochemistry and Molecular Biology. Prior approval must be obtained from the course coordinator.
PREREQUISITES: Permission of coordinator and a member of the Department who will serve as supervisor. At least a B average for BIOC 3300.03, BIOC 3400.03 and BIOC 3700.03.
FORMATS: Lab

BIOC 4605 Research Project II
CREDIT HOURS: 3
This course requires original biochemical research in the laboratory of a faculty member, and requires the equivalent of at least one day per week to be spent in the laboratory. A report is submitted at the end of the term. COORDINATOR: Stephen Beame
CALENDAR NOTES: This course is intended to be taken in conjunction with BIOC 4604.03 and no credit can be given for one class without the other. The work undertaken in BIOC 4604.03 should be a continuation of that initiated in BIOC 4604.03 and hence the report submitted hence the report submitted for BIOC 4605.03 may include data and analysis incorporated in the BIOC 4604.03 report. In exceptional cases the research project can be done outside the Department of Biochemistry & Molecular Biology. Prior approval must be obtained from the course coordinator.
PREREQUISITES: BIOC 4604.03
FORMATS: Lab

BIOC 4700 Proteins
CREDIT HOURS: 3
Our theme is the relationship between structure and function. The kinetic and thermodynamic determination of the protein fold is explored. Specific details of how form determines function in binding other molecules both small and large in membranes, and in energy transduction are provided. Protein evolution and turnover are examined.
PREREQUISITES: BIOC 3700.03; or (CHEM 3601.03 AND CHEM 2301.03 AND CHEM 2304.03), or instructor's consent.
CROSSLISTED: BIOC 5700.03
FORMATS: Lecture

BIOC 4701 Enzymes
CREDIT HOURS: 3
Fundamental principles of enzyme catalysis and its regulation are examined. Topics include enzyme kinetics, enzyme inhibition and inactivation, isotope effect measurements, site-directed mutagenesis, and the active site architecture and transition state stabilization of selected enzymes. Classic and current papers in the literature are reviewed and the experimental and conceptual approaches are critically appraised.
PREREQUISITES: BIOC 3700.03; or (CHEM 3601 AND CHEM 2301 AND CHEM 2304), or instructor's consent.
CROSSLISTED: BIOC 5701.03
FORMATS: Lecture

BIOC 4702 Biophysical Characterization of Macromolecules
CREDIT HOURS: 3
This course covers methods allowing determination of sub-molecular and atomic-level structure and dynamics of biomacromolecules in physiological settings (e.g. solution-state or lipid bilayers) including: fluorescence, electronic and vibrational circular dichroism and NMR spectroscopy; light vs. X-ray vs. neutron scattering; and, single molecule methods.
PREREQUISITES: BIOC 3700.03; or (CHEM 3601 AND CHEM 2301 AND CHEM 2304), or instructor's consent. Recommended: PHYC 1190.03 and 1290.03, or 1310.03 and 1320.03
CROSSLISTED: CHEM 4602.03
EXCLUSIONS: BIOC 5702.03, CHEM 5602.03
FORMATS: Lecture

BIOC 4703 Structural Biology
CREDIT HOURS: 3
This course covers theoretical and practical aspects of determining and assessing the quality of atomic resolution biomolecular structures. The underlying theory and applications of X-ray diffraction, NMR spectroscopy, and cryo-electron microscopy are discussed in detail.
PREREQUISITES: BIOC 3700 or CHEM 3601 or instructor's consent.
CROSSLISTED: CHEM 4603.03
EXCLUSIONS: BIOC 5703.03, CHEM 5603.03
FORMATS: Lecture

BIOC 4813 Biochemistry of Clinical Disorders
CREDIT HOURS: 3
This course is an introduction to the pathophysiology of disease. It provides the clinical and biochemical background to disease groups and system disorders and the laboratory approach to their diagnosis. Topics include cardiovascular, renal, gastrointestinal and hepatobiliary disorders, addiction, and acid-base, carbohydrate, lipid and amino acid disorders; endocrine and rheumatological diseases, as well as tumor markers and toxicology, blood and immune abnormalities.
PREREQUISITES: BIOC 3300.03 and BIOC 3400.03 and BIOC 3700.03 or consent of instructor
CROSSLISTED: PATH 5013.03, BIOC 5813.03
EXCLUSIONS: BIOC 4811.03 and BIOC 4812.03
FORMATS: Lecture | Discussion

BIOC 4835 Human Genetics
CREDIT HOURS: 3
For science students with special interest in human genetics. Topics include errors of metabolism, human development, transmission genetics, DNA structure, gene function, mutation and chromosomal alterations, population genetics, genetics of immunity and cancer, genetic technology in medicine, and ethical and social issues related to medical genetics.
PREREQUISITES: BIOC 3400.03 or permission from instructor
CROSSLISTED: BIOL 4035.03, 5035.03, PATH 5035.03
FORMATS: Lecture | Tutorial
Bioinformatics

Much of the current research in the biological sciences today requires the handling of “Big Data”. Nowhere is this need more apparent than in the area of genomics, where next generation sequencing techniques are capable of producing, at a relatively low cost, hundreds of gigabytes and even terabytes of DNA sequence data. There is a need for people who have an understanding of molecular and evolutionary genomics (the structure and function of genes and genomes) and the skill set needed to analyze the data. A Minor in Bioinformatics provides students with an introduction to molecular genomics and to some of the informatics tools currently available.

Coordinator: Dr. Daniel Ruzzante (daniel.ruzzante@dal.ca)

Minor in Bioinformatics

This minor is available to students registered in a 120 credit hour Bachelor of Science or Bachelor of Science (Computer Science) program.

Much of the current research in the biological sciences today requires the handling of “Big Data”. Nowhere is this need more apparent than in the area of genomics, where next generation sequencing techniques are capable of producing, at a relatively low cost, hundreds of gigabytes and even terabytes of DNA sequence data. There is a need for people who have an understanding of molecular and evolutionary genomics (the structure and function of genes and genomes) and the skill set needed to analyze the data. A Minor in Bioinformatics provides students with an introduction to molecular genomics and to some of the informatics tools currently available.

To qualify for a Minor in Bioinformatics, students must take all Required Courses and enough courses from the Selectives list to total 18 credit hours above the 2000 level that count uniquely toward the Minor (e.g. do not also count toward a Major or Honours degree). In addition all students must complete the prerequisite 1000-level courses.

Pathways to obtaining the Minor in Bioinformatics have been designed for students majoring in Computer Science, Biochemistry & Molecular Biology, Biology, Marine Biology, Statistics and Neuroscience. Students in other programs may obtain the Minor by fulfilling the general requirements below, but should be aware that most of the courses listed have prerequisites, and that they may need to complete a number of courses in addition to the required and selective courses.

Irrespective of path, students with a Bioinformatics Minor will end up having taken a common set of courses in Computer Science, Calculus, Statistics, Genetics, and Molecular Biology or Biochemistry. All students will also receive training in use of ACENET.

**Minor in Bioinformatics – General requirements**

Coordinator: Dr. Daniel Ruzzante (daniel.ruzzante@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.
Required prerequisite courses (don’t count toward minor)

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 3046.03: Molecular Evolution or BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

Selectives

- CSCI 2134.03: Software Development (Highly recommended)
- STAT 2080.03/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- BIOL 2040.03: Evolution
- BIOL 3101.03/MARI 3101.03: Microbial Ecology
- BIOL 3042.03/MARI 3042.03: Molecular Ecology
- CSCI 3110.03: Design and Analysis of Algorithms I
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics
- CSCI 4181.03: Bioinformatics Algorithms
- BIOC 4010.03: Bioinformatics
- BIOC 4403.03: Genes and Genomes (Highly recommended)

PATHWAY for Biochemistry & Molecular Biology students
Coordinator: Dr. Claudio Slamovits (claudio.slamovits@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don’t count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required course:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics

Selectives:

- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- CSCI 2134.03: Software Development (Highly recommended)
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics
- CSCI 4181.03: Bioinformatics Algorithms
- BIOL 3046.03: Molecular Evolution
- BIOC 4010.03: Bioinformatics *
- BIOC 4403.03: Genes and Genomes (Highly recommended) *

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree

PATHWAY for Biology or Marine Biology students
Coordinator: Dr. Daniel Ruzzante (daniel.ruzzante@dal.ca)
Students must take all **required courses and enough selective courses to total 18 credit hours**. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

**Required prerequisite courses** (don’t count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

**Required courses:**

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 3046.03: Molecular Evolution * or BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology *

**Selectives:**

- CSCI 2134.03: Software Development (Highly recommended)
- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
  - BIOL 3101/MARI 3101.03: Microbial Ecology *
  - BIOL 3042/MARI 3042.03: Molecular Ecology *
  - BIOL 3046.03: Molecular Evolution *
  - BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology *
  - CSCI 4180.03: Intro to Computational Biology and Bioinformatics
  - CSCI 4181.03: Bioinformatics Algorithms
  - BIOC 4010.03: Bioinformatics *
  - BIOC 4403.03: Genes and Genomes (Highly recommended) *

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree

**PATHWAY for Computer Science students**

**Coordinator:** Dr. Robert Beiko (beiko@cs.dal.ca)

Students must take all **required courses and enough selective courses to total 18 credit hours**. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

**Required prerequisite courses** (don’t count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

**Required courses:**

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics *
  - BIOL 2030.03: Genetics and Molecular Biology
  - BIOL 2040.03: Evolution
  - BIOL 3046.03: Molecular Evolution

**Selectives:**

- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- CSCI 2134.03: Software Development *
- CSCI 3110.03: Design and Analysis of Algorithms I *
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics *
  - CSCI 4181.03: Bioinformatics Algorithms *
  - BIOC 4403.03: Genes and Genomes (Highly recommended)

* Cannot be used toward the Minor if the course is being counted toward a Major or Honours degree
PATHWAY for Statistics or Mathematics students
Coordinator: Dr. Hong Gu (hgu@mathstat.dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don’t count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology
- MATH 1000.03: Differential and Integral Calculus I or MATH 1500.06 X/Y: Calculus

Required courses

- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 3046.03: Molecular Evolution

Selectives

- CSCI 2134.03: Software Development (Highly recommended)
- CSCI 4180.03: Intro to Computational Biology and Bioinformatics
- CSCI 4181.03: Bioinformatics Algorithms
- BIOC 4403.03: Genes and Genomes (Highly recommended)

PATHWAY for Neuroscience students
Coordinator: Dr. Tamara Franklin (tamara.franklin@dal.ca)

Students must take all required courses and enough selective courses to total 18 credit hours. Courses (required or selective) cannot be used toward the Minor if the course is being counted toward a Major or Honours degree.

Required prerequisite courses (don’t count toward minor):

- CSCI 1105.03: Introduction to Computer Programming (or CSCI 1100.03)
- CSCI 1110.03: Introduction to Computer Science (or CSCI 1101.03)
- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus

Required courses:

- STAT 2060/MATH 2060.03: Introduction to Probability and Statistics
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 3046.03: Molecular Evolution or BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology

Selectives:

- CSCI 2134.03: Software Development (Highly recommended)
- STAT 2080/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- BIOL 2040.03: Evolution
- BIOL 3101/MARI 3101.03: Microbial Ecology
  - BIOL 3042/MARI 3042.03: Molecular Ecology
  - CSCI 3110.03: Design and Analysis of Algorithms I
  - CSCI 4180.03: Intro to Computational Biology and Bioinformatics
  - CSCI 4181.03: Bioinformatics Algorithms
  - BIOC 4010.03: Bioinformatics
  - BIOC 4403.03: Genes and Genomes (Highly recommended)
Introduction

Welcome to the Department of Biology. It has been said that the 21st century will be the century of Biology. We are inclined to agree. Biologists study the entire hierarchy of living systems from molecules, cells, organelles and organs to individuals, populations, and ecosystems. Increasingly, the focus of biological inquiry has shifted from reducing living systems into their parts to investigating how these parts interact in complex systems from which novel and unique properties emerge.

The Department of Biology offers both undergraduate and graduate students a wide range of learning experiences and training in the biological sciences. The undergraduate core introduces the student to the whole biological hierarchy and provides an excellent introduction to the biodiversity of species and their habitats. There are multiple avenues for more tailored learning as well, including independent research opportunities, special topics courses, experiential learning, specialty certificates, and honours research. State of the art laboratories provide experience in current technology and experimental design. Our Seaside Program includes a large number of summer field courses covering freshwater, marine, and terrestrial ecosystems. We excel in Marine Biology as proximity to the Atlantic Ocean gives us the capacity to provide hands-on marine training. In 2014, the Department of Biology began participating in a unique Medical Sciences program that was developed collaboratively by the Faculty of Science and the Faculty of Medicine.

There has never been a more exciting time to be a Biologist, nor has the need to understand the intricacies of nature been more urgent. Our comprehensive programs prepare students for a wide range of career options, including research and education, field and laboratory positions, environmental management and conservation, medical sciences and biotechnology, bioengineering, industry, and business. Not every student will use this degree to be a biologist but each one will have the opportunity to participate in and contribute to one of the most worthwhile endeavors in humanity’s near future: understanding nature and how humanity can live better without endangering the multitude of living systems around us, and in turn, ourselves.

Degree Programs
The Department of Biology offers the following degree programs in Biology

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Biology
- Minor in Biology

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.
Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Biology undergraduate academic advisor.

Prospective Biology students should be aware that to advance to second year Biology courses, they must achieve at least a C grade in the prerequisite first year Biology courses. Students with exceptional extenuating circumstances may appeal this requirement to the Biology Undergraduate Curriculum Committee. Students should go to the Biology Main Office for further details.

Staff

Dean
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chair
Stone, S. L., PhD (York)

Biology Program Advisors
For Biology program advising, please email biology.advising@dal.ca for an auto-reply with advisors' office hours.

Professors Emeriti
Hall, B. K., DSc (UNE), LLD (Calgary), PhD (UNE), FRSC, University Research Professor Emeritus
Meinertzhagen, I. A., PhD, DSc (St. Andrews), FRSC, Professor Emeritus

Professors
Adamo, S., BSc (Toronto), PhD (McGill), major appointment in Psychology
Bentzen, P., MSc (UBC), PhD (McGill), Killam Professor
Bielawski, J. P., PhD (Texas A & M Univ)
Budge, S., PhD (Memorial), major appointment in Process Engineering
Burton, D. L., BSc (Dalhousie), MSc (Guelph), PhD (Alberta), major appointment in Plant, Food, and Environmental Sciences (Agr)
Croll, R., PhD (McGill), major appointment in Physiology/Biophysics (Medicine)
Cutler, C., BSc Honors (Memorial), MPM (SFU), PhD (Guelph), major appointment in Plant, Food and Environmental Sciences (Agr)
Dustin, J., major appointment in Faculty of Agriculture
Fredeen, A., BSA (Saskatoon), MSc (Guelph), PhD (California), major appointment in Animal Science and Aquaculture (Agr)
Gunawardena, A., BSc (Peradeniya), PhD (Oxford Brookes)
Hutchings, J. A., MSc, PhD (Memorial)
Iverson, S. J., PhD (Maryland)
Johnston, M. O., PhD (Chicago), Campbell Chair
Lada, R., BSc, MSc (Hort) (TNAU), PhD (Adelaide), major appointment in Plant, Food, and Environmental Sciences (Agr)
Lane, P. A., MSc (SUNY Binghampton), PhD (SUNY Albany)
La Roche, J., BSc (McGill), PhD (Dalhousie)
Leonard, M. L., PhD (Ottawa)
Lotze, H. K., BSc (Gottingen), MSc, PhD (Kiel)
Lynch, D. H., BSc, MSc (Agr) (McGill), PhD (Guelph), major appointment in Plant, Food and Environmental Sciences (Agr)
MacLaren, L., major appointment in Faculty of Agriculture
Metaxas, A., BSc (McGill), MSc (UBC), PhD (Dalhousie), major appointment in Oceanography
Miar, Y., major appointment in Faculty of Agriculture
Nams, V. O., BSc (Toronto), MSc (Alberta), PhD (Victoria), major appointment in Environmental Sciences (Agr)
Percival, D. C., BSc (Agr), MSc, PhD (Guelph), major appointment in Environmental Sciences (Agr)
Prithiviraj, B., BSc (Agr) (Annamalai), MSc, PhD (BHU)
Rathgeber, B., major appointment in Faculty of Agriculture
Rupasinghe, H. P. V., BSc (Perederynja), MSc (Iowa), PhD (Guelph), major appointment in Plant, Food and Environmental Sciences (Agr)
Ruzzante, D. E., PhD (Dalhousie), Killam Professor
Simpson, A. G. B., BSc, PhD (Sydney Australia)
Stewart-Clark, S., major appointment in Faculty of Agriculture
Stone, S. L., PhD (York)
Walde, S. J., PhD (Calgary)
Wang-Pruski, G., BSc (China), PhD (Alberta), major appointment in Plant and Animal Science (Agr)
Whitehead, H., MA, PhD (Cambridge)
Worm, B., PhD (Kiel)
Associate Professors

Bertrand, E., BSc (Bates College), PhD (MIT/WHOI)
Crossin, G. T., BA (Maine), BSc (New Hampshire), MSc, PhD (UBC)
Figueira, R., major appointment in Marine Affairs
Gujar, S., DVM (Marathwarda), PhD (Memorial), MHA (Dalhousie), major appointment in Pathology and Microbiology & Immunology (Medicine)
Latta, R., MSc (Toronto), PhD (Colorado)
MacNeil, M. A., BSc (Hons) (Dalhousie) MSc (Georgia), PhD (Newcastle)
Myles, S. A., BA (St. Thomas), MSc (Oxford), PhD (Max Planck), major appointment in Plant, Food and Environmental Sciences (Agr)
Tittensor, D. P., BSc (Aberdeen), MSc (Memorial), PhD (Dalhousie)

Assistant Professors

Côté, P. D., BSc (Ottawa), PhD (McGill)
El Hiani, Y., PhD (Université de Picardie Jules Verne), major appointment in Physiology and Biophysics (Medicine)
Ferrier, J., PhD (Ottawa)
Gonzales-Morales, N., BSc (Universidad Autónoma de Querétaro) PhD (Université de Nice Sophia-Anpolis)
McLean, N. L., BSc (Agri), MSc (McGill), PhD (Dalhousie), major appointment in Plant, Food and Environmental Sciences (Agr)

Frail-Gauthier, J., BSc, PhD (Dalhousie)

Adjunct

Bailie, S., BSc (Acadia), MSc (Memorial), PhD (New Zealand)
Benoit, H., BSc (Calgary), MSc (Memorial), PhD (Dalhousie)
Bowen, W. D., PhD (UBC), B.I.O.
Bowlby, H., BSc (Victoria), MSc (Dalhousie), PhD (Memorial)
Bradbury, I. R., BSc, BEd, MSc (Memorial), PhD (Dalhousie)
Cameron, R., BScF (New Brunswick), MSc (Acadia)
Cerchio, S., BSc (Tufts), MSc (San Jose State), PhD (Michigan)
Cinner, J., BA (Colorado), MA (Rhode Island), PhD (James Cook)
Devillers, R., BSc (Lyon), MSc (Montreal), PhD (Morne-La-Vallee)
Franz-Odendaal, T., BSc (Hons), MSc, PhD (Cape Town)
Gero, S., BSc, MSc, PhD (Dalhousie)
Guderley, H., BA (Indiana), PhD (UBC)
Hardie, D., BSc (Guelph), MSc (Guelph), PhD (Dalhousie)
Harvey-Clark, C., BSc (Univ of Victoria), DVM (Saskatoon)
Hess, S., PhD (Cologne)
Herbinger, C. M., PhD (Dalhousie)
Horn, A., BSc (Cornell), PhD (Toronto)
Jabado, R., BA (Concordia), MSc (James Cook), PhD (United Arab Emirates)
Keith, D., BSc, MSc (Calgary), PhD, BEng (Dalhousie), DEng (Cape Breton)
Kuparinen, A., MSc, PhD (Helsinki)
LaCroix, C., BSc, MSc (McGill), PhD (Guelph)
Lee, R. W., BSc, MA (UMass Amherst), PhD (Stoney Brook)
Mallory, M., BSc (Queens), MSc, PhD (Carleton)
Moors-Murphy, H., BSc, MSc (UNB), PhD (Dalhousie)
Qaderi, M. M., MSc, PhD (Western)
Rossolimo, T., MSc (Moscow State Univ), PhD (Russian Academy of Science)
Runions, A., PhD (Calgary)
Shackell, N. L., BSc (McGill), PhD (Dalhousie)
Salomon, A., BSc (Queens), MSc (UBC), PhD (Washington)
Skinner, M. A., BSc (CBU), MSc (UNB), PhD (UNB)
Staicer, C. A., MSc (Northern Arizona), PhD (UMass Amherst)
Trudel, M., BSc (Montreal), MSc (Montreal), PhD (Montreal)
Weir, L., BSc (Concordia), MSc, PhD (Dalhousie)
Whoriskey, F. G., PhD (Laval)
University Teaching Fellow
Bishop, T., BSc, MSc (Memorial)
Cooper, M., PhD (Dalhousie), BEd (Ottawa)
Gass, G., PhD (Toronto)
Gibson, L., BSc (Victoria), MSc (Dalhousie)
McCarville, M., BSc, MSc (Dalhousie)
Schmidt, A., MSc, PhD (Dalhousie)

Senior Instructors
Ewart, K. V., PhD (Memorial), major appointment in Biochemistry & Molecular Biology
Grantham, D., BSc (Hons), MSc (Dalhousie)
Rajaselvam, R. J., MScF (Toronto), MSc (Oxford), MPhil (Peradeniya), BSc (Peradeniya)
Van Dommelen, J., MSc (Dalhousie)

Instructors
Frail-Gauthier, J., BSc, PhD (Dalhousie)
Ibarra, D., BEng (ITESM), MSc (Dalhousie), PhD (Dalhousie)

Post Doctoral Fellows
Batista, D., PhD (VUB)
Boerder, K., BSc (Germany), MSc (Germany), PhD (Dalhousie)
Delgado, L., BSc (Peru), MSc (Michigan), PhD (Dalhousie)
Godwin, S., PhD (SFU)
McLean, M., PhD (IFREMER)
Martins, A., PhD (JCU)
Mull, C., PhD (SFU)

BSc or BA (120 credit hour) Concentrated Honours in Biology
Students who want a challenging program resulting in a broad background in Biology, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours.

To graduate with Honours, students must complete a minimum of 54 credit hours above the 1000 level in Biology. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the core Biology courses. Students must also have a cumulative B average (GPA of 3.0) in courses in the honours subject at the time of graduation. Students write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of BIOL 4901.03 AND BIOL 4902.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Biology. See Co-operative Education Program.

Admission to Honours
Students must apply for admission to Honours programs. Students considering Honours should consult with a Biology Honours Advisor early in their studies. To be admitted, students must:

- Have a minimum B+ average (GPA of 3.3) in the core Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the honours subject.
- Identify and gain the support of a thesis supervisor during their third year of studies (see Honours webpage for supervisor eligibility).
- With the supervisor’s input, draft and submit a thesis proposal to the Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Biology Honours webpage https://www.dal.ca/faculty/science/biology/honours.html

Course Requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Biology must complete the following courses:

1000 level
- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- An additional 3 credit hours in MATH or STAT (BSc)
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Recommended:
- PHYC 1310.03/PHYC 1320.03 (or PHYC 1300X/Y.06): Physics In and Around You
- MATH 1215.03: Life Sciences Calculus or MATH 1000.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level
Core Biology courses
- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plant and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

3000/4000 level
A minimum of 30 additional credit hours in BIOL or BIOL-equivalent courses at or above the 2000 level, of which at least 18 credit hours must be at or above the 3000 level. One of the following course options must be included:

Core Biology Courses
- BIOL 3050.03: Developmental Biology
- BIOL 3078.03: Principles of Animal Physiology Part I AND BIOL 3079.03: Principles of Animal Physiology Part II

In addition, students must complete an Honours Thesis:
- BIOL 4901.03: Honours Research and Thesis I and BIOL 4902.03: Honours Research and Thesis II

Students are encouraged to consult the sections on Course Selection Guidelines and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

BSc or BA (120 credit hour) Combined Honours in Biology and another subject
Students who wish to study Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science (other than Marine Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas.
To graduate with Honours, students must complete a minimum of 36 credit hours above the 1000 level in BIOL or BIOL-equivalent courses, whether Biology is the primary or the secondary subject. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the core Biology courses. Students must also have a cumulative B average (GPA of 3.0) at the time of graduation. Students write a research-based Honours thesis and complete an Honours Qualifying Examination in their primary subject area. For Biology, this requirement is satisfied through BIOL 4901.03 AND BIOL 4902.03.

A Co-op option is available for students enrolled in a BSc Combined Honours in Biology. See Co-operative Education Program.

**Admission to Honours**

Students must apply for admission to Honours programs. To be admitted to the Biology Honours program, students must:

- Have a minimum B+ average (GPA of 3.3) in core 2nd year Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the Honours subject.
  - If Biology is to be the primary subject area, students must
    - Identify and gain the support of a thesis supervisor during their third year of studies (see Biology Honours webpage for supervisor eligibility).
    - With the supervisor’s input, draft and submit a thesis proposal to the Biology Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Biology Honours webpage https://www.dal.ca/faculty/science/biology/honours.html

---

**Course Requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Combined Honours program in Biology and another subject must complete the following:

**1000 level**

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09 Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09 Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Recommended:

- PHYC 1310.03/PHYC 1320.03 (or PHYC 1300X/Y.06): Physics In and Around You or equivalent
- MATH 1215.03: Life Sciences Calculus or MATH 1000.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I

**2000 level**

Core Biology Courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

**3000/4000 level**
If Biology is the primary subject, students must complete 12 additional credit hours in BIOL or BIOL-equivalent courses at the 3000/4000 level. If Biology is the secondary subject, you must complete 18 additional credit hours in BIOL or BIOL-equivalent courses at the 3000/4000 level. In either case, one of the following course options must be included:

Core Biology Courses

- BIOL 3050.03: Developmental Biology
  OR
- BIOL 3078.03: Principles of Animal Physiology Part I AND BIOL 3079.03: Principles of Animal Physiology Part II

In addition, if Biology is the primary subject, students will also complete:

- BIOL 4901.03: Honours Research and Thesis I and BIOL 4902.03: Honours Research and Thesis II

Students are encouraged to consult the sections on Course Selection Guidelines, and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

**BSc or BA (120 credit hour) Major in Biology**

The Major degree program is suited to students who want to focus on Biology but wish to have a program that is somewhat less constrained than the Honours program. It provides a four-year survey of Biology and is designed for students not anticipating subsequent experimental graduate-level training in Biology or related disciplines. Biology Majors complete a minimum of 42 credit hours in BIOL or BIOL-equivalent courses above the 1000 level. Biology Majors do not have thesis (or related) requirements. Research and other experiential learning opportunities are available through laboratories, independent research courses, special topics courses and experiential learning courses. Students should plan their programs carefully and obtain advice from an academic advisor in the Biology Department.

A Science Co-op option is available for students enrolled in a Major program in Biology. See [Co-operative Education Program](#).

**Course Requirements**

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Major program in Biology must complete the following courses:

### 1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09: Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: Integrated Science or SCIE 1506.09: Integrated Science I and SCIE 1507.09: Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09: Integrated Science II or equivalent)
- An additional three credit hours in MATH or STAT (BSc)
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

### 2000 level

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

### 3000/4000 level

- A minimum of 24 credit hours, of which at least 3 credit hours must be at the 4000 level, of BIOL or BIOL-equivalent courses.
Students are encouraged to consult Course Selection Guidelines and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

**BSc or BA (120 credit hour) Double Major in Biology and another subject**

The Double Major degree program allows students to combine a study of Biology with another subject. The other subject may be any discipline from the Faculty of Science (other than Marine Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Regardless of whether Biology is the primary or secondary subject, the Biology departmental requirements are the same (see below). Students must complete a minimum of 33 credit hours in BIOL or BIOL-equivalent courses above the 1000 level. It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Science Co-op option is available for students enrolled in BSc Double Major with Biology as the primary subject. See Co-operative Education Program.

**Course Requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Double Major program in Biology and another subject must complete the following:

**1000 level**

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18: or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18: or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent) (if planning to take BIOL 2060.03: Introductory Ecology)
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- An additional three credit hours of MATH or STAT (Bsc)

**2000 level**

- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- Any TWO of
  - BIOL 2003.03: Animal Diversity
  - BIOL 2004.03: Diversity of Plants and Microorganisms
  - BIOL 2060.03: Introductory Ecology
- Three additional credit hours in BIOL or BIOL-equivalent courses at or above the 2000 level

**3000/4000 level**

- A minimum of 18 credit hours of BIOL or BIOL-equivalent courses at or above the 3000 level whether Biology is the primary or the secondary subject

Please note that a double major in Biology and Marine Biology is not offered.

Students are encouraged to consult the sections on Course Selection Guidelines and BIOL-Equivalent Courses when selecting their 3000 and 4000 level courses.

**BSc or BA (90 credit hour) Minor in Biology**

The 90 credit hour degree with Minor in Biology is appropriate for students who want to study some Biology but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some...
specialization in Biology. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Biology is usually the preferred option for students who wish to combine studies in Biology with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

Requirements

- A minimum of 18 credit hours in Biology (BIOL) and/or Marine Biology (MARI) courses at the 2000 level or higher to a maximum of 36 credit hours. A maximum of 6 credit hours may be BIOL-equivalent.

Please note that upper level Biology (BIOL) and Marine Biology (MARI) courses have prerequisite requirements.

A BSc or BA (120 credit hour) degree program with a Minor in Biology is also available to students in the Faculty of Science.

Minor in Biology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

This minor is not available to students majoring in Marine Biology.

Requirements

- A minimum of 18 credit hours in Biology (BIOL) and/or Marine Biology (MARI) courses at the 2000 level or higher to a maximum of 36 credit hours. A maximum of 6 credit hours may be BIOL-equivalent.

Please note that upper level Biology (BIOL) and Marine Biology (MARI) courses have prerequisite requirements.

A BSc or BA (90 credit hour) degree program with a Minor in Biology is also available to students in the Faculty of Science.

Contact Biology for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Biology

Co-op Academic Advisor: Mindy McCarville  mindy.mccarville@dal.ca

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Biology, or in Combined Honours or Double Major programs with Biology as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is recommended that interested students contact their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Biology Co-op Academic Advisor and from the Co-operative Education office http://www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Biology, please see the Biology department webpage.

Minors available to students in Biology
Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Biology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

**Certificates**

In combination with a BSc or BA in Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.

A complete list of Faculty of Science Certificates and requirements. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to student enrolled in a BSc or BA in Biology include:

- Certificate in Animal Behaviour
- Certificate in Aquaculture and the Environment
- Certificate in Environmental Impact Assessment
- Certificate in Genetics
- Certificate in Geographic Information Science
- Certificate in Science Leadership and Communication

**BSc/BEng or BA/BEng Concurrent Program**

Students interested in combining their interest in Biology with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Biology and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Biology and from the Faculty of Engineering in their first year of study.

Required Biology courses for a BSc/BEng or BA/BEng program in Biology

- A minimum of 18 credit hours in BIOL above the 1000 level

Note that there are prerequisite requirements for entry into upper level Biology courses.

**Course Selection Guidelines**

Biology is a large and diverse field, and students enroll in Biology programs with a corresponding diversity of interests and goals. While we encourage students to sample broadly across the various biological disciplines during their undergraduate years, we recognize that many students wish to emphasize one or more general areas within Biology. To help students select courses that fit their interests and goals, we have identified three general areas in Biology:

A. Ecology and Evolution,
B. Organismal Biology,
C. Cell/Molecular Biology.

Below, we list courses associated with each area, and provide recommendations for designing individual programs at the third and fourth year levels.

IMPORTANT: Students should choose 2000 level courses in their second year with care, so that they will have the necessary prerequisites to enroll in third and fourth year courses in their interest areas.

NOTE: These are not requirements. Students may select courses from any or all areas, provided they meet requirements for their degree program.

**Ecology and Evolution**

Ecology and Evolution (E&E) spans a broad range of concepts and applications from ecosystem ecology through population ecology to molecular evolution. A well-rounded course of study in Ecology or Evolution or both will include some courses in basic principles applicable to all organisms and habitats/ecosystems, as well as more specific courses on the details of how these principles play out in
particular situations (e.g. taxa, habitats), and how these principles are applied to real world problems. In addition, a well-trained student in E&E should have both well-developed numerical skills as well as exposure to the application of E&E in broader society. Students wishing to emphasize E&E in their degree program should select courses from the following:

**Principles:** BIOL 3042, BIOL 3044, BIOL 3046, BIOL 3061, BIOL 3062, BIOL 3065, BIOL 3101, BIOL 4500

**Biodiversity:** BIOL 3080, BIOL 3221, BIOL 3301, BIOL 3322, BIOL 3327, BIOL 3620, BIOL 3622, BIOL 3626, MARI 3090

**Ecosystems:** BIOL 3101, BIOL 3623, BIOL 3624, BIOL 3664, BIOL 3761, BIOL 4002, BIOL 4323, BIOL 4370, BIOL 4661, BIOL 4666, OCEA 3001, OCEA 3002, OCEA 3003, OCEA 3004

**Evolution:** BIOL 3102, BIOL 3326, BIOL 4500, ERTH 2205, ERTH 2420, MARI 4090

**Applications:** BIOL 3060, BIOL 3063, BIOL 3225, BIOL 3226, BIOL 3329, BIOL 3580, BIOL 3601, BIOL 3623, BIOL 3624, BIOL 3634, BIOL 4001, BIOL 4065, BIOL 4160, BIOL 4335, BIOL 4369, BIOL 4500, HSTC 2204, MARI 3602, MARI 3603, MARI 3604

**Methods and Data Skills:** BIOL 3633, BIOL 3664, BIOL 3680, BIOL 4061, BIOL 4062, BIOL 4323, MARI 4600

**Organismal Biology**

Organismal biology includes areas such as development, physiology and anatomy, as well the study of particular taxonomic groups. Students interested in organismal biology are encouraged to select courses from the following:

**Developmental Biology:** BIOL 3050

**Physiology/Anatomy:** BIOL 3078, BIOL 3079, BIOL 3326, BIOL 3336, BIOL 3421, BIOL 3430, PHYL 3120

**Microbes:** BIOL 2004, BIOL 3101, BIOL 3102

**Algae/plants:** BIOL 3221, BIOL 3225, BIOL 3226

**Animals:** BIOL 3080, BIOL 3301, BIOL 3322, BIOL 3326, BIOL 3327, BIOL 3336, BIOL 3622, BIOL 3626, BIOL 4080, ERTH 2420, MARI 3090, MARI 3627, MARI 4090

**Organisms in the environment:** BIOL 3062, BIOL 3101, BIOL 3620, BIOL 3623, BIOL 3630, BIOL 3664, BIOL 4323, BIOL 4369, BIOL 4370

**General:** BIOL 3024, BIOL 3503, BIOL 3580, BIOL 4061, BIOL 4062, BIOL 4664

**Cell/Molecular Biology**

Cell/molecular biology includes areas such as cell biology, molecular biology, genetics, biochemistry, microbiology, development, evolution and biotechnology. Students interested in cell/molecular biology are encouraged to consider the courses listed below. Note that Biology credit can be obtained for Microbiology, Biochemistry and Physiology courses above the 2000 level.

**Biology:** BIOL 3037, BIOL 3046, BIOL 3102, BIOL 4020, BIOL 4035

**Microbiology:** all MICI courses 2000 level or higher

**Biochemistry:** all BIOC courses 2000 level or higher

**Neuroscience:** NESC 2570, NESC 3970

**Physiology:** all PHYL courses 2000 level or higher

**BIOL-Equivalent Courses**

Several other Dalhousie departments offer courses in one or more areas of Biology. Students enrolled in a 120 credit hour BSc or BA program in Biology may count any of the following courses toward their Biology program course requirements:

Please note that two (2) BIOL-equivalent courses can count towards a minor program in Biology.

Any course cross-listed as a BIOL course
Agriculture (AGRI)
AGRI 1000

Anatomy (ANAT)
All ANAT courses 2000 level or higher

Animal Science (ANSC)
ANSC 2002, ANSC 2005, ANSC 3000, ANSC 3001,
ANSC 3006, ANSC 3007, ANSC 4008

Aquaculture (AQUA)
AQUA 2000, AQUA 3000

Biochemistry (BIOC)

Physiology (PHYL)
All PHYL courses 2000 level or higher

Plant Science (PLSC)
PLSC 3000, PLSC 4000, PLSC 4002, PLSC 4003, PLSC 4004
Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the department's website.

Course Notes
The normal entry requirement for admission to upper level courses in Biology is a grade of C or better in each of BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03 or in SCIE 1505.18. Students with a lower grade and extenuating circumstances may appeal to the department Undergraduate Curriculum committee. Students should go to the Biology Main Office for further details.

Consult the Biology Department’s website for updates on new courses and suggested course combinations.

Course Descriptions

BIOL 1010 Principles of Biology Part I
CREDIT HOURS: 3
This course, which prepares students for more advanced courses in biology and allied subjects, surveys the fundamental principles of biology with an emphasis on those features common to all organisms. Topics covered include cell and molecular biology, genetics, and evolution. Knowledge of high school mathematics, chemistry and biology is recommended.
CALENDAR NOTES: Students wishing to continue as biology or marine biology majors should complete BIOL 1010 (or BIOL 1020) and BIOL 1011 (or BIOL 1021) in the first year of study. Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees.
EXCLUSIONS: BIOL 1020.03, SCIE (15XX), BIOA 1002.03
FORMATS: Lecture | Lab

BIOL 1011 Principles of Biology Part II
CREDIT HOURS: 3
Biology 1011 broadens the background laid down in BIOL 1010 to include plant and fungi form and function, animal form and function, and ecology. Knowledge of high school mathematics, chemistry and biology is recommended.
CALENDAR NOTES: Students wishing to continue as biology or marine biology majors should complete BIOL 1010 (BIOL 1020) and BIOL 1011 (BIOL 1021) in the first year of study. Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees.
EXCLUSIONS: BIOL 1021.03, SCIE 15XX, BIOA 1003.03
FORMATS: Lecture | Lab

BIOL 1020 Introductory Biology I: Cells, Genetics & Evolution
CREDIT HOURS: 3
Biology 1020.03 is the equivalent of BIOL 1010.03, and is offered primarily online. Topics include cell and molecular biology, genetics, and evolution. High school mathematics, chemistry, and biology is recommended. Learning activities include readings, quizzes, interactive multimedia, online labs, home labs, recorded lectures, and synchronous help sessions.

CALENDAR NOTES: Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees.
Exams must be written on a Dalhousie campus.
EXCLUSIONS: BIOL 1010.03, SCIE 15XX, BIOA 1002.03
FORMATS: Online Delivery

**BIOL 1021 Introductory Biology II: Organismal Biology & Ecology**

CREDIT HOURS: 3
Biology 1021.03 is the equivalent of BIOL 1011.03, and is offered primarily online. Topics include diversity of eukaryotic life, ecology, and plant and animal biology. High school mathematics, chemistry, and biology are recommended. Learning activities include readings, quizzes, interactive multimedia, online labs, home labs, recorded lectures, and synchronous help sessions.

CALENDAR NOTES: Students planning to take further courses in Biology or Marine Biology should read the Program Requirements for these degrees.
Exams must be written on a Dalhousie campus.
EXCLUSIONS: BIOL 1011.03, SCIE 15XX, BIOA 1003.03
FORMATS: Online Delivery

**BIOL 1050 Biology and Society**

CREDIT HOURS: 3
Health, climate change, genetically modified organisms, species and the evolution of disease. Designed for non-majors this course introduces the basics of cell biology, genetics and evolution and how they affect our society. Students acquire a foundation for life-long learning and critical thinking in biology through lectures, independent study and lab activities. NOTE: This course is for students in an Arts program or program other than Biology.
PREREQUISITES: None
EXCLUSIONS: BIOL 1010.03, BIOL 1020.03, SCIE 15XX
FORMATS: Lecture | Lab

**BIOL 2003 Animal Diversity**

CREDIT HOURS: 3
Surveys the diversity of forms and functions of invertebrate and vertebrate animals. The course takes a phylogenetic approach, exploring the evolutionary relationships and key transitions between metazoan taxa. Examples of the different life forms are introduced.
PREREQUISITES: A grade of C or higher in BIOL 1011.03 or (BIOL 1021.03, BIOL 1031.03, BIOA 1003.03, SCIE 1506.09).
FORMATS: Lecture | Lab

**BIOL 2004 Diversity of Plants and Microorganisms**

CREDIT HOURS: 3
Introduces the main domains of plant, fungal and microbial life, based on modern phylogenetic taxonomy. Examines the diversity, structure, physiology and ecology of non – animal life forms. Reviews the origins of the main lineages of living things - Archaea, Eubacteria and Eukaryota, as well as the main groups of eukaryotes.
PREREQUISITES: A grade of C or higher in BIOL 1010.03 or (BIOL 1020.03, BIOL 1030.03, BIOA 1002.03, SCIE 1507.09) and BIOL 1011.03 or (BIOL 1021.03, BIOL 1031.03, BIOA 1003.03, SCIE 1506.09).
FORMATS: Lecture | Lab

**BIOL 2020 Cell Biology**

CREDIT HOURS: 3
An introduction to the eukaryotic cell. Major cell components and activities are described at ultrastructural and molecular levels with emphasis on mammalian systems. The concept of the cell as an integrated structural, functional unit is developed.
PREREQUISITES: A grade of C or higher in BIOL 1010.03 or (BIOL 1020.03, BIOL 1030.03, BIOA 1002.03, SCIE 1507.09). RECOMMENDED: CHEM 1011.03 and CHEM 1012.03
EXCLUSIONS: BIOA 2001.03
FORMATS: Lecture | Lab

**BIOL 2030 Genetics and Molecular Biology**

CREDIT HOURS: 3
The power and prominence of modern genetics are emphasized through a blend of classical and molecular approaches. Topics: Mendelian, population and quantitative genetics; chromosome structure and variation; structure and function of nucleic acids; DNA replication, transcription and translation; gene
expression; gene mutations; and genetic engineering. Course-based authentic research in lab.

PREREQUISITES: A grade of C or higher in BIOL 1010.03 or (BIOL 1020.03, BIOL 1030.03, BIOA 1002.03, SCIE 1507.09). RECOMMENDED: CHEM 1011.03 and CHEM 1012.03
EXCLUSIONS: GENE 2000.03
FORMATS: Lecture | Lab | Tutorial

BIOL 2040 Evolution
CREDIT HOURS: 3
A thorough overview of the process of evolution. Genetic variation and changes in genetic composition of populations, the relationship between genetic and phenotypic change. Adaptation at various levels of organization (DNA to species), speciation, phylogeny, and macroevolutionary patterns. Introduces the full breadth of evolutionary concepts, preparatory to more advanced courses.

CALENDAR NOTES: Recommended: SCIE 1111.03 Writing for the Sciences.
PREREQUISITES: A grade of C or higher in BIOL 1010.03 or BIOL 1020.03 or BIOL 1031.03 or BIOA 1002.03 and BIOA 1003.03, or SCIE 1506.09 and SCIE 1507.09 or equivalent.
EXCLUSIONS: none
FORMATS: Lecture | Lab

BIOL 2060 Introductory Ecology
CREDIT HOURS: 3
Ecology examines interactions of plants and animals, including humans, with each other and with their non-living world. Topics include population growth, competition, predation, food webs, metapopulation dynamics, biodiversity and ecosystem function. The course has a quantitative approach providing a foundation for further work in ecology, marine biology and environmental science.

PREREQUISITES: A grade of C or higher in BIOL 1011.03 or (BIOL 1021.03, BIOL 1031.03, BIOA 1003.03, ENVS 1100.03, ENVS 1000.06, SCIE 1506.09); and a grade of D or higher in MATH 1060.03 or (STAT 1060.03, MATH 2080.03, STAT 2080.03).
EXCLUSIONS: BIOA 3001.03
FORMATS: Lecture | Lab | Tutorial

BIOL 2111 Dalhousie Science Scholars and Leaders: Becoming a Scientist I
CREDIT HOURS: 0
This course examines the structure of science and situates science majors in the context of the scientific process. The course de-mystifies the language and culture of science. Students will develop skills to help them progress towards a science career. The course also explores the translation of science to society.

CALENDAR NOTES: BIOL 2111.00 and BIOL 2112.03 must be taken in consecutive fall/winter terms.
CROSSTANCED: SCIE 2111
RESTRICTIONS: E1. The course requires permission of instructor. Preference will be given to students in the Dalhousie Science Scholars & Leaders Program. BIOL 2111 will be open to Biology majors. SCIE 2111 will be open to students from other units within the Faculty of Science.
FORMATS: Lecture | Experiential Learning | Other (explain in comments)

BIOL 2112 Dalhousie Science Scholars and Leaders: Becoming a Scientist II
CREDIT HOURS: 3
This course examines the structure of science and situates science majors in the context of the scientific process. The course de-mystifies the language and culture of science. Students will develop skills to help them progress towards a science career. The course also explores the translation of science to society.

CALENDAR NOTES: BIOL 2111.00 and BIOL 2112.03 must be taken in consecutive fall/winter terms.
CROSSTANCED: SCIE 2111
RESTRICTIONS: E1. The course requires permission of instructor. Students must have been enrolled in BIOL/SCIE2111 in the Fall term. BIOL 2112.03 will be open to Biology majors. SCIE 2112.03 will be open to students from other units within the Faculty of Science.
FORMATS: Lecture | Experiential Learning | Other (explain in comments)

BIOL 2601 The Flora of Nova Scotia
CREDIT HOURS: 3
Introduction to the biodiversity of flowering plants (Angiosperms) found in Nova Scotia. A wide range of plant communities are visited on several day-long field trips. A focus on plant identification is supplemented with lessons in plant ecology, floral biology, pollination mechanisms, natural history, and human uses (e.g., edible, poisonous, medicinal).

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: One year of university courses
EXCLUSIONS: BIOL 3219.03
FORMATS: Lecture | Lab
BIOL 2605 Introduction to Marine Life of Nova Scotia
CREDIT HOURS: 3
Introduction to the variety of marine life found in Nova Scotia. The diversity and zonation of invertebrates and macroalgae is explored on field trips to different shore environments, including a salt marsh, rocky shore and sandy beach. Lectures and laboratory-based investigations on live marine organisms complement the field trips.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Marine Biology students may NOT use this course as part of their major degree requirements. This course is aimed at non-majors who have completed at least one year of university.
PREREQUISITES: One year of university courses
FORMATS: Lecture | Lab

BIOL 3003 Introduction to Field Oceanography
CREDIT HOURS: 3
See course description for OCEA 3003.03 in the Oceanography section of the calendar.

BIOL 3024 Microscopy
CREDIT HOURS: 3
See course description for MICI 3024.03 in the Microbiology and Immunology section of the calendar.

BIOL 3037 Life Rewritten: Applications and Implications of Gene Editing and Synthetic Biology
CREDIT HOURS: 3
This course introduces students to gene editing and synthetic biology tools (eg.CRISPR) as well as both current and future applications of those tools for conservation, medicine, and food production. This course empowers students to develop informed opinions about the ethics of using such tools in science and society.
PREREQUISITES: A mark of B- or better in both BIOL 2020 (Cell Biology) and BIOL 2030 (Genetics and Molecular Biology) or instructor's consent.
RESTRICTIONS: E1 and E2. Reservation for Biology majors to register first.
FORMATS: Lecture | Discussion | Other (explain in comments)

BIOL 3042 Molecular Ecology
CREDIT HOURS: 3
We survey techniques of molecular genetic analysis and consider how they can be used to identify species, populations, sexes, individuals and family relationships, and study population attributes such as historical dispersal, contemporary connectivity, mating behaviour and effective population size. Evaluation is based on assignments, a test and a final exam.
PREREQUISITES: A grade of B- or better in each of BIOL 2030.03 (or GENE 2000.03), BIOL 2040.03, and BIOL 2060.03.
EXCLUSIONS: BIOL 4042.03
FORMATS: Lecture

BIOL 3044 Ecological Genetics
CREDIT HOURS: 3
An advanced examination of genetic variation in ecologically important (especially quantitative) traits. Topics will include determining whether a trait is inherited; natural selection in the wild; specialist vs. generalist strategies; how variation is maintained in the face of selection; trade-offs between competing selective pressures and selection for diversification.
PREREQUISITES: BIOL 2040.03 or BIOL 3041.03
EXCLUSIONS: BIOL 4044.03
FORMATS: Lecture

BIOL 3046 Molecular Evolution
CREDIT HOURS: 3
This course examines the process of evolutionary change at the molecular level. It begins with the sources of mutation, and moves on to dynamics of population variation. The course culminates with a macro-evolutionary perspective on topics such as adaptive evolution and genetic co-option. This course is complementary to BIOC 4010.03 (Bioinformatics).
PREREQUISITES: BIOL 2030.03 (or GENE 2000.03) and BIOL 2040.03
FORMATS: Lecture
BIOL 3050 Developmental Biology
CREDIT HOURS: 3
Lectures describe development as a sequence of processes and events, in which 'simple' structures such as fertilized eggs are progressively transformed into complex organisms. These events are governed by developmental 'rules' which have been determined through experimental study of animal and plant model organisms. Laboratories use live material whenever possible.
PREREQUISITES: BIOL 2020.03 (or BIOA 2001.03) and BIOL 2030.03 (or GENE 2000.03)
FORMATS: Lecture | Lab | Discussion

BIOL 3060 Environmental Ecology
CREDIT HOURS: 3
The ecological effects of pollution, disturbance, and other stressors, both anthropogenic and natural. Major subject areas are air pollutants, toxic metals, acidification, eutrophication, oil spills, pesticides, forestry, warfare, urban ecology, risks to biodiversity, and resource degradation. The overarching context of the course is ecological sustainability of the human economy.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) (or see instructor)
FORMATS: Lecture | Tutorial

BIOL 3061 Communities and Ecosystems
CREDIT HOURS: 3
Life exists and evolves in ecosystems which are complex systems. This class studies ecosystems and their food webs from a systems theory approach with an emphasis on network theory and qualitative analysis. Life itself is a networked process. Ecosystems are approached holistically to discover a new set of system properties.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) or INTD 2001.03 or INTD 2002.03
RESTRICTIONS: E1, E2
FORMATS: Lecture

BIOL 3062 Behavioral Ecology
CREDIT HOURS: 3
This course examines animal behaviour from an evolutionary perspective. Using the theory of natural selection as a basis, we will examine foraging, grouping patterns, territorial behaviour, parenting, mating behaviour, social organization, aggression and cooperation. There will be tutorials and essay assignments.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03)
FORMATS: Lecture

BIOL 3063 Resource Ecology
CREDIT HOURS: 3
This course considers the ecology, utilization, and management of natural resources in fisheries, wildlife and forest management, agriculture and aquaculture. Topics include population dynamics, community interactions, and ecosystem support of resources as well as the history of resource utilization, practices of controlling production, pests, and predators, and sustainable management strategies.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and MATH 1000.03 (or MATH 1215.03 or SCIE 1505.18) and STAT 1060.03 (or SCIE 1505.18)
CROSSTLISTED: MARI 3063.03
FORMATS: Lecture | Tutorial

BIOL 3065 Conservation Biology
CREDIT HOURS: 3
This course offers an introduction to conservation biology: the science of understanding and conserving biodiversity on Earth. Students learn how biodiversity change is assessed and what tools are used to prevent the extinction of species and the disruption of ecosystems. Tutorials involve oral presentations as well as a written essay, and an in-depth discussion of controversial topics.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03
FORMATS: Lecture | Tutorial

BIOL 3078 Principles of Animal Physiology Part I
CREDIT HOURS: 3
Lectures on the mechanisms which coordinate the activities of cells within multicellular organisms and permit such organisms to remain in homeostatic balance. The emphasis is on the mechanisms most widely distributed throughout the animal kingdom. The laboratories are designed to illustrate these principles in a variety of organisms.
CALENDAR NOTES: Students must complete 3078.03 before 3079.03
PREREQUISITES: BIOL 2003.03, and BIOL 2020.03 (or BIOA 2001.03)
CROSSLISTED: MARI 3074.03
FORMATS: Lecture | Lab

BIOL 3079 Principles of Animal Physiology Part II
CREDIT HOURS: 3
This course is a continuation of a discussion of the mechanisms which coordinate the activities of cells within multicellular organisms which began in BIOL 3078.03. This term emphasizes the urinary, cardiovascular and respiratory systems. The laboratories reflect the approaches taken to study these systems in a variety of organisms.
PREREQUISITES: BIOL 3078.03 or MARI 3074.03
CROSSLISTED: MARI 3076.03
EXCLUSIONS: BIOA 3005.03
FORMATS: Lecture | Lab

BIOL 3080 The Ecology and Evolution of Fishes
CREDIT HOURS: 3
The class examines selected topics on the ecology and evolution of marine and freshwater fishes. Topics include: phylogeny and systematics; functional morphology and physiology; population biology; life-history evolution; behavior; fisheries science; and conservation biology.
PREREQUISITES: A cumulative GPA of 2.7 (B-) or better in BIOL 2003.03, BIOL 2040.03, BIOL 2060.02 (or BIOA 3001.03)
CROSSLISTED: MARI 3080.03
EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03
FORMATS: Lecture

BIOL 3101 Microbial Ecology
CREDIT HOURS: 3
Lectures on the ecology of bacteria, viruses and protists. Community structure, food web nutrient cycling, biogeochemical cycles, competition, succession and symbiosis are discussed with examples from marine, fresh-water and soil habitats. There is an emphasis on marine organisms.
PREREQUISITES: BIOL 2004.03 (or MICI 2100.03), and BIOL 2060.03 (or BIOA 3001.03)
CROSSLISTED: MARI 3101.03
FORMATS: Lecture

BIOL 3102 Microbial Eukaryotes: Biodiversity and Evolution
CREDIT HOURS: 3
Microbial eukaryotes are of tremendous ecological, evolutionary and medical/veterinary importance. This course provides a comprehensive understanding of the biodiversity and evolution of both algal and protozoan eukaryotes, and examines important aspects of their organismal biology, including cell and genome organization, life histories, trophic strategies, locomotion and symbiosis.
PREREQUISITES: BIOL 2020.03 (or BIOA 2001.03) and BIOL 2004.03 (or MICI 2100.03)
FORMATS: Lecture | Lab

BIOL 3219 Flora of Nova Scotia
CREDIT HOURS: 3
Hands-on introduction to the plants of Nova Scotia, with an emphasis on taxonomy and a focus on the flowering plants. Includes identification, morphology, distribution, habitat, and ecology. Takes several day-long and half-day field trips. Evaluation includes a plant collection, field notebook, field report, presentation, and lecture and lab exams.
CALENDAR NOTES: Instructor approval required. Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses.
PREREQUISITES: BIOL 2004.03, and 2060.03, or equivalents
EXCLUSIONS: BIOL 2601.03
FORMATS: Lecture | Lab | Other (explain in comments)

BIOL 3221 Diversity of Algae
CREDIT HOURS: 3
This is a taxonomic introduction to the major algal groups (macrophytic and microscopic) with an emphasis on the marine seaweeds. Basic taxonomic differences are covered, along with an introduction to macrophyte ecology, human uses and symbioses. Laboratory sessions focus on morphology and reproduction.
CALENDAR NOTES: Also offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see http://www.seaside.science.dal.ca
BIOL 3225 Plants in the Human Landscape
CREDIT HOURS: 3
The use of plants for human recreation and aesthetic purposes in gardens, public parks, suburban and urban landscapes. Topics include: history of gardens, garden design, plant materials, edible landscaping, plants and human health. The course includes field trips and group work and students complete a design project.
PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 (C+ or better) and BIOL 1011.03 or BIOL 1021.03 (C+ or better); or SCIE 1505.18 (C+ or better) or PLAN 2001.03 (C+ or better) or instructor permission
CROSSLISTED: ENVS 3225, PLAN 3225
FORMATS: Lecture | Tutorial

BIOL 3226 Economic Botany: Plants & Civilization
CREDIT HOURS: 3
The story of the human use of plants for food, fibre and fuel including the botany, domestication, development, distribution, production, processing, history, economic and social impacts of the major world crops (cereals, fruits, vegetables, flowers and industrial crops) and the importance of plants in medicine and conservation.
PREREQUISITES: A grade of B- or higher in BIOL 1010.03 or (BIOL 1020.03 or BIOA 1002.03 or BIOL 1030.03) and BIOL 1011.03 or (BIOL 1021.03, BIOA 1003.03, or BIOL 1031.03); or SCIE 1505.18
CROSSLISTED: ENVS 3226.03
FORMATS: Lecture | Tutorial

BIOL 3301 Invertebrate Biology
CREDIT HOURS: 3
A survey of the diversity, ecology and evolutionary history of the major invertebrate groups. Lectures will emphasize phylogenetics and diversity of body plans. Labs will emphasize identification and anatomy through dissections and observations.
PREREQUISITES: BIOL 2003.03
CROSSLISTED: MARI 3301.03
EXCLUSIONS: BIOL 3321X/Y.06
FORMATS: Lecture | Lab

BIOL 3322 Parasitology
CREDIT HOURS: 3
The course emphasizes the parasite-host relationships, evolution of the parasites and adaptations to the host, modifications of physiology, structure and life cycle for a parasitic existence. Since the most extensive research pertains to parasites of man, the emphasis is on human parasites.
CALENDAR NOTES: Students who took a Biology 1000 level prerequisite prior to September 2013 and did not get a grade of C+ or higher should contact an advisor in the Biology Department preferably before registration begins.
PREREQUISITES: A grade of C+ or higher in BIOL 1010 (or BIOL 1020.03 or BIOA 1002.03) and BIOL 1011.03 (or BIOL 1021.03 or BIOA 1003.03) or SCIE 1505.18
FORMATS: Lecture | Lab

BIOL 3326 Vertebrate Design: Evolution and Function
CREDIT HOURS: 3
Vertebrate Design explores 600 million years of vertebrate evolution and phylogenetic relationships, with particular attention to origins of major groups and the anatomical and functional innovations associated with their rise and diversification. Functional morphology and physiology of swimming, flying and terrestrial locomotion is also covered.
PREREQUISITES: BIOL 2003.03 and BIOL 2040.03
FORMATS: Lecture

BIOL 3327 Entomology
CREDIT HOURS: 3
The course is an introduction to the study of insects. Topics include insect classification, evolutionary diversity, biology, ecology, behaviour, and various applied aspects. Through this survey of the insects, students will gain an appreciation of insect biodiversity as well as their economic and ecological importance.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03
EXCLUSIONS: BIOA 3000.03
FORMATS: Lecture | Lab

BIOL 3328 Medical Entomology
CREDIT HOURS: 3
Medical Entomology covers direct injuries caused by arthropods such as phobias, annoyance, allergies, toxins, venoms and myiasis, arthropod transmission of vertebrate parasites, epidemiology of arthropod-borne diseases. Students study transmission of diseases, methods of surveillance of diseases, management by vector control and other methods of arthropod-borne diseases.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03 or permission of instructor
FORMATS: Lecture | Lab

BIOL 3329 Applied Entomology
CREDIT HOURS: 3
Insects not only comprise more than half of the world's biodiversity, but influence human health and economic well-being in many ways. In this course students are introduced to insect pest management, agricultural, forest and medical entomology, forensic entomology, and insects in food science, beneficial and harmful insects.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: A grade of C+ or higher in BIOL 1010 (or BIOL 1020.03 or BIOA 1002.03) and BIOL 1011.03 (or BIOL 1021.03 or BIOA 1003.03) or SCIE 1505.18
FORMATS: Lecture | Lab

BIOL 3336 Vertebrate Functional Morphology
CREDIT HOURS: 3
Vertebrates are mechanical machines that move through the environment in a wide variety of ways. We use simple physics and mathematics to explore the mechanics and energetics of various modes of terrestrial locomotion, swimming, and flying, and the materials from which vertebrates are built.
PREREQUISITES: BIOL 2003.03 AND MATH 1000.03 or MATH 1215.03
RESTRICTIONS: E1
FORMATS: Lecture

BIOL 3421 Comparative Vertebrate Histology
CREDIT HOURS: 3
See course description for ANAT 3421.03 in the Anatomy and Neurobiology section of this calendar.

BIOL 3430 Introduction to Human Histology
CREDIT HOURS: 3
See course description for ANAT 2160.03 in the Anatomy and Neurobiology section of the calendar.

BIOL 3580 Philosophy of Biology
CREDIT HOURS: 3
See course description for PHIL 3420.03 in the Philosophy section of this calendar.

BIOL 3601 Nature Conservation
CREDIT HOURS: 3
This interdisciplinary course explores relationships between humans and the natural world, including damage caused to species and ecosystems. The course looks at environmental ethics and world views, environmental philosophy, sustainability, the cultural expression of natural values (literature, music, art) and conservation science and actions, including the establishment of protected areas.
PREREQUISITES: BIOL 1010.03 (or BIOL 1020.03 or BIOA 1002.03) and BIOL 1011.03 (or BIOL 1021.03 or BIOA 1003.05); or SCIE 15XX, or permission of instructor
FORMATS: Lecture | Tutorial
**BIOL 3602 History of Biology**  
**CREDIT HOURS:** 3  
What was life? This course explores a wide range of human attempts to understand the living world, from ancient accounts of spontaneous generation to atomic-age genetics and ecology.  
**CROSSTLISTED:** HSTC 3302  
**RESTRICTIONS:** E1 and E2  
**FORMATS:** Lecture | Seminar

**BIOL 3614 Field Ecology**  
**CREDIT HOURS:** 3  
This course provides practical experience in field ecology by collecting, analysing, and interpreting field data and preparing formal reports. Class research projects address questions in animal or plant ecology within intertidal, freshwater or forest ecosystems. Instruction includes data analysis and scientific writing skills. Evaluation is based on individual written papers.  
**CALENDAR NOTES:** Includes several weekend field trips, some overnight camping; contact instructor for details and application; auxiliary fee charged to cover costs of field expenses; course aimed at 4th year majors and 3rd year honours students. Signature required.  
**PREREQUISITES:** BIOL 2060.03 and STAT 1060.03; STAT 2080.03 recommended  
**RESTRICTIONS:** E1, E2  
**EXCLUSIONS:** BIOL 3615.03  
**FORMATS:** Lecture | Lab | Other (explain in comments)

**BIOL 3620 Field Survey of Terrestrial Biodiversity**  
**CREDIT HOURS:** 3  
Measuring and interpreting trends in the biodiversity of organisms in terrestrial environments. Field-intensive, with one week spent camping at a field station. Techniques for identification of major groups (lichens, mosses, higher plants, insects, amphibians, birds, mammals), sampling presence and abundance of species, and relating trends to natural and anthropogenic variation.  
**CALENDAR NOTES:** Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.  
**PREREQUISITES:** BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03) or permission of instructor  
**FORMATS:** Lecture | Lab

**BIOL 3622 Ornithology**  
**CREDIT HOURS:** 3  
Overview of avian biology and techniques for the scientific study of bird populations, including identification by sight and sound. Field-intensive, with 8 days in the field, including one week camping at a field station in southwestern Nova Scotia to conduct research on birds in their natural habitats.  
**CALENDAR NOTES:** Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.  
**PREREQUISITES:** BIOL 2003.03 or BIOL 2060.03 or BIOA 3001.03, or permission of instructor  
**FORMATS:** Lecture | Lab

**BIOL 3623 Applied Coastal Ecology**  
**CREDIT HOURS:** 3  
Applied Coastal Ecology explores impacts of anthropogenic inputs on structure and function of coastal ecosystems. Through field trips, laboratories and guest demonstrations, students examine ecosystem health, e.g. communities on rocky shores, salt marshes and sandy shores and learn experimental design, principles of environmental assessment and monitoring, and coastal habitat remediation.  
**CALENDAR NOTES:** Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Not offered every year.  
**PREREQUISITES:** BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03)  
**CROSSTLISTED:** ENVS 3623.03, MARI 3623.03  
**FORMATS:** Lecture | Lab

**BIOL 3624 Urban Freshwater Systems**  
**CREDIT HOURS:** 3  
Ecology of urban freshwater systems with a focus on understanding how they respond to human-caused stresses within their watersheds. Students conduct case studies at nearby lakes and/or streams to monitor water quality and characterize resident communities of plants and animals. Evaluation is based on individual and group research reports.  
**CALENDAR NOTES:** Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration
BIOL 3626 Field Studies of Marine Mammals
CREDIT HOURS: 3
Hands-on introduction to research on marine mammals. Lectures provide an overview of marine mammal adaptations, evolution, population biology, social organization, conservation, and management. Labs include a necropsy and techniques of photographic identification of individuals. On a several-day camping trip, students observe marine mammals from whale-watch boats and conduct research projects. CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and BIOL 3062.03 (or BIOL 3630.03 or PSYO 2160.03), and MATH 1060.03/STAT 1060.03
CROSSSLISTED: MARI 3626.03
FORMATS: Lecture | Lab

BIOL 3628 Marine Ornithology
CREDIT HOURS: 3
Overview of the biology of birds in marine environments. Seabird ecology, evolution, adaptations, identification, and natural history. Tools and techniques for studying their behaviour, diet, and populations in the field. Lectures, exercises, and a week-long field trip to Maritime seabird breeding colonies. Student team and independent research projects and presentations. CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.
PREREQUISITES: BIOL 1010 or BIOL 1020 or equivalent, and BIOL 1011 or BIOL 1021 or equivalent, or SCIE 15XX, one of BIOL 2003 or BIOL 2004, and BIOL 2060, or instructor's permission. Knowledge of statistics, Geographic Information Systems (GIS), and familiarity with Excel spreadsheets are helpful, but not required, for research projects.
CROSSSLISTED: MARI 3628.03

BIOL 3630 Field Methods in Animal Behaviour
CREDIT HOURS: 3
First-hand experience in studying animal behaviour in the field. Day-long field exercises teach basic methods, then students plan, conduct, write up, and orally present a 5-day project of their own. CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 3062.03 or PSYO 2160.03 or PSYO 3160X/Y.06 or permission of instructor
FORMATS: Lecture | Lab

BIOL 3632 Applied Field Methods in Fish Ecology
CREDIT HOURS: 3
Practical experience conducting field research on fishes with field trips to streams and shallow water marine/freshwater habitats. Techniques include collecting fish, designing and conducting surveys, studying behaviour, measuring phenotypic variability, quantifying temporal and spatial variation, planning for statistical analysis, and weighing tradeoffs between data quality, quantity, costs and ethical/environmental considerations. CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and STAT 1060.03 (or MATH 1060.03 or SCIE 1505), or their equivalents, or permission of instructor. STAT 2080 is recommended.
CROSSSLISTED: MARI 3632.03, ENVS 3632.03
FORMATS: Lecture | Lab

BIOL 3633 Spatial Information and GIS in Ecology
CREDIT HOURS: 3
A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology. CALENDAR NOTES: Offered in the summer through SEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03
CROSSSLISTED: ENVS 3633.03, GEOG 3633.03, MARI 3633.03
EXCLUSIONS: PLAN 2006.03, GEOG 2006.03
FORMATS: Lecture | Lab
BIOL 3634 Agroforestry
CREDIT HOURS: 3
Agroforestry is a land-use system in which trees or shrubs are grown in association with agricultural crops or livestock. As practiced in the tropics, agroforestry generates numerous ecological, environmental and economic benefits. This hands-on, field-intensive course provides a foundation for understanding this traditional practice and its applications in North America.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures, see seaside.science.dal.ca
PREREQUISITES: BIOL 2060.03 or AGRI 1000.03 or BIOA 3001.03 or permission of the Instructor. An additional class on the biology, ecology, diversity or physiology of plants is recommended.

BIOL 3635 Species at Risk Field Course
CREDIT HOURS: 3
This course provides practical field experience in the biology of Species at Risk (SAR). Students learn through lectures, presentations, field work, and writing a formal report. On a week-long field trip to Southwestern Nova Scotia, students learn from SAR biologists how to conduct field surveys, document data, and recover SAR.
CALENDAR NOTES: Intensive summer field course. Field trip to Southwestern NS for 7-9 days. Auxiliary fee charged to cover field expenses. Application and deposit required for permission to register. See www.seaside.science.dal.ca for details.
PREREQUISITES: BIOL 2003.03 or BIOL 2004.03; and BIOL 2060.03. BIOL 3065.03 is recommended.
CROSSLISTED: MARI 3635.03
RESTRICTIONS: Requires permission of instructor
FORMATS: Lecture | Lab | Other (explain in comments)

BIOL 3639 Herpetology
CREDIT HOURS: 3
Through a combination of lectures, labs and field activities, this course provides an overview of the global diversity, evolution, ecology and conservation of herpetofauna (amphibians and reptiles), and the natural history and identification of Nova Scotian herpetofauna. Students gain experience with common field research and monitoring techniques for herpetofauna.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca
PREREQUISITES: BIOL 2060.03, BIOL 2003.03
FORMATS: Lecture | Lab | Other (explain in comments)

BIOL 3640 Tropical Ecology and Biodiversity Field Class
CREDIT HOURS: 6
Hands-on introduction to tropical ecology, biodiversity, and conservation. Includes an 18-day field trip to Sri Lanka to visit a variety of tropical terrestrial and aquatic ecosystems, quantify habitats, identify species, and study agroforestry, ecological interactions and animal behavior. Evaluation includes lecture tests, field notebooks, class research projects, presentations and reports.
CALENDAR NOTES: Offered in summer through SEASIDE. Special application procedure. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03 and BIOL 2004.03 or equivalent and BIOL 2060 or equivalent or instructor’s permission. An introductory course in statistics (STAT 1060.03 or similar) is recommended.

BIOL 3664 Intertidal Ecology and Diversity
CREDIT HOURS: 3
Hands-on, intensive introduction to ecological research on rocky shores, tidal flats, and sandy beaches. Relevant ecological concepts, sampling techniques for flora and fauna, and statistical skills are learned. Field sampling on day and camping trips is followed by lab work (e.g., identification of seaweeds, invertebrates), statistical analysis, and report preparation.
CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), and STAT 1060.03 (or MATH 1060.03 or SCIE 15xx), and BIOL 2003.03
CROSSLISTED: ENVS 3664.03, MARI 3664.03
EXCLUSIONS: BIOL 3662.03, BIOL 3663.03
FORMATS: Lecture | Lab

BIOL 3680 Scientific Diving Methods for Marine Ecology
This course introduces students that are certified divers to the practice of underwater research using SCUBA. It combines lectures with supervised dives in various marine habitats to demonstrate the application of standard sampling and experimental procedures in marine ecology, with an emphasis on logistical considerations and diving safety.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2003.03, BIOL 2060.03 or BIOA 3001.03, STAT 1060.03 or DISP, internationally recognized diving certification, diving physical; recommended: BIOL 3321.03, BIOL 3301.03

CROSSLISTED: MARI 3680.03

FORMATS: Lecture | Lab

**BIOL 3761 Marine Ecology**

CREDIT HOURS: 3

Building upon an understanding of basic ecological and evolutionary principles, and a familiarity with the major marine invertebrate and algal taxa, this course examines patterns and processes at the organismal, population and community levels that determine the diversity and distribution of life in the sea.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and (BIOL 2003.03 or BIOL 2004.03), and OCEA 2000X/Y.06 or (OCEA 2001.03 and OCEA 2002.03)

CROSSLISTED: MARI 3761.03

RESTRICTIONS: This course is restricted to 3rd and 4th year students.

FORMATS: Lecture

**BIOL 3762 Terrestrial Ecology**

CREDIT HOURS: 3

This course provides a conceptual framework for understanding the function of terrestrial ecosystems. One week at a field station in Nova Scotia provides practical experience with forest, bog and agroecosystems. Topics include soil profiles and nutrients; plant productivity and interactions; and ecological roles of microorganisms, lichens, fungi, insects, and vertebrates.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures see seaside.science.dal.ca

PREREQUISITES: BIOL 2003.03 or BIOL 2004.03 , and BIOL 2060.03 (or BIOA 3001.03), or instructor's permission.

FORMATS: Lecture | Lab

**BIOL 3800 Experiential Learning**

CREDIT HOURS: 3

Experiential Learning recognizes the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and a timetable.

CALENDAR NOTES: To register in this course, a student must first find a suitable supervisor and sign a learning agreement between the course coordinator, the student and the supervisor.

PREREQUISITES: Students must be registered in a Biology or Marine Biology program, have completed a minimum of 18 credit hours in Biology above the 1000 level and have a minimum cumulative GPA of 2.4 or permission of course coordinator.

CROSSLISTED: MARI 3800.03

EXCLUSIONS: Scheduled courses at a learning institution, study that would qualify for a Special Topics course, an Honours project, co-op work terms and paid work. Only one experiential learning course per degree is permitted.

**BIOL 3872 The Biologist's Toolkit**

CREDIT HOURS: 3

Best practices for scientific computing and data handling, theory of visualisation, and scripting, teaching students how to create, store, and manipulate data using the object-oriented programming language R. Examples and projects will be drawn from a wide variety of biological areas, covering typical problems encountered with computer use.

CALENDAR NOTES: This course is aimed at biology and marine biology majors who are looking to pursue future research in any discipline.

PREREQUISITES: BIOL 2030.03 or BIOL 2040.03 or BIOL 2060.03 or permission of Instructor

FORMATS: Lecture | Lab

**BIOL 4001 Environmental Impact Assessment**

CREDIT HOURS: 3

This course serves as the capstone to the EIA certificate. It is a hands-on training course that guides students through a nine-step framework for preparing individual EIAs on a physical project as well as a Strategic Environmental Assessment on a policy. International, national, provincial examples illustrate the framework.

CALENDAR NOTES: All students taking BIOL 4001.03 or ENVS 4001.03 must have completed 90 credit hours and be in their fourth year of study, or have permission of instructor.
PREREQUISITES: ENVS 1100.03 and 1200.03 (or ENVS 1000X/Y.06) or BIOL 2060.03 (or BIOA 3001.03) or ERTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or INTD 2002.03 or OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) or SUST 2000.06 or SUST 2001.06
CROSSLISTED: ENVS 4001.03
RESTRICTIONS: E1, E2, and E3 This course is open to all students with the necessary prerequisites regardless of whether they are applying for the EIA certificate or not.
FORMATS: Lecture | Tutorial

BIOL 4002 The Science of Wetland Ecosystems
CREDIT HOURS: 3
See ENVS 4002.03 in the Environmental Science section of the calendar.

BIOL 4003 Indigenous perspectives in conservation biology
CREDIT HOURS: 3
This two week field course takes a holistic approach to conservation biology. Paradigms and frameworks in native science are discussed in conservation study hotspots, in outdoor and indoor classrooms, and laboratories in First Nations’ territories. Native knowledge systems from Turtle Island are explored to highlight the roles and duties indigenous peoples have with attention to Canada’s colonial framework and the treaties.
CALENDAR NOTES: Intensive summer field course. Multiple overnight trips. Auxiliary fee charged to cover field expenses. Application and deposit required for permission to register. See www.seaside.science.dal.ca for details.
RESTRICTIONS: Requires permission of instructor
EXCLUSIONS: E1, E2
FORMATS: Lecture | Lab | Experiential Learning | Other (explain in comments)

BIOL 4004 Principles of Indigenous Medicine
CREDIT HOURS: 3
A holistic, two-eyed seeing course highlighting indigenous medicine’s principles in ceremony, concepts of health and wellness, biochemistry, ethnopharmacology, practice and discovery. This course introduces indigenous ways of knowing medicine, important natural products, their biosynthesis, the drug discovery process, synthetic biology and indigenous style formulations and medicine practices.
PREREQUISITES: Recommend that students have completed the second year requirements of a degree program. Override permitted with instructor permission.
CROSSLISTED: Grad
EXCLUSIONS: E1: 30 Credit hours
FORMATS: Lecture | Discussion | Experiential Learning

BIOL 4020 Advanced Cell Biology
CREDIT HOURS: 3
This advanced class focuses on how the animal cell interacts with its environment and integrates information to proceed with an appropriate course of action. Consequences of disrupting signaling pathways are also examined. Lectures are supplemented with assigned readings of original research articles for discussion in class.
PREREQUISITES: BIOL 2020.03 or BIOA 2001.03 with a minimum grade of B- or instructor's consent.
EXCLUSIONS: BIOL 3020.03
FORMATS: Lecture | Discussion

BIOL 4035 Human Genetics
CREDIT HOURS: 3
See BIOC 4835 in the Biochemistry section of the calendar.

BIOL 4039 Special Topics
CREDIT HOURS: 3
Enables students to study an area of Biology or Marine Biology not covered in other courses. Students should consult with the faculty member to arrange the topic of study and develop an outline of course content, which must be approved by the Chair of the Biology Undergraduate Curriculum Committee.
CALENDAR NOTES: Registration in Special Topics can only be approved by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html
BIOL 4061 Design of Biological Experiments  
CREDIT HOURS: 3  
This course introduces students with previous training in univariate statistics to the practice and pitfalls of experimental design and data analysis in biology. Lectures and take-home exams are used to demonstrate the fundamentals of design and analysis, with emphasis on potential problems and how they are overcome.  
PREREQUISITES: MATH 2080.03 or STAT 2080.03 or ECON 2280.03 (Grade of B+ or higher); offered to well prepared honours students as well as graduate students  
FORMATS: Lecture

BIOL 4062 Analysis of Biological Data  
CREDIT HOURS: 3  
The course introduces students to techniques available for the analysis of biological data, including regression, general linear models and multivariate methods. Emphasis is on the practical use of these techniques rather than derivations. Students analyze real and realistic data sets, and are assessed on write-ups of these analyses.  
PREREQUISITES: (STAT 2080.03 or MATH 2080.03) and BIOL 3872.03

BIOL 4065 Sustainability and Complexity  
CREDIT HOURS: 3  
Sustainability is a transdisciplinary area integrating equitable societies, protected environments, and robust economies. Achieving sustainability is a challenge that has only had limited success in our complex world. Complexity studies offer new approaches for achieving sustainability beyond the traditional ones mostly focused upon reducing unsustainability.  
CALENDAR NOTES: Course open to students in: Faculty of Science, College of Sustainability, and International Development students in FASS  
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) or ERTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or INTD 2002.03 or OCEA 2001.03/2002.03 (or OCEA 2000X/Y.06) or SUST 2000.06 or SUST 2001.06  
RESTRICTIONS: E1, E2, E3 Restricted to students in: Faculty of Science, College of Sustainability and International Development students in FASS  
FORMATS: Lecture | Tutorial | Discussion

BIOL 4069 Statistical Rethinking: Applied Bayesian Statistics  
CREDIT HOURS: 3  
This course, which uses Richard McElreath’s popular ‘Statistical Rethinking’ book as a foundation, provides a broad introduction to applied Bayesian models using R or Python. Examples are drawn from Biology and Social Science, in contexts designed to be widely applicable to analysis of observational data across disciplines.  
CALENDAR NOTES: Course is aimed at non-stats majors seeking to do applied statistical work, primarily in Biology but including other disciplines; Students majoring in statistics (including Honours, Majors, Combined Honours and Double Majors programs) cannot receive STAT course credit for this course. Students Minorin in Statistics can count this as a 3000 level STAT course credit.  
PREREQUISITES: STAT 2060.03 OR STAT 2080.03 AND One of: STAT 2450.03, CSCI 2202.03, BIOL 3872.03, MARI 4600.03  
CROSSLISTED: STAT 3069.03  
FORMATS: Lecture

BIOL 4071 Physiological adaptations for breeding in birds  
CREDIT HOURS: 3  
This course provides an overview of female avian reproductive physiology and ecology, with an emphasis on individual variation in life-history traits. It will describe the physiological, metabolic, energetic, and hormonal mechanisms that underpin individual variation in the key female-specific reproductive traits, and the trade-offs amongst these traits that determine variation in fitness.  
PREREQUISITES: BIOL 3062.03 and BIOL 3078.03  
FORMATS: Lecture | Other (explain in comments)

BIOL 4080 Laboratory Studies of Fishes  
CREDIT HOURS: 3  
Through a series of laboratory exercises, the course provides students with practical experience on various topics related to the study of ichthyology. Topics shall include the following: species identification; meristics and morphometrics; use of dichotomous keys; internal and external morphology; ageing and growth determination; ecomorphological attributes; data collection and analysis.  
PREREQUISITES: BIOL 3080.03 or MARI 3080.03  
CROSSLISTED: MARI 4080.03  
EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03  
FORMATS: Lab
BIOL 4160 Political Ecology
CREDIT HOURS: 3
Political ecology (PE) examines the politics of the environment but not on specific policies, political theories, or ideologies. PE considers an interacting array of political and socio-economic forces that shape human-environmental relationships. International case studies will be evaluated using several PE tools. Discussion format with Blackboard Learning/Internet assignments.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), and one of BIOL 3003.03, BIOL 3060.03, BIOL 3061.03, BIOL 3062.03, BIOL 3063.03, BIOL 3065.03, BIOL 3067.03, BIOL 3069.03, BIOL 3101.03, BIOL 3601.03, BIOL 3623.03, BIOL 3624.03, BIOL 3761.03, BIOL 3762.03, or INTD 2001 or INTD 2002 or permission of instructor
FORMATS: Discussion

BIOL 4220 Plant Cell Biology
CREDIT HOURS: 3
This course covers the structure, function, and dynamic properties of plant cellular components including constituent organelles, cytoskeleton, and the cell wall. Current areas of research such as programmed cell death, cell signalling and cellular trafficking are discussed in depth. The course consists of lectures, student seminars, and report writing.
PREREQUISITES: BIOL 2020.03 (or BIOA 2001.03) and BIOL 2004.03 or permission of the instructor
FORMATS: Lecture

BIOL 4302 Clinical and Molecular Immunology
CREDIT HOURS: 3
See course description for MICI 4302.03 in the Microbiology and Immunology section of this calendar.

BIOL 4323 Biologging & Biotelemetry in Ecology
CREDIT HOURS: 3
This course explores the fundamentals and applications of biologging and biotelemetry: the use of electronic tags to study free-ranging animals and their environment. Students are introduced to the wide range of tags and their diverse applications in biology.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), or PSYO/NESC 2160.03 or permission of the instructor.
CROSSLISTED: MARI 4323.03
FORMATS: Lecture | Lab

BIOL 4335 Environmental Impacts in Marine Ecosystems
CREDIT HOURS: 3
See course description for OCEA 4335.03, in the Oceanography section of this calendar.

BIOL 4369 Fisheries Oceanography
CREDIT HOURS: 3
See course description for OCEA 4160.03 in the Oceanography section of this calendar.

BIOL 4370 Deep Sea Biology
CREDIT HOURS: 3
See course description for MARI 4370.03 in the Marine Biology section or OCEA 4370.03 in the Oceanography section of this calendar.
PREREQUISITES: (BIOL 2060 or BIOA 3001) and OCEA 2000 or (OCEA 2001 and OCEA 2002)

BIOL 4500 The Evolution of Life Histories
CREDIT HOURS: 3
Life history describes how reproductive effort changes with age to create strategies that influence survival and reproduction. Life-history research is fundamental to population ecology, evolutionary biology, sustainable harvesting, and conservation biology. Life-history theory provides an explanatory/predictive framework for understanding why organisms differ in how they propagate genes to future generations.
CALENDAR NOTES: This course is restricted to 4th year students
PREREQUISITES: Minimum of B- in each of BIOL 2003.03, BIOL 2040.03, and BIOL 2060.03 or Instructor's approval. One of BIOL 3044.03, BIOL 3060.03, or BIOL 3080.03 is strongly recommended.
RESTRICTIONS: E1, E2, E3
FORMATS: Lecture
**BIOL 4510 Cultural Evolution**  
**CREDIT HOURS:** 3  
Culture is socially learned and group-specific information or behaviour. This course explores the nature of culture across the animal kingdom, how it evolves, and its relationship to ecology, genetic evolution and conservation. Students consider and discuss the controversies and uncertainties as to the role of culture in biology.  
**PREREQUISITES:** BIOL 2040.03, and BIOL 3062.03 or PSYO 3162.03  
**FORMATS:** Lecture | Discussion | Other (explain in comments)

**BIOL 4661 Biological Oceanography**  
**CREDIT HOURS:** 3  
See course description for OCEA 4140.03, in the Oceanography section of this calendar.  
**PREREQUISITES:** OCEA 2000 or (OCEA 2001 and OCEA 2002) and OCEA 2020 and OCEA 2021

**BIOL 4662 Biology of Phytoplankton**  
**CREDIT HOURS:** 3  
This is an upper-division course on the phytoplankton in the context of their evolutionary history and ecological diversity, with an emphasis on their adaptations and acclimation to different environments and their role in food webs and in biogeochemical cycling.  
**PREREQUISITES:** MATH 1000.03 (or MATH 1215.03) and MATH 1010.03 or equivalent, and OCEA 2001.03 and OCEA 2002.03; or permission of Instructor  
**CROSSLISTED:** OCEA 4230, OCEA 5230, MARI 4662  
**EXCLUSIONS:** E1, E2  
**FORMATS:** Lecture | Discussion

**BIOL 4664 History of Marine Sciences**  
**CREDIT HOURS:** 3  
See course description for MARI 4664.03 in the Marine Biology section, or SCIE 4001.03 in the Science, Interdisciplinary section of this calendar.

**BIOL 4666 Benthic Ecology**  
**CREDIT HOURS:** 3  
See course description for OCEA 4330.03 in the Oceanography section of the calendar.

**BIOL 4806 Independent Research I**  
**CREDIT HOURS:** 3  
Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.  
**CALENDAR NOTES:** This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html  
**PREREQUISITES:** Signature required  
**FORMATS:** Other (explain in comments)

**BIOL 4807 Independent Research II**  
**CREDIT HOURS:** 3  
Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.  
**CALENDAR NOTES:** This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html  
**PREREQUISITES:** Signature required  
**FORMATS:** Other (explain in comments)
BIOL 4809 Independent Research III
CREDIT HOURS: 3
Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.

CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html

PREREQUISITES: Signature required
FORMATS: Other (explain in comments)

BIOL 4811 Special Topics
CREDIT HOURS: 3
Enables students to study an area of Biology or Marine Biology not covered in other courses. Students should consult with the faculty member to arrange the topic of study and develop an outline of course content, which must be approved by the Chair of the Biology Undergraduate Curriculum Committee. CALENDAR NOTES: Registration in Special Topics can only be approved by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html

PREREQUISITES: Signature required

BIOL 4850 Geographic Information Science Research Project
CREDIT HOURS: 3
Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.

COREQUISITES: ERTH 4520.03/GEOG 4520.03
PREREQUISITES: ENVS 3500 or ERTH3500 or GEOG 3500; and permission of instructor.
CROSSLISTED: ENVS 4850/ERTH 4850/GEOG 4850/SCIE 4850

RESTRICTIONS: This course is restricted to 3rd and 4th year students.

BIOL 4880 Communicating science for societal impact
CREDIT HOURS: 3
This class is for students interested in communicating scientific content with relevance to society, contributing to positive change. We aim to build skills to reach media, decision makers, regulators, and the public. The emphasis will be on communicating findings effectively and developing critical skills in science communication and scientific leadership.

CROSSLISTED: MARI 4880

RESTRICTIONS: E3
FORMATS: Lecture | Tutorial | Experiential Learning

BIOL 4901 Honours Research and Thesis I
CREDIT HOURS: 3
This course is required of, and restricted to, all Biology Honours programs in which Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (BIOL 4901.03 and BIOL 4902.03) are taken in the students' final year.

CALENDAR NOTES: BIOL 4901.03 and BIOL 4902.03 must be taken in consecutive fall/winter terms, or winter/fall terms (co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated.

EXCLUSIONS: BIOL 4900.06, MARI 4900.06
FORMATS: Other (explain in comments)

BIOL 4902 Honours Research Thesis II
CREDIT HOURS: 3
This course is required of, and restricted to, all Biology Honours programs in which Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (BIOL 4901.03 and BIOL 4902.03) are taken in the students' final year.

CALENDAR NOTES: BIOL 4901.03 and BIOL 4902.03 must be taken in consecutive fall/winter terms, or winter/fall terms (co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated.
RESTRICTIONS: Students in the Biology Honours Programme, normally in their final year of study.
EXCLUSIONS: BIOL 4900.06, MARI 4900.06
FORMATS: Other (explain in comments)

BIOL 8891 Co-op Work Term I
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.03

BIOL 8892 Co-op Work Term II
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.03, BIOL 8891.00

BIOL 8893 Co-op Work Term III
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.03, BIOL 8892.00

BIOL 8894 Co-op Work Term IV
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.03, BIOL 8893.00

Introduction
Chemistry is often called the central science because of its relevance to so many other disciplines. Understanding the composition and properties of matter, as well as the manner in which one substance is transformed into another, is essential to the study of our physical and natural worlds. As such, chemistry is often a starting point for many different careers in science. A variety of programs are available, ranging from focused studies to interdisciplinary options to suit the interests of the student.

A chemistry degree involves considerable breadth of training in the major branches of chemistry. These include organic, inorganic, physical, analytical and biological chemistry. In addition to establishing a solid foundation in the fundamental principles of chemistry, students who undertake a chemistry degree develop essential skills that include problem solving, critical thinking, organization, data analysis, and written and oral communication. The laboratories associated with courses develop the necessary experience with laboratory procedures, equipment and safety, and serve to reinforce the concepts learned in lecture.

Degree Programs
The Department of Chemistry offers the following degree programs in Chemistry

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Chemistry
- Minor in Chemistry

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment in the Faculty of Science, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects; otherwise the student should consult the calendar of the appropriate year.

The 120 credit hour Concentrated Honours and Major degrees, as well as corresponding Co-op programs, are accredited by the Canadian Society for Chemistry (CSC). CSC accreditation ensures that graduates of these programs have met certain criteria concerning the quantity and quality of their instruction. It qualifies such graduates for membership in the CSC and to practice chemistry as professionals.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Chemistry undergraduate academic advisor.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies.

Staff

Dean
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chairperson of Department
Schepp, N. P., BSc, PhD (Toronto)

Undergraduate Advising
To contact a Chemistry academic advisor, please go to the Chemistry Main Office (Chemistry Room 212), phone 902-494-3305 or visit the Chemistry Website (www.dal.ca/faculty/science/chemistry.html)

Professors Emeriti
Aue, W. A., PhD (Vienna), FCIC
Becke, A. D., BSc (Queen's), MSc, PhD (McMaster), FRSC, FRS, FCIC, Harry Shirreff Professor of Chemical Research (Emerita)
Boyd, R. J., BSc (UBC), PhD (McGill), FCIC
Burnell, D. J., BSc, MSc (Carleton), PhD (UNB)
Coxon, J. A., BA (Cambridge), MSc, PhD (East Anglia)
Kwak, J. C. T., BSc, MSc, PhD (Amsterdam), FCIC
White, M. A., BSc (Univ of Western Ontario), PhD (McMaster), OC, FRSC, Harry Shirreff Professor of Chemical Research (Emerita) and cross-appointment with Physics and Atmospheric Science

Professors
Andreas, H. A., BSc, PhD (Calgary)
Bearn, S. L., BSc (Acadia), PhD (Toronto), MDCM (McGill). Cross-appointment from Biochemistry and Molecular Biology
Dahn, J. R., BSc (Dalhousie), MSc, PhD (UBC). Cross-appointment from Physics and Atmospheric Science. Canada Research Chair in Battery and Fuel Cell Materials & NSERC/3M Canada Inc. Industrial Research Chair
Doucette, A. A., BSc (Dalhousie), PhD (Alberta)
Freund, M., BSc, PhD (Florida). Cross-appointments with Physics and Atmospheric Science, Electrical & Computer Engineering, and Process Engineering. Harry Shirreff Chair of Chemical Research & Director of the Clean Technologies Research Institute

Jakeman, D. L., BSc, PhD (Sheffield). Cross-appointment from College of Pharmacy

Johnson, E. R., BSc (Carleton), PhD (Queen’s). Cross-appointment with Physics and Atmospheric Science. Herzberg-Becke Chair in Theoretical Chemistry

Macdonald, C. L. B., BSc, PhD (Dalhousie). Dean, Faculty of Science

Martin, R. V., BS (Cornell), MSc (Oxford), PhD (Harvard). Cross-appointment from Physics and Atmospheric Science

Obrovac, M. N., BSc (Simon Fraser), MSc, PhD (Dalhousie). Cross-appointment with Physics and Atmospheric Science. Industrial Research Chair in Materials Science

Rainey, J. K., BSc (Guelph), MSc, PhD (Toronto). Cross-appointment from Biochemistry and Molecular Biology. Director of NMR-3

Stradiotto, M., BSc, PhD (McMaster). FRSC, Alexander McLeod Professor of Chemistry & Arthur B. MacDonald Research Chair (CRC Tier-I Equivalent)

Thompson, A., BSc (Leicester), PhD (Sheffield)

Turculet, L., BSc (MIT), PhD (Berkeley)

Wentzell, P. D., BSc (Dalhousie), PhD (Michigan State)

Zhang, P., BSc, MSc (Jilin Univ, China), PhD (Western). Cross appointment with School of Biomedical Engineering

Zwanziger, J. W., BA (Chicago), PhD (Cornell). Cross-appointment with Physics and Atmospheric Science. Canada Research Chair in NMR Studies of Materials

Associate Professors

Cozens, F. L., BSc (York), PhD (Toronto)

Dasog, M., BSc (Saskatchewan), PhD (Alberta). Izaak Walton Killam Memorial Research Chair

Schepp, N. P., BSc, PhD (Toronto)

Speed, A. W., BSc (Dalhousie), PhD (Harvard)

Assistant Professors

Chitnis, S. S., BASc (McMaster), PhD (Victoria)

Metzger, M., BSc, PhD (Technical Univ of Munich, Germany). Cross-appointment from Physics and Atmospheric Science

Senior Instructors

Alemán Milán, G., BEng (Superior Polytechnic Institute of Havana, Cuba), MSc, PhD (Dalhousie)

Chisholm, R.A., BSc (St. Mary’s), PhD (Alberta)

Crane, A. K., BSc (Memorial), PhD (UBC)

MacDonald, J. L., BSc, BTech (Cape Breton Univ), PhD (Dalhousie). University Teaching Fellow

Moya Barrios, R., BSc (Univ of Havana, Cuba), MSc, PhD (Dalhousie)

Whalen, J. M., BSc (Dalhousie), PhD (McMaster)

Instructors

Aish, G. A., ACBT dip. (Camosun College), BSc, MSc (Dalhousie)

Bates, J. I., BSc (Queen’s), PhD (UBC)

Adjunct (FGS)

Boyd, R. J., BSc (UBC), PhD (McGill), FCIC

Burnell, D. J., BSc, MSc (Carleton), PhD (UNB)

Chatt, A., BSc (Univ of Calcutta, India), MSc (Roorkee, India), MSc (Waterloo), PhD (Toronto), FCIC

Grindley, T. B., BSc, MSc, PhD (Queen’s), FCIC

Grossert, J. S., BSc, MSc, PhD (Univ of Natal, South Africa), FCIC

Kelly, A. T., BSc (Memorial), PhD (Toronto)

Matta, C., BPharm Sci (Alexandria Univ, Egypt), Graduate Diploma in Health and Hospital Administration (National Institute of Management, Egypt), PhD (McMaster), Mount Saint Vincent University

Pinto, D. M., BSc (McGill), PhD (Alberta), Institute for Marine Biosciences

Quilliam, M., BSc, PhD (Manitoba), National Research Council, Institute for Marine Biosciences

Ramaley, L., BA (Colorado), MA, PhD (Princeton), FCIC

Werner-Zwanziger, U., Vordiplom, Diploma, PhD (Westfälische Wilhelms-Universität Münster, Germany)

White, R. L., BSc (Dalhousie), PhD (McMaster), FCIC

Adjunct (Retired)
Becke, A. D., BSc (Queen's), MSc, PhD (McMaster), FRSC, FRS, FCIC, Harry Shirreff Professor of Chemical Research (Emerita)
White, M. A., BSc (Western), PhD (McMaster), OC, FRSC, Harry Shirreff Professor of Chemical Research (Emerita) and cross-appointment with Physics and Atmospheric Science

Part-time Academics
Allison, A., BSc (Dalhousie)
Curtis, I., BSc (Mount Allison)
Foisy, R., BSc (Dalhousie)
Karaballi, R., BSc, MSc (Saint Mary's)
Perrott, A., BSc (Dalhousie), BEd (Acadia), PhD (Dalhousie)
Wall, M., BTech (Cape Breton Univ), PhD (Dalhousie)

Postdoctoral Fellows, Research Associates/Assistants
Adeleke, A., BTech (Federal Univ of Tech, Nigeria), MSc (Saskatchewan)
Albert, J., BSc (Dalhousie)
Alkas, A., BSc (Marmara Univ, Turkey), MSc (Istanbul Tech Univ, Turkey), PhD (Massey Univ, New Zealand)
Ambrose, K., BSc (Saint Mary's), PhD (Memorial)
Anderson, T., BSc (Mount Allison), PhD (Memorial)
Bamford, K., BSc (Victoria), PhD (Toronto)
Ben-Barak, I., BSc, MS (Technion Israel Institute of Tech, Israel)
Chen, Z., BSc, MSc (Dalhousie)
Esfahani Monfared, Y., BSc, MSc (IAU Univ, Iran), PhD (Dalhousie)
Gauthier, R., MSc, PhD (Dalhousie)
Ghosh, S., BSc (Burdwan Univ, India), MSc, PhD (Indian Institute of Tech, India)
Greening, S., BS (Univ of Central Florida), PhD (Dalhousie)
Hans, S., BSc (Dalhousie)
Hatchard, T., BSc, BComm (St. Mary's), MSc, PhD (Dalhousie)
Hilborn, J., BSc (Guelph), PhD (Dalhousie)
Humagain, G., BSc (Dalhousie)
Jahan, N., BSc, MS, PhD (Univ of Karachi, Pakistan)
Johnson, M., BSc (Dalhousie), MSc (Univ of Western Ontario)
Kompany-Zareh, M., MSc (Shiraz, Iran), PhD (Shahid B., Iran)
Ma, X., BSc, ME (Tongji Univ, China), PhD (Florida State)
Monfared, Y., BSc, MSc (IAU Univ, Iran), PhD (Dalhousie)
Omidvar, N., BSc (Andishmand Univ., Iran), MSc (Payame Noor Univ., Iran), MSc (Dalhousie)
Parsons, K., BSc (Saint Mary's), MSc (Dalhousie)
Roberts, N., BSc (Dalhousie)
Shayan, M., BSc, MSc (Isfahan Univ of Tech, Iran), PhD (Memorial)
Tahmasebi Sefid Dashti, M. H., BSc, MSc, PhD (Isfahad Univ of Tech, Iran)
Werner-Zwanziger, U., Vordiplom, Diploma, PhD (Westfälische Wilhelms-Universitat Munster, Germany)

BSc or BA (120 credit hour) Concentrated Honours in Chemistry

Students who want a challenging program resulting in a broad and in-depth background in Chemistry that includes an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider the Honours program. Honours students complete a minimum of 54 credit hours above the 1000 level in Chemistry with a minimum GPA of 3.0 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of CHEM 4902.03 and CHEM 4903.03. The Honours program is accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Chemistry. See Co-operative Education Program.

Admission to Honours

Students must apply for admission to Honours programs. Students considering Honours in Chemistry should consult with a Chemistry Academic Advisor early in their studies.

Departmental requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Concentrated Honours program in Chemistry must complete the following courses:

1000 level

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You, or equivalent

2000 level

- CHEM 2101.03: Introductory Inorganic Chemistry
- CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I and CHEM 2304.03: Introductory Physical Chemistry II

3000 level

- CHEM 3103.03: Intermediate Inorganic Chemistry
- CHEM 3203.03: Advanced Analytical Laboratory
- CHEM 3301.03: Quantum Mechanics and Chemical Bonding
- CHEM 3401.03: Intermediate Organic Chemistry or CHEM 3404.03: Intermediate Organic Chemistry - Physical Organic and Spectroscopy
- CHEM 3601.03: Chemistry of Living Systems

4000 level

- CHEM 4902.03: Honours and Major Research Project I and CHEM 4903.03: Honours and Major Research Project II (minimum grade of B-)

Additional Requirements

- MATH 1030.03 (or MATH 2030.03): Matrix Theory and Linear Algebra I and MATH 2001.03: Intermediate Calculus
- A minimum of 15 additional credit hours in CHEM courses at or above the 2000 level
- Combined lab hours across CHEM 3XXX and 4XXX must be >190.
- Minimum grade of C in all Honours subject courses (except CHEM 4902.03 and CHEM 4903.03, which require a minimum grade of B-)

BSc or BA (120 credit hour) Combined Honours in Chemistry and another subject

Students who wish to study Chemistry in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Chemistry may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. The Combined Honours program is not accredited by the Canadian Society for Chemistry.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Chemistry, this requirement is satisfied through CHEM 4902.03 and CHEM 4903.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Chemistry as the primary subject. See Co-operative Education Program.

Departmental requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Combined Honours program in Chemistry and another subject must complete the following:

Chemistry as the primary subject

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- CHEM 2101.03: Introductory Inorganic Chemistry
- CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I and CHEM 2304.03: Introductory Physical Chemistry II
- A minimum of 18 additional CHEM credit hours above the 2000 level (including CHEM 4902.03 and CHEM 4903.03 if applicable).

Chemistry as the secondary subject

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- A minimum of 30 CHEM credit hours above the 1000 level, including at least 18 CHEM credit hours above the 2000 level.

BSc or BA (120 credit hour) Major in Chemistry

The 120 credit hour Major is suited to students who want to focus on Chemistry, but wish to have a program that is somewhat less constrained than the Honours program. Chemistry Majors complete a minimum of 45 credit hours in Chemistry courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories and research project classes. Like the Honours degree, the 120 credit hour Major program is accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Chemistry. See Co-operative Education Program.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Major program in Chemistry must complete the following courses:

1000 level

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II, or equivalent
- PHYC 1190.03/PHYC 1290.03: Introduction to Physics, or PHYC 1310.03/PHYC 1320.03: Physics In and Around You, or equivalent

2000 level

- CHEM 2101.03: Introductory Inorganic Chemistry
- CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I and CHEM 2304.03: Introductory Physical Chemistry II

3000 level

- CHEM 3103.03: Intermediate Inorganic Chemistry
- CHEM 3203.03: Advanced Analytical Laboratory
- CHEM 3305.03: Materials Science
- CHEM 3401.03: Intermediate Organic Chemistry or CHEM 3404.03: Intermediate Organic Chemistry - Physical Organic and Spectroscopy
- CHEM 3601.03: Chemistry of Living Systems

**Additional Requirements**

- Six additional hours from a combination of MATH 1030.03, MATH 2XXX, any STAT course, CSCI 1100.03, CSCI 1101.01, CSCI 1105.03, CSCI 1110.03
- A minimum of 12 additional CHEM credit hours at or above the 2000 level, including at least 3 credit hours at or above the 3000 level
- Combined lab hours across CHEM 3XXX and 4XXX must be >190.

**BSc or BA (120 credit hour) Double Major in Chemistry and another subject**

The Double Major degree program allows students to combine a study of Chemistry with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Chemistry may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA. The Double Major program is not accredited by the Canadian Society for Chemistry.

A Co-op option is available for students enrolled in BSc Double Major with Chemistry as the primary subject. See [Co-operative Education Program](#).

**Departmental requirements**

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Double Major program in Chemistry and another subject must complete the following:

**Chemistry as the primary subject**

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/ CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/ CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I or MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 2101.03: Introductory Inorganic Chemistry and CHEM 2201.03: Introductory Analytical Chemistry
- CHEM 2301.03: Introduction to Physical Chemistry I or CHEM 2304.03: Introductory Physical Chemistry II
- A minimum of 18 additional CHEM credit hours above the 2000 level.

**Chemistry as the secondary subject**

- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/ CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, or CHEM 1021.03: Engineering Chemistry I/ CHEM 1022.03: Engineering Chemistry II, or equivalent
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus I or MATH 1030.03: Matrix Theory and Linear Algebra I or MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences
- A minimum of 30 CHEM credit hours above the 1000 level, including at least 18 CHEM credit hours above the 2000 level.

**BSc or BA (90 credit hour) Minor in Chemistry**

The 90 credit hour degree with Minor in Chemistry is appropriate for students who want to study some Chemistry but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Chemistry. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies and is not accredited by the Canadian Society for Chemistry. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Chemistry is usually the preferred option for students who wish to combine studies in Chemistry with a degree in Engineering (see [BSc/BEng or BA/BEng Concurrent Program](#)).
See Minor in Chemistry section.

**Minor in Chemistry**

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Chemistry is available to students in the Faculty of Science.

**Requirements**

- A minimum of 18 credit hours in Chemistry (CHEM) courses at the 2000 level or higher to a maximum of 36 credit hours, not including any course that cannot be used toward a Chemistry degree

Please note that entry into upper level Chemistry (CHEM) courses requires completion of six credit hours at the first year level (CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium)

Contact Chemistry for more information.

**Co-op, Minors, Certificates and Engineering Concurrent Programs for Students**

**Co-operative Education Program (Science Co-op) in Chemistry**

Co-op Academic Advisor: Dr. Alan Doucette alan.doucette@dal.ca

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs, or in Combined Honours or Double Major programs. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Chemistry Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Chemistry please see the departmental page www.dal.ca/faculty/science/chemistry/programs/undergraduate-studies/degree-programs/co-operative-education.html.

**Minors available to students in Chemistry**

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Chemistry may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

**Certificates**

In combination with a BSc or BA in Chemistry, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.

A complete list of Faculty of Science Certificates and requirements is available. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.
Certificates of particular interest to student enrolled in a BSc or BA in Chemistry include:

- Certificate in Materials Science
- Certificate in Medicinal Chemistry
- Certificate in Science Leadership and Communication

**BSc/BEng Concurrent Program (Chemistry)**

Chemistry is known as the central science because its main theme is transformations of matter and energy that are at the core of many fields of science and engineering. A strong background in Chemistry has direct relevance to fields such as biological/biomedical engineering, chemical engineering, environmental and resource engineering, food science technology, materials engineering, mining/petroleum engineering and process engineering. Following is the recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Chemistry. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Chemistry. A concurrent BEng/BSc Major or Honours in Chemistry (120 credit hours) can be designed for interested candidates.

Graduate with Diploma in Engineering and BSc 90 credit degree
Year 4  Continue in BEng program

Year 5  Complete BEng program

To meet the BSc 90 credit hour Minor in Chemistry requirements, students complete 30 credit hours in addition to their Engineering requirements: a minimum of 18 credit hours of CHEM courses at or above the 2000 level, 6 credit hours of social science/humanities courses, and 6 additional credit hours in Science/FASS courses (which may be CHEM). Students may not select CHEM courses that cannot be counted toward a Chemistry Major degree.

Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements [College of Arts and Science]

Choose from CANA, CTMP, ECON, EMSP, EURO, GWST, HIST, HSTC, INTD, POLI, PSYO, SOST for social science courses. Choose from ARBC, CANA, CHIN, CLAS, CTMP, CRWR, EMSP, EURO, SWST, GERM, HIST, HTSC, ITAL, PERF, PHIL, RELS, RUSN, SPAN and THEA for humanities courses

See Engineering section of the calendar for details

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the department’s website.

Course Notes

Undergraduate courses that are regularly offered by the Chemistry Department are briefly described in this section. More detailed information can be found on the departmental web site at http://chemistry.dal.ca. Students should note the following.

- Not all courses are offered every year. Please consult the Academic Timetable for the details of courses offered in a particular academic year.
- The first digit of the course number is the year of a student’s program that a course would typically be taken, but this is not meant to be restrictive if a student has the necessary prerequisites or permission of the instructor. For example, a 3000 level course can be taken in the fourth year and 4000 level course can be taken in the third year.
- The second digit of the course number defines the general sub-discipline:

  0 = General Chemistry

  1 = Inorganic Chemistry  
  2 = Analytical Chemistry  
  3 = Physical Chemistry  
  4 = Organic Chemistry  

  5 = Interdisciplinary  
  6 = Biological Chemistry  
  8,9 = Research Classes

- The extension following the course number (e.g. XXXX.03) indicates the number of credit hours assigned to the course (e.g. three credit hours). Note that six credit hours are equivalent to one credit.
- All chemistry courses, unless stated otherwise, have a minimum grade requirement of C- for their prerequisite chemistry courses. Students with grades below C- in the prerequisite chemistry courses can only register with the permission of the instructor for the course.
- Unless stated otherwise, the minimum grade requirement for credit in a chemistry course is a D, except for Honours programs, where the minimum grade requirement for chemistry credit is a C (B- for Honours Qualifying Examination).

Chemistry Resource Centres
First-Year and Advanced Chemistry Resource Centres are located in Rooms 122 and 115, respectively. The former is staffed with advanced undergraduate and graduate students to help with both lab and course material. First-year students are encouraged to make use of the Concept Room, which is located in the First-Year Resource Centre. Here, first-year Instructors will be available at regularly scheduled times to provide aid with course material in a small group or one-on-one atmosphere.

The First-Year Chemistry Resource Centre also houses a number of computers with chemistry-specific programs for students to use. Additionally, there is a selection of resource materials such as molecular model kits and reference texts available to students.

Course Descriptions

**CHEM 1011 Concepts in Chemistry: Structure and Reactivity**
CREDIT HOURS: 3
The electronic structures of atoms and molecules are used to explain the reactivity and properties of chemicals. Topics include atomic structure, bonding models, structure and shape of molecules and ions, and acid/base chemistry. It is recommended that students have Nova Scotia grade 12 chemistry or equivalent before taking this course.
COORDINATOR: A. Crane
EXCLUSIONS: CHEM 1021.03
FORMATS: Lecture | Lab

**CHEM 1012 Concepts in Chemistry: Energy and Equilibrium**
CREDIT HOURS: 3
The principles of thermodynamics and kinetics are used to explain chemical reactivity and the principles of organic chemistry are used to develop an understanding of organic synthesis. Special topics include electrochemistry, spectroscopy, chirality, polymers, and the chemistry of living systems to illustrate the relevance of chemistry in everyday life.
PREREQUISITES: CHEM 1011.03 or equivalent
EXCLUSIONS: CHEM 1022.03
FORMATS: Lecture | Lab

**CHEM 1021 Engineering Chemistry I**
CREDIT HOURS: 3
The electronic structures of atoms and molecules are used to explain the reactivity and properties of chemicals. Topics include atomic structure, bonding models, structure and shape of molecules and ions, and acid/base chemistry. It is recommended that students have Nova Scotia grade 12 chemistry or equivalent before taking this course.
COORDINATOR: A. Crane
EXCLUSIONS: CHEM 1011.03
FORMATS: Lecture | Lab

**CHEM 1022 Engineering Chemistry II**
CREDIT HOURS: 3
The principles of thermodynamics and kinetics are used to explain chemical reactivity and the principles of organic chemistry are used to develop an understanding of organic synthesis. Special topics include electrochemistry, spectroscopy, chirality, polymers, and the chemistry of living systems to illustrate the relevance of chemistry in everyday life.
COORDINATOR: A. Crane
PREREQUISITES: CHEM 1021.03 or equivalent
EXCLUSIONS: CHEM 1012.03
FORMATS: Lecture | Lab

**CHEM 2101 Introductory Inorganic Chemistry**
CREDIT HOURS: 3
The fundamentals of inorganic chemistry are covered. Specific topics include ionic bonding and the nature of solids, the structure of atoms and simple bonding theory, coordination chemistry of the transition metals, and selected topics in main group chemistry. The preparation, analysis and observation of inorganic compounds are the laboratory assignments.
PREREQUISITES: CHEM 1011.03/CHEM 1012.03 or equivalent (grade of C- or better)
**CHEM 2201 Introductory Analytical Chemistry**  
**CREDIT HOURS:** 3  
The basic principles of analytical chemistry are presented, including chemical and instrumental methods of analysis. Topics include chemical equilibria, spectroscopy, electrochemistry and chromatography. Laboratory experiments explore all of these topics, and illustrate the techniques with practical examples.  
**PREREQUISITES:** CHEM 1011.03 and CHEM 1012.03 or equivalent (grade of C- or better)  
**FORMATS:** Lecture | Lab

**CHEM 2301 Introduction to Physical Chemistry I**  
**CREDIT HOURS:** 3  
The physical principles underlying chemical systems and reactivity are explored, with an emphasis on the forces between molecules and the properties of matter. Principles of thermodynamics are presented, including thermochemistry, entropy and free-energy relationships. Applications include phase equilibria, chemical equilibria, solutions, colligative properties and electrochemistry.  
**PREREQUISITES:** CHEM 1011.03/CHM 1012.03 or equivalent; MATH 1000.03 or equivalent (grade of C- or better). PHYC 1190.03/PYC 1290.03 or PHYC 1310.03/PYC 1320.03 is strongly recommended.  
**FORMATS:** Lecture | Lab

**CHEM 2304 Introductory Physical Chemistry II**  
**CREDIT HOURS:** 3  
The physical properties of chemical systems at the level of atoms and molecules are examined. Topics include the quantum mechanical description of atoms and molecules, chemical bonding, experimental and computational methods for studying molecular systems, and the kinetics of chemical processes.  
**PREREQUISITES:** CHEM 1011.03/CHM 1012.03 or equivalent; MATH 1000.03 and MATH 1010.03 or equivalent (grade of C- or better). PHYC 1190.03/PYC 1290.03 or PHYC 1310.03/PYC 1320.03 is strongly recommended.  
**FORMATS:** Lecture | Lab

**CHEM 2401 Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy**  
**CREDIT HOURS:** 3  
Organic chemistry is introduced through an examination of bonding, conformation and stereochemistry. Spectroscopic methods (MS, IR, 1H and 13C NMR) are used to determine the structures of compounds. Alkanes, alkenes, alkynes and alkyl halides are presented with an emphasis on the mechanisms of their reactions.  
**PREREQUISITES:** CHEM 1011.03/CHM 1012.03 or equivalent (grade of C- or better)  
**FORMATS:** Lecture | Lab

**CHEM 2402 Introductory Organic Chemistry: Reactivity of Functional Groups**  
**CREDIT HOURS:** 3  
Building on CHEM 2401, the properties and reactions of alcohols, ethers, amines, nitriles, the carbonyl-containing functional groups and aromatic compounds are examined. The reactions are used in synthetic sequences, and reaction mechanisms are stressed. The concepts of resonance and aromaticity become familiar. The use of spectroscopic methods is reinforced.  
**PREREQUISITES:** CHEM 2401.03 (grade of C+ or better)  
**FORMATS:** Lecture | Lab

**CHEM 2488 Our Organic World**  
**CREDIT HOURS:** 3  
Pharmaceuticals, plastics, and some fuels are organic compounds with dramatic roles in our health and economy. Drugs or poisons? Caraway or spearmint? Bendable or stiff? Aspects of organic chemistry are surveyed so that issues such as these can be debated and the chemical facts applied to the world around us.  
**PREREQUISITES:** CHEM 1011.03 or equivalent  
**EXCLUSIONS:** CHEM 2488.03 does not serve as a prerequisite for any other chemistry class nor does it count as a chemistry credit towards any degree with a major in chemistry.  
**FORMATS:** Lecture

**CHEM 3103 Intermediate Inorganic Chemistry**  
**CREDIT HOURS:** 3  
Modern bonding theories are developed using symmetry concepts. These are applied to understanding the molecular structure, reactivity and spectroscopic properties of inorganic compounds, including coordination compounds and organometallic complexes. The compounds prepared in the laboratory introduce
more advanced synthetic procedures for the preparation of inorganic compounds.
PREREQUISITES: CHEM 2101.03 (grade of C- or better). Recommended: CHEM 2402.03.
EXCLUSIONS: CHEM 3101.03, CHEM 3102.03
FORMATS: Lecture | Lab

CHEM 3201 Analytical Mass Spectrometry and Separations
CREDIT HOURS: 3
The most commonly employed instrumental techniques in chemical analysis use spectroscopy in some form or involve separations. Qualitative and quantitative analysis and the instrumentation involved are discussed in some detail for mass spectrometry. Methods of separation including solvent extraction and the various types of chromatography are presented. Laboratory experiments illustrate the above techniques with practical examples.
PREREQUISITES: CHEM 2201.03 (grade of C- or better)
EXCLUSIONS: CHEM 3203
FORMATS: Lecture | Lab

CHEM 3203 Advanced Analytical Laboratory
CREDIT HOURS: 3
An introduction to the fundamentals of instrumental chemical analysis is presented in a laboratory environment, with emphasis on selection of appropriate analytical techniques, sample treatment, data handling, and communication of experimental results. Instrumental techniques include chromatography, spectrophotometry, mass spectrometry, and electrochemistry, with applications in biological, environmental, forensic and health-related areas.
PREREQUISITES: CHEM 2201.03 (grade of C- or better)
EXCLUSIONS: CHEM 3201
FORMATS: Lecture | Lab | Tutorial

CHEM 3301 Quantum Mechanics and Chemical Bonding
CREDIT HOURS: 3
The fundamentals and postulates of quantum mechanics are developed from first principles, with applications to illustrative model systems, vibrations, rotations, atoms, and molecules.
PREREQUISITES: MATH 2001.03 and MATH 1030.03, and CHEM 2304.03, (grade of C-or better), and PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03
FORMATS: Lecture

CHEM 3305 Materials Science
CREDIT HOURS: 3
This course emphasizes understanding the principles behind materials' physical properties, such as thermal and mechanical stability, and electrical and optical properties. Materials discussed include liquid crystals, perfect crystals, defective solids, polymers and glasses. Applications, such as the use of materials in displays, gas sensors, and lasers, are discussed.
CALENDAR NOTES: This course is the same as PHYC 3303, except CHEM 3305 has a lab and PHYC 3303 has a major term paper.
PREREQUISITES: CHEM 1012.03, and (CHEM 2301.03 and CHEM 2304.03) or PHYC 3200.03 (can be a corequisite) or (ERTH 2001.03 and ERTH 2002.03)
EXCLUSIONS: PHYC 3303.03, CHEM 3303.03
FORMATS: Lecture | Lab

CHEM 3401 Intermediate Organic Chemistry
CREDIT HOURS: 3
Topics presented include aromatics, heterocycles, amines, enolate anions and other methods for forming C-C bonds, concerted reactions, carbohydrates and some heteroatom chemistry. There is a continuing emphasis on the principles of mechanistic organic chemistry. Students work independently in the laboratory on the preparation of organic compounds.
PREREQUISITES: CHEM 2402.03 (grade of C- or better)
FORMATS: Lecture | Lab

CHEM 3404 Intermediate Organic Chemistry—Physical Organic and Spectroscopy
CREDIT HOURS: 3
This course provides an introduction to concepts in physical organic chemistry that are used to explain structure reactivity relationships. Spectroscopic techniques are also described with an emphasis on NMR spectroscopy. The organic laboratory will focus on organic compound separation and identification.
PREREQUISITES: CHEM 2402.03 (grade of C- or better)
EXCLUSIONS: CHEM 3402.03
FORMATS: Lecture | Lab
CHEM 3601 Chemistry of Living Systems
CREDIT HOURS: 3
The chemical principles governing a wide variety of biological processes are discussed. Structure and mechanism are emphasized in explanations and predictions of the behavior of organic compounds in nature. Specific topics include proteins, activation of carboxyl groups, peptide synthesis and biosynthesis, enzyme catalysis, coenzymes and prochirality.
PREREQUISITES: CHEM 2402.03 (grade of C- or better)
FORMATS: Lecture

CHEM 3801 Experiential Learning in Chemistry
CREDIT HOURS: 3
This is an outside-the-classroom learning experience in which students work to acquire knowledge and skills relevant to chemistry under the direction of a supervisor. Suitable work environments can be located at Dalhousie or in a commercial/industrial setting.
CALENDAR NOTES: To register for this course, each student must first find a supervisor willing to supervise the chemistry work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator.
PREREQUISITES: At least four of the following courses: CHEM 2101.03, CHEM 2201.03, CHEM 2301.03, CHEM 2304.03, CHEM 2401.03 and CHEM 2402.03.
RESTRICTIONS: Restricted to students in third year and above.
EXCLUSIONS: The following may not be used towards CHEM 3801: work that is part of another scheduled course at a learning institution; study that would qualify for Special Topics course; co-op work terms; and paid work.

CHEM 4101 Advanced Main Group Chemistry
CREDIT HOURS: 3
Following a brief overview of the fundamental aspects of preparation, structure and bonding for familiar systems, selected topics are examined in some detail. An emphasis is placed on novel structure and bonding arrangements in comparison with carbon chemistry.
PREREQUISITES: CHEM 3103.03 (grade of C- or better)
CROSSLISTED: CHEM 5101.03
FORMATS: Lecture

CHEM 4102 Advanced Transition Metal Chemistry
CREDIT HOURS: 3
Various themes of modern transition metal chemistry are examined, including but not restricted to: fundamental structure and bonding; spectroscopic characterization methods; as well as reactivity and reaction mechanisms.
PREREQUISITES: CHEM 3103.03 (grade of C- or better)
CROSSLISTED: CHEM 5102.03
FORMATS: Lecture

CHEM 4105 Inorganic Materials Synthesis
CREDIT HOURS: 3
Methods for the preparation of advanced functional inorganic materials for energy, optoelectronics, catalysis and other applications are presented. Topics in the course include solid-state chemistry, sol-gel synthesis, nucleation and growth of nanoparticles, thin film fabrication, and soft lithography.
PREREQUISITES: CHEM 2101.03, CHEM 2301.03
EXCLUSIONS: CHEM 5105.03
FORMATS: Lecture

CHEM 4120 Advanced Organometallic Chemistry
CREDIT HOURS: 3
Catalytic and stoichiometric transition metal mediated reactions of fundamental significance in synthetic chemistry are surveyed. Molecular orbital theory is used to understand structure and bonding in metal complexes and the reactivity properties of these species. Relevant examples from the current chemical literature are introduced.
PREREQUISITES: CHEM 3103.03 (grade of C- or better)
FORMATS: Lecture

CHEM 4201 Advanced Topics in Separations
Classical methods (solvent extraction and ion exchange) are reviewed for pre-concentration of metal ions prior to their determination by spectroscopic methods. Chromatographic topics include gas, liquid, and supercritical chromatography with emphasis on multidimensional techniques. Examples in environmental and biological analysis are drawn from the current literature.

**CHEM 4205 Chemometrics**
CREDIT HOURS: 3
The application of statistical tools to univariate and multivariate chemical measurements is explored. Topics include descriptive statistics, probability and probability distributions, propagation of errors, hypothesis testing, analysis of variance, experimental design, univariate and multivariate calibration, pattern recognition, exploratory data analysis and mixture analysis. Students are introduced to programming in MatLab.

**CHEM 4206 Analytical Mass Spectrometry**
CREDIT HOURS: 3
This course offers a thorough treatment of modern analytical mass spectrometry instrumentation, with applications towards chemical and biochemical analysis. Specific examples include characterization of pharmaceuticals and biomolecules (proteins, carbohydrates), and discussion of field portable instruments. Reaction mechanisms and spectral interpretation are discussed, but are not emphasized in this applied course.

**CHEM 4301 Theory of Chemical Bonding**
CREDIT HOURS: 3
This course develops molecular orbital theory from both qualitative and quantitative perspectives. Topics include the basic principles of the LCAO (Linear Combination of Atomic Orbitals) MO method, qualitative understanding of MOs in simple molecules, orbital symmetries, through to state-of-the-art techniques for computer computations of molecular properties.

**CHEM 4302 Introduction to Surface Science**
The fundamental theory and principles of surface science are introduced. Topics include the atomic structure of solid surfaces, thermodynamic and kinetic properties of surfaces, electronic and bonding behavior of surfaces, catalytic processes by surfaces, and typical surface analysis techniques.

**CHEM 4311 Fundamental and Applied Electrochemistry**
This course provides a broad introduction to the fundamentals of electrochemistry, including electrochemical theory, double layer modelling and electrochemical methods. Additionally, important electrochemical applications are discussed, including corrosion, energy production and energy storage (fuel cells, batteries and supercapacitors).

**CHEM 4401 Synthesis in Organic Chemistry**
A number of important organic reactions are examined in depth with particular attention to regioselectivity and the development of relative or absolute stereochemistry. Applications of these reactions in the synthesis of complex molecules are illustrated with recent examples from the literature.
CHEM 4402 Organic Structure Determination
CREDIT HOURS: 3
Nuclear magnetic resonance spectroscopy and mass spectrometry are emphasized in solving structural problems. Topics include 2D NMR, correlation of structure with chemical shifts and coupling constants, operation of NMR spectrometers, NMR relaxation, analysis of spectral patterns, the vector model of 1D and 2D experiments and ionization methods in mass spectrometry.
PREREQUISITES: CHEM 3404.03 (grade of C- or better)
CROSSLISTED: CHEM 5402.03
FORMATS: Lecture

CHEM 4502 Polymer Science
CREDIT HOURS: 3
Aspects of synthesis, analysis, characterization, structure and uses of synthetic and naturally occurring macromolecules are explored. Emphasis is on the application of standard methods of organic synthesis, analytical separations, and physico-chemical characterization. There is no laboratory, but students will do an independent literature project.
PREREQUISITES: CHEM 2201.03 and CHEM 2301.03 and CHEM 2304.03 and CHEM 2402.03 (grade of C- or better)
FORMATS: Lecture

CHEM 4504 Diffraction Techniques in Solid State Chemistry
CREDIT HOURS: 3
All chemical elements and compounds can exist as crystalline solids. This course studies the arrangements of atoms and molecules in such solids and examines the methods used to determine these structures. Particular emphasis is placed on the techniques of X-ray crystallography.
PREREQUISITES: CHEM 2101.03 (grade of C- or better) and MATH 2001.03 and MATH 1030.03
FORMATS: Lecture | Lab

CHEM 4595 Atmospheric Chemistry
CREDIT HOURS: 3
PREREQUISITES: MATH 1000.03, PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03, and CHEM 1012.03 (grade of C- or better)
CROSSLISTED: PHYC 4595.03, OCEA 4595.03, OCEA 5595.03
FORMATS: Lecture

CHEM 4601 Principles of Biomolecular and Drug Molecule Design
CREDIT HOURS: 3
The course covers both general principles and biochemical considerations in drug design. The fundamental goal is to give students the necessary tools to design new chemical structures as putative therapeutics for a human or veterinarian pathological problem. Students in chemistry are strongly recommended to take CHEM 3601.03 prior to registering in this course.
PREREQUISITES: CHEM 2402.03 (grade of C- or better)
CROSSLISTED: CHEM 5601
FORMATS: Lecture

CHEM 4602 Biophysical Characterization of Macromolecules
CREDIT HOURS: 3
Covers methods allowing determination of sub-molecular and atomic-level structure and dynamics of biomacromolecules in physiological settings (e.g. solution-state or lipid bilayers) including: fluorescence, electronic and vibrational circular dichroism and NMR spectroscopy; light vs. X-ray vs. neutron scattering; and, single molecule methods.
PREREQUISITES: BIOC 3700.03 or (CHEM 3601.03 and CHEM 2301.03 and CHEM 2304.03), all with grades of B or higher, or permission of instructor.
Recommended: PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03.
CROSSLISTED: BIOC 4702.03, CHEM 5602.03, BIOC 5702.03
FORMATS: Lecture
CHEM 4603 Structural Biology
CREDIT HOURS: 3
This course covers theoretical and practical aspects of determining and assessing the quality of atomic-resolution biomolecular structures. The underlying theory and applications of X-ray diffraction, NMR spectroscopy, and cryo-electron microscopy are discussed in detail.
PREREQUISITES: BIOC 3700.03 or CHEM 3601.03
CROSSLISTED: BIOC 4703.03
FORMATS: Lecture

CHEM 4801 Research Project in Chemistry I
CREDIT HOURS: 3
Students carry out research projects under the supervision of a faculty member, and submit a report and make an oral presentation.
PREREQUISITES: CHEM 2101.03, 2201.03, 2301.03, 2304.03, 2401.03 and 2402.03 plus at least one full credit at the 3000 or 4000 level in the area of interest with an average grade of at least B-, or permission of instructor; GPA 3.0

CHEM 4802 Research Project in Chemistry II
CREDIT HOURS: 3
Students carry out research projects under the supervision of a faculty member and submit a report and make an oral presentation. This course is intended for those students in the Major program who wish greater exposure to independent scientific research.
PREREQUISITES: CHEM 4801.03

CHEM 4902 Honours and Major Research Project I
CREDIT HOURS: 3
Together with CHEM 4903.03, this is an honours program requirement to develop research skills. Research is carried out under the direction of a faculty member and evaluated through supervisor assessment, a written report and oral presentation.
CALENDAR NOTES: Students should apply for this course in the winter term prior to their final year by contacting the Honours Coordinator. A grade will not be assigned for CHEM 4902.03 until both CHEM 4902.03 and CHEM 4903.03 have been completed. To receive credit, CHEM 4902.03 and 4903.03 must be completed in the same academic year.
PREREQUISITES: Minimum GPA of 3.0 and permission of Honours Coordinator.
EXCLUSIONS: CHEM 4901.06
FORMATS: Experiential Learning

CHEM 4903 Honours and Major Research Project II
CREDIT HOURS: 3
Together with CHEM 4902.03, this is an honours program requirement to develop research skills. Research is carried out under the direction of a faculty member and evaluated through supervisor assessment, an honours thesis and oral presentation.
CALENDAR NOTES: To receive credit, CHEM 4902.03 and 4903.03 must be completed in the same academic year.
PREREQUISITES: Completion of CHEM 4902.03 and permission of Honours Coordinator.
EXCLUSIONS: CHEM 4901.06
FORMATS: Experiential Learning

Introduction

For information concerning programs and courses in Earth Sciences, please refer to the Earth Sciences section of this calendar. For Environmental Science, please refer to the Environmental Science section.

Staff

Dean
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chair of Earth and Environmental Sciences
Brenan, J. M., BSc Honours (McGill), PhD (Rensselaer)

Graduate Program Coordinator (Earth Sciences)
Fedorchouk, Y., MSc (Moscow State Univ), PhD (Victoria)

Undergraduate Program Coordinator (Earth Sciences)
Plug, L., BA (McGill), PhD (Univ of Alaska - Fairbanks)

Undergraduate Program Coordinator (Environmental Science)
Wright, T., PhD (Alberta)

Undergraduate Advisor (Earth Sciences)
Young, M., BSc (Dalhousie), MSc (Queen’s)

Undergraduate Advisor (Environmental Science)
Mui, A., PhD (Toronto)

Co-op Academic Advisor (EES)
Wright, T., PhD (Alberta)

Faculty
Arnott, A., BSc (Acadia), PhD (Dalhousie)
Brenan, J. M., BSc Honours (McGill), PhD (Rensselaer)
Coutand, L., BSc, PhD, (Univ of Rennes, France)
Cox, R., BSc Hon, MSc (Glasgow Univ), PhD (Memorial)
Fedorchouk, Y., MSc (Moscow State Univ), PhD (Victoria)
Fong, K., HBSc (Toronto), MSc (ETH Zurich), ScD (Harvard)
Gass, S., PhD (Open Univ, UK)
Gosse, J. C., BSc Honours (Memorial), PhD (Lehigh)
Green, C., BSc Honours (Acadia), MES (York), MSA, PhD (Ryerson)
Grujic, D., BSc (Belgrade), PhD (ETH Zurich)
Maselli, V., BSc (Bologna), MSc (Trieste), PhD (Bologna)
Mui, A., PhD (Toronto)
Nedimovic, M., BSc (Belgrade), MSc, PhD (Toronto)
Plug, L., BA (McGill), PhD (Univ of Alaska - Fairbanks)
Ryan, A. M., BSc (Univ College Dublin), MSc, BEd (Acadia), MEd (MSVU), PhD (Dalhousie)
Sherwood, O., BSc, MSc (McMaster), PhD (Dalhousie)
Sterling, S., PhD (Duke Univ)
Wach, G. D., BA (Hons) (Western Ontario), MSc (South Carolina), DPhil (Oxford)
Wright, T., PhD (Alberta)
Young, M., BSc (Dalhousie), MSc (Queen’s)
Zhang, M., BSc (Henan Normal University), PhD (University of Science and Technology of China)

Professors Emeriti
Gibling, M. R., BA (Oxon), PhD (Ottawa)
Jamieson, R. A., BSc (Dalhousie), PhD, (Memorial)
Scott, D. B., BSc (Washington), MSc (Washington State), PhD (Dalhousie)
Zentilli, M., BSc (Chile), PhD (Queen’s), PGeo

Adjunct Faculty
Adam, Jurgen, MSc (Clausthal), PhD (Technical University of Berlin), University of London
Brown, D., BSc (Dalhousie) Canada-NS Offshore Petroleum Board (CNSOPB)
Calder, J., BSc (SMU), PhD (Dalhousie), Nova Scotia Department of Natural Resources
Campbell, C., BSc Honours (SMU), PhD (Dalhousie), Geological Survey of Canada Atlantic
Clarke, B., BSc. MSc (Toronto), PhD (Edinburgh)
Deptuck, M., BSc (St. Mary’s), PhD (Dalhousie), CNSOPB
Dyke, A., BSc Honours (Carleton), MA, PhD (Univ of Colorado)
Easton, R., PhD, Ontatio Geological Survey
Fedak, T. J., BA (NSCAD), PhD (Dalhousie), Fundy Geological Museum
Fowler, M., PhD (Newcastle-upon-Tyne)
Gibling, M., BA (Oxon), PhD (Ottawa)
Hanley, J., BSc, MSc, PhD (Toronto), Saint Mary’s University
Jamieson, R. A., BSc (Dalhousie), PhD, (Memorial)
Kellet, D., BSc (UBC), MSc, PhD (Dalhousie), GSC
Kellman, L., BA (McMaster), MSc (McGill), PhD (Univ du Quebec à Montreal), St. Francis Xavier University
Kettanah, Y., BSc (Baghdad Univ), PhD (Univ of New Mexico), PhD (MIT)
Kopp, H., BSc, MSc, PhD (Kiel), GEOMAR
Martel, T., BSc Honours, PhD (Dalhousie), Corridor Resources Inc.
Melchin, M., MSc (Waterloo), PhD (Western), St. Francis Xavier University
Mosher, D., BSc (Acadia), MSc (Memorial), PhD (Dalhousie), GSC Atlantic
Mudie, P. J., BSc (Cape Town), BSc (Leicester), PhD (Dalhousie), National Research Council
Mukhopadhyay, P., BSc, MSc, PhD (Jadavpur Univ), Global Geoenergy Research Limited
Murphy, J. B., BSc (Dublin), MSc (Acadia), PhD (McGill), St. Francis Xavier University
Neuweiler, F., Diplom, Dr. rer. nat. (FU Berlin), Laval University
Normand, A., BSc, MSc, PhD (Laval), GSC
Normand, P., BSc (École Polytechnique de Montréal), MSc (UQAM), PhD (McGill), NWT Geological Survey
Parsons, M., BSc (Dalhousie), PhD (Stanford), GSC Atlantic
Piper, D. J. W., BA Honours (St. Catharine’s Col, Cantab), MA (Cantab), PhD (Darwin Col, Cantab), GSC Atlantic
Pufhal, P., BSc Honours, MSc, PhD, Acadia University
Richards, F. W., BSc Honour (Bristol), MSc (Imperial College), ESSO
Shaw, C. S. J., BSc Honours (Univ of London), MSc, PhD (UWO), University of New Brunswick
Shimeld, J., BSc Honours (Waterloo), MSc (Dalhousie), GSC Atlantic
Silva, R., BSc, PhD (Univ of Coimbra), Universityof Exeter
Simpson, D. W., BSc Honours, MSc (Dalhousie), PhD (Australian National Univ), IRIS Consortium
Swinden, S., BSc (Dalhousie), MSc, PhD (Memorial)
van Rooyen, D., BSc, PhD (Carleton), CBU
Vincent, H., BSc (Univ of West Indies), MSc (Imperial College), PhD (Dalhousie), BP Trinidad and Tobago
Waldron, J., BA (Cambridge), PhD (Edinburgh), University of Alberta
Warren, C., BA (Oxford), MSc (Univ College London), DPhil (Oxford)
Whipp, D. M., BSc, PhD (Univ of Michigan), University of Helsinki
Wilson, B., BSc Honours (Univ College of Whales), MSc, PhD (Univ of Whales), The University of West Indies
Zentilli, M., BSc (Univ of Chile), PhD (Queen’s)

Introduction
Earth Science is a holistic discipline whose focus of study is the Earth System. It includes the geosciences which address the solid earth, but necessarily also extends to study of the atmosphere, hydrosphere, oceans and biosphere. Broadly, Earth scientists work to understand

1. how the Earth System works;
2. how it evolved to its current state;
3. the processes for and distribution of Earth's physical resources such as fossil fuels, minerals, and water; and
4. limits to and consequences of the use of physical resources by humans.

Examples of specific questions within Earth Sciences include: How was the Earth formed? What is its composition? Where do we look for oil? Where do we look for reliable water supplies? What are the relationships between glaciers, rivers, and climate, both now and in the deep past? To answer questions such as these, Earth scientists typically use methods from the foundation sciences -- physics, chemistry, biology, mathematics - along with discipline-specific methods and modern tools including computing and satellite mapping. Some Earth scientists also consider or draw expertise from the social sciences, particularly as humans collectively become a significant agent in modifying components of the Earth System.

Career paths
Earth Science is of tremendous importance to Canadians and can be an immensely satisfying profession. Earth scientists are employed in universities, government agencies, the oil, gas and mineral industries, environmental consulting, and beyond. The Earth Sciences department offers programs and courses designed to meet the needs of students with varying goals for her/his undergraduate education. In general, the following summary recommendations can be made:

- To prepare to become a professional geoscientist, students should enroll in a 120 credit hour BSc or BA degree (Major, Honours or Combined) and meet the knowledge requirements for professional registration by following the Geoscience Knowledge and Experience handbook available at https://geoscientistscanada.ca.
- To prepare for postgraduate study (MSc or PhD) in Earth Sciences or a related field, students should pursue a BSc Concentrated Honours in Earth Sciences or Combined Honours with a related subject, and consider meeting requirements of professional registration (above).
- Students seeking an undergraduate preparation for Law, Education, or another professional program outside of Earth Sciences, or to complement another subject, should consider a BSc or BA Major or Double Major.
- Electives courses and Minors: Earth Sciences is about understanding how the Earth 'works'. As such it makes an excellent general education subject. Several ERTH courses that may be suitable electives are listed below.

General interest courses
These courses are designed to be accessible to students who want to know something about the Earth, but whose major field of study is not Earth Sciences. For example, the course may be of interest to an economics student concerned with resources, a history student interested in the role played by Canada’s geological framework in the development of transportation, a biology student interested in faunal environments on the seafloor.

Courses without prerequisites
- ERTH 1030.03: Introduction to Physical Geography
- ERTH 1060.03: Earthquakes, Volcanoes and Natural Disasters
- ERTH 1080.03: Geology I (lab course)

Courses with prerequisites
- ERTH 1090.03: Geology II (with lab)
- ERTH 1091.03: Geology II (non-lab course)
- ERTH 2020.03: Journey Through the Solar System
- ERTH 2410.03: Environmental Issues in Earth Sciences
- ERTH 2420.03: Dinosaurs
- ERTH 3440.03: Geomorphology

High School Preparation
Students in high school who plan a career in Earth Sciences, should have Advanced Math or Pre-calculus Math, plus Chemistry and Physics. Note that only Mathematics is required as a prerequisite, but the others are strongly recommended. A student should ideally aim to make up deficiencies in high school preparation in the first year at Dalhousie.

Degree Programs
The Department of Earth Sciences offers the following degree programs in Earth Sciences

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Earth Sciences
- Minor in Earth Sciences

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Departmental Requirements for these programs are described below. In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Earth Sciences undergraduate academic advisor.

Plug, L., BA (McGill), PhD (Univ of Alaska - Fairbanks)
Ryan, A. M., BSc (Univ College Dublin), MSc, BEd (Acadia), MEd (MSVU), PhD (Dalhousie) cross appointed with Environmental Science
Sherwood, O., BSc, MSc (McMaster), PhD (Dalhousie)
Core Requirements for all BSc and BA (120 credit hour) Degrees

All 120 credit hour degrees in Earth Sciences (Concentrated Honours, Combined Honours, Major, Double Major) share the following required courses:

1000 level

- ERTH 1080.03: Geology I and ERTH 1090.03 (recommended) or ERTH 1091.03: Geology II
- MATH 1000.03: Differential and Integral Calculus I (recommended) or MATH 1215.03: Life Sciences Calculus or equivalent

Students in the Integrated Science Program should contact the department regarding first year equivalencies.

2000 level

- ERTH 2001.03: Mineralogy
- ERTH 2002.03: Introduction to Petrology
- ERTH 2110.03: Field Methods
- ERTH 2203.03: Sediments and Sedimentary Rocks
- ERTH 2380.03: Geochemistry

3000 level

- ERTH 3001.03: Field School
- ERTH 3140.03: Structural Geology
- ERTH 3303.03: Stratigraphy

Field Work

Many Earth Sciences courses have a regular field excursion component that are typically conducted when classes are in regular session, although some excursions may occur on weekends or following exams. Course syllabi will provide specific for each course's field excursions each term, and whether trips are mandatory for the course.

Note that ERTH 3001.03 : Field School is required for all 120 credit hour degree programs in Earth Sciences and is typically held over 15 days in late August, just before the start of the University fall term.

BSc or BA (120 credit hour) Concentrated Honours in Earth Sciences

Students who want a challenging program that includes an in-depth background in Earth Sciences and an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Earth Sciences with a minimum GPA of 3.5 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of ERTH 4201.03/ ERTH 4202.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Earth Sciences.

Admission to Honours

Students must apply for admission to Honours programs, usually by the end of their third year. Students considering Honours in Earth Sciences should consult with an Earth Sciences Academic Advisor early in their studies.
Departmental Requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in the Concentrated Honours program in Earth Sciences must complete the following:

Core Requirements (Section A)

1000 level

- MATH 1010.03: Differential and Integral Calculus II, or MATH 1030.03: Matrix Theory and Linear Algebra I, or MATH 2300.03: Mathematical Modelling, or STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03: Introduction to Probability and Statistics
- PHYC 1190.03: Introduction to Physics and PHYC 1290.03: Introduction to Physics (recommended), or PHYC 1310.03: Physics In and Around You I and PHYC 1320.03: Physics In and Around You II

2000 level and higher

- ERTH 2270.03: Introduction to Applied Geophysics
- ERTH 4201.03 and ERTH 4202.03: Honours Thesis
- Minimum of 21 additional credit hours of ERTH courses at or above the 2000 level, of which at least 15 credit hours must be at or above the 3000 level

Additional Requirements

- Minimum GPA of 3.5 in Honours subject courses, with no grade less than a C
- First-class Honours; Minimum GPA of 3.7 in Honours subject courses, with at least an A- in ERTH 4200.06

BSc or BA (120 credit hour) Combined Honours in Earth Sciences and another subject
Students who wish to study Earth Sciences in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Earth Sciences may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Earth Sciences, this requirement is satisfied through ERTH 4201.03/ERTH 4202.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Earth Sciences as the primary subject.

Departmental requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Earth Sciences and another subject must complete the following:

Earth Sciences as primary subject

- Core requirements (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2040.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03
- PHYC 1190.03 and PHYC 1290.03 or PHYC 1310.03 and PHYC 1320.03

2000 level and higher

- ERTH 2270.03: Introduction to Applied Geophysics
- ERTH 4201.03 and ERTH 4202.03: (Honours Thesis)
- A minimum of three additional ERTH credit hours at 3000 level or above
Students in Combined Honours should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student’s particular subject combination.

**Earth Sciences as secondary subject**

- **Core requirements** (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2040.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03
- PHYC 1190.03 and PHYC 1290.03 or PHYC 1310.03 and PHYC 1320.03

2000 level and higher

- ERTH 2270.03: Introduction to Applied Geophysics
- A minimum of nine additional credit hours in ERTH at or above the 3000 level

Students in Combined Honours should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student’s particular subject combination.

**BSc or BA (120 credit hour) Major in Earth Sciences**
The 120 credit hour Major is suited to students who want to focus on Earth Sciences, but wish to have a program that is somewhat less constrained than the Honours program.

Earth Sciences Majors complete a minimum of 42 credit hours in Earth Sciences courses above the 1000 level.

Research and other experiential learning opportunities are available through laboratories and research project classes.

A [Co-op option](#) is available for students enrolled in a 120 credit hour BSc Major program in Earth Sciences.

**Departmental requirements**
In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Major program in Earth Sciences must complete the following courses:

- **Core requirements** (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2040.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03 (BSc only)

2000 level and higher

- An additional 18-credit hours of Earth Sciences courses, of which a minimum of 15-credit hours must be at the 3000- or 4000-level

**BSc or BA (120 credit hour) Double Major in Earth Sciences and another subject**
The Double Major degree program allows students to combine a study of Earth Sciences with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Earth Sciences may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A [Co-op option](#) is available for students enrolled in BSc Double Major with Earth Sciences as the primary subject.

**Departmental requirements**
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Earth Sciences and another subject must complete the following:

Earth Sciences as the primary or secondary subject

- **Core requirements** (Section A)

1000 level

- One of MATH 1010.03, MATH 1030.03, MATH 2040.03, MATH 2300.03, STAT 1060.03, or STAT 2060.03

2000 level and higher

- A minimum of nine additional credit hours in ERTH at or above the 3000 level

Students in Double Major programs should consult the department when choosing courses. Exceptions to requirements may be made where justified by a student’s particular subject combination.

BSc or BA (90 credit hour) Minor in Earth Sciences

The 90 credit hour degree with Minor in Earth Sciences is appropriate for students who want to study some Earth Sciences but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Earth Sciences. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Earth Sciences is usually the preferred option for students who wish to combine studies in Earth Sciences with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

See Minor in Earth Sciences section.

Minor in Earth Science

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Earth Sciences is available to students in the Faculty of Science.

**Requirements**

- ERTH 1080.03: Geology I and ERTH 1090.03 or ERTH 1091.03: Geology II
- A minimum of 18 credit hours in Earth Sciences courses at the 2000 level or higher, must include at least six credit hours at the 3000 level or higher

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Earth Sciences

Co-op Academic Advisor: Dr. Tarah Wright

Science Co-op is a program of academic study in a science subject, combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Earth Sciences, or in Combined Honours or Double Major programs with Earth Sciences as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.
Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Earth Sciences Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html

Minors available to students in Earth Sciences

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Earth Sciences may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Earth Sciences, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a BSc or BA program in Earth Sciences include:

- Certificate in Environmental Impact Assessment (EIA) (contact: Dr. Patricia Lane, Biology, patricia.lane@dal.ca)
- Certificate in Geographic Information Science (GIS) (contact: Dr. Chris Greene, Earth Sciences, csgreene@dal.ca)
- Certificate in Materials Science (contact: Dr. Mita Dasog, Chemistry, mita.dasog@dal.ca)
- Certificate in Science Leadership and Communication (contact: Dr. Anne-Marie Ryan, Earth Sciences, AMRyan@dal.ca)

Knowledge Requirements for Professional Practice as a Geoscientist

Geoscience is a regulated profession in most of Canada. Individual provinces and territories have acts that restrict the practice of geoscience to individuals who are registered members of professional associations. In Nova Scotia, the Association of Professional Geoscientists of Nova Scotia (APGNS) is the licensing body which fulfils this mandate. APGNS and other provincial geoscience associations, under the guidance of Geoscientists Canada, ensure high standards of geoscience practice and education.

Students who intend to pursue geoscience as a profession, or simply want the most in-depth education in geoscience, should follow the guidelines laid out in the Geoscience Knowledge and Experience handbook provided by Geoscientists Canada. The Geoscience Knowledge and Experience handbook outlines comprehensive sequences of courses intended to prepare a student for professional practice in modern geoscience, and to meet formal requirements for registration in the Geology and Environmental Geoscience streams.

Professional geoscience knowledge requirements are more specific and stringent than degree requirements in terms of the courses required in Earth Sciences and in the Foundation Sciences (mathematics and physics in particular). Earth Science students can meet the knowledge requirements within a 120 credit hour degree by careful selection of ERTH courses and Foundation Science courses, and this should begin in the first year. Less than judicious course selection, and/or combining Earth Science with another subject which also has numerous specific course requirements, may result in a student needing extra courses (beyond the 120 credit hours) in order to meet knowledge requirements for registration. Consult the professional associations -- Geoscientists Canada and APGNS - for additional information on registration.

BSc/BEng or BA/BEng Concurrent Program

Students interested in combining their interest in Program with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Earth Sciences and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see undergraduate advisors from Earth Sciences and from the Faculty of Engineering in their first year of study.

Field Work
Field excursions are part of many courses and are conducted at appropriate times during the session. In addition, some optional field excursions may be held each year. Note that some mandatory field trips may be held on Saturdays or Sundays. Field School, ERTH 3001, which is required for most degree programs, is offered for about 15 days in late August, just before the start of the University fall term.

**Courses**

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the department’s website.

**Course Notes**

NOTE: Some mandatory field trips may be held on Saturdays or Sundays. Check with Instructor.

**Course Descriptions**

**ERTH 1030 Introduction to Physical Geography**  
CREDIT HOURS: 3  
This science course examines the nature of weather and climate, Earth's surface features and processes, and internal processes that contribute to landform development. An integral component of the course is an exploration of the representation and interpretation of physical geographic data through the examination of a variety maps.  
CALENDAR NOTES: There are no pre-requisites for this course, and students may take this course in addition to any other first year Earth Science course.  
CROSSLISTED: GEOG 1030.03  
FORMATS: Lecture | Tutorial

**ERTH 1060 Earthquakes, Volcanoes and Natural Disasters**  
CREDIT HOURS: 3  
Earthquakes, meteorite impacts, rapid climate change, volcanic eruptions, hurricanes, landslides, solar flares, and floods are natural disasters that affect our economy, public policy, and safety. Where, why and how frequently do natural disasters occur? Are predictions possible? Are media portrayals of risk and damage realistic? This course, aimed at the nonspecialist, investigates these intriguing questions. Excerpts of “disaster films”, in conjunction with lectures and discussions are used to identify the causes, consequences and sometimes erroneous perceptions of natural hazards. Examples from Atlantic Canada and contemporary disasters are used to assess local risk and real-time events worldwide.  
CROSSLISTED: GEOG 1060.03  
FORMATS: Lecture

**ERTH 1080 Geology I**  
CREDIT HOURS: 3  
This course focuses on the solid earth (geosphere) and how it evolved throughout earth's vast history, and continues to evolve today. The processes involved are recorded in the rocks and minerals of our earth, and we explore these natural processes and materials as a way to understanding our earth. The course meets the needs of students who require a science course with a lab component, is a required prerequisite course for all Earth Science majors, and serves as an introduction for all those interested in Earth Science. No previous knowledge of geology is required.  
FORMATS: Lecture | Lab

**ERTH 1090 Geology II**  
CREDIT HOURS: 3  
Earth systems introduced in Geology I are explored in greater detail, with an emphasis on change through time, earth resources, and on geologic systems that are connected to human actions. This course provides a strong background to pursue further work in the environmental sciences and is the required course for Earth Sciences majors.  
PREREQUISITES: ERTH 1080.03. Concurrent enrolment in ERTH 1080.03 and ERTH 1090.03 is by permission of instructor.
**EXCLUSIONS:** Credit will only be given for one of ERTH 1091.03 or ERTH 1090.03

**FORMATS:** Lecture | Lab

**ERTH 1091 Geology II**

**CREDIT HOURS:** 3

ERTH 1091 builds on the earth systems introduced in Geology I and explores them in greater detail. The emphasis is on change through time, earth resources, and on geologic systems that are connected to human actions. This non-lab course provides a strong background to pursue further work in the environmental sciences and is the required course for earth sciences majors.

**PREREQUISITES:** ERTH 1080.03. Concurrent enrolment with 1080.03 is by permission of instructor.

**EXCLUSIONS:** Credit will be given for only one of ERTH 1091.03 or ERTH 1090.03.

**FORMATS:** Lecture

**ERTH 2001 Mineralogy**

**CREDIT HOURS:** 3

Earth Materials Science I ERTH 2001 introduces the chemical/physical properties of minerals, their origins and distribution. Labs include mineral identification, crystal chemistry, crystallography, and optical mineralogy. X-ray diffraction and electron microprobe methods are introduced.

**PREREQUISITES:** ERTH 1080.03 or SCIE 1506.09, and (ERTH 1090.03 or ERTH 1091.03 or permission of instructor) or SCIE 1506.09/1507.09, and (CHEM 1011.03/CHEM 1012.03 or CHEM 1021.03/CHEM 1022.03). Chemistry majors should consult the department.

**FORMATS:** Lecture | Lab

**ERTH 2002 Introduction to Petrology**

**CREDIT HOURS:** 3

Through a thorough and systematic examination of hand specimens and thin sections, and the detailed description of mineral assemblages and textures, students will be able to formally classify a wide range of igneous, metamorphic and sedimentary rock types. Case studies representing the geology of Nova Scotia will also be presented.

**PREREQUISITES:** ERTH 2001.03 and CHEM 1011.03/CHEM 1012.03 or CHEM 1021.03/CHEM 1022.03

**FORMATS:** Lecture | Lab

**ERTH 2020 Journey Through The Solar System**

**CREDIT HOURS:** 3

An introduction to the geological features of the planets, asteroid belt, and major satellites of our solar system, and the current understanding as to their formation. The course uses the earth as an analog to compare the landforms, and both the measured and inferred geology of the solar system.

**PREREQUISITES:** There are no prerequisites, however a basic understanding of mathematics and the physical sciences is required.

**RESTRICTIONS:** Restricted from students in first year.

**FORMATS:** Lecture | Online Delivery

**ERTH 2110 Field Methods**

**CREDIT HOURS:** 3

This is intended as an introduction to field techniques useful to the practicing geologist, particularly those concepts essential for the accurate field description and identification of rocks and the use and construction of geological maps. Computer techniques and elementary structural geology are also considered.

**PREREQUISITES:** ERTH 1080.03 (or SCIE 1506.09 and SCIE 1507.09) and (permission of instructor or ERTH 1090.03 or ERTH 1091.03)

**FORMATS:** Lecture | Lab

**ERTH 2203 Sediments and Sedimentary Rocks**

**CREDIT HOURS:** 3

The course deals with physical, chemical and biological processes that generate modern sediments, and their conversion to sedimentary rocks through time. Labs provide a practical introduction to sediment analysis and to a range of sedimentary structures and rock types. Fieldwork may include description of beaches and bedrock in Nova Scotia.

**PREREQUISITES:** ERTH 1080.03 (or SCIE 1506.09/ SCIE 1507.09) and (ERTH 1090.03 or ERTH 1091.03 or permission of instructor)

**FORMATS:** Lecture | Lab

**ERTH 2270 Introduction to Applied Geophysics**

**CREDIT HOURS:** 3

An introduction to using physical principles to explore the Earth's subsurface, with an emphasis on near-surface applications. Topics include seismic, gravity, magnetic, electrical, and electromagnetic surveying techniques, and their application in prospecting, hydrogeology, environmental assessments, and well-
logging. The geophysics field school, normally conducted during the last week of April, is an integral part of this course.

**PREREQUISITES:** ERTH 1080.03 or (SCIE 1506.03/SCIE 1507.03) and MATH 1000.03 and (PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03 X/Y)

**CROSSLISTED:** PHYC 2270.03

**FORMATS:** Lecture | Lab | Experiential Learning

**ERTH 2380 Geochemistry**

**CREDIT HOURS:** 3

An introduction to the principles of chemistry applied to geologic systems, including an overview of the chemistry of rocks and minerals, isotopes in the geologic environment, processes that control the mobility of elements in geologic environments, and the use of geochemical data in solving geological and paleo-environmental problems.

**PREREQUISITES:** ERTH 2001.03 or permission of the instructor

**FORMATS:** Lecture | Tutorial

**ERTH 2410 Environmental Issues in Earth Sciences**

**CREDIT HOURS:** 3

Geology underlies many of the environmental problems facing humans today. Topics include environmental aspects of energy and mineral resource, geologic hazards, geologic connections to pollution and waste disposal, and the role that water plays in its various guises. Canadian examples are incorporated where appropriate. Approved with Canadian Studies.

**CALENDAR NOTES:** This course is not offered every year. Please consult department in the spring for further information.

**PREREQUISITES:** One of: ERTH 1080, ERTH/GEOG 1030, ERTH/GEOG 1060, ENVS 1000 or ENVS 1100 or ENVS 1200, SUST 1001 with a grade of B or above, or DISP with Earth Sciences

**CROSSLISTED:** ENVS 2410

**EXCLUSIONS:** This class does not count toward a Major or Honours in Earth Sciences

**FORMATS:** Lecture

**ERTH 2420 Dinosaurs**

**CREDIT HOURS:** 3

Students will consider the origin, evolution and extinction of non-avian dinosaurs. What are dinosaurs? Why were some dinosaurs so big? What did dinosaurs eat? How fast could dinosaurs run? Were dinosaurs good parents? To answer these questions, we will examine the nature of evidence gathered from dinosaur fossils and their surrounding rocks.

**CALENDAR NOTES:** This course may not be offered every year. Please consult spring timetable or Department on whether course will be offered.

**PREREQUISITES:** ERTH 1080.03 or any two of ERTH 1060.03, ERTH 1090.03, ERTH 1091.03, or permission of instructor

**FORMATS:** Lecture

**ERTH 2430 Forensic and Medical Geology**

**CREDIT HOURS:** 3

Designed for non-earth sciences majors, this course explores the evolving fields within the realm of geosciences. Forensic and medical geology share a common thread in that both depend upon identifying potential geologic and geoenvironmental sources of evidence, and applying this information to solve a larger problem, either legal or health-related.

**CALENDAR NOTES:** This course is not offered every year. Please consult department in the spring for further information.

**PREREQUISITES:** ERTH 1080 and one other Earth Sciences course or instructor's permission.

**FORMATS:** Lecture | Tutorial

**ERTH 3001 Field School**

**CREDIT HOURS:** 3

This field-intensive course provides two weeks of geological mapping in northern Nova Scotia and entails: (1) identifying, measuring and localizing rocks and geological structures; (2) drawing geological maps from field observations and (3) writing a report describing and interpreting the data.

**CALENDAR NOTES:** The class is held for two weeks at the end of summer just prior to the start of the fall term and is required for the Major and Honours programs. It can be a physically demanding course involving day-long traverses - prior consultation with instructors is required

**PREREQUISITES:** ERTH 2002.03, ERTH 2110.03, ERTH 2203.03 and permission of the instructor.

**FORMATS:** Experiential Learning

**ERTH 3010 Igneous Petrology**

**CREDIT HOURS:** 3

Igneous petrology is the study of the field relations, mineralogy, texture, and geochemistry of volcanic and plutonic rocks. Lectures discuss the classification and graphical representation of igneous rocks; the production, differentiation, and emplacement of magma in different tectonic environments. Practical work
consists of laboratory petrographic examination and weekend field trips.

PREREQUISITES: ERTH 2002.03 and ERTH 2380.03
FORMATS: Lecture | Lab

**ERTH 3011 Theoretical Foundations of Igneous Petrology**

CREDIT HOURS: 3

Igneous petrology is an online class that introduces students to the variety of volcanic and plutonic rocks, their field relations, textures, mineralogical and geochemical features. The class examines the production, differentiation, and emplacement of magma in different tectonic environments using thermodynamics, geochemical methods, virtual field trips, and projects-based studies.

CALENDAR NOTES: Cannot receive credit for ERTH 3011 after receiving credit for ERTH 3010

PREREQUISITES: ERTH 2002.03 and ERTH 2380.03
EXCLUSIONS: ERTH 3010
FORMATS: Online Delivery

**ERTH 3012 Practicum on Petrography of Igneous Rocks**

CREDIT HOURS: 1

This course complements the “Theoretical Foundations of Igneous Petrology” course by providing students with in-depth training using petrographic microscope for studies of plutonic and volcanic rocks. The course consists of eight lab sessions followed by an exam completed over one week (5 days).

CALENDAR NOTES: Cannot receive credit for ERTH 3012 after receiving credit for ERTH 3010

PREREQUISITES: ERTH 2002, ERTH 3011
EXCLUSIONS: ERTH 3010

**ERTH 3020 Metamorphic Petrology**

CREDIT HOURS: 3

Metamorphic petrology is the study of the way in which pre-existing igneous, sedimentary, and metamorphic rocks respond to changes in pressure, temperature, and geochemical environment. Metamorphic reactions, deformation and recrystallization, the stability relations of minerals and mineral assemblages under various physical and chemical conditions, and the concept of metamorphic facies are discussed. The relationship of metamorphism to other geological processes is considered. In the labs, microscopic mineralogy and texture are used to decipher the metamorphic history of rocks.

PREREQUISITES: ERTH 3010.03
FORMATS: Lecture | Lab

**ERTH 3140 Structural Geology**

CREDIT HOURS: 3

Introduction to the behaviour of rocks during deformation, stressing the geometrical aspects of rock structures. Students learn: (a) geometrical principles to identify, describe, and interpret common types of structures in outcrop and hand sample; (b) to interpret the mechanical properties of rocks based on their microstructure; (c) construction techniques to calculate and interpret stress and strain in deformed rocks.

PREREQUISITES: ERTH 2002.03, ERTH 2110.03, ERTH 2203.03
FORMATS: Lecture | Lab

**ERTH 3205 Paleobiology**

CREDIT HOURS: 3

This course examines fossil plants and animals and their interactions with the physical world throughout Earth's history. Lectures and lab encompass the concepts of fossil preservation, fossil morphology, fossil identification, systematics, evolution, extinction, paleoecology and biostratigraphy.

PREREQUISITES: ERTH 2203.03 or permission of the instructor.
EXCLUSIONS: ERTH 2205.03
FORMATS: Lecture | Lab

**ERTH 3302 Quaternary Sedimentary Environments**

CREDIT HOURS: 3

The student is exposed to fluvial, alluvial, subglacial, glaciolacustrine, hillslope, eolian, coastal, shallow marine, rift, wedge top, retroarc, and foreland basin environments. Field trips and labs provide experience in methods used to distinguish the environments, including sedimentology, geomorphology, geochronology and thermochronology, and analysis of soils, cores, pebble fabrics, and section-scale non-petroleum sedimentary facies. Quaternary paleoclimatology and tectonic controls on weathering and deposition are discussed and debated.

PREREQUISITES: ERTH 2203.03
CROSSLISTED: GEOG 3302
FORMATS: Lecture | Lab
ERTH 3303 Stratigraphy
CREDIT HOURS: 3
Stratigraphy is the backbone of the geological sciences; it brings together sedimentology, paleontology, petrology and structural geology to reconstruct Earth history. We survey the impact of sea-level change, tectonics and climate on sediment accumulation, with emphasis on seismic and sequence stratigraphy. Case studies focus on sedimentary basins across Canada, and practical work includes laboratory and class exercises, as well as field excursions.
PREREQUISITES: ERTH 2203.03
FORMATS: Lecture | Lab

ERTH 3401 Hydrogeology
CREDIT HOURS: 3
Hydrogeology examines the space-time characteristics of groundwater quantity and quality. It includes physical processes occurring in natural groundwater systems and the governing relations for flow and transport; emphasizing Darcy's Law, steady state and transient flow. It provides an overview of groundwater resource development, evaluation, contamination, and remediation.
PREREQUISITES: ERTH 3701 or permission of instructor
FORMATS: Lecture | Lab

ERTH 3440 Geomorphology
CREDIT HOURS: 3
Geomorphology is the quantitative study of Earth’s surface processes and landforms with applications in geology, civil engineering, hydrogeology, and environmental management. We investigate slope stability, weathering and soils, sediment production, wind-driven and coastal environments, tectonic landforms, and river, glacial and permafrost processes.
PREREQUISITES: ERTH 1080 (or SCIE 1506.09/SCIE 1507.09) and (ERTH 1090.03 or ERTH 1091.03); OR completion of (or concurrent enrolment in) a 1000-level mathematics class, a 1000-level physics class, a 1000-level chemistry class AND permission of instructor
CROSSLISTED: GEOG 3440.03
FORMATS: Lecture

ERTH 3500 Geoscience Information Management
CREDIT HOURS: 3
Geographic Information Systems (GIS), as a tool for the management of georeferenced data, have become indispensable for disciplines where location of objects and pattern of processes is important. GIS plays a fundamental role for a wide range of applications, from modeling, to analysis and predictions, to decision making. The course is designed for a broad base of potential users and draws on examples of the role of GIS in global climate change, mineral exploration, preservation of biodiversity, coastal zone management, resource depletion, and many other present and future environmental issues. The course material will be of interest to those studying geoscience, environmental science, ecology, marine biology, oceanography, epidemiology, urban and rural planning, civil engineering, and any other field involving spatial data. Laboratory exercises emphasize the principles of raster and vector GIS, and the integration of databases and GPS (global positioning systems) data into GIS. Exercises draw on the diversity of GIS applications in a number of topical areas.
PREREQUISITES: Two years of university study or equivalent or instructor’s permission
CROSSLISTED: ERTH 5600, GEOG 3500, ENVS 3500
EXCLUSIONS: Credit will only be given for one of ERTH 3500.03, ERTH 5600.03, GEOG 3500.03, SCIE 3600.03 or ENVS 3500
FORMATS: Lecture | Lab

ERTH 3601 Global Biogeochemical Cycles
CREDIT HOURS: 3
We currently face daunting environmental challenges at the global scale that are expected to worsen in the 21st century, including a global water crisis, climate change and pollution of our waters and atmosphere; this course examines the science behind these environmental issues from the multidisciplinary framework of global biogeochemical cycling. With the global scale as the focus, this course pulls together the many disparate fields that are encompassed by the broad reach of biogeochemistry. You will learn about the processes that drive the movement of carbon, water, nitrogen, phosphorus, and sulphur, through the earth system, and the residency of these elements in the atmosphere, soils, lithosphere, oceans and freshwaters. In the quantitative and analytical exercises you calculate and compare the effects of industrial emissions, land clearing, agriculture, and rising population on the processes driving the Earth's chemical cycles. Weekly journal readings for discussion in laboratory group cover the latest developments in this exciting and rapidly changing field. This course provides an excellent framework for those interested in the science of global change.
PREREQUISITES: CHEM 1011.03/ CHEM 1012.03 or equivalent, and one of ENVS 1100.03, SUST 1001.03, ERTH 1080.03, or (SCIE 1506.09 or SCIE 1507.09) and completion of 2 years of an undergraduate degree.
CROSSLISTED: ENVS 3601.03

ERTH 3700 Earth Resources, Sustainability, and Society
ERTH 3701 Fundamentals of Hydrology
CREDIT HOURS: 3
This course is an introduction to hydrology, emphasizing surface processes and watershed responses. In this course we learn about both the pure and applied uses of hydrology. The course is quantitative and introduces hydrologic processes in the atmosphere, on the land surface, in groundwater and in stream channels.
PREREQUISITES: MATH 1000.03 or MATH 1215.03, AND one of ENVS 1100.03/ENVS 1200.03, SUST 1001.06, ERTH 1080.03, SCIE 1506.09/SCIE 1507.09, AND completion of 2 years of an undergraduate degree. PHYC 1190.03 and PHYC 1290.03 (or PHYC 1310.03/PHYC 1320.03) are recommended.
CROSSLISTED: ENVS 3701.03
RESTRICTIONS: E1 and E2
FORMATS: Lecture | Lab

ERTH 4001 Sponsored Geologic Experience
CREDIT HOURS: 1.5
These Field Trips &/or Laboratory Sessions Introduce students to some of the following: Practical exploration techniques, field and laboratory skills, familiarization with deposit models, related economic and environmental geology, and the business side of Earth-science industries.
FORMATS: Lab

ERTH 4002 Advanced Field School
CREDIT HOURS: 3
This application of the principles of field geology is a comprehensive and intellectually challenging program designed to provide pre-professional field training for senior BSc geoscience students. Multiple field-based projects challenge students to synthesize field observations and solve geological and environmental geoscience problems to gain training that is otherwise difficult to obtain in the classroom or laboratory.
CALENDAR NOTES: The field camp is usually offered in May at selected international settings, and involves mapping exercises and camping over a wide range of climate and topography.
PREREQUISITES: ERTH 3001.03, ERTH 3140.03 and permission from instructor

ERTH 4003 Advanced Field Geology Orientation
CREDIT HOURS: 1.5
This course covers geological and logistical preparation for the month-long Advanced Field Geology course. The course will examine the geology of southwestern North America, as well as geological processes and field techniques relevant to the Field School projects. Discussion topics will also include field safety, group dynamics, travel logistics, and travel grant proposals and fundraising.
CALENDAR NOTES: This is a compulsory course for students taking ERTH 4004: Advanced Field Geology. Credit can only be given for this course if ERTH 4003.015 and 4004.045 are completed in consecutive terms. No grade is assigned for ERTH 4003 until ERTH 4004 has also been completed.
CROSSLISTED: ERTH 3140.03
PREREQUISITES: ERTH 3001.03 and permission from instructor
EXCLUSIONS: ERTH 4002
FORMATS: Seminar

ERTH 4004 Advanced Field Geology
CREDIT HOURS: 4.5
This application of the principles of field geology is a comprehensive and intellectually challenging program designed to provide pre-professional field training for senior BSc geoscience students. Multiple field-based projects challenge students to synthesize field observations and solve geological and environmental geoscience problems to gain training that is otherwise difficult to obtain in the classroom or laboratory.
CALENDAR NOTES: The field camp is usually offered in May at selected international settings and involves mapping exercises and camping over a wide range of climate and topography. Credit can only be given for this course if ERTH 4003.015 and 4004.045 are completed in consecutive terms.
PREREQUISITES: ERTH 4003.015 and permission of instructor
RESTRICTIONS: Requires an application and permission of instructor
EXCLUSIONS: ERTH 4002
FORMATS: Experiential Learning
ERTH 4010 Advanced Topics in Petrology and Geochemistry
CREDIT HOURS: 3
This course advances students' knowledge of modern aspects of petrology, volcanology, and geochemistry, chosen to reflect instructor and students interests. The focus is on learning thermodynamic and computational methods as well as advanced petrographic work and field mapping for interpretation of igneous and metamorphic rocks.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: ERTH 3010, ERTH 3020, ERTH 3001
CROSSTIED: ERTH 5010

ERTH 4040 Integrated Field Studies
CREDIT HOURS: 3
A field-based course, of up to 2 weeks, which includes detailed exercises in geological mapping integrated with advanced concepts in mineralogy, petrology, economic geology, structural geology and tectonics. Students are based for the entire duration of the course off-campus, at an international location, or within Canada.
CALENDAR NOTES: This course will not be offered every year (please consult timetable and/or Department) and will run only if there is a minimum number of 8 students registered. There is a cap of 12 students and priority will be given to students in their final year of study.
PREREQUISITES: ERTH 3001.03, ERTH 3140.03, ERTH 3303.03 and one of ERTH 3010.03 or ERTH 3020.03, as well as permission of the instructor.
FORMATS:

ERTH 4101 Research Project
CREDIT HOURS: 3
This course allows students who are not in an Honours program to do a research project. See course description for ERTH 4201.03/ERTH 4202.03.
CALENDAR NOTES: Credit can only be given for this course if ERTH 4101.03 and 4102.03 are completed in consecutive terms. No grade is assigned for ERTH 4101.03 until both ERTH 4101.03 and 4102.03 have been completed.
EXCLUSIONS: ERTH 4100.06
FORMATS: Lecture

ERTH 4102 Research Project
CREDIT HOURS: 3
This course allows students who are not in an Honours program to do a research project. See course description for ERTH 4201.03/ERTH 4202.03.
CALENDAR NOTES: Credit can only be given for this course if ERTH 4101.03 and 4102.03 are completed in consecutive terms. Credit cannot be given for a single term.
PREREQUISITES: ERTH 4101.03
EXCLUSIONS: ERTH 4100.06
FORMATS: Lecture

ERTH 4110 Geological Oceanography
CREDIT HOURS: 3
This course provides a broad survey of geology and geophysics as they apply to the oceans. The course content covers methods and observations with quantitative applications to an understanding of marine geophysical and geological processes. The topics covered include the origin of ocean basins, plate tectonics, heat flow, gravity, and magnetics (1/3 of the course); patterns and processes of sediment transport and deposition, and the paleoceanographic reconstruction of and past climates (2/3 of the course).
CALENDAR NOTES: Some training in calculus and statistics will prove to be advantageous to the student's outcome.
PREREQUISITES: OCEA 2001.03/OCEA 2002.03 (or OCEA 2000.06); OCEA 2020.03; OCEA 2021.03; ERTH 1080.03 or equivalent; or permission of instructor.
CROSSTIED: OCEA 5110.03; OCEA 4110.03
EXCLUSIONS: Students in third year and above.
FORMATS: Lecture

ERTH 4131 Advanced Petroleum Geoscience
CREDIT HOURS: 3
This is an advanced course in petroleum geoscience applications and interpretations for basin/prospect evaluation. Students work in a team interpreting industry data, including well logs and reflection seismic, in a competitive environment. The team submits its findings and recommendations in written and oral presentations.
PREREQUISITES: ERTH 3303.03, ERTH 4153.03, or permission of the instructor
CROSSTIED: ERTH 5131.03
ERTH 4151 Mineral Deposits
CREDIT HOURS: 3
This course is an introduction to the geology of metallic ore and some industrial mineral deposits. Emphasis is given to the ore formation processes that lead to the economic concentrations of commodities. The course integrates many Earth Science disciplines. Laboratory work introduces ore study in reflected light microscopy.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: ERTH 3010.03, 3140.03
CROSSTLISTED: ERTH 5151.03
FORMATS: Lecture | Lab

ERTH 4153 Petroleum Geology and Energy Systems
CREDIT HOURS: 3
The course provides an introduction to petroleum geology (gas and oil) with some discussion of alternative energy sources. The course provides an introduction to petroleum geology and petroleum systems with discussion of basin analysis, source rock evaluation, seismic and well log sequence stratigraphy, core and outcrop description, depositional facies analysis, oil sands geology, biostratigraphy, drilling and completions, petrophysics and well log analysis in addition to other topics.
PREREQUISITES: ERTH 2270.03, ERTH 3140.03, ERTH 3303.03
FORMATS: Lecture | Lab

ERTH 4157 Petroleum Geoscience Field Methods
CREDIT HOURS: 3
This course provides an advanced-level overview of petroleum systems and petroleum geology field methods including basin analysis, source rock evaluation, seismic and well log sequence stratigraphy and depositional facies analysis, biostratigraphy, drilling and completions, petrophysics and well log analysis in addition to other topics.
PREREQUISITES: ERTH 3303.03 and ERTH 4153.03 and permission of instructor
CROSSTLISTED: ERTH 5157.03

ERTH 4201 Honours Thesis
CREDIT HOURS: 3
This course covers many aspects of written and oral communication of scientific material. In particular, it covers the scientific method, the elements of scientific style, the logical organization and development of ideas and scientific writing. Individual research presentations form a key component.
CALENDAR NOTES: This is a compulsory course for students writing an Honours thesis in Earth Sciences, but is open to students from other disciplines. Field work may be part of thesis research. Credit can only be given for this course if ERTH 4201.03 and ERTH 4202.03 are completed in consecutive terms. No grade is assigned for ERTH 4201.03 until ERTH 4202.03 has also been completed.
EXCLUSIONS: ERTH 4200.06
FORMATS: Lecture

ERTH 4202 Honours Thesis
CREDIT HOURS: 3
This course covers many aspects of written and oral communication of scientific material. In particular, it covers the scientific method, the elements of scientific style, the logical organization and development of ideas and scientific writing. Individual research presentations form a key component.
CALENDAR NOTES: This is a compulsory course for students writing an Honours thesis in Earth Sciences, but is open to students from other disciplines. Field work may be part of thesis research. Credit can only be given for this course if ERTH 4201.03 and ERTH 4202.03 are completed in consecutive terms. EXCLUSIONS: ERTH 4200.06
FORMATS: Lecture

ERTH 4350 Tectonics
CREDIT HOURS: 3
This course is intended to synthesize the various aspects of geology covered in the third year core program. The focus of the course is on tectonic processes and the ways in which these processes create and modify the Earth’s crust. We cover the fundamental geological, geophysical, and geochemical controls that operate today, including plate tectonics, and the ways in which these might have differed in the geological past. The tectonic evolution of specific orogenic belts is discussed, including both modern and ancient examples in Canada and other parts of the world.
PREREQUISITES: ERTH 2270.03, 3140.03
CROSSTLISTED: ERTH 5350.03
FORMATS: Lecture
ERTH 4410 Environmental Geoscience
CREDIT HOURS: 3
Environmental geoscience integrates various aspects of earth sciences to critically examine the interaction between humans and the geologic environment. Topics include: environmentally sensitive elements and minerals, geologic hazards, water, soil, mineral and energy issues, use of isotopes as tracers, as well as waste management, radioactivity, and the urban environment.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
COREQUISITES: ERTH 2380.03
PREREQUISITES: ERTH 2380.03, ERTH 3303.03 and two additional ERTH courses at the 3000 level or above, or permission of instructor
RESTRICTIONS: Restricted to students in third year or above.
FORMATS: Lecture | Tutorial

ERTH 4460 Geochronology and Thermochronology
CREDIT HOURS: 3
Earth and Planetary Sciences extensively use the radioactive decay and growth of naturally occurring nuclides to quantify the timing and rates of geological processes. This course introduces the fundamentals of Geochronology and Thermochronology including the principles, analytical methods and application of several of the most widely applied geo- and thermochronometers.
PREREQUISITES: ERTH 2380.03, ERTH 2002.03 and one course out of MATH 1000.03, PHYC 1190.03 or PHYC 1290.03.
CROSSLISTED: ERTH 6400.03
FORMATS: Online Delivery

ERTH 4470 Introduction to Seismic Imaging
CREDIT HOURS: 3
This course teaches the basic techniques of the reflection seismic method for imaging of earth structures such as those used in hydrocarbon exploration. Lectures introduce concepts and techniques that are applied in computer lab to the processing of a multi-channel seismic dataset. Concepts covered include: source and receiver geometry, digital filtering, deconvolution, velocity analysis, stacking, and migration.
PREREQUISITES: ERTH 2270.03 or permission of instructor
CROSSLISTED: ERTH 5470.03, OCEA 4470.03, PHYC 4470.03, PHYC 5470.03
FORMATS: Lecture | Lab

ERTH 4510 Directed Reading
CREDIT HOURS: 3
NOTE: Course Details listed here also apply to ERTH 4511.
PREREQUISITES: Permission of Department

ERTH 4511 Directed Readings
CREDIT HOURS: 3
See ERTH 4510.
PREREQUISITES: Permission of Department

ERTH 4520 GIS Applications to Environmental and Geological Sciences
CREDIT HOURS: 3
Geographic information systems (GIS) provide a rich set of new tools to the geologist and environmental scientist, not only to solve conventional problems, but also to explore transdisciplinary questions not readily answered by other means. This course builds on the fundamentals of GIS taught in ERTH 3500.03 to explore analytical tools that aid in decision-making processes encountered in mineral exploration, hydrogeology, site selection, environmental assessment, and global change analysis. The course concentrates on case studies and problem solving, including those requiring multi-criteria and multi-objective decision making processes.
PREREQUISITES: GEOG 3500.03, ENVS 3500, ERTH 3500.03; ERTH 5600, or SCIE 3600.03; STAT 1060.03
CROSSLISTED: GEOG 4520.03, ERTH 5520.03
FORMATS: Lab

ERTH 4530 Environmental Remote Sensing
CREDIT HOURS: 3
The goal of this course is to introduce students to the role of remote sensing as a technique provide environmental and geologic information. Particular emphasis will be placed on examining the potential and limitations of remote sensing methods and data in this context. The lectures discuss the fundamentals
of remote sensing with an emphasis on optical multispectral satellite systems. In the lab, students use computerized techniques of digital image enhancement and thematic information extraction to process images derived from a range of remote-sensing systems. The integration of remote-sensing information with GIS (Geographic Information Systems) is stressed in both the labs and lectures.

CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.

PREREQUISITES: ERTH 3500.03, GEOG 3500.03, ENVS 3500.03 or ERTH 5600.03 or SCIE 3600.03
CROSSLISTED: GEOG 4530.03, ERTH 5530.03
FORMATS: Lecture | Lab

**ERTH 4850 Geographic Information Science Research Project**

CREDIT HOURS: 3

Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.

COREQUISITES: ERTH 5420.03/GEOG 4520.03/ERTH4520.03
PREREQUISITES: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03 and permission of instructor
CROSSLISTED: SCIE 4850.03, ENVS 4850.03, ERTH 4850.03, GEOG 4850.03
EXCLUSIONS: Restricted to 3rd and 4th year students

FORMATS: Lecture

Email Address: economics@dal.ca
Website: www.dal.ca/economics

**Introduction**

Economics is a social science - a science because it involves a rigorous intellectual effort to derive logical conclusions from basic facts and propositions; a social science because it has human beings and their welfare as its ultimate concern. The basic facts of Economics cannot be knowable and measurable with the same precision as those of the physical sciences - human society and its motivations are far too complex to permit this - but none of the sciences surpasses economics in its relevance to our needs, problems and goals.

Economics analyzes the equity, efficiency, and sustainability of human behavior in the production, distribution, and consumption of commodities. Economics is not an easy science; indeed, it is one of the most complex, difficult (and fascinating) areas of study when you pursue it beyond its elementary levels, but some basic knowledge of economics is essential for any educated person. A more extensive knowledge of the subject is an invaluable complement to other fields of specialization such as law, commerce, politics and other studies in social sciences or humanities, and a specialization in the field can lead to a variety of interesting career opportunities.

**Degree Programs**

The Department of Economics offers the following degree programs in Economics

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Economics
- Minor in Economics

* May be combined with Minor programs from other disciplines
Departmental Requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Economics undergraduate academic advisor.

**Staff**

**Dean**
Macdonald, C., BA (Hons), PhD (Dalhousie), Professor (Chemistry)

**Chairperson of Department**
Iscan, T., BA (Middle East Tech), MA, PhD (Cornell)

**Faculty Advisors**
Ntantamis, C., Co-op Academic Advisor and Undergraduate Advisor, econadvisor@dal.ca
Okoye, D., Graduate Coordinator (MDE/PhD), econgrad@dal.ca
Warman, C., Graduate Coordinator (MA/PhD), econgrad@dal.ca

**Professors Emeritus**
Lesser, B. BComm (Dalhousie), MA, PhD (Cornell)

**Professors**
Akbulut-Yuksel, M., BS (Middle East Tech), MA, PhD (Houston)
Burton, P., BSc (Saskatchewan), MA, PhD (UBC)
Iscan, T., BA (Middle East Tech), MA, PhD (Cornell)
Osberg, L., BA (Hons) (Queen’s), MPhil, PhD (Yale), McCulloch Professor of Economics
Phipps, S. A., BA (Hons) (Victoria), MA, PhD (UBC), Maxwell Chair of Economics
Tumennasan, N., BA (Univ of Mongolia), MA (Colorado-Denver), AM, PhD (Brown)
Warman, C., BA (Combined Hons), MA, PhD (Carleton)
Xu, K., Dip. (Beijing Teachers’ Univ), MBA, PhD (Concordia)
Yuksel, M., BSc (METU), MA, PhD (Houston)

**Associate Professors**
Cyrus, T., BA (UCLA), PhD (Berkeley)
Giusto, A., Laurea in Economics (Bologna), PhD (Oregon)
Kotlyarova, Y., Dip. Software Eng (Lviv Poly Inst), MSc (Univ of Illinois - Urbana), PhD (McGill)
Okoye, D., BA Hons, PhD (UWO)
Rosenblum, D., BA (Williams College), MA, MPhil, PhD (Yale)
Zhou, W., BE, MA (Tokyo Inst of Technology), PhD (UBC)

**Assistant Professor**
McNeil, J., BA Hons (Carleton), MA, PhD (Queens)

**University Teaching Fellow**
Boulafot, C., MS (Universite Catholique de l'Ouest), PhD (Utah State)

**Senior Instructor**
Forsdyke, R., BSc (Hons) Biochemistry, BEd, MA (Quenn's), PhD (Simon Fraser)

**Instructors**
Ntantamis, C., Dip. Naval Architecture & Marine Eng. (Athens), MSc (Piraeus), PhD (McGill)
Shamsuddin, M., BA (Lafayette), PhD (Georgetown)
Adjunct Professors
Cross, M.L., AA (Dawson College), BA (Montana), MA (SFU), PhD (Texas A&M)
Dasgupta, S., BA (Calcutta), MA (Delhi), MA, PhD (Rochester)
McAllister, R.I., MA (Oxon), MA (Cantab), LLD (Dalhousie)
Rankaduwa, W., BA, MSc (Sri Lanka), MA, PhD (Dalhousie), UPEI

BSc or BA (120 credit hour) Concentrated Honours in Economics

Students who want a challenging program that results in a broad background in Economics and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Economics with a minimum GPA of 3.3 and write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of ECON 4201.03 / ECON 4202: Honours Thesis I and II.

Students interested in eventually pursuing a Masters in Economics are advised to choose the BSc Honours option in order to acquire the needed analytical skills. In contrast, the the BA Honours program provides a broad background in Economics which is excellent preparation for a wide variety of other post-graduate programs.

Admission to Concentrated Honours

Students must apply for admission to Honours programs. Students considering Honours in Economics should consult with an Economics Undergraduate Advisor early in their studies.

To be admitted to the BSc Concentrated Honours program, students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I, and ECON 3700.03: Mathematics for Economists
- It is highly recommended that BSc students complete ECON3339.03: Econometrics II prior to applying to Honours
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

To be admitted to the BA Concentrated Honours program, students must

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I
- Have completed at least 12 credit hours of additional advanced Economics courses including 3000-level courses.
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Concentrated Honours program in Economics must complete the following courses:

BSc Concentrated Honours Requirements:

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level and higher
• ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
• ECON 3338.03: Econometrics I/ECON 3339.03: Econometrics II
• ECON 3700.03: Mathematics for Economists
• One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
• ECON 4420.03: Microeconomic Theory/ECON 4421.03: Macroeconomic Theory
• ECON 4201.03: Honours Thesis I/ECON 4202.03: Honours Thesis II
• An additional 24 credit hours in Economics at or above the 2000 level

Additional Requirements

• STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BA Concentrated Honours Requirements:

1000 level

• ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
• MATH 1000.03: Differential and Integral Calculus I
• MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level and higher

• ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
• ECON 3338.03: Econometrics I
• One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
• ECON 4201.03: Honours Thesis I/ECON 4202.03: Honours Thesis II
• An additional 36 advanced credit hours in Economics of which 12 credit hours must be at the 3000-level or higher

Additional Requirements

• STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BSc or BA (120 credit hour) Combined Honours in Economics and another subject

Students who wish to study Economics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Economics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Economics, this requirement is satisfied through ECON 4201.03/ECON 4202.03: Honours Thesis.

Students are required to complete a minimum of 33 credit hours in Economics courses above the 1000 level if Economics is their primary subject, and a minimum of 30 credit hours in Economics courses above the 1000 level if Economics is their secondary subject.

Combined Honours students interested in eventually pursuing a Masters in Economics, are advised to choose the BSc option (with Economics as the primary subject) in order to acquire the needed analytical skills. To contrast, the BA Combined Honours program or BSc or BA (with Economics as a secondary subject) provides a broad background in Economics and another subject which is excellent preparation for a wide variety of other post-graduate programs.

Admission to Combined Honours
Students must apply for admission to Combined Honours programs. Students considering Combined Honours in Economics should consult with an Economics Undergraduate Advisor early in their studies.

To be admitted to the **BSc Combined Honours program (Economics as primary subject)**, students must:

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I, and ECON 3700.03: Mathematics for Economists
- It is highly recommended that BSc students complete ECON 3339.03: Econometrics II prior to applying to Combined Honours
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

To be admitted to the **BA Combined Honours program (Economics as primary subject)** or **BA/BSc Combined Honours program (Economics as secondary subject)** students must:

- Have at least a B+ average (GPA of 3.3 or above) in Economics courses at the 2000 level and above, with no grade lower than a C
- Have completed ECON 2200.03: Intermediate Microeconomics, ECON 2201.03: Intermediate Macroeconomics, ECON 3338.03: Econometrics I
- Have completed the Dalhousie writing requirement with a grade of B or higher
- Submit the Economics Department honours application by the end of their third year of studies

**Departmental requirements**

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Combined Honours program in Economics and another subject must complete the following:

**BSc Combined Honours Requirements:**

**Economics as primary subject**

**1000 level**

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

**2000 level and higher**

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- ECON 3338.03: Econometrics I/ECON 3339.03: Econometrics II
- ECON 3700.03: Mathematics for Economists
- One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
- ECON 4420.03: Microeconomic Theory/ECON 4421.03: Macroeconomic Theory
- ECON 4201.03: Honours Thesis I/ECON 4202.03: Honours Thesis II
- An additional 3 credit hours in Economics at or above the 2000 level

**Additional Requirement**

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

**Economics as secondary subject**

**1000 level**
• ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
• MATH 1000.03: Differential and Integral Calculus I
• MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level and higher

• ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
• ECON 3338.03: Econometrics I
• One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
• An additional 18 credit hours in Economics at or above the 2000-level, 12 of which must be at or above the 3000-level if (ECON 3310.03 or ECON 3349.03) is chosen or 15 of which must be at or above the 3000-level if (ECON 2233.03 or ECON 2239.03) is chosen.

Additional Requirement

• STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BA Combined Honours Requirements:

Economics as primary subject

1000 level

• ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
• MATH 1000.03: Differential and Integral Calculus I
• MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level and higher

• ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
• ECON 3338.03: Econometrics I
• One of ECON 2233.03: Canadian Economic History, ECON 2239.03: The European Economy Since 1900, ECON 3310.03: Economic Growth in Historical Perspective, or ECON 3349.03: History of Economic Thought
• ECON 4201.03: Honours Thesis I/ ECON 4202.03: Honours Thesis II
• An additional 15 advanced credit hours in Economics of which 12 credit hours must be at the 3000-level or higher

Additional Requirement

• STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

Economics as secondary subject

• Same requirements as for BSc. Combined Honours with Economics as a secondary subject

BSc or BA (120 credit hour) Major in Economics

The 120 credit hour Major is suited to students who want to focus on Economics, but wish to have a program that is somewhat less constrained than the Honours program. BSc Economics Majors complete a minimum of 42 credit hours in Economics courses above the 1000 level; BA Economics majors complete a minimum of 36 credit hours in Economics courses above the 1000 level. Research and other experiential learning opportunities are available through special topics and experiential classes.

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

BSc Major requirements:
1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1030.03: Matrix Theory and Linear Algebra I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- An additional 12 credit hours in Economics at or above the 2000 level

3000 level and higher

- ECON 3338.03: Econometrics I
- An additional 21 credit hours in Economics at or above the 3000 level

Additional Requirements

- STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BA Major requirements:

1000 level

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- MATH 1000.03: Differential and Integral Calculus I
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 level

- ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
- An additional 12 credit hours in Economics at or above the 2000 level

3000 level and higher

- An additional 18 credit hours in Economics at or above the 3000 level

BSc or BA (120 credit hour) Double Major in Economics and another subject

The Double Major degree program allows students to combine a study of Economics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Economics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA. Students are required to complete a minimum of 30 credit hours in Economics courses above the 1000 level.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

BSc requirements (Economics as primary or secondary subject)

1000 level
• ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
• MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
• MATH 1030.03: Matrix Theory and Linear Algebra I
• MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

2000 level

• ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
• An additional 6 credit hours in Economics at or above the 2000 level

3000 level and higher

• ECON 3338.03: Econometrics I
• An additional 15 credit hours in Economics at or above the 3000 level

Additional Requirements

• STAT 2060.03/MATH 2060.03: Introduction to Probability and Statistics

BA requirements (Economics as primary or secondary subject)

1000 level

• ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
• MATH 1000.03: Differential and Integral Calculus I
• MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 level

• ECON 2200.03: Intermediate Microeconomics/ECON 2201.03: Intermediate Macroeconomics
• An additional 6 credit hours in Economics at or above the 2000 level

3000 level and higher

• An additional 18 additional credit hours in Economics at or above the 3000 level

BSc or BA (90 credit hour) Minor in Economics

The 90 credit hour degree with Minor in Economics is appropriate for students who want to study some Economics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general arts or science degree with some specialization in Economics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Economics is usually the preferred option for students who wish to combine studies in Economics with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

See the Minor in Economics section of this Calendar.

Minor in Economics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Economics is available to students in the Faculty of Science and in the Faculty of Arts and Social Sciences.
Requirements

- ECON 1101.03: Principles of Microeconomics/ECON 1102.03: Principles of Macroeconomics
- Must complete between 18 and 36 credit hours in Economics courses at the 2000 level or higher

Contact Economics for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Economics

Co-op Academic Advisor: Dr. Christos Ntantamis (econadvisor@dal.ca)

Co-operative Education in Science is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Economics, or in Combined Honours (with Economics as the primary subject) or Double Major programs. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is strongly recommended that interested students meet with their Department Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Co-operative Education office dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Economics, please see the Department webpage dal.ca/faculty/science/economics/programs/undergraduate-programs/Co-operative-education.html

Minors available to students in Economics

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Economics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Economics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section of this calendar. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.
Certificates of particular interest to students enrolled in a BSc or BA in Economics include:

**Certificate in Data Analytics**

**Certificate in Environmental Impact Assessment**

**Certificate in Science Leadership and Communication**

**BEng/BSc (90 credit hour) concurrent degree (Economics)**

This degree prepares students for careers in engineering by providing students with a better understanding of: the costs and benefits of projects (including externalities and opportunity costs), the business side of projects and financing, and economic policy frameworks. Following is a recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Economics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Economics. A concurrent BEng/BSc Major in Economics (120 credit hours) can be designed for interested candidates.

## Co-operative Education Program in Economics

Co-op Academic Advisor: Dr. C. Ntantamis (econadvisor@dal.ca)

Co-operative Education in Science is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in **BSc (120 credit hour) Honours or Major programs** in Economics, or in Combined Honours (with Economics as the primary subject) or Double Major programs. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is strongly recommended that interested students meet with their Department Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Co-operative Education office [dal.ca/academics/cooperative_education.html](http://dal.ca/academics/cooperative_education.html). For more information on Co-op Education in Economics, please see the Department webpage [dal.ca/faculty/science/economics/programs/undergraduate-programs/Co-operative-education.html](http://dal.ca/faculty/science/economics/programs/undergraduate-programs/Co-operative-education.html).

## Minors available to students in Economics

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).
Students in a BSc or BA (120 credit hour) program in Economics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates
In combination with a BSc or BA in Economics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section of this calendar. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to students enrolled in a BSc or BA in Economics include:

Certificate in Data Analytics
Certificate in Science Leadership and Communication

BEng/BSc (90 credit hour) concurrent degree (Economics)
This degree prepares students for careers in engineering by providing students with a better understanding of: the costs and benefits of projects (including externalities and opportunity costs), the business side of projects and financing, and economic policy frameworks. Following is a recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Economics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Economics. A concurrent BEng/BSc Major in Economics (120 credit hours) can be designed for interested candidates.

Year 3

**IENG 2005** *Engineering economics*

**ECED 2000** *Electric circuits*

**ENGI 2102** *Thermo-Fluid Engineering I*

---

Option 1

**One 2000 level (or higher) ECON course**

**One Science/FASS course (may be ECON)**

---

Option 2

**Two 2000 level (or higher) ECON courses**

**One Science/FASS course (may be ECON)**

---

---

ENGI 2203 *Engineering design II*

‘ Two Engineering electives

---

---

Graduate with Diploma in Engineering and BSc 90 credit degree

---

Year 4

Continue in BEng program

---

Year 5

Complete BEng program

---

Under either Option (1 or 2) students must complete ECON 1101/ECON 1102, and a minimum of 18 credit hours of ECON courses at or above the 2000 level, and an additional 6 credit hours of Science/FASS courses (which may also be ECON courses)

Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements [College of Arts and Science]

See Engineering section of the calendar for details

---

**Graduate Studies**

The Department offers a graduate program leading to the MA, MDE and PhD degrees. Details of these programs, including a list of graduate courses, are given in the Calendar of the Faculty of Graduate Studies. Senior undergraduates may be admitted to some graduate courses at the discretion of the instructors concerned.

---

**Courses**

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above
are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the department's website.

**Course Notes**
Recent course outlines are available on the department’s website (http://economics.dal.ca)

All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.

**Course Descriptions**

**ECON 1101 Principles of Microeconomics**
CREDIT HOURS: 3
How do you decide whether or not to go to university? Why does the price of pizza change so much less than the price of oil? What will better help prevent climate change: a carbon tax, or a cap-and-trade system? Microeconomic analysis, which considers the behaviour of individuals and businesses, can answer questions like these.
FORMATS: Lecture

**ECON 1102 Principles of Macroeconomics**
CREDIT HOURS: 3
Why are some countries rich and others poor? If high oil prices cause the loonie to rise, how are Ontario manufacturers affected? Why were mortgage interest rates above 20% in 1981 but below 5% in 2013? Macroeconomic analysis, which considers the behaviour of the entire economy, can answer questions like these.
CALENDAR NOTES: ECON 1101.03 is not required before taking ECON 1102.03. ECON 1101.03 and ECON 1102.03 (together) satisfy the Principles of Economics requirement for Economics majors and for Bachelor of Commerce and Bachelor of Management students.
FORMATS: Lecture

**ECON 2064 Economic History of the Early Modern West 1500 - 1800**
CREDIT HOURS: 3
The course provides an overview of Europe's growing economic power - agriculture, manufacturing, commerce, consumption and fiscal policy - in the centuries between the first overseas exploration and the onset of the Industrial Revolution. Along with the lectures, students are introduced to a variety of period sources, transcribed and translated.
CALENDAR NOTES: This class cannot be used to meet the life or physical science subject requirement for the BA degree.
CROSSLISTED: HIST2064.03
FORMATS: Lecture | Seminar

**ECON 2200 Intermediate Microeconomics**
CREDIT HOURS: 3
This course covers consumer behaviour, the theory of the firm, factor markets, and general equilibrium welfare analysis. The course serves as the microeconomic prerequisite for higher-level courses in economics.
CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: ECON 1101.03 with a minimum grade of C.
EXCLUSIONS: ECON 2220.03, ECON 2210.03
FORMATS: Lecture

**ECON 2201 Intermediate Macroeconomics**
CREDIT HOURS: 3
An extension of macroeconomic theory of income, unemployment, the exchange rate, inflation and financial markets that satisfies the minimum macroeconomic theory requirement for majors in economics. Serves as the macroeconomic prerequisite for higher-level courses in economics.
CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: ECON 1102.03 with a minimum grade of C.
FORMATS: Lecture
ECON 2210 Managerial Microeconomics  
CREDIT HOURS: 3  
An extension of microeconomic theory and its applications that satisfies the minimum microeconomic theory requirements for Majors in economics. Especially of interest to Commerce students or others not majoring in economics, it pays particular attention to applications of theory in a practical context. Serves as the microeconomic prerequisite for higher-level classes in economics.  
CALENDAR NOTES: Credit cannot be received for BOTH ECON 2200.03 and ECON 2210.03.  
PREREQUISITES: ECON 1101.03 or ECOA 1000.03 with minimum grade of C  
EXCLUSIONS: ECON 2200.03, ECON 2220.03  
FORMATS: Lecture

ECON 2211 Economics of Innovation  
CREDIT HOURS: 3  
Innovation involves the creation and diffusion of new products, processes and methods that drive productivity increases and sustainable growth. This course uses microeconomics to examine the public sector’s role in promoting innovation and firms’ receptor capacity to recognize and address productivity gaps with investments in innovative products, processes and methods.  
PREREQUISITES: ECON 1101 or ECON 1102 with minimum grade of C  
FORMATS: Lecture

ECON 2212 Law and Economics  
CREDIT HOURS: 3  
Law and Economics is the study of optimal legal frameworks. This course uses microeconomic theory to study the efficiencies of property, contract, tort, criminal, and antitrust law. A critical analysis of the role of the Competition Bureau in Canadian markets is presented, along with the tools used to evaluate transactions.  
PREREQUISITES: ECON 1101 with minimum grade of C  
FORMATS: Lecture

ECON 2213 Emerging Giants: The Economic Rise of China and India  
CREDIT HOURS: 3  
This course examines the economic history, current issues, and future trends of China and India, answering such questions as: What explains China's and India’s growth? How is climate change affected by this growth? How are global labour markets affected? Must growth lead to rising inequality? Is democracy required for development?  
CALENDAR NOTES: The student is recommended to have some knowledge of Statistics prior to taking this course.  
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C  
CROSSLISTED: CHIN 2290.03  
FORMATS: Lecture

ECON 2216 Economics of Global Warming  
CREDIT HOURS: 3  
This course uses economic principles to investigate such questions as: What are the benefits and costs of various time paths for abating emissions? How do we value the well-being of future generations? How do we balance helping the poor with environmental sustainability? What policies can align incentives with environmental sustainability?  
PREREQUISITES: ECON 1101.03 with minimum grade of C  
EXCLUSIONS: ECON2850.06, PHYC2850.06  
FORMATS: Lecture

ECON 2217 Women and the Economy  
CREDIT HOURS: 3  
This course studies questions such as: Have economic conditions improved for women in Canada over the past 30 years? Is there gender discrimination in the Canadian labour market? What are the economic consequences of divorce? Are women more likely than men to be poor? Are there inequalities within families?  
CALENDAR NOTES: Approved with Canadian Studies.  
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C  
CROSSLISTED: GWST 2217.03  
FORMATS: Lecture

ECON 2218 Canadian Economy: Policy Issues
Canada’s economy today faces many problems: unemployment, productivity, income distribution, environmental protection, trade relations, federal-provincial fiscal relations, maintenance of social programs, etc. What are the most important economic policy issues that Canada now faces? What is the appropriate policy role for government?

CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 1101.03, ECON 1102.03, with minimum grades of C
CROSSLISTED: CANA 2218.03
FORMATS: Lecture

**ECON 2219 Euros and Cents: From Common Market to European Union**
CREDIT HOURS: 3
The European Union is a grand experiment to unite countries in a single market. The stepwise evolution from customs union to common market to economic and monetary union with a single currency, the Euro, is reviewed and analyzed. Learn more about an economic integration that is unparalleled in history.

CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
FORMATS: Lecture

**ECON 2220 Microeconomic Theory**
CREDIT HOURS: 3
This course covers the economic behaviour of individual decision makers, such as a consumer, a worker or a firm. Emphasis is on theoretical ideas, while applications of these ideas are also considered. Of particular interest to those planning to major or to do honours in economics.

CALENDAR NOTES: Students may not receive credit for both 2200.03 and 2220.03. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: Econ 1101.03, MATH 1000.03 (or equivalent) with minimum grades of C
EXCLUSIONS: Credit cannot be received for BOTH ECON 2200.03 and ECON 2210.03.
FORMATS: Lecture

**ECON 2231 Perspectives in Health Economics**
CREDIT HOURS: 3
This course introduces students to the economics of health, health care, and health policy. It surveys major topics in health economics and the ongoing debate over health care policy. Topics include the economic determinants of health, markets for medical care and health insurance and the government’s role in health care.

PREREQUISITES: ECON 1101.03 and any MATH or STAT course with minimum grades of C
FORMATS: Lecture

**ECON 2233 Canadian Economic History**
CREDIT HOURS: 3
An examination of the economic history of Canada from the time of Confederation to WWI. Major topics explored include: the economic reasons for Confederation, the building of the CPR, the Wheat Boom, foreign trade and investment and the roots of regional disparities.

CALENDAR NOTES: Approved with Canadian Studies. The student is recommended to have some knowledge of history prior to taking this course.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
CROSSLISTED: CANA 2233.03
FORMATS: Lecture

**ECON 2239 European Economic History**
CREDIT HOURS: 3
This course examines the contrasting development patterns of various industrialized European countries during and after their respective industrial revolutions, their association to the European colonial expansion taking place at the same time, and the economic impact on the rest of the world with reference to the turbulent 20th century.

CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
FORMATS: Lecture

**ECON 2326 Money and Banking**
CREDIT HOURS: 3
The course concerns the nature and operation of the financial system with particular reference to the Canadian experience. It investigates financial instruments (including money) and institutions and the social control of the supply of money and credit.
ECON 2334 Perspectives on Economic Development
CREDIT HOURS: 3
Economists have long debated whether the task of development should be entrusted largely to market forces, or whether there is a role for the state in directing a nation’s economic affairs. These debates continue. We assess critiques of economic analysis of development and students are encouraged to debate these issues.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
FORMATS: Lecture

ECON 2336 Regional Development
CREDIT HOURS: 3
Why are some countries or regions poor? Why have the relative positions of different countries and regions shifted over the last several decades? Economic development issues, policies, and theories are analyzed to answer these questions.
PREREQUISITES: ECON 1101.03, 1102.03 with minimum grades of C
CROSSLISTED: GEOG 2336.03
FORMATS: Lecture

ECON 2400 Economic Demography
CREDIT HOURS: 3
This course investigates the economic determinants and consequences of the size, growth, and age structure of human populations. Topics include: why and how households save for retirement and related policy; how age structure affects the employment and well-being of particular generations; and how demographic change and economic growth interact.
PREREQUISITES: ECON 1101.03, ECON 1102.03 with minimum grades of C
FORMATS: Lecture

ECON 2850 The Science and Economics of Climate Change
CREDIT HOURS: 6
This course examines how climate change will impact the environment and human activities, and how to formulate and implement economically realistic solutions. It integrates the physical and biological science with economics in order to analyze the response options as we move towards a carbon-neutral society.
PREREQUISITES: ECON 1101.03 or ECON 1102.03 or any First year MATH or STAT course
CROSSLISTED: PHYC 2850.06
EXCLUSIONS: PHYC 2800.03, ECON 2216.03
FORMATS: Lecture

ECON 3111 Writing in Economics
CREDIT HOURS: 3
This course provides instruction in principles and practice of good writing about economics. Students read and examine writing samples and practice writing for various venues (such as government, firms, and news media) in various formats (such as opinion editorials, government policy papers, proposal writing and journal articles).
PREREQUISITES: ECON 2200.03 or (ECON 2210.03 or ECON 2220.03) with a minimum grade of C

ECON 3231 Topics in Health Economics
CREDIT HOURS: 3
This course comprises a survey of major topics in health economics and introduces the issues, theory and practice of health economics. The course frames health care as an input into the production of health. It thus differentiates the concepts of healthcare and health addressing both throughout the term.
CALENDAR NOTES: ECON 2231.03 is a recommended prerequisite
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON 2280.03/STAT 2080.03/MATH 2080.03, with minimum grades of C
FORMATS: Lecture

ECON 3310 Economic Growth in Historical Perspective
CREDIT HOURS: 3
This course examines the sources of long-run economic growth and development in a historical perspective. Topics covered include invention, innovation, culture, legal institutions governing access to resources, demography, fertility, mortality, and alternative modes of production.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) and ECON 2201.03 with minimum grades of C
FORMATS: Lecture

ECON 3315 Labour Economics
CREDIT HOURS: 3
This course considers the theory, evidence and policy of labour economics from a Canadian perspective. Topics include: How does EI affect the Canadian labour market? Do minimum wages reduce employment? What is economic discrimination and does it exist in Canada? How well do immigrants fare in the Canadian labour market?
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON 2201.03 with minimum grades of C
FORMATS: Lecture

ECON 3319 Industrial Organization
CREDIT HOURS: 3
The course provides an overview of the organization of production. Market structure, firm conduct, and performance affect each other in complex ways; the degree of horizontal and vertical integration affects the ability to set prices, for example. Governments regulate firms in order to reduce socially harmful anticompetitive behaviour.
CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with minimum grade of C
FORMATS: Lecture

ECON 3320 The Economics of Professional Sports
CREDIT HOURS: 3
This course applies microeconomic theory to explain the peculiar nature of professional sports. Topics may include the organization of leagues, ticket pricing, advertising, competitive balance, franchise valuation, stadium financing, broadcasting and sports labour markets. “Controversial” topics, such as gambling, cheating, performance enhancing drugs (PEDs) and discrimination may also be covered.
PREREQUISITES: ECON1102.03, ECON 2200.03 (or ECON2210.03 or ECON2220.03) and (STAT1060.03/MATH1060.03 or STAT2060.03/MATH2060.03) each with minimum grades of C.
FORMATS: Lecture

ECON 3330 International Trade
CREDIT HOURS: 3
This course examines the theory and empirics of international trade, including standard historical trade theories, more recent theories, and evidence regarding these theories. The course investigate factor movements, the welfare effects of trade policies in both industrial and developing countries, and the institutions that have developed to regulate those policies.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with minimum grade of C
FORMATS: Lecture

ECON 3331 International Finance
CREDIT HOURS: 3
This course covers the theory and empirics of international macroeconomics. It examines the determination of exchange rates, international capital flows, and risk; the effectiveness of fiscal and monetary policy in an open economy; modern international policy coordination; and the determination of the current account and net foreign assets.
PREREQUISITES: ECON 2201.03 with minimum of grade C
FORMATS: Lecture

ECON 3332 Resource Economics
CREDIT HOURS: 3
This course focuses on intertemporal economics and the economics of market failure as they pertain to the use of natural resources. A selection of resource sectors will also be discussed. Fisheries, agriculture, forestry, and energy represent possibilities, but this will vary from year to year.
CALENDAR NOTES: Approved with Canadian Studies. All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), MATH 1000.03 or equivalent with minimum grades of C
FORMATS: Lecture
ECON 3333 Economic Development
CREDIT HOURS: 3
This course surveys current applications of economic theory to the problem of economic development. Topics covered include recent advances in theory of economic growth, theories of poverty and inequality and their relation to economic performance, theories of fertility and population growth, and the microeconomics of peasant agriculture.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, with minimum grades of C
FORMATS: Lecture

ECON 3335 Environmental Economics
CREDIT HOURS: 3
This course serves as an introduction to environmental economics. Topics include social decision making, externalities and public goods, regulatory approaches (standards, charges, tradable permits), forms of value derived from the environment and measurement techniques.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with minimum grade of C
FORMATS: Lecture

ECON 3338 Econometrics I
CREDIT HOURS: 3
The theory of some quantitative methods commonly used by economists is discussed in the context of the classical linear model. Estimation problems caused by violations of the assumptions of the classical model are studied including heteroscedasticity and autocorrelation.
PREREQUISITES: MATH 1000.03 (or equivalent) and STAT 2060.03/MATH 2060.03 with minimum grades of C
FORMATS: Lecture

ECON 3339 Econometrics II
CREDIT HOURS: 3
This course is an extension of ECON 3338.03 and covers a range of econometric methods that are used in economic research. The topics for this course include: panel data, binary-choice models, instrumental variables, time series and forecasting.
PREREQUISITES: ECON 3338.03 with minimum grade of C
FORMATS: Lecture

ECON 3345 Public Finance
CREDIT HOURS: 3
This class studies the economics of taxes and transfers. Equity and efficiency effects of both are considered. Approved with Canadian Studies.
CALENDAR NOTES: All Economics courses, unless stated otherwise, have a minimum grade requirement of C for their prerequisite courses.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) and ECON 2201.03 with minimum grades of C

ECON 3349 History of Economic Thought
CREDIT HOURS: 3
This course will examine theories of value, production, distribution, and growth as developed in classical political economy and neoclassical economics. Theories of equilibrium and stability, the links between classical political economy and macroeconomic theory, and reactions to classical and neoclassical economics will be considered as time permits.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) and ECON 2201.03 with minimum grades of C
FORMATS: Lecture

ECON 3350 Social Cost Benefit Analysis
CREDIT HOURS: 3
Social cost benefit analysis is used to evaluate public projects and private sector regulations. It is similar to the revenue cost accounting used by firms but takes into account external costs and benefits such as environmental damages. This course explains the methodology in the context of case studies after which students apply the method to evaluate a public policy problem.
CALENDAR NOTES: It is strongly recommended for students to have taken one welfare analysis course such as ECON2216.03, ECON3335.03, ECON3345.03, ECON3330.03 or ECON3319.03 prior to registering for the course.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03) with a minimum grade of C
RESTRICTIONS: Registration exclusion = E2
EXCLUSIONS: ECON 4350
FORMATS: Lecture
ECON 3426 Monetary Policy
CREDIT HOURS: 3
Assuming a basic knowledge of monetary institutions and macroeconomics, a critical analysis of the objectives and effectiveness of monetary policy is developed. Particular attention is given to the Canadian experience and the effectiveness of Canadian policy.
CALENDAR NOTES: Approved with Canadian Studies.
PREREQUISITES: ECON 2201.03 and ECON 2326.03 with minimum grades of C
EXCLUSIONS: ECON4426
FORMATS: Lecture

ECON 3500 Public Economics
CREDIT HOURS: 3
Analyzes the role of government in problems of resource allocation due to market failure. Concentrates on theories of public goods, collective choice, potential of conflict and cooperation in individually-motivated actions, incentive structures capable of realizing rational, cooperative, group outcomes. Provides theoretical underpinnings of many applied fields. Involves mathematical methods.
CALENDAR NOTES: While a background of ECON 3700 is helpful, it is not a prerequisite.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and MATH 1000.03 or equivalent with minimum grades of C or instructor permission
FORMATS: Lecture

ECON 3600 Strategic Behaviour in Economics
CREDIT HOURS: 3
Many economic questions (such as price competition, tax policy, research and development decision, bargaining) can be interpreted as games, in which each player's action affects payoffs of other players. The students learn how to recognize various strategic interactions in economics, and how to evaluate the outcomes of such interactions.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), MATH 1000.03 or equivalent with minimum grades of C
FORMATS: Lecture

ECON 3700 Mathematics for Economists
CREDIT HOURS: 3
This course presents mathematical methods used in modern economics. The lectures concentrate on the basic concepts of analysis, comparative statics and optimization theory. Topics include an introduction to set theory and matrix algebra, the implicit function theorem, unconstrained optimization, constrained optimization with equality and inequality constraints, and intertemporal choice.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, and MATH 1000.03 or equivalent with minimum grades of C or permission of the instructor
CROSSLISTED: MATH 3700.03
FORMATS: Lecture

ECON 3800 Financial Economics
CREDIT HOURS: 3
This course is an introduction to decision making by investors under uncertainty, portfolio theory, asset pricing, financial markets, and instruments. The course covers both the theoretical and practical aspects of investment, surveys the techniques available for economists, and emphasizes "hands-on" learning using Canadian and international case studies.
PREREQUISITES: ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03 with minimum grades of C
CROSSLISTED: MATH 3800.03
FORMATS: Lecture

ECON 3900 Financial Mathematics
CREDIT HOURS: 3
See course description for MATH 3900.03 in the Mathematics section of this calendar.
PREREQUISITES: MATH 2060.03 and (MATH 2120.03 or MATH 3110.03 or MATH 2135.03) with minimum grades of C or instructor's permission
CROSSLISTED: MATH 3900.03
FORMATS: Lecture

ECON 4002 Experiential Learning (in Economics)
Experiential learning recognizes the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and timetable.

**PREREQUISITES:** ECON 1101.03, ECON 1102.03, ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, ECON 3338.03, ECON 3339.03 with minimum grades of C. To be eligible, students should have a minimum average GPA of 3.0 in Economics.

**EXCLUSIONS:** Scheduled classes at a learning institution, study that would qualify for co-op work terms and paid work. Only one experiential learning class per degree is permitted.

**ECON 4201 Honours Thesis I**

**CREDIT HOURS:** 3

This course is required for honours students, and helps students define, research, and write an original research project under the supervision of an economics faculty member. Students develop a topic, critique current literature, run statistical tests, or research and write a policy paper, and present results in a public conference.

**CALENDAR NOTES:** Students must complete both ECON4201.03 and 4202.03 in the same academic year, and are assigned a common grade for both courses after both have been completed. To be given permission to take the Honours Thesis courses, students should have completed the Dalhousie writing requirement, with a grade of B or higher in at least one Dalhousie writing course. ECON3339.03 is a recommended prerequisite for B.Sc. students.

**PREREQUISITES:** ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, ECON 3338.03, with minimum grades of C and permission of instructor

**EXCLUSIONS:** ECON4200.06

**FORMATS:** Seminar

**ECON 4202 Honours Thesis II**

**CREDIT HOURS:** 3

This course is required for honours students, and helps students define, research, and write an original research project under the supervision of an economics faculty member. Students develop a topic, critique current literature, run statistical tests, or research and write a policy paper, and present results in a public conference.

**CALENDAR NOTES:** Students must complete both ECON4201.03 and 4202.03 in the same academic year, and are assigned a common grade for both courses after both have been completed. To be given permission to take the Honours Thesis course, students should have completed the Dalhousie writing requirement, with a grade of B or higher in at least one Dalhousie writing course. ECON3339.03 is a recommended prerequisite for B.Sc. students.

**PREREQUISITES:** ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 2201.03, ECON 3338.03, ECON4201.03, all with minimum grades of C, and permission of instructor

**EXCLUSIONS:** ECON4200.06

**FORMATS:** Seminar

**ECON 4317 Poverty and Inequality**

**CREDIT HOURS:** 3

Why are some people poor, while others are rich? Why do some nations have more poverty or inequality than others? What can or should be done? This course examines the extent of poverty and inequality in contemporary societies, and the theories underlying alternative measures and explanations.

**CALENDAR NOTES:** Approved with Canadian Studies. The student is advised to take ECON 3315 before taking ECON 4317.

**PREREQUISITES:** ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON2201.03, with minimum grades of C.

**EXCLUSIONS:** ECON 3317.03; ECON 5317.03

**FORMATS:** Lecture

**ECON 4360 Ethics, Justice, and Economics**

**CREDIT HOURS:** 3

Assumptions of Neoclassical economic theory are critically examined with a focus on the ethical and distributional consequences of using markets as an allocation mechanism. We discuss the major conceptions of economic justice, including utilitarianism and social choice theory, Rawlsian egalitarianism, Nozickian libertarianism, Sen’s capabilities approach and equality of opportunity.

**PREREQUISITES:** ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), and ECON 2201.03, with minimum grades of C

**CROSSLISTED:** PHIL 4360.03

**EXCLUSIONS:** ECON 3360.03, ECON 5360.03, PHIL 3361.03

**FORMATS:** Lecture

**ECON 4420 Microeconomic Theory**

**CREDIT HOURS:** 3

In-depth study of outcomes of decision-making by agents, individually, collectively or as an interdependent system. Selects topics from: linear and non-linear optimization and applications to theory of consumers and firms, general equilibrium, game theory, alternative solution concepts, comparative statics, stability, welfare, market failures, collective choice, intertemporal economics, uncertainty.

**PREREQUISITES:** ECON 2200.03 (or ECON 2210.03 or ECON 2220.03), ECON 3700.03, MATH 1000.03 or equivalent, MATH 1010.03 with minimum
ECON 4421 Macroeconomic Theory
CREDIT HOURS: 3
Students are introduced to contemporary issues in macroeconomics including aggregate growth accounting; neoclassical growth models; monetary policy, inflation and unemployment; theories of consumption and investment; and trade and exchange rates. Mathematical methods are applied extensively and their application to economic problems will be stressed at both the theoretical and intuitive levels.
PREREQUISITES: ECON 2201.03, ECON 3700.03, MATH 1000.03 (or equivalent), MATH 1010.03 with minimum grades of C
FORMATS: Lecture

ECON 4427 Market Design
CREDIT HOURS: 3
The course studies how the organization of centrally administered markets affects their performance. Students learn several mechanisms that are currently used, and evaluate their properties. The course has a strong emphasis on applications, e.g., the allocation of students to public schools, interns to hospitals or organ donors to recipients.
PREREQUISITES: ECON3700 or MATH 2001 with a minimum grade of C
EXCLUSIONS: Econ 5427.03
FORMATS: Lecture

ECON 4440 Time Series in Economics
CREDIT HOURS: 3
This is a course in econometrics that focuses on time series models. The topics cover estimation and inference procedures for univariate and multivariate time series models with stationary and nonstationary data, including vector autoregressive models and Markov switching models.
PREREQUISITES: ECON 3338.03 (grade of C or higher), ECON 3339.03 (grade of B or higher)
EXCLUSIONS: ECON 5440.03
FORMATS: Lecture

ECON 4700 Advanced Mathematics for Economists
CREDIT HOURS: 3
The course emphasizes abstract analytical methods via a selection of topics in mathematics which prepares the advanced undergraduate student for pursuing graduate studies in economics. Topics include elements of mathematical logic, sets and correspondence, vector spaces, metric spaces, topological concepts, fundamentals of analysis, multivariate calculus, fixed point theorems, dynamic optimization.
PREREQUISITES: ECON 3700.03 with minimum grade of C
FORMATS: Lecture

ECON 8891 Co-op Work-Term I
CREDIT HOURS: 0

ECON 8892 Co-op Work-Term II
CREDIT HOURS: 0

ECON 8893 Co-op Work-Term III
CREDIT HOURS: 0
Environment, Sustainability and Society

Location:
College of Sustainability
1459 LeMarchant Street
Suite 1401
PO BOX 15000
Halifax NS
B3H 4R2

Phone Number:  (902) 494-4581
Fax Number:    (902) 494-8923
Email Address: sustainability@dal.ca
Website:        www.ess.dal.ca

Degree Programs
The College of Sustainability offers a BSc Double Major, Combined Honours and Minor in Environment, Sustainability and Society with any major/honours subject in the Faculty of Science and the Faculty of Computer Science. For complete details about the College, its programs and courses please see the College of Sustainability.

Students in the ESS Program are eligible to pursue the following Certificates offered by the Faculty of Science:

- Certificate in Environmental Impact Assessment
- Certificate in Geographical Information Systems

BSc Combined Honours, Environment, Sustainability and Society
The BSc Combined Honours degree program allows students to combine a study of Environment, Sustainability and Society (ESS) with another subject (Allied Subject). The Allied Subject may be any Honours subject from the Faculty of Science or the Faculty of Computer Science. An Honours Thesis is completed in either ESS or in the Allied Subject. Students intending to complete a Combined Honours program must consult with academic advisors in both subject areas. This degree may also be combined with Minor(s).

Admission to ESS Honours (ESS as primary subject):
Students must apply for admission to the ESS Honours Program by completing the “Intent to Register for ESS Honours Thesis” form before the end of the winter term prior to starting the ESS Honours Thesis course. A cumulative GPA of 3.3 is required in all SUST and ESS Elective courses at 2000 level or above, with no individual grade less than C. Students must also complete the Dalhousie Honours Application Form before the deadline in September of their Honours year.

BSc Combined Honours Graduation Requirements
Students must fulfill the requirements for the 120 credit hour degree requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. A cumulative GPA of 3.0 is required in all Honours Subject courses at 2000 level or above, with no individual grade less than C.

Course Requirements
In addition to fulfilling the 120 credit hour degree requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc Combined Honours program in ESS and another subject must complete the following:

ESS Course Requirements:
1000-level Requirements:

- SUST 1000.06: What is Sustainability? or SUST 1400.03 Exploring Sustainability (online)
- SUST 1001.06: A Sustainable Future
- With Foundation Year Program (FYP) or Dalhousie Integrated Science Program (DISP): Any 1000-level SUST course (minimum 3 credit hours)
Upper-level requirements:

- SUST 2000.06: Local Governance, Citizen Engagement and Sustainability
- SUST 2001.06: Global Environmental Governance
- SUST 3000.03: Environmental Decision Making
- 9 more credit hours SUST at 3000 level or above (SUST 4001.03 and SUST 4002.03 ESS Capstone recommended)

**ESS as primary subject in BSc Combined Honours:**
- 6 more credit hours SUST or ESS Electives at 2000 level or above
- SUST 4901.03 and SUST 4902.03: ESS Honours Thesis

**ESS as secondary subject in BSc Combined Honours:**
- 6 more credit hours SUST or ESS Electives at 3000 level or above

- The courses listed above fulfill the minimum requirements of 30 credit hours at 2000-level or above and 18 credit hours at 3000-level or above
- Students may take no more than 54 credit hours in SUST/ESS Electives at 2000-level or above

Allied Subject Requirements:
Please consult the Academic Calendar and Academic Advisor for your Allied Subject. If ESS is the secondary subject, the Honours Thesis is typically completed in the Allied (primary) Subject. Even if ESS is the primary subject, there may be additional course requirements for the Allied Subject to satisfy their Combined Honours degree requirements.

General Degree Requirements satisfied by SUST courses:
SUST 1000.06 satisfies the 6 credit hours writing requirement (SUST 1400.03 and SUST 1001.06 do not satisfy the Writing Requirement). For BSc students either SUST 1000.06 or SUST 1001.06 satisfy the Social Science requirement. For BA students either SUST 1000.06 or SUST 1001.06 satisfy the Life and Physical Sciences requirement. For all General Degree Requirements please see [College of Arts and Science Degree Requirements](#).

BSc Double Major, Environment, Sustainability and Society
The BSc Double Major degree program allows students to combine a study of Environment, Sustainability and Society (ESS) with another subject (Allied Subject). The Allied Subject may be any Major subject from the Faculty of Science or the Faculty of Computer Science. It is recommended that students enrolled in a Double Major program consult with academic advisors in both subject areas. This degree may also be combined with Minor(s).

Course Requirements
In addition to fulfilling the 120 credit hour degree requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc Double Major program in ESS and another subject must complete the following:

**ESS Requirements:**
1000-level requirements:
- SUST 1000.06: What is Sustainability? or SUST 1400.03 Exploring Sustainability (online)
- SUST 1001.06: A Sustainable Future

- With Foundation Year Program (FYP) or Dalhousie Integrated Science Program (DISP): Any 1000-level SUST course (minimum 3 credit hours)

Upper-level requirements:
- SUST 2000.06: Local Governance, Citizen Engagement and Sustainability
- SUST 2001.06: Global Environmental Governance
- SUST 3000.03: Environmental Decision-Making
- SUST 4001.03: Environment, Sustainability and Society Capstone Part 1
• SUST 4002.03: Environment, Sustainability and Society Capstone Part 2

• 3 more credit hours SUST at 3000 level or above
• 6 more credit hours SUST or ESS Electives at 3000 level or above

• The courses listed above fulfill the minimum requirements of 30 credit hours at 2000-level or above and 18 credit hours at 3000-level or above
• Students may take up to 18 more credit hours in SUST/ESS Electives at 2000-level or above, to a maximum of 48 credit hours

* SUST 4001 and SUST 4002 must be taken in consecutive Fall and Winter terms. Credit will not be granted for SUST 4001 until completion of SUST 4002.

**Allied Subject Requirements:**
Please consult the Calendar and Academic Advisor for your Allied Subject.

**General Degree Requirements satisfied by SUST courses:**
SUST 1000.06 satisfies the 6 credit hours Writing Requirement (SUST 1400.03 and SUST 1001.06 do not satisfy the Writing Requirement). For BA students either SUST 1000.06 or SUST 1001.06 satisfy the Life and Physical Sciences requirement. For BSc students either SUST 1000.06 or SUST 1001.06 satisfy the Social Science requirement. For all General Degree Requirements please see College of Arts and Science Degree Requirements.

**Minor in Environment, Sustainability and Society**
The Environment, Sustainability and Society (ESS) Minor is available to students registered in a 120 credit hour Bachelor of Arts, Bachelor of Science, Bachelor of Commerce, Bachelor of Computer Science, Bachelor of Applied Computer Science, Bachelor of Management, Bachelor of Music, Bachelor of Journalism, or Bachelor of Science (Medical Sciences) program.

A BA (90 credit hour) degree program with a Minor in Environment, Sustainability and Society (ESS) is also available.

Requirements for Minor in ESS:

• any 1000-level SUST course
• a minimum of 18 credit hours and a maximum of 27 credit hours at the 2000 level or above in SUST courses.

Contact College of Sustainability for more information.

**Environmental Science**

**Location:**
Life Sciences Centre
1355 Oxford Street

**Introduction**
Environmental Science in the Department of Earth and Environmental Sciences offers several programs. These include a BSc Honours/Major in Environmental Science, a Minor in Environmental Science, a Double Major in Environmental Science and Community Design, and a BSc or BA Double Major or Combined Honours in Environmental Science and any Major/Honours subject in the Faculty of Science, Faculty of Arts and Social Sciences (FASS) or with the College of Sustainability. The Faculty of Arts and Social Sciences (FASS), the Faculty of Science, the Faculty of Computer Science and the Faculty of Architecture and Planning also offer a Minor in Environmental Studies which is administered through Environmental Science.
Environmental Science applies the findings and principles from multiple disciplines to environmental questions and problems. Environmental Science, by nature, is multidisciplinary and interdisciplinary. Most environmental scientists develop expertise in a particular discipline, and work co-operatively with specialists in other disciplines to solve environmental problems. They work in a variety of institutions in both the public and private sectors: municipal, provincial and federal government departments, consulting and engineering companies, development aid organizations in the non-governmental sector and activist community organizations. In all of these institutions they must integrate their scientific knowledge into the prevailing political, economic and legal systems.

The courses required for the BSc Environmental Science stress the links among the fields of study that the students acquire. Thus, students graduate with a combination of depth and breadth of knowledge and the ability to solve problems in the real world.

**Degree Programs**

The Faculty of Science offers the following degree programs in Environmental Science

- BSc (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- Minor in Environmental Science (120 hour and 90 hour)
- Minor in Environmental Studies

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Program Requirements can be seen by following the links to the right. In addition to the program requirements, students must satisfy the requirements outlined in the [Academic Regulations](#) and the [College of Arts and Science Degree Requirements](#) sections. Students are advised that a number of requirements differ for the BA and BSc degrees.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with the Environmental Science undergraduate academic advisor.

**Staff**

**Dean**

Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

**Chair of Earth and Environmental Sciences**

Brenan, J. M., BSc Honours (McGill), PhD (Rensselaer)

**Undergraduate Program Coordinator**

Wright, T., PhD (Alberta)

**Undergraduate Advisors**

Mui, A., PhD (Toronto)

**Faculty**

Cray, H., MSc (McGill), PhD (Waterloo)
Fong, K., HBSc (Toronto), MSc (ETH Zurich), ScD (Harvard)
Gass, S., PhD (Open Univ, UK)
Mui, A., PhD (Toronto)
Ryan, A. M., BSc (Univ College Dublin), MSc, BEd (Acadia), MEd (MSVU), PhD (Dalhousie)
Sterling, S., PhD (Duke Univ)
Wright, T., PhD (Alberta)

Supporting Faculty
Environmental Science draws on faculty from the departments below:

Biology
Chemical Engineering
Chemistry
Earth Sciences
Economics
Environmental Engineering
International Development Studies
Mathematics
Oceanography
Philosophy
Physics and Atmospheric Science
Political Science
School for Resource and Environmental Studies
School of Planning
Sociology and Social Anthropology
Statistics

Note: This field is rapidly expanding. Students interested in these types of programs should ask about courses related to the environment, other than those listed on the following pages, through the departmental contacts noted above.

**BSc (120 credit hour) Major in Environmental Science**

The 120 credit hour Major is suited to students who want to focus on Environmental Science, but wish to have a program that is somewhat less constrained than the Honours program. Environmental Science Majors complete 36 credit hours in Environmental Science courses. Research and other experiential learning opportunities are available through laboratories, field, special topics and internship courses.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Environmental Science. See Co-operative Education Program.

**Program requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Major program in Environmental Science must complete the 1000 level courses (listed below) and the Common Core courses - Majors (also listed below).

**1000 Level Courses (to be taken in first year, if possible)**

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

Or

- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- ERTH 1080.03: Geology I
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement in their first year.

Also required but usually taken in the second year:

- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics*

**Common Core Courses - Majors**
To be completed over the course of a four year degree program: Common Core Courses introduce students to the scope and magnitude of Environmental Science and are designed to provide students with an appreciation of the scientific, historic, legal and social aspects of environmental issues.

- STAT 2080.03: Statistical Methods of Data Analysis and Inference*
- BIOL 2060.03: Introductory Ecology
- PHIL 2480.03: Environmental Ethics**
- ENVS 2310.03: Energy and the Environment
- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- ENVS 3001.03: Environmental Science Field School
- ENVS 3100.03: Environmental Analytics
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3500.03: Geoscience Information Management
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3601.03: Global Biogeochemical Cycles
- ENVS 4001.03: Environmental Impact Assessment
- ENVS 4100.03: Environmental Science Capstone

*STAT 2080.03: Statistical Methods of Data Analysis and Inference and ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics together satisfy the College of Arts and Science requirement for six credit hours in Social Science.

**PHIL 2480.03: Environmental Ethics satisfies half of the College of Arts and Science requirement for six credit hours in Languages and Humanities.

BA (120 credit hour) Major in Environmental Science

BA Major in Environmental Science

1000 Level

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a single first year science subject chosen from BIOL, CHEM, PHYC, ERTH, ECON
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 Level

- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- Six credit hours chosen from:
  - BIOL 2003.03: Diversity of Life I
  - BIOL 2004.03: Diversity of Life II
  - BIOL 2060.03: Introductory Ecology
  - GEOG 2800.03: Climate Change
  - CHEM 2505.03
  - OCEA 2001.03: The Blue Planet I
  - OCEA 2002.03: The Blue Planet 2
  - ECON 2216.03: Economics of Global Warming
  - ERTH 2410.03: Environmental Issues in Earth Sciences
  - ENVS 2310.03: Energy and the Environment
  - PHIL 2480.03: Environmental Ethics
  - Any additional ENVS 2000- level course. Please note this may include ENVS 2000 or ENVS 2500.

3000 and 4000 Level

- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
• ENVS 3502.03: Environmental Problem Solving II*
• ENVS 4001.03: Environmental Impact Assessment
• At least six additional credit hours from:
  o Any additional 3000 or 4000 level ENVS courses
  o BIOL 3060.03: Environmental Ecology
  o BIOL 3061.03: Communities and Ecosystems
  o BIOL 4160.03: Political Ecology

BSc Double Major in Environmental Science and Community Design

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Double Major program in Environmental Science and Community Design must complete the following:

1000 Level

• SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)
• ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics
• PLAN 1001.03: Introduction to Community Design I and PLAN 1002.03: Introduction to Community Design II

OR

• CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity and CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
• MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
• STAT 1060.03: Introductory Statistics for Science and Health Sciences
• ERTH 1030.03: Introduction to Physical Geography
• ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics
• PLAN 1001.03 and PLAN 1002.03
• ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability and ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions

Common Core Courses - as listed for BSc Major, except:

• ENVS 2310.03: Energy and the Environment not required
• Choice of ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science or ENVS 3001.03: Environmental Science Field School

Community Design Courses

• PLAN 2001.03: Landscape Analysis
• PLAN 2002.03: Community Design Methods
• PLAN 2005.03: Community Design Context
• PLAN 3001.03: Landscape Ecology
• PLAN 3002.03: Reading the City
• PLAN 3005.03: Cities and the Environment in History
• PLAN 3006.03: Reading the Landscape
• An additional three credit hours in PLAN

BSc or BA (120 credit hour) Double Major in Environmental Science and another subject

The Double Major degree program allows students to combine a study of Environmental Science with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, the College of Sustainability or Community Design in the Faculty of Architecture and Planning. Environmental Science may be the
primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

A Co-op option is available for students enrolled in BSc Double Major with Environmental Science as the primary subject. See Co-operative Education Program.

Program Requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc or BA Double Major program in Environmental Science and another subject must complete the following (BSc requirements are listed first followed by those for a BA):

BSc Double Major, ENVS as primary or secondary subject

Students must complete the following:

1000 Level (to be taken the first year, if possible)

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

OR

- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement in their first year.

Also required but usually taken in the second year:

- ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics*

Common Core Courses as listed for BSc Major except:

- ENVS 2310.03: Energy and the Environment is not required
- Choice of ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science or ENVS 3001.03: Environmental Science Field School

BA Double Major, ENVS as primary or secondary subject

1000 Level

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a first year science subject chosen from BIOL, CHEM, PHYC, ERTH, ECON
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

2000 Level

- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- Six credit hours chosen from:
  - BIOL 2003.03: Diversity of Life I
  - BIOL 2004.03: Diversity of Life II
  - BIOL 2060.03: Introductory Ecology
3000 and 4000 Level

- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II*
- ENVS 4001.03: Environmental Impact Assessment
- At least six additional credit hours from:
  - Any additional 3000 or 4000 level ENVS courses
  - BIOL 3060.03: Environmental Ecology
  - BIOL 3061.03: Communities and Ecosystems
  - BIOL 4160.03: Political Ecology

*If ESS is the A subject ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory is waived, and should be replaced with another ENVS course at or above the 3000 level.

**BSc or BA (120 credit hour) Combined Honours in Environmental Science and another subject**

Students who wish to study Environmental Science in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Environmental Science may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Environmental Science, this requirement is satisfied through ENVS 4901.03 and ENVS 4902.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Environmental Science as the primary subject. See Co-operative Education Program.

**Program Requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc or BA Combined Honours program in Environmental Science and another subject must complete the following (BSc requirements are listed first followed by those for a BA):

**BSc Combined Honours in Environmental Science and another subject**

**ENVS as primary or secondary subject**

**1000 Level (to be taken in first year, if possible)**

- SCIE 1505.18: Integrated Science or (1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

OR

- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
• CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
• ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
• ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement and/or their writing requirement in their first year.

Also required but normally taken in the second year:

• ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics

**Common Core Courses as listed for BSc Concentrated Honours except:**

• ENVS 2310.03: Energy and the Environment not required
• Choice of ENVS 2000.03: Urban Field School or or ENVS 2500.03 Field Methods in Environmental Science or ENVS 3001.03: Environmental Science Field School

If ENVS is the primary subject: a minimum of six additional credit hours of ENVS or ENVS-equivalent courses, which may be ENVS 4901.03/ENVS 4902.03 (Honours Thesis and Qualifying Exam).

If ESS (Environment, Sustainability and Society) is the primary subject, ENVS 3502.03: Environmental Problem Solving II is waived and should be replaced with another ENVS course at or above the 3000 level.

**BA Combined Honours in Environmental Science and another subject**

Requirements are the same for ENVS as primary or secondary subject. Students must complete the following:

**1000 Level**

• ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
• ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
• Six credit hours in a single first-year science subject chosen from BIOL, CHEM, PHYC, ERTH, ECON
• STAT 1060.03: Introductory Statistics for Science and Health Sciences

**2000 Level**

• ENVS 2000.03: Urban Field School or ENVS 2500.03: Field Methods in Environmental Science
• ENVS 2100.03: Environmental Informatics
• Six credit hours chosen from:
  o BIOL 2003.03: Diversity of Life
  o BIOL 2004.03: Diversity of Life II
  o BIOL 2060.03: Introductory Ecology
  o GEOG 2800.03: Climate Change
  o CHEM 2505.03
  o OCEA 2000.06: The Blue Planet
  o ECON 2216.03: Economics of Global Warming
  o ERTH 2410.03: Environmental Issues in Earth Sciences
  o ENVS 2310.03: Energy and the Environment
  o PHIL 2480.03: Environmental Ethics

**3000 and 4000 Level**

• ENVS 3200.03: Introduction to Environmental Law
• ENVS 3501.03: Environmental Problem Solving I
• ENVS 3502.03: Environmental Problem Solving II*
• ENVS 4001.03: Environmental Impact Assessment
• At least six additional credit hours from:
  o Any ENVS course
  o BIOL 3060.03: Environmental Ecology
If ENVS is the primary subject, a minimum of six additional credit hours of ENVS or ENVS equivalent courses, which may be ENVS 4901.03, ENVS 4902.03 (Honours Thesis and Qualifying Exam).

*If ESS is the primary subject, ENVS 3502.03: Environmental Problem Solving II is waived and should be replaced with another ENVS course at or above the 3000 level.

**BSc (120 credit hour) Concentrated Honours in Environmental Science**

Students who want a challenging program resulting in a broad background in Environmental Science, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Environmental Science or Environmental Science Equivalent Courses with a minimum GPA of 3.0, and each ENVS and ENVS Equivalent Course above the 1000-level must be passed with a grade of "C" or better. Honours students write a research-based Honours thesis and the Honours Qualifying Examination requirement is satisfied through completion of ENVS 4901.03 and ENVS 4902.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Environmental Science. See Co-operative Education Program.

**Admission to Honours**

Students must apply for admission to Honours programs. Students considering Honours in Environmental Science should consult with an Environmental Science Advisor early in their studies. To be admitted, students must have a minimum GPA of 3.5 in all ENVS courses. More information on applying to the Environmental Science Honours program can be found at www.dal.ca/environmentalscience.

**Program Requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc Concentrated Honours program in Environmental Science must complete the following:

1. 1000 level courses (below)
2. Common Core courses (Honours) (below)
3. ENVS 4901.03 and ENVS 4902.03 (Honours thesis and Qualifying Exam)
4. An additional 12 credit hours of ENVS or ENVS-equivalent courses at or above the 2000 level

**1000 Level**

- SCIE 1505.18: Integrated Science or Integrated Science I and II (SCIE 1506.09 and 1507.09) and (CHEM 1011.03 and CHEM 1012.03) and (MATH 1000.03 or MATH 1215.03)

**OR**

- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- ERTH 1080.03: Geology I
- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)

Students are encouraged to take three credit hours of their Language and Humanities requirement and/or their writing requirement in their first year.

The courses listed above should be taken in the first year, if possible, if ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability and ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions are not taken in the first year, it should be taken in the second year.
Also required but usually taken in the second year.

- ECON 1101.03: Principles of Microeconomics* or ECON 1102.03: Principles of Macroeconomics*

**Common Core Courses**
Completed at various times over a four year degree program, the Common Core Courses introduce students to the scope and magnitude of Environmental Science and are designed to provide students with an appreciation of the scientific, historic, legal and social aspects of environmental issues.

- STAT 2080.03: Statistical Methods for Data Analysis and Inference*
- BIOL 2060.03: Introductory Ecology
- PHIL 2480.03: Environmental Ethics**
- ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
- ENVS 2100.03: Environmental Informatics
- ENVS 2310.03: Energy and the Environment
- ENVS 3001.03: Environmental Science Field School
- ENVS 3100.03: Environmental Analytics
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3500.03: Geoscience Information Management
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3601.03: Global Biogeochemical Cycles
- ENVS 4001.03: Environmental Impact Assessment
- ENVS 4100.03: Environmental Science Capstone

*STAT 2080.03: Statistical Methods for Data Analysis and Inference and ECON 1101.03: Principles of Microeconomics or ECON 1102.03: Principles of Macroeconomics together satisfy the College of Arts and Science requirement for six credit hours in social science.

**PHIL 2480.03: Environmental Ethics satisfies half of the College of Arts and Science requirement for six credit hours in Language and Humanities.

**BA (120 credit hour) Concentrated Honours in Environmental Science**

BA Concentrated Honours in Environmental Science

Students who want a challenging program resulting in a broad background in Environmental Science, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Environmental Science or Environmental Science Equivalent Courses with a minimum GPA of 3.0, and each ENVS and ENVS Equivalent Course above the 1000-level must be passed with a grade of "C" or better. Honours students write a research-based Honours thesis and the Honours Qualifying Examination requirement is satisfied through completion of ENVS 4901.03 and ENVS 4902.03.

**Admission to Honours**

Students must apply for admission to Honours programs. Students considering Honours in Environmental Science should consult with an Environmental Science Advisor early in their studies. To be admitted, students must have a cumulative GPA of 3.5 in the first two years of study. More information on applying to the Environmental Science Honours program can be found at [www.dal.ca/environmentalscience](http://www.dal.ca/environmentalscience).

**1000 Level**

- ENVS 1100.03: Foundations of Environmental Science: Ecosphere, Resources and Sustainability (grade of B- or higher)
- ENVS 1200.03: Current Environmental Challenges: Analysis and Solutions (grade of B- or higher)
- Six credit hours in a single first year science subject chosen from BIOL, CHEM, PHYC, ERTH, ECON
- STAT 1060.03: Introductory Statistics for Science and Health Sciences

**2000 Level**
• ENVS 2000.03: Urban Field School or ENVS 2500.03 Field Methods in Environmental Science
• ENVS 2100.03: Environmental Informatics
• Six credit hours chosen from:
  o BIOL 2003.03: Diversity of Life I
  o BIOL 2004.03: Diversity of Life II
  o BIOL 2060.03: Introductory Ecology
  o GEOG 2800.03: Climate Change
  o CHEM 2505.03
  o OCEA 2001.03: The Blue Planet I
  o OCEA 2002.03: The Blue Planet 2
  o ECON 2216.03: Economics of Global Warming
  o ERTH 2410.03: Environmental Issues in Earth Sciences
  o ENVS 2310.03: Energy and the Environment
  o PHIL 2480.03: Environmental Ethics

3000 and 4000 Level

• ENVS 3200.03: Introduction to Environmental Law
• ENVS 3501.03: Environmental Problem Solving I
• ENVS 3502.03: Environmental Problem Solving II*
• ENVS 4001.03: Environmental Impact Assessment
• At least six additional credit hours from:
  o Any additional 3000 or 4000 level ENVS courses
  o BIOL 3060.03: Environmental Ecology
  o BIOL 3061.03: Communities and Ecosystems
  o BIOL 4160.03: Political Ecology

*If ESS is the A subject ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory is waived, and should be replaced with another ENVS course at or above the 3000 level.

Minor in Environmental Science
This Minor is available to students registered in a 120-credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA 90-credit hour degree with Minor in Environmental Science is appropriate for students who want to study some Environmental Science but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Environmental Science. A 90-credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120-credit hour Major or Honours degree at a later date.

The 90-credit hour BSc or BA in Environmental Science is usually the preferred option for students who wish to combine studies in Environmental Science with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).

Minor requirements:
• ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
• A minimum of 18 credit hours in Environmental Science (ENVS) courses at the 2000 level or higher to a maximum of 36 credit hours. A maximum of 6 credit hours may be ENVS-equivalent.

*Please note that upper level Environmental Science (ENVS) courses have prerequisite requirements.

Minor in Environmental Studies
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

BA Minor
BA students must take 12 credit hours of required courses and 18 elective credit hours from the list of approved courses below. The following rules apply to the selection of courses for the Minor:

- A maximum of three credit hours in the Major subject (e.g. a course beyond those required for the Major) can count instead toward the Minor.
- At least six credit hours from the Approved Electives list must be in FASS courses and at least six credit hours must be from Science Approved Electives courses.
- In addition to ENVS 3200.03: Introduction to Environmental Law, at least nine credit hours must be at the 3000 level or above.

**Required Courses:**

- ENVS 1000X/Y.06: Introduction to Environmental Science or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3200.03: Introduction to Environmental Law

**BA Approved Electives in Environmental Studies:**
Additions to the following lists will be made, as relevant courses become available.

**Faculty of Science:**

- BIOL 2060.03: Introductory Ecology
- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction to Marine Life in Nova Scotia
- BIOL 3060.03: Environmental Ecology
- BIOL 3061.03: Communities and Ecosystems
- BIOL 3225.03: Plants in the human landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3615.03: Methods in Ecology
- BIOL 4065.03: Sustainability and Global Change
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ERTH 2410.03: Environmental and Resource Geology I
- ERTH 3500.03: Geoscience Information Management
- GEOG 2800.03: Climate Change
- MARI 4665.03: Hacking the Blue Planet
- OCEA 2001.03: The Blue Planet I
- OCEA 2002.03: The Blue Planet II
- OCEA 2800.03: Climate Change
- PHYC 2451.03: Astronomy I: The Sky and Planets
- PHYC 2800.03: Climate Change
- ENVS 2100.03: Environmental Informatics
- ENVS 2310.03: Energy and the Environment
- ENVS 3000.03: Environmental Science Internship
- ENVS 3100.03: Environmental Analytics
- ENVS 3210.03: Environmental Law II: Natural Justice and Unnatural Acts
- ENVS 3220.03: International Environmental Law for Scientists
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3400.03: Human Health and Sustainability
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory
- ENVS 3702.03: Sustainable Industries
- ENVS 4001.03: Environmental Impact Assessment
- ENVS 4004.03: Pathways to Sustainable Energy
• ENVS 4100.03: Environmental Science Capstone

Faculty of Arts and Social Sciences (FASS):

• CTMP 3000.06: Science and Culture
• CTMP 3150.03: Nature and History
• CTMP 3210.03: Intersecting Bodies, Selves and Environments
• CTMP 3411.03: Studies in Contemporary Science and Technology
• EMSP 2310.03: Women and Gender in Early Modern Science
• EMSP 2330.03: Nature Imagined
• EMSP 3000.06: The Study of Nature in Early Modern Europe
• ENGL 4005.03: Green Reading: Nature, Culture, Canada
• ENGL 4400.03: Nature of America
• HSTC 3000.03: The Scientific Revolution
• HSTC 4000.06: Science and Nature in the Modern Period
• HSTC 4300.03: Nature and Romanticism
• HIST 3073.03: History of Marine Sciences
• HIST 3210/CANA 3020/GEOG 3020.03: Canadian Cultural Landscapes
• HIST 3302.03: Technology and History in North America
• HIST 3370.03: North American Landscapes
• HIST 3750.03: History of Seafaring
• HIST 4271.03: The Fisheries of Atlantic Canada - Society and Ecology in Historical Perspective
• HIST 4350.03: People and Things - Material Culture
• INTD 2001.03: Introduction to Development I
• INTD 2002.03: Introduction to Development II
• INTD 3002.03: Seminar in Development: Development Practice
• INTD 3114.03: Environment and Development
• INTD 3304.03: Sustainable Development in Cuba
• INTD 4013.03: Environmental Conflict & Security
• PHIL 2475.03: Justice in Global Perspective
• PHIL 2485.03: Technology and the Environment
• PHIL 3670.03: Philosophy of Science
• PHIL 4120.03: Theory of Rational Decision-Making
• POLI 3585.03: Politics of the Environment
• POLI 4228.03: Interest Groups
• POLI 4380.03: Politics of Climate Change
• SOSA 2100.06: Environment and Culture
• SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America
• SOSA 3190.03: Social Movements
• SOSA 3200.03: Environment and Society
• SOSA 3220.03: Coastal Communities
• SOSA 4210.03: Tourism and Development
• SPAN 2070.03: Area Studies on Mexico and Central America
• GWST 3310.03: Gender and Development in Africa

Other Electives

• PLAN 2001.03: Landscape Analysis
• PLAN 3001.03: Landscape Ecology
• PLAN 3002.03: Reading the City
• PLAN 3005.03: Cities and the Environment in History
• PLAN 3010.03: Urban Ecology
• PLAN 3020.03: Landscape Design
• PLAN 4106.03: Transportation Planning

BACSc, BSc, BCSc, BInf, BComm, BMgmt Minor
Students in these programs must take 18 credit hours of required courses, plus 12 credit hours from the approved list of elective courses below. Note: In planning their programs students must take into account the prerequisites which apply to many of the elective courses listed below. The following rules apply to the selection of courses for the Minor:

- No course can fulfill a requirement of both the Major or Honours subject and the Minor.
- A maximum of three credit hours in the Major/Honours subject (e.g. a course beyond those required for the Major/Honours) can count toward the Minor.
- At least three credit hours beyond the required courses must be at the 3000 level or above.

Additions to the Electives list will be made as relevant courses become available.

**Required Courses:**

- ENVS 1000X/Y.06: Introduction to Environmental Science or ENVS 1100.03: Foundations of Environmental Science
- ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3200.03: Introduction to Environmental Law

Electives (12 credit hours from the list):

- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction the Marine Life of Nova Scotia
- BIOL 3063.03: Resource Ecology
- BIOL 3225.03: Plants in the Human Landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3xxx.03: Any ecology-related course at 3000-level or above
- BIOL 4065.03: Sustainability and Global Change
- BIOL 4104.03: Environmental Microbiology
- BIOL 4160.03: Political Ecology
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- CHEM 4595.03: Atmospheric Chemistry
- CTMP 3210.03: Intersecting Bodies, Selves and Environment
- CTMP 3220.03: The Aesthetics of Nature
- ERTH 2203.03: Sediments and Sedimentary Rocks
- ERTH 2410.03: Environmental and Resource Geology I
- ERTH 3302.03: Quaternary Sedimentary Environments
- ERTH 3400.03: Fundamentals of Hydrogeology
- ERTH 3402.03: Practical Hydrogeology
- ERTH 3410.03: Environmental Geology 2
- ERTH 3420.03: Geochemistry of Aquatic Environments
- ERTH 3440.03: Geomorphology
- ERTH 3500.03: Geoscience Information Management
- ERTH 4450.03: Introduction to Landscape Simulation
- ERTH 4502.03: Micropaleontology and Global Change
- ERTH 4520.03: GIS Applications to Environmental and Geological Sciences
- ERTH 4530.03: Environmental Remote Sensing
- ECON 2210.03: Emerging Giants: the Economic Rise of China and India
- ECON 2216.03: Economics of Global Warming
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ENVS 2100.03: Environmental Informatics
- ENVS 2310.03: Energy and the Environment
- ENVS 3000.03: Environmental Science Internship
- ENVS 4210.03: Administrative Environmental Law: Natural Justice and Unnatural Acts
- ENVS 3220.03: International Law for Environmental Scientists
- ENVS 3225.03: Plants in the Human Landscapes
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3301.03: Enterprise Sustainability
- ENVS 3400.03: Human Health and Sustainability
- ENVS 3500.03: Geoscience Information Management
- ENVS 3615.03: Methods in Ecology
- ENVS 3632.03: Applied Field Methods in Fish Ecology
- ENVS 3801.03: Directed Readings in Environmental Science
- ENVS 3702.03: Sustainable Industries
- ENVS 4001.03: Environmental Impact Assessment
- ENVS 4100.03: Environmental Science Capstone
- ENVS 4004.03: Pathways to Sustainable Energy
- GEOG 2800.03: Climate Change
- HIST 3370.03: North American Landscapes
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- INTD 3304.03: Sustainable Development in Cuba
- MARI 4665.03: Hacking the Blue Planet
- MICI 4104.03: Environmental Microbiology
- OCEA 2001.03: The Blue Planet I
- OCEA 2002.03: The Blue Planet II
- OCEA 2800.03: Climate Change
- OCEA 4110.03: Introduction to Geological Oceanography
- OCEA 4120.03: Introduction to Physical Oceanography
- OCEA 4130.03: Introduction to Chemical Oceanography
- OCEA 4140.03: Introduction to Biological Oceanography
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2485.03: Technology and the Environment
- PHYC 2310.03: Energy and the Environment
- PHYC 2451.03: Astronomy I: The Sky and Planets
- PHYC 2800.03: Climate Change
- PLAN 2001.03: Landscape Analysis
- PLAN 3001.03: Landscape Ecology
- PLAN 3002.03: Reading the City
- PLAN 3005.03: Cities and the Environment in History
- PLAN 3010.03: Urban Ecology
- PLAN 3020.03: Landscape Design
- PLAN 4106.03: Transportation Planning
- POLI 3380.03: Politics of Climate Change
- POLI 3385.03: Politics of the Environment
- POLI 3589.03: Politics of the Sea I
- POLI 3590.03: Politics of the Sea II
- SOSA 2100.06: Environment and Culture
- SOSA 3200.03: Environment and Society
- SOSA 3211.03: Continuity and Change in Rural Society
- SOSA 3220.03: Coastal Communities in the North Atlantic

**BCD Minor**

The Minor in Environmental Studies is a 30 credit hour Minor taken in conjunction with the Bachelor of Community Design Honours (It is not available within the three year BCD program). The Minor in Environmental Studies provides a student with an appreciation of the scientific, cultural, economic, historic, legal and social aspects of environmental issues. The student will have the opportunity to earn an additional credential on the degree to recognize the special concentration of courses in environmental studies. Approval for the program is required from the School of Planning and from the Coordinator of Environmental Programs. Students complete all requirements for their Honours Major in addition to these required courses for the minor. Students may count the course ENVS 1000 towards both the BCD requirements and towards the requirement for the Minor. Other courses cannot be counted towards both sets of requirements.
**Required Courses:**

- ENVS 1000.06: Introduction to Environmental Studies (or DISP) or ENVS 1100.03: Foundations of Environmental Science and ENVS 1200.03: Current Environmental Challenges
- PHIL 2480.03: Environmental Ethics
- ENVS 3200.03: Environmental Law
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03 Environmental Problem Solving II

**Elective requirements:**

12 credit hours of courses from the following list:

- BIOL 2605.03: Introduction to Marine Life of Nova Scotia
- BIOL 3601.03: Nature Conservation
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- ECON 2216.03: Economics of Global Warming
- ECON 2336.03: Regional Development
- ECON 3332.03: Resource Economics
- ENVS 3000.03: Environmental Science Internship
- ENVS 3200.03: Introduction to Environmental Law
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3301.03: Enterprise Sustainability
- ENVS 3220.03: International Environmental Law for Scientists
- ENVS 3400.03: Environment and Human Health
- ENVS 3500.03: Exploring Geographic Information Systems
- ENVS 4001.03: Environmental Impact Assessment
- ESMP 2330.03: Nature Imagined
- ESMP 3000.06: The Study of Nature in Early Modern Europe
- ERTH 3302.03: Quaternary Sedimentary Deposits
- ERTH 3440/GEOG 3440: Geomorphology
- HIST 3370.03: North American Landscapes
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- MARI 4665.03: Hacking the Blue Planet
- OCEA 2001.03: The Blue Planet I
- OCEA 2002.03: The Blue Planet II
- OCEA 2800.03: Climate Change
- OCEA 3001.03: Introduction to Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- PHIL 2485.03: Technology and the Environment
- POLI 3385.03: Politics of the Environment
- POLI 3589.03: Politics of the Sea I
- SOSA 2100.06: Environment and Culture
- SOSA 3200.03: Environment and Society
- SOSA 3211.03: Continuity and Change in Rural Society
- SOSA 3220.03: Coastal Communities in the North Atlantic
- SOSA 4072.03: Naturalistic Approaches to the Social Sciences
- STAT 3345.03: Environmental Risk Assessment

**Co-op, Minors, Certificates and Engineering Concurrent Programs for Students**
Co-operative Education Program (Science Co-op) in Environmental Science

Co-op Academic Advisor: Dr. Tarah Wright tarah.wright@dal.ca

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Environmental Science, or in Combined Honours or Double Major programs with Environmental Science as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Environmental Science Co-op Academic Advisor and from the Co-operative Education office http://www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Environmental Science, please see www.dal.ca/environment.

Minors available to students in Environmental Science

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Environmental Science may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc or BA in Environmental Science, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements.

Certificates of particular interest to student enrolled in a BSc or BA in Environmental Science include:

- Certificate in Animal Behaviour
- Certificate in Environmental Impact Assessment
- Certificate in Geographic Information Science
- Certificate in Science Leadership and Communication

Environmental Science Approved Courses from other departments

Agriculture

- AGRI 4001: Agriculture, Food and Well-being
- APSC 4005: Watershed Management & Environmental Restoration

Biology

- BIOL 2060: Intro Ecology
- BIOL 3036: Transgenic Organism
- BIOL 3060: Environmental Ecology
• BIOL 3061: Communities and Ecosystems
• BIOL 3063: Resource Ecology
• BIOL 3065: Conservation Biology
• BIOL 3329: Applied Entomology
• BIOL 3602: Introduction to Aquaculture
• BIOL 3601: Nature Conservation
• BIOL 3620: Field Survey of Terrestrial Biodiversity
• BIOL 3623: Applied Coastal Ecology
• BIOL 3640: Tropical Ecology and Biodiversity Field Class
• BIOL 3666: Species Invasions
• BIOL 4065: Sustainability and Global Change
• BIOL 4160: Political Ecology
• BIOL 4664: History of Marine Science

Chemical Engineering

• ENVE 4772: Environmental Assessment and Management

Chemistry

• CHEM 4595: Atmospheric Chemistry

Contemporary Studies

• CTMP 2203: Bio-Politics: Human Nature in Contemporary Thought
• CTMP 3000.06: Science and Culture

Economics

• ECON 2216: The Economics of Climate Change
• ECON 2334: Perspectives in Economic Development
• ECON 2850: The Science and Economics of Climate Change

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non-credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year's offering. For further information please contact the department, or visit the department's website.

Course Descriptions

**ENVS 1100 Foundations of Environmental Science: Ecosphere, Resources & Sustainability**
CREDIT HOURS: 3
This course introduces students to key topics in Environmental Science including science literacy, environmental ethics, principles of ecology, evolution, biodiversity, human population growth, soil, agriculture, forestry, and oceans and freshwater systems. Tutorials reinforce and supplement lectures and allow for small group discussion and debate.
EXCLUSIONS: ENVI 1100.06, ENVS 1000.06, MGMT 1702.03
FORMATS: Lecture | Tutorial

**ENVS 1200 Current Environmental Challenges: Analysis and Solutions**
CREDIT HOURS: 3
This course introduces current issues and challenges in Environmental Science including air pollution and climate change, non-renewable and renewable energy, waste, urbanization, environmental law, and sustainability and education. Tutorials reinforce and supplement lectures and allow for small group discussion and debate.
EXCLUSIONS: ENVI 1100.06, ENVS 1000.06, MGMT 1702.03
FORMATS: Lecture | Tutorial

**ENVS 2000 Urban Field School**
CREDIT HOURS: 3
This field course offers an introduction to urban environmental science by examining the role of humans in ecosystems and how humans change ecosystem processes and functions within urban areas. Students gain hands-on experience in environmental science techniques during excursions in different urban settings within the Halifax Regional Municipality.
CALENDAR NOTES: Offered in early May. Daily field trips and/or labs. An auxiliary fee is charged to cover field expenses.
PREREQUISITES: ENVS 1000.06 or SCIE 1505.18 or ENVS 1100.03 and ENVS 1200.03, or equivalent and open only to students in the BSc or BA Environmental Science Programs
FORMATS: Lecture | Lab
ENVS 2100 Environmental Informatics
CREDIT HOURS: 3
Environmental Informatics is the knowledge, skills and tools which enable information to be collected, managed and disseminated to support research in environmental science. Students develop analytical skills using a variety of software including spatial querying in GIS. Identification of fallacies in the media and effective science communication are introduced and applied to current environmental issues.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03, and STAT 1060.03
FORMATS: Lecture | Lab

ENVS 2310 Energy and the Environment
CREDIT HOURS: 3
The physical principles and limitations of renewable energy source utilization and energy conversion. A quantitative introduction to energy conversion and storage systems, including solar power and heating, wind, tidal, geothermal, hydroelectric, nuclear power, hydrogen technology, electrical and mechanical energy storage. The input of these energy options on the global climate and environment will be discussed.
PREREQUISITES: PHYC 1190.03/1290.03 or PHYC 1300X/Y.06 or CHEM 1011.03/1012 and MATH 1000.03 or MATH 1215.03 or permission of the instructor.
CROSSLISTED: PHYC 2310.03
EXCLUSIONS: Students who have previously taken PHYC 3330 can not take PHYC 2310.
FORMATS: Lecture

ENVS 2410 Environmental Issues in Earth Sciences
CREDIT HOURS: 3
Geology underlies many of the environmental problems facing humanity today. Topics include environmental aspects of energy and mineral resource, geologic hazards, geologic connections to pollution and waste disposal, and the role that water plays in its various guises. Canadian examples are incorporated where appropriate. Approved with Canadian Studies.
CALENDAR NOTES: This course is not offered every year. Please consult department in the spring for further information.
PREREQUISITES: One of: ERTH 1080, ERTH/GEOG 1030, ERTH/GEOG 1060, ENVS 1100.03 and ENVS 1200.03, or ENVS 1000.06, SUST 1001 with a grade of B or above, or DISP with Earth Sciences
CROSSLISTED: CANA 2410.03, ERTH 2410.03
EXCLUSIONS: This class does not count toward a Major or Honours in Earth Sciences
FORMATS: Lecture

ENVS 2500 Field Methods in Environmental Science
CREDIT HOURS: 3
A field-based immersion into environmental field sampling methods. Students gain skills in flora and fauna identification and inventory, assessment of ecosystem health, and sampling methods for air and soil. GPS, GIS, and basic remote sensing skills are utilized in sampling design, collection and visualization of results.
CALENDAR NOTES: Includes a number of field trips. An auxiliary fee is charged to cover field expenses.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03, (or ENVS 1000.06)
RESTRICTIONS: Restricted to students in BSc and BA Environmental Science programs
FORMATS: Lab

ENVS 3000 Environmental Science Internship
CREDIT HOURS: 3
This course allows students to gain hands-on experience while addressing a question of personal and academic interest relevant to the field of environmental science by working as interns for 8 hours a week over a twelve-week period on a specific project at a sponsoring agency.
CALENDAR NOTES: It is the student's responsibility to consult with Environmental Program at least 3 weeks prior to the term in which the internship will take place to arrange for a placement and to make sure that the details of the internship are in accordance with university standards.
PREREQUISITES: Open ONLY to students in Minor in Environmental Studies, Honours/Major/Double Major/Combined Honours in Environmental Science. Minimum GPA of 3.0 or permission of instructor required to register.

ENVS 3001 Environmental Science Field School
CREDIT HOURS: 3
Daily field trips introduce methods used in environmental science and environmental processes at diverse sites within Nova Scotia. Involves full-day trips from Halifax and a multi-day camping trip away from Halifax. Offered during the last 2 weeks before Labour Day.
PREREQUISITES: ENVS 2100 and must be an ENVS student
ENVS 3100 Environmental Analytics
CREDIT HOURS: 3
This course takes a hands-on approach to data analysis to support environmental conservation. Topics include experimental design, spatial pattern analysis, visualization of 3D data, ecological modelling, and animated mapping of time series data. Emphasis is placed on learning skills directly applicable to conducting environmental research in a variety of settings.
PREREQUISITES: ENVS 2100.03 and STAT 2080.03
FORMATS: Lecture | Tutorial

ENVS 3200 Introduction to Environmental Law
CREDIT HOURS: 3
This course will take a look at how environmental law operates in Nova Scotia within the Federal framework and it will illustrate some of the multidisciplinary aspects which make this area of law part science, part art and part soothsaying.
PREREQUISITES: Must be a third year student
FORMATS: Lecture

ENVS 3225 Plants in the Human Landscape
CREDIT HOURS: 3
The use of plants for human recreation and aesthetic purposes in gardens, public parks, suburban and urban landscapes. Topics include: history of gardens, garden design, plant materials, edible landscaping, plants and human health. The course includes field trips and group work and students complete a design project.
PREREQUISITES: BIoL 1010.03 or BIOL 1020.03 (C+ or better) and BIOL 1011.03 or BIOL 1021.03 (C+ or better) or DISP or PLAN 2001.03
CROSSLISTED: PLAN 3225, BIOL 3225
FORMATS: Lecture | Tutorial

ENVS 3226 Economic Botany, Plants and Civilization
CREDIT HOURS: 3
The story of the human use of plants for food, fibre and fuel including the botany, domestication, development, distribution, production, processing, history, economic and social impacts of the major world crops (cereals, fruits, vegetables, flowers and industrial crops) and the importance of plants in medicine and conservation.
PREREQUISITES: A grade of C+ or higher in BIOL 1010.03 or (BIOL 1020.03 or BIOA 1002.03 or BIOL 1030.03) and BIOL 1011.03 or (BIOL 1021.03, BIOA 1003.03, or BIOL 1031.03); or SCIE 1505.18
CROSSLISTED: BIOL 3226.03
FORMATS: Lecture | Lab

ENVS 3300 Contaminated Site Management
CREDIT HOURS: 3
Scientists, engineers and planners should have a basic understanding of the issues surrounding environmental site assessment given the potential environmental and socio-economic impacts. Topics include phased assessments, risk assessment, remediation and monitoring. Case studies, projects, guest speakers and field trips augment the class.
PREREQUISITES: CHEM 1011.03 and 1012.03 (or equivalent) AND ERTH 1080.03; OR permission of the instructor
RESTRICTIONS: Restricted to 3rd year students and above or permission of instructor.
FORMATS: Lecture

ENVS 3400 Environment and Human Health
CREDIT HOURS: 3
This course examines the relationships between the health of populations and health determinants in the context of environmental sustainability. Weekly laboratory exercises will teach students how geomatics (GIS, GPS, and remote sensing technologies) and epidemiological tools can be used to assess the links between the health of human populations and the health of the environment, and how to use these tools for environmental health research.
PREREQUISITES: Must be a third year student or have permission of instructor
CROSSLISTED: GEOG 3400.03
FORMATS: Lecture | Lab

ENVS 3500 Geoscience Information Management
ENVS 3501 Environmental Problem Solving I
CREDIT HOURS: 3
This course introduces students to concepts and methods for analyzing environmental problems. Students will learn analytical approaches for problem solving that are appropriate for a wide range of environmental issues and apply these to the analysis of case studies.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 (with a grade of B- or higher in each) or SUST 1000.06 or SUST 1001.06 (with a grade of B- or higher). Must be a 3rd year student OR have permission of instructor.

ENVS 3502 Environmental Problem Solving II: The Campus as a Living Laboratory
CREDIT HOURS: 3
In this course the campus serves as a living laboratory for identifying, evaluating and assessing indicators of progress toward greater campus sustainability. Working in groups, students apply problem solving models to case studies using qualitative and quantitative research methods and make recommendations for improvements on campus based on their analyses.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 (with a grade of B- or higher in each) or SUST 2000.06 or SUST 2001.06. Must be a 3rd year student OR have permission of instructor.
CROSSLISTED: SUST 3502.03
EXCLUSIONS: MGMT 3701.03 SUST 3701.03

ENVS 3601 Global Biogeochemical Cycles
CREDIT HOURS: 3
An interdisciplinary course that examines example global cycles of water, carbon, nitrogen, phosphorus, and sulphur, and human impacts on these cycles, as manifested in our atmospheric, soil, ocean and freshwater environments. This course involves discussion of the latest developments in this rapidly changing field and will provide a framework for those interested in global change.
PREREQUISITES: CHEM 1011.03/ CHEM 1012.03 or equivalent, and one of ENVS 1100.03, SUST 1001.03, ERTH 1080.03, or (SCIE 1506.09 or SCIE 1507.09) and completion of 2 years of an undergraduate degree.
CROSSLISTED: ERTH 3601.03

ENVS 3615 Methods in Ecology
CREDIT HOURS: 3
See course description for BIOL 3615 in the Biology section of the calendar.

ENVS 3623 Applied Coastal Ecology
CREDIT HOURS: 3
See course description for BIOL 3623 in the Biology section of the calendar.

ENVS 3624 Urban Freshwater Systems
CREDIT HOURS: 3
See course description for BIOL 3624 in the Biology section of the calendar.

ENVS 3632 Applied Field Methods in Fish Ecology
CREDIT HOURS: 3
See course description for BIOL 3632 in the Biology section of the calendar.
FORMATS: Lecture | Lab

ENVS 3633 Spatial Information and GIS in Ecology
CREDIT HOURS: 3
A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.
CALENDAR NOTES: Offered in the summer through SEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration
ENVS 3664 Intertidal Ecology and Diversity
CREDIT HOURS: 3
See course description for BIOL 3664 in the Biology section of the calendar.

ENVS 3700 Earth Resources, Sustainability, and Society
CREDIT HOURS: 3
This course addresses the question: What do we need to know and understand about the nature and distribution of geologic resources to optimally reconcile mineral extraction with society’s needs, considerations of the environment, and the sustainable development goals in a more sustainable, geoethical, and balanced approach, through the 21st century.
CALENDAR NOTES: Aimed as an elective course for majors in Earth Sciences and in Environmental Sciences. Must be third year students.
PREREQUISITES: ERTH 1080
CROSSLISTED: GEOG 3700 ERTH 3700
RESTRICTIONS: E1 and E2
FORMATS: Lecture | Seminar | Discussion | Other (explain in comments)

ENVS 3701 Fundamentals of Hydrology
CREDIT HOURS: 3
This course is an introduction to hydrology, emphasizing surface processes and watershed responses. In this course we learn about both the pure and applied uses of hydrology. The course is quantitative and introduces hydrologic processes in the atmosphere, on the land surface, in groundwater and in stream channels.
PREREQUISITES: MATH 1000.03 or MATH 1215.03 and one of ENVS 1000.06 or ENVS 1100.03 and ENVS 1200.03, SUST 1001.06, ERTH 1080.03, or ERTH 1090.03 or one of SCIE 1515X/Y.21, SCIE 1530.27, SCIE 1540X/Y.33 and completion of 2 years of an undergraduate degree. PHYC 1280 and PHYC 1290.03 (or PHYC 1300X/Y.06) and MATH 1010.03 are recommended.
CROSSLISTED: ERTH 3701.03
FORMATS: Lecture | Tutorial

ENVS 3702 Sustainable Industries
CREDIT HOURS: 3
This course introduces concepts and methods for analyzing industrial sustainability through an interdisciplinary lens including economic, social and environmental considerations. The business case for industrial sustainability, the tools necessary to decouple economic growth of our business sectors from resource use and environmental degradation, and the role of sustainable industries in the sustainable development agenda are explored.
PREREQUISITES: (ENVS 1100.03 and ENVS 1200.03) or MGMT 1700.06 or ENVI 1100.06 or ENVS 1000.06 or SUST 2000.06 or SUST 2001.06 or (MGMT 1702.03 and MGMT 2702.03)
CROSSLISTED: MGMT 3702.03
FORMATS: Lecture

ENVS 3703 Ecology and Environmental Issues in the Bahamas
CREDIT HOURS: 3
This applied field course includes introductory lectures in Canada followed by a place-based field trip to the Cape Eleuthera Institute, Bahamas. Students will collect and analyze a wide spectrum of data related to environmental problems on the island and will consider and problematize various environmental solutions.
PREREQUISITES: ENVS 1100.03 and ENVS 1200.03 (with a grade of B- or higher in each) or SUST 1000.06 or SUST1001.06(with a grade of B- or higher). An introductory course in statistics (STAT 1060.03 or similar ) is recommended. Must be at least a 2nd year student OR have permission of the instructor.
RESTRICTIONS: E1 and E2
FORMATS: Lecture | Experiential Learning | Other (explain in comments)

ENVS 3801 Directed Readings in Environmental Science
CREDIT HOURS: 3
This course is intended for third and fourth-year students who wish to study in an area of environmental science not covered in other courses offered at the university. It involves independent study supervised by a faculty member. Class content and marking scheme must be approved by the Director of Environmental Programs during the first week of the academic term in which the credit is being sought. It is the student's responsibility to consult with Environmental Programs at least 2 weeks prior to the term in which the Directed Readings course will take place.
PREREQUISITES: ENVS 1000X/Y.06 or ENVS 2001.03 or (ENVS 1100.03 and ENVS 1200.03) and third year student status.

ENVS 4001 Environmental Impact Assessment  
CREDIT HOURS: 3  
This course provides an opportunity to explore all aspects of environmental impact assessment (EIA) as practiced in Canada and in other countries. The course traces the development of EIA over the past 30 years and critically examines the scientific, procedural and political dimensions.  
CALENDAR NOTES: All students taking BIOL 4001.03 or ENVS 4001.03 must have completed 90 credits and be in their fourth year of study or have permission of instructor.  
PREREQUISITES: ENVS 1000X/Y.06 or ENVS 1100.03 and ENVS 1200.03 or BIOL 2060.03 or ERTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or INTD 2002.03 or OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) or SUST 2000.06 or SUST 2001.06.  
CROSSLISTED: BIOL 4001.03  
FORMATS: Lecture | Tutorial

ENVS 4002 The Science of Wetland Ecosystems  
CREDIT HOURS: 3  
An interdisciplinary introduction to wetland ecosystems, with emphasis on the relationship between wetlands and the surrounding watershed. This relationship determines wetland type, function and in developed landscapes, wetland health. Inversely, wetland type, function and health can affect the developed landscapes. Students will gain an appreciation of the physical relationship through an examination of wetland hydrology, chemical cycling, and ecology. Management of wetlands in the landscape through policy and engineering will also be studied.  
PREREQUISITES: CHEM 1011.03/1012.03 or CHEM 1021.03/1022.03 and BIOL 2060.03  
CROSSLISTED: BIOL 4002.03  
FORMATS: Lecture

ENVS 4003 Coral Reefs and Environmental Change  
CREDIT HOURS: 3  
Coral reefs are iconic marine ecosystems both biologically and economically. This class introduces students to the biology of both tropical and cold-water corals, key characteristics of their abiotic environments, human impacts at both local and global scales, and management options for sustainable resource use and the protection of biodiversity.  
PREREQUISITES: Chem 1011/Chem 1012 and Biol 2060. Also restricted to students with 6 credit hours in Environmental Science or Biology or Marine Biology at or above the 3000 level.  
CROSSLISTED: MARI 4003  
RESTRICTIONS: Restricted to exclude E1, E2, E3.

ENVS 4004 Pathways to Sustainable Energy  
CREDIT HOURS: 3  
Students gain a practical understanding of how to move towards a low-carbon energy future. Students learn about international, national, and subnational policies that drive adoption of renewable energy, energy efficiency, and carbon capture and storage technologies and how the technologies work. The technological barriers to their widespread adoption and how to overcome these barriers are also discussed.  
PREREQUISITES: 4th year student, or have permission of instructor.  
CROSSLISTED: SUST 4004.03  
EXCLUSIONS: E1, E2, E3  
FORMATS: Lecture

ENVS 4100 Environmental Science Capstone  
CREDIT HOURS: 3  
Students apply the interdisciplinary knowledge they have acquired during their program of study to real world environmental issues. Students work individually and in groups in preparation towards a formal debate. They evaluate evidence from science, economics, philosophy and other ways of understanding the world to develop mastery and nuance among current environmental topics.  
PREREQUISITES: (ECON 1101.03 or ECON 1102.03), PHIL 2480.03, STAT 2080.03, ENVS 2100.03, ENVS 3200.03, and ENVS 3501. Must be a fourth year student.  
RESTRICTIONS: E1, E2, E3  
FORMATS: Seminar | Discussion

ENVS 4850 Geographic Information Science Research Project  
CREDIT HOURS: 3  
Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for
completion of the Certificate in GIS.

**COREQUISITES**: ERTH 5420.03/GEOG 4520.03
**PREREQUISITES**: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03 and permission of instructor
**CROSSLISTED**: BIOL 4850.03, SCIE 4850.03, ERTH 4850.03, GEOG 4850.03
**EXCLUSIONS**: Restricted to 3rd and 4th year students.
**FORMATS**: Lecture

---

**ENVS 4901 Honours Thesis Part A**

**CREDIT HOURS**: 3

Mastery of the basic skills of problem definition, proposal preparation and project implementation is the key to dealing with a wide range of "real-life" situations, both on and off the career path. Includes lectures and tutorials on proposal writing, research design and methodologies, and an independent environmental science research project carried out under the supervision of an approved faculty member. Required for Honours Environmental Science.

**PREREQUISITES**: Fourth year Environmental Science and permission of Instructor/Director
**FORMATS**: Lecture | Seminar

---

**ENVS 4902 Honours Thesis Project Part B**

**CREDIT HOURS**: 3

Independent research project carried out under the supervision of an approved faculty member or affiliated research scientists. Required for Honours Environmental Science.

**PREREQUISITES**: ENVS 4901.03 with a grade of B+ or higher

---

**ENVS 4950 Advanced Topics in Environmental Science**

**CREDIT HOURS**: 3

This course will address current interdisciplinary issues in environmental science with topics varying each semester. Details as to the content of the course will be announced by Environmental Programs at least one month in advance of the course offering. The course will be taught by Dalhousie faculty, and/or visiting scholars.

**PREREQUISITES**: This class is restricted to students in the Honours/Major/Double Major in Environmental Science, or permission of the Director of Environmental Programs.
**FORMATS**: Lecture | Seminar

---

**ENVS 8891 Co-op Work Term I**

**CREDIT HOURS**: 0

Co-op Work Term I. See Environmental Programmes for details.

---

**ENVS 8892 Co-op Work Term II**

**CREDIT HOURS**: 0

See Environmental Programmes for details.

---

**ENVS 8893 Co-op Work Term III**

**CREDIT HOURS**: 0

See Environmental Programmes for details.

---

**ENVS 8894 Co-op Work Term IV**

**CREDIT HOURS**: 0

See Environmental Programmes for details.

---

**First Year Interest Groups (FIGs)**

*a start for university success*
What is a FIG and why sign up?
A First Year Interest Group, or FIG, is a group of students who meet weekly for an hour during the fall term of their first year at Dal. Groups are composed of about 15 students who have similar academic interests or goals, and who are enrolled in one or more of the same first year courses.

FIGs are designed to complement the classroom experience. It’s a place to meet other first year students, and to discuss some of the big ideas emerging in your future field of study. Signing up for a FIG can help you get involved, meet people, and maybe even form lasting friendships. FIGs are free, informal, interactive groups that will help you make the most out of your first year at Dal.

What will you do in a FIG?
- Get to know other first year students with similar interests (maybe you’ll find a study partner)
- Meet Dal faculty or professionals who work in your area of interest
- Find out how to get involved (volunteer opportunities, events, clubs)
- Learn about future opportunities for students with your interests (scholarships, summer research, co-op, study abroad)
- Talk!

Who should enrol in a FIG?
Any student in the Faculty of Science who has been accepted as an undeclared Science student and is in their first year of studies can enrol in a FIG.

How do I enrol in a FIG?
You enroll in a FIG when you registered for your regular courses, using the same registration procedure. First, make sure that the time slot of the FIG doesn’t conflict with the lecture, lab or tutorial times of your other courses. Then register for the appropriate FIG section (FIGS 0001, 0002, etc.).

Does a FIG count toward my degree?
The FIG will appear on your academic transcript – it can be seen by future employers along with the credit courses you complete. However, because it is not for credit, a FIG does not count as part of the 90 or 120 credit hours you must complete for a BSc degree.

Will I receive a grade for my FIG?
If you complete the FIG, it will appear on your academic transcript with Pass noted beside it. Letter grades are not given for FIGs, and FIGs are not included in calculation of your GPA. However, to receive a Pass you must participate in the FIG sessions.

What if I don’t like my FIG?
We expect that most students will enjoy their FIG, and will feel that the time has been well spent. However, if for some reason you find that you do not want to participate in your FIG, you may withdraw. The FIG will then not appear on your transcript.

Can I sign up for more than one FIG?
No. We want to offer the opportunity to participate in a FiG to as many students as possible, and so students may not register in more than one FIG.

FIG options for science students

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department.
Course Descriptions

FIGS 0001 Psychology and Human Behaviour
CREDIT HOURS: 0
Psychology & Human Behaviour is a group for first year science students with interests in psychology, the brain, human behaviour and mental health. In this FIG, you will meet other first year students and will be able to explore your interests and learn about academic and extra-curricular opportunities. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science. FIGS courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King’s Foundation Year) who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0002 Neuroscience and the Brain
CREDIT HOURS: 0
Neuroscience and the Brain is a group for first year science students who are coming to Dal to learn about how the brain works and why that matters. In this FIG, you will meet other first year students and will be able to explore your interests and learn about academic and extra-curricular opportunities. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science. FIGS courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King’s Foundation Year) who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0003 Health and Medicine
CREDIT HOURS: 0
Health & Medicine is a group for first year science students who are coming to Dal to learn about human biology, physiology and/or disease and are interested in pursuing a career in medicine, medical research or another health profession. In this FIG, you will meet other first year students and will be able to explore your interests and learn about academic and extra-curricular opportunities. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science. FIGS courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King’s Foundation Year) who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0004 Oceans
CREDIT HOURS: 0
Oceans is a group for first year science students who are coming to Dal to learn more about oceans and ocean life, including marine conservation, climate change, ocean research, and the living organisms found in ocean environments. In this FIG, you will meet other first year students and will be able to explore your interests and learn about academic and extra-curricular opportunities. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science. FIG courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King’s Foundation Year) who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0005 Earth and Environment
CREDIT HOURS: 0
Who should register: You are coming to Dal with an interest in the natural world. You may want to focus your studies on how our world came to be as it is today – continental drift, mountain building, ice ages, river migration, paleobiology, or you may be most interested in how we as humans are changing that world – our impacts on climate, land, water and ecosystems. In this FIG, you will meet first year students with similar interests. You will have the opportunity to explore your interests and the options for shaping your academic pathway, with senior peers and with experts, all in a small group setting. Relevant Science programs: Earth Sciences, Environmental Science, Biology, Chemistry, Economics, Marine Biology, Physics, Statistics, Sustainability
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science as Undeclared Science majors or as BSc students in the College of Sustainability. FIG courses are zero credit hours, but will appear on the academic transcript if completed.
COREQUISITES: One Science course or SUST 1000
RESTRICTIONS: Restricted to UNDS or BSc (College of Sustainability) students with fewer than 16 credit hours.
FORMATS: Seminar
FIGS 0007 Innovation and Entrepreneurship in Science
CREDIT HOURS: 0
Innovation and Entrepreneurship is a group for first year students with an interest in how design thinking and innovation can lead to science or technology-based solutions for real world problems. In this FIG, you will meet other first year students and will have opportunities to explore your interests and opportunities together. We will talk about the creative process and design testing, and about opportunities to get involved in SURGE, Dalhousie’s Science sandbox, as well as the larger innovation ecosystem on campus. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science.
CALENDAR NOTES: For first year students enrolled in the Faculty of Science or Computer Science. FIG courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King’s Foundation Year) who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0008 Logic and Problem Solving
CREDIT HOURS: 0
Logic & Problem Solving is a group for first year students with an interest in mathematics, statistics or related areas of study such as economics or physics. In this FIG, you will meet first year students with similar interests. We will learn about how to approach mathematical problems, and we will work through challenges and puzzles of varying complexity and talk about math in the real world.
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science or Computer Science. FIG courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science (Undeclared Science, Integrated Science, Medical Science, King’s Foundation Year) or Computer Science students who have fewer than 16 credit hours.
FORMATS: Seminar

FIGS 0009 Navigate Your Science Degree
CREDIT HOURS: 0
This is a not-for-credit course for first year Science students. The class meets seven times throughout the winter semester leading up to the March course registration date. We start by matching you with career goals based on your interests. Throughout the seven workshop sessions you explore career options based on these interests, identify employable skills required for 21st century careers, and match these skills with academic courses, co-curricular experiences, work and volunteering opportunities.
CALENDAR NOTES: For first year students enrolled in the Faculty of Science. FIG courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King’s Foundation Year) who have fewer than 30 credit hours.

FIGS 0010 Indigenous Ways of Knowing
CREDIT HOURS: 0
This is a group for first year students who want to know more about the intersection between Science and Indigenous ways of knowing, as both a learner and participant. In this FIG you will meet first year students and have opportunities to explore concepts such as holistic approaches, life-long and land-based learning, and Indigenous medicine. We will also discuss ideas around reconciliation, relationships among communities, and how diversity and inclusion may be experienced in science. There will be guests, field trips, and activities.
CALENDAR NOTES: Note: For first year students enrolled in the Faculty of Science. FIG courses are zero credit hours, but will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students (Undeclared Science, Integrated Science, Medical Science, King’s Foundation Year) who have fewer than 16 credit hours.
FORMATS: Experiential Learning

FIGS 0101 FIG Action: Climate change
CREDIT HOURS: 0
In this First year Interest Group you will have the opportunity to work on a project together with other students where you explore CLIMATE CHANGE from the perspective of your interests in oceans, ecosystems, earth, energy, economics, innovation or research. Groups will be mentored by a faculty member and a senior student. These one hour Lunch and Learn sessions will run weekly, and are offered at no cost. They require no homework and are not for credit, but will appear as a PASS on your transcript if completed. A minimum of 5 students must register for the session to run.
CALENDAR NOTES: Can be taken together with FIGS 0009
RESTRICTIONS: restricted to Faculty of Science students with less than 30 earned credit hours
FORMATS: Seminar
FIGS 0102 FIG Action: Stress
CREDIT HOURS: 0
In this First year Interest Group you will have the opportunity to work on a project together with other students where you explore STRESS from the perspective of your interests in mental health, cardiovascular health, gut health, immunology, epidemiology, learning and memory, behaviour, drugs or research. Groups will be mentored by a faculty member and a senior student. These one hour Lunch and Learn sessions will run weekly, and are offered at no cost. They require no homework and are not for credit, but will appear as a PASS on your transcript if completed. A minimum of 5 students must register for the session to run.
CALENDAR NOTES: Can be taken together with FIGS 0009
RESTRICTIONS: Restricted to Faculty of Science students with less than 30 earned credit hours
FORMATS: Seminar

FIGS 0201 BSc Truro Start I
CREDIT HOURS: 0
This is a not-for-credit course for first year students starting their Science (BSc) program on the Truro campus. The class meets weekly throughout the fall semester. In this FIG, you will meet other first year students and will start to explore your interests, and academic goals. FIGS are a great way to gain unique access and exposure to experts, professors, labs and facilities during your first year in science. The one-hour meetings will consist of discussions, activities and short excursions, and brief information sessions, where you will learn about science-related academic and extra-curricular opportunities.
CALENDAR NOTES: For first year students enrolled in the Faculty of Science. FIGS courses are zero credit hours and will appear as a PASS on the academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students who have fewer than 30 credit hours and are starting their BSc program on the Truro campus.
FORMATS: Seminar

FIGS 0202 BSc Truro Start II
CREDIT HOURS: 0
This is a not-for-credit course for first year students starting their BSc program on the Truro campus. The class meets weekly throughout the winter semester. You will learn about future academic opportunities available in a BSc program, including research, honours, and co-op. You will explore the various Science Majors and get help choosing the best fit for you. The meetings will consist of discussions, activities and an opportunity for a one-day visit to the Halifax campus.
CALENDAR NOTES: For first year students enrolled in the Faculty of Science. FIG courses are zero credit hours and will appear as a PASS grade on your academic transcript if completed.
RESTRICTIONS: Restricted to Faculty of Science students who have fewer than 30 credit hours and are starting their BSc program on the Truro campus.
FORMATS: Seminar

Geography

Note: There is no Geography program at Dalhousie; however, several courses taught in various departments are commonly recognized as Geography courses. Only courses which are cross-listed in Science departments may be used to meet the life or physical science subject requirement for the BA degree.

Staff

Deans
Macy, C., BA (Arch) (Calif. At Berkeley), MArch (MIT)
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)
Gantar, J., BA, MA (University of Ljubljana), PhD (University of Toronto) (Acting Dean)

Geography Coordinators
Architecture and Planning: Manuel, P., BA (Carleton), MSc (McGill), PhD (Dalhousie), MCIP, LPP (patricia.manuel@dal.ca)
Arts and Social Sciences: TBD
Science: Cray, H., BA Hon (McGill), MSc (McGill), PhD (Waterloo) (hcray@dal.ca)

Minor in Geography
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

To fulfill the requirements for a Minor in Geography, students must complete 24 credit hours, including the following:

- GEOG 1030.03/ERTH 1030.03: Introduction to Physical Geography
- GEOG 1035.03: Introduction to Human Geography
- GEOG 2000.03: Cartography

Additional 15 credit hours from the following list: at least 6 of which must be at the 3000 level or higher.

- GEOG 1060/ERTH 1060: Natural Disasters
- GEOG 2006/PLAN 2006: Space, Place, and Geographic Information Systems
- GEOG 2070/HIST 2383/SPAN 2070.03: Area Studies on Mexico and Central America
- GEOG 2100.06/SOSA 2100.06: Environment and Culture
- GEOG 2201/INTD 2001.03: Introduction to Development
- GEOG 2202/INTD 2002.03: Introduction to Development II
- GEOG 2206/INTD 2106.03: Africa: An Introduction
- GEOG 2336/ECON 2336.03: Regional Development
- GEOG 2800.03/PHYC 2800.03/OCEA 2800.03: Climate Change
- GEOG 3102/SUS 3102.03: Coastal Change and Adaptation
- GEOG 3106/SUS 3106.03: The Canadian North
- GEOG 3165/SOSA 3165.03: Peoples and Cultures of the World: Selected Area Studies
- GEOG 3110/INTD 3110.03: Migration and Development
- GEOG 3114/INTD 3114.03: Agriculture and Development
- GEOG 3284/SOSA 3284.03: Living in cities
- GEOG 3400/ENVS 3400.03: Human Health and Sustainability
- GEOG 3440/ERTH 3440.03: Geomorphology
- GEOG 3500/ERTH 3500.03/ENVS 3500.03/ERTH 5600.03: Exploring Geographic Information Systems
- GEOG 3633/ENVS 3633.03/BIOL 3633.03: Spatial Information and GIS in Ecology
- GEOG 3700/ERTH 3700.03/ENVS 3700.03: Earth resources, sustainability, and society
- GEOG 4440/ERTH 4440.03: Geomorphology and Landscape Evolution
- GEOG 4450/ERTH 4450.03: Introduction to Landscape Simulation
- GEOG 4520/ERTH 4520.03: GIS Applications to Environmental and Geological Sciences
- GEOG 4530/ERTH 4530.03: Environmental Remote Sensing
- GEOG 4850/SCIE 4850.03/BIOL 4850.03/ENVS 4850.03/ERTH 4850.03: Geographic Information Science Research Project

Note that the following courses are not offered in upcoming terms, but may be counted toward the Minor in Geography if taken previously:

- GEOG 2001.03/PLAN 2001.03: Landscape analysis
- GEOG 3001.03/PLAN 3001.03: Landscape Ecology
- GEOG 3002.03/PLAN 3002.03: Reading the City
- GEOG 3005.03/PLAN 3005.03: Cities and the Environment
- GEOG 3006.03/PLAN 3006.03: Reading the Landscape
- GEOG 3110/INTD 3110.03: Migration and Development
- GEOG 3114/INTD 3114.03: Agriculture and Development
- GEOG 3210/HIST 3210.03/CANA 3020.03: Canadian Cultural Landscapes
- GEOG 3220/SOSA 3220.03: Coastal Communities in the North Atlantic
- GEOG 3370/INTD 3370.03: North American Landscapes

**NOTE: Students in the BCD program may not select PLAN cross-listed courses that are required courses for their degree program**

Contact Geography for more information.
Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the department’s website.

Course Descriptions

GEOG 1030 Introduction to Physical Geography
CREDIT HOURS: 3
This non-lab science course examines the nature of weather and climate, earth’s surface features and processes, and internal processes that contribute to landform development. An integral component of the course is an exploration of the representation and interpretation of physical geographic data through the examination of a variety of maps.
CALENDAR NOTES: There are no pre-requisites for this course and students may take this class in addition to any other first year Earth Sciences class.
CROSSLISTED: ERTH 1030.03
FORMATS: Lecture | Tutorial

GEOG 1035 Introduction to Human Geography
CREDIT HOURS: 3
Human geography examines the ways that people perceive, use, and alter the landscapes they occupy. This course considers aspects of culture that characterize different social groups, as well as the systems of production, livelihood, spatial organization, and administration that societies erect. The class introduces the principal tools of human geographers: maps, demography, and analysis of cultural patterns.
CALENDAR NOTES: This class cannot be used to meet the life or physical science subject requirement for the BA degree.
FORMATS: Lecture

GEOG 1060 Earthquakes, Volcanoes and Natural Disasters
CREDIT HOURS: 3
Earthquakes, meteorite impacts, rapid climate change, volcanic eruptions, hurricanes, landslides, solar flares, and floods are natural disasters that affect our economy, public policy, and safety. Where, why and how frequently do natural disasters occur? Are predictions possible? Are media portrayals of risk and damage realistic? This course, aimed at the non-specialist, investigates these intriguing questions. Excerpts of “disaster films”, in conjunction with lectures and discussions are used to identify the causes, consequences and sometimes erroneous perceptions of natural hazards. Examples from Atlantic Canada and contemporary disasters are used to assess local risk and real-time events worldwide.
CROSSLISTED: ERTH 1060.03
FORMATS: Lecture

GEOG 2000 Cartography
CREDIT HOURS: 3
Maps, are essential aids to disciplines that span archaeology to zoology. Navigation is the art and science of finding one’s way through both natural and built landscapes. This class investigates how maps are constructed and interpreted, how maps can distort perceptions, and can influence one’s decisions.
PREREQUISITES: ERTH/GEOG 1030, or ERTH 1080
FORMATS: Lecture

GEOG 2001 Landscape Analysis
CREDIT HOURS: 3
Designers and planners need to understand the influence of physical, biological, and cultural systems in landscape evolution, and the relevance of that information in analyzing land capability. Students develop inventory and analysis tools for understanding environmental processes and their implications for design and planning. There will be field trips and a lab component.
CROSSLISTED: PLAN 2001.03
GEOG 2006 Space, Place and Geographic Information Systems
CREDIT HOURS: 3
Planners use Geographical Information systems (GIS) for data collection, coordination, and analysis. Properly interpreted, GIS data contribute to informed decision-making. This course explores the application of GIS in planning within a project-centred setting. Students learn to use GIS to address and use and site planning issues. The course also considers mapping standards used within the field of planning, and examines legal, privacy, and ethical implications of using GIS data in the public realm.
CROSSLISTED: PLAN 2006.03
FORMATS: Lecture | Lab

GEOG 2070 Area Studies on Mexico and Central America
CREDIT HOURS: 3
Following an examination of the indigenous heritage, and the colonial legacy of the conquistadors, the class deals principally with the contemporary period, examining the Mexican Revolution and its aftermath, the Somoza dynasty, Nicaragua under the Sandinistas, the U.S. role in the region, the human rights situation in Central America, and probable developments in the region. The class is designed to provide an understanding of the contemporary reality of this volatile region, in many ways a microcosm of the crucial situation of Latin America as a whole.
PREREQUISITES: No prerequisites. Open to students in all departments. No knowledge of Spanish necessary
CROSSLISTED: HIST 2383.03. SPAN 2070.03
FORMATS: Lecture | Discussion

GEOG 2100 Environment and Culture
CREDIT HOURS: 6
Concern about the environment is a widespread phenomenon as virtually everyone is confronted by environmental issues -- be they global warming, the depletion of the ozone layer or the continuing problems of water pollution and solid waste disposal. Furthermore, we are becoming increasingly aware of that environmental issues often have global implications. The efforts of cities in Canada to deal with environmental pollution, for example, may lead to conflicts with rural regions. Similarly, rural regions, in their use of various chemical agents, may find themselves affecting the lives of city dwellers. This class will explore key relationships between human culture and the physical environment. Topics to be examined include: historical, social, and legal aspects of contemporary environmentalism, food and agriculture, environmental ethics, health, traditional ecological knowledge, sustainable forestry, waste management, public participation and environmental movements.
CALENDAR NOTES: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: One of SOSA 1000X/Y.06, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200 X/Y.06
CROSSLISTED: SOSA 2100.06
FORMATS: Lecture

GEOG 2201 Introduction to Development I
CREDIT HOURS: 3
Poverty, inequality and injustice are widespread throughout the contemporary developing world. This course will examine how this situation came to be. It begins by analyzing the different meanings of the term “development” and then examines the major approaches that have shaped practical development initiatives on the ground in the Global South over the past 60 years. The course also examines the legacies of history for contemporary development efforts in the Global South through specific case studies.
PREREQUISITES: Completion of five full credits at the 1000 level or permission of the instructor
CROSSLISTED: INTD 2001.03
FORMATS: Lecture | Tutorial

GEOG 2202 Introduction to Development II
CREDIT HOURS: 3
This course builds upon the core concepts and approaches studied in INTD 2001 (i.e. different theoretical approaches to development and the historical creation of underdevelopment). The course examines key contemporary issues in the field of development and analyses the connections between them: debt, global trade rules, foreign aid, hunger and malnutrition, rural and urban livelihoods, population growth. The course also examines the principle actors involved in development and the strategies they have used to promote and resist development, including: governments, non-governmental organizations (NGOs), the World Bank and IMF, and popular social movements in the Global South and North.
PREREQUISITES: Completion of five credits at the 1000 level or permission of the instructor
CROSSLISTED: INTD 2002.03
FORMATS: Lecture | Tutorial
GEOG 2206 Africa: An Introduction  
CREDIT HOURS: 3  
This course will focus on contemporary Africa. Sterotypical portrayals of Africa will be examined and critiqued with the goal of emphasizing the immensity, diversity and complexity of the continent in order to better understand the opportunities and challenges of African development in the twenty-first century.  
CROSSLISTED: INTD 2106.03  
FORMATS: Lecture | Tutorial

GEOG 2336 Regional Development  
CREDIT HOURS: 3  
Most countries have richer and poorer regions. Economic development issues, policies, and theories facing more industrialized nations are analyzed with particular focus on Canada (especially the Atlantic region), the European Economic Community, U.S.A., Japan, and Australia. Approved with Canadian Studies. In addition to the prerequisites, the student is advised to take one class in Political Science and one class in Canadian History before taking ECON 3336.  
PREREQUISITES: ECON 1101.03 and 1102.03  
CROSSLISTED: ECON 2336.03  
FORMATS: Tutorial | Seminar

GEOG 2800 Climate Change  
CREDIT HOURS: 3  
Most models of the atmosphere predict that increasing concentrations of greenhouse gases will continue to warm the surface of the earth and the oceans in the twenty-first century. The magnitude of the warming and its consequences are still very controversial. This class will discuss, mainly from a nonmathematical viewpoint, the reasons for the greenhouse effect, the current warming in the context of the historical record of climate change, and sources of natural climate variability such as the El Nino Southern Oscillation. It will also review arguments that attribute the warming that has occurred in the Twentieth century to natural variability, and those that attribute the warming to increased human emission of greenhouse gases.  
CROSSLISTED: PHYC 2800.03 and OCEA 2800.03  
EXCLUSIONS: ECON2850.06, PHYC2850.06

GEOG 3001 Landscape Ecology  
CREDIT HOURS: 3  
Landscapes reflect the interaction of natural and cultural processes. This course introduces the principles of ecology to landscape analysis. It explores relationships between environmental components in the landscape to inform community design and land use planning applications.  
PREREQUISITES: PLAN 2001.03 or GEOG 2001.03 or permission of the instructor  
CROSSLISTED: PLAN 3001.03  
FORMATS: Lecture | Lab

GEOG 3002 Reading the City  
CREDIT HOURS: 3  
Any city reflects the history of its topography, cultural traditions, and design interventions. This course introduces the principles, theories, and methods of urban form analysis in the local urban context. Students explore the local urban environment to interpret what the city means, and how it comes to take the shape it does.  
CROSSLISTED: PLAN 3002.03  
FORMATS: Lecture | Lab

GEOG 3005 Cities and the Environment  
CREDIT HOURS: 3  
The contemporary landscape reflects a long history of human activities on the land and design and planning interventions through time. Civilizations rise and fall, often because of their degradation of the ecosystems that support them. This course examines the relationship of cities with the environment to enhance our understanding of landscape change, urban form and patterns in human settlements through the ages.  
CROSSLISTED: PLAN 3005.03  
FORMATS: Lecture | Seminar

GEOG 3006 Reading the Landscape  
CREDIT HOURS: 3  
Any landscape reflects its natural and cultural history. This course explores principles, theories, and methods of landscape interpretation. These approaches will be applied to community design problems in local landscapes.  
PREREQUISITES: PLAN 3001.03, 3002.03, or GEOG 3001.03, 3002.03  
CROSSLISTED: PLAN 3006.03
GEOG 3102 Coastal Change and Adaptation
CREDIT HOURS: 3
Human activities alter coastal environments directly and by influencing natural processes. We analyze the drivers of change and impacts on environment, economy and society. Mitigation and management strategies for sustainable adaptation are investigated. Lectures are integrated with student presentations, guest lectures and discussion of current coastal and marine research.
PREREQUISITES: Must be third year standing or above
CROSSLISTED: SUST 3102.03
EXCLUSIONS: SUST 3952.03 (winter 2016 and winter 2017)

GEOG 3106 The Canadian North
CREDIT HOURS: 3
This course introduces the Canadian North through an examination of the challenges faced by northern peoples. Emphasis is placed on the causes and consequences of global environmental change, and interactions with ecological processes and challenges for the human environment. Inuit perspectives of ecological knowledge will complement discussions on planning and development in a warming future. Principles of ecosystem management and emergent challenges for a sustainable future will also be addressed.
PREREQUISITES: Third year status or above, or permission of instructor.
CROSSLISTED: SUST 3106.03
EXCLUSIONS: SUST 3956.03 (offered in Winter 2019) ENVI 5106.03
FORMATS: Lecture

GEOG 3110 Migration and Development
CREDIT HOURS: 3
The purpose of this course is to explore and better understand the connections between migration and development in contemporary societies. Classes will introduce or further explore one main theme or issue, such as development-induced displacement, labour migration, and HIV/AIDS and migration. Each class will centre on one or more discussion questions, exchange insights from relevant experiences of class participants or focus on a case study
CROSSLISTED: INTD 3110.03
FORMATS: Lecture | Seminar

GEOG 3114 Environment and Development
CREDIT HOURS: 3
This course will examine the interconnections between the natural environment and different forms of social and economic development with a specific focus on developing countries. Various perspectives will be used to analyze the links between environmental issues and poverty, inequality, wealth, economic globalization and the ways in which different cultures understand and interact with the environment.
CROSSLISTED: INTD 3114.03
FORMATS: Lecture | Seminar

GEOG 3165 Peoples and Cultures of the World: Selected Area Studies
CREDIT HOURS: 3
This class examines a specific geographic and/or culture area. The class begins with background material on geography and history. Its focus is on the people themselves, their social organization and political, economic, and cultural systems. How they relate to globalization and development will also be examined. Consult the Department to find which region is to be covered in a particular year. Approved with International Development Studies.
PREREQUISITES: SOSA 1000X/Y.06; 1050X/Y.06; 1100X/Y.06; 1200X/Y.06
CROSSLISTED: SOSA 3165.03
EXCLUSIONS: SOSA 2370.03
FORMATS: Lecture

GEOG 3210 Canadian Cultural Landscapes
CREDIT HOURS: 3
This course explores the origins of one "signature" landscape in each province. Contact with different geographies shaped distinctive regional histories; but at the same time, the story of each place is tied to the national narrative. These landscapes also illuminate how nature has been understood, used, and transformed since the fifteenth century.
CROSSLISTED: HIST 3210.03, CANA 3020.03
FORMATS: Lecture | Discussion
GEOG 3220 Coastal Communities in the North Atlantic
CREDIT HOURS: 3
Coastal communities as a social/ecological type are examined as populations, and social structures (territorial, economic, occupational, political) as they have developed in response to particular ecological and social circumstances. Various perspectives which have been applied to coastal communities are examined with regard to the contribution they may make to understanding the dynamics of these communities. The focus is on North Atlantic communities.
PREREQUISITES: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06
CROSSLISTED: SOSA 3220.03
FORMATS: Lecture

GEOG 3284 Living in Cities
CREDIT HOURS: 3
2008 marked the first time in history that more of the global population lived in cities than in rural areas. What perspectives to anthropology and sociology offer on cities and their inhabitants? This course explores the social dynamics that constitute 'the city' and surveys how social scientists have studied and engaged with cities and city-dwellers. It approached 'the city' both as a whole and through its constituent parts: people and places. Examples may be drawn from cities large and small, near and far - including Halifax.
PREREQUISITES: One of SOSA 1000.06, SOSA 1050.06, SOSA 1100.06 SOSA 1200.06 FYP or PLAN 2005.06
CROSSLISTED: SOSA 3284.03
FORMATS: Lecture | Seminar

GEOG 3302 Quaternary Sedimentary Environments
CREDIT HOURS: 3
The student is exposed to fluvial, alluvial, subglacial, glaciolacustrine, hillslope, eolian, coastal, shallow marine, rift, wedge top, retroarc, and foreland basin environments. Field trips and labs provide experience in methods used to distinguish the environments, including sedimentology, geomorphology, geochronology and thermochronology, and analysis of soils, cores, pebble fabrics, and section-scale non-petroleum sedimentary facies. Quaternary paleoclimatology and tectonic controls on weathering and deposition are discussed and debated.
PREREQUISITES: ERTH 2203.03
CROSSLISTED: ERTH 3302.03
FORMATS: Lecture | Lab

GEOG 3370 North American Landscapes
CREDIT HOURS: 3
Landscapes are the product of human culture ordering nature for economic, social, political, religious, recreational, and artistic purposes. Landscape history analyzes and interprets the use and design of such features as fields and woodlands, roads and waterways, settlements and buildings, towns and suburbs, and parks and cities. This class examines the use and meaning of the spatial environment among the various societies in North America from the sixteenth to the twentieth centuries. Among the topics are the meaning of area resources for indigenous peoples, the occupation and settlement of colonial populations, transportation and continental expansion, town planning, the politics of water and land in the West, preservation movements, scenic tourism, and the literary and artistic stylization of landscapes. The class welcomes non-history students with an interdisciplinary interest in issues regarding planning and design, cultural ecology, and the governance of resources.
CROSSLISTED: HIST 3370.03
FORMATS: Lecture | Discussion

GEOG 3400 Human Health and Sustainability
CREDIT HOURS: 3
This course examines the relationships between the health of populations and health determinants in the context of environmental sustainability. Weekly laboratory exercises will teach students how geomatics (GIS, GPS, and remote sensing technologies) and epidemiological tools can be used to assess the links between the health of human populations and the health of the environment, and how to use these tools for environmental health research.
PREREQUISITES: Must be a third year student or have permission of instructor
CROSSLISTED: ENVS 3400.03
FORMATS: Lecture | Lab

GEOG 3440 Geomorphology
CREDIT HOURS: 3
Geomorphology is the quantitative study of Earth’s surface processes and landforms applies to geology, civil engineering, hydrogeology, and environmental management. We investigate slope stability, weathering and soils, sediment production, wind-driven and coastal environments, tectonic landforms, and river, glacial and permafrost processes.
PREREQUISITES: ERTH 1080.03 (or SCIE 1506.09/SCIE 1507.09) and (ERTH 1090.03 or ERTH 1091.03); OR completion of (or concurrent enrolment in) a 1000-level mathematics class, a 1000-level physics class, a 1000-level chemistry class AND permission of instructor
CROSSLISTED: ERTH 3440.03
FORMATS: Lecture | Lab
GEOG 3500 Exploring Geographic Information Systems
CREDIT HOURS: 3
Geographic Information Systems (GIS), as a tool for the management of georeferenced data, have become indispensable for disciplines where location of objects and pattern of processes is important. GIS plays a fundamental role for a wide range of applications, from modeling, to analysis and predictions, to decision making. The class is designed for a broad base of potential users and draws on examples of the role of GIS in global climate change, mineral exploration, preservation of biodiversity, coastal zone management, resource depletion, and many other present and future environmental issues. The course material will be of interest to those studying geoscience, environmental science, ecology, marine biology, oceanography, epidemiology, urban and rural planning, civil engineering, and any other field involving spatial data. Laboratory exercises emphasize the principles of raster and vector GIS, and the integration of databases and GPS (global positioning systems) data into GIS. Exercises draw on the diversity of GIS applications in a number of topical areas. PREREQUISITES: Two years of university study or equivalent or instructor’s permission CROSSTLISTED: ERTH 3500, ERTH 5600, ENVS 3500 EXCLUSIONS: Credit will only be given for one of GEOG 3500, SCIE 3600, ERTH 3500, ERTH 5600, ENVS 3500 FORMATS: Lecture | Lab

GEOG 3633 Spatial Information and GIS in Ecology
CREDIT HOURS: 3
A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology. CALENDAR NOTES: Offered in the summer through SEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. PREREQUISITES: BIOL 2060.03 CROSSTLISTED: ENVS 3633.03, BIOL 3633.03

GEOG 3700 Earth Resources, Sustainability, and Society
CREDIT HOURS: 3
This course addresses the question: What do we need to know and understand about the nature and distribution of geologic resources to optimally reconcile mineral extraction with society’s needs, considerations of the environment, and the sustainable development goals in a more sustainable, geoethical, and balanced approach, through the 21st century. CALENDAR NOTES: Aimed as an elective course for majors in Earth Sciences and in Environmental Sciences. Must be third year students. PREREQUISITES: ERTH 1080 CROSSTLISTED: ERTH 3700 ENVS 3700 RESTRICTIONS: E1 and E2 FORMATS: Lecture | Seminar | Discussion | Other (explain in comments)

GEOG 4520 GIS Applications to Environmental and Geological Sciences
CREDIT HOURS: 3
Geographic information systems (GIS) provide a rich set of new tools to the geologist and environmental scientist, not only to solve conventional problems, but also to explore transdisciplinary questions not readily answered by other means. This class builds on the fundamentals of GIS taught in ERTH 3500.03 to explore analytical tools that aid in decision-making processes encountered in mineral exploration, hydrogeology, site selection, environmental assessment, and global change analysis. The class concentrates on case studies and problem solving, including those requiring multi-criteria and multi-objective decision making processes. PREREQUISITES: GEOG 3500.03, ENVS 3500, ERTH 3500.03; ERTH 5600, or SCIE 3600.03; STAT 1060.03 CROSSTLISTED: ERTH 4520.03 FORMATs: Lecture | Lab

GEOG 4530 Environmental Remote Sensing
CREDIT HOURS: 3
The goal of this class is to introduce students to the role of remote sensing as a technique provide environmental and geologic information. Particular emphasis will be placed on examining the potential and limitations of remote sensing methods and data in this context. The lectures discuss the fundamentals of remote sensing with an emphasis on optical multispectral satellite systems. In the lab, students use computerized techniques of digital image enhancement and thematic information extraction to process images derived from a range of remote-sensing systems. The integration of remote-sensing information with GIS (Geographic Information Systems) is stressed in both the labs and lectures. PREREQUISITES: ERTH 3500.03, ENVS 3500.03, or ERTH 5600.03 or SCIE 3600.03 or GEOG 3500.03 CROSSTLISTED: ERTH 4530.03 FORMATs: Lecture | Lab
GEOG 4850 Geographic Information Science Research Project
CREDIT HOURS: 3
Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.
COREQUISITES: ERTH 5420.03/GEOG 4520.03/ERTH 4520.03
PREREQUISITES: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03 and permission of instructor
CROSSLISTED: BIOL 4850.03, ENVS 4850.03, SCIE 4850.03, ERTH 4850.03
EXCLUSIONS: Restricted to 3rd and 4th year students
FORMATS: Lecture

Humanistic Studies in Science
Attention is drawn to the following courses, offered in several departments. All of these courses are concerned with the humanistic aspects of scientific thought and its development. For complete course descriptions please consult the appropriate department listing in this calendar.

NOTE: Not all courses are offered every year. Please consult the current timetable for this year’s offerings.

History of the Sciences

- BIOL 3503.06, HSTC 2200.06, SCIE 2000.06: Introduction to the History of Science
- BIOL 4664.03/OCEA 4331.03/SCIE 4001.03/HIST 3073.03/HSTC 3331.03: History of Marine Sciences

Philosophy of the Sciences

- PHIL 3420.03, BIOL 3580.03: Philosophy of Biology
- PHIL 2560.03: Minds & Machines: Introduction to cognitive Science
- PHIL 2660.03 Logic: Understanding Scientific Reasoning
- BIOL 3601.03: Nature Conservation
- PHIL 2130.03: Logic
- PHIL 3051.03: Epistemology
- PHIL 3670.03: Philosophy of Science

Integrated Science Program

Introduction
Dalhousie’s Integrated Science Program is a unique and engaging way for a serious and well-prepared student to complete the first year of a BSc degree. In addition to learning the core material of several first-year science subjects, students gain an interdisciplinary perspective, develop transferrable skills, and conduct research, all in their first year. The goals of the program are:

1. To engage students in the process of scientific inquiry with hands-on experience in scientific research skills.
2. To provide a strong academic background for second-year courses in the subjects covered by the program.
3. To identify links among the science disciplines.
4. To learn effective team skills.
5. To explore the relevance of science for society at large.

The Integrated Science program exposes first year students to a broad range of science disciplines in an integrated manner, and provides a strong foundation for most BSc programs. Students learn from a team of instructors with expertise in particular subject areas, who also highlight the natural links among disciplines. Integrated Science students are members of a small cohort (maximum 80) who take the majority of their lectures, labs and field trips together.

The Integrated Science program has a strong emphasis on research-relevant training. Students study experimental design, collect and analyze data in the laboratory and during field trips, work on communication skills, including scientific writing, and are introduced to some of the ethical questions that arise in the practice of science. In the winter term, students undertake an independent research project under the supervision of a Dalhousie-affiliated researcher, which culminates in a presentation at a conference-style event.

Integrated Science consists of a core program taken only by IS students, and auxiliary courses taken together with other first year BSc students. The core program covers Biology, Psychology, Earth Sciences, Statistics, and Ethics in Science. Auxiliary courses include Chemistry, Math and Physics (optional). Exposure to multiple science disciplines can also be helpful for students who are unsure which subjects interest them most, and early training in research is especially valuable for those considering an Honours program. Integrated Science is also excellent preparation for professional graduate programs, such as Law or Medicine.

Integrated Science candidates should be highly-motivated, have a strong interest in science, and be willing to think across discipline boundaries. They should be enthusiastic about being part of a small cohort of students intent on learning how to work and think like scientists; they should want to learn to be cooperative and effective team members; they should have good study, work, and time-management skills; and they should welcome the challenge to work hard, to think critically, and to solve problems.

Students wishing to enter this program normally must have a minimum Grade 12 average of 80%, with a minimum of 80% in Mathematics and 70% English, and a minimum of 75% in two of Grade 12 Chemistry, Biology or Physics. The average high school mark of incoming Integrated Science students is around 90%. Students must be accepted to the Integrated Science Program as well as be accepted to the BSc at Dalhousie University.

### Choosing an Integrated Science Option

Integrated Science is a full-time, first-year program designed to prepare BSc students for second year courses in multiple science programs. The IS program emphasizes the connections among the different science disciplines, and provides students with research training and experience. Students take the core program as a cohort (max 80 students).

The core consists of two 9-credit-hour courses, Integrated Science I (SCIE 1506.09), and Integrated Science II (SCIE 1507.09), as well as Ethics in Science (PHIL 1050.03). In the fall, students have lectures, laboratories and field trips in Biology, Psychology and Statistics, and receive training in research skills (experimental design, analysis, scientific writing). The winter term consists of lectures and laboratories in Biology, Psychology and Earth Sciences, and students conduct a 10-week independent research project in a Dalhousie or Dalhousie-affiliated research lab. Students present the results of their research at a conference-style event.

Integrated Science I and II are equivalent to two terms of Biology and Psychology, and one term of Earth Sciences and Statistics. Together with PHIL 1050: Ethics in Science, the core fulfills the writing requirement for BSc students.
Students also register for several auxiliary or co-requisite courses; these are taken along with other BSc students, typically in larger classes. Students take a full year of Chemistry (CHEM 1011.03/CHEM 1012.03) and a half year of Calculus (MATH 1000.03 or MATH 1215.03). Students have the option to enroll in a second term of Calculus (MATH 1010.03) and to take Physics (full year or half year). See co-requisite details below:

**Fall term co-requisite courses taken at the same time as Integrated Science I (SCIE 1506.09)**

**Required:**
1. Ethics in Science (PHIL 1050.03)
2. Concepts in Chemistry: Structure and Reactivity (CHEM 1011.03)
3. Differential and Integral Calculus I (MATH 1000.03) **OR** Life Sciences Calculus (MATH 1215.03)

**Optional:**
1. Introduction to Physics I (PHYC 1190.03) **OR** Physics in and Around You I (PHYC 1310.03)

**Winter term co-requisite courses taken at the same time as Integrated Science II (SCIE 1507.09)**

**Required:**
1. Concepts in Chemistry: Energy and Equilibrium (CHEM 1012.03)

**Optional:**
1. Differential and Integral Calculus II (MATH 1010.03).
2. Introduction to Physics II (PHYC 1290.03) **OR** Physics in and Around You II (PHYC 1320.03)

*In the fall term Integrated Science students take a course overload with 18-21 credit hours (21 credit hours if Physics is included). 15 credit hours is a full course load for regular BSc students. Students enrolling in 21 credit hours can expect a significantly heavier work load. Students planning to take only one term of calculus have the option of taking MATH 1000.03 in the winter to lighten their fall course load.*

**In the winter term, Integrated Science students may take an overload (18 credit hours), a regular full course load (15 credit hours,) or a lighter course load of 12 credit hours (if they choose not to take MATH or PHYSICS in winter).**

**Choice of Math and Physics courses**

Prior to selecting Math or Physics courses please consult the course descriptions in the Dalhousie Academic Calendar.

- PHYC 1190/PHYC 1290 is designed for students in Physical Sciences and Engineering, and PHYC 1310/PHYC 1320 is designed for students in Life Sciences.
- MATH 1000 should be taken by students interested in math, economics or the physical sciences, while MATH 1215 is designed for life sciences students.
- One calculus course (MATH 1000.03 or MATH 1215.03) together with SCIE 1506.09 (Statistics) satisfies the full math requirement for BSc students. Students who do not require MATH 1010 for their programs have the option to take only one calculus course.

Physics MATH 1000/MATH 1010 PHYC 1190/PHYC 1290
Psychology MATH 1215 (or MATH 1000)
Statistics MATH 1000/MATH 1010

* Physics is required for all Earth Science Honours programs. PHYC 1190/PHYC 1290 is recommended, as PHYC 1310/PHYC 1320 may not be recognized for PGeo (Professional Geologist) certification. Physics is not required for Earth Sciences Major programs.

** Marine Biology students who wish to include 2nd year courses in Ocean Sciences (other than OCEA 2001/OCEA 2002: The Blue Planet) in their programs should take PHYC 1310/PHYC 1320 (or PHYC 1190/PHYC 1290).

BSc degree requirements and the Integrated Science program

The Integrated Science program core satisfies the Writing requirement, the Social Science and Science subject requirements, and with MATH 1000 or MATH 1215, the Math requirement for BSc students at Dalhousie. It satisfies half of the Humanities/Language requirement; another Humanities or Language course is needed before graduation.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department.

Course Descriptions

SCIE 1506 Integrated Science I
CREDIT HOURS: 9
This course comprises the first half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1506 consists of lectures, laboratories, and field trips in Biology, Psychology and Statistics, as well as integrated lectures and workshops that cut across disciplines. It also has an interdisciplinary Writing in Science component that prepares students for research projects in SCIE 1507. Together, SCIE 1506 and SCIE 1507 provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science I must also register for CHEM 1011.03 and PHIL 1050.03 (Ethics in Science). Registration in PHYC 1190.03 or PHYC 1310.03 is recommended for students considering programs that require Physics. For calculus, students register in MATH 1000.03 (fall or winter) or MATH 1215.03 (fall or winter). Students taking MATH 1010.03 in fall term have the option to additionally take MATH 1010.03 in winter term.
CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).
COREQUISITES: PHIL 1050.03, CHEM 1011.03
RESTRICTIONS: Registration is restricted to Integrated Science students.
EXCLUSIONS: BIOL 1011.03, BIOL 1021.03, PSYO 1011.03, STAT 1060.03
FORMATS: Lecture | Lab

SCIE 1507 Integrated Science II
CREDIT HOURS: 9
This course comprises the second half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1507 consists of lectures, laboratories, and field trips in Biology, Psychology and Earth Sciences, as well as integrated lectures and workshops that cut across disciplines. The Writing in Science component, continued from Integrated Science I, includes a 10-week research project in which students apply the research design concepts and statistical analyses covered in Integrated Science I. Together, SCIE 1506 and SCIE 1507 provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science II must also register for CHEM 1012.03. Registration in MATH 1010.03 and in one of PHYC 1290.03 or PHYC 1320.03 is recommended for students considering programs with those requirements. For calculus, students must register in either MATH 1000 (fall or winter) or MATH 1215 (fall or winter).
CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).
COREQUISITES: CHEM 1012.03
PREREQUISITES: SCIE 1506.09, CHEM 1011.03, PHIL 1050.03
RESTRICTIONS: Registration is restricted to Integrated Science students
EXCLUSIONS: BIOL 1010.03, BIOL 1020.03, PSYO 1012.03, ERTH 1080.03, SCIE 1111.03
FORMATS: Lecture | Lab

Introduction
The Marine Biology Program offers students the opportunity to study and experience marine life, from the tiny plankton that drive ocean ecosystems to the sharks and marine mammals at the top of the food chain. In the first two years of the program, Marine Biology students obtain a basic grounding in Biology and start to learn the basics of how the ocean works. They then use their third and fourth years to study in greater depth the diversity, physiology, ecology, and evolution of marine animals and plants. Many students combine their studies of marine biology with courses in the chemistry or physics of the ocean. Marine Biology students are offered a Co-op option, where three work terms in industry, government or university laboratories, or ecotourism are included within the program.

The Biology department is located adjacent to the sea in the Life Sciences Centre. All eight floors have running sea water, and we have a 15m pool tank and a 10m deep tower tank. Within a 30 km radius there are salt marshes, rocky shores, estuaries, and sand beaches for field work.
Our students have many opportunities to participate in marine-related research; examples can be viewed on our website. "Ocean studies" is an area of special emphasis for Dalhousie University, and thus many faculty members have active research programs in marine science. In addition, many marine scientists at local research institutions, including the Bedford Institute of Oceanography and the Institute for Marine Biosciences serve as supervisors for our Honours students.

An undergraduate major in Marine Biology at Dalhousie qualifies you for technical positions in places like government fisheries laboratories, aquaculture farms, and consulting firms. In the Marine Biology program’s summer field courses or in the honours research courses, you’ll get plenty of hands-on opportunities to explore the ocean—preparing you for the exciting challenges of diverse marine-related careers.

Degree Programs
The Department of Biology offers the following degree programs in Marine Biology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- Minor in Marine Biology

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu at the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Marine Biology undergraduate academic advisor.

Prospective Marine Biology students should be aware that to advance to the second year Biology courses in the Marine Biology program, they must achieve at least a C grade in the prerequisite first year Biology courses. Students with exceptional extenuating circumstances may appeal this requirement to the Biology Undergraduate Curriculum Committee. Students should go to the Biology Main Office for further details.

BSc or BA (120 credit hour) Concentrated Honours in Marine Biology

Students who want a challenging program resulting in a broad background in Marine Biology, including an independent research experience may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours.

To graduate with Honours, students must complete a minimum of 54 credit hours with a grade of C or better above the 1000 level in Marine Biology/Biology. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the Core Biology and Core
Marine Biology courses. Students must also have a cumulative B average (GPA of 3.0) in courses in the honours subject at the time of graduation. Students write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of MARI 4901.03 AND MARI 4902.03.

A Science Co-op option is available for students enrolled in a BSc Concentrated Honours in Marine Biology. See Co-operative Education Program.

Admission to Honours
Students must apply for admission to Honours programs. Students considering Honours should consult with a Marine Biology Honours Advisor early in their studies. To be admitted, students must:

- Have a minimum B+ average (GPA of 3.3) in Core Biology and Core Marine Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the honours subject.
- Identify and gain the support of a thesis supervisor during their third year of studies (see Honours webpage for supervisor eligibility)
- With the supervisor’s input, draft and submit a thesis proposal to the Honours Committee no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Course Requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Marine Biology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra 1
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

Note: Marine Biology students wishing to incorporate Ocean Sciences into their program should include MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus and PHYC 1190.03/PHYC 1290.03 Introduction to Physics (or PHYC 1310.03/PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

2000 level
Core Biology courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

Other required courses

- OCEA 2000.06: The Blue Planet or OCEA 2001.03: The Blue Planet I and OCEA 2002.03: The Blue Planet II
- MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference

3000/4000 level
Core Biology/Core Marine Biology Courses

- BIOL 3101/MARI 3101 OR BIOL 3761/MARI 3761

Students must choose 15 credit hours from any of the following courses:

- BIOL 3042/MARI 3042 Molecular Ecology
- BIOL 3063/MARI 3063 Resource Ecology
- MARI 3074 Physiology of Marine Animals Part I
- MARI 3076 Physiology of Marine Animals Part II
- BIOL 3080/MARI 3080 The Ecology and Evolution of Fishes
- MARI 3090 Marine Mammalogy OR BIOL 3626/MARI 3626 Field Studies of Marine Mammals
- BIOL 3101/MARI 3101 Microbial Ecology
- BIOL 3221/MARI 3221 Diversity of Algae
- BIOL 3301/MARI 3301 Invertebrate Biology
- MARI 3602 Introduction to Aquaculture
- BIOL 3761/MARI 3761 Marine Ecology
- MARI 4350 Cutting Edge in Marine Science
- MARI 4665 Hacking the Blue Planet
- Any two MARI SEASIDE course
- Any two OCEA course cross-listed as MARI

In addition, students must complete an Honours Thesis:

- MARI 4901.03: Honours Research and Thesis I and MARI 4902.03: Honours Research and Thesis II

In addition, students must complete at least another 12 credits hours in MARI or MARI-Equivalent courses to achieve the minimum of 54 credit hours in their honours subject above the 1000 level. This may include additional SEASIDE courses or any courses cross-listed as MARI.

**BSc or BA (120 credit hour) Combined Honours in Marine Biology and another subject**

Students who wish to study Marine Biology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science (other than Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Marine Biology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas.

To graduate with Honours, students must complete a minimum of 36 credit hours above the 1000 level in Marine Biology/Biology, whether Marine Biology is the primary or the secondary subject. A minimum B+ average (GPA of 3.3), with no grade less than C, is required in the Core Biology/Core Marine Biology courses. Students must also have a cumulative B average (GPA of 3.0) in courses in the honours subject at the time of graduation. Students write a research-based Honours thesis and complete an Honours Qualifying Examination in their primary subject area. For Marine Biology, this requirement is satisfied through MARI 4901.03/MARI 4902.03.

A Co-op option is available for students enrolled in a BSc Combined Honours in Marine Biology. See Co-operative Education Program.

**Admission to Honours**

Students must apply for admission to Honours programs. Students considering Honours should consult with a Marine Biology Honours Advisor early in their studies. To be admitted, students must:

- Have a minimum B+ average (GPA of 3.3) in Core Biology/Core Marine Biology courses with no grade less than C. A maximum of two of these core courses may be repeated once to achieve this requirement.
- Have a minimum B average (GPA of 3.0) across all courses in the honours subject.
- If Marine Biology is to be the primary subject area, students must
  - Identify and gain the support of a thesis supervisor during their third year of studies (see Honours webpage for supervisor eligibility)
With the supervisor’s input, draft and submit a thesis proposal to the Honours Committee preferably no later than May 15th of their third year of studies. See Honours webpage for thesis proposal guidelines, and admission procedures for Honours Co-op students.

Marine Biology/Biology Honours webpage [https://www.dal.ca/faculty/science/biology/honours.html](https://www.dal.ca/faculty/science/biology/honours.html)

**Course Requirements**

In addition to fulfilling the requirements outlined in the [Academic Regulations](https://www.dal.ca/faculty/science/biology/honours.html) and [College of Arts and Science Degree Requirements](https://www.dal.ca/faculty/science/biology/honours.html) sections, students in a Combined Honours program in Marine Biology and another subject must complete the following:

### 1000 level

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra I
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

**Note:** Marine Biology students wishing to incorporate Ocean Sciences into their program should include MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus and PHYC 1190.03/PHYC 1290.03 Introduction to Physics (or PHYC 1310.03/PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

### 2000 level

Core Biology courses

- BIOL 2003.03: Animal Diversity
- BIOL 2004.03: Diversity of Plants and Microorganisms
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

Other recommended courses

- OCEA 2000.06: The Blue Planet or OCEA 2001.03: The Blue Planet I and OCEA 2002.03: The Blue Planet II
- MATH 2080.03/STAT 2080.03: Statistical Methods for Data Analysis and Inference

### 3000 and 4000 levels

Core Biology/Core Marine Biology Courses

- BIOL 3101/MARI 3101 OR BIOL 3761/MARI 3761

If Marine Biology is the primary subject, students must choose an additional 9 credit hours from any of the following courses. If Marine Biology is the secondary subject, you must choose an additional 15 credit hours from any of the following courses:

- BIOL 3042/MARI 3042 Molecular Ecology
- BIOL 3063/MARI 3063 Resource Ecology
- MARI 3074 Physiology of Marine Animals Part I
- MARI 3076 Physiology of Marine Animals Part II
- BIOL 3080/MARI 3080 The Ecology and Evolution of Fishes
- MARI 3090 Marine Mammalogy OR BIOL 3626/MARI 3626 Field Studies of Marine Mammals
- BIOL 3101/MARI 3101 Microbial Ecology
- BIOL 3221/MARI 3221 Diversity of Algae
• BIOL 3301/MARI 3301 Invertebrate Biology
• MARI 3602 Introduction to Aquaculture
• BIOL 3761/MARI 3761 Marine Ecology
• MARI 4350 Cutting Edge in Marine Science
• MARI 4665 Hacking the Blue Planet
• Any two MARI SEASIDE courses
• Any two OCEA courses cross-listed as MARI

If Marine Biology is the primary subject, students will also complete

• MARI 4901.03: Honours Research and Thesis I and MARI 4902.03: Honours Research and Thesis II

**BSc or BA (120 credit hour) Major in Marine Biology**

The 120 credit hour Major is suited to students who want to focus on Marine Biology, but wish to have a program that is more flexible than the Honours program. It provides a four-year survey of Marine Biology, and is designed for students not anticipating subsequent experimental graduate-level training in Marine Biology or related disciplines. Marine Biology Majors complete a minimum of 42 credit hours in Marine Biology courses above the 1000 level and do not have thesis (or related) requirements. Research and other experiential learning opportunities are available through laboratories, independent research courses, special topics courses and experiential learning courses. Students should plan their programs carefully and obtain advice from an academic advisor in the Biology Department.

A Science Co-op option is available for students enrolled in a Major program in Marine Biology. See [Co-operative Education Program](#).

**Course Requirements**

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Major program in Marine Biology must complete the following courses:

**1000 level**

• BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II)
• BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
• MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
• MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra I
• CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
• CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

**Note:** Marine Biology students wishing to incorporate Ocean Sciences into their program should include MATH 1000.03: Differential and Integral Calculus I (or MATH 1215.03: Life Sciences Calculus) and PHYC 1190 and PHYC 1290.03 Introduction to Physics (or PHYC 1310.03 and PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

**2000 level**

• BIOL 2003.03: Animal Diversity
• BIOL 2004.03: Diversity of Plants and Microorganisms
• BIOL 2020.03: Cell Biology
• BIOL 2030.03: Genetics and Molecular Biology
• BIOL 2040.03: Evolution
• BIOL 2060.03: Introductory Ecology
• OCEA 2000.06: The Blue Planet or OCEA 2001.03: The Blue Planet I and OCEA 2002.03: The Blue Planet II

**3000/4000 level**
A minimum of 24 credit hours, of which at least 3 credit hours must be at the 4000 level, of Marine Biology (MARI) or MARI-equivalent courses. This may include any MARI SEASIDE courses or any courses cross-listed as MARI.

### BSc or BA (120 credit hour) Double Major in Marine Biology and another subject

The Double Major degree program allows students to combine a study of Marine Biology with another subject. The other subject may be any discipline from the Faculty of Science (other than Biology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Marine Biology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Regardless of whether Marine Biology is the primary or secondary subject, the Biology departmental requirements are the same (see below). Students must complete a minimum of 33 credit hours in Marine Biology/Biology courses above the 1000 level. It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A Science Co-op option is available for students enrolled in a Double Major with Marine Biology as the primary subject. See Co-operative Education Program.

#### Course Requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Marine Biology and another subject must complete the following:

**1000 level**

- BIOL 1010.03: Principles of Biology Part I (or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- BIOL 1011.03: Principles of Biology Part II (or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences (or SCIE 1505X/Y.18 or SCIE 1506.09: Integrated Science I and SCIE 1507.09 Integrated Science II or equivalent)
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus or MATH 1030.03: Matrix Theory and Linear Algebra I
- CHEM 1011.03: Concepts of Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium

*Note:* Marine Biology students wishing to incorporate Ocean Sciences into their program should include MATH 1000.03: Differential and Integral Calculus I (or MATH 1215.03: Life Sciences Calculus) and PHYC 1190 and PHYC 1290.03 Introduction to Physics (or PHYC 1310.03 and PHYC 1320.03 or PHYC 1300.06 Physics in & Around You)

**2000 level**

- BIOL 2003.03: Animal Diversity
- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOL 2040.03: Evolution
- BIOL 2060.03: Introductory Ecology

**3000/4000 level**

- A minimum of 18 credit hours of Marine Biology (MARI) or MARI-equivalent courses at or above the 3000 level whether Marine Biology is the primary or secondary subject. This may include any MARI SEASIDE courses or any courses cross-listed as MARI.

Please note that a double major in Biology and Marine Biology is not offered.
Minor in Marine Biology

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Marine Biology (MARI) courses at the 2000 level or higher. A maximum of 6 credit hours may be MARI-equivalent.

Contact Marine Biology for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program (Science Co-op) in Marine Biology

Co-op Academic Advisor: Dr. N McAllister-Irwin (nancy.mcallister-irwin@dal.ca)

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Marine Biology, or in Combined Honours or Double Major programs with Marine Biology as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. For entry into Marine Biology Co-op, a minimum grade of B+ in BIOL 1010.03 is required. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study, but application during the second year of study is possible. Students must apply before April 15, and it is recommended that interested students meet contact their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four months prior to the first work term.

Details are available from the Marine Biology/Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Marine Biology, please see the Departmental webpage www.dal.ca/academics/programs/undergraduate/marinebio/what_will_I_learn/coop_work_terms.html.

Minors available to students in Marine Biology

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Marine Biology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Marine Biology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to student enrolled in a BSc in Marine Biology include:

- Certificate in Animal Behaviour
- Certificate in Aquaculture and the Environment
- Certificate in Environmental Impact Assessment
The following courses given by other departments may be taken as a Marine Biology course toward a BA, BSc and BSc (Honours) Marine Biology degrees.

Please note that MARI-equivalent courses will not count towards a minor program in Marine Biology.

**Any course cross-listed as a MARI course**

Aquaculture (AQUA)
- AQUA 2000, AQUA 3000, AQUA 4000, AQUA 4001

Biochemistry (BIOC)
- BIOC 2300

Biology (BIOA)
- BIOA 3006

Biology (BIOL)
- BIOL 2003, BIOL 3061, BIOL 3062, BIOL 3065, BIOL 3102, BIOL 3336, BIOL 3326, BIOL 3614, BIOL 3615, BIOL 3635, BIOL 3639, BIOL 3665, BIOL 3872, BIOL 4001, BIOL 4003, BIOL 4061, BIOL 4062, BIOL 4500, BIOL 4510, BIOL 4850

Engineering Mathematics (ENGM)
- ENGM 4680

Nutrition (NUTR)
- NUTR 3002

Oceanography
- OCEA 4401, OCEA 4402

(...)^ indicates courses taught at the Agricultural Campus in Truro.

**Courses**

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the department's website.

**Course Notes**
The normal entry requirement for upper level courses in Biology and Marine Biology is a grade of C or better in BOTH terms of first year Biology or in SCIE 1506.09 and SCIE 1507.09. Students with extenuating circumstances may appeal to the departmental Undergraduate curriculum committee. Students should go to the Biology Main Office for further details.

Course Descriptions

**MARI 3003 Introduction to Field Oceanography**

CREDIT HOURS: 3

See course description for OCEA 3003.03 in the Oceanography section of the calendar.

**MARI 3042 Molecular Ecology**

CREDIT HOURS: 3

We survey techniques of molecular genetic analysis and consider how they can be used to identify species, populations, sexes, individuals and family relationships, and study population attributes such as historical dispersal, contemporary connectivity, mating behaviour and effective population size. Evaluation is based on assignments, a test and a final exam.

PREREQUISITES: A grade of B- or better in each of BIOL 2030.03 (or GENE 2000.03), BIOL 2040.03, and BIOL 2060.03

CROSSLISTED: BIOL 3042.03

EXCLUSIONS: BIOL 4042.03

FORMATS: Lecture

**MARI 3063 Resource Ecology**

CREDIT HOURS: 3

This course considers the ecology, utilization, and management of natural resources in fisheries, wildlife and forest management, agriculture and aquaculture. Topics include population dynamics, community interactions, and ecosystem support of resources as well as the history of resource utilization, practices of controlling production, pests, and predators, and sustainable management strategies.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), MATH 1000.03 (or MATH 1215.03 or SCIE 15xx), STAT 1060.03 (or SCIE 15xx)

CROSSLISTED: BIOL 3063.03

FORMATS: Lecture | Tutorial

**MARI 3074 Physiology of Marine Animals, Part I**

CREDIT HOURS: 3

Animals in a marine environment are quite different from those found in air or fresh water, but the “physiological principles” are similar. This course deals with the same principles as BIOL 3078, but emphasizes the special characteristics of marine animals and the techniques necessary to study them in laboratories. Note: Students must complete MARI 3074.03 before MARI 3076.03

PREREQUISITES: BIOL 2003.03 and BIOL 2020.03 (or BIOA 2001.03)

CROSSLISTED: BIOL 3078.03

FORMATS: Lecture | Lab

**MARI 3076 Physiology of Marine Animals Part II**

CREDIT HOURS: 3

Animals in a marine environment are quite different from those found in air or fresh water, but the “physiological principles” are similar. This course deals with the same principles as BIOL 3079, but emphasizes the special characteristics of marine animals and the techniques necessary to study them in laboratories.

PREREQUISITES: MARI 3074.03 OR BIOL 3078.03

CROSSLISTED: BIOL 3079.03

RESTRICTIONS: BIOA 3005.03

FORMATS: Lecture | Lab

**MARI 3080 The Ecology and Evolution of Fishes**

CREDIT HOURS: 3

The course examines selected topics on the ecology and evolution of marine and freshwater fishes. Topics include: phylogeny and systematics; functional morphology and physiology; population biology; life-history evolution; behavior; fisheries science; and conservation biology.

PREREQUISITES: A cumulative GPA of 2.7 (B-) or better in BIOL 2003.03, BIOL 2040.03, BIOL 2060.03 (or BIOA 3001.03)

CROSSLISTED: BIOL 3080.03

EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03

FORMATS: Lecture
MARI 3090 Marine Mammalogy
CREDIT HOURS: 3
This course examines the characteristics of marine mammals, the roles of marine mammals in oceanic ecosystems and general principles of marine mammal population biology. Students use information on the biology of marine mammals to explore conservation/management issues. They learn of these animals and explore how they interact with humans.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03
EXCLUSIONS: BIOL 4060.03, MARI 4060.03
FORMATS: Lecture

MARI 3101 Microbial Ecology
CREDIT HOURS: 3
Lectures on the ecology of bacteria, viruses, protists. Community structure, food web nutrient cycling, biogeochemical cycles, competition, succession and symbiosis are discussed with examples from marine, fresh-water and soil habitats. There is an emphasis on marine organisms.
PREREQUISITES: BIOL 2004.03 (or MICI 2100.03) and BIOL 2060.03 (or BIOA 3001.03)
CROSSTLISTED: BIOL 3101.03
FORMATS: Lecture

MARI 3221 Diversity of Algae
CREDIT HOURS: 3
This course is a taxonomic introduction to the major algal groups (macrophytic and microscopic) with an emphasis on the marine seaweeds. Basic taxonomic differences are covered, along with an introduction to macrophyte ecology, human uses and symbioses. Laboratory sessions focus on morphology and reproduction.
CALENDAR NOTES: Also offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures, see http://www.seaside.science.dal.ca
PREREQUISITES: BIOL 2004.03 or equivalent
CROSSTLISTED: BIOL 3221.03
EXCLUSIONS: BIOL 3212.03, MARI 3212.03

MARI 3301 Invertebrate Biology
CREDIT HOURS: 3
A survey of the diversity, ecology and evolutionary history of the major invertebrate groups. Lectures will emphasize phylogenetics and diversity of body plans. Labs will emphasize identification and anatomy through dissections and observations.
PREREQUISITES: BIOL 2003.03
CROSSTLISTED: BIOL 3301.03
RESTRICTIONS: This course is restricted to MARI majors.
EXCLUSIONS: BIOL 3321X/Y.06
FORMATS: Lecture | Lab

MARI 3602 Introduction to Aquaculture
CREDIT HOURS: 3
This course offers an introductory overview of aquaculture, the culturing of aquatic plants and animals. The following topics are covered with both a Maritimes and global perspective: overview physico-chemistry of water, engineering, culture techniques, health, nutrition, genetics, environmental and socio-economic considerations.
PREREQUISITES: BIOL 2003.03
EXCLUSIONS: BIOL 3600.03, MARI 3600.03
FORMATS: Lecture

MARI 3603 Practical Aquaculture
CREDIT HOURS: 3
This course provides students with aquaculture practical experience. The laboratories involve finfish, shellfish and live feed, and help students acquire skills useful for conducting experiments with aquatic animals (e.g. marking, measuring, anaesthesia, etc.). Students collect real data and learn to conduct exploratory graphical and statistical analyses.
COREQUISITES: MARI 3602.03
PREREQUISITES: STAT 1060.03 and BIOL 2003.03
EXCLUSIONS: BIOL 3600.03, MARI 3600.03, BIOL 5603
FORMATS: Lab
MARI 3604 Field Aquaculture
CREDIT HOURS: 3
Hands-on learning of aquaculture techniques through field trips to several aquaculture-related facilities (e.g., farms, hatcheries, research institutes, government offices) in the Maritimes and through laboratory exercises in water quality analysis, necropsies, fish processing, knots/rope handling, and culturing of Artemia, rotifers, microalgae, and other species in the Aquatron's ongoing research.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Not offered every year.

PREREQUISITES: BIOL 2003.03 or Instructor's approval. MARI 3602.03 is recommended.

RESTRICTIONS: Restricted from students with fewer than 60 credit hours.

FORMATS: Lecture | Lab

MARI 3623 Applied Coastal Ecology
CREDIT HOURS: 3
Coastal Ecology explores anthropogenic impacts on the structure and function of coastal ecosystems. Through field trips, laboratories and guest demonstrations, students examine ecosystem health, e.g., communities on rocky shores, salt marshes and sandy shores, and will learn basic experimental design, principles of environmental assessment and monitoring, and coastal habitat remediation.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03)
CROSSLISTED: BIOL 3623.03, ENVS 3623.03
FORMATS: Lecture | Lab

MARI 3626 Field Studies of Marine Mammals
CREDIT HOURS: 3
Hands-on introduction to research on marine mammals. Lectures provide an overview of marine mammal adaptations, evolution, population biology, social organization, conservation, and management. Labs include a necropsy and techniques of photographic identification of individuals. On a several-day camping trip, students observe marine mammals from whale-watch boats and conduct research projects.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), and BIOL 3062.03 (or BIOL 3630.03 or PSYO 2160.03), and STAT 1060.03 (or equivalent)
CROSSLISTED: BIOL 3626.03
FORMATS: Lecture | Lab

MARI 3627 Biology and Conservation of Sharks, Skates and Rays
CREDIT HOURS: 3
This course offers a combination of lectures, labs, and field trips that explore the elements of elasmobranches (shark, skate and ray) biology and conservation. Students are introduced to current methods used in shark research, such as tagging, and learn about the role of sharks in ecosystems.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03) and BIOL 2003.03
FORMATS: Lecture | Lab

MARI 3628 Marine Ornithology
CREDIT HOURS: 3
Overview of the biology of birds in marine environments. Seabird ecology, evolution, adaptations, identification, and natural history. Tools and techniques for studying their behaviour, diet, and populations in the field. Lectures, exercises, and a week-long field trip to Maritime seabird breeding colonies. Student team and independent research projects and presentations.

CALENDAR NOTES: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.

PREREQUISITES: BIOL 1010 or BIOL 1020 or equivalent, and BIOL 1011 or BIOL 1021 or equivalent, or SCIE 15XX, one of BIOL 2003 or BIOL 2004, and BIOL 2060, or instructor's permission. Knowledge of statistics, Geographic Information Systems (GIS), and familiarity with Excel spreadsheets are helpful, but not required, for research projects.
CROSSLISTED: BIOL 3628.03
FORMATS: Lecture | Lab

MARI 3632 Applied Field Methods in Fish Ecology
CREDIT HOURS: 3
Practical experience conducting field research on fishes with field trips to streams and shallow water marine/freshwater habitats. Techniques include collecting fish, designing and conducting surveys, studying behaviour, measuring phenotypic variability, quantifying temporal and spatial variation, planning for statistical analysis, and weighing tradeoffs between data quality, quantity, costs and ethical/environmental considerations.
MARI 3633 Spatial Information and GIS in Ecology
CREDIT HOURS: 3
A hands-on approach to understanding and using spatial information, this course introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address an applied problem in ecology.

MARI 3635 Species at Risk Field Course
CREDIT HOURS: 3
This course provides practical field experience in the biology of Species at Risk (SAR). Students learn through lectures, presentations, field work, and writing a formal report. On a week-long field trip to Southwestern Nova Scotia, students learn from SAR biologists how to conduct field surveys, document data, and recover SAR.

MARI 3650 Ocean Technology for the Observation and Conservation of Marine Species
CREDIT HOURS: 3
This course offers lectures, labs, and field trips that explore the emerging field of ocean technology and observation efforts that are applied to the conservation of marine species. Students learn about applications of ocean technology, including remotely operated vehicles, acoustic receivers, and other tools used to track and manage species.

MARI 3664 Intertidal Ecology and Diversity
CREDIT HOURS: 3
Hands-on, intensive introduction to ecological research on rocky shores, tidal flats, and sandy beaches. Relevant ecological concepts, sampling techniques for flora and fauna, and statistical skills are learned. Field sampling on day and camping trips is followed by lab work (e.g., identification of seaweeds, invertebrates), statistical analysis, and report preparation.

MARI 3680 Scientific Diving Methods for Marine Ecology
CREDIT HOURS: 3
This course introduces students that are certified divers to the practice of underwater research using SCUBA. It combines lectures with supervised dives in various marine habitats to demonstrate the application of standard sampling and experimental procedures in marine ecology, with an emphasis on logistical considerations and diving safety.
CALENDAR NOTES: Offered every other summer through the SEASIDE program. An auxiliary fee is charged to cover costs of dive trips. For dates, times and special registration procedures, see seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 (or BIOA 3001.03) and STAT 1060.03 or SCIE 15xx, and an internationally recognized diving certification, and a diving physical. Recommended: BIOL 3221.03/MARI 3221.03, BIOL 3301.03
CROSSTOIZED: BIOL 3680.03
FORMATS: Lecture | Lab

MARI 3682 Tropical Marine Biology
CREDIT HOURS: 3
This course provides a practical introduction to tropical marine biology, including a multi-day field trip to tropical marine ecosystems (reef, mangrove, seagrass). Identification of species, ecological interactions and tropical marine conservation will be discussed. Evaluation includes, but is not limited to, lecture and field tests, presentations, field observations and reports.
CALENDAR NOTES: Field work involves snorkeling; students must be comfortable swimming for extended periods in open water. Offered in summer through SEASIDE. Special application procedure. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see: seaside.science.dal.ca.
PREREQUISITES: BIOL 2003.03 and BIOL 2060.03 or equivalent courses; or Instructor's permission. An introductory course in statistics and familiarity with spreadsheets (e.g. Excel) will be useful.
FORMATS: Lecture | Lab

MARI 3685 The Gulf of Eilat Ecosystem: Coral Reef and Subtropical Sea
CREDIT HOURS: 3
Introduction to physical, chemical, and biological oceanography, marine geology, biogeochemistry, and coral-reef biology. Focus is on subtropical seas, the coral reef ecosystem, and the unique characteristics of the Gulf of Eilat. Lectures, laboratories, demonstrations, field trips, exam, group field research projects in the sea, oral presentation, and scientific research paper.
CALENDAR NOTES: This is a field course given at the Eilat Ocean Studies Centre in Israel. Entry is restricted and requires submission of an application form
PREREQUISITES: OCEA 2000, STAT 1060 or permission of instructor
CROSSLISTED: OCEA 3685.03
FORMATS: Lecture | Lab

MARI 3761 Marine Ecology
CREDIT HOURS: 3
Building upon an understanding of basic ecological and evolutionary principles, and a familiarity with the major marine invertebrate and algal taxa, this course examines patterns and processes at the organismal, population and community levels that determine the diversity and distribution of life in the sea.
PREREQUISITES: BIOL 2060.03 (or BIOA 3001.03), and (BIOL 2003.03 or BIOL 2004.03) and OCEA 2000X/Y.06 or (OCEA 2001.03 and OCEA 2002.03)
CROSSLISTED: BIOL 3761.03
RESTRICTIONS: This course is restricted to 3rd and 4th year students.
FORMATS: Lecture | Lab

MARI 3800 Experiential Learning
CREDIT HOURS: 3
Experiential Learning recognizes the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the course coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and a timetable.
CALENDAR NOTES: To register in this course, a student must first find a suitable supervisor and sign a learning agreement between the course coordinator, the student and the supervisor.
PREREQUISITES: Students must be registered in a Biology or Marine Biology program, have completed a minimum of 18 credit hours in Biology or Marine Biology above the 1000 level and have a minimum cumulative GPA of 2.4 or permission of the course coordinator.
CROSSLISTED: BIOL 3800.03
EXCLUSIONS: Scheduled courses at a learning institution, study that would qualify for a Special Topics class, an Honours project, co-op work terms and paid work. Only one experiential learning course per degree is permitted.

MARI 4003 Coral Reefs and Environmental Change
CREDIT HOURS: 3
Coral reefs are iconic marine ecosystems both biologically and economically. This course introduces students to the biology of both tropical and cold-water corals, key characteristics of their abiotic environments, human impacts at both local and global scales, and management options for sustainable resource use and the protection of biodiversity.
PREREQUISITES: CHEM 1011.03/CHEM 1012.03 and BIOL 2060.03 and 6 credit hours in ENVS or BIOL or MARI at or above the 3000 level.
CROSSLISTED: ENVS 4003
MARI 4080 Laboratory Studies of Fishes
CREDIT HOURS: 3
Through a series of laboratory exercises, the course provides students with practical experience on various topics related to the study of ichthyology. Topics shall include the following: species identification; meristics and morphometrics; use of dichotomous keys; internal and external morphology; ageing and growth determination; ecomorphological attributes; data collection and analysis.
PREREQUISITES: BIOL 3080.03 or MARI 3080.03
CROSSLISTED: BIOL 4080.03
EXCLUSIONS: BIOL 3067.03, MARI 3067.03, BIOL 5067.03
FORMATS: Lab

MARI 4090 Evolutionary ecology of marine mammals
CREDIT HOURS: 3
Mammals evolved on land and then made their way into the ocean. The course considers how marine mammals adapted to this major change in habitat, so that they are now highly successful participants in the marine ecosystem. Students examine adaptations ranging from the cellular to social structure.
PREREQUISITES: One of MARI 3090.03, BIOL 3626.03, MARI 3626.03, BIOL 4060.03, MARI 4060.03 or permission of Instructor
EXCLUSIONS: BIOL 5651
FORMATS: Lecture

MARI 4215 Marine Plants in the 21st Century
CREDIT HOURS: 3
This course focuses on the growing importance of habitat-forming marine plants, including mangroves, saltmarshes, seagrass meadows, kelp forests and other seaweed beds. We cover issues around wild harvesting, aquaculture, blue carbon storage, bioprospecting, habitat restoration, ecosystem-based management, and climate change. Class format includes overview lectures, case-studies, discussions, and interactive work.
PREREQUISITES: BIOL 2060.03 and OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) and two of any of the following: MARI 3063.03/BIOL 3063.03 or BIOL 3065.03 or MARI 3221.03/BIOL 3221.03 or MARI 3602.03 or MARI 3623.03/BIOL 3623.03/ENVS 3623.03 or MARI 3664.03/BIOL 3664.03 /ENVS 3664.03 or BIOL 3761.03/MARI 3761.03.
EXCLUSIONS: MARI 5215
FORMATS: Lecture | Tutorial

MARI 4323 Biologging & Biotelemetry in Ecology
CREDIT HOURS: 3
This course explores the fundamentals and applications of biologging and biotelemetry: the use of electronic tags to study free-ranging animals and their environment. Students are introduced to the wide range of tags and their diverse applications in biology.
PREREQUISITES: BIOL 2060.03 or BIOA 3001.03 or PSYO/NESC 2160.03 or permission of the instructor.
CROSSLISTED: BIOL 4323.03
FORMATS: Lecture | Lab

MARI 4350 Cutting Edge in Marine Science
CREDIT HOURS: 3
This course focuses on current, often hotly debated topics in marine science. We discuss recently published papers and current research initiatives on urgent issues, including biodiversity, fisheries, conservation, management, climate change, and human-ocean interactions. Class format includes lectures, case-studies, as well as active discussion, debates, group work and hands-on assignments.
PREREQUISITES: BIOL 2060.03 and OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) and one of any of the following: BIOL 3065.03, MARI 3063.03, BIOL 3067.03, MARI 3067.03, MARI 3080.03, BIOL 3600.03, MARI 3600.03, MARI 3602.03 or MARI 3761.03.
CROSSLISTED: MARI 5350.03
FORMATS: Lecture | Tutorial

MARI 4369 Fisheries Oceanography
CREDIT HOURS: 3
See course description for OCEA 4160.03, in the Oceanography section of this calendar.

**MARI 4370 Deep Sea Biology**
CREDIT HOURS: 3
See course description for OCEA 4370.03, in the Oceanography section of this calendar.

**MARI 4600 Ecosystem Modelling for Aquaculture**
CREDIT HOURS: 3
Learn a collection of tools for the sustainable utilization of aquatic resources. Emphasis is on bilateral interactions between aquaculture and the environment. Topics include water/sediment/biota variability, carrying capacity, invasive species, habitat destruction/creation, ecosystem functions/services, climate changes, etc. Tools include data analysis/modelling/visualization/mapping using Python™ (prior programming experience is not required).
PREREQUISITES: MARI 3602.03 or Instructor's approval
RESTRICTIONS: Restricted from students with fewer than 60 credit hours
FORMATS: Lecture

**MARI 4661 Biological Oceanography**
CREDIT HOURS: 3
See course description for OCEA 4140.03, in the Oceanography section of this calendar.

**MARI 4662 Biology of Phytoplankton**
CREDIT HOURS: 3
This is an upper-division course on the phytoplankton in the context of their evolutionary history and ecological diversity, with an emphasis on their adaptations and acclimation to different environments and their role in food webs and in biogeochemical cycling.
PREREQUISITES: MATH 1000.03 (or MATH 1215.03) and MATH 1010.03 or equivalent, and OCEA 2001.03 and OCEA 2002.03; or permission of Instructor
CROSSLISTED: OCEA 4230, OCEA 5230, BIOL 4662
EXCLUSIONS: E1, E2
FORMATS: Lecture | Discussion

**MARI 4664 History of Marine Sciences**
CREDIT HOURS: 3
In this course, we will trace the history of marine sciences from the ancients to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped human understanding of the oceans.
PREREQUISITES: Instructor's consent
CROSSLISTED: BIOL 4664.03, OCEA 4331.03/5331.03, HIST 3073.03, HSTC 3331.03, SCIE 4001.03
FORMATS: Lecture

**MARI 4665 Hacking the blue planet: The scientific and social dimensions of ocean fertilization**
CREDIT HOURS: 3
This course explores the biology, ecology, biogeochemistry and ethical and legal dimensions of purposeful ocean fertilization. Through lectures, discussion, case studies, and group projects, students consider the biological and oceanographic basis of ocean fertilization and its use as a 1) scientific tool and 2) controversial geoengineering strategy for climate change mitigation.
PREREQUISITES: One of the BIOL 3101.03, OCEA 2000X/Y.06, ERTH 3601.03, BIOL 3060.03 or instructor's permission
CROSSLISTED: OCEA 4665.03
EXCLUSIONS: BIOL 5665.03, OCEA 5665.03
FORMATS: Lecture | Discussion

**MARI 4666 Benthic Ecology**
CREDIT HOURS: 3
See course description for OCEA 4330.03, in the Oceanography section of this calendar.
MARI 4806 Independent Research I  
CREDIT HOURS: 3  
Students conduct supervised, independent research in Marine Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.  
CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html  
PREREQUISITES: Signature required  
FORMATS: Other (explain in comments)

MARI 4807 Independent Research II  
CREDIT HOURS: 3  
Students conduct supervised, independent research in Marine Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.  
CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For forms and more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html  
PREREQUISITES: Signature required  
FORMATS: Other (explain in comments)

MARI 4809 Independent Research III  
CREDIT HOURS: 3  
Students conduct supervised, independent research in Biology. The student and faculty supervisor together develop a course outline, with a proposal for original research and the method of evaluation, including a formal research paper. Outline must be approved by the course coordinator before the student is permitted to register.  
CALENDAR NOTES: This course is intended for Biology or Marine Biology majors in their fourth year of study. The signature required to register can only be given by the Chair of the Biology Undergraduate Curriculum Committee or their designate. The course outline must be submitted for approval no later than one week after the start of the term in which the student wishes to register. For more information see https://www.dal.ca/faculty/science/biology/programs/undergraduate.html  
PREREQUISITES: Signature required  
FORMATS: Other (explain in comments)

MARI 4880 Communicating science for societal impact  
CREDIT HOURS: 3  
This class is for students interested in communicating scientific content with relevance to society, contributing to positive change. We aim to build skills to reach media, decision makers, regulators, and the public. The emphasis will be on communicating findings effectively and developing critical skills in science communication and scientific leadership.  
CROSSLISTED: BIOL 4880  
RESTRICIONS: E3  
FORMATS: Lecture | Tutorial | Experiential Learning

MARI 4901 Honours Research and Thesis I  
CREDIT HOURS: 3  
This course is required for, and restricted to, all Marine Biology Honours programs in which Marine Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (MARI 4901.03 and MARI 4902.03) are normally taken in the students' final year. See Marine Biology and Biology Honours webpage for more details (https://www.dal.ca/faculty/science/biology/honours.html).  
CALENDAR NOTES: MARI 4901.03 and MARI 4902.03 must be taken in consecutive fall/winter or winter/fall terms (Co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated.  
PREREQUISITES: Permission of Honours Coordinator  
CROSSLISTED: BIOL 4901.03  
EXCLUSIONS: BIOL 4900.06 and MARI 4900.06  
FORMATS: Other (explain in comments)

MARI 4902 Honours Research and Thesis II
CREDIT HOURS: 3
This course is required of, and restricted to, all Marine Biology Honours programs in which Marine Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class. The classes (MARI 4901.03 and MARI 4902.03) are normally taken in the students' final year.

CALENDAR NOTES: MARI 4901.03 and MARI 4902.03 must be taken in consecutive fall/winter or winter/fall terms (Co-op only). Grades will not be recorded for either course until both have been completed, and the final Honours Thesis has been evaluated. See Biology Honours homepage for more details (https://www.dal.ca/faculty/science/biology/honours.html). https://www.dal.ca/faculty/science/biology/honours.html

PREREQUISITES: Permission of Honours Coordinator
CROSSLISTED: BIOL 4902.03
RESTRICTIONS: Students in the Marine Biology Honours Programme, normally in their final year of study.
EXCLUSIONS: BIOL 4900.06 and MARI 4900.06
FORMATS: Other (explain in comments)

MARI 8891 Co-op Workterm 1
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.03

MARI 8892 Co-op Workterm 2
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.03, MARI 8891.00

MARI 8893 Co-op Workterm 3
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.03, MARI 8892.00

MARI 8894 Co-op Workterm 4
CREDIT HOURS: 0
PREREQUISITES: MARI 8893.00 and SCIE 2800.03

Introduction
The Mathematics division offers a full range of programs aimed at students of diverse interests and levels. This includes honours, major, minor and joint degree programs. We work closely with students to choose a program that is the right fit for their interests and goals. Mathematics is a creative activity with its own intrinsic value and beauty. Mathematics also provides a solid foundation for
every scientific field. A degree in mathematics can prepare students for a career in academia, industry, management, information technology, banking, teaching, and other areas.

**General Interest Courses**
We offer a number of courses for students not majoring in Mathematics:

- **MATH 1000.03/MATH 1010.03**: These core calculus courses are the starting point for any degree program in the sciences.
- **MATH 1030.03/MATH 2040.03**: These courses serve as introductions to matrix theory, linear equations and linear algebra, topics of importance in many fields.
- **MATH 1060.03**: This course serves as an introduction to the basic ideas of statistics, through examples drawn from a wide variety of disciplines.
- **MATH 1215.03**: This course emphasizes the application of calculus to the life sciences.
- **MATH 2110.03**: This course is concerned with the foundations of mathematics, including logic, set theory, and proof techniques.
- **MATH 2300.03**: Topics from science and technology are used to motivate and illustrate basic mathematical tools of linear algebra and calculus. Mathematical software such as Matlab and Maple is also introduced.

Six credit hours of Mathematics or Statistics are required for a BSc degree. The following courses may not be used to satisfy this requirement: MATH 1001.03, MATH 1002.03, MATH 1003.03, MATH 1115.03, MATH 1315.03.

**Degree Programs**
The Department of Mathematics and Statistics offers the following degree programs in Mathematics:

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc (90 credit hour) Minor in Mathematics
- Minor in Mathematics (added to a 120 credit hour degree)

* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A BSc degree is the choice of most students in Mathematics; however, a BA degree option is also available for each of the programs listed below. The Departmental requirements for each BA degree program are the same as those of the corresponding BSc degree program; however, students are advised that some of the general College of Arts and Science requirements differ for the BA and BSc degrees. Minors and certificates that can be combined with a BSc degree can also be combined with a BA degree.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Mathematics undergraduate academic advisor. Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies.

Students in any Mathematics program are strongly encouraged to include CSCI 1105.03 and CSCI 1110.03 in their programs.

BSc (120 credit hour) Concentrated Honours in Mathematics
An Honours degree offers an in-depth preparation in undergraduate mathematics, including an independent research experience. This degree option is recommended for students interested in eventually pursuing graduate studies in mathematics. Honours students complete a minimum of 54 credit hours above the 1000 level in Mathematics with a minimum GPA of 3.0 and write an Honours Comprehensive Examination.

Admission to Honours
Students must apply for admission to Honours programs. Students considering Honours in Mathematics should consult with a Mathematics Honours Advisor early in their studies to have their programs approved.

Departmental requirements
The Department offers two Honours streams in Mathematics: (A) Pure Mathematics and (B) Applied Mathematics. Stream A emphasizes the power and beauty of mathematics as an independent academic discipline. Stream B emphasizes the connections between mathematics and other scientific disciplines. Both streams follow the same courses for the first two years. Students decide which stream to pursue during their second year.

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc Concentrated Honours program in Mathematics must complete the following courses:

1000 level
- MATH 1000.03/MATH 1010.03 (or equivalent)
- MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level
- MATH 2001.03: Intermediate Calculus I/MATH 2002.03: Intermediate Calculus II
- MATH 2135.03: Linear Algebra and MATH 2505.03: Introductory Analysis
- Fifteen additional credit hours in mathematics at or above the 2000 level - not including courses listed below

3000 level
- MATH 3031.03: Abstract Algebra I and MATH 3501.03: Intermediate Analysis I
- Students in Stream A are required to take MATH 3032.03: Abstract Algebra II and MATH 3502.03: Intermediate Analysis II
- Students in Stream B are required to take MATH 3080.03: Introduction to Complex Variables and (MATH 3120.03: Differential Equations or MATH 3260.03: Applied Differential Equations)

4000 level
- MATH 4950.03: Honours Research Project
- Twelve additional credit hours at or above the 4000 level

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03

Programming requirement
- Students must complete a 3-credit course that incorporates computer programming. Suggested course is one of CSCI 2202, MATH/STAT 2300, PHYC 2050/MATH 2052, or permission of advisor.

Students in Stream A are advised to include a selection of courses from the following list in their programs:
Students in Stream B are advised to include a selection of courses from the following list in their programs:

- MATH 2060.03: Introduction to Probability and Statistics
- MATH 2300.03: Mathematical Modelling
- MATH 3032.03: Abstract Algebra II
- MATH 3045.03: Curves and Surfaces
- PHYC 3050.03: Introduction to Numerical Programming
- MATH 3300.03: Optimization
- MATH 3330.03: Applied Graph Theory
- MATH 3360.03: Probability
- MATH 3400.03: Classical Game Theory
- MATH 3502.03: Intermediate Analysis II
- MATH 3900.03: Financial Mathematics

**Honours Comprehensive Examination**

The Honours Comprehensive Examination in mathematics consists of a written paper of about 20-30 pages researched and prepared by the student. The topic is decided on in conjunction with the Honours advisor. The paper is also presented to the honours seminar. The work for this paper is done as part of the required course MATH 4950.03: Honours Research Project.

**BSc (120 credit hour) Combined Honours in Mathematics and another subject**

Students who wish to study Mathematics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Mathematics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. Students contemplating a Combined Honours program in Mathematics and another subject should bear in mind, however, that the work in either subject may be insufficient for admission to a regular graduate program.

Students planning to enrol in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Mathematics, this requirement is satisfied through MATH 4950.03.

**Departmental Requirements**

Students in a BSc Combined Honours program in Mathematics and another subject must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. A combined total of 66 credit hours above the 1000 level must be completed in two subjects, with a minimum of 30 credit hours above the 1000 level in each subject. In addition, students must complete a minimum of 18 credit hours at the 3000 level or above in each of the primary and secondary subjects.

**Mathematics as the primary subject**

The Mathematics part of a Combined Honours program in Mathematics and another subject will be designed to suit the needs and interests of the student. However, the program must be approved by a Mathematics Honours Advisor and an Honours advisor from the other subject. Students will normally complete MATH 4950.03 Honours Research Project.

**Mathematics as the secondary subject**

The Mathematics part of a Combined Honours program in Mathematics and another subject will be designed to suit the needs and interests of the student. However, the program must be approved by a Mathematics Honours Advisor and an Honours advisor from the other subject.
Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03

BSc (120 credit hour) Major in Mathematics
The 120 credit hour Major is suited to students who want to focus on Mathematics, but wish to have a program that is somewhat less constrained than the Honours program. Students in a Major program normally choose to concentrate in Pure Mathematics, Applied Mathematics or Mathematics Education.

Departmental Requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc Major program in Mathematics must complete the following courses:

1000 level

- MATH 1000.03/MATH 1010.03 (or equivalent)
- MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level

- MATH 2001.03: Intermediate Calculus I/MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II (or MATH 2135.03: Linear Algebra)
- At least one of MATH 2110.03: Logic and set theory (or MATH 2112.03: Discrete Structures I), MATH 2051.03: Problems in Geometry or MATH 2505.03: Introductory Analysis
- Six additional credit hours in MATH at or above 2000 level
- Three credit hours in a STAT course at or above 2000 level

3000 level

- 24 additional credit hours in MATH at or above the 3000 level. This selection may not include MATH 3700.03: Mathematics for Economists, MATH 3800.03: Financial Economics.

Programming requirement

- Students must complete a 3-credit course that incorporates computer programming. Suggested course is one of CSCI 2202, MATH 2300/STAT 2300, PHYC 2050/MATH 2052, or permission of advisor.

Students wishing to concentrate in Applied Mathematics should choose the additional MATH courses from

- MATH 2060.03: Introduction to Probability and Statistics/MATH 2080.03: Statistical Methods for Data Analysis and Inference
- MATH 2120.03: Methods for Ordinary Differential Equations/MATH 3120.03: Differential Equations
- MATH 2300.03: Mathematical Modelling
- MATH 3120.03: Differential Equations
- MATH 3210.03: Introduction to Numerical Analysis
- MATH 3300.03: Optimization
- MATH 3330.03: Applied Graph Theory
- MATH 3400.03: Classical Game Theory

Students wishing to concentrate in Pure Mathematics should choose the additional MATH courses from

- MATH 2060.03: Introduction to Probability and Statistics/MATH 2080.03
- MATH 2120.03: Methods for Ordinary Differential Equations/MATH 3120.03: Differential Equations
- MATH 3031.03: Abstract Algebra I/MATH 3032.03: Abstract Algebra II
- MATH 3045.03: Curves and Surfaces
- MATH 3070.03: Theory of Numbers
- MATH 3080.03: Introduction to Complex Variables

Students contemplating a career in Mathematics Education should choose the additional MATH courses from
• MATH 2051.03: Problems in Geometry
• MATH 2060.03: Introduction to Probability and Statistics/MATH 2080.03
• MATH 2110.03: Logic and set theory
• MATH 2113.03: Discrete Structures II
• MATH 2300.03: Mathematical Modelling
• MATH 3031.03: Abstract Algebra I/MATH 3032.03: Abstract Algebra II
• MATH 3070.03: Theory of Numbers
• MATH 3080.03: Introduction to Complex Variables
• MATH 3140.03: Introduction to Wavelets
• MATH 3300.03: Optimization
• MATH 3330.03: Applied Graph Theory
• MATH 3400.03: Classical Game Theory

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03

**BSc or BA (120 credit hour) Double Major in Mathematics and another subject**

The Double Major degree program allows students to combine the study of Mathematics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Mathematics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program are advised to review their proposed program of study with advisors in both subject areas.

*Departmental requirements*

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc or BA Double Major program in Mathematics and another subject must complete the following:

**Mathematics as the primary subject**

Student completing a double major with Mathematics as the primary subject can fulfill the Mathematics requirements by following one of two programs below.

**Pure Mathematics**

**1000 level**

MATH 1000.03/MATH 1010.03 (or equivalent)

**2000 level**

• MATH 2001.03: Intermediate Calculus I and MATH 2002.03: Intermediate Calculus II
• MATH 2040.03: Matrix Theory and Linear Algebra II (or MATH 2135.03: Linear Algebra)
• At least two of MATH 2110.03: Logic and set theory (or MATH 2112.03: Discrete Structures I), MATH 2051.03: Problems in Geometry, MATH 2505.03: Introductory Analysis

**3000 level**

• 18 additional MATH credit hours at or above the 3000 level. This selection may not include MATH 3700.03: Mathematics for Economists, MATH 3800.03: Financial Economics.

**Programming requirement**

• Students must complete a 3-credit course that incorporates computer programming. Suggested course is one of CSCI 2202.03, MATH 2300.03/STAT 2300.03, PHYC 2050.03/MATH 2052.03, or permission of advisor.

**Applied Mathematics**
1000 level

- MATH 1000.03/MATH 1010.03 (or equivalent)

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2040.03: Matrix Theory and Linear Algebra II (or MATH 2135.03: Linear Algebra)
- MATH 2120.03: Methods for Ordinary Differential Equations and MATH 2002.03: Intermediate Calculus II
- MATH 2060.03: Introduction to Probability and Statistics or MATH 2080.03: Statistical Methods for Data Analysis and Inference

3000 and 4000 level

- MATH 3120.03 or MATH 3260.03
- At least 15 credit hours selected from: MATH 3045.03, MATH 3080.03, MATH 3210.03, MATH 3300.03, MATH 3330.03, MATH 3340.03, MATH 3360.03, MATH 3400.03, MATH 3900.03, MATH 4190.03, MATH 4220.03, MATH 4230.03, MATH 4250.03, MATH 4320.03, MATH 4370.03, MATH 4540.03.

Programming requirement

- Students must complete a 3-credit course that incorporates computer programming. Suggested course is one of CSCI 2202.03, MATH 2300.03/STAT 2300.03, PHYC 2050.03/MATH 2052.03, or permission of advisor.

Mathematics as the secondary subject

A student enrolled in a Double Major with Mathematics as the secondary subject also fulfills the Mathematics requirements by following one of the programs listed above for a Double Major with Mathematics as the primary subject.

Note: Students will not receive credit for taking MATH 1115.03 after receiving credit for MATH 1000.03, MATH 1500X, or MATH 1215.03.

BSc (90 credit hour) Minor in Mathematics

The 90 credit hour Minor in Mathematics is appropriate for students who want to study some Mathematics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Mathematics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc in Mathematics is usually the preferred option for students who wish to combine studies in Mathematics with a degree in Engineering (see BSc/BEng Concurrent Program).

See the Minor in Mathematics section of this Calendar.

Minor in Mathematics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

BA or BSc (90 credit hour) degree program with a Minor in Mathematics is also available.

Requirements

* A minimum of 18 credit hours in MATH courses at the 2000 level or higher to a maximum of 36 credit hours.

* It is recommended that students take MATH 1010 and MATH 1030. These are prerequisites for many other upper-level MATH courses.

Contact Mathematics and Statistics for more information.
Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Mathematics
Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Mathematics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates
In combination with a BSc in Mathematics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section of the calendar.

Certificates of particular interest to students enrolled in a BSc in Mathematics include:

• Certificate in Actuarial and Financial Mathematics
• Certificate in Applied and Computational Mathematics

BSc/BEng Concurrent Program
BEng/BSc (90 credit hour) concurrent degree (Mathematics)

This degree combines an engineering degree with a deeper knowledge of mathematics, and provides a strong foundation for students interested in areas such as robotics, telecommunications, systems analysis and modelling. Following is the recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Mathematics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Mathematics and Statistics. A concurrent BEng/BSc Honours Mathematics program can be designed for interested candidates.

Year 2: ENGM 2101 *Applied Vector Calculus* | ENGM 2022 *Applied Differential Equations* |
ENGM 2032 *Applied Probability & Statistics* | HSTC 1801 *History of Engineering II* |
Writing course (Humanities)  
Two 2000 level (or higher) MATH courses (may not be MATH 2001 or MATH 2120)  
One social science course  
One Engineering elective  
Two 2000 level (or higher) MATH courses (may not be MATH 2001 or MATH 2120)  
One social science or humanities course  

Year 3  
IENG 2005 Engineering economics  
ECED 2000 Electric circuits  
ENGI 2102 Thermo-Fluid Engineering I  
One 3000 level (or higher) MATH\textsuperscript{e} course (may not be MATH 2001 or MATH 2120)  
One Science/FASS course (may be MATH)  

Graduate with Diploma in Engineering and BSc 90 credit degree  
Year 4  Continue in BEng program  
Year 5  Complete BEng program  

\textsuperscript{c} To meet the BSc 90 credit hour Minor in Mathematics requirements, students complete 30 credit hours in addition to their Engineering requirements: 12 credit hours of MATH courses at or above the 2000 level, as specified above, 6 MATH credit hours at or above the 3000 level, 6 credit hours of social science/humanities courses, and 6 credit hours in Science/FASS courses (which may be MATH)  

\textsuperscript{b} Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements [College of Arts and Science]  

\textsuperscript{d} Choose from CANA, CTMP, ECON, EMSP, EURO, GWST, HIST, HSTC, INTD, POLI, PSYO, SOSA, SUST for social science courses. Choose from ARBC, CANA, CHIN, CLAS, CTMP, CRWR, EMSP, EURO, SWST, GERM, HIST, HTSC, ITAL, PERF, PHIL, RELS, RUSN, SPAN and THEA for humanities courses  

\textsuperscript{e} See Engineering section of the calendar for details  

\textsuperscript{c} Upper level courses that may be of particular interest to Engineering students include MATH 4220, MATH 4230 and MATH 4165  

Notes:  
- For a BEng/BSc with Minor in Math, students will not receive credit for MATH 1030, MATH 2001 or MATH 2120  
- Completion of ENGM 2101, ENGM 2022 and ENGM 2032 fulfill the Math Minor requirements for MATH 2001 and MATH 2120  
- ENGM 1041 fulfills the MATH 1030 requirement for the Math minor  

Courses  

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.  

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, fourth year. Courses numbered at the 5000 level or above are graduate
level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses so designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department.

Course Notes
Course descriptions for Statistics can be found in the calendar under Statistics.

Credit may not be obtained twice for the same course even if the numbers have been changed.

Courses with the designation (MLC) are supported by the tutorial services of the Math Learning Centre.

The following three courses below the 1000 level are offered by the College of Continuing Education. Students register and pay for them at the College of continuing Education located at 1220 LeMarchant Street, 2nd Floor or by calling (902) 494-2375 (see College of Continuing Education for more details).

Course Descriptions

MATH 0009 Academic Math
CREDIT HOURS: 0
Academic Math has been developed to prepare you for the math involved in non-calculus courses. If you have solid math skills (at least grade 11 academic level) and want to develop them to the university level necessary for entrance to the Faculty of Arts, Bachelor of Commerce, Management, or Nursing programs, this course is designed for you. MATH 0009.00 is accepted by Dalhousie University in place of NS Math 12 Academic.
PREREQUISITES: At least grade 10 academic math or equivalent
FORMATS: Lecture | Tutorial

MATH 0010 Pre-Calculus Accelerated
CREDIT HOURS: 0
This single-term accelerated course has been designed for calculus bound students, who have a firm grasp of grade 11 and 12 math skills. Focus is placed on pre-calculus key concepts, assuming students have current knowledge of grade 11 and 12 math concepts. Students requiring review of grade 11 and 12 concepts should take Pre-Calculus Plus (MATH 0011.00). Topics are explored in class following a clear, logical progression, with mastery generally occurring after assignments are completed.
PREREQUISITES: Recommend at least 80% in grade 11 and 12 math
FORMATS: Lecture | Tutorial

MATH 0011 Pre-Calculus Plus
CREDIT HOURS: 0
This full year course has been designed for the majority of students either requiring pre-calculus to gain admittance to the Dalhousie BSc program or as preparation for MATH 1000.03. This course provides a more in depth coverage of math concepts than found in the accelerated 1 term class, and adds a review of relevant 11 and 12 material, as well as a study of area under a curve. Students who have been away from math for 2 or more years, or have a heavy schedule, will find this course a better fit than the accelerated MATH 0010.00. Throughout the course, algebra, and applied geometric problem solving skills needed for calculus, are emphasized.
PREREQUISITES: Grade 11 and 12 math or equivalent
FORMATS: Lecture | Tutorial

MATH 1000 Differential and Integral Calculus I
CREDIT HOURS: 3
This course offers a self-contained introduction to differential and integral calculus. The topics include functions, limits, differentiation of polynomial, trigonometric, exponential and logarithmic functions, product, quotient and chain rules, applications of differentiation, antiderivatives and definite integrals, integration by substitution. A sequel to this course is MATH 1010.03.
PREREQUISITES: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus. Pre-calculus is highly recommended.
EXCLUSIONS: MATH 1215.03, MATH 1280.03, MATH 1500X/Y.06
FORMATS: Lecture

MATH 1010 Differential and Integral Calculus II
MATH 1030 Matrix Theory and Linear Algebra I
CREDIT HOURS: 3
This course is a self-contained introduction to Matrix Theory and Linear Algebra. Topics include: systems of linear equations, vectors in \( \mathbb{R}^n \), matrices, spans, linear independence, bases, dimension, linear transformations in \( \mathbb{R}^n \), determinants, eigenvalues and eigenvectors, diagonalization, applications.
PREREQUISITES: Nova Scotia Advanced Mathematics 11 or 12 (or equivalent)
EXCLUSIONS: MATH 2030.03
FORMATS: Lecture

MATH 1060 Introductory Statistics for Science and Health Sciences
CREDIT HOURS: 3
See course description for STAT 1060.03 in the Statistics section of this calendar.

MATH 1215 Life Sciences Calculus
CREDIT HOURS: 3
This course emphasizes the application of calculus to the life sciences. The concepts and content studied include derivatives, techniques of differentiation, logarithmic and exponential functions, optimization, basic ordinary differential equations, integration, and techniques and applications of integration.
CALENDAR NOTES: Students who have already received credit for MATH 1215.03 cannot subsequently receive credit for MATH 1115.03.
PREREQUISITES: Nova Scotia Mathematics 11 and 12 or pre-calculus is highly recommended.
EXCLUSIONS: MATH 1000.03, MATH 1280.03, MATH 1500.06
FORMATS: Lecture | Tutorial

MATH 1280 Engineering Mathematics I
CREDIT HOURS: 3
This forms an introduction to differential and integral calculus for Engineering students. All topics of MATH 1000.03 are covered, but in greater depth. In addition, this course covers functions, differentiation of polynomial, trigonometric, exponential and logarithmic functions, product, quotient and chain rules, Taylor series, antiderivatives and definite integrals, Riemann sums, polynomial approximations, and numerical approximations of integrals.
CALENDAR NOTES: Students who have already received credit for MATH 1280.03 cannot subsequently receive credit for MATH 1000.03 or MATH 1115.03.
PREREQUISITES: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus. Pre-calculus is highly recommended.
EXCLUSIONS: MATH 1000.03, MATH 1215.03
FORMATS: Lecture | Tutorial

MATH 1290 Engineering Mathematics II
CREDIT HOURS: 3
This course is a sequel to MATH 1280. All topics of MATH 1010.03 are covered, but in greater depth. This course also introduces the students to the application of mathematics in engineering problems.
CALENDAR NOTES: 1: Students who have already received credit for MATH 1290.03 cannot subsequently receive credit for MATH 1010.03 2: MATH 1010.03 is not equivalent to MATH 1290.03
PREREQUISITES: MATH 1280.03
FORMATS: Lecture | Tutorial

MATH 1315 Discrete Mathematics for Computer Science
CREDIT HOURS: 3
This course is an introduction to formal reasoning and discrete mathematics with applications to computer science. Students will be introduced to formal notation and reasoning about problems and algorithms. Topics include: sets, sequences, and summations, simple proof techniques, elementary number theory, back-of-the-envelope approximations, combinatorial objects. Applications and relevance of these concepts in computer science will be emphasized.
EXCLUSIONS: CSCI 1315.03, MATH 2112.03
FORMATS: Lecture
MATH 2001 Intermediate Calculus I
CREDIT HOURS: 3
Topics include review of parametric equations, polar coordinates, conic sections, coordinate systems and vectors, dot product and cross product, vector functions, derivatives and integrals of vector functions, arc length and curvature, functions of several variables and partial derivatives, directional derivatives and double and triple integrals.
PREREQUISITES: MATH 1010.03
FORMATS: Lecture

MATH 2002 Intermediate Calculus II
CREDIT HOURS: 3
Topics include multiple integrals and changes of variables, and vector calculus, with an emphasis on Green's and Stokes' theorems. The course also includes an introduction to second order ordinary differential equations.
PREREQUISITES: MATH 2001.03
FORMATS: Lecture

MATH 2040 Matrix Theory and Linear Algebra II
CREDIT HOURS: 3
This course is a continuation of MATH 1030.03. Topics include: vector spaces and linear transformations, complex numbers, real and complex inner product spaces, orthogonal and orthonormal bases, Gram-Schmidt procedure, orthogonal projections, generalized Fourier series, orthogonal and unitary transformations, diagonalization of symmetric and hermitian matrices, quadratic forms, least squares approximation and curve fitting, applications.
PREREQUISITES: MATH 1030.03 or 2030.03, and MATH 1000.03 or MATH 1215.03
EXCLUSIONS: MATH 2135.03
FORMATS: Lecture

MATH 2051 Problems in Geometry
CREDIT HOURS: 3
This is a basic course for all students interested in geometry. Topics from Euclidean and non-Euclidean geometry may include: transformation geometry, symmetry groups, frieze groups, wallpaper groups and the crystallographic restrictions, similarities; projective geometry and the classical theorems of Menelaus, Ceva, Desargues, Pappus, Pascal; hyperbolic geometry.
PREREQUISITES: MATH 1010.03
FORMATS: Lecture

MATH 2052 Introduction to Numerical Programming
CREDIT HOURS: 3
See PHYC 2050
PREREQUISITES: PHYC 1190.03/1290.03 or equivalent , or MATH 1010.03 or equivalent
CROSSLISTED: PHYC 2050.03
EXCLUSIONS: MATH 2400.03
FORMATS: Lecture

MATH 2060 Introduction to Probability and Statistics
CREDIT HOURS: 3
See course description for STAT 2060.03 in the Statistics section of this calendar.
PREREQUISITES: Math 1000 or Math 1215 or Math 1500 or 1500X/Y

MATH 2080 Statistical Methods For Data Analysis and Inference
CREDIT HOURS: 3
See course description for STAT 2080.03 in the Statistics section of this calendar.

MATH 2110 Logic and Set Theory
CREDIT HOURS: 3
This course is an introduction to the foundations of modern mathematics, including basic set theory, proof techniques, and programming. Topics include: set-theoretic encoding of mathematical entities: tuples, relations, numbers, sequences, families; set comprehension; cardinality; sets and classes; proof techniques; existential and universal quantifiers; induction; proof by contradiction; programming as a tool for problem solving.
EXCLUSIONS: MATH 2112.03
MATH 2112 Discrete Structures I
CREDIT HOURS: 3
This course together with MATH 2113.03 offers a survey of the following areas: set theory, mathematical induction, number theory, relations, functions, algebraic structures and introductory graph theory. The topics to be discussed are fundamental to most areas of Mathematics and have wide applicability to Computer Science.
PREREQUISITES: Nova Scotia Mathematics 441 or equivalent
CROSSLISTED: CSCI 2112.03
FORMATS: Lecture

MATH 2113 Discrete Structures
CREDIT HOURS: 3
This course continues CSCI 2112.03/MATH 2112.03. This course covers some basic concepts in discrete mathematics which are of particular relevance to students of computer science, engineering, and mathematics. The topics to be covered will include solution of recurrence relations, generating functions, number theory, Chinese remainder theorem, trees and graphs, finite state machines, abstract algorithms, Boolean algebra.
PREREQUISITES: MATH 1315.03 or MATH 2110.03 or MATH 2112.03
CROSSLISTED: CSCI 2113.03
FORMATS: Lecture

MATH 2120 Methods for Ordinary Differential Equations
CREDIT HOURS: 3
A comprehensive introduction to the theory of ordinary differential equations (ODEs), which is a broad field in pure and applied mathematics with numerous applications in other sciences. The topics include: special types of ODEs of 1st order, homogeneous and inhomogeneous linear ODEs with constant coefficients, Laplace transforms, systems of ODEs.
COREQUISITES: MATH 1030.03 or 2030.03
PREREQUISITES: MATH 1010.03 or permission of the instructor
FORMATS: Lecture

MATH 2135 Linear Algebra
CREDIT HOURS: 3
This course is a continuation of MATH 1030.03 or 2030.03 with an emphasis on foundations and the theory of vector spaces and linear transformations. Additional topics include inner product spaces, symmetric and orthogonal transformations, bilinear forms, similarity and diagonalization, the solution of linear differential equations, and various applications in mathematics, physics and computer science.
PREREQUISITES: MATH 1030.03 (or MATH 2030.03) and MATH 1000.03
EXCLUSIONS: MATH 2040.03
FORMATS: Lecture

MATH 2300 Mathematical Modelling
CREDIT HOURS: 3
By using fundamental calculus concepts in a modelling framework, the student investigates practical problems chosen from common experiences encompassing many academic disciplines, including the mathematical sciences, operations research, engineering and the management and life sciences. A significant part of the course is learning to use MAPLE as a mathematical tool.
COREQUISITES: MATH 1030.03 or 2030.03
PREREQUISITES: MATH 1000.03
CROSSLISTED: STAT 2300.03
FORMATS: Lecture

MATH 2505 Introductory Analysis
CREDIT HOURS: 3
This course is for honours students and other serious students of mathematics. Topics include: the axioms for the real number system, geometry and topology of Euclidean space, limits, continuity, differentiability, the inverse and implicit function theorems.
PREREQUISITES: MATH 2001.03
FORMATS: Lecture
MATH 2600 Theory of Interest and Life Contingencies
CREDIT HOURS: 3
Simple and compound interest are covered in detail. Topics include: nominal and effective rates of interest/discount, force of interest, annuities, perpetuities, and bonds.
PREREQUISITES: MATH 1010.03, MATH 1115.03 or MATH 1215.03
CROSSLISTED: STAT 2600.03
FORMATS: Lecture

MATH 3031 Abstract Algebra I
CREDIT HOURS: 3
Groups, subgroups, permutation groups, cosets, direct products, fundamental theorem of finitely generated abelian groups, simple groups, group homomorphisms, factor groups, isomorphism theorems of groups, series of groups, Sylow theorems and applications. Additional topics may include free groups, group actions, and groups in Topology.
PREREQUISITES: MATH 2040.03 or MATH 2135.03
EXCLUSIONS: MATH 3030X/Y.06
FORMATS: Lecture

MATH 3032 Abstract Algebra II
CREDIT HOURS: 3
Rings, fields, integral domains, Fermat's theorem, Euler's theorem, ideals, quotient rings, prime and maximal ideals, factorization of polynomials, Gröbner bases, Unique Factorization Domains, Euclidean Domains and Gaussian integers, and applications as time allows.
PREREQUISITES: MATH 3031.03
EXCLUSIONS: MATH 3030X/Y.06
FORMATS: Lecture

MATH 3045 Curves and Surfaces
CREDIT HOURS: 3
The course is designed as an introduction to differential geometry, the study of geometric objects by means of analysis. It presents a comprehensive study of curves and surfaces in Euclidean space. Topics include: Frenet frame and equations, curvature, torsion, first and second fundamental forms, shape operator, Gauss-Weingarten equations.
PREREQUISITES: MATH 2002.03 and (MATH 2040.03 or MATH 2135.03) or consent of instructor
FORMATS: Lecture

MATH 3070 Theory of Numbers
CREDIT HOURS: 3
Topics include: congruences and residues; elementary properties of congruences, linear congruences, theorems of Fermat, Euler and Wilson, Chinese remainder theorem, quadratic residues, law of quadratic reciprocity, Legendre, Jacobi and Kronecker symbols, arithmetic functions, algebraic fields, algebraic numbers and integers, uniqueness of factorization, elementary properties of ideals, and class number.
PREREQUISITES: MATH 2040.03 (or MATH 2135.03)
FORMATS: Lecture

MATH 3080 Introduction to Complex Variables
CREDIT HOURS: 3
An introduction to the basic elements of complex analysis. Topics include: complex numbers, functions, differentiation and integration in the complex plane, some special mappings, series in general, Taylor and Laurent Series, residues, some principles of conformal mapping theory.
PREREQUISITES: MATH 2002.03
FORMATS: Lecture

MATH 3120 Differential Equations
CREDIT HOURS: 3
The topics discussed are of great importance to any student interested in applied mathematics. Areas include Fourier series, orthogonal polynomials, Sturm-Liouville problems, the classical partial differential equations, and some applications to physics, chemistry and engineering.
PREREQUISITES: MATH 2120.03 or MATH 2135.03 or PHYC 2140.03
FORMATS: Lecture
MATH 3140 Introduction to Wavelets
CREDIT HOURS: 3
Wavelet analysis provides an extremely powerful and highly flexible tool for the compression, denoising, and recognition of both audio and image signals. This course will develop many of the essential mathematical ideas behind Fourier analysis and wavelets. Many applications will also be discussed and examined.
PREREQUISITES: MATH 2002.03, and MATH 1030.03 (or MATH 2030.03)
FORMATS: Lecture

MATH 3210 Introduction to Numerical Analysis
CREDIT HOURS: 3
This course covers the practice as well as theory of basic numerical techniques. Topics may include: root finding, interpolation, integration, initial value problems, linear and nonlinear fitting, boundary value problems. We will emphasize error analysis and stability of methods, as well as practical implementation on a computer.
PREREQUISITES: MATH 2001.03 or (MATH 2120.03 and one of MATH 1030.03 or MATH 2030.03)

MATH 3300 Optimization
CREDIT HOURS: 3
An introduction to the concepts and applications of linear programming. Topics include the simplex method for linear programming, duality and sensitivity analysis. Some of these topics are illustrated by means of interactive computer packages.
PREREQUISITES: MATH 1030.03 or 2030.03
FORMATS: Lecture

MATH 3330 Applied Graph Theory
CREDIT HOURS: 3
This course offers an introduction to graph theory, with an emphasis on applications and modelling. Topics include: paths and cycles, shortest route problem, connectivity and trees, minimum spanning trees, network flow, planar graphs, matchings, assignment problem, graph colouring and applications to scheduling, Hamilton cycles, and the Travelling Salesman Problem.
PREREQUISITES: MATH 1030.03 or MATH 2030.03 or MATH 2110.03 or MATH 2112.03 or MATH 2113.03

MATH 3340 Regression and Analysis of Variance
CREDIT HOURS: 3
See course description for STAT 3340.03 in the Statistics section of this calendar.
COREQUISITES: STAT 2450.03 (if not taken as a prerequisite)
PREREQUISITES: MATH 1030.03 AND STAT 2060.03 or MATH 2060.03 AND STAT 2080.03 or MATH 2080.03 or ECON 3338.03 AND STAT 2450.03.
CROSSLISTED: STAT 3340.03
FORMATS: Lecture

MATH 3350 Design of Experiments
CREDIT HOURS: 3
See course description for STAT 3350.03 in the Statistics section of this calendar.

MATH 3360 Probability
CREDIT HOURS: 3
See course description for STAT 3360.03 in the Statistics section of this calendar.

MATH 3370 Combinatorics: Techniques and Structures
CREDIT HOURS: 3
We introduce counting techniques and combinatorial structures, and show their application and use in all branches of mathematics. Counting techniques include combinations and permutations, the pigeonhole principle, inclusion/exclusion. Other topics include recurrence relations, generating functions and power series. Structures include partial orders, set systems and transversals, and simplicial complexes
PREREQUISITES: MATH/CSCI 1315.03 or MATH 2110.03 or MATH 2112.03 or MATH 2113.03
RESTRICTIONS: E1
EXCLUSIONS: MATH 4370.03
FORMATS: Lecture
MATH 3380 Sample Survey Methods  
CREDIT HOURS: 3  
See course description for STAT 3380.03 in the Statistics section of this calendar.

MATH 3460 Intermediate Statistical Theory  
CREDIT HOURS: 3  
See course description for STAT 3460.03 in the Statistics section of this calendar.

MATH 3501 Intermediate Analysis I  
CREDIT HOURS: 3  
MATH 3501.03 continues the analysis sequence begun in MATH 2505.03. Topics include: Metric spaces, point-set topological notions, sequences, completeness, separability, compactness (Heine-Borel, Bolzano-Weierstrass, Finite Intersection, complete and totally bounded), limits and continuity, continuity in topological terms, connectedness, path and local-path connectedness, homeomorphisms, uniform continuity, Lipschitz continuity, contractions, contraction principle, sequences of functions, uniform convergence. Further topics may include: Arzela-Ascoli theorem, Stone-Weierstrass theorem.  
PREREQUISITES: (MATH 2040 or MATH 2135.03) and MATH 2505.03  
EXCLUSIONS: MATH 3500X/Y.06  
FORMATS: Lecture

MATH 3502 Intermediate Analysis II  
CREDIT HOURS: 3  
Topics include: The full derivative for functions between Euclidean spaces, directional derivatives, Jacobian matrix, differentiability, C¹ functions, multilinear maps, higher derivatives, Taylor's theorem, extrema, inverse and implicit function theorems, extrema subject to constraints, Lagrange multipliers. Further topics may include: normed vector spaces and basic functional analysis, basic theory of manifolds in Rⁿ, Fourier series.  
PREREQUISITES: MATH 3501.03  
EXCLUSIONS: MATH 3500X/Y.06

MATH 3700 Mathematics for Economists  
CREDIT HOURS: 3  
See course description for ECON 3700 in the Economics section of this calendar.

MATH 3790 Mathematical Problem Solving: Techniques & Methods  
CREDIT HOURS: 3  
This class will provide an introduction to techniques for solving mathematical problems of the sort encountered in competition (such as the Mathematical Olympiad or the William Putnam competition). There will be self-contained modules developing techniques from several branches of mathematics including number theory, combinatorics, geometry and analysis. The majority of the class time, however, will be devoted to examining examples. Students will be expected to prepare and present in class solutions to assigned problems.  
COREQUISITES: MATH 1030.03 or 2030.03  
PREREQUISITES: MATH 1000.03, MATH 1010.03 or equivalent, and consent of instructor.

MATH 3800 Financial Economics  
CREDIT HOURS: 3  
See course description for ECON 3800.03 in the Economics section of this calendar.

MATH 3900 Financial Mathematics  
CREDIT HOURS: 3  
This course is an introduction to derivative pricing. Topics include: binomial tree model, stochastic calculus, Itô calculus, Black-Scholes model, market price of risk, log-normal models.  
PREREQUISITES: MATH 2060.03 and (MATH 2120.03 or MATH 2135.03), or permission of the instructor  
CROSSLISTED: ECON 3900.03
MATH 4001 AARMS Summer School I  
CREDIT HOURS: 3  
A Topics class given by leading researchers in the precise field, which varies from year to year. Consult the Department for current details.  
PREREQUISITES: Permission of the Honours Advisor  
CROSSLISTED: STAT 4001.03  
FORMATS: Lecture

MATH 4002 AARMS Summer School II  
CREDIT HOURS: 3  
A Topics class given by leading researchers in the precise field, which varies from year to year. Consult the Department for current details.  
PREREQUISITES: Permission of the Honours Advisor  
CROSSLISTED: STAT 4002.03  
FORMATS: Lecture

MATH 4010 Introduction to Measure Theory and Integration  
CREDIT HOURS: 3  
Lebesgue's theory of measure and integration. The topics include: sigma-algebras, measures, construction of measures, Lebesgue measure on the real line, measurable functions, the Lebesgue integral and convergence theorems, Lp spaces, product measures and the Fubini-Tonelli theorem.  
PREREQUISITES: MAT 3501.03  
CROSSLISTED: MATH 5010.03  
FORMATS: Lecture

MATH 4020 Analytic Function Theory  
CREDIT HOURS: 3  
Topics include: review of analytic complex functions including topological properties of the plane, Mobius mappings, exponential, logarithmic, trigonometric and related functions, integration and the Cauchy theorem. Cauchy's integral formula, residues, harmonic functions, analytic continuation, entire and meromorphic functions, some results of conformal mapping, including the Riemann mapping theorem.  
PREREQUISITES: MATH 2002.03 (MATH 3080.03 recommended)  
CROSSLISTED: MATH 5020.03

MATH 4025 Commutative Algebra I  
CREDIT HOURS: 3  
This introduction to commutative algebra includes a selection of the following topics: prime and maximal ideals, primary decomposition, Noetherian rings, Hilbert's Basis Theorem and the Nullstellensatz.  
PREREQUISITES: MATH 3032.03  
CROSSLISTED: MATH 5025.03  
FORMATS: Lecture

MATH 4035 Topics in Commutative Algebra  
CREDIT HOURS: 3  
This course covers special topics in commutative algebra.  
PREREQUISITES: MATH 4045.03 or permission of the instructor  
CROSSLISTED: MATH 5035.03  
FORMATS: Lecture

MATH 4045 Advanced Algebra I  
CREDIT HOURS: 3  
Introduction to module theory: modules, submodules, quotient modules, module homomorphisms, generators for modules, direct sums, free modules, tensor products, exact sequences, projective modules, injective modules, and flat modules. Modules over principal ideal domains. Additional topics may include homological algebra, Ext and Tor functors, symmetric and exterior algebras.  
PREREQUISITES: MATH 3032.03  
CROSSLISTED: MATH 5045.03  
FORMATS: Lecture

MATH 4055 Advanced Algebra II
CREDIT HOURS: 3
Field theory, field extensions, Galois theory and applications.
PREREQUISITES: MATH 3032.03
CROSSLISTED: MATH 5055.03
FORMATS: Lecture

MATH 4065 Algebraic Geometry
CREDIT HOURS: 3
This is a first course in algebraic geometry and will introduce students to the basic properties of affine and projective varieties. Topics covered will include a selection from: local properties of plane curves, elliptic curves, Bezout’s Theorem, Riemann-Roch Theorem.
PREREQUISITES: MATH 3032.03
CROSSLISTED: MATH 5065.03
FORMATS: Lecture

MATH 4066 Advanced Statistical Theory I
CREDIT HOURS: 3
See course description for STAT 4066.03 in the Statistics section of this calendar.

MATH 4070 Algebraic Number Theory
CREDIT HOURS: 3
An introduction to algebraic number theory, with special emphasis on quadratic and cyclotomic fields. A more general study of rings of integers of algebraic number fields focuses on divisibility properties. Other topics include Dedekind domains, ideals and their factorization into prime ideals, and class groups and class numbers.
PREREQUISITES: MATH 3032.03 (MATH 3070.03 recommended)
CROSSLISTED: MATH 5070.03
FORMATS: Lecture

MATH 4116 Cryptography
CREDIT HOURS: 3
This course is an introduction to modern cryptographic techniques and its mathematical foundations. The material covered includes: elementary number theory and algebra, classical cryptosystems, probability, the Data Encryption Standard, prime number generation and primality tests, public key cryptosystems, and further applications, such as digital signatures and identification.
PREREQUISITES: MATH 1000.03, MATH 1010.03, MATH 1030.03 (or MATH 2030.03), and at least six additional credit hours in Mathematics beyond the first year, or permission of the instructor.
CROSSLISTED: CSCI 4116.03

MATH 4130 Design and Analysis of Algorithms II
CREDIT HOURS: 3
See course description for CSCI 4113.03 in the Computer Science section of this calendar.

MATH 4135 Introduction to Category Theory
CREDIT HOURS: 3
Categories, functors, natural transformations and adjointness are introduced with emphasis on examples drawn from undergraduate Mathematics and theoretical Computer Science. The calculus of diagram chasing, limits, colimits and Kan extensions is explored in detail.
PREREQUISITES: MATH 3031.03 and MATH 3501.03 or permission of the instructor.
CROSSLISTED: MATH 5135.03
FORMATS: Lecture

MATH 4136 Topics in Category Theory
CREDIT HOURS: 3
Topics of current interest in category theory will be discussed with an emphasis on open problems. No previous knowledge of category theory is required. The necessary concepts will be discussed in the context of their applications. However, a certain familiarity with the basic concepts of modern mathematics such as found in courses on algebra and topology would be an asset.
PREREQUISITES: MATH 3031.03 and consent of instructor
CROSSLISTED: MATH 5136.03
MATH 4140 Introduction to Functional Analysis
CREDIT HOURS: 3
An introduction to the basic principles of functional analysis including the following topics: infinite dimensional vector spaces, normed spaces, inner-product spaces, Banach and Hilbert spaces, linear and continuous linear functionals, the Hahn–Banach Theorem, the principle of uniform boundedness, dual spaces, weak* topology, and the Alaoglu theorem, the open mapping and closed graph theorems, and consequences and applications.
PREREQUISITES: MATH 3502.03
CROSSLISTED: MATH 5140.03
FORMATS: Lecture

MATH 4165 Mathematical Methods in Physics
CREDIT HOURS: 3
Topics discussed include: complex variable theory, Fourier and Laplace transform techniques, special functions, partial differential equations.
PREREQUISITES: MATH 3120.03 or MATH 3260.03 or permission of instructor.
CROSSLISTED: PHYC 4160.03
EXCLUSIONS: PHYC 5160.03, MATH 5165.03
FORMATS: Lecture

MATH 4170 General Topology
CREDIT HOURS: 3
An introduction to topological spaces that includes the following topics: classification in terms of cardinality of bases, separation, etc., product spaces, Tychonoff theorem, compactness, compactifications, Tychonoff spaces, metrization.
PREREQUISITES: MATH 3502.03
CROSSLISTED: MATH 5170.03
FORMATS: Lecture

MATH 4175 Topics in Mathematical Physics
CREDIT HOURS: 3
This course is a continuation of MATH 4165.03 and deals with special topics in mathematical physics selected from areas such as the Green's function technique for solving ordinary and partial differential equations, scattering theory and phase shift analysis, diffraction theory, group theory, tensor analysis and general relativity.
PREREQUISITES: MATH 4165.03
CROSSLISTED: PHYC 4170.03, PHYC 5170.03

MATH 4180 Introduction to Algebraic Topology
CREDIT HOURS: 3
An introduction to algebraic topology including the following topics: the definitions, properties and methods of computation of the fundamental group of a topological space; simplicial, singular and cellular homology groups; basic properties and methods of computation of homology groups; a selection of application such as the classification of surfaces and fixed point theorems.
PREREQUISITES: MATH 2505.03, MATH 4170.03
CROSSLISTED: MATH 5180.03
FORMATS: Lecture

MATH 4200 Ordinary Differential Equations - Qualitative Theory
CREDIT HOURS: 3
Qualitative theory is concerned with determining the behaviour of solutions of differential equations without finding explicit solutions. Topics are selected from Liapunov stability theory, stable and unstable manifolds of singular points and periodic solutions, classification of plane singular points, structural stability and Hamiltonian systems. Other topics at the instructor’s discretion.
PREREQUISITES: MATH 4190.03
CROSSLISTED: MATH 5200.03
FORMATS: Lecture

MATH 4220 Introduction to Partial Differential Equations
CREDIT HOURS: 3
This course is a basic introduction to the theory of partial differential equations. Topics covered include: modelling physical systems, method of
characteristics, Laplace, wave and heat equations, separation of variables, eigenfunction expansions, integral transforms, maximum principles and Ritz Raleigh theory.

PREREQUISITES: MATH 3120.03 or MATH 3260.03 or permission of instructor
CROSSLISTED: MATH 5220.03
FORMATS: Lecture

MATH 4230 Partial Differential Equations
CREDIT HOURS: 3
This course will provide students with an introduction to advanced topics in partial differential equations in a variety of settings. Topics may include: reaction diffusion systems, pattern formation, numerical methods, applications to physical sciences, variational methods, Sobolev Theory.
PREREQUISITES: MATH 3120.03 or MATH 3260.03 or permission of the instructor
CROSSLISTED: MATH 5230.03
FORMATS: Lecture

MATH 4250 Asymptotic Analysis
CREDIT HOURS: 3
Most mathematical models of physical systems cannot be solved exactly. Often such systems have a naturally occurring small parameter which may be exploited using asymptotic analysis techniques. In this course, we will study a variety of physical systems which illustrate many of the common approaches used in asymptotic analysis. Focus will be on applications to ordinary and partial differential equations.
PREREQUISITES: (MATH 1030.03 or MATH 2030.03) and (MATH 3120.03 or MATH 3260.03), or permission of the instructor
CROSSLISTED: MATH 5250.03
FORMATS: Lecture

MATH 4330 Topics in Graph Theory
CREDIT HOURS: 3
This course covers current research topics in graph theory. Items are selected from the following topics: graph colourings, combinatorial optimization, random graphs, network analysis, graph clustering, processes on graphs.
PREREQUISITES: MATH 3330.03 or CSCI 3110.03 or permission of the instructor
CROSSLISTED: CSCI 4115.03
EXCLUSIONS: MATH 5330.03
FORMATS: Lecture

MATH 4331 Topics in Combinatorics
CREDIT HOURS: 3
This course will cover current research in combinatorics. Selected topics may include: graph polynomials, simplicial complexes, partial orders, enumeration problems, and algebraic methods in combinatorics.
PREREQUISITES: MATH 3330.03 or CSCI 3110.03 or permission of the instructor
FORMATS: Lecture

MATH 4340 Discrete Random Structures
CREDIT HOURS: 3
This course will cover basics of probability and stochastic processes, and then focus on areas where probability and combinatorics interact. Topics include: probabilistic method, stochastic graph models for complex networks, probabilistic algorithms. Probabilistic techniques include: expectation and concentration of random variables, stochastic processes, conditional expectation, Markov chains, martingales, branching processes.
PREREQUISITES: MATH 4330.03/MATH 5330.03 or MATH 2113.03 or permission from the instructor
CROSSLISTED: MATH 5340.03
FORMATS: Lecture

MATH 4360 Combinatorial Modelling
CREDIT HOURS: 3
This course introduces a common framework for combinatorial structures (graphs, digraphs, hypergraphs, posets, preorders, lattices, finite topologies, simplicial complexes), with an emphasis on how to model these structures with other fields of mathematics, such as matrix theory and linear algebra, commutative algebra, topology, analysis, probability and logic.
PREREQUISITES: MATH 2060.03 and MATH 3032.03 or permission of the instructor.
CROSSLISTED: MATH 5360.03
FORMATS: Lecture
MATH 4370 Combinatorics: Techniques and Structures
CREDIT HOURS: 3
We introduce counting techniques and combinatorial structures, and show their application and use in all branches of mathematics. Counting techniques include combinations and permutations, the pigeonhole principle, inclusion/exclusion. Advanced techniques include recurrence relations, generating functions and power series. Structures include partial orders, set systems and transversals, and finite geometries.
PREREQUISITES: MATH 2112.03 or MATH 2051.03 or MATH 3070.03 or MATH 3330.03
CROSSLISTED: MATH 5370.03
FORMATS: Lecture

MATH 4410 Cosmology
CREDIT HOURS: 3
A self-contained introduction to cosmology will be given and no prior knowledge of differential geometry or general relativity will be assumed (although some knowledge of elementary differential equations will be useful). A cosmological model is a model of the universe, as a whole, on the largest scales; the emphasis of the course will be on the modelling aspects of cosmology.
PREREQUISITES: Instructor's permission
CROSSLISTED: MATH 5410.03, PHYC 4660.03/PHYC 5660.03
FORMATS: Lecture

MATH 4500 Introduction to Harmonic Analysis
CREDIT HOURS: 3
This course covers the basic elements of L^p-spaces, convolution, interpolation, maximal functions, Fourier analysis of functions, and the theory of generalized functions, or distributions. Further topics may include L^p-Sobolev spaces, boundary values of harmonic functions, spherical harmonics, singular integral operators, or multipliers.
PREREQUISITES: MATH 4010.03/MATH 5010.03, or MATH 3502.03 with permission of instructor
CROSSLISTED: MATH 5500.03
FORMATS: Lecture

MATH 4530 Differential Geometry
CREDIT HOURS: 3
This course is a self-contained introduction to manifold theory. Topics include: elements of surface theory, the tangent space, vector fields, differential forms and more general tensors, the Lie derivative, connections, Riemannian geometry, applications in mechanics and general relativity.
PREREQUISITES: MATH 3045.03 or MATH 3502.03 or permission of the instructor
CROSSLISTED: MATH 5530.03
FORMATS: Lecture

MATH 4540 Applied Analysis
CREDIT HOURS: 3
This course is an introduction to the methods of modern applied analysis. This course is suitable for advanced undergraduate and graduate students. The topics include classification of planar dynamical systems, nonlinear dynamics, and equilibria, global nonlinear techniques, closed orbits and limit cycles. Calculus of Variations: first and second variations, symmetries, conservation laws and Noether's theorem, Hamiltonian formalism. Time permitting, other topics in Applied Analysis such as tensor calculus will be covered.
PREREQUISITES: (MATH 3120.03 or MATH 3260.03) and MATH 3501.03, or consent of instructor
CROSSLISTED: MATH 5540.03
FORMATS: Lecture

MATH 4650 General Relativity
CREDIT HOURS: 3
A review of differential geometry will be given followed by an introduction to the general theory of relativity. Various topics will be discussed, including: linearized theory and gravitational radiation, spherically symmetric metrics and the Schwarzschild solution, gravitational collapse, black holes, and cosmology.
PREREQUISITES: MATH 3045.03 or permission of the instructor
CROSSLISTED: MATH 5650.03, PHYC 4650.03/PHYC 5650.03
FORMATS: Lecture

MATH 4660 Theory of Computation
MATH 4680 Topics in Logic and Computation
CREDIT HOURS: 3
This course covers topics of current interest in logic and/or the foundations of computation. Suitable topics include: formal logic, soundness and completeness, Gödel's incompleteness theorem, formal set theory, the Zermelo-Fraenkel axioms, non-standard models, independence of axioms, lambda calculus and foundations of functional programming languages, proof theory, semantics.
CALENDAR NOTES: Please consult the instructor for the topics offered in a particular year. This course is suitable for advanced undergraduates and graduate students from both mathematics and computer science.
COREQUISITES:
Suggested prerequisites for math students are algebra or analysis at honours undergraduate level. Students from computer science should be familiar with formal language theory and concepts of programming languages. All students should be comfortable with writing mathematical proofs. When in doubt about prerequisites, please consult the instructor.
CROSSLISTED: MATH 5680.03
FORMATS: Lecture

MATH 4681 Topics in Logic
CREDIT HOURS: 3
This course covers topics of current interest in logic. Suitable topics include: formal logic, soundness and completeness, Gödel's incompleteness theorems; model theory, compactness; set theory, non-standard models; categorical logic; proof theory; type theory, proof assistants.
CALENDAR NOTES: Please consult the instructor for the topics offered in a particular year. This course is suitable for advanced undergraduates and graduate students from both mathematics and computer science.
PREREQUISITES: MATH 3032.03, or MATH 3502.03, or MATH 3031.03 and MATH 3501.03, or CSCI 3110.03 and CSCI 3136.03, or permission of the instructor.
CROSSLISTED: MATH 5681.03
FORMATS: Lecture

MATH 4682 Topics in Computation
CREDIT HOURS: 3
This course covers topics of current interest in the mathematical study of computation. Suitable topics include: the lambda calculus and foundations of functional programming languages; the Curry-Howard correspondence; denotational and operational semantics; complexity theory; quantum information and computation.
CALENDAR NOTES: Please consult the instructor for the topics offered in a particular year. This course is suitable for advanced undergraduates and graduate students from both mathematics and computer science.
PREREQUISITES: MATH 3032.03, or MATH 3502.03, or MATH 3031.03 and MATH 3501.03, or CSCI 3110.03 and CSCI 3136.03, or permission of the instructor.
CROSSLISTED: MATH 5682.03
FORMATS: Lecture

MATH 4950 Honours Research Project
CREDIT HOURS: 3
A requirement for the mathematics honours degree, this course consists of a supervised research project culminating in a written report and an oral presentation in the honours seminar. Enrolment must be approved by the mathematics honours coordinator.
CALENDAR NOTES: Students are required to take twelve additional credit hours at or above the 4000-level in addition to this one.

MATH 8891 Co-op Work-Term I
CREDIT HOURS: 0
PREREQUISITES: SCIE 2700.03

MATH 8892 Co-op Work-Term II
CREDIT HOURS: 0
PREREQUISITES: MATH 8891.00
Introduction
The Medical Sciences program is a 4-year Bachelor of Science aimed at students who wish to initiate studies in medical science as undergraduates. The program will introduce students to subjects such as human anatomy, physiology, neuroscience, epidemiology, and health ethics.

In the first two years of the program, students take core courses in Biology, Chemistry, Mathematics, Statistics, Psychology, Microbiology, Sociology, Neuroscience, Biochemistry, and Physiology. These courses will not only provide a solid background in basic sciences, but will prepare students for admission tests for various medical sciences disciplines (such as the MCAT, DAT, OAT, GRE), meet (or exceed) the early prerequisites for acceptance into medically related professional programs (such as Medicine, Dentistry, Pharmacy, Nursing, Physiotherapy, Optometry, Ultrasound Technology, Radiological Therapy etc.) locally and across the country, and meet (or exceed) the early prerequisites required for acceptance into biomedical sciences graduate programs at Dalhousie and across the country. In their third and fourth years, students take core and selective courses in various subjects within the medical sciences. These courses come from Pharmacology, Microbiology & Immunology, Physics, Anatomy, Pathology, Philosophy, and Community Health & Epidemiology departments. In fourth year, students will either pursue an Honours, with an associated research project, or a one-term case-based Capstone course.

Career path advising and the course selection process are critical to the success of the Medical Sciences undergraduate program. In addition to guidance with respect to health-related programs and their entry requirements, academic advising is provided so that students are aware of what courses are required should they want to enter graduate programs in the various biomedical science disciplines. Opportunities are available to concentrate in areas of special interest, explore scientific curiosities further, or fulfil professional school prerequisites. Students will graduate with a broad biomedical science background that will prepare them for a variety of clinical professional programs, graduate school, employment in the biotechnology industry, health administration, and in government.

Degree Programs
The curriculum offers core courses from 14 different departments, providing a broad background in biomedical science and a guided learning experience throughout the program. Students are also required to take a minimum of 21 credit-hours in “Selective” courses (chosen from a predetermined list provided by the program) in relevant medical sciences fields. These selective courses allow students to focus their interests in a particular area (including advanced courses in year 4), explore their interests further, and fulfil professional
school prerequisites. Furthermore, for those interested, selectives will aptly prepare students in pursuit of senior research projects, subsequently providing the necessary groundwork to be excellent candidates for graduate programs in a specialized field at Dalhousie or elsewhere in Canada.

NOTE: Most second and third year core courses in the Medical Sciences curriculum have prerequisites with minimum grade requirements in those prerequisite courses. Please consult the appropriate calendar section for these requirements.

The program also offers 21 credit hours in open "Electives", which allows students to take any course offered at Dalhousie (at the appropriate level). Students are encouraged to fulfil the Writing requirement using one or both Electives in the first year and it is recommended that students take the writing course from the English department, since some professional schools require six credit hours in ENGL courses.

Students can choose to do a concentrated Honours in their fourth year, where they have the option of completing the research project at any Dalhousie research site, provided the Medical Sciences Honours Committee approves the project and supervisor. Despite the research site where students complete the project, they will still receive an Honours degree in Medical Sciences. If students do not choose Honours, they will take a case-based Capstone course that integrates multiple medical sciences disciplines by examining 5 medically-related cases, through expert lectures, group discussions, and student presentations.

The Medical Sciences program offers the following degree options:

- BSc (Medical Sciences) Honours - 120 credit hour
- BSc (Medical Sciences) - 120 credit hour

Students also have the option of doing a Minor. Core courses and required selectives may not be double-counted as Minor courses; extra selectives and electives may be used towards the minor. If a minor is added, students may find that they need to take more than 120 credit hours to complete all of their degree requirements.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Medical Sciences undergraduate academic advisor.

Program requirements can be seen by following the links to the right. In addition, students must satisfy the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections of this calendar.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Staff

Dean
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Assistant Dean
Wells, S. M., BSc (Western), PhD (Toronto), Associate Professor (Biomedical Engineering), joint appointment in Physics & Atmospheric Sciences

Program & Honours Coordinator
Jordan, J., BSc (St. FX), PhD (Dalhousie)

Medical Sciences Clerk
Haq-Montford, A., BA (Dalhousie)

BSc (Medical Sciences)
The Bachelor of Science (Medical Sciences) degree is a 120 credit hour program, typically completed in 4 years. It will provide an educational experience that offers a broad, interdisciplinary background in all relevant subjects in biomedical sciences. The degree also meets the general degree requirements for the Faculty of Science. This program may fulfill the Dalhousie Faculty of Graduate Studies requirements for graduate school, but may not satisfy department-specific or other school-specific graduate school entry requirements.
Requirements
In addition to the courses listed below, students must ensure that they satisfy the requirements outlined in the "Degree Requirements" section for the College of Arts and Science. For the required Writing class, students can choose from the list of approved writing classes in the Academic Calendar. Before selecting a writing course, students are encouraged to consult the advising sheet available on the Medical Sciences program website, as some professional schools require an ENGL course as a prerequisite for entry.

1000 Level

- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution with BIOL 1011.03: Principles of Biology Part II or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology or SCIE 1506.09 + 1507.09: Integrated Science
- MATH 1215.03: Life Sciences Calculus or MATH 1000.03: Differential and Integral Calculus I
- STAT 1060.03: Introductory Statistics for Science and Health Sciences or SCIE 1506.09 + 1507.09: Integrated Science
- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person or PSYO 1031.03: Introduction to Psychology and Neuroscience I: From Neuron to Person with PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology or PSYO 1032.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology, or SCIE 1506.09 + 1507.09: Integrated Science
- PHYC 1310.03: Physics In and Around You I or PHYC 1310 + 1320: Physics In and Around You II
- Writing course

2000 Level

- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry
- PHYL 2044.03: Human Systems Physiology
- MICI 2100.03: Introductory Microbiology and Immunology (in-class or distance)
- PHYL 2041.03: Human Neurophysiology
- PHIL 2805.03: Ethics and Health Care: Patient Care or PHIL 2810.03: Ethics and Health Care: Social Policy
- SOSA 2503.03: Health and Society

3000 and 4000 Level

- MICI 3115.03: Immunology
- PHAC 3030.03: Pharmacology - The Drugs Around Us
- ANAT 3010.03: Introductory Human Anatomy
- PATH 3000.03: Introduction to Pathology
- CH&E 4010.03: Epidemiology Principles
- SCIE 4005.03: Medical Sciences Capstone

24 credit hours of Selectives, including at least 3 credit hours of Advanced Selectives

List of Selectives and Advanced Selectives

**BSc (Medical Sciences) Honours**

Students who want a challenging program resulting in a broad background in medical sciences, including independent research experience, may want to enrol in the Honours program. An Honours degree in the Medical Sciences program aims to prepare students for future thesis-based graduate studies in a number of medically related fields. In addition to specific core course requirements with a minimum GPA of 3.0, students must identify a faculty member who has agreed to be their research supervisor. Students will have the flexibility to do their Honours research at a Dalhousie Research site of their choice (Faculty of Science, Faculty of Medicine, Faculty of Arts & Social Sciences, or other), subject to the approval of the Honours class coordinator. All students conduct an independent research project in their final year under the supervision of a faculty member. Students must attend weekly classes, submit a satisfactory Interim Report and thesis, and deliver a satisfactory symposium presentation of the thesis research in a Medical Sciences student research forum.
Students should consult with an advisor and choose their electives and selectives carefully in their second, third and fourth years to ensure that they are prepared for Honours and potentially graduate studies in their field of interest. Students with an Honours degree will also be well prepared for entry into professional schools.

Requirements

1000 Level

- BIOL 1010.03: Principles of Biology Part I or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution
- BIOL 1011.03: Principles of Biology Part II or BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- SCIE 1506.09 + 1507.09: Integrated Science
- MATH 1215.03: Life Sciences Calculus or MATH 1000.03: Differential and Integral Calculus I
- STAT 1060.03: Introductory Statistics for Science and Health Sciences or SCIE 1506.09 + 1507.09: Integrated Science
- PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person or PSYO 1031.03: Introduction to Psychology and Neuroscience I: From Neuron to Person with PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology or PSYO 1032.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology, or SCIE 1506.09 + 1507.09: Integrated Science
- PHYC 1310.03: Physics In and Around You I or PHYC 1310 + 1320: Physics In and Around You I & II
- Writing course (6 credit hours) *

2000 Level

- BIOL 2020.03: Cell Biology
- BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry
- PHYL 2044.03: Human Systems Physiology
- PHYL 2041.03: Human Neurophysiology
- MICI 2100.03: Introductory Microbiology and Immunology (in-class or distance)
- PHIL 2805.03: Ethics and Health Care: Patient Care or PHIL 2810.03: Ethics and Health Care: Social Policy
- SOSA 2503.03: Health and Society

3000 and 4000 Level

- MICI 3115.03: Immunology
- PHAC 3030.03: Pharmacology - The Drugs Around Us
- ANAT 3010.03: Introductory Human Anatomy
- PATH 3000.03: Introduction to Pathology
- CH&E 4010.03: Epidemiology Principles
- SCIE 4901.03 + SCIE 4902.03: Medical Sciences Honours Research and Thesis I and II

21 credit hours of Selectives (see list below), including at least 3 credit hours of Advanced Selectives

Required standing for graduation:
GPA 3.0 in core courses
GPA 3.70 in core and selective courses for first class

* See Writing Course Requirements. Before selecting a writing course, students are encouraged to consult the advising sheet available on the Medical Sciences program website, as some professional schools require an ENGL course as a prerequisite for entry.

List of Selectives and Advanced Selectives
Medical Sciences Honours students must include in their program at least 21 credit hours in the following courses. Students not in the honours program must include at least 24 credit hours of these courses. In both cases, at least one of the Selectives must be an Advanced Selective.

Selectives:

Biochemistry and Molecular Biology

- BIOC 2610: Introductory Biochemistry Lab
- BIOC 3300: Intermediary Metabolism
- BIOC 3400: Nucleic Acid Biochemistry & Molecular Biology
- BIOC 3610: Laboratory Techniques in Biomedical Sciences
- BIOC 3700: Biomolecular Chemistry

Biology

- BIOL 2003: Animal Diversity
- BIOL 2040: Evolution
- BIOL 2060: Introductory Ecology
- BIOL 3046: Molecular Evolution
- BIOL 3050: Developmental Biology
- BIOL 3078: Animal Physiology I
- BIOL 3322: Parasitology
- BIOL 3328: Medical Entomology (only offered in Summer)
- BIOL 3336: Vertebrate Functional Morphology
- BIOL 3421/ANAT 3421: Comparative Vertebrate Histology
- BIOL 3430/ANAT 2160: Introduction to Human Histology

Biomedical Engineering

- BMNG 3000: Technology in Medicine

Chemistry

- CHEM 2301: Introduction to Physical Chemistry I
- CHEM 2304: Introduction to Physical Chemistry II
- CHEM 3601: Chemistry of Living Systems

Economics

- ECON 2231: Perspectives in Health Economics
- ECON 3231: Topics in Health Economics

Environmental Science

- ENVS 3400: Environment and Human Health

Humanities and Social Sciences

- ENGL 2030: Literature, Health, and Healing (offered in alternate years to ENGL 3320)
- ENGL 3320: Literature and the History of Medicine (offered in alternate years to ENGL 2030)
- HSTC 2102: Origins of Modern Medicine
- HSTC 2200: Introduction to History of Science
- HSTC 2202: The Beginnings of Western Medicine: The Birth of the Body
- HSTC 2206: Biopolitics: Human Nature In Contemporary Thought
- HSTC 2211: Introduction to History of Science I: From the Ancients to the Birth of the Modern
• HSTC 2212: Introduction to History of Science II: From the Birth of Modern to the Present
• HSTC 2350: The Body in Early Modern Europe
• HSTC 3101/CTMP 3204: Human Experiments
• HSTC 3121: In Search of the Philosopher's Stone: The History of European Alchemy
• INTD 3115: Global Health in the 21st Century
• PHIL 2805: Ethics and Health Care: Patient Care (students can only count PHIL 2805 or 2810 as selective and other as core ethics course)
• PHIL 2810: Ethics and Health Care: Social Policy (students can only count PHIL 2805 or 2810 as selective and other as core ethics course)
• PHIL 3800: Philosophy of Medicine
• SOSA 2502: Biomedicine and the Illness Experience
• SOSA 3135: The Social Organization of Health Care
• SOSA 3143: Health, Illness, and the World System
• SOSA 3145/GWST 3145: Gender and Health
• SOSA 3147: Aging Cross Culturally
• SOSA 3148: The Sociology of Addiction/ Drugs, Health, and Society
• SOSA 3403: Qualitative and Field Methods

Interprofessional Health Education

• IPHE 2201/IDHS 2201: Introduction to Aboriginal Peoples' Health and Healing

Kinesiology

• KINE 2465: Introductory Biomechanics
• KINE 3485: Psychology of Sport & Physical Activity

Mathematics

• MATH 1010: Differential and Integral Calculus II

Medical Neuroscience

• ANAT 2160/BIOL 3430: Introduction to Human Histology
• ANAT 3421/BIOL 3421: Comparative Vertebrate Histology

Microbiology and Immunology

• MICI 2400: Laboratory Methods in Microbiology and Immunology
• MICI 3114: Virology
• MICI 3119: Physiology of Prokaryotic Cell
• MICI 4115: Medical Immunology
• MICI 4218: Clinical Microbiology

Neuroscience

• NESC 2130/PSYO 2130: Introduction to Cognitive Psychology
• NESC 2570/PSYO 2570/PHYL 2570: Cellular Neuroscience
• NESC 3043/PSYO 3043: Neurobiology of Learning
• NESC 3170/PSYO 3170: Hormones and Behaviour
• NESC 3227/PSYO 3227: Principles of Human Neuropsychology
• NESC 3670: Genes, Brain and Behaviour

Physics
• PHYC 1290: Introduction to Physics
• PHYC 1320: Physics In and Around You II

• PHYC 2250: Physics of Biological and Medical Technology
• PHYC 2610: Introduction to Biomechanics

**Physiology and Biophysics**

• PHYL 3120: Exercise Physiology in Health & Disease
• PHYL 3320: Human Cell Physiology
• PHYL 3420: Sensory Physiology
• PHYL 3520: Core Concepts in Medical Physiology
• PHYL 3600: Directed Project in Physiology
• PHYL 3620: Human Physiology Lab

**Psychology**

• PSYO 2080: Social Psychology
• PSYO 2090: Developmental Psychology
• PSYO 2130/NESC 2130: Introduction to Cognitive Psychology
• PSYO 2220: Abnormal Behaviour
• PSYO 2444: Forensic Psychology
• PSYO 2770: Brain & Behaviour (offered in alternate years)
• PSYO 3043/NESC 3043: Neurobiology of Learning
• PSYO 3129: Childhood Psychopathology
• PSYO 3170/NESC 3170: Hormones and Behaviour
• PSYO 3227/NESC 3227: Principles of Human Neuropsychology

**Science**

• SCIE 3100: Experiential Learning in Medical Sciences

**Advanced Selectives:**

**Biochemistry and Molecular Biology**

• BIOC 4010: Bioinformatics (offered in alternate years)
• BIOC 4302: Biochemistry of Lipids
• BIOC 4305: Mechanisms of Signal Transduction
• BIOC 4403: Genes and Genomes
• BIOC 4404: Gene Expression
• BIOC 4501: Medical Biotechnology I
• BIOC 4700: Proteins
• BIOC 4701: Enzymes
• BIOC 4835/BIOL 4035: Human Genetics

**Biology**

• BIOL 3079: Animal Physiology II
• BIOL 4020: Advanced Cell Biology
• BIOL 4035/BIOC 4835: Human Genetics

**Computer Science**

• CSCI 4180: Introduction to Computational Biology and Bioinformatics
• CSCI 4181: Algorithms in Bioinformatics

**Humanities and Social Sciences**
• SOSA 4006: Issues in Critical Health Studies
• PHIL 4801: Topics in Ethics and Healthcare (offered every 3-4yr)
• POLI 4260: The Politics of Health Care

Medical Neuroscience

• ANAT 4010: Advanced Human Anatomy

Microbiology and Immunology

• MICI 4027: Molecular Mechanisms of Cancer (offered in alternate years)
• MICI 4033: Advanced Microbial Genetics
• MICI 4100: Processes & Mediators of Inflammation
• MICI 4114: Advanced Topics in Molecular & Medical Virology
• MICI 4116: Current Topics in Mucosal Immunology
• MICI 4302: Clinical and Molecular Immunology (alternate years)

Neuroscience

• NESC 3180/PSYO 3180: Psychoneuroimmunology/Ecological Immunology (offered in alternate years)
• NESC 3970/PSYO 3970: Molecular Neuroscience
• NESC 4185/PHYL 4000: Current Advances in Synaptic Function or Plasticity

Pathology

• PATH 4100: Critical Thinking in Neuropathology

Pharmacology

• PHAC 4403: Systems Pharmacology 1
• PHAC 4409: Systems Pharmacology 2

Physiology and Biophysics

• PHYL 4000/NESC 4185: Current Advances in Synaptic Function and Plasticity
• PHYL 4324: Endocrine Physiology
• PHYL 4504: Respiratory Physiology
• PHYL 4680: Cardiovascular Physiology

Psychology

• PSYO 3180/NESC 3180: Psychoneuroimmunology/Ecological Immunology
• PSYO 3970/NESC 3970: Molecular Neuroscience

Science

• SCIE 4101 & SCIE 4102: Directed Project in Medical Sciences I and II

Microbiology and Immunology

Location:
Sir Charles Tupper Medical Building
5850 College Street
Room 7-C
PO BOX 15000
Introduction
Microbiologists study small cells (microorganisms) and viruses. Among other things, immunologists want to know how larger organisms (such as humans) respond to foreign objects, many of which are very small. These two disciplines are thus inextricably linked, and when taken together comprise a major strength of the Dept. Another focus of the department is cancer biology, a natural fit with other interests, as cancers can be thought of as foreign objects, and many are caused by bacteria and viruses.

Degree programs in Microbiology and Immunology at Dalhousie focus on education and training in bacteriology, virology and immunology, with an understanding that biochemistry, genetics, and cell and molecular biology are also essential elements of a comprehensive academic program. A degree in Microbiology and Immunology provides a firm foundation for future employment in a variety of laboratory environments, for the pursuit of an advanced post-graduate degree, and/or for entry into the health professions (e.g. medicine).

Degree Programs
The Department offers the following degree programs in Microbiology and Immunology

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- BSc (90 credit hour) Minor in Microbiology and Immunology

* BSc Co-op option available
* May be combined with Minors from other disciplines.

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully. It is recommended that students considering an Honours or Major program consult with a Microbiology and Immunology Academic Advisor prior to registering for second year classes.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Microbiology and Immunology program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1540.27
- SCIE 1505.18
- SCIE 1506.09 and SCIE 1507.09

Staff
Dean
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Head of Department
Makrigiannis, A. P.
Advising
MicroImm.Advising@dal.ca

Professors
Duncan, R., PhD (Guelph), Graduate Studies Coordinator (Molecular Virology)
Haldane, D. J. M., MBChB (Dundee), FRCP(C) (Medical Microbiology)
Hoskin, D. W., PhD (McGill) (Tumour Immunology; Cancer Biology)
Issekutz, T. B., MD (Dalhousie), FRCP(C), Prof., Pediatrics (Lymphocytes in Autoimmune Disease)
Johnston, B., PhD (Calgary) (Inflammation and Immune Response)
Johnston, G. C., PhD (York)
Kelvin, D., PhD (Toronto) (Immunology)
Lee, S. F., PhD (Guelph) (Oral Microbiology; Microbial Pathogenesis, Mucosal Vaccines)
Makrigiannis, A. P., PhD (Dalhousie) (Natural Killer Cells in Infection and Cancer)
Marshall, J. S., PhD (Manchester) (Mast Cells in Inflammation and Cancer)
McCormick, C., PhD (UBC) (Viral Oncology)
Richardson, C. D., PhD (UBC) (Molecular Virology)
Stadnyk, A. W., PhD (McMaster) (Intestinal Inflammation; Cytokines)
Stoltz, D. B., PhD (McMaster) (Biology of Parasitic Insects; Polydnaviruses)

Associate Professors
Davidson, R. J., PhD (Manitoba) (Antimicrobial Mechanisms of Action and Resistance)
Hatchette, T. F., MD (Memorial) Pathology (Clinical Virology and Influenza)
LeBlanc, J., PhD, FCCM, (ABMM) (Dalhousie) (Clinical and Molecular Microbiology)
Li, Y. H., PhD (Manitoba) (Bacteriology and Molecular Biology)
Rohde, J., PhD (British Columbia) (Bacterial Pathogenesis and Ubiquitin)
Thomas, N., PhD (Queen’s) (Molecular Bacterial Pathogenesis)
Wang, J., PhD (McMaster) (Host Defense Mechanisms Against Infection and Cancer and Vaccine Development)

Assistant Professors
Boudreau, J., PhD (McMaster)
Cheng, Z., PhD (Waterloo) (Host-bacterial Interactions, Cancer Biology)
DiCara, F., PhD (Naples) (Role of Peroxisome Biogenesis in Innate Immunity)
Gujar, S., PhD (Memorial)
Kelvin, A., PhD (Queens University Belfast) (Pediatrics)
Khasperskyy, D., PhD (State University of New York, Buffalo) (Host Pathogen Interaction, Influenza A virus, Cellular Stress Responses)

Senior Instructor
Murray, L. E., PhD (Dalhousie) (Molecular Genetics)

BSc (120 credit hour) Concentrated Honours in Microbiology and Immunology

Students who want a challenging program that results in a broad and in-depth background in Microbiology and Immunology, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Microbiology and Immunology subject courses, with a minimum GPA of 3.0 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of MICI 4901/4902.06. Certain specified courses from other departments (BIOC, BIOL, CHEM, NESC) count as MICI-subject courses (see below).

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Microbiology and Immunology.

Admission to Honours
Students who wish to enrol in a Microbiology and Immunology Honours program should apply for admission after receiving their 2nd year Fall term grades. To be admitted, students must have:

- Consulted with a departmental academic advisor
- Completed the required 1000 level classes
- A GPA of B+ at the time of application
Departmental requirements

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a BSc Concentrated Honours program in Microbiology and Immunology must complete the following courses:

1000 level

- BIOL 1010.03: Principles of Biology Part I/
  BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/
  BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/
  CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

2000 level

- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab

3000 level

- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology
- MICI 3115.03: Immunology
- MICI 3119.03: Physiology of the Prokaryotic Cell

4000 level

- MICI 4901/4902.06: Honours Research and Thesis*
- One additional 4000-level MICI course
- A minimum of three additional courses from the list below, at least one of which is at the 4000 level
  - MICI 2115.03: Human Organs and Tissues, MICI 3024.03: Microscopy, MICI 3620.03: Experiential Learning in Microbiology and Immunology, MICI 4027.03: Molecular Mechanisms of Cancer, MICI 4033.03: Advanced Microbial Genetics, MICI 4100.03: Processes and Mediators of Inflammation, MICI 4114.03: Advanced Topics in Molecular and Medical Virology, MICI 4115.03: Immunology of the Host Resistance, MICI 4116.03: Current Topics in Mucosal Immunology, MICI 4118.03: Molecular Bacterial Pathogenesis, MICI 4119.03: Host Pathogen Interactions, MICI 4218.03: Clinical Microbiology, MICI 4302.03: Molecular Immunology
  - BIOC 4010.03: Bioinformatics, BIOC 4403.03: Genes and Genomes, BIOC 4404.03: Gene Expression, BIOC 4501.03: Medical Biotechnology, BIOC 4835.03/BIOL 4035.03: Human Genetics
  - BIOL 2004.03: Diversity of Life II, BIOL 3037.03 Gene Editing, and Synthetic Biology, BIOL 3101.03: Microbial Ecology, BIOL 3102.03: Microbial Eukaryotes, BIOL 3322.03: Parasitology, BIOL 4020.03 Advanced Cell Biology
  - PSYO 3180.03/NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
  - FOSC 3080.03: Food Microbiology

* The Honours research thesis (MICI 4901/4902.06) is normally supervised by a faculty member from Microbiology and Immunology or from Biochemistry and Molecular Biology (including joint and cross appointments). Students who wish to undertake their honours research project in another department must first have the project approved by the Microbiology and Immunology Undergraduate Studies Committee.

Grade requirements for Honours:
• In the following core courses, MICI 2100.03: Introductory Microbiology and Immunology, MICI 2400.03: Laboratory Methods in Microbiology and Immunology, MICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell and MICI 4901/4902.06: Honours Research and Thesis, a minimum grade of B in five and a minimum grade of B- in the sixth course. In the other MICI or required courses a grade of C or greater is required.

BSc (120 credit hour) Combined Honours in Microbiology and Immunology and another subject

Students who wish to study Microbiology and Immunology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Microbiology and Immunology may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Microbiology and Immunology, this requirement is satisfied through MICI 4901/4902.06.

A Co-op option is available for students enrolled in BSc Combined Honours with Microbiology and Immunology as the primary subject.

Departmental requirements

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Microbiology and Immunology and another subject must complete the following:

Microbiology and Immunology as the primary subject

• 1000-level as for Concentrated Honours (above)
• MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
• BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
• BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab
• BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
• MICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell
• MICI 4901/4902.06: Honours Research and Thesis
• One additional MICI course at the 4000 level

Requirements for a Combined Honours with Biochemistry & Molecular Biology as the secondary subject can be met by completing the following courses in addition to the above list:

• BIOC 3300.03: Intermediate Metabolism, BIOC 3700.03: Biomolecular Chemistry
• Two courses from BIOC 40XX, 43XX, 44XX, 45XX, or 47XX
• Three additional MICI or BIOC courses at or above the 2000 level

Microbiology & Immunology as the secondary subject

• 1000-level as for Concentrated Honours (above)
• MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
• BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
• BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introduction Biochemistry Lab
• BIOC 3400.03: Nucleic Acid Biochemistry and Molecular BiologyMICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell
• One additional MICI or MICI-approved course at or above the 3000 level.
• One additional MICI course at the 4000 level

Grade requirements for Combined Honours:

In the following core courses, MICI 2100.03: Introductory Microbiology and Immunology, MICI 2400.03: Laboratory Methods in Microbiology and Immunology, MICI 3114.03: Virology, MICI 3115.03: Immunology, MICI 3119.03: Physiology of the Prokaryotic Cell and MICI 4901/4902.06: Honours Research and Thesis, a minimum of B in five and a minimum of B- in the sixth course. In the other MICI or required courses a grade of C or greater is required.

**BSc (120 credit hour) Major in Microbiology and Immunology**

The 120 credit hour Major is suited to students who want to focus on Microbiology and Immunology, but wish to have a program that is somewhat less constrained than the Honours program. Microbiology and Immunology Majors complete a minimum of 42 credit hours in program courses above the 1000 level. Certain specified courses from other departments (BIOC, BIOL, CHEM, NESC) count as program courses (see below). Research and other experiential learning opportunities are available through laboratories, and through direct research and experiential classes.

A **Co-op option** is available for students enrolled in a 120 credit hour BSc Major program in Microbiology and Immunology.

It is required that a student consult with a MICI departmental advisor.

**Departmental requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Microbiology and Immunology must complete the following courses:

**1000 level**

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

**2000 level**

- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab

**3000 level**

- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology
- MICI 3115.03: Immunology
- MICI 3119.03: Physiology of the Prokaryotic Cell

**4000 level**

- One of the following courses: MICI 4033.03: Advanced Microbial Genetics, MICI 4100.03: Processes and Mediators of Inflammation, MICI 4114.03: Advanced Topics in Molecular and Medical Virology, MICI 4115.03: Immunology of the Host Resistance, MICI 4116.03: Current Topics in Mucosal Immunology, MICI 4118.03: Molecular Bacterial
Pathogenesis, MICI 4119.03: Host Pathogen Interactions, MICI 4218.03: Clinical Microbiology, or MICI 4302.03: Molecular Immunology

- Three additional credit hours in MICI-approved courses at or above the 3000 level

Grade requirements for Majors:

For all MICI or required courses you must obtain a grade of C- or better. In some cases, you will need a grade of B- as a prerequisite for entry into 3000 or 4000 level courses.

**BSc (120 credit hour) Double Major in Microbiology and Immunology and another subject**

The Double Major degree program allows students to combine a study of Microbiology and Immunology with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Microbiology and Immunology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A [Co-op option](#) is available for students enrolled in BSc Double Major with Microbiology and Immunology as the primary subject.

**Departmental requirements**

In addition to fulfilling the requirements outlined in the [Academic Regulations](#) and [College of Arts and Science Degree Requirements](#) sections, students in a Double Major program in Microbiology and Immunology and another subject must complete the following set of core courses:

**1000 level**

- BIOL 1010.03: Principles of Biology Part I/BIOL 1011.03: Principles of Biology Part II or BIOL 1020.03: Introductory Biology I: Cells, Genetics and Evolution/BIOL 1021.03: Introductory Biology II: Organismal Biology and Ecology
- MATH 1000.03: Differential and Integral Calculus I or MATH 1215.03: Life Sciences Calculus
- MATH 1010.03: Differential and Integral Calculus II or STAT 1060.03: Introductory Statistics for Science and Health Sciences

Or Integrated Science Program: One of SCIE 1515.36, SCIE 1520.30, SCIE 1540.27, SCIE 1505.18

**2000 level**

- MICI 2100.03: Introductory Microbiology and Immunology and MICI 2400.03: Laboratory Methods in Microbiology and Immunology
- BIOL 2020.03: Cell Biology and BIOL 2030.03: Genetics and Molecular Biology
- BIOC 2300.03: Introduction to Biochemistry and BIOC 2610.03: Introductory Biochemistry Lab

**3000/4000 level**

- BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology
- MICI 3114.03: Virology
- MICI 3115.03: Immunology
- MICI 3119.03: Physiology of the Prokaryotic Cell
- MICI 3XXX-4XXX (or MICI approved): one course or 6 credit hours if the second subject is Biochemistry
- One of MICI 4033.03: Advanced Microbial Genetics, MICI 4100.03: Processes and Mediators of Inflammation, MICI 4114.03: Advanced Topics in Molecular and Medical Virology, MICI 4115.03: Immunology of the Host Resistance, MICI 4116.03: Current Topics in Mucosal Immunology, MICI 4118.03: Molecular Bacterial Pathogenesis, MICI 4119.03: Host Pathogen Interactions, MICI 4218.03: Clinical Microbiology, or MICI 4302.03: Molecular Immunology
The same set of core courses is required in a Double Major with Microbiology and Immunology as the primary or secondary subject.

Grade requirements for Double Major:

For all MICI or required courses you must obtain a grade of C- or better. In some cases, you will need a grade of B- as a prerequisite for entry into 3000 or 4000 level courses.

**Minor in Microbiology and Immunology**

The 90 credit hour degree is suited to students who want to focus on Microbiology and Immunology, but wish to graduate in three years rather than four in the event of acceptance into a professional school that has the prerequisite of an undergraduate degree. Students will complete a minimum of 18 credit hours in Microbiology and Immunology above the 1000 level. Certain specified courses from other departments (BIOC, CHEM) are also required.

**Departmental Requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a 90 credit BSc Minor program in Microbiology and Immunology must complete the following courses:

1000 level

BIOL 1010 and 1011 or BIOL 1020 and 1021

CHEM 1011 and 1012

2000 level and above

MICI 2100.03: Introductory Microbiology and Immunology, and MICI 2400.03: Laboratory Methods in Microbiology and Immunology, plus 12 additional credit hours in MICI (or MICI-approved) courses above the 1000 level. Note that 3000 level MICI courses will, for the most part, require certain prerequisite grades within courses provided by other departments, such as BIOL 2020, BIOL 2030 and BIOC 2300.

It is required that a student considering the 90 credit hour degree consult with a MICI departmental advisor.

Contact Microbiology and Immunology for more information.

**Co-op, Minors, Certificates and Engineering Concurrent Programs for Students**

**Co-operative Education Program (Science Co-op) in Microbiology and Immunology**

**Co-op Academic Advisor:** Dr. D.B. Stoltz (dstoltz@dal.ca)

Science Co-op is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Science Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Microbiology and Immunology, or in Combined Honours or Double Major programs with Microbiology and Immunology as the primary subject. The number of students admitted into Science Co-op each year is limited. A minimum GPA of 3.3 is required for admission and for continuation in the Co-op program as is a grade of B+ in MICI 2100.03. Students must be eligible to work in Canada.

Students normally apply to join Science Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) in the Fall term of the year they join.

Details are available from the Microbiology and Immunology Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html For more information on Co-op Education in Microbiology and Immunology, please see the Department webpage www.dal.ca/academics/programs/undergraduate/mbim/what_will_I_learn/coop_work_terms.html
Minors available to students in Microbiology and Immunology

Minors programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally embedded within 120 credit hour programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Microbiology and Immunology may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Microbiology and Immunology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a Microbiology and Immunology Major or Honours program include:

- Certificate in Genetics
- Certificate in Medicinal Chemistry

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the department's website.

Course Notes

For more detailed information on the following courses please see the departmental webpage http://microbiology.medicine.dal.ca

NOTE: Owing to the combined pressures of student numbers and a dearth of available space, the names of students absent from the first day of course may be deleted from course lists; students are therefore advised that being signed into a course is no guarantee of continued registration.

Course Descriptions

MICI 1050 Basic Microbiology and Immunology for Pharmacy
CREDIT HOURS: 3
This course is only for pharmacy students and involves problem based learning tutorials, lectures and laboratory sessions (demonstrations and exercises). Topics include: concepts of antibiotics and immunity, basic principles of microbial structure, physiology, and genetics in relation to microbial pathogenesis.
PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03 or instructor's consent
FORMATS: Lecture | Lab | Tutorial

MICI 1100 Health Science Microbiology
CREDIT HOURS: 3
An introduction to microbiology and infectious diseases only for healthcare professionals. It includes a study of the structure and physiology of microorganisms, the ways microorganisms cause disease in man and the way they affect human's well being.
CALENDAR NOTES: This course is also offered by distance education to all students.
RESTRICTIONS: This course is restricted to Nursing and Kinesiology students. It is not for students registered in the Faculty of Science.

FORMATS: Lecture

**MICI 1200 Introduction to General and Oral Microbiology**

CREDIT HOURS: 3

See course description in the Dental Hygiene section of the Dentistry, Law and Medicine Calendar (DEHY 2850.03).

**MICI 2100 Introductory Microbiology and Immunology**

CREDIT HOURS: 3

An introduction to the basic concepts of microbiology and immunology. Topics include: structure, genetics and biology of microorganisms, basic immunology and host defence mechanisms. The class is designed to interrelate the major research themes within the Department (bacteriology and microbial pathogenesis, immunology, microbial and molecular genetics, virology and cancer biology).

CALENDAR NOTES: This class is also offered by distance education with online labs.

PREREQUISITES: Grade of B- or better in BIOL 1010.03 and 1011.03, (or BIOL 1020.03 and BIOL 1021.03) and CHEM 1011.03 and CHEM 1012.03

FORMATS: Lecture | Lab | Online Delivery

**MICI 2115 Human Organs and Tissues**

CREDIT HOURS: 3

Using a histology approach, students learn how tissues and organs are constructed and function at the cellular level normally and in disease. The course does not cover all histology topics. Instead, the subject matter has been selected for its relevance and potential for complementing advanced courses in microbiology, immunology, physiology, and pathology.

PREREQUISITES: Grade of B- or better in BIOL 1010.03 and BIOL 1011.03 (or BIOL 1020.03 and BIOL 1021.03)

CROSSLISTED: PATH 2115.03

RESTRICTIONS: Bachelor of Medical Sciences students cannot take this course

EXCLUSIONS: ANAT 2160.03/BIOL 3430.03, PATH 3000.03

FORMATS: Lecture

**MICI 2400 Laboratory Methods in Microbiology and Immunology**

CREDIT HOURS: 3

An introduction to techniques in Microbiology and Immunology through a rigorous wet laboratory experience that includes training in how to explore safely and effectively the properties of viruses, bacteria and immune cells. This course is directed to students in Microbiology and Immunology, Biochemistry & Molecular Biology, and Biology programs.

COREQUISITES: BIOL 2020.03 and BIOL 2030.03

PREREQUISITES: Grade of B- or better in MICI 2100 or instructor’s consent

FORMATS: Lab

**MICI 3024 Microscopy**

CREDIT HOURS: 3

Biological ultrastructural analysis concentrating on transmission and scanning electron microscopy. Topics include: physical and chemical principles governing technical procedures such as fixation, staining, freeze-fracture, immunocytochemistry, autoradiography, X-ray microanalysis and photography. During laboratory periods, students have the opportunity through individual projects to participate in some techniques covered in lectures.

PREREQUISITES: Grades of B- or better in MICI 2100.03 and BIOL 2020.03

CROSSLISTED: BIOL 3024.03

FORMATS: Lecture | Lab

**MICI 3114 Virology**

CREDIT HOURS: 3

Viruses play important roles in infectious diseases and cancer as well as in model systems for gene regulation, molecular evolution and gene therapy. Topics include: virus structure, assays, classification, gene organization and expression, host-cell interactions, cell transformation, gene therapy and molecular mechanisms of pathogenesis.

PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOL 2020.03 and BIOL 2030.03 (a minimum of B- in each of these courses). BIOC 3400.03 should be taken either prior to or concurrently with this course; the same grade requirement applies.

FORMATS: Lecture | Tutorial

**MICI 3115 Immunology**
CREDIT HOURS: 3
An introduction to cellular and molecular immunology and impacts in human health. Topics include: cells and tissues of the immune system, the structure and synthesis of antibodies, complement pathways, lymphocyte subsets and their functions, the genetics of the immune response and the immunologic contributions to human disease.
PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOL 2020.03 and BIOL 2030.03 (a minimum of B- in each of these courses)
FORMATS: Lecture

MICI 3119 Physiology of the Prokaryotic Cell
CREDIT HOURS: 3
An introduction to the bacterial physiological processes required for interactions with other organisms and the environment. Topics include: molecular architecture and assembly of bacterial cell components, metabolism and energy production, utilization of energy, adaptation responses to host and environmental challenges, and host-pathogen interactions.
PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOL 2020.03 and BIOL 2030.03, (a minimum of B- in each of these courses).

MICI 3620 Experiential Learning in Microbiology and Immunology
CREDIT HOURS: 3
This lab-based course is designed to give students an introduction to general microbiological lab procedures along with molecular and cellular techniques. Topics are centered around major research themes in the Department and are hosted in Faculty laboratories and may include bacteriology, genetics, virology, immunology, and cancer biology. In collaboration with a Faculty supervisor and course coordinator, students draft a learning agreement specifying learning outcomes and how these will be achieved.
CALENDAR NOTES: To register in this course students will need to find a research supervisor and contact the course coordinator to receive approval before registration. Registration must be completed by the last day of fall term - this is an internal departmental deadline.
PREREQUISITES: MICI 2100.03, BIOC 2300.03, BIOC 2610.03, BIOL 2020.03 and BIOL 2030.03 (a minimum of B- in each of these courses). Permission of instructor required.
RESTRICTIONS: Normally restricted to students registered in a Majors or Honours degree in Microbiology and Immunology; any other students interested should consult the course coordinator.
EXCLUSIONS: The following may not be used towards MICI 3620: lab work that is part of another scheduled class, co-op workterms, and paid employment. Only one experiential learning course per degree is permitted. Students may not take MICI 3620 concurrently with MICI 4900, MICI 4700, MICI 4901, MICI 4902, or a co-op work term.

MICI 4033 Advanced Microbial Genetics
CREDIT HOURS: 3
This advanced course focuses on select aspects of bacterial gene regulation including bacterial viruses. Topics include gene transfer, transposon biology, bacterial cell signaling, activators and repressors, molecular and chemical approaches to genetic analysis and regulation of bacterial gene expression.
PREREQUISITES: Grade of B- or better in MICI 3119.03 and instructor's consent
EXCLUSIONS: MICI 5033.03
FORMATS: Lecture

MICI 4100 Processes and Mediators of Inflammation
CREDIT HOURS: 3
This advanced course focuses on the cellular and molecular mechanisms of inflammation and consists of lectures and student presentations based on review articles and current research papers. Topics include: inflammatory mediators and receptors, complement, steroids, tissue remodeling. Current research questions and emerging treatments are emphasized.
PREREQUISITES: Grade of B+ or better in MICI 3115.03 and instructor’s consent
EXCLUSIONS: MICI 5100.03, PATH 5100.03
FORMATS: Lecture | Discussion

MICI 4114 Advanced Topics in Molecular and Medical Virology
CREDIT HOURS: 3
This advanced course focuses on selected aspects of molecular and medical virology and consists of lectures and student presentations based on review articles and current research papers. Topics include: Hepatitis C virus and innate immunity, influenza virus pathogenesis, virus interactions with host cells, viruses as vectors for gene therapy and applications.
PREREQUISITES: Students enrol in the Fall semester, but must attend the first class where final admittance is determined. Restricted enrollment based on performance in MICI 3114.03 (minimum A- or instructor's consent)
CROSSLISTED: MICI 5114.03
FORMATS: Lecture | Discussion
**MICI 4115 Medical Immunology**  
CREDIT HOURS: 3  
This advanced course focuses on fundamental and advanced immune mechanisms involved in the host immune response to pathogens and tumor cells and consists of lectures and student presentations based on review articles and current research papers. Topics also include: allergic inflammation and transplantation immunology.  
PREREQUISITES: Minimum grade of B in MICI 3115.03 or instructor’s consent  
FORMATS: Lecture | Discussion

**MICI 4116 Current Topics in Mucosal Immunology**  
CREDIT HOURS: 3  
This advanced course focuses on the mucosal immune system, which maintains a state of tolerance to environmental antigens while mounting a strong immune response to infectious agents. The course consists of lectures and student presentations based on review articles and research papers. Topics include: immune mechanisms in the gastrointestinal tract and respiratory and genitourinary systems.  
PREREQUISITES: MICI 3115.03 with a grade of B or better or instructor’s consent  
CROSSLISTED: MICI 5116.03

**MICI 4118 Molecular Bacterial Pathogenesis**  
CREDIT HOURS: 3  
This advanced course focuses on the molecular basis of bacterial pathogenesis and consists of lectures and student presentations based on landmark articles and current research papers. Topics include: the regulation of genes encoding virulence factors, the function of these factors in surface colonization, invasion, intracellular growth and toxin production.  
PREREQUISITES: Grade of B or better in MICI 3119.03 or instructor's consent  
EXCLUSIONS: MICI 5118.03

**MICI 4119 Host Pathogen Interactions**  
CREDIT HOURS: 3  
This is an advanced undergraduate course, focusing on how pathogens modify, disrupt or utilize cellular functions for their own purposes and the significance of these interactions in both pathogenesis and host defense. It will help students critically evaluate the scientific literature, develop hypotheses and design experiments to test these hypotheses.  
PREREQUISITES: Students must have taken 2 out of 3 of the following: MICI 3114, MICI 3115, MICI 3119, or receive permission from the instructor. Students require a B average in these classes, with a minimum B- in any one.  
FORMATS: Lecture

**MICI 4218 Clinical Microbiology**  
CREDIT HOURS: 3  
This advanced course covers all aspects of clinical microbiology including bacteriology, virology, parasitology, mycology and molecular diagnostics. The emphasis will be placed on bacteriology. Topics include epidemiology and transmission, laboratory management and identification, antimicrobial testing and resistance, treatment and prevention of infectious diseases.  
PREREQUISITES: Grade of B or better in MICI 3119.03 or instructor's consent  
FORMATS: Lecture

**MICI 4701 Advanced Topics in Microbiology and Immunology**  
CREDIT HOURS: 3  
This is an advanced literature review course that is not part of the regular BSc program. Approval is required from the departmental undergraduate committee.  
PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will supervise the independent study program.

**MICI 4702 Advanced Topics in Microbiology and Immunology**  
CREDIT HOURS: 3  
This is an advanced literature review course that is not part of the regular BSc program. Approval is required from the departmental undergraduate committee.  
PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will supervise the independent study program.

**MICI 4703 Directed Research Project 1**  
CREDIT HOURS: 3  
Students spend at least one day per week performing laboratory research in the lab of approved departmental faculty. This course is not for students in a regular BSc Honours program. Approval is required from the departmental undergraduate committee.
CALENDAR NOTES: Credit can only be given for this course if MICI 4703.03 and MICI 4704.03 are completed in consecutive terms, and partial credit cannot be given for a single term.
PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will serve as a supervisor. At least a B average for MICI 3114.03, MICI 3115.03 and MICI 3119.03.
EXCLUSIONS: MICI 4700.06

MICI 4704 Directed Research Project 2
CREDIT HOURS: 3
Students spend at least one day per week performing laboratory research in the lab of approved departmental faculty. This course is not for students in a regular BSc Honours program. Approval is required from the departmental undergraduate committee.
CALENDAR NOTES: Credit can only be given for this course if MICI 4703.03 and MICI 4704.03 are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Permission of the Undergraduate Studies Committee and a member of the Department who will serve as supervisor. At least a B average for MICI 3114.03, MICI 3115.03, and MICI 3119.03.
EXCLUSIONS: MICI 4700.06

MICI 4901 Honours Research and Thesis 1
CREDIT HOURS: 3
MICI 4901 is followed by MICI 4902, both being required for completion of the Honours. While typically requiring original research conducted under the supervision of a faculty member, in the period of the pandemic and ahead, Honours can be conducted in 1 of 3 options: 1) If the student is permitted into the supervisor’s laboratory beginning with 4901, for both terms (e.g. 4902), the project should be original research conducted at the bench. 2) If the student is not in the laboratory or conducting in silico analyses for both 4901 and 4902, (for example, not on campus) a written project will be based on research of the literature on a problem related to the supervisor’s research, in consultation with the supervisor. 3) If the student is permitted into the laboratory in the (second, i.e. 4902) only, the project could be a “hybrid” of a literature review.
CALENDAR NOTES: This course must be taken consecutively with MICI 4902.03. No grade is provided until both MICI 4901.03 and MICI 4902.03 are completed.
PREREQUISITES: B average in at least three of MICI 3114.03, MICI 3115.03, MICI 3119.03 and BIOC 3400.03 with no grade lower than B- (AND instructor’s permission); and a member of the department who will serve as a supervisor. Students must have completed all second year course requirements, and preferably all third year course requirements, although there may be exceptions in which one required third year course is deferred to fourth year.
EXCLUSIONS: MICI 4900.06

MICI 4902 Honours Research and Thesis 2
CREDIT HOURS: 3
MICI 4902 is a continuation of MICI 4901. While typically requiring original research conducted under the supervision of a faculty member, in the period of the pandemic and ahead, Honours can be conducted in 1 of 3 options: 1) If the student is permitted into the supervisor’s laboratory beginning in fall term, for both terms, the project should be original research conducted at the bench. 2) If the student is not in the laboratory or conducting in silico analyses for both terms, a written project will be based on research of the literature on a problem related to the supervisor’s research, in consultation with the supervisor. 3) If the student is permitted into the laboratory in the (second, 4902) winter term only, the project could be a “hybrid” of a literature review.
CALENDAR NOTES: This course must be taken consecutively with MICI 4901.03. No grade is provided until both MICI 4901.03 and MICI 4902.03 are completed.
PREREQUISITES: B average in at least three of MICI 3114.03, MICI 3115.03, MICI 3119.03 and BIOC 3400.03 with no grade lower than B- (AND instructor’s permission); and a member of the department who will serve as a supervisor. Students must have completed all second year course requirements.
EXCLUSIONS: MICI 4900.06

MICI 8891 Co-op Work Term I
CREDIT HOURS: 0

MICI 8892 Co-op Work Term II
CREDIT HOURS: 0

MICI 8893 Co-op Work Term III
CREDIT HOURS: 0

Introduction
The primary goal of the field of Neuroscience is to understand the brain. Neuroscientists examine all aspects of the structure and function of nervous systems and use a variety of experimental strategies to understand them, including molecular, biochemical, behavioural, anatomical, physiological, and developmental approaches. The programs outlined below represent all of these approaches, with an emphasis on behaviour as the adaptive product of neural activity and neuroplasticity. Knowledge obtained from research in Neuroscience may be applied to a variety of human health problems, including Alzheimer's disease, Parkinson's disease, and a variety of drug- or injury-induced behavioural disorders.

Degree Programs
The Department of Psychology and Neuroscience offers the following degree programs in Neuroscience:

- BSc (120 credit hour) Honours (Concentrated)*
- BSc (120 credit hour) Combined Honours*
- BSc (120 credit hour) Major*
- BSc (120 credit hour) Double Major*
- Minor in Neuroscience

* May be combined with Minor programs from other disciplines (except Psychology).

Departmental requirements for each degree program can be seen by following the links in the menu at the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Neuroscience undergraduate academic advisor.

Staff

Dean
Macdonald, C.L.B. BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chairperson of Department
Newman, A. J.. BA (Winnipeg), MSc, PhD (Oregon)

Academic Advisors
To contact an academic advisor, please go to the Psychology and Neuroscience Main Office (LSC 3263), telephone (902) 494-3417, or visit the Psychology and Neuroscience website.

Professors Emeriti
Brown, R. E., BSc (Victoria), MA, PhD (Dalhousie)
Klein, R. M., BA (SUNY), MA, PhD (Oregon)
LoLordo, V. M., AB (Brown), PhD (Penn)
Meinertzhagen, I. A., BSc (Aberdeen), PhD, DSc (St. Andrews)
Mitchell, D. E., BSc, MAppSc (Melb), PhD (Berkeley)

Professors
Abbass, A., BSc (Ottawa), MD (Dalhousie), FRCP (Toronto), major appointment in Psychiatry
Adamo, S., BSc (Toronto), PhD (McGill), Graduate Coordinator
Barrett, S. P., BA (St. FX), PhD (McGill)
Campbell-Yeo, M., BSc, MScN (Dalhousie), PhDN (McGill), major appointment in the School of Nursing
Chambers, C. T., BSc (Dalhousie), MA, PhD (UBC), joint appointment in Pediatrics, Faculty of Science Killam Professor in Psychology
Corkum, P. V., BSc (Dalhousie), MA, PhD (OISE at Toronto)
Crowder, N. A., BSc, PhD (Alberta)
Deacon, S. H., BSc (UPEI), PhD (Oxon)
Duffy, K., BA (St. Thomas), PhD (McMaster)
Eskes, G. A., BA, PhD (Berkeley), joint appointment in Psychiatry
Finley, G. A., BSc MD (Dalhousie), FRCP, major appointment in Anaesthesia
Good, K., BSc (UNB), MSc, PhD (UBC), major appointment in Psychiatry
Kay-Raining Bird, E., BA (Queen’s), MSc (Columbia), PhD (Univ Wisconsin - Madison), major appointment in the School of Human Communication Disorders
Kiefte, M., BA (Memorial), MSc, PhD (Alberta), major appointment in the School of Human Communication Disorders
Moore, C. L., BA, PhD (Cantab)
Newman, A. J., BA (Winnipeg), MSc, PhD (Oregon)
Perrot, T. S., BSc, PhD (Western)
Phillmore, L., BA (UWO), MA, PhD (Queen’s)
Rosen, N. O., BA (Queen’s), PhD (McGill)
Rusak, B., BA (Toronto), PhD (Berkeley), FRSC, joint appointment in Psychiatry
Semba, K., BEd, MA (Tokyo), PhD (Rutgers), major appointment in Medical Neuroscience
Sherry, S. B., BA (York), MA (UBC), PhD (Saskatchewan)
Smith, I. M., BA (Dalhousie), MSc (Brown), PhD (Dalhousie), major appointment in Pediatrics, Joan and Jack Craig Chair in Autism Research
Stewart, S., BSc (Dalhousie), PhD (McGill), joint appointment in Psychiatry
Taylor-Helmick, T. L., BA (Calgary), MSc, PhD (Dalhousie)
Uher, R., MRCPsych (Royal College of Psychiatrists), CCT (London Deanery, UK), PhD, MUDr. (Charles Univ), major appointment in Psychiatry
Ungar, M., BA, BSW, MSW (McGill), PhD (Wilfrid Laurier), major appointment in the School of Social Work
Westwood, D. A., BSc, MA, PhD (Waterloo), major appointment in the School of Health and Human Performance

Associate Professors
Aiken, S., BA, MSc (Western), PhD (Toronto), major appointment in the School of Human Communication Disorders
Bardouille, T., BSc (Queen's), MSc (Dalhousie), PhD (Toronto) major appointment in Psychiatry
Boe, S., BPhEd (Brock), PhD, MPT (Western), major appointment in the School of Physiotherapy
Bombay, A., BSc (Ottawa), MSc, PhD (Carleton), major appointment is held jointly with the School of Nursing and Psychiatry
Chorney, J., BSc (Dalhousie), MA, PhD (West Virginia), major appointment in Anesthesiology
Fisher, D., BSc (Ottawa), MSc, PhD (Carleton), major appointment in Psychiatry
Fisk, J., BSc, MA, PhD (Western), major appointment in Psychiatry
Franklin, T., BSc (King's), MSc (Dalhousie), PhD (Swiss Federal Institute of Technology)
Jacques, S., BA (McGill), MA, PhD (Toronto)
Johnson, S., BA (Kalamazoo), MSc, PhD (Victoria), Clinical PhD Program Director of Training
Meier, S., BSc, MSc (Universitat Basel, Switzerland), PhD (Ruprecht Karls Universitat, Germany)
Neydli, H., BSc Hons (Dalhousie), MSc, PhD (Toronto), major appointment in Health and Human Performance
Robinson, L., BSc (Victoria), MA, PhD (Simon Fraser), major appointment in the School of Health and Human Performance
Weaver, I. C. G., BSc (Aberdeen), MSc (Bristol), PhD (McGill)

Assistant Professors
Blais, J., BA/MA/PhD (Carleton)
Cloutier, A., BA, MA (Carleton), PhD (Queens) major appointment in Rowe School of Business
Conrad, C., BA, MEC, PhD (Dalhousie), MA (Queens) major appointment in Information Management
Dithurbide, L., BA (St. Mary’s), MA (Brock), PhD (Michigan State), major appointment in Health and Human Performance
Filliter, J., BSc, MSc, PhD (Dalhousie) major appointment in Pediatrics
Ghanouni, P., BSc/MSc (SBUMS), PhD (UBC) major appointment in Occupational Therapy
Hashimi, J., BSc (Punjab), MSc (Western), PhD (Toronto), major appointment in Anesthesia
Ilie, G., BSc, MA (York), PhD (Toronto), major appointment in Community Health and Epidemiology
Lee-Bagley, D., BSc (Calgary), MSc, PhD (UBC), major appointment in Family Medicine
Lovas, D., BSc, MD (Dalhousie), major appointment in Psychiatry
Pavlova, B., MSc (Palacky Univ., Czech Republic), PhD (Charles Univ., Czech Republic), DClinPsy (Inst. of Psychiatry, King’s College)
Thomas, M., BSc (St. Andrew’s), MBChB (Mancester), DRCOG/MRCP-UK (Glasgow), PhD (Central Lancashire) FRCPCH FRCP, major appointment in Pediatrics
Town, J., BSc (York), DClinPsy (Univ of Sheffield), major appointment in Psychiatry
Weatherhead, D., COGS-P-BCH (Queen’s), PhD (Waterloo)
Yakovenko, I., BSc (Toronto), MSc (Calgary), PhD (Yale), joint appointment in Psychiatry

University Teaching Fellows
Gadbois, S., BP, MAPs (Moncton), PhD (Dalhousie)
Stamp, J., BSc (Dalhousie), PhD (Cambridge)
Stevens, L., BSc (Acadia), MSc, PhD (Dalhousie), Undergraduate Program Coordinator

Senior Instructors
Borycz, J., PhD (Inst. of Pharmacology, Krakow, Poland)
Christie, J., BSc, MSc, PhD (Dalhousie)
Juckes, T., BA, MA (Natal), PhD (Dalhousie)
Mackinnon, S., BA(H) (UCCB), MSc (Wildred Laurier), PhD (Dalhousie)
Pencer, A., BSc (St. FX), MSc, PhD (Calgary)

Instructors
Stratton, N., BA (Concordia), MA/PhD (Ryerson)

Adjunct Professors
Barresi, J., BSc (Brown), MA (S Calif), MS, PhD (Wisc), Psychology and Neuroscience/Dalhousie
Cawley, E., BA (Hons) Ottawa, MSc, PhD (McGill), National Mental Health Strategy
Champond, A.S., BSc (Montreal), PhD (McGill) Psychology/Acadia
Chipman, K., BA (UPEI), MA, PhD (Western), Neuropsychology Service/Nova Scotia Hospital
Church, E., BA (St. John’s), MA, PhD (Toronto), School Psychology/Mount Saint Vincent
Conrad, N., BA (St. Mary’s), PhD (McMaster), Psychology/Saint Mary’s
Day, A., BA (Manitoba), MSc, PhD (Waterloo), Psychology/Saint Mary’s
DiGiorgio, C., BA (UCCB), BSc, BEd (Dalhousie), MEd (St. FX) PhD (Univ. South Australia)
Ellsworth, C., BA (McMaster), MA, PhD (Queen’s), Psychology/IWK Health Centre
Flanagan, H., BA, BSc (McMaster), MA, PhD (York)
Gilin Oore, D., BSc (Northern Michigan), MA, PhD (Missouri-St. Louis), Psychology/Saint Mary’s
Ivanoff, J., BSc, MA (Guelph), PhD (Dalhousie), Psychology/Saint Mary’s
Lackner, C., MSc (Queen’s) PhD (Brock), Psychology/Mount Saint Vincent
LoLordo, V. M., AB (Brown), PhD (Penn), Psychology and Neuroscience/Dalhousie
MacNeil, B., BSc (St. FX), PhD (New Brunswick) Mental Health and Addictions/QEII Health Sciences Centre
Marchand, Y., MCS (Univ of Paris), PhD (Compiegne)
Mitchell, D. E., BSc, MAAppSc (Melb), PhD (Berkeley), Psychology and Neuroscience/Dalhousie
Omisaode, A., BA (York), PhD (Dalhousie), Neuropsychology/QEII Health Sciences Centre
Rigney, G., BHons, PhD (South Australia) Psychology/CQUniversity Adelaide
Robertson, E., BA (Mt. A), MA, PhD (Western), Psychology/Cape Breton Univ
Roy-Charland, A., BPs, MAPs and PhD (Moncton), Psychology/Univ. of Moncton
Saint-Aubin, J., BA (Sherbrooke), MPs, PhD (Laval), École de psychologie/ Université de Moncton
Schellinck, H., BSc, MSc, PhD (Dalhousie), Psychology and Neuroscience/Dalhousie
Shaw, S. R., BSc (London), PhD (St. Andrews), Psychology and Neuroscience/Dalhousie
Smith, S. M., BA (Bishop’s), MA, PhD (Queen’s), Psychology/Saint Mary’s
Vallis, T. M., BSc (Dalhousie), MA, PhD (Western), Psychology/QEII Health Sciences Centre
Watt, M., BA (St. FX), PhD (Dalhousie), Psychology/St. Francis Xavier

Postdoctoral Fellows
Borycz, J., PhD
Bouchard, K., PhD
Ferguson, L. PhD
Huberman, J. PhD
Krenca, K., PhD
Lambe, L., PhD
Yunus, F. PhD

BSc (120 credit hour) Concentrated Honours in Neuroscience

The Honours program is intended to serve as a preparation for graduate work in Neuroscience, biological psychology, medicine, human communication disorders and related fields. Its interdisciplinary nature is reflected in the participation of faculty from several departments in the program. In the first year of study, students take courses which provide a firm grounding in the physical and biological sciences. In subsequent years, the program includes credits in courses drawn from Neuroscience, Psychology and Biology. These include a number of required core courses that emphasize the acquisition and application of laboratory skills.

Honours students complete a minimum of 54 credit hours above the 1000 level in Neuroscience with a minimum GPA of 3.0 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of NESC 4501.03 and NESC 4502.03.

Admission to Honours
Students must apply for admission to Honours programs. Students wishing to enrol in Honours in Neuroscience should consult with the Neuroscience Honours Advisor in January of their third year. Students may not apply for Honours before January of their third year of studies. A detailed description of the Honours application process can be found on the departmental website www.dal.ca/psychandneuro.

Admission requirements include:

- A grade of B+ or better in NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent)
- A minimum of A- or better in the most recently completed:
  - 18 credit hours of NESC courses (for admission in January of 3rd year)
  - OR
  - 27 credit hours of NESC courses (for admission at end of 3rd year)
- A willing supervisor

Departmental requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Neuroscience must complete the following:

1000 level

- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or equivalent) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or equivalent) with grade of B- or better
- Principles of Biology I (BIOL 1010.03; or equivalent) with a grade of B- or better
- Principles of Biology II (BIOL 1011.03; or equivalent) with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics

2000 level

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent)
- NESC 2470.03: Systems Neuroscience
- NESC 2570.03: Cellular Neuroscience
- PSYO 2501.03: Statistical Methods I
- BIOL 2020.03: Cell Biology
- Six credit hours selected from:
  - NESC 2130.03: Introduction to Cognitive Psychology
  - NESC 2140.03: Learning: Conditioning & Motivation
  - NESC 2150.03: Perceptual Processes
  - NESC 2160.03: Animal Behaviour
  - BIOC 2300.03: Introduction to Biochemistry
  - BIOL 2030.03: Genetics and Molecular Biology

Note: It is recommended that NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent) and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000 level
Six credit hours of laboratory courses selected from:
- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Research Methods in Psycholinguistics
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill three-credit hours of laboratory courses)

Six additional credit hours selected from:
- NESC 3162.03: Advanced Animal Behaviour
- NESC 3170.03: Hormones and Behaviour
- NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- NESC 3190.03: Psycholinguistics
- NESC 3227.03: Principles of Human Neuropsychology
- NESC 3237.03: Drugs and Behaviour
- NESC 3264.03: The Science of Sleep
- NESC 3270.03: Developmental Neuroscience
- NESC 3670.03: Genes, Brain and Behaviour
- NESC 3770.03: Behavioural Neuroscience
- NESC 3970.03: Molecular Neuroscience
- BIOL 3020.03: Advanced Cell Biology
- PHAC 3001.03: Pharmacology I (discontinued 21/22)
- PHAC 3030.03: The Drugs Around Us
- PHAC 4001.03: Pharmacology I (discontinued 21/22)
- PHAC 4403.03: Systems Pharmacology I
- PHAC 4409.03: Systems Pharmacology II
- PHYL 3420.03: Sensory Physiology

4000 level
- NESC 4501.03 and NESC 4502.03: Honours Thesis and Qualifying Exam
- PSYO 3502.03: Statistical Methods II
- Six credit hours selected from:
  - NESC 4000.03: Directed Reading Seminar
  - NESC 4007.03: Contemporary Issues in Neuroscience
  - NESC 4008.03: Topics in Neuroscience
- NESC 4050.03: Topics in Perception
- NESC 4070.03: Chemical Neurobiology
- NESC 4130.03: Topics in Cognition
- NESC 4140.03: Animal Learning Topics
- NESC 4160.03: Topics in Behavioural Biology
- NESC 4170.03: Topics in Behavioural Neuroendocrinology
- NESC 4177.03: Theoretical Neuroscience
- NESC 4185.03: Current Advances in Synaptic Function and Plasticity
- NESC 4225.03: Science of Mindfulness
- NESC 4230.03: Human Performance Topics
- NESC 4670.03: Behavioural Neuro(epi)genetics and Genomics
- NESC 4740.03: Topics in the Neurobiology of Learning and Memory
- BIOL 4510.03: Cultural Evolution
- Six additional credit hours from Neuroscience 3000-/4000-level courses

Other regulations

- Courses that are counted towards the Honours program requirements must be a minimum grade of C.

**BSc (120 credit hour) Combined Honours in Neuroscience and another subject**

Students who wish to study Neuroscience in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be from any discipline in the Faculty of Science (other than Psychology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Neuroscience may be the primary subject (with a minimum of 45 credit hours beyond the 1000 level), or the secondary subject (30 credit hours).

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Neuroscience, this requirement is satisfied through NESC 4501.03 and NESC 4502.03.

**Departmental requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Neuroscience and another subject must complete the following:

**1000 level**

- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or equivalent) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or equivalent) with grade of B- or better
- Principles of Biology I (BIOL 1010.03; or equivalent) with a grade of B- or better
- Principles of Biology II (BIOL 1011.03; or equivalent) with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics

**Neuroscience as the primary subject**

**2000 level**

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent) with grade of B+ or better
- NESC 2470.03: Systems Neuroscience
- NESC 2570.03: Cellular Neuroscience
- PSYO 2501.03: Statistical Methods I
- BIOL 2020.03: Cell Biology*
• Additional three credit hours of NESC courses at the 2000-level or above

Note: It is recommended that NESC 2000.03: Methods in Experimental Psychology & Neuroscience and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000 level
Six credit hours of laboratory courses selected from:

• NESC 3051.03: Research Methods in Sensation and Perception
• NESC 3131.03: Research Methods in Attention
• NESC 3133.03: Research Methods in Memory
• NESC 3134.03: Research Methods in Psycholinguistics
• NESC 3137.03: Research Methods in Cognitive Neuroscience
• NESC 3161.03: Measuring Behaviour
• NESC 3165.03: Neuroethology
• NESC 3370.03: Advanced Methods in Neurobiology
• NESC 3371.03: Neuronal Organization Laboratory
• NESC 3440.03: Neuroanatomy
• NESC 3505.03: Neural Data Science
• NESC 3100.03/ NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill three-credit hours of 'laboratory courses')

Three additional credit hours selected from:

• NESC 3162.03: Advanced Animal Behaviour
• NESC 3170.03: Hormones and Behaviour
• NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
• NESC 3190.03: Psycholinguistics
• NESC 3227.03: Principles of Human Neuropsychology
• NESC 3237.03: Drugs and Behaviour
• NESC 3264.03: The Science of Sleep
• NESC 3270.03: Developmental Neuroscience
• NESC 3670.03: Genes, Brain and Behaviour
• NESC 3770.03: Behavioural Neuroscience
• NESC 3970.03: Molecular Neuroscience
• BIOL 3020.03: Advanced Cell Biology
• PATH 4100.03: Critical Thinking in Neuropathology
• PHAC 3001.03: Pharmacology I (discontinued 21/22)
• PHAC 3030.03: The Drugs Around Us
• PHAC 4001.03: Pharmacology I (discontinued 21/22)
• PHAC 4403.03: Systems Pharmacology I
• PHAC 4409.03: Systems Pharmacology II
• PHYL 3420.03: Sensory Physiology

4000 level

• NESC 4501.03 and NESC 4502.03: Honours thesis and Qualifying Exam
• PSYO 3502.03: Statistical Methods II

Six credit hours selected from:

  o NESC 4000.03: Directed Reading Seminar
  o NESC 4007.03: Contemporary Issues in Neuroscience
  o NESC 4008.03: Topics in Neuroscience
  o NESC 4050.03: Topics in Perception
  o NESC 4070.03: Chemical Neurobiology
  o NESC 4130.03: Topics in Cognition
  o NESC 4140.03: Animal Learning Topics
  o NESC 4160.03: Topics in Behavioural Biology
- NESC 4170.03: Topics in Behavioural Neuroendocrinology
- NESC 4177.03: Theoretical Neuroscience
- NESC 4185.03: Current Advances in Synaptic Function and Plasticity
- NESC 4225.03: Science of Mindfulness
- NESC 4230.03: Human Performance Topics
- NESC 4670.03: Behavioural Neuro(epi)genetics and Genomics
- NESC 4740.03: Topics in the Neurobiology of Learning and Memory
- BIOL 4510.03: Cultural Evolution
- PATH 4100.03: Critical Thinking in Neuropathology

- Six additional credit hours from Neuroscience 3000-/4000-level courses

**Neuroscience as the secondary subject**

**2000 level**

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent)
- NESC 2470.03: Systems Neuroscience
- NESC 2570.03: Cellular Neuroscience
- PSYO 2501.03: Statistical Methods I
- BIOL 2020.03: Cell Biology*
- Additional three credit hours of NESC courses at the 2000-level (or above)

Note: It is recommended that NESC 2000.03: Methods in Experimental Psychology & Neuroscience and PSYO 2501.03: Statistical Methods I be taken concurrently.

**3000/4000 level**

Six credit hours of laboratory courses selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Research Methods in Psycholinguistics
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill three-credit hours of laboratory courses)

- 12 additional credit hours selected from NESC courses at the 3000 or 4000 level, including: BIOL 3020.03: Advanced Cell Biology, PATH 4100.03: Critical Thinking in Neuropathology, PHAC 3001.03: Pharmacology I (discontinued 21/22), PHAC 3030.03: The Drugs Around Us, PHAC 4001.03: Pharmacology I (discontinued 21/22), PHAC 4403.03: Pharmacology I, PHAC 4409.03: Pharmacology II, PHYL 3420.03: Sensory Physiology

* If students undertake another program of study that requires BIOL 2020.03: Cell Biology, they should substitute another three credit hour elective in a Neuroscience topic at the 2000 level for BIOL 2020.03.

**Other regulations**

- Courses that are counted towards the Honours program requirements must be a minimum grade of C.

**BSc (120 credit hour) Major in Neuroscience**

The 120 credit hour Major is suited to students who want to focus on Neuroscience, but wish to have a program that is somewhat less constrained than the Honours program. It provides a four-year survey of Neuroscience, and is designed for students not anticipating subsequent graduate-level training in Neuroscience or related disciplines. Neuroscience Majors complete a minimum of 45 credit hours in Neuroscience courses above the 1000 level and do not have thesis (or related) requirements.
Students should plan their programs carefully and, if required, obtain advice from an academic advisor. Advisors can be consulted by contacting the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263 or (902) 494-3417), or by visiting the Psychology and Neuroscience website.

**Departmental requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Neuroscience must complete the following courses:

**1000 level**

- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or equivalent) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or equivalent) with grade of B- or better
- Principles of Biology I (BIOL 1010.03; or equivalent) with a grade of B- or better
- Principles of Biology II (BIOL 1011.03; or equivalent) with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics

**2000 level**

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent)*
- NESC 2470.03: Systems Neuroscience
- NESC 2570.03: Cellular Neuroscience
- PSYO 2501.03: Statistical Methods I
- BIOL 2020.03: Cell Biology
- Plus, six credit hours selected from:
  - NESC 2130.03: Introduction to Cognitive Psychology
  - NESC 2140.03: Learning: Conditioning & Motivation
  - NESC 2150.03: Perceptual Processes
  - NESC 2160.03: Animal Behaviour
  - BIOC 2300.03: Introduction to Biochemistry
  - BIOL 2030.03: Genetics and Molecular Biology

*Note: It is recommended that NESC 2000.03: Methods in Experimental Psychology & Neuroscience and PSYO 2501.03: Statistical Methods I be taken concurrently.

**3000/4000 level**

Six credit hours of laboratory courses selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Research Methods in Psycholinguistics
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill three-credit hours of laboratory courses)

Six additional credit hours selected from:
- NESC 3162.03: Advanced Animal Behaviour
- NESC 3170.03: Hormones and Behaviour
- NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- NESC 3190.03: Psycholinguistics
- NESC 3227.03: Principles of Human Neuropsychology
- NESC 3237.03: Drugs and Behaviour
- NESC 3264.03: The Science of Sleep
- NESC 3270.03: Developmental Neuroscience
- NESC 3670.03: Genes, Brain and Behaviour
- NESC 3770.03: Behavioural Neuroscience
- NESC 3970.03: Molecular Neuroscience
- BIOL 3020.03: Advanced Cell Biology
- PATH 4100.03: Critical Thinking in Neuropathology
- PHAC 3001.03: Pharmacology I (discontinued 21/22)
- PHAC 3030.03: The Drugs Around Us
- PHAC 4001.03: Pharmacology I (discontinued 21/22)
- PHAC 4403.03: Systems Pharmacology I
- PHAC 4409.03: Systems Pharmacology II
- PHYL 3420.03: Sensory Physiology

An additional 12 credit hours from Neuroscience 3000-/4000-level courses, including BIOL 3020.03: Advanced Cell Biology, PATH 4100.03: Critical Thinking in Neuropathology, PHAC 3001.03: Drugs and Society, PHAC 4403.03: Pharmacology I, PHAC 4409.03: Pharmacology II, PHYL 3420.03: Sensory Physiology, BIOL 4510.03: Cultural Evolution

**BSc (120 credit hour) Double Major in Neuroscience and another subject**

The Double Major degree program allows students to combine a study of Neuroscience with another subject. The other subject may be from any discipline in the Faculty of Science (other than Psychology), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Neuroscience may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

**Departmental requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Double Major program in Neuroscience and another subject must complete the following:

**1000 level**

- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or equivalent) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or equivalent) with grade of B- or better
- Principles of Biology I (BIOL 1010.03; or equivalent) with a grade of B- or better
- Principles of Biology II (BIOL 1011.03; or equivalent) with a grade of B- or better
- CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity
- CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium
- MATH 1215.03: Life Science Calculus (recommended) or MATH 1000.03: Differential and Integral Calculus I
- An additional three credit hours in mathematics or statistics

**Neuroscience as the PRIMARY subject**

**2000 level**

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent)
- NESC 2470.03: Systems Neuroscience
- NESC 2570.03: Cellular Neuroscience
- PSYO 2501.03: Statistical Methods I
- BIOL 2020.03: Cell Biology*
- Additional three credit hours of NESC courses at the 2000-level (or above)

Note: It is recommended that NESC 2000.03: Methods in Experimental Psychology & Neuroscience and PSYO 2501.03: Statistical Methods I be taken concurrently.

**3000/4000 level**
Six credit hours of laboratory courses selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Research Methods in Psycholinguistics
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill three-credit hours of laboratory courses)

Six additional credit hours selected from:

- NESC 3162.03: Advanced Animal Behaviour
- NESC 3170.03: Hormones and Behaviour
- NESC 3180.03: Psychoneuroimmunology/Ecological Immunology
- NESC 3190.03: Psycholinguistics
- NESC 3227.03: Principles of Human Neuropsychology
- NESC 3237.03: Drugs and Behaviour
- NESC 3264.03: The Science of Sleep
- NESC 3270.03: Developmental Neuroscience
- NESC 3670.03: Genes, Brain and Behaviour
- NESC 3770.03: Behavioural Neuroscience
- NESC 3970.03: Molecular Neuroscience
- BIOL 3020.03: Advanced Cell Biology
- PATH 4100.03: Critical Thinking in Neuropathology
- PHAC 3001.03: Pharmacology I (discontinued 21/22)
- PHAC 3030.03: The Drugs Around Us
- PHAC 4001.03: Pharmacology I (discontinued 21/22)
- PHAC 4403.03: Systems Pharmacology I
- PHAC 4409.03: Systems Pharmacology II
- PHYL 3420.03: Sensory Physiology

An additional six credit hours from 3000-/4000-level Neuroscience courses

**Neuroscience as the SECONDARY subject**

**2000 level**

- NESC 2000.03: Methods in Experimental Psychology & Neuroscience (or equivalent)
- NESC 2470.03: Systems Neuroscience
- NESC 2570.03: Cellular Neuroscience
- PSYO 2501.03: Statistical Methods I
- BIOL 2020.03: Cell Biology*
- Additional three credit hours of NESC courses at the 2000-level or above
Note: It is recommended that NESC 2000.03: Methods in Experimental Psychology & Neuroscience and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000/4000 level
Six credit hours of laboratory courses selected from:

- NESC 3051.03: Research Methods in Sensation and Perception
- NESC 3131.03: Research Methods in Attention
- NESC 3133.03: Research Methods in Memory
- NESC 3134.03: Research Methods in Psycholinguistics
- NESC 3137.03: Research Methods in Cognitive Neuroscience
- NESC 3161.03: Measuring Behaviour
- NESC 3165.03: Neuroethology
- NESC 3370.03: Advanced Methods in Neurobiology
- NESC 3371.03: Neuronal Organization Laboratory
- NESC 3440.03: Neuroanatomy
- NESC 3505.03: Neural Data Science
- NESC 3100.03/NESC 3101.03 Independent Research Project (Note: The full-year Independent Research Project may only be used to fulfill three-credit hours of 'laboratory courses')

Plus an additional 12-credit hours selected from NESC courses at the 3000-/4000-level, including: BIOL 3020.03: Advanced Cell Biology, PATH 4100.03: Critical Thinking in Neuropathology, PHAC 3001.03: Pharmacology I (discontinued 21/22), PHAC 3030.03: The Drugs Around Us, PHAC 4001.03: Pharmacology I (discontinued 21/22), PHAC 4403.03: Pharmacology I, PHAC 4409.03: Pharmacology II, PHYL 3420.03: Sensory Physiology, BIOL 4510.03: Cultural Evolution

* If students undertake another program of study that requires BIOL 2020.03: Cell Biology, they should substitute another three credit hour elective in a Neuroscience topic at the 2000 level for BIOL 2020.03.

Minor in Neuroscience
This Minor is available to non-Neuroscience/Psychology students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

Requirements

- A minimum of 18 to a maximum of 36 credit hours in Neuroscience courses at the 2000 level or higher, with a maximum of 6 credit hours from NESC-equivalent courses (e.g., BIOC 2300.03, BIOL 2030.03).

Contact Neuroscience for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Neuroscience
Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc (120 credit hour) program in Neuroscience may choose to include a Minor selected from the list of approved Minors (except Psychology). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates
In combination with a BSc in Neuroscience, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.
A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to students enrolled in a BSc in Neuroscience include:

- Certificate in Animal Behaviour
- Certificate in Science Leadership and Communication

BSc/BEng Concurrent Program
Students wishing to combine their interest in Neuroscience with a degree in Engineering may choose a BSc/BEng Concurrent Program. Students take courses toward, and complete the requirements for a BSc 120 credit hour Major in Neuroscience, at the same time as they fulfill their BEng requirements. Such a program normally takes 5 years (or longer) to complete. Interested students should see undergraduate advisors from Neuroscience and from the Faculty of Engineering in their first year of study.

Courses
Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

Courses vary from year to year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the department’s website.

Course Notes
Students going on in Neuroscience are recommended to take PSYO 1011.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1032.03 with the lab component.

4000-Level Seminars
These seminars are intended for fourth-year Honours students. Third-year Honours students are eligible provided they obtain permission from the instructor, and the needs of all the fourth-year Honours students have been met. The topics covered in these courses vary from year to year. Go to the departmental website www.dal.ca/psychandneuro for more detail about the topics to be covered in the current academic year.

Course Descriptions

**NESC 2000 Methods in Experimental Psychology and Neuroscience**
CREDIT HOURS: 3
This course provides a thorough grounding in scientific research methods used by experimental psychologists and neuroscientists. Lectures explore concepts, methods, and analytic tools employed to investigate human and animal behaviour and neurophysiology. Students also complete assignments and write reports on a series of supervised laboratory experiments to illustrate concepts presented in lectures.

This course is restricted to students registered in Neuroscience Major or Honours programs. It is highly recommended that students take PSYO 2501.03 and PSYO 2130.03 concurrently with NESC 2000.03. The first lecture section must be attended.

PREREQUISITES: (PSYO 1011.03 or PSYO 1031.03) and (PSYO 1012.03 or PSYO 1032.03)

RESTRICTIONS: Neuroscience Majors

FORMATS: Lecture | Lab

**NESC 2130 Introduction to Cognitive Psychology**
CREDIT HOURS: 3
Lectures focus on the processes involved in transforming sensory information into the meaningful everyday world that we know. Initially, emphasis is on the visual system, and how information within that system is structured and organized, followed by a consideration of the character of internal representations used in thinking and remembering.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: PSYO 2130.03
FORMATS: Lecture

NESC 2140 Learning: Conditioning and Motivation
CREDIT HOURS: 3
Lectures focus on several goals: (1) providing general principles of learning; (2) understanding the behaviour of particular species; (3) direct application to human problems. Emphasis is on understanding why researchers in animal learning do what they are currently doing (given the goals and the historical context).
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: PSYO 2140.03
EXCLUSIONS: NESC/PSYO 3005.03
FORMATS: Lecture

NESC 2150 Perceptual Processes
CREDIT HOURS: 3
Perception deals with the way in which our senses provide us with information about our environment. This course focuses on the process by which sensory experiences are coded, how they are interpreted by the nervous system, and how experience modifies perception.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18) OR BIOL 1010.03 (or BIOL 1020.03) and BIOL 1011.03 (or BIOL 1021.03). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: PSYO 2150.03
EXCLUSIONS: NESC/PSYO 3005.03
FORMATS: Lecture

NESC 2160 Animal Behaviour
CREDIT HOURS: 3
Using concepts from behavioural biology and psychology, animal behaviourists attempt to explain why animals behave the way they do. The course examines topics such as mating and social systems, mate choice, the evolution of behaviour, and animal communication. The behaviour of a wide range of animals is studied.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03), each with a grade of B- or better; OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18), each with a grade of B- or better; OR BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, each with a grade of C or better.
CROSSLISTED: PSYO 2160.03
EXCLUSIONS: NESC/PSYO 3005.03
FORMATS: Lecture

NESC 2470 Systems Neuroscience
CREDIT HOURS: 3
This lecture class examines the brain’s role in controlling experience and behaviour in both animals and humans. The course will focus on the functional anatomy of several psychological systems, in particular the brain pathways involved in sensation, perception, movement, motivation, mood, memory, sleep, emotion, and language. There will be emphasis on recent research findings and understanding methodology for asking questions in neuroscience.
CALENDAR NOTES: Restricted to students registered in Neuroscience or Psychology Major or Honours programs.
PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better or SCIE 1505X/Y.18 with a grade of B- or better.
CROSSLISTED: PSYO 2470.03
RESTRICTIONS: Restricted to students registered in Neuroscience or Psychology Major or Honours programs.
EXCLUSIONS: PSYO 2770.03, PHYL 2041.03
FORMATS: Lecture

NESC 2570 Cellular Neuroscience
CREDIT HOURS: 3
This course explores the brain at the neuronal level. Material covered includes: the ionic basis of resting potentials; the electrical activity of neurons; synaptic transmission and plasticity; synthesis and action of synaptic transmitters; and drug actions. Cellular phenomena relevant to healthy and neurologically-dysfunctional systems are also discussed.
PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, or Principles of Biology I (BIOL 1010.03 or BIOL 1020.03) and Principles of Biology II (BIOL 1011.03 or BIOL 1021.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better, or SCIE 1505X/Y.18 with a grade of B- or better.
NESC 3001 Directed Research in Neuroscience
CREDIT HOURS: 3
Students work on single-term project under the supervision of faculty advisor. Requirements include a minimum grade of B in NESC 2000.03 (or PSYO 2000.03), an overall B+ (GPA 3.30) average in all other Neuroscience courses, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. Coordinator permission required - contact: pnistud@dal.ca
CALENDAR NOTES: This course provides 3-credit hours of directed research. Students wanting a full-year research experience in a single lab with single project, should register for NESC 3100.03 / NESC 3101.03.
PREREQUISITES: NESC 2000.03 or PSYO 2000.03, AND PSYO 2501.03 and previous or concurrent enrolment in two other 3000-level courses.
CROSSLISTED: PSYO 3001.03
EXCLUSIONS: NESC 3000.06, PSYO 3000.06, NESC 3100.03, NESC 3101.03, PSYO 3100.03, PSYO 3101.03
FORMATS: Lab

NESC 3002 Directed Research in Neuroscience
CREDIT HOURS: 3
Students work on single-term project under the supervision of faculty advisor. Requirements include a minimum grade of B in NESC 2000.03, an overall B+ (GPA 3.30) average in all other Neuroscience courses, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. Coordinator permission required - contact: pnistud@dal.ca
CALENDAR NOTES: This course provides 3-credit hours of directed research. Students wanting a full-year research experience in a single lab with single project, should register for PSYO 3100.03 and PSYO 3101.03.
PREREQUISITES: NESC 2000.03 or PSYO 2000.03, PSYO 2501.03, previous or concurrent enrolment in two other Psychology or Neuroscience 3000-level courses, and Coordinator's consent.
EXCLUSIONS: PSYO 3000.06, NESC 3000.06, PSYO 3100.03, PSYO 3101.03, NESC 3100.03, NESC 3101.03
FORMATS: Lab

NESC 3011 Experiential Learning in Science Communication I
CREDIT HOURS: 3
An experiential learning class for suitably-qualified senior students. This is a fundamentally ‘learn by doing’ course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO 1011.03 and PSYO 1012.03 lab groups (approx. 25 students). SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as NESC 3012.03 and no credit can be given for one course without the other. A grade will be given for NESC 3011.03 only after NESC 3012.03 is completed.
PREREQUISITES: B+ or better in NESC 3007.03 (or equivalent), advanced courses in Psychology or Neuroscience, and Instructor’s consent.
CROSSLISTED: PSYO 3011.03
EXCLUSIONS: PSYO 3010.06
FORMATS: Lecture | Lab | Seminar

NESC 3012 Experiential Learning in Science Communication II
CREDIT HOURS: 3
An experiential learning class for suitably-qualified senior students. This is a fundamentally ‘learn by doing’ course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO1011.03 and PSYO1012.03 lab groups (approx. 25 students). SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken after, and in conjunction with, NESC 3011.03 in the same academic year and no credit can be given for one course without the other. A grade will be given for PSYO 3011.03 only after PSYO 3012.03 is completed.
PREREQUISITES: NESC 3011.03
CROSSLISTED: PSYO 3012.03
EXCLUSIONS: NESC 3010.06
FORMATS: Lecture | Lab | Seminar

NESC 3043 Neurobiology of Learning
CREDIT HOURS: 3
This course examines the neurobiological processes underlying various forms of learning such as classical and operant conditioning, song learning by birds, spatial learning, and fear conditioning. Different methods used to study the neurobiology of learning, and the evolutionary origins of these systems are also considered.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03
CROSSLISTED: PSYO 3043.03
NESC 3044 Laboratory Methods of Learning and Conditioning
CREDIT HOURS: 3
A hands-on course on techniques used to test learning and memory in animals, including operant conditioning and spatial memory, and an exposure to the neurobiological systems involved. Students work in pairs to conduct a series of experiments, analyze data as a class, but write individual laboratory reports on each experiment.
CALENDAR NOTES: Students should be aware that some data collection occurs outside of class time.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and one of NESC 2140.03/PSYO 2140.03 or NESC 2470.03/PSYO 2470.03 or PSYO 2770.03
CROSSLISTED: PSYO 3044.03
EXCLUSIONS: PSYO 3042.03
FORMATS: Lab

NESC 3051 Research Methods in Sensation and Perception
CREDIT HOURS: 3
A hands-on course that explores sensory perception with an emphasis on data collection, analysis, and interpretation. Several methodologies are used across the different senses to study perception and its neural underpinnings.
CALENDAR NOTES: Students should be aware that some data collection may occur outside of class time.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, NESC 2470.03/PSYO 2470.03, and NESC 2150.03/PSYO 2150.03
CROSSLISTED: PSYO 3051.03
FORMATS: Lecture | Lab

NESC 3052 Sensory Neuroscience II Hearing and Speech
CREDIT HOURS: 3
This course explores hearing at levels that include stimulus parameters and their psychophysical correlates, middle ear function, cochlear biophysics, central auditory neurophysiology, and principles of speech perception. We emphasize mechanisms of normal hearing and speech, but address pathology wherever it helps us understand the relation between neurophysiology and perception.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and NESC 2470.03/PSYO 2470.03
CROSSLISTED: PSYO 3052.03
FORMATS: Lecture

NESC 3100 Independent Research in Neuroscience I
CREDIT HOURS: 3
Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in NESC 2000.03/PSYO 2000.03, a high level of performance in other Neuroscience courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as NESC 3101.03 and no credit can be given for one course without the other. The work undertaken in NESC 3101.03 should be a continuation of that initiated in NESC 3100.03. A grade will be given for NESC 3100.03 only after NESC 3101.03 is completed.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, previous or concurrent enrolment in two other Psychology or Neuroscience 3000-level courses, and Coordinator's consent.
CROSSLISTED: PSYO 3100.03
RESTRICTIONS: Restricted to Neuroscience Majors and Honours Students
EXCLUSIONS: NESC 3001.03, NESC 3000.06
FORMATS: Lab | Experiential Learning

NESC 3101 Independent Research in Neuroscience II
CREDIT HOURS: 3
Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in NESC 2000.03 or PSYO 2000.03, a high level of performance in other Neuroscience courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as NESC 3100.03 and no credit can be given for one course without the other. The work undertaken in NESC 3101.03 should be a continuation of that initiated in NESC 3100.03. A grade will be given for NESC 3100.03 only after NESC 3101.03 is completed.
PREREQUISITES: NESC 3100.03 and Coordinator's consent
CROSSLISTED: PSYO 3101.03
RESTRICTIONS: Restricted to Neuroscience Majors and Honours Students
EXCLUSIONS: NESC 3001.03, NESC 3000.06
FORMATS: Lab | Experiential Learning
NESC 3131 Research Methods in Attention
CREDIT HOURS: 3
The methods, findings, and theories that underpin our understanding of attention (alertness, preparation, selection, and control of information processing) are covered. Behavioural and neuroscientific evidence as well as computational models are examined in the lectures. Laboratories emphasize behavioural methods used to isolate and reveal the components of attention.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03 or NESC 2150.03/PSYO 2150.03
CROSSLISTED: PSYO 3131.03
EXCLUSIONS: NESC 3130.06/PSYO 3130.06
FORMATS: Lecture | Lab

NESC 3132 Research Methods in Visual Cognition
CREDIT HOURS: 3
Visual cognition is the study of how we extract meaning from our visual environment and use it to direct our behaviour. Emphasis is placed on object, face, and word recognition as revealed by normal behaviour, and by neuroimaging techniques and neuropsychological studies of brain-damaged individuals who have lost these recognition abilities.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03 or NESC 2150.03/PSYO 2150.03
CROSSLISTED: PSYO 3132.03
EXCLUSIONS: NESC 3130.03/PSYO 3130.06
FORMATS: Lecture | Lab

NESC 3133 Research Methods in Memory
CREDIT HOURS: 3
This course examines human memory from the perspective of cognitive psychology and, to a lesser extent, cognitive neuroscience. Lectures emphasize cognitive approaches to the study of memory with an explicit focus on empirical research methods, data, and interpretation of results.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03
CROSSLISTED: PSYO 3133.03
EXCLUSIONS: NESC 3130.03/PSYO 3130.06
FORMATS: Lecture | Lab

NESC 3134 Research Methods in Psycholinguistics
CREDIT HOURS: 3
Provides hands-on experience with various methodologies employed in the study of language processing, and uses these to explore topics in psycholinguistics in greater depth. Methods covered may include reaction time, priming, self-paced reading, computational modeling, corpus-based research, and event-related brain potentials. Students serve as experimenters and participants in class experiments.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and NESC 3190.03/PSYO 3190.03
CROSSLISTED: PSYO 3134.03
EXCLUSIONS: NESC 3130.06/PSYO 3130.06
FORMATS: Lecture | Lab

NESC 3137 Research Methods in Cognitive Neuroscience
CREDIT HOURS: 3
An overview of neuroimaging and other techniques of cognitive neuroscience (including fMRI, ERP, and others) focusing on how they work, how they are applied, and their inherent limitations. Labs include experience collecting and analyzing ERP data, demonstrations of fMRI scanning, and analysis of fMRI data.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and NESC 2130.03/PSYO 2130.03
CROSSLISTED: PSYO 3137.03
FORMATS: Lecture | Lab

NESC 3161 Measuring Behaviour
CREDIT HOURS: 3
Measuring behaviour is essential in the study of ethology, behavioural neuroscience, developmental, social and clinical psychology. The function of this laboratory course is to teach methods of observing and scoring behavior using qualitative and quantitative methods. Sampling methods, behaviour description and analysis will be done in laboratory and naturalistic settings.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03
CROSSLISTED: PSYO 3161.03
FORMATS: Lab
NESC 3162 Advanced Animal Behaviour: Theories and Applications
CREDIT HOURS: 3
This course focuses on advanced theories and applications of animal behaviour, with a focus on proximate, integrative and applied questions. It offers a more in-depth analysis of topics covered in NESC/PSYO 2160.03 and explores trends and issues in contemporary ethology, animal psychology and behavioural ecology.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03 or BIOL 3062.03 or BIOL 3630.03, and NESC 2160.03/PSYO 2160.03
CROSSLISTED: PSYO 3162.03
FORMATS: Lecture

NESC 3165 Neuroethology
CREDIT HOURS: 3
Neuroethology explores how assemblies of neurons work together to produce behaviour. The course typically uses a mix of simple model systems, including live animals (e.g., earthworms), virtual systems, and robotics to examine how nervous systems produce behaviour.
CALENDAR NOTES: All experiments in the accompanying lab involve invertebrates. Students are required to handle invertebrates during the lab.
PREREQUISITES: NESC 2570.03/PSYO 2570.03, and either PSYO 2000.03 or NESC 2000.03 or BIOL 2020.03
CROSSLISTED: PSYO 3165.03
FORMATS: Lab

NESC 3170 Hormones and Behaviour
CREDIT HOURS: 3
This course examines how chemical signals of the neural, endocrine, and immune systems interact to influence the brain and behaviour and how neurotransmitters, cytokines, and hormones control neural and behavioural development, sexual, aggressive, and maternal behaviour. Hormone receptors in the brain, reproduction, puberty, brain sex differences, and stress are also examined.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PHYL 2041.03
CROSSLISTED: PSYO 3170.03
EXCLUSIONS: NESC 2170.03/PSYO 2170.03

NESC 3180 Psychoneuroimmunology/Ecological Immunology
CREDIT HOURS: 3
Our behaviour can influence how well we resist disease, and infection can alter behaviour. This course examines how immune systems and nervous systems interact in both vertebrates and invertebrates. Evolutionary forces that have led to the existence of these interactions are also examined.
PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, and one of NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03 or MICI 2100.03; or BIOL 2020.03
CROSSLISTED: PSYO 3180.03
FORMATS: Lecture

NESC 3190 Psycholinguistics
CREDIT HOURS: 3
Explores the cognitive and neural bases of human language processing. Topics include: human language and other communication systems; phonology; morphology; semantics; syntax; discourse; first and second language acquisition; relationship of language to general cognitive functions such as music and mathematics; signed languages such as American Sign Language, and non-linguistic gesture.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, and NESC 2130.03/PSYO 2130.03
CROSSLISTED: PSYO 3190.03
EXCLUSIONS: NESC 2190.03/PSYO 2190.03
FORMATS: Lecture

NESC 3227 Principles of Human Neuropsychology
CREDIT HOURS: 3
Clinical neuropsychologists study the organization of cognitive, emotional, and social functions in the brain to understand how brain damage alters human behaviour across the lifespan. We examine how clinicians diagnose and rehabilitate persons with brain diseases and disorders. Assignments emphasize application of textbook/lecture-based knowledge, critical thinking, and group presentation skills.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03, NESC/PSYO 2130 is recommended
CROSSLISTED: PSYO 3227.03
FORMATS: Lecture
NESC 3237 Drugs and Behaviour
CREDIT HOURS: 3
An introduction to behavioural psychopharmacology. The lectures involve basic anatomy, physiology, and chemistry of the nervous system. Behavioural effects and underlying mechanisms of various psychoactive drugs are discussed. Specific topics covered are alcohol, tobacco, amphetamines, cocaine, opiates, hallucinogens, tranquilizers, and antipsychotic drugs.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, and one of NESC 2470.03/PSYO 2470.03 or NESC 2570.03/PSYO 2570.03
CROSSLISTED: PSYO 3237.03
FORMATS: Lecture

NESC 3260 Biological Rhythms
CREDIT HOURS: 3
Daily (circadian) clocks generate rhythms in many functions, including sleep, reproduction, and intellectual performance. This course examines the nature of these biological clocks, their neural mechanisms, and their roles in regulating sleep and other aspects of physiology and in pathological conditions, including sleep disorders, jet lag, and psychiatric disorders.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, or BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, and NESC 2470.03/PSYO 2470.03 or PSYO 2770.03
CROSSLISTED: PSYO 3260.03
FORMATS: Lecture

NESC 3264 The Science of Sleep
CREDIT HOURS: 3
This course reviews the history, methods and results of the scientific study of sleep. Topics include: circadian and homeostatic regulation; developmental and cultural impacts; normal and abnormal function of neural and other control mechanisms; effects of sleep loss on performance and health; theories of the functions of sleep.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03 and NESC 2470.03/PSYO 2470.03 or BIOL 2020.03
CROSSLISTED: PSYO 3264.03
FORMATS: Lecture

NESC 3270 Developmental Neuroscience
CREDIT HOURS: 3
This course presents the fundamentals of development in complex and simple nervous systems. Cell differentiation, pattern regulation, proliferation, migration, and circuit development are discussed. Special attention is given to later developmental events such as neuronal growth cones, cell death, growth factors, neuron-target interactions, and synapse formation.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03
CROSSLISTED: PSYO 3270.03
FORMATS: Lecture

NESC 3370 Advanced Methods in Neurobiology
CREDIT HOURS: 3
Introduction to several neurophysiological techniques used in contemporary neuroscience, employing extracellular and intracellular electrical recording and stimulation methods on nervous system preparations, both sensory and motor. After introductory instruction, students in groups of 2 or 3 get to perform quite sophisticated practical experiments themselves, enabled by computer-based data acquisition.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03
CROSSLISTED: PSYO 3370.03
FORMATS: Lab

NESC 3371 Neuronal Organization Laboratory
CREDIT HOURS: 3
Introduction to several techniques used in contemporary neuroscience. Students work under supervision in groups of 2 or 3 in regular labs that introduce neuroanatomical analyses using the following: Golgi impregnation, immunocytochemistry, dye-tracing of connections, electronmicroscopy of the retina, and neurotransmitter determinations using HPLC.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03
CROSSLISTED: PSYO 3371.03
FORMATS: Lab

NESC 3440 Neuroanatomy

1487
CREDIT HOURS: 3
This is a survey of the structure and function of the human central nervous system (CNS, the brain and spinal cord). The laboratory component provides the opportunity to dissect the human brain and to study the microscopic anatomy of the CNS. This course provides the lecture and laboratory component for the graduate course ANAT 5100 Human Neuroanatomy. ORGANIZER: W. Baldridge
PREREQUISITES: BIOL 2020.03 or permission of the instructor
FORMATS: Lecture | Lab

NESC 3505 Neural Data Science
CREDIT HOURS: 3
An introduction to data management, manipulation, visualization, and analysis for neuroscience. Students learn scientific programming in Python, and use this to work with example data from areas such as single-cell recording, EEG, structural and functional MRI, and confocal microscopy. Basic signal processing techniques including filtering are covered.
PREREQUISITES: PSYO 2501.03 with a grade of B or higher, and NESC 2000.03 or PSYO 2000.03, and NESC 2470.03 or PSYO 2470.03
CROSSTLISTED: PSYO 3505.03
FORMATS: Lab | Online Delivery

NESC 3670 Genes, Brain and Behaviour
CREDIT HOURS: 3
The application of genetic techniques to the study of cognitive abilities, psychopathology, personality disorders, stress-related illnesses, and ethical issues in genetic research. The role of genetic factors in eating and drug abuse problems, as well as methods used to study gene-environment interactions are explored.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03, AND BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, or SCIE 1505X/Y.18, SCIE 1515X/Y.36, SCIE 1520X/Y.30 or SCIE 1540.27 (with a grade of B- or better); BIOL 2020.03 and BIOL 2030.03 are recommended
CROSSTLISTED: PSYO 3670.03
EXCLUSIONS: NESC 2670.03/PSYO 2670.03
FORMATS: Lecture

NESC 3770 Behavioural Neuroscience
CREDIT HOURS: 3
Behavioural neuroscience explores the neural and hormonal mechanisms underlying a variety of behavioural phenomena. The course focuses on neural correlates of social and emotional behaviour, motor behaviour and patterns, and behavioural toxicology processes (neurotoxins and endocrine disruptors).
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, and NESC 2470.03/PSYO 2470.03 or PSYO 2770.03
CROSSTLISTED: PSYO 3770.03
FORMATS: Lecture

NESC 3775 Behavioural Neuroscience Laboratory
CREDIT HOURS: 3
Students motivated to pursue a career in Neuroscience, or in a related biomedical discipline, gain direct experience studying the nervous system in relation to behaviour. Students acquire skills in animal handling, ethics, and measuring behaviour. Emphasis is placed on histological/molecular analysis of the brain including examining protein and/or mRNA levels. SIGNATURE REQUIRED
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, NESC 2470.03/PSYO 2470.03 or PSYO 2770.03, PSYO 2501.03, and one of NESC 2160.03/PSYO 2160.03 or NESC 3237.03 /PSYO 3237.03 or NESC 3770.03/PSYO 3770.03, and instructor's consent
CROSSTLISTED: PSYO 3775.03
FORMATS: Lab

NESC 3790 Neurolinguistics
CREDIT HOURS: 3
The course covers: (1) brain damage and language disorders; (2) aphasia; (3) localization of lesions in the human brain; (4) neuroimaging; (5) intracranial electric stimulation experiments; (6) event-related brain potential experiments; (7) PET, fNMR scan experiments; (8) neural models of language processing.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 or PSYO 2770.03
CROSSTLISTED: PSYO 3790.03
FORMATS: Lecture

NESC 3970 Molecular Neuroscience
CREDIT HOURS: 3
This course examines the development, function, and pathology of the brain at the molecular level. A particular focus will be placed upon the molecular mechanisms thought to contribute to neurological disease. The basic molecular neuroscience tools used to study these mechanisms are emphasized.
PREREQUISITES: NESC 2570.03/PSYO 2570.03 or BIOL 2020.03 or BIOL 2030.03
CROSSLISTED: PSYO 3970.03
FORMATS: Lecture

NESC 4000 Directed Reading Project
CREDIT HOURS: 3
An individually tailored reading or study course designed to allow Honours students to focus on a particular issue, or a set of related issues, that are not part of the regular program. Enrolment is contingent upon securing a faculty member to supervise the study program. This course will count as a seminar class. SIGNATURE REQUIRED Contact pnistud@dal.ca for details.
CROSSLISTED: PSYO 4000.03
RESTRICTIONS: Restricted to Neuroscience Majors and Honours Students
FORMATS: Seminar

NESC 4007 Contemporary Issues in Neuroscience
CREDIT HOURS: 3
This is a seminar course that focuses on a significant theme or topic in the research literature in Neuroscience. Topics vary from year to year. Consult the department for the details about course content. SIGNATURE REQUIRED
PREREQUISITES: NESC Honours student, permission of the instructor.
FORMATS: Seminar

NESC 4008 Topics in Neuroscience
CREDIT HOURS: 3
This is a seminar course that focuses on a significant theme or topic in the research literature in neuroscience. Topics vary from year to year. Consult the department for details about course content. SIGNATURE REQUIRED.
CALENDAR NOTES: Instructor Permission Required.
RESTRICTIONS: Neuroscience Honours Student, permission of the instructor.
FORMATS: Seminar

NESC 4050 Topics in Perception
CREDIT HOURS: 3
SIGNATURE REQUIRED
PREREQUISITES: NESC 3051.03/PSYO 3051.03 or instructor's consent
CROSSLISTED: PSYO 4050.03
FORMATS: Seminar

NESC 4070 Chemical Neurobiology
CREDIT HOURS: 3
The goal is to acquaint the student with neurotransmitters (excitatory amino acids, acetylcholine, monoamines, neuropeptides). Anatomical, biochemical, physiological, pharmacological, behavioral, and clinical aspects of individual neurotransmitter systems are discussed. Lectures are given by the instructors. Students are expected to write an examination and a review, and give a presentation.
PREREQUISITES: NESC 2470.03/PSYO 2470.03 and NESC 2570.03/PSYO 2570.03, or instructor's consent
CROSSLISTED: NESC 5070.03
FORMATS: Seminar

NESC 4130 Topics in Cognition
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: PSYO 4130.03
FORMATS: Seminar

NESC 4140 Animal Learning Topics
CREDIT HOURS: 3
SIGNATURE REQUIRED
CALENDAR NOTES: PSYO 2140.03/NESC 2140.03 recommended
CROSSLISTED: PSYO 4140.03
NESC 4160 Topics in Behavioural Biology
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: PSYO 4160.03
FORMATS: Seminar

NESC 4170 Topics in Behavioural Neuroendocrinology
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: PSYO 4170.03
REstrictions: Restricted to NESC/PSYO Honours Students
FORMATS: Seminar

NESC 4177 Theoretical Neuroscience
CREDIT HOURS: 3
An introduction to basic concepts and research questions in computational neuroscience. This includes cellular mechanisms such as spike generation and synaptic plasticity, network-level concepts such as perceptrons and associative attractor networks, and system-level concepts such as memory, learning and anticipation. This course includes an introduction to MATLAB programming. SIGNATURE REQUIRED
PREREQUISITES: Intended for third- or fourth-year Neuroscience students.
FORMATS: Seminar

NESC 4185 Synaptic Function and Plasticity
CREDIT HOURS: 3
Key recent research studies in cellular and system neurophysiology are presented and critically discussed. Emphasis is placed on plasticity, synaptic function, excitability, dendritic integration, neural networks and relevant advances in experimental methods. Newly published papers within these areas are reviewed weekly, followed by a more extensive critique of two publications.
PREREQUISITES: NESC 2570/PHYL 2570 or permission of course instructors
CROSSLISTED: PHYL 4000.03
FORMATS: Seminar

NESC 4225 The Science of Mindfulness
CREDIT HOURS: 3
This seminar focuses on the scientific literature relating to the concept, and practice of, mindfulness. Topics explore the effects of mindfulness practice on the brain, cognition, the immune system, addiction, emotion regulation, interpersonal relations, pain, and stress. Critical evaluation of the literature is emphasized.
CROSSLISTED: PSYO 4225
RESTRICTIONS: Requires permission of instructor
EXCLUSIONS: PSYO 6225.03, PSYO 4001.03 (offered in 2017/18, 18/19, 19/20)
FORMATS: Seminar

NESC 4230 Human Performance Topics
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: PSYO 4230.03
FORMATS: Seminar

NESC 4501 Honours Thesis I
CREDIT HOURS: 3
Under a staff member’s supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as NESC 4502.03 and no credit can be given for one course without the other. The work undertaken in NESC 4502.03 should be a continuation of that initiated in NESC 4501.03. A grade will be given for NESC 4501.03 only after NESC 4502.03 is completed.
**NESC 4502 Honours Thesis II**

**CREDIT HOURS: 3**
Under a staff member’s supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. SIGNATURE REQUIRED.

**PREREQUISITES: PSYO 2000.03 or equivalent with a grade of B+ or higher, PSYO 3502.03, admission to the honours program, and instructor's consent.**

**CROSSLISTED: PSYO 4502.03**

**RESTRICTIONS: Restricted to Honours Neuroscience students in their graduating year.**

**EXCLUSIONS: NESC 4500.06**

**FORMATS: Lecture | Lab | Experiential Learning**

---

**NESC 4587 Topics in the History of Neuroscience**

**CREDIT HOURS: 3**
This course examines the history of the attempts to find the neurobiological basis for human thought and behaviour. This involves the examination of the theories, methods and experimental data which have attempted to link neural activity with thought and behaviour. Historical documents and web-based resources are used to examine original sources.

**PREREQUISITES: PSYO 1011.03 or PSYO 1012.03 or equivalent, or instructor's consent**

**EXCLUSIONS: HSTC 4301.03**

**FORMATS: Seminar**

---

**NESC 4670 Behavioural Neuro(epi)genetics and Genomics**

**CREDIT HOURS: 3**
This senior seminar course examines the primary scientific literature on the use of (epi)genetic techniques to study the molecular and cellular bases of behaviour. Transgenic-technology is discussed combined with recent advances in next-generation biological techniques (e.g., DNA/RNA methyolome sequencing, optogenetics) and genome editing (e.g., CRISPR/Cas9) tools for investigation of neural circuits underlying brain function.

**CALENDAR NOTES: Course aimed at NESC Honours students**

**RESTRICTIONS: NESC Honours student, Instructor permission required.**

**FORMATS: Seminar**

---

**NESC 4705 Neurotechnology Innovation, Commercialization, and Entrepreneurship**

**CREDIT HOURS: 3**
An introduction to neurotechnology, clinical neuroscience, and commercialization. Topics include neuroimaging methods; diagnosis, assessment, and treatment of nervous system-related disorders; the process of innovation; and business fundamentals. Features guest lectures by successful scientists and entrepreneurs, as well as hands-on workshops and lab exercises on business and neurotechnology topics **SIGNATURE REQUIRED**

**PREREQUISITES: Two full years of undergraduate University study, plus instructor's consent.**

**CROSSLISTED: PSYO 4705.03, SCIE 4705**

**EXCLUSIONS: PSYO 7705.06**

**FORMATS: Lecture**

---

**NESC 4740 Topics in the Neurobiology of Learning and Memory**

**CREDIT HOURS: 3**
**SIGNATURE REQUIRED**

**PREREQUISITES: NESC 2470.03/PSYO 2470.03, NESC 2140.03/PSYO 2140.03**

**CROSSLISTED: PSYO 4740.03**

**FORMATS: Seminar**

---

**NESC 4901 Honours Foundation**
CREDIT HOURS: 3
Under a faculty member’s supervision, each student conducts original research in Neuroscience. Students meet as a class to describe their proposed research and progress. A presentation of the research proposal and formal written report are both required. Students are expected to begin their project during fall term and final grade will reflect presentation, written proposal and lab work/skills development. Students must receive a grade of B- or higher in 4901 in order to continue into 4902. Students who do not receive a B- or higher in 4901 will be removed from the Honours degree.

CALENDAR NOTES: This course must be taken in the same academic year as NESC 4902.03. A minimum grade of B- or higher is required in NESC 4901.03 to continue on in NESC 4902.03. Student who do not achieve the minimum grade in NESC 4901.03 will be removed from NESC 4902.03 and not permitted to continue in the Honours program. The work undertaken in NESC 4902.03 should be a continuation of that initiated in NESC 4901.03.

COREQUISITES: PSYO 3502.03
PREREQUISITES: Instructor Approval (see Academic Calendar for Honours Admission Requirements)
CROSSTIFIED: PSYO 4901.03
RESTRICTIONS: NESC and PSYO majors only
EXCLUSIONS: NESC 4501.03, PSYO 4501.03, NESC 4500.06, PSYO 4500.06

FORMATS: Seminar

NESC 4902 Honours Thesis
CREDIT HOURS: 3
Under a faculty member’s supervision, each student conducts original research in psychology. Students meet as a class to describe their research projects and ongoing progress. A formal written report of the completed thesis is required. Final grade will reflect written thesis and lab work/skills development. Students must receive a grade of B- or higher in 4901 in order to continue into 4902. Students who do not receive a B- or higher in 4901 will be removed from the Honours degree.

CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4901.03. A minimum grade of B- or higher is required in PSYO 4901.03 to continue on in PSYO 4902.03. Student who do not achieve the minimum grade in PSYO 4901.03 will be removed from PSYO 4902.03 and not permitted to continue in the Honours program. The work undertaken in PSYO 4902.03 should be a continuation of that initiated in PSYO 4901.03.

Ocean Sciences

Location: Life Sciences Centre
Department of Oceanography
1355 Oxford Street
PO BOX 15000
Halifax NS
B3H 4R2

Phone Number: (902) 494-3557
Fax Number: (902) 494-3877
Email Address: oceanography@dal.ca
Website: www.dal.ca/oceanography

Introduction
Ocean Sciences includes the study of the physics, biology, geology, chemistry, and meteorology of the marine environment. Topic areas include ocean currents, waves, tides, marine sediments, oceanic crustal structure, nutrient cycling, acoustics, ocean-atmosphere coupling, biological production, marine biodiversity, and seawater properties, among others. Students enrolled in the Ocean Sciences program will be educated in the core oceanographic sub-disciplines of physical, geological, chemical, and biological oceanography, while also being exposed to issues in marine policy, law, and management. Graduates of the Ocean Sciences program will have gained an appreciation of the interdisciplinary and collaborative approaches often required to arrive at effective solutions to environmental problems relating to the oceans. They will have developed strong quantitative and practical skills, as well as a breadth of knowledge across ocean science disciplines. Ocean scientists are employed in research laboratories, universities, government agencies, and private industry. Career paths include environmental prediction, environmental monitoring and assessment, marine technology, marine surveying, marine resource use and extraction, and marine conservation.

NOTE: Not all courses are offered every year. Please consult the current timetable for this year’s offerings.

Degree Programs
The Department of Oceanography offers the following degree programs in Ocean Sciences:

- **BSc (120 credit hour) Honours (Concentrated)***
- **BSc (120 credit hour) Combined Honours***
- **BSc (120 credit hour) Major***
- **BSc (120 credit hour) Double Major***
- **Minor in Ocean Sciences**

* May be combined with Minor programs from other disciplines

**NOTE:** There is no 90 credit hour (3 year) degree program in Ocean Sciences.

Departmental Requirements for these programs are described below. In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with an Ocean Sciences undergraduate academic advisor.

Students who participated in the Integrated Science Program in their first year should consult the Undergraduate Calendar for first year course equivalencies. The following options fulfill the first year requirements for any Ocean Sciences program:

- SCIE 1515.36
- SCIE 1520.30
- SCIE 1530.27
- SCIE 1540.27, MATH 1000.03/MATH 1010.03 and PHYC 1300.06 or PHYC 1310.03/PHYC 1320.03
- SCIE 1505.18, Option A or B (MATH 1000.03/MATH 1010.03, PHYC 1300.06 or PHYC 1310.03/PHYC 1320.03)

**Staff**

**Dean**
Macdonald, C., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

**Chairperson of Department**
Fennel, K. (902) 494-1435

**Undergraduate Advisor**
deGelleke, L. (902) 494-3249

**Graduate Studies Coordinator**
Barclay, D.

**Professors Emeriti**
Boudreau, B. P., BSc (UNB), MS (Texas A & M), MPhil, PhD (Yale), FRSC
Bowen, A. J., MA (Cantab), PhD (Scripps), FRSC
Cullen, J. J., AB (California), PhD (Scripps), FRSC
Fournier, R. O., MSc (Wm & Mary), PhD (URI)
Lewis, M. R., BS, MS (UMd), PhD (Dalhousie)
Mills, E., BSc (CARL), MS, PhD (Yale), FLS
Moore, R. M., BA (Oxon), PhD (Southampton)

**Professors**
Fennel, K., MSc, PhD (Rostock), Killam Professor
Finkel, Z. V., BSc (Manitoba), MSc (Dalhousie), PhD (Rutgers)
Grant, J., BSc (Duke), PhD (South Carolina), NSERC - Cooke IRC
Hay, A., BSc, MSc (Western), PhD (UBC)
Hill, P. S., AB (Dartmouth), MSc, PhD (Wash)
Kelley, D., BSc (Mt. A), PhD (Dalhousie)
Kienast, M., BSc (Clausthal), MSc (Kiel), PhD (UBC)
MacIntyre, H. L., BA (Cambridge), MA (UT Austin), PhD (Delaware)
Metaxas, A., BSc (McGill), MSc (UBC), PhD (Dalhousie)
Sheng, J., BEng (East China Tech Univ), MSc, PhD (Memorial)
Waite, A., BSc (Dalhousie), PhD (UBC). Associate Vice-President Research (Ocean) and Scientific Director (Ocean Frontier Institute)
Wallace, D. W., BSc (Univ of East Anglia), PhD (Dalhousie)

Associate Professors
Algar, C., BSc (Laurentian), PhD (Dalhousie)
Barclay, D., BSc (McGill), PhD (Scripps, Univ of California)
Brown, C., BSc (Univ Reading), PhD (Univ of Portsmouth)
Kienast, S., MSc (Kiel), PhD (UBC)

Assistant Professors
Buchwald, C., BSc (MIT), PhD (MIT/WHOI)
Fortune, S., BAH (Queen’s), MSc, PhD (UBC), Canadian Wildlife Federation Chair in Large Whale Conservation
Musgrave, R., BSc (Melbourne), MSc, PhD (Monash), PhD (Scripps)
Oliver, E., BSc (Acadia), MSc (Ottawa), PhD (Dalhousie)

Instructor
deGelleke, L., BS (Univ of Hawaii at Manoa), MSc (Dalhousie)

Adjunct (FGS)
Azetsu-Scott, K., BSc, MSc (Japan), PhD (Dalhousie)
Baumgartner, M., BSc (Notre Dame), MSc (Southern Mississippi), PhD (Oregon State)
Brillant, S., BSc, MSc (UNB), PhD (Univ of Sydney)
Dale, A., BSc (Birmingham), MSc, PhD (Plymouth)
Davies, K., BSc (UVic), PhD (Dalhousie)
Devey, C., BSc (Univ of London), PhD (Oxford)
Devred, E., MPhys (Tulon), PhD (Littoral Cote d'Opale)
Dosso, S., BSc, MSc (UVic), PhD (UBC)
Ellis, D., BSc (Mt. A), MSc, PhD (McMaster)
Fortin, M.-J., BSc, MSc (Montreal), PhD (New York)
Gardner, I., BVSc (Sydney), MPVM, PhD (California)
Greatbatch, R., BSc (Liverpool), PhD (Cambridge)
Greenberg, D., MMath (Waterloo), PhD (Liverpool)
Johnson, B., BEng (North Carolina), PhD (Dalhousie)
Krastel, S., PhD (Kiel)
Lu, Y., BEng (Tsinghua), MSc (Qingdao), MSc (Memorial), PhD (Victoria)
Martin, S. B., BSc (Royal Military College), MSc, PhD (Dalhousie)
Milligan, T., BSc, MSc (Dalhousie)
Perrie, W., BSc (Toronto), MSc (California), PhD (Massachusetts Institute of Technology)
Piper, D., BA, MA, PhD (Canterbury)
Richards, C., BSc (New Brunswick), MSc (Memorial), PhD (Dalhousie)
Ritchie, H., BSc (Mt. A), BA (Oxford), MSc, PhD (McGill)
Snelgrove, P., BSc (MUN), MSc (McGill), PhD (MIT/WHOI), Memorial University of Newfoundland
Tanhua, T., MSc, PhD (Goteborg)
Wu, Y., BEng (Petroleum Univ of China), MEng, PhD (Tianjin Univ)
Zedel, L., BSc (Victoria), PhD (UBC) Adjunct (Retired)

Adjunct (Retired)
Beaumont, C., BSc (Sussex), PhD (Dalhousie)
Lewis, M. R., BS, MS (UMd), PhD (Dalhousie)
Ruddick, B., BSc (Victoria), PhD (MIT)
Taggart, C. T., BSc (Carleton), MSc (York), PhD (McGill)
Thompson, K. R., BSc, MSc (UManc), PhD (Liv)
BSc (120 credit hour) Concentrated Honours in Ocean Sciences

Students who want a challenging program that results in a broad and in-depth background in Ocean Sciences, and includes an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Ocean Sciences with a minimum GPA of 3.3 and write a research-based Honours thesis. The Honours Qualifying Examination requirement is satisfied through completion of OCEA 4201.03 and OCEA 4202.03.

**Admission to Honours**

Students considering Honours should consult with an Ocean Sciences Honours Advisor early in their studies.

**Departmental Requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Concentrated Honours program in Ocean Sciences must complete the following courses:

### 1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03 (or PHYC 1300.06): Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or MATH 2060.03/STAT 2060.03: Introductory Probability & Statistics
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03: Principles of Biology, CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, ERTH 1080.03: Geology I/ERTH 1090.03: Geology II

OR Integrated Science Program (options above)

A "B+" average (3.3) must be attained in the following 2000, 3000, and 4000 level courses.

### 2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet (minimum grade of "B")
- OCEA 2020.03: Tools and Concepts in Ocean Sciences I/OCEA 2021.03: Tools and Concepts in Ocean Sciences II (minimum grade of "B")

### 3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- A minimum of six credit hours each from three of the four Ocean Science areas (18 credit hours total). See Ocean Science Areas.
- One additional six credit hours from any of the four Ocean Science areas.
- OCEA 3001.03: Introduction to Physical Oceanography or OCEA 4120.03: Physical Oceanography must be included in one of the preceding two requirements.
- OCEA 4000.03: Oceans and Global Change
- OCEA 4401.03: Marine Management I/OCEA 4402.03: Marine Management II
- OCEA 4201.03 and OCEA 4202.03: Honours Research

BSc (120 credit hour) Combined Honours in Ocean Sciences and another subject

Students who wish to study Ocean Sciences in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Ocean Sciences may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above).
addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Ocean Sciences, this requirement is satisfied through OCEA 4201.03 and OCEA 4202.03.

**Departmental Requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a BSc or BA Combined Honours program in Ocean Sciences and another subject must complete the following:

**Ocean Sciences as the primary subject**

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03 Physics In and Around You (or PHYC 1300.06)
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or MATH 2060.03/STAT 2060.03: Introductory Probability & Statistics
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03: Principles of Biology, CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, ERTH 1080.03: Geology I/ERTH 1090.03: Geology II

OR Integrated Science Program (options above)

A “B+” average (3.3) must be attained in the following 2000-, 3000- and 4000- courses.

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet (minimum grade of “B”)

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- OCEA 3001.03: Introduction to Physical Oceanography or OCEA 4120.03: Physical Oceanography
- Six credit hours selected from: OCEA 3002.03: Introduction to Chemical Oceanography, OCEA 4110.03: Geological Oceanography, OCEA 4140.03: Introduction to Biological Oceanography
- An additional nine credit hours from the Ocean Science areas. See Ocean Science Areas.
- OCEA 4000.03: Oceans and Global Change
- OCEA 4401.03: Marine Management I/OCEA 4402.03: Marine Management II
- OCEA 4201.03 and OCEA 4202.03: Honours Research

**Ocean Sciences as the secondary subject**

1000 level

- PHYC 1190.03/PHYC 1290.03 or PHYC 1310.03/PHYC 1320.03 (or PHYC 1300.06)
- MATH 1000.03
- MATH 1060.03/STAT 1060.03 or MATH 2060.03/STAT 2060.03
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03, CHEM 1011.03/CHEM 1012.03, ERTH 1080.03/ERTH 1090.03

OR Integrated Science Program (options above)

A “B+” average (3.3) must be attained in the following 2000-, 3000- and 4000- courses.

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet
3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- A minimum of six credit hours each from three of the four Ocean Sciences areas (18 credit hours total). See Ocean Sciences areas.
- OCEA 4000.03: Oceans and Global Change

**BSc (120 credit hour) Major in Ocean Sciences**
The 120 credit hour Major is suited to students who want to focus on Ocean Sciences, but wish to have a program that is somewhat less constrained than the Honours program. Ocean Science Majors complete a minimum of 42 credit hours in OCEA courses. Research and other experiential learning opportunities are available through laboratories, special topics and experiential courses.

**Departmental Requirements**
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students in a Major program in Ocean Sciences must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03 (or PHYC 1300.06): Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1060.03/STAT 1060.03: Introductory Statistics for Science and Health Sciences or MATH 2060.03/STAT 2060.03: Introductory Probability & Statistics
- Any two of the following three course sequences: BIOL 1010.03/BIOL 1011.03: Principles of Biology, CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity/CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium, ERTH 1080.03: Geology I/ERTH 1090.03: Geology II

OR Integrated Science Program (options above)

2000 level

- OCEA 2001.03 and OCEA 2002.03: The Blue Planet

3000 and 4000 level

- OCEA 3003.03: Introduction to Field Oceanography
- A minimum of six credit hours each from three of the four Ocean Science areas (18 credit hours total). See Ocean Science Areas.
- OCEA 4000.03: Oceans and Global Change
- OCEA 4401.03: Marine Management I/OCEA 4402.03: Marine Management II

**BSc or BA (120 credit hour) Double Major in Ocean Sciences and another subject**
The Double Major degree program allows students to combine a study of Ocean Sciences with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Ocean Sciences may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject.

**Departmental requirements**
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements, students must fulfill the requirements listed for the BSc (120 credit hour) Major in Ocean Sciences.

The Ocean Science course requirements for students in a Double Major program, with Ocean Sciences as the primary or secondary subject, are the same as for the Major program (above).

**Minor in Ocean Sciences**
This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

Requirements

• A minimum of 18 to a maximum of 36 credit hours in Ocean Sciences courses at the 2000 level or higher.

Please note that there are prerequisite requirements for entry into upper level Ocean Sciences courses (see Department of Oceanography course listings).

Contact Ocean Sciences for more information.

Ocean Science Areas

NOTE: Classes marked with an asterisk* are required in that area.

Physical Oceanography
OCEA 3001.03 and/or OCEA 4120.03*, OCEA 4210.03, OCEA 4220.03, OCEA 4222.03, OCEA 4311.03, OCEA 4411.03, OCEA 4422.03, OCEA 4505.03, OCEA 4520.03, OCEA 4541.03, OCEA 4550.03

Biological Oceanography
OCEA 3685.03, OCEA 4140.03*, OCEA 4160.03, OCEA 4230.03, OCEA 4330.03, OCEA 4335.03, OCEA 4370.03, OCEA 4380.03, OCEA 4665.03

Chemical Oceanography
OCEA 3002.03*, OCEA 3420.03 (NOTE: this course may fulfill a three credit hour requirement in either this Ocean Science Area or the Geological Oceanography Ocean Science Area, but not both), OCEA 4130.03, OCEA 4595.03

Geological Oceanography
OCEA 3004.03, OCEA 3420.03 (NOTE: this course may fulfill a three credit hour requirement in either this Ocean Science Area or the Chemical Oceanography Ocean Science Area, but not both), OCEA 4110.03*, OCEA 4115.03, OCEA 4470.03, OCEA 4480.03

See Oceanography section for course descriptions.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Minors available to students in Ocean Sciences

Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc programs

Students in a BSc program in Ocean Sciences may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates

In combination with a BSc in Ocean Sciences, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Courses
Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department.

Course Descriptions

OCEA 1001 Conversations with Ocean Scientists: Part I
CREDIT HOURS: 3
Students engage with working ocean scientists about their research, its relevance, and how to communicate science to different audiences. In addition to regular writing exercises that include journaling, blogging, and lab reporting, students compose a research paper and follow it through the process of submission and peer-review for an in-class journal.
CALENDAR NOTES: College of Arts & Science writing requirement fulfilled if OCEA 1001.03 and OCEA 1002.03 are completed in the same academic year. Credit will not be granted if courses are not completed consecutively.
COREQUISITES: MATH 1000.03 or MATH 1215.03 or MATH 1060.03/STAT 1060.03
EXCLUSIONS: OCEA 1000.06
FORMATS: Lecture | Tutorial

OCEA 1002 Conversations with Ocean Scientists: Part II
CREDIT HOURS: 3
Students engage with working ocean scientists about their research, its relevance, and how to communicate science to different audiences. In addition to regular writing exercises that include journaling, blogging, and lab reporting, students compose a research paper and follow it through the process of submission and peer-review for an in-class journal.
CALENDAR NOTES: College of Arts & Science writing requirement fulfilled if OCEA 1001.03 and OCEA 1002.03 are completed in the same academic year. Credit will not be granted if courses are not completed consecutively.
PREREQUISITES: OCEA 1001.03 (must have been taken in same academic year)
EXCLUSIONS: OCEA 1000.06
FORMATS: Lecture | Tutorial

OCEA 2001 The Blue Planet I
CREDIT HOURS: 3
This course provides a general survey of oceanography. It is designed to develop an understanding of the ocean and of the science of oceanography. Students learn about the geological, chemical, physical and biological processes at work in the sea.
EXCLUSIONS: OCEA 2000.06, OCEA 2850.06, OCEA 2851.03/OCEA 2852.03
FORMATS: Lecture

OCEA 2002 The Blue Planet II
CREDIT HOURS: 3
This course provides a general survey of biological oceanography. Students learn about marine biology and marine ecosystems. Consideration is also given to human impacts.
PREREQUISITES: OCEA 2001.03
EXCLUSIONS: OCEA 2000.06, OCEA 2850.06, OCEA 2851.03/OCEA 2852.03
FORMATS: Lecture

OCEA 2020 Tools and Concepts in Ocean Sciences I
CREDIT HOURS: 3
Students gain practical insights into oceanographic concepts introduced in OCEA 2001.03/2002.03 through lab exercises. Labs focus on navigation and position, instruments and calibration, ocean optics and acoustics, water movement, and basic marine chemistry. Labs involve data acquisition and analyses to develop quantitative skills. Students will become familiar with the ‘R’ programming language.
COREQUISITES: OCEA 2001.03; or permission of instructor.
PREREQUISITES: MATH 1000.03; MATH 1060.03/STAT 1060.03 (or MATH 2060.03/STATS 2060.03); PHYC 1190/1290.03 (or PHYC 1310.03/1320.03
or PHYC 1300.06); at least one of: CHEM 1011.03/1012.03, ERTH 1080.03/1090.03, or BIOL 1010/1011 or (BIOL 1020.03/1021.03); or permission of instructor.

FORMATS: Lab

**OCEA 2021 Tools and Concepts II**

**CREDIT HOURS: 3**

Students gain practical insights into oceanographic concepts introduced in OCEA 2001/2002 through lab exercises. Labs focus on particle dynamics and life in the ocean and involve data acquisition and analysis to develop quantitative skills. At the end of the course, students observe a mesocosm to synthesize concepts from both OCEA 2020.03 and OCEA 2021.03. Students will continue to use the ‘R’ programming language.

**COREQUISITES: OCEA 2002.03; or permission of instructor**

**PREREQUISITES: OCEA 2020.03**

**FORMATS: Lab**

**OCEA 2800 Climate Change**

**CREDIT HOURS: 3**

See course description for PHYC 2800.03 in the Physics and Atmospheric Science section of this calendar.

**CROSSLISTED: PHYC 2800.03, GEOG 2800.03**

**EXCLUSIONS: ECON2850.06, PHYC2850.06**

**OCEA 3001 Introduction to Physical Oceanography**

**CREDIT HOURS: 3**

This course introduces Ocean Physics, focusing on issues of interest to undergraduates in ocean-related disciplines. The approach is to bind facts together with ideas, often starting with thought experiments and proceeding to simple mathematical models.

**PREREQUISITES: MATH 1000.03 or permission of Instructor**

**FORMATS: Lecture**

**OCEA 3002 Introduction to Chemical Oceanography**

**CREDIT HOURS: 3**

This course provides students with a basic understanding of the composition of seawater and the processes that leads to this composition. This understanding is both qualitative and quantitative through the use of thermodynamic, kinetic and box models to describe the balances that produce the observed chemical distributions.

**PREREQUISITES: CHEM 1011.03 and CHEM 1012.03 (or equivalent), OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); OCEA 2020.03 and OCEA 2021.03; or permission of instructor**

**EXCLUSIONS: OCEA 3170**

**FORMATS: Lecture**

**OCEA 3003 Introduction to Field Oceanography**

**CREDIT HOURS: 3**

This course explores interrelationships between living organisms in the sea and the ocean environment. Biological processes are introduced in the context of the physical and chemical oceanography. The emphasis is on sea-going field work on day trips in local marine waters and hands-on laboratory investigation.

**CALENDAR NOTES: The OCEA 3003 requirement could be waived in light of equivalent course workload at another institution.**

**PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06)**

**CROSSLISTED: MARI 3003.03, BIOL 3003.03**

**FORMATS: Lecture**

**OCEA 3004 The Last Billion Years**

**CREDIT HOURS: 3**

This course examines major events in Earth history. The geological and geochemical evidence will be described, and the hypothesized causes of the events will be examined. The goal of this course is to develop an understanding of the functioning of the earth/ocean/atmosphere system, how it has reacted to perturbations in the past and how it will react to current perturbations in the future.

**PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); or ERTH 1080.03**

**FORMATS: Lecture**

**OCEA 3420 Geochemistry of Aquatic Environments**
CREDIT HOURS: 3
This course is an introduction to the governing principles and processes of aquatic geochemistry. Specific topics will include physical chemistry of natural waters, kinetics of geochemical reactions, the hydrologic cycle, the carbonate system and pH, redox reactions, weathering and mineral-solution equilibria, controls on the composition of rainwater, rivers, and oceans.
PREREQUISITES: CHEM 1011.03/1012.03 or equivalent and ERTH 1080.03/1090.03
CROSSLISTED: ERTH 3420.03
FORMATS: Lecture

OCEA 4000 Oceans and Global Change
CREDIT HOURS: 3
This course examines the role and response of the Oceans to global change, including alterations in currents and circulation, increases in sea level and storm surges, changes in ocean chemistry, modification to the types and patterns of sediment deposition, alterations in the abundances and distributions of organisms, and overall productivity. The course will discuss means of predicting these changes and their effects.
PREREQUISITES: OCEA 3001.03, OCEA 3002.03, OCEA 4110.03, OCEA 4140.03 or permission of Instructor
CROSSLISTED: OCEA 5110.03, ERTH 4110.03
FORMATS: Lecture

OCEA 4110 Geological Oceanography
CREDIT HOURS: 3
This course provides a broad survey of geology and geophysics as they apply to the oceans. The course content covers methods and observations with quantitative applications to an understanding of marine geophysical and geological processes. The topics covered include the origin of ocean basins, plate tectonics, heat flow, gravity, and magnetics (1/3 of the course); patterns and processes of sediment transport and deposition, and the paleoceanographic reconstruction of past climates (2/3 of the course).
CALENDAR NOTES: Training in calculus and statistics will prove to be advantageous to the student’s outcome.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06), OCEA 2020.03, OCEA 2021.03, and ERTH 1080.03; or permission of instructor.
CROSSLISTED: OCEA 5110.03, ERTH 4110.03
FORMATS: Lecture

OCEA 4115 Micropaleontology and Global Change
CREDIT HOURS: 3
See course description for ERTH 4502 in the Earth Sciences section of this calendar.
CROSSLISTED: ERTH 4502.03

OCEA 4120 Physical Oceanography
CREDIT HOURS: 3
This course introduces undergraduate students to the physical properties and dynamics of the oceans. Topics range from global circulation down to the small scales of turbulence. Fact and theory are blended throughout. Quantitative problem solving is emphasized in assignments.
PREREQUISITES: MATH 1000.03, MATH 1010.03, classic calculus or equivalent, and permission of the instructor
CROSSLISTED: OCEA 5120.03
RESTRICTIONS: Third- and fourth-year students only
FORMATS: Lecture

OCEA 4130 Chemical Oceanography
CREDIT HOURS: 3
This course covers the major and minor constituents of sea water, the controls on its chemical composition, nutrient cycling, gas exchange and the influence of the oceans on atmospheric chemistry. Other topics included are chemical tracers, and radiochemical dating methods, stable isotope studies, chemical speciation and chemical models of sea water.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06), and OCEA 3002.03, or instructor's consent
CROSSLISTED: OCEA 5130.03
FORMATS: Lecture | Lab

OCEA 4140 Biological Oceanography
CREDIT HOURS: 3
The goal is to describe how physical, chemical and biological processes interact to determine the species composition, biogeochemical activities, and trophic structure of marine communities. Outstanding problems currently facing biological oceanographers and earth systems scientists are discussed, as are current attempts and methodologies to address them.
CALENDAR NOTES: Biological oceanography is a quantitative science and extensive problem solving is required. Students should be competent in
OCEA 4160 Fisheries Oceanography
CREDIT HOURS: 3
Oceanographic influences on ecology of marine fish: on population dynamics, distribution, abundance, reproduction, life history, feeding, growth, metabolism, mortality, and recruitment. Emphasis on contemporary hypotheses and primary literature and some on fishery management. Primary-publication-style research paper required. Competence with fundamental population dynamics, ecology, physical oceanography, mathematics, and statistical analyses expected.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.06); BIOL 2060.03 or BIOL 3080.03 or equivalent; MATH 1060.03/STAT 1060.03 or STAT 2080.03 or MATH 2060.03/STAT 2060.03 or instructor's consent.
CROSSLISTED: BIOL 4369.03, MARI 4369.03, OCEA 5160.03
FORMATS: Lecture | Tutorial

OCEA 4201 Honours Research - Part I
CREDIT HOURS: 3
This course is required for students enrolled in the Concentrated Honours in Ocean Sciences, and certain streams of the Combined Honours in Oceanography program. It consists of a research project under the supervision of a faculty member, and should include an original component in oceanography. Students are required to participate in weekly meetings of the class and make a presentation (oral or poster) at the annual CDOGS meeting in March.
CALENDAR NOTES: Credit can only be given for this course if OCEA 4201.03 and OCEA 4202.03 are completed in consecutive terms. Partial credit cannot be given for a single term.
PREREQUISITES: Permission given by instructor.
EXCLUSIONS: OCEA 4200.06

OCEA 4202 Honours Research - Part II
CREDIT HOURS: 3
This course is required for students enrolled in the Concentrated Honours in Ocean Sciences, and certain streams of the Combined Honours in Oceanography program. It consists of a research project under the supervision of a faculty member, and should include an original component in oceanography. Students are required to participate in weekly meetings of the class and make a presentation (oral or poster) at the annual CDOGS meeting in March.
CALENDAR NOTES: Credit can only be given for this course if OCEA 4201.03 and OCEA 4202.03 are completed in consecutive terms and partial credit cannot be given for a single term.
PREREQUISITES: Permission given by instructor.
EXCLUSIONS: OCEA 4200.06

OCEA 4210 Time Series Analysis in Oceanography and Meteorology
CREDIT HOURS: 3
See course description for STAT 4390.03 in the Statistics section of this calendar.
PREREQUISITES: Instructor's consent
CROSSLISTED: STAT 4390.03
EXCLUSIONS: STAT 5390.03, OCEA 5210.03
FORMATS: Lecture

OCEA 4220 Numerical Modelling of Atmospheres and Oceans
CREDIT HOURS: 3
This course discusses numerical modelling techniques for simulating atmospheric and oceanic circulations. Material includes: review of governing equations; finite difference, finite element, and spectral methods; Eulerian, semi-implicit and semi-Lagrangian time integration techniques; accuracy and stability analyses; data assimilation and ensemble prediction methods; and boundary treatment for ocean models.
PREREQUISITES: 1000-level calculus course and instructor's consent
CROSSLISTED: OCEA 5220.03
FORMATS: Lecture

OCEA 4221 Ocean Dynamics
CREDIT HOURS: 3
An advanced course for students in Physical Oceanography and Atmospheric Science that studies the basic equations governing rotating geophysical flows, plus applications. Topics include geostrophy, conservation of potential vorticity, quasi-geostrophic dynamics, geostrophic adjustment, response to surface
OCEA 4222 Estuary, Coast and Shelf Dynamics
CREDIT HOURS: 3
This course discusses the physical processes that operate on continental shelves to create long waves, tides, tidal mixing, thermohaline circulation, wind forcing, upwelling, etc. Both observations and models for these processes are discussed.
PREREQUISITES: OCEA 4120.03
CROSSLISTED: OCEA 5222.03
FORMATS: Lecture

OCEA 4230 Biology of Phytoplankton
CREDIT HOURS: 3
This is an upper-division course on the phytoplankton in the context of their evolutionary history and ecological diversity. It has an emphasis on their adaptations and acclimation to different environments and their role in food webs and biogeochemical cycling.
PREREQUISITES: MATH 1000.03 and 1010.03 or MATH 1215.03, OCEA 2001.03 and 2002.03; or permission of Instructor.
CROSSLISTED: BIOL 4662.03, OCEA 5230.03, MARI 4662.03
FORMATS: Lecture

OCEA 4250 Acoustical Oceanography
CREDIT HOURS: 3
This class covers the basic theory of sound propagation and scattering in the ocean environment, and the applications to acoustic remote sensing of the ocean interior. Topics include: normal modes; ray theory; scattering from particles, bubbles and biota; sonar theory and operation.
PREREQUISITES: MATH 2001.03 and 2002.03 or equivalent and instructor's consent
CROSSLISTED: OCEA 5250.03
FORMATS: Lecture

OCEA 4290 Advanced Chemical Oceanography
CREDIT HOURS: 3
This course presents research topics in chemical oceanography, taught as 3-4 self-contained modules. Examples include, the oceanic C02 system and its relation to climate change, chemical reactions in sediments, photochemistry in the upper ocean, and inferring the chemistry of ancient oceans through the isotope record in sediments.
PREREQUISITES: Students will have completed all required 3000 level courses in Oceanography, OCEA 4130, and have the consent of the instructor of this course.
CROSSLISTED: OCEA 5290.03
RESTRICTIONS: Open only to students enrolled in the combined Honours in Chemistry and Oceanography

OCEA 4301 Special Topics in Ocean Science
CREDIT HOURS: 3
This course provides upper level undergraduate students with the opportunity to study an area of Ocean Science that is not offered through the existing curriculum. Students consult with a faculty member to arrange the topic of study and together develop course proposal. The course proposal must be approved by the course coordinator before the student is permitted to register.
CALENDAR NOTES: Instructors are regular faculty members in the Department of Oceanography and serve as supervisors of the Special Topics course. A maximum of 3 credit hours can be taken as a Special Topics course. The Special Topics course cannot replace one of the required core OCEA courses. The course coordinator is the Chair of the Curriculum Committee or designate. The student, with approval from the instructor, must submit the the Registration Form and other documents to the course coordinator no later than 3 days after the start of the term in which the student wishes to register. For Registration Form and more information, please visit www.dal.ca/faculty/science/oceanography/programs.html
PREREQUISITES: OCEA 2001.03, OCEA 2002.03, OCEA 2020.03, OCEA 2021.03, and at least two 3000-level OCEA course. An average grade of ‘B’ (GPA 3) must be attained in these OCEA courses. Signature required from the course coordinator.
RESTRICTIONS: Material produced during a Special Topics course cannot fulfill the requirements for an Honours thesis. For additional restrictions, please see http://
EXCLUSIONS: E3
FORMATS: Other (explain in comments)

OCEA 4302 Independent Research in Ocean Science
CREDIT HOURS: 3
Students in their 3rd or 4th year of study conduct supervised, independent research in Ocean Science. The student and a faculty supervisor together develop a
course outline, with a proposal for original research and the method of evaluation, including a formal research paper. The course outline must be approved by the course coordinator before the student is permitted to register. The course coordinator is the Chair of the Curriculum Committee or designee. CALENDAR NOTES: This course builds on field work, lab experiment(s) or measurements, literature meta-analysis, and/or modeling exercise(s). The course is to be started and completed within one term. Supervisors are regular faculty in the department of Oceanography who conduct research in an area related to the course. A maximum of 3 credit hours can be taken as an Independent Research course. The Independent Research course cannot replace one of the required core OCEA courses. The student, with approval from the supervisor, must submit the Registration Form and other documents to the course coordinator no later than 3 days after the start of the term in which the student wishes to register. For Registration Form and more information, please visit www.dal.ca/faculty/science/oceanography/programs.html

PREREQUISITES: OCEA 2001.03, OCEA 2002.03, OCEA 2020.03, OCEA 2021.03, and at least one 3000-level OCEA course. An average grade of ‘B’ average (GPA 3) must be attained in these OCEA courses. Signature required from the course coordinator.

RESTRICTIONS: Material prepared for an Independent Research course cannot be used in an Honours thesis. Students cannot take OCEA 4302.03 and the Honours course (OCEA 4201.03 and OCEA 4202.03) in the same academic year. For additional restrictions, please see http://

EXCLUSIONS: E2

FORMATS: Other (explain in comments)

OCEA 4311 Fluid Dynamics I
CREDIT HOURS: 3
An introduction to the theory of fluid dynamics, with some emphasis on geophysically important aspects. Contents: tensor mathematics, flow kinematics, equations of motion, viscous flow, potential flow, convection, turbulence, and basic aerodynamics. Occasional reference will be made to current research topics, especially those in Physical Oceanography.

PREREQUISITES: Intended for first-year graduate students in physical oceanography, but graduate students or senior undergraduates in Mathematics or Physics are invited to take it (subject to instructor approval)

CROSSLISTED: PHYC 4311.03, PHYC 5311.03, OCEA 5311.03

FORMATS: Lecture

OCEA 4330 Benthic Ecology
CREDIT HOURS: 3
A fourth year undergraduate course on major topics of benthic ecology, such as animal-sediment relationships, ecosystem processes and geospatial patterns of structure and dynamics of benthic communities. Courses consist of two lectures per week and one journal discussion session. The last three weeks are devoted to a class research project.

PREREQUISITES: OCEA 2001.03, OCEA 2002.03, and BIOL 2060.03, or permission of instructor

CROSSLISTED: BIOL 4666.03, MARI 4666.03

FORMATS: Lecture

OCEA 4331 History of Marine Sciences
CREDIT HOURS: 3
In this course, we will trace the history of marine sciences from the ancients to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped human understanding of the oceans.

PREREQUISITES: Instructor’s consent

CROSSLISTED: BIOL 4664.03, OCEA 5331.03, SCIE 4001.03, HIST 3073.03, HSTC 3331.03, MARI 4664.03

FORMATS: Lecture

OCEA 4370 Deep Sea Biology
CREDIT HOURS: 3
We focus on the biology of organisms inhabiting the deep sea: physiological adaptations to the physicochemical and geological environment; spatial and temporal distributions of biological assemblages; and regulatory factors of these assemblages, such as currents, food availability, reproduction and recruitment. Also, we delve into unique habitats, such as hydrothermal vents.

PREREQUISITES: BIOL 2060.03, OCEA 2001.03 and OCEA 2002.03

CROSSLISTED: BIOL 4370.03, MARI 4370.03, OCEA 5370.03

OCEA 4380 Marine Modelling
CREDIT HOURS: 3
This course provides an overview of modelling techniques applied to biological and biogeochemical topics in oceanography, including the philosophy of modelling, population dynamics, linear and non-linear regression analysis, Principal Component Analysis, numerical approaches to solving differential equations, and visualization. All techniques are introduced with concrete examples and applied to specific problems.

PREREQUISITES: MATH 1000.03; MATH 1010.03; OCEA 2020.03; OCEA 2021.03; or permission of instructor.

CROSSLISTED: OCEA 5380.03

FORMATS: Lecture
OCEA 4401 Marine Management I
CREDIT HOURS: 3
This course exposes students with a marine science background to the increasing need for marine scientists and ocean managers and policy makers to work collaboratively to address the interdisciplinary nature of the problems confronting the world's oceans. This course is restricted to 4th year students with a marine science background.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.6)
RESTRICTIONS: Restricted to 4th year students
FORMATS: Lecture

OCEA 4402 Marine Management II
CREDIT HOURS: 3
Students focus on the linkages between ocean governance and ocean science to understand the role of marine science in informing and influencing decisions affecting coastal and marine space and resources at multiple geographic and jurisdictional scales. This course is restricted to 4th year students with a marine science background.
PREREQUISITES: OCEA 2001.03 and OCEA 2002.03 (or OCEA 2000.6); OCEA 4401.03
RESTRICTIONS: Restricted to 4th year students
FORMATS: Lecture

OCEA 4411 Atmospheric Dynamics I
CREDIT HOURS: 3
See course description for PHYC 4411.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: PHYC 2140.03, or instructor's consent
CROSSLISTED: OCEA 5411.03, PHYC 4411.03/5411.03

OCEA 4412 Atmospheric Dynamics II
CREDIT HOURS: 3
See course description for PHYC 4412.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: OCEA 4411.03/5411.03 or PHYC 4411.03/5411.03, or instructor's consent
CROSSLISTED: OCEA 5412.03, PHYC 4412.03/5412.03

OCEA 4470 Introduction to Seismic Imaging
CREDIT HOURS: 3
See course description for ERTH 4470.03 in the Earth Sciences section of this calendar.
PREREQUISITES: ERTH 2270.03, or instructor's consent
CROSSLISTED: OCEA 5470.03, ERTH 4470.03/5470.03

OCEA 4505 Atmospheric Physics
CREDIT HOURS: 3
See course description for PHYC 4505.03 in the Physics & Atmospheric Science section of this calendar.
CROSSLISTED: OCEA 5505, PHYC 4505/5505

OCEA 4520 Introduction to Atmospheric Science
CREDIT HOURS: 3
See course description for PHYC 4520.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: PHYC 2140.03, or instructor's consent
CROSSLISTED: OCEA 5520.03, PHYC 4520.03/5520.03

OCEA 4541 Synoptic Meteorology I
CREDIT HOURS: 3
See course description for PHYC 4540.03 in the Physics and Atmospheric Science section of this calendar.
COREQUISITES: OCEA 4411.03
OCEA 4550 Synoptic Meteorology II
CREDIT HOURS: 3
See course description for PHYC 4550.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: OCEA 4541.03, or PHYC 4540
CROSSLISTED: OCEA 5550.03, PHYC 4550.03/5550.03

OCEA 4595 Atmospheric Chemistry
CREDIT HOURS: 3
See course description for PHYC 4595.03 in the Physics and Atmospheric Science section of this calendar.
PREREQUISITES: PHYC 2140.03 and a first-year chemistry course
CROSSLISTED: OCEA 5595.03, PHYC 4595.03, PHYC 5595.03, CHEM 4595.03

OCEA 4665 Hacking the blue planet: The scientific and social dimensions of ocean fertilization
CREDIT HOURS: 3
See course description for MARI 4665.03 in the Marine Biology section of this calendar.
PREREQUISITES: One of the BIOL 3101.03, OCEA 2000X/Y.06, ERTH 3601.03, BIOL 3060.03 or instructor's permission
CROSSLISTED: MARI 4665.03
EXCLUSIONS: BIOL 5665.03, OCEA 5665.03
FORMATS: Lecture | Discussion

Physics and Atmospheric Science

Introduction
How does the world work? What are the rules that govern how things happen? These are the questions that intrigue physicists who try to explain the great diversity of nature with the fewest and simplest hypotheses. They discover that there are underlying similarities between things that look very different on the surface. Good physicists have the imagination to see these similarities, coupled with the understanding of the fundamentals of their science to determine the rules that govern the universe. Our programs are designed to allow you to learn physics in a systematic manner and understand how physics applies to the world around us.

Physicists are employed in many areas in universities, government departments and industry and are valued for their ability to discover and apply fundamental insights to a variety of situations.

This intellectual rigor can be applied in many fields beyond physics including meteorology, engineering, education, law, medicine, dentistry, health sciences, and business. Because practicing physicists often have knowledge of several fields, we have a number of combined programs with other science disciplines to provide that broader approach.

Our Honours program is our most comprehensive program aimed at those intending to become career physics specialists. Our various major and combined programs described below provide the opportunity to pursue a broad education in both physics and other areas.
First Year Courses
PHYC 1400 is a general interest course and is not acceptable as a prerequisite for further courses in physics. PHYC 1190/PHYC 1290, and PHYC 1310/PHYC 1320 both give a general introduction to physics, but each has its own particular approach and selection of topics.

PHYC 1190/PHYC 1290 is primarily for students intending to make a study of a physical science or engineering; it has regular labs, occasional tutorials, uses calculus, and is accepted as a prerequisite for advanced physics courses. Nova Scotia Grade XII Physics or its equivalent is a prerequisite. It is recommended that PHYC 1190/PHYC 1290 be taken consecutively, but PHYC 1190 is not a prerequisite for PHYC 1290.

PHYC 1310/PHYC 1320 is an introduction to physics that is oriented towards the health sciences and is primarily intended for students in biology, pre-medicine, pre-dentistry and allied health sciences. The course incorporates labs and tutorials, and is accepted as a prerequisite for advanced physics courses when MATH 1000.03 and MATH 1010.03 are taken concurrently. It is a good preparation for the Medical College Admission Test (MCAT). Nova Scotia Grade XII Physics or its equivalent is highly recommended.

Students who are participating in the Integrated Science Program, and are interested in continuing in Physics, should consult the Undergraduate Advisor.

Second Year Courses
There are five 2nd year core physics courses (PHYC 2050, PHYC 2060, PHYC 2150, PHYC 2510, PHYC 2515). These courses are also suitable for students in other disciplines who would like to enhance their knowledge of physics. In particular, PHYC 2150 provides an opportunity to gain more laboratory experience, which is extremely valuable in many jobs.

Third and Fourth Year Courses
Not all courses are offered each year. Students should take careful note of the year in which each of these courses is planned to be offered. This information can be found at the department website http://www.physics.dal.ca

Prizes are awarded to the top students in each year of the program. Please refer to Awards.

Degree Programs
The Department of Physics and Atmospheric Science offers the following degree programs in Physics

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Major combined with a Diploma in Meteorology*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit) Minor in Physics
- Minor in Physics
- One year Diploma in Meteorology

* BSc Co-op option available
* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections.

A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Student applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Physics undergraduate academic advisor.

Staff

Dean
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chair of Department and George Munro Professor of Physics
Hill, Ian. (902) 494-3897 ian.hill@dal.ca

Undergraduate Advisor Coordinator
Bennett, P. (902) 494-2313 philip.bennett@dal.ca

Diploma in Meteorology
Folkins, I. (902) 494-1292 ian.folkins@dal.ca

Graduate Coordinator
Monchesky, T. (902) 494-3582 theodore.monchesky@dal.ca

Co-op Academic Advisor
Labrie, D. (902) 494-2322 daniel.labrie@dal.ca

Professors Emeriti
Drummond, J. R., BA, MA, PhD (Oxford), FRSC, Canada Research Chair, Remote Sounding of Atmospheres
Jericho, M. H., BSc, MSc (Dalhousie), PhD (Canab), FRSC
Kreuzer, H. J., MSc, DSc (Bonn), FRSC, A.C. Fales Professor of Theoretical Physics
Rotermund, H. H., PhD(Berlin)
Stroink, G., BSc, MSc (Delft), PhD (McGill), PEng

Professors Research
Dunlap, R. A., BS (Worcester), AM (Dart), PhD (Clark), Research
Geldart, D. J. W., BSc (Acadia), PhD (McMaster), FRSC, Research

Professors
Beyea, S., PhD (UNB), primary appointment with Diagnostic Radiology
Chapman, S. C., BSc, MSc, PhD (UBC)
Dahn, J. R., BSc (Dalhousie), MSc, PhD (UBC), FRSC, NSERC/Tesla Canada Industrial Research Chair (IRC), Canada Research Chair, cross appointment with Chemistry, cross appointment with Process Engineering and Applied Science
Hall, K. C., MSc, PhD (Toronto), Canada Research Chair, Ultrafast Science
Hewitt, K., BSc (Toronto), PhD (SFU), PPhys
Hill, I. G., BSc, PhD (Queen’s), George Munro Professor of Physics
Johnson, E.R. BSc (Carleton, PhD (Queen’s)

Associate Professors
Duck, T., BSc, PhD (York)
Folkins, I., BSc (Dalhousie), MSc PhD (Toronto)
Kyriakidis, J., BSc, MSc (Dalhousie), PhD (Basel)
Labrie, D., BSc (Montreal), MSc, PhD (McMaster)
Maksym, G. N., PhD (McGill), primary appointment in the School of Biomedical Engineering
Obrovac, M., PhD (Dalhousie), primary appointment in Chemistry

Assistant Professors
Bennett, P., PhD (UBC), St. Mary’s
Brewer, K., PhD (Dalhousie), Primary appointment with Department of Diagnostic Radiology
Chang, R. Y. -W., BASc, MASc, PhD (Toronto), Canada Research Chair in Atmospheric Science
Cherpak, A., PhD (Carleton), Primary appointment with Department of Radiation Oncology
Chytyk-Praznik, K., PhD (Manitoba), Primary appointment with Department of Radiation Oncology
Hashmi, J., PhD (Toronto), Primary appointment with Department of Anesthesia, Pain Management and Perioperative Medicine
Lesins, G. B., PhD (Toronto)
Maassen, J., BEng, MASc (Ecole Polytechnique de Montreal), PhD (McGill)
Syme, A., PhD (Alberta), Primary appointment with Department of Radiation Oncology
Thomas, C., BSc (St. Mary's), MSc (Dalhousie), PhD (Western), Primary appointment with Department of Radiation Oncology
Yewondwossen, M., PhD (Dalhousie), Primary appointment with Department of Radiation Oncology

Senior Instructor
Payne, S. H., BSc, PhD (Canterbury)

Instructor
de Vet, S. J., MSc (Dalhousie), PhD (Western)

Adjunct Professors
Azzouz, M., PhD (J. F., France), Physics and Astronomy, Laurentian University
Bennett, J. C., PhD (Waterloo), Physics, Acadia
Bowen, C., BSc (St. FX), MSc (McMaster) PhD (Western), Institute for Biodiagnostics, NRC
Grabtchak, S., PhD (UPEI)
Hornidge, D., PhD (Saskatchewan) Physics, Mount Allison
Isaac, G., BSc, MSc, PhD (McGill)
Kanungo, R., PhD (Calcutta Univ), Astronomy and Physics, St. Mary's
Pierce, J., BS (Northeastern), PhD (Carnegie Mellon), Colorado State
Ritchie, H. C., MSc, PhD (McGill), Meteorological Service of Canada - Atlantic
Sarty, A., PhD (Saskatchewan) Astronomy and Physics, St. Mary's
Sham, E., BASc (UBC), MSc (McGill), PhD (McGill)
Titus, L., BSc (St. Mary's), DMet, MSc (Dalhousie)
*White, M. A., BSc (Univ Western Ontario), PhD (McMaster), OC, FRSC, Harry Shirreff Professor of Chemical Research (Emerita)

*Retired

Postdoctoral Fellows/Research Associates
Cakmakyapan, S., PhD (Bilkent)
Cao, Y., PhD (Tsinghua)
Chaubey, J., PhD (Kerala)
Cheng, J., PhD (National Taiwan)

Cooper, M., PhD (Dalhousie)
Croft, B., PhD (Dalhousie)
DeBay, D., PhD (Dalhousie)
Genovese, M., PhD (Toronto)
Hammer, M., PhD (Dalhousie)

McDuffie, E., PhD (Colorado)

Xu, J., PhD (Dalhousie)

BSc or BA (120 credit hour) Concentrated Honours in Physics

Students who want a challenging program resulting in a broad and in-depth background in Physics, including an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in the Physics
courses listed below with a minimum GPA of 3.0, and write a research-based Honours thesis. The thesis requirement is satisfied through completion of PHYC 4800.03/PHYC 4850.03.

A Co-op option is available for students enrolled in a BSc Concentrated Honours in Physics.

**Admission to Honours**
Students must apply for admission to Honours programs. Students considering Honours in Physics should consult with a Physics Undergraduate Advisor early in their second year.

**Departmental requirements**
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Concentrated Honours program in Physics must complete the following courses:

### 1000 level
- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I

Or Integrated Science Program (options above)

### 2000 level
- PHYC 2060.03: Oscillations and Waves/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I
- MATH 2120.03: Methods for Ordinary Differential Equations
- PHYC 2050.03: Computer Simulation in Science

### 3000 and 4000 level
- PHYC 3000.03: Experimental Physics I/PHYC 3010.03: Experimental Physics II
- PHYC 3640.03: Quantum Physics I/PHYC 3590.03: Advanced Classical Mechanics
- PHYC 3200.03: Thermodynamics/PHYC 3210.03: Statistical Mechanics
- MATH 3120.03: Differential Equations/PHYC 3100.03
- PHYC 4151.03: Quantum Physics II
- PHYC 4160.03: Mathematical Methods of Physics
- PHYC 4800.03/PHYC 4850.03: Honours Research Project
- An additional six credit hours of 3000 or 4000 level PHYC courses, other than PHYC 3160.03, PHYC 3170.03, PHYC 3330.03, PHYC 4540.03: Synoptic Meteorology I, PHYC 4550.03: Synoptic Meteorology II

* Up to 30 credit hours of general electives may be chosen from the Faculty of Engineering.

**Honours Qualifying Exam**
The Honours Qualifying Exam grade is the average of best ten grades obtained in 3000 and 4000 level Honours courses.

**BSc or BA (120 credit hour) Combined Honours in Physics and another subject**
Students who wish to study Physics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainabilty. Physics may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. In recent years, students have combined Physics with:

- Mathematics
- Biology
- Earth Sciences
Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. The same standards and conditions for admission apply as for entry into a Concentrated Honours program (see above). In addition, students must have their program of study approved by Academic Advisors in both subject areas. Students must complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Physics, this requirement is satisfied through PHYC 4800.03/PHYC 4850.03.

A Co-op option is available for students enrolled in BSc Combined Honours with Physics as the primary subject.

**Departmental requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Combined Honours program in Physics and another subject must complete the courses listed below. Elective Physics courses should be chosen in consultation with a Physics undergraduate advisor. If courses are not selected carefully, students in a Combined Honours program may not be qualified to enter a regular graduate program in Physics after graduation.

**Physics as the primary or secondary subject**

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/ PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II

Or Integrated Science Program (options above)

2000 level

- PHYC 2060.03: Oscillations and Waves/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I
- MATH 2120.03: Methods for Ordinary Differential Equations
- PHYC 2050.03: Computer Simulation in Science

3000 and 4000 levels

- A minimum of 15 credit hours in PHYC courses at or above the 3000 level

**If Physics is the primary subject**

- An additional six credit hours at or above the 3000 level, which may be PHYC 4800.03/PHYC 4850.03: Honours Research Project

**BSc or BA (120 credit hour) Major in Physics**

The 120 credit hour Major is suited to students who want to focus on Physics, but wish to have a program that is somewhat less constrained than the Honours program. Physics Majors complete a minimum of 42 credit hours in Physics courses past the 1000 level as listed below. Research and other experiential learning opportunities are available through laboratories, special topics and experiential classes.

A Co-op option is available for students enrolled in a 120 credit hour BSc Major program in Physics.

**Departmental requirements**

In addition to fulfilling the requirements outline in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a Major program in Physics must complete the following courses:
1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II

Or Integrated Science Program (options above)

2000 level

- PHYC 2060.03: Oscillations and Waves/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I
- MATH 2120.03: Methods for Ordinary Differential Equations
- PHYC 2050.03: Computer Simulation in Science
- Six additional physics credit hours at or above the 2000 level

3000 and 4000 level

- A minimum of 21 additional physics credit hours at or above the 3000 level

BSc (120 credit hour) Major in Physics combined with a Diploma in Meteorology

This is an integrated Physics/Meteorology program. In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students must complete the following courses:

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II
- MATH 1030.03: Matrix Theory and Linear Algebra I

Or Integrated Science Program (options above)

2000 level

- PHYC 2060.03: Oscillations and Waves/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- MATH 2001.03: Intermediate Calculus I/MATH 2120.03: Methods for Ordinary Differential Equations
- PHYC 2050.03: Computer Simulation in Science
- Three additional physics credit hours at or above the 2000 level

3000 level

- PHYC 3100.03 or PHYC 3210.03: Statistical Mechanics or PHYC 3250.03: Computational Methods in Physics or PHYC 3590.03: Advanced Classical Mechanics or PHYC 4311.03: Fluid Dynamics I
- PHYC 3200.03: Thermodynamics

4000 level: Meteorology course requirements

- PHYC 4505.03: Atmospheric Physics/PHYC 4570.03: Light Scattering, Radiative Transfer, and Remote Sensing
- PHYC 4540.03: Synoptic Meteorology I/PHYC 4550.03: Synoptic Meteorology II
- PHYC 4411.03: Atmospheric Dynamics I/PHYC 4412.03: Atmospheric Dynamics II
- PHYC 4520.03: Introduction to Atmospheric Science/PHYC 4595.03: Atmospheric Chemistry
• OCEA 4120.03: Physical Oceanography
• OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans or another three credit hour course approved by Program Coordinator

Students are encouraged to ensure that their program meets the requirements for the 90 credit hour BSc by the end of Year 3.

After completion of the Major in Physics and Diploma in Meteorology program, students are eligible to be considered for admission to a graduate program in Atmospheric Science at Dalhousie.

**BSc or BA (120 credit hour) Double Major in Physics and another subject**
The Double Major degree program allows students to combine a study of Physics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Physics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

A *Co-op option* is available for students enrolled in BSc Double Major with Physics as the primary subject.

**Departmental requirements**
In addition to fulfilling the requirements outlined in the *Academic Regulations* and *College of Arts and Science Degree Requirements* sections, students in a Double Major program in Physics and another subject must complete the following:

**Physics as the primary or secondary subject**

1000 level

- PHYC 1190.03/PHYC 1290.03: Introduction to Physics or PHYC 1310.03/PHYC 1320.03: Physics In and Around You or equivalent
- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II

Or Integrated Science Program (options above)

2000 level

- PHYC 2060.03: Oscillations and Waves/PHYC 2150.03: Physics Tools: Experiment
- PHYC 2515.03: Modern Physics/PHYC 2510.03: Electricity and Magnetism
- PHYC 2050.03: Computer Simulation in Science

3000 and 4000 levels

- A minimum of 15 credit hours in PHYC courses at or above the 3000 level

**BSc or BA (90 credit hour) Minor in Physics**
The 90 credit hour degree with Minor in Physics is appropriate for students who want to study some Physics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Physics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc in Physics is usually the preferred option for students who wish to combine studies in Physics with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program below). Students with a 90 credit hour BSc in Physics may also want to consider the one year *Diploma in Meteorology program*.

See the *Minor in Physics* section of this Calendar.
Diploma in Meteorology

Students with a general 90 credit hour BSc degree in Physics, Mathematics, Chemistry, or other quantitative disciplines, may apply for admission into a one year Diploma in Meteorology program, provided they have completed the appropriate Physics and Mathematics courses. A strong background in Physics and Mathematics is necessary, and courses taken should cover Vector Calculus and differential equations. More information on the Diploma in Meteorology program is available at http://atm.dal.ca/Diploma_in_meteorology/.

Course requirements

- PHYC 4505.03: Atmospheric Physics
- PHYC 4570.03: Light Scattering, Radiative Transfer, and Remote Sensing
- PHYC 4540.03: Synoptic Meteorology I
- PHYC 4550.03: Synoptic Meteorology II
- PHYC 4411.03: Atmospheric Dynamics I
- PHYC 4412.03: Atmospheric Dynamics II
- PHYC 4520.03: Introduction to Atmospheric Science
- PHYC 4595.03: Atmospheric Chemistry
- OCEA 4120.03: Physical Oceanography
- OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans or another three credit hour course approved by Program Coordinator

After completion of the Diploma program, students are eligible to be considered for admission to a graduate program in Atmospheric Science at Dalhousie.

Minor in Physics

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a Minor in Physics is available to students in the Faculty of Science.

Departmental Requirements

A minimum of 18 credit hours in Physics (PHYC) courses at the 2000 level or higher, to a maximum of 36 credit hours, not including Physics (PHYC) courses that do not count toward a 120 credit hour degree in Physics.

Contact Physics and Atmospheric Science for more information.

Co-op, Minors, Certificates and Engineering Concurrent Programs for Students

Co-operative Education Program in Physics

Co-op Academic Advisor: Dr. D. Labrie (daniel.labrie@dal.ca)

Co-operative Education in Science is a program where academic study in a science subject is combined with paid career-related work experience. Students undertake three work-terms interspersed with their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices.

Co-op is available to students in BSc (120 credit hour) Honours or Major programs in Physics, or in Combined Honours or Double Major programs with Physics as the primary subject. The number of students admitted into Co-op each year is limited. A minimum GPA of 3.00 is required for admission and for continuation in the Co-op program. Students must be eligible to work in Canada.

Students normally apply to join Co-op during their first year of study. Students must apply before April 15, and it is strongly recommended that interested students meet with their Departmental Co-op advisor early in the Winter term of their first year. If accepted into Science Co-op, students must register for, and attend the Science Co-op Seminar Series (SCIE 2800.00) at least four month prior to the first work term.

Details are available from the Physics Co-op Academic Advisor and from the Co-operative Education office www.dal.ca/academics/cooperative_education.html. For more information on Co-op Education in Physics, please see the departmental webpage www.dal.ca/academics/programs/undergraduate/pas/what_will_I_learn/coop_work_term.html.

Minors available to students in Physics
Minor programs allow students to develop subject specialties in addition to their major or honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Physics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

Certificates
In combination with a BSc or BA in Physics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to student enrolled in a BSc or BA in Physics include:

- Certificate in Information Technology
- Certificate in Materials Science
- Certificate in Science Leadership and Communication

BSc/BEng or BA/BEng Concurrent Program
BEng/BSc (90 credit hour) concurrent degree (Physics)

This degree prepares students for research and development careers in a broad range of sectors such as materials engineering, optoelectronics and clean technologies. Following is the recommended sequence of courses for students wishing to obtain a concurrent BEng and BSc (90 credit hour) degree with Minor in Physics. Interested students must consult with the Assistant Dean, Faculty of Science, and the Associate Dean, Faculty of Engineering prior to enrolling in a concurrent BEng/BSc degree.

It is recommended that students also discuss their selection of courses with an undergraduate advisor in the Department of Physics. A concurrent BEng/BSc Honours Physics program can be designed for interested candidates.

One Social science course

Two 2000 level (or above) PHYC courses

One Social science or Humanities course

Year 3
- IENG 2005 Engineering economics
- ECED 2000 Electric circuits
- ENGI 2102 Thermo-Fluid Engineering I

One 2000 level (or above) PHYC course

One Science/FASS elective course (may be PHYC)

ENGI 2203 Engineering design II

Two of PEAS 2201, ECED 2001

PEAS 2202, ECED 2200

BIOL 1030, ENGI 2400

MINE 2200, ENGI 2103

ENGI 2204

Year 4  Continue in BEng program

Year 5  Complete BEng program

To meet the BSc 90 credit hour Minor in Physics requirements, students complete 30 credit hours in addition to their Engineering requirements: 18 credit hours of PHYC courses at or above the 2000 level (excluding any PHYC course that does not count toward a 120 credit hour degree in Physics), 6 credit hours of social science/humanities courses, and 6 credit hours of elective courses from Science or FASS (may be additional PHYC courses)

Writing requirement: choose from eligible writing courses in CLAS, ENGL, GERM, HIST, PERF, PHIL, RELS, or RUSN to fulfill writing and humanities requirements.

Choose from CANA, CTMP, ECON, EMSP, EURO, GWST, HIST, HSTC, INTD, POLI, PSYO, SOST, SUST for social science courses. Choose from ARBC, CANA, CHIN, CLAS, CTMP, CRWR, EMSP, EURO, SWST, GERM, HIST, HTSC, ITAL, PERF, PHIL, RELS, RUSN, SPAN and THEA for humanities courses

Selection of engineering electives depends on engineering discipline. See Engineering section of the calendar for details.

Notes:
- ENGM 2101 and 2022 fulfill the MATH 2001/2002 requirement for the Physics Minor
- ENGM 1081 fulfills the PHYC 2050 requirement for the Physics Minor

Geophysics
For students interested in Geophysics, two options are recommended:

- Combined Honours program in Physics and Earth Sciences,

OR

- Concentrated Honours in Physics
- Elective courses: ERTH 2270.03, ERTH 3270.03, ERTH 4470.03, ERTH 4480.03.
PHYC-Equivalent Courses

Other Dalhousie departments offer courses in one or more areas of Physics. Students enrolled in a 120 credit hour BSc or BA program in Physics may count any of the following courses toward their Physics program course requirements:

Please note that PHYC-equivalent courses will not count towards a minor program in Physics.

Any course cross-listed as a PHYC course

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions. The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the department's website.

Course Descriptions

PHYC 0010 University Prep Physics
CREDIT HOURS: 0
This course can be used as a prerequisite for PHYC 1100X/Y.06 and PHYC 1300X/Y.06. The course will develop problem-solving techniques in preparation for topics to be covered in PHYC 1100X/Y.06 and PHYC 1300X/Y.06. This course is offered by the College of Continuing Education. Students may register and pay for this course at the College of Continuing Education located at 1220 LeMarchant Street, 2nd Floor or by calling (902) 494-2375. This course is offered in the Fall and Summer sessions only (see College of Continuing Education for more details http://collegeofcontinuinged.dal.ca).
PREREQUISITES: Grade 12 Pre-Calculus Math

PHYC 1190 Introduction to Physics
CREDIT HOURS: 3
This course concentrates on mechanics (forces and motion). Primarily for students interested in Physical Sciences and Engineering. Students entering this course must be familiar with algebra, graphs, and trigonometry, and should be taking calculus (MATH 1000.03/1010.03 or MATH 1280.03/1290.03) concurrently. Ideas are introduced through in-class demonstrations enabling students to relate physical theory to events in the real world. Students explore many concepts via hands-on labs.
PREREQUISITES: High School Physics equivalent to the Nova Scotia 12 level. Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term. See the College of Continuing Education at: http://collegeofcontinuinged.dal.ca.
EXCLUSIONS: Credit will be given for only one of 1190.03, 1280.03, or 1310.03
FORMATS: Lecture | Lab

PHYC 1290 Introduction To Physics
CREDIT HOURS: 3
This course concentrates on oscillations and waves, optics, electricity and magnetism. Primarily for students interested in Physical Sciences and Engineering. This course is required for all Engineering programs. Students entering this course must be familiar with algebra, graphs, and trigonometry, and should be taking calculus (MATH 1000.03/1010.03 or MATH 1280.03/1290.03) concurrently. Ideas are introduced through in-class demonstrations enabling students to relate physical theory to events in the real world. Students explore many concepts via hands-on labs.
PREREQUISITES: High School Physics equivalent to the Nova Scotia 12 level. Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term. See the College of Continuing Education at: http://collegeofcontinuinged.dal.ca.
EXCLUSIONS: Credit will be given for only one of 1190.03/1290.03, 1280.03/1290.03, 1300X/Y.06, or 1310.03/1320.03
**PHYC 1310 Physics in and Around You I**

**CREDIT HOURS:** 3  
This is an introduction to physics for students in Biology, Psychology, Arts and Environmental Sciences, and for students preparing for MCAT, and Medicine, Dentistry and Applied Health Sciences. It is accepted as a prerequisite to advanced courses in physics when combined with PHYC 1320, MATH 1000.03 and 1010.03. Basic concepts in mechanics, waves, sound and fluids are applied, where possible, to realistic biological models, e.g. forces and torques are related to muscles and joints.

**CALENDAR NOTES:** This course is not acceptable for the Engineering program  
**PREREQUISITES:** High School Physics equivalent to the Nova Scotia 12 level. Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term. See the College of Continuing Education at: http://collegeofcontinuinged.dal.ca.

**EXCLUSIONS:** Credit will be given for only one of PHYC 1000X/Y.06, 1100X/Y.06, 1190.03, 1280.03, 1300X/Y.06, or 1310.03

**FORMATS:** Lecture | Lab

---

**PHYC 1320 Physics in and Around You II**

**CREDIT HOURS:** 3  
This is a continuation of the introduction to physics presented in PHYC 1310. Topics include optics, electricity, atomic and nuclear physics with applications to vision, cellular activity, imaging and radiation treatment. The course is designed for students in Biology, Psychology, Arts and Environmental Sciences, and for students preparing for MCAT, and Medicine, Dentistry and Applied Health Sciences. It is accepted as a prerequisite to advanced courses in physics when combined with PHYC 1310, MATH 1000.03 and 1010.03.

**CALENDAR NOTES:** This course is not acceptable for the Engineering program.  
**PREREQUISITES:** PHYC 1310.03 or PHYC 1190.03

**EXCLUSIONS:** Credit will be given for only one of PHYC 1000X/Y.06, 1100X/Y.06, 1290.03, 1300X/Y.06, or 1320.03

**FORMATS:** Lecture | Lab

---

**PHYC 1400 Life in the Universe**

**CREDIT HOURS:** 3  
This course provides an overview of the night sky, solar system and stellar astronomy. The focus is on conditions necessary for life, the requirements of extrasolar planetary systems to support Earth-like environments, and the development of life on the Earth.

**EXCLUSIONS:** PHYC 1451.03, PHYC 1452.03

**FORMATS:** Lecture | Lab | Tutorial

---

**PHYC 1600 Understanding Weather**

**CREDIT HOURS:** 3  
The changing weather is a topic of almost universal interest. This course provides an introductory explanation for the basic processes that comprise the day to day weather changes in a non-mathematical way. Topics include weather maps and the wide range of atmospheric phenomena.

**FORMATS:** Lecture

---

**PHYC 2050 Computer Simulations in Science**

**CREDIT HOURS:** 3  
Computer simulation plays an essential role in all fields of science. This class introduces techniques in computer simulation, including finite-difference calculations, Monte Carlo methods, and scientific visualization. A modern programming language and practical tools will be used. The course is suitable for students in Science, Computer Science and Engineering.

**PREREQUISITES:** PHYC 1190.03/PHYC 1290.03, MATH 1000.03/MATH 1010.03

---

**PHYC 2060 Oscillations and Waves**

**CREDIT HOURS:** 3  
Oscillations and waves occur in a wide range of physical, chemical and biological systems. The objective of this course is to quantitatively explore the physics of oscillation and waves in a variety of classical systems such as mechanical and electrical oscillators, sound, and electromagnetic waves.

**CALENDAR NOTES:** This course replaces PHYC 2140.

**PREREQUISITES:** PHYC 1190/1290 or PHYC 1310/1320, and MATH 1000/1010 or MATH 1280/1290

**EXCLUSIONS:** PHYC 2140

**FORMATS:** Lecture | Tutorial
PHYC 2150 Physics Tools: Experiment
CREDIT HOURS: 3
Introducing experimental tools and techniques within a theoretical framework, this course explores concepts in oscillations, waves, electricity and magnetism. The aim is to learn and apply techniques commonly used in Physics research. The following experimental tools and techniques are explored: Instrumentation; Fourier series; Data analysis; building AC and DC circuits; Detection and production of ultrasonic, acoustic, visible, microwaves; Mechanical systems. For example, the concept of resonance is applied to electronic (e.g. Radio), optical, acoustic (e.g. Music), mechanical and nuclear (e.g. MRI) systems in the lab. Textbook: An Introduction to Error Analysis, John R. Taylor.
PREREQUISITES: PHYC 1190.03/1290.03 or 1300X/Y.06 or SCIE 1500X/Y.30 and a 1000-level calculus course, or permission of instructor
FORMATS: Lecture | Lab

PHYC 2250 Physics of Biological and Medical Technology
CREDIT HOURS: 3
This course focuses on the nature of different forms of radiation and their interactions with living organisms. Particular attention is given to imaging techniques for the examination of internal organs, and the resulting effects of radiation. Topics may include ultrasound, nuclear medicine, X-ray tomography, magnetic resonance imaging, and exposure to ultraviolet and nuclear radiation.
PREREQUISITES: PHYC 1190.03/1290.03 or 1300X/Y.06; MATH 1000.03/1010.03 or SCIE 1500X/Y.30, 1501X/Y.30, 1501X/Y.27, 1502X/Y.21 1503X/Y.21, 1504X/Y.27, or 1510X/Y.33 or permission of the instructor.
FORMATS: Lecture

PHYC 2310 Energy and the Environment
CREDIT HOURS: 3
The physical principles and limitations of renewable energy source utilization and energy conversion. A quantitative introduction to energy conversion and storage systems, including solar power and heating, wind, tidal, geothermal, hydroelectric, nuclear power, hydrogen technology, electrical and mechanical energy storage. The input of these energy options on the global climate and environment will be discussed.
PREREQUISITES: PHYC 1190.03/1290.03 (or PHYC 1310/1320), CHEM 1011.03/1012.03, and MATH 1000.03 (or MATH 1215.03), or permission of the instructor.
CROSSLISTED: ENVS 2310.03
EXCLUSIONS: Students who have previously taken PHYC 3330 can not take PHYC 2310.
FORMATS: Lecture

PHYC 2451 Solar System Astronomy & the Night Sky
CREDIT HOURS: 3
An introduction to solar system astronomy and the night sky for science students. The historical development of astronomy, and celestial coordinate systems are discussed, with focus on the planets and satellites of our solar system. Planetarium sessions are included, as are opportunities to observe the night sky through small telescopes.
PREREQUISITES: A first year science course
EXCLUSIONS: PHYC 1400, PHYC 1451
FORMATS: Lecture

PHYC 2452 Stellar & Galactic Astrophysics
CREDIT HOURS: 3
This companion course to PHYC 2451 will serve as a general introduction to the astrophysics of stars and galaxies for science students. The basic properties of stars, star formation, stellar evolution, stellar populations, star clusters, and the late stages of stellar evolution will be discussed. The course will examine the interstellar medium, and galactic structure and evolution, and compact objects (neutron stars, black holes, quasars) at an introductory level. The role of dark matter and dark energy in the formation of the universe, and in establishing the present-day large scale structure of the universe will be reviewed.
PREREQUISITES: A first year science course, and one of MATH 1000, 1215, 1500, or 1280
EXCLUSIONS: PHYC 1452, PHYC 2450
FORMATS: Lecture

PHYC 2510 Electricity and Magnetism
CREDIT HOURS: 3
The course will develop the vector calculus needed for the description of electric and magnetic fields. Other topics include scalar and vector potentials, forces on charges, magnetic induction and Maxwell's equations. The course will give students the necessary foundation for an understanding of more advanced topics in electricity and magnetism.
PREREQUISITES: PHYC 2140.03, a multi-variable calculus course (MATH 2001.03/2002.03, which can be taken concurrently), or permission of the instructor
FORMATS: Lecture | Tutorial
**PHYC 2515 Modern Physics**  
**CREDIT HOURS: 3**  
This course introduces two physics revolutions: Einstein's theory of special relativity and the theory of quantum mechanics. Important early experiments are considered throughout the course. We consider length contraction, time dilation, and relativistic kinematics. Then, to account for wave-like properties of matter, we introduce complex wave functions in one-dimension and show how they lead to energy quantization, Schrodinger's equation, and penetration into classically forbidden regions. Other topics of modern physics, such as random walks (transport theory) may be introduced. A tutorial is offered.  
**PREREQUISITES:** PHYC 1190.03/1290.03 or PHYC 1300.06 or SCIE 1500.03, and a 1000 level calculus course  
**FORMATS:** Lecture | Tutorial

**PHYC 2610 Introduction to Biomechanics**  
**CREDIT HOURS: 3**  
This course provides an introduction to mechanical and analytical concepts applied to the study of biological systems, particularly human movements and tissues. It expands on the knowledge acquired in PHYC 1310, the mechanics as it applies to the human body. It deals with the muscle forces required for the different tasks, the role of the centre of mass in balance and motion and the stresses and strains endured by the different biological tissues. The primary goal of the course is to learn to apply basic mechanical concepts to human movements.  
**PREREQUISITES:** PHYC 1310.03 or PHYC 1190.03 or permission of the instructor  
**EXCLUSIONS:** KINE 2465.03  
**FORMATS:** Lecture

**PHYC 2800 Climate Change**  
**CREDIT HOURS: 3**  
The workings of the Earth's climate system are examined and then applied to help understand contemporary climate change. The role of numerical climate models is discussed with the aim of interpreting climate change predictions for the coming decades. Finally the impacts of climate change are studied with a focus on the various mitigation and adaptation strategies needed.  
**CROSSLISTED:** GEOG 2800.03, OCEA 2800.03  
**EXCLUSIONS:** ECON2850.06, PHYC2850.06

**PHYC 2850 The Science and Economics of Climate Change**  
**CREDIT HOURS: 6**  
This course examines how climate change will impact the environment and human activities, and how to formulate and implement economically realistic solutions. It integrates the physical and biological science with economics in order to analyze the response options as we move towards a carbon-neutral society.  
**PREREQUISITES:** ECON 1101.03 or ECON 1102.03 or any first year science or math course or permission of the instructor.  
**CROSSLISTED:** ECON 2850.03  
**EXCLUSIONS:** PHYC 2800, ECON 2216  
**FORMATS:** Lecture

**PHYC 3000 Experimental Physics I**  
**CREDIT HOURS: 3**  
This course introduces students to electronics and measuring techniques. Topics include digital electronics: logic gates, clocks, shift registers, counters, memory; analog electronics; R.C.L. circuits, operational amplifiers; electronic systems: A/D and D/A chips, computer chips, and displays. The course also introduces students to modern data acquisition methods (including LabVIEW), skills which will be applied in the design and execution of experiments that illustrate fundamental concepts in physics. This course is open to Honours students only.  
**CALENDAR NOTES:** This course has no final examination. Student evaluation is through performance on assignments and projects, and evaluation of written lab reports.  
**PREREQUISITES:** PHYC 2150.03 and PHYC 2515.03, or permission of the instructor.  
**FORMATS:** Lecture | Lab

**PHYC 3010 Experimental Physics II**  
**CREDIT HOURS: 3**  
Designed to give the students a chance to do non-set experiments and thereby encounter and solve the problems of experimentation. Original approaches by the students are encouraged. As the number of experiments is small (three) students should achieve a real understanding of a few physical phenomena. Lecture topics include data & analysis as encountered in the different areas of physics.  
**PREREQUISITES:** PHYC 3000.03 with a minimum grade of B, or permission of the instructor  
**FORMATS:** Lecture | Lab

**PHYC 3100 Electrodynamics**
CREDIT HOURS: 3
Topics include electrostatics and magnestostatics, boundary value problems, fields in matter, time-dependent phenomena, Maxwell's equations, electromagnetic waves, radiation and special relativity.
PREREQUISITES: PHYC 2510.03, PHYC 2140.03
EXCLUSIONS: PHYC 4100.03
FORMATS: Lecture

PHYC 3180 Contemporary Physics
CREDIT HOURS: 3
This course covers a variety of current research topics in physics within a format that introduces students to the learning techniques used in research in academic or industrial settings. Through this course, students will: (i) learn how to read and digest current physics topics using the standard presentation in physics journals; (ii) develop skills required to communicate topics of current interest in physics to classmates through written summaries and oral presentations; and (iii) develop skills required for collaborative discussion to solve research problems.
PREREQUISITES: MATH 2001.03 and at least one of PHYC 2515.03 or PHYC 2150.03 or permission of the instructor
FORMATS: Lecture

PHYC 3200 Thermodynamics
CREDIT HOURS: 3
An introduction to the basic concepts and laws of thermodynamics. There will be a short survey of required Mathematics (partial derivatives). Topics include: thermometry, equations of state, energy and entropy, thermodynamic potentials, heat engines, thermodynamic efficiency and phase transitions.
PREREQUISITES: PHYC 2140.03, MATH 2001.03/2002.03, or permission of the instructor.
FORMATS: Lecture | Tutorial

PHYC 3210 Statistical Mechanics
CREDIT HOURS: 3
Using statistical entropy, we will explore how macroscopic thermodynamic behavior emerges from microscopic models. We will consider the microcanonical, canonical, and the grand canonical statistical ensembles. We will examine two-state systems as well as non-interacting Fermionic and Bosonic systems. Finally, we will learn about deceptively simple interacting systems such as the Ising model.
PREREQUISITES: PHYC 3200.03 or equivalent; MATH 2001.03/2002.03

PHYC 3250 Computational Methods in Physics
CREDIT HOURS: 3
The objective of this course is to teach students the use of computers in physical analysis. The UNIX operating system will be introduced and used throughout the course. A modern programming language will be applied to a selection of problems drawn from physical theory and experiment. This is a hands-on, practical, and interactive class with an emphasis on the development of computational skills that scientists use.
PREREQUISITES: PHYC 1190.03/1290.03 or equivalent, MATH 1010.03 or equivalent, PHYC 2050.03 or equivalent

PHYC 3303 Materials Science
CREDIT HOURS: 3
This course emphasizes understanding the principles behind materials' physical properties, such as thermal and mechanical stability, and electrical and optical properties. Materials discussed include liquid crystals, perfect crystals, defective solids, polymers and glasses. Applications, such as the use of materials in displays, gas sensors, and lasers, are discussed.
CALENDAR NOTES: This course holds lectures together with CHEM 3305. CHEM 3305 has a lab and PHYC 3303 has a major term paper.
PREREQUISITES: CHEM 1012.03, and PHYC 3200.03 (can be co-requisite) or (CHEM 2301.03 and CHEM 2304.03) or (ERTH 2001.03 and ERTH 2002.03)
EXCLUSIONS: CHEM 3305.03
FORMATS: Lecture

PHYC 3340 Electronics
CREDIT HOURS: 3
Topics include digital electronics: logic gates, clocks, shift registers, counters, memory; analog electronics: R.C.L. circuits, operational amplifiers; electronic systems: A/D and D/A chips, computer chips, and displays.
CALENDAR NOTES: Credit cannot be given for both PHYC 3000.03 and PHYC 3340.03
PREREQUISITES: PHYC 2150.03; or ENGI 2001.03
FORMATS: Lecture | Lab
PHYC 3540 Optics and Photonics
CREDIT HOURS: 3
Topics in physical and geometrical optics will be covered. Selected applications will be presented in certain areas of photonics, including micro-optic sensors, semiconductor lasers and detectors, optical waveguides and fibres, optical signal processing and telecommunications.
PREREQUISITES: PHYC 2150.03 and PHYC 2510.03 or MATH 2002.03
FORMATS: Lecture

PHYC 3590 Advanced Classical Mechanics
CREDIT HOURS: 3
Topics include: central force motion, the principle of virtual work, Lagrange’s equations, the principle of least action, Hamilton’s equations, canonical transformations, Hamilton-Jacobi equation.
PREREQUISITES: PHYC 2140.03, MATH 2002.03
FORMATS: Lecture

PHYC 3640 Quantum Physics I
CREDIT HOURS: 3
This course introduces the formal structure of quantum mechanics as well as quantum mechanical calculations. The emphasis is on problem solving. The course starts with quantum measurement, then considers particles in a box and the quantum harmonic oscillator. The course starts with one-dimensional quantum mechanics and ends with higher dimensional problems. The course introduces quantum mechanical operators, time-evolution, quantum angular momentum, and the solution of the hydrogen atom.
PREREQUISITES: MATH 2002.03, MATH 1030.03, PHYC 2515.03 and PHYC 2140.03
FORMATS: Lecture

PHYC 3810 Microcomputers and the Real World
CREDIT HOURS: 3
Subject material: measurement theory, modern sensors, microcomputer architecture, and software simulation of digital electronic circuits. Interfacing techniques including serial, parallel USB and GPIB ports. The graphical programming language is used throughout.
PREREQUISITES: PHYC 2150.03, PHYC 3340.03
CROSSLISTED: CSCI 3122.03
FORMATS: Lecture | Lab

PHYC 3900 Introduction to Soft Condensed Matter Physics
CREDIT HOURS: 3
The aim of this course is to provide an introduction to some concepts used in soft condensed matter physics through the study of three systems, polymers, colloids and liquid crystals. The course will be divided in four modules: I) Brownian dynamics and diffusion II) Polymers shape, molecular mass distribution, osmotic pressure, gel, entropic elasticity III) Colloids: van der Waals and electrostatic interactions, Hamaker constant, DLVO theory, polymer layers (brushes), gel electrophoresis IV) Liquid crystals: order parameter, optical properties of nematics (birefringence), phase transitions, LCD
PREREQUISITES: MATH 2001.03, 2002.03: Intermediate Calculus I and II
FORMATS: Lecture

PHYC 4098 The Physical Cosmology
CREDIT HOURS: 3
The course is intended to provide a sound physical foundation to modern cosmology and the formation and evolution of the Universe. The course introduces the principles of geometrical and astrophysical cosmology and emphasizes the direct confrontation of observational data with contemporary theories.
PREREQUISITES: PHYC 2515, PHYC 2140, or permission of instructor
FORMATS: Lecture

PHYC 4099 Stellar Structure and Evolution
CREDIT HOURS: 3
This course introduces concepts in stellar astronomy, building an understanding of stellar physics to probe the evolution of stars. Topics covered include stellar timescales, energy generation, and derivation of equations of stellar structure, evolution of stars from the pre-main sequence, through the main sequence hydrogen burning, and beyond.
PREREQUISITES: PHYC 2515, PHYC 2140, or permission of instructor
FORMATS: Lecture
PHYC 4151 Quantum Physics II
CREDIT HOURS: 3
This course builds on the concepts and theory of quantum mechanics presented in “Quantum Physics I” (PHYC 3640) by introducing additional topics of fundamental importance, including: spin, identical particles, time-independent perturbation theory, variational approach, WKB approximation, time-dependent perturbation theory, and scattering theory.
PREREQUISITES: PHYC 3640.03
CROSSLISTED: PHYC 5151.03
FORMATS: Lecture

PHYC 4160 Mathematical Methods of Physics
CREDIT HOURS: 3
Topics discussed include: complex variable theory, Fourier and Laplace transform techniques, special functions, partial differential equations.
PREREQUISITES: MATH 3120.03, PHYC 2140.03 or permission of instructor.
CROSSLISTED: PHYC 5160.03, MATH 5165.03
FORMATS: Lecture

PHYC 4180 Nuclear and Particle Physics
CREDIT HOURS: 3
This is an introductory course in nuclear physics. Topics discussed include: nucleon-nucleon interactions, nuclear structure, gamma transitions, alpha decay, beta decay, nuclear reactions and elementary particle physics, with applications to the interior of stars and the earlier universe.
PREREQUISITES: PHYC 3640.03
CROSSLISTED: PHYC 5180.03
FORMATS: Lecture

PHYC 4230 Introduction to Solid State Physics
CREDIT HOURS: 3
An introduction to the basic concepts of solid state physics which are related to the periodic nature of the crystalline lattice. Topics include crystal structure, X-ray diffraction, phonons and lattice vibrations, the free electron theory of metals, energy bands, magnetism and superconductivity.
PREREQUISITES: PHYC 3640.03 and 3210.03 which may be taken concurrently, or permission of instructor
EXCLUSIONS: PHYC 5230.03
FORMATS: Lecture

PHYC 4250 Topics in Numerical Computing
CREDIT HOURS: 3
This class focuses on discrete and stochastic techniques of computational physics. Topics may include stochastic methods, global optimisation techniques, spectral methods, linear algebra, correlations, and computational modelling.
PREREQUISITES: PHYC 1280.03/1290.03 or equivalent, MATH 1010.03 / PHYC 2050 or equivalent
FORMATS: Lecture

PHYC 4311 Fluid Dynamics I
CREDIT HOURS: 3
An introduction to the theory of fluid dynamics with some emphasis on geophysically important aspects. Contents: tensor mathematics, flow kinematics, equations of motion, viscous flow, potential flow, convection, turbulence, and basic aerodynamics.
PREREQUISITES: Subject to instructor approval
CROSSLISTED: PHYC 5311.02, OCEA 4311.03/5311.01
FORMATS: Lecture

PHYC 4411 Atmospheric Dynamics I
CREDIT HOURS: 3
The basic laws of fluid dynamics are applied to studies of atmospheric motion, including the atmospheric boundary layer and synoptic scale weather disturbances (the familiar highs and lows on weather maps). Emphasis will be placed on the blend of mathematical theory and physical reasoning which leads to the best understanding of the dominant physical mechanisms.
PREREQUISITES: PHYC 2140.03 or permission of the instructor
CROSSLISTED: PHYC 5411.03, OCEA 4411.03/5411.03.
FORMATS: Lecture
PHYC 4412 Atmospheric Dynamics II
CREDIT HOURS: 3
The approach is the same as for PHYC 4411.03, with emphasis on synoptic-scale wave phenomena, frontal motions and the global circulation. Additional topics including tropical meteorology, middle atmospheric dynamics, severe storms, mesoscale meteorology and numerical weather prediction may be included.
PREREQUISITES: PHYC 4411.03 or permission of the instructor.
CROSSLISTED: PHYC 5412.03, OCEA 4412.03/5412.03
FORMATS: Lecture

PHYC 4460 Photons and Atoms
CREDIT HOURS: 3
This class covers a selection of topics in advanced optics, that may include: a quantum treatment of light-matter interactions, strong field effects, quantum optics, nonlinear optics, optical resonators, laser physics, laser dynamics, and photonic devices.
PREREQUISITES: PHYC 3640.03
CROSSLISTED: PHYC 5460.03
FORMATS: Lecture

PHYC 4505 Atmospheric Physics
CREDIT HOURS: 3
Moist thermodynamics is applied to a variety of atmospheric phenomenon. These include aerosols, cloud droplets, precipitation formation, convection, supercells, hurricanes, lightning, and the boundary layer. We also discuss the radar equation and the interpretation of radar images.
PREREQUISITES: PHYC 2140 and PHYC 4520, or permission of the instructor
CROSSLISTED: PHYC 5505, OCEA 4505/5505
FORMATS: Lecture

PHYC 4520 Introduction to Atmospheric Science
CREDIT HOURS: 3
The general overview of the atmosphere provides the student with an understanding of the composition and thermal structure of the atmosphere, air mass and frontal theory and weather generating physical processes and their consequences. Other topics include atmospheric radiation, dynamic meteorology, climatology and the physics of clouds and storms.
PREREQUISITES: PHYC 2140.03 or permission of instructor
CROSSLISTED: PHYC 5520.03, OCEA 4520.03/5520.03
FORMATS: Lecture

PHYC 4540 Synoptic Meteorology I
CREDIT HOURS: 3
This course introduces the practical skills of meteorological observation and analysis. Emphasis is on developing skills in drawing and interpreting weather maps, and on studying the three-dimensional structure of weather systems. Satellite and radar remote sensing of the atmosphere is also introduced. Case studies of atmospheric systems and processes are carried out during the tutorial-laboratory period.
COREQUISITES: PHYC 4411.03
PREREQUISITES: At least one third-year physics course
CROSSLISTED: PHYC 5540.03, OCEA 4541.03/5541.03
FORMATS: Lecture | Lab | Tutorial

PHYC 4550 Synoptic Meteorology II
CREDIT HOURS: 3
This course extends the analysis and diagnosis of atmospheric dynamics and weather processes introduced in PHYC 4540.03. Emphasis is on the practical application of meteorological theory, particularly in the area of diagnosing the cases of weather events. Modern computer and statistical methods are discussed, and students receive an introduction to weather forecasting.
PREREQUISITES: PHYC 4540.03
CROSSLISTED: PHYC 5550.03, OCEA 4550.03/5550.03
FORMATS: Lecture | Lab | Tutorial

PHYC 4570 Light Scattering, Radiative Transfer, and Remote Sensing
CREDIT HOURS: 3
The equations of radiative transfer through the atmosphere will be developed and used. Special topics include transfer of infrared radiation, Mie scattering, absorption by atmospheric gases and aerosols, transfer through clear and cloudy atmospheres. Also remote sensing techniques and radiative transfer models.
PHYC 4595 Atmospheric Chemistry
CREDIT HOURS: 3
PREREQUISITES: MATH 1000.03, PHYC 1190.03/1290.03 (or PHYC 1310.03/1320.03 or 1300.06) and CHEM 1011.03/1012.03
CROSSLISTED: PHYC 5595.03, CHEM 4595.03, OCEA 4595.03/5595.03
FORMATS: Lecture

PHYC 4660 Cosmology
CREDIT HOURS: 3
A self-contained introduction to cosmology will be given and no prior knowledge of differential geometry or general relativity will be assumed (although some knowledge of elementary differential equations will be useful). A cosmological model is a model of the universe, as a whole, on the largest scales; the emphasis of the course will be on the modeling aspects of cosmology.
PREREQUISITES: Instructor's permission
CROSSLISTED: PHYC 5660.03, MATH 4410.03/5410.03
FORMATS: Lecture

PHYC 4800 Honours Research Project I
CREDIT HOURS: 3
Students in the honours stream in Physics and Atmospheric Science will do a research project under the direction of a faculty member. A research plan, interim progress reports and a formal final report are required. The final grade will be based on an evaluation of the reports and an oral presentation. Students in the major stream can apply to the department to take this course.
PREREQUISITES: PHYC 3010 and permission of the coordinator and supervisor.

PHYC 4850 Honours Research Project II
CREDIT HOURS: 3
Students in the honors stream will do a second research project or continue the project started in PHYC 4800 under the direction of a faculty member. A research plan, interim progress reports and a formal, final report are required. The final grade will be based on an evaluation of the reports and an oral presentation.
PREREQUISITES: PHYC 4800 and permission of the coordinator and supervisor.

PHYC 8891 Co-op Work-Term I
CREDIT HOURS: 0
PREREQUISITES: SCIE 2800.00

PHYC 8892 Co-op Work-Term II
CREDIT HOURS: 0
More Information

For information concerning programs and courses in Psychology, please refer to the Psychology section of this calendar. For Neuroscience, please refer to the Neuroscience section.

Staff

Dean
Macdonald, C.L.B. BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

Chairperson of Department
Newman, A. J., BA (Winnipeg), MSc, PhD (Oregon)

Academic Advisors
To contact an academic advisor, please go to the Psychology and Neuroscience Main Office (LSC 3263), telephone (902) 494-3417, or visit the Psychology and Neuroscience website.

Professors Emeriti
Brown, R. E., BSc (Victoria), MA, PhD (Dalhousie)
Klein, R. M., BA (SUNY), MA, PhD (Oregon)
LoLordo, V. M., AB (Brown), PhD (Penn)
Meinertzhagen, I. A., BSc (Aberdeen), PhD, DSc (St. Andrews)
Mitchell, D. E., BSc, MA (Melb), PhD (Berkeley)

Professors
Abbass, A., BSc (Ottawa), MD (Dalhousie), FRCPC (Toronto), major appointment in Psychiatry
Adamo, S., BSc (Toronto), PhD (McGill), Graduate Coordinator
Barrett, S. P., BA (St. FX), PhD (McGill)
Campbell-Yeo, M., BSc, MScN (Dalhousie), PhDN (McGill), major appointment in the School of Nursing
Chambers, C. T., BSc (Dalhousie), MA, PhD (UBC), joint appointment in Pediatrics, Faculty of Science Killam Professor in Psychology
Corkum, P. V., BSc (Dalhousie), MA, PhD (OISE at Toronto)
Crowder, N. A., BSc, PhD (Alberta)
Deacon, S. H., BSc (UPEI), PhD (Oxon)
Duffy, K., BA (St. Thomas), PhD (McMaster)
Eskes, G. A., BA, PhD (Berkeley), joint appointment in Psychiatry
Finley, G. A., BSc, MD (Dalhousie), FRCPC, major appointment in Anaesthesia
Good, K., BSc (UNB), MSc, PhD (UBC), major appointment in Psychiatry
Kay-Raining Bird, E., BA (Queen's), MSc (Columbia), PhD (Univ Wisconsin - Madison), major appointment in the School of Human Communication Disorders
Kieffe, M., BA (Memorial), MSc, PhD (Alberta), major appointment in the School of Human Communication Disorders
Moore, C. L., BA, PhD (Cantab)
Newman, A. J., BA (Winnipeg), MSc, PhD (Oregon)
Perrot, T. S., BSc, PhD (Western)
Phillmore, L., BA (UWO), MA, PhD (Queen’s)
Rosen, N. O., BA (Queen’s), PhD (McGill)
Rusak, B., BA (Toronto), PhD (Berkeley), FRSC, joint appointment in Psychiatry
Semba, K., BEd, MA (Tokyo), PhD (Rutgers), major appointment in Medical Neuroscience
Sherry, S. B., BA (York), MA (UBC), PhD (Saskatchewan)
Smith, I. M., BA (Dalhousie), MSc (Brown), PhD (Dalhousie), major appointment in Pediatrics, Joan and Jack Craig Chair in Autism Research
Stewart, S., BSc (Dalhousie), PhD (McGill), joint appointment in Psychiatry
Taylor-Helmick, T. L., BA (Calgary), MSc, PhD (Dalhousie)
Unger, M., BA, BSW, MSW (McGill), PhD (Wilfrid Laurier), major appointment in the School of Social Work
Westwood, D. A., BSc, MA, PhD (Waterloo), major appointment in the School of Health and Human Performance

Associate Professors
Aiken, S., BA, MSc (Western), PhD (Toronto), major appointment in the School of Human Communication Disorders
Bardouille, T., BSc (Queen's), MSc (Dalhousie), PhD (Toronto) major appointment in Psychiatry
Boe, S., BPhEd (Brock), PhD, MPT (Western), major appointment in the School of Physiotherapy
Bombay, A., BSc (Ottawa), MSc, PhD (Carleton), major appointment is held jointly with the School of Nursing and Psychiatry
Chorney, J., BSc (Dalhousie), MA, PhD (West Virginia), major appointment in Anesthesiology
Fisher, D., BSc (Carleton), MSc, PhD (Carleton), major appointment in Psychiatry
Fisk, J., BSc, MA, PhD (Western), major appointment in Psychiatry
Franklin, T., BSc (King's), MSc (Dalhousie), PhD (Swiss Federal Institute of Technology)
Jacques, S., BA (McGill), MA, PhD (Toronto)
Johnson, S., BA (Kalamazoo), MSc, PhD (Victoria), Clinical PhD Program Director of Training
Meier, S., BSc, MSc (Universitat Basel, Switzerland), PhD (Ruprecht Karls Universitat, Germany)
Neyedli, H., BSc Honors (Dalhousie), MSc, PhD (Toronto), major appointment in Health and Human Performance
Robinson, L., BSc (Victoria), MA, PhD (Simon Fraser), major appointment in the School of Health and Human Performance
Weaver, I. C. G., BSc (Aberdeen), MSc (Bristol), PhD (McGill)

Assistant Professors
Blais, J., BA/MA/PhD (Carleton)
Cloutier, A., BA, MA (Carleton), PhD (Queens) major appointment in Rowe School of Business
Conrad, C., BA, MEC, PhD (Dalhousie), MA (Queens) major appointment in Information Management
Dithurbide, L., BA (St. Mary's), MA (Brock), PhD (Michigan State), major appointment in Health and Human Performance
Filliter, J., BSc, MSc, PhD (Dalhousie) major appointment in Pediatrics
Ghanouni, P., BSc/MSc (SBUMS), PhD (UBC) major appointment in Occupational Therapy
Hashimi, J., BSc (Punjab), MSc (Western), PhD (Toronto), major appointment in Anesthesiology
Ilie, G., BSc, MA (York), PhD (Toronto), major appointment in Community Health and Epidemiology
Lee-Bagley, D., BSc (Calgary), MSc, PhD (UBC), major appointment in Family Medicine
Lovas, D., BSc, MD (Dalhousie), major appointment in Psychiatry
Pavlova, B., MSc (Palacky Univ., Czech Republic), PhD (Charles Univ., Czech Republic), DClinPsy (Inst. of Psychiatry, King's College)
Thomas, M., BSc (St. Andrew's), MBChB (Manchester), DRCOG/MRCP-UK (Glasgow), PhD (Central Lancashire) FRCPCH FRCP, major appointment in Pediatrics
Town, J., BSc (York), DClinPsy (Univ of Sheffield), major appointment in Psychiatry
Weatherhead, D., COGS-P-BCH (Queen's), PhD (Waterloo)
Yakovenko, I., BSc (Toronto), MSc (Calgary), PhD (Yale), joint appointment in Psychiatry

University Teaching Fellows
Gadbois, S., BP, MAPs (Moncton), PhD (Dalhousie)
Stamp, J., BSc (Dalhousie), PhD (Cambridge)
Stevens, L., BSc (Acadia), MSc, PhD (Dalhousie), Undergraduate Program Coordinator
Senior Instructors
Borycz, J., PhD (Inst. of Pharmacology, Krakow, Poland)
Christie, J., BSc, MSc, PhD (Dalhousie)
Juckes, T., BA, MA (Natal), PhD (Dalhousie)
Mackinnon, S., BA(H) (UCCB), MSc (Wildred Laurier), PhD (Dalhousie)
Pencer, A., BSc (St. FX), MSc, PhD (Calgary)

Instructors
Stratton, N., BA (Concordia), MA/PhD (Ryerson)

Adjunct Professors
Barresi, J., BSc (Brown), MA (S Calif), MS, PhD (Wisc), Psychology and Neuroscience/Dalhousie
Cawley, E., BA (Hons) Ottawa, MSc, PhD (McGill), Director, National Mental Health Strategy
Champod, A.S., BSc (Montreal), PhD (McGill) Psychology/Acadia
Chipman, K., BA (UPEI), MA, PhD (Western), Neuropsychology Service/Nova Scotia Hospital
Church, E., BA (St. John’s), MA, PhD (Toronto), School Psychology/Mount Saint Vincent
Conrad, N., BA (St. Mary’s), PhD (McMaster), Psychology/Saint Mary’s
Day, A., BA (Manitoba), MSc, PhD (Waterloo), Psychology/Saint Mary’s
DiGiorgio, C., BA (UCCB), BSc, BEd (Dalhousie), MEd (St. FX) PHD (Univ. South Australia)
Ellsworth, C., BA (McMaster), MA, PhD (Queen’s), Psychology/IWK Health Centre
Flanagan, H., BA, BSc (McMaster), MA, PhD (York)
Gilin Oore, D., BSc (Northern Michigan), MA, PhD (Missouri-St. Louis), Psychology/Saint Mary’s
Ivanoff, J., BSc, MA (Guelph), PhD (Dalhousie), Psychology/Saint Mary’s
Lackner, C., MSc (Queen’s) PhD (Brock), Psychology/Mount Saint Vincent
LoLordo, V., AB (Brown), PhD (Penn), Psychology and Neuroscience/Dalhousie
MacNeil, B., BSc (St. FX), PhD (New Brunswick) Mental Health and Addictions/QEI Health Sciences Centre
Marchand, Y., MCS (Univ of Paris), PhD (Compiegne)
Mitchell, D. E., BSc, MAAppSc (Melb), PhD (Berkeley), Psychology and Neuroscience/Dalhousie
Omisade, A., BA (York), PhD (Dalhousie), Neuropsychology/QEI Health Sciences Centre
Rigney, G., BHons, PhD (South Australia) Psychology/CQUniversity Adelaide
Robertson, E., BA (Mt. A), MA, PhD (Western), Psychology/Cape Breton Univ
Roy-Charland, A., BPs, MAPs and PhD (Moncton), Psychologie/Univ. de Moncton
Saint-Aubin, J., BA (Sherbrooke), MPs, PhD (Laval), École de psychologie/ Université de Moncton
Schellinck, H., BSc, MSc, PhD (Dalhousie), Psychology and Neuroscience/Dalhousie
Shaw, S. R., BSc (London), PhD (St. Andrews), Psychology and Neuroscience/Dalhousie
Smith, S. M., BA (Bishop’s), MA, PhD (Queen’s), Psychology/Saint Mary’s
Vallis, T. M., BSc (Dalhousie), MA, PhD (Western), Psychology/QEI Health Sciences Centre
Watt, M., BA (St. FX), PhD (Dalhousie), Psychology/St. Francis Xavier

Phone Number: (902) 494-3417
Fax Number: (902) 494-6585
Introduction

Psychology is an experimental science: Its purpose is to discover the conditions that control the activities of animals and people, to measure these conditions and the responses they produce, and to use this knowledge to predict and change behaviour. It is a subject for inventive but also scientifically rigorous people, better suited to those who want to find out for themselves than to those who want to be told what to believe.

Psychology at Dalhousie treats behaviour as a natural phenomenon, and in that sense shares much with the other life sciences. The boundaries that historically separated psychology from zoology, physiology, and cellular biology are blurred. As well, important ties are being made to such disciplines as anthropology, sociology, and philosophy. The student will find that the diverse subject matter includes three major levels of analysis: the organism, the organism’s biological machinery, and the broader social-environmental context in which particular behaviour patterns are expressed. Meaningful integration of these diverse levels and forms of analysis is an intellectual challenge of major proportions. Similarly, the time perspectives of immediate causation, development, evolution, and function all contribute to the modern approach to behavioural science and each must be evaluated in relation to the others.

A. Enrolment Limitations

Psychology is a popular program, and we have a high enrolment of students. Potential Major and Honours students, and those intending to enrol in the 90 credit hour BA or BSc Minor program in Psychology should note that there are limitations on the number of students that can be accepted into these programs in any given year. Passing introductory psychology courses with the required grade of B- and declaring an intent to Major in Psychology does not guarantee a place in any of these programs. Students are advised to register as early as possible for required courses to secure a space within a program.

There are strict size restrictions on individual courses. Lecture courses are limited by room size. Enrolment in laboratory courses is further restricted because of equipment limitations and requirements for supervision. All Major and Honours students, and those enrolled in a 90 credit hour program, should review carefully program requirements and choose prerequisite courses accordingly. Laboratory courses fill rapidly, and not all laboratory courses are offered every year.

B. Enrolment of Other Students

Only Major and Honours students in Psychology may enrol in PSYO 2000.03, PSYO 2470.03, and PSYO 2501.03, and such students are given preference in other second-year courses. All students must have at least a B- in both the introductory psychology courses, or a B- in the psychology component of the Integrated Science Program, to be permitted to register in any second-year course in Psychology.

C. Laboratories

Psychology laboratories typically involve data collection and interpretation, and writing reports on the results. All Major and Honours students must take the second-year research methods course (PSYO 2000.03) and at least one third-year research laboratory course (six credit hours for Honours students).

Degree Programs

The Department of Psychology and Neuroscience offers the following degree programs in Psychology:

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Psychology
- Minor in Psychology

* May be combined with Minor programs from other disciplines (except Neuroscience).

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ between the BA and BSc degrees.
A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Psychology undergraduate academic advisor.

A detailed description of the Psychology programs is available in a pamphlet titled "A Student's Guide to Psychology Classes". The pamphlet is available from the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263) and online from the Department's website (www.dal.ca/psychandneuro).

**BSc or BA (120 credit hour) Concentrated Honours in Psychology**

Students who want a challenging program resulting in a broad background in Psychology, including an independent research experience, may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students complete a minimum of 54 credit hours above the 1000 level in Psychology with a minimum GPA of 3.0 and write a research-based Honours thesis. The Honours thesis and Qualifying Examination requirements are satisfied through completion of PSYO 4501.03 and PSYO 4502.03.

**Admission to Honours**

Students must apply for admission to Honours programs. Students wishing to enrol in Honours in Psychology should consult with an Honours Advisor. Students may not apply for Honours before January of their third year of studies. A detailed description of the Honours application process can be found on the departmental website www.dal.ca/psychandneuro. Admission requirements include:

- A grade of B+ or better in PSYO 2000.03: Methods in Experimental Psychology
- A minimum of A- or better in the most recently completed:
  - 18 credit hours of PSYO courses (for admission in January of 3rd year)
  - OR
  - 27 credit hours of PSYO courses (for admission at end of 3rd year)
- A willing supervisor

**Departmental requirements**

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ between the BA and BSc degrees. In addition, students in a Concentrated Honours program in Psychology must complete the following:

### 1000 level

Introduction to Psychology and Neuroscience I and II (six credit hours)

- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or equivalent) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or equivalent) with grade of B- or better
  - OR
  - a B- in the Psychology component of SCIE 1506.09 and 1507.09: Integrated Science Program I and II, or equivalent

### 2000 level

- PSYO 2000.03: Methods in Experimental Psychology & Neuroscience (with grade of B+ or better)
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)

Plus, an additional nine credit hours, selected from:

- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning
- PSYO 2150.03: Perceptual Processes
• PSYO 2160.03: Animal Behaviour
• PSYO 2220.03: Abnormal Behaviour
• PSYO 2444.03: Forensic Psychology
• PSYO 2570.03: Cellular Neuroscience

Note: It is recommended that PSYO 2000.03: Methods in Experimental Psychology and PSYO 2501.03: Statistical Methods I be taken concurrently.

Care should be taken in selecting second-year courses to ensure they provide the necessary prerequisites for courses intended to be taken in third and fourth years of study.

3000 level
Six credit hours of designated lab courses, selected from:

• PSYO 3051.03: Research Methods in Sensation and Perception
• PSYO 3082.03: Experimental Social Psychology
• PSYO 3091.03: Methods in Developmental Psychology
• PSYO 3122.03: Methods in Experimental Clinical Psychology
• PSYO 3131.03: Research Methods in Attention
• PSYO 3133.03: Research Methods in Memory
• PSYO 3134.03: Research Methods in Psycholinguistics
• PSYO 3137.03: Research Methods in Cognitive Neuroscience
• PSYO 3161.03: Measuring Behaviour
• PSYO 3165.03: Neuroethology
• PSYO 3370.03: Methods in Neurobiology
• PSYO 3371.03: Neuronal Organization Laboratory
• PSYO 3505.03: Neural Data Science
• PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill 3 credit hours of lab course requirement)

Plus, an additional nine credit hours of 3000/4000-level PSYO courses

4000 level

• PSYO 4501.03 and PSYO 4502.03: Honours Thesis and Qualifying Exam
• PSYO 3502.03: Statistical Methods II

Plus six credit hours of 4000-level seminar courses, selected from:

• PSYO 4000.03: Directed Reading
• PSYO 4001.03: Contemporary Issues in Psychology
• PSYO 4090.03: Development of Social Behaviour
• PSYO 4091.03: Social Determinants of Child Development
• PSYO 4092.03: Topics in Developmental Psychology
• PSYO 4120.03: Topics in Clinical Psychology
• PSYO 4130.03: Topics in Cognition
• PSYO 4140.03: Topics in Animal Learning
• PSYO 4160.03: Topics in Behavioural Biology
• PSYO 4196.03: Meta Analyses
• PSYO 4227.03: Neurological Basis of Psychopathology
• PSYO 4440.03: Topics in Infant Development
• PSYO 4740.03: Topics in the Neurobiology of Learning & Memory

Plus six additional credit hours of 3000/4000-level PSYO courses

Other regulations
• Laboratory courses focusing on human psychology typically require students to serve as participants and/or as experimenters in course projects. Students who do not wish to participate in such projects should ensure that they have the prerequisites necessary to register in alternative laboratory courses.
• Courses that are counted towards the Honours program requirements must be a minimum grade of C.

BSc or BA (120 credit hour) Combined Honours in Psychology and another subject

Students who wish to study Psychology in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be from any discipline in the Faculty of Science (other than Neuroscience), the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Psychology may be the primary subject (with a minimum of 45 credit hours beyond the 1000 level), or the secondary subject (30 credit hours).

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students complete an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Psychology, this requirement is satisfied through PSYO 4501.03 and PSYO 4502.03.

Departmental requirements

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ between the BA and BSc degrees. In addition, students in a Combined Honours program in Psychology and another subject must complete the following program requirements:

Psychology as the PRIMARY subject

1000 level
Introduction to Psychology and Neuroscience I and II (six credit hours):

• Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or equivalent) with grade of B- or better
• Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or equivalent) with grade of B- or better
  OR
  a B- in the Psychology component of SCIE 1506.09 and 1507.09: Integrated Science Program I and II, or equivalent

2000 level

• PSYO 2000.03: Methods in Experimental Psychology (with grade of B+ or better)
• PSYO 2501.03: Statistical Methods I
• PSYO 2470.03: Systems Neuroscience (or equivalent)

Plus, an additional nine credit hours, selected from:

• PSYO 2080.03: Social Psychology
• PSYO 2090.03: Developmental Psychology
• PSYO 2130.03: Introduction to Cognitive Psychology
• PSYO 2140.03: Learning
• PSYO 2150.03: Perceptual Processes
• PSYO 2160.03: Animal Behaviour
• PSYO 2220.03: Abnormal Behaviour
• PSYO 2444.03: Forensic Psychology
• PSYO 2570.03: Cellular Neuroscience

Note: It is recommended that PSYO 2000.03: Methods in Experimental Psychology and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000 level
Six credit hours of designated lab courses, selected from:

• PSYO 3051.03: Research Methods in Sensation and Perception
- PSYO 3082.03: Experimental Social Psychology
- PSYO 3091.03: Methods in Developmental Psychology
- PSYO 3122.03: Methods in Experimental Clinical Psychology
- PSYO 3131.03: Research Methods in Attention
- PSYO 3133.03: Research Methods in Memory
- PSYO 3134.03: Research Methods in Psycholinguistics
- PSYO 3137.03: Research Methods in Cognitive Neuroscience
- PSYO 3161.03: Measuring Behaviour
- PSYO 3165.03: Neuroethology
- PSYO 3370.03: Methods in Neurobiology
- PSYO 3371.03: Neuronal Organization Laboratory
- PSYO 3505.03: Neural Data Science
- PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill 3 credit hours of lab course requirement)

Plus, an additional six credit hours in 3000-/4000-level PSYO courses

4000 level

- PSYO 4501.03 and PSYO 4502.03: Honours Thesis and Qualifying Exam
- PSYO 3502.03: Statistical Methods II

Plus six credit hours of 4000-level seminar courses, selected from:

- PSYO 4000.03: Directed Reading
- PSYO 4001.03: Contemporary Issues in Psychology
- PSYO 4090.03: Development of Social Behaviour
- PSYO 4091.03: Social Determinants of Child Development
- PSYO 4092.03: Topics in Developmental Psychology
- PSYO 4120.03: Topics in Clinical Psychology
- PSYO 4130.03: Topics in Cognition
- PSYO 4140.03: Topics in Animal Learning
- PSYO 4160.03: Topics in Behavioural Biology
- PSYO 4196.03: Meta Analyses
- PSYO 4227.03: Neurological Basis of Psychopathology
- PSYO 4440.03: Topics in Infant Development
- PSYO 4740.03: Topics in the Neurobiology of Learning & Memory

Other regulations

- Laboratory courses focusing on human psychology typically require students to serve as participants and/or as experimenters in course projects. Students who do not wish to participate in such projects should ensure that they have the prerequisites necessary to register in alternative laboratory courses.
- Courses that are counted towards the Honours program requirements must be a minimum grade of C.

Psychology as the SECONDARY subject

1000 level
Introduction to Psychology and Neuroscience I and II (six credit hours):

- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or equivalent) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or equivalent) with grade of B- or better
  OR
  a B- in the Psychology component of SCIE 1506.09 and 1507.09: Integrated Science Program I and II, or equivalent

2000 level
• PSYO 2000.03: Methods in Experimental Psychology (with grade of B+ or better)
• PSYO 2501.03: Statistical Methods I
• PSYO 2470.03: Systems Neuroscience (or equivalent)

Plus, an additional nine credit hours, selected from:

• PSYO 2080.03: Social Psychology
• PSYO 2090.03: Developmental Psychology
• PSYO 2130.03: Introduction to Cognitive Psychology
• PSYO 2140.03: Learning
• PSYO 2150.03: Perceptual Processes
• PSYO 2160.03: Animal Behaviour
• PSYO 2220.03: Abnormal Behaviour
• PSYO 2570.03: Cellular Neuroscience

Note: It is recommended that PSYO 2000.03: Methods in Experimental Psychology and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000/4000 level
Three credit hours of designated lab courses, selected from:

• PSYO 3051.03: Research Methods in Sensation and Perception
• PSYO 3082.03: Experimental Social Psychology
• PSYO 3091.03: Methods in Developmental Psychology
• PSYO 3122.03: Methods in Experimental Clinical Psychology
• PSYO 3131.03: Research Methods in Attention
• PSYO 3133.03: Research Methods in Memory
• PSYO 3134.03: Research Methods in Psycholinguistics
• PSYO 3137.03: Research Methods in Cognitive Neuroscience
• PSYO 3161.03: Measuring Behaviour
• PSYO 3165.03: Neuroethology
• PSYO 3370.03: Methods in Neurobiology
• PSYO 3371.03: Neuronal Organization Laboratory
• PSYO 3505.03: Neural Data Science
• PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill 3 credit hours of lab course requirement)

Plus, an additional 15 credit hours in 3000-/4000-level PSYO courses

**BSc or BA (120 credit hour) Major in Psychology**

The 120 credit hour Major is suited to students who want to focus on Psychology, but wish to have a program that is somewhat less constrained than the Honours program. Psychology Majors complete a minimum of 42 credit hours in Psychology courses above the 1000 level. Research and other experiential learning opportunities are available through laboratories and research project classes.

Students should plan carefully and, if required, obtain advice from an academic advisor. Advisors can be consulted by contacting the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263 or (902) 494-3417) or by visiting the department's website.

**Departmental requirements**

All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections of this calendar. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Major program in Psychology must complete the following courses:

**1000 level**

- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or equivalent) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or equivalent) with grade of B- or better
OR
a B- in the Psychology component of SCIE 1506.09 and 1507.09: Integrated Science Program I and II, or equivalent

2000 level

- PSYO 2000.03: Methods in Experimental Psychology
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)

Plus, an additional nine credit hours, selected from:

- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2220.03: Abnormal Behaviour
- PSYO 2444.03: Forensic Psychology
- PSYO 2570.03: Cellular Neuroscience

Note: It is recommended that PSYO 2000.03: Methods in Experimental Psychology and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000/4000 level

Three credit hours of designated lab courses, selected from:

- PSYO 3051.03: Research Methods in Sensation and Perception
- PSYO 3082.03: Experimental Social Psychology
- PSYO 3091.03: Methods in Developmental Psychology
- PSYO 3122.03: Methods in Experimental Clinical Psychology
- PSYO 3131.03: Research Methods in Attention
- PSYO 3133.03: Research Methods in Memory
- PSYO 3134.03: Research Methods in Psycholinguistics
- PSYO 3137.03: Research Methods in Cognitive Neuroscience
- PSYO 3161.03: Measuring Behaviour
- PSYO 3165.03: Neuroethology
- PSYO 3370.03: Methods in Neurobiology
- PSYO 3371.03: Neuronal Organization Laboratory
- PSYO 3505.03: Neural Data Science
- PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill 3 credit hours of lab course requirement)

Additional 21 credit hours of 3000/4000-level PSYO courses

**BSc or BA (120 credit hour) Double Major in Psychology and another subject**

The Double Major degree program allows students to combine a study of Psychology with another subject. The other subject may be from any discipline in the Faculty of Science (other than Neuroscience), the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. A Double Major in Psychology requires 30 credit hours beyond the 1000 level. Psychology may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

Students enrolled in a Double Major program must have their program of study approved by advisors in both subject areas.

*Departmental requirements*
All students must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees. In addition, students in a Double Major program in Psychology and another subject must complete the following:

Psychology as the PRIMARY or SECONDARY subject (same requirements for both options)

1000 level

- Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or equivalent) with grade of B- or better
- Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or equivalent) with grade of B- or better
  OR
  a B- in the Psychology component of SCIE 1505.18: Integrated Science Program, or equivalent

2000 level

- PSYO 2000.03: Methods in Experimental Psychology
- PSYO 2501.03: Statistical Methods I
- PSYO 2470.03: Systems Neuroscience (or equivalent)

Additional nine credit hours selected from:

- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2220.03: Abnormal Behaviour
- PSYO 2444.03: Forensic Psychology
- PSYO 2570.03: Cellular Neuroscience

Note: It is recommended that PSYO 2000.03: Methods in Experimental Psychology and PSYO 2501.03: Statistical Methods I be taken concurrently.

3000/4000 level
Three credit hours of designated lab courses, selected from:

- PSYO 3051.03: Research Methods in Sensation and Perception
- PSYO 3082.03: Experimental Social Psychology
- PSYO 3091.03: Methods in Developmental Psychology
- PSYO 3122.03: Methods in Experimental Clinical Psychology
- PSYO 3131.03: Research Methods in Attention
- PSYO 3133.03: Research Methods in Memory
- PSYO 3134.03: Research Methods in Psycholinguistics
- PSYO 3137.03: Research Methods in Cognitive Neuroscience
- PSYO 3161.03: Measuring Behaviour
- PSYO 3165.03: Neuroethology
- PSYO 3370.03: Methods in Neurobiology
- PSYO 3371.03: Neuronal Organization Laboratory
- PSYO 3505.03: Neural Data Science
- PSYO 3100.03/3101.03: Independent Research Project (Note: PSYO 3100/3101 full-year Independent Research Project may only be used to fulfill 3 credit hours of lab course requirement)

An additional 15 credit hours of 3000-/4000-level PSYO courses

BSc or BA (90 credit hour) Minor in Psychology
The 90 credit hour degree with a Minor in Psychology is appropriate for students who want to study some Psychology but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general Science degree with some specialization in Psychology. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Psychology is usually the preferred option for students who wish to combine studies in Psychology with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program below).

See the Minor in Psychology section of this Calendar.

**Minor in Psychology**

This Minor is available to non-Neuroscience/Psychology students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Science) program.

A BSc or BA (90 credit hour) degree program with a Minor in Psychology is also available.

**Requirements**

- A minimum of 18 to a maximum of 36 credit hours in Psychology courses at the 2000 level or higher, other than PSYO 2000.03: Methods in Experimental Psychology and PSYO 2501.03: Statistical Methods I, which are restricted to students in a Major/Honours program.

Please note that entry into upper level Psychology (PSYO) courses requires completion of six credit hours, with a minimum grade of B-, at the first year level:

Introduction to Psychology and Neuroscience I: From Neuron to Person (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and

Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03)

or SCIE 1506.09 and 1507.09: Integrated Science Program I and II, or equivalent.

Contact Psychology for more information.

**Co-op, Minors, Certificates and Engineering Concurrent Programs for Students**

**Minors available to students in Psychology**

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs (including Science Co-op).

Students in a BSc or BA (120 credit hour) program in Psychology may choose to include a Minor selected from the list of approved Minors (except Neuroscience). Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

**Certificates**

In combination with a BSc or BA in Psychology, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to student enrolled in a BSc or BA in Psychology include:
Certificate in Animal Behaviour (Biology, Psychology and Neuroscience)
Certificate in Science Leadership and Communication
Certificate in Neurotechnology

BSc/BEng or BA/BEng Concurrent Program
Students interested in combining their interest in Psychology with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Psychology and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Psychology and from the Faculty of Engineering in their first year of study.

Required Psychology courses for a BSc/BEng or BA/BEng program in Psychology

1000 level

- Introduction to Psychology and Neuroscience I and II (six credit hours):
  - PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 (with grade of B- or better)
  - PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03 (with grade of B- or better)
  OR
  - A minimum of 18 credit hours in Psychology courses at the 2000 level or higher, other than PSYO 2000.03 and PSYO 2501.03, which are restricted to students in the Major and Honours programs.

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non-credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the department's website.

Course Notes
Students going on in Psychology are recommended to take Introduction to Psychology I and II courses with the lab component.

4000-Level Seminars

These seminars are intended for fourth-year Honours students. Third-year Honours students are eligible provided they obtain permission from the instructor, and the needs of all the fourth-year Honours students have been met. Courses offered and the topics covered vary from year to year. Go to the departmental website (www.dal.ca/psychandneuro) for more detail about course offerings and the topics to be covered in the current academic year.

Course Descriptions

PSYO 1011 Introduction to Psychology and Neuroscience I: From Neuron to Person
CREDIT HOURS: 3
Material covered includes historical background, research methodology, neural mechanisms that underlie behaviour, sensory and perceptual processes, states of consciousness, learning, and memory. The course is taught by several different instructors with expertise in the topics covered. Biweekly labs add depth to the material covered in lectures.

CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) AND Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03). COORDINATOR: L. Stevens
EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1021.03, PSYO 1031.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1502X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.36, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1505X/Y.18, SCIE 1506.03 and SCIE 1507.03
PSYO 1012 Introduction to Psychology and Neuroscience I: From Neuron to Person
CREDIT HOURS: 3
This course extends the coverage offered in PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and includes material on development, cognition, intelligence, motivation, personality, social behaviour, and psychopathology. The course is taught by one or two different instructors with expertise in the topics covered. Biweekly labs add depth to the material covered in lectures.
CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) and Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).
COORDINATOR: L. Stevens
EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1022.03, PSYO 1032.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1505X/Y.18, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1506.03.03, SCIE 1506.03.18, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.03, SCIE 1540X/Y.27, SCIE 1506.03 and SCIE 1507.03.
FORMATS: Lecture | Lab

PSYO 1022 Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology
CREDIT HOURS: 3
This course extends the coverage offered in PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and includes material on development, cognition, intelligence, motivation, personality, social behaviour, and psychopathology. The course is taught by one or two different instructors with expertise in the topics covered. This course has no accompanying laboratory/tutorial.
CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) and Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).
EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1012.03, PSYO 1022.03, PSYO 1032.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27, SCIE 1506.03 and SCIE 1507.03.
FORMATS: Lecture

PSYO 1032 Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology
CREDIT HOURS: 3
This course extends the coverage offered in PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and includes material on development, cognition, intelligence, motivation, personality, social behaviour, and psychopathology. The course is taught by one or two different instructors with expertise in the topics covered. Recorded lectures, lab activities and write-ups, quizzes, and discussion will be delivered through the University's learning management system.
CALENDAR NOTES: To enrol in 2000-level Psychology courses, a grade of B- is required in Intro to Psychology I (PSYO 1011.02 or PSYO 1021.03 or PSYO 1031.03) and Intro to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03).
EXCLUSIONS: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1012.03, PSYO 1022.03, PSYO 1032.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1505X/Y.18, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.03, SCIE 1540X/Y.27, SCIE 1506.03 and SCIE 1507.03.
FORMATS: Online Delivery
PSYO 2000 Methods in Experimental Psychology and Neuroscience
CREDIT HOURS: 3
This course provides a thorough grounding in scientific research methods used by experimental psychologists and neuroscientists. Lectures explore concepts, methods, and analytic tools employed to investigate human and animal behaviour and neurophysiology. Students also complete assignments and write reports on a series of supervised laboratory experiments to illustrate concepts presented in lectures.
CALENDAR NOTES: Restricted to students registered in Psychology programs. It is highly recommended that students take PSYO 2501.03, Statistical Methods I, concurrently with PSYO 2000.03. Students must attend the first lecture session.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: NESC 2000.03
EXCLUSIONS: NESC 2007.03
FORMATS: Lecture | Lab

PSYO 2080 Social Psychology
CREDIT HOURS: 3
The course undertakes a critical analysis of social theory and research promoting a close and skeptical evaluation of our knowledge, our obedience and rebellion, our affections and hostilities, our willingness to help and injure, our attempts to explain ourselves and others, our erotic orientations, and our gender roles.
PREREQUISITES: PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03, OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
FORMATS: Lecture

PSYO 2090 Developmental Psychology
CREDIT HOURS: 3
People change with age. This course examines the changes that occur in humans from conception through adolescence. Biological, social, cognitive, and linguistic aspects of development are considered. Theory, research, and practical implications are integrated throughout the course.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
FORMATS: Lecture

PSYO 2130 Introduction to Cognitive Psychology
CREDIT HOURS: 3
Lectures focus on the processes involved in transforming sensory information into the meaningful everyday world that we know. Initially, emphasis is on the visual system, and how information within that system is structured and organized, followed by a consideration of the character of internal representations used in thinking and remembering.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: NESC 2130.03
FORMATS: Lecture

PSYO 2140 Learning: Conditioning and Motivation
CREDIT HOURS: 3
Lectures focus on several goals: (1) providing general principles of learning; (2) understanding the behaviour of particular species; (3) direct application to human problems. Emphasis is on understanding why researchers in animal learning do what they are currently doing (given the goals and the historical context).
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
CROSSLISTED: NESC 2140.03
FORMATS: Lecture

PSYO 2150 Perceptual Processes
CREDIT HOURS: 3
Perception deals with the way in which our senses provide us with information about our environment. This course focuses on the process by which sensory experiences are coded, how they are interpreted by the nervous system, and how experience modifies perception.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
PSYO 2160 Animal Behaviour
CREDIT HOURS: 3
Using concepts from behavioural biology and psychology, animal behaviourists attempt to explain why animals behave the way they do. The course examines topics such as mating and social systems, mate choice, the evolution of behaviour, and animal communication. The behaviour of a wide range of animals is studied.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03), each with a grade of B- or better; OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18), each with a grade of B- or better; OR BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, each with a grade of C or better.
CROSSLISTED: NESC 2160.03
FORMATS: Lecture

PSYO 2220 Adult Psychopathology
CREDIT HOURS: 3
This course provides an introduction to adult psychopathology. Diagnostic criteria and evidence on etiology and treatment of the major mental health disorders within adulthood are discussed. Historical, social, cultural, and contextual aspects of adult psychopathology are examined and current research in the field is highlighted.
PREREQUISITES: PSYO 1011.03 (or PSYO 1021.03 or PSYO 1031.03) and PSYO 1012.03 (or PSYO 1022.03 or PSYO 1032.03); OR SCIE 1506.09/1507.09 (or SCIE1505X/Y.18). All prerequisite courses must have a grade of B- or better.
FORMATS: Lecture

PSYO 2444 Forensic Psychology
CREDIT HOURS: 3
This course provides an introduction to the application of psychology to the various areas of the criminal justice system (i.e., court, corrections, policing). In addition, consideration is given to the professional and ethical issues that arise when psychological knowledge is applied in forensic contexts.
PREREQUISITES: PSYO 1011.03 (or equivalent) and PSYO 1012.03 (or equivalent) with grade of B- or higher in both
EXCLUSIONS: PSYO 3224
FORMATS: Lecture

PSYO 2470 Systems Neuroscience
CREDIT HOURS: 3
This course provides an introduction to the functional systems of the brain. We examine neural systems (e.g., the sensory systems, motor system, neurotransmitter-specific systems) individually. We explore their anatomy and function, neurobiological properties that make each unique, and factors that are common to all neural systems (e.g., development and plasticity).
CALENDAR NOTES: Restricted to students registered in Psychology or Neuroscience Major or Honours programs.
PREREQUISITES: Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better, or SCIE 1505X/Y.18 with a grade of B- or better.
CROSSLISTED: NESC 2470.03
RESTRICTIONS: Restricted to students registered in Psychology or Neuroscience Major or Honours programs.
EXCLUSIONS: PHYL 2041.03, PSYO 2770.03
FORMATS: Lecture

PSYO 2501 Statistical Methods I
CREDIT HOURS: 3
This course provides an introduction to research design and statistics within Neuroscience and Psychology. Particular emphasis is placed on conducting and interpreting various statistical procedures, including descriptive and inferential statistics (z-test, t-test, ANOVA, chi-square tests), frequently used in these fields.
CALENDAR NOTES: Only students undertaking a Major or Honours degree in Psychology or Neuroscience are eligible for enrolment. This course does not fulfil any part of the Faculty of Science Mathematics requirement.
COREQUISITES: PSYO 2000.03 or NESC 2007.03 or instructor’s consent
EXCLUSIONS: PSYO 3501.03
FORMATS: Lecture
**PSYO 2570 Cellular Neuroscience**

**CREDIT HOURS:** 3

This course explores the brain at the neuronal level. Material covered includes: the ionic basis of resting potentials; the electrical activity of neurons; synaptic transmission and plasticity; synthesis and action of synaptic transmitters; and drug actions. Cellular phenomena relevant to healthy and neurologically-dysfunctional systems are also discussed.

**PREREQUISITES:** Introduction to Psychology I (PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03) and Introduction to Psychology II (PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03) EACH with a grade of B- or better, or Principles of Biology I (BIOL 1010.03 or BIOL 1020.03) and Principles of Biology II (BIOL 1011.03 or BIOL 1021.03) EACH with a grade of B- or better, OR SCIE 1506.09 and SCIE 1507.09 EACH with a grade of B- or better, or SCIE 1505X/Y.18 with a grade of B- or better.

**CROSSLISTED:** NESC 2570.03, PHYL 2570.03

**FORMATS:** Lecture

---

**PSYO 3001 Directed Project in Psychology**

**CREDIT HOURS:** 3

Students work on single-term project under the supervision of faculty advisor. Requirements include a minimum grade of B in PSYO 2000.03, an overall B+ (GPA 3.30) average in all other Psychology courses, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. Coordinator permission required - contact: pnistud@dal.ca

**CALENDAR NOTES:** This course provides 3-credit hours of directed research. Students wanting a full-year research experience in a single lab with single project, should register for PSYO 3100.03 and PSYO 3101.03.

**PREREQUISITES:** PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, or PSYO 2502.03, previous or concurrent enrolment in two other Psychology or Neuroscience 3000-level courses, and Coordinator's consent.

**CROSSLISTED:** NESC 3001.03

**EXCLUSIONS:** PSYO 3000.06, NESC 3000.06, PSYO 3100.03, PSYO 3101.03, NESC 3100.03, NESC 3101.03

**FORMATS:** Lab

---

**PSYO 3002 Directed Research in Psychology**

**CREDIT HOURS:** 3

Students work on single-term project under the supervision of faculty advisor. Requirements include a minimum grade of B in PSYO 2000.03 (or NESC 2000.03), an overall B+ (GPA 3.30) average in all other Psychology courses, and securing a faculty advisor to supervise the research project. Note: This course cannot be used to fulfill the department's research laboratory requirement. Coordinator permission required - contact: pnistud@dal.ca

**CALENDAR NOTES:** This course provides 3-credit hours of directed research. Students wanting a full-year research experience in a single lab with single project, should register for PSYO 3100.03 and PSYO 3101.03.

**PREREQUISITES:** PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, previous or concurrent enrolment in two other Psychology or Neuroscience 3000-level courses, and Coordinator's consent.

**CROSSLISTED:** NESC 3002.03

**EXCLUSIONS:** PSYO 3000.06, NESC 3000.06, PSYO 3100.03, PSYO 3101.03, NESC 3100.03, NESC 3101.03

**FORMATS:** Lab

---

**PSYO 3011 Experiential Learning in Science Communication I**

**CREDIT HOURS:** 3

An experiential learning class for suitably-qualified senior students. This is a fundamentally ‘learn by doing’ course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO 1011.03 and PSYO 1012.03 lab groups (approx. 25 students), SIGNATURE REQUIRED.

**CALENDAR NOTES:** This course must be taken in the same academic year as PSYO 3012.03 and no credit can be given for one course without the other. A grade will be given for PSYO 3011.03 only after PSYO 3012.03 is completed.

**PREREQUISITES:** B+ or better in PSYO 2000.03 (or equivalent), advanced courses in Psychology or Neuroscience, and Instructor’s consent.

**CROSSLISTED:** NESC 3011.03

**EXCLUSIONS:** NESC 3010.06

**FORMATS:** Lecture | Lab | Seminar

---

**PSYO 3012 Experiential Learning in Science Communication II**

**CREDIT HOURS:** 3

An experiential learning class for suitably-qualified senior students. This is a fundamentally ‘learn by doing’ course in which students have the opportunity to develop and consolidate teaching and communications skills in Psychology and Neuroscience. Students develop these skills through a series of communication-based projects, in-class instruction, and preparing, delivering, and marking lab materials for PSYO 1011.03 and PSYO 1012.03 lab groups (approx. 25 students), SIGNATURE REQUIRED.

**CALENDAR NOTES:** This course must be taken after, and in conjunction with, PSYO 3011.03 in the same academic year and no credit can be given for one course without the other. A grade will be given for PSYO 3011.03 only after PSYO 3012.03 is completed.

**PREREQUISITES:** PSYO 3011.03

**CROSSLISTED:** NESC 3012.03

**EXCLUSIONS:** PSYO 3010.06
**PSYO 3043 Neurobiology of Learning**  
**CREDIT HOURS: 3**  
This course examines the neurobiological processes underlying various forms of learning such as classical and operant conditioning, song learning by birds, spatial learning, and fear conditioning. Different methods used to study the neurobiology of learning, and the evolutionary origins of these systems are also considered.  
**PREREQUISITES:** PSYO 2470.03/NESC 2470.03 or PSYO 2770.03 or PHYL 2041.03  
**CROSSLISTED:** NESC 3043.03  
**EXCLUSIONS:** PSYO 3043.03  
**FORMATS:** Lecture

**PSYO 3044 Laboratory Methods of Learning and Conditioning**  
**CREDIT HOURS: 3**  
A hands-on course on techniques used to test learning and memory in animals, including operant conditioning and spatial memory, and an exposure to the neurobiological systems involved. Students work in pairs to conduct a series of experiments, analyze data as a class, but write individual laboratory reports on each experiment.  
**CALENDAR NOTES:** Students should be aware that some data collection occurs outside of class time.  
**PREREQUISITES:** PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and one of PSYO 2140.03/NESC 2140.03 or PSYO 2470.03/NESC 2470.03 or PSYO 2770.03  
**CROSSLISTED:** NESC 3044.03  
**EXCLUSIONS:** PSYO 3042.03  
**FORMATS:** Lab

**PSYO 3051 Research Methods in Sensation and Perception**  
**CREDIT HOURS: 3**  
A hands-on course that explores sensory perception with an emphasis on data collection, analysis, and interpretation. Several methodologies are used across the different senses to study perception and its neural underpinnings.  
**CALENDAR NOTES:** Students should be aware that some data collection may occur outside of class time.  
**PREREQUISITES:** PSYO 2000.03 or NESC 2000.03, PSYO 2470.03/NESC 2470.03, and PSYO 2150.03/NESC 2150.03  
**CROSSLISTED:** NESC 3051.03  
**FORMATS:** Lecture | Lab

**PSYO 3052 Sensory Neuroscience II Hearing and Speech**  
**CREDIT HOURS: 3**  
This course explores hearing at levels that include stimulus parameters and their psychophysical correlates, middle ear function, cochlear biophysics, central auditory neurophysiology, and principles of speech perception. We emphasize mechanisms of normal hearing and speech, but address pathology wherever it helps us understand the relation between neurophysiology and perception.  
**PREREQUISITES:** PSYO 2000.03 or NESC 2007.03, and PSYO 2470.03/NESC 2470.03  
**CROSSLISTED:** NESC 3052.03  
**FORMATS:** Lecture

**PSYO 3060 Psychological Perspectives of Sex & Gender**  
**CREDIT HOURS: 3**  
Students will explore how the different areas of psychology understand, inform, and at times contradict, knowledge of and diversity in sex and gender.  
**PREREQUISITES:** PSYO 1011.03 and PSYO 1012.03  
**FORMATS:** Lecture | Discussion

**PSYO 3082 Experimental Social Psychology**  
**CREDIT HOURS: 3**  
This course attempts to develop students' skill level in empirical analysis of social psychology phenomena. Students complete two research projects during the term. The projects involve testing subjects, coding data, computer data analysis, and report writing. Familiarity with computer-based statistical analysis and text processing is strongly recommended.  
**PREREQUISITES:** PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and PSYO 2080.03  
**FORMATS:** Lecture | Lab
PSYO 3084 Social Cognition  
CREDIT HOURS: 3  
This course focuses on the understanding people develop of themselves and others as social beings. The contributions of evolution, historical, and cultural factors are considered. The ways in which human development of social perception and cognition differs from that of other species are also examined. 
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and one of PSYO 2080.03 or PSYO 2090.03 or PSYO 2220.03  
FORMATS: Lecture

PSYO 3091 Methods in Developmental Psychology  
CREDIT HOURS: 3  
This course provides a survey of research methods in developmental psychology. It assumes knowledge of basic methodology and design, and concentrates on methods of relevance to the study of human development. In addition to lectures, students conduct a number of research exercises to gain experience in conducting research with children. 
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and PSYO 2090.03  
FORMATS: Lecture | Lab

PSYO 3092 Early Development  
CREDIT HOURS: 3  
This course examines development in infancy and the preschool period. The main theme of the course is to examine the integration of perceptual, cognitive, emotional, social, and linguistic changes occurring during the first five years of life. 
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2090.03  
FORMATS: Lecture

PSYO 3093 Development of Language and Literacy Abilities  
CREDIT HOURS: 3  
This course examines the cognitive and linguistic processes underlying language acquisition and how they interact in influencing the development of language and literacy abilities. 
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, and PSYO 2090.03  
FORMATS: Lecture

PSYO 3100 Independent Research in Psychology I  
CREDIT HOURS: 3  
Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in PSYO 2000.03/NESC 2000.03, a high level of performance in other Psychology courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED. Contact: pnistad@dal.ca  
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 3101.03 and no credit can be given for one course without the other. The work undertaken in PSYO 3101.03 should be a continuation of that initiated in PSYO 3100.03. A grade will be given for PSYO 3100.03 only after PSYO 3101.03 is completed. 
PREREQUISITES: PSYO 2000.03 or NESC 2000.03 and PSYO 2501.03  
CROSSLISTED: NESC 3100.03  
RESTRICTIONS: Restricted to Psychology Majors and Honours Students  
EXCLUSIONS: PSYO 3001.03, PSYO 3000.06  
FORMATS: Lab | Experiential Learning

PSYO 3101 Independent Research in Psychology II  
CREDIT HOURS: 3  
Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in PSYO 2000.03/NESC 2000.03, a high level of performance in other Psychology courses, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project. SIGNATURE REQUIRED.  
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 3100.03 and no credit can be given for one course without the other. The work undertaken in PSYO 3101.03 should be a continuation of that initiated in PSYO 3100.03. A grade will be given for PSYO 3100.03 only after PSYO 3101.03 is completed. 
PREREQUISITES: PSYO 3100.03 and Coordinator's consent  
CROSSLISTED: NESC 3101.03  
RESTRICTIONS: Restricted to Psychology Majors and Honours Students  
EXCLUSIONS: PSYO 3000.06, PSYO 3001.03  
FORMATS: Lab | Experiential Learning
PSYO 3122 Methods in Experimental Clinical Psychology
CREDIT HOURS: 3
Students learn how to conduct research on topics in applied clinical psychology. Students conduct a series of research projects in the laboratory by serving both as subjects and experimenters, and analyze the results of these studies in written lab reports. Research studies serve to illustrate concepts discussed in class.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03, PSYO 2501.03, and PSYO 2220.03
FORMATS: Lecture | Lab

PSYO 3129 Childhood Psychopathology
CREDIT HOURS: 3
This course examines a wide range of mental health disorders in children (e.g., reading disability, autism, ADHD). The goal is to gain a better understanding of the nature of these disorders, to learn about evidence-based assessment and treatment, and to review research findings in relation to children’s mental health.
PREREQUISITES: PSYO 2000.03 or NESC 2000.03; PSYO 2220.03 is recommended
FORMATS: Lecture

PSYO 3131 Research Methods in Attention
CREDIT HOURS: 3
The methods, findings, and theories that underpin our understanding of attention (alertness, preparation, selection, and control of information processing) are covered. Behavioural and neuroscientific evidence as well as computational models are examined in the lectures. Laboratories emphasize behavioural methods used to isolate and reveal the components of attention.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, PSYO 2501.03, and PSYO 2130.03/NESC 2130.03 or PSYO 2150.03/NESC 2150.03
CROSSLISTED: NESC 3131.03
EXCLUSIONS: PSYO/NESC 3130.06
FORMATS: Lecture | Lab

PSYO 3132 Research Methods in Visual Cognition
CREDIT HOURS: 3
Visual cognition is the study of how we extract meaning from our visual environment and use it to direct our behaviour. Emphasis is placed on object, face, and word recognition as revealed by normal behaviour, and by neuroimaging techniques and neuropsychological studies of brain-damaged individuals who have lost these recognition abilities.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and PSYO 2130.03/NESC 2130.03 or PSYO 2150.03/NESC 2150.03
CROSSLISTED: NESC 3132.03
EXCLUSIONS: PSYO/NESC 3130.06
FORMATS: Lecture | Lab

PSYO 3133 Research Methods in Memory
CREDIT HOURS: 3
This course examines human memory from the perspective of cognitive psychology and, to a lesser extent, cognitive neuroscience. Lectures emphasize cognitive approaches to the study of memory with an explicit focus on empirical research methods, data, and interpretation of results.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2501.03, and PSYO 2130.03/NESC 2130.03
CROSSLISTED: NESC 3133.03
EXCLUSIONS: PSYO 3130.06/NESC 3130.06
FORMATS: Lecture | Lab

PSYO 3134 Research Methods in Psycholinguistics
CREDIT HOURS: 3
Provides hands-on experience with various methodologies employed in the study of language processing, and uses these to explore topics in psycholinguistics in greater depth. Methods covered may include reaction time, priming, self-paced reading, computational modeling, corpus-based research, and event-related brain potentials. Students serve as experimenters and participants in class experiments.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03, and PSYO 3190.03/NESC 3190.03
CROSSLISTED: NESC 3134.03
EXCLUSIONS: PSYO 3130.06/NESC 3130.06
FORMATS: Lecture | Lab

PSYO 3137 Research Methods in Cognitive Neuroscience
PSYO 3161 Measuring Behaviour
CREDIT HOURS: 3
Measuring behaviour is essential in the study of ethology, behavioural neuroscience, developmental, social and clinical psychology. The function of this laboratory course is to teach methods of observing and scoring behaviour using qualitative and quantitative methods. Sampling methods, behaviour description and analysis will be done in laboratory and naturalistic settings.
PREREQUISITES: PSYO 2000.03/NESC 2000.03
CROSSLISTED: NESC 3161.03
FORMATS: Lab

PSYO 3162 Advanced Animal Behaviour: Theories and Applications
CREDIT HOURS: 3
This course focuses on advanced theories and applications of animal behaviour, with a focus on proximate, integrative and applied questions. It offers a more in-depth analysis of topics covered in PSYO 2160.03/NESC 2160.03 and explores trends and issues in contemporary ethology, animal psychology and behavourial ecology.
PREREQUISITES: PSYO 2000.03/NESC 2000.03 or BIOL 3062.03 or BIOL 3630.03, and PSYO 2160.03/NESC 2160.03
CROSSLISTED: NESC 3162.03
FORMATS: Lecture

PSYO 3165 Neuroethology
CREDIT HOURS: 3
Neuroethology explores how assemblies of neurons produce behaviour. The course typically uses a mix of simple model systems, including live animals (e.g., earthworms), visual systems, and robotics to examine how nervous systems produce behaviour.
CALENDAR NOTES: All experiments in the accompanying lab involve invertebrates. Students are required to handle invertebrates during the lab.
PREREQUISITES: PSYO 2570.03/NESC 2570.03, and either PSYO 2000.03 or NESC 2000.03 or BIOL 2020.03
CROSSLISTED: NESC 3165.03
FORMATS: Lab

PSYO 3170 Hormones and Behaviour
CREDIT HOURS: 3
This course examines how chemical signals of the neural, endocrine, and immune systems interact to influence the brain and behaviour and how neurotransmitters, cytokines, and hormones control neural and behavioural development, sexual, aggressive, and maternal behaviour. Hormone receptors in the brain, reproduction, puberty, brain sex differences, and stress are also examined.
PREREQUISITES: PSYO 2470.03/NESC 2470.03 or PHYL 2041.03
CROSSLISTED: NESC 3170.03
EXCLUSIONS: PSYO 2170.03/NESC 2170.03

PSYO 3180 Psychoneuroimmunology/Ecological Immunology
CREDIT HOURS: 3
Our behaviour can influence how well we resist disease, and infection can alter behaviour. This course examines how immune systems and nervous systems interact in both vertebrates and invertebrates. Evolutionary forces that have led to the existence of these interactions are also examined.
PREREQUISITES: BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, and one of PSYO 2770.03 or PSYO 2470.03/NESC 2470.03 or PHYL 2041.03 or MICI 2100.03; OR BIOL 2020.03
CROSSLISTED: NESC 3180.03
FORMATS: Lecture

PSYO 3190 Psycholinguistics
CREDIT HOURS: 3
Explores the cognitive and neural bases of human language processing. Topics include: human language and other communication systems; phonology; morphology; semantics; syntax; discourse; first and second language acquisition; relationship of language to general cognitive functions such as music and
mathematics; signed languages such as American Sign Language; and non-linguistic gesture.

**PREREQUISITES:** PSYO 2000.03/NESC 2000.03 and PSYO 2130.03/NESC 2130.03

**CROSSLISTED:** NESC 3190.03

**EXCLUSIONS:** PSYO/NESC 2190.03

**FORMATS:** Lecture

**PSYO 3220 Clinical Psychology**

**CREDIT HOURS:** 3

A survey of professional issues relevant to the practice of clinical psychology in hospitals, private practice, schools, the court system, and the community. Students gain knowledge about psychological services, and an understanding of the training, ethics, and expertise that clinical psychology brings to the delivery of mental health and healthcare.

**PREREQUISITES:** PSYO 2000.03/NESC 2000.03, and PSYO 2220.03

**EXCLUSIONS:** PSYO 2120.03

**FORMATS:** Lecture

**PSYO 3224 Forensic Psychology**

**CREDIT HOURS:** 3

This course provides an introduction to the application of psychology to the various areas of the criminal justice system (i.e., courts, corrections, policing). In addition, consideration is given to professional and ethical issues that arise when psychological knowledge is applied in forensic contexts.

**PREREQUISITES:** PSYO 1011.03 or PSYO 1021.03 or PSYO 1031.03 and PSYO 1012.03 or PSYO 1022.03 or PSYO 1032.03, or SCIE 1505X/Y.18, SCIE 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27 (with a grade of B- or better), AND any 2000-level Psychology class, or PHYL 2041.03 or SOSA 2503.03

**EXCLUSIONS:** PSYO 2444

**FORMATS:** Lecture

**PSYO 3225 Health Psychology**

**CREDIT HOURS:** 3

A study of psychological influences on how people stay healthy and how they respond when they become ill. Using a biopsychosocial model, this course examines topics such as health behaviours and prevention, stress and coping, the patient in treatment settings, and management of chronic and terminal illness.

**PREREQUISITES:** PSYO 2000.03/NESC 2000.03, and PSYO 2220.03

**FORMATS:** Lecture

**PSYO 3227 Principles of Human Neuropsychology**

**CREDIT HOURS:** 3

Clinical neuropsychologists study the organization of cognitive, emotional, and social functions in the brain to understand how brain damage alters human behaviour across the lifespan. We examine how clinicians diagnose and rehabilitate persons with brain diseases and disorders. Assignments emphasize application of textbook/lecture-based knowledge, critical thinking, and group presentation skills.

**PREREQUISITES:** NESC 2470.03/PSYO 2470.03 or PSYO 2770.03 or PHYL 2041.03, NESC/PSYO 2130.03 is recommended

**CROSSLISTED:** NESC 3227.03

**FORMATS:** Lecture

**PSYO 3237 Drugs and Behaviour**

**CREDIT HOURS:** 3

An introduction to behavioural psychopharmacology. The lectures involve basic anatomy, physiology, and chemistry of the nervous system. Behavioural effects and underlying mechanisms of various psychoactive drugs are discussed. Specific topics covered are alcohol, tobacco, amphetamines, cocaine, opiates, hallucinogens, tranquilizers, and antipsychotic drugs.

**PREREQUISITES:** PSYO 2000.03/NESC 2000.03, and PSYO 2470.03/NESC 2470.03 or PSYO 2570.03/NESC 2570.03

**CROSSLISTED:** NESC 3237.03

**FORMATS:** Lecture

**PSYO 3260 Biological Rhythms**

**CREDIT HOURS:** 3

Daily (circadian) clocks generate rhythms in many functions, including sleep, reproduction, and intellectual performance. This course examines the nature of these biological clocks, their neural mechanisms, and their roles in regulating sleep and other aspects of physiology and in pathological conditions, including sleep disorders, jet lag, and psychiatric disorders.

**PREREQUISITES:** PSYO 2000.03/NESC 2000.03 OR BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, and PSYO 2470.03/NESC 2470.03
PSYO 3264 The Science of Sleep
CREDIT HOURS: 3
This course reviews the history, methods and results of the scientific study of sleep. Topics include: circadian and homeostatic regulation; developmental and cultural impacts; normal and abnormal function of neural and other control mechanisms; effects of sleep loss on performance and health; theories of the functions of sleep.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2470.03/NESC 2470.03; OR BIOL 2020.03
CROSSLISTED: NESC 3264.03
FORMATS: Lecture

PSYO 3270 Developmental Neuroscience
CREDIT HOURS: 3
This course presents the fundamentals of development in complex and simple nervous systems. Cell differentiation, pattern regulation, proliferation, migration, and circuit development are discussed. Special attention is given to later developmental events such as neuronal growth cones, cell death, growth factors, neuron-target interactions, and synapse formation.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2470.03/NESC 2470.03 and PSYO 2570.03/NESC 2570.03
CROSSLISTED: NESC 3270.03
FORMATS: Lecture

PSYO 3280 Personality
CREDIT HOURS: 3
Personality deals with questions such as: Is a science of persons possible? Are there types of personalities, or is each individual's personality unique? Is an individual's life history an expression of his or her personality, or is personality description merely a summary statement of behaviour whose cause lies elsewhere?
PREREQUISITES: PSYO 2000.03/NESC 2000.03, and one of PSYO 2080.03 or PSYO 2090.03 or PSYO 2220.03
FORMATS: Lecture

PSYO 3370 Advanced Methods in Neurobiology
CREDIT HOURS: 3
Introduction to several neurophysiological techniques used in contemporary neuroscience, employing extracellular and intracellular electrical recording and stimulation methods on nervous system preparations, both sensory and motor. After introductory instruction, students in groups of 2 or 3 get to perform quite sophisticated practical experiments themselves, enabled by computer-based data acquisition.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, PSYO 2470.03/NESC 2470.03 and PSYO 2570.03/NESC 2570.03
CROSSLISTED: NESC 3370.03
FORMATS: Lab

PSYO 3371 Neuronal Organization Laboratory
CREDIT HOURS: 3
Introduction to several techniques used in contemporary neuroscience. Students work under supervision in groups of 2 or 3 in regular labs that introduce neuroanatomical analyses using the following: Golgi impregnation, immunocytochemistry, dye-tracing of connections, electronmicroscopy of the retina, and neurotransmitter determinations using HPLC.
PREREQUISITES: PSYO 2000.03/NESC 2000.03, PSYO 2470.03/NESC 2470.03 and PSYO 2570.03/NESC 2570.03
CROSSLISTED: NESC 3371.03
FORMATS: Lab

PSYO 3390 Cognitive Development
CREDIT HOURS: 3
In this course we trace the development of the child's knowledge from birth to adolescence. Piaget's theory provides the background for the study of recent progress in our understanding of children's concepts of the physical world.
PREREQUISITES: PSYO 2000.03 or NESC 2007.03, and PSYO 2090.03
FORMATS: Lecture

PSYO 3444 Criminal Behaviour
This course provides a theoretical and practical understanding of the causes and correlates of criminal behaviour. Topics include biological and social theories of crime, risk assessment, rehabilitation, and the application of each topic to the study of different populations involved in the justice system (youth, women, Indigenous peoples, etc.).

**PREREQUISITES:** PSYO 1011.03 (or equivalent) and PSYO 1012.03 (or equivalent) with a grade of B- or higher in both, AND any two 2000-level PSYO courses.

**FORMATS:** Lecture

---

**PSYO 3502 Statistical Methods II**

**CREDIT HOURS:** 3

This course is the continuation of PSYO 2501.03, with the examination of more complex, but commonly used, inferential statistics. Topics include factorial ANOVA, ANCOVA, and multiple regression. This course is for prospective Honours students in Psychology or Neuroscience. Class work includes computer-based assignments.

**CALENDAR NOTES:** PSYO 3502.03 is to be taken concurrently with PSYO 4501.03/NESC 4501.03. Permission for registration is dependent upon admission to the Honours program.

**COREQUISITES:** NESC 4501.03/PSYO 4501.03

**RESTRICTIONS:** Restricted to PSYO and NESC Honours students only. Permission by instructor REQUIRED.

**FORMATS:** Lecture | Lab

---

**PSYO 3505 Neural Data Science**

**CREDIT HOURS:** 3

An introduction to data management, manipulation, visualization, and analysis for neuroscience. Students learn scientific programming in Python, and use this to work with example data from areas such as single-cell recording, EEG, structural and functional MRI, and confocal microscopy. Basic signal processing techniques including filtering are covered.

**PREREQUISITES:** PSYO 2501.03 with a grade of B or higher, and NESC 2000.03 or PSYO 2000, and NESC 2470.03 or PSYO 2470.03

**CROSSLISTED:** NESC 3505.03

**FORMATS:** Lab | Online Delivery

---

**PSYO 3511 Data Communication and Visualization in Psychology**

**CREDIT HOURS:** 3

The history, psychology, and practical guidance in data visualization and reporting are covered. Open source statistics software will be used and some coding will be done. The format will be lecture and lab.

**PREREQUISITES:** PSYO 2000.03, PSYO 2501.03

**FORMATS:** Lecture | Lab

---

**PSYO 3581 History of Psychology I**

**CREDIT HOURS:** 3

Drawing on writings from antiquity to the early years of the 20th century, we explore the nature of historical explanation, explanation in science, knowledge and truth, life, human nature, the domains of animal and man, neuroscience, and personality. Usually offered in the Fall term.

**PREREQUISITES:** PSYO 1011.03 or PSYO 1012.03 or equivalent, or Instructor's consent

**EXCLUSIONS:** PSYO 3580.06

**FORMATS:** Lecture

---

**PSYO 3582 History of Psychology II**

**CREDIT HOURS:** 3

Drawing on writings from antiquity to the early years of the 20th century, we explore the nature of learning, thinking, memory, intelligence, mental illness and treatment, the unconscious, dreams, development, and the self. Usually offered in the Winter term. Familiarity with ideas developed in PSYO 3581 is helpful.

**PREREQUISITES:** PSYO 1011.03 or PSYO 1012.03 or equivalent, or instructor's consent

**EXCLUSIONS:** PSYO 3580.06

**FORMATS:** Lecture

---

**PSYO 3670 Genes, Brain and Behaviour**

**CREDIT HOURS:** 3

The application of genetic techniques to the study of cognitive abilities, psychopathology, personality disorders, stress-related illnesses, and ethical issues in genetic research. The role of genetic factors in eating and drug abuse problems, as well as methods used to study gene-environment interactions are explored.

**PREREQUISITES:** PSYO 2470.03/NESC 2470.03 or PSYO 2770.03 or PHYL 2041.03, AND BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or BIOL 1021.03, or SCIE 1505X/Y.18, SCIE 1515.X/Y36, SCIE 1520X/Y.30, or SCIE 1540X/Y.27 (with a grade of B- or better); BIOL 2020.03 and BIOL 2030.03
are recommended.
CROSSLISTED: NESC 3670.03
EXCLUSIONS: PSYO/NESC 2670.03
FORMATS: Lecture

**PSYO 3770 Behavioural Neuroscience**
CREDIT HOURS: 3
Behavioural neuroscience explores the neural and hormonal mechanisms underlying a variety of behavioural phenomena. The course focuses on neural correlates of social and emotional behaviour, motor behaviour and patterns, and behavioural toxicology processes (neurotoxins and endocrine disruptors).
PREREQUISITES: PSYO 2000.03/NESC 2000.03, and PSYO 2470.03/NESC 2470.03
CROSSLISTED: NESC 3770.03
FORMATS: Lecture

**PSYO 3775 Behavioural Neuroscience Laboratory**
CREDIT HOURS: 3
Students motivated to pursue a career in Neuroscience, or in a related biomedical discipline, gain direct experience studying the nervous system in relation to behaviour. Students acquire skills in animal handling, ethics, and measuring behaviour. Emphasis is placed on histological/molecular analysis of the brain including examining protein and/or mRNA levels. SIGNATURE REQUIRED
PREREQUISITES: PSYO 2000.03/NESC 2000.03, PSYO 2470.03/NESC 2470.03, PSYO 2501.03, and one of PSYO 2160.03/NESC 2160.03 or PSYO 3237.03/NESC 3237.03 or PSYO 3770.03/NESC 3770.03, and instructor's consent
CROSSLISTED: NESC 3775.03
FORMATS: Lab

**PSYO 3790 Neurolinguistics**
CREDIT HOURS: 3
The course covers: (1) brain damage and language disorders; (2) aphasia; (3) localization of lesions in the human brain; (4) neuroimaging; (5) intracranial electric stimulation experiments; (6) event-related brain potential experiments; (7) PET, fNMR scan experiments; (8) neural models of language processing.
PREREQUISITES: PSYO 2470.03/NESC 2470.03 or PSYO 2770.03
CROSSLISTED: NESC 3790.03
FORMATS: Lecture

**PSYO 3970 Molecular Neuroscience**
CREDIT HOURS: 3
This course examines the development, function, and pathology of the brain at the molecular level. A particular focus will be placed upon the molecular mechanisms thought to contribute to neurological disease. The basic molecular neuroscience tools used to study these mechanisms are emphasized.
PREREQUISITES: PSYO 2570.03/NESC 2570.03 or BIOL 2020.03 or BIOL 2030.03
CROSSLISTED: NESC 3970.03
FORMATS: Lecture

**PSYO 4000 Directed Reading Project**
CREDIT HOURS: 3
An individually tailored reading or study course designed to allow Honours students to focus on a particular issue, or a set of related issues, that are not part of the regular program. Enrollment is contingent upon securing a faculty member to supervise the study program. This course can count as a seminar class.
SIGNATURE REQUIRED
Contact: pnistud@dal.ca
CROSSLISTED: NESC 4000.03
FORMATS: Seminar

**PSYO 4001 Contemporary Issues in Psychology**
CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

**PSYO 4040 Learning Applications in Clinical and Social Psychology**
PSYO 4050 Topics In Perception
CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar
PREREQUISITES: PSYO 3051.03/NESC 3051.03
CROSSLISTED: NESC 4050.03

PSYO 4080 Topics in Social Psychology and Personality
CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4090 Development of Social Behaviour
CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4091 Social Determinants of Health and Child Development
CREDIT HOURS: 3
This course focuses on the impacts of social determinants of health on child and adolescent development. Different social determinants of health are explored in relation to development (e.g., income, food insecurity, social safety network, social exclusion, education/literacy, childhood trauma, access to health services, sexual orientation, gender, disability, culture, racism, etc.).
CALENDAR NOTES: This is a fourth-year course for students completing an Honours degree in Psychology. It is expected that students will possess sound foundational knowledge relating to the science of human behaviour.
PREREQUISITES: PSYO 2090
RESTRICTIONS: Instructor Permission Required
EXCLUSIONS: PSYO 6091
FORMATS: Seminar

PSYO 4092 Topics in Developmental Psychology
CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4120 Topics in Clinical Psychology
CREDIT HOURS: 3
SIGNATURE REQUIRED
FORMATS: Seminar

PSYO 4130 Topics in Cognition
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: NESC 4130.03
FORMATS: Seminar

PSYO 4140 Animal Learning Topics
CREDIT HOURS: 3
SIGNATURE REQUIRED
PSYO 4160 Topics in Behavioural Biology
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: NESC 4160.03
FORMATS: Seminar

PSYO 4170 Topics in Behavioural Neuroendocrinology
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: NESC 4170.03
RESTRICTIONS: Restricted to PSYO/NESC Honours Students
FORMATS: Seminar

PSYO 4196 Quantitative Intros & Meta Analyses
CREDIT HOURS: 3
Introduction to the quantitative introduction, meta analyses and, preeminently, meta analytic thinking primarily through exercises tailored to student interests, when possible.
PREREQUISITES: Advanced statistics classes or experience are expected (e.g., PSYO 3502 or PSYO 6001)
RESTRICTIONS: Instructor permission required
FORMATS: Seminar

PSYO 4224 Topics in Forensic Psychology
CREDIT HOURS: 3
SIGNATURE REQUIRED
RESTRICTIONS: Restricted to Psychology Honours students
FORMATS: Seminar

PSYO 4225 The Science of Mindfulness
CREDIT HOURS: 3
This seminar focuses on the scientific literature relating to the concept, and practice of, mindfulness. Topics explore the effects of mindfulness practice on the brain, cognition, the immune system, addiction, emotion regulation, interpersonal relations, pain, and stress. Critical evaluation of the literature is emphasized.
RESTRICTIONS: Requires permission of instructor
EXCLUSIONS: PSYO 6225.03, PSYO 4001.03 (in 2017/18, 18/19, 19/20)
FORMATS: Seminar

PSYO 4227 Neurobiological Basis of Psychopathology
CREDIT HOURS: 3
This seminar will focus on biological foundations of the etiology, maintenance, and treatment of various forms of psychopathology. Topics will include: evolutionary, genetic and neurobiological foundations of psychopathology; as well as how various therapeutic approaches (e.g. diet, exercise, psychotherapy, medication) impact neurobiological processes.
RESTRICTIONS: Signature required
EXCLUSIONS: PSYO 6804.03
FORMATS: Seminar

PSYO 4230 Human Performance Topics
CREDIT HOURS: 3
SIGNATURE REQUIRED
CROSSLISTED: NESC 4230.03
FORMATS: Seminar
PSYO 4501 Honours Thesis I
CREDIT HOURS: 3
Under a staff member’s supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4502.03 and no credit can be given for one course without the other. The work undertaken in PSYO 4502.03 should be a continuation of that initiated in PSYO 4501.03. A grade will be given for PSYO 4501.03 only after PSYO 4502.03 is completed.
PREREQUISITES: PSYO 2000.03 or equivalent with a grade of B+ or higher, PSYO 3502.03, admission to the honours program, and instructor's consent.
CROSSLISTED: NESC 4501.03
REstrictions: Restricted to Honours Psychology students in their graduating year.
EXCLUSIONS: PSYO 4500.06
FORMATS: Lecture | Lab | Experiential Learning

PSYO 4502 Honours Thesis II
CREDIT HOURS: 3
Under a staff member’s supervision, each student conducts original research in psychology. Students meet as a class to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports. Please note: admission requires that the student has secured a willing supervisor. SIGNATURE REQUIRED.
CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4501.03 and no credit can be given for one course without the other. The work undertaken in PSYO 4502.03 should be a continuation of that initiated in PSYO 4501.03. A grade for 4501.03 will only be given when 4502.03 is complete.
PREREQUISITES: PSYO 2000.03 or equivalent with a grade of B+ or higher, PSYO 3502.03, and PSYO 4501.03 admission to the honours program, and instructor's consent.
CROSSLISTED: NESC 4502.03
REstrictions: Restricted to Honours Psychology students in their graduating year.
EXCLUSIONS: PSYO 4500.06
FORMATS: Lecture | Lab | Experiential Learning

PSYO 4581 Topics in the History of Psychology
CREDIT HOURS: 3
This course will cover in depth a particular topic in Psychology as it changes through history, from conception, development, and study, including important figures and historical context. Topic changes from year to year.
PREREQUISITES: PSYO 1011.03 or PSYO 1012.03 or equivalent, or instructor's consent.
FORMATS: Seminar

PSYO 4705 Neurotechnology Innovation, Commercialization, and Entrepreneurship
CREDIT HOURS: 3
Intensive 2-week course in neurotechnology, clinical neuroscience, and commercialization. Topics include neuroimagining methods; diagnosis, assessment, and treatment of nervous system-related disorders; the process of innovation; and business fundamentals. Features guest lectures by successful scientists and entrepreneurs, as well as hands-on workshops and lab exercises on business and neurotechnology topics.
PREREQUISITES: Two full years of undergraduate University study, plus instructor's consent
CROSSLISTED: NESC 4705.03
EXCLUSIONS: PSYO 7705.06
FORMATS: Lecture

PSYO 4740 Topics in the Neurobiology of Learning and Memory
CREDIT HOURS: 3
SIGNATURE REQUIRED
PREREQUISITES: PSYO 2470.03/NESC 2470.03, PSYO 2140.03/NESC 2140.03
CROSSLISTED: NESC 4740.03
FORMATS: Seminar

PSYO 4901 Honours Foundation
CREDIT HOURS: 3
Under a staff member’s supervision, each student conducts original research in psychology and/or neuroscience. Students meet weekly as a class to describe
their proposed research and progress. A formal written report of the completed research is required. The final grade is based on presentation, written proposal report, and lab work/skills. Please note: admission requires that the student has secured a willing supervisor in addition to meeting grade requirements.

SIGNATURE REQUIRED.

CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4902.03. A minimum grade of B- or higher is required in PSYO 4901.03 to continue on in PSYO 4902.03. Student who do not achieve the minimum grade in PSYO 4901.03 will be removed from PSYO 4902.03 and not permitted to continue in the Honours program. The work undertaken in PSYO 4902.03 should be a continuation of that initiated in PSYO 4901.03.

COREQUISITES: PSYO 3502.03
PREREQUISITES: Instructor Approval (see Academic Calendar for Honours Admission Requirements)
CROSSLISTED: NESC 4901.03
RESTRICTIONS: PSYO and NESC Honours students only
EXCLUSIONS: PSYO 4501.03; NESC 4501.03; PSYO 4500.06, NESC 4500.06
FORMATS: Seminar

PSYO 4902 Honours Thesis
CREDIT HOURS: 3
Under a faculty member’s supervision, each student conducts original research in psychology. Students meet as a class to describe their research projects and ongoing progress. A formal written report of the completed thesis is required. Final grade will reflect written thesis and lab work/skills development. Students must receive a grade of B- or higher in 4901 in order to continue into 4902. Students who do not receive a B- or higher in 4901 will be removed from the Honours degree.

CALENDAR NOTES: This course must be taken in the same academic year as PSYO 4901.03. A minimum grade of B- or higher is required in PSYO 4901.03 to continue on in PSYO 4902.03. Student who do not achieve the minimum grade in PSYO 4901.03 will be removed from PSYO 4902.03 and not permitted to continue in the Honours program. The work undertaken in PSYO 4902.03 should be a continuation of that initiated in PSYO 4901.03.

PREREQUISITES: PSYO 4901.03 with B- or higher and Instructor Approval (see Academic Calendar for Honours Admission Requirements)
CROSSLISTED: NESC 4902.03
RESTRICTIONS: PSYO and NESC majors only
EXCLUSIONS: PSYO 4502.03, NESC 4502.03, PSYO 4500.06, NESC 4500.06
FORMATS: Seminar

Science, Interdisciplinary

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not take both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department.

Course Descriptions

SCIE 1111 Writing for the Sciences
CREDIT HOURS: 3
This course satisfies the Faculty of Science Writing Requirement. The course covers communication theory; scientific style; grammar and punctuation; words, sentences, and paragraphs; the scientific process and scientific communication; research proposals; graphics; sections of the scientific paper; citations and references; posters; and ethics. Weekly assignments/quizzes apply writing skills introduced in lectures and small weekly tutorials further develop skills.
FORMATS: Lecture | Tutorial

SCIE 1506 Integrated Science I
SCIE 1507 Integrated Science II
CREDIT HOURS: 9
This course comprises the second half of the Integrated Science Program, a challenging first year option for BSc students interested in exploring connections among science disciplines. SCIE 1507 consists of lectures, laboratories, and field trips in Biology, Psychology and Earth Sciences, as well as integrated lectures and workshops that cut across disciplines. The Writing in Science component, continued from Integrated Science I, includes a 10-week research project in which students apply the research design concepts and statistical analyses covered in Integrated Science I. Together, SCIE 1506 and SCIE 1507 provide comprehensive first-year preparation for major or honours degrees in science. Students in Integrated Science II must also register for CHEM 1012.03. Registration in MATH 1010.03 and in one of PHYC 1290.03 or PHYC 1320.03 is recommended for students considering programs that require Physics. For calculus, students register in MATH 1000.03 (fall or winter) or MATH 1215.03 (fall or winter). Students taking MATH 1010.03 in fall term have the option to additionally take MATH 1010.03 in winter term.
CALENDAR NOTES: SCIE 1506 and SCIE 1507 are to be taken in consecutive terms. Both must be completed to receive credit for the Writing in Science component (equivalent to SCIE 1111.03).
COREQUISITES: CHEM 1012.03
PREREQUISITES: SCIE 1506.09, CHEM 1011.03
RESTRICTIONS: Registration is restricted to Integrated Science students.
EXCLUSIONS: BIOL 1010.03, BIOL 1020.03, PSYO 1012.03, ERTH 1080.03, SCIE 1111.03
FORMATS: Lecture | Lab

SCIE 2001 Introduction to the History of Science I
CREDIT HOURS: 3
This course covers the historical foundations of science, from ancient Babylonia to the Enlightenment. Open to first-year students and above, it can be taken as a humanities or a science course and serves as preparation for its modern counterpart, HIST 2211.03/ HIST 2076.03/ SCIE 2002.03. It covers the development of scientific understanding and the evolution of scientific methods. Open to first-year students and above, it can be taken as a humanities or science credit.
CALENDAR NOTES: Credit can only be given for this course if SCIE 2001.03 and SCIE 2002.03 are completed in consecutive terms and partial credit cannot be given for a single term.
CROSSLISTED: HSTC 2201.03
EXCLUSIONS: HSTC 2201.03, BIOL 3502.03, HIST 3072.03, SCIE 4000.03, HIST 2074X/Y.06, HIST 2074X/Y.06, HSTC 1200.06, HSTC 2200.06, SCIE 2000.06
FORMATS: Lecture | Tutorial

SCIE 2002 Introduction to the History of Science II
CREDIT HOURS: 3
This course covers the creation of modern science, from the radical changes of the Enlightenment to contemporary notions of technoscience and our place in nature and the cosmos. It follows the themes and contexts introduced in HISTC 2201.03/HISTC 2211.03/ HIST 2075.03/SCIE 2001.03. Open to first-year students and above, it can be taken as a humanities or science credit.
CALENDAR NOTES: Credit can only be given for this course if SCIE 2001.03 and SCIE 2002.03 are completed in consecutive terms and partial credit cannot be given for a single term.
CROSSLISTED: HSTC 1202.03
EXCLUSIONS: HSTC 2201.03, BIOL 3502.03, HIST 3072.03, SCIE 4000.03, HIST 2074X/Y.06, HIST 2074X/Y.06, HSTC 1200.06, HSTC 2200.06, SCIE 2000.06
FORMATS: Lecture | Tutorial

SCIE 2111 Dalhousie Science Scholars and Leaders: Becoming a Scientist I
CREDIT HOURS: 0
This course examines the structure of science and situates science majors in the context of the scientific process. The course de-mystifies the language and culture of science. Students will develop skills to help them progress towards a science career. The course also explores the translation of science to society.
CALENDAR NOTES: BIOL 2111.03 and BIOL 2112.03 must be taken in consecutive fall/winter terms.
CROSSLISTED: BIOL 2111.00
RESTRICTIONS: E1. The course requires permission of instructor. Preference will be given to students in the Dalhousie Science Scholars & Leaders
SCIE 2112 Dalhousie Science Scholars and Leaders: Becoming a Scientist II
CREDIT HOURS: 3
This course examines the structure of science and situates science majors in the context of the scientific process. The course de-mystifies the language and culture of science. Students will develop skills to help them progress towards a science career. The course also explores the translation of science to society.
CALENDAR NOTES: BIOL 2111.00 and BIOL 2112.03 must be taken in consecutive fall/winter terms.
PREREQUISITES: Permission of instructor
CROSSLISTED: BIOL 2112.03
RESTRICTIONS: E1. The course requires permission of instructor. Students must have been enrolled in BIOL/SCIE2111 in the Fall term. BIOL 2112.03 will be open to Biology majors. SCIE 2112.03 will be open to students from other units within the Faculty of Science.
FORMATS: Other (explain in comments)

SCIE 2800 Science Co-op Seminar Orientation
CREDIT HOURS: 0
This course is designed to introduce Science Co-op students to aspects of career development and preparation for their work terms. This course is a prerequisite to the first work term and is a mandatory component of the Science-Cooperative Education program; all Science Co-operative Education students are required complete this course at least four months prior to the first workterm. A grade of Pass is required before students undertake the first work term experience.
FORMATS: Seminar

SCIE 3100 Experiential Learning in Medical Sciences
CREDIT HOURS: 3
This is an outside-the-classroom learning experience in which the student works to acquire knowledge and skills relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty. This course is intended for students with no prior research experience.
CALENDAR NOTES: Open only to students in the Bachelor of Science Medical Sciences Program. Students are advised to take SCIE 3100 prior to SCIE 4901/4902 (Honours Project) or SCIE 4101/4102 (Directed Project). Students must gain permission from coordinator before registering. To gain permission for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator.
PREREQUISITES: Permission of course coordinator required. To register for this class, a student must find a supervisor willing to supervise the work experience. This course is intended for students in their third year with no prior research experience. It is strongly recommended that students take SCIE 3100 prior to SCIE 4901/4902 or SCIE 4101/4102.
RESTRICTIONS: Open only to students in the Bachelor of Science Medical Sciences Program.
EXCLUSIONS: Lab work that is part of another scheduled class or paid employment cannot be used towards SCIE 3100. Only one experiential learning course per degree is permitted. Cannot be taken concurrently with PHYL 3600, SCIE 4901/4902 (Honours Project) or SCIE 4101/4102 (Directed Project).
FORMATS: Other (explain in comments)

SCIE 3111 Communicating Science
CREDIT HOURS: 3
A course for senior science students to hone communication skills. Students (1) learn to communicate scientific information to various non-specialist audiences, and (2) prepare and deliver tutorials to small groups of SCIE 1111.03 students. The course allows students to use different communication styles and topics to build a portfolio.
PREREQUISITES: Permission of instructor

SCIE 3211 Communicating Science to Non-Scientists
CREDIT HOURS: 3
In this course, science students learn and practice core concepts of communicating science to a non-scientist audience. Multiple forms of delivery are discussed, practiced, and critiqued, including written, oral, and visual. The impact of social media on the ways in which scientists communicate with the public are also explored.
CALENDAR NOTES: Course is open to students in the Bachelor of Science and Bachelor of Science (MedSci) programs, only. Instructor permission required.
PREREQUISITES: Instructor permission required. Students must be enrolled in a Bachelor of Science (BSc) program and have completed at least 60 credit hours towards their degree.
RESTRICTIONS: Course is restricted to students enrolled in a Bachelor of Science degree in the Faculty of Science (BSc or BSc(Medical Sciences)).
FORMATS: Lecture
SCIE 3333 Science Education: Introduction to Principles and Practices
CREDIT HOURS: 3
Students investigate and apply key principles related to teaching and learning in sciences. Emphasized are: (1) conveying how science works; (2) the nature of learning; (3) the science-society connection; (4) teaching concepts that cross the sciences such as patterns, scale, visualization, complexity, uncertainty, bias, and multiple perspectives. Experiential learning is an integral component.
PREREQUISITES: Minimum of 4 courses at or above the second year level AND permission of the Instructor.
RESTRICTIONS: E1 and E2
FORMATS: Tutorial | Seminar | Experiential Learning

SCIE 3600 Exploring Geographic Information Systems
CREDIT HOURS: 3
This course provides a general overview of Geographic Information Systems (GIS), examining what GIS is, what it can do, and how it works. The course is aimed at students studying in all disciplines and will involve creating, understanding, manipulating and displaying geographic data. Topics will include data models, analysis of vector and raster data, creation of spatial databases, the Global Positioning System and other aspects of spatial data. Lectures (3 per week) will explore basic aspects of GIS in detail and introduce material to be covered in the labs. Labs are held once per week and will provide practical experience in data manipulation and problem solving.
PREREQUISITES: Two years of university study
EXCLUSIONS: ERTH 3500.03, ENVS 3500.03, GEOG 3500.03, ERTH 5600.03

SCIE 4001 History of Marine Sciences
CREDIT HOURS: 3
In this course, we will trace the history of marine sciences from the ancients to the 20th century. Topics may include ancient cosmologies, voyages of discovery, ocean circulation, and a range of scientific perspectives and technological developments that have shaped human understanding of the oceans.
PREREQUISITES: Instructor's consent
CROSSLISTED: BIOL 4664.03, OCEA 4331.03/5331.03, HIST 3073.03, HSTC 3331.03, MARI 4664.03
FORMATS: Lecture

SCIE 4005 Major Capstone Course in Medical Sciences
CREDIT HOURS: 3
Integration of multiple Medical Sciences disciplines through in-depth analysis of a series of 5 medical "cases" through expert lectures, group discussion, and small group presentations. Cases are selected from across all biomedical disciplines (Medicine, Dentistry, Nursing, Physiotherapy, Occupational Therapy, etc), reflecting a wide range of patient ages and demographics. This course is required by Medical Sciences students not pursuing Honours. Medical Science Honours students take SCIE 4901 & 4902 instead. This course cannot be taken at the same time as the Medical Sciences Honours courses SCIE 4901 & 4902.
PREREQUISITES: Writing requirement, PHAC 3001.03, MICI 3115.03, ANAT 3010.03, PATH 3000.03, and PHIL 2810.03 or PHIL 2805.03.
RESTRICTIONS: Open only to fourth year Major students in the Bachelor of Sciences Medical Sciences Program
EXCLUSIONS: This course cannot be taken at the same time as the Medical Sciences Honours courses SCIE 4901 & 4902.
FORMATS: Lecture

SCIE 4100 Directed Project in Medical Sciences
CREDIT HOURS: 6
This is an outside-the-classroom learning experience in which the student works on a research project relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty.
CALENDAR NOTES: To register for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator.
PREREQUISITES: Permission of coordinator required. Students are advised to have at least 2 senior (3000- or 4000-level) courses on topics relevant to the research area, including SCIE3100 (Research Skills in Medical Sciences). Minimum B average (GPA 3.0) in at least three of the following Medical Sciences 3rd Year core courses (PHAC 3001, MICI 3115, ANAT 3010, PATH 3000, PHIL 2810).
RESTRICTIONS: Open only to Major students in the Bachelor of Science Medical Sciences Program.
EXCLUSIONS: Lab work that is part of another scheduled class or paid employment cannot be used towards SCIE 4100X/Y. Cannot be taken concurrently with SCIE3100. Cannot be taken with SCIE 4900X/Y.
FORMATS: Other (explain in comments)

SCIE 4101 Directed Project in Medical Sciences I
CREDIT HOURS: 3
This is the first half of an outside-the-classroom learning experience in which the student works on a research project relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty.
CALENDAR NOTES: Open only to students in the Bachelor of Science Medical Sciences Program. To register for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator. This course must be taken in the same academic year as SCIE 4102.03 and no credit can be given for one course without the other. Grades will not be assigned for SCIE 4101.03 until SCIE 4102.03 has also been completed.
RESTRICTIONS: Registration by instructor's permission.

SCIE 4102 Directed Project in Medical Sciences II
CREDIT HOURS: 3
This is an outside-the-classroom learning experience in which the student works on a research project relevant to medical sciences under the direction of a supervisor. Suitable work environments may be located at any Dalhousie-affiliated site. Supervisors may be in any department/Faculty.
CALENDAR NOTES: Open only to students in the Bachelor of Science Medical Sciences Program. To register for this class, a student must find a supervisor willing to supervise the work experience. The student and supervisor must sign a learning agreement that has been approved by the course coordinator. This course must be taken in the same academic year as SCIE 4101.03 and no credit can be given for one course without the other. No grade will appear for SCIE 4101.03 until SCIE 4102.03 has also been completed.
PREREQUISITES: Permission of coordinator required. Students are advised to have at least 2 senior (3000- or 4000-level) courses on topics relevant to the research area, including SCIE 3100.03 (Experiential Learning in Medical Sciences). Minimum B average (GPA 3.0) in at least three of the following Medical Sciences 3rd year core courses (PHAC 3001.03, MICI 3115.03, ANAT 3010.03, PATH 3000.03, PHIL 2805.03 or PHIL 2810.03).
EXCLUSIONS: Open only to students in the Bachelor of Science Medical Sciences Program. Research work that is part of another scheduled class or paid employment cannot be used towards SCIE 4101.03. Cannot be taken concurrently with SCIE 3100.03. Cannot be taken with SCIE 4901.03 or SCIE 4902.03.
FORMATS: Other (explain in comments)

SCIE 4211 Portfolio in Science Communication
CREDIT HOURS: 0
Students completing the Science Communication certificate are required to register for this zero-credit hour course in the semester in which they are submitting their completed portfolio for evaluation (typically, the final semester of their degree). The portfolio is a record that can be shared with future employers and built upon into the future. More details about the requirements for the portfolio itself, are available from the certificate coordinator.
PREREQUISITES: Restricted to students registered in the Science Communication Certificate. Permission of Coordinator required.
PREREQUISITES: Permission of Coordinator
RESTRICTIONS: Restricted to students enrolled in the Science Communication Certificate.

SCIE 4444 Leadership in Science
CREDIT HOURS: 3
Students will develop leadership skills and build confidence while applying their scientific knowledge. Through in-class activities and a science-based practicum, students gain experience with various aspects of leadership, allowing for integration and application of their expertise.
PREREQUISITES: Instructor permission. Students should have completed at least three (3) third year courses in their declared major and have a minimum of B+ average in their major.

SCIE 4445 Science Leadership and Communication Portfolio
CREDIT HOURS: 0
This zero-credit course is the final component of the Science Leadership and Communication Certificate requirement. Students should only register for this course in the semester that they are submitting their completed portfolio for evaluation. The portfolio represents an opportunity for you to highlight and synthesize your learning about leadership and communication in science throughout your undergraduate years in a concise package, and includes reflection on each of the required Certificate courses, their interconnections, and the practica involved.
CALENDAR NOTES: 1. This is a zero-credit course, carrying a pass/fail grading scheme. 2. Deadline for submission of the portfolio is 6 weeks prior to graduation.
PREREQUISITES: Registration in the Science Leadership and Communication Certificate. Completion or co-completion of the required Certificate courses.
FORMATS: Other (explain in comments)

SCIE 4701 Science and Technology Innovation, Commercialization, and Entrepreneurship I
CREDIT HOURS: 3
Capstone course providing an introduction to the processes and mindsets around innovation and commercialization of science and technology, including entrepreneurship. Experiential learning format; teams work to develop and pitch a viable business model for a scientific solution to a real-world problem. Complemented by lectures, case studies, and guest presentations.
CALENDAR NOTES: This course must be taken in the same academic year as SCIE 4702.03 and no credit can be given for one course without the other. The work undertaken in SCIE 4702.03 should be a continuation of that initiated in SCIE 4701.03.
COREQUISITES: SCIE 4702.03
PREREQUISITES: Registration by instructor's permission. Undergraduates should have completed at least three full years (90 credit hours) of university study, and have previous exposure to innovation and entrepreneurship such as events offered by Dalhousie sandbox programs.
RESTRICTIONS: Registration by instructor's permission.
SCIE 4702 Science and Technology Innovation, Commercialization, and Entrepreneurship II
CREDIT HOURS: 3
Capstone course providing an introduction to the processes and mindsets around innovation and commercialization of science and technology, including entrepreneurship. Experiential learning format; teams work to develop and pitch a viable business model for a scientific solution to a real-world problem. Complemented by lectures, case studies, and guest presentations.
CALENDAR NOTES: This course must be taken in the same academic year as SCIE 4701.03 and no credit can be given for one course without the other. The work undertaken in SCIE 4702.03 should be a continuation of that initiated in SCIE 4701.03.
PREREQUISITES: SCIE 4701.03. Registration by instructor's permission.
RESTRICTIONS: Registration by instructor's permission
EXCLUSIONS: NESC 4705.03/PSYO 4705.03, SCIE 5701.06
FORMATS: Lecture | Lab | Tutorial | Experiential Learning

SCIE 4705 Neurotechnology Innovation, Commercialization, and Entrepreneurship
CREDIT HOURS: 3
An introduction to neurotechnology, clinical neuroscience, and commercialization. Topics include neuroimaging methods; diagnosis, assessment, and treatment of nervous system-related disorders; the process of innovation; and business fundamentals. Features guest lectures by successful scientists and entrepreneurs, as well as hands-on workshops and lab exercises on business and neurotechnology topics SIGNATURE REQUIRED
PREREQUISITES: Two full years of undergraduate University study, plus instructor's consent.
CROSSLISTED: PSYO 4705.03, NESC 4705.03
EXCLUSIONS: PSYO 7705.06
FORMATS: Lecture

SCIE 4850 Geographic Information Science Research Project
CREDIT HOURS: 3
Students learn how to design, manage and complete a research project in Geographic Information Science (GIS). Projects must include a substantive analytical component where GIS is central to methods employed. Evaluation includes a written report, oral presentation and digital data. Required for completion of the Certificate in GIS.
COREQUISITES: ERTH 4520.03/GEOG 4520.03/ERTH4520.03
PREREQUISITES: ENVS 3500.03/ERTH 3500.03/GEOG 3500.03 and permission of instructor
CROSSLISTED: BIOL 4850.03, ENVS 4850.03, ERTH 4850.03, GEOG 4850.03
EXCLUSIONS: Restricted to 3rd and 4th year students
FORMATS: Lecture

SCIE 4901 Medical Sciences Honours Research & Thesis I
CREDIT HOURS: 3
The course is required of, and restricted to, students in the Medical Sciences Honours program. Students conduct a research project in the laboratory or research site of an approved faculty member and attend weekly meetings of the class. Students have the flexibility to undertake their research in a department of their choice, subject to the approval of the Honours Committee. Class participation, an interim report, a written thesis, and a presentation at the Annual Medical Sciences Symposium are required for completion. No grade will appear for the course in the Fall term; grade for the course will appear in the Winter term.
CALENDAR NOTES: This course must be taken in the same academic year as SCIE 4902.03 and no credit can be given for one course without the other. Students will not receive a grade for SCIE 4901.03 until both SCIE 4901.03 and SCIE 4902.03 have been completed.
PREREQUISITES: An approved research project supervisor (as determined by the Medical Sciences Honours Committee) and minimum average GPA of 3.0 calculated from the following core courses: BIOL 2020.03, BIOL 2030.03, PHYL 2041.03, PHYL 2044.03, MICI 2100.03, BIOC 2300.03, SOSA 2503.03, PHIL 2805.03 or PHIL 2805.03, PHAC 3001.03, MCV 3115.03, ANAT 3010.03, PATH 3000.03, CHEM 2401.03, and CHEM 2402.03. At the time of application, you are unlikely to have completed all the listed core courses; therefore, your GPA of the completed courses at the time of application must be equal to or greater than 3.0 (B average). A GPA of at least 3.0 is also required for all core courses at the time of graduation.
EXCLUSIONS: SCIE 4900.06
FORMATS: Other (explain in comments)

SCIE 4902 Medical Sciences Honours Research & Thesis II
CREDIT HOURS: 3
The course is required of, and restricted to, students in the Medical Sciences Honours program. Students conduct a research project in the laboratory or research site of an approved faculty member and attend weekly meetings of the class. Students have the flexibility to undertake their research in a department of their choice, subject to the approval of the Honours Committee. Class participation, an interim report, a written thesis, and a presentation at the Annual Medical Sciences Symposium are required for completion. No grade will appear for the course in the Fall term; grade for the course will appear in the Winter term.
Introduction

It doesn't matter if you want to design computer games, study the safety of nuclear power plants, analyze the stock market or conduct political polls: scientists of all kinds work with numbers to measure and explore the world. That's where statistics comes in. Statistics is the study of the collection, organization, analysis, interpretation and presentation of data. Extracting knowledge from data helps us plan for the future and improve our quality of life.

The Dalhousie Statistics program is the only program in the Maritimes that offers a full range of undergraduate and graduate programs. Our undergraduate courses are also approved by the accreditation committee of the Statistics Society of Canada, so that our graduates can apply for the Associate Statistician designation.

Statistics makes a great undergraduate degree with wide applicability and is an essential component of any program in the sciences or social sciences.

Degree Programs

The Department of Mathematics and Statistics offers the following degree programs in Statistics

- BSc or BA (120 credit hour) Honours (Concentrated)*
- BSc or BA (120 credit hour) Combined Honours*
- BSc or BA (120 credit hour) Major*
- BSc or BA (120 credit hour) Double Major*
- BSc or BA (90 credit hour) Minor in Statistics
- Minor in Statistics

* May be combined with Minor programs from other disciplines

Departmental requirements for each degree program can be seen by following the links in the menu to the right.

In addition to departmental requirements, students must satisfy the requirements outlined in the Academic Regulations and the College of Arts and Science Degree Requirements sections. Students are advised that a number of requirements differ for the BA and BSc degrees.
A student is governed by the academic regulations in place at the time of initial enrolment, as long as the degree is completed within the time permitted (10 years). Subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their programs of study carefully and are strongly encouraged to do so in consultation with a Statistics undergraduate academic advisor.

**Staff**

**Dean**  
Macdonald, C.L.B., BSc (Hons), PhD (Dalhousie), Professor (Chemistry)

**Chair of the Department**  
Janssen, J. C., MSc (Eindhoven), PhD (Lehigh)

**Director of Division**  
Dowd, M., PhD (Dalhousie)

**Faculty Advisor**  
Susko, E., PhD (Waterloo), Honours and Undergraduate Advisor, Statistics  
Kenney, T., BA (Hons), MMath, PhD (Cambridge), Honours and Undergraduate Advisor, Actuarial Science  
Brown, J., MSc, PhD (Toronto) Co-op Coordinator

**Professor Emeritus**  
Field, C. A., MSc, PhD (Northwestern)  
Hamilton, D. C., MA, PhD (Queen's)  
Thompson, K., MSc (Manchester), PhD (Liverpool) (CRC Chair), jointly with Oceanography

**Professors**  
Beiko, R., PhD (Ottawa), cross appointment with Computer Science  
Bielewski, J., MA, PhD (Texas A & M), jointly with Biology  
Dowd, M., PhD (Dalhousie)  
Feng, C., MSc. & PhD (Simon Fraser U.), cross appointment with Community Health and Epidemiology  
Gu, H., MSc (Peking), PhD (Hong Kong)  
Mills-Flemming, J., MSc (TUNS), PhD (Dalhousie), Graduate Advisor Statistics  
Smith, B., MSc (Calgary), PhD (Berkeley)  
Susko, E., PhD (Waterloo), Killam Professor, Undergraduate Advisor

**Associate Professors**  
Kenney, T., BA (Hons), MMath, PhD (Cambridge), cross appointment with Mathematics

**Assistant Professors**  
Ho, L, PhD (Univ of Wisconsin)  
Murphy, O., MSc. & PhD (McGill)

**University Teaching Fellows**  
Sarhan, A., PhD (Gdansk)

**Adjunct Professors**  
Gupta, R. P., PhD (Delhi) Dalhousie  
Herbinger, C., MSc (Paris), PhD (Dalhousie), jointly with Biology  
Millar, M., PhD (Dalhousie) MSVU  
Sneddon, G., PhD (Dalhousie) MSVU

**Statistical Consultant**  
Wang, H., PhD (Ottawa)

Please refer to the entry for the Department of Mathematics and Statistics for a full listing of the members of the Department and information on other programs offered by the Department.
BSc or BA (120 credit hour) Concentrated Honours in Statistics

Students who want a challenging program resulting in comprehensive knowledge of both theoretical and applied Statistics may want to enroll in an Honours program. Students interested in eventually pursuing graduate studies are particularly encouraged to consider Honours. Honours students must write a research-based Honours thesis. The research thesis and the Honours Qualifying Examination requirement are satisfied through completion of STAT 4950.03.

Admission to Honours
Students must apply for admission to Honours programs. Students considering Honours in Statistics should consult with a Statistics Honours Advisor early in their studies.

Departmental requirements
In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Concentrated Honours program in Statistics must complete the following courses:

1000 level

- MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II
- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- MATH 1030.03: Matrix Theory and Linear Algebra I

2000 level

- MATH 2001.03: Intermediate Calculus I
- MATH 2002.03: Intermediate Calculus II or MATH 2505: Introductory Analysis
- MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03 Introduction to Data Mining with R
- CSCI 2202.03: Computer modelling for scientists
- At least two additional statistics courses at or above the 2000 level (6 credit hours)

3000 level

- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- At least two mathematics courses at the 3000 level (6 credit hours)
- Two of STAT 3350.03: Design of Experiments, STAT 3380.03: Sample Survey Methods, STAT 3450.03: Statistical Learning with R, STAT 3740.03: Predictive Analytics

4000 level

- STAT 4066.03: Advanced Statistical Theory I
- One of STAT 4130.03: Bayesian Data Analysis, STAT 4350.03: Applied Multivariate Analysis, STAT 4390.03: Time Series Analysis, STAT 4620.03: Data Analysis, STAT 4690.03: Computational Statistics.
- STAT 4950.03: Honours Research Project

The requirement to take STAT 1060.03: Introductory Statistics for Science and Health Sciences may be waived for students entering the program in their second year.

Some students may take STAT 2080.03 in the first year of their degree program.

Statistics courses are any courses listed or cross-listed as STAT (with the exception of STAT 3069)

3000 level mathematics courses can be chosen from the following list, and count toward the required credit hours in statistics:
BSc or BA (120 credit hour) Combined Honours in Statistics and another subject

Students who wish to study Statistics in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science, or the College of Sustainability. Statistics may be the primary subject (defined as the subject with the larger number of credits at the second year or above), or the secondary subject.

Students planning to enroll in a Combined Honours program should consult with academic advisors from both programs early in their studies. Students must have their program of study approved by Academic Advisors in both subject areas. Students must complete a research thesis and an Honours Qualifying Examination in one of the two subject areas, a requirement normally completed in the primary subject area. For Statistics, this requirement is satisfied through STAT 4950.03.

Departmental requirements

Students in a BSc or BA Combined Honours program in Statistics and another subject must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections.

Courses must include:
- Math 1030.03: Matrix Theory and Linear Algebra I
- MATH 2001.03: Intermediate Calculus I
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory
- At least one STAT course at the 4000 level (3 credit hours)

If Statistics is the primary subject, students will also complete:

- One Statistics\(^1\) course at or above the 2000 level (3 credit hours)
- One Mathematics\(^4\) course at the 3000 level (3 credit hours)
- STAT4950.03 : Honours Research Project

If Statistics is the secondary subject, students will also complete:

- One Statistics\(^1\) course at or above the 3000 level (3 credit hours)
- One Statistics\(^1\) or Mathematics\(^4\) course at or above the 3000 level (3 credit hours)

\(^1\)Statistics courses are any courses listed or cross-listed as STAT. (with the exception of STAT 3069) The following can also be counted towards statistics credit hours:

- MATH 2002.03: Intermediate Calculus II
• MATH 2040.03: Matrix Theory and Linear Algebra II or Math 2135.03 Linear Algebra

3000 level mathematics courses can be chosen from the following list, and count toward the required credit hours in statistics:

• MATH 3045: Curves and Surfaces
• MATH 3080: Introduction to Complex Variables
• MATH 3120: Differential Equations
• MATH 3140: Introduction to Wavelets
• MATH 3210: Introduction to Numerical Analysis
• MATH 3260: Applied Differential Equations
• MATH 3300: Optimization
• MATH 3330: Applied Graph Theory
• MATH 3400: Classical Game Theory
• MATH 3500X/Y.06: Intermediate Analysis
• MATH 3501: Intermediate Analysis I
• MATH 3502: Intermediate Analysis II
• MATH 3900: Financial Mathematics

BSc or BA (120 credit hour) Major in Statistics

The 120 credit hour Major is suited to students who want to focus on Statistics, but wish to have a program that is somewhat less constrained than the Honours program.

**Departmental requirements**

In addition to fulfilling the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections, students in a BSc or BA Major program in Statistics must complete the following courses:

**1000 level**

• MATH 1000.03: Differential and Integral Calculus I/MATH 1010.03: Differential and Integral Calculus II or MATH 1215.03: Life Sciences Calculus/MATH 1010.03: Differential and Integral Calculus II
• STAT 1060.03: Introductory Statistics for Science and Health Sciences

• Math 1030.03: Matrix Theory and Linear Algebra I

**2000 level**

• MATH 2001.03: Intermediate Calculus
• MATH 2002.03: Intermediate Calculus II or MATH 2505: Introductory Analysis or STAT 2450: Data Visualization
• MATH 2040.03: Matrix Theory and Linear Algebra II or MATH 2135.03: Linear Algebra
• CSCI 2202.03: Computer modelling for scientists
• STAT 2060.03: Introduction to Probability and Statistics
• STAT 2080.03: Statistical Methods for Data Analysis and Inference
• STAT 2450.03: Introduction to Data Mining with R

**3000 level**

• STAT 3340.03: Regression and Analysis of Variance
• STAT 3360.03: Probability
• STAT 3460.03: Intermediate Statistical Theory
• One Statistics course (3 credit hours) at or above the 3000 level.
• One Statistics course (3 credit hours) at the 4000 level
• One of STAT 3350: Design of Experiments, STAT 3380: Sample Survey Methods, STAT 3450: Statistical Learning with R, STAT 3740: Predictive Analytics
The requirement to take STAT 1060.03: Introductory Statistics for Science and Health Sciences may be waived for students entering the program in their second year.

Some students may take STAT 2080.03 in the first year of their degree program.

Statistics courses are any courses listed or cross-listed as STAT (with the exception of STAT 3069)

**BSc or BA (120 credit hour) Double Major in Statistics and another subject**

The Double Major degree program allows students to combine a study of Statistics with another subject. The other subject may be any discipline from the Faculty of Science, the Faculty of Arts and Social Sciences, the Faculty of Computer Science or the College of Sustainability. Statistics may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA.

It is recommended that students enrolled in a Double Major program consult with advisors in both subject areas.

**Departmental requirements**

Students in a BSc or BA Double Major in Statistics and another subject must fulfill the requirements outlined in the Academic Regulations and College of Arts and Science Degree Requirements sections.

- Courses must include:
  - Math 1030.03: Matrix Theory and Linear Algebra I
  - MATH 2001.03: Intermediate Calculus I
  - STAT 2060.03: Introduction to Probability and Statistics
  - STAT 2080.03: Statistical Methods for Data Analysis and Inference
  - STAT 2450.03 Introduction to Data Mining with R
  - STAT 3340.03: Regression and Analysis of Variance
  - STAT 3360.03: Probability
  - STAT 3450.03 Introduction to Data Mining with R
  - One Statistics\(^1\) course at or above the 3000 level (3 credit hours)
  - Two Statistics\(^1\) or Mathematics\(^4\) course at or above the 3000 level (6 credit hours).  

Statistics courses are any courses listed or cross-listed as STAT (with the exception of STAT 3069)

3000 level mathematics courses can be chosen from the following list, and count toward the required credit hours in statistics:

- MATH 3045: Curves and Surfaces
- MATH 3080: Introduction to Complex Variables
- MATH 3120: Differential Equations
- MATH 3140: Introduction to Wavelets
- MATH 3210: Introduction to Numerical Analysis
- MATH 3260: Applied Differential Equations
- MATH 3300: Optimization
- MATH 3330: Applied Graph Theory
- MATH 3400: Classical Game Theory
- MATH 3500X/Y.06: Intermediate Analysis
- MATH 3501: Intermediate Analysis I
- MATH 3502: Intermediate Analysis II
- MATH 3900: Financial Mathematics

**BSc or BA (90 credit hour) Minor in Statistics**

The 90 credit hour Minor in Statistics is appropriate for students who want to study some Statistics but do not wish to complete the conventional four-year program. The degree is best suited for students who want a general science degree with some specialization in Statistics. A 90 credit hour degree program is not suitable for students who wish to pursue graduate studies. With additional study, the degree may be upgraded to a 120 credit hour Major or Honours degree at a later date.

A 90 credit hour BSc or BA in Statistics is usually the preferred option for students who wish to combine studies in Statistics with a degree in Engineering (see BSc/BEng or BA/BEng Concurrent Program).
See the [Minor in Statistics](#) section of this Calendar.

**Minor in Statistics**

This minor is available to students registered in a 120 credit hour Bachelor of Applied Computer Science, Bachelor of Arts, Bachelor of Commerce, Bachelor of Community Design, Bachelor of Computer Science, Bachelor of Informatics, Bachelor of Management, Bachelor of Music, Bachelor of Science or Bachelor of Science (Medical Sciences) program.

A BSc or BA (90 credit hour) degree program with a minor in Statistics is also available.

**Requirements**

A minimum of 18 to a maximum of 36 credit hours in Statistics, which must include:

- MATH 1030.03: Matrix Theory and Linear Algebra
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 2450.03: Introduction to Data Mining with R
- STAT 3340.03: Regression and Analysis of Variance
- At least one additional statistics course at the 2000 level or above (3 credit hours)
- At least one additional statistics course at the 3000 level or above (3 credit hours)

Statistics courses are any courses listed or cross-listed as STAT, (including STAT 3069). The following can also be counted as 2000 level statistics credit hours:

- MATH 2001.03: Intermediate Calculus
- MATH 2002.03: Intermediate Calculus II
- MATH 2040.03: Matrix Theory and Linear Algebra II or Math 2135.03 Linear Algebra
- BIOL 4062.03: Analysis of Biological Data

Contact Statistics for more information.

**Co-op, Minors, Certificates and Engineering Concurrent Programs for Students**

**Minors available to students in Statistics**

Minor programs allow students to develop subject specialties in addition to their Major or Honours subjects. Minors in other subjects are normally added to 120 credit hour BSc or BA programs.

Students in a BSc or BA (120 credit hour) program in Statistics may choose to include a Minor selected from the list of approved Minors. Courses counted toward a Major or Honours subject cannot be used to fulfill the requirements of a Minor program.

**Certificates**

In combination with a BSc or BA in Statistics, students may obtain one or more Certificates. A Certificate indicates that a student has achieved a certain level of proficiency in a given area or subspecialty. Courses counted toward a Major, Honours or Minor subject may also be used to fulfill the requirements of a Certificate. Students must apply to the Certificate Coordinator to be considered for a Certificate. Certificates are awarded upon graduation and are noted on the student’s academic transcript.

A complete list of Faculty of Science Certificates and requirements can be found at the beginning of the Faculty of Science section. Students may also work toward obtaining Certificates offered by other Faculties; some of these are listed in the College of Arts and Science Degree Requirements section.

Certificates of particular interest to student enrolled in a BSc or BA in Statistics include:

- [Certificate in Actuarial and Financial Mathematics](#)
- [Certificate in Applied and Computational Mathematics](#)
- [Certificate in Data Analytics](#)

**BSc/BEng or BA/BEng Concurrent Program**
Students interested in combining their interest in Program with a degree in Engineering may choose a BSc/BEng or BA/BEng Concurrent Program, normally completed in a 5 year period. Over the first three years, students complete the requirements for a 90 credit hour BSc or BA degree in Statistics and a Diploma of Engineering (the first two years of engineering studies). Two more years of engineering studies are then required to obtain a BEng. Interested students should see an undergraduate advisor from Statistics and from the Faculty of Engineering in their first year of study.

Required Statistics courses for a BSc/BEng or BA/BEng program in Statistics

- A minimum of 18 credit hours in Statistics courses at the 2000 level or higher, which must include STAT 2060.03, STAT 2080.03, STAT 3340.03 and at least one other STAT course at or above the 3000 level

Statistics courses are any courses listed or cross-listed as STAT. The following can also be counted towards statistics credit hours:

- MATH 2001.03
- MATH 2002.03
- MATH 2030.03
- MATH 2040.03 or Math 2135.03

Courses

Below you will find descriptions for courses offered in this field of study. You will find a general overview of the topics covered and any prerequisite course or grade requirements, credit value and exclusions.

The first digit of the course indicates the general level. Those in the 1000 series are introductory degree level. Courses at the 2000, 3000, 4000 series are typically available to students in the second, third, and fourth year. Courses numbered at the 5000 level or above are graduate level. Courses listed at the 0100 or 0200 series are technology level courses. Courses below the 0100 level are generally non credit courses.

Some courses are listed as exclusionary to one another. This means that students may not obtain credit for both courses as designated.

Not all courses are offered each year. Please consult the current timetable for this year’s offering. For further information please contact the department, or visit the department's website.

Course Descriptions

Course Notes

Certain courses have been approved for use in fulfilling the educational requirements of the Associate Statistician (A.Stat.) designation of the Statistical Society of Canada (SSC). See the Department or the SSC website (http://ssc.ca/en/accreditation/apply/suggested-courses-use-towards-astat-designation) for details.

Credit may not be obtained twice for the same course even if the numbers have been changed.

Statistics

STAT 1060 Introductory Statistics for Science and Health Sciences
CREDIT HOURS: 3
This course gives an introduction to the basic concepts of statistics through extensive use of examples. The topics include experimental design, descriptive statistics, simple linear regression and the basics of statistical inference. Students will learn to use the statistical package MINITAB. NOTE: Students who have already taken university level Calculus should consider taking STAT 2060.03 instead of STAT 1060.03.
CALENDAR NOTES: Students will not receive credit for taking STAT 1060.03 after receiving credit for STAT 2060.03.
PREREQUISITES: Academic or advanced Grade 12 Mathematics (or pre-calculus) or equivalent
CROSSLISTED: MATH 1060.03
EXCLUSIONS: COMM 2501.03, MGMT 1501.03, DISP, STAA 2000.03
FORMATS: Lecture | Tutorial

STAT 2060 Introduction to Probability and Statistics
CREDIT HOURS: 3
Rigorous introduction to probability and statistical theory. Topics covered include elementary probability, random variables, distributions, estimation and
hypothesis testing. Estimation and testing are introduced using maximum likelihood and the generalized likelihood ratio. Natural sequels for this course are STAT 2080.03 and 3360.03
PREREQUISITES: MATH 1000.03 or MATH 1215.03 or CSCI 1300 with a minimum grade of C
CROSSLISTED: MATH 2060.03
EXCLUSIONS: ENGM 2032.03, ECON 2260.03
FORMATS: Lecture

STAT 2080 Statistical Methods for Data Analysis and Inference
CREDIT HOURS: 3
The usual sequel to STAT 1060.03 or STAT 2060.03. This course introduces a number of techniques for data analysis and inference commonly used in the experimental sciences. Topics covered include two-sample inference one-way and two-way analysis of variance, correlation, linear regression, and the analysis of categorical and count data. A natural sequel for this course is STAT 3340.03.
PREREQUISITES: STAT 1060.03 or STAT 2060.03 or DISP
CROSSLISTED: MATH 2080.03
EXCLUSIONS: COMM 2502.03, MGMT 2502.03, ECON 2280.03
FORMATS: Lecture

STAT 2300 Introduction to Mathematical Modelling I
CREDIT HOURS: 3
See course description for MATH 2300.03 in the Mathematics section of this calendar.

STAT 2430 Data Visualization
CREDIT HOURS: 3
Data visualization is the art and science of turning data into readable graphics. We will explore how to design and create data visualizations based on data available and tasks to be achieved. This course aims to introduce students to data visualization, including both the principles and techniques. Students will learn the value of visualization, specific techniques and understand the best visualization method.
PREREQUISITES: At least one MATH or STAT course at or above the 1000 level
FORMATS: Lecture

STAT 2450 Introduction to Data Mining with R
CREDIT HOURS: 3
This course provided as introduction to data mining and R programming, suited for science students. Data mining methods include a vast set of tools developed in different areas for identifying the patterns in data. Students will learn programming methods for manipulating and exploring data through learning the basic ideas of some clustering, regression and classification methods. No prior programming knowledge is assumed.
PREREQUISITES: MATH 1000.03 or MATH 1215.03 and either (STAT 1060.03 or MATH 1060.03) or (STAT 2060.03 or MATH 2060.03
FORMATS: Lecture

STAT 2600 Theory of Interest
CREDIT HOURS: 3
See course description for MATH 2600.03 in the Mathematics section of this calendar.

STAT 3069 Statistical Rethinking: Applied Bayesian Statistics
CREDIT HOURS: 3
This course, which uses Richard McElreath’s popular ‘Statistical Rethinking’ book as a foundation, provides a broad introduction to applied Bayesian models using R or Python. Examples are drawn from Biology and Social Science, in contexts designed to be widely applicable to analysis of observational data across disciplines.
CALENDAR NOTES: Course aimed at non-stats majors seeking to do applied statistical work, primarily in Biology but including other disciplines; Students majoring in statistics (including Honours, Majors, Combined Honours and Double Major programs) cannot receive STAT course credit for this course. Students Minoring in Statistics can count this as a 3000 level STAT course credit.
PREREQUISITES: STAT 2060.03 OR STAT 2080.03 AND One of: STAT 2450.03, CSCI 2202.03, BIOL 3872.03, MARI 4600.03
CROSSLISTED: BIOL 4069.03
FORMATS: Lecture

STAT 3340 Regression and Analysis of Variance
A thorough treatment of the theory and practice of regression analysis. Topics include: fitting general linear models using matrices, optimality of least squares estimators (Gauss-Markov theorem), inferences, simple and partial correlation, analysis of residuals, case-deletion diagnostics, polynomial regression, transformations, use of indicator variables for analysis of variance and covariance problems, model selection, and an introduction to nonlinear least squares.

This course makes extensive use of computer packages.

**COREQUISITES: Stat 2450.03 (if not taken as a prerequisite)**

**PREREQUISITES: Math 1030.03 AND STAT 2060.03 or MATH 2060.03 AND STAT 2080.03 or MATH 2080.03 or ECON 2280.03 or 3338.03, AND STAT 2450.03**

**CROSSLISTED: MATH 3340.03**

**FORMATS: Lecture**

---

**STAT 3345 Environmental Risk Assessment**

**CREDIT HOURS: 3**

Statistical methods for assessing risk are discussed, including dose-response models, survival analysis, relative risk analysis, bioassay, estimating methods for zero risk trend analysis and association risks. Case studies are used to illustrate the methods.

**PREREQUISITES: MATH 1000.03 or MATH 1215.03, STAT 2080.03 or equivalent**

---

**STAT 3350 Design of Experiments**

**CREDIT HOURS: 3**

The aim of the course is to develop the fundamental statistical concepts required for designing efficient experiments to answer real questions. The first main subject is unit variation and control. The basic concepts of replication, blocking and randomization are each examined. The second main subject is treatment questions and structure. The ideas of factorial designs, split-plot and incomplete plot designs are presented. We conclude with a look at response surface methodology.

**PREREQUISITES: STAT 2080.03, MATH 2030.03 or Math 1030.03, and one of MATH 1010.03, STAT 2060.03 or DISP (except SCIE 1540X/Y.27)**

**CROSSLISTED: MATH 3350.03**

**FORMATS: Lecture**

---

**STAT 3360 Probability**

**CREDIT HOURS: 3**

The concepts and application of probability. Topics include the classical discrete and continuous distributions, including the binomial, hypergeometric, multinomial, Poisson, uniform, exponential and normal; definitions and properties of random variables; independence; sums of independent random variables, including the law of large numbers and central limit theorem; conditional probability; and the bivariate normal distribution. Examples will be taken from the natural and physical sciences.

**PREREQUISITES: STAT 2060.03 and MATH 2001.03**

**CROSSLISTED: MATH 3360.03**

**FORMATS: Lecture**

---

**STAT 3380 Sample Survey Methods**

**CREDIT HOURS: 3**

The development of design and analysis techniques for sample surveys. Topics include simple, stratified and systematic random sampling, ratio and regression estimation, sub-sampling with units of equal and unequal size, double-multistage and multiphase sampling, non-sample errors and non-respondents.

**PREREQUISITES: STAT 2060.03**

**CROSSLISTED: MATH 3380.03**

**FORMATS: Lecture**

---

**STAT 3450 Statistical Learning with R**

**CREDIT HOURS: 3**

This course teaches students how to use the R software environment to analyze data of various types. Students will be given the opportunity to write their own programs to explore data and solve meaningful problems. Emphasis will be given to a good understanding of supervised/unsupervised learning models, their founding principles, and to data processing and interpretation.

**PREREQUISITES: STAT 2450**

**FORMATS: Lecture**

---

**STAT 3460 Intermediate Statistical Theory**

**CREDIT HOURS: 3**

This course provides an intermediate level coverage of statistical theory to provide a framework for valid inferences from sample data. The methods
developed are based on the likelihood function and are discussed from the frequentist, likelihood, and Bayesian approaches. The problems of point estimation, interval estimation and hypothesis testing and the related topics of sampling distributions, sufficiency, and Fisher Information are discussed.

PREREQUISITES: STAT 3360.03
CROSSLISTED: MATH 3460.03
FORMATS: Lecture

STAT 3703 Actuarial Models I
CREDIT HOURS: 3
This class builds on the material in STAT 3360 to develop the theoretical basis for construction and evaluation of actuarial models. Topics covered include survival models, probability distributions, deductibles and limits, and aggregate loss models, with application to insurance. This course covers the part of the syllabus for the professional actuarial examination concerned with the Construction and Evaluation of Actuarial Models.

PREREQUISITES: STAT 3360.03 OR MATH 3360.03
CROSSLISTED: ACSC 3703.03
EXCLUSIONS: STAT 4701.03
FORMATS: Lecture

STAT 3720 Life Contingencies I
CREDIT HOURS: 3
This course introduces the student to the mathematical models for valuation of life contingencies (e.g. life insurance policies). The course covers both the statistical aspects of modelling survival data, and the financial aspects of valuing uncertain future cash-flows.

PREREQUISITES: STAT 3360.03, STAT 2600.03
CROSSLISTED: ACSC 3720.03
FORMATS: Lecture

STAT 3740 Predictive Analytics
CREDIT HOURS: 3
This course teaches students to analyse data in a real-world context, going through all stages of the data analysis: problem formulation; initial data exploration; model selection and validation; and communication of results. It is intended that this course should prepare students for the Society of Actuaries Predictive Analytics examination.

PREREQUISITES: STAT 2450, STAT 3340
CROSSLISTED: ACSC 3740
FORMATS: Lecture

STAT 3750 Credibility Theory
CREDIT HOURS: 3
Credibility theory deals with the difficulty in combining information from two samples, one of which is small but very relevant, the other is large but less relevant. In this course, we will study different approaches to dealing with this problem.

COREQUISITES: ACSC 3703.03
PREREQUISITES: STAT 3360.03
CROSSLISTED: ACSC 3750.03

STAT 4001 AARMS Summer School I
CREDIT HOURS: 3
A Topics class given by leading researchers in the precise field, which varies from year to year. Consult the Department for current details.

PREREQUISITES: Permission of the Honours Advisor
CROSSLISTED: MATH 4001.03

STAT 4002 AARMS Summer School II
CREDIT HOURS: 3
A Topics class given by leading researchers in the precise field, which varies from year to year. Consult the Department for current details.

PREREQUISITES: Permission of the Honours Advisor
CROSSLISTED: MATH 4002.03

STAT 4066 Advanced Statistical Theory I
This course, together with STAT 5067.03 provides a solid basis in the theory of statistical inference. After a review of some probability and distribution theory, the Bayesian and classical theories of estimation and testing are introduced.

PREREQUISITES: STAT 3460.03 or instructor’s consent
CROSSTLISTED: MATH 4066.03/5066.03, STAT 5066.03
FORMATS: Lecture

STAT 4100 Survival Analysis
CREDIT HOURS: 3
This course is an introduction to survival analysis methods and will cover both the statistical theory behind the methods, and the application of various techniques. Topics to be discussed include survivorship and hazard functions and their relationship to lifetime distributions and densities; modes of censoring; the Kaplan-Meier estimate of the survivor function; parametric survival time distributions; proportional hazard models and their semi-parametric estimation; accelerated life models, log rank tests, including the Mantel-Haenszel test; and goodness of fit measures.
PREREQUISITES: STAT 3340.03 and STAT 3460.03, or equivalent
CROSSTLISTED: STAT 5100.03
FORMATS: Lecture

STAT 4130 Bayesian Data Analysis
CREDIT HOURS: 3
This course introduces the student to the Bayesian methods in applied statistics. The course covers all the fundamental concepts of Bayesian methods, and works from the simplest ideas (characterizations of probability; comparative inference; prior, posterior and predictive distributions) up through hierarchical modes applied to various data. Computational methods include MCMC for posterior simulation.
PREREQUISITES: MATH 2030.03 or Math 1030.03, and STAT 3460.03
EXCLUSIONS: STAT 5130.03
FORMATS: Lecture

STAT 4300 Topics in Statistics and Probability
CREDIT HOURS: 3
CROSSTLISTED: STAT 5300.03

STAT 4350 Applied Multivariate Analysis
CREDIT HOURS: 3
The course deals with the stochastic behaviour of several variables in systems where their interdependence is the object of analysis. Greater emphasis is placed on practical application than on mathematical refinement. Topics include classification, cluster analysis, categorized data, analysis of interdependence, structural simplification by transformation or modelling and hypothesis construction and testing.
PREREQUISITES: STAT 3340.03 and MATH 2135.03 or 2040.03
CROSSTLISTED: STAT 5350.03
FORMATS: Lecture

STAT 4360 Robust Statistics
CREDIT HOURS: 3
Robust statistics are those which provide protection against violation of assumptions underlying the statistical procedure. We will develop basic concepts including sensitivity, influence and breakdown of estimates and tests. Classical procedures will be evaluated in terms of robustness and alternate techniques developed based on weighted least squares and/or median based generalizations. We will also consider robust techniques in time series.
PREREQUISITES: STAT 3340.03 and STAT 3460.03
CROSSTLISTED: STAT 5360.03

STAT 4370 Stochastic Processes
CREDIT HOURS: 3
The theory and application of stochastic processes. Topics to be discussed include the Poisson process, renewal theory, discrete and continuous time Markov processes, and Brownian motion. Applications will be taken from the biological and physical sciences, and queuing theory.
PREREQUISITES: STAT 3360.03 or instructor's consent
CROSSTLISTED: STAT 5370.03
FORMATS: Lecture
STAT 4390 Time Series Analysis
CREDIT HOURS: 3
Time series analysis in both the time and frequency domain is introduced. The course is applied and students are required to develop their own computer programs in the analysis of real time series with an emphasis on oceanographic data. Topics to be discussed include the nature of time series, stationarity, auto and cross covariance, ARMA models, spectral analysis, and state space models (the Kalman filter and the particle filter).
PREREQUISITES: STAT 3340.03, 3360.03, STAT 3460.03, or instructor's consent
CROSSLISTED: OCEA 4210.03
EXCLUSIONS: OCEA 5210.03, STAT 5390.03
FORMATS: Lecture

STAT 4570 Statistical Genetics
CREDIT HOURS: 3
Statistical aspects of several ideas in genetics are discussed. Topics of some or all the following: gene frequency estimation, Hardy-Weinberg equilibrium, linkage analysis, association studies, quantitative traits, microarrays.
PREREQUISITES: STAT 3460 or permission of instructor
CROSSLISTED: STAT 5570
FORMATS: Lecture

STAT 4620 Data Analysis
CREDIT HOURS: 3
A variety of statistical models which are useful for the analysis of real data are discussed. Topics include: generalized linear models, such as logistic regression and Poisson regression, models for multidimensional contingency tables, ordered categories and survival data.
PREREQUISITES: STAT 3340.03, 3460.03, or instructor's consent
CROSSLISTED: STAT 5620.03
FORMATS: Lecture

STAT 4690 Computational Statistics
CREDIT HOURS: 3
The advances in computing over the past decades have opened up possibilities for statistical analyses that were not previously possible. However, increasing model complexity can exceed even today's huge computational resources. This course covers techniques for handling computationally intensive tasks arising from statistical analysis of data.
PREREQUISITES: STAT 2450.03, STAT 3460.03
EXCLUSIONS: STAT 5690.03
FORMATS: Lecture

STAT 4701 Actuarial Models I
CREDIT HOURS: 3
This course develops the theoretical basis of a number of probabilistic models useful for the study of life contingencies, including survival models, Markov chains, Poisson processes, with application to life insurances and annuities.
PREREQUISITES: STAT 3360.03
FORMATS: Lecture

STAT 4703 Actuarial Models II
CREDIT HOURS: 3
This course focuses on the development of statistical methods for the estimation and validation of actuarial models. Topics to be discussed include: methods of estimation, properties of estimators, goodness of fit, credibility theory, survival estimators, measures of risk, estimation of severity and ruin models.
PREREQUISITES: STAT 3703 or ACSC3703
CROSSLISTED: ACSC 4703.03
FORMATS: Lecture

STAT 4720 Life Contingencies II
CREDIT HOURS: 3
STAT 3720.03 covers the basics of life contingencies in a simple standard situation. In this course we extend this to deal with a number of common additional features that affect life insurance policies. We introduce multiple-state models, pensions, interest rate risk and profit testing.
PREREQUISITES: STAT 3720.03
CROSSLISTED: ACSC 4720.03
FORMATS: Lecture
STAT 4950 Honours Research Project
CREDIT HOURS: 3
This course is required for students in the honours program. It will consist of a research project carried out under the supervision of a faculty member. The results of the research will be submitted to the statistics honours advisor as a written report. Students wishing to enrol in this course must have a suitable background in statistics, and must meet with, and obtain the approval of, the statistics honours co-ordinator before undertaking their project.

STAT 8892 Co-op Work-Term II
CREDIT HOURS: 0

STAT 8893 Co-op Work-Term III
CREDIT HOURS: 0

Centres and Institutes
Introduction
A number of centres and institutes for study and research in specific fields are based at the University. These are:

Atlantic Institute of Criminology
Director: D.H. Clairmont, BA, MA, PhD
The Atlantic Institute of Criminology (AIC) is a research institute that is heavily policy-oriented in the field of crime and the criminal justice system. Its mandate is to foster the exchange of information among researchers and policy makers in those areas. Consultative services are provided to fellow scholars and researchers, including graduate students and visiting professors, with respect to the planning and execution of research projects and related undertakings. The AIC is an entity that itself conducts extensive research in criminology, especially with respect to policing, the administration of justice, youth justice issues, race, ethnic and equity issues in justice. It has produced a significant body of policy-oriented research on Aboriginal and African-Canadian justice issues. The AIC Dalhousie website (Dalhousie - SOSA-AIC), which is regularly updated, provides a clear indication of the research products of recent years even though the website is largely restricted to research output that does not include articles in professional journals or edited books available elsewhere.

Atlantic Research Centre (ARC)
Director: Neale Ridgway
Phone: (902) 494-7133
Website: http://arc.medicine.dal.ca/

Established in 1967, the ARC conducts basic biomedical research in the fields of lipid metabolism and cell signalling, areas of fundamental importance to a variety of disorders including cancer, neurological, heart and infectious diseases. It also provides education and expertise in these fields to undergraduate and graduate students, other researchers, and the general public. The ARC houses state-of-the-art facilities for biochemical and molecular biological research. The Centre’s staff hold appointments in the Departments of Pediatrics and Biochemistry and Molecular Biology in the Faculty of Medicine. Research at the ARC is supported by agencies such as the CIHR, NSERC, CFI, Heart and Stroke Foundation, National Cancer Institute, Atlantic Innovation Fund, and the IWK Health Centre.
Beatrice Hunter Cancer Research Institute

Director: Dr. Gerry Johnston
Administrative Director: Cindy Pettipas
Telephone: 902 494-4513
Fax: 902 494-8472
Email: cpettipas@dal.ca
Website: www.bhcri.ca

In 1999, Beatrice Hunter bequeathed $12.5 million to the Dalhousie Medical Research Foundation for cancer research, in memory of her parents, Dr. Owen and Mrs. Pearle Cameron. The bequest was placed in the Cameron Endowment Fund, with the annual earnings supporting cancer research at Dalhousie Faculty of Medicine. Early on, Beatrice Hunter’s generosity sparked the creation of the Dalhousie Cancer Research Program (DCRP) that united key players within charitable, University and government sectors to create and support a thriving cancer research community. Over a short period of time, talented researchers and trainees were recruited to the region and collectively now secure millions of dollars of cancer research funding from outside granting agencies.

In 2009, the DCRP and its funding partners took the next bold step to become the Beatrice Hunter Cancer Research Institute (BHCRI), which was created to foster a more powerful, productive and collaborative cancer research environment throughout Atlantic Canada. The Institute provides regular workshops, lectures and symposia that serve as a common forum for researchers to share ideas and forge new collaborations within Atlantic Canada and beyond. The Institute also provides a key entry point for members of the public who want to learn more about cancer research in the region. The Institute represents the major resource within our region for those seeking training and careers in cancer research as well as those interested in supporting cancer research. The BHCRI has over 300 active members (both principal investigators and trainees at all career stages) throughout Atlantic Canada. BHCRI is supported by advisory committees populated by cancer experts and informed members of the public that provide advice on all aspects of cancer research and training. BHCRI receives financial support from a broad range of local and national organizations and the Institute takes responsibility for allocation of financial resources that support all aspects of cancer research and training, with funds allocated through peer-review processes that meet international standards.

Researchers within the Beatrice Hunter Cancer Research Institute share a collective vision and work toward the same goal: to save lives and ease the burden of cancer on individuals, families and society. Even though our funding comes from many sources, all of this funding stays in Atlantic Canada to build and support cancer research within our own region.

The Beatrice Hunter Cancer Research Institute was approved as an institution by Dalhousie on November 29, 2017.

Brain Repair Centre

Chair: Dr. Victor Rafuse, Director
Website: http://www.brainrepair.ca/

The Brain Repair Centre (BRC) is a collaboration of Dalhousie University, the Capital District Health Authority and the IWK Health Centre. The BRC is a multi-disciplinary unit focusing on research that can lead to the diagnosis, treatment, and repair of the brain to overcome the effects of neurological and psychiatric disorders such as Parkinson’s disease, Huntington’s disease, Amyotrophic Lateral Sclerosis (ALS), Epilepsy, Muscular Sclerosis (MS), stroke and spinal cord injury. The BRC grew out of the clinical Neural Transplantation Program, collaboration between basic neuroscientists and clinicians interested in treating Parkinson’s disease. The success of the Neural Transplantation Program led clinical and basic neuroscientists to decide to form the Brain Repair Centre. The BRC was formed in 1999 and has focused on stem cell transplantation, Parkinson’s disease, spinal cord injury, psychotic disorders, stroke and neuroimaging as areas of innovation at Dalhousie University, Capital Health and the IWK Health Centre.

Examples of BRC achievements include:

- Attracted capital funding from private donors, institutions and the public sector to support construction and fit-up of the new Life Sciences Research Institute. When the LSRI is completed, the Brain Repair Centre will become the anchor tenant of this new research and commercialization building with state-of-the-art research, equipment and facilities.
- Establishment of collaboration agreements with research teams at McLean Hospital/Harvard University; Jilin University, China; Cardiff University, Wales; and Neurodyn, Inc.
- Establishment of a $12 million magnetic resonance imaging facility with the national Research council’s Institute for Biodiagnostics (NRC-IBD).
- In 2006, the BRC was awarded $5.5 million for infrastructure from the Canadian Foundation for Innovation, the largest such award to date in Atlantic Canada. Also in 2006, BRC received a $3 million Atlantic Innovation Fund award for research, a follow-on to an earlier $3 million research award.
- Dr. David Clarke, a member of the Brain Repair Centre used a virtual model of a patient’s brain to remove a simulated brain tumour before removing the actual tumour the following morning. Developed by a partnership of the National
Research Council and a team of about 50 people in 10 Centres across Canada, this was the first such surgery performed in the world.

- Medtronic Canada, Capital District Health Authority, QEII Foundation, and the Brain Repair Centre established a Canadian Centre of Excellence and Training at the Halifax Infirmary. This new $3.5 million centre provides important new clinical facilities for training and development in imaging, spinal cord and neuromodulation.
- In the neurotransplantation field, the BRC is unique in Canada and one of only four centres worldwide involved in clinical application of neural transplantation, with the “Halifax Protocol” accepted as the world gold standard.
- The BRC is an innovative collaboration that integrates its research expertise with pioneers in the fields of imaging, neurology, stem cell neurobiology, vision, molecular neurobiology, pharmacology, psychiatry, clinical trials and cognitive neuroscience.
- The BRC brings together the expanding fields of neuroimaging and stem cell technologies with application to the treatment of neurological and psychiatric disorders.
- The BRC is the Atlantic Canada presence in the Stem Cell Network, a National Centre of Excellence in stem cell research.

The BRC places emphasis on moving basic science research from the bench to the clinical bedside and from the bedside back to the bench. A key objective of the BRC is to produce innovative technologies that will be commercialized.

**Canadian Center for Vaccinology**

**Director:** Scott Halperin, MD  
**Associate Directors:** Robert Anderson, MD  
Joanne Langley, MD  
Janice Graham, PhD

**Website:** [www.centerforvaccinology.ca](http://www.centerforvaccinology.ca)  
**Email:** ccfv@iwk.nshealth.ca  
**Facebook:** CCFVhfx  
**Twitter:** @VACCres  
**Phone:** 902 470-8141  
**Fax:** 902 470-7232

**Vision**

CCfV is an integrated collaborative multidisciplinary vaccine research team committed to excellent research. CCfV unites the biomedical and clinical sciences with the social sciences and humanities to effectively span the research continuum from basic discovery to translation into useful vaccines to prevent disease in humans and to change population and public health outcomes.

**Organization**

Activity within CCfV is organized into three groups

- Vaccine Discovery Group  
- Vaccine Evaluation Group  
- Health Policy & Translation Group

An **Advisory Committee** of CCfV investigators and external advisors provides counsel on the strategic direction and objectives of CCfV research.

**Members**

Anyone with an interest in vaccine-related research may apply for membership at [http://www.centerforvaccinology.ca/about-ccfv/join-us/](http://www.centerforvaccinology.ca/about-ccfv/join-us/)

For a list of current members go to [http://www.centerforvaccinology.ca/about-ccfv/members/](http://www.centerforvaccinology.ca/about-ccfv/members/)

CCfV is made possible by a continuing collaboration of Dalhousie University, the IWK Health Centre, and Capital Health. The CCfV’s 20,000 square foot facility in the IWK Health Centre includes laboratories for microbiological and molecular research,
ambulatory and inpatient clinical trial facilities, data analysis, training and conference space. It was founded in 2007 with financial assistance from the Canada Foundation for Innovation, the Nova Scotia Research and Innovation Trust, and the Government of Nova Scotia’s Department of Economic Development, among others. The Clinical Research/Vaccine Challenge Unit, which opened in 2009, was made possible by additional funding from Sanofi Pasteur.

Canadian Institute of Fisheries Technology (CIFT)
Director: A. T. Paulson, PhD
Phone: (902) 494-3280
Fax: (902) 420-0219
Website: http://cift.engineering.dal.ca

CIFT was established in 1979 at the former Nova Scotia Technical College (later TUNS). The federal Department of Fisheries and Oceans provided much of its early specialized laboratory and seafood pilot scale processing equipment, and Industry Canada provided start-up funding and designated CIFT a centre of excellence. As a government-approved laboratory for advanced technology, it also provides R&D services on a cost-recovery basis to industry and to various governmental agencies. The Institute promotes technology transfer and the development of advanced technologies aimed at more effective commercial utilization of both marine and terrestrial resources in Canada and throughout the world.

In addition, CIFT offers unique opportunities for post-graduate training and research through the Food Science program. Major areas of emphasis are: food biochemistry and microbiology; fats, oils, nutraceuticals and other bioactives; physical properties of foods; fish/food process engineering; food safety and preservation; food rheology, food fermentation and beverage science.

Facilities
CIFT is located in the MacDonald Building of Sexton Campus at 1360 Barrington Street in downtown Halifax. The Institute’s facilities include:

- fats and oils laboratory
- food chemistry laboratory
- food development laboratory
- sensory evaluation laboratory
- food process engineering pilot plant
- low temperature storage facility
- food physical properties laboratory
- food microbiology laboratory

These areas contain specialized instrumentation and food processing equipment to enable experimental processing, laboratory analysis, and product storage evaluation. In addition to a computer-controlled cold-storage facility, the pilot plant is equipped for experimental processing including freezing, chilling, thermal processing, drying, centrifugal separation, and meat-bone separation.

The pilot plant is well equipped for thermal processing with an automated retort capable of steam, steam-air, or water immersion processing research. The specially designed cold-storage facility is computer controlled and particularly useful for the study of changes in foods as a result of frozen storage history. The pilot plant is also equipped with a custom-built computer-controlled heat pump dryer that is used in food dehydration experiments.

Specialized laboratory equipment includes: automated high performance and fast protein liquid chromatography systems, gas chromatography/mass spectroscopy system, preparative ultracentrifuge, multi-purpose refrigerated centrifuge, microtube centrifuge, analytical and preparative electrophoretic/iseoelectric focusing equipment, pulsed field electrophoresis system, thermocycler, DNA gel electrophoresis, Hoefer Daltix for 2D electrophoresis, Image Master 2D elite software, capillary electrophoresis system, ultra-low temperature freezer, universal texture testing machine, various colorimeters, U.V. and visible spectrophotometer, spectrofluorometer, electrokinetic analyzer, workstation for mathematical modelling and computer simulation, Linkham shearing stage/microscope, Nikon microscope (various attachments), controlled stress rheometer with a high temperature/pressure attachment, controlled rate rheometer, Viscomat, and a rolling ball viscometer.

Educational Opportunities
Graduate (MSc and PhD) programs are available through the Food Science and Technology program. Also post-doctoral research opportunities are offered. Graduate level class work and research opportunities relate to food science, seafood processing technology, marine oils, engineering design, packaging technology, fish post-mortem biochemistry, food microbiology, food rheology and food process science. Students with degrees in food science, engineering, chemistry/biochemistry, microbiology or biology are invited to apply.
Centre for African Studies
Phone: (902) 494-3814/494-1377
Fax: (902) 494-2105
Director: Theresa Ulicki, PhD

The mandate for this Centre is under review.

This centre, established in 1975, advances instruction, publication, research and development education programs in African Studies. Associated faculty offer classes through the Departments History, International Development Studies, Political Science, French, Sociology and Social Anthropology and Philosophy. The Centre organizes academic and informal seminars and public policy conferences on Africa and encourages interdisciplinary interaction at all levels on African subjects and issues. It co-operates with the International Development Studies department and with the International Research and Development office.

Centre for Comparative Genomics and Evolutionary Bioinformatics
Director: Andrew J. Roger, PhD
Coordinator: Wanda Danilchuk
Phone: (902) 494-2620
Fax: (902) 494-1355
Website: http://www.cgeb.dal.ca

The Centre for Comparative Genomics and Evolutionary Bioinformatics (CGEB) at Dalhousie University encompasses an interdisciplinary group of researchers in the Faculties of Medicine, Science and Computer Science. Although microbial genome evolution and diversity is at the heart of many of the CGEB researchers’ activities, our work spans computational biology, computer science, statistical modeling and comparative genomics, with a strong focus on method and theory. The application of DNA sequencing technologies to characterize the genomes of a wide diversity of microbes has generated vast quantities of genome sequence data. Now the intellectual challenge is to develop from this enormous resource more comprehensive and theoretically robust phylogenetic, genetic and ecological models to further our understanding of the many roles of microbes in the biological world.

CGEB researchers are united by the common goal of using this vast resource of genomic information to elucidate evolutionary patterns and processes: the pathways by which microbial organisms have diversified over the last 3.5 billion years of Earth’s history and through which they continue to shape the global environment. Only through the integration of experimental genomic approaches and sophisticated bioinformatic modeling will we be able to achieve this goal.

CGEB researchers and trainees are supported by grants from the Canadian Institutes for Health Research (CIHR), Natural Sciences and Engineering Research Council (NSERC), and the Nova Scotia Health Research Foundation (NSHRF). The Centre itself is supported by funding from the Tula Foundation (http://www.tula.ca), the Faculties of Medicine, Science, and Computer Science, and the Provost and Vice President Academic. CGEB is also supported by a large grant from the Tula Foundation (http://www.tula.ca) that provides funds for training top-notch postdoctoral and graduate trainees in the CGEB research specialties. CGEB also has a regular seminar series that brings world renowned scientists to speak at Dalhousie University and interact with faculty members and trainees.

Centre for Environmental and Marine Geology
Contact: Ann Bannon, Administrator

This Centre was originally founded as the Centre for Marine Geology in 1983 to promote interdisciplinary studies of various types of problems in marine Geology, capitalizing on our unique position in Canada with links to related departments such as Oceanography, Physics, Biology, the Bedford Institute of Oceanography and our hosting of the Canadian office of the Ocean Drilling Program. Since 1983 the role of the Centre has changed, reflected in the new name, which better describes the work being done now where marine geology is combined with environmental problems. We have three new faculty that expand our expertise into new chronological techniques and permafrost as well as strengthening our capacity in the petroleum-related environmental geology. Some of the objectives of the Centre are to: 1) continue to expand our participation in a revitalized east coast offshore energy related problems; 2) continue our climate-change work with a variety of approaches both offshore and on land; 3) expand into Arctic regions both with major oceanographic and shore-based programs; and 4) expand our capacity to help solve some of the many environmental geology problems associated with urbanization.

Centre for European Studies
The Centre for European Studies was established in 2007 to promote research on all aspects of European society and its relations with the rest of the world. The Centre facilitates the work of Europeanist scholars at Dalhousie, including the participating Canada Research Chairs in European Studies, enables research collaboration with scholars from Canada and around the world on projects related to Europe and the European Union.

**Centre for Innovation in Infrastructure**

Director: John Newhook, PhD, PEng  
Location: Room B233, Sexton Campus  
1360 Barrington Street  
PO Box 1000  
Halifax, NS B3J 2X4  
Phone: (902) 494-2847  
Email: forgeron@dal.ca

The Centre for Innovation in Infrastructure is an industry-oriented research centre with the Faculty of Engineering and with strong affiliations with the Department of Civil and Resource Engineering. Established in 1983 as the Nova Scotia CAD/CAM Centre, the Centre originally focused on assisting Atlantic Canadian industry with the integration of computer-aided manufacturing and computer-aided design technology in their operations. Since the 1990s, the Centre has continued to evolve to meet the needs of industry in other areas and to take a more active role in research and development in civil infrastructure.

Today the Centre acts as a focal point for research, innovation, and technology transfer in Civil Infrastructure related areas. The major funding partnerships are with the Atlantic Canadian departments of transportation, industries related to bridge and structural engineering, and with companies developing new materials and products for infrastructure.

Our combined areas of expertise and research interests include:

- Structural Analysis and Design
- Structural Health monitoring
- Bridge engineering and innovations
- Soil-steel structures
- Fibre reinforced polymers
- Fibre reinforced concrete
- NDT of bridge decks and pavements
- Sustainable asphalt technology

The Centre has acquired and maintains significant testing equipment related to these research areas and contributes to the maintenance and operation of the research facilities within the Department of Civil and Resource Engineering.

**Centre for Research in Sustainable Supply Chain Analytics (CRSSCA)**

Location: 6100 University Avenue, Room 4065  
PO Box 15000  
Halifax, NS B3H 4R2  
Director: Dr. M. Ali Ülkü  
Phone: (902) 494-3848
Email: crssca@dal.ca
Fax: (902) 494-1107
Website: www.dal.ca/crssca

The Centre for Research in Sustainable Supply Chain Analytics (CRSSCA), housed in the Rowe School of Business - Faculty of Management, is the supply chain research hub in Eastern Canada. We conduct interdisciplinary research that sheds light on complex issues in supply chain management. Focusing on social, environmental, economic and cultural sustainability, CRSSCA aims to create new knowledge in prescribing solution models for data-driven industrial problems, devise analytical tools for better decision-making, and develop insights into the intricate relationships between supply chain operations, green logistics (global trade, inventory, process and product design, procurement, manufacturing, transportation), and sustainable consumption. CRSSCA supports annual workshops on Supply Chain and Logistics Management (SC&LM), Bachelor of Commerce Major in SC&LM, and involvement of students in research activities.

**Centre for Marine Vessel Development and Research (CMVDR)**
Contact: Josh Leon, Dean of Engineering

The mandate for this Centre is under review.

**Centre for the Study of Security and Development**
Director: Brian Bow

Established in 1971 the Centre is concerned with teaching, research, publication, policy advice and other professional activities in the various aspects of foreign policy, security studies, development studies, and international politics.

The Centre’s work is concentrated in the areas of Canadian and comparative maritime security and oceans policy, Canadian and American foreign and security policies, and global security and international development. Its geographical specializations include Canada, North America, Europe, and the South (especially Africa, Asia, and the Caribbean). The Centre encourages activities in these areas by Faculty, Research, and Doctoral Fellows, and advances communication among local and international communities in these fields through seminars, workshops conferences and colloquia, often in collaboration with local, national, and/or international organizations. It publishes occasional papers and monographs on Maritime Security, Canadian Defence and Security, and Global Security issues.

The Centre is an integral part of the Department of Political Science. Centre faculty offer classes through the Department in foreign and defence policy, international relations and development, and maritime affairs at both undergraduate (majors and honours) and graduate (MA and PhD) levels. They also supervise masters and doctoral theses in these fields.

For further information, consult the Centre’s website: [dal.ca/sites/cssd.html](http://dal.ca/sites/cssd.html).

**Centre for Transformative Nursing and Health Research**
Director: Dr. Ruth Martin-Misener
Research Coordinator: Julie Barry
Location: School of Nursing, 5869 University Avenue, Halifax NS B3H 4R2
Phone: (902) 494-6125

The Centre for Transformative Nursing and Health Research is a designated Research Centre at Dalhousie University. The vision of the Centre is to undertake collaborative research that develops, enhances, expands and disseminates evidence and knowledge to inform ways to improve and sustain people’s health and wellbeing. The mission of the Centre is to generate nursing research and inspire discovery that is methodologically sound, actionable, and dedicated to improving outcomes for those requiring health care, their providers and the overall system. Through strong research partnerships and extensive research capacity building initiatives, the Research Centre will be acknowledged as a key resource for health system planning. This collective strength creates a more research-intensive environment, transforming the culture of health research within and beyond the School so that evidence and the quest for new knowledge are well integrated into teaching and clinical practice. The overall improved scholarly environment ensures graduates engage in original research, advance professional knowledge and are well positioned to be leaders in practice and health system change.
In concert with the School of Nursing’s transformation strategy, Academic Plan and Research Strategy and informed by Boyer’s Model of Scholarship, the Centre’s activities will focus on four research pillars: the health needs of people, health workforce and health systems planning, marginalized populations and health equity, and knowledge translation.

Centre for Water Resources Studies

Director: Graham Gagnon, PhD, PEng
Location: Office D-514

1360 Barrington Street

Phone: (902) 494-3268
Email: cwrs@dal.ca

The Centre for Water Resources Studies was established in December 1981, by a resolution of the Board of Governors (TUNS). The objectives of the Centre are to carry out applied research which contributes to the effective and sustainable protection of water resources in Atlantic Canada, nationally and internationally, and to facilitate the transfer of new knowledge to potential users. Research programs directed by the Centre address the design of cost-effective on-site wastewater systems, soil erosion processes, drinking water treatment, the use of roofwater cisterns for domestic water supply, eutrophication, watershed management and the computer modeling of hydrodynamic and hydrochemical processes. The Centre also has a number of research advisory panels, which involve professionals from industry, government and academia in applied research related to water use and water management.

Facilities
The Centre for Water Resources Studies is located on the fifth floor of “D” Building on Sexton Campus. Laboratory and office space is available for specific graduate research topics, as well as ongoing research carried out by Centre personnel. Analytical equipment includes instrumentation for determining low levels of major ions and nutrients, as well as trace quantities of metal ions in water. The Centre has apparatus for laboratory investigation and pilot scale testing of innovative water treatment methods using Dissolved Air Floatation (DAF) and ozonation and has worked with local consultants and municipalities to develop new applications of the technologies. The Centre is a North American leader in the development of on-site sewage disposal and has had an active research program in this area since 1987. In conjunction with the Faculty of Agriculture, the Centre has a field laboratory investigating sloping sand filters and septic disposal.

Educational Opportunities
The Centre co-operates with academic units in the training of undergraduate and graduate students who have an interest in water resources. The Centre also participates in the program leading to a dual degree in water resources engineering and planning, in conjunction with the School of Planning into the Faculty of Architecture and Planning.

Children and Youth in Challenging Contexts Institute

Director: Dr. Michael Ungar

The Children and Youth in Challenging Contexts (CYCC) Institute is an interdisciplinary research initiative and a network of Canadian and international researchers committed to making a lasting difference in the lives of vulnerable children and youth. CYCC Institute researchers examine the political, social, psychological and biological factors that pose serious risks to children and youth exposed to adversity across contexts and cultures. Through interdisciplinary collaboration and innovation, the Institute promotes change at the program and policy level that will improve the protection and well-being of young people around the world. More than 200 policy makers, mental health practitioners, directors of local and international NGOs, law enforcement officers, Aboriginal child welfare advocates, national defence personnel, and researchers are among the community partners who provide leadership to, and benefit from, the work of the Institute.

Clean Technologies Research Institute

Director: Daniel Boyd, PhD
Administrative Offices: 6414 Coburg Road

PO Box 15000

Halifax, NS B3H 4R2

Phone: (902) 494-6373
Established in 2002, Clean Technologies Research Institute is made up of over 90 faculty members in six faculties (Science, Engineering, Dentistry, Medicine, Architecture and Planning and Health). The goals of the Institute include advancing the collective interdisciplinary research efforts in materials science and engineering at Dalhousie University, facilitating interdisciplinary teaching in materials science within the existing discipline structure, and enhancing interactions between materials researchers at Dalhousie University with relevant government laboratories and industry, especially within the region. The Institute leads collaboration within the university on interdisciplinary applications to funding agencies for major equipment and research infrastructure, and collaborates with external organizations to pursue research opportunities.

All Dalhousie University faculty members carrying out research in the area of materials are eligible to be Members of Clean Technologies Research Institute. Postdoctoral fellows and graduate students associated with these research groups are invited to become Associate Members of Clean Technologies Research Institute.

In addition to equipment operated by individual members of the Institute, Clean Technologies Research Institute has established (2003) the Facilities for Materials Characterization, an $11 million suite of instruments managed by the Institute.

The equipment includes:

- High-field solid-state NMR spectrometer (managed by the Nuclear Magnetic Resonance Research Resource)
- Scanning electron microscope
-Focused ion beam
- X-ray photoelectron spectrometer (XPS)
- Secondary ion mass spectrometer (SIMS)
- Physical property measurement system (PPMS)
- Scanning thermal microscope (SThM)
- Hot press
- Grindo Sonic
- High-speed motion recorder/analyzer
- FT-Raman spectrometer

These facilities are open to external users. Please contact IRM@dal.ca for details.

**Dalhousie Institute for Society and Culture (DISC)**

**Director:** Associate Dean, Research in the Faculty of Arts and Social Sciences  
**Email:** discfass@dal.ca  
**Website:** http://arts.dal.ca/Research

Established in 2008, the Dalhousie Institute on Society and Culture serves as the virtual home for the many divergent research activities and initiatives within the Faculty of Arts and Social Sciences. Its primary function is to support research within the Faculty through various fellowship programs, publicity and fund raising initiatives, publishing ventures, conferences and lecture series, and cross-disciplinary exchanges.

The Institute encompasses two broad and overlapping research clusters: **Societies in Local, National, and Global Contexts**, and **Cultural Representations and Presentations**. The former cluster aims to develop new knowledge about political, social, and economic transformations, about national and regional identities, and about global relations, whereas the latter seeks to investigate and preserve cultural traditions, literatures, and languages, to foster studies and theories of cultural identity, to stimulate artistic innovation, to examine the shaping influence of beliefs and religions, and to contribute to the cultural life and profile of the province. These two clusters, with a flexibility and breadth unequalled in Eastern Canada, are uniquely equipped to analyze social and cultural change.

**Global Health Office**

**Director:** Shawna O’Hearn  
**Location:** C-241, 5849 University Avenue  
**PO Box 15000**
Working through an interprofessional lens, the Global Health Office is committed to training global health leaders who strengthen health systems for vulnerable populations in Canada and abroad. The office prepares students, residents and faculty doing clinical electives, training or research with our international partners as well as leads local and global electives.

- Events focusing on relevant and timely global health issues are organized through the office including global health rounds, speaker series, conferences.
- Opportunities to become involved in research and mentorship.
- A certificate in “Advocates in Global Health”.
- Annual awards are presented to a student, resident and faculty member who demonstrate leadership in global health
- Partnerships with organizations strengthen the global reach including CSIH (Canadian Society for International Health), CCGHR (Canadian Coalition for Global Health Research), National Network on MNCH (Maternal, Newborn and Child Health), ACIC (Atlantic Council for International Cooperation), GHEC (Global Health Education Consortium), and International Centre (Dalhousie)

Health Law Institute

Director: Constance MacIntosh, BA, MA, LLB
Location: Dalhousie University

6061 University Avenue

PO Box 15000

Halifax, NS B3H 4R2

Phone: 902 494-6881
Email: hli@dal.ca
Website: http://www.dal.ca/hli

An Interdisciplinary Institute of the Faculties of Law, Medicine, Health, and Dentistry, the Institute is committed to the advancement of health law and policy and the improvement of health care practice and health systems through scholarly analysis, professional education, and public service. Its objectives are:

1. To foster strong and innovative health law and policy scholarship by:
   - cultivating interdisciplinary health law and policy research networks
   - engaging in principled analysis of both recognized and emerging areas of health law and policy
   - enabling knowledge transfer

1. To advance health law and policy education by:
   - designing and implementing education programs for law, medicine, health professions and dentistry students
   - providing continuing education opportunities for health professionals and legal practitioners

1. To serve the public in our areas of expertise by:
Healthy Populations Institute

Managing Director: Maureen Summers, MSc
Scientific Director: Lois Jackson, PhD

Phone: (902) 494-2240
Fax: (902) 494-3594
Website: www.dal.ca/hpi

The Healthy Populations Institute or HPI (formerly Atlantic Health Promotion Research Centre, AHPRC) is a leading Canadian health promotion research centre based at Dalhousie University. HPI was established in 1993 to conduct interdisciplinary, collaborative population health and prevention research that informs policies and programs to improve the health and well-being of Canadians.

The centre is conducting research on health services and health systems, healthy eating and physical activity, knowledge translation, prevention of chronic illness and disability, oral health of seniors, youth obesity, aboriginal health, and harm reduction.

The HPI is currently supported by the Faculties of Health, Dentistry, and Medicine, and the Office of the Provost and Vice President Academic at Dalhousie University. Support for specific research projects comes from agencies such as Canadian Institutes for Health Research, Social Sciences and Humanities Research Council of Canada, Nova Scotia Health Research Foundation, and charitable sector research institutes, and private foundations.

Our research associates hold appointments in the Faculties of Health, Architecture, Management, Medicine, Dentistry and Science.

Institute for Big Data Analytics at Dalhousie University

Director: Dr. Stan Matwin
Location: Goldberg Computer Science Building
6500 University Avenue
PO Box 15000
Halifax, NS B3H 4R2
Phone: (902) 494-4320
Email: bigdata@cs.dal.ca
Website: https://bigdata.cs.dal.ca

Big data is not a single breakthrough invention, but rather a coming together and maturing of several technologies: huge, inexpensive data harvesting tools and databases, efficient, fast data analytics and data mining algorithms, the proliferation of user-friendly data visualization methods and the availability of affordable, massive and non-proprietary computing. Using these technologies in a knowledgeable way allows us to turn the masses of data that are created daily by businesses and government into an important asset that will result in better, more informed decisions. This could lead, for example, to intelligent, personalized electric power pricing for consumers, to optimized port traffic management or to the discovery of interesting patterns of migrations in marine life.
The Institute for Big Data Analytics (Big Data @ Dal) acts as a catalyst and a container in which a number of Dalhousie researchers and internationally renowned experts in all of the above areas can work together on Big Data.

The Institute has three main goals. Firstly, we want to become an international hub of excellence in big data research - a place to which scientists will come to work on interesting problems, but also in search of interesting, real-life applications. Our second goal is to make the Institute very relevant to local industries in Nova Scotia, and in Canada. To achieve this goal, we want to focus - for example - on becoming a world leader in the analytics of marine data and all aspects relating to marine biology, fisheries and shipping. Thirdly, we will develop a focused and advanced training program that covers all aspects of big data, preparing our next generation of researchers and practitioners for this important field of study.

**Law and Technology Institute**

Director: Robert J. Currie, BA, MA, LLB, LLM  
Associate Director: Steve Coughlan, BA, MA, LLB, PhD  
Location: Schulich School of Law  
6061 University Avenue  
PO Box 15000  
Halifax, NS B3H 4R2  
Phone: 902 494-1469  
Fax: 902 494-1316  
Email: lynda.corkum@dal.ca  
Website: www.dal.ca/faculty/law/LATI.html

The Law and Technology Institute was established at the Schulich School of Dalhousie in 2001 to provide teaching, research, and continuing education on technology law issues to students, faculty members, and the practicing Bar. The Institute participates, with the faculties of Computer Science and Management, in Dalhousie’s Master of Electronic Commerce Program, and has been involved in collaborative projects with the private sector and governments on information technology issues. Also, in conjunction with Dalhousie’s Industry Liaison and Innovation Office, the Institute sometimes offers a student placement program in intellectual property and commercialization. Its faculty members provide graduate supervision to students interested in the developing field of technology law, and are active in law and technology organizations, such as IT.Can and the International Society for Law and Technology. Faculty members of the institute are writers of the English edition of IT.Can bi-weekly newsletter. The Institute hosts an Eminent Speakers Series, which brings leading IT lawyers and academics to Dalhousie to share their expertise. The Institute is home to the Canadian Journal of Law and Technology, co-edited by Professors Currie and Coughlan. The CJLT is the pre-eminent technology law review in Canada.

**Classes Offered:**

- Law and Technology  
- Internet and Media Law  
- Privacy Law  
- Intellectual Property Law  
- Information Technology Transactions  
- Entertainment Law  
- Intellectual Property and Commercialization Placement  
- Special Topics on Intellectual Property (IPII)  
- Copyright Law  
- Patent law

Students also have the opportunity to pursue specialized interests in fields such as criminal law, health law and alternate dispute resolution, as they relate to law and technology.

**MacEachen Institute for Public Policy and Governance**
The MacEachen Institute for Public Policy and Governance at Dalhousie University is a nationally-focused, non-partisan, interdisciplinary institute designed to support the development of progressive public policy and encourage greater citizen engagement. The MacEachen Institute is named in honour of Allan J. MacEachen, retired federal cabinet minister and senator and one of Nova Scotia’s most accomplished political leaders.

The MacEachen Institute is a collaboration between Dalhousie’s Faculties of Arts & Social Sciences, Law, Health and Management, as well as the Office of the Vice-President, Research & Innovation. It stimulates debate, discussion and research by engaging thought leaders from across Canada and internationally.

The Institute builds on Allan J. MacEachen’s legacy and passion by promoting vigorous debate on progressive public policy issues, ranging from community and neighbourhood issues to those of national concern.

**Marine & Environmental Law Institute**

Location: Schulich School of Law  
6061 University Avenue

PO Box 15000

Halifax, NS B3H 4R2

Phone: 902 494-1988  
Fax: 902 494-1316  
Email: MELAW@dal.ca

Website: [http://www.dal.ca/law/MELAW](http://www.dal.ca/law/MELAW)

The Institute, which is housed in the Schulich School of Law, carries out teaching, research capacity-building and consultancy activities and also directs the MELP academic specialization, in marine and/or environmental law to JD students. In addition to their scholarly research and publication activities, MELAW faculty and associates carry out research projects and provide advisory services to agencies of the United Nations, international non-governmental organizations, and regional organizations as well as assisting government departments, private sector institutions and non-governmental organizations in Canada and overseas.

The Marine & Environmental Law Institute is home to the editorial office of the Ocean Yearbook. The Ocean Yearbook is a major international interdisciplinary annual, devoted to ocean affairs, published in collaboration with the International Ocean Institute (IOI) in Malta. MELP law students have the chance to gain experience working as research assistants on the Institute’s research projects and workshops, and assisting with editing the Ocean Yearbook.

MELAW supports student collaboration in addressing environmental issues through the Environmental Law Students’ Society (ELSS) and the East Coast Environmental Law Association (ECELAW), a non-governmental organization dedicated to environmental law education and law reform. MELAW encourages interdisciplinary collaborations within the Dalhousie University community including the School for Resource and Environmental Studies (SRES), the Marine Affairs Program (MAP), the College of Sustainability, the International Development Studies Program (IDS), the Ocean Frontier Institute (OFI), the Ocean Tracking Network (OTN) led by the Department of Oceanography and the Institute for Ocean Research Enterprise (IORE). MELAW also participates in national collaborations such as, the OceanCanada Partnership. International linkages include: the Global Forum on Oceans, the IUCN Academy of Environmental Law, the Australia Canada Ocean Research Network (ACORN) as well as numerous other partner institutions in Asia, the Caribbean, Europe, South America, Africa, and the United States.

**Minerals Engineering Centre**

Director: Josh Leon, PhD, PEng  
Location: G Building, Sexton Campus  
1360 Barrington Street

PO Box 15000
The Minerals Engineering Centre was established from the Laboratory for the Investigation of Minerals. The Minerals Engineering Centre provides research, analytical and advisory services to industries, universities, and government bodies in Atlantic Canada, Canada and International. The Centre is located in G Building on Sexton Campus and is affiliated with the Materials Engineering program. The services offered include:

- Sample preparation of ores, soils, silts, rocks, cores, clay fraction and wood pellets
- Size analysis, including screening, sieving, and sub-sieve analysis
- Minerals separation using dense liquids
- Physical and chemical analytical methods using atomic adsorption, XRD, ICP-OES, AA, x-ray fluorescence spectographic, wet chemical techniques and carboy/sulphur analysis
- Analysis of samples including geological, metalliferous ores, industrial minerals, coals, metals, alloys and water
- Mineral processing test work covering the whole range of investigative techniques from bench scale to pilot plant, including crushing, grinding, classification, gravity separation, dense medium separation, magnetic separation, electrostatic separation, flotation, flocculation, thickening, filtration, and drying
- Evaluation of biomass fuels calositic value of raw material and wood pellet.

The Minerals Engineering Centre provides opportunities for undergraduate and graduate students to learn various analytical and testing techniques applicable in their course of studies. It also offers services to faculty members to assist in their teaching and research activities.

Further information may be obtained from the Director of the Centre.

**Neuroscience Institute**

Contact: neuroscience.institute@dal.ca
Website: [http://www.neuroscience.dal.ca](http://www.neuroscience.dal.ca)

The Neuroscience Institute was founded in 1990 to promote and coordinate research in neuroscience, the modern interdisciplinary study of the brain and nervous system.

It serves as an umbrella organization to foster research and training in neuroscience at Dalhousie. A major objective is to increase understanding of the functions of the nervous system in health and disease. To this end, the Institute coordinates the activities of neuroscientists in the Faculty of Medicine, the Faculty of Science, the Faculty of Computer Science and the School of Biomedical Engineering, facilitating collaboration between clinical and basic scientists in these Faculties. Some foci of current research activity include: development and plasticity of the nervous system; cognitive neuroscience; motor control; autonomic function; synaptic function; and sensory physiology. The Institute also provides a vehicle to seek new sources of funding, and encourages new initiatives in all areas of neuroscience research at Dalhousie. In addition, the Institute promotes and coordinates training programs in neuroscience currently offered through its constituent departments at both the undergraduate and graduate levels. It sponsors seminar series annually, and coordinates a variety of community outreach events.

**Norman Newman Centre for Entrepreneurship**

Website: [https://dalinnovates.ca/programs/nnce/](https://dalinnovates.ca/programs/nnce/)

Dalhousie University’s flagship entrepreneurship program is the Norman Newman Centre for Entrepreneurship in Dalhousie’s Faculty of Management. The NNCE fosters an experiential learning environment for students from all faculties interested in entrepreneurship and business creation.

Since 2004, we’ve been cultivating and promoting entrepreneurship and innovation through curriculum, workshops, seminars, and competitions so that students, faculty and members of the community can develop the skills and creativity needed to bring ideas to market.
All of our programs are designed to enhance students’ entrepreneurial knowledge, skills, and networks. The Centre has deep connections to the regional innovation ecosystem that transcend the university, government and industry boundaries.

**NNCE Programs**

**Winter Workshop Series 2021:** Join us for bite-sized sessions designed to give you practical skills to bring you to the next level in your journey in entrepreneurship and innovation. [Learn more here.](#)

**Ready2Launch:** Ready2Launch is a 12 week educational summer accelerator program that helps teams see one, be one for an entrepreneur. Ready2Launch provides participants an involved experience that strengthens founders leadership skills, improves their business acumen, helps them run and grow their business, and helps them figure out how to finance their venture. [Learn more here.](#)

**Path2Innovation:** Path2Innovation is a three-day program taking place April 27-29. It explores the value of entrepreneurial thinking as a means of developing careers and research of leading graduate students, post-docs and faculty and advancing their research, innovations and ideas into impacts, whether that be scientific, economic, social, cultural or environmental. [Learn more here.](#)

**Lab2Market:** Lab2Market (L2M) is the first national-level program in Canada to fund and equip graduate students and their faculty supervisors with the entrepreneurial skills needed to assess the commercial viability of their university-based research innovations. [Learn more here.](#)

**Nuclear Magnetic Resonance Research Resource (NMR3)**

Director: J. K. Rainey, BSc, MSc, PhD  
Facility Coordinator: M. D. Lumsden, BSc, PhD  
Solid-state NMR Coordinator: U. Werner-Zwanziger, BSc, PhD

Established in 1982 with assistance from the Natural Sciences and Engineering Research Council, the Resource is located in the Department of Chemistry and is used by faculty, researchers and graduate students in all Maritime universities, the NRC, local industry and many Dalhousie Departments. It is concerned with applications of magnetic resonance spectroscopy to problems in chemistry, materials science, biology, biochemistry and related areas. Its current instrumentation includes Bruker, Avance 300 and Avance 500 NMR spectrometers for liquids and Bruker Avance DSX 400 and Avance 700 NMR spectrometers for solids. NMR users also have direct access to a Bruker Avance III 700 NMR spectrometer with cryoprobe capabilities for liquids experiments. The Avance 500 and Avance 700 NMR spectrometers were installed in 2003 with funding from NSERC, the Canadian Foundation for Innovation and the Atlantic Innovation Fund. The cryoprobes on the Avance III 700 were purchased in 2009 by Dalhousie University through an Atlantic Canada Opportunities Agency Grant. The Resource offers facilities for hands-on use by researchers and also provides NMR spectra and expertise to scientists throughout the Atlantic Region and beyond.

For more information see: [http://nmr3.chemistry.dal.ca](http://nmr3.chemistry.dal.ca).

**Trace Analysis Research Centre**

Director: A. Doucette, BSc, PhD

The Trace Analysis Research Centre (TARC) was established in 1971 with the assistance of a grant from the National Research Council. Its mission is to train analytical chemists and, through research, to contribute to the advancement of analytical chemistry. Members of TARC from Dalhousie and associated institutions comprise a group with expertise in a wide range of chemical analysis techniques in areas such as spectroscopy, chromatography, mass spectrometry, electrochemistry, and nuclear analytical chemistry.

**Awards**

**Scholarships, Bursaries, Awards, and Prizes**

The Registrar’s Office is responsible for:

- Undergraduate Scholarships  
- Undergraduate Bursaries  
- Undergraduate Awards and Prizes  
- Convocation Medals
IMPORTANT NOTE: The University regularly reviews the policy governing undergraduate awards. Consequently, portions of the following statement of policy may be modified or altered and may be implemented during the course of the academic year of this Calendar.

Helpful Terms

Admissions Average
This is the average of the subjects which were used for entry to the Dalhousie academic program and is governed by admission requirements for the degree/diploma selected.

Adjusted Average
This number is the sum of the Admissions Average, plus points which are assigned to the level of course difficulty (for AP and IB courses) and the number of university-preparatory subjects beyond the minimum five.

Faculty Groupings
There are eight: agriculture; architecture and planning; arts and social sciences; computer science; engineering; health professions; management; and science.

Types of Awards

- Scholarships: A monetary award, at the entrance, in-course and/or graduating level, based on academic performance (in specific subject or group of subjects).
- Awards: A monetary award, at the entrance, in-course and/or graduating level, based on academic performance (in specific subject or group of subjects) and on the recognition of additional relevant attributes.
- Bursary: An award granted on the basis of financial need.
- Medal: An award based on recognition of an outstanding academic record at Dalhousie for a specific degree program in a particular subject.
- Prize: A monetary award of any value, or a non-monetary award, based on general academic excellence, or proficiency in a specific area of study or competition.
- External Award: An award given to the student of the university by an external agency. The University may share in the selection, administration and/or payment of such an award.

General Policy
Applicable to those awards administered by the Registrar’s Office. Selection criteria may be different for those awards administered by individual faculties/schools/departments.

Where Dalhousie Scholarships can be Used
Dalhousie University scholarships can be used only at Dalhousie unless the Will or Trust Deed should otherwise permit. The University of King’s College has its own scholarship program. Insofar as scholarships, bursaries, awards, prizes, and governmental student loans are concerned, Dalhousie and King’s are separate. In order to receive Dalhousie funds you must be a registered Dalhousie University student.

Changing Degree Programs or Faculties
Changing degree/diploma programs or faculties can have implications for scholarship retention. Scholarship holders considering degree or faculty changes should consult the Awards Office prior to making the change.

Scholarship Payments and Rebates
To receive scholarship funds, a student must be registered at least as a full-time student (minimum nine credit hours for degree students, six credit hours for technical students) at Dalhousie during the term(s) in which they are receiving the funds. Students registered in Graduate Studies, Medicine, Law and Dentistry (with the exception of Dental Hygiene students), are ineligible to receive in-course scholarships or renew an existing scholarship. These faculties have their own awards programs.

- Payments: Dalhousie University scholarships are credited towards students’ accounts in two equal installments first and second term. Awards are applied first to tuition and prescribed fees, and secondly for residence fees.
- Rebates: The portion of scholarship money in excess of the above charges will be refunded to the student. Refunds are made by the Student Accounts Office in October and February upon request.

Entrance Awards
Entrance awards are available to students applying to Dalhousie directly from high school. Transfer students are not eligible for entrance awards, with the exception of the First Nations and Indigenous Black Students Scholarships. Entrants coming from Year II of
a CEGEP program are considered to be transfer students. Students entering the third year of engineering (including students entering from Associated Universities) should review the In-Course Awards (Engineering) section of this Calendar for award opportunities.

Dalhousie offers both renewable and non-renewable entrance awards. Non-renewable awards are held for one year. Renewable entrance awards are typically renewable for a maximum of four years. To be considered for entrance awards, applicants must submit a complete Dalhousie application for admission, a scholarship application, and an official transcript, to the Registrar's Office by March 15. Students must be admitted with a minimum 80% average (26 predicted points for IB diploma candidates) for entrance award consideration. Achieving the minimum academic average does not guarantee that an applicant will receive an award.

Applicants will be evaluated for entrance awards based on some or all of the following criteria: academic merit, extracurricular involvement, financial need, initiative to fund their own education, ancestry, and leadership. A DalOnline application is available for accepted applicants in December. A paper-based application is available for applicants yet to be accepted the following February. Visit [http://www.dal.ca/scholarships](http://www.dal.ca/scholarships) for more information.

**Eligible Courses for Scholarship Assessment**

The Registrar’s Office (Awards) considers all those Dalhousie courses which are taken for credit in a designated degree/diploma program during the academic year (or term in the Co-op program) as eligible courses for scholarship assessment.

Correspondence courses are considered for scholarship purposes.

Unless taken on Letter of Permission, transfer credits do not count towards the credit hours reviewed for scholarship assessment.

Please note that courses taken at other institutions are counted, to a maximum of one course per term, for scholarship assessment if such courses are taken on Letter of Permission towards an eligible degree/diploma at Dalhousie.

**Scholarship GPA (SGPA) Calculation**

The scholarship GPA (SGPA) will be calculated for students who have completed a minimum of 30 credit hours of work over two terms within the preceding academic year. The SGPA will include all eligible courses attempted during this time period. Please note that the scholarship GPA and the sessional GPA normally differ. The scholarship GPA, expressed to two decimal places, does not show on a student’s transcript.

**Renewable Scholarships**

Unless otherwise advised, an SGPA of 3.70 is required to maintain a renewable scholarship. Students must also complete a full course load (a minimum of 30 credit hours) over two terms within the previous academic year to be eligible for renewal. Co-op students who are on a work term during the calendar year must also complete 30 credit hours over two terms to be eligible. Students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term and achieve a minimum term GPA of 3.70 to be considered. In those cases where students have taken more than 30 credit hours, assessment is based on all courses taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment. Holders of renewable awards are notified of either the renewal or the non-renewal of their awards annually, via Dalhousie email.

Holders of renewable scholarships are not also entitled to hold Dalhousie in-course scholarships. Students registered in Graduate Studies, Medicine, Dentistry (with the exception of Dental Hygiene students), or Law are ineligible to receive in-course scholarships or renew an existing scholarship.

**In-Course Scholarships**

All undergraduate Dalhousie students not on a renewable scholarship, in eligible programs in the faculties of Architecture & Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management and Science, who have completed a full course load (a minimum of 30 credit hours) over two terms within the previous academic year and achieved a minimum SGPA of 3.70 will be eligible for in-course scholarship consideration. Co-op students who are on a work term during the calendar year must also complete 30 credit hours over two terms and achieve a passing grade in the work term to be eligible for consideration. Students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term, achieve passing grades in both work terms, and achieve a minimum term GPA of 3.70 to be considered eligible for consideration. In those cases where students have taken more than 30 credit hours, assessment is based on all courses taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment. In-course scholarship recipients are notified of their award over the summer, via Dalhousie email.

Students registered in Graduate Studies, Medicine, Dentistry (with the exception of Diploma in Dental Hygiene students), or Law are ineligible to receive in-course scholarships or renew an existing scholarship.

**Bursaries**
The University's bursary program is intended as possible supplementary assistance to help qualifying students with a portion of their educational costs.

The University has funds for the purpose of assisting its students who may face certain types of financial situations. These bursaries are awarded primarily on the basis of demonstrable need as determined by the appropriate University office or committee, satisfactory academic standing (see as defined in Academic Regulations) is also expected. Students whose financial needs are exceptionally large and/or students whose academic standing is unsatisfactory may not be assisted. Normally, bursaries will be awarded only to students who have availed themselves of assistance under the Canada Student Loan Program and/or corresponding provincial or territorial loan programs or bank loans. Normally, receipt of the first installment of such funding is a prerequisite to the University's consideration of an application for bursary assistance. Students may access the bursary program for a maximum of five years.

**International Exchanges**

Students who have permission to study for one or two terms outside of Canada in an approved exchange program, and are considered to be full-time (normally 30 credit hours), can be considered eligible for in-course or renewable scholarship assessment. Students who hold a Dalhousie scholarship and are planning to study abroad are advised to contact the Assistant Registrar (Awards) prior to departure to discuss their funding schedule.

**Scholarship Assessment**

Students who hold renewable scholarships will be assessed for renewal in either June or September depending on completion of two academic terms. If a student has previously failed to renew their scholarship and subsequently achieves the required 3.70 SGPA in the next academic year, or in any academic year within four of the original offer, the scholarship may be reinstated.

All other undergraduate students are assessed for in-course scholarships in June or September depending on completion of two academic terms.

**Reduced Course Load and Retention of Scholarship**

Scholarship holders considering taking a reduced course load should consult the Registrar’s Office - Awards before dropping courses. Students must complete a minimum of 30 credit hours over two terms within the academic year to qualify for renewal of their scholarships or an in-course scholarship.

**Record of Scholarships**

Scholarships, awards, and prizes are recorded on academic transcripts. The University retains the right to reassign the source funding of a student’s scholarship as circumstances may warrant (but there would be no reduction in the amount).

**Graduation and Renewable or In-Course Scholarships**

Students holding a renewable scholarship who choose to graduate earlier than originally expected, and later decide to return to upgrade their degree to a four-year degree, must submit a request to access their scholarship for the final year. In addition, if a student graduates and then decides to upgrade their degree, they cannot be assessed for an in-course scholarship until a further 30 credit hours over two terms within the same academic year are completed and a minimum SGPA of 3.70 is achieved.

**Taxation**

Students registered as full or part-time students are not required to claim financial awards (e.g. scholarships, bursaries) as income on their taxes.

**Withdrawing**

Award funds are credited to a student's account with the expectation that they will remain registered at Dalhousie at least as a full-time student (minimum nine credit hours for degree students or six credit hours for technical students) within the applicable term. Therefore, if a student reduces their course load or withdraws, these funds are expected to be returned to the University. However, depending on the time of the withdrawal, a student may be entitled to retain a prorated portion of the scholarship. Students in this situation are advised to contact the Assistant Registrar - Awards prior to withdrawing.

**Scholarship Appeals**

The deadline to appeal a scholarship decision for an entrance/in-course/renewable scholarship or entrance bursary is September 30.

Students may appeal under the following grounds:

- extraordinary or compassionate circumstances;
- unfair scholarship decision under the circumstances; and/or,
- inconsistent scholarship decision compared to other offers/decisions (compared to other Dalhousie scholarships)
Students must submit their appeal, in written form, to the Assistant Registrar, Awards, in the Registrar's Office, by the deadline noted above. The letter should clearly outline the grounds for appeal and the remedy being sought. Students should include documentation, if applicable, to support the basis of their appeal. The decision of the Appeals Committee is final.

**Convocation Awards**

The Governor General's Silver Medal, Governor General's Bronze Medal, University Silver Medal, Avery Prize, and University Medals are administered by the Registrar's Office (Awards) and are awarded at convocation. For the aforementioned medals and prize, a student who is completing a second Dalhousie degree will have only those courses required for the second degree used when calculating their cumulative average. Students graduating in the fall convocation are eligible for consideration for the aforementioned medals and prizes in the following spring convocation. In addition, any disciplinary action by the Senate Discipline Committee shall be deemed sufficient cause for any student to be ineligible.

In the College of Pharmacy, the School of Health and Human Performance, the School of Health Sciences, and the School of Nursing, a University medal is awarded annually at the spring convocation to a graduating student who demonstrates the following criteria have been met:

- The candidate has successfully completed the equivalent of three full-time years in their respective baccalaureate program (90 credit hours) at Dalhousie.
- Has met the FHP cumulative GPA requirement or better on courses taken at Dalhousie towards the degree.
- Of those eligible, has the highest GPA.

All credits taken towards the degree at Dalhousie will be used in the calculations. Transfer credits taken prior to entry into the program are not counted towards either the 90 credit hours criterion, or towards the cumulative GPA requirement. Classes taken on Letter of Permission, while registered in the program, are included in the 90 credit hours criterion and calculated as part of the cumulative GPA requirement. As the School of Social Work does not offer a three year (90 credit hour) BSW degree, it is not eligible for the University Medal.

**Entrance Awards**

**Robert J Chadwick Scholarship**

This renewable scholarship will support a first year student entering the Bachelor of Commerce or Bachelor of Management program at the Rowe School of Business who demonstrates academic merit, community involvement and athletic interest.

Eligibility: The eligible student will be entering first year of a Bachelor of Commerce or Bachelor of Management program. They will demonstrate academic merit, community involvement, and an interest in athletics.

Marjorie Ball was born in Newfoundland in 1912 and attended Dalhousie University in 1934. This scholarship was established by a bequest from the Estate of Marjorie Ball to the Dalhousie University Alumni Association.
Eligibility: Available to entering and current undergraduate students.
Application Type: Automatic Consideration – No Application Required

**The Annie L. Beer Prize**
Under the Will of the late Mrs. Thomas (Annie L.) Beer of Charlottetown a bequest was established at Dalhousie University. The net income from the fund provides for a prize which is to be awarded to the youngest student from Prince Edward Island who enters this University in each year.
Eligibility: Available to an entering undergraduate student from Prince Edward Island.
Application Type: Automatic Consideration – No Application Required

**The Francis Hugh Bell Entrance Scholarship in Science**
This scholarship was established by a bequest from the estate of Barbara Bell who attended Dalhousie in 1923 as a music student. This scholarship is awarded annually to honour her father, the late Mr. Francis Hugh Bell who was one of Dalhousie’s earliest graduates.
Eligibility: Available to students entering any program in the Faculty of Science at Dalhousie University directly from high school.
Application Type: General Entrance Award Application
Application Deadline: March 1

**Beta Sigma Phi Scholarship**
The Halifax-Dartmouth City Council of Beta Sigma Phi sorority has established an endowment of $2,000 whereby the annual income will provide for a
scholarship. The successful candidate will be selected from the following categories, listed preferentially: first, an active Member; secondly, a daughter, son or spouse of an active Member; and thirdly, some other student chosen by the Registrar’s Office. Applications are available from sorority members.

Eligibility: Available to students entering any program at Dalhousie University, with preference to an active member of the sorority or the child or spouse of an active sorority member.

Application Type: See dal.ca/scholarships for more information

Application Deadline: July 31

**The Bissett Scholarship**

A scholarship valued at $24,000 ($6,000 per year) was established by Mr. David Bissett with the intention of encouraging scholastic achievement by providing an incentive to capable high school students. A nomination for a Bissett Scholarship will not interfere with consideration of the nominee for other University scholarships. A student may not, however, hold a Bissett Scholarship and another Dalhousie scholarship at the same time. Students must be nominated by their school to be considered for this scholarship, and should contact the Guidance Office for more information.

Eligibility: Available to students entering any program at Dalhousie University directly from Cole Harbour District High School. Applicants must be attending university as full-time students.

Application Type: See dal.ca/scholarships for more information

Value: $24,000

The University is a beneficiary of a bequest from the late Robert Bruce of Quebec whereby a portion of the annual income is to be used for both entrance and in-course scholarships, and for bursaries.

Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture)

Application Type: Automatic Consideration – No Application Required

**Dr. John Bubar Scholarship**

After graduating in 1950, John Bubar returned to former NSAC in 1967 to become the first department head of Plant Science Department. By the time John relinquished the chair more than a decade later, it had grown to a professional group of dozen accomplished scientists and teachers. John Bubar loved to teach and share his love of plants and agriculture in general. He was affectionately known by many students as “Johnny Plant.” In turn he knew every students name and, by the time he retired in 1987, he had taught three generations of students at the former NSAC. John is a friend of the Agricultural Campus, and a strong proponent of practical learning. He has left an indelible mark on NSAC and the students who have passed through his doors.

Eligibility: Available to students entering the Bachelor of Science (Agriculture) program at Dalhousie University. Applicants must be permanent residents of New Brunswick. Selection criteria will include academic performance and financial need. Recipients cannot have received other significant awards.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: $4,000

**George Burris Scholarship**

The scholarship was established by Mary Burris and Grace Burris in memory of their father, George Burris, to support Dalhousie students wishing to study in England as part of their academic program. Scholarships are awarded on the basis of academic and extracurricular excellence, financial need, and international experience. Open to Dalhousie University upper year Canadian students who have applied for admission to participate in an International Program/Placement in England. Value: up to $5,000 each. Students must submit application a minimum of one month before departure.

Eligibility: Available to students participating in a study abroad or exchange program in England.

Application Type: Contact the International Centre for more information

Value: $5,000

To be considered, students must submit medical documentation regarding the nature of their disability.
Eligibility: Available to students entering any program at Dalhousie University directly from high school with a documented permanent disability.
Application Type: General Entrance Award Application

**Blair Eavis Scholarships**
Blair Eavis, who received his early education in Cape Breton, graduated from Dalhousie University with a B.A. in 1986. During his time on campus he was actively involved in student organizations and intramural sports. He credits much of his later success as a naval officer and layer to experiences at Dalhousie.

Eligibility: Enrolled full-time in an undergraduate degree
Application Type: General Entrance Award Application
Application Deadline: March 1

**Jeff D and Martha Edwards Scholarship**
Hugh Maccagno established this scholarship in 2007 in memory of Jeff and Martha Edwards. As a young child living in the village of Lac La Biche in northeast Alberta, Hugh Maccagno clearly recalls his father speaking to Mr. Edwards and afterwards commenting "What a fine gentleman he is." Mr. Edwards, a black man dressed in a suit, tie, and hat, was in Lac La Biche coaching his baseball team from Amber Valley, Alberta. His father’s words continue to inspire Hugh as they were voiced at a time when black people were subjected to so much discrimination in the US and Canada. Jeff Edwards was 21 when he and many other blacks left Oklahoma for Canada in 1910 seeking an escape from segregation and prejudice in the American South. He and his wife Martha homesteaded as pioneers at Amber Valley, raised 10 children, and contributed enormously to the community. Mr. Edwards embraced his new citizenship with pride, and when he died in 1973 at the age of 90, was remembered as a proud Canadian citizen who epitomized the spirit of black pioneers who settled the Canadian West. It is with these sentiments that Hugh Maccagno established this scholarship, which serves to provide post-secondary education to many from the large and long-established Black community of Nova Scotia.

Eligibility: Available to Black students entering any program at Dalhousie University directly from high school, with preference given to Canadian students of Black African descent, followed by native Black Bermudian students.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $12,000

**DA Eisenhauer Memorial Scholarship**
This fund was created in honour of the life and career of Daniel Andrew Eisenhauer. It will aim to support engineering students from the South Shore of Nova Scotia and give them an opportunity to be inspired and accomplish their goals while studying Engineering at Dalhousie.

Eligibility: This award is for students in Engineering. Preference is given for students in their first year. Preference is also given for students from the South Shore of Nova Scotia, with second preference for students from Nova Scotia at large.
Application Type: General Entrance Award Application
Application Deadline: see Dal.ca/entranceawards

**Marjorie F. Ellis Scholarships**

Application Type: Contact the Department, School, or College for more information

**Facilities Management Employee Scholarship**
Established by the Department of Facilities Management employees at Dalhousie, this scholarship supports up to two entering students each year who are children, grandchildren or spouses of Facilities Management Employees. Selection is based on financial need and community involvement.
Eligibility: Available to students entering any program at Dalhousie University directly from high school.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $1,000

**Fairfax Financial Holdings Limited Entrance Award**
Two renewable awards of $20,000 ($5,000 per year) each, are awarded annually to assist worthy candidates. The scholarships were established to encourage scholastic achievement by providing an incentive to capable high school students who wish to obtain a university education and who might otherwise be prevented due to the cost of attending the university. Students will be selected on the basis of financial need but outstanding academic achievement, independently documented outstanding achievement, commitment in community and other extracurricular activities could also be influential.

Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants must be a Canadian citizen or a permanent resident of Canada.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $20,000
Ross Faulkner Scholarships
The University received from the Estate of Julia L. Faulkner a bequest to provide scholarships in memory of her husband, Dr. Ebenezer Ross Faulkner. Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture). Application Type: Automatic Consideration – No Application Required

First Nations and Indigenous Black Students Scholarships
Ten renewable entrance scholarships of $12,000 ($3,000 per year) each are available to First Nations and Indigenous Black students. Scholarships are available to students who are applying directly from high school as well as those who have attended another post-secondary institution. Scholarships will be awarded on the basis of a student’s financial need and academic standing. Eligibility: Available to Indigenous Black and First Nations students entering any program at Dalhousie University. Applicants must be permanent residents of one of the Maritime Provinces (NS, NB, PEI). Application Type: General Entrance Award Application Application Deadline: March 1 Value: $12,000

Forsyth Family Nova Scotia Scholarship
A Dalhousie Law graduate established this scholarship in support of Black high school students from Nova Scotia wanting to pursue post secondary education at Dalhousie. This is one of our highest valued scholarships for entering undergraduates at a value of up to $20,000 per year to cover tuition, housing and books; recipients receive up to $80,000 over four years. One entering student is selected each year based on academic excellence, financial need and demonstrated participation in extra-curricular activities, preferably leadership, and a social conscience within his or her community. Eligibility: Available to Black students entering any program at Dalhousie University directly from high school. Applicants must be permanent residents of Nova Scotia. Application Type: General Entrance Award Application Application Deadline: March 1 Value: $80,000

This endowment, established in memory of Isaac Walton Killam, provides entrance and in-course scholarships to citizens of the United States who are enrolled in undergraduate programs at Dalhousie University.

Eligibility: Available to entering and current undergraduate students who are US citizens (excluding the Faculty of Agriculture).

Application Type: Automatic Consideration – No Application Required

The Lockward Memorial Scholarships

These scholarships have been established from an endowment by the late Reginald and Anne T. Lockward of Liverpool, Nova Scotia. Students will be selected on the basis of academic standing, character and financial need. Recipients of renewable scholarships may have an opportunity to access further funding if later admitted to the Doctor of Medicine degree at Dalhousie.

Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants must be graduates of a high school in Nova Scotia, with preference given to those students who are permanent residents of Queen’s County, Nova Scotia.

Application Type: General Entrance Award Application

Application Deadline: March 1 - check dal.ca/scholarships

Value: $16,000

Loran Scholars Foundation (Loran Award)

The program was started in 1989 to identify and invest in well-rounded students who demonstrate character, leadership potential, and a commitment to service in the community. In 1991 Dalhousie University became a participating member of those institutions where the Loran Awards are tenable. High schools may each nominate up to three students, and CEGEPs may each nominate up to eight students. The scholarship consists of $9,000 (paid by the Foundation) and tuition (paid by the University) annually, as well as mentorship and summer programs.

Eligibility: Available to Canadian graduating high school students with a minimum average of 85%. Selection is based on evidence of character, service and leadership potential.

Application Type: Contact awards@dal.ca for more information

Application Deadline: October for the next academic year

Value: Up to $100,000 over four years

Bazil & Madge Lund Scholarship in Business

Established by David P. Lund in honour of his parents, this scholarship recognizes academic achievement and provides financial support.

Eligibility: Available to students entering the Bachelor of Commerce program at Dalhousie University directly from high school, with preference given to students entering Dalhousie directly from a high school within Greater Moncton, New Brunswick.

Application Type: General Entrance Award Application

Application Deadline: March 1

Value: $1,500

The A. Murray MacKay Scholarship

The Scots North British Society has established an annual scholarship. The Selection Committee will consider candidates on the criteria of academic ability, financial need and leadership. The criteria are weighted equally. The late Dr. MacKay was chairman of the School Board at the time when Queen Elizabeth High School was constructed.

Eligibility: Available to students entering any program at Dalhousie University directly from high school. Applicants must be graduates of Citadel High School, Nova Scotia.

Application Type: General Entrance Award Application

Application Deadline: March 15

Value: $1,000

MacKean Athletic Scholarship

The Margaret Louise MacKean Scholarships were established through the estate of Charlotte Louise MacKean. Through a bequest in her will, the Margaret Louise MacKean Scholarships will eternally benefit Dalhousie student athletes who have demonstrated athletic, academic and citizenship excellence.

Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Nicholas M. MacLeod Memorial Scholarship
Under the will of Eva Eileen McLeod, this scholarship fund was established in memory of her late husband, Dalhousie alumnus Nicholas W. McLeod, for the purpose of funding entrance and in-course scholarships for students in the Faculty of Arts and Social Sciences.
Eligibility: Available to entering and current undergraduate students in the Faculty of Arts & Social Sciences.
Application Type: Automatic Consideration – No Application Required

Frederick A. MacMillen Scholarships

Eligibility: Available to entering undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Donald N MacNeill Scholarships
It was Mr. MacNeill's wish to establish this award to provide renewable scholarships to students entering full-time study in any discipline at Dalhousie University. The scholarship is intended to assist the University in attracting top students to study at Dalhousie and to ease the student's financial burden.
Eligibility: Students entering Dalhousie with a minimum of 80%.
Application Type: General Entrance Award Application
Application Deadline: see Dal.ca/entranceawards

Marjorie Manning Fountain Scholarships
Two non-renewable entrance scholarships are awarded to students who have demonstrated a high level of academic achievement and financial need.
Eligibility: Available to students entering any program in the Faculty of Management at Dalhousie University directly from high school. Applicants must be permanent residents of one of the Atlantic provinces (NB, NS, NL, PEI).
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $5,000

Harrison McCain Scholarships
McCain Foods Limited and the McCain families have a long history of charitable giving dating back to and before 1957 when the company opened its first French fry plant in the small village of Florenceville, New Brunswick. In March, 1993, the McCain Foundation was set up to better focus on their donations and to enhance the impact of their giving on local communities. The McCain Foundation supports a wide variety of projects across the country with a particularly strong focus on communities in Atlantic Canada.
Eligibility: The Harrison McCain Foundation fund provides numerous renewable scholarships to entering high school students. Scholarships are awarded to students with demonstrated financial need, a recognized initiative to fund their own education and possess strong leadership abilities. Available to students who have graduated from a high school in Canada and who are entering the Faculty of Agriculture (excluding the Vet Tech and Pre Vet programs) or the School of Nursing directly from high school.
Application Type: See dal.ca/scholarships for more information
Application Deadline: March 1
Value: $16,000

This bursary is available to an entering Dalhousie student with a permanent disability and demonstrated financial need. This bursary is administered and awarded in combination with the Johnson Foundation Bursary. To be considered, students must submit medical documentation regarding the nature of their disability.
Eligibility: Available to students entering any program at Dalhousie University directly from high school with a documented permanent disability.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $4,000

**Reverend Trevor Phillips Memorial Scholarship**
Revd. Trevor A. Phillips was born in Jamaica on March 5, 1941. He received his early education at Kingston College and Union Theological Seminary in Kingston. He was an Ordained Minister at Mount Zion United Church in Jamaica before migrating to Canada. From 1969-72 he continued his pastoral work in Prince Edward Island. Revd. Phillips moved to Nova Scotia and worked at St. Paul’s United Church in Halifax from 1973-1981, and then Sambro-Parkhill-Jolymore Pastoral Charge from 1981 until his passing in 2008. He obtained degrees at the University of Prince Edward Island (BSc), St. Mary’s University (MEd) and Dalhousie University (BEd 1975 & MA Education 1980) Science, Education, Educational Psychology, Counselling, Educational Administration and Supervision. During his career he was a teacher and guidance counsellor at several schools within the Halifax Regional School Board and a member of their Crisis Intervention Team. He was also a presenter at several national and provincial conferences delivering workshops on multi-culturalism, human rights, curriculum reform and discipline strategies. Revd. Phillips was a man of excellence with great passion for life. He was an avid sportsman who enjoyed badminton (at Dalplex with the “Silver Tigers” Table Tennis), cricket and jogging. His compassion and dedication to Christian Ministry, counselling within the community and caring for people in need was extensive and extraordinary. His amazing laughter and sense of humour brought joy to many lives. He was a legend in his time. On Eagles’ Wings is an autobiographical account of his life and faith. The Revd. Trevor Phillips Memorial Scholarship was established as a “living” memorial so that his name and his excellence will be remembered in a significant way.
Eligibility: Awarded to students beginning their studies in any program directly from high school who are either Nova Scotia residents of Caribbean descent,
or applying from the Caribbean.
Application Type: General Entrance Award Application
Application Deadline: March 15

**The Hugh J. Potter Scholarship**
An endowment has been established to provide a scholarship to a student who has demonstrated a high level of academic achievement. The scholarship honours the memory of Joseph Hugh Potter, a native of Digby County, who showed himself to be an exceptional initiator and developer of financial and commercial activity throughout this province in the fields of insurance, securities, shipbuilding, transportation and manufacturing.
Eligibility: Available to students entering the Bachelor of Commerce program at Dalhousie University directly from high school, with preference given to permanent residents of Digby County, Nova Scotia.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $5,000

**Gordon S. Rankin Memorial Scholarship**
Gordon Rankin, born in Halifax in 1933, graduated from Dalhousie in 1957 with a Bachelor of Commerce degree. He played both varsity football and basketball, holding the position of Captain for a period of time on both teams. As a continuing tribute to Gord, this scholarship was formed to assist athletes in financing their studies while attending Dalhousie University.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

**The Harold A. Renouf Scholarship**
An endowment has been established to provide an annual scholarship.
Eligibility: Available to students entering the Bachelor of Commerce program directly from high school.
Application Type: Automatic Consideration – No Application Required

Value: $16,000

F. W. Walsh Memorial Scholarship
Frederick Waldemar (Waldo) Walsh (1897-1984) was born in Moncton, New Brunswick, and spent his boyhood in Coverdale, New Brunswick, on the family farm. He attended the Nova Scotia Agricultural College (now Dalhousie University, Faculty of Agriculture) (Class of ‘17) and O.A.C. (Class of ’22) and worked as Superintendent of Agriculture for the C.N.R. until 1934 when he became senior agriculturalist with the Nova Scotia Department of Agriculture, until his retirement as Deputy Minister in 1962. After his passing, his three sons Robert, Jack, and Fred set aside money, the interest of which would provide a memorial scholarship for a deserving young man or women entering the degree course at the Faculty of Agriculture.
Eligibility: Available to students entering first year of any undergraduate degree program at the Faculty of Agriculture. Selection is based primarily on academic performance. Financial need and participation in school and community affairs will also be considered.
Application Type: General Entrance Award Application
Application Deadline: March 1
Value: $500

Weinkauf Family Scholarship in Dental Hygiene
To provide an entrance scholarship in the School of Dental Hygiene.
Eligibility: First preference will be given to a student from Western Canada. If there are no suitable candidates, all first-year students will be considered. Financial need may also be considered in the selection of the recipient.
Application Type: Contact the Faculty for more information
**F. Hume Wells Scholarship**

This scholarship is awarded on the basis of performance excellence to a student entering university for the first time directly from high school into a course of study leading to an undergraduate degree in music performance. It was established by Judith Wells and Karen Woolhouse in memory of F. Hume Wells, a businessman in Halifax, who was interested in music and thought university education was important.

**Eligibility:** Available to students entering first year of the Bachelor of Music program at Dalhousie.

**Application Type:** Contact the Department, School, or College for more information.

**The Women’s Division of the Dalhousie Alumni Association Scholarships**

This fund provides two entrance scholarships; one is named the Margaret Florence Newcombe Scholarship, which commemorates the 100th anniversary of the graduation of the first woman graduate of Dalhousie University in 1885. The second scholarship is named the Ruth Skaling Murray Scholarship, in memory of a dedicated alumna of the Dalhousie Women’s Division.

**Eligibility:** Available to entering undergraduate students (excluding the Faculty of Agriculture).

**Application Type:** Automatic Consideration – No Application Required

**Don Wright Scholarship of Excellence**

This annual scholarship funded by the Lillian and Don Wright Foundation, supports outstanding students who are entering the Fountain School of Performing Arts in a Music degree program. While preference shall be given to awarding the scholarship to one student per year, if no one student merits the awarding of the scholarship, the awarding committee has the authority to award two scholarships to students who have applied and been accepted to study Music within the School. Where there is more than one eligible candidate, first preference shall be given to the candidate deemed to have the most merit as judged by a majority of the Fountain School of Performing Arts scholarships committee.

**Eligibility:** Available to students entering first year of the Bachelor of Music program at Dalhousie.

**Application Type:** Contact the Department, School, or College for more information.

**Sir William Young Scholarship**

This fund was left by Sir William Young for the purpose of endowing scholarships.

**Eligibility:** Available to entering and current undergraduate students (excluding the Faculty of Agriculture).

**Application Type:** Automatic Consideration – No Application Required

**Christine Zinck Scholarships**

Four scholarships awarded annually in each of the four streams of Theatre: Acting, Costume Studies, Scenography and Technical Theatre and Stage Design and Theatre Studies.

**Application Type:** Automatic Consideration – No Application Required

**In-Course Awards**

**How to use this Section**

The term 'awards' in this section is a general term encompassing scholarships, bursaries, awards, prizes, medals, fellowships, and studentships. To see a list of awards that you may be eligible for, select your Faculty or College from the list on the right. You may also have the option to select a department within a faculty. Students who have yet to choose a major or belong to a Faculty of College that does not have Departments should select their Faculty or College, and then 'All Faculty Awards'.

The awards listed under the Department and ‘All Awards’ pages include those administered centrally (by the Registrar's Office, International Centre, and other units) as well as those administered within faculties and departments.

**General Information**

**Dalhousie In-Course Scholarships**

All undergraduate Dalhousie students not on a renewable scholarship, in eligible programs in the Faculties of Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management, and Science, and the Dental Hygiene program, who have completed a full course load (a minimum of 30 credit hours) over two terms within the previous academic year and achieved a minimum SGPA of 3.70 will be considered eligible for in-course scholarships. Co-op students who are on a work term during the calendar year must also complete 30 credit hours over two terms and achieve a passing grade in their work term to be eligible. Co-op students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term, achieve a minimum term GPA of 3.70, and achieve passing grades in both work terms, to be considered eligible. In those cases where students have taken more than 30 credit hours, assessment is based on all courses taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment. In-Course Scholarship assessment takes place over the summer months. Scholarship recipients will be notified by Dalhousie email.

Students registered in Graduate Studies, Medicine, Dentistry (with the exception Dental Hygiene Students), or Law are ineligible to receive in-course scholarships or renew an existing scholarship.
**Dalhousie Undergraduate Bursary Program**
The University’s bursary program is intended as possible supplementary assistance to help qualifying students with a portion of their educational costs.

The University has funds for the purpose of assisting its students who may face certain types of financial situations. These bursaries are awarded primarily on the basis of demonstrable need as determined by the appropriate University office or committee, satisfactory academic standing (see as defined in Academic Regulations) is also expected. Students whose financial needs are exceptionally large and/or students whose academic standing is unsatisfactory may not be assisted. Normally, bursaries will be awarded only to students who have availed themselves of assistance under the Canada Student Loan Program and/or corresponding provincial or territorial loan programs or bank loans. Normally, receipt of the first installment of such funding is a prerequisite to the University's consideration of an application for bursary assistance. Students may access the bursary program for a maximum of five years.

**Faculty of Agriculture In-Course Awards Program**
The Faculty of Agriculture has its own in-course award program (including bursaries), typically due in the fall term. Most Faculty of Agriculture awards require a single application. More information is available at dal.ca/scholarships.

**Golden Key International Honour Society**
Dalhousie University has a participating chapter in the Golden Key International Society. The Golden Key Society is an academic honours society that recognizes the academic achievements of students. The society provides scholarships and leadership opportunities and career assistance to its student members. Students are invited to become members based upon criteria established by the society. For information please refer to the society’s website: goldenkey.org.

College of Sustainability

Introduction

This Calendar is prepared some months before the year for which it is intended to provide guidance. The policies, procedures, and awards listed in this section are subject to continuing review and revision. Not all awards listed will be offered in any given year. Additionally, the number of awards offered, values of awards, and selection criteria may change without notice.

Note to ESS Students

Students in any Environment, Sustainability and Society (ESS) Major program are eligible for awards from the list linked below. This list includes all awards that are exclusive to ESS students as well as all university-wide awards. More information about College of Sustainability awards that require an application can be found on the College of Sustainability website.

ESS double major students are also eligible for awards from their other major subject. Please refer to the appropriate department list, grouped by Faculty, on the right side menu.

Bachelor of Management students in the ESS Major are also eligible for awards from the Faculty of Management.

All College of Sustainability Awards

Howard C. Clarke International Study Award
An endowment fund to assistance a Dalhousie student who is participating in a recognized study abroad or exchange program for academic credit. Student must demonstrate great financial challenges. Eligibility: Available to an undergraduate Dalhousie student participating in a study abroad or exchange program. Application Type: Contact the International Centre for more information

The Rebecca Cohn Bursary Fund
A gift of $4,000 by the executors of the Estate of the late Rebecca Cohn provides an endowed bursary fund for needy students. Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. Application Type: General Online Bursary Application Application Deadline to Apply: October 15

Dorothy Macdonald Crummey Memorial Bursary
This bursary was established by the family of the late Dorothy Macdonald Crummey (1912-2005) who was born in Little Harbour, Pictou County. She attended Halifax Ladies College (an affiliate of Dalhousie University) and graduated with a diploma in Household Science in 1932. Like many educated women of her generation, Dorothy did not work outside the home after marriage to Dr. Clarence Crummey (MD 1932). Nevertheless, she actively supported university students remembering her own efforts to fund her education during “The Great Depression”. Bursaries will be available to students enrolled in any undergraduate degree program from Nova Scotia with a preference for students from Pictou County. Apply through the general online bursary program. Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need, have satisfactory academic standing, and preferably graduated from a high school in Pictou County, Nova Scotia. Application Type: General Online Bursary Application Application Deadline to Apply: October 15

Dalhousie Leadership Bursaries
A limited number of bursaries are available annually to students who have exhibited a record of considerable leadership achievement. Candidates must also demonstrate consistent satisfactory academic accomplishment. The Selecting Committee may consider such other matters as financial need, service to the University and the community, and character. Submit completed forms to the Department of Athletics and Recreation, which will forward your application with supplementary information. Application Type: Contact the Department, School, or College for more information

Dalhousie Memorial Bursary Fund
From time to time at Dalhousie contributions have been made to the University as a memorial subscription in honour of some student or former student. Until now there has been no proper place into which these funds could be channeled. Because of these occurrences a Dalhousie Memorial Bursary Fund has been established. The existence of the fund will be commemorated by a book of remembrance to be located in a prominent place in the Killam Library. Names of persons in whose memory contributions have been made by relatives, friends, individuals or groups, to the Memorial Fund will be recorded in the book, along with the date of their birth and death. The pages will be turned on a regular basis. All money contributed to the Fund will be invested by the Board of Governors and only the investment income will be awarded. The award will be available to any full-time Dalhousie student, already registered and in attendance at courses, who can show a need for additional support. Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. Application Type: General Online Bursary Application Application Deadline to Apply: October 15

Dalhousie Student Union Student Accessibility Award
This award is open to Dalhousie students with a permanent disability (physical, mental or learning impairment). Applicants must apply by writing, taping or filming a personal statement on why they could benefit from this award. Interested students should contact the Vice-President, Internal, Dalhousie Student
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.

Application Type: See dal.ca/scholarships for more information

Dalhousie Student Union Student Wise Health Plan Bursary
To provide financial aid to an undergraduate student or students who are covered by the DSU health care plan.

Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program entering directly from high school. Applicants will have demonstrated financial need and have satisfactory academic standing.

Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dalhousie University Undergraduate Bursaries
Students who are registered in six credit hours per term will be considered for bursaries.

Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.

Application Type: General Online Bursary Application
Application Deadline to Apply: October 15 (fall), February 15 (winter), June 15 (spring and summer)

Alfred George Darville Memorial Bursary
This fund provides one bursary to a qualifying Dalhousie student.

Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program entering directly from high school. Applicants will have demonstrated financial need, have satisfactory academic standing, and have graduated from Halifax West High School, Nova Scotia.

Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Frank R. Davis Memorial Scholarships
These scholarships are made possible by a fund established by Mrs. Davis in memory of her late husband, the Hon. Frank R. Davis, Minister of Public Health in the government of Nova Scotia and a graduate of this University. The scholarship will be awarded to deserving graduates of Bridgewater High School, on the nomination of the Supervisor of Schools and the Senior High School Staff. In selecting candidates, the governing considerations will be scholastic standing, unselfishness of purpose, and interest in the common good.

Eligibility: Available to entering students from Bridgewater Jr./Sr. High School.

Application Type: Automatic Consideration – No Application Required

The Honourable W. H. Dennis Memorial Prizes for Literary Compositions in English
Two prizes known as the Joseph Howe Prizes are offered each year. First prize $250, second prize $150, for a poem or collection of poems of any length greater than one hundred lines. Two prizes known as the James DeMille Prizes are offered each year, one of $250 for an essay, the other of $250 for a prose short story.

Eligibility: Available to any full-time undergraduate or graduate Dalhousie student who submits the best essay, short story, or collection of poems.

Application Type: Contact the Department, School, or College for more information

Dharma Master Chuk Mor Memorial Scholarship
Tin Yick Lung established this scholarship in memory of Buddhist monk Chuk Mor (1913-2002) who was an educator and artist well known in the fields of Chinese poetry, Chinese painting and Chinese calligraphy. This in-course scholarship is available to a full-time undergraduate student who has attained a high standard of academic achievement and who has completed a minimum of one year in any undergraduate degree program.

Eligibility: Available to a current full-time undergraduate student.

Application Type: Automatic Consideration – No Application Required

Charles Robert Raefe Douthwaite Memorial Bursary
To honour the memory of Charles Robert Raefe Douthwaite, an endowment was established to provide bursaries for students graduating from Nova Scotia high schools.

standing, and be a resident of a rural area.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

**Shawn Dupuis Memorial Prize**
This prize was established in memory of Shawn Dupuis of Dartmouth, Nova Scotia who was a member of the varsity swim team. This prize will be awarded at the first AUS meet of the season held at Dalhousie to a Dartmouth Crusader Swimmer entering his/her first year of study at Dalhousie University. Preference will be given to students who are enrolled in a class from the Bachelor of Commerce program or the Spanish and Latin American Studies Department, Faculty of Arts and Social Sciences.
Eligibility: Available to a former member of the Dartmouth Crusaders Swim Team entering an undergraduate program at Dalhousie.
Application Type: Contact the Department of Athletics for more information
Value: $300

**Marjorie F. Ellis Scholarships**
The late Marjorie F. Ellis bequeathed one-half of the remainder of her estate to Dalhousie University for scholarships to worthy students.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

**Environment, Sustainability and Society Academic Improvement Prize**
This prize is awarded annually at spring convocation to an ESS Major/Honours student convocating in spring or the previous fall who has shown the most academic improvement throughout the degree.
Application Type: Automatic Consideration – No Application Required

**Environment, Sustainability and Society First-year Prize**
This prize is awarded annually to an ESS Major student completing their first year of study who had the highest GPA in their first year courses at Dalhousie.
Application Type: Automatic Consideration – No Application Required

**Environment, Sustainability and Society Honours Thesis Prize**
This prize is awarded annually at Spring Convocation to the student convocating in spring or the previous fall that is judged to have submitted and defended the best ESS Honours thesis.
Application Type: Automatic Consideration – No Application Required

**Environment, Sustainability and Society Second-year Prize**
This prize is awarded annually to an ESS Major student completing their second year of study who had the highest GPA in their second year courses at Dalhousie.
Application Type: Automatic Consideration – No Application Required

**Environment, Sustainability and Society Student Travel Award**
A fund has been established to support ESS students for travel with grants. Application information is available on the [College of Sustainability](#) website. Students submit a cover letter and budget to the College of Sustainability Awards Committee. The cover letter should explain how the proposed travel will contribute to research experiences or to the application or expansion of the undergraduate academic experience. The budget should include all expected sources of income (including other successful and unsuccessful grant applications) and a list of expected experiences.
Eligibility: Available to current students at the College of Sustainability at Dalhousie.
Application Type: Contact the Department, School, or College for more information
Application Deadline to Apply: March 15 and October 31
Value: $300-$500

**Environment, Sustainability and Society SUST-star Prize**
This prize is awarded annually at Spring Convocation to the ESS Major/Honours student graduating with the highest grade-point average (GPA) in all SUST courses.
Application Type: Automatic Consideration – No Application Required

**Environment, Sustainability and Society Rookie-of-the-year Prize**
This prize is awarded annually to an ESS student completing their first year of study who has contributed significantly to life in the College of Sustainability. Faculty members nominate students to the Awards Committee.
Application Type: Automatic Consideration – No Application Required

**European Union Centre of Excellence (EUCE) Prize**
Prize awarded by EUCE for the best essay on Europe and the European Union.
Eligibility: Available to any Dalhousie student.
Application Type: Contact the Department, School, or College for more information
Adrian Facca Leadership Fund
The Adrian Facca Leadership Fund has been established in Memory of Adrian Facca. Adrian graduated from Dalhousie University with Bachelor’s degrees in both Arts (1980) and Commerce (1982). He proudly wore number 19 for the Dalhousie Tigers hockey team for five seasons, starting in 1977. He exemplified leadership both on and off the ice and was an important contributor to his team and to Dalhousie.
Eligibility: Awarded to students on the Tigers men’s hockey and women’s volleyball teams.
Application Type: Contact the Department of Athletics for more information

Ross Faulkner Scholarships
The University received from the Estate of Julia L. Faulkner a bequest to provide scholarships in memory of her husband, Dr. Ebenezer Ross Faulkner.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

The SLT Bruce Galloway Memorial Prize
Friends, family and shipmates of Sub-Lieutenant Bruce David Galloway, a member of the Ship’s Company of H.M.C.S. Fraser and a 1983 Arts graduate of Dalhousie, have established a memorial fund. The prize is to be awarded to the student, male or female, attending Dalhousie University on the Regular Officer Training Plan who attained the highest academic standing (not less than a passing standing) in the program in which he or she is enrolled. A prize is to be awarded in each year in which there is a student attending Dalhousie on the Regular Officer Training Plan who achieves a passing standing.
Eligibility: Available to a current undergraduate student (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

The Irving and Jeanné Glovin Award
The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying “good human conduct”. Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.
Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.
Application Type: Contact the Faculty for more information
Application Deadline to Apply: mid-February

Governors’ Awards
In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students’ contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors’ Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.
Application Type: Contact the Department, School, or College for more information

Governor General’s Silver Medal
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of baccalaureate programs.
Application Type: Automatic Consideration – No Application Required

The Graham Family Athletic Awards
John and Lina Graham have established the Graham Family Athletic Awards, which recognize the contributions that varsity student athletes make in enriching the quality of life at Dalhousie University. Awards are available to entering and continuing varsity athletes. Award recipients should demonstrate positive attributes in the areas of citizenship, sportsmanship, and community service.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

MacCallum S. Grant Charitable Foundation Bursary
The MacCallum S. Grant Charitable Foundation supports a number of bursaries for Dalhousie University students each year. First priority will be given to students who have lived in Halifax County, Guysborough County and Preston for a period of at least two years immediately prior to receiving a bursary.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering,
Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing. See award description for specific eligibility requirements.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Under the Will of the late E. John Jordan a bequest was left to the University for the purpose of funding entrance and in-course scholarships.
Eligibility: Available to entering or current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Nimmi and Teji Kanwal Bursary
Mr. Tejinder (Teji) and Mrs. Nirmal (Nimmi) Kanwal have cared and impacted numerous lives over the years. Although now retired, both were successful and beloved teachers for over 30 years. They grew up in India where their parents were strong believers in education and supported their schooling. Teji came to Canada in 1962 and Nimmi joined him in 1967. Travelling around the world twice, their love of adventure and travel continued throughout their lives. Both received Masters degrees from Dalhousie. They are supports of equal rights for all, which includes their support for equal opportunities for teachers in Nova Scotia. As Teji puts it “If you can’t do something for someone, you are a no one.”
Eligibility: Awarded to an undergraduate Dalhousie student who is in good academic standing and demonstrates financial need, with preference to a female student.
Application Type: General Entrance Award Application
Application Deadline to Apply: October 15

The Khaki University Scholarships
From the Khaki University of Canada and the Young Men’s Christian Association Memorial Scholarship Fund, the trustees of Khaki University made a gift to Dalhousie University in 1921 of $6,500 to endow scholarships.
Eligibility: Available to entering and current undergraduate students (excluding students studying at the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Killam American Scholarship Fund
This endowment, established in memory of Isaac Walton Killam, provides entrance and in-course scholarships to citizens of the United States who are enrolled in undergraduate programs at Dalhousie University.
Eligibility: Available to entering and current undergraduate students who are US citizens (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Kostman Family Bursary
An endowment has been established in memory of Harry Kostman to provide a four-year renewable bursary for an undergraduate student of Indigenous or African-Canadian descent. Harry Kostman had an enduring passion for education, and generously provided for his children and grandchildren while they attended university. Through this bursary, they strive to continue his legacy of support.
Eligibility: Earnings from the fund will provide a four-year renewable bursary for an undergraduate student who is of Indigenous or African-Canadian descent, and is in their first year of full-time studies at Dalhousie. Preference will be given to students who have completed the Transition Year Program, or successor program. The recipient will have demonstrated financial need and satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Ann Lavers Howe Hall Bursary
The Ann Lavers How Hall Bursary was founded, by alumni and friends of Howe Hall, to provide financial assistance to a Dalhousie student who is a current Howe Hall resident. It is named in honour of Ann Lavers, staff member of Howe Hall from 1967-1994, who befriended many residents over her term of employment, in a variety of positions, at Howe Hall. The recipient must have made a positive contribution to the residence community at Howe Hall. Application information is posted within the residence each January.
Eligibility: Available to a Dalhousie student who is a current resident of Howe Hall, who is in good academic standing, and has demonstrated financial need.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

**Annie E. Longard Memorial Bursary**
An endowment has been established to provide an annual bursary in memory of an accomplished alumna and long-time participant in the Women’s Division of the Dalhousie Alumni Association.
Eligibility: Available to undergraduate students registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Dental Hygiene program. Applicants will have demonstrated financial need and have satisfactory academic standing.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

**The Robert and Katherine MacDonald Award**
An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students’ Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.
Eligibility: Available to an undergraduate Chinese student who is a member of the Dalhousie Chinese Students and Scholars Association.
Application Type: Automatic Consideration – No Application Required

**The W. Andrew MacKay Alumni Scholarship**
The Dalhousie Alumni Association established an annual scholarship in honour of Dr. W. A. MacKay, a former president of the University. The scholarships are available to students who have demonstrated high academic standing (GPA of at least 3.30) and who have shown an excellence in qualities of leadership, citizenship and sportsmanship. Candidates are considered by nomination by their Department or School in the fall of each year.
Eligibility: Available to current undergraduate students in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: See dal.ca/scholarships for more information

**MacKean Athletic Scholarship**
The Margaret Louise MacKean Scholarships were established through the estate of Charlotte Louise MacKean. Through a bequest in her will, the Margaret Louise MacKean Scholarships will eternally benefit Dalhousie student athletes who have demonstrated athletic, academic and citizenship excellence.
Eligibility: Available to student athletes in any program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

Applicants will have demonstrated financial need, have satisfactory academic standing, and be residents of Springhill, Cumberland County, Nova Scotia.
Application Type: General Online Bursary Application
Application Deadline to Apply: October 15

Dr. Carolyn Savoy Award of Excellence
In March of 2009, Dr. Carolyn Savoy announced her retirement from coaching, after a 32-year career of outstanding service to Dalhousie University and its women’s basketball program. Carolyn continues to work as an Associate Professor in the School of Health and Human Performance at Dalhousie. Dr. Savoy came to Dalhousie in 1977 as head coach of the women’s basketball team, following seven years in the same capacity at St. FX. In over three decades of
coaching, Coach Savoy posted very impressive results, including an 858-292 CIS win-loss record for a 74.5 winning percentage. A four-time AUS Coach of the Year, she led the Tigers to the national final in 1980, the semifinals in 1982, to a fourth place CIS finish in 2007 and placed sixth at nationals in 1986, 1996 and 2001. Coach Savoy's teams won nine regular season AUS titles and five AUS championships. Academically, her teams had a 100% graduation record for those playing three to five years in the program. As a Level 4 basketball master course conductor, Carolyn has coached at the national and international level as an assistant with the Canadian national team program and also served as head coach of the 2001 Nova Scotia Canada Games team. She completed her BPE degree in 1969 at the University of New Brunswick. She enjoyed an outstanding athletic career at UNB, where she was a star volleyball, basketball (she played on a team that compiled a 93-game winning streak) and field hockey player. She began her coaching career at St. FX (1969-77), where she transformed both the basketball and field hockey teams into winning programs. Carolyn has been honoured with a number of prestigious awards including the 2002 Women of Excellence award in the health, sport and fitness category. In 2005 she received the Frank Baldwin award for her contribution to the development of basketball in Nova Scotia. She was also inducted to the Saint John Sport Hall of Fame as a builder in 2003.

Eligibility: Available to athletes in the women's basketball program at Dalhousie University (excluding the Dalhousie Faculty of Agriculture).
Application Type: Contact the Department of Athletics for more information

Leslie Shaw Bursary
This bursary was established by Allan, Gabrielle, and Sarah Shaw for Leslie Shaw to honour her and to celebrate her 60th birthday. Leslie Shaw dedicates her professional and volunteer life to the betterment of our society. This bursary is awarded annually to permanent residents of Canada and/or international students whose first language is not English. First preference will be given to students who are either permanent residents or intending to become permanent residents of Canada.

Application Deadline to Apply: October 15

South House Sexual and Gender Resource Centre Bursary
The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women’s Centre, was founded in recognition of women and trans people’s common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between $25 and $250. Available funds are split between applicants. See http://southhousehalifax.ca/ for an application form.
Application Type: Contact the Department, School, or College for more information

Betty Spencer Scholarship
Betty Spencer was born in Saint John, New Brunswick in 1916. She graduated from Saint John Vocational School and worked for a time at Wasson’s Pharmacy where she met her husband. They retired in Bangor, Maine and later in St. Andrews, New Brunswick. Although Betty had no specific connection to Dalhousie, she generously bequeathed this endowment through her Will. Preference is given to students from the Atlantic provinces.
Eligibility: Available to entering and current undergraduate students (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

This fund was created by members of the Zwerling family in memory of Mr. and Mrs. Charles Zwerling for a scholarship beyond first year.
Eligibility: Available to a current undergraduate student (excluding the Faculty of Agriculture).
Application Type: Automatic Consideration – No Application Required

Faculty of Agriculture

Introduction
All Faculty of Agriculture Awards

**Dr. Stewart R. Keddy Memorial Scholarship**
Dr. Stewart Keddy graduated from the Nova Scotia Agricultural College in 1967. He credited the AC as giving him a strong academic start. This award is in his honor and recognizes the academic skill of a student interested in agriculture.
Eligibility: This award is for students enrolled in the Faculty of Agriculture who are studying on a full-time basis. Students must be in their second year (or later) of an undergraduate program (including technical or degree programs). They will have strong academic standing and demonstrate financial need. Preference will be given to a student who attended high school in the Annapolis Valley.
Application Type: Faculty of Agriculture In-Course Award Application

**CMM & PHP Natural Resource Bursary**
The purpose of the CMM & PHP Natural Resource Bursary is to encourage First Nation/Aboriginal student interest in the environment and natural resource stewardship. PHP, along with CMM has recognized the need to support students in their endeavors to protect the environment and its resources.
Eligibility: Students enrolled full time at the Faculty of Agriculture. Preference is given for a student who demonstrates an interest in environmental protection or natural resource sustainability.
Application Type: Faculty of Agriculture In-Course Award Application

**Friends of Alex Taylor Memorial Award**
To honour the memory of Alexander Taylor, the Friends of Alex Taylor Memorial Award will provide an annual award to a student with an interest in plant science and its relation to sustainability.
Eligibility: A full or part-time student enrolled in an undergraduate program at the Faculty of Agriculture in their second, third or fourth year, with a minimum GPA of 3.0. Preference is given to students that have taken courses related to plant science or agriculture and have demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application

**Valacta Dairy Scholarship**
Valacta, the dairy production centre of expertise for Quebec and Atlantic Canada, offers the Valacta Dairy Scholarship which recognizes and supports students with a demonstrated interest in the dairy industry.
Eligibility: Available to one student enrolled in an undergraduate or diploma program at the Faculty of Agriculture that demonstrates a genuine interest in the dairy industry by program, course, or project work.
Application Type: Faculty of Agriculture In-Course Award Application

**Estabrooks Family Scholarship**
The Estabrooks Family Scholarships was established by Evans and Lois Estabrooks to support students with financial need attending the Faculty of Agriculture.
Eligibility: Available to full-time students in the Bachelor of Science in Agriculture program, majoring in Plant Science who attended a high school in Atlantic Canada, achieved at least a 3.0 GPA in the previous term, and demonstrate financial need.
Application Type: Faculty of Agriculture In-Course Award Application

**PY Hamilton Scholarship**
Peter Y. Hamilton, Class of 1944 and Professor Emeritus, attended the former Nova Scotia Agricultural College, and later returned as Registrar in 1973. This scholarship has been established in his memory to reward scholarly excellence.
Eligibility: Available to Canadian citizens enrolled in any program in the Faculty of Agriculture on a full-time basis in their second year of study or later who have achieved an average of 80% in the previous year of study.
Application Type: Faculty of Agriculture In-Course Award Application

**Faculty of Agriculture Alumni Family Scholarships**
In celebration of the fact that many students at the Faculty of Agriculture are family members of AC Alumni, the Alumni Association decided to establish a Family Bursary for the first time in 2008. There are several bursaries available for family members of Alumni attending the Faculty of Agriculture.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Awarded based on academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application

**Faculty of Agriculture Athletic Bursaries**
Awarded to returning student varsity athletes.
Eligibility: Available to current student varsity athletes in any undergraduate program in the Faculty of Agriculture. Applicants will have demonstrated financial need, satisfactory academic standing, and be recommended for the award by a coach.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Faculty of Agriculture Bursaries
The Faculty of Agriculture has established a fund which will provide bursaries to assist students in need of financial assistance. Students in need of financial assistance can apply for a bursary on an ongoing basis throughout the academic year.

Eligibility: Available to current students at the Faculty of Agriculture who have demonstrated financial need and have satisfactory academic standing.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Animal Nutrition Association of Canada (Atlantic Division) Scholarship
The Animal Nutrition Association of Canada (Atlantic) Scholarship was established in 1989 for a student who successfully completes their second year of B.Sc. (Agr.) program. The Animal Nutrition Association of Canada (ANAC) is the national trade association of the livestock and poultry feed industry. The 170 members include feed and ingredient manufacturers and distributors, as well as suppliers of a wide range of goods and services to the feed industry. Taken together, ANAC’s membership represents 90 percent of commercial feed manufactured in Canada.

Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program who have demonstrated leadership in student and community affairs, strong academic performance, and who are not receiving other scholarships of higher value.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $300

Ralph H. Armstrong Memorial Award
Established in memory of Ralph Armstrong of North Kingston, Kings Co., Nova Scotia. Ralph was well known for his breeding of dual-purpose Shorthorns and marketing of livestock. His prize Shorthorns had been exhibited under the Brookmont Farms name for more than 30 years at Exhibitions throughout Nova Scotia, the Royal Winter Fair in Toronto, and in the 1980 World Shorthorn congress in Calgary. Mr. Armstrong was an honoured member, Secretary and Past President of the Nova Scotia Shorthorn Association, Vice President of the Annapolis County Exhibition, Past Director of the Atlantic Winter Fair and Past Director of the Maritime Shorthorn Association.

Eligibility: Available to former or current 4-H club members from Kings or Annapolis Counties in Nova Scotia who have completed their first year of study in any undergraduate program at the Faculty of Agriculture. Selection is based on financial need and involvement in school, athletic and/or community organizations.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $400

Associate Dean's Scholarship
Established by the Faculty of Agriculture and has built on a proud history of industry-leading education and research.

Eligibility: Available to students entering fourth year of the Bachelor of Science (Agriculture) program. Awarded based on academic merit.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $300

Atlantic Council of Crop Life Canada Awards
CropLife Canada is the trade association representing the manufacturers, developers and distributors of plant science technologies, including pest control products and plant biotechnology, for use in agriculture, urban and public health settings. They strive to ensure that the benefits of plant science innovations can be enjoyed by both farmers and consumers. CropLife Canada promotes sustainable agricultural practices and are committed to protecting human health and the environment.

Eligibility: Available to current students in the Diploma of Technology programs in the Faculty of Agriculture. Recipients will be from agricultural backgrounds and plan to pursue employment in the agricultural sector. Preference is given to students whose backgrounds, course and project work, summer employment, and career plans reflect an interest in the crop protection industry.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Atlantic Farm Mechanization Show Scholarship
The Atlantic Farm Mechanization Show is an event that is held bi-annually that mainly focuses on the newest, innovative ideas in the agricultural industry. Farming has changed dramatically over the last few decades. New farming ventures are becoming increasingly popular, from large tract farms that are operated by multi-nationals, to small individual bed plots. According to The Atlantic Farm Mechanization Show, “innovation has always been the most powerful tool in a farmer’s tool box and will continue to be so into the future.”

Eligibility: Available to students from Atlantic Canada who have completed at least one year in the Diploma of Engineering or Bachelor of Science (Agriculture) in Integrated Environmental Management program at the Faculty of Agriculture. Selection is based on academic performance and the demonstrated potential for a career in the area of mechanization of agriculture.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500
Value: $1,000

**Atlantic Fertilizer Council Award**

Eligibility: Awarded to a student from Atlantic Canada in the second year of a diploma program related to crop protection. Selection criteria include farm interests, leadership qualities within the University community, financial need, and academic performance.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: $500

**Atlantic Land Improvement Contractors Association Award**

The Atlantic Land Improvement Contractors Association Bursary was created by ALICA for engineering students with a keen interest in soil, water and land improvement. ALICA acknowledges that the cost of tuition is becoming increasingly high which makes it difficult for many students to attend University. The Board of Directors voted to begin a scholarship fund in 1990 and the scholarship has been active and helping students with their post-secondary education ever since.

Eligibility: Available to students in the Diploma of Engineering program in the Faculty of Agriculture with a demonstrated ability and interest in soil, water, and land improvement.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $800

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Dr. Roger S. Bacon Scholarship in Agriculture**

Dr. Roger S. Bacon was a dairy farmer and blueberry producer from Cumberland County, Nova Scotia. He was also a long standing MLA from this area. During his political career, he was a well-respected and long serving Minister of Agriculture and for a time Premier of Nova Scotia. In keeping with his
lifetime interest and service to Agriculture, Dr. Bacon has made a donation to establish an endowed fund to support a new scholarship at the Faculty of Agriculture.
Eligibility: Awarded to a Nova Scotia student entering the final year of any program at the Faculty of Agriculture who has plans to pursue a long term career in agriculture. Selection criteria include career plans, academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

**Doug Bailey Memorial Bursary**

Doug Bailey had a lengthy and successful career at Farmers Dairy (now Agropur). It began at what is now known as the Middleton Spreads Plant in 1968 when Twin Cities Dairy acquired J.D. MacKenzie’s Limited. Doug held many managerial positions over the years, including General Manager of the Truro Cheese Plant and Vice-President and General Manager of Central Dairies in Newfoundland. He was appointed President and Chief Executive Officer of Farmers Dairy (now Agropur) in 1987, a position he held until his death in 1996. One of Doug’s greatest strengths was his leadership ability, which he demonstrated not only with Farmers Dairy (now Agropur) but also throughout the industry. The Farmers Dairy (now Agropur) Board of Directors established this Bursary in memory of Doug.
Eligibility: Awarded to a technical, undergraduate, or graduate student at the Faculty of Agriculture who is a family member of an Agropur shareholder or employee. Selection criteria include leadership, extracurricular and community activities, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

**A. B. Banks Memorial Scholarship**

This scholarship is given by friends and family in memory of A.B. Banks, a former Director of Livestock Services Branch, Nova Scotia Department of Agriculture and Marketing. Mr. Banks was highly dedicated to the agricultural industry throughout his 35 year career in Nova Scotia and elsewhere in Atlantic Canada. He was born and raised in the Annapolis Valley and graduated from the former Nova Scotia Agricultural College and the Ontario Agricultural College. His career included service with the Canada Department of Agriculture, the Newfoundland Department of Agriculture and Forestry and the Nova Scotia Department of Agriculture and Marketing. As one of the first agricultural representatives in Nova Scotia, he served the counties of Colchester, Halifax, and Cumberland. He was a strong advocate of improved farm management skills and believed this to be an important key to improving agricultural production.
Eligibility: Awarded to the second year BSc(Agr) Animal Science student with the highest average from the first year of study.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

**Bible Hill Garden Club Scholarship**

The Bible Hill Garden Club, originally referred to as Hillcrest Landscape Club was first organized in January of 1947. The group was created to promote the improvement of home grounds, assist in the beautification of community grounds, local parks and schools. Over the years, the group has gained popularity and has grown from 17 members to over 60, mostly women who range in age of 50-60. The group contributes to the Faculty of Agriculture through help supporting students with the bursary they have created.
Eligibility: Available to current students who are permanent residents of the Truro area, in any undergraduate program at the Faculty of Agriculture, with preference given to students in at least the second year of study in Horticulture, preferably a landscape program. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

**Ali Brown Scholarship in Food Science**

This scholarship is established to honour the memory of Ali Brown. Ali spent approximately 15 years of her life working towards improving and implementing food safety standards within the dairy industry. It was with a strong sense of ethics and determination that she had to walk the line between industry’s goals and food safety for the public. This award salutes her dedication, determination, well rounded qualities and the spirit to succeed.
Eligibility: Recipient will be enrolled as a student at the Faculty of Agriculture, studying in any program in the Plant, Food and Environmental Science department. Recipients will have shown academic excellence. Preference for students with an interest in food science and/or food safety as demonstrated by having completed at least one food science or food safety course. Preference for students from Atlantic Canada as determined by where they attended high school. Preference for a student who identifies as female.
Application Type: Faculty of Agriculture In-Course Award Application

**David W. Brown Memorial Scholarship**

The David W. Brown bursary is an ongoing demonstration of appreciation to the foundation of the David Brown United Limited by Atlantic Poultry Incorporated formerly ACA Cooperative Limited. Initiated in November 25, 1976; the company has continued to fund an annual memorial scholarship.
Eligibility: Available to students who have graduated from a high school in Atlantic Canada and who are entering the second year of a technical program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, an interest in farming, and an interest in the poultry industry.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000
Edward Brown Memorial Undergraduate Bursary
The Edward Brown Memorial Undergraduate Scholarship was created in memory of Edward Brown under the estate of his wife, Dorothy Aveleigh Brown. Edward attended the Agricultural Campus and graduated in 1954.
Eligibility: Available to a Bachelor of Science (Agriculture) student, with preference to a student in the fourth year of study from Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Merle Cail Memorial Scholarship
The Merle Cail Memorial Scholarship Fund was created by Merle’s wife, Faye Cail in memory of Merle’s dedication to organic agriculture. Born in Rexton, New Brunswick, Merle was heavily involved in his community. He attended Zion Presbyterian Church, was director of Northumberland Co-operative and Cartier Co-operative, member of the Kent Agriconservation club, Moncton Holstein Association, Kent Farmers Association, Dairy Farmers of NB, and many more. Merle also had a dedicated career as a farmer.
Eligibility: Awarded to a senior undergraduate or graduate student from Atlantic Canada studying in the Faculty of Agriculture whose course and project work reflect an interest in organic agriculture. Selection criteria include academic performance, financial need and commitment to organic agriculture.
Application Type: Faculty of Agriculture In-Course Award Application

**Donald E. Clark Memorial Scholarship**

Professor Clark was born in Luchow, China in 1923 and came to Canada at the age of 15 months. In 1951 he graduated from the Ontario Agricultural College, B.S.A. (Honours). In 1962 while a member of the teaching staff at O.A.C. he received his M.S.A. from the University of Toronto. In 1968 he accepted a position with the NSAC as an Associate Professor and Head of the Agricultural Engineering Department. Donald was well known for his work with sprayers and zero tillage for corn production. He also served with distinction on such committees as the Canada Weed Committee, the Atlantic Herbicide Committee and the Atlantic Agricultural Engineering Committee. As a Professional Engineer and Agrologist, Donald was a charter member of the Canadian Society of Agricultural Engineers and in 1976 was elected President of this organization. As a result of Professor Donald E. Clark’s sincere commitment to his chosen field of study, and his lifetime of contributions to both the NSAC and the Engineering community, a scholarship has been created in his memory.

Eligibility: Available to current students in their final year of the Diploma of Engineering program in the Faculty of Agriculture. Selection criteria include academic performance, interest, and aptitude in the engineering field.

Application Type: Faculty of Agriculture In-Course Award Application

**Class of 1950 Award Fund**

The Class of ’50 Award was first established in 2000 at the Class of 1950, 50th anniversary weekend celebration. President, Don Young and Vice-President, Jack Johnson spearheaded the campaign to get their classmates involved in their commitment to help future AC students. The group recognizes the difficulty that young students face to finance their post-secondary education, as they too faced similar challenges. After a great deal of preparatory work from Don, Jack and Cliff McIsaac, a proposal was created for the Class of ’50 Award fund of to assist deserving students to “stick with it.” The group of classmates have made and continue to make significant contributions to the campus and students.

Eligibility: Available to current students in financial need in any technical or undergraduate program in the Faculty of Agriculture.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: $1,000

---

**Class of 1960 Memorial Bursary**

In recognition of their 50th reunion, classmates established the Class of 1960 Memorial Bursary. Classmates contributed generously to this fund, with the intention of supporting an AC student. Their wish is to honour their deceased classmates who contributed to this fund, and who valued the experience and education they received at the Nova Scotia Agricultural College.

Eligibility: Awarded to a full-time technical or undergraduate student enrolled in any program at the Faculty of Agriculture who has demonstrated financial need.

Application Type: Faculty of Agriculture In-Course Award Application
Colonel Charles Coll Memorial Scholarship
The Colonel Charles Coll Memorial was established in memory of Col. Charles Coll Sr. He was the inventor, owner and president of Muskol Enterprises Limited. He manufactured and sold Muskol insect repellent first from his basement in his Truro, Nova Scotia home and later from his manufacturing plant in Hilden, just outside of Truro. In 1957 Charles concocted a perfume to apply to clothing while deer hunting and later registered a company. The deer lure was used by regular deer hunters, bow hunters, wildlife photographers and naturalists. Charles named the ingredient “Muskol” which derives from musk, an ingredient in the lure and the phonetic last name Coll. Federal and Provincial Departments of Fisheries, Resources, Mines, as well as many sportmen and outdoors people still continue to use the Muskol Insect Repellent.
Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) Animal Science program. Selection criteria include academic performance, involvement and interest in poultry, and achievement and contribution to 4-H.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Charles M. Collins Memorial Scholarship
The scholarship is in memory of Charles McKittrick Collins who spent the years 1936-1962 working in various positions in the agricultural industry in Nova Scotia, including teaching at Dalhousie’s Agricultural Campus for twenty-five years. Collins Horticultural Building on the Dal-AC campus is named in his honour as well.
Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in the Bachelor of Technology program in Environmental Landscape Horticulture who have not qualified for other significant awards.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,200

George and Lottie Cook Memorial Scholarship
Lottie Cook first developed her passion for agriculture on her family farm on Cape Breton Island. Lottie’s parents were pioneers in the agricultural industry, and her father a renowned farmer. At a young age Lottie became involved in 4-H where she achieved some of the club’s top honours. She later graduated from the former Nova Scotia Agricultural College and worked as an assistant agricultural representative to J.C.F MacDonnell for many years. In 1943 Lottie married George Cook and the pair later opened a chick hatchery in Truro and became one of the foremost producers of high quality chicks in the Maritime Provinces. After the passing of her husband in 1954, Lottie continued to operate the family business. Due to Lottie’s involvement in the agricultural industry and former NSAC community from both herself and family business, a scholarship has been created in her and her husband’s name.
Eligibility: Available to students from Nova Scotia in the first or second year of a technical or undergraduate program at the Faculty of Agriculture. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Cooke Aquaculture Scholarship
Cooke Aquaculture Inc. created this award to support students studying Aquaculture at Dalhousie University. Cooke Aquaculture is a vertically integrated corporation headquartered in Black's Harbour, NB, with aquaculture operations in Atlantic Canada, the United States, Chile, Spain, and Scotland.
Eligibility: Students in 2nd, 3rd, or 4th year of the Bachelor of Science (Aquaculture) program who demonstrate high academic achievement and leadership in a volunteer, community, sports, or work activity.
Application Type: Faculty of Agriculture In-Course Award Application

Value: $2000
Year of Study: 2, 3, 4

Country Ribbon Agricultural Award
Country Ribbon established this scholarship to recognize and support students from Atlantic Canada with a demonstrated interest in pursuing a career in agriculture.
Eligibility: Must be enrolled in an undergraduate degree or diploma program at the Faculty of Agriculture, who plans to pursue a career in agriculture, preferably in Newfoundland and Labrador. Preference given to a student who attended high school in Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Renée Covill Scholarships
The Renée Covill Scholarship was established by Dennis Covill and Renée Covill in their estate. Dennis and Renee Covill, immigrated to Canada from England in 1955. Building on his experience working on the development of Colossus, the world’s first electronic computer, Dennis went on to establish Nautel Limited in Hacketts Cove, N.S. Under his leadership and expertise, Nautel created the world’s first high-powered solid state radio beacon—a technology now used around the world. Nautel, a partner in UNB’s wireless research program, designs and manufactures high power solid state radio transmitters for AM and FM radio stations, navigation radio beacons and other applications.
Eligibility: Available to current students studying in the Bachelor of Science (Agriculture) Plant Science, Environmental Science, or Integrated Environmental Management programs at the Faculty of Agriculture. Preference will be given to students who have demonstrated an interest in sustainable agriculture, organic agriculture or environmental issues. Selection criteria are academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $3,000
Dr. Kenneth Cox Memorial Scholarship
The Dr. Kenneth Cox Scholarship was created by the class of 1964 as a tribute for the retiring Principal of the former Nova Scotia Agricultural College. Dr. Kenneth Cox followed a very distinguished career in the Maritime agricultural industry. His early training was at the former NSAC, now known as the Faculty of Agriculture, where he graduated with the Class of 1921. He continued his studies at the Ontario Agricultural College graduating in 1924 with a Bachelor of Science in Agriculture.
Eligibility: Available to students entering the final year of the Bachelor of Science (Agriculture) program or a diploma program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Dorothy Creelman Cox Memorial Scholarship
The Dorothy Creelman Cox Scholarship was created by Dorothy’s husband, Kenneth Cox in memory of his wife. Dorothy Cox passed away on December 24th, 1992. She was a retired teacher and a secretary of University Club of Montreal. She was also an active member of the St. Andrews United Church and was mainly involved in choir and Sunday school.
Eligibility: Available to female students entering second year of the Bachelor of Science (Agriculture) Plant Science program. Selection criteria include academic performance and contribution to the university community.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Dairy Farmers of Nova Scotia Award
The Dairy Farmers of Nova Scotia organization was created through legislation enacted in 2001, and replaces the former Nova Scotia Dairy Commission. The organization exists under the umbrella of the Natural Products Marketing Council of the Department of Agriculture. The Dairy Farmers of Nova Scotia bursary has been active since 1989 and continues to help support students with their post-secondary education.
Eligibility: Available to a third or fourth year Bachelor of Science (Agriculture) student or a graduate student from Nova Scotia undertaking course or project work related to the dairy industry. Selection criteria include proven interest and experience in the dairy industry, the potential beneficial impact of study on the Nova Scotia dairy industry, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Dartmouth Horticultural Society Scholarships
The Dartmouth Horticultural Society is a gardening club whose aim is to promote, enrich and expand the practice of amateur gardening. Monthly meetings are held where their guest speakers from inside and outside the Society share their knowledge. In addition club experts are available for formal and informal exchange of ideas. Some of the club’s activities include a plant sale, a flower show, the planting and maintaining of a raised bed in Leighton Dillman Park, plant exchanges, and garden tours
Eligibility: Available to upper-year students in any plant-related undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to students from the Halifax Regional Municipality, followed by all Nova Scotia residents, followed by residents of other Canadian provinces. Selection criteria include financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Dalhousie Agricultural Students’ Association Awards
Dalhousie Agricultural Students’ Association (DASA) is the student association for all students at the Dalhousie Agricultural Campus. DASA is the official voice of the student body, and provides leadership and vision for the students of the Agricultural Campus. DASA promotes student engagement and leadership through various campus activities including Orientation, Shinerama, College Royal and Winter Carnival. DASA also promotes student engagement within the surrounding communities of Truro and Bible Hill. DASA works closely with Student Services and Administration to collectively provide a welcoming community dedicated to higher learning and service to the community.
Eligibility: Awarded to students enrolled in the Faculty of Agriculture who have demonstrated, in the current academic year, exceptional school spirit and involvement in any or all of the following: DASA sponsored events, volunteering, campus community leadership.
Application Type: Automatic Consideration – No Application Required
Value: 2 @ $300

K. de Geus Memorial Prize for Plant Science
The K. de Geus Memorial Prize was created in memory of Klaus de Geus. Klaus, met his wife, Christina “Tina” de Geus, in DeBeemster, The Netherlands. Klaus and Tina immigrated to Canada in 1957 with their three children, Gram, Louise, and Tineke. When they arrived in Canada, they decided to settle in Nova Scotia where they made a new life for their family, including setting up and running a successful flower shop and landscaping business in Bridgetown. Tina took great pleasure in her work as a floral designer. Over the years, she gave many demonstrations on all aspects of floral designing. This lead to a career in teaching floral design in the continuing education department of the former Nova Scotia Agricultural College.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture, based on high standing in course work, with preference to students in the Horticultural field.
Application Type: Automatic Consideration – No Application Required

The Honourable W. H. Dennis Memorial Prizes for Literary Compositions in English
Two prizes known as the Joseph Howe Prizes are offered each year. First prize $250, second prize $150, for a poem or collection of poems of any length
greater than one hundred lines. Two prizes known as the James DeMille Prizes are offered each year, one of $250 for an essay, the other of $250 for a prose short story.
Eligibility: Available to any full-time undergraduate or graduate Dalhousie student who submits the best essay, short story, or collection of poems.
Application Type: Contact the Department, School, or College for more information

**Dr. Donald Young Plant Science Award**
Created in memory of Dr. Donald Young, fund establishes an annual award for an undergraduate degree student studying Plant Science.
Eligibility: Upper year plant science
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships
Year of Study: 2, 3, 4

**CA Douglas Bursary**
The CA Douglas Bursary was originally established in 1984 in recognition of the impact of Charles Allan Douglas on the Agriculture industry in Nova Scotia.
Charles held positions at Scotstoun Creamery, Avon Valley Greenhouse Farm and had a 35 year career with the Department of Agriculture and Marketing.
Charles had a unique ability to inspire leadership and confidence in those around him, as he was very conscious of the importance of the individual. He devoted untiring energy to supporting rural youth and community development. As a result of his dedication and commitment to new technology, and his leadership and desire to relate to the individual Charles was inducted into the Atlantic Agricultural Hall of Fame in 1979 and honored with a bursary in his memory.
Eligibility: Awarded to a BSc(Agr) student enrolled full-time in the third or fourth year of study who has demonstrated financial need. Preference is given to students majoring in Animal Science.
Application Type: Faculty of Agriculture In-Course Award Application

**Eastern Veterinary Technicians Association Bursary**
The Eastern AHT Association represents AHTs and similar persons especially those working in the field of veterinary practice in the four Atlantic Provinces. Faced with the problem of a declining number of students entering the degree programs of the universities, the AHT Association, through its members, took the lead in establishing the Bursary in 1989.
Eligibility: Awarded to a student who best demonstrates proficiency in veterinary clinical skills during their first year and externship at the Atlantic Veterinary College as part of the Veterinary Technology program. Students must be in good academic standing and demonstrate financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $200

**Paul C Eaton Memorial Scholarship**
Paul C. Eaton was an alumnus, Class of ‘48, at the former Nova Scotia Agricultural College. Growing up on a dairy and apple farm, Mr. Eaton understood the importance of agriculture, and devoted his life to this passion. Mr. Eaton spent the majority of his career working in Extension Services on the Agricultural Campus.
Eligibility: Awarded to a full-time student from Atlantic Canada in the second year or higher of the BSc(Agr) program majoring in Environmental Sciences or Plant Science. Recipients must have a background in agriculture or come from a family farm. Selection is made on the basis of academic merit.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: at least $2,500

**Ernest L. Eaton Memorial Scholarship**
Throughout Mr. Eaton’s lifetime he maintained a keen interest in scientific agriculture, and the education and development of the interested young people. He personally established the Ernest L. Eaton Scholarships, and made provision for them to continue in perpetuity. Although none of his children are directly active in farming, they all are interested in, and support, the fine work being done at present at the Agricultural Campus. The hope for the recipient of the Ernest L. Eaton Scholarship is to encourage the pursuit of excellence in both academic and scientific activities.
Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program based on performance in second year. Recipient cannot have received another scholarship of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Egg Farmers of Newfoundland and Labrador Scholarship**
The Egg Farmers of Newfoundland and Labrador (formerly the Egg Producers of Newfoundland and Labrador) is a commodity board governing the production of eggs.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program. Applicants must be permanent residents of Newfoundland and Labrador.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000
**Noel Enman Memorial Award**
To honor the memory of Noel Enman, a former Agricultural Campus Animal Science Technician-Agricultural Technology student, 1979-1982, the Alumni Association has established a fund for the Noel Enman Memorial Award.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture whose personality and fellowship have contributed to student life and activities, thereby gaining the respect of the students and faculty.
Application Type: Automatic Consideration – No Application Required

**Faculty of Agriculture Mature Student Bursary**
At the Faculty of Agriculture, the student body demographics have shifted dramatically over the past generation. We have increasingly more students transfer from other institutions or begin studies as a visiting or mature student. The 2012 Annual Appeal for the Faculty of Agriculture focused on raising funds for an endowment that would benefit mature students. In addition, alumnus Charles MacQuarrie directed that his planned gift benefit Faculty of Agriculture mature students.
Eligibility: Students enrolled at the Faculty of Agriculture in full-time studies who demonstrate financial need and are mature students (as defined by the Registrar's Office).
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least $1,000

**Fall River Garden Club Bursary**
The Fall River Garden Club’s mission is to promote the improvement of home and community flower and vegetable gardens, lawns, trees and landscaping through friendly sharing of information, work and education. During the year they run fund raising events in order to raise money to beautify the neighborhoods. Their main fundraiser is their annual plant sale followed by an area garden tour whereby members open their gardens for viewing to the general public. The monies raised at these events go towards supporting Santa’s Express and giving a Bursary to a student at the Agriculture Campus studying horticulture. In addition, the gardens maintained in the surrounding areas are also funded from these events.
Eligibility: Available to a first year student in a Horticulture program at the Faculty of Agriculture in good academic standing, with preference given to students from the Fall River, Waverley, Wellington, Oakfield, Lakeview or Windsor Junction, Nova Scotia areas. Other residents of Nova Scotia will be considered. Applicants will have demonstrated financial need and well-developed career plans.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

**Farm Credit Canada Scholarship**
The Farm Credit Corporation is a crown corporation wholly owned by the Government of Canada. The Corporation’s mission is to “provide the Canadian farmer with a reliable source of long term credit and personalized counselling services.” Farm Credit Corporation strongly believes in the farm community and the education of youth. The Farm Credit Corporation Bursary is their way of demonstrating their commitment to the betterment of the young people in the community.
Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) program. Applicants must be Canadian citizens who are Agricultural Economics or Agricultural Business majors. Selection criteria include academic performance, interest and competence in farm management and in the subjects associated with the economics of the farm business, interest and involvement in college and home community as demonstrated by participation in organizations and affairs, farm experience, and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Farm Focus Scholarship**
Farm Focus of Atlantic Canada is an agricultural newspaper that covers the Atlantic Provinces and their diverse food production. The publication contains information on the various sectors of the agricultural industry, including: regional, national, and international news; profiles on farms and farm families; 4-H; features on new innovations and technology; and editorials and opinions on issues of importance to the farming community.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture at Dalhousie. Selection is based on financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $200

**Ena Fenton Memorial Scholarship**
Ena Fenton was a founding member of the Bedford Horticultural Society in 1950. Ena was an enthusiastic and willing participant in every function of that group for 47 years. Mrs. Fenton had been a teacher prior to her marriage and had always been interested in the education of young people. After her death in 1977, the Society decided to name their scholarship in her honor. They feel certain that she would have been very pleased by their acknowledgment of her interest in the development of Horticulture in Nova Scotia.
Eligibility: Available to students studying Horticulture or Environmental Studies, entering the second year of any undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to those from Bedford, Sackville, and Waverley. In years when no student from Bedford, Sackville, or Waverley applies for the scholarship, consideration will be given to other students from the Halifax Regional Municipality (excluding those from Halifax and Dartmouth). Selection will be based on financial need, career plans, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000
Robert and Sheila Frame Scholarship for Maple Research
This award was established by Robert and Sheila Frame to recognize and support student involvement in maple research. Robert Frame is the past President and current Vice-President of the Maple Producers Association of Nova Scotia (MPANS), and co-chair of the organization’s research committee. Eligibility: Awarded to a student enrolled in the BSc(Agr) program in any year of study who has demonstrated involvement in maple research, with preference for the following areas: research on natural and environmental influences on maple syrup production, research that contributes to best management practices in maple syrup production including business practices, and research on the origin and history of maple syrup production in Nova Scotia.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: $500

H. J. Fraser Memorial Prize in English
The H.J. Fraser Memorial Prize was established in memory of HJ Fraser who taught at the Agricultural Campus. Eligibility: Awarded to a second year student who has excelled in first year English at the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $50

Dr. Gerry W. Friars Undergraduate Research Prize
Dr. Friars, a former NSAC Alumnus, was introduced to scientific research by an undergraduate research project. This was the beginning of a career in research in teaching. In recognition of the significance of this first research experience, Dr. Friars has provided a sum of money to endow an Undergraduate Research Award. Eligibility: Awarded to a graduating undergraduate student from the Faculty of Agriculture who is judged to have completed the best written research report as part of the fourth-year project requirements.
Application Type: Automatic Consideration – No Application Required

Friends of the Federation Scholarship
The Nova Scotia Federation of Agriculture (NSFA) provides this scholarship to support undergraduate students at the Faculty of Agriculture and to recognize the importance of agricultural education. Funds for this award were raised in partnership with NSFA members and matched by the Federation. Eligibility: Enrolled full-time in the Faculty of Agriculture. Eligible students will have attended high school in Nova Scotia. Preference will be given to family members of NSFA members, and to students with career interest in primary agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships
Year of Study: Any

The Irving and Jeanne Glovin Award
The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying "good human conduct". Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.
Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.
Application Type: Contact the Faculty for more information
Application Deadline to Apply: mid-February

Governors’ Awards
In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students’ contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors’ Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.
Application Type: Contact the Department, School, or College for more information

Governor General’s Bronze Medal
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of technical programs.
Application Type: Automatic Consideration – No Application Required

Governor General’s Silver Medal
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of baccalaureate programs.
Application Type: Automatic Consideration – No Application Required

Kevin Grant Memorial Scholarships
In memory of Kevin Grant, Class of 1975 (Animal Science Technician diploma).
Eligibility: Available to students entering their final year in any two-year diploma program at the Faculty of Agriculture, with preference given to students enrolled on a full-time basis. Selection criteria include academic performance, leadership and contribution to campus life, career plans, and financial need.

Bonnie R. Haviland Memorial Bursary
The Bonnie R. Haviland Memorial Bursary was created by Barb Whiston in memory of her mother’s aunt Bonnie, in order to honor her memory. This bursary will provide a legacy to Bonnie Haviland and provide support and encouragement to the selected student.
Eligibility: Awarded to a student entering the second year of the Veterinary Technology program whose performance in the first year has demonstrated a caring attitude and a commitment to others. Applicants will have demonstrated financial need. Recipients must not have received other bursaries of greater value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Jennifer Hayes Starratt Scholarship
The Jennifer Hayes Starratt Scholarship was created by Jennifer’s husband, Mark, as a Christmas gift. Jennifer Starratt attended the Agricultural campus and graduated in 1996 with a Bachelor of Science in Agriculture. According to her husband the Agricultural campus holds a very special place in Jennifer’s heart and having a scholarship created in her name, is something very special to her. Due to the couple’s success in their professional lives, they were able to create a legacy to give back to the communities that have helped enrich their lives.
Eligibility: Available to female students entering their final year of the Bachelor of Science (Agriculture) program, with preference given to students who have completed their first three years at the Faculty of Agriculture. Selection will be based on academic performance, leadership, and involvement in campus activities. The scholarship will not be awarded to a student receiving other significant scholarships.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,500

Anna Helvig Schousboe Memorial Scholarship
This scholarship was established with the Department of Agriculture, Fisheries and Aquaculture, Government of New Brunswick, in memory of Anna Helvig Schousboe. Anna and her husband Gustav emigrated from Denmark in 1928 and became lifelong Kings Co. NB farmers and also very active in their community. Always strong believers in the value of education, after her death in 1993 Gustav endowed this scholarship in her memory to assist New Brunswick youth in pursuing studies in the agricultural field.
Eligibility: Awarded to a resident from Kings County, New Brunswick, working towards a degree or diploma in agriculture at the Faculty of Agriculture. Applicants must be permanent residents of Kings County, New Brunswick.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500
John Higgins Memorial Scholarship
John was a founding member of The Atlantic Association of Landscape Designers in 1992. He was instrumental to the development of Canada’s first ever Certification Program for Landscape Designers, which was available to all designers in the Atlantic Region, and pre-empted the National Certification Program by several years. John Higgins’ dedication and enthusiasm for the Landscape Design Industry throughout his career was unflagging, his contributions immeasurable. It is for these reasons that AALD decided to offer a Design Scholarship for students attending the AC, to be dedicated in his name. The Atlantic Association of Landscape Designers hope is that, in part through this scholarship, his legacy will live on.
Eligibility: Available to students entering third year of the Bachelor of Technology in Environmental Landscape Horticulture program in the Faculty of Agriculture. Selection criteria include academic performance and skill and interest in landscape design.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Eileen Holden Scholarship
To provide financial support for an undergraduate student.
Eligibility: Awarded to an undergraduate student who has graduated from a high school in/near Lunenburg County, NS. Preference is given to students who graduated from Bridgewater Jr/Sr High School or Park View Education Centre.
Application Type: Automatic Consideration – No Application Required

Dr. Bill Jenkins Memorial Scholarship
Bill’s career began early and always had the same theme; to improve farm management and education. He held numerous positions with the Provincial Department of Agriculture, the Faculty of Agriculture at Dalhousie University, as well as Chairman of the Nova Scotia Farm Land Settlement Board. Bill retired as Principal of the former NSAC (now Dalhousie Faculty of Agriculture) in 1972 after witnessing growth in both the level and training for all sectors of the agricultural industry. He then joined the staffs of the Council of Maritime Premiers’ Higher Education Commission, Services Overseas (CESO) in 1992. As a result of Bill Jenkins sincere commitment to his chosen career path, and his lifetime of contributions to both the AC and the Agricultural Industry, a scholarship has been created in his memory.
Eligibility: Available to students entering second or third year in any of the business degree programs in the Faculty of Agriculture. Selection criteria include overall academic performance, leadership, and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Joyce Family Foundation Agricultural Bursary
The Joyce Family Foundation Agricultural Bursaries were established to create an endowed bursary program to ensure students with financial barriers are able to access and succeed at the Faculty of Agriculture.
Eligibility: Must be a Canadian Citizen or Landed Immigrant, enrolled in any year of undergraduate study at the Faculty of Agriculture, has demonstrated financial need, and be in good academic standing.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships

Randy and Gladys Keddy Memorial Scholarship
The Randy & Gladys Keddy Memorial Bursary was established by their son, Stewart Keddy in memory of his parents to provide an on-going legacy that is meaningful for family members and friends. Stewart graduated from the Faculty of Agriculture in 1967, from McGill University in 1969, and from Dalhousie Dentistry in 1974, where he was recognized for excellence in endodontics and radiology. Stewart practiced as a dentist for 37 years. He served in the Dental Corps from 1974-1979 and was a founding partner of Purdy’s Wharf Dental Group from 1985 until his retirement in 2011. He held memberships in the Nova Scotia Dental Association, Canadian Dental Association, and Academy of General Dentistry.
Eligibility: Available to students entering second year of a diploma program or the third year of a degree program in the Faculty of Agriculture, with preference given to students from the Annapolis Valley of Nova Scotia with farm backgrounds. Awarded to a student whose background, program of study, course and project work and summer employment show a genuine interest in working in the agricultural industry following graduation. Selection criteria include career goals, academic performance, and financial need. Students receiving other scholarships of greater value will not be eligible for this scholarship.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships
Value: $1,000

Ketchum Manufacturing Company Limited Prize
Zebulon Ketchum, an Ottawa, Canada based inventor and former professional lacrosse player turned his love of tinkering into a successful business. He owned a bicycle shop in downtown Ottawa and eventually grew and expanded that business into other products including becoming the first provider of the new “horseless carriage” in the nation's capital. However, it was his inventor's nature that led him to the genesis of the Ketchum business which was metal identification tags to be used in the livestock industry. The company has become the world's leading supplier of tags used to identify and trace the origins of wild caught and farmed seafood and they continue to be a metal stamping company as well and currently produce numerous metal products for various industries around the world. The business started on a rural farm outside of Ottawa and when it moved it found itself in the middle of the city. What started as a niche business serving the local agricultural community spread regionally, then nationally, and now competes in almost every market of the world.
Eligibility: The Ketchum Manufacturing Company Limited Prize is awarded to a graduate of the Animal Science option.
Application Type: Automatic Consideration – No Application Required

Kings Mutual Insurance Scholarships
In memory of Past Directors, the Kings Mutual Insurance Company awards scholarships to students in the Faculty of Agriculture. The Kings County
Federation of Agriculture represents the interest of the agricultural community in Kings County and is an active voice for its 395 members with the Nova Scotia Federation of Agriculture, Council of Leaders and provincial and national governments.

Eligibility: Available to students in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Selection criteria include financial need, academic performance, and demonstrated interest in a career in the Agri-food industry as reflected by summer employment and/or extra-curricular involvement. This scholarship is not available to students receiving other scholarships of greater value. At least one scholarship will be awarded annually to a technical-level student.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

P. Max Kuhn Scholarship
P. Max Kuhn grew up on a small farm in Lawrencetown, Halifax County. He lived from 1887 until 1928 and was the father to Bernard G. Kuhn. Max attended one year of the former NSAC General Course in 1908-1909. He was not able to return the next year because of need for him at home and shortage of funds, it was a great disappointment to him. That year was his only year of formal schooling; his home was so isolated that he was never able to attend grade school or high school, and his mother taught him at home. Max was a dedicated, hard-working farmer, and he made great use of his AC training. He bought his own Manor Hill Farm in 1918, located on Woodlawn Road (Portland Street) just outside what were then the town limits of Dartmouth. He market-gardened and ran a dairy there until his death. It was Bernard’s wish to establish this scholarship to recognize his father, Max, give education opportunity to others beyond what his father had, and to “repay Nova Scotia, former NSAC and Canada in small part for the education and support that he received here” (Bernard G. Kuhn).

Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture at Dalhousie, with preference given to students who have completed at least one year of study. Applicants must be permanent residents of Nova Scotia, with preference to students from the Halifax Regional Municipality. Awarded to a student with a farm background or those whose course and project work and summer employment demonstrates an interest in working in the agriculture industry after graduation. Selection criteria include financial need and academic performance.

Application Type: Faculty of Agriculture In-Course Award Application

Langille Brothers Scholarship
Alan Langille graduated from the Nova Scotia Agricultural College in 1958 and went on to have a career as a plant physiologist and professor at the University of Maine. Alan makes this scholarship possible in memory of his two older brothers, both also NSAC Alumni. Bruce Langille (grad 1946) went on to work as a chemist for the Plant Products Lab in Ottawa. Jim Langille (grad 1947) went on to a career as an Agronomist for Nappan Experimental Farm.

Eligibility: Awarded to a third year BSc(Agr) student majoring in Plant Sciences. Preference will be given to students who have completed their first three years of study at the Faculty of Agriculture. Awarded based on academic excellence and financial need.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Raymond Loo Memorial Scholarship in Organic Agriculture
Raymond Loo was a certified organic farmer from Springhill, PEI where he operated Springwillow Farms. Ensuring there was room for wildlife on the farm and exploring ways to produce healthy food with the smallest environmental impact was very important to Raymond. Committed to promoting better farming practices in his community, he was a founding member of ACORN and board director for 6 years. Raymond also helped found and was the first president of the PEI Certified Organic Producers Cooperative. Raymond was dedicated to his province and the field of organic agriculture and was recognized greatly for his contributions.

Eligibility: Awarded to an undergraduate or technical student at the Faculty of Agriculture enrolled in at least one organic agriculture course offered on the Dalhousie Agricultural Campus.

Application Type: Faculty of Agriculture In-Course Award Application

The Robert and Katherine MacDonald Award
An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students’ Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.

Eligibility: Available to an undergraduate Chinese student who is a member of the Dalhousie Chinese Students and Scholars Association.

Application Type: Automatic Consideration – No Application Required

C. C. MacDougall Memorial Scholarship
C.C. MacDougall was the first district agriculturist to work with the NB Department of Agriculture in Sussex. The C.C. MacDougall Memorial Scholarship was established in 1958 by a large group of agriculture groups.
Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture. Awarded to a student pursuing a degree or diploma in Agriculture. The recipient must have a 4-H member from Kings County, New Brunswick, or have parents who raise or breed Guernseys anywhere in New Brunswick.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: $250

Danny MacEwen Memorial Scholarship
Danny was an example of what typifies a farmer – not afraid of hard work, willing to give everything he had even if the financial return wasn’t always there, and proud of what he did for a living and never made an excuse for it. Danny was also very involved in the community and those who lived in it. He enjoyed not only showing off his many talents but also found great satisfaction in teaching others. Although he was not known for his patience, he strived hard to achieve the best at whatever he did. Danny will always be remembered for his passion for farming, and the agricultural world is a better place because of what he gave.

Eligibility: Awarded to a BSc(Agr) student majoring in Agricultural Business who has a background in agriculture or comes from a family farm. The recipient will be involved in the community and athletics, either at the Faculty of Agriculture or in the local area.

Application Type: Faculty of Agriculture In-Course Award Application

Value: $1,000

Dr. Allan and Barbara MacKay Scholarship
Born in Heathbell, Pictou County, Nova Scotia, Dr. Allan MacKay received his early agricultural experience on the Spruce Grove Farm that had the distinction of having one of the first purebred Guernsey herds in Canada. He was a member of the Scotsburn Junior Dairy Calf Club and represented his province in the National competitions for club members at the Royal Winter Fair in Toronto in 1941. Dr. MacKay received his primary education at Heathbell School and his secondary education at Pictou Academy. He graduated from former N.S.A.C. in 1943 and obtained his Doctor of Veterinary Medicine from the Ontario Veterinary College in 1951. That same year he established a veterinary practice in Pictou County and continued his work until his retirement in 1991. Dr. MacKay is honoured for his program of animal health care, for his philosophy of preventing disease problems before they occur and his dedication to farm families in the area he served.

Eligibility: Awarded to a student with strong academic performance from the Faculty of Agriculture who plans to study veterinary medicine at the Atlantic Veterinary College.

Value: $250

Paul R. MacPhail PEI Potato Industry Scholarship
The roots of the Prince Edward Island Potato Board can be traced as far back as 1920, when the first Potato Growers’ Association was formed on Prince Edward Island. A true marketing board followed in 1950 and was restructured as a producer controlled board under the Natural Products Marketing Act in 1990. The PEI Potato Board established this award in memory of Paul R. MacPhail.

Eligibility: Awarded to a PEI student studying at the technical or undergraduate level of an agricultural program. The recipient will demonstrate an interest in working in the potato industry through course work, research projects related to potato production and utilization (including all disciplines, e.g. pathology, biotechnology, entomology, etc). Awarded based on academic performance and the project's relevance to the improvement of the potato industry.

Joseph E. Mapplebeck Memorial Bursaries
In honour of Joseph E. Mapplebeck, who farmed for 50 years in Kings County, Nova Scotia, and in recognition of his appreciation for the importance of a good education, family members have established two bursaries.

Eligibility: Available to current second year technology students at the Faculty of Agriculture in good academic standing who demonstrate financial need.
Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture.

Maritime Dairy Industry Scholarship
Dairy Farmers of Canada created this award to support Maritime students interested in the dairy industry. Dairy Farmers of Canada (DFC) is the national policy, lobbying and promotional organization representing Canada's farmers living on 12,529 dairy farms. DFC strives to create stable conditions for the Canadian dairy industry, today and in the future. It works to maintain policies that foster the viability of Canadian dairy farmers and promote dairy products and their health benefits.
Eligibility: Awarded to a third year student from the Maritime provinces enrolled in any Faculty of Agriculture program who shows commitment to and interest in the dairy industry, and professional and academic promise.
Application Type: Faculty of Agriculture In-Course Award Application
Value: $2,000

Masstown Market Bursary
Masstown Market is a national award-winning, progressive, family owned business celebrating over 45 years of quality and excellence in specialty food, gift and garden retailing. This fund is created by the Jennings family to establish an award at the Faculty of Agriculture that will support an Undergraduate, Technical or Diploma student at the Faculty of Agriculture with an interest in encouraging students who aspire to start or expand a family business in Atlantic Canada.
Eligibility: The recipient will be enrolled at Dalhousie University Faculty of Agriculture in an Undergraduate, Technical or Diploma program. They must be from Atlantic Canada as determined by their High School. They have demonstrated financial need. Preference for a student who indicates an interest in starting or growing a family business in Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application

Bill Mathewson Memorial Award
Bill Mathewson grew up on a hill sheep farm in Sma Glen, Scotland. He graduated with a BSc (Agriculture) in 1949 and later (1974) a MSc. both from Aberdeen University. On graduation 1949, he joined H.M. Overseas Civil Service. After further training in Cambridge and Trinidad, he was posted to Tanganyika, Africa where he worked for 14 years. On retirement in 1965, he worked for three years with the N.F.U. of Scotland in Edinburgh before immigrating with his family to Nova Scotia in 1968. He taught for 20 years at the Faculty of Agriculture. Bill retired in 1988 and was honored by his colleagues by being made Professor Emeritus. Much loved by students, faculty and the agricultural industry, Bill will be greatly missed. It is with his memory in mind, that Bill’s friends and colleagues at the AC launched an award in his name.
Eligibility: Available to any student registered in any program at the Faculty of Agriculture participating in an international experience. In applying for consideration, students will submit a proposal to participate in such activities as a study semester abroad toward their degree/diploma, attendance at a conference to make a presentation, a specialized training course or an internship or development project.

Value: $1,000

Donald McInnes Award
Established in 1904, Pictou Mutual Insurance Company is the oldest mutual insurance company in Nova Scotia. Initially established by a group of farmers who sought to provide local protection for each other in the event of loss, their company has grown to include more than 3,500 local and rural policyholders. Donald McInnes was born in 1933 on the original McInnes farm on Scotch Hill Road. A graduate of Pictou Academy high school, he attended the AC, graduating in 1955. As a shareholder of Scotsburn Co-op, Donald served as Director for 22 years and Chairman of the Board for 15 years. For 35 years Donald was active in the Pictou County Farmers Mutual Fire Insurance Company. Donald served first as an agent, then as a director and manager of the company. Due to Donald’s sincere involvement with both the community and Pictou Mutual Insurance Company, an award has been created in his name which is funded by Pictou Mutual Insurance.
Eligibility: Available to a student enrolled at the Faculty of Agriculture. Selection criteria include commitment to and involvement in the community and leadership provided in student activities, academic performance and financial need. A student may not be selected for this award more than once.
Application Type: Faculty of Agriculture In-Course Award Application

H. A. L. McLaughlin Memorial Scholarship
The H.A.L. McLaughlin Memorial Scholarship was established in memory of H.A.L. McLaughlin who taught horticultural at the Agricultural Campus from 1953 to 1971.
Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture.
**Reg Moore** was born in Economy, Nova Scotia on August 25, 1917; the fifth of six children. He was educated in Economy and Bass River graduating in 1935.

**Clint McLean Memorial Scholarship**
The Clint McLean Memorial Scholarship was established by Clint’s loving family, with contributions from his many friends and colleagues. Clint loved life and had many interests including entertaining, fine cooking, travel and music. To Clint family was everything; no amount of trouble, sacrifice, or inconvenience was too much. However, his heart was in agriculture. He lived and breathed agriculture, but dairy had a special corner in his heart. Not only did he talk the talk, he walked the walk. Clint was a graduate of NSAC (Class of 1979) and Guelph University. He was also an active member of his alumni associations, serving as Vice President and President for the Agriculture College Alumni. Clint served on the Agricultural Institute of Canada Board of Directors and on numerous institute committees. He served as the chair of the Atlantic Forage Crops Advisory committee and represented the Atlantic Provinces at the National Expert Committee on Forage. Clint was a distinguished and valued member of the NB Department of Agriculture, taking a leading role in innumerable initiatives to support the true stewards of the land: the farmers of Atlantic Canada. His career was that of a scientist with a human touch.

Eligibility: Awarded to a third or fourth year BSc(Agr) student, with a preference to a student from New Brunswick and a preference to a student involved in the study of dairy. Recipients will have strong academic standing and demonstrate financial need.

**Value:** $2,000

**Karen Meek Memorial Scholarship**
Karen was born March 28, 1962 and grew up on the family farm in Canning, Nova Scotia. She attended local schools and graduated from Cornwallis District High School in 1980. Karen was an avid participant in school sports, 4H, horseback riding, ringette, her motorbike, and living life to its fullest. Following in her father’s footsteps (Eric Meek – class of 1954) she attended and graduated from former NSAC in 1982 with a Diploma in Ag Business. Karen participated in many campus activities but the Woodsmen Team was always her favorite. She developed many close friendships in her years in Truro. The Karen Meek Memorial Scholarship was established so that Karen’s memory could live on.

Eligibility: Available to current students in the Bachelor of Science (Agriculture) Environmental Sciences program. Selection criteria include academic performance, financial need and contribution to campus life. This scholarship is not available to students receiving other awards over $1,000.

**Application Type:** Faculty of Agriculture In-Course Award Application

**Application Deadline to Apply:** Check dal.ca/scholarships for application deadline

**Value:** $1,500

**John Miller Memorial Award**
Since 1983 John Miller assisted the hog industry by coordinating and providing programs that greatly improved the industry as secretary/manager of Pork Nova Scotia. John spent countless hours educating producers and others of the cost efficient and productive way to raise and market hogs. He often spoke at the Faculty of Agriculture to students in the hog production course on the strengths of the industry. To show appreciation of this dedication, the producers and friends of Pork, NS provide an award in memory of John.

Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Awarded to a student whose course and project work and career plans reflect an interest in the hog industry or whose application shows interest, understanding, and appreciation for Nova Scotia’s hog industry.

**John Reginald (Reg) Moore Memorial Scholarships**
Reg Moore was born in Economy, Nova Scotia on August 25, 1917; the fifth of six children. He was educated in Economy and Bass River graduating in 1935.
Reg then enrolled in Normal (Teachers) College in Truro. He taught in various locations in Nova Scotia until called up for service in the Royal Canadian Air Force in 1940. Reg served as a staff pilot and as a Coastal Command pilot in Canada and the United Kingdom. Returning to Canada in 1945 Reg enrolled in the Nova Scotia Agricultural College (now the Faculty of Agriculture, Dalhousie University). He graduated from the former NSAC in 1947. Reg spent his entire post war career at the FCC. First as a Credit Advisor, then as Branch Manager for Nova Scotia. In 1960 he was transferred to Saint John, New Brunswick as Executive Assistant to the Regional Manager Atlantic. By 1962 Reg had tired of doing office work and transfers (four in three years) so requested a transfer to field duties where he would have day to day contact with farmers. He was assigned to the Sussex, NB Office where he completed his career, retiring in 1981.

Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in a full-time capacity. Applicants must be permanent residents of Colchester County, Nova Scotia and will have completed at least one year of study. Selection will be based on financial need and a cumulative average of at least 3.00.

Application Type: Faculty of Agriculture In-Course Award Application

A. C. Neish Memorial Trust Scholarship
Dr. Neish (1916-1973) was an undergraduate at the former Nova Scotia Agricultural College in Truro. This is where he had his first contact with science and where he had won the Governor General’s Medal and a Macdonald College (Quebec) Scholarship. His work on fermentation, bacterial and plant metabolism and the biosynthesis of plant polysaccharides and lignins received international acclaim. He was a Fellow of the Chemical Institute of Canada, of the Royal Society of Canada, and the Royal Society of London. Dr. Neish was the first person to be awarded the Gold Medal of the Canadian Society of Plant Physiologists, and was awarded an honorary doctorate by Mount Allison University and an honorary Doctor of Science degree by McGill University. The A.C. Neish Memorial Trust Scholarship was established by friends, admirers, and colleagues of the late Arthur Charles Neish.

Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) program. Selection criteria include high academic performance and qualities of leadership as indicated by participation and achievement in both academic and non-academic activities.

Nova Scotia Mink Breeders Association Award
Dr. Bruce Hunter passed away on October 19th, 2011 at the age of 61. He was a leading veterinarian in the fields of avian and furbearer disease, and an integral part of the Canadian mink industry, serving as director of research for the Canada Mink Breeders Association. He was a longtime champion of integrating animal, human and environmental health at OVC and around the world. He played a key role in setting up a Canadian Community Practice in EcoHealth (CoPEH) and a graduate-level course in ecosystem approaches to health involving U of Gm the University of British Columbia and Université du Québec à Montréal. Recently, he was co-leader of a poultry project in Ghana for Veterinarians Without Borders/Vétérinaires Sans Frontières-Canada. This year, he received the Aeroplan Volunteer of the Year Award from VWB/VSF in recognition of his work and commitment. The Nova Scotia Mink Breeders Association established this scholarship in memory of Dr. Bruce Hunter, a retired veterinarian from Ontario Veterinary College and recognized expert on naturally occurring diseases in mink. This scholarship will recognize students who have an interest in mink.
Eligibility: Available to current students in any Animal Science-related undergraduate program in the Faculty of Agriculture, with preference given to a student whose course/project work demonstrates an interest in the mink industry.

**Oxford Frozen Foods & Associates Award**

In July of 2018 Oxford Frozen Foods celebrated 50 years in business. To honour this occasion, John Bragg established the Oxford Frozen Foods and Associates Award to provide scholarship support to rural Atlantic Canadian students entering the Faculty of Agriculture at the Agricultural Campus of Dalhousie University in Truro, Nova Scotia.

Eligibility: The recipient will be enrolled in the Faculty of Agriculture in any program, have attended high school in rural Atlantic Canada, and demonstrates financial need and high academic standing.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Donald Palfrey Award**

The Don Palfrey Award was established in memory of Don Palfrey in recognition of his many years of service and contributions to weed science in Nova Scotia. Don was born in Fort Fairfield, Maine. He received his formal education in Pictou County and he graduated from the AC in Truro, Nova Scotia and from McGill University in Montreal, Quebec with a Bachelor of Science in Plant Pathology. He worked for the N.S. Department of Agriculture in Marketing for 37 years, retiring as Supervisor of Weed Science, where he was a key player and helping in pioneering work in extension and research in weed control in Nova Scotia. Don also taught at the AC for 18 years, teaching courses in Weed Control and Plant Pathology. He was a distinguished life member of the N.S. Institute of Agrologists and the first honorary life member of the Atlantic Vegetation Management Association. As a result of Don Palfrey’s sincere commitment to the Department of Agriculture and his field of interest, an award has been created to honor his memory and legacy.

Eligibility: Awarded to a final year undergraduate student carrying out a research project in the area of pest management, with preference to a student involved in weed science, either through academic work or summer employment.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

**Robert Parent Memorial Scholarship**

The Robert Parent Memorial Scholarship was created in memory of Robert Parent who attended the Agricultural Campus and graduated in 1921. His wife, Laura E. Daisy Parent, left in their estate, wishes to establish a scholarship in his memory.

Eligibility: Available to an outstanding current student in any undergraduate program in the Faculty of Agriculture who has not qualified for other significant awards.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,200

**Passionate Plants Person Award**

In 1976, with two passionate plants men – the late Don Craig and the late Captain Richard Steele – as founding members, they began as RSCAR, the Rhododendron Society of Canada Atlantic Region. They were one of three regions, the other two being Niagara and Toronto. When Niagara and Toronto decided to join the American Rhododendron Society in the 1980s and RSC ceased being its own organization, the three regions – Atlantic, Niagara, and Toronto – became the 3 chapters in District 12 of the ARS. In 2003, they formed the Atlantic Rhododendron & Horticulture Society, to reflect the diversity of plant interests among local gardeners and plants people, while maintaining a central interest in rhododendrons and other ericaceous plants. They are a non-profit society registered in Nova Scotia.

Eligibility: Available to students entering second year of the Environmental Horticulture diploma program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Preference is given to students whose passion for plants is infectious and will most impact the way we regard and understand plants in both public and private environments. The student should also demonstrate leadership abilities and financial need.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $750 and 1-yr membership with ARHS

**Pork Nova Scotia Scholarship**

Pork Nova Scotia is the marketing agent for hogs in Nova Scotia. Their mandate is to create the most favorable environment possible for the production and marketing of pork in Nova Scotia to assist in maximizing returns for Nova Scotia producers. PNS has an active and organized structure that has become the recognized voice of the Pork Industry in Nova Scotia. It is organized into 3 geographical zones, representing pork producers who account for 100% of Nova Scotia’s pork production.

Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Awarded to a student with an interest and/or background in swine production. Selection criteria include demonstrated interest in the swine industry (through course or project work), academic performance and financial need.

**Stuart Rath Junior A Bearcat Hockey Education Award Fund**
The Stuart Rath Truro Bearcat Education Awards have been established to encourage the pursuit of university education among players with the Truro Junior A Bearcat Hockey Team (“The Bearcats”) by providing tuition support for players enrolled at Dalhousie University. Stuart Rath, a very involved community member of Colchester County and surrounding area, established The Bearcat Hockey Education Award. Some of Stuarts endeavors are as follows: he served as the Vice President of Truro Centre Ltd, and the President of Stuco Holdings Ltd. From 1985-1995 Stuart served as the President of Halifax Cablevision Ltd, from 1976-1985 he served as the President and General Manager of Eastern Cablevision, and from 1960-1975 he was the Chairman of the Truro Industrial Society. A few of Stuarts other accomplishments are being Director of Nova Scotia Business Inc. since March 2007, Director of Morien Resources Corp since December 1997, as well as serving as Director of Stuco Holdings Ltd. and Director of Erdene Resource Development Corporation since June 2006 until November 2012.

Eligibility: Available to entering or current technical and undergraduate students at the Faculty of Agriculture. Selection is based on academic performance and the recommendation of the team coaches.

Application Type: Automatic Consideration – No Application Required

**Cliff and Grace Retson Memorial Scholarship**
The Grace and Cliff Retson Memorial Bursary was first created by Grace in memory of her husband, Cliff Retson who graduated from the AC in 1934. Cliff passed away in 1997. Grace was born in Waskada, Manitoba and grew up in Kerrobert, Saskatchewan. She attended secretarial school in Saskatoon and after retiring, she received her Bachelor of Arts from St. Mary’s University. Grace met Cliff, her husband of 56 years, while she was working at the Senate in Ottawa. They married on July 26, 1941 and moved to Truro in 1947. The Retson’s (Grace & Cliff) hosted several international students studying at the Faculty of Agriculture over the years. It is for this reason and to ensure ongoing support of the educational interests of International students studying at Dal-AC, that Grace created the scholarship.

Eligibility: Available to international students in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, and interest in and involvement in multi-cultural activities on campus.

**Ira L. Rhodenizer Memorial Scholarship**
Ira Rhodenizer was born in 1890 in Parkdale, Lunenburg County, Nova Scotia and lived there for the majority of his life. He served in the Canadian Army from 1914 to 1919 and was wounded overseas during World War I. He later became a farmer, storekeeper, and lumberman in Parkdale, NS. He was greatly interested in community life and was associated with farmer’s organizations for many years. He was married and had seven children. He was a member of the Baptist Church, the I.O.O.F. and Masons. Ira was active in Nova Scotia Guides and Fish and Game Associations, had been a municipal councillor and President of the Lunenburg Centre Liberal Association. He was a Director of the Nova Scotia Federation of Agriculture and was killed in a car accident on the way to a meeting of this organization in August 1958. The Ira L. Rhodenizer Memorial Scholarship was provided by the Federation as a memorial for his dedication and contributions through the years.

Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Selection criteria include academic performance, involvement in student affairs, and participation in the 4-H program.

**Value:** $500

**Dr. Robert G. Rix Family Farm Scholarship**
Robert (Bob) Rix was born in Halifax on July 29th, 1948. Robert graduated from Dalhousie University Dental School in 1974. He practiced in Musquodoboit Harbour, Tatamagouche, and Winsloe, PEI, prior to opening his own dental practice in Bible Hill. He took great interest in his profession and knew the family trees of most of his patients and will be fondly remembered by everyone for his excellent dentistry, story-telling, knowledge of American History, love of gardening, tinkering with mechanical items, love of nature and his family. Robert had originally established the “Robert G. Rix Family Farm Bursary” in 1985. Although not having a farm background himself, he shared his beliefs that everyone’s roots are in the land and he felt his way to contribute to the importance of agriculture to our society was through this small bursary each year. A couple years ago, the award became known as the “Dr. Robert G. Rix Scholarship” to allow support to a student where the need was greatest. After Robert’s passing, one of the faculty provided funds to continue the bursary in Robert’s name. Since then, Robert’s family has graciously supported the scholarship to allow his legacy and memory to live on.

Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture who has shown determination and dedication to operating a family farm. Recipients will have demonstrated financial need.

Howard W. Roper Memorial Award
The Howard W. Roper Memorial Bursary: Presented by the Nova Scotia/Newfoundland Holstein Branch was established in memory of Howard Roper. Howard was born in Charlottetown, PEI and later moved to Princeport with his father in 1926 to manage the Beech Hill Farm and Dairy. Howard and his father purchased the farm in 1932 and operated the farm with purebred Guernsey’s until 1952. Following the sale of the farm, he was employed by the Nova Scotia Animal Breeders Co-operative as Manager of Sales and Promotions. Howard was well-known throughout Canada, especially in Atlantic Canada for his work in the dairy industry and his love of dairy cattle, particularly Holsteins and Guernsey’s. He was inducted into Atlantic Agricultural Hall of Fame in 1980, an institution in which he was instrumental in founding. The Canadian Association of Animal Breeders honored Howard in 1992 with the Award of Merit for outstanding contribution to the Dairy Cattle Industry. He was also a lifetime member of the Canadian Guernsey Breeder Association. Those who knew Howard best will remember him for his honesty, integrity, love of people and his great eye for cattle.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program at the Faculty of Agriculture, with preference given to second year students in the Diploma in Business Management - Dairy Farming program. Applicants must be either be permanent residents of Nova Scotia or Newfoundland and Labrador. Applicants must be members of Holstein Canada, or, a member of a family with Holstein Canada membership. Selection criteria include involvement in the dairy industry, extra-curricular involvement through athletics and clubs on campus, involvement in farm organizations, financial need and satisfactory academic performance.

Ted Rose Memorial Scholarship
The Ted Rose Memorial Scholarship was created by Mrs. Ann M. Rose in memory of her husband, Ted. Ted had grown up on a dairy farm in Urbania, near Shubenacadie. Ted and his brother Percy ran the farm after the death of their father. Although no one from the family had any connection to the AC, Mrs. Rose had a soft spot for farming, admitting there can be "nothing as rewarding as farming." Rose wanted to provide a scholarship to a deserving young person who is interested in farming themselves someday, while honoring her husband’s memory.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Awarded to a student who plans to operate a livestock farm. Selection criteria include financial need, academic performance and a documented commitment to animal welfare.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Rotary Club of Truro International Student Bursary
The Rotary Club of Truro has been part of the fabric of the community of Truro as well as the network of Rotary Clubs around the world since 1926. The Rotary Club of Truro is proud of its years of service and benevolence in the community and internationally. In addition to providing assistance to countless individuals with special needs for medical treatment or equipment over the years, the Club has continued to focus on the needs of children with disabilities.
Eligibility: Available to a current international student at the Faculty of Agriculture. Preference will be given to students registered in a program of study and registered full time, with additional preference given to students studying for the full year. Special consideration will be given to students who came from a developing country and plan to return and apply their education there. All students paying the international tuition differential are eligible for consideration. Selection criteria include financial need and potential impact of the bursary on the student's lifestyle while at school and their future plans.

Jack Sibley Agriculture Bursary
This award was established by the John & Judy Bragg Foundation to honour John D (Jack) Sibley. Jack was born in 1937 at Meaghers Grant in Nova Scotia’s Musquodoboit Valley and graduated from Musquodoboit Rural High School in 1954. After receiving a BA from Mount Allison University in 1957 he attended the Nova Scotia Agricultural College and is an alumnus of the Class of 1959. He began his working career as a teacher and then moved on to work for several years as a field manager for McCain Foods. In 1965 he returned to Nova Scotia and spent the next 29 years as a wild blueberry extension specialist with the Department of Agriculture and Marketing. In 1994 he retired from this position and in 1997 began work with WBANA Canada in wild blueberry promotion, retiring in 2011 after a total of 44 years of service to the wild blueberry industry. Jack had a number of part-time careers which included operating his own wild blueberry acreage, working as a musician and MC, and teaching old-time fiddling to children from the Truro area.
Eligibility: Awarded to a full-time technical or undergraduate student at the Faculty of Agriculture who demonstrates financial need.

G. G. Smeltzer Memorial Award
Gerald “Gerry” Gordon Smeltzer was a graduate of the former Nova Scotia Agricultural College and McGill University, his work in the livestock industry, apiculture, livestock crops, 4-H, and his community rapidly earned Gerry Smeltzer the admiration of all who came to be associated with him. As an Extension worker with the Nova Scotia Department of Agriculture and Marketing, he promoted improved livestock management techniques and was considered a driving force in the 4-H program. While an agrologist with Agriculture Canada, his work on new varieties of corn for silage and grasses, legumes, soybeans, fababeans, field peas, and small grains, laid the foundation for the livestock industry of Eastern Canada. In 1966, Mr. Smeltzer was named the Annapolis Valley Man of the Year in appreciation of his efforts. In 1987, he was awarded the Fred Rathje Memorial Award by the Canadian Beekeepers’ Association.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program at. Applicants must be permanent residents of one of the Atlantic provinces and be Plant Science - Agronomy majors. Selection criteria include a genuine interest in the area of field crops reflected through course and project work and summer employment, and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Sodhi Memorial Bursary
This bursary was established by the Sodhi family in memory of Mr. Bhagat S. Sodhi, long-time librarian at the former Nova Scotia Agricultural College. Mr. Sodhi immigrated to Canada in the 1960’s, in search of opportunity for his future family. After meeting and bringing his wife Darshan to Canada, they settled in Truro, NS, and began their family. Mr. Sodhi began working at the former Agricultural College in 1968, when the campus library was housed in Cox Institute. He was instrumental in moving the library to its current location at the MacRae Library, acting as head librarian until 1995. Mr. Sodhi considered the library staff as a second family. As a tribute to his memory, the Sodhi Family established an award in his name upon his passing on June 1st, 2009.
Eligibility: Available to current international students at the Faculty of Agriculture in good academic standing, with preference given to students in undergraduate and technical programs based on financial need. Students in all programs of study are eligible.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

South House Sexual and Gender Resource Centre Bursary
The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women’s Centre, was founded in recognition of women and trans people’s common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between $25 and $250. Available funds are split between applicants. See http://southhousehalifax.ca/ for an application form.
Application Type: Contact the Department, School, or College for more information

Sport Leadership Award
The Sport Leadership Award recognizes a high school varsity athlete enrolling full time in a program of study and planning on participating in a sport at the varsity level at the Faculty of Agriculture.
Eligibility: Available to entering technical or undergraduate students at the Faculty of Agriculture with an admissions average of at least 75%. Recipients of other major entrance scholarships are not eligible. Selection criteria include financial need, sport skills and leadership.
Application Type: Automatic Consideration – No Application Required

Phillip Stead Memorial Leadership Award
Phillip Stead graduated from the former Nova Scotia Agricultural College in 1965 with a degree certificate. He left Nova Scotia to complete his BSc. in Animal Science at McGill University and returned in 1967 to begin what was to be a long and successful career with the Nova Scotia Department of
Agriculture, working as a sheep specialist with the Animal Industry Branch. In 1972 Phil continued his education by completing a MSc. in Agriculture and Nutrition at Virginia Polytechnic Institute and State University. For his passion for community involvement and his long standing contributions to Agriculture, a memorial award has been created in his name.

Eligibility: An award will be presented annually to a student who has exhibited outstanding leadership at the Faculty of Agriculture and/or within the community. Nominations for the award will be received by a committee representing the Student Leadership program at the Faculty of Agriculture and a member of the sponsoring body for the award (Nova Scotia/Newfoundland Holstein Branch). The committee will select an awardee from those nominated who best represents the leadership qualities and performance in the past five or number of years that would be a model for others. Selection criteria may also include academic performance, financial need, and the other awards that have been granted to the nominee.

Application Type: Contact the Faculty for more information

Captain R. M. Steele Memorial Fellowship
Captain Richard Steele was a founding member of the Atlantic Chapter of the Rhododendron Society of Canada (RSCAR) and supported the creation of the Atlantic Rhododendron & Horticultural Society. He faithfully attended, and contributed to, meetings and programs. A mentor and friend to many, and with an international network of plants people, he was a major influence on horticulture, locally and further afield. RSCAR members in the early days established the tradition of the annual Steele Lecture, the objective being to bring a top-ranking plants person to Nova Scotia as a guest speaker. Captain Steele died March 14th 2010.

Eligibility: Awarded to a final year undergraduate student in the Faculty of Agriculture who intends to pursue plant-related studies at the graduate level.

Application Type: Faculty of Agriculture In-Course Award Application

Value: $1,000

Catherine and Alexander Sutherland Bursary
This bursary was established in memory of Victor Sutherland’s parents, Catherine and Alexander Sutherland. Born in the 1890s in the area of Earltown, Nova Scotia, Catherine and Alexander operated the Earltown General Store. Over a century later, this store still operates, under other ownership. Alexander also operated a saw mill, while Catherine managed the books and ran the store. In 1939 the family moved to Truro and operated a second store in Bible Hill, near the Nova Scotia Agricultural College. Alexander died in 1943, and Catherine continued to raise their three children. Catherine died in 1972, having lived a very full and satisfying life. Victor Sutherland is an alumnus of the Nova Scotia Agricultural College, Class of 1954. After completing his diploma at the NSAC, now the Dalhousie University Faculty of Agriculture, Victor completed a degree in geology at Acadia University. He spent his career working in the oil and gas industry, including forming his own company, Northrock Resources, in 1986.

Eligibility: Awarded to a full-time Faculty of Agriculture technical or undergraduate student who demonstrates financial need. Preference is given to students who have attended high school in Truro, and then to students who attended high school in Colchester County.

Application Type: Faculty of Agriculture In-Course Award Application

Value: $250

William D. Swetnam Memorial Award
Raised in Port Mouton and Liverpool, NS, William (Bill) Swetnam, graduated from the former Nova Scotia Agricultural College in 1956. Bill discovered what he was destined to do when he purchased a farm in Sheffield Mills, NS in 1958. Throughout his career, Bill dedicated countless hours to many boards. As a founder of the Nova Scotia Turkey Marketing Board he also spent time on the County South and East Livestock Health Services Board, the NS Crop and Livestock Insurance Commission, Canadian Livestock Feed Board Advisors Committee, as well as Nova Scotia Farm Loan Board. Bill also served as president of the Kings County Federation of Agriculture and became a member of the Council of Leaders with the Federation. Bill’s dedication to his community has not gone unnoticed. In 2002 he was honored by the Queen with the Golden Jubilee Medal. Bill has truly distinguished himself in his area of expertise, bringing honour to the former NSAC and the Alumni Association. It is for this reason, an award has been created in his memory.

Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program who have displayed leadership qualities during their program. Applicants must be permanent residents of one of the Atlantic provinces.

Syngenta Canada Inc. Awards
Syngenta is one of the world’s leading companies with more than 28,000 employees in some 90 countries dedicated to their purpose: Bringing plant potential to life. Syngenta’s mission is to make a difference for smallholders in developing countries. By helping them become more professional growers, they want to achieve added value for rural communities. One way they do that is through technical innovation. Equally important is access to markets, enabling smallholders both to buy inputs and sell their produce. These and other factors are all essential for sustainability successful agriculture.

Eligibility: Available to a technical or undergraduate student in any program in the Faculty of Agriculture. Awarded to students whose course and project work reflect an interest in the Maritime potato industry. Applicants will be required to submit a 300-500 word essay expressing opinion on a topic relating to the crop protection industry. Selection criteria include academic performance, and potato farm experience or background.

Raymond Webber Memorial Scholarship
Ray was born and raised in Halifax, Nova Scotia. Upon completion of High School, Ray took a business course and worked in an office for the next five years. This soon became boring so Ray entered the “Nova Scotia Agricultural College” (now known as the Faculty of Agriculture) in Truro in 1928. After completing his studies at Truro, he attended MacDonald University in Montreal where in 1931 he received a Bachelor of Science Degree in Agriculture. After graduation, Ray went to work for Canada Agriculture in the Plant Protection Branch in Halifax in an administrative capacity. Due to Ray’s sincere dedication and commitment to Landscape Atlantic, a memorial scholarship has been established in his name to ensure his legacy lives on long into the future.
Eligibility: Available to students entering second year of the Diploma in Technology (Managed Landscapes) program at the Faculty of Agriculture. Selection criteria include academic performance and practical skills.
Application Type: Faculty of Agriculture In-Course Award Application

Value: $800

Michael Whidden Memorial Award
Awarded to a student who has provided leadership on the Faculty of Agriculture’s Woodsmen Team, and has maintained a sound academic performance.
Eligibility: Available to current technical and undergraduate students at the Faculty of Agriculture.
Application Type: Automatic Consideration – No Application Required

Wild Blueberry Producers Association of Nova Scotia Scholarship
The Blueberry Producers Association of Nova Scotia is a grower organization with approximately 1000 members from around the province. The Association promotes the production and consumption of wild blueberries. It constantly strives to keep growers informed of the newest technology available for both growing and harvesting. As well, it helps provide the producers with an adequate return to management, labour and capital.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program with Plant Science majors. Preference given to someone with interest and experience in small fruit. Selection will be based on academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $750

Eric Williams Memorial Scholarships
Born in 1938 Eric P. Williams started farming in 1959 with nine cows and twenty acres. Today the Williams’ family own and operate a two hundred head Holstein dairy farm in the Goulds and employ a nephew and one other worker. Eric worked hard to introduce supply management for milk producers in Newfoundland. In 1983 he was appointed the first chair of the Newfoundland Milk Marketing Board now known as the Dairy Farmers of Newfoundland and Labrador. During his lifetime he fought to improve the cost of production formula for milk producers in the province. Eric was also nominated by the Dairy Farmers of Newfoundland and Labrador in recognition of his tremendous contributions to agriculture, to become an inductee into the Atlantic Agricultural Hall of Fame. It is for the same reasons that the Dairy Farmers of Newfoundland and Labrador have established a scholarship in his memory for his dedication and commitment to agriculture.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Newfoundland and Labrador. Selection will be based on academic performance. Typically one award is given to a technical student and the other to an degree-seeking student.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
**Zhuhui Ye Memorial Award**

This fund was established by classmates of Zhuhui Ye (Kevin) to honour his memory. Kevin attended the former Nova Scotia Agricultural College as part of the FAFU 2+2 program, earning his BSc(Agr) in Aquaculture in 2012. Kevin continued his studies with the Dalhousie MSc. program. On September 8, 2012, Kevin lost his life in a drowning accident at Dollar Lake Provincial Park. Kevin is well remembered as an intelligent, popular, and outgoing man whose generosity touched the lives of many friends. The intent of the Zhuhui Ye Memorial Award is to further the understanding of culture and relationship between Chinese and Canadian students by supporting the FAFU/DAC 2+2 program.

Eligibility: Award to a Chinese student in the FAFU 2+2 program or another student demonstrating a commitment to and involvement with the FAFU 2+2 program at the Faculty of Agriculture, in addition to academic performance and financial need.

The Dairy Farmers of Nova Scotia organization was created through legislation enacted in 2001, and replaces the former Nova Scotia Dairy Commission. The organization exists under the umbrella of the Natural Products Marketing Council of the Department of Agriculture. The Dairy Farmers of Nova Scotia

Class of 1960 Memorial Bursary
In recognition of their 50th reunion, classmates established the Class of 1960 Memorial Bursary. Classmates contributed generously to this fund, with the intention of supporting an AC student. Their wish is to honour their deceased classmates who contributed to this fund, and who valued the experience and education they received at the Nova Scotia Agricultural College.
Eligibility: Awarded to a full-time technical or undergraduate student enrolled in any program at the Faculty of Agriculture who has demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Class of 1950 Award Fund
The Class of ‘50 Award was first established in 2000 at the Class of 1950, 50th anniversary weekend celebration. President, Don Young and Vice-President, Jack Johnson spearheaded the campaign to get their classmates involved in their commitment to help future AC students. The group recognizes the difficulty that young students face to finance their post-secondary education, as they too faced similar challenges. After a great deal of preparatory work from Don, Jack and Cliff McIsaac, a proposal was created for the Class of ’50 Award fund of to assist deserving students to “stick with it.” The group of classmates have made and continue to make significant contributions to the campus and students.
Eligibility: Available to current students in financial need in any technical or undergraduate program in the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

George and Lottie Cook Memorial Scholarship
Lottie Cook first developed her passion for agriculture on her family farm on Cape Breton Island. Lottie’s parents were pioneers in the agricultural industry, and her father a renowned farmer. At a young age Lottie became involved in 4-H where she achieved some of the club’s top honours. She later graduated from the former Nova Scotia Agricultural College and worked as an assistant agricultural representative to J.C.F MacDonnell for many years. In 1943 Lottie married George Cook and the pair later opened a chick hatchery in Truro and became one of the foremost producers of high quality chicks in the Maritime Provinces. After the passing of her husband in 1954, Lottie continued to operate the family business. Due to Lottie’s involvement in the agricultural industry and former NSAC community from both herself and family business, a scholarship has been created in her and her husband’s name.
Eligibility: Available to students from Nova Scotia in the first or second year of a technical or undergraduate program at the Faculty of Agriculture. Selection criteria include academic performance and financial need.

Dalhousie Agricultural Students' Association Awards

Dalhousie Agricultural Students’ Association (DASA) is the student association for all students at the Dalhousie Agricultural Campus. DASA is the official voice of the student body, and provides leadership and vision for the students of the Agricultural Campus. DASA promotes student engagement and leadership through various campus activities including Orientation, Shinerama, College Royal and Winter Carnival. DASA also promotes student engagement within the surrounding communities of Truro and Bible Hill. DASA works closely with Student Services and Administration to collectively provide a welcoming community dedicated to higher learning and service to the community.

Eligibility: Awarded to students enrolled in the Faculty of Agriculture who have demonstrated, in the current academic year, exceptional school spirit and involvement in any or all of the following: DASA sponsored events, volunteering, campus community leadership.

K. de Geus Memorial Prize for Plant Science

The K de Geus Memorial Prize was created in memory of Klaus de Geus. Klaus, met his wife, Christina “Tina” de Geus, in DeBeemster, The Netherlands. Klaus and Tina immigrated to Canada in 1957 with their three children, Gram, Louise, and Tineke. When they arrived in Canada, they decided to settle in Nova Scotia where they made a new life for their family, including setting up and running a successful flower shop and landscaping business in Bridgetown. Tina took great pleasure in her work as a floral designer. Over the years, she gave many demonstrations on all aspects of floral designing. This lead to a career in teaching floral design in the continuing education department of the former Nova Scotia Agricultural College.

Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture, based on high standing in course work, with preference to students in the Horticultural field.

Application Type: Automatic Consideration – No Application Required

The Honourable W. H. Dennis Memorial Prizes for Literary Compositions in English

Two prizes known as the Joseph Howe Prizes are offered each year, one of $250 for an essay, the other of $250 for a prose short story.

Eligibility: Available to any full-time undergraduate or graduate Dalhousie student who submits the best essay, short story, or collection of poems.

Application Type: Contact the Department, School, or College for more information

CA Douglas Bursary

The CA Douglas Bursary was originally established in 1984 in recognition of the impact of Charles Allan Douglas on the Agriculture industry in Nova Scotia. Charles held positions at Scotsburn Creamery, Avon Valley Greenhouse Farm and had a 35 year career with the Department of Agriculture and Marketing. Charles had a unique ability to inspire leadership and confidence in those around him, as he was very conscious of the importance of the individual. He devoted untiring energy to supporting rural youth and community development. As a result of his dedication and commitment to new technology, and his leadership and desire to relate to the individual Charles was inducted into the Atlantic Agricultural Hall of Fame in 1979 and honored with a bursary in his memory.

Eligibility: Awarded to a BSc(Agr) student enrolled full-time in the third or fourth year of study who has demonstrated financial need. Preference is given to students majoring in Animal Science.

Application Type: Faculty of Agriculture In-Course Award Application

Ernest L. Eaton Memorial Scholarship

Throughout Mr. Eaton’s lifetime he maintained a keen interest in scientific agriculture, and the education and development of the interested young people. He personally established the Ernest L. Eaton Scholarships, and made provision for them to continue in perpetuity. Although none of his children are directly active in farming, they all are interested in, and support, the fine work being done at present at the Agricultural Campus. The hope for the recipient of the Ernest L. Eaton Scholarship is to encourage the pursuit of excellence in both academic and scientific activities.

Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program based on performance in second year. Recipient cannot have received another scholarship of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Noel Enman Memorial Award**
To honor the memory of Noel Enman, a former Agricultural Campus Animal Science Technician-Agricultural Technology student, 1979-1982, the Alumni Association has established a fund for the Noel Enman Memorial Award.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture whose personality and fellowship have contributed to student life and activities, thereby gaining the respect of the students and faculty.
Application Type: Automatic Consideration – No Application Required

**Faculty of Agriculture Mature Student Bursary**
At the Faculty of Agriculture, the student body demographics have shifted dramatically over the past generation. We have increasingly more students transfer from other institutions or begin studies as a visiting or mature student. The 2012 Annual Appeal for the Faculty of Agriculture focused on raising funds for an endowment that would benefit mature students. In addition, alumnus Charles MacQuarrie directed that his planned gift benefit Faculty of Agriculture mature students.
Eligibility: Students enrolled at the Faculty of Agriculture in full-time studies who demonstrate financial need and are mature students (as defined by the Registrar’s Office).
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least $1,000

**Fall River Garden Club Bursary**
The Fall River Garden Club’s mission is to promote the improvement of home and community flower and vegetable gardens, lawns, trees and landscaping through friendly sharing of information, work and education. During the year they run fund raising events in order to raise money to beautify the neighborhoods. Their main fundraiser is their annual plant sale followed by an area garden tour whereby members open their gardens for viewing to the general public. The monies raised at these events go towards supporting Santa’s Express and giving a Bursary to a student at the Agriculture Campus studying horticulture. In addition, the gardens maintained in the surrounding areas are also funded from these events.
Eligibility: Available to a first year student in a Horticulture program at the Faculty of Agriculture in good academic standing, with preference given to students from the Fall River, Waverley, Wellington, Oakfield, Lakeview or Windsor Junction, Nova Scotia areas. Other residents of Nova Scotia will be considered. Applicants will have demonstrated financial need and well-developed career plans.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: $250

**Farm Credit Canada Scholarship**
The Farm Credit Corporation is a crown corporation wholly owned by the Government of Canada. The Corporation’s mission is to “provide the Canadian farmer with a reliable source of long term credit and personalized counselling services.” Farm Credit Corporation strongly believes in the farm community and the education of youth. The Farm Credit Corporation Bursary is their way of demonstrating their commitment to the betterment of the young people in the community.
Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) program. Applicants must be Canadian citizens who are Agricultural Economics or Agricultural Business majors. Selection criteria include academic performance, interest and competence in farm management and in the subjects associated with the economics of the farm business, interest and involvement in college and home community as demonstrated by participation in organizations and affairs, farm experience, and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Farm Focus Scholarship**
Farm Focus of Atlantic Canada is an agricultural newspaper that covers the Atlantic Provinces and their diverse food production. The publication contains information on the various sectors of the agricultural industry, including: regional, national, and international news; profiles on farms and farm families; 4-H; features on new innovations and technology; and editorials and opinions on issues of importance to the farming community.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture at Dalhousie. Selection is based on financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved standing among graduates of technical programs.

Eligibility: Available to students studying Horticulture or Environmental Studies, entering the second year of any undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to those from Bedford, Sackville, and Waverley. In years when no student from Bedford, Sackville, or Waverley applies for the scholarship, consideration will be given to other students from the Halifax Regional Municipality (excluding those from Halifax and Dartmouth). Selection will be based on financial need, career plans, and academic performance.

Value: $200

**Ena Fenton Memorial Scholarship**
Ena Fenton was a founding member of the Bedford Horticultural Society in 1950. Ena was an enthusiastic and willing participant in every function of that group for 47 years. Mrs. Fenton had been a teacher prior to her marriage and had always been interested in the education of young people. After her death in 1977, the Society decided to name their scholarship in her honor. They feel certain that she would have been very pleased by their acknowledgment of her interest in the development of Horticulture and Landscaping in Nova Scotia.

Eligibility: Available to students studying Horticulture or Environmental Studies, entering the second year of any undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to those from Bedford, Sackville, and Waverley. In years when no student from Bedford, Sackville, or Waverley applies for the scholarship, consideration will be given to other students from the Halifax Regional Municipality (excluding those from Halifax and Dartmouth). Selection will be based on financial need, career plans, and academic performance.

**The Irving and Jeanne Glovin Award**
The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying “good human conduct.” Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.

Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.
Application Type: Application Available
Application Deadline to Apply: mid-February

**Governors’ Awards**
In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students’ contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors’ Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.
Application Type: Application Available

Jennifer Hayes Starratt Scholarship
The Jennifer Hayes Starratt Scholarship was created by Jennifer’s husband, Mark, as a Christmas gift. Jennifer Starratt attended the Agricultural campus and graduated in 1996 with a Bachelor of Science in Agriculture. According to her husband the Agricultural campus holds a very special place in Jennifer’s heart and having a scholarship created in her name, is something very special to her. Due to the couple’s success in their professional lives, they were able to create a legacy to give back to the communities that have helped enrich their lives.
Eligibility: Available to female students entering their final year of the Bachelor of Science (Agriculture) program, with preference given to students who have completed their first three years at the Faculty of Agriculture. Selection will be based on academic performance, leadership, and involvement in campus activities. The scholarship will not be awarded to a student receiving other significant scholarships.
Application Type: Faculty of Agriculture In-Course Award Application

Value: $1,500

Anna Helvig Schousboe Memorial Scholarship
This scholarship was established with the Department of Agriculture, Fisheries and Aquaculture, Government of New Brunswick, in memory of Anna Helvig Schousboe. Anna and her husband Gustav emigrated from Denmark in 1928 and became lifelong Kings Co. NB farmers and also very active in their community. Always strong believers in the value of education, after her death in 1993 Gustav endowed this scholarship in her memory to assist New Brunswick youth in pursuing studies in the agricultural field.
Eligibility: Awarded to a resident from Kings County, New Brunswick, working towards a degree or diploma in agriculture at the Faculty of Agriculture. Applicants must be permanent residents of Kings County, New Brunswick.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

John Higgins Memorial Scholarship
John was a founding member of The Atlantic Association of Landscape Designers in 1992. He was instrumental to the development of Canada’s first ever Certification Program for Landscape Designers, which was available to all designers in the Atlantic Region, and pre-empted the National Certification Program by several years. John Higgins’ dedication and enthusiasm for the Landscape Design Industry throughout his career was unflattering, his contributions immeasurable. It is for these reasons that AALD decided to offer a Design Scholarship for students attending the AC, to be dedicated in his name. The Atlantic Association of Landscape Designers hope is that, in part through this scholarship, his legacy will live on.
Eligibility: Available to students entering third year of the Bachelor of Technology in Environmental Landscape Horticulture program in the Faculty of Agriculture. Selection criteria include academic performance and skill and interest in landscape design.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500
Dr. Bill Jenkins Memorial Scholarship
Bills career began early and always had the same theme; to improve farm management and education. He held numerous positions with the Provincial Department of Agriculture, the Faculty of Agriculture at Dalhousie University, as well as Chairman of the Nova Scotia Farm Land Settlement Board. Bill retired as Principal of the former NSAC (now Dalhousie Faculty of Agriculture) in 1972 after witnessing growth in both the level and training for all sectors of the agricultural industry. He then joined the staffs of the Council of Maritime Premiers’ Higher Education Commission, Services Overseas (CESO) in 1992. As a result of Bill Jenkins sincere commitment to his chosen career path, and his lifetime of contributions to both the AC and the Agricultural Industry, a scholarship has been created in his memory.
Eligibility: Available to students entering second or third year in any of the business degree programs in the Faculty of Agriculture. Selection criteria include overall academic performance, leadership, and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Joyce Family Foundation Agricultural Bursary
The Joyce Family Foundation Agricultural Bursaries were established to create an endowed bursary program to ensure students with financial barriers are able to access and succeed at the Faculty of Agriculture.
Eligibility: Must be a Canadian Citizen or Landed Immigrant, enrolled in any year of undergraduate study at the Faculty of Agriculture, has demonstrated financial need, and be in good academic standing.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Randy and Gladys Keddy Memorial Scholarship
The Randy & Gladys Keddy Memorial Bursary was established by their son, Stewart Keddy in memory of his parents to provide an on-going legacy that is meaningful for family members and friends. Stewart graduated from the Faculty of Agriculture in 1967, from McGill University in 1969, and from Dalhousie Dentistry in 1974, where he was recognized for excellence in endodontics and radiology. Stewart practiced as a dentist for 37 years. He served in the Dental Corps from 1974-1979 and was a founding partner of Purdy’s Wharf Dental Group from 1985 until his retirement in 2011. He held memberships in the Nova Scotia Dental Association, Canadian Dental Association, and Academy of General Dentistry.
Eligibility: Available to students entering second year of a diploma program or the third year of a degree program in the Faculty of Agriculture, with preference given to students from the Annapolis Valley of Nova Scotia with farm backgrounds. Awarded to a student whose background, program of study, course and project work and summer employment show a genuine interest in working in the agricultural industry following graduation. Selection criteria include career goals, academic performance, and financial need. Students receiving other scholarships of greater value will not be eligible for this scholarship.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Kings Mutual Insurance Scholarships
In memory of Past Directors, the Kings Mutual Insurance Company awards scholarships to students in the Faculty of Agriculture. The Kings County Federation of Agriculture represents the interest of the agricultural community in Kings County and is an active voice for its 395 members with the Nova Scotia Federation of Agriculture, Council of Leaders and provincial and national governments.
Eligibility: Available to students in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Selection criteria include financial need, academic performance, and demonstrated interest in a career in the Agri-food industry as reflected by summer employment and/or extra-curricular involvement. This scholarship is not available to students receiving other scholarships of greater value. At least one scholarship will be awarded annually to a technical-level student.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

P. Max Kuhn Scholarship
P. Max Kuhn grew up on a small farm in Lawrencetown, Halifax County. He lived from 1887 until 1928 and was the father to Bernard G. Kuhn. Max attended one year of the former NSAC General Course in 1908-1909. He was not able to return the next year because of need for him at home and shortage of funds, it was a great disappointment to him. That year was his only year of formal schooling; his home was so isolated that he was never able to attend grade school or high school, and his mother taught him at home. Max was a dedicated, hard-working farmer, and he made great use of his AC training. He bought his own Manor Hill Farm in 1918, located on Woodlawn Road (Portland Street) just outside what were then the town limits of Dartmouth. He market-gardened and ran a dairy there until his death. It was Bernard’s wish to establish this scholarship to recognize his father, Max, give education opportunity to others beyond what his father had, and to “repay Nova Scotia, former NSAC and Canada in small part for the education and support that he received here” (Bernard G. Kuhn).
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture at Dalhousie, with preference given to students who have completed at least one year of study. Applicants must be permanent residents of Nova Scotia, with preference to students from the Halifax Regional Municipality. Awarded to a student with a farm background or those whose course and project work and summer employment demonstrates an interest in working in the agriculture industry after graduation. Selection criteria include financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Landscape Nova Scotia Award
Landscape Nova Scotia’s mission is to promote high standards in product quality, professional service and conduct in the horticultural trades industry; and to encourage the use of Association members by the public. Landscape Nova Scotia has been a voice for the landscape and horticultural industry for more than
20 years in Nova Scotia, and are committed to providing consumers with options to make informed decisions.

Eligibility: Available to students in a landscape-related undergraduate program in the Faculty of Agriculture. Selection criteria include academic performance and financial need.

Application Type: Faculty of Agriculture In-Course Award Application

Value: $750

Raymond Loo was a certified organic farmer from Springfield, PEI where he operated Springwillow Farms. Ensuring there was room for wildlife on the farm and exploring ways to produce healthy food with the smallest environmental impact was very important to Raymond. Committed to promoting better farming practices in his community, he was a founding member of ACORN and board director for 6 years. Raymond also helped found and was the first president of the PEI Certified Organic Producers Cooperative. Raymond was dedicated to his province and the field of organic agriculture and was recognized greatly for his contributions.

Eligibility: Awarded to an undergraduate or technical student at the Faculty of Agriculture enrolled in at least one organic agriculture course offered on the Dalhousie Agricultural Campus.

Application Type: Faculty of Agriculture In-Course Award Application

Value: $250

Danny MacEwen Memorial Scholarship

Danny was an example of what typifies a farmer – not afraid of hard work, willing to give everything he had even if the financial return wasn’t always there, and proud of what he did for a living and never made an excuse for it. Danny was also very involved with the community and those who lived in it. He enjoyed not only showing off his many talents but also found great satisfaction in teaching others. Although he was not known for his patience, he strived hard to achieve the best at whatever he did. Danny will always be remembered for his passion for farming, and the agricultural world is a better place because of what he gave.

Eligibility: Awarded to a BSc(Agr) student majoring in Agricultural Business who has a background in agriculture or comes from a family farm. The recipient will be involved in the community and athletics, either at the Faculty of Agriculture or in the local area.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: $1,000

Dr. Allan and Barbara MacKay Scholarship

Born in Heathbell, Pictou County, Nova Scotia, Dr. Allan MacKay received his early agricultural experience on the Spruce Grove Farm that had the distinction of having one of the first purebred Guernsey herds in Canada. He was a member of the Scotsburn Junior Dairy Calf Club and represented his province in the National competitions for club members at the Royal Winter Fair in Toronto in 1941. Dr. MacKay received his primary education at Heathbell School and his secondary education at Pictou Academy. He graduated from former N.S.A.C. in 1943 and obtained his Doctor of Veterinary Medicine from the Ontario Veterinary College in 1951. That same year he established a veterinary practice in Pictou County and continued his work until his retirement in 1991. Dr. MacKay is honoured for his program of animal health care, for his philosophy of preventing disease problems before they occur and his dedication to farm families in the area he served.

Eligibility: Awarded to a student with strong academic performance from the Faculty of Agriculture who plans to study veterinary medicine at the Atlantic Veterinary College.

**Paul R. MacPhail PEI Potato Industry Scholarship**

The roots of the Prince Edward Island Potato Board can be traced as far back as 1920, when the first Potato Growers’ Association was formed on Prince Edward Island. A true marketing board followed in 1950 and was restructured as a producer controlled board under the Natural Products Marketing Act in 1990. The PEI Potato Board established this award in memory of Paul R. MacPhail.

Eligibility: Awarded to a PEI student studying at the technical or undergraduate level of an agricultural program. The recipient will demonstrate an interest in working in the potato industry through course work, research projects related to potato production and utilization (including all disciplines, e.g. pathology, biotechnology, entomology, etc). Awarded based on academic performance and the project's relevance to the improvement of the potato industry.

**Maritime Dairy Industry Scholarship**

Dairy Farmers of Canada created this award to support Maritime students interested in the dairy industry. Dairy Farmers of Canada (DFC) is the national policy, lobbying and promotional organization representing Canada's farmers living on 12,529 dairy farms. DFC strives to create stable conditions for the Canadian dairy industry, today and in the future. It works to maintain policies that foster the viability of Canadian dairy farmers and promote dairy products and their health benefits.

Eligibility: Awarded to a third year student from the Maritime provinces enrolled in any Faculty of Agriculture program who shows commitment to and interest in the dairy industry, and professional and academic promise.

Application Type: Faculty of Agriculture In-Course Award Application

**Bill Mathewson Memorial Award**

Bill Mathewson grew up on a hill sheep farm in Sma Glen, Scotland. He graduated with a BSc (Agriculture) in 1949 and later (1974) a MSc. both from Aberdeen University. On graduation 1949, he joined H.M. Overseas Civil Service. After further training in Cambridge and Trinidad, he was posted to Scotland.
Tanganyika, Africa where he worked for 14 years. On retirement in 1965, he worked for three years with the N.F. U. of Scotland in Edinburgh before immigrating with his family to Nova Scotia in 1968. He taught for 20 years at the Faculty of Agriculture. Bill retired in 1988 and was honored by his colleagues by being made Professor Emeritus. Much loved by students, faculty and the agricultural industry, Bill will be greatly missed. It is with his memory in mind, that Bill’s friends and colleagues at the AC launched an award in his name.

Eligibility: Available to any student registered in any program at the Faculty of Agriculture participating in an international experience. In applying for consideration, students will submit a proposal to participate in such activities as a study semester abroad toward their degree/diploma, attendance at a conference to make a presentation, a specialized training course or an internship or development project.

Value: $1,000

**Donald McInnes Award**

Established in 1904, Pictou Mutual Insurance Company is the oldest mutual insurance company in Nova Scotia. Initially established by a group of farmers who sought to provide local protection for each other in the event of loss, their company has grown to include more than 3,500 local and rural policyholders. Donald McInnes was born in 1933 on the original McInnes farm on Scotch Hill Road. A graduate of Pictou Academy high school, he attended the AC, graduating in 1955. As a shareholder of Scotsburn Co-op, Donald served as Director for 22 years and Chairman of the Board for 15 years. For 35 years Donald was active in the Pictou County Farmers Mutual Fire Insurance Company. Donald served first as an agent, then as a director and manager of the company. Due to Donald’s sincere involvement with both the community and Pictou Mutual Insurance Company, an award has been created in his name which is funded by Pictou Mutual Insurance.

Eligibility: Available to a student enrolled at the Faculty of Agriculture. Selection criteria include commitment to and involvement in the community and leadership provided in student activities, academic performance and financial need. A student may not be selected for this award more than once.

Value: $100

**Clint McLean Memorial Scholarship**

The Clint McLean Memorial Scholarship was established by Clint’s loving family, with contributions from his many friends and colleagues. Clint loved life and had many interests including entertaining, fine cooking, travel and music. To Clint family was everything; no amount of trouble, sacrifice, or inconvenience was too much. However, his heart was in agriculture. He lived and breathed agriculture, but dairy had a special corner in his heart. Not only did he talk the talk, he walked the walk. Clint was a graduate of NSAC (Class of 1979) and Guelph University. He was also an active member of his alumni associations, serving as Vice President and President for the Agriculture College Alumni. Clint served on the Agricultural Institute of Canada Board of Directors and on numerous institute committees. He served as the chair of the Atlantic Forage Crops Advisory committee and represented the Atlantic Provinces at the National Expert Committee on Forage. Clint was a distinguished and valued member of the NB Department of Agriculture, taking a leading role in innumerable initiatives to support the true stewards of the land; the farmers of Atlantic Canada. His career was that of a scientist with a human touch.

Eligibility: Awarded to a third or fourth year BSc(Agr) student, with a preference to a student from New Brunswick and a preference to a student involved in the study of dairy. Recipients will have strong academic standing and demonstrate financial need.

A. C. Neish Memorial Trust Scholarship
Dr. Neish (1916-1973) was an undergraduate at the former Nova Scotia Agricultural College in Truro. This is where he had his first contact with science and where he had won the Governor General’s Medal and a Macdonald College (Quebec) Scholarship. His work on fermentation, bacterial and plant metabolism and the biosynthesis of plant polysaccharides and lignins received international acclaim. He was a fellow of the Chemical Institute of Canada, of the Royal Society of Canada, and the Royal Society of London. Dr. Neish was the first person to be awarded the Gold Medal of the Canadian Society of Plant Physiologists, and was awarded an honorary doctorate by Mount Allison University and an honorary Doctor of Science degree by McGill University. The A.C. Neish Memorial Trust Scholarship was established by friends, admirers, and colleagues of the late Arthur Charles Neish. Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) program. Selection criteria include high academic performance and qualities of leadership as indicated by participation and achievement in both academic and non-academic activities.

John Reginald (Reg) Moore Memorial Scholarships
Reg Moore was born in Economy Nova Scotia on August 25, 1917; the fifth of six children. He was educated in Economy and Bass River graduating in 1935. Reg then enrolled in Normal (Teachers) College in Truro. He taught in various locations in Nova Scotia until called up for service in the Royal Canadian Air Force in 1940. Reg served as a staff pilot and as a Coastal Command pilot in Canada and the United Kingdom. Returning to Canada in 1945 Reg enrolled in the Nova Scotia Agricultural College (now the Faculty of Agriculture, Dalhousie University). He graduated from the former NSAC in 1947. Reg spent his entire post war career at the FCC. First as a Credit Advisor, then as Branch Manager for Nova Scotia. In 1960 he was transferred to Saint John, New Brunswick as Executive Assistant to the Regional Manager Atlantic. By 1962 Reg had tired of doing office work and transfers (four in three years) so requested a transfer to field duties where he would have day to day contact with farmers. He was assigned to the Sussex, NB Office where he completed his career, retiring in 1981. Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in a full-time capacity. Applicants must be permanent residents of Colchester County, Nova Scotia and will have completed at least one year of study. Selection will be based on financial need and a cumulative average of at least 3.00.

**Donald Palfrey Award**
The Donald Palfrey Award was established in memory of Donald Palfrey in recognition of his many years of service and contributions to weed science in Nova Scotia. Don was born in Fort Fairfield, Maine. He received his formal education in Pictou County and he graduated from the AC in Truro, Nova Scotia and from McGill University in Montreal, Quebec with a Bachelor of Science in Plant Pathology. He worked for the N.S. Department of Agriculture in Marketing for 37 years, retiring as Supervisor of Weed Science, where he was a key player and helping in pioneering work in extension and research in weed control in Nova Scotia. Don also taught at the AC for 18 years, teaching courses in Weed Control and Plant Pathology. He was a distinguished life member of the N.S. Institute of Agrologists and the first honorary life member of the Atlantic Vegetation Management Association. As a result of Don Palfrey's sincere commitment to the Department of Agriculture and his field of interest, an award has been created to honor his memory and legacy.
Eligibility: Awarded to a final year undergraduate student carrying out a research project in the area of pest management, with preference to a student involved in weed science, either through academic work or summer employment.

Stuart Rath Junior A Bearcat Hockey Education Award Fund
The Stuart Rath Truro Bearcat Education Awards have been established to encourage the pursuit of university education among players with the Truro Junior A Bearcat Hockey Team (“The Bearcats”) by providing tuition support for players enrolled at Dalhousie University. Stuart Rath, a very involved community member of Colchester County and surrounding area, established The Bearcat Hockey Education Award. Some of Stuarts endeavors are as follows: he serves as the Vice President of Truro Centre Ltd, and the President of Stuco Holdings Ltd. From 1985-1995 Stuart served as the President of Halifax Cablevision Ltd, from 1976-1985 he served as the President and General Manager of Eastern Cablevision, and from 1960-1975 he was the Chairman of the Truro Industrial Society. A few of Stuarts other accomplishments are being Director of Nova Scotia Business Inc. since March 2007, Director of Morien Resources Corp since December 1997, as well as serving as Director of Stuco Holdings Ltd. and Director of Erdene Resource Development Corporation since June 2006 until November 2012.
Eligibility: Available to entering or current technical and undergraduate students at the Faculty of Agriculture. Selection is based on academic performance and the recommendation of the team coaches.
Application Type: Automatic Consideration – No Application Required

Cliff and Grace Retson Memorial Scholarship
The Grace and Cliff Retson Memorial Bursary was first created by Grace in memory of her husband, Cliff Retson who graduated from the AC in 1934. Cliff passed away in 1997. Grace was born in Waskada, Manitoba and grew up in Kerrobert, Saskatchewan. She attended secretarial school in Saskatoon and after retiring, she received her Bachelor of Arts from St. Mary’s University. Grace met Cliff, her husband of 56 years, while she was working at the Senate in Ottawa. They married on July 26, 1941 and moved to Truro in 1947. The Retson’s (Grace & Cliff) hosted several international students studying at the Faculty of Agriculture over the years. It is for this reason and to ensure ongoing support of the educational interests of International students studying at Dal-AC, that Grace created the scholarship.
Eligibility: Available to international students in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, and interest in and involvement in multi-cultural activities on campus.

Ira L. Rhodenizer Memorial Scholarship
Ira Rhodenizer was born in 1890 in Parkdale, Lunenburg County, Nova Scotia and lived there for the majority of his life. He served in the Canadian Army from 1914 to 1919 and was wounded overseas during World War I. He later became a farmer, storekeeper, and lumberman in Parkdale, NS. He was greatly interested in community life and was associated with farmer’s organizations for many years. He was married and had seven children. He was a member of the Baptist Church, the I.O.O.F. and Masons. Ira was active in Nova Scotia Guides and Fish and Game Associations, had been a municipal councillor and President of the Lunenburg Centre Liberal Association. He was a Director of the Nova Scotia Federation of Agriculture and was killed in a car accident on the way to a meeting of this organization in August 1958. The Ira L. Rhodenizer Memorial Scholarship was provided by the Federation as a memorial for his dedication and contributions through the years.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Selection criteria include academic performance, involvement in student affairs, and participation in the 4-H program.

Value: $500

Dr. Robert G. Rix Family Farm Scholarship
Robert (Bob) Rix was born in Halifax on July 29th, 1948. Robert graduated from Dalhousie University Dental School in 1974. He practiced in Musquodoboit Harbour, Tatamagouche, and Winsloe, PEI, prior to opening his own dental practice in Bible Hill. He took great interest in his profession and knew the family trees of most of his patients and will be fondly remembered by everyone for his excellent dentistry, story-telling, knowledge of American History, love of gardening, tinkering with mechanical items, love of nature and his family. Robert had originally established the “Robert G. Rix Family Farm Bursary” in 1985. Although not having a farm background himself, he shared his beliefs that everyone’s roots are in the land and he felt his way to contribute to the importance of agriculture to our society was through this small bursary each year. A couple years ago, the award became known as the “Dr. Robert G. Rix Scholarship” to allow support to a student where the need was greatest. After Robert’s passing, one of the faculty provided funds to continue the bursary in Robert’s name. Since then, Robert’s family has graciously supported the scholarship to allow his legacy and memory to live on.
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture who has shown determination and dedication to operating a family farm. Recipients will have demonstrated financial need.

Howard W. Roper Memorial Award
The Howard W. Roper Memorial Bursary: Presented by the Nova Scotia/Newfoundland Holstein Branch was established in memory of Howard Roper. Howard was born in Charlottetown, PEI and later moved to Princeport with his father in 1926 to manage the Beech Hill Farm and Dairy. Howard and his father purchased the farm in 1932 and operated the farm with purebred Guernsey’s until 1952. Following the sale of the farm, he was employed by the Nova Scotia Animal Breeders Co-operative as Manager of Sales and Promotions. Howard was well-known throughout Canada, especially in Atlantic Canada for his work in the dairy industry and his love of dairy cattle, particularly Holsteins and Guernsey’s. He was inducted into Atlantic Agricultural Hall of Fame in 1990, an institution in which he was instrumental in founding. The Canadian Association of Animal Breeders honored Howard in 1992 with the Award of Merit for outstanding contribution to the Dairy Cattle Industry. He was also made a lifetime member of the Canadian Guernsey Breeder Association. Those who knew Howard best will remember him for his honesty, integrity, love of people and his great eye for cattle.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program at the Faculty of Agriculture, with preference given to second year students in the Diploma in Business Management - Dairy Farming program. Applicants must be either be permanent residents of Nova Scotia or Newfoundland and Labrador. Applicants must be members of Holstein Canada, or, a member of a family with Holstein Canada membership. Selection criteria include involvement in the dairy industry, extra-curricular involvement through athletics and clubs on campus, involvement in farm organizations, financial need and satisfactory academic performance.

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Ted Rose Memorial Scholarship
The Ted Rose Memorial Scholarship was created by Mrs. Ann M. Rose in memory of her husband, Ted. Ted had grown up on a dairy farm in Urbana, near Shubenacadie. Ted and his brother Percy ran the farm after the death of their father. Although no one from the family had any connection to the AC, Mrs. Rose had a soft spot for farming, admitting there can be “nothing as rewarding as farming.” Rose wanted to provide a scholarship to a deserving young person who is interested in farming themselves someday, while honoring her husband’s memory.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Awarded to a student who plans to operate a livestock farm. Selection criteria include financial need, academic performance and a documented commitment to animal welfare.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500
**Rotary Club of Truro International Student Bursary**
The Rotary Club of Truro has been part of the fabric of the community of Truro as well as the network of Rotary Clubs around the world since 1926. The Rotary Club of Truro is proud of its years of service and benevolence in the community and internationally. In addition to providing assistance to countless individuals with special needs for medical treatment or equipment over the years, the Club has continued to focus on the needs of children with disabilities.

Eligibility: Available to a current international student at the Faculty of Agriculture. Preference will be given to students registered in a program of study and registered full time, with additional preference given to students studying for the full year. Special consideration will be given to students who came from a developing country and plan to return and apply their education there. All students paying the international tuition differential are eligible for consideration. Selection criteria include financial need and potential impact of the bursary on the student's lifestyle while at school and their future plans.

**Rick Russell Memorial Scholarship**
Rick Russell passed away Saturday, July 3rd, 2004 after a courageous battle with cancer. After graduating from NSAC, Rick was employed at the College as the swine herdsmen for 20 years and then as manager of the fur unit for 4 years. Rick was the coach of the former NSAC Woodsmen Team for 24 years. He was well respected by both his peers and the athletes he coached. He was always giving of himself and was recognized for his unselfish devotion to the college community by being given the Student Appreciation Award in 1995. Due to his sincere commitment to NSAC and his community, a scholarship has been created in his memory.

Eligibility: Available to current student athletes in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, involvement and leadership in the Woodsmen program, and satisfactory academic performance.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

**Jack Sibley Agriculture Bursary**
This award was established by the John & Judy Bragg Foundation to honour John D (Jack) Sibley. Jack was born in 1937 at Meaghears Grant in Nova Scotia’s Musquodoboit Valley and graduated from Musquodoboit Rural High School in 1954. After receiving a BA from Mount Allison University in 1957 he attended the Nova Scotia Agricultural College and is an alumnus of the Class of 1959. He began his working career as a teacher and then moved on to work for several years as a field manager for McCain Foods. In 1965 he returned to Nova Scotia and spent the next 29 years as a wild blueberry extension specialist with the Department of Agriculture and Marketing. In 1994 he retired from this position and in 1997 began work with WBANA Canada in wild blueberry promotion, retiring in 2011 after a total of 44 years of service to the wild blueberry industry. Jack had a number of part-time careers which included operating his own wild blueberry acreage, working as a musician and MC, and teaching old-time fiddling to children from the Truro area.

Eligibility: Awarded to a full-time technical or undergraduate student at the Faculty of Agriculture who demonstrates financial need.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Sodhi Memorial Bursary**
This bursary was established by the Sodhi family in memory of Mr. Bhagat S. Sodhi, long-time librarian at the former Nova Scotia Agricultural College. Mr. Sodhi immigrated to Canada in the 1960’s, in search of opportunity for his future family. After meeting and bringing his wife Darshan to Canada, they settled in Truro, NS, and began their family. Mr. Sodhi began working at the former Agricultural College in 1968, when the campus library was housed in Cox Institute. He was instrumental in moving the library to its current location at the MacRae Library, acting as head librarian until 1995. Mr. Sodhi considered the library staff as a second family. As a tribute to his memory, the Sodhi Family established an award in his name upon his passing on June 1st, 2009.

Eligibility: Available to current international students at the Faculty of Agriculture in good academic standing, with preference given to students in undergraduate and technical programs based on financial need. Students in all programs of study are eligible.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**South House Sexual and Gender Resource Centre Bursary**
The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women’s Centre, was founded in recognition of women and trans people’s common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between $25 and $250. Available funds are split between applicants. See http://southhousehalifax.ca/ for an application form.

Application Type: Contact the Department, School, or College for more information

**Sport Leadership Award**
The Sport Leadership Award recognizes a high school varsity athlete enrolling full time in a program of study and planning on participating in a sport at the varsity level at the Faculty of Agriculture.

Eligibility: Available to entering technical or undergraduate students at the Faculty of Agriculture with an admissions average of at least 75%. Recipients of other major entrance scholarships are not eligible. Selection criteria include financial need, sport skills and leadership.

Application Type: Automatic Consideration – No Application Required
Phillip Stead Memorial Leadership Award
Phillip Stead graduated from the former Nova Scotia Agricultural College in 1965 with a degree certificate. He left Nova Scotia to complete his BSc. in Animal Science at McGill University and returned in 1967 to begin what was to be a long and successful career with the Nova Scotia Department of Agriculture, working as a sheep specialist with the Animal Industry Branch. In 1972 Phil continued his education by completing a MSc. in Agriculture and Nutrition at Virginia Polytechnic Institute and State University. For his passion for community involvement and his long standing contributions to Agriculture, a memorial award has been created in his name.
Eligibility: An award will be presented annually to a student who has exhibited outstanding leadership at the Faculty of Agriculture and/or within the community. Nominations for the award will be received by a committee representing the Student Leadership program at the Faculty of Agriculture and a member of the sponsoring body for the award (Nova Scotia/Newfoundland Holstein Branch). The committee will select an awardee from those nominated who best represents the leadership qualities and performance in the past year or number of years that would be a model for others. Selection criteria may also include academic performance, financial need, and the other awards that have been granted to the nominee.
Application Type: Contact the Faculty for more information

Captain R. M. Steele Memorial Fellowship
Captain Richard Steele was a founding member of the Atlantic Chapter of the Rhododendron Society of Canada (RSCAR) and supported the creation of the Atlantic Rhododendron & Horticultural Society. He faithfully attended, and contributed to, meetings and programs. A mentor and friend to many, and with an international network of plants people, he was a major influence on horticulture, locally and further afield. RSCAR members in the early days established the tradition of the annual Steele Lecture, the objective being to bring a top-ranking plants person to Nova Scotia as a guest speaker. Captain Steele died March 14th 2010.
Eligibility: Awarded to a final year undergraduate student in the Faculty of Agriculture who intends to pursue plant-related studies at the graduate level.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Stewiacke Valley Garden Club Scholarship
Stewiacke Valley Garden Club Scholarship
Stewiacke Valley is located in the Southern area of Colchester County. The Stewiacke Valley Garden Club is involved in the beautification of the Valley, as the Club is a part of the Nova Scotia Association of Garden Clubs which promote the general landscape beautification of the province. The Club hosts a multitude of events, such as speakers on Horticulture, etc., bake sale events, plant sale events, and more.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Applicant must be from the Stewiacke Valley area of Nova Scotia. Selection criteria include involvement in extracurricular and community affairs, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Catherine and Alexander Sutherland Bursary
This bursary was established in memory of Victor Sutherland's parents, Catherine and Alexander Sutherland. Born in the 1890s in the area of Earltown, Nova Scotia, Catherine and Alexander operated the Earltown General Store. Over a century later, this store still operates, under other ownership. Alexander also operated a saw mill, while Catherine managed the books and ran the store. In 1939 the family moved to Truro and operated a second store in Bible Hill, near the Nova Scotia Agricultural College. Alexander died in 1943, and Catherine continued to raise their three children. Catherine died in 1972, having lived a very full and satisfying life. Victor Sutherland is an alumnus of the Nova Scotia Agricultural College, Class of 1954. After completing his diploma at the NSAC, now the Dalhousie University Faculty of Agriculture, Victor completed a degree in geology at Acadia University. He spent his career working in the oil and gas industry, including forming his own company, Northrock Resources, in 1986.
Eligibility: Awarded to a full-time Faculty of Agriculture technical or undergraduate student who demonstrates financial need. Preference is given to students who have attended high school in Truro, and then to students who attended high school in Colchester County.
Application Type: Faculty of Agriculture In-Course Award Application

William D. Swetnam Memorial Award
Raised in Port Mouton and Liverpool, NS, William (Bill) Swetnam, graduated from the former Nova Scotia Agricultural College in 1956. Bill discovered what he was destined to do when he purchased a farm in Sheffield Mills, NS in 1958. Throughout his career, Bill dedicated countless hours to many boards. As a founder of the Nova Scotia Turkey Marketing Board he also spent time on the County South and East Livestock Health Services Board, the NS Crop and Livestock Insurance Commission, Canadian Livestock Feed Board Advisors Committee, as well as Nova Scotia Farm Loan Board. Bill also served as president of the Kings County Federation of Agriculture and became a member of the Council of Leaders with the Federation. Bill’s dedication to his community has not gone unnoticed. In 2002 he was honored by the Queen with the Golden Jubilee Medal. Bill has truly distinguished himself in his area of expertise, bringing honour to the former NSAC and the Alumni Association. It is for this reason, an award has been created in his memory.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program who have displayed leadership qualities during their program. Applicants must be permanent residents of one of the Atlantic provinces.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

Syngenta Canada Inc. Awards
Syngenta is one of the world’s leading companies with more than 28,000 employees in some 90 countries dedicated to their purpose: Bringing plant potential to life. Syngenta’s mission is to make a difference for smallholders in developing countries. By helping them become more professional growers, they want to achieve added value for rural communities. One way they do that is through technical innovation. Equally important is access to markets, enabling smallholders both to buy inputs and sell their produce. These and other factors are all essential for sustainability successful agriculture.
Eligibility: Available to a technical or undergraduate student in any program in the Faculty of Agriculture. Awarded to students whose course and project work reflect an interest in the Maritime potato industry. Applicants will be required to submit a 300-500 word essay expressing opinion on a topic relating to
the crop protection industry. Selection criteria include academic performance, and potato farm experience or background.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Bruce Trenholm/Atlantic ’86 Scholarship
Bruce was born on the family farm in Grand Pre, Kings County, he graduated from the former Nova Scotia Agricultural College and MacDonald College, receiving his Bachelor of Science Degree in Animal Husbandry in 1947. Upon graduating from McDonald College he served as the Agricultural Representative in Yarmouth and then taught Animal Husbandry at the former Nova Scotia Agricultural College for three years. In 1952 he took over the family farm going on to establish the well-known Brulo herd. Bruce’s contributions to agriculture have been many and varied and are worthy of recognition in the Atlantic Agricultural Hall of Fame. He had a lifelong interest in Holstein cattle and was Master Breeder and Past President of Holstein Canada. In 1986, the year of Bruce’s death, he coordinated Atlantic ’86 – the Annual National Convention of Holstein Canada. This scholarship was established in his name as an on-going memorial.
Eligibility: Available to students entering their final year in any undergraduate program at the Faculty of Agriculture. Applicants must be permanent residents of one of the Atlantic provinces, have a Holstein farm or 4-H (Holstein calf project) background. Selection criteria include academic performance and career goals.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

University Medal in Agricultural Business
Awarded to the graduating Agricultural Business student with the highest standing.
Application Type: Automatic Consideration – No Application Required

University Medal in Agricultural Economics
Awarded to the graduating Agricultural Economics student with the highest standing.
Application Type: Automatic Consideration – No Application Required

University Medal in International Food Business
Awarded to the graduating International Food Business student with the highest standing.
Application Type: Automatic Consideration – No Application Required

University Silver Medal
This medal is awarded to the student who is judged to be the leading First Class Honours student among graduates of baccalaureate programs. The recipient cannot have received the Governor General’s Silver Medal.
Application Type: Automatic Consideration – No Application Required

Marinus Van de Sande Scholarship
The Marinus Van de Sande Scholarship was created by the Nova Scotia Co-operative Council to honour their colleague Mariinus Van de Sande, who served on their board for more than 25 years.
Eligibility: Must be enrolled as a full-time student at the Faculty of Agriculture, in any program directly related to agriculture (this excludes students enrolled in Pre-Veterinary, Biomedical Science, and Landscape Architecture programs). Student must have attended high school in Nova Scotia and demonstrate financial need. Preference is given to a student participating in local government or leadership activities.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Dr. Peter Van der Borch Memorial Bursary
Peter Van der Borch DVM established this bursary for an exceptional first year student from Truro, Nova Scotia.
Eligibility: Must be first year student registered at the Faculty of Agriculture and be from Truro, Nova Scotia.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Florence (Pineo) Ward Memorial Award
The Florence (Pineo) Ward Memorial Award was established by James Pineo in memory of his late sister, Florence. James wanted to leave a legacy behind for his sister, and help support the academic efforts of agricultural students, such as his niece Lisa (Orlando) Gowan, a BSc(Agr) Agricultural Chemistry graduate.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program at the Faculty of Agriculture. Preference will be given to students from Boutilier’s Point, Halifax County, and Advocate, Cumberland County. Awarded to students in financial need. Preference will be given to students with sound academic background who have come to the Faculty of Agriculture for technical training to enhance their employability but financial constraints are limiting their ability to continue their studies.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000
Michael Whidden Memorial Award
Awarded to a student who has provided leadership on the Faculty of Agriculture’s Woodsmen Team, and has maintained a sound academic performance.
Eligibility: Available to current technical and undergraduate students at the Faculty of Agriculture.
Application Type: Automatic Consideration – No Application Required

Eric Williams Memorial Scholarships
Born in 1938 Eric P. Williams started farming in 1959 with nine cows and twenty acres. Today the Williams’ family own and operate a two hundred head Holstein dairy farm in the Goulds and employ a nephew and one other worker. Eric worked hard to introduce supply management for milk producers in Newfoundland. In 1983 he was appointed the first chair of the Newfoundland Milk Marketing Board now known as the Dairy Farmers of Newfoundland and Labrador. During his lifetime he fought to improve the cost of production formula for milk producers in the province. Eric was also nominated by the Dairy Farmers of Newfoundland and Labrador in recognition of his tremendous contributions to agriculture, to become an inductee into the Atlantic Agricultural Hall of Fame. It is for the same reasons that the Dairy Farmers of Newfoundland and Labrador have established a scholarship in his memory for his dedication and commitment to agriculture.
Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Newfoundland and Labrador. Selection will be based on academic performance. Typically one award is given to a technical student and the other to an degree-seeking student.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Zhuhui Ye Memorial Award
This fund was established by classmates of Zhuhui Ye (Kevin) to honour his memory. Kevin attended the former Nova Scotia Agricultural College as part of the FAFU 2+2 program, earning his BSc(Agr) in Aquaculture in 2012. Kevin continued his studies with the Dalhousie MSc. program. On September 8, 2012, Kevin lost his life in a drowning accident at Dollar Lake Provincial Park. Kevin is well remembered as an intelligent, popular, and outgoing man whose generosity touched the lives of many friends. The intent of the Zhuhui Ye Memorial Award is to further the understanding of culture and relationship between Chinese and Canadian students by supporting the FAFU/DAC 2+2 program.
Eligibility: Award to a Chinese student in the FAFU 2+2 program or another student demonstrating a commitment to and involvement with the FAFU 2+2 program at the Faculty of Agriculture, in addition to academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadlines

Engineering
Dr. Stewart R. Keddy Memorial Scholarship
Dr. Stewart Keddy graduated from the Nova Scotia Agricultural College in 1967. He credited the AC as giving him a strong academic start. This award is in his honor and recognizes the academic skill of a student interested in agriculture.
Eligibility: This award is for students enrolled in the Faculty of Agriculture who are studying on a full-time basis. Students must be in their second year (or later) of an undergraduate program (including technical or degree programs). They will have strong academic standing and demonstrate financial need. Preference will be given to a student who attended high school in the Annapolis Valley.
Application Type: Faculty of Agriculture In-Course Award Application

CMM & PHP Natural Resource Bursary
The purpose of the CMM & PHP Natural Resource Bursary is to encourage First Nation/Aboriginal student interest in the environment and natural resource stewardship. PHP, along with CMM has recognized the need to support students in their endeavors to protect the environment and its resources.
Eligibility: Students enrolled full time at the Faculty of Agriculture. Preference is given for a student who demonstrates an interest in environmental protection or natural resource sustainability.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships

Friends of Alex Taylor Memorial Award
To honour the memory of Alexander Taylor, the Friends of Alex Taylor Memorial Award will provide an annual award to a student with an interest in plant science and its relation to sustainability.
Eligibility: A full or part-time student enrolled in an undergraduate program at the Faculty of Agriculture in their second, third or fourth year, with a minimum GPA of 3.0. Preference is given to students that have taken courses related to plant science or agriculture and have demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships

Valacta Dairy Scholarship
Valacta, the dairy production centre of expertise for Quebec and Atlantic Canada, offers the Valacta Dairy Scholarship which recognizes and supports students with a demonstrated interest in the dairy industry.
Eligibility: Available to one student enrolled in an undergraduate or diploma program at the Faculty of Agriculture that demonstrates a genuine interest in the dairy industry by program, course, or project work.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships
PY Hamilton Scholarship
Peter Y. Hamilton, Class of 1944 and Professor Emeritus, attended the former Nova Scotia Agricultural College, and later returned as Registrar in 1973. This scholarship has been established in his memory to reward scholarly excellence.
Eligibility: Available to Canadian citizens enrolled in any program in the Faculty of Agriculture on a full-time basis in their second year of study or later who have achieved an average of 80% in the previous year of study.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships

Faculty of Agriculture Alumni Family Scholarships
In celebration of the fact that many students at the Faculty of Agriculture are family members of AC Alumni, the Alumni Association decided to establish a Family Bursary for the first time in 2008. There are several bursaries available for family members of Alumni attending the Faculty of Agriculture.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Awarded based on academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500 - $1,000

Faculty of Agriculture Athletic Bursaries
Awarded to returning student varsity athletes.
Eligibility: Available to current student varsity athletes in any undergraduate program in the Faculty of Agriculture. Applicants will have demonstrated financial need, satisfactory academic standing, and be recommended for the award by a coach.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Faculty of Agriculture Bursaries
The Faculty of Agriculture has established a fund which will provide bursaries to assist students in need of financial assistance. Students in need of financial assistance can apply for a bursary on an ongoing basis throughout the academic year.
Eligibility: Available to current students at the Faculty of Agriculture who have demonstrated financial need and have satisfactory academic standing.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Animal Nutrition Association of Canada (Atlantic Division) Scholarship
The Animal Nutrition Association of Canada (Atlantic) Scholarship was established in 1989 for a student who successfully completes their second year of B.Sc. (Agr.) program. The Animal Nutrition Association of Canada (ANAC) is the national trade association of the livestock and poultry feed industry. The 170 members include feed and ingredient manufacturers and distributors, as well as suppliers of a wide range of goods and services to the feed industry. Taken together, ANAC’s membership represents 90 percent of commercial feed manufactured in Canada.
Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program who have demonstrated leadership in student and community affairs, strong academic performance, and who are not receiving other scholarships of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Ralph H. Armstrong Memorial Award
Established in memory of Ralph Armstrong of North Kingston, Kings Co., Nova Scotia. Ralph was well known for his breeding of dual-purpose Shorthorns and marketing of livestock. His prize Shorthorns had been exhibited under the Brookmont Farms name for more than 30 years at Exhibitions throughout Nova Scotia, the Royal Winter Fair in Toronto, and in the 1980 World Shorthorn congress in Calgary. Mr. Armstrong was an honoured member, Secretary and Past President of the Nova Scotia Shorthorn Association, Vice President of the Annapolis County Exhibition, Past Director of the Atlantic Winter Fair and Past Director of the Maritime Shorthorn Association.
Eligibility: Available to former or current 4-H club members from Kings or Annapolis Counties in Nova Scotia who have completed their first year of study in any undergraduate program at the Faculty of Agriculture. Selection is based on financial need and involvement in school, athletic and/or community organizations.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $400

Atlantic Farm Mechanization Show Scholarship
The Atlantic Farm Mechanization Show is an event that is held bi-annually that mainly focuses on the newest, innovative ideas in the agricultural industry. Farming has changed dramatically over the last few decades. New farming ventures are becoming increasingly popular, from large tract farms that are operated by multi-nationals, to small individual bed plots. According to The Atlantic Farm Mechanization Show, “innovation has always been the most powerful tool in a farmer’s tool box and will continue to be so into the future.”
Eligibility: Available to students from Atlantic Canada who have completed at least one year in the Diploma of Engineering or Bachelor of Science (Agriculture) in Integrated Environmental Management program at the Faculty of Agriculture. Selection is based on academic performance and the demonstrated potential for a career in the area of mechanization of agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
During his political career, he was a well-respected and long serving Minister of Agriculture and for a time Premier of Nova Scotia. In keeping with his lifelong dedication to the agricultural industry, Dr. Roger S. Bacon was a dairy farmer and blueberry producer from Cumberland County, Nova Scotia. He was also a long standing member of the Farm Mechanization Show and the Atlantic Poultry Conference.

### Atlantic Fertilizer Council Award
Eligibility: Awarded to a student from Atlantic Canada in the second year of a diploma program related to crop protection. Selection criteria include farm interests, leadership qualities within the University community, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: $1,000

### Atlantic Land Improvement Contractors Association Award
The Atlantic Land Improvement Contractors Association Bursary was created by ALICA for engineering students with a keen interest in soil, water and land improvement. ALICA acknowledges that the cost of tuition is becoming increasingly high which makes it difficult for many students to attend University. The Board of Directors voted to begin a scholarship fund in 1990 and the scholarship has been active and helping students with their post-secondary education ever since.
Eligibility: Available to students in the Diploma of Engineering program in the Faculty of Agriculture with a demonstrated ability and interest in soil, water, and land improvement.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $800

### Atlantic Poultry Incorporated Scholarship
The Atlantic Poultry Incorporated Scholarship was created in 2012. API (formerly ACA Co-operative Limited) has had many changes over the years. Most recently becoming incorporated in March 2012 and then in 2013 growing the company with the purchase of Clarks Chick Hatchery in New Brunswick and Island Chick Hatchery in Newfoundland.
Eligibility: Awarded to a student enrolled in the BSc(Agr) degree, with preference to a student pursuing an Animal Science major. The recipient will have graduated from a high school in Atlantic Canada, and demonstrate strong academic performance and a career interest in poultry.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

### Atlantic Poultry Conference Award
The Atlantic Poultry Conference is the key meeting place for producers and service providers to gather and discuss and share their news, the Conference is held once per year. Speakers who attend the Conference address a number of topics that cover: ventilation, energy, health, reducing feed costs, transportation, eggs, chickens and turkeys.
Eligibility: Awarded to a student whose course and project work reflect an interest in poultry. Preference will be given to final year students in the BSc(Agr) program who have either completed or have plans to complete a poultry-related research project in RESM 4002 and RESM 4003. This scholarship is awarded in odd years.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

### Avery Prize
This prize, bequeathed by J. F. Avery, MD, will be awarded on graduation to the student standing highest among graduates of the general degree program. The recipient cannot have received the Governor General’s Silver Medal or University Silver Medal. For the aforementioned medals and prize, a student who is completing a second Dalhousie degree will have only those courses required for a second degree used when calculating their cumulative average. In addition, any disciplinary action by the Senate Discipline Committee shall be deemed sufficient cause for any student to be ineligible. For more information on deadlines and application procedures, please visit: www.dal.ca/scholarships.
Application Type: Automatic Consideration – No Application Required

### Paul Babineau Memorial Scholarship
The Paul Babineau Memorial Scholarship was established by the Atlantic Farm Mechanization Show in memory of Paul, a former Director of the Atlantic Farm Mechanization Show. Paul was the owner and operator of Babineau Equipment Ltd, he was a 4-Wheeler enthusiast, and a director with the Atlantic Farm Mechanization Show.
Eligibility: Available to students from Atlantic Canada who have completed at least one year in the Diploma of Engineering or Bachelor of Science (Agriculture) Integrated Environmentnal Management programs in the Faculty of Agriculture. Selection is based on academic performance and the demonstrated potential for a career in the area of mechanization of agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

### Dr. Roger S. Bacon Scholarship in Agriculture
Dr. Roger S. Bacon was a dairy farmer and blueberry producer from Cumberland County, Nova Scotia. He was also a long standing MLA from this area. During his political career, he was a well-respected and long serving Minister of Agriculture and for a time Premier of Nova Scotia. In keeping with his
lifetime interest and service to Agriculture, Dr. Bacon has made a donation to establish an endowed fund to support a new scholarship at the Faculty of Agriculture. Eligibility: Awarded to a Nova Scotia student entering the final year of any program at the Faculty of Agriculture who has plans to pursue a long term career in agriculture. Selection criteria include career plans, academic performance and financial need.

Application Type: Faculty of Agriculture In-Course Award Application

Value: $2,000

Bible Hill Garden Club Scholarship
The Bible Hill Garden Club, originally referred to as Hillcrest Landscape Club was first organized in January of 1947. The group was created to promote the improvement of home grounds, assist in the beautification of community grounds, local parks and schools. Over the years, the group has gained popularity and has grown from 17 members to over 60, mostly women who range in age of 50-60. The group contributes to the Faculty of Agriculture through help supporting students with the bursary they have created.

Eligibility: Available to current students who are permanent residents of the Truro area, in any undergraduate program at the Faculty of Agriculture, with preference given to students in at least the second year of study in Horticulture, preferably a landscape program. Selection criteria include academic performance and financial need.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: $300

Ali Brown Scholarship in Food Science
This scholarship is established to honour the memory of Ali Brown. Ali spent approximately 15 years of her life working towards improving and implementing food safety standards within the dairy industry. It was with a strong sense of ethics and determination that she had to walk the line between industry's goals and food safety for the public. This award salutes her dedication, determination, well rounded qualities and the spirit to succeed.

Eligibility: Recipient will be enrolled as a student at the Faculty of Agriculture, studying in any program in the Plant, Food and Environmental Science department. Recipients will have shown academic excellence. Preference for students with an interest in food science and/or food safety as demonstrated by having completed at least one food science or food safety course. Preference for students from Atlantic Canada as determined by where they attended high school. Preference for a student who identifies as female.

Application Type: Faculty of Agriculture In-Course Award Application

Value: $500

David W. Brown Memorial Scholarship
The David W. Brown bursary is an ongoing demonstration of appreciation to the foundation of the David Brown United Limited by Atlantic Poultry Incorporated formerly ACA Cooperative Limited. Initiated in November 25, 1976; the company has continued to fund an annual memorial scholarship.

Eligibility: Available to students who have graduated from a high school in Atlantic Canada and who are entering the second year of a technical program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, an interest in farming, and an interest in the poultry industry.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: $1,000

Edward Brown Memorial Undergraduate Bursary
The Edward Brown Memorial Undergraduate Scholarship was created in memory of Edward Brown under the estate of his wife, Dorothy Aveleigh Brown. Edward attended the Agricultural Campus and graduated in 1954.

Eligibility: Available to a Bachelor of Science (Agriculture) student, with preference to a student in the fourth year of study from Atlantic Canada.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: $2,000

Merle Cail Memorial Scholarship
The Merle Cail Memorial Scholarship Fund was created by Merle’s wife, Faye Cail in memory of Merle’s dedication to organic agriculture. Born in Rexton, New Brunswick, Merle was heavily involved in his community. He attended Zion Presbyterian Church, was director of Northumberland Co-operative and Cartier Co-operative, member of the Kent Agriconservation club, Moncton Holstein Association, Kent Farmers Association, Dairy Farmers of NB, and many more. Merle also had a dedicated career as a farmer.

Eligibility: Awarded to a senior undergraduate or graduate student from Atlantic Canada studying in the Faculty of Agriculture whose course and project work reflect an interest in organic agriculture. Selection criteria include academic performance, financial need and commitment to organic agriculture.

Application Type: Faculty of Agriculture In-Course Award Application

Value: $1,000

Vera Caldwell Memorial Bursary
Vera Caldwell was born on June 3rd, 1924 in Hants County. She was a very devoted and involved member of the Newport United Church, serving as a Steward, Sunday School Teacher, and as a Youth Group Leader. Vera taught school for more than 25 years, first beginning in a one-room schoolhouse and ending her career at Brooklyn District Elementary School in 1989. As shown by her achievements, Vera was dedicated to the educational system and being a life-long learner. She was passionate about international education and actively supported education for children from developing nations. Due to her sincere involvement and passion in the educational system, a bursary has been created in her memory.

Eligibility: Awarded based on financial need to full-time technical or undergraduate international students at the Faculty of Agriculture.

Application Type: Faculty of Agriculture In-Course Award Application
Eligibility: Available to current students in their final year of the Diploma of Engineering program in the Faculty of Agriculture and in 1976 was elected President of this organization. As a result of Professor Donald E. Clark and the Atlantic Agricultural Engineering Committee. As a Professional Engineer and Agrologist, Donald was an

B.S.A. (Honours). In 1962 while a member of the teaching staff at O.A.C. he received his M.S.A. from McGill. In 1933 he attended Cambridge University on an I.O.D.E overseas scholarship before returning to McGill to receive his MSc. degree in 1937. On October 25, 2000, he received an Honorary Doctorate from Dalhousie University and the former Nova Scotia Agricultural College, now Dalhousie Faculty of Agriculture. The Canard Conservation Scholarships were established by Dr. & Mrs. Eaves to provide a graduate and undergraduate scholarship each year for students of Kings County focusing on environmental studies related to agricultural practices with particular reference to dyke land preservation and the general conservation of soil and water reserves.

Eligibility: Awarded to a student who is a permanent resident of Kings County, Nova Scotia, in the first or second year of the Bachelor of Science (Agriculture) program who is planning course and/or project work related to the environment. Selection criteria include academic performance, demonstrated interest in the environment, and career plans.

Donald E. Clark Memorial Scholarship

Professor Clark was born in Luchow, China in 1923 and came to Canada at the age of 15 months. In 1951 he graduated from the Ontario Agricultural College, B.S.A. (Honours). In 1962 while a member of the teaching staff at O.A.C. he received his M.S.A. from the University of Toronto. In 1968 he accepted a position with the NSAC as an Associate Professor and Head of the Agricultural Engineering Department. Donald was well known for his work with sprayers and zero tillage for corn production. He also served with distinction on such committees as the Canada Weed Committee, the Atlantic Herbicide Committee and the Atlantic Agricultural Engineering Committee. As a Professional Engineer and Agrologist, Donald was a charter member of the Canadian Society of Agricultural Engineers and in 1976 was elected President of this organization. As a result of Professor Donald E. Clark’s sincere commitment to his chosen field of study, and his lifetime of contributions to both the NSAC and the Engineering community, a scholarship has been created in his memory.

Eligibility: Available to current students in their final year of the Diploma of Engineering program in the Faculty of Agriculture. Selection criteria include
academic performance, interest, and aptitude in the engineering field.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check moneymatters.dal.ca for application deadline
Value: $500

Class of 1950 Award Fund
The Class of '50 Award was first established in 2000 at the Class of 1950, 50th anniversary weekend celebration. President, Don Young and Vice-President, Jack Johnson spearheaded the campaign to get their classmates involved in their commitment to help future AC students. The group recognizes the difficulty that young students face to finance their post-secondary education, as they too faced similar challenges. After a great deal of preparatory work from Don, Jack and Cliff McIsaac, a proposal was created for the Class of '50 Award fund of to assist deserving students to "stick with it." The group of classmates have made and continue to make significant contributions to the campus and students.
Eligibility: Available to current students in financial need in any technical or undergraduate program in the Faculty of Agriculture.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships for application deadline
Value: $500

Class of 1960 Memorial Bursary
In recognition of their 50th reunion, classmates established the Class of 1960 Memorial Bursary. Classmates contributed generously to this fund, with the intention of supporting an AC student. Their wish is to honour their deceased classmates who contributed to this fund, and who valued the experience and education they received at the Nova Scotia Agricultural College.
Eligibility: Awarded to a full-time technical or undergraduate student enrolled in any program at the Faculty of Agriculture who has demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application

Charles M. Collins Memorial Scholarship
The scholarship is in memory of Charles McKittrick Collins who spent the years 1936-1962 working in various positions in the agricultural industry in Nova Scotia, including teaching at Dalhousie’s Agricultural Campus for twenty-five years. Collins Horticultural Building on the Dalh-AC campus is named in his honour as well.
Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in the Bachelor of Technology program in Environmental Landscape Horticulture who have not qualified for other significant awards.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,200

George and Lottie Cook Memorial Scholarship
Lottie Cook first developed her passion for agriculture on her family farm on Cape Breton Island. Lottie’s parents were pioneers in the agricultural industry, and her father a renowned farmer. At a young age Lottie became involved in 4-H where she achieved some of the club’s top honours. She later graduated from the former Nova Scotia Agricultural College and worked as an assistant agricultural representative to J.C.F MacDonnell for many years. In 1943 Lottie married George Cook and the pair later opened a chick hatchery in Truro and became one of the foremost producers of high quality chicks in the Maritime Provinces. After the passing of her husband in 1954, Lottie continued to operate the family business. Due to Lottie’s involvement in the agricultural industry and former NSAC community from both herself and family business, a scholarship has been created in her and her husband’s name.
Eligibility: Available to students from Nova Scotia in the first or second year of a technical or undergraduate program at the Faculty of Agriculture. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Country Ribbon Agricultural Award
Country Ribbon established this scholarship to recognize and support students from Atlantic Canada with a demonstrated interest in pursuing a career in agriculture.
Eligibility: Must be enrolled in an undergraduate degree or diploma program at the Faculty of Agriculture, who plans to pursue a career in agriculture, preferably in Newfoundland and Labrador. Preference given to a student who attended high school in Atlantic Canada.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Dartmouth Horticultural Society Scholarships
The Dartmouth Horticultural Society is a gardening club whose aim is to promote, enrich and expand the practice of amateur gardening. Monthly meetings are held where their guest speakers from inside and outside the Society share their knowledge. In addition club experts are available for formal and informal exchange of ideas. Some of the club’s activities include a plant sale, a flower show, the planting and maintaining of a raised bed in Leighton Dillman Park, plant exchanges, and garden tours
Eligibility: Available to upper-year students in any plant-related undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to students from the Halifax Regional Municipality, followed by all Nova Scotia residents, followed by residents of other Canadian provinces. Selection criteria include financial need and academic performance.

Value: at least $1,000

**Dalhousie Agricultural Students' Association Awards**

Dalhousie Agricultural Students’ Association (DASA) is the student association for all students at the Dalhousie Agricultural Campus. DASA is the official voice of the student body, and provides leadership and vision for the students of the Agricultural Campus. DASA promotes student engagement and leadership through various campus activities including Orientation, Shinerama, College Royal and Winter Carnival. DASA also promotes student engagement within the surrounding communities of Truro and Bible Hill. DASA works closely with Student Services and Administration to collectively provide a welcoming community dedicated to higher learning and service to the community.

Eligibility: Awarded to students enrolled in the Faculty of Agriculture who have demonstrated, in the current academic year, exceptional school spirit and involvement in any or all of the following: DASA sponsored events, volunteering, campus community leadership.
Application Type: Automatic Consideration – No Application Required
Value: 2 @ $300

**CA Douglas Bursary**

The CA Douglas Bursary was originally established in 1984 in recognition of the impact of Charles Allan Douglas on the Agriculture industry in Nova Scotia. Charles held positions at Scotsburn Creamery, Avon Valley Greenhouse Farm and had a 35 year career with the Department of Agriculture and Marketing. Charles had a unique ability to inspire leadership and confidence in those around him, as he was very conscious of the importance of the individual. He devoted untiring energy to supporting rural youth and community development. As a result of his dedication and commitment to new technology, and his leadership and desire to relate to the individual Charles was inducted into the Atlantic Agricultural Hall of Fame in 1979 and honored with a bursary in his memory.

Eligibility: Awarded to a BSc(Agr) student enrolled full-time in the third or fourth year of study who has demonstrated financial need. Preference is given to students majoring in Animal Science.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: at least $2,500

**Paul C Eaton Memorial Scholarship**

Paul C. Eaton was an alumnus, Class of ’48, at the former Nova Scotia Agricultural College. Growing up on a dairy and apple farm, Mr. Eaton understood the importance of agriculture, and devoted his life to this passion. Mr. Eaton spent the majority of his career working in Extension Services on the Agricultural Campus.

Eligibility: Awarded to a full-time student from Atlantic Canada in the second year or higher of the BSc(Agr) program majoring in Environmental Sciences or Plant Science. Recipients must have a background in agriculture or come from a family farm. Selection is made on the basis of academic merit.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least $2,500

**Ernest L. Eaton Memorial Scholarship**

Throughout Mr. Eaton’s lifetime he maintained a keen interest in scientific agriculture, and the education and development of the interested young people. He personally established the Ernest L. Eaton Scholarships, and made provision for them to continue in perpetuity. Although none of his children are directly active in farming, they all are interested in, and support, the fine work being done at present at the Agricultural Campus. The hope for the recipient of the Ernest L. Eaton Scholarship is to encourage the pursuit of excellence in both academic and scientific activities.

Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program based on performance in second year. Recipient cannot have received another scholarship of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Egg Farmers of Newfoundland and Labrador Scholarship**

The Egg Farmers of Newfoundland and Labrador (formerly the Egg Producers of Newfoundland and Labrador) is a commodity board governing the production of eggs.

Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program. Applicants must be permanent residents of Newfoundland and Labrador.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Faculty of Agriculture Mature Student Bursary**

At the Faculty of Agriculture, the student body demographics have shifted dramatically over the past generation. We have increasingly more students transfer from other institutions or begin studies as a visiting or mature student. The 2012 Annual Appeal for the Faculty of Agriculture focused on raising funds for an endowment that would benefit mature students. In addition, alumnus Charles MacQuarrie directed that his planned gift benefit Faculty of Agriculture mature students.

Eligibility: Students enrolled at the Faculty of Agriculture in full-time studies who demonstrate financial need and are mature students (as defined by the Registrar's Office).
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least $1,000
Eligibility: Broad general education and interdisciplinary interests appropriate to the research topic chosen. Program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will have demonstrated financial need and well-developed career plans.

Application Type: Faculty of Agriculture In-Course Award Application

Value: $250

Farm Focus Scholarship

Farm Focus of Atlantic Canada is an agricultural newspaper that covers the Atlantic Provinces and their diverse food production. The publication contains information on the various sectors of the agricultural industry, including: regional, national, and international news; profiles on farms and farm families; 4-H; features on new innovations and technology; and editorials and opinions on issues of importance to the farming community.

Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture at Dalhousie. Selection is based on financial need and academic performance.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: $200

Ena Fenton Memorial Scholarship

Ena Fenton was a founding member of the Bedford Horticultural Society in 1950. Ena was an enthusiastic and willing participant in every function of that group for 47 years. Mrs. Fenton had been a teacher prior to her marriage and had always been interested in the education of young people. After her death in 1977, the Society decided to name their scholarship in her honor. They feel certain that she would have been very pleased by their acknowledgment of her interest in the development of Horticulture and Landscaping in Nova Scotia.

Eligibility: Available to students studying Horticulture or Environmental Studies, entering the second year of any undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to those from Bedford, Sackville, and Waverley. In years when no student from Bedford, Sackville, or Waverley applies for the scholarship, consideration will be given to other students from the Halifax Regional Municipality (excluding those from Halifax and Dartmouth). Selection will be based on financial need, career plans, and academic performance.

H. J. Fraser Memorial Prize in English

The H.J. Fraser Memorial Prize was established in memory of H.J Fraser who taught at the Agricultural Campus.

Eligibility: Available to a second year student who has excelled in first year English at the Faculty of Agriculture.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: $50

Dr. Gerry W. Friars Undergraduate Research Prize

Dr. Friars, a former NSAC Alumni, was introduced to scientific research by an undergraduate research project. This was the beginning of a career in research in teaching. In recognition of the significance of this first research experience, Dr. Friars has provided a sum of money to endow an Undergraduate Research Award.

Eligibility: Awarded to a graduating undergraduate student from the Faculty of Agriculture who is judged to have completed the best written research report as part of the fourth-year project requirements.

Application Type: Automatic Consideration – No Application Required

Friends of the Federation Scholarship

The Nova Scotia Federation of Agriculture (NSFA) provides this scholarship to support undergraduate students at the Faculty of Agriculture and to recognize the importance of agricultural education. Funds for this award were raised in partnership with NSFA members and matched by the Federation.

Eligibility: Enrolled full-time in the Faculty of Agriculture. Eligible students will have attended high school in Nova Scotia. Preference will be given to family members of NSFA members, and to students with career interest in primary agriculture.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: See dal.ca/scholarships

Year of Study: Any

The Irving and Jeanne Glovin Award

The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying “good human conduct”. Students enrolled in any major discipline, for example, Languages, Social Sciences, Humanities and Performing Arts, or any interdisciplinary program, for example, Canadian Studies, European Studies, Gender and Women Studies and IDS are encouraged to apply. The recipient will preferably have broad general education and interdisciplinary interests appropriate to the research topic chosen.

Eligibility: Available to a full-time student in the final year of any undergraduate program or any year of a graduate program at Dalhousie University.
Governors' Awards
In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students’ contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors’ Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.

Application Type: Contact the Faculty for more information
Application Deadline to Apply: mid-February

Governor General’s Bronze Medal
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of technical programs.

Application Type: Automatic Consideration – No Application Required

Kings Mutual Insurance Scholarships
In memory of Past Directors, the Kings Mutual Insurance Company awards scholarships to students in the Faculty of Agriculture. The Kings County Federation of Agriculture represents the interest of the agricultural community in Kings County and is an active voice for its 395 members with the Nova Scotia Federation of Agriculture, Council of Leaders and provincial and national governments.
Eligibility: Available to students in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Selection criteria include financial need, academic performance, and demonstrated interest in a career in the Agri-food industry as reflected by summer employment and/or extra-curricular involvement. This scholarship is not available to students receiving other scholarships of greater value. At least one scholarship will be awarded annually to a technical-level student.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

P. Max Kuhn Scholarship
P. Max Kuhn grew up on a small farm in Lawrencetown, Halifax County. He lived from 1887 until 1928 and was the father to Bernard G. Kuhn. Max attended one year of the former NSAC General Course in 1908-1909. He was not able to return the next year because of need for him at home and shortage of funds, it was a great disappointment to him. That year was his only year of formal schooling; his home was so isolated that he was never able to attend grade school or high school, and his mother taught him at home. Max was a dedicated, hard-working farmer, and he made great use of his AC training. He bought his own Manor Hill Farm in 1918, located on Woodlawn Road (Portland Street) just outside what were then the town limits of Dartmouth. He market-gardened and ran a dairy there until his death. It was Bernard’s wish to establish this scholarship to recognize his father, Max, give education opportunity to others beyond what his father had, and to “repay Nova Scotia, former NSAC and Canada in small part for the education and support that he received here” (Bernard G. Kuhn).
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture at Dalhousie, with preference given to students who have completed at least one year of study. Applicants must be permanent residents of Nova Scotia, with preference to students from the Halifax Regional Municipality. Awarded to a student with a farm background or those whose course and project work and summer employment demonstrates an interest in working in the agriculture industry after graduation. Selection criteria include financial need and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application

Value: $2,000

Langille Brothers Scholarship
Alan Langille graduated from the Nova Scotia Agricultural College in 1958 and went on to have a career as a plant physiologist and professor at the University of Maine. Alan makes this scholarship possible in memory of his two older brothers, both also NSAC Alumni. Bruce Langille (grad 1946) went on to work as a chemist for the Plant Products Lab in Ottawa. Jim Langille (grad 1947) went on to a career as an Agronomist for Nappan Experimental Farm.
Eligibility: Awarded to a third year BSc(Agr) student majoring in Plant Sciences. Preference will be given to students who have completed their first three years of study at the Faculty of Agriculture. Awarded based on academic excellence and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Raymond Loo Memorial Scholarship in Organic Agriculture
Raymond Loo was a certified organic farmer from Springfield, PEI where he operated Springwillow Farms. Ensuring there was room for wildlife on the farm and exploring ways to produce healthy food with the smallest environmental impact was very important to Raymond. Committed to promoting better farming practices in his community, he was a founding member of ACORN and board director for 6 years. Raymond also helped found and was the first president of the PEI Certified Organic Producers Cooperative. Raymond was dedicated to his province and the field of organic agriculture and was recognized greatly for his contributions.
Eligibility: Awarded to an undergraduate or technical student at the Faculty of Agriculture enrolled in at least one organic agriculture course offered on the Dalhousie Agricultural Campus.
Application Type: Faculty of Agriculture In-Course Award Application

The Robert and Katherine MacDonald Award
An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students’ Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.
Eligibility: Available to an undergraduate Chinese student who is a member of the Dalhousie Chinese Students and Scholars Association.
Application Type: Automatic Consideration – No Application Required

C. C. MacDougall Memorial Scholarship
C.C. MacDougall was the first district agriculturist to work with the NB Department of Agriculture in Sussex. The C.C. MacDougall Memorial Scholarship was established in 1958 by a large group of agriculture groups.
Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture. Awarded to a student pursuing a degree or diploma in Agriculture. The recipient must have been a 4-H member from Kings County, New Brunswick, or have parents who raise or breed Guernseys anywhere in New Brunswick.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
**Dr. Allan and Barbara MacKay Scholarship**

Born in Heathbell, Pictou County, Nova Scotia, Dr. Allan MacKay received his early agricultural experience on the Spruce Grove Farm that had the distinction of having one of the first purebred Guernsey herds in Canada. He was a member of the Scotsburn Junior Dairy Calf Club and represented his province in the National competitions for club members at the Royal Winter Fair in Toronto in 1941. Dr. MacKay received his primary education at Heathbell School and his secondary education at Pictou Academy. He graduated from former N.S.A.C. in 1943 and obtained his Doctor of Veterinary Medicine from the Ontario Veterinary College in 1951. That same year he established a veterinary practice in Pictou County and continued his work until his retirement in 1991. Dr. MacKay is honoured for his program of animal health care, for his philosophy of preventing disease problems before they occur and his dedication to farm families in the area he served.

Eligibility: Awarded to a student with strong academic performance from the Faculty of Agriculture who plans to study veterinary medicine at the Atlantic Veterinary College.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

**Paul R. MacPhail PEI Potato Industry Scholarship**

The roots of the Prince Edward Island Potato Board can be traced as far back as 1920, when the first Potato Growers’ Association was formed on Prince Edward Island. A true marketing board followed in 1950 and was restructured as a producer controlled board under the Natural Products Marketing Act in 1990. The PEI Potato Board established this award in memory of Paul R. MacPhail.

Eligibility: Awarded to a PEI student studying at the technical or undergraduate level of an agricultural program. The recipient will demonstrate an interest in working in the potato industry through course work, research projects related to potato production and utilization (including all disciplines, e.g. pathology, biotechnology, entomology, etc). Awarded based on academic performance and the project's relevance to the improvement of the potato industry.

**Maritime Dairy Industry Scholarship**

Dairy Farmers of Canada created this award to support Maritime students interested in the dairy industry. Dairy Farmers of Canada (DFC) is the national policy, lobbying and promotional organization representing Canada's farmers living on 12,529 dairy farms. DFC strives to create stable conditions for the Canadian dairy industry, today and in the future. It works to maintain policies that foster the viability of Canadian dairy farmers and promote dairy products and their health benefits.

Eligibility: Awarded to a third year student from the Maritime provinces enrolled in any Faculty of Agriculture program who shows commitment to and interest in the dairy industry, and professional and academic promise.

Bill Mathewson Memorial Award
Bill Mathewson grew up on a hill sheep farm in Sma Glen, Scotland. He graduated with a BSc (Agriculture) in 1949 and later (1974) a MSc. both from Aberdeen University. On graduation 1949, he joined H.M. Overseas Civil Service. After further training in Cambridge and Trinidad, he was posted to Tanganyika, Africa where he worked for 14 years. On retirement in 1965, he worked for three years with the N.F.U. of Scotland in Edinburgh before immigrating with his family to Nova Scotia in 1968. He taught for 20 years at the Faculty of Agriculture. Bill retired in 1988 and was honored by his colleagues by being made Professor Emeritus. Much loved by students, faculty and the agricultural industry, Bill will be greatly missed. It is with his memory in mind, that Bill’s friends and colleagues at the AC launched an award in his name.

Eligibility: Available to any student registered in any program at the Faculty of Agriculture participating in an international experience. In applying for consideration, students will submit a proposal to participate in such activities as a study semester abroad toward their degree/diploma, attendance at a conference to make a presentation, a specialized training course or an internship or development project.

Value: $1,000

Donald McInnes Award
Established in 1904, Pictou Mutual Insurance Company is the oldest mutual insurance company in Nova Scotia. Initially established by a group of farmers who sought to provide local protection for each other in the event of loss, their company has grown to include more than 3,500 local and rural policyholders. Donald McInnes was born in 1933 on the original McInnes farm on Scotch Hill Road. A graduate of Pictou Academy high school, he attended the AC, graduating in 1955. As a shareholder of Scotsburn Co-op, Donald served as Director for 22 years and Chairman of the Board for 15 years. For 35 years Donald was active in the Pictou County Farmers Mutual Fire Insurance Company. Donald served first as an agent, then as a director and manager of the company. Due to Donald’s sincere involvement with both the community and Pictou Mutual Insurance Company, an award has been created in his name which is funded by Pictou Mutual Insurance.

Eligibility: Available to a student enrolled at the Faculty of Agriculture. Selection criteria include commitment to and involvement in the community and leadership provided in student activities, academic performance and financial need. A student may not be selected for this award more than once.

Value: $1,000

Clint McLean Memorial Scholarship
The Clint McLean Memorial Scholarship was established by Clint’s loving family, with contributions from his many friends and colleagues. Clint loved life and had many interests including entertaining, fine cooking, travel and music. To Clint family was everything; no amount of trouble, sacrifice, or inconvenience was too much. However, his heart was in agriculture. He lived and breathed agriculture, but dairy had a special corner in his heart. Not only did he talk the talk, he walked the walk. Clint was a graduate of NSAC (Class of 1979) and Guelph University. He was also an active member of his alumni associations, serving as Vice President and President for the Agriculture College Alumni. Clint served on the Agricultural Institute of Canada Board of Directors and on numerous institute committees. He served as the chair of the Atlantic Forage Crops Advisory committee and represented the Atlantic Provinces at the National Expert Committee on Forage. Clint was a distinguished and valued member of the NB Department of Agriculture, taking a leading role in innumerable initiatives to support the true stewards of the land: the farmers of Atlantic Canada. His career was that of a scientist with a human touch.

Eligibility: Awarded to a third or fourth year BSc(Agr) student, with a preference to a student from New Brunswick and a preference to a student involved in the study of dairy. Recipients will have strong academic standing and demonstrate financial need.

John Reginald (Reg) Moore Memorial Scholarships
Reg Moore was born in Economy Nova Scotia on August 25, 1917; the fifth of six children. He was educated in Economy and Bass River graduating in 1935. Reg then enrolled in Normal (Teachers) College in Truro. He taught in various locations in Nova Scotia until called up for service in the Royal Canadian Air Force in 1940. Reg served as a staff pilot and as a Coastal Command pilot in Canada and the United Kingdom. Returning to Canada in 1945 Reg enrolled in the Nova Scotia Agricultural College (now the Faculty of Agriculture, Dalhousie University). He graduated from the former NSAC in 1947. Reg spent his entire post war career at the FCC. First as a Credit Advisor, then as Branch Manager for Nova Scotia. In 1960 he was transferred to Saint John, New Brunswick as Executive Assistant to the Regional Manager Atlantic. By 1962 Reg had tired of doing office work and transfers (four in three years) so requested a transfer to field duties where he would have day to day contact with farmers. He was assigned to the Sussex, NB Office where he completed his career, retiring in 1981.

Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in a full-time capacity. Applicants must be permanent residents of Colchester County, Nova Scotia and will have completed at least one year of study. Selection will be based on financial need and a cumulative average of at least 3.00.

Application Type: Faculty of Agriculture In-Course Award Application
Nova Scotia Animal Breeders Co-operative Limited Awards
The Nova Scotia Animal Breeders (NSAB) Co-op Limited specializes in an array of different cow options for their consumers. They offer products and supplies for cow farmers, and a multitude of service options. Some of the services offered are: artificial insemination, computer assisted herd mating, young sire program (Holstein), direct sales-owner breeders, and A.I. Sires.
Eligibility: Available to current students in the 2nd year of the BSc (Agriculture) with a major or minor in Animal Science or the 2nd year of a diploma with specialty in Dairy Farming or Agriculture. Recipients must have attended high school in Nova Scotia and demonstrate an interest in the dairy or beef industry through their farm backgrounds, course, and/or project work.

Value: 2 @ $1,000

Oxford Frozen Foods & Associates Award
In July of 2018 Oxford Frozen Foods celebrated 50 years in business. To honour this occasion, John Bragg established the Oxford Frozen Foods and Associates Award to provide scholarship support to rural Atlantic Canadian students entering the Faculty of Agriculture at the Agricultural Campus of Dalhousie University in Truro, Nova Scotia.
Eligibility: The recipient will be enrolled in the Faculty of Agriculture in any program, have attended high school in rural Atlantic Canada, and demonstrates financial need and high academic standing
Application Type: Faculty of Agriculture In-Course Award Application

Donald Palfrey Award
The Donald Palfrey Award was established in memory of Don Palfrey in recognition of his many years of service and contributions to weed science in Nova Scotia. Don was born in Fort Fairfield, Maine. He received his formal education in Pictou County and he graduated from the AC in Truro, Nova Scotia and from McGill University in Montreal, Quebec with a Bachelor of Science in Plant Pathology. He worked for the N.S. Department of Agriculture in Marketing for 37 years, retiring as Supervisor of Weed Science, where he was a key player and helping in pioneering work in extension and research in weed control in Nova Scotia. Don also taught at the AC for 18 years, teaching courses in Weed Control and Plant Pathology. He was a distinguished life member of the N.S. Institute of Agrologists and the first honorary life member of the Atlantic Vegetation Management Association. As a result of Don Palfrey’s sincere commitment to the Department of Agriculture and his field of interest, an award has been created to honor his memory and legacy.
Eligibility: Awarded to a final year undergraduate student carrying out a research project in the area of pest management, with preference to a student involved in weed science, either through academic work or summer employment.

Application Type: Faculty of Agriculture In-Course Award Application

Stuart Rath Junior A Bearcat Hockey Education Award Fund
The Stuart Rath Truro Bearcat Education Awards have been established to encourage the pursuit of university education among players with the Truro Junior A Bearcat Hockey Team (“The Bearcats”) by providing tuition support for players enrolled at Dalhousie University. Stuart Rath, a very involved community member of Colchester County and surrounding area, established The Bearcat Hockey Education Award. Some of Stuarts endeavors are as follows: he serves as the Vice President of Truro Centre Ltd, and the President of Stuco Holdings Ltd. From 1985-1995 Stuart served as the President of Halifax Cablevision Ltd, from 1976-1985 he served as the President and General Manager of Eastern Cablevision, and from 1960-1975 he was the Chairman of the Truro Industrial Society. A few of Stuarts other accomplishments are being Director of Nova Scotia Business Inc. since March 2007, Director of Morien Resources Corp since December 1997, as well as serving as Director of Stuco Holdings Ltd. and Director of Erdene Resource Development Corporation since June 2006 until November 2012.
Eligibility: Available to entering or current technical and undergraduate students at the Faculty of Agriculture. Selection is based on academic performance and the recommendation of the team coaches.
Application Type: Automatic Consideration – No Application Required

Cliff and Grace Retson Memorial Scholarship
The Grace and Cliff Retson Memorial Bursary was first created by Grace in memory of her husband, Cliff Retson who graduated from the AC in 1934. Cliff passed away in 1997. Grace was born in Waskada, Manitoba and grew up in Kerrobert, Saskatchewan. She attended secretarial school in Saskatoon and after retiring, she received her Bachelor of Arts from St. Mary’s University. Grace met Cliff, her husband of 56 years, while she was working at the Senate in Ottawa. They married on July 26, 1941 and moved to Truro in 1947. The Retson’s (Grace & Cliff) hosted several international students studying at the Faculty of Agriculture over the years. It is for this reason and to ensure ongoing support of the educational interests of International students studying at Dal-AC, that Grace created the scholarship.
Eligibility: Available to international students in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, and interest in and involvement in multi-cultural activities on campus.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Ira L. Rhodenizer Memorial Scholarship
Ira Rhodenizer was born in 1890 in Parkdale, Lunenburg County, Nova Scotia and lived there for the majority of his life. He served in the Canadian Army from 1914 to 1919 and was wounded overseas during World War I. He later became a farmer, storekeeper, and lumberman in Parkdale, NS. He was greatly interested in community life and was associated with farmer’s organizations for many years. He was married and had seven children. He was a member of the Baptist Church, the I.O.O.F. and Masons. Ira was active in Nova Scotia Guides and Fish and Game Associations, had been a municipal councillor and President of the Lunenburg Centre Liberal Association. He was a Director of the Nova Scotia Federation of Agriculture and was killed in a car accident on the way to a meeting of this organization in August 1958. The Ira L. Rhodenizer Memorial Scholarship was provided by the Federation as a memorial for his dedication and contributions through the years.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Selection criteria include academic performance, involvement in student affairs, and participation in the 4-H program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Dr. Robert G. Rix Family Farm Scholarship
Robert (Bob) Rix was born in Halifax on July 29th, 1948. Robert graduated from Dalhousie University Dental School in 1974. He practiced in Musquodoboit Harbour, Tatamagouche, and Winsloe, PEI, prior to opening his own dental practice in Bible Hill. He took great interest in his profession and knew the family trees of most of his patients and will be fondly remembered by everyone for his excellent dentistry, story-telling, knowledge of American History, love of gardening, tinkering with mechanical items, love of nature and his family. Robert had originally established the “Robert G. Rix Family Farm Bursary” in 1985. Although not having a farm background himself, he shared his beliefs that everyone’s roots are in the land and he felt his way to contribute to the importance of agriculture to our society was through this small bursary each year. A couple years ago, the award became known as the “Dr. Robert G. Rix Scholarship” to allow support to a student where the need was greatest. After Robert’s passing, one of the faculty provided funds to continue the bursary in Robert’s name. Since then, Robert’s family has graciously supported the scholarship to allow his legacy and memory to live on.
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture who has shown determination and dedication to operating a
family farm. Recipients will have demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application

**J. Arnold Roberts Memorial Scholarship**
The J. Arnold Roberts Memorial Scholarship was created by Elsie Roberts in memory of her husband, Arnold Roberts. Establishing a scholarship in memory of a loved one is a wonderful way to ensure their legacy and memory lives on, and this is what Elsie wished for her late husband.
Eligibility: Available to current students in any year of an undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of one of the Atlantic provinces. Awarded to an outstanding student who is not receiving a scholarship of greater value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Ted Rose Memorial Scholarship**
The Ted Rose Memorial Scholarship was created by Mrs. Ann M. Rose in memory of her husband, Ted. Ted had grown up on a dairy farm in Urbania, near Shubenacadie. Ted and his brother Percy ran the farm after the death of their father. Although no one from the family had any connection to the AC, Mrs. Rose had a soft spot for farming, admitting there can be “nothing as rewarding as farming.” Rose wanted to provide a scholarship to a deserving young person who is interested in farming themselves someday, while honoring her husband’s memory.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Awarded to a student who plans to operate a livestock farm.
Selection criteria include financial need, academic performance and a documented commitment to animal welfare.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

**Rotary Club of Truro International Student Bursary**
The Rotary Club of Truro has been part of the fabric of the community of Truro as well as the network of Rotary Clubs around the world since 1926. The Rotary Club of Truro is proud of its years of service and benevolence in the community and internationally. In addition to providing assistance to countless individuals with special needs for medical treatment or equipment over the years, the Club has continued to focus on the needs of children with disabilities.
Eligibility: Available to a current international student at the Faculty of Agriculture. Preference will be given to students registered in a program of study and registered full time, with additional preference given to students studying for the full year. Special consideration will be given to students who came from a developing country and plan to return and apply their education there. All students paying the international tuition differential are eligible for consideration.
Selection criteria include financial need and potential impact of the bursary on the student's lifestyle while at school and their future plans.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Rick Russell Memorial Scholarship**
Rick Russell passed away Saturday, July 3rd, 2004 after a courageous battle with cancer. After graduating from NSAC, Rick was employed at the College as the swine herdsman for 20 years and then as manager of the fur unit for 4 years. Rick was the coach of the former NSAC Woodsmen Team for 24 years. He was well respected by both his peers and the athletes he coached. He was always giving of himself and was recognized for his selfless devotion to the college community by the AC Student population by being given the Student Appreciation Award in 1995. Due to his sincere commitment to NSAC and his community, a scholarship has been created in his memory.
Eligibility: Available to current student athletes in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, involvement and leadership in the Woodsmen program, and satisfactory academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

**Jack Sibley Agricultural Bursary**
This award was established by the John & Judy Bragg Foundation to honour John D (Jack) Sibley. Jack was born in 1937 at Meaghers Grant in Nova Scotia’s Musquodoboit Valley and graduated from Musquodoboit Rural High School in 1954. After receiving a BA from Mount Allison University in 1957 he attended the Nova Scotia Agricultural College and is an alumnus of the Class of 1959. He began his working career as a teacher and then moved on to work for several years as a field manager for McCain Foods. In 1965 he returned to Nova Scotia and spent the next 29 years as a wild blueberry extension specialist with the Department of Agriculture and Marketing. In 1994 he retired from this position and in 1997 began work with WBANA Canada in wild blueberry promotion, retiring in 2011 after a total of 44 years of service to the wild blueberry industry. Jack had a number of part-time careers which included operating his own wild blueberry acreage, working as a musician and MC, and teaching old-time fiddling to children from the Truro area.
Eligibility: Awarded to a full-time technical or undergraduate student at the Faculty of Agriculture who demonstrates financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Sodhi Memorial Bursary**
This bursary was established by the Sodhi family in memory of Mr. Bhagat S. Sodhi, long-time librarian at the former Nova Scotia Agricultural College. Mr. Sodhi immigrated to Canada in the 1960’s, in search of opportunity for his future family. After meeting and bringing his wife Darshan to Canada, they settled in Truro, NS, and began their family. Mr. Sodhi began working at the former Agricultural College in 1968, when the campus library was housed in Cox
Institute. He was instrumental in moving the library to its current location at the MacRae Library, acting as head librarian until 1995. Mr. Sodhi considered the library staff as a second family. As a tribute to his memory, the Sodhi Family established an award in his name upon his passing on June 1st, 2009.

Eligibility: Available to current international students at the Faculty of Agriculture in good academic standing, with preference given to students in undergraduate and technical programs based on financial need. Students in all programs of study are eligible.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

South House Sexual and Gender Resource Centre Bursary
The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women’s Centre, was founded in recognition of women and trans people’s common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between $25 and $250. Available funds are split between applicants. See http://southhousehalifax.ca/ for an application form.

Application Type: Contact the Department, School, or College for more information

Sport Leadership Award
The Sport Leadership Award recognizes a high school varsity athlete enrolling full time in a program of study and planning on participating in a sport at the varsity level at the Faculty of Agriculture.

Eligibility: Available to entering technical or undergraduate students at the Faculty of Agriculture with an admissions average of at least 75%. Recipients of other major entrance scholarships are not eligible. Selection criteria include financial need, sport skills and leadership.

Application Type: Automatic Consideration – No Application Required

Phillip Stead Memorial Leadership Award
Phillip Stead graduated from the former Nova Scotia Agricultural College in 1965 with a degree certificate. He left Nova Scotia to complete his BSc. in Animal Science at McGill University and returned in 1967 to begin what was to be a long and successful career with the Nova Scotia Department of Agriculture, working as a sheep specialist with the Animal Industry Branch. In 1972 Phil continued his education by completing a MSc. in Agriculture and Nutrition at Virginia Polytechnic Institute and State University. For his passion for community involvement and his long standing contributions to Agriculture, a memorial award has been created in his name.

Eligibility: An award will be presented annually to a student who has exhibited outstanding leadership at the Faculty of Agriculture and/or within the community. Nominations for the award will be received by a committee representing the Student Leadership program at the Faculty of Agriculture and a member of the sponsoring body for the award (Nova Scotia/Newfoundland Holstein Branch). The committee will select an awardee from those nominated who best represents the leadership qualities and performance in the past year or number of years that would be a model for others. Selection criteria may also include academic performance, financial need, and the other awards that have been granted to the nominee.

Application Type: Contact the Faculty for more information

Captain R. M. Steele Memorial Fellowship
Captain Richard Steele was a founding member of the Atlantic Chapter of the Rhododendron Society of Canada (RSCAR) and supported the creation of the Atlantic Rhododendron & Horticultural Society. He faithfully attended, and contributed to, meetings and programs. A mentor and friend to many, and with an international network of plants people, he was a major influence on horticulture, locally and further afield. RSCAR members in the early days established the tradition of the annual Steele Lecture, the objective being to bring a top-ranking plants person to Nova Scotia as a guest speaker. Captain Steele died March 14th 2010.

Eligibility: Awarded to a final year undergraduate student in the Faculty of Agriculture who intends to pursue plant-related studies at the graduate level.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Stewiacke Valley Garden Club Scholarship
Stewiacke Valley is located in the Southern area of Colchester County. The Stewiacke Valley Garden Club is involved in the beautification of the Valley, as the Club is a part of the Nova Scotia Association of Garden Clubs which promote the general landscape beautification of the province. The Club hosts a multitude of events, such as speakers on Horticulture, etc., bake sale events, plant sale events, and more.

Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Applicant must be from the Stewiacke Valley area of Nova Scotia. Selection criteria include involvement in extra-curricular and community affairs, financial need, and academic performance.

Value: $250

Catherine and Alexander Sutherland Bursary
This bursary was established in memory of Victor Sutherland's parents, Catherine and Alexander Sutherland. Born in the 1890s in the area of Earlton, Nova Scotia, Catherine and Alexander operated the Earlton General Store. Over a century later, this store still operates, under other ownership. Alexander also operated a saw mill, while Catherine managed the books and ran the store. In 1939 the family moved to Truro and operated a second store in Bible Hill, near the Nova Scotia Agricultural College. Alexander died in 1943, and Catherine continued to raise their three children. Catherine died in 1972, having lived a very full and satisfying life. Victor Sutherland is an alumnus of the Nova Scotia Agricultural College, Class of 1954. After completing his diploma at the NSAC, now the Dalhousie University Faculty of Agriculture, Victor completed a degree in geology at Acadia University. He spent his career working in the oil and gas industry, including forming his own company, Northrock Resources, in 1986.
Eligibility: Awarded to a full-time Faculty of Agriculture technical or undergraduate student who demonstrates financial need. Preference is given to students who have attended high school in Truro, and then to students who attended high school in Colchester County.

Application Type: Faculty of Agriculture In-Course Award Application

Syngenta Canada Inc. Awards
Syngenta is one of the world’s leading companies with more than 28,000 employees in some 90 countries dedicated to their purpose: Bringing plant potential to life. Syngenta’s mission is to make a difference for smallholders in developing countries. By helping them become more professional growers, they want to achieve added value for rural communities. One way they do that is through technical innovation. Equally important is access to markets, enabling smallholders both to buy inputs and sell their produce. These and other factors are all essential for sustainability successful agriculture.

Eligibility: Available to a technical or undergraduate student in any program in the Faculty of Agriculture. Awarded to students whose course and project work reflect an interest in the Maritime potato industry. Applicants will be required to submit a 300-500 word essay expressing opinion on a topic relating to the crop protection industry. Selection criteria include academic performance, and potato farm experience or background.

Value: $500

Bruce Trenholm/Atlantic ’86 Scholarship
Bruce was born on the family farm in Grand Pre, Kings County, he graduated from the former Nova Scotia Agricultural College and MacDonald College, receiving his Bachelor of Science Degree in Animal Husbandry in 1947. Upon graduating from McDonald College he served as the Agricultural Representative in Yarmouth and then taught Animal Husbandry at the former Nova Scotia Agricultural College for three years. In 1952 he took over the family farm going on to establish the well-known Brulo herd. Bruce’s contributions to agriculture have been many and varied and are worthy of recognition in the Atlantic Agricultural Hall of Fame. He had a lifelong interest in Holstein cattle and was Master Breeder and Past President of Holstein Canada. In 1986, the year of Bruce’s death, he coordinated Atlantic ’86 – the Annual National Convention of Holstein Canada. This scholarship was established in his name as an on-going memorial.

Eligibility: Available to students entering their final year in any undergraduate program at the Faculty of Agriculture. Applicants must be permanent residents of one of the Atlantic provinces, have a Holstein farm or 4-H (Holstein calf project) background. Selection criteria include academic performance and career goals.

Peter Van der Borch DVM established this bursary for an exceptional first year student from Truro, Nova Scotia.

Eligibility: Must be first year student registered at the Faculty of Agriculture and be from Truro, Nova Scotia.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Visit dal.ca/scholarships

Eric Williams Memorial Scholarships
Born in 1938 Eric P. Williams started farming in 1959 with nine cows and twenty acres. Today the Williams’ family own and operate a two hundred head Holstein dairy farm in the Goulds and employ a nephew and one other worker. Eric worked hard to introduce supply management for milk producers in Newfoundland. In 1983 he was appointed the first chair of the Newfoundland Milk Marketing Board now known as the Dairy Farmers of Newfoundland and Labrador. During his lifetime he fought to improve the cost of production formula for milk producers in the province. Eric was also nominated by the Dairy Farmers of Newfoundland and Labrador in recognition of his tremendous contributions to agriculture, to become an inductee into the Atlantic Agricultural Hall of Fame. It is for the same reasons that the Dairy Farmers of Newfoundland and Labrador have established a scholarship in his memory for his dedication and commitment to agriculture.

Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Newfoundland and Labrador. Selection will be based on academic performance. Typically one award
Zhuhui Ye Memorial Award
This fund was established by classmates of Zhuhui Ye (Kevin) to honour his memory. Kevin attended the former Nova Scotia Agricultural College as part of the FAFU 2+2 program, earning his BSc(Agr) in Aquaculture in 2012. Kevin continued his studies with the Dalhousie MSc. program. On September 8, 2012, Kevin lost his life in a drowning accident at Dollar Lake Provincial Park. Kevin is well remembered as an intelligent, popular, and outgoing man whose generosity touched the lives of many friends. The intent of the Zhuhui Ye Memorial Award is to further the understanding of culture and relationship between Chinese and Canadian students by supporting the FAFU/DAC 2+2 program.
Eligibility: Award to a Chinese student in the FAFU 2+2 program or another student demonstrating a commitment to and involvement with the FAFU 2+2 program at the Faculty of Agriculture, in addition to academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships for application deadline
Value: $500

Environmental Sciences
Dr. Stewart R. Keddy Memorial Scholarship
Dr. Stewart Keddy graduated from the Nova Scotia Agricultural College in 1967. He credited the AC as giving him a strong academic start. This award is in his honor and recognizes the academic skill of a student interested in agriculture.
Eligibility: This award is for students enrolled in the Faculty of Agriculture who are studying on a full-time basis. Students must be in their second year (or later) of an undergraduate program (including technical or degree programs). They will have strong academic standing and demonstrate financial need. Preference will be given to a student who attended high school in the Annapolis Valley.
Application Type: Faculty of Agriculture In-Course Award Application

CMM & PHP Natural Resource Bursary
The purpose of the CMM & PHP Natural Resource Bursary is to encourage First Nation/Aboriginal student interest in the environment and natural resource stewardship. PHP, along with CMM has recognized the need to support students in their endeavors to protect the environment and its resources.
Eligibility: Students enrolled full time at the Faculty of Agriculture. Preference is given for a student who demonstrates an interest in environmental protection or natural resource sustainability.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships

Friends of Alex Taylor Memorial Award
To honour the memory of Alexander Taylor, the Friends of Alex Taylor Memorial Award will provide an annual award to a student with an interest in plant science and its relation to sustainability.
Eligibility: A full or part-time student enrolled in an undergraduate program at the Faculty of Agriculture in their second, third or fourth year, with a minimum GPA of 3.0. Preference is given to students that have taken courses related to plant science or agriculture and have demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships

Valacta Dairy Scholarship
Valacta, the dairy production centre of expertise for Quebec and Atlantic Canada, offers the Valacta Dairy Scholarship which recognizes and supports students with a demonstrated interest in the dairy industry.
Eligibility: Available to one student enrolled in an undergraduate or diploma program at the Faculty of Agriculture that demonstrates a genuine interest in the dairy industry by program, course, or project work.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships

Estabrooks Family Scholarship
The Estabrooks Family Scholarships was established by Evans and Lois Estabrooks to support students with financial need attending the Faculty of Agriculture.
Eligibility: Available to full-time students in the Bachelor of Science in Agriculture program, majoring in Plant Science who attended a high school in Atlantic Canada, achieved at least a 3.0 GPA in the previous term, and demonstrate financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Please visit dal.ca/scholarships

PY Hamilton Scholarship
Peter Y. Hamilton, Class of 1944 and Professor Emeritus, attended the former Nova Scotia Agricultural College, and later returned as Registrar in 1973. This scholarship has been established in his memory to reward scholarly excellence.
Eligibility: Available to Canadian citizens enrolled in any program in the Faculty of Agriculture on a full-time basis in their second year of study or later who have achieved an average of 80% in the previous year of study.
Application Type: Faculty of Agriculture In-Course Award Application
Faculty of Agriculture Alumni Family Scholarships
In celebration of the fact that many students at the Faculty of Agriculture are family members of AC Alumni, the Alumni Association decided to establish a Family Bursary for the first time in 2008. There are several bursaries available for family members of Alumni attending the Faculty of Agriculture.
Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Awarded based on academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500 - $1,000

Faculty of Agriculture Athletic Bursaries
Awarded to returning student varsity athletes. Eligibility: Available to current student varsity athletes in any undergraduate program in the Faculty of Agriculture. Applicants will have demonstrated financial need, satisfactory academic standing, and be recommended for the award by a coach.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Faculty of Agriculture Bursaries
The Faculty of Agriculture has established a fund which will provide bursaries to assist students in need of financial assistance. Students in need of financial assistance can apply for a bursary on an ongoing basis throughout the academic year.
Eligibility: Available to current students at the Faculty of Agriculture who have demonstrated leadership in student affairs, strong academic performance, and who are not receiving other scholarships of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Animal Nutrition Association of Canada (Atlantic Division) Scholarship
The Animal Nutrition Association of Canada (Atlantic) Scholarship was established in 1989 for a student who successfully completes their second year of B.Sc. (Agr.) program. The Animal Nutrition Association of Canada (ANAC) is the national trade association of the livestock and poultry feed industry. The 170 members include feed and ingredient manufacturers and distributors, as well as suppliers of a wide range of goods and services to the feed industry. Taken together, ANAC’s membership represents 90 percent of commercial feed manufactured in Canada.
Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program who have demonstrated leadership in student and community affairs, strong academic performance, and who are not receiving other scholarships of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Ralph H. Armstrong Memorial Award
Established in memory of Ralph Armstrong of North Kingston, Kings Co., Nova Scotia. Ralph was well known for his breeding of dual-purpose Shorthorns and marketing of livestock. His prize Shorthorns had been exhibited under the Brookmont Farms name for more than 30 years at Exhibitions throughout Nova Scotia, the Royal Winter Fair in Toronto, and in the 1980 World Shorthorn congress in Calgary. Mr. Armstrong was an honoured member, Secretary and Past President of the Nova Scotia Shorthorn Association, Vice President of the Annapolis County Exhibition, Past Director of the Atlantic Winter Fair and Past Director of the Maritime Shorthorn Association.
Eligibility: Available to former or current 4-H club members from Kings or Annapolis Counties in Nova Scotia who have completed their first year of study in any undergraduate program at the Faculty of Agriculture. Selection is based on financial need and involvement in school, athletic and/or community organizations.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $400

Associate Dean's Scholarship
Established by the Faculty of Agriculture and has built on a proud history of industry-leading education and research.
Eligibility: Available to students entering fourth year of the Bachelor of Science (Agriculture) program. Awarded based on academic merit.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $300

Atlantic Council of Crop Life Canada Awards
CropLife Canada is the trade association representing the manufacturers, developers and distributors of plant science technologies, including pest control products and plant biotechnology, for use in agriculture, urban and public health settings. They strive to ensure that the benefits of plant science innovations can be enjoyed by both farmers and consumers. CropLife Canada promotes sustainable agricultural practices and are committed to protecting human health and the environment.
Eligibility: Available to current students in the Diploma of Technology programs in the Faculty of Agriculture. Recipients will be from agricultural backgrounds and plan to pursue employment in the agricultural sector. Preference is given to students whose backgrounds, course and project work, summer employment, and career plans reflect an interest in the crop protection industry.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

**Atlantic Fertilizer Council Award**

Eligibility: Awarded to a student from Atlantic Canada in the second year of a diploma program related to crop protection. Selection criteria include farm interests, leadership qualities within the University community, financial need, and academic performance.

The Atlantic Poultry Conference is the key meeting place for producers and service providers to gather and discuss and share their news, the Conference is held once per year. Speakers who attend the Conference address a number of topics that cover: ventilation, energy, health, reducing feed costs, transportation, eggs, chickens and turkeys.
Eligibility: Awarded to a student whose course and project work reflect an interest in poultry. Preference will be given to final year students in the BSc(Agr) program who have either completed or have plans to complete a poultry-related research project in RESM 4002 and RESM 4003. This scholarship is awarded in odd years.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Avery Prize**

This prize, bequeathed by J. F. Avery, MD, will be awarded on graduation to the student standing highest among graduates of the general degree program. The recipient cannot have received the Governor General’s Silver Medal or University Silver Medal. For the aforementioned medals and prize, a student who is completing a second Dalhousie degree will have only those courses required for a second degree used when calculating their cumulative average. In addition, any disciplinary action by the Senate Discipline Committee shall be deemed sufficient cause for any student to be ineligible. For more information on deadlines and application procedures, please visit: www.dal.ca/scholarships.
Application Type: Automatic Consideration – No Application Required

**Dr. Roger S. Bacon Scholarship in Agriculture**

Dr. Roger S. Bacon was a dairy farmer and blueberry producer from Cumberland County, Nova Scotia. He was also a long standing MLA from this area. During his political career, he was a well-respected and long serving Minister of Agriculture and for a time Premier of Nova Scotia. In keeping with his lifetime interest and service to Agriculture, Dr. Bacon has made a donation to establish an endowed fund to support a new scholarship at the Faculty of Agriculture.
Eligibility: Awarded to a Nova Scotia student entering the final year of any program at the Faculty of Agriculture who has plans to pursue a long term career in agriculture. Selection criteria include career plans, academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

**Doug Bailey Memorial Bursary**

Doug Bailey had a lengthy and successful career at Farmers Dairy (now Agropur). It began at what is now known as the Middleton Spreads Plant in 1968 when Twin Cities Dairy acquired J.D. MacKenzie’s Limited. Doug held many managerial positions over the years, including General Manager of the Truro Cheese Plant and Vice-President and General Manager of Central Dairies in Newfoundland. He was appointed President and Chief Executive Officer of Farmers Dairy (now Agropur) in 1987, a position he held until his death in 1996. One of Doug’s greatest strengths was his leadership ability, which he demonstrated not only with Farmers Dairy (now Agropur) but also throughout the industry. The Farmers Dairy (now Agropur) Board of Directors established this Bursary in memory of Doug.
Eligibility: Awarded to a technical, undergraduate, or graduate student at the Faculty of Agriculture who is a family member of an Agropur shareholder or employee. Selection criteria include leadership, extracurricular and community activities, financial need, and academic performance.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $2,000

**Bible Hill Garden Club Scholarship**

The Bible Hill Garden Club, originally referred to as Hillcrest Landscape Club was first organized in January of 1947. The group was created to promote the improvement of home grounds, assist in the beautification of community grounds, local parks and schools. Over the years, the group has gained popularity and has grown from 17 members to over 60, mostly women who range in age of 50-60. The group contributes to the Faculty of Agriculture through help supporting students with the bursary they have created.
Eligibility: Available to current students who are permanent residents of the Truro area, in any undergraduate program at the Faculty of Agriculture, with preference given to students in at least the second year of study in Horticulture, preferably a landscape program. Selection criteria include academic performance and financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
**Chartwells Scholarships**

Chartwells is a catering/food service company that specializes in providing services to higher education students. They are committed to providing programs.

**Value:** $500

**David W. Brown Memorial Scholarship**

The David W. Brown bursary is an ongoing demonstration of appreciation to the foundation of the David Brown United Limited by Atlantic Poultry Incorporated formerly ACA Cooperative Limited. Initiated in November 25, 1976; the company has continued to fund an annual memorial scholarship.

*Eligibility:* Available to students who have graduated from a high school in Atlantic Canada and who are entering the second year of a technical program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, an interest in farming, and an interest in the poultry industry.

*Application Type:* Faculty of Agriculture In-Course Award Application

*Application Deadline to Apply:* Check dal.ca/scholarships for application deadline

*Value:* $1,000

**Edward Brown Memorial Undergraduate Bursary**

The Edward Brown Memorial Undergraduate Scholarship was created in memory of Edward Brown under the estate of his wife, Dorothy Aveleigh Brown. Edward attended the Agricultural Campus and graduated in 1954.

*Eligibility:* Available to a Bachelor of Science (Agriculture) student, with preference to a student in the fourth year of study from Atlantic Canada.

*Application Type:* Faculty of Agriculture In-Course Award Application

*Application Deadline to Apply:* Check dal.ca/scholarships for application deadline

*Value:* $2,000

**Merle Cail Memorial Scholarship**

The Merle Cail Memorial Scholarship Fund was created by Merle’s wife, Faye Cail in memory of Merle’s dedication to organic agriculture. Born in Reston, New Brunswick, Merle was heavily involved in his community. He attended Zion Presbyterian Church, was director of Northumberland Co-operative and Cartier Co-operative, member of the Kent Agriconservation club, Moncton Holstein Association, Kent Farmers Association, Dairy Farmers of NB, and many more. Merle also had a dedicated career as a farmer.

*Eligibility:* Awarded to a senior undergraduate or graduate student from Atlantic Canada studying in the Faculty of Agriculture whose course and project work reflect an interest in organic agriculture. Selection criteria include academic performance, financial need and commitment to organic agriculture.

*Application Type:* Faculty of Agriculture In-Course Award Application

*Application Deadline to Apply:* Check dal.ca/scholarships for application deadline

**Vera Caldwell Memorial Bursary**

Vera Caldwell was born on June 3rd, 1924 in Hants County. She was a very devoted and involved member of the Newport United Church, serving as a Steward, Sunday School Teacher, and as a Youth Group Leader. Vera taught school for more than 25 years, first beginning in a one-room schoolhouse and ending her career at Brooklyn District Elementary School in 1989. As shown by her achievements, Vera was dedicated to the educational system, a bursary has been created in her memory.

*Eligibility:* Awarded based on financial need to full-time technical or undergraduate international students at the Faculty of Agriculture.

*Application Type:* Faculty of Agriculture In-Course Award Application

*Application Deadline to Apply:* Check dal.ca/scholarships for application deadline

*Value:* $500

**Canard Conservation Undergraduate Scholarship**

Dr. Charles Albert Eaves was born February 21st, 1908 in Liverpool England. Charles immigrated to Canada in March 1926 and in 1932 received his B.Sc. from McGill. In 1933 he attended Cambridge University on an I.O.D.E overseas scholarship before returning to McGill to receive his MSc. degree in 1937. On October 25, 2000, he received an Honorary Doctorate from Dalhousie University and the former Nova Scotia Agricultural College, now Dalhousie Faculty of Agriculture. The Canard Conservation Scholarships were established by Dr. & Mrs. Eaves to provide a graduate and undergraduate scholarship each year for students of Kings County focusing on environmental studies related to agricultural practices with particular reference to dyke land preservation and the general conservation of soil and water reserves.

*Eligibility:* Awarded to a student who is a permanent resident of Kings County, Nova Scotia, in the first or second year of the Bachelor of Science (Agriculture) program who is planning course and/or project work related to the environment. Selection criteria include academic performance, demonstrated interest in the environment, and career plans.

*Application Type:* Faculty of Agriculture In-Course Award Application

*Application Deadline to Apply:* Check dal.ca/scholarships for application deadline

*Value:* $500

**James Card Memorial Bursaries**

James Card was born in Windsor, Nova Scotia on October 12, 1924. He was a life-long farmer in Centre Burlington and was a former West Hants Municipal Councillor and was also a 4-H Club leader. As a part of James estate, three awards have been sponsored in his memory.

*Eligibility:* Awarded to students in financial need, with preference to international students, who are studying at the Faculty of Agriculture.

*Application Type:* Faculty of Agriculture In-Course Award Application

*Application Deadline to Apply:* Check dal.ca/scholarships for application deadline

*Value:* 3 @ $1,000

**Chartwells Scholarships**

Chartwells is a catering/food service company that specializes in providing services to higher education students. They are committed to providing programs.
and solutions to students to fit their unique needs and requests. Chartwells understands that a well-balanced diet is integral to an individual’s state of mind and long-term happiness. Providing students with a high-quality food service isn’t the only commitment Chartwells has made, they also offer multiple scholarships for both graduate and undergraduate programs.

Eligibility: Available to current students with high academic performance in any undergraduate program in the Faculty of Agriculture at Dalhousie who have not received other significant awards.

Application Type: Faculty of Agriculture In-Course Award Application

**Chisholm Family Bursary**

The Chisholm Family Bursary was established in memory of Mr. John Archie Chisholm, for students who share his interest in organic farming.

Eligibility: Must be enrolled in any diploma or undergraduate degree program at the Faculty of Agriculture. Preference is given to applicants who have completed or are currently enrolled in at least one organic agriculture course at the Faculty of Agriculture.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

**Class of 1960 Memorial Bursary**

In recognition of their 50th reunion, classmates established the Class of 1960 Memorial Bursary. Classmates contributed generously to this fund, with the intention of supporting an AC student. Their wish is to honour their deceased classmates who contributed to this fund, and who valued the experience and education they received at the Nova Scotia Agricultural College.

Eligibility: Awarded to a full-time technical or undergraduate student enrolled in any program at the Faculty of Agriculture who has demonstrated financial need.

Application Type: Faculty of Agriculture In-Course Award Application

**Class of 1950 Award Fund**

The Class of ’50 Award was first established in 2000 at the Class of 1950, 50th anniversary weekend celebration. President, Don Young and Vice-President, Jack Johnson spearheaded the campaign to get their classmates involved in their commitment to help future AC students. The group recognizes the difficulty that young students face to finance their post-secondary education, as they too faced similar challenges. After a great deal of preparatory work from Don, Jack and Cliff McIsaac, a proposal was created for the Class of ’50 Award fund of to assist deserving students to “stick with it.” The group of classmates have made and continue to make significant contributions to the campus and students.

Eligibility: Available to current students in financial need in any technical or undergraduate program in the Faculty of Agriculture.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Charles M. Collins Memorial Scholarship**

The scholarship is in memory of Charles McKittrick Collins who spent the years 1936-1962 working in various positions in the agricultural industry in Nova Scotia, including teaching at Dalhousie’s Horticultural Campus for twenty-five years. Collins Horticultural Building on the Dal-AC campus is named in his honour as well.

Eligibility: Available to current students studying Horticulture in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in the Bachelor of Technology program in Environmental Landscape Horticulture who have not qualified for other significant awards.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,200

**George and Lottie Cook Memorial Scholarship**

Lottie Cook first developed her passion for agriculture on her family farm on Cape Breton Island. Lottie’s parents were pioneers in the agricultural industry, and her father a renowned farmer. At a young age Lottie became involved in 4-H where she achieved some of the club’s top honours. She later graduated from the former Nova Scotia Agricultural College and worked as an assistant agricultural representative to J.C.F. MacDonnell for many years. In 1943 Lottie married George Cook and the pair later opened a chick hatchery in Truro and became one of the foremost producers of high quality chicks in the Maritime Provinces. After the passing of her husband in 1954, Lottie continued to operate the family business. Due to Lottie’s involvement in the agricultural industry and former NSAC community from both herself and family business, a scholarship has been created in her and her husband’s name.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture, based on high standing in course work.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Country Ribbon Agricultural Award
Country Ribbon established this scholarship to recognize and support students from Atlantic Canada with a demonstrated interest in pursuing a career in agriculture.

Eligibility: Must be enrolled in an undergraduate degree or diploma program at the Faculty of Agriculture, who plans to pursue a career in agriculture, preferably in Newfoundland and Labrador. Preference given to a student who attended high school in Atlantic Canada.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Visit dal.ca/scholarships

Dr. Kenneth Cox Memorial Scholarship
The Dr. Kenneth Cox Scholarship was created by the class of 1964 as a tribute for the retiring Principal of the former Nova Scotia Agricultural College. Dr. Kenneth Cox followed a very distinguished career in the Maritime agricultural industry. His early training was at the former NSAC, now known as the Faculty of Agriculture, where he graduated with the Class of 1921. He continued his studies at the Ontario Agricultural College graduating in 1924 with a Bachelor of Science in Agriculture.

Eligibility: Available to students entering the final year of the Bachelor of Science (Agriculture) program or a diploma program.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $250

Dairy Farmers of Nova Scotia Award
The Dairy Farmers of Nova Scotia organization was created through legislation enacted in 2001, and replaces the former Nova Scotia Dairy Commission. The organization exists under the umbrella of the Natural Products Marketing Council of the Department of Agriculture. The Dairy Farmers of Nova Scotia bursary has been active since 1989 and continues to help support students with their post-secondary education.

Eligibility: Available to a third or fourth year Bachelor of Science (Agriculture) student or a graduate student from Nova Scotia undertaking course or project work related to the dairy industry. Selection criteria include proven interest and experience in the dairy industry, the potential beneficial impact of study on the Nova Scotia dairy industry, and academic performance.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Dartmouth Horticultural Society Scholarships
The Dartmouth Horticultural Society is a gardening club whose aim is to promote, enrich and expand the practice of amateur gardening. Monthly meetings are held where their guest speakers from inside and outside the Society share their knowledge. In addition club experts are available for formal and informal exchange of ideas. Some of the club’s activities include a plant sale, a flower show, the planting and maintaining of a raised bed in Leighton Dillman Park, plant exchanges, and garden tours.

Eligibility: Available to upper-year students in any plant-related undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to students from the Halifax Regional Municipality, followed by all Nova Scotia residents, followed by residents of other Canadian provinces. Selection criteria include financial need and academic performance.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Dalhousie Agricultural Students' Association Awards
Dalhousie Agricultural Students' Association (DASA) is the student association for all students at the Dalhousie Agricultural Campus. DASA is the official voice of the student body, and provides leadership and vision for the students of the Agricultural Campus. DASA promotes student engagement and leadership through various campus activities including Orientation, Shinerama, College Royal and Winter Carnival. DASA also promotes student engagement within the surrounding communities of Truro and Bible Hill. DASA works closely with Student Services and Administration to collectively provide a welcoming community dedicated to higher learning and service to the community.

Eligibility: Awarded to students enrolled in the Faculty of Agriculture who have demonstrated, in the current academic year, exceptional school spirit and involvement in any or all of the following: DASA sponsored events, volunteering, campus community leadership.

Application Type: Automatic Consideration – No Application Required
Value: 2 @ $300

K. de Geus Memorial Prize for Plant Science
The K de Geus Memorial Prize was created in memory of Klaus de Geus. Klaus, met his wife, Christina “Tina” de Geus, in DeBeemster, The Netherlands. Klaus and Tina immigrated to Canada in 1957 with their three children, Gram, Louise, and Tineke. When they arrived in Canada, they decided to settle in Nova Scotia where they made a new life for their family, including setting up and running a successful flower shop and landscaping business in Bridgetown. Tina took great pleasure in her work as a floral designer. Over the years, she gave many demonstrations on all aspects of floral designing. This lead to a career in teaching floral design in the continuing education department of the former Nova Scotia Agricultural College.

Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture, based on high standing in course work, with preference to students in the Horticultural field.
Ernest L. Eaton Memorial Scholarship
Throughout Mr. Eaton’s lifetime he maintained a keen interest in scientific agriculture, and the education and development of the interested young people. He personally established the Ernest L. Eaton Scholarships, and made provision for them to continue in perpetuity. Although none of his children are directly active in farming, they all are interested in, and support, the fine work being done at present at the Agricultural Campus. The hope for the recipient of the Ernest L. Eaton Scholarship is to encourage the pursuit of excellence in both academic and scientific activities.
Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program based on performance in second year. Recipient cannot have received another scholarship of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Egg Farmers of Newfoundland and Labrador Scholarship
The Egg Farmers of Newfoundland and Labrador (formerly the Egg Producers of Newfoundland and Labrador) is a commodity board governing the production of eggs.
Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program. Applicants must be permanent residents of Newfoundland and Labrador.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Noel Enman Memorial Award
To honor the memory of Noel Enman, a former Agricultural Campus Animal Science Technician-Agricultural Technology student, 1979-1982, the Alumni Association has established a fund for the Noel Enman Memorial Award.
Eligibility: Awarded to a graduating technical student from the Faculty of Agriculture whose personality and fellowship have contributed to student life and activities, thereby gaining the respect of the students and faculty.
Application Type: Automatic Consideration – No Application Required

Faculty of Agriculture Mature Student Bursary
At the Faculty of Agriculture, the student body demographics have shifted dramatically over the past generation. We have increasingly more students transfer from other institutions or begin studies as a visiting or mature student. The 2012 Annual Appeal for the Faculty of Agriculture focused on raising funds for an endowment that would benefit mature students. In addition, alumnus Charles MacQuarrie directed that his planned gift benefit Faculty of Agriculture mature students.
Eligibility: Students enrolled at the Faculty of Agriculture in full-time studies who demonstrate financial need and are mature students (as defined by the Registrar’s Office).
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: See dal.ca/scholarships for application deadline
Value: at least $1,000

Fall River Garden Club Bursary
The Fall River Garden Club’s mission is to promote the improvement of home and community flower and vegetable gardens, lawns, trees and landscaping through friendly sharing of information, work and education. During the year they run fund raising events in order to raise money to beautify the neighborhoods. Their main fundraiser is their annual plant sale followed by an area garden tour whereby members open their gardens for viewing to the general public. The monies raised at these events go towards supporting Santa’s Express and giving a Bursary to a student at the Agriculture Campus studying horticulture. In addition, the gardens maintained in the surrounding areas are also funded from these events.
Eligibility: Available to a first year student in a Horticulture program at the Faculty of Agriculture in good academic standing, with preference given to students from the Fall River, Waverley, Wellington, Oakfield, Lakeview or Windsor Junction, Nova Scotia areas. Other residents of Nova Scotia will be considered. Applicants will have demonstrated financial need and well-developed career plans.

Value: $200

Ena Fenton Memorial Scholarship
Ena Fenton was a founding member of the Bedford Horticultural Society in 1950. Ena was an enthusiastic and willing participant in every function of that
group for 47 years. Mrs. Fenton had been a teacher prior to her marriage and had always been interested in the education of young people. After her death in 1977, the Society decided to name their scholarship in her honor. They feel certain that she would have been very pleased by their acknowledgment of her interest in the development of Horticulture and Landscaping in Nova Scotia.

Eligibility: Available to students studying Horticulture or Environmental Studies, entering the second year of any undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia, with preference given to those from Bedford, Sackville, and Waverley. In years when no student from Bedford, Sackville, or Waverley applies for the scholarship, consideration will be given to other students from the Halifax Regional Municipality (excluding those from Halifax and Dartmouth). Selection will be based on financial need, career plans, and academic performance.

Value: $50

**Governors’ Awards**
In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students’ contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors’ Awards. Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics. To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award. Information is available on the Student Services website.

Application Type: Contact the Department, School, or College for more information

**Governor General’s Bronze Medal**
Offered by His Excellency the Governor General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of technical programs.

**Jennifer Hayes Starratt Scholarship**

The Jennifer Hayes Starratt Scholarship was created by Jennifer’s husband, Mark, as a Christmas gift. Jennifer Starratt attended the Agricultural campus and graduated in 1996 with a Bachelor of Science in Agriculture. According to her husband the Agricultural campus holds a very special place in Jennifer’s heart and having a scholarship created in her name, is something very special to her. Due to the couple’s success in their professional lives, they were able to create a legacy to give back to the communities that have helped enrich their lives.

Eligibility: Available to female students entering their final year of the Bachelor of Science (Agriculture) program, with preference given to students who have completed their first three years at the Faculty of Agriculture. Selection will be based on academic performance, leadership, and involvement in campus activities. The scholarship will not be awarded to a student receiving other significant scholarships.

**John Higgins Memorial Scholarship**

John was a founding member of The Atlantic Association of Landscape Designers in 1992. He was instrumental to the development of Canada’s first ever Certification Program for Landscape Designers, which was available to all designers in the Atlantic Region, and pre-empted the National Certification Program by several years. John Higgins’ dedication and enthusiasm for the Landscape Design Industry throughout his career was unfaltering, his contributions immeasurable. It is for these reasons that AALD decided to offer a Design Scholarship for students attending the AC, to be dedicated in his name. The Atlantic Association of Landscape Designers hope is that, in part through this scholarship, his legacy will live on.

Eligibility: Available to students entering third year of the Bachelor of Technology in Environmental Landscape Horticulture program in the Faculty of Agriculture. Selection criteria include academic performance and skill and interest in landscape design.

**Joyce Family Foundation Agricultural Bursary**

The Joyce Family Foundation Agricultural Bursaries were established to create an endowed bursary program to ensure students with financial barriers are able to access and succeed at the Faculty of Agriculture.

Eligibility: Must be a Canadian Citizen or Landed Immigrant, enrolled in any year of undergraduate study at the Faculty of Agriculture, has demonstrated financial need, and be in good academic standing.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Visit dal.ca/scholarships

**Randy and Gladys Keddy Memorial Scholarship**

The Randy & Gladys Keddy Memorial Bursary was established by their son, Stewart Keddy in memory of his parents to provide an on-going legacy that is meaningful for family members and friends. Stewart graduated from the Faculty of Agriculture in 1967, from McGill University in 1969, and from Dalhousie Dentistry in 1974, where he was recognized for excellence in endodontics and radiology. Stewart practiced as a dentist for 37 years. He served in the Dental
Corps from 1974-1979 and was a founding partner of Purdy’s Wharf Dental Group from 1985 until his retirement in 2011. He held memberships in the Nova Scotia Dental Association, Canadian Dental Association, and Academy of General Dentistry.

Eligibility: Available to students entering second year of a diploma program or the third year of a degree program in the Faculty of Agriculture, with preference given to students from the Annapolis Valley of Nova Scotia with farm backgrounds. Awarded to a student whose background, program of study, course and project work and summer employment show a genuine interest in working in the agricultural industry following graduation. Selection criteria include career goals, academic performance, and financial need. Students receiving other scholarships of greater value will not be eligible for this scholarship.

Kings Mutual Insurance Scholarships
In memory of Past Directors, the Kings Mutual Insurance Company awards scholarships to students in the Faculty of Agriculture. The Kings County Federation of Agriculture represents the interest of the agricultural community in Kings County and is an active voice for its 395 members with the Nova Scotia Federation of Agriculture, Council of Leaders and provincial and national governments.

Eligibility: Available to students in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Selection criteria include financial need, academic performance, and demonstrated interest in a career in the Agri-food industry as reflected by summer employment and/or extra-curricular involvement. This scholarship is not available to students receiving other scholarships of greater value. At least one scholarship will be awarded annually to a technical-level student.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

P. Max Kuhn Scholarship
P. Max Kuhn grew up on a small farm in Lawrencetown, Halifax County. He lived from 1887 until 1928 and was the father to Bernard G. Kuhn. Max attended one year of the former NSAC General Course in 1908-1909. He was not able to return the next year because of need for him at home and shortage of funds, it was a great disappointment to him. That year was his only year of formal schooling; his home was so isolated that he was never able to attend grade school or high school, and his mother taught him at home. Max was a dedicated, hard-working farmer, and he made great use of his AC training. He bought his own Manor Hill Farm in 1918, located on Woodlawn Road (Portland Street) just outside what were then the town limits of Dartmouth. He market-gardened and ran a dairy there until his death. It was Bernard’s wish to establish this scholarship to recognize his father, Max, give education opportunity to others beyond what his father had, and to “repay Nova Scotia, former NSAC and Canada in small part for the education and support that he received here” (Bernard G. Kuhn).

Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture at Dalhousie, with preference given to students who have completed at least one year of study. Applicants must be permanent residents of Nova Scotia, with preference to students from the Halifax Regional Municipality. Awarded to a student with a farm background or those whose course and project work and summer employment demonstrates an interest in working in the agriculture industry after graduation. Selection criteria include financial need and academic performance.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $750

Raymond Loo Memorial Scholarship in Organic Agriculture
Raymond Loo was a certified organic farmer from Springfield, PEI where he operated Springwillow Farms. Ensuring there was room for wildlife on the farm and exploring ways to produce healthy food with the smallest environmental impact was very important to Raymond. Committed to promoting better farming practices in his community, he was a founding member of ACORN and board director for 6 years. Raymond also helped found and was the first president of the PEI Certified Organic Producers Cooperative. Raymond was dedicated to his province and the field of organic agriculture and was recognized greatly for his contributions.

Eligibility: Awarded to an undergraduate or technical student at the Faculty of Agriculture enrolled in at least one organic agriculture course offered on the Dalhousie Agricultural Campus.

Application Type: Faculty of Agriculture In-Course Award Application

The Robert and Katherine MacDonald Award
An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students’ Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.

Eligibility: Available to an undergraduate Chinese student who is a member of the Dalhousie Chinese Students and Scholars Association.

Application Type: Automatic Consideration – No Application Required
C. C. MacDougall Memorial Scholarship
C.C. MacDougall was the first district agriculturist to work with the NB Department of Agriculture in Sussex. The C.C. MacDougall Memorial Scholarship was established in 1958 by a large group of agriculture groups.
Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture. Awarded to a student pursuing a degree or diploma in Agriculture. The recipient must have been a 4-H member from Kings County, New Brunswick, or have parents who raise or breed Guernseys anywhere in New Brunswick.

Value: $250

Dr. Allan and Barbara MacKay Scholarship
Born in Heathbell, Pictou County, Nova Scotia, Dr. Allan MacKay received his early agricultural experience on the Spruce Grove Farm that had the distinction of having one of the first purebred Guernsey herds in Canada. He was a member of the Scotsburn Junior Dairy Calf Club and represented his province in the National competitions for club members at the Royal Winter Fair in Toronto in 1941. Dr. MacKay received his primary education at Heathbell School and his secondary education at Pictou Academy. He graduated from former N.S.A.C. in 1943 and obtained his Doctor of Veterinary Medicine from the Ontario Veterinary College in 1951. That same year he established a veterinary practice in Pictou County and continued his work until his retirement in 1991. Dr. MacKay is honoured for his program of animal health care, for his philosophy of preventing disease problems before they occur and his dedication to farm families in the area he served.
Eligibility: Awarded to a student with strong academic performance from the Faculty of Agriculture who plans to study veterinary medicine at the Atlantic Veterinary College.

Paul R. MacPhail PEI Potato Industry Scholarship
The roots of the Prince Edward Island Potato Board can be traced as far back as 1920, when the first Potato Growers’ Association was formed on Prince Edward Island. A true marketing board followed in 1950 and was restructured as a producer controlled board under the Natural Products Marketing Act in 1990. The PEI Potato Board established this award in memory of Paul R. MacPhail.
Eligibility: Awarded to a PEI student studying at the technical or undergraduate level of an agricultural program. The recipient will demonstrate an interest in working in the potato industry through course work, research projects related to potato production and utilization (including all disciplines, e.g. pathology, biotechnology, entomology, etc). Awarded based on academic performance and the project's relevance to the improvement of the potato industry.

In honour of Joseph E. Mapplebeck, who farmed for 50 years in Kings County, Nova Scotia, and in recognition of his appreciation for the importance of a good education, family members have established two bursaries.
Eligibility: Available to current second year technology students at the Faculty of Agriculture in good academic standing who demonstrate financial need. One of the two awards will be made available annually to a student in the Plant Science Technician program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Maritime Dairy Industry Scholarship
Dairy Farmers of Canada created this award to support Maritime students interested in the dairy industry. Dairy Farmers of Canada (DFC) is the national policy, lobbying and promotional organization representing Canada's farmers living on 12,529 dairy farms. DFC strives to create stable conditions for the Canadian dairy industry, today and in the future. It works to maintain policies that foster the viability of Canadian dairy farmers and promote dairy products.
and their health benefits.

Eligibility: Awarded to a third year student from the Maritime provinces enrolled in any Faculty of Agriculture program who shows commitment to and interest in the dairy industry, and professional and academic promise.

Application Type: Faculty of Agriculture In-Course Award Application
Value: $2,000

Bill Mathewson Memorial Award
Bill Mathewson grew up on a hill sheep farm in Sma Glen, Scotland. He graduated with a BSc (Agriculture) in 1949 and later (1974) a MSc. both from Aberdeen University. On graduation 1949, he joined H.M. Overseas Civil Service. After further training in Cambridge and Trinidad, he was posted to Tanganyika, Africa where he worked for 14 years. On retirement in 1965, he worked for three years with the N.F.U. of Scotland in Edinburgh before immigrating with his family to Nova Scotia in 1968. He taught for 20 years at the Faculty of Agriculture. Bill retired in 1988 and was honored by his colleagues by being made Professor Emeritus. Much loved by students, faculty and the agricultural industry, Bill will be greatly missed. It is with his memory in mind, that Bill’s friends and colleagues at the AC launched an award in his name.

Eligibility: Available to any student registered in any program at the Faculty of Agriculture participating in an international experience. In applying for consideration, students will submit a proposal to participate in such activities as a study semester abroad toward their degree/diploma, attendance at a conference to make a presentation, a specialized training course or an internship or development project.

Application Type: Contact awards@dal.ca for more information
Value: $1,000

Donald McInnes Award
Established in 1904, Pictou Mutual Insurance Company is the oldest mutual insurance company in Nova Scotia. Initially established by a group of farmers who sought to provide local protection for each other in the event of loss, their company has grown to include more than 3,500 local and rural policyholders. Donald McInnes was born in 1933 on the original McInnes farm on Scotch Hill Road. A graduate of Pictou Academy high school, he attended the AC, graduating in 1955. As a shareholder of Scotsburn Co-op, Donald served as Director for 22 years and Chairman of the Board for 15 years. For 35 years Donald was active in the Pictou County Farmers Mutual Fire Insurance Company. Donald served first as an agent, then as a director and manager of the company. Due to Donald’s sincere involvement with both the community and Pictou Mutual Insurance Company, an award has been created in his name which is funded by Pictou Mutual Insurance.

Eligibility: Available to a student enrolled at the Faculty of Agriculture. Selection criteria include commitment to and involvement in the community and leadership provided in student activities, academic performance and financial need. A student may not be selected for this award more than once.

Karen Meek Memorial Scholarship
Karen was born March 28, 1962 and grew up on the family farm in Canning, Nova Scotia. She attended local schools and graduated from Cornwallis District High School in 1980. Karen was an avid participant in school sports, 4H, horseback riding, ringette, her motorbike, and living life to its fullest. Following in her father’s footsteps (Eric Meek – class of 1954) she attended and graduated from former NSAC in 1982 with a Diploma in Ag Business. Karen participated in many campus activities but the Woodsmen Team was always her favorite. She developed many close friendships in her years in Truro. The Karen Meek Memorial Scholarship was established so that Karen’s memory could live on.

Eligibility: Available to current students in the Bachelor of Science (Agriculture) Environmental Sciences program. Selection criteria include academic performance, financial need and contribution to campus life. This scholarship is not available to students receiving other awards over $1,000.

Application Type: Faculty of Agriculture In-Course Award Application

**John Reginald (Reg) Moore Memorial Scholarships**

Reg Moore was born in Economy Nova Scotia on August 25, 1917; the fifth of six children. He was educated in Economy and Bass River graduating in 1935. Reg then enrolled in Normal (Teachers) College in Truro. He taught in various locations in Nova Scotia until called up for service in the Royal Canadian Air Force in 1940. Reg served as a staff pilot and as a Coastal Command pilot in Canada and the United Kingdom. Returning to Canada in 1945 Reg enrolled in the Nova Scotia Agricultural College (now the Faculty of Agriculture, Dalhousie University). He graduated from the former NSAC in 1947. Reg spent his entire post war career at the FCC. First as a Credit Advisor, then as Branch Manager for Nova Scotia. In 1960 he was transferred to Saint John, New Brunswick as Executive Assistant to the Regional Manager Atlantic. By 1962 Reg had tired of doing office work and transfers (four in three years) so requested a transfer to field duties where he would have day to day contact with farmers. He was assigned to the Sussex, NB Office where he completed his career, retiring in 1981.

Eligibility: Available to current students in any undergraduate program in the Faculty of Agriculture, with preference given to students studying in a full-time capacity. Applicants must be permanent residents of Colchester County, Nova Scotia and will have completed at least one year of study. Selection will be based on financial need and a cumulative average of at least 3.00.

**A. C. Neish Memorial Trust Scholarship**

Dr. Neish (1916-1973) was an undergraduate at the former Nova Scotia Agricultural College in Truro. This is where he had his first contact with science and where he had won the Governor General’s Medal and a Macdonald College (Quebec) Scholarship. His work on fermentation, bacterial and plant metabolism and the biosynthesis of plant polysaccharides and lignins received international acclaim. He was a Fellow of the Chemical Institute of Canada, of the Royal Society of Canada, and the Royal Society of London. Dr. Neish was the first person to be awarded the Gold Medal of the Canadian Society of Plant Physiologists, and was awarded an honorary doctorate by Mount Allison University and an honorary Doctor of Science degree by McGill University. The A.C. Neish Memorial Trust Scholarship was established by friends, admirers, and colleagues of the late Arthur Charles Neish.

Eligibility: Available to students entering their final year of the Bachelor of Science (Agriculture) program. Selection criteria include high academic performance and qualities of leadership as indicated by participation and achievement in both academic and non-academic activities.

Donald Palfrey Award
The Donald Palfrey Award was established in memory of Donald Palfrey in recognition of his many years of service and contributions to weed science in Nova Scotia. Donald was born in Fort Fairfield, Maine. He received his formal education in Pictou County and he graduated from the AC in Truro, Nova Scotia and from McGill University in Montreal, Quebec with a Bachelor of Science in Plant Pathology. He worked for the N.S. Department of Agriculture in Marketing for 37 years, retiring as Supervisor of Weed Science, where he was a key player and helping in pioneering work in extension and research in weed control in Nova Scotia. Donald also taught at the AC for 18 years, teaching courses in Weed Control and Plant Pathology. He was a distinguished life member of the N.S. Institute of Agrologists and the first honorary life member of the Atlantic Vegetation Management Association. As a result of Donald Palfrey's sincere commitment to the Department of Agriculture and his field of interest, an award has been created to honor his memory and legacy.
Eligibility: Awarded to a final year undergraduate student carrying out a research project in the area of pest management, with preference to a student involved in weed science, either through academic work or summer employment.
Application Type: Faculty of Agriculture In-Course Award Application

Robert Parent Memorial Scholarship
The Robert Parent Memorial Scholarship was created in memory of Robert Parent who attended the Agricultural Campus and graduated in 1921. His wife, Laura E. Daisy Parent, left in their estate, wishes to establish a scholarship in his memory.
Eligibility: Available to an outstanding current student in any undergraduate program in the Faculty of Agriculture who has not qualified for other significant awards.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,200

Passionate Plants Person Award
In 1976, with two passionate plants men – the late Don Craig and the late Captain Richard Steele – as founding members, they began as RSCAR, the
Rhododendron Society of Canada Atlantic Region. They were one of three regions, the other two being Niagara and Toronto. When Niagara and Toronto decided to join the American Rhododendron Society in the 1980s and RSC ceased being its own organization, the three regions – Atlantic, Niagara, and Toronto – became the 3 chapters in District 12 of the ARS. In 2003, they formed the Atlantic Rhododendron & Horticulture Society, to reflect the diversity of plant interests among local gardeners and plants people, while maintaining a central interest in rhododendrons and other ericaceous plants. They are a non-profit society registered in Nova Scotia.

Eligibility: Available to students entering second year of the Environmental Horticulture diploma program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Preference is given to students whose passion for plants is infectious and who will most impact the way we regard and understand plants in both public and private environments. The student should also demonstrate leadership abilities and financial need.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $750 and 1-yr membership with ARHS

Pork Nova Scotia Scholarship
Pork Nova Scotia is the marketing agent for hogs in Nova Scotia. Their mandate is to create the most favorable environment possible for the production and marketing of pork in Nova Scotia to assist in maximizing returns for Nova Scotia producers. PNS has an active and organized structure that has become the recognized voice of the Pork Industry in Nova Scotia. It is organized into 3 geographical zones, representing pork producers who account for 100% of Nova Scotia’s pork production.

Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Applicants must be permanent residents of Nova Scotia. Awarded to a student with an interest and/or background in swine production. Selection criteria include demonstrated interest in the swine industry (through course or project work), academic performance and financial need.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $350

Porter Brothers Dairy Award
This fund is created to honour the memories of Arthur & Donald Porter of Fort Belcher to provide financial assistance to students pursuing an education in the field of dairy science and production.

Eligibility: Must be registered in an undergraduate or technical program at the Faculty of Agriculture, entering their second, third, or fourth year of study, studying in any discipline that could have a positive impact on the dairy industry, and have demonstrated financial need. Preference is given to students from Atlantic Canada.

Application Type: Faculty of Agriculture In-Course Award Application

Prince Edward Island Institute of Agrologists Scholarship
The P.E.I.L.A is made up of agricultural professionals who are at the leading edge of the agri-food industry. Institute members are researchers, educators, extension specialists, primary producers and administrators of agricultural programs and policies.

Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program. Applicants must be permanent residents of Prince Edward Island. Selection criteria include academic performance, school and community involvement, financial need, and a career goal of becoming an agrologist.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Stuart Rath Junior A Bearcat Hockey Education Award Fund
The Stuart Rath Truro Bearcat Education Awards have been established to encourage the pursuit of university education among players with the Truro Junior A Bearcat Hockey Team (“The Bears”) by providing tuition support for players enrolled at Dalhousie University. Stuart Rath, a very involved community member of Colchester County and surrounding area, established The Bearcat Hockey Education Award. Some of Stuarts endeavors are as follows: he serves as the Vice President of Truro Centre Ltd, and the President of Stuco Holdings Ltd. From 1985–1995 Stuart served as the President of Halifax Cablevision Ltd, from 1976-1985 he served as the President and General Manager of Eastern Cablevision, and from 1960-1975 he was the Chairman of the Truro Industrial Society. A few of Stuarts other accomplishments are being Director of Nova Scotia Business Inc. since March 2007, Director of Morien Resources Corp since December 1997, as well as serving as Director of Stuco Holdings Ltd. and Director of Erdene Resource Development Corporation since June 2006 until November 2012.

Eligibility: Available to entering or current technical and undergraduate students at the Faculty of Agriculture. Selection is based on academic performance and the recommendation of the team coaches.

Application Type: Automatic Consideration – No Application Required

Cliff and Grace Retson Memorial Scholarship
The Grace and Cliff Retson Memorial Bursary was first created by Grace in memory of her husband, Cliff Retson who graduated from the AC in 1934. Cliff passed away in 1997. Grace was born in Waskada, Manitoba and grew up in Kerrobert, Saskatchewan. She attended secretarial school in Saskatoon and after retiring, she received her Bachelor of Arts from St. Mary’s University. Grace met Cliff, her husband of 56 years, while she was working at the Senate in Ottawa. They married on July 26, 1941 and moved to Truro in 1947. The Retson’s (Grace & Cliff) hosted several international students studying at the Faculty of Agriculture over the years. It is for this reason and to ensure ongoing support of the educational interests of International students studying at Dal-AC, that Grace created the scholarship.

Eligibility: Available to international students in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, academic performance, and interest in and involvement in multi-cultural activities on campus.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Ira L. Rhodenizer Memorial Scholarship
Ira Rhodenizer was born in 1890 in Parkdale, Lunenburg County, Nova Scotia and lived there for the majority of his life. He served in the Canadian Army from 1914 to 1919 and was wounded overseas during World War I. He later became a farmer, storekeeper, and lumberman in Parkdale, NS. He was greatly interested in community life and was associated with farmer’s organizations for many years. He was married and had seven children. He was a member of the Baptist Church, the I.O.O.F. and Masons. Ira was active in Nova Scotia Guides and Fish and Game Associations, had been a municipal counsellor and President of the Lunenburg Centre Liberal Association. He was a Director of the Nova Scotia Federation of Agriculture and was killed in a car accident on the way to a meeting of this organization in August 1938. The Ira L. Rhodenizer Memorial Scholarship was provided by the Federation as a memorial for his dedication and contributions through the years.
Eligibility: Available to students entering second year of any undergraduate program in the Faculty of Agriculture who are permanent residents of Nova Scotia. Selection criteria include academic performance, involvement in student affairs, and participation in the 4-H program.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $600

Dr. Robert G. Rix Family Farm Scholarship
Robert (Bob) Rix was born in Halifax on July 29th, 1948. Robert graduated from Dalhousie University Dental School in 1974. He practiced in Musquodoboit Harbour, Tmatagouche, and Winsloe, P.E.I., prior to opening his own dental practice in Bible Hill. He took great interest in his profession and knew the family trees of most of his patients and will be fondly remembered by everyone for his excellent dentistry, story-telling, knowledge of American History, love of gardening, tinkering with mechanical items, love of nature and his family. Robert had originally established the “Robert G. Rix Family Farm Bursary” in 1985. Although not having a farm background himself, he shared his beliefs that everyone’s roots are in the land and he felt his way to contribute to the importance of agriculture to our society was through this small bursary each year. A couple years ago, the award became known as the “Dr. Robert G. Rix Scholarship” to allow support to a student where the need was greatest. After Robert’s passing, one of the faculty provided funds to continue the bursary in Robert’s name. Since then, Robert’s family has graciously supported the scholarship to allow his legacy and memory to live on.
Eligibility: Available to students in any undergraduate program in the Faculty of Agriculture who has shown determination and dedication to operating a family farm. Recipients will have demonstrated financial need.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $300

J. Arnold Roberts Memorial Scholarship
The J. Arnold Roberts Memorial Scholarship was created by Elsie Roberts in memory of her husband, Arnold Roberts. Establishing a scholarship in memory of a loved one is a wonderful way to ensure their legacy and memory lives on, and this is what Elsie wished for her late husband.
Eligibility: Available to current students in any year of an undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of one of the Atlantic provinces. Awarded to an outstanding student who is not receiving a scholarship of greater value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Ted Rose Memorial Scholarship
The Ted Rose Memorial Scholarship was created by Mrs. Ann M. Rose in memory of her husband, Ted. Ted had grown up on a dairy farm in Urbania, near Shubenacadie. Ted and his brother Percy ran the farm after the death of their father. Although no one from the family had any connection to the AC, Mrs. Rose had a soft spot for farming, admitting there can be “nothing as rewarding as farming.” Rose wanted to provide a scholarship to a deserving young person who is interested in farming himself someday, while honoring his husband’s memory.
Eligibility: Available to current students in any undergraduate program at the Faculty of Agriculture. Awarded to a student who plans to operate a livestock farm. Selection criteria include financial need, academic performance and a documented commitment to animal welfare.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Rotary Club of Truro International Student Bursary
The Rotary Club of Truro has been part of the fabric of the community of Truro as well as the network of Rotary Clubs around the world since 1926. The Rotary Club of Truro is proud of its years of service and benevolence in the community and internationally. In addition to providing assistance to countless individuals with special needs for medical treatment or equipment over the years, the Club has continued to focus on the needs of children with disabilities. Eligibility: Available to a current international student at the Faculty of Agriculture. Preference will be given to students registered in a program of study and registered full time, with additional preference given to students studying for the full year. Special consideration will be given to students who came from a developing country and plan to return and apply their education there. All students paying the international tuition differential are eligible for consideration. Selection criteria include financial need and potential impact of the bursary on the student’s lifestyle while at school and their future plans.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Rick Russell Memorial Scholarship
Rick Russell passed away Saturday, July 3rd, 2004 after a courageous battle with cancer. After graduating from NSAC, Rick was employed at the College as the swine herdsman for 20 years and then as manager of the fur unit for 4 years. Rick was the coach of the former NSAC Woodsmen Team for 24 years. He
was well respected by both his peers and the athletes he coached. He was always giving of himself and was recognized for his unselfish devotion to the college community by the AC Student population by being given the Student Appreciation Award in 1995. Due to his sincere commitment to NSAC and his community, a scholarship has been created in his memory.

Eligibility: Available to current student athletes in any undergraduate program at the Faculty of Agriculture. Selection criteria include financial need, involvement and leadership in the Woodsmen program, and satisfactory academic performance.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

**Jack Sibley Agriculture Bursary**

This award was established by the John & Judy Bragg Foundation to honour John D (Jack) Sibley. Jack was born in 1937 at Meaghers Grant in Nova Scotia’s Musquodoboit Valley and graduated from Musquodoboit Rural High School in 1954. After receiving a BA from Mount Allison University in 1957 he attended the Nova Scotia Agricultural College and is an alumnus of the Class of 1959. He began his working career as a teacher and then moved on to work for several years as a field manager for McCain Foods. In 1965 he returned to Nova Scotia and spent the next 29 years as a wild blueberry extension specialist with the Department of Agriculture and Marketing. In 1994 he retired from this position and in 1997 began work with WBANA Canada in wild blueberry promotion, retiring in 2011 after a total of 44 years of service to the wild blueberry industry. Jack had a number of part-time careers which included operating his own wild blueberry acreage, working as a musician and MC, and teaching old-time fiddling to children from the Truro area.

Eligibility: Awarded to a full-time technical or undergraduate student at the Faculty of Agriculture who demonstrates financial need.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**Sodhi Memorial Bursary**

This bursary was established by the Sodhi family in memory of Mr. Bhagat S. Sodhi, long-time librarian at the former Nova Scotia Agricultural College. Mr. Sodhi immigrated to Canada in the 1960’s, in search of opportunity for his future family. After meeting and bringing his wife Darshan to Canada, they settled in Truro, NS, and began their family. Mr. Sodhi began working at the former Agricultural College in 1968, when the campus library was housed in Cox Institute. He was instrumental in moving the library to its current location at the MacRae Library, acting as head librarian until 1995. Mr. Sodhi considered the library staff as a second family. As a tribute to his memory, the Sodhi Family established an award in his name upon his passing on June 1st, 2009.

Eligibility: Available to current international students at the Faculty of Agriculture in good academic standing, with preference given to students in undergraduate and technical programs based on financial need. Students in all programs of study are eligible.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

**South House Sexual and Gender Resource Centre Bursary**

The South House Sexual and Gender Resource Centre, formerly the Dalhousie Women’s Centre, was founded in recognition of women and trans people’s common and diverse needs. The South House recognizes that you cannot work for a society free of sexism and patriarchy without also working for a society free of all forms of oppression. The South House supports women and all people dealing with oppression on the basis of sexuality and gender. South House believes in working together for the creation of a society that is vibrant and safe for people of all genders. The funds available will be distributed according to identified need. Bursaries are given out in sums between $25 and $250. Available funds are split between applicants. See http://southhousehalifax.ca/ for an application form.

Application Type: Contact the Department, School, or College for more information

**Sport Leadership Award**

The Sport Leadership Award recognizes a high school varsity athlete enrolling full time in a program of study and planning on participating in a sport at the varsity level at the Faculty of Agriculture.

Eligibility: Available to entering technical or undergraduate students at the Faculty of Agriculture with an admissions average of at least 75%. Recipients of other major entrance scholarships are not eligible. Selection criteria include financial need, sport skills and leadership.

Application Type: Automatic Consideration – No Application Required

**Phillip Stead Memorial Leadership Award**

Phillip Stead graduated from the former Nova Scotia Agricultural College in 1965 with a degree certificate. He left Nova Scotia to complete his BSc. in Animal Science at McGill University and returned in 1967 to begin what was to be a long and successful career with the Nova Scotia Department of Agriculture, working as a sheep specialist with the Animal Industry Branch. In 1972 Phil continued his education by completing a MSc in Agriculture and Nutrition at Virginia Polytechnic Institute and State University. For his passion for community involvement and his long standing contributions to Agriculture, a memorial award has been created in his name.

Eligibility: An award will be presented annually to a student who has exhibited outstanding leadership at the Faculty of Agriculture and/or within the community. Nominations for the award will be received by a committee representing the Student Leadership program at the Faculty of Agriculture and a member of the sponsoring body for the award (Nova Scotia/Newfoundland Holstein Branch). The committee will select an awardee from those nominated who best represents the leadership qualities and performance in the past year or number of years that would be a model for others. Selection criteria may also include academic performance, financial need, and the other awards that have been granted to the nominee.

Application Type: Contact the Faculty for more information

**Captain R. M. Steele Memorial Fellowship**

Captain Richard Steele was a founding member of the Atlantic Chapter of the Rhododendron Society of Canada (RSCAR) and supported the creation of the Atlantic Rhododendron & Horticultural Society. He faithfully attended, and contributed to, meetings and programs. A mentor and friend to many, and with an
international network of plants people, he was a major influence on horticulture, locally and further afield. RSCAR members in the early days established the tradition of the annual Steele Lecture, the objective being to bring a top-ranking plants person to Nova Scotia as a guest speaker. Captain Steele died March 14th 2010.

Eligibility: Awarded to a final year undergraduate student in the Faculty of Agriculture who intends to pursue plant-related studies at the graduate level.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: $1,000

Stewiacke Valley Garden Club Scholarship

Stewiacke Valley is located in the Southern area of Colchester County. The Stewiacke Valley Garden Club is involved in the beautification of the Valley, as the Club is a part of the Nova Scotia Association of Garden Clubs which promote the general landscape beautification of the province. The Club hosts a multitude of events, such as speakers on Horticulture, etc., bake sale events, plant sale events, and more.

Eligibility: Available to students in any undergraduate program at the Faculty of Agriculture. Applicant must be from the Stewiacke Valley area of Nova Scotia. Selection criteria include involvement in extra-curricular and community affairs, financial need, and academic performance.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: $250

Catherine and Alexander Sutherland Bursary

This bursary was established in memory of Victor Sutherland's parents, Catherine and Alexander Sutherland. Born in the 1890s in the area of Earltown, Nova Scotia, Catherine and Alexander operated the Earltown General Store. Over a century later, this store still operates, under other ownership. Alexander also operated a saw mill, while Catherine managed the books and ran the store. In 1939 the family moved to Truro and operated a second store in Bible Hill, near the Nova Scotia Agricultural College. Alexander died in 1943, and Catherine continued to raise their three children. Catherine died in 1972, having lived a very full and satisfying life. Victor Sutherland is an alumnus of the Nova Scotia Agricultural College, Class of 1954. After completing his diploma at the NSAC, now the Dalhousie University Faculty of Agriculture, Victor completed a degree in geology at Acadia University. He spent his career working in the oil and gas industry, including forming his own company, Northrock Resources, in 1986.

Eligibility: Awarded to a full-time Faculty of Agriculture technical or undergraduate student who demonstrates financial need. Preference is given to students who have attended high school in Truro, and then to students who attended high school in Colchester County.

Application Type: Faculty of Agriculture In-Course Award Application

William D. Swetnam Memorial Award

Raised in Port Mouton and Liverpool, NS, William (Bill) Swetnam, graduated from the former Nova Scotia Agricultural College in 1956. Bill discovered what he was destined to do when he purchased a farm in Sheffield Mills, NS in 1958. Throughout his career, Bill dedicated countless hours to many boards. As a founder of the Nova Scotia Turkey Marketing Board he also spent time on the County South and East Livestock Health Services Board, the NS Crop and Livestock Insurance Commission, Canadian Livestock Feed Board Advisors Committee, as well as Nova Scotia Farm Loan Board. Bill also served as president of the Kings County Federation of Agriculture and became a member of the Council of Leaders with the Federation. Bill’s dedication to his community has not gone unnoticed. In 2002 he was honored by the Queen with the Golden Jubilee Medal. Bill has truly distinguished himself in his area of expertise, bringing honour to the former NSAC and the Alumni Association. It is for this reason, an award has been created in his memory.

Eligibility: Available to students entering third or fourth year of the Bachelor of Science (Agriculture) program who have displayed leadership qualities during their program. Applicants must be permanent residents of one of the Atlantic provinces.

Application Type: Faculty of Agriculture In-Course Award Application

Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Value: $2,000

Syngenta Canada Inc. Awards

Syngenta is one of the world’s leading companies with more than 28,000 employees in some 90 countries dedicated to their purpose: Bringing plant potential to life. Syngenta’s mission is to make a difference for smallholders in developing countries. By helping them become more professional growers, they want to achieve added value for rural communities. One way they do that is through technical innovation. Equally important is access to markets, enabling smallholders both to buy inputs and sell their produce. These and other factors are all essential for sustainability successful agriculture.

Eligibility: Available to a technical or undergraduate student in any program in the Faculty of Agriculture. Awarded to students whose course and project work reflect an interest in the Maritime potato industry. Applicants will be required to submit a 300-500 word essay expressing opinion on a topic relating to the crop protection industry. Selection criteria include academic performance, and potato farm experience or background.

Bruce Trenholm/Atlantic ‘86 Scholarship

Bruce was born on the family farm in Grand Pre, Kings County, he graduated from the former Nova Scotia Agricultural College and MacDonald College, receiving his Bachelor of Science Degree in Animal Husbandry in 1947. Upon graduating from MacDonald College he served as the Agricultural Representative in Yarmouth and then taught Animal Husbandry at the former Nova Scotia Agricultural College for three years. In 1952 he took over the family farm going on to establish the well-known Brulo herd. Bruce’s contributions to agriculture have been many and varied and are worthy of recognition in the Atlantic Agricultural Hall of Fame. He had a lifelong interest in Holstein cattle and was Master Breeder and Past President of Holstein Canada. In 1986, the year of Bruce’s death, he coordinated Atlantic ’86 – the Annual National Convention of Holstein Canada. This scholarship was established in his name as an ongoing memorial.

Eligibility: Available to students entering their final year in any undergraduate program at the Faculty of Agriculture. Applicants must be permanent residents of one of the Atlantic provinces, have a Holstein farm or 4-H (Holstein calf project) background. Selection criteria include academic performance and career goals.

Value: $1,000

**Raymond Webber Memorial Scholarship**
Ray was born and raised in Halifax, Nova Scotia. Upon completion of High School, Ray took a business course and worked in an office for the next five years. This soon became boring so Ray entered the “Nova Scotia Agricultural College” (now known as the Faculty of Agriculture) in Truro in 1928. After completing his studies at Truro, he attended MacDonald University in Montreal where in 1931 he received a Bachelor of Science Degree in Agriculture. After graduation, Ray went to work for Canada Agriculture in the Plant Protection Branch in Halifax in an administrative capacity. Due to Ray’s sincere dedication and commitment to Landscape Atlantic, a memorial scholarship has been established in his name to ensure his legacy lives on long into the future.
Eligibility: Available to students entering second year of the Diploma in Technology (Managed Landscapes) program at the Faculty of Agriculture. Selection criteria include academic performance and practical skills.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $800

**Michael Whidden Memorial Award**
Awarded to a student who has provided leadership on the Faculty of Agriculture’s Woodsmen Team, and has maintained a sound academic performance.
Eligibility: Available to current technical and undergraduate students at the Faculty of Agriculture.
Application Type: Automatic Consideration – No Application Required

**Eric Williams Memorial Scholarships**
Born in 1938 Eric P. Williams started farming in 1959 with nine cows and twenty acres. Today the Williams’ family own and operate a two hundred head
Holstein dairy farm in the Goulds and employ a nephew and one other worker. Eric worked hard to introduce supply management for milk producers in Newfoundland. In 1983 he was appointed the first chair of the Newfoundland Milk Marketing Board now known as the Dairy Farmers of Newfoundland and Labrador. During his lifetime he fought to improve the cost of production formula for milk producers in the province. Eric was also nominated by the Dairy Farmers of Newfoundland and Labrador in recognition of his tremendous contributions to agriculture, to become an inductee into the Atlantic Agricultural Hall of Fame. It is for the same reasons that the Dairy Farmers of Newfoundland and Labrador have established a scholarship in his memory for his dedication and commitment to agriculture.

Eligibility: Available to current students who have completed at least one year of study in any technical or undergraduate program in the Faculty of Agriculture. Applicants must be permanent residents of Newfoundland and Labrador. Selection will be based on academic performance. Typically one award is given to a technical student and the other to an degree-seeking student.

Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Zhuhui Ye Memorial Award
This fund was established by classmates of Zhuhui Ye (Kevin) to honour his memory. Kevin attended the former Nova Scotia Agricultural College as part of the FAFU 2+2 program, earning his BSc(Agr) in Aquaculture in 2012. Kevin continued his studies with the Dalhousie MSC. program. On September 8, 2012, Kevin lost his life in a drowning accident at Dollar Lake Provincial Park. Kevin is well remembered as an intelligent, popular, and outgoing man whose generosity touched the lives of many friends. The intent of the Zhuhui Ye Memorial Award is to further the understanding of culture and relationship between Chinese and Canadian students by supporting the FAFU/DAC 2+2 program.

Eligibility: Award to a Chinese student in the FAFU 2+2 program or another student demonstrating a commitment to and involvemnt with the FAFU 2+2 program at the Faculty of Agriculture, in addition to academic performance and financial need.

Faculty of Agriculture Bursaries
The Faculty of Agriculture has established a fund which will provide bursaries to assist students in need of financial assistance. Students in need of financial assistance can apply for a bursary on an ongoing basis throughout the academic year.
Eligibility: Available to current students at the Faculty of Agriculture who have demonstrated financial need and have satisfactory academic standing.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $500

Animal Nutrition Association of Canada (Atlantic Division) Scholarship
The Animal Nutrition Association of Canada (Atlantic) Scholarship was established in 1989 for a student who successfully completes their second year of B.Sc. (Agr.) program. The Animal Nutrition Association of Canada (ANAC) is the national trade association of the livestock and poultry feed industry. The 170 members include feed and ingredient manufacturers and distributors, as well as suppliers of a wide range of goods and services to the feed industry. Taken together, ANAC’s membership represents 90 percent of commercial feed manufactured in Canada.
Eligibility: Available to students entering third year of the Bachelor of Science (Agriculture) program who have demonstrated leadership in student and community affairs, strong academic performance, and who are not receiving other scholarships of higher value.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $1,000

Ralph H. Armstrong Memorial Award
Established in memory of Ralph Armstrong of North Kingston, Kings Co., Nova Scotia. Ralph was well known for his breeding of dual-purpose Shorthorns and marketing of livestock. His prize Shorthorns had been exhibited under the Brookmont Farms name for more than 30 years at Exhibitions throughout Nova Scotia, the Royal Winter Fair in Toronto, and in the 1980 World Shorthorn congress in Calgary. Mr. Armstrong was an honoured member, Secretary and Past President of the Nova Scotia Shorthorn Association, Vice President of the Annapolis County Exhibition, Past Director of the Atlantic Winter Fair and Past Director of the Maritime Shorthorn Association.
Eligibility: Available to former or current 4-H club members from Kings or Annapolis Counties in Nova Scotia who have completed their first year of study in any undergraduate program at the Faculty of Agriculture. Selection is based on financial need and involvement in school, athletic and/or community organizations.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline

Associate Dean’s Scholarship
Established by the Faculty of Agriculture and has built on a proud history of industry-leading education and research.
Eligibility: Available to students entering fourth year of the Bachelor of Science (Agriculture) program. Awarded based on academic merit.
Application Type: Faculty of Agriculture In-Course Award Application
Application Deadline to Apply: Check dal.ca/scholarships for application deadline
Value: $300

Atlantic Council of Crop Life Canada Awards
CropLife Canada is the trade association representing the manufacturers, developers and distributors of plant science technologies, including pest control products and plant biotechnology, for use in agriculture, urban and public health settings. They strive to ensure that the benefits of plant science innovations can be enjoyed by both farmers and consumers. CropLife Canada promotes sustainable agricultural practices and are committed to protecting human health and the environment.
Eligibility: Available to current students in the Diploma of Technology programs in the Faculty of Agriculture. Recipients will be from agricultural backgrounds and plan to pursue employment in the agricultural sector. Preference is given to students whose backgrounds, course and project work, summer employment, and career plans reflect an interest in the crop protection industry.
Application Type: Faculty of Agriculture In-Course Award Application
Atlantic Fertilizer Council Award

Eligibility: Awarded to a student from Atlantic Canada in the second year of a diploma program related to crop protection. Selection criteria include farm interests, leadership qualities within the University community, financial need, and academic performance.
