subject. In addition, a minimum cumulative GPA of 2.70 is required. Potential applicants should consult with one of the Department's Undergraduate Advisors, preferably during their second year of study, and should plan to take the 3000 level classes required for honours during their third year. The Advisor will assist the student to design a program of study with a minor in Social Anthropology or Sociology meeting the general Faculty requirements and the specific requirements for each program as set out below. It is important that students have a strong foundation before undertaking the honours thesis, therefore SOSA 2001 or SOSA 2002, and two of the required 3000 level classes are pre-requisites to the departmental Honours Seminars (SOSA 4000 X/Y or SOSA 4500 X/Y). Students who, after their third year, have not taken the pre-requisite classes may still do honours, but should plan to do so part-time over two years. The honours thesis paper is produced for the class SOSA 4500X/Y.06 (Sociology) or SOSA 4000.06 (Social Anthropology). This fulfills the College of Arts and Science Honours Qualifying Examination requirement. Students with the honours concentration in Sociology may not declare Social Anthropology as their secondary subject; students with the honours concentration Social Anthropology may not declare Sociology as their secondary subject.

### Departmental Requirements

#### Classes required in Concentrated Honours in Social Anthropology:

##### 1000 level

- One of: SOSA 1000.06, 1050.06, 1100.06, 1200.06, both 1002.03 and 1003.03 or King's Foundation Year Program

##### 2000 level

- SOSA 2001.06 or 2002.06
- At least one additional 2000 level credit

##### 3000 level

- SOSA 3400.03
- SOSA 3402.03
- SOSA 3403.03

##### 4000 level

- SOSA 4000.06
- SOSA 4003.03
- A minimum of one additional SOSA 4000 level seminar (0.5 credit)

In total a minimum of nine and a maximum of 11 SOSA credits beyond the 1000 level are required.

#### Classes required in Concentrated Honours in Sociology:

##### 1000 level

- One of: SOSA 1000.06, 1050.06, 1100.06, 1200.06, both 1002.03 and 1003.03 or King's Foundation Year Program

##### 2000 level

- SOSA 2001.06 or 2002.06
- At least one additional 2000 level credit

##### 3000 level

- SOSA 3401.03
- SOSA 3402.03
- SOSA 3403.03
- SOSA 3405.03

##### 4000 level

- SOSA 4001.03 or 4003.03
- SOSA 4500X/Y.06
- A minimum of one additional SOSA 4000 level seminar (0.5 credit)

In total a minimum of nine and a maximum of 11 SOSA credits beyond the 1000 level are required.

NOTE: Students considering graduate work in Sociology are strongly advised to take SOSA 4002.03: Quantitative Analysis for the Social Sciences II, since intermediate statistical competence is often required as a component of graduate social science programs.

## B. Combined Honours in Sociology or Social Anthropology and another field

The requirements noted below normally apply. In some cases a variation may be allowable when approved by honours advisors in both departments, for example when a similar class is required by both departments.

**Classes required in Combined Honours with Sociology as the primary subject:**

### 1000 level

- One of: SOSA 1000.06, 1050.06, 1100.06, 1200.06, both 1002.03 and 1003.03 or King's Foundation Year Program

### 2000 level

- SOSA 2002.06 (recommended) or 2001.06

### 3000 level

- SOSA 3401.03
- SOSA 3402.03
- SOSA 3403.03
- SOSA 3405.03

### 4000 level

- SOSA 4001.03 (recommended) or 4003.03
- SOSA 4500.06
- A minimum of one additional SOSA 4000 level seminar (half credit) excluding SOSA 4211.03

In total, a minimum of 11 and maximum of 14 credits beyond the 1000 level in the two honours subjects with a grade of "C" or better. Of this, at least five credits must be in the other honours subject.

**Classes required in Combined Honours with Social Anthropology as the primary subject:**

### 1000 level

- One of: SOSA 1000.06, 1050.06, 1100.06, 1200.06, both 1002.03 and 1003.03 or King's Foundation Year Program

### 2000 level

- SOSA 2001.06 (recommended) or 2002.06

### 3000 level

- SOSA 3400.03
- SOSA 3402.03
- SOSA 3403.03

### 4000 level

- SOSA 4003.03
- SOSA 4000.06
- A minimum of one additional SOSA 4000 level seminar (half credit) excluding SOSA 4211.03

In total, a minimum of 11 and maximum of 14 credits beyond the 1000 level in the two honours subjects with a grade of "C" or better. Of this, at least five credits must be in the other honours subject.

**Classes required in Combined Honours with Sociology or Social Anthropology as the secondary subject:**

### 1000 level

- One of: SOSA 1000.06, 1050.06, 1100.06, 1200.06, both 1002.03 and 1003.03 or King's Foundation Year Program

### 2000 level

- SOSA 2001.06 or 2002.06

### 3000 level

- For Sociology: one of SOSA 3401.03, 3402.03, 3403.03 or 3405.03
- For Social Anthropology: one of SOSA 3400.03, 3402.03, 3403.03

In total, a minimum of 11 and maximum of 14 credits beyond the 1000 level in the two honours subjects with a grade of "C" or better. Of this, at least five credits must be in SOSA classes.

## C. Honours Conversion in Sociology or Social Anthropology

This program permits Dalhousie graduates to undertake an additional five credits upgrading their qualifications from the 15 credit BA to Honours. Students must meet the usual conditions for admission to honours, and complete the full set of Honours requirements in either Sociology or Social Anthropology. Interested students should consult an Undergraduate Advisor. Students with a 20 credit major may also upgrade to honours.

## D. BA (20 credit) Major in Sociology and Social Anthropology

### Departmental requirements

#### 1000 level

- One of: SOSA 1000.06, 1050.06, 1100.06, 1200.06, both 1002.03 and 1003.03 or King's Foundation Year Program

#### 2000 level

- Either SOSA 2001.06 or 2002.06
- At least one additional 2000 level credit

#### 3000/4000 level

- Total of three full SOSA credits, including at least one half credit at the 4000 level

In total a minimum of six and a maximum of nine SOSA credits beyond the 1000 level are required.

## E. BA (20 credit) Double Major in Sociology and Social Anthropology

Students must obtain at least 10 and no more than 14 credits beyond the 1000 level in two allied subjects, with no fewer than five and no more than eight in either.

### Departmental requirements

#### 1000 level

- One of: SOSA 1000.06, 1050.06, 1100.06, 1200.06, both 1002.03 and 1003.03 or King's Foundation Year Program

#### 2000 level

- Either SOSA 2001.06 or 2002.06
- At least one additional 2000 level credit

#### 3000/4000 level

- Two full SOSA credits at the 3000 level or above

## F. BA (20 credit) Major in Sociology and Social Anthropology Conversion

This program permits Dalhousie graduates to undertake an additional year of study upgrading their qualifications from the 15 credit BA to the 20 credit BA. Students must meet the full set of Major requirements.

## G. BA (15 credit) Minor in Sociology and Social Anthropology

See requirements for minor below.

## H. Minor in Sociology and Social Anthropology

### Departmental Requirements

#### 2000 level

- Either SOSA 2001.06 or 2002.06
- At least one additional 2000 level credit

#### 3000 level

- One full SOSA credit

In total, three to four and a half SOSA credits beyond the 1000 level are required.

## I. Minor in Sociology and Social Anthropology of Critical Health Studies

This minor requires three full credits (18 credit hours) above the 1000 level from the list below. PLEASE NOTE THAT ONLY A SOME OF THESE CLASSES WILL BE OFFERED IN ANY GIVEN YEAR. Students may pick any classes from the following list.

- SOSA 2001.06: Ethnography in Global Context OR SOSA 2002.06: The Sociological Perspective (only one of these two may be included in the minor)
- SOSA 2401.06: Food and Eating Across Cultures
- SOSA 2400.06: Health and Illness Across Cultures
- SOSA2502.03: Biomedicine and the Illness Experience
- SOSA2501.06: Sociology of Health and Illness
- SOSA 3135.03: The Social Organization of Health Care
- SOSA 3143.03: Health, Illness and the World System
- SOSA 3145.03: Gender and Health
- SOSA 3147.03: Social Gerontology
- SOSA 3148.03: Drugs, Health and Society
- SOSA 3149.03: Childhood in Cross Cultural Perspective
- SOSA 3150.03: Sociology and Anthropology of the Body
- SOSA 3245.03: Women and Aging
- SOSA 3250.03: Beyond Genes and Circuits: The Anthropology and Sociology of Technoscience

## J. Minor in the Sociology and Social Anthropology of Social Justice & Inequality

This minor requires three full credits (18 credit hours) above the 1000 level from the list below. PLEASE NOTE THAT ONLY A SOME OF THESE CLASSES WILL BE OFFERED IN ANY GIVEN YEAR. Students may choose from the following classes:

- SOSA 2001.06: Ethnography in Global Context OR SOSA 2002.06: The Sociological Perspective (only one of these two may be included in the minor)
- SOSA 2041.03: Describing Social Inequality
- SOSA 2042.03: Explaining Social Inequality
- SOSA 2115.03: African Canadian Society, Culture and Resistance
- SOSA 2180.06: Crime and Criminal Justice
- SOSA 2181.03: Explaining Crime and Criminal Behavior
- SOSA 2182.03: Exploring Crime and Criminal Behavior
- SOSA 2190.06: Comparative Perspectives on Gender
- SOSA 2260.03: Society, Politics, and Culture
- SOSA 3002.03: Native Peoples of Canada
- SOSA 3006.03: Comparative Perspectives on Gender and Work
- SOSA 3015.03: Popular Memory SOSA 3100.03: Feminist Perspectives in Sociology and Anthropology
- SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America
- SOSA 3190.03: Social Movements
- SOSA 3206.03: Ethnicity, Race and Nationalism
- SOSA 3215.03: Migration and Identity
- SOSA 3225.03: Culture, Rights and Power SOSA 3275.03: Crime and Public Policy SOSA 3283.03: Globalized Security and Justice: the Challenge of Global Crime and Terrorism
- SOSA 3285.03: Sociology of Law
- SOSA 3295.03: Society and the Police

## K. Minor in the Sociology and Social Anthropology of Economy, Work and Development

This minor requires three full credits (18 credit hours) above the 1000 level from the list below. PLEASE NOTE THAT ONLY A SOME OF THESE CLASSES WILL BE OFFERED IN ANY GIVEN YEAR. Students may choose from the following classes:

- SOSA 2001.06: Ethnography in Global Context OR SOSA 2002.06: The Sociological Perspective (only one of these two may be included in the minor)
- SOSA 2111.03: Is there an Atlantic Canada?
- SOSA 2140.03: Going Global; Geography, Economy, and Work in the 21st Century
- SOSA 2141.03: Good Jobs, Bad Jobs
- SOSA 2270.03: Introduction to Popular Culture
- SOSA 2271.03: Popular Culture in a Global Context
- SOSA 2401.06: Food and Eating Across Cultures
- SOSA 3005.03: Knowledge, Work and Culture in the Contemporary World
- SOSA 3006.03: Comparative Perspectives on Gender and Work

- SOSA 3014.03: Rethinking Culture and Class
- SOSA 3060.03: Social Change and Development
- SOSA 3096.03: Introduction to Demography
- SOSA 3165.03: Peoples and Cultures of the World: Selected Area Studies
- SOSA 3168.03: Issues in Latin American Society
- SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America
- SOSA 3200.03: Environmental Anthropology SOSA 3211.03: Continuity and Change in Rural Societies SOSA 3214.03: Living in a Globalized World SOSA 3215.03: Migration and Identity SOSA 3284.03: Living in Cities SOSA 3310.03: Indian Society: Change and Continuity

## III. Class Descriptions

Some classes listed may not be offered in a given academic year. Consult the timetable for details. Where prerequisites apply, students requesting exceptions must obtain permission directly from the instructor involved.

Note:

1. Enrolment in 4000 level classes is restricted to Honours and Major students in their fourth year of study.
2. No more than one credit may be obtained for introductory classes from SOSA 1000.06, 1050.06, 1100.06, 1200.06 or both 1002.03 and 1003.03.
3. King's Foundation Year Program satisfies the introductory class prerequisite.

### SOSA 1002.03: People and Culture.

The course is an introduction to both anthropology and sociology. It presents to the students the research field that both scientific disciplines share in common: how humans organize themselves in groups, be it tribes or states, and how group organization affect individual lives. For this purpose, the course proceeds to explain and apply a series of fundamental concepts like culture, socialization, institutions, stratification, and so forth. Students also explore the various dimensions of social life, either in Canada or abroad: from politics to religion, from economy to sexuality.

FORMAT: Lecture

EXCLUSION: SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06, 1200X/Y.06

### SOSA 1003.03: People and Society.

This course builds on the material developed in SOSA 1002 though the latter is not a requirement for students. By making use of the basic concepts in anthropology and sociology, students examine specific empirical cases relevant for the scientific study and understanding of human activities in the world today. Topics may include: control and deviance, gender and health, racial and ethnic inequality, self and identity, work and organization, globalization, and so on.

FORMAT: Lecture

EXCLUSION: SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y, 1100X/Y.06, 1200X/Y.06

### SOSA 1050X/Y.06: Explorations in Culture and Society.

What are culture and society? How do we study and understand them? In beginning to answer these questions, the class introduces students to the key concepts, perspectives and methods of sociology and social anthropology. Taking examples from Canada and around the globe, we will look at such topics as beliefs, values, power, social structure, economy and more. This class fulfills the first-year writing requirement. It also satisfies the prerequisite for enrolment in upper level classes in sociology and social anthropology.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: ✍ Writing Requirement, lecture

EXCLUSION: SOSA 1000X/Y.06, or 1002.03/1003.03, 1100X/Y.06, or 1200X/Y.06.

### SOSA 1100X/Y.06: Introduction to Anthropology.

Social anthropologists study cultural diversity in western and non-western societies. Often living among the people they study, anthropologists attempt to understand the structures that shape and constrain peoples' lives, and the ways in which people make sense of their changing circumstances. Classic studies focused on rural people in the developing world (hunter-gatherers, pastoralists, peasants). Contemporary studies are just as likely to focus on development, migration, artists, boardroom rituals or street gangs. Theories and methods from anthropology can be applied to a wide range of academic and practical settings including development, politics, economics, health, law, art, and human rights.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

EXCLUSION: SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06 and 1200X/Y.06

### **SOSA 1200X/Y.06: Introduction to Sociology.**

This class introduces students to basic sociological concepts, the logic of social inquiry, and major theoretical and methodological issues in the field. Substantive class contents may include the study of culture, socialization, deviance, social organizations, institutions, social roles, and demography. Emphasis is on the study of modern industrial societies with special attention given to Canadian society.

NOTE: Students taking this class must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture

EXCLUSION: SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06 and 1100X/Y.06

### **SOSA 2001X/Y.06: Ethnography in a Global Context.**

Ethnography describes how people conduct their lives in a particular time and place. This class examines the challenge, complexity, strengths, and limitations of ethnographic knowledge and writing in Social Anthropology. Students will learn about a number of different ethnographic settings which may vary from year to year. A selection of ethnographies, films, autobiographical writing, and critical commentaries will be used to reveal how social anthropologists generate ethnographic knowledge about past and present societies, and why research priorities shift. Approved with International Development Studies.

NOTE: Students taking this class must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

### **SOSA 2002X/Y.06: The Sociological Perspective: Thinking and Doing Sociology.**

Sociologists are interested in understanding the social world. They do not rely on preconceived ideas alone to enrich this understanding, but see the need to conduct studies, carry out investigations, make observations, analyze findings, formulate ideas, and construct theories and interpretations about what they find. This class looks at the ways sociologists go about their work. What are some of the dominant ways of thinking current in sociology today? What are the relationships between such ways of thinking and what are seen as questions to investigate? How do sociologists do their research? What are social surveys, interviews, theories, sociological ideas? What is distinctive about a sociological way of looking at a problem?

NOTE: Students taking this class must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

### **SOSA 2004.03: Current Controversies.**

This course will examine current social problems, puzzles and controversies. It will introduce perspectives to explore and understand social fads, critical events, and social debates. Readings and assignments will look at issues like the rise of social networking media, environmental disasters, and contemporary controversies, such as, austerity measures, same-sex-marriage, immigration, and abortion, among others.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1002.03 and 1003.03, 1050X/Y.06, 1100X/Y.06, or 1200X/Y.06

### **SOSA 2041.03: Describing Social Inequality.**

This course examines inequality in practice. The focus will be on applying understandings of inequality to empirically describe cases of injustices in order to look at measures, practices, and policies regarding inequality. The evidence used to describe inequality will be critically examined through theoretical considerations. Possible topics to be covered in readings and assignments include economic, social, cultural, political and health inequalities among other contemporary issues of social justice.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1002.03 and 1003.03, 1050X/Y.06, 1100X/Y.06, or 1200X/Y.06

EXCLUSION: SOSA 2040X/Y.06

### **SOSA 2042.03: Explaining Social Inequality.**

This course examines various perspectives on inequality. It will examine how various forms of social inequality emerge and persist. The focus will be on the unequal distribution of wealth and sources of social power. Readings and assignments will focus on theories and explanations of inequality as well as historical and contemporary cases, including class, ethnicity, race, nation, region, gender, orientation and other manifestations of inequality.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1002.03 and 1003.03, 1050X/Y.06, 1100X/Y.06, or 1200X/Y.06

EXCLUSION: SOSA 2040X/Y.06

### **SOSA 2045.03: Indian Society: Change and Continuity.**

The objective of this half-credit class is to introduce students to the society and culture of India from an interdisciplinary perspective. India presents a society of enormous complexity and an unbroken living civilization of great antiquity. The focus of the class will be on selected, significant aspects of Indian society with particular emphasis on issues of current relevance. Topics discussed include: a historical background, social structure, political and social constraints to economic development, health issues, major religions and philosophy, development and foreign policy since independence, science and technology, disaster relief and development, and literature. This class counts as a half-credit in Sociology and Social Anthropology towards the IDS established discipline requirement.

INSTRUCTOR(S): Staff

FORMAT: Lecture

CROSS-LISTING: INTD 2045.03

EXCLUSION: INTD 3045.03

### **SOSA 2090X/Y.06: Youth and Society.**

Events of enormous future consequences occur in the period between childhood and adulthood. Competing sociological and anthropological arguments try to explain the nature of the relationships between youth and society. This course critically examines the arguments, with special focus on assessing the empirical evidence that might be used to support or refute them. That is, the context of youth will be used to illuminate the connections between argument and evidence, theory and data. Although the emphasis is on youth in Canadian society, a comparative perspective will be employed.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200X/Y.06

### **SOSA 2101.03: Environment and Culture.**

Concern about the environment is an increasingly widespread phenomenon as more people and confront their relationship to a changing ecology. Environmental issues like pollution, global warming, or resource depletion, have global as well as personal implications. The efforts of cities to deal with environmental pollution, for example, may lead to conflicts with rural regions, and changes in consumption patterns in one country may have consequences for the environment of other countries. This class will explore key relationships between human culture and the physical environment. Topics to be examined may include: environmental knowledge, food and agriculture, environmental ethics, health, resource management and conservation.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06, or 1200X/Y.06

EXCLUSION: SOSA 2100.06

### **SOSA 2102.03: Political Ecology.**

Environmental issues, like all things involving human societies, are always political issues. Whether we are talking about who gets to use a resource, or who has to clean up afterwards, environmental actions always have consequences for other aspects of people's lives, and therefore the possibility for disagreement. The course will examine those phenomena where traditionally political questions about the distribution of resources or power within a society overlap with environmental questions, and where struggles over environmental protection or regulation intersect with struggles to control group life. Topics covered may include competition over resources, the politics of environmental regulation, the social and historical conditions that give rise to environmental disagreements, or the ways that different plans for mitigating climate change affect global power dynamics.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06, or 1200X/Y.06

EXCLUSION: SOSA 2100.06

### SOSA 2111.03: Is there an Atlantic Canada?

This course will examine the historical and contemporary social issues related to the Maritimes and Atlantic Provinces. The course will critically question what is meant by "Atlantic Canada" and look at its social, demographic, economic, and cultural trends in relation to the rest of the country. Attention will be given to the role of Acadians, Mi'kmaq, and African Nova Scotians as well as dominant power holders in the construction of Atlantic Canada.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06, or 1200X/Y.06

CROSS-LISTING: CANA 2111.03

### SOSA 2115.03: African Canadian Society, Culture, and Resistance.

There has been a presence of African peoples in Canada for over 400 years; however, the rich histories of African-Canadian people have been often ignored. This course examines African Canadian society and culture from the historical to contemporary period. Topics will include historical analyses, slavery, patterns of immigration and settlement, family, continental African and diasporic connections, identity, arts and culture, education, employment, justice and the law, the media, diasporic debates, Black struggles and resistance, and African Canadian achievements. The course will be taught from a critical race and gender perspective, and will include readings about the diverse Black communities across Canada. There has been a presence of African peoples in Canada for over 400 years; however, the rich histories of African-Canadian people have been often ignored. This course examines African Canadian society and culture from the historical to contemporary period. Topics will include historical analyses, slavery, patterns of immigration and settlement, family, continental African and diasporic connections, identity, arts and culture, education, employment, justice and the law, the media, diasporic debates, Black struggles and resistance, and African Canadian achievements. The course will be taught from a critical race and gender perspective, and will include readings about the diverse Black communities across Canada.

CROSS-LISTING: CANA 2115.03

### SOSA 2140.03: Going Global; Geography, Economy, and Work in the 21st Century.

This course will explore the economic, industrial and organizational transformations which have affected world economies since the 1980s. The spatial reorganization of the international division of labour has led to "world cities", and rural concentration and depopulation, as well as exploitative economic enclaves as endpoints in global commodity chains. The emergence of an increasingly integrated international economic order are associated, in the advanced economies, with a shift from manufacturing, for which automobile production has been the standard example, to a service-dominated economy, ranging from financial services, internet development and movie and music creation, to fast food chains and mass tourism. This industrial transformation has been accompanied by shifts in organizational structures, whether the emphasis has been on increased operational flexibility, or downsizing, one is continuously faced with the impact of new information technologies on the workplace. Does the electronic storage and transmission of information create acceptable efficiencies, or do they represent new methods for controlling and exploiting an increasingly vulnerable workforce, particularly lower-class women and/or immigrants? This course will employ the relevant portions of a standard Canadian sociological text to evaluate main tendencies, while selected anthropological case studies from different places will help understand the specific dynamics of a new, world economy."

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200X/Y.06

### SOSA 2141.03: Good Jobs, Bad Jobs.

The course will focus on the new forms of post-industrial work are at the core of the advanced economies. While traditional jobs in the primary sector (fishing, farming, forestry), and in manufacturing are still components of contemporary societies, the attractive new work in the information economy, as well as the less desirable employment available in the low end service jobs, are the new prospects

we face. In addition, the intensified use of information technology has stripped away employment prospects, and is associated with increasing levels of unemployment, or with the double-edged transfer of paid work to the home. Higher rates of unemployment challenge the notion of increased leisure time in a materially abundant system, while changing gender relations reshape the meaning of unpaid work in the household.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06, or 1200X/Y.06

### SOSA 2181.03: Explaining Crime and Criminal Behavior.

What is crime, why do rates of crime vary, why do people commit crimes and how do social, cultural, psychological and biological theories and research findings explain crime as social and behavioral phenomena? Criminology is an interdisciplinary attempt to answer these questions through the social scientific study and analysis of crime and criminal behavior. This class introduces students to a broad variety of critical thinking, disciplinary theories, research studies and social policies, in order to help you understand and explain crime and show how these understandings inform the policies and politics designed to manage and prevent crime. This class provides a general but primarily sociological understanding of crime.

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

EXCLUSION: SOSA 2180X/Y.06

### SOSA 2182.03: Exploring Crime and Criminal Behavior.

Though this is a stand-alone course it builds on the exploration of theories of crime addressed in 2181.03 and applies them to various "types" of crime and criminal behavior in Canada and elsewhere. This course pulls together various sources of knowledge to provide description and analysis of various patterns and types of crime and explores how this knowledge is being applied in specific policies and practices aimed at managing and preventing crimes: typically by the criminal justice system. The course content covers Violent crimes such as murder, sexual assault, domestic violence, robbery and gang violence; Property crimes such as burglary and motor vehicle theft; Organized crime, White Collar and Corporate crime and new forms of Global crime such as narco trafficking; human and arms smuggling and money laundering.

NOTE: Approved with Law and Society Minor.

PREREQUISITE: One of SOSA 1000 X/Y.06, or 1002.03/1003.03, 1050 X/Y.06, 1100 X/Y.06 or 1200 X/Y.06 or SOSA 2181.03

EXCLUSION: SOSA 2180X/Y.06

### SOSA 2190X/Y.06: Comparative Perspectives on Gender.

Applying theoretical perspectives drawn from anthropology and sociology, this class considers the underlying conditions for and consequences of gender inequalities in different historical & cultural contexts. The class begins with an overview of the study of gender relations in anthropology and sociology. Themes around which the class will be organized include the relationship between gender and the following: culture and difference; sexuality and reproduction; labour; gender politics, power relations and political discourse; and gender in the global political economy. Approved with International Development Studies.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSS-LISTING: GWST 2800X/Y.06

### SOSA 2221X/Y.06: Society and the Self.

Groups influence individuals and individuals react to these influences. This is the field of Social Psychology. The processes involved in such person-group relationships are explored in a number of different settings, such as the family, mental hospitals, and universities. The class will focus on a critical review of research and theorizing.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06, or 1200X/Y.06

EXCLUSION: SOSA 2220.03

### **SOSA 2260.03: Society, Politics, and Culture.**

SOSA 2260: Society, Politics and Culture

You may not think of yourself as political but power is a process of everyday life. Although it is often assumed to be located in economic and political institutions, it is also important to consider that “the personal is political” and this too contributes to the negotiation of power. This course will explore how social processes affect and are shaped by material, institutional, and normative pressures. Contemporary examples of the intersection of these social forces will show how sociology and social anthropology can be used to identify otherwise hidden relationships.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06, or 1200X/Y.06

### **SOSA 2270.03: Introduction to Popular Culture.**

In this course, we will examine and discuss the various approaches and theories of popular culture in anthropology and sociology. Popular culture has been defined in multiple ways and attached to multiple objects and activities in society. We will consider how human beings take part in popular culture on one hand and how popular culture affects the rest of their lives on the other hand. Related themes include consumption, media, technology, communication, identity, ideology, stratification.

FORMAT: Lectures

PREREQUISITE: SOSA1000X/Y.06, or 1002.03/1003.03, SOSA1050X/Y.06, SOSA1100X/Y.06, SOSA1200X/Y.06

### **SOSA 2271.03: Popular Culture in a Global Context.**

The course explores many different theories and manifestations of popular culture in a wide range of contexts. Popular culture as it intersects with films, television, Internet, magazines, comics, cartoons, fashion, sports, music, etc., provides a rich platform for consideration of how popular culture influences individuals in their lives while simultaneously being shaped by those same individuals and their cultural contexts. We will also explore how individuals take on different roles in the production and consumption of popular culture.

PREREQUISITE: One of SOSA 100X/Y.06, SOSA 1002.03 and 1003.03, 1050X/Y.06, 1100X/Y.06, or 1200X/Y.06

### **SOSA 2291X/Y.06: Goblins, Ghosts, Gods, Gurus.**

Societies and groups within societies differ in terms of what their members believe, how people view the world and their place within it, the sources of knowledge, attitudes toward the supernatural and the sacred, the status and authority of different sources of knowledge and what it all means. What makes religion different from science? What makes them similar? What is commonsense? What are magic and witchcraft? What are the relations between belief and actions? What is the status of religious authority and power? What are altered states of consciousness? What are religious groups all about? Why do people belong to them, join them, leave them? What is involved in conversion and commitment? This class considers such questions drawing on a wide variety of societies, cultures, and groups, western and non-western.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1050X/Y.06, SOSA 1100X/Y.06 or SOSA 1200X/Y.06

CROSS-LISTING: RELS 2291.06

### **SOSA 2300X/Y.06: Introduction to Social Problems.**

The study of social problems uses sociological theory and research to examine the social dynamics and consequences of a variety of contemporary issues. Though the class content will vary year by year, students can expect to deal with social problems such as poverty, drug abuse, gender and race relations, work and alienation, and environmental issues.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

### **SOSA 2400X/Y.06: Health and Illness Across Cultures.**

Every culture has its own concepts of health and nutrition, its own treatments and practices. The strengths and weaknesses of our own system grow clearer when medical anthropologists compare it with that of other societies. This class's specific topics vary from year to year but always include: native theories of the etiology of illness, transcultural versus culture-specific disease syndromes, pregnancy and childbirth in other cultures and our own; senescence and death viewed cross-culturally, the conflict between traditional medical systems and the

Western physician and hospital, patients' expectations and the medical subculture, the physician as secular priest, and food and nutrition across cultures. Approved with International Development Studies.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

### **SOSA 2401X/Y.06: Food and Eating Across Cultures.**

Our bodies determine nutrition, our environments limit what may be available, and our cultures decide what is to be considered "food." This class is an introduction to the anthropology and sociology of food. Topics include evolution and human nutrition, social change and food, famine and the world food system, food in contemporary film, food taboos, age and gender differences in food prescriptions and proscriptions, dieting and obesity, cannibalism, the symbolic meaning of eating and food, and vegans vs. carnivores. Approved with International Development Studies.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200X/Y.06

### **SOSA 2402.03: Food Through Time and Space.**

In this course we examine the concept of "food" through time and space. We explore topics such as ancient food entitlements, foodways, classification systems, concepts of nutrition, and how culture and social location shape food practices and beliefs.

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1050X/Y.06, 1100X/Y.06, SOSA 1200X/Y.06

EXCLUSION: SOSA 2401X/Y

### **SOSA 2403.03: Food Activism.**

In this course we will explore food movements and alternative food practices, especially in relation to the modern food system. We will discuss the key characteristics and critiques of the food system and focus on case studies of cultural practices and food activism from around the world which challenge or provide alternatives to the current food system.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1050X/Y.06, SOSA 1100 X/Y.06, SOSA 1200 X/Y.06

EXCLUSION: SOSA 2401X/Y.06

### **SOSA 2502.03: Biomedicine and the Illness Experience.**

This course provides an introduction to the sociology of medicine, patienthood, and practitioner-patient relationships. The course is organized into two sections. The first section analyses the theory and practice of medicine, our society's dominant system for addressing health problems. In the second section, we examine illness and the experience of receiving medical care. We will cover such topics as: the biomedical model; medical school; the experience of chronic illness; medical science and technology; models of the doctor-patient relationship; and mental illness.

INSTRUCTOR(S): Staff

FORMAT: Lecture

EXCLUSION: SOSA 2501X/Y.06, SOSA 2500.03

### **SOSA 2503.03: Health and Society.**

This course examines the social foundations of health and illness, community responses to health problems, and the structure of health care in Canada and internationally. Topics to be covered include: morality and health, social inequality and the political economy of health and health care, the multinational pharmaceutical industry, environmental health, and the development of and 'crisis' in the Canadian Medicare system.

EXCLUSION: SOSA 2501.03

### **SOSA 2993.03: Health and Illness through Cultural Time.**

This course explores health illness and aetiology through culture and time with a focus on ancient and pre-capitalist societies. Topics may vary from year to year but we will invariably explore different ensibilities of what it meant to feel healthy and "well" through an examination of religion, culture and efficacy; cultures of colours, smells; tastes and health and wellness (proxemics; kinetics-how wellness, health and illness are embodied through time, space and culture); narratives of

health (literature, poetry, music, oral genres); pregnancy; birth and rearing of children; senescence and death and the morality of care. The weaknesses and strengths of our own system become clear when medical anthropologists compare it with the science and health systems of other societies.

FORMAT: Lectures

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06, SOSA 1002 and 1003, (must have both sections),

EXCLUSION: SOSA 2040X/Y.06

### **SOSA 2996.03: Health and Illness through Culture and Space.**

Every culture has its own concepts of health and nutrition, its own treatments and practices. This course explores health aetiologies through contemporary culture and space. Topics may vary from year to year but we invariably will learn about contemporary cultures around the world in relation to sensibilities of what it means to feel healthy and “well” in the content of rapid economic and social change. We will explore religion, culture and efficacy; cultures of colours, smells; tastes and health and wellness (proxemics; kinetics-how wellness, health and illness are embodied through time, space and culture); narratives of health (poetry, music, oral genres); pregnancy; birth and rearing of children; senescence and death; the content of public health systems and the extent to which they incorporate these practices and beliefs. The weaknesses and strengths of our own system become clear when medical anthropologists compare it with the science and health systems of other societies.

FORMAT: Lectures

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06, SOSA 1002 and 1003, (must have both sections)

EXCLUSION: SOSA 2400X/Y.06

### **SOSA 3002.03: Native Peoples of Canada.**

This class uses an ecological perspective to describe the cultures and peoples occupying Canada at the time Europeans came to this continent. As time permits, some ethnohistory and the situation of contemporary Native peoples is also discussed. Films will be used to supplement lectures and readings. Approved with Canadian Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

EXCLUSION: SOSA 2350.03

### **SOSA 3005.03: Knowledge, Work and Culture in the Contemporary World.**

Since the publication of Daniel Bell's book, *The Coming of Postindustrial Society*, studies of the economic structure of the advanced societies have addressed the question of the extent to which we are living through a transition to a new, knowledge-driven economy which may be qualitatively distinguished from the system of industrial capitalism which has characterized North America and western Europe for most of this century. Whether one uses terms like “postindustrialism”, “postmaterialism” or “postmodernism”, debates have centered on the question of fundamental alterations in the economic, cultural and political organization of technologically advanced societies. Are we witnessing the creation of an “information economy”, are we observing the emergence of a new “knowledge class”, which rules by virtue of its educational skills and credentials, is there a new underclass being excluded from paid employment of any form, and is government being privatized to facilitate new forms of global economic integration? Are new types of social movements arising in response to basic changes in our society? This class will address the above questions, with particular emphasis being devoted to discuss issues in contemporary political economy.

FORMAT: Lecture

PREREQUISITE: SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06, or 1200X/Y.06

### **SOSA 3006.03: Comparative Perspectives on Gender and Work.**

This class will use comparative perspectives to explore a range of topics relating to the gendering of work- wage-work, household-based labour, the informal sector, masculinity and femininity in the work place, occupational segregation, employment policies directed at changing the status quo (such as affirmative action, pay equity), and unionization. The context will be the changing global political economy and its consequences for the strategies of different groups (such as nation states, but also trade unions, feminist groups and employer groups). Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSS-LISTING: GWST 3006.03

### **SOSA 3008.03: Canadian Society and Politics.**

This class about the nature of Canadian society has as its focus the study of structures and events which shape social and political organization in Canada. There is not only one way to understand Canadian society: generations of historians, political scientists and economists have provided valuable insights as to why Canadians have believed or acted or voted in one way or another. Sociology and Social Anthropology have helped to understand Canada in terms of contexts and conditions of life which have shaped the evolution of society as we know it. The class explores issues, events, discontents and groups which have produced the recurrent themes that underlie social life in Canada.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

RECOMMENDED: SOSA 2110 or another course on Canadian society and/or politics.

CROSS-LISTING: CANA 3008.03

### **SOSA 3009.03: Public Opinion in Canada.**

This class will introduce students to the study of public opinion in Canada and impact on informed decision making. In particular, the focus will be upon ideas and issues which have been held by groups and been influenced by the media. The lectures would explore the basis of our knowledge about the formation and change of public opinion relative to other forms of collective behaviour. We will present and analyze data relating to the role of public opinion in explaining and predicting political events.

FORMAT: Lecture

PREREQUISITE: SOSA 1000X/Y.06, or 1002.03/1003.03, 1100X/Y.06, 1050X/Y.06 and 1200X/Y.06

CROSS-LISTING: CANA 3009.03

### **SOSA 3013.03: Religion in Contemporary Society.**

Religion is alive and well in society today; some religious organizations are in decline but others appear to be flourishing. How can these tendencies be accounted for? Do we live in a secular age or is that just a flip expression? What does religion mean to people in contemporary society? Is there a search going on for spiritual growth, spiritual awareness, spiritual expression? If so, what forms does this search take? What can we learn by thinking about religion sociologically? What are the trends in religion telling us about the character of late twentieth century society?

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, RELS 1000.06, or permission of the instructor

CROSS-LISTING: RELS 3013.03

### **SOSA 3014.03: Rethinking Culture and Class.**

Critical cultural studies has become a vigorous focus of interdisciplinary scholarship drawing on the fields of history, anthropology, sociology, geography, and literary criticism. Researchers in all of these areas are reconsidering the significance of symbolic aspects of social life and how the collective experiencing of cultural forms is related to changes in capitalism and modernity. For example, what is the significance of popular music in different class, gender, and ethnic contexts? How do commitments to kin and community relate to expressions of culture and class consciousness? Are boundaries between work and leisure mutable in terms of class, gender and ethnic processes? Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

### **SOSA 3015.03: Popular Memory.**

This class considers history-writing as a social and cultural process operating at personal, group and national levels. It examines theoretical, methodological and political questions raised in work on popular memory. Readings and films address the problems of: official history, public history (museums, national monuments), “history from below,” and oral history. Cases will be taken from across the globe. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1050X/Y.06, SOSA 1100Z/Y.06, SOSA 1200X/Y.06

**SOSA 3031.03: Social Problems and Social Policy.**

This class focuses on the nature of social problems and social policy in advanced industrial societies. It adopts a social movement perspective, exploring the processes whereby agitation on behalf of undesirable but remedial social conditions leads to changes in social policy. Among the areas treated in depth are crime prevention, the quality of work life, race relations, deviance, and poverty and inequality.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

**SOSA 3060.03: Social Change and Development.**

This class considers theories of social change and development; approaches to the analysis of rural and urban livelihoods at the micro level; and the examination of community, class, patronage and gender relations in both their economic and cultural aspects. The constructive uses of social analysis in the support and design of development initiatives are also discussed. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; or INTD 2001.03 or INTD 2002.03

**SOSA 3071.03: Human Nature and Anthropology/ Sociology.**

Do social anthropology and sociology suffer from “biophobia”? Can evolutionists explain why we feel sexual jealousy or why we tend to follow a dominant leader in times of stress? Can the theories that explain why we have finger prints and flat nails account for why we are cultural animals? This class reviews theory and data on the evolution of human mind and culture in order to construct a theory of human nature and to argue that ethnographers vastly exaggerate the extent to which human societies differ from one another. Its perspective and contents include much of what some have categorized as “Human Sociobiology”, “Biosociology”, “Darwinian Anthropology”, “Darwinian Psychology”, and “Darwinian Medicine”.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200.06; or an introductory class in either Psychology or Biology

**SOSA 3085.03: Self and Society.**

This class explores the relationship between the self and the larger social context. It considers the dynamic interplay of personal experiences, interpersonal relations, group affiliation, and larger socio-cultural conditions. It examines how such interactions and institutions shape our conceptions of who we should be, who we are, or who we might become. In addition the relationship between changes in society and changes in the self are explored. The course may consider these questions cross-culturally.

PREREQUISITE: SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1100X/Y.06, SOSA 1050X/Y.06 or SOSA 1200X/Y.06

**SOSA 3091.03: The Sociology of Culture.**

Does culture permeate all aspects of social life or are there specialized social domains which are “cultural”? What is the connection between societies and “cultures” and the “culture” of music or art? This course explores the question of how one can sociologically study culture. The course reviews classical and contemporary theoretical approaches to the social production, distribution and reception of culture. Broad themes include the discussion of cultural consumption, cultural identity, cultural change, and notions of cultural resistance. Specific “cultural objects” of study may include fashion, sport, class, and social problems. The course concludes with analysis of the intersection of the fields of sociology and cultural studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

**SOSA 3096.03: Introduction to Demography.**

This class will explore the demographic techniques and theory used to describe the dynamics of population structure. Various demographic sources ranging from census to church records will be examined. Basic techniques for determining rates and measures of fertility, mortality, morbidity, and growth. Students will be expected to complete a project using primary sources.

FORMAT: Seminar/discussion

CROSS-LISTING: SOSA 5096.03

EXCLUSION: SOSA 3095X/Y.06

**SOSA 3100.03: Feminist Perspectives in Sociology and Anthropology.**

This course will begin with an overview discussing what is feminism? There is no way to come to a definitive answer to this question, therefore the first month of classes will focus on readings and discussion of feminism from an historical perspective. We will investigate the three historical waves of feminism and the diversity of feminism found in the social sciences. After this brief introduction we will concentrate on gender and sex, clearly dominant themes found in feminist works. We will approach this by critically exploring sociocultural constructions of sex and gender, which in turn will shed critical light on feminist perspectives about the relationship between these two concepts.

FORMAT: Lecture

PREREQUISITE: SOSA 1000.06, or 1002.03/1003.03, SOSA 1050.06, SOSA 1100.06, SOSA 1200.06

**SOSA 3105.03: Media and Society.**

This course provides an introductory overview to the theoretical and practical issues that concern media and society. It examines contemporary theories of mass communications and popular culture and engages the political economy of media, their impact on audiences, and the role they play in the political process.

FORMAT: Lecture

PREREQUISITE: SOSA 1000.06, or 1002.03/1003.03, SOSA 1050.06, SOSA 1100.06, SOSA 1200.06, or permission of instructor.

**SOSA 3116.03: Issues in Social Research.**

This course consists of the intensive examination of a selected area in social research. Since the specific topic which will receive special attention will differ from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1050X/Y.06, SOSA 1100X/Y.06, or SOSA 1200X/Y.06

**SOSA 3120.03: Social Conflict.**

This class introduces students to the various analytical perspectives sociologists have employed to understand the patterning and consequences of conflict in society. In this regard particular attention is devoted to the functional, coercion, and Marxian theories of conflict. This class is also concerned with conflict in contemporary society, with special reference to patterns of conflict and change in Canada.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

**SOSA 3135.03: The Social Organization of Health Care.**

The social organization of medicine and the politics of health are examined. Particular attention is paid to environmental and occupational health issues in light of technological and social change. Epidemiological patterns of morbidity and mortality are assessed. Students are responsible for seminar presentations in areas of interest.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

**SOSA 3143.03: Health, Illness and the World System.**

Placing the political economic bases of health and illness in ethnographic context, this course is concerned with the ways that afflictions of poverty become naturalized as biomedical experiences. Core questions pursued are as follows: 1) how is relative health affected by the world market pressures in diverse global contexts? 2) how do afflictions of poverty become naturalized as biomedical experiences? 3) how do patients and communities activate alternative health infrastructures as they resist their marginalization in neo-liberal political agendas? 4) what kinds of illnesses are characteristic of capitalism and wage labour migration (e.g. HIV/AIDS; SARS)? 5) how have market pressures and profit seeking retarded the progress of scientific inquiry into modern illness? We will elucidate these questions by looking at case studies from Canada, South Africa, Sri Lanka, Spain and Brazil.

FORMAT: Lecture

PREREQUISITE: SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200X/Y.06

### SOSA 3145.03: Gender and Health.

This course aims to reflect upon and challenge our taken-for-granted assumptions about the gendered dimensions of health and healthcare. Rather than take the categories of 'women's health' and 'men's health' as its foundation, the course revolves around two main questions: (1) how does the field of health and healthcare define and enforce the very categories of 'women' and 'men'; (2) how does gender, thus defined and enforced, affect the health, healthcare, and health work of those defined as men, women, or other? We will consider these questions by examining particular health topics that have a strongly gendered component, such as sexual health, reproductive health, and disability. Throughout the course, we will explore the theoretical perspectives used in the field; the two-sex model and challenges to it; the gendering of particular health problems and health professions; the medicalization of womanhood and, more recently, manhood; and the relationships between gender and other forms of social classification (e.g. race, class, sexual orientation). It is recommended that students take SOSA 2501 or SOSA 2400 prior to taking this class.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSS-LISTING: GWST 3800.03

### SOSA 3147.03: Social Gerontology.

This class considers human aging in a broad socio-cultural context. Course emphasis will be on historical, philosophic, and demographic aspects of aging, theories of social gerontology, attitudes toward aging and the aged, cross-cultural perspectives on aging, the socio-cultural analysis of retirement, and aging and the community. This class is designed as an overview of the major issues of aging in society.

The course will examine the condition of the elderly in contemporary society, noting both attitudes toward the elderly and the objective state of the elderly, and assess the manner in which these conditions are affected by variables such as race, class, and gender. The social implications of population aging for society will be highlighted as well as identifying the roles and importance of the elderly within the basic social institutions of the family, the economy, and the political system, and discussing the ways in which these institutions have adapted to the elderly and population aging. We will attempt to explain how social factors that affect successful aging are modified by such variables as social class and health status.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSS-LISTING: HLTH 4900.03

### SOSA 3148.03: The Sociology of Addiction: Drugs, Health and Society.

This course explores how the meaning and significance of various drug-taking practices and addictive experiences are shaped by the social, cultural, political and economic contexts in which they take place. It also examines how perceptions of different drugs and addictions have changed over time, and how complex and competing political, cultural and economic forces shape drug law and policy. The general aim of the course is to de-individualize and de-pathologize drug use and addiction, to better understand and address their health consequences.

FORMAT: Lecture

PREREQUISITE: One SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06, or 1200X/Y.06

### SOSA 3149.03: Childhood in Cross Cultural Perspective.

This course explores childhood as an important reflection of socialization and thus a nexus of cultural and social values, ideas, and histories. In examining pregnancy, birth, infant development and socialization patterns, we ask: What is universal, what is near universal, and what is indisputably variable? The course tries to maintain a balance among three perspectives: those of the infant; those of the parents; and relevant cultural and historical factors that shape both of these. The course also seeks to maintain a balance between the biological, cultural and social nature of human behavior. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: SOSA 1000.06, or 1002.03/1003.03, SOSA 1050.06, SOSA 1100.06, SOSA 1200.06

### SOSA 3150.03: Sociology and Anthropology of the Body.

This class will consist of a micro-sociological examination of the human body as a socio-cultural construction. Topics include: bodily self image, cultural definitions of physical attractiveness, stigmatization, proxemic behaviour, non-verbal

communications, body hygiene and pollution taboos, and cultural aspects of human reproduction and sexuality. Special attention will be paid to class, gender and ethnicity and their relationship to body politics.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSS-LISTING: GWST 3150.03

### SOSA 3165.03: Peoples and Cultures of the World: Selected Area Studies.

This class examines a specific geographic and/or culture area. The class begins with background material on geography and history. Its focus is on the people themselves, their social organization and political, economic, and cultural systems. How they relate to globalization and development will also be examined. Consult the Department to find which region is to be covered in a particular year. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: SOSA 1000X/Y.06; or 1002.03/1003.03, 1050X/Y.06; 1100X/Y.06; 1200X/Y.06

CROSS-LISTING: GEOG 3165.03

### SOSA 3168.03: Issues in Latin American Society.

This course introduces students to case studies on contemporary Latin America. The goal of the course is to familiarize students with key social and cultural issues in the region. The focus of the course will change from year to year, and may include a particular country or region, or a theme or topic. Students should contact the department for details on the specific theme of the course in a given year.

Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: SOSA 1100X/Y.06, or 1002.03/1003.03, SOSA 1500X/Y.06, SOSA 1100X/Y.06, SOSA 1200X/Y.06

### SOSA 3175.03: Sociology of Education.

This course is intended to develop students' knowledge about the relationships between schooling and other aspects of society. We will achieve this, in part, by examining the theoretical perspectives and practical implications of knowledge in and outside of schooling as a basis for the development of autonomous and creative individuals. Topics may include: social stratification, cultural demands and constraints, relations between family, community and educational attainment, and the changing social conditions that have had an impact on educational institutions.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1050X/Y.06, SOSA 1100X/Y.06, or SOSA 1200X/Y.06

### SOSA 3180.03: Special Topics in Sociology and Social Anthropology.

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One or SOSA 1000X/Y.06, or 1002.03/1003.03, 1050 X/Y.06, 1100X/Y.06, or 1200X/Y.06

### SOSA 3181.03: Special Topics in Sociology and Social Anthropology.

This course consists of an intensive examination of a selected substantive issue within Sociology and Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

### SOSA 3182.03: Special Topics in Sociology and Social Anthropology.

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000 X/Y.06, or 1002.03/1003.03, 1050 X/Y.06, 1100 X/Y.06 or 1200 X/Y.06

### **SOSA 3183.03: Special Topics.**

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000 X/Y.06, or 1002.03/1003.03, 1050 X/Y.06, 1100 X/Y.06 or 1200 X/Y.06

### **SOSA 3184.03: Special Topics in Sociology and Social Anthropology.**

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000 X/Y.06, or 1002.03/1003.03, 1050 X/Y.06, 1100 X/Y.06 or 1200 X/Y.06

### **SOSA 3185.03: Issues in the Study of Indigenous Peoples of North America.**

This seminar is concerned with the historical background of the Native-European situation in North America and with issues arising from this background. Students will research issues which are significant to themselves and important to Native groups. Topics covered may vary from year to year, but will normally include a combination of historical issues such as culture change and contemporary issues such as land claims, self-determination and government policy, and social conditions of Natives. Approved with International Development Studies and Law and Society minor.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSS-LISTING: CANA 3185.03

### **SOSA 3186.03: Special Topics in Sociology and Social Anthropology.**

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000 X/Y.06, or 1002.03/1003.03, SOSA 1050 X/Y.06, SOSA 1100 X/Y.06 or SOSA 1200 X/Y.06

### **SOSA 3187.03: Special Topics in Sociology and Social Anthropology.**

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000 X/Y.06, or 1002.03/1003.03, 1050 X/Y.06, 1100 X/Y.06 or 1200 X/Y.06

### **SOSA 3188.03: Special Topics in Sociology and Social Anthropology.**

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000 X/Y.06, or 1002.03/1003.03, 1050 X/Y.06, 1100 X/Y.06 or 1200 X/Y.06

### **SOSA 3189.03: Special Topics in Sociology and Social Anthropology.**

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000 X/Y.06, or 1002.03/1003.03, 1050 X/Y.06, 1100 X/Y.06 or 1200 X/Y.06

### **SOSA 3190.03: Social Movements.**

The general topic of unstructured group activity encompasses phenomena traditionally classified as collective behaviour incidents, as well as reformist and revolutionary social movements. Although there is considerable overlap, the collective behaviour literature tends to focus on relatively brief and spontaneous activities, such as panics, disasters, and crazes, while work on social movements examines relatively more organized and enduring group activities which still fall outside the realm of normal institutions. This class investigates problems emerging from both areas of concern. Emphasis is given to relevant Canadian materials.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

### **SOSA 3200.03: Environmental Anthropology.**

Humans are aware as never before of their impacts on the environment, and their dependence on the other things and beings with which they coexist. In this class we explore the ways that Social Scientists are rethinking the relationship between humans and the non-humans, whether they are carbon atoms, computers, amphibians, mushrooms or ecosystems.

PREREQUISITE: One SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1050X/Y.06, SOSA 1100X/Y.06, or SODA 1200X/Y.06

### **SOSA 3206.03: Ethnicity, Nationalism and Race.**

This class looks at the social construction and present relevance of the categories "ethnicity", "nation", and "race". The current prevalence of identity politics and ethnic nationalism suggest the extent to which these categories are both profoundly political and deeply personal. By looking at case studies from Canada and around the world we examine these ideas and their implications. Topics will vary from year to year, but may include Quebec nationalism, multiculturalism, "ethnic" warfare in Rwanda or Bosnia, and race politics. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06, or 1200X/Y.06

### **SOSA 3211.03: Continuity and Change in Rural Societies.**

The majority of the world's population, even today, lives in rural settings and depends upon primary production as the principal source of livelihood. This does not mean, however, that rural life has remained static and unchanging over the centuries. All rural societies, even those remote from centres of world power, have long been caught up in the world economic system and involved, in particular ways, with capitalist relations of production. This class examines continuity and change in a range of rural contexts across several continents including North America, and encourages students to consider the notion of "development" from alternative perspectives. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; or INTD 2000X/Y.06

### **SOSA 3214.03: Living in a Globalized World.**

This course examines various definitions and approaches to globalization as a multidimensional process. Students will discuss topics such as: global culture (identity, migration, hybridity, homogenization, heterogenization), global risks (pollution, health, food, unemployment, poverty), global regulations and norms (international organizations, international regimes, global forums), global technology (computer networks, cyberspace, information age, global media), and global international order (global terrorism, war, security). Students will also explore political movements that demand globalization be made a more equitable process. Finally, while learning more about the complex reality of today's world, students will engage in critical reflections and debates about some of the most fundamental concepts in social sciences like society, culture, nation, state, territory, space and democracy.

FORMAT: Lecture

PREREQUISITE: SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1050X/Y.06, SOSA 1100X/Y.06, or SOSA 1200X/Y.06

### **SOSA 3215.03: Migration and Identity.**

This class explores the inter-relating of migration and identity under conditions that are now described as globalization. Migrants become immigrants in particular places. Most depart as citizens of one country seeking temporary refuge, employment, or new citizenship at their destination. As they travel, migrants negotiate the multiple (sometimes competing) demands of kin, employers, and policies set by more than one state. Because commitments and obligations they

experience straddle the borders they have crossed, migrants lives are transnational. their ideas of “home” and identity are also reworked as they travel and can be conflicted as their circumstances change. Some writers have concluded contemporary migration is both turbulent and chaotic compared with historical examples. This class begins with review of some historical migration examples and critically reviews how these differ from current globalization flows. However, the main focus is on particular instances of migration as described in ethnographic and sociological case studies. Some key concepts to be discusses in the course are diaspora, transnationalism, and ethnoscape. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

### **SOSA 3220.03: Coastal Communities in the North Atlantic.**

Coastal communities as a social/ecological type are examined as populations, and social structures (territorial, economic, occupational, political) as they have developed in response to particular ecological and social circumstances. Various perspectives which have been applied to coastal communities are examined with regard to the contribution they may make to understanding the dynamics of these communities. The focus is on North Atlantic communities.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSS-LISTING: ENVI 5180.03, GEOG 3220.03, CANA 3220.03

### **SOSA 3225.03: Culture, Rights and Power.**

The class examines the interrelation of culture, rights and power cross-culturally. It thus considers how the idea and exercise of rights can vary across cultures. It also addresses the ways in which rights and relations of power make themselves felt in people's everyday lives. Finally, it considers the variety of experiences and understandings of these issues across societies and social groups. Examples may be drawn from social and cultural groups within or outside of Canada. Approved with International Development Studies and Law and Society minor.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1050X/Y.06, SOSA 1100X/Y.06, or SOSA 1200X/Y.06 or permission of the instructor

### **SOSA 3228.03: Belief Systems: Symbol, Myth, and Meaning.**

Emphasis will be placed upon how belief systems and their symbolic representations give meaning to the universe and one's place in it. Topics may include the nature of ritual, the structure of myth, religion and symbols, religion and healing, magic, sorcery, and witchcraft, and how all these phenomena relate to cultural and social change. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1050X/Y.06 or 1200X/Y.06

### **SOSA 3245.03: Women and Aging.**

As women grow older, the experience of aging is difficult. This class will explore the issues related to socio-economic factors that are major determinants of the well-being of aging women. Topics will include: aging as a process; menopause; violence against older women; older women and housing; self-image and sexuality; health and the aging woman; and older women and poverty.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; or two classes in Gender and Women's Studies

CROSS-LISTING: GWST 3810.03, NURS 4370.03

### **SOSA 3250.03: Beyond Genes and Circuits: The Anthropology and Sociology of Technoscience.**

This course uses the tools of the social sciences to understand the cultural and institutional practices of science and technology. Technology and science both drive and are driven by socioeconomic and cultural change. Little in our lives is unaffected by "technoscience": the toys children play with, the scale of habitus and identity, the substances we eat, entertainment sports, the distribution of our friendships and the sources of our information, the illnesses we get and the treatments they receive, how we make love and how we make war.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 1200X/Y.06 or permission of the instructor.

### **SOSA 3275.03: Crime and Public Policy.**

This class deals with the dynamics of change in the criminal justice system that reflect three major factors namely social movements (e.g. the victims movement, the women's movement), social forces (e.g. aging, multiculturalism), and internal processes (e.g. professionalism, rationalization). The class focuses on how outside pressures modify, and are channelled by, the criminal justice system. Approved with Law and Society minor.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

### **SOSA 3281.03: Youth Crime.**

This class deals with criminal offenses committed by young persons. Etiologies drawn from various disciplines are examined and evaluated. A secondary focus concerns the criminal justice system as it applies to young offenders. Approved with Law and Society minor.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

### **SOSA 3283.03: Globalized Security and Justice: the Challenge of Global Crime and Terrorism.**

Since the terrorist attacks of 9/11, the relationship between global processes and the issues of crime and terrorism have become more explicit. As new or enhanced global economic, political, cultural and environmental processes facilitate profound social and cultural change, new pressures and opportunities for both traditional and new kinds of crime and various forms of political and religious violence are being created. This course examines how globalization influences the various global and local conditions that create these new kinds crime and terrorism by exploring various theoretical explanations, and more empirically based case studies of different global crimes and terrorism movements. In addition we will explore how global organized crime and terrorism challenges the ability of western societies and states to ensure political order and security and examine how they are reconfiguring both the rhetoric and reality of state governance and justice.

INSTRUCTOR(S): C. Murphy

### **SOSA 3284.03: Living in Cities.**

2008 marked the first time in history that more of the global population lived in cities than in rural areas. What perspectives to anthropology and sociology offer on cities and their inhabitants? This course explores the social dynamics that constitute 'the city' and surveys how social scientists have studied and engaged with cities and city-dwellers. It approaches 'the city' both as a whole and through its constituent parts: people and places. Examples may be drawn from cities large and small, near and far - including Halifax.

INSTRUCTOR(S): M. Radice

FORMAT: Lecture and Seminar

PREREQUISITE: One of SOSA 1000.06, or 1002.03/1003.03, SOSA 1050.06, SOSA 1100.06 SOSA 1200.06 FYP or PLAN 2005.03

CROSS-LISTING: GEOG 3284.03

### **SOSA 3285.03: Sociology of Law.**

This course is a sociological examination of law both as a mechanism of social regulation and as a field of knowledge. It explores classical and contemporary theoretical contributions to Sociology of Law. Some specific issues to be analyzed include law and social control, law and social change, social reality of the law, the profession and practice of law, violence against women, and the influence of race, gender and social status in the outcome of legal decisions.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

### **SOSA 3295.03: Society and the Police.**

The police play an increasingly powerful role in the maintenance of social order in contemporary Canadian society. This class introduces students to sociological theory and research on: (a) the role of police in social development and social control; (b) the historical and political development of public policing; (c) the nature and structure of police work; (d) control and accountability and (e) selected issues in policing such as, policing the family, minorities and the police, community based policing and police discretion. Approved with Law and Society minor.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

### **SOSA 3310.03: Indian Society: Change and Continuity.**

The objective of this class is to introduce students to the society and culture of India from an interdisciplinary perspective. India presents a society of enormous complexity and an unbroken living civilization. Approved with International Development Studies.

FORMAT: Lecture and Seminar

PREREQUISITE: Second-year Arts and/or Science class

### **SOSA 3400.03: History of Anthropological Theory.**

This class considers the foundations and development of social anthropology. Major theoretical schools and the work of prominent anthropologists in those schools are considered, including Cultural Evolution, Historical Particularism, Functionalism, Culture and Personality, Structuralism, Symbolism, Cultural Materialism, and the directions in which contemporary sociocultural anthropology point.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; and SOSA 2001X/Y.06 or 2002X/Y.06

### **SOSA 3401.03: History of Sociological Thought.**

Towards the middle of the nineteenth century a novel way of thinking about human existence began to emerge. Primacy was given to the understanding that humans are social beings, their lives and thoughts bounded and patterned by their social environments. This approach formed the basis for a new discipline of analysis eventually named Sociology. This class considers some of the main ideas of the earlier contributors to the new way of thinking: Comte, Marx, Durkheim, Weber, Simmel, Mead, Mannheim and, more recently, Parsons and Schutz. Modern sociology rests largely on the intellectual legacy of these thinkers. They raise questions and formulate answers to them which remain relevant to the sociological enterprise today.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; and SOSA 2001X/Y.06 or 2002X/Y.06

### **SOSA 3402.03: Figuring Out Society.**

This class provides an introduction to issues of research design, including the relationship of theory to the choice of methodology. Students are exposed to basic tools and procedures which will help them to analyze the numerical tables and graphs they may come across in sociological or anthropological journals. Other relevant issues will be included, such as, whether it is possible to achieve scientific objectivity when studying human behaviour. It is assumed students enrolled in this class possess basic computer skills.

FORMAT: Lecture/lab as required

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; and SOSA 2001X/Y.06 or 2002X/Y.06

### **SOSA 3403.03: Qualitative and Field Methods.**

Research is a craft requiring many skills. This class focuses on skills complementary to those discussed in SOSA 3402.03 (Figuring out Society). Topics may include- theory and the choice of method; applied social science; field work; ethnography; use of interpreters; interviewing; life histories; note taking; analysis of texts; feminist methodologies.

FORMAT: Lecture/lab as required

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; and SOSA 2001X/Y.06 or 2002X/Y.06.

### **SOSA 3405.03: Contemporary Social Theory.**

A variety of approaches constitute theory in contemporary sociology. Among them are those called interactionist, ethnomethodological, structuralist, critical, feminist, rational choice, and post-modernist. This class considers the contributions of these approaches to the enterprise of modern sociology. What are the main premises of particular sociological theories? What are their implications for the study and understanding of the social world? What are the issues that evoke debate between different schools of theory?

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; and SOSA 2001X/Y.06 or 2002X/Y.06

### **SOSA 4000X/Y.06: Honours Seminar in Social Anthropology.**

This seminar provides an opportunity for students to engage in sustained investigative scholarship through independent research initiative. The first term concentrates on locating the student's work within a broader set of theoretical and methodological debates in the discipline, while the second term is devoted to

students' research and writing activities in preparing the thesis required for honours graduation. In the second term, class time is used for students to make "in progress" reports and presentations about their chosen topics. The class carries two separate grades, one for the class and the other for the thesis, appearing on the transcript as "honours qualifying examination" (a University requirement for all honours students SOSA 8880.00).

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: Honours registration in Social Anthropology and SOSA 2001 (recommended) or SOSA 2002, and two of SOSA 3400, SOSA 3402 and 3403. or permission of the instructor

### **SOSA 4001.03: Quantitative Analysis for the Social Sciences I.**

This class will introduce quantitative analysis. It will engage issues of research design, the relationship between samples and populations, statistics and inference, as well as basic tests of statistical significance. The course will also introduce tabular, graphical, and bi-variate linear analysis, using computer software. It will encourage secondary data analysis of available datasets, evaluation of surveys, and develop skills through a series of class projects.

FORMAT: Seminar

PREREQUISITE: SOSA 3402.03 and fourth year Major or Honours standing in Sociology and/or Social Anthropology

CROSS-LISTING: SOSA 5001.03

### **SOSA 4002.03: Quantitative Analysis for the Social Sciences II.**

This course will focus on the use of quantitative methods in social science research. It will introduce students to regression techniques and concentrate on the assumptions motivating quantitative analysis. The course will also look at regression diagnostics and critically weigh options available to researchers when "normal" assumptions are broken. The class will be split into lectures and computer labs using statistical software. The labs will apply methods covered in class and explore potential secondary data resources. The class will develop these skills through a series of class projects.

FORMAT: Seminar

PREREQUISITE: SOSA 3402.03, SOSA 4001.03 and fourth year Major or Honours standing in Sociology and/or Social Anthropology

CROSS-LISTING: SOSA 5002.03

### **SOSA 4003.03: Contemporary Perspectives in Ethnography.**

Ethnographies and critical writings which grapple with questions of theory and interpretation in a range of contexts - near and far, familiar and strange, local and global - will be examined in this class. Approved with International Development Studies.

FORMAT: Seminar

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06; SOSA 2001X/Y.06 or 2002X/Y.06; and fourth year Honours standing in Sociology and/or Social Anthropology

CROSS-LISTING: SOSA 5003.03

### **SOSA 4004.03: Capital, Class, Community-Mobilities, Immobilities**

Commencing from a review of the multiple meanings of neoliberalism, this course will examine changing relationships to employment and 'home' under conditions of economic insecurity. Such conditions have long been prevalent in what is termed the 'global south' but are now more obviously present in class-divided northern economies, Canada included. How do people, men and women, young and old, react to increasingly precarious conditions of employment and uncertain futures? Is employment-related mobility becoming an accepted pattern of living, even in stable communities where people had previously relied on secure livelihoods shared between generations? How does migration and immigration shape new understandings of community? Have people's sense of themselves and others, their subjectivities, been reshaped through new political and economic realities? In addition to some key theoretical readings, we will explore these issues through a close reading of several critical ethnographies.

FORMAT: Seminar

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06 and fourth year Honours standing in Sociology and/or Social Anthropology

**SOSA 4005.03: Issues in Social Justice and Inequality.**

Each year, this "issues" class focuses on a different specific topic within the general area. In past years topics have addressed the social and moral problems of social inequalities of various kinds viewed in a context of global changes. Sample topics include but are not restricted to: gender, minority and class inequalities; struggles over rights; social movements; social scenarios surrounding citizenship, migration and immigration; multiculturalism; and border and security studies. Consult Department for specific topic.

FORMAT: Seminar

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06 and fourth year Honours standing in Sociology and/or Social Anthropology

**SOSA 4006.03: Issues in Critical Health Studies.**

Each year, this "issues" class focuses on a different specific topic within the general area. In past years topics have addressed how health is socially and culturally constructed, the differential social and cultural affects of health knowledges and power relationships, and how various perspectives on health are challenged from within and beyond the health professions. Consult Department for the specific topic.

FORMAT: Seminar

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06 and fourth year Honours standing in Sociology and/or Social Anthropology

**SOSA 4012.03: 4013.03: Issues in Sociology and Social Anthropology.**

This seminar consists of an intensive examination of selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem which receives special treatment will differ from year to year, students are advised to consult the department prior to registration.

FORMAT: Seminar

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06, and fourth year Major or Honours standing in Sociology and Social Anthropology

**SOSA 4014.03: Special Topics.**

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture and seminar

PREREQUISITE: SOSA 1000X/Y.06 or 1002.03/1003.03, or SOSA 1050, or SOSA 1100 or SOSA 1200 AND SOSA 2001 or 2002

**SOSA 4015.03: Special Topics.**

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture and seminar

PREREQUISITE: SOSA 1000X/Y.06 or 1002.03/1003.03, or SOSA 1050, or SOSA 1100 or SOSA 1200 AND SOSA 2001 or 2002

**SOSA 4016.03: Special Topics.**

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

FORMAT: Lecture and seminar

PREREQUISITE: SOSA 1000X/Y.06 or 1002.03/1003.03, or SOSA 1050, or SOSA 1100 or SOSA 1200 AND SOSA 2001 or 2002

**SOSA 4017.03: Special Topics.**

This course consists of an intensive examination of a selected substantive issue within Sociology and Social Anthropology. Since the specific topic or research problem will vary from year to year, students are advised to consult the department prior to registration.

**SOSA 4031.03: Social Policy Research Seminar.**

One of the distinctive features of the social sciences has been the use of social research as a basis for the development and reform of social policy. Though the relationship of social research to social policy has changed and evolved with changes in the politics and process of policy making, it still remains a core activity for many social scientists. Using a variety of academic and applied research

sources, the seminar will examine the politics of policy research, uses of social research knowledge, policy research models and research strategies and the policy outcomes of social research. In addition to reviewing the critical literature on social policy research, students will do case study analysis of a major policy research project. The course will selectively draw on faculty, government and private sector policy researchers and policy makers to help ground discussion and research in actual policy research experience.

FORMAT: Seminar

PREREQUISITE: SOSA 1000X/Y.06, or 1002.03/1003.03, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200X/Y.06 and fourth year Major or Honours standing in Sociology and/or Social Anthropology.

CROSS-LISTING: SOSA 5031.03

**SOSA 4205.03: Moral Panics as a Social Phenomenon.**

If we relied solely on news reports emanating from the mass media, we might well form the impression that every few years a particular form of allegedly immoral and/or unlawful behavior becomes so widespread as to endanger the very foundation of society. Where such socially shared fears and concerns are exaggerated—i.e., all out of proportion to the actual threat when judged from a rational or empirical perspective — social scientists refer to them as “moral panics.” This class will apply sociological analysis to documented case studies of such panics, both past and present. Examples would include public anxiety about communist infiltration of the U.S. government in the 1950s or, more recently, popularized scares over child sexual abuse, satanism, or serial killing. Particular attention will be paid to the social processes that generate, sustain, and erode adherence to such beliefs.

FORMAT: Seminar

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06 and fourth year Major or Honours standing in Sociology and/or Social Anthropology.

**SOSA 4210.03: Tourism and Development.**

Tourism is now the most lucrative industry in the world. Around the globe, companies chase the tourist's dollar offering the best deals on wide range of destinations tailored to a variety of different experiences from sex tourism to eco-tourism. This class will explore the relationship between tourism and development. Topics under discussion will include the definitions of hosts and guests, the commodification of tourist sites and the tourist experience, and the relationship of tourism to sustainability, environmentalism, and globalization. Approved with International Development Studies.

FORMAT: Seminar

PREREQUISITE: One of SOSA 1000X/Y.06, or 1002.03/1003.03, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06 and fourth year Major or Honours standing in Sociology and/or Social Anthropology.

CROSS-LISTING: SOSA 5007.03

**SOSA 4211.03: Embodying the body : The Human body for Anatomists and Humanists.**

This course explores form and function of the human body and how these relate to broader issues associated with what it means to be human. The course begins with an anatomical exploration of the body, then expands into contemporary issues about the body and embodiment, including gender identity, beauty, etc. (This course does not fulfill the 4000 level elective requirement for Sociology and Social Anthropology honours students.)

INSTRUCTOR(S): Wassersug, R.

FORMAT: Lecture/labs

PREREQUISITE: SOSA 2501X/Y or SOSA 3150, permission of the instructor required

CROSS-LISTING: ANAT 5555

**SOSA 4400X/Y.06: Applying Sociology and Social Anthropology Inside, Outside, and Beyond University.**

This is a "capstone" class for SOSA majors and double majors in their fourth and final year of undergraduate studies. The class should be especially relevant to students hoping to enter social work, law, business administration, counselling, community organizing, public service, occupational therapy, medicine or other health professions. The primary focus in the first term will be to introduce, reflect upon, and discuss students' university and life experiences, vocational plans beyond university, and responsibilities as a citizen in democratic society. Work in the second term of the class will revolve around the choosing, planning, execution, and analysis of an experiential learning project. This project might involve volunteering at a community service agency, serving as a tutor or mentor to first-year Dalhousie students, or doing a piece of applied social research for a campus or community organization. This project will culminate in the preparation and

presentation of a major essay outlining what students have learned from this exercise. Throughout the year every effort will be made to improve students' abilities for introspection, written and oral communication, critical thinking, and group leadership.

The class will be strictly limited to a maximum of 20 students. Enrolment in the class requires instructor's permission.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: SOSA 2001X/Y.06 or 2002X/Y.06 and fourth-year standing in the SOSA 20-credit major/double major program.

EXCLUSION: SOSA 4000X/Y.06, 4500X/Y.06

### **SOSA 4500X/Y.06: Honours Seminar in Sociology.**

This seminar provides an opportunity for students to engage in sustained investigative scholarship through independent research initiative. The first term concentrates on locating the student's work within a broader set of theoretical and methodological debates in the discipline, while the second term is devoted to students' research and writing activities in preparing the thesis required for honours graduation. In the second term, class time is used for students to make "in progress" reports and presentations about their chosen topics. The class carries two separate grades, one for the class and the other for the thesis, appearing on the transcript as "honours qualifying examination" (a University requirement for all honours students SOSA 8880.00).

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar

PREREQUISITE: Honours registration in Sociology and SOSA 2002 (recommended) or SOSA 2001 and two of SOSA 3401, SOSA 3402, SOSA 3403 and SOSA 3405. or permission of the instructor

### **SOSA 4510.03: 4520.03: Readings in Sociology/Social Anthropology.**

In a reading class the student is assigned to a member of staff for regular meetings to discuss readings in a selected area. Papers and research projects are expected. FORMAT: Individual instruction

PREREQUISITE: Honours registration in Sociology or Social Anthropology, permission of the instructor and permission of the Undergraduate Coordinator

## **Spanish and Latin American Studies**

Location: 6135 University Avenue, Room 3025

Santos-Montero, E., BA, MA (Salamanca)

### **Senior Instructors**

De Antueno, L., BA (NU of La Plata)

Rafales, C., BA (Barcelona)

### **Instructor**

Dam-Mazzi, M., BA (Lima), MA (Salamanca)

## **I. Introduction**

Spanish opens the doors for you into exciting and diverse cultures in more than 20 countries - it is the first language of over 400 million people, and the second most widely spoken language in the world (after Chinese).

The Spanish-speaking world is home to fascinating people, traditions and institutions, and the Department of Spanish and Latin American Studies is your gateway into this vibrant world.

We warmly welcome students interested in starting Spanish as well as those who already have some experience with the language. Our degree options for the study of the language, literatures and cultures of the Spanish-speaking world are highly practical choices, and also complement studies in such diverse disciplines as political science, sociology and social anthropology, literature, linguistics, history, international development studies, intercultural communication, economics, commerce, and many others.

Fluency in Spanish will be useful to all students seeking careers in the foreign service and NGOs, in business and banking, as entrepreneurs, interpreters, translators, teachers, professors, editors, journalists, and many others. Our language classes emphasize skills acquisition and communicative competence; once you have mastered the fundamentals, a whole world of diverse interests is open for you to engage with: history, politics, social issues, international development, literature, film, art, business and many others.

## II. Certificate of Proficiency in Spanish

This certificate is normally awarded by the Department to students who are not specializing in Spanish but who, having taken several Spanish classes at Dalhousie, wish to have their proficiency officially acknowledged. However, Major and Honours students who do so wish can also be awarded a certificate, provided all the requirements are met. A candidate's superior performance will be reflected by a specific distinction appearing on the certificate.

### Requirements

#### 1. Classes:

- 1000 level: SPAN 1020X/Y.06 (or equivalent)
- 2000 level: SPAN 2020X/Y.06
- 3000 level: SPAN 3020.03 or 3025.03, 3035.03, 3036.03

#### 2. Exam

A written and oral Examination with a minimum average of B- on each part. Students who fail the Examination on the first attempt will be allowed to take it over after one year. No one is entitled to take the Examination without having done the class work.

Administration: Please contact the Spanish and Latin American Studies Department for details.

## III. Diplomas of Spanish as a foreign Language (DELEs)

These diplomas were created in 1991 by the Ministry of Education and Culture of Spain, designed and evaluated by the University of Salamanca and administered by the Instituto Cervantes and the Spanish Embassies. They offer an internationally recognized accreditation on the degree of mastery of the Spanish language for citizens of countries where Spanish is not the official language. They test your ability to read, write, speak and understand Spanish. The DELEs are offered on three levels:

#### 1. The *Diploma de Español (Nivel Inicial)*

accredits the sufficient knowledge of the language to be able to cope with a range of situations which require an elementary use of the language.

#### 2. The *Diploma de Español (Nivel Intermedio)*

accredits a sufficient knowledge of the language that allows communication in customary situations of everyday life where specialized use is not required.

#### 3. The *Diploma de Español (Nivel Superior)*

accredits the necessary knowledge of the language as to allow communication in situations which require an advanced use of Spanish and knowledge of its cultural background.

The examinations are offered in about 50 countries at accredited centres around the world. The Department of Spanish and Latin American Studies at Dalhousie University organizes the examinations every May.

The exam for obtaining the DELEs consists of five tests: reading comprehension, written expression, listening comprehension, grammar and vocabulary, and oral expression. A grade of "apto" (satisfactory) in each of the sections is required to pass the entire exam.

Please contact the Department DELE Co-ordinator for further details. For additional information visit the Embassy of Spain website: <http://www.DocuWeb.ca/SpaininCanada/english/educat/dele.html> and <http://www.diplomas.cervantes.es>

## IV. Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, page 131 of this calendar.

### A. BA (15 credit) Minor in Spanish Language

Three credits in Spanish Language  
(See below, Section F for requirements)

### B. BA (20 credit) Major in Spanish

(Minimum six credits; maximum nine credits in Spanish, including at least three credits at the 3000 level)

#### Core Major Requirements

- 2000 level: SPAN 2020X/Y.06, or equivalent/SPAN 2090.03
- 3000 level: SPAN 3020.03 or SPAN 3025.03/SPAN 3035.03/SPAN 3036.03
- .5 credit in Spanish or Spanish-American literature
- .5 credit in Spanish or Spanish-American civilization

#### Departmental Requirements

- an additional .5 credit in literature (student must take a class in each of Spanish literature and Spanish-American literature)
- an additional .5 credit in civilization (student must take a class in each of Spanish civilization and Spanish-American civilization)
- one additional Spanish credit at the 3000 or 4000 level

### C. BA (20 credit) Double Major in Spanish

(Combination of 10, minimum of five credits in Spanish)

#### Core Major Requirements

- 2000 level: SPAN 2020X/Y.06, or equivalent/SPAN 2090.03
- 3000 level: SPAN 3020.03 or SPAN 3025.03/SPAN 3035.03/SPAN 3036.03
- .5 credit in Spanish or Spanish-American literature
- .5 credit in Spanish or Spanish-American civilization

#### Departmental Requirements

- any other advanced Spanish credits

### D. Bachelor of Arts with Honours in Spanish

(Minimum nine credits in Spanish)

#### Core Major Requirements

- 2000 level: SPAN 2020X/Y.06, or equivalent/SPAN 2090.03
- 3000 level: SPAN 3020.03 or SPAN 3025.03/SPAN 3035.03/SPAN 3036.03
- .5 credit in Spanish or Spanish-American literature
- .5 credit in Spanish or Spanish-American civilization

#### Departmental Requirements

Students seeking entrance to the Spanish Honours Program are expected to have and to maintain a general A- average in Spanish. Classes taken abroad do not count towards this average.

- an additional .5 credit in literature (student must take a class in each of Spanish literature and Spanish-American literature)
- an additional .5 credit in civilization (student must take a class in each of Spanish civilization and Spanish-American civilization)
- four optional Spanish credits (includes classes taught in English)
- Honours thesis

### E. Bachelor of Arts with Combined Honours

(Combination of 11 credits; if Spanish is Primary, minimum six credits in Spanish and thesis completed in the Spanish and Latin American Studies Department; If Spanish is Secondary, minimum five credits in Spanish)

#### Core Major Requirements

- 2000 level: SPAN 2020X/Y.06, or equivalent/SPAN 2090.03
- 3000 level: SPAN 3020.03 or SPAN 3025.03/SPAN 3035.03/SPAN 3036.03
- .5 credit in Spanish or Spanish-American literature
- .5 credit in Spanish or Spanish-American civilization

#### Departmental Requirements

Students seeking entrance to the Spanish Honours Program are expected to have and to maintain a general A- average in Spanish. Classes taken abroad do not count towards this average.

If Spanish is Primary:

- an additional .5 credit in literature (student must take a class in each of Spanish literature and Spanish-American literature)
- an additional .5 credit in civilization (student must take a class in each of Spanish civilization and Spanish-American civilization)
- one additional Spanish credit at the 3000 or 4000 level
- Honours thesis

If Spanish is Secondary:

- One additional credit

## F. Minor in Spanish Language

- SPAN 2020.06
- SPAN 2030.03
- SPAN 3035.03
- SPAN 3036.03
- SPAN 3020.03 or SPAN 3025.03

## G. Minor in Hispanic Literature

- SPAN 2020.06
- SPAN 2090.03
- SPAN 2500.03
- SPAN 2510.03
- SPAN 3215.03 or SPAN 3510.03
- SPAN 3500.03 or SPAN 3525.03

## H. Minor in Hispanic Cultures

- SPAN 2100.03
- SPAN 2200.03

And any two credits from:

- SPAN 2040.03
- SPAN 2069.03
- SPAN 2070.03
- SPAN 2105.03
- SPAN 2109.03
- SPAN 2110.03
- SPAN 2130.03
- SPAN 2150.03
- SPAN 3095.03

## I. Minor in Latin American Studies

- SPAN 2020.06

Any any two of:

- SPAN 2069.03
- SPAN 2070.03
- SPAN 2109.03
- SPAN 2110.03
- SPAN 2130.03
- SPAN 2200.03
- SPAN 2510.03
- SPAN 3215.03
- SPAN 3510.03

Any any two credits from:

- HIST 2381.03
- HIST 2386.03
- HIST 3390.03
- HIST 4300.03
- INTD 3302.03
- INTD 3303.03
- INTD 3304.03
- INTD 3310.06
- INTD 3401.03
- POLI 3360.03
- SOSA 3168.03 (or Xlist code GWST 3168.03)

At least .5 credit must be at the 3000 level or above.

## J. Minor in Spanish for Students in the Faculty of Management

- SPAN 2020.06
- SPAN 2040.03
- .5 credit in Spanish or Spanish-American Civilization (this includes SPAN 2069, 2070, 2109, 2110, 2100, and 2200)
- SPAN 2090.03
- .5 credit in Spanish or Spanish-American Literature
- SPAN 3020.03
- SPAN 3035.03

- SPAN 3036.03

## K. Minor in Spanish for Students in the Faculty of Computer Science

- SPAN 2020.06
- .5 credit in Spanish or Spanish American Civilization (this includes SPAN 2069, 2070, 2109, 2110, and 2200)
- SPAN 2090.03
- .5 credit in Spanish or Spanish-American Literature
- SPAN 3020.03
- SPAN 3035.03
- SPAN 3036.03

## V. Programs and Classes Abroad

### A. The Salamanca Program at the Universidad de Salamanca

The Salamanca Program is a special inter-disciplinary program of instruction designed to allow Dalhousie students to undertake both an intensive study of the Spanish language and classes in Spanish culture. Students must have completed SPAN 2020X/Y.06 with at least a standing of B-. The program takes place during the fall, winter, spring or summer term, and is offered at the Universidad de Salamanca in Salamanca, Spain. Dalhousie University will grant three credits to those students who successfully complete their classes in Spain. Enquires and applications should be addressed to the coordinator of the Program. Students will register via Letter of Permission and will receive grades on a Pass/Fail basis. The classes will be noted on the student's academic record as a transfer credit.

Students must take the equivalent of three full classes.

#### Compulsory classes:

- Lengua española (1.5 cr)

Students will then select ONE class from each of the following three Options.

#### Option 1

- Conversación y redacción (.5 cr)
- La mujer en la historia de España (.5 cr)
- Historia de la España contemporánea (.5 cr)

#### Option 2

- Cultura española (.5 cr)
- Literatura española e hispanoamericana (.5 cr)
- El mundo árabe en el mundo hispánico (.5 cr)
- Destrezas orales y escritas (.5 cr)

#### Option 3

- Historia del arte español (.5 cr)
- Español de los negocios (.5 cr)
- Cine español e hispanoamericano (.5 cr)

### B. The Cuba Program at FLACSO/Havana

This program is given by FLACSO/Havana and generally takes place in the fall and winter terms. All class work is conducted in the Spanish language. Students must have completed SPAN 2020X/Y.06 with at least a standing of B-. See class descriptions for INTD 3301.03, 3302.03, 3303.03, 3304.03, and 3306.06 in the International Development Studies Section of this Calendar. For more information, please contact the Department of International Development Studies.

### C. The Mexico Program at the University of Campeche

This program, designed for students with a minimum of two years' university-level Spanish, is located at the Universidad Autónoma de Campeche, in the southwest of the Yucatán peninsula, in Mexico. Students must have completed SPAN 2020/XY.06 with at least a standing of B-. It started in the Fall of 1998, and is administered by the university's Centro de Español y Maya. Students can be located with Mexican families if they desire. They are also encouraged to travel and see the superb Maya architectural sites in the Yucatán region. The city of Campeche, situated on the Caribbean coast, has a population of approximately 190,000. It was founded in 1540. The cities of Halifax and Campeche twinned in

1998, and there have been several educational, political, and commercial exchanges. This program is offered in the fall semester only. Students will register for classes via Letter of Permission and will receive grades on a Pass/Fail basis. The classes will be noted on the student's academic record as a transfer credit.

Classes taken at the University of Campeche are:

- Gramática Intensiva (1 cr)
- Vocabulario Intensivo (1 cr)
- Historia Mexicana (1 cr)

## D. The Peru Program at the Pontificia Universidad Católica del Perú

This program takes place for four weeks in July in Cusco, a city of about 359,000 in the Andes of southeastern Peru (elevation 3400 m). Cusco was the capital of the Inca empire and is well situated for visits of cultural and historic importance (museums, Inca archaeological sites, colonial sites) in and around the city. Students will study Spanish and Inca culture; all classwork is conducted in Spanish. Students must have completed SPAN 2020 X/Y.06 with at least a standing of B-. Students will register for classes via Letter of Permission and will receive grades on a Pass/Fail basis. The classes will be noted on the student's academic record as transfer credits.

Classes taken at the Pontificia Universidad Católica del Perú are:

- Intermediate or Advanced Spanish (.5 cr)
- Inca Culture (.5 cr)
- Practical Experience (.5 cr)

## E. SPAN 3310.06: Cuban Culture and Society.

See class description for INTD 3310.06 in the International Development Studies section of this calendar.

## VI. Classes Offered on Campus

### PLEASE NOTE:

If you have taken two or more years of Spanish in High School or have studied it previously in another institution, you need to take the **Spanish Placement Test (SPT)**.

The **Spanish Placement Test** is a one and a half hour standardized multiple-choice test that is designed to assess your current level in Spanish and place you in the class better suited to your needs. Students who wish to register for a language class before taking this test may do so, but care should be taken in choosing it. Please read the class descriptions below carefully and try not to underestimate your knowledge.

This test is administered online. Please contact our Academic Advisor ([spanish.advising@dal.ca](mailto:spanish.advising@dal.ca)) to register for the test. Scores from this test are normally available within a day, and are considered valid for up to a year from the date it was taken.

Students who are taking or have taken any language class at Dalhousie do NOT need to take this test.

Not all classes are offered every year. Please consult the current timetable.

### SPAN 1020X/Y.06: Beginning Spanish.

For students wishing to achieve proficiency in both spoken and written Spanish. NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Discussion/conversation/tutorial, language lab and computer assisted language learning as needed

PREREQUISITE: Open to students with no knowledge or only a slight knowledge of Spanish

### SPAN 1025.03: Advanced Beginning Spanish.

For students with some slight prior knowledge of Spanish. Students join, at mid-year, classes of SPAN 1020X/Y.06 already in progress.

FORMAT: Discussion/conversation/tutorial, language lab and computer assisted language learning as needed

PREREQUISITE: Knowledge of Spanish to the equivalent of first half of SPAN 1020X/Y.06

EXCLUSION: SPAN 1020X/Y.06

### SPAN 1200X/Y.06: Spanish for Reading.

For students who wish to acquire reading knowledge of Spanish for general academic purposes. Overview of fundamentals of Spanish grammar and vocabulary, with emphasis on reading for comprehension of texts in the arts, humanities and social sciences. This course does not satisfy the Bachelor of Arts Language Requirement (see SPAN 1020).

NOTE: Credit can be given for this class only if X and Y are completed in consecutive terms; partial credit cannot be given for a single term.

FORMAT: Lecture/discussion, conducted in English

PREREQUISITE: None. Open to students in all departments. No prior knowledge of Spanish is necessary

### SPAN 2020X/Y.06: Intermediate Spanish.

This class continues the work done in SPAN 1010.03 or SPAN 1020.06.

Supplementary readings as necessary.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms.

FORMAT: Discussion/conversation/tutorial, language lab and computer assisted language learning as needed

PREREQUISITE: Spanish 1020X/Y.06, or equivalent

### SPAN 2025.03: Advanced Intermediate Spanish.

For students with sufficient knowledge of Spanish that surpasses the basic admittance requirement to SPAN 2020X/Y but insufficient for third year courses. Students join, at midyear, classes of SPAN 2020X/Y.06 already in progress.

FORMAT: Discussion/conversation, language lab and computer assisted language learning as needed

PREREQUISITE: Knowledge of Spanish to the equivalent of the first half of SPAN 2020X/Y.

EXCLUSION: SPAN 2020X/Y

### SPAN 2030.03: Integrated Skills.

The objective of this course is to reinforce grammatical concepts through the development of the four language skills in a practical setting. Students enrolled in SPAN 2020X/Y.06 are encouraged to take this class in the same academic year.

This course is particularly useful to students planning to take any of our programs abroad. The class will be organized in thematic units in which authentic materials will be used to practice Oral and Written Expression, and Listening and Reading Comprehension, thus activating the mechanisms of language acquisition and integrating students' skills in a cohesive way.

INSTRUCTOR(S): E. Santos-Montero

FORMAT: Lecture/discussion

PREREQUISITE: SPAN 1020X/Y.06 or equivalent

### SPAN 2040.03: Spanish for Business.

Spanish for business and international trade. Introduction to the Spanish of international business and to the social cultural norms of negotiation in Spanish-speaking countries.

INSTRUCTOR(S): L. De Antueno

FORMAT: Lecture/discussion

PREREQUISITE: SPAN 2020.06

### SPAN 2069.03: Central America to 1979.

Events in Central America are frequently covered in our media, causing people to believe that "the unrest" there is recent. This class seeks to examine the historical roots of the conflict from the colonial period until the 1970s. The aim of the class is to provide students with a background knowledge of this area, so that they can better understand current developments there.

INSTRUCTOR(S): J. Kirk

FORMAT: Lecture/discussion/conducted in English

PREREQUISITE: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary

CROSS-LISTING: HIST 2382.03

### SPAN 2070.03: Area Studies on Mexico and Central America.

Following an examination of the indigenous heritage, and the colonial legacy of the conquistadors, the class deals principally with the contemporary period, examining the Mexican Revolution and its aftermath, the Somoza dynasty, Nicaragua under the Sandinistas, the impact of NAFTA, the "democracy" of Mexico, the U.S. role in the region, the human rights situation in Central America, and probable developments in the region. The class is designed to provide an understanding of the contemporary reality of this volatile region, in many ways a microcosm of the crucial situation of Latin America as a whole.

INSTRUCTOR(S): J. Kirk

FORMAT: Lecture/discussion/conducted in English  
PREREQUISITE: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary  
CROSS-LISTING: HIST 2383.03

### **SPAN 2090.03: Introduction to Hispanic Literary Study.**

This course will introduce students to literary analysis and critical writing in Spanish. Readings will include works from a variety of periods, genres and regions.

NOTE: Does not fulfill the literature requirement for any Spanish degree programs.

INSTRUCTOR(S): D. Pifano, M.J. Gimenez

FORMAT: Lecture

PREREQUISITE: SPAN 2020X/Y.06

### **SPAN 2100.03: Evolving Spain: History, Culture, Society.**

This class provides an overview of the major sociopolitical and cultural elements, from the Middle Ages to the present, that formed contemporary Spain.

INSTRUCTOR(S): M.J. Gimenez, D. Rogers

FORMAT: Lecture/discussion/conducted in English

PREREQUISITE: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary.

### **SPAN 2105.03: Catalan Language and Culture.**

Introduction to Catalan, the Romance language spoken by some 8 million people in northeastern Spain-Barcelona and Catalonia - southern France, the Balearic Islands and Sardinia. Elementary Catalan language and an introduction to Catalan culture.

INSTRUCTOR(S): C. Ráfales

FORMAT: Lecture/discussion

PREREQUISITE: 2 years' study of any Romance language, or permission of instructor

### **SPAN 2109.03: Cuba from Colonial Times to 1961.**

While many people are aware of the impact of the Cuban Revolution of 1959, few are aware of the kind of society that existed in Cuba beforehand. This class seeks to examine the historical roots of the country from the colonial period until the 1960's, with particular attention being paid to socio-cultural aspects. The objective is to provide students with a background knowledge of this country and its current reality.

INSTRUCTOR(S): J. Kirk

FORMAT: Lecture/discussion/conducted in English

PREREQUISITE: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary

CROSS-LISTING: HIST 2384.03

### **SPAN 2110.03: The Cuban Cultural Revolution.**

Cuba, the only Communist society in the Western Hemisphere, has undergone a dramatic political and economic transformation. The Revolution has also brought about changes in education, the arts, the role of women, race relations, and athletics. The class focuses on the problems and achievements of the Revolution, the peculiarities of Communism in a Caribbean society, and its effect on literature and the arts.

INSTRUCTOR(S): J. Kirk

FORMAT: Lecture/discussion/conducted in English

CROSS-LISTING: HIST 2385.03

### **SPAN 2130.03: Latin American dictators: From Fact to Fiction.**

The history of Latin America since Independence has been characterized by the rise to power of countless dictators. Some of the best Latin American novels portray these almost mythical figures who to this day wield absolute power in many countries. The class examines the literature and history of this phenomenon with particular attention to the twentieth century, and attempts to discover its roots in militarism, underdevelopment, and imperialism.

INSTRUCTOR(S): J. Kirk

FORMAT: Lecture/discussion/conducted in English

PREREQUISITE: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary

CROSS-LISTING: HIST 2388.03

### **SPAN 2150.03: Hispanic Identities Through Film.**

This course focuses on the concept of Hispanic identity, through the study of contemporary and historical sociocultural and geopolitical issues, as manifested in cinema from around the Spanish-speaking world.

INSTRUCTOR(S): M. Dam-Mazzi

FORMAT: Lecture/discussion/conducted in Spanish

PREREQUISITE: SPAN 2020.06

### **SPAN 2200.03: Latin American Culture: From the Maya to the 21st Century.**

The aim of this class is to provide basic understanding of this varied and historic area. This class examines the development of Latin America from pre-Columbian times to the present. It also examines the way in which the reality of Latin America has shaped a continental cultural identity.

INSTRUCTOR(S): J. Kirk, D. Pifano

FORMAT: Lecture/discussion/conducted in English

PREREQUISITE: No prerequisite. Open to students in all departments. No knowledge of Spanish necessary.

### **SPAN 2500.03: Introducción a la literatura española.**

This class is an introduction to Spanish literature presenting selected works of prose, poetry and theater from Spain. This is a survey of literature from the Middle Ages to the 20th century. Entirely conducted in Spanish, normally taken in the second or third year of study, the everyday work in this class involves group discussion and lectures. The aim of this class is to introduce students to general notions of literary history and to the basic concepts involved in reading literary texts with particular emphasis on the development of both oral and written linguistic expression.

INSTRUCTOR(S): M. J. Giménez

FORMAT: Lecture/discussion/conducted in Spanish

PREREQUISITE: SPAN 2090.03

### **SPAN 2510.03: Introducción a la literatura latinoamericana.**

This is a panoramic course that serves as an introduction to Latin American literature. It is based on a selection of prose and poetry from the most representative periods and authors, spanning from pre-Columbian times to the twentieth century.

INSTRUCTOR(S): D. Pifano

FORMAT: Lecture/discussion/conducted in Spanish

PREREQUISITE: SPAN 2090.03

### **SPAN 3020.03: Translation.**

Exercises in translation, from Spanish to English.

INSTRUCTOR(S): J. Kirk

FORMAT: Lecture/discussion

PREREQUISITE: SPAN 2020X/Y.06, or equivalent

### **SPAN 3025.03: Traducción: Inglés-Español.**

The objective of this course is to develop basic translation skills through the practice of translating English texts into Spanish. The approach would be methodological and practical: theoretical issues will be discussed to solve translation problems. After establishing the fundamental concepts, the course will progress to examine a series of important aspects of translation; cultural transposition, phonic, graphic and prosodic problems, grammatical and lexical issues, language variety in texts, etc. Each aspect outlined will have a practical component in which students are given a concrete translation task to solve. Group and class discussions will follow.

The aim of the course is to provide students with a general view of the mechanics of translation to then encourage the creative aspects of the process.

INSTRUCTOR(S): E. Santos-Montero

FORMAT: Lecture/discussion/conducted in Spanish

PREREQUISITE: SPAN 3035.03 or equivalent

### **SPAN 3035.03: Advanced Spanish I.**

The objective of this course is to reinforce and expand students' skills in listening, speaking, reading, writing, integrated with an advanced grammar review and extended vocabulary.

INSTRUCTOR(S): Staff

FORMAT: Lecture/conducted in Spanish

PREREQUISITE: SPAN 2020X/Y.06, or equivalent

EXCLUSION: SPAN 3010.03, SPAN 3015.03, SPAN 3030.03, SPAN 3060.03

**SPAN 3036.03: Advanced Spanish II.**

A continuation of SPN 3035. The objective of this course is to reinforce and expand further students' skills in listening, speaking, reading, writing, integrated with an advanced grammar review and extended vocabulary.

INSTRUCTOR(S): Staff

FORMAT: Lecture/conducted in Spanish

PREREQUISITE: SPAN 3035.03. or equivalent

EXCLUSION: SPAN 3010.03, SPAN 3015.03, SPAN 3030.03, SPAN 3060.03

**SPAN 3090.03: Spanish Phonetics and Pronunciation.**

This class seeks to introduce students to the analysis of the sound system of Spanish. Students will learn to identify and adjust non-native patterns of pronunciation through contrastive analysis, transcriptions and pronunciation practice. Students will master basic concepts and techniques of phonetic analysis and the general phonological characterization of Spanish dialects. The course will focus on the attributes of Spanish sounds, differences between the English and the Spanish sound systems, and the main differences among varieties of Spanish.

INSTRUCTOR(S): D. Rogers

FORMAT: Lecture/discussion/conducted in Spanish

PREREQUISITE: SPAN 2020X/Y.06 or equivalent

**SPAN 3095.03: Evolution of Spanish.**

This class offers a panoramic study of the evolution of spoken Latin into modern Spanish (no prior knowledge of Latin required). Topics covered will include: the major historical events that influenced the evolution of Spanish; phonological change; morphological and syntactic change; lexical borrowings from other languages; and semantic change.

INSTRUCTOR(S): D. Rogers

FORMAT: Lecture/discussion/conducted in Spanish

PREREQUISITE: SPAN 2020 X/Y.06 or equivalent

**SPAN 3110.06: Advanced Grammar II.**

This class is designed for advanced students who have already completed one such program abroad which included SPAN 3100.06 (Advanced Grammar I), and who are now undertaking another, more advanced class. The skills of Spanish language performance, both active and passive, are practiced and enhanced through various means of instruction in an environment of total immersion.

FORMAT: Lecture

PREREQUISITE: SPAN 3100.06

**SPAN 3215.03: Seminario de literatura latinoamericana.**

This class studies the work of Latin American women writers. It seeks to introduce students to critical approaches and recurring themes in Latin American women's literature. Representative works are studied within their historical and cultural context. Readings include novels, short stories, plays and caricatures.

INSTRUCTOR(S): D. Pifano

FORMAT: Lecture/discussion/conducted in Spanish

PREREQUISITE: SPAN 2090.03

**SPAN 3310.06: Cuban Culture and Society.**

See class description for INTD 3310.06 in the International Development Studies section of this calendar.

**SPAN 3500.03: Literatura española contemporánea.**

This class is a survey of the most important authors of Spanish contemporary literature. Students will study internationally well known writers such Rosa Montero, Arturo Pérez-Reverte, Manuel Vázquez Montalbán, and others. Areas of special focus may include the writings of Antonio Muñoz Molina and Eduardo Mendoza, both of whom are considered representative of the Spanish transition period. The aim of this class is to introduce students to a specific area of Spanish literature focusing on the historic context in which the novels are written.

INSTRUCTOR(S): M. J. Giménez

FORMAT: Lecture/discussion/conducted in Spanish

PREREQUISITE: SPAN 2090.03

**SPAN 3510.03: Literatura hispanoamericana contemporánea.**

This is a panoramic course that studies Latin American literature from the "boom" to the present. It is divided into five sections, each of which will focus on a literary genre: short stories, essays, journalism, theatre and novels.

INSTRUCTOR(S): D. Pifano

FORMAT: Lecture/discussion/conducted in Spanish

PREREQUISITE: SPAN 2090.03

**SPAN 3520.03: Topics in Culture & Identity in the Spanish-Speaking World.**

A broad outline of the interaction between culture and identity in the Hispanic world. Focus will be on the end of the 19th and the 20th centuries, and the connection between artists and identity in relation to political, culture and social forces. Selected works of artistic expression (art, literature, music, etc.) become the point of departure for understanding the Spanish-speaking world. Specific topics may vary.

INSTRUCTOR(S): Staff

FORMAT: Lecture/discussion/conducted in Spanish

PREREQUISITE: SPAN 2020.06 and SPAN 2090.03

**SPAN 3525.03: Historia e historias: la literatura como alternativa.**

This class is designed for advanced students who have taken the available classes at the 2000 level or equivalent. During this course students will explore the relationship between science and literature, especially subversive representations of History in fictional texts during the 20th century. Lectures will be organized on a chronological basis and will cover different Spanish-speaking cultural areas. The aim of this class is to introduce students to a specific area of Hispanic literature focusing on the historic facts included in novels and essays.

INSTRUCTOR(S): M. J. Giménez

FORMAT: Lecture/discussion/conducted in Spanish

PREREQUISITE: SPAN 2090.03

**SPAN 3905.06: Estudios hispánicos avanzados.**

This class offers the student an opportunity to study aspects of Hispanic culture not already included in other language offerings or in literature classes more narrowly defined by period, genre, etc. It takes advantage of special research interest of staff or the unique expertise of visiting faculty to provide instruction not regularly available here.

FORMAT: Lecture/conducted in Spanish

**SPAN 3920.03: Experiential Learning.**

Experiential learning combines formal learning with practical experience using the Spanish language; students are required to volunteer/intern for a minimum of 60 hours over the term, or approximately 4-5 hours per week. Students will also compile a portfolio under the supervision of the course instructor, to include relevant readings and assignments (these may include reading responses, reports, presentations, essays).

INSTRUCTOR(S): Staff

FORMAT: Discussion, conducted in Spanish

PREREQUISITE: SPAN 2020.06

**SPAN 3970.03: Lecturas dirigidas de literatura Hispanoamericana.****SPAN 3975.03: Estudios hispánicos dirigidos.****SPAN 3980.03: Lecturas para especialistas.****SPAN 4985.03: Lecturas para estudiantes de honores.****SPAN 4990.03: Honours Reading.**

MacLennan, B., BA (Dalhousie)  
Robb, M., Dip. (Sheridan)

## I. Introduction

The Dalhousie Theatre Department offers many ways to study the theatre or some aspect of it in tandem with other disciplines offered by the university.

1. You can undertake programs that lead to a university degree: an Honours or Combined Honours BA (four years), a BA with Major (four years), a General BA (three years);
2. You can enroll in a Diploma program in Costume Studies (two years) which combines academic study and research skills with creative design interpretation and applied skills;
3. You can select certain theatre classes to reinforce and complement your studies in other disciplines offered by the university;

The degree programs involve a curriculum of Theatre classes and a selection of other classes in different disciplines. The University has Academic Regulations which specify how these programs must be arranged. These regulations are all

listed earlier in this Calendar, and prospective students should refer to them to become aware of the opportunities offered. There are a surprising number of different ways to arrange one's studies; recommended here are the paths you can follow if Theatre is your primary interest.

## Facilities

The Department is located in the Theatre wing of the Dalhousie Arts Centre. The Theatre wing is a self-sufficient unit involving one proscenium theatre, two studios, and supporting workshops. Teaching spaces for costume studies are currently located off-campus. The main Departmental office is in Room 5-32 of the Arts Centre.

Because of the work involved, some theatre classes have a limited enrolment. All students wishing to take any practical class in Theatre should, therefore, first consult with the department.

PLEASE NOTE: Theatre by its nature requires evening work. Students, especially in Acting, Scenography, and Costume classes, are advised not to undertake other evening commitments.

## II. Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, page 131 of this calendar.

### A. BA Honours in Theatre

#### 1. Theatre Studies

This degree is designed for students who wish to follow a program of theatre studies that keeps the whole of theatre in perspective, is academically oriented, and serves as a strong foundation for graduate degrees in Theatre and Drama, or as a good preparation for a variety of professional and education degrees. Honours students must maintain at least a B+ average in all of their advanced Theatre classes.

##### Year 1

- THEA 1000X/Y.06
- one other full class in THEA at 1000-level
- three classes in other subjects

##### Year 2

- THEA 2011.03
- THEA 2012.03
- THEA 2901.03
- THEA 2902.03
- three full classes in other subjects

##### Years 3 and 4

- THEA 3200X/Y.06
- THEA 3501.03
- THEA 3502.03
- THEA 3600X/Y.06
- THEA 4500.03
- THEA 4501.03
- three full advanced electives in THEA
- one full advanced class in dramatic literature from another department (ENGL, CLAS, RUSS, SPAN, FREN, GERM, etc.)
- two full classes in other subjects, including THEA

An additional credit (the Honours Qualifying Project) consists of fulfilling the function of a dramaturge or assistant director on one of DalTheatre productions.

NOTE: Applications for Honours in Theatre are not considered by the Department until the winter term of the student's third year. Please enquire at the Department for the relevant deadline.

#### 2. Acting

The main objective of the Acting Program is to satisfy the needs of those students who have decided to pursue a career as performers in the professional theatre. The program is progressive in nature, culminating in a company of student actors who perform in three shows in the DalTheatre season in their fourth year. Third year students in the Acting Program will participate in the third show of the DalTheatre season. Fourth year students in the Acting Program will participate in a Class Project Workshop. Auditions are held at the end of the first year for admission into

the upper years of study. In addition to meeting degree requirements, students must achieve a B in all Acting Program classes, and must also be recommended by the Acting Faculty in order to advance to the next year's class of study. The program provides these students with professional training and the benefits of a liberal-arts education at a major Canadian university. Honours students must maintain at least a B+ average in all of their advanced Theatre classes.

#### **Year 1**

- THEA 1000X/Y.06
- THEA 1800X/Y.06
- three full classes in other subjects

#### **Year 2**

- THEA 2011.03
- THEA 2012.03
- THEA 2800X/Y.06
- THEA 2810X/Y.06
- THEA 2820X/Y.06
- one full elective in other subject

#### **Year 3**

- THEA 3800X/Y.06
- THEA 3810X/Y.06
- THEA 3820X/Y.06
- MUSC 1081.03
- 1.5 classes in other subjects

#### **Year 4**

- THEA 4800X/Y.06
- THEA 4840X/Y.06
- THEA 3501.03
- THEA 3502.03
- two classes in other subjects (one of these can be in THEA)

Honours Acting students will qualify for Honours with the satisfactory completion of a professional portfolio.

NOTE: Applications for Honours in Theatre are not considered by the Department until the winter term of the student's third year. Please enquire at the Department for the relevant deadline.

### **3. Technical Scenography**

This degree is designed for students wishing to pursue careers in technical theatre and stage design. The Technical Scenography section encompasses all areas of specialization that work together in the production of live performance. Set design, scenic carpentry, scenic painting, lighting, sound, props and stage management are taught through lectures and hands-on labs. Students in the first year of the program are required to work on one DalTheatre production, and those in second and third years work on four DalTheatre productions each year. All students must maintain at least a B- average in all Technical Scenography classes to move on to the next year, and Honours students must maintain at least a B+ average in all their advanced Theatre classes.

#### **Year 1**

- THEA 1000X/Y.06
- THEA 1050X/Y.06
- three full classes in other subjects

#### **Year 2**

- THEA 2011.03
- THEA 2012.03
- THEA 2060X/Y.06
- THEA 2070X/Y.06
- THEA 2700X/Y.06
- one full elective in other subject

#### **Year 3**

- THEA 3060X/Y.06
- THEA 3070X/Y.06
- THEA 3710X/Y.06
- two classes in other subjects

#### **Year 4**

- THEA 3501.03
- THEA 3502.03

- two full advanced level electives in theatre
- two full classes in other subjects, including up to 1 in theatre.

The Honours Qualifying Project in Technical Scenography consists of designing either set or lighting for one, or assistant-designing for two, DalTheatre productions.

NOTE: Applications for Honours in Theatre are not considered by the Department until the winter term of the student's third year. Please enquire at the Department for the relevant deadline.

NOTE: Interested students studying Technical Scenography may find occasional, paid employment with Neptune Theatre, the Rebecca Cohn Auditorium and IATSE Local 680 (International Alliance of Theatrical Stage Employees), organizations with which the Department of Theatre has a close connection.

### **4. Costume Studies**

This program combines the academic study and research skills necessary to the understanding of costume in its broadest context with the creative interpretation of design and the applied skills of the costumer whose goal is to work in the theatre, film, museums, or historical animation. Some classes in Costume Studies are open to general BA students. See individual class listings. Honours students must maintain at least a B+ average in all of their advanced theatre classes

#### **Year 1**

- THEA 1000X/Y.06
- THEA 1450X/Y.06
- TEXTL 3320 (NSCAD)
- TEXTL 2100 (NSCAD)
- two full classes in other subjects

#### **Year 2**

- THEA 2011.03
- THEA 2012.03
- THEA 2400X/Y.06
- THEA 2406X/Y.06
- THEA 2411.03
- THEA 2451X/Y.03
- one full class in other subjects

#### **Year 3**

- THEA 3401X/Y.06
- THEA 3451X/Y.06
- THEA 3454.03
- THEA 3455.03
- two full classes on other subjects

#### **Year 4**

- THEA 3501.03
- THEA 3502.03
- THEA 4406X/Y.06
- THEA 4450.03
- THEA 4452.03
- two full classes in another subjects

Upon acceptance into their program, students should contact the undergraduate advisor in the Department of Theatre for information on registering for required classes that take place at NSCAD University.

Honours students in Costume Studies will be awarded the Honours Qualifying Project upon successful completion of a 20-page research paper on an aspect of theatrical costume or historical dress, with a related applied skills project.

NOTE: Applications for Honours in Theatre are not considered by the Department until the winter term of the student's third year. Please enquire at the Department for the relevant deadline.

### **B. BA Combined Honours**

Dalhousie and University of King's College students can also combine their Theatre degrees with a number of other disciplines at the two institutions. For more specific instructions on how to set up a Combined Honours degree in Theatre and another subject, please consult the relevant departments' Undergraduate Advisors. In principle, a student who wishes to graduate with this degree must fulfil at least the minimal requirements for a three year BA and have, in the two subjects combined, the required distribution of classes.

## 1. Music and Theatre

In addition to these Combined Honours degrees, the Departments of Theatre and Music also offer a highly specialized four year BA with Combined Honours in Music and Theatre which blends the principal classes of the Bachelor of Music minor in voice with Theatre classes in Acting, Movement and Voice and Speech. Students must audition for both the Music and Theatre Departments: a maximum of five students will be selected for entrance into the program each year. The graduate of this program will advance toward a professional career in the performing arts equipped with a foundation in music and theatre.

Students must successfully complete the audition/entrance tests for the first year of the Music Program. Students must also audition for, and be accepted into, the Acting Program in the Department of Theatre. The prerequisite for auditioning is the successful completion of THEA 1800X/Y.06.

Students planning to take this program must advise the Theatre Department Student Advisor.

To qualify for graduation a student must participate by having a significant role in at least one staged musical production (either as an integral part of DalTheatre Productions, or Opera Workshop).

NOTE: Students having to withdraw from this Program through failure to achieve the required standards in Theatre classes must re-audition if they wish to complete a Degree Program in Music. Students having to withdraw from this Program through failure to achieve the required standards in Music Classes must re-apply to the Department of Theatre if they wish to complete a Degree Program in Theatre.

### Year 1

- MUSC 1101X/Y.06
- MUSC 1201.03
- MUSC 1202.03
- MUSC 1270X/Y.03
- MUSC 1271X/Y.03
- THEA 1000X/Y.06
- THEA 1800X/Y.06
- Ensemble: Chamber Choir/Opera Workshop

### Year 2

- MUSC 2101X/Y.06
- MUSC 2201.03
- MUSC 2202.03
- MUSC 2270.03
- MUSC 2271X/Y.03
- THEA 2800X/Y.06
- THEA 2820X/Y.06
- Ensemble: Chamber Choir/Opera Workshop

### Year 3

- MUSC 3101X/Y.06
- THEA 3800X/Y.06
- THEA 3820X/Y.06
- one required full elective
- Ensemble: Chamber Choir/Opera Workshop

### Year 4

- MUSC 4101X/Y.06
- THEA 4800X/Y.06
- THEA 4840X/Y.06
- two remaining required full electives
- Ensemble: Chamber Choir/Opera Workshop
- Honours Music and Theatre students will complete the Honours Qualifying Project by their satisfactory participation in DalTheatre productions.

## C. BA (20 credit) Major in Theatre

A student may take a 20 credit Major program in Theatre (in Theatre Studies, Acting, Scenography and Technical Scenography or Costume Studies), following consultation with the Departmental Undergraduate Advisor. As in the case of a BA with Combined Honours, it is also possible to set up a Double Major in Theatre and another subject. In this case, a student must fulfil at least the minimal requirements for a three year BA and have the required distribution of classes in the two majoring subjects as outlined in the Degree Requirements section of this Calendar.

## D. BA (15 credit) Minor in Theatre

This degree is designed for students who want to take a general liberal-arts degree in Theatre, would like to acquire a broad and varied knowledge of its various aspects, or are not interested in specializing. Students are advised to take THEA 1000X/Y and one other full credit in THEA at the 1000 level, although these do not count toward the minor.

See requirements below.

## E. Minor in Theatre

Three full credits at or above the 2000 level, to be selected from:

- THEA 2000X/Y.06: Theatre Performance
- THEA 2011.03: Classical Theatre
- THEA 2012.03: Early Modern Theatre
- THEA 2020.06: Jazz Dance I
- THEA 2214X/Y.06: Shakespeare
- THEA 2229.03: Tragedy
- THEA 2313.03: Shakespeare and his Contemporaries on Film
- THEA 2400X/Y.06: Cave to Cafe: Costume and Identity from Antiquity to 1700
- THEA 2411.03: Designers' Language
- THEA 2700X/Y.06: Scenography I
- THEA 2841.03: Speak with Confidence: Voice for Non-Majors
- THEA 2901.03: Production Dramaturgy
- THEA 2902.03: Play Analysis for Directing
- THEA 2911.03: Stars and Stardom in Stage and Screen
- THEA 3010X/Y.06: The History of Musical Theatre
- THEA 3015.03: Renaissance Drama
- THEA 3020.06: Jazz Dance II
- THEA 3200X/Y.06: The Director in the Theatre
- THEA 3401X/Y.06: Dress and Identity: King's Court to Mass Culture, 1700-Present
- THEA 3501.03: The Modern Theatre 1: Realism and Responses
- THEA 3502.03: The Modern Theatre 2: High Modernism
- THEA 3600X/Y.06: The Playwright in the Theatre
- THEA 3751X/Y.06: Modern German Drama
- THEA 3911.03: Gender in Theatre: A Cross-Cultural Survey
- THEA 3912.03: Gender Theory and Contemporary Performance
- THEA 3913.03: English Drama 1660-1800
- THEA 3914.03: Topics in Italian Drama and Spectacle
- THEA 4500.03: Canadian Theatre to 1968: Performing the Nation
- THEA 4501.03: Canadian Theatre Since 1968: Interrogating Identities
- THEA 4700X/Y.06: Special Topics I
- THEA 4735X/Y.06: Advanced Seminar in Baroque Culture
- THEA 4900X/Y.06: Theory and Criticism of Drama and Theatre
- THEA 4921.03: Special Topics II
- THEA 4922.03: Topics in Theatre History
- THEA 4923.03: Topics in Dramatic Literature
- THEA 4931.03: Contemporary Theatre

## F. Minor in Popular Culture Studies

### Requirements

Students seeking a minor in Popular Culture Studies will be expected to take 3.5 credits beyond the 1000 level, with one full credit at or above the 3000 level, and with no more than 1.5 credits taken in a single department. Appropriate courses can be chosen from the following list (22 credits):

2.5 credits from:

- CTMP 2336/CHIN 2052.03: East Meets West in Popular Culture
- EMSP 2313: The Vampire
- EMSP 2320: Witchcraft in Early Modern Europe
- EMSP 2480: The Pirate and Piracy
- ENGL 2006: Cultural Studies
- ENGL 2080: Cartoons & Comics
- ENGL 2095: Narrative in the Cinema
- ENGL 2231: Foundations of Science Fiction
- ENGL 2232: Contemporary Science Fiction
- ENGL 2235: Tolkien: Fantasy & Medievalism
- MUSC 2016: Topics in Music and Cinema
- MUSC 2018: Popular Music Until 1960
- MUSC 2019: The Rock'n'Roll Era and Beyond

- MUSC 2020: The History of Jazz
- \*THEA 2360: Popular Cinema

One full credit from:

- CTMP 3322: Representations of the Holocaust: Remembrance
- CTMP 3305: Modern Film and the Theory of the Gaze
- ENGL 3300: TV: Theory & Criticism
- ENGL 3301: Graphic Novels
- FREN 3750: Littérature industrielle, roman populaire et roman de consommation. - Popular Literature and the Rise of Mass Culture
- FREN 3730: La bande dessinée franco-belge - The Franco-Belgian Comic Strip
- JOUR 3560: Great Journalists
- MUSC 4354: Popular Music Analysis
- THEA 2400X/Y: Cave to Café: Costume and Identity from Antiquity to 1700
- THEA 2911: Stars and Stardom on Stage and Screen
- THEA 3912: Gender Theory and Contemporary Performance
- THEA 4391: Special Topics in Popular Cinema

## G. Costume Studies, Diploma in two years

After successful completion of this program, students may upgrade their DCS to a BA in Theatre (Costume Studies). Students pursuing the Diploma in Costume Studies are required to combine the classes in the following manner:

### Year 1

- THEA 1450X/Y.06
- THEA 2400X/Y.06
- THEA 2406X/Y.06
- THEA 2411.03
- THEA 2451X/Y.03
- TEXTL 3320 (NSCAD)
- TEXTL 2100 (NSCAD)

### Year 2

- THEA 3401X/Y.06
- THEA 3451X/Y.06
- THEA 3454.03
- THEA 3455.03
- THEA 4406X/Y.06
- THEA 4450.03
- THEA 4452.03

## III. Class Descriptions

NOTE: Not all classes are offered every year. Please consult the current timetable to determine if these classes are offered in the current year.

### THEA 1000X/Y.06: Introduction to Theatre.

The purpose of this class is twofold: first, to introduce students to the study of theatre through analysis of a range of plays related to the DalTheatre season; and second, to instruct students in the methodology of writing in the humanities. Students will learn about the theatrical production process and practice skills of script and performance analysis. Students will address specific problems within their papers and discuss questions on an individual basis in writing tutorials. This class fulfills the writing requirement of Dalhousie University and is a prerequisite for all Theatre majors.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Writing Requirement, lecture/tutorial 3 hours

### THEA 1050X/Y.06: Introduction to Theatre Organization and Stagecraft.

This class takes the student behind the scenes to understand how a play is brought to life. Scenography is discussed and explored. Students are introduced to scenic design and scenic carpentry, props, sound, lighting, stage management and costume. How a script is staged determines how an audience will understand the ideas inherent in the script. Methods and procedures for theatre productions make up the substance of this class. Students are expected to work with power tools and are required to work on one DalTheatre Production, which will include evening and weekend work outside of class time. Some supplementary equipment is required for this class.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture 2 hours, lab 4 hours

### THEA 1300X/Y.06: Introduction to Film.

This class is a general introduction to film studies. It examines film genres and history, the component elements of film, the diversity of cinema industries and institutions, and the medium's impact on society. It also instructs students in the methodology of writing in the humanities and fulfils the writing requirement of Dalhousie University.

NOTE: Students taking this class must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Writing Requirement, lecture/tutorial 3 hours

### THEA 1450X/Y.06: Introduction to Costume Studies.

This class serves as an introduction to costume in its broadest context, enabling students to acquire a basic understanding of creating costume for the stage. Both modern and historical costume creation techniques are explored and mastered by students in preparation for more advanced study of costume in subsequent years of the Costume Studies Programme. This class is a prerequisite for all other Costume Studies classes.

NOTE: Students taking this class must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture/lab 4.5 hours

### THEA 1800X/Y.06: Introduction to Acting and Performance.

This class is designed to provide the beginning acting student with an understanding of what it is to act, and to introduce some basic performance techniques. The approach will be practical, focusing on three major sections throughout the year: Space, Character, and Action. Each unit will be comprised of exercises and scene study, the texts of which will range from classical to contemporary. Explorations will be centred on group dynamics, requiring commitment, concentration, and full-bodied participation, which will strengthen communication, teamwork and improvisational skills. Students will challenge themselves physically, vocally, and imaginatively, while working with others to create a safe, dynamic environment.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms. THEA 1800X/Y.06 is the pre-requisite for an audition for the Acting Program.

FORMAT: Lab/seminar 3 hours

### THEA 2000X/Y.06: Theatre Performance.

This class is designed to provide experience in performance outside the Acting Programme. Through practical theatre exercises and performance assignments, students experience and discuss elements which contribute to theatre performance. This class will not serve as a prerequisite to the Acting Programme, but is suitable for students having completed THEA 1800, or any student interested in cultivating self-confidence, communication, and performance skills.

NOTE: Students taking this class must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture/lab 3 hours

RESTRICTION: Students cannot register for THEA 1800 and THEA 2000 at the same time.

### THEA 2011.03: Classical Theatre.

This class gives students an opportunity to study the dramatic literature, staging practices, and theoretical foundations of the early history of theatre. Specific topics covered include ancient Greek, Roman, and medieval European performance, as well as classical Indian and Japanese theatres. Although there is no formal prerequisite for the class, students should normally be in their second year of study. A background in theatre, history, and/or dramatic literature will be an advantage.

FORMAT: Lecture/seminar 3 hours

### THEA 2012.03: Early Modern Theatre.

This class is in a sense the sequel to THEA 2011.03, though that class is not a prerequisite. It aims to study the development of dramatic literature, staging practices, and criticism from the theatres of the Italian Renaissance and of Shakespeare to European Romanticism, as well as early modern Asian theatres. There is no formal prerequisite, but students should normally be in at least the second year of study. A background in history, theatre and/or dramatic literature will be an advantage.

FORMAT: Lecture/seminar 3 hours

### THEA 2020.06: Jazz Dance I (Spring Session Only).

This class is a practical exploration into the Luigi Jazz Dance technique, incorporating the use of space, rhythm, and correct body alignment. Emphasis is

on the development of personal expression through the medium of dance. Students are expected to develop an awareness of dance terminology and vocabulary.  
 FORMAT: Lab/demonstration/lecture  
 CROSS-LISTING: MUSC 2130.06

### **THEA 2060X/Y.06: Technical Scenography I.**

The theories behind the operation of lighting, sound, construction, and properties, as well as the advances in technology and their expense and adaptability, form part of this class. Lecture periods are concerned with stage management, lighting and sound, construction, properties, and other related topics.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms.

FORMAT: Lecture/lab 6 hours  
 PREREQUISITE: THEA 1050X/Y.06  
 CO-REQUISITE: THEA 2070X/Y.06

### **THEA 2070X/Y.06: Performance Technology I.**

This class is concerned with the more complex problems of the preparation of theatre production in lighting, sound, scenic carpentry, scenic painting, and properties. Workshop preparation in light and sound, properties, and construction is integrated with crew responsibilities in department productions. Students are required to work on four (4) productions staged under Departmental supervision. These productions will require work outside of class time on evenings and weekends. This class is the practical application of THEA 2060X/Y.06.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms.

FORMAT: Lab 6 hours  
 PREREQUISITE: THEA 1050X/Y.06  
 CO-REQUISITE: THEA 2060X/Y.06

### **THEA 2214X/Y.06: Shakespeare.**

An introduction to Shakespeare's career as a playwright, through discussion and interpretation of a dozen or more of his plays.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms.

FORMAT: Lecture/discussion  
 PREREQUISITE: ENGL 1000X/Y.06; or any two of ENGL 1010.03, 1020.03, 1040.03, or THEA 1000X/Y.06; or the King's Foundation Year Program  
 CROSS-LISTING: ENGL 2214.06

### **THEA 2229.03: Tragedy.**

This class studies a representative selection of texts from various historical periods in order to arrive at an understanding of the meaning of tragedy. Various definitions of tragedy will be examined along with such possible questions as: how has tragedy changed over time, and what is tragicomedy.

FORMAT: Lecture/discussion  
 PREREQUISITE: ENGL 1000X/Y.06; or any two of ENGL 1010.03, 1020.03, 1040.03, or THEA 1000X/Y.06; or the King's Foundation Year Program  
 CROSS-LISTING: ENGL 2229.03  
 EXCLUSION: ENGL 2226.06

### **THEA 2301.03: Film History I.**

This course surveys the history of film from its invention in the 1890s to the 1950s. Students will learn about the aesthetic, social and technological changes that affected the development of cinema. The course includes the study of silent film and the Classical Hollywood cinema, as well as artistic movements such as Expressionism and Soviet Montage.

FORMAT: Lecture/discussion  
 EXCLUSION: THEA 2300X/Y.06 and NSCAD AHIS 2800.03

### **THEA 2311.03: Film Analysis.**

This course introduces students to the close textual analysis of narrative films. To this end, a few films will be studied in depth. Their formal properties, such as mise-en-scène, sound, cinematography, and editing, will be analyzed and situated in social and historical context. Through screenings, readings, lectures, discussions and exercises, students will develop their technical vocabulary and skills in film interpretation.

FORMAT: Lecture/discussions

### **THEA 2314.03: Survey of Italian Cinema.**

Class to be held in English; with part of the course work in Italian for Italian majors. Survey of the Italian Cinema from the origins onwards. Focus: the 'golden age' of Italian silent movies; visual culture under fascism; Italian neo-realism; the impact of television.

FORMAT: Lecture  
 CROSS-LISTING: ITAL 2600.03

### **THEA 2336.03: Russian Film I.**

This course surveys Russian film from the Silent Era to "Thaw" (1900-1960s). Its goal is to develop students' knowledge of cinema in its historical and cultural context through critical watching, reading, thinking, and writing. The course will concentrate on the development of main genres and styles in Russian and official Soviet Cinema, major directors and styles. Full versions of films will be screened each Monday night. Later in the week they will be followed by a lecture, discussion, and viewing additional short clips.

FORMAT: Lecture/discussion  
 CROSS-LISTING: RUSN 2036

### **THEA 2337.03: Russian Film II.**

This course will provide an overview of the most significant trends and periods in the development of Russian cinema since the 1960s until the latest blockbusters. The course will concentrate on the development of main genres and styles, major directors and productions, issues of race, gender, war and violence in Soviet, post-Soviet and new Russian cinema.

FORMAT: Lecture/discussion  
 CROSS-LISTING: RUSN 2037.03

### **THEA 2346.03: East European Cinema: War, Love, and Revolutions.**

This course brings post-Berlin Wall European film into the fray of current debates on cultural identity, transnational cinema, and postcolonialism. Despite the state control, the filmmakers of communist Europe were often more bold, honest and provocative than their profit-driven Hollywood counterparts. By drawing on political, cultural, and philosophical discourses, the course will offer pointed analyses of most significant East European films that touch upon issues of ethnicity, gender, and overcoming censorship.

FORMAT: Lecture/discussion 3 hours  
 CROSS-LISTING: RUSN 2046.03

### **THEA 2350.03: Studies in Film Directors.**

This course offers students the opportunity to study in detail the work of an individual film director. Aesthetic, political, philosophical and/or ethical issues related to the director's work will be studied via close analysis of his/her most significant films. The identity of the director to be studied will be posted on the Academic timetable.

FORMAT: Lecture/discussion

### **THEA 2360.03: Popular Cinema.**

This course helps students develop their critical understanding of popular cinema. It introduces different approaches to the analysis of popular film, and considers principles of production, distribution, exhibition and reception in major industries such as Hollywood and popular Hindi and Hong Kong cinemas. Throughout, it addresses the implications of the concept of "popular cinema."

FORMAT: Lecture/discussion  
 EXCLUSION: THEA 2320.06

### **THEA 2370.03: Animated Film.**

This course is an overview of different forms of animated film and key topics and debates in the field of animation studies. Emphasis is on Canadian, US American and Japanese animation, but examples will be drawn from a variety of regions, and will range from old to new and popular to experimental. The course will focus on cultural approaches, theoretical questions posed by specific types of animation, and historical developments.

FORMAT: Lecture, discussion, screening

### **THEA 2400X/Y.06: Cave to Café: Costume and Identity from Antiquity to 1700.**

An introduction to the study of human social behaviour and its relationship to the development of body coverings, this survey class begins with the earliest Mediterranean cultures, Ancient Egypt, Greece and Rome, and continues through to the end of the seventeenth century. This class may be taken by general BA students, and is also part of the Costume Studies Programme.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion 3 hours  
 PREREQUISITE: General BA students must have completed the writing requirement.

For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06

For Diploma in Costume Studies: See Costume Studies class combinations.

### THEA 2406X/Y.06: The Aesthetics of Contemporary Dress.

By examining the aesthetics of contemporary dress, this class will enable the student to understand established systems used to create clothing, utilizing body image as principle means. Through the study and application of systematic principles, the student will gain a better understanding of people's need to define body image in terms of ornamental self-expression and social identification. This class is also part of the Costume Studies Programme.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 4.5 hours

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06

For Diploma in Costume Studies: See Costume Studies class combinations.

RESTRICTION: Costume Studies degree or diploma students only

### THEA 2411.03: Designers' Language.

This class explores components of costume design, offering a discourse on design language, color theory, structure, and decoration as they relate to costumes for the theatre. Through lecture and practical application, the student will learn how to design costumes, choose fabrics, interpret scripts and develop characters, leading to a better understanding of theatrical characterization. This class may be taken by general BA students, and is also a part of the Costume Studies Programme.

FORMAT: Lecture/demonstration 3 hours

PREREQUISITE: General BA students must have completed the writing requirement.

For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06

For Diploma in Costume Studies: See Costume Studies class combinations.

### THEA 2451.03: Costume in Performance I.

In this year the student will apply the knowledge from THEA 1450X/Y to research, illustrate and create modern and historical costume designs for the stage. In addition, students work on productions in order to understand the integral role played by costume in staging a play, in an actor's character development, and in body image and representation.

This class is part of the Costume Studies Program.

FORMAT: Lecture 3 hours

PREREQUISITE: For BA in THEA (Costume Studies) Students: THEA 1000.06, THEA 1450.06

CO-REQUISITE: For Diploma in Costume Studies Students: THEA 1450.06, THEA 2400.06, THEA 2406.06, THEA

2411.03, TEXTL 2000 (NSCAD), TEXTL 2100 (NSCAD)

RESTRICTION: Limited to BA in Theatre (Costume Studies) and Diploma in Costume Studies students

### THEA 2700X/Y.06: Scenography I.

This course is designed to acquaint the student with the language, techniques and conventions involved in the field of scenography. In the first semester, students will develop basic abilities in visual composition, watermedia and drafting. In the second half, model building, text analysis, research and three-dimensional space development will be taught. Assignments will emphasize practical skills and will culminate in a full design process.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 6 hours

### THEA 2800X/Y.06/THEA 2810X/Y.06/THEA 2820X/Y.06: The Discovery Year.

The second year of the Acting Program introduces students to the fundamental principles of acting through the study of Shakespearean text, voice and movement. Emphasis is placed on the discipline and dedication that is the basis for a career in the professional theatre. In addition to meeting degree requirements, students must achieve a B in all Acting Program classes, and must also be recommended by the Acting Faculty in order to advance to the next year's class of study.

NOTE: Students taking these classes must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

### THEA 2800X/Y.06: Acting II.

The second year of the Acting Programme introduces students to classical theatre performance approaches through the exploration of the texts of William Shakespeare. Using his sonnets, soliloquies and scenes, students will discover performance clues within the author's text and explore characterization, dramatic situations and action, and the interpretation of dramatic text. Emphasis is placed

on the need for clarity in expressing and communicating these works and on the dedication to craft and discipline necessary to do so.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 6 hours

PREREQUISITE: THEA 1800X/Y.06 and audition

CO-REQUISITE: THEA 2820X/Y.06, THEA 2810X/Y.06

### THEA 2810X/Y.06: Voice and Speech II.

This class focuses on developing the speaking voice. It is an introduction to mind/body/voice awareness, the anatomical and physiological aspects of phonation, and the care of the voice. This introduction includes exploration and drilling of the primary breathing and phonating muscles with the object of releasing the voice and developing an open, flexible sound. Focusing of the mind, alignment of the spine, releasing of unnecessary and habitual tensions, exploration of resonating cavities, pitch, volume/power, and articulation, as well as exploration of a variety of text will all be investigated.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: THEA 1800X/Y.06 and audition

CO-REQUISITE: THEA 2800X/Y.06, THEA 2820X/Y.06

### THEA 2818X/Y.06: Voice and Speech II.

This class focuses on developing the speaking voice. It is an introduction to mind/body/voice awareness, the anatomical and physiological aspects of phonation, and the care of the voice. This introduction includes exploration and drilling of the primary breathing and phonating muscles with the object of releasing the voice and developing an open, flexible sound. Focusing of the mind, alignment of the spine, releasing of unnecessary and habitual tensions, exploration of resonating cavities, pitch, volume/power, and articulation, as well as exploration of a variety of text will all be investigated.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: THEA 1800X/Y.06 and audition

CO-REQUISITE: THEA 2800X/Y.06, THEA 2820X/Y.06

### THEA 2820X/Y.06: Dance and Movement II.

The class is designed to develop and enhance the acting student's practical knowledge of movement through the discipline of jazz dance. This is manifest through a practical exploration of the Luigi jazz dance technique, incorporating the use of space, rhythm, and correct body alignment. Students are expected to develop a working vocabulary of dance terminology.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab/demonstration/lecture 3 hours

PREREQUISITE: THEA 1800X/Y.06 and audition

CO-REQUISITE: THEA 2800X/Y.06, THEA 2810X/Y.06

### THEA 2841.03: Speak With Confidence: Voice for Non-Majors.

This class is designed to enable the student to use the speaking voice effectively, to communicate freely and easily, with clarity and conviction, thereby strengthening his or her presentation skills. This course will be practical in nature. Exercises and explorations will initially be centred on group dynamics and will require commitment, concentration and full-bodied participation. Many aspects of voice use will be covered, including release of the body, alignment of the spine, breathing, resonance, pitch, volume and power, articulation, working with an intention, and care of the voice. The focus of the class will be on self-discovery as well as awareness of others. Students will also have the opportunity to make individual presentations and receive feedback accordingly. Guest speakers/artists may be invited to visit the classroom.

FORMAT: Lecture/lab 3 hours

EXCLUSION: All advanced Acting classes

### THEA 2901.03: Production Dramaturgy.

This course introduces students to the dramaturgical work of dramaturges and directors in the theatre. Students will learn skills including the presenting of research, the preparation of playtexts, the adapting of playtexts for new theatrical contexts, and the creation of theatrical seasons and programs.

FORMAT: Lecture/discussion

PREREQUISITE: THEA 1000.06 or permission of the instructor

EXCLUSION: THEA 2900.06

**THEA 2902.03: Play Analysis for Directing.**

This class introduces students to the director's process in analyzing a dramatic script for performance. Working with plays from a range of periods and genres, students will explore key theoretical approaches to directorial analysis, will learn the director's core vocabulary, and will apply these discoveries to practical scene work.

FORMAT: Lecture/seminar 3 hours

PREREQUISITE: THEA 1000.06 or Permission of the Instructor

EXCLUSION: THEA 2900.06

**THEA 2911.03: Stars and Stardom on Stage and Screen.**

What makes a 'star' actor? How do stars' gifts and idiosyncrasies interact with the possibilities of their media and with market forces to create celebrity? This course explores stage and screen stardom as historical, aesthetic, and economic phenomena that illuminate shifting constructions of beauty, class, gender, sexuality, race, and ethnicity.

FORMAT: Lecture/discussion 3 hours

**THEA 3015.03: Renaissance Drama.**

This class will explore the richness and strangeness of some of the playwrights too often obscured by Shakespeare's shadow. Between the opening of the first professional playhouse in London (1576) and the closing of the theatres by Parliament (1641), the Globe was only one of many venues catering to an avid theatre-going public, and the first English play by a woman was circulated in manuscript. Playwrights to be studied include Christopher Marlowe, Ben Jonson, Thomas Middleton, John Webster, Elizabeth Cary and John Ford.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000X/Y.06; or any two of ENGL 1010.03, 1020.03, 1040.03, or THEA 1000X/Y.06; or the King's Foundation Year Program

CROSS-LISTING: ENGL 3015.03

**THEA 3020.06: Jazz Dance II. (Spring Session only).**

The class is the continued practical exploration into the Luigi Jazz Dance Technique at the intermediate level. Emphasis is on the development of personal expression through the medium of dance. Students must have a basic foundation in dance technique.

FORMAT: Lab/demonstration/lecture

PREREQUISITE: THEA 2020 or approval of instructor (interview)

CROSS-LISTING: MUSC 3130.06 (spring session only)

**THEA 3060X/Y.06: Technical Scenography II.**

This class is designed to supplement Performance Technology II and is a continuation of THEA 2060X/Y.06 covering the topics in greater detail. NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 6 hours

PREREQUISITE: THEA 2060X/Y.06, THEA 2070X/Y.06

CO-REQUISITE: THEA 3070X/Y.06

**THEA 3070X/Y.06: Performance Technology II.**

This is an advanced class in production technology. Students work intensively in the areas of: scenic carpentry, scenic painting, props, lighting and sound, or stage management. Students are required to work on four (4) productions staged under Departmental supervision. These productions will require work outside of class time, on evenings and weekends. Each student also serves as a crew head where possible for at least two (2) productions staged under Departmental supervision. NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab 6 hours

PREREQUISITE: THEA 2060X/Y.06, THEA 2070X/Y.06

CO-REQUISITE: THEA 3060X/Y.06

**THEA 3200X/Y.06: The Director in the Theatre.**

This class explores in theoretical and practical terms the various functions of the director in creating a theatrical event. Topics include the historical role of the director, conceptualizing scripts, working with a dramaturg, relationships with actors, and the script development process. Laboratory exploration of practical problems related to the above topics will form an integral part of the class.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: THEA 2901.03, THEA 2902.03, and permission of instructor

**THEA 3301.03: Film History II.**

This course surveys the history of film from the 1950s until the present day. Students will learn about the aesthetic, social and technological changes that affected the development of cinema. The course includes the study of radical 1960s movements such as the French New Wave, and the birth of auteurist cinema in the European and Hollywood film industries. It also introduces students to the concept of national cinema with a study of global film industries, and concludes with a study of the digital revolution in contemporary cinema.

FORMAT: Lecture/discussion

PREREQUISITE: Recommended THEA 2301.03

EXCLUSION: THEA 2300X/Y.06 and NSCAD AHIS 2810.03

**THEA 3313.03: Documentary, Experimental and Animated Film.**

This course introduces students to the historical, social, ethical and aesthetic dimensions of documentary, experimental and animated cinema. The course is taught through lectures, discussions, film screenings and readings.

FORMAT: Lecture/discussion

PREREQUISITE: THEA 2311.03 or permission of the instructor

EXCLUSION: THEA 2312.03 and NSCAD AHIS 3850.03

**THEA 3314.03: Shakespeare and his Contemporaries on Film.**

This course will study the adaptation of Shakespeare and his contemporaries to the medium of cinema, focusing on the differences between theatre and cinema, the process of textual adaptation, the updating of classic stories to modern settings, and the close analysis of the performer's choices.

FORMAT: Lecture/seminar

PREREQUISITE: Experience in Shakespeare at any level OR experience in Film Studies at any level.

CROSS-LISTING: ENGL 3314.03

EXCLUSION: THEA 2313.03, ENGL 2313.03

**THEA 3320.03: Italian National Cinema.**

The focus of the course: the New Wave of Italian cinemas, which has received international recognition since the 1960s. Its aim to investigate Italian film production within the social and cultural climate of contemporary Italy.

FORMAT: Lecture/seminar

PREREQUISITE: ITAL 2010

CROSS-LISTING: ITAL 3600

**THEA 3330.03: Film Theory I.**

This course will survey and discuss the major cinematic theories of the twentieth century: from formalism and realism to Lacanian psychoanalysis and post-structuralism, from film semiotics and feminist theory to postmodern debates and approaches which sought to define new terminology and new methodologies for the study of the moving images.

FORMAT: Lecture/Discussion

PREREQUISITE: Previous Film Studies course or permission of the instructor

**THEA 3331.03: Film Theory II: Desire in Cinema.**

This course focuses on theories of gender, sexuality and desire in the cinema. It addresses debates around the representation of gender, sexuality and desire on screen, as well as theories of spectatorial desire.

FORMAT: Lecture/discussion

PREREQUISITE: Previous Film Studies course or permission of the instructor

CROSS-LISTING: GWST 3331.03

**THEA 3350.03: Topics in Asian Cinema.**

Each year will focus on specific topics as explored in the cinema of various Asian countries. Particular attention will be paid to how Asian filmmakers employ different cinematic genres in their treatments of diverse aspects of Asian societies and cultures.

FORMAT: Film screening with lecture/discussion

CROSS-LISTING: CHIN 3050.03

**THEA 3351.03: The Cinema of David Lynch.**

David Lynch is one of the most fascinating filmmakers alive today. His work includes relatively mainstream and popular successes, such as *The Elephant Man* and the TV series *Twin Peaks*, along with more difficult cult films such as *Eraserhead*, *Lost Highway* and *Mulholland Drive*. In this course, students will engage in close analysis of Lynch's works, his source material, and his inspirations.

FORMAT: Lecture/discussion

PREREQUISITE: Any of the core courses in the Film Studies Minor (THEA 2301, 2311, 3301, 3313) or permission of the instructor.  
EXCLUSION: THEA 3311 X/Y.06

### THEA 3371.03: Experimental Film.

This is a survey of experimental cinema. The films studied attempt to revise the basic grammar of film; they do not assume that film is about narrative or even representation, but that it is a fundamentally visual art, often closer to painting or printmaking than to the novel or the theatre. The course will cover films from a range of time periods and regions, and examine a variety of experimental movements.

FORMAT: Lecture, discussion, screening

PREREQUISITE: THEA 2311

### THEA 3401X/Y.06: Dress and Identity: King's Court to Mass Culture, 1700-Present.

This is a survey class which will trace the development of dress through the eighteenth, nineteenth, and twentieth centuries, showing its evolution from the period when the fashion aesthetic was determined by the Courts, to the time of the rise of the common man as the arbiter of taste. Concentration in this class will be placed on dress worn in England and France, but students may explore costume from other countries as individual topics of research. Emphasis will be placed on the social and cultural aspects of dress history, using slides of representative works of art, films, and artifacts as visual documentation for each period.

NOTE: Students registering in this class must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture 3 hours

PREREQUISITE: General BA students must have completed the writing requirement. For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, 1450X/Y.06, 2011.03, 2012.03, 2400X/Y.06, 2406X/Y.06, 2411.03, 2451X/Y.03.

For Diploma in Costume Studies, see Costume Studies class combinations in calendar.

EXCLUSION: THEA 4400X/Y.06

### THEA 3451X/Y.06: Costume in Performance II.

In this class students will demonstrate their fluency in costume creation with design interpretations for theatrical production. Students will examine problems related to costume as an expression and extension of theatrical character development. The Theatre Department productions provide a venue for students to develop interpersonal and technical skills. Students work as an integral part of a team. This class is part of the Costume Studies Programme.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 8 hours

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, 1450X/Y.06, 2011.03, 2012.03, 2400X/Y.06, 2406X/Y.06, 2411.03, 2451X/Y.03.

For Diploma in Costume Studies: See Costume Studies class combinations.

EXCLUSION: THEA 3540.06

RESTRICTION: Costume Studies degree or diploma students only.

### THEA 3454.03: Body-Shaping Through Historical Tailoring II.

This class introduces the student to the process of tailoring as it originated in the Renaissance, and its development down to the twentieth century. Emphasis is placed on the purpose of underpaddings, understructures and the techniques of fixing them in place. This class is part of the Costume Studies Programme.

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, THEA 1450X/Y.06, THEA 2011.03, THEA 2012.03, THEA 2400X/Y.06, THEA 2406X/Y.06, THEA 2411.03, 2451X/Y.03

For Diploma in Costume Studies: See Costume Studies class combinations.

RESTRICTION: Costume Studies degree or diploma students only.

### THEA 3455.03: Body-Shaping Through Historical Tailoring I.

The "Systems" of Pattern Drafting from the early nineteenth century to the twentieth century. Utilizing traditional tailoring techniques, the process of creating professional tailored garments is studied in detail. This class is part of the Costume Studies Programme.

FORMAT: Lecture/lab 4.5 hours

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, 1450X/Y.06, 2011.03, 2012.03, 2400X/Y.06, 2406X/Y.06, 2411.03, 2451X/Y.03.

For Diploma in Costume Studies: See Costume Studies class combinations.

RESTRICTION: Costume Studies degree or diploma students only.

### THEA 3500X/Y.06: The Modern Theatre.

From the rise of realism in the 1870s to the emergence of postmodern performance one hundred years later, modernist theatre was characterized by successive bursts of creative energy and experiment. This class gives an opportunity to study these developments in detail and to examine several important theatrical theories and their application.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/seminar 3 hours

PREREQUISITE: THEA 2011.03 and THEA 2012.03 or permission of the instructor

### THEA 3501.03: The Modern Theatre 1: Realism and Responses.

From the 1870s until the coming of the First World War, the theatre underwent a series of radical transformations. This class explores the key theatrical movements of this period, including realism, naturalism, symbolism, and expressionism, and compares the theories behind them to the plays, stagecraft, and performance techniques they produced.

FORMAT: Lecture/seminar/discussion 3 hours

PREREQUISITE: THEA 2011.03 and THEA 2012.03 or permission of the instructor

CROSS-LISTING: ENGL 3501.03

EXCLUSION: THEA 3500 X/Y.06

### THEA 3502.03: The Modern Theatre 2: High Modernism.

From the close of WWI to the 1960s, theatrical modernists sought new artistic forms for a rapidly changing world. This class introduces students to major forms of theatrical modernism from Dada and Theatre of Cruelty through Epic Theatre and Biomechanics to Absurdism, and considers their legacy for the contemporary stage.

FORMAT: Lecture and seminar

PREREQUISITE: THEA 3501.03 or Permission of the Instructor

CROSS-LISTING: ENGL 3502.03

EXCLUSION: THEA 3500 X/Y.06

### THEA 3600X/Y.06: The Playwright in the Theatre.

This class studies the play as a vehicle for performance rather than as a literary work. Through weekly writing exercises dealing with specific dramaturgical problems, the craft of play-writing is explored. With this background, the class then writes plays which are revised, critiqued, and given a public presentation.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: THEA 2901.03, THEA 2902.03, and/or permission of the instructor

### THEA 3710X/Y.06: Scenography II.

This class is for theatre honours and special scenography students only. It builds on the knowledge gained in the previous class in the field, THEA 2700X/Y.06, as far as visual knowledge is concerned, and from technical knowledge acquired in THEA 2060X/Y.06/THEA 2070X/Y.06.

The goal of this course is to expose, explore and develop methods of visual communication within the design process of scenography. Students are given a schedule that will foster quick solutions, creating an environment conducive to the project or play assigned. Students will then begin to learn how to find and apply research as it relates to a design. The second portion of the course will provide students with experience in drafting and model building that will culminate in several portfolio-quality design projects in the spring semester.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 6 hours

PREREQUISITE: THEA 2060X/Y.06, 2070X/Y.06, 2011.03, 2012.03, 2700X/Y.06

### THEA 3751X/Y.06: Modern German Drama.

An historical study of modern German Drama from the 1770s to the twentieth century. Works by J.M.R. Lenz, J.W.V. Goethe, H.V. Kleist, G. Büchner, G. Hauptmann, E. Toller, B. Brecht and B. Strauß will be discussed. The notion of Freedom (Freiheit) and its apparent impossibility in the nineteenth and twentieth century is central. The texts are read in English translation with the German originals as backup.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.  
 FORMAT: Seminar  
 CROSS-LISTING: GERM 3050X/Y.06

### **THEA 3800X/Y.06/THEA 3810X/Y.06/THEA 3820.06/ MUSC 1081.03: The Transformation Year.**

The third year of the Acting Program is structured to build on the knowledge acquired in the previous two years. Students learn how to integrate what they have discovered as they gain further understanding of skills, techniques and creative expression. Third-year students perform in one show of the DalTheatre season and may be invited to perform in others, depending upon the needs of the plays chosen and the student's readiness for the performance situation as assessed by the faculty.

In addition to meeting degree requirements, students must achieve a B in all Acting Program classes, and must also be recommended by the Acting Faculty in order to advance to the next year's class of study.

NOTE: Credit can only be given for X/Y classes if completed in consecutive terms and partial credit cannot be given for a single term.

### **THEA 3800X/Y.06: Acting III.**

This course aims to strengthen the actor's instrument and creative response, while further developing acting technique through practical experience in Mask, Mime and Period Study. "Acting" is expanded upon to include Script Analysis, with materials being drawn from classical and contemporary texts, ensuring that the 'inner' work of characterization feeds the 'outer' work, and vice versa.

NOTE: Students taking these classes must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

PREREQUISITE: THEA 2800X/Y.06, THEA 2820.X/Y.06, THEA 2810X/Y.06 and permission of the Acting Faculty.

CO-REQUISITE: THEA 3810X/Y.06, THEA 3820X/Y.06, MUSC 1081.03

### **THEA 3810X/Y.06: Voice and Speech III.**

This class is a continuation of 2810X/Y.06. Emphasis is on freeing the voice by combining newly developed skills that constitute "good use": releasing the mind and body; aligning the spine, and accessing primary breathing muscles. Attention is paid to vocal support, clarity of the sound, flexibility and range, and the power behind the sound. A voice warm up is designed and instructed by each student. Ways of accessing oral, nasal and pharyngeal cavities are explored. Phonetics, speech and accents/dialects are introduced. Much of the work involves application to a variety of texts.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: THEA 2800X/Y.06, THEA 2810X/Y.06, THEA 2820X/Y.06, and permission of the Acting Faculty

CO-REQUISITE: THEA 3800X/Y.06, 3820X/Y.06, MUSC 1081.03

### **THEA 3820X/Y.06: Dance and Movement III.**

The class is designed to develop and enhance the acting student's practical knowledge of movement through the discipline of Jazz Dance. This is manifest through the continued practical exploration of the Luigi Jazz Dance Technique. Emphasized are the performer's building blocks: a strong body alignment, a healthy stretching regimen, and an expanding skill repertoire. Explorations commence into dance choreography and performance.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab/demonstration/lecture 3 hours

PREREQUISITE: THEA 2800X/Y.06, 2810X/Y.06, and THEA 2820X/Y.06, and permission of the Acting Faculty

CO-REQUISITE: THEA 3800X/Y.06, 3810X/Y.06, MUSC 1081.03

### **THEA 3911.03: Gender in Theatre: A Cross-Cultural Survey.**

This seminar class examines the roles gender has played in the shaping of world theatre alongside the roles the theatre has played in the shaping of various cultural conceptions of gender. By exploring plays and performances from Europe, North America, China, Japan, India, Iran and/or other traditions, we will strive to understand the ways in which various forms of representation reflect their cultures' governing images of masculinity and femininity. In the process, we will interrogate the historical and cultural variability of the notion of "gender" itself. The main objective of the seminar will be to ask how gender determines

performers' choices in various cultures, and to see how gender itself can actually be shaped by performance.

FORMAT: Lecture/seminar, 3 hours

CROSS-LISTING: GWST 3911.03

### **THEA 3912.03: Gender Theory and Contemporary Performance.**

This seminar class offers students an opportunity to encounter some of the most provocative and challenging gender theory of recent years in relation to contemporary theatre, film and performance art. Students will read considerations of the relationship between gender, performance and identity by such authors as Jacques Lacan, Michel Foucault, Hélène Cixous, Luce Irigaray, Julia Kristeva, Judith Butler, Peggy Phelan and Camille Paglia, among others. Alongside these works, we will examine contemporary performances from the popular to the oppositional. Through this intertextual exploration of theory and performance, we will aim to expand our understanding of the ways in gender roles are created, maintained, questioned and changed in contemporary culture(s).

FORMAT: Lecture/seminar, 3 hours plus bi-weekly screenings

CROSS-LISTING: GWST 3912.03

### **THEA 3913.03: English Drama 1660-1800.**

A survey of plays produced during the Restoration and eighteenth century. Concentrating on the London scene from the first appearance of actresses on the stage to the burning of the Haymarket theatre in 1789, this class introduces students to the period's various dramatic forms, the literary influences and controversies, and the many women and men who penned for the stage.

FORMAT: Lecture/discussion

PREREQUISITE: ENGL 1000X/Y.06; or any two of ENGL 1010.03, 1020.03, 1040.03, or THEA 1000X/Y.06; or the King's Foundation Year Program

CROSS-LISTING: ENGL 3020.03

EXCLUSION: ENGL 3225.06

### **THEA 3914.03: Topics in Italian Drama and Spectacle.**

This class focuses on Italian drama and performance. The topic will vary from year to year and may include topics such as Italian Renaissance theatre, the Commedia dell'arte, Pirandello's productions and contemporary Italian spectacle. The class will examine the selected topic while placing Italian theatre into a broader European context; students will acquire reading strategies for drama and spectacle and learn to consider the works from a theoretical perspective. The class is held in English but Italian majors will be required to read the texts in the original.

FORMAT: Lecture

CROSS-LISTING: ITAL 3700.03

### **THEA 4390.03: Special Topics in Film Studies.**

This is an advanced seminar in film studies which examines one topic in depth from formal, political, and historical perspectives. Topics may include but are not limited to: animated film; political cinema; montage; screen acting; film adaptation; the work of a particular director; or a film movement. The topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable.

FORMAT: Seminar

PREREQUISITE: THEA 2311.03 and one other film course (3000-level or above recommended)

### **THEA 4391.03: Special Topics in Popular Cinema.**

This advanced seminar addresses an issue in popular cinema. Topics may include but are not limited to: critical perspectives on a particular set of films; the relation between "independent" cinema and "mainstream" cinema; or the social and aesthetic impact of new technologies in popular cinema. The topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable.

FORMAT: Seminar

PREREQUISITE: THEA 2311.03 (+ THEA 2360.03 or THEA 2320.06 are recommended)

### **THEA 4406X/Y.06: The Aesthetics of Historical Dress.**

This class examines the aesthetics of historical dress, tracing the evolution of changing silhouettes and historical pattern design throughout the eighteenth and/or nineteenth centuries. The student will learn to carry out material-culture and textual analyses as historical source material with a view to re-creating character and dress of the eighteenth and/or nineteenth centuries. This class stresses research and academic skills, along with applied skills. Primary research forms a significant component of this class. This class is part of the Costume Studies Program.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/discussion/lab

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, 1450X/Y.06, 2011.03, 2012.03, 2400X/Y.06, 2406X/Y.06, 2411.03, 2451X/Y.03, 3401X/Y.06, 3451X/Y.06, 3454.03, 3455.03

For Diploma in Costume Studies, see Costume Studies class combinations in calendar.

EXCLUSION: THEA 3405X/Y.06

RESTRICTION: Costume Studies degree or diploma students only.

### THEA 4450.03: Costume Technology.

This class extends the expertise in costume creation developed in THEA 1450X/Y.06, THEA 2451.03 and THEA 3451.06 to examine techniques of fine finish as students prepare their costume 'masterpiece.' This class is part of the Costume Studies Programme.

FORMAT: Lecture/lab 4.5 hours

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, 1450X/Y.06, 2011.03, 2012.03, 2400X/Y.06, 2406X/Y.06, 2411.03, 2451X/Y.03, 3401X/Y.06, 3451X/Y.06, 3454.03, 3455.03

For Diploma in Costume Studies, see Costume Studies class combinations in calendar.

RESTRICTION: Costume Studies degree or diploma students only.

### THEA 4452.03: The Sculpture of Dress.

Based less in abstract principles and more in creativity, this class examines sculptural forms in a human context to facilitate modern and historical costume design. The student works directly on the human body or mannequin to gain proficiency in modelling textiles to shape costume. This class is part of the Costume Studies Programme.

FORMAT: Lecture/demonstration/lab 4.5 hours

PREREQUISITE: For BA in Theatre (Costume Studies) students: THEA 1000X/Y.06, 1450X/Y.06, 2011.03, 2012.03, 2400X/Y.06, 2406X/Y.06, 2411.03, 2451X/Y.03, 3401X/Y.06, 3451X/Y.06, 3454.03, 3455.03

For Diploma in Costume Studies, see Costume Studies class combinations in calendar.

RESTRICTION: Costume Studies degree or diploma students only.

### THEA 4500.03: Canadian Theatre to 1968: Performing the Nation.

Early Canadian theatre offers a fascinating example of a colonized nation's struggle to find its own dramatic voice in the face of powerful outside influences. This seminar class will explore the development of theatre in Canada from its roots in First Nations ritual and performance, to its encounters with British and European models and its eventual search for an independent identity via the Little Theatre movement, the Workers' Theatre movement and the Dominion Drama Festival. The class will close with a consideration of the influential Massey Commission and the birth of the Stratford Festival, Canada's first 'world class' theatre. Over the course of the term, special attention will be paid to the development of diverse dramatic traditions in French and English Canada. Drama by representative playwrights will be studied alongside primary sources in Canadian theatre history to give students an integrated perspective on the complex artistic and political debates that helped to determine the character of performance in Canada.

FORMAT: Seminar/discussion

PREREQUISITE: Permission of the instructor

CROSS-LISTING: ENGL 4500.03, CANA 4500.03

### THEA 4501.03: Canadian Theatre Since 1968: Interrogating Identities.

This seminar class will examine the ongoing emergence of uniquely Canadian forms of theatre in the years since the Massey Commission asserted the need to foster Canada's native talent. Topics to be considered will include: the controversial role of government subsidy and policy-making in Canadian culture; the differing models offered by the Stratford and Shaw Festivals, by the major regional theatres, and by 'alternate' and independent companies; the contrast between First Nations, English- and French-Canadian traditions; and the rise of the current 'Fringe' phenomenon. Drama by representative playwrights will be considered alongside post-colonial theory and primary sources in Canadian theatre history to help students consider what a genuinely 'Canadian' theatre might look like. Above all, the class offers an opportunity to consider the complex relationship between theatre and national identity: who are 'we,' and how might our theatre express or even shape 'us'?

FORMAT: Seminar/discussion

PREREQUISITE: Permission of the instructor

CROSS-LISTING: ENGL 4501.03, CANA 4501.03

### THEA 4700X/Y.06: Special Topics I.

In this full year seminar class, students focus on a particular topic in dramatic literature, film studies, theatre history, dramatic theory, or a related interdisciplinary subject in order to investigate it in great detail. The topic is assigned by the Department at the end of the preceding year and is then posted by the Department and in the University's timetable.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Seminar 3 hours

### THEA 4735.06: Advanced Seminar in Baroque Culture.

This course offers its students a survey of key aspects of seventeenth and eighteenth-century European history and society along with a first-hand view of some of the most important aspects of baroque style and material culture. It takes place in the town of Cesky Krumlov in the Czech Republic. The class introduces students to the socio-political conditions that led to the birth of Baroque civilization before entering into an exploration of the court life of seventeenth and eighteenth-century Europe. It then examines the cultural and artistic forms most characteristic of this period, with particular emphasis on theatre history and on the role of the 'theatrical' in the Baroque arts. As the course proceeds, students will have an opportunity to consider the connections between course material and the evidence of Baroque culture to be found in the Castle Theatre's scenographic machinery, its stock of original scenery and props, and its collection of historical costumes, as well as to witness an experimental Baroque opera performance. Finally, the course will include visits to Prague and other sites of interest to add to students' understanding of the Baroque and its legacy to subsequent periods.

FORMAT: Lecture/lab

PREREQUISITE: Permission of the Departments of Theatre, Music and/or History.

CROSS-LISTING: HIST 4162.06, MUSC 4360.06

RESTRICTION: 3rd and 4th year students only.

### THEA 4800X/Y.06/4840X/Y.06: The Interpretation and Performance Year.

In the final year of the Acting Program, students' studies are geared toward performance and entering the world of professional acting. The company of fourth year Acting Program students will be cast in three DalTheatre season shows. Classes are devoted to preparing the student actor for transition into the profession.

NOTE: Credit can only be given for these classes if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

### THEA 4800X/Y.06: Acting IV.

The culminating course of the Acting Program focuses on the rehearsal and performance of three DalTheatre shows and a Class Project. This course provides students with the opportunity to earn their Honours credit by preparing professional portfolios and audition pieces under the tutelage of the Acting Program faculty. The class project is directed by an Acting Program faculty member and all written requirements for both the Dal Theatre season and the class project assessed by the Acting Program faculty. In its twofold function, this course is a bridge to the Acting profession.

NOTE: Students taking 4800X/Y.06 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Lecture/lab 6 hours per week as well as up to 30 hours per week rehearsals week-nights and Saturdays

PREREQUISITE: THEA 3800X/Y.06, 3810X/Y.06, 3820X/Y.06, MUSC 1081.03 and permission of the Acting Faculty

CO-REQUISITE: THEA 4840X/Y.06

### THEA 4840X/Y.06: Advanced Performance Techniques.

This fourth-year Acting class is intended to provide production-related and movement instruction that will assist students with developing skills and techniques which can be applied in the DalTheatre season as well as in the professional theatre world. Production related instruction may vary from year to year, depending on the specific needs of each DalTheatre season.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab/lecture 3 hours

PREREQUISITE: THEA 3800X/Y.06, 3810X/Y.06, 3820X/Y.06, MUSC 1081.03 and permission of the Acting Faculty

EXCLUSION: THEA 4810X/Y.06, THEA 4820X/Y.06  
CO-REQUISITE: THEA 4800X/Y.06

### **THEA 4900X/Y.06: Theory and Criticism of Drama and Theatre.**

This is a writing intensive class that tackles the problems of evaluating theatre. It investigates critical strategies of the past and judges today's theatre criticism. Students will practice the craft of criticism and debate the role of theatre theory for contemporary audiences.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture/seminar 3 hours

### **THEA 4921.03: Special Topics II.**

In this seminar class, students focus on a particular topic in dramatic literature, film studies, theatre history, dramatic theory, or a related interdisciplinary subject, and investigate it in great detail. The topic is assigned by the Department at the end of the preceding academic year and is then posted at the Department and in the Faculty's timetable.

FORMAT: Seminar 3 hours

### **THEA 4922.03: Topics in Theatre History.**

In this seminar class, students focus on a particular topic in the field of theatre history and investigate it in great detail. The topic is assigned by the Department at the end of the preceding academic year and it is then posted at the Department and in the Faculty's timetable.

FORMAT: Lecture/seminar/discussion

PREREQUISITE: Permission of the instructor

### **THEA 4923.03: Topics in Dramatic Literature.**

In this seminar class, students focus on a particular topic in the field of dramatic literature and investigate it in a great detail. The topic is assigned by the Department at the end of the preceding academic year and it is then posted at the Department and in the Faculty's timetable.

FORMAT: Lecture/seminar/discussion

PREREQUISITE: Permission of the instructor

### **THEA 4931.03: Contemporary Theatre.**

This course will deal with the most recent developments in theatre, especially with those post-1970's trends that exercise a broad international influence. Each year, our investigation will begin with a brief look at postmodern theatre and cover topics such as performance art, physical theatre, and postdramatic theatre. The main focus of the course, however, will be dictated by what is currently happening on major stages across the world and may significantly change from one year to another. In the interest of a comprehensive and inclusive approach to the subject, both commercial and experimental theatres will be studied, and we will also examine some relevant works of criticism and theory. Since much of the material required for this course is not yet removed enough from our time to be accessible in scholarly literature, students should be prepared for alternative methods of research.

FORMAT: Lecture/seminar, 3 hours

## I. Introduction

Computer Science is a fundamental multi-disciplinary, high-technology discipline. Computer Science forms an integral and indispensable part of higher education. The Faculty of Computer Science provides high-quality education to our students in all areas of Computer Science and Informatics and conducts excellent research in specific areas of Computer Science, emphasizing major research programs with the support and participation of Industry and Government. Our modern award-winning Computer Science building and state-of-the-art equipment permit Computer Science to conduct primary research in Algorithms, Bioinformatics, Data Mining, Health Informatics, Human Computer Interaction, Information Retrieval, Network Centered Computing, Privacy and Security and Visualization.

The Faculty of Computer Science was formed on April 1, 1997, following the amalgamation of the Technical University of Nova Scotia (TUNS) and Dalhousie University. Its members came from the School of Computer Science at TUNS and the Computing Science Division of the Department of Mathematics, Statistics, and Computing Science at Dalhousie.

Significant growth has occurred in our formative early years. Our graduate and undergraduate programs include imaginative multi-disciplinary programs such as Electronic Commerce, Health Informatics, and Bioinformatics. The most up-to-date information on ongoing programs, ongoing curriculum revision, and general information about the Faculty can be found on our website: <http://www.cs.dal.ca>.

## II. Academic Regulations

In addition to the regulations below, please see the Academic Regulations section of the calendar.

### Workload

A normal class load is five classes during each study term.

### Class Selection

The content of every class that students take to meet degree requirements must represent new material: students may not take classes whose content is largely repetitive of, or more elementary than, a class taken earlier on the same topic, without permission of the Faculty.

Of the 40 half-credits required to complete any CS undergraduate degree, at least 20 must be taken from Dalhousie University.

## Computer classes in other departments

Computer classes offered by other departments (e.g., COMM 1502.03) cannot be taken for credit in the Faculty's degree programs without explicit permission of the Faculty of Computer Science.

## Grades

- Class instructors will describe methods of student evaluation during the first week of each class.
- Supplementary examinations are not given in Computer Science classes.
- A grade of at least C- is required for a class to satisfy a prerequisite condition for a CSCI/INFX class.
- A grade of at least C- is required in all Computer Science CSCI/INFX core classes to graduate with any Computer Science degree.

## Dismissal

A student who meets the conditions for dismissal as outlined in Section 20, Academic Dismissal, of the Academic Regulations will be dismissed from the program. A student who fails more than one co-op work term will be dismissed from the co-op program.

An application for readmission to the program may be considered two terms after dismissal. A student who has been dismissed and who has been required to withdraw from the university for one term or more may be readmitted to a program in the Faculty of Computer Science only once. A readmitted student is considered to be on probation.

## Professor Emeritus

Slonim, J., BSc, MSc (Western), PhD (Kansas)

## Professors

Abidi, S., BEng (N.E.D. Univ of Eng & Technology), MS (Miami), PhD (Surrey)  
Bodorik, P., BSc (Calgary), MEng, PhD (Carleton)  
Cox, P. T., BSc, MSc (Auckland), PhD (Waterloo)  
Farrag, A., PhD (Alberta)  
Gao, Q., MASC, PhD (Waterloo)  
Heywood, M., PhD (Essex)  
Janssen, J., MSc (Eindhoven), PhD (Lehigh), cross appointment with Department of Mathematics and Statistics  
Keselj, V., BSc (Belgrade), MMath, PhD (Waterloo)  
Milios, E. E., Dipl Eng (National Technical University), SM & EE, PhD (MIT)  
Rau-Chaplin, A., BCompSc (York), MCompSc, PhD (Carleton)  
Sampalli, S., BEng (Bangalore), PhD (Ind. Inst. of Sc.)  
Scrimger, J. N., BSc (UBC), MSc, PhD (Western Ontario)  
Trappenberg, T., MSc, PhD (Aachen)  
Wach, G., BA (Western Ontario), MSc (South Carolina), PhD (Oxford), cross appointment with Department of Earth Sciences  
Watters, C. R., BSc, MSc, MLS (Western Ontario), PhD (Technical University of Nova Scotia)  
Zincir-Heywood, A.N., BSc, MSc, PhD (Ege University)

## Associate Professors

Arnold, D., Diplom Computer Science (Dortmund), MSc (SFU), Dr. rer. nat. (Dortmund)  
Beiko, R., BSc (Dalhousie), PhD (Ottawa)  
Blouin, C., BSc (Laval), PhD (Dalhousie)  
Blustein, W. J., BSc, MSc, PhD (Western)  
Brooks, S., BSc (Brock), MSc (UBC), PhD (Cambridge)  
McAllister, M., BMath (Waterloo), MS, PhD (UBC)  
Mitnitski, A., MEng, PhD (Baltic State Tech University), cross appointment with Faculty of Medicine  
Selinger, P., Vordiplom Mathematics (Technische Hochschule Darmstadt), PhD (Pennsylvania), cross-appointed with Department of Mathematics and Statistics  
Zeh, N., Diplom-Informatiker (Friedrich-Scholler, PhD (Carleton)

## Assistant Professor

Hawkey, K., BSc, PhD (Dalhousie)  
He, M., BEng (Nanjing), M. Math, PhD (Waterloo)  
Reilly, D., BA (Waterloo), BA (McGill), BEd (Queen's), PhD (Dalhousie)

## Adjunct Professors

Borwein, J., BA (Western Ontario), MSc, PhD (Oxford)  
Cercione, N., BSc (Steubenville), MSc (Ohio), PhD (Alberta)  
Gentleman, M., BSc (McGill), MA, PhD (Princeton)  
Grundke, E. W., BSc, MSc (Dalhousie), PhD (Waterloo)  
Jost, A., BSc, MSc, PhD (Dalhousie)  
Rahman, M., BSc, MSc (Gauhati), PhD (Windsor)  
Silver, D., BSc (Acadia), CIM (SMU), MSc, PhD (Western)

## Adjunct Associate Professors

Oore, S., BSc (Dalhousie), MSc, PhD (Toronto)  
Wang, H., BSc (UNB), MSc, PhD (Toronto)

## Adjunct Assistant Professors

Abidi, S., MBBS (Dow), MSc (Malaysia), PhD (Dalhousie)  
Bardouille, T., BSc (Queen's), MSc (Dalhousie), PhD (Toronto)  
Jutla, D. N., BSc (U. W. Indies), MSc, PhD (TUNS)  
Liscano, R., BSc (UNB), MSc (Rhode Island), PhD (Waterloo)  
Lucic, V., Dipl. EE (Nis), MASC, PhD (Waterloo)  
Marchand, Y., MCS (Paris, D.E.A. (Caen), PhD (Compeigne)  
McIntyre, A., BSc (Mt. A), PhD (Dalhousie)  
Shafiei, M., BSc (Sharif), PhD (Dalhousie)  
Song, X., BSc (Tianjin), MSc (Chinese Academy of Science), PhD (UNE), MSCS (Dalhousie)  
Vaughn, P., HBA, MA (Guelph), MD (McMaster), MPH (Johns Hopkins)  
Wilson, G., BA, MCS, PhD (Dalhousie)  
Ye, Q., BEng, MEng (Harbin), PhD (Alberta)

## Senior Instructor

Brodsky, A., BMath (Waterloo), Msc, PhD (UBC)  
Kalyaniwalla, N., BSc (Bombay), M.S., PhD (Rensselaer)

## Instructor

Fleming, J., BComm, BA (SMU), MA (Dalhousie)

## I. General Interest Classes

The Faculty offers eight classes that should be of interest to students whose major field of study while at Dalhousie will not be Computer Science.

### CSCI 1106.03: Animated Computing.

The Animated computing course is a hands-on introduction to animated computing. Students will use applications to create web pages with animation and progress to the design of animated games and control of robots.

### CSCI 1107.03: Social Computing.

A hands-on course on technologies and the underlying infrastructure for social computing, including digital collaboration media, social networks and visualization, and their social impact. Students will use various applications, such as Twitter, YouTube, and wikis to examine their functionalities, and explore infrastructure technologies including databases, computer networks and Web-servers that facilitate their execution.

### CSCI 1200.03: Introduction to Computing for Non-Majors.

This is a class of technical computer literacy. Students can expect to learn about computers in a general way and how computers affect the way we live and work. Students will be given an opportunity to become familiar with typical applications of software such as word processors, spreadsheets and database applications. Other topics will include the use of the internet, creation of web pages, and simple programming concepts. No previous computer experience is required. This class is open to Arts and Social Sciences and Health Education students only. NOTE: This class cannot be counted towards the Bachelor of Commerce or a Minor in Business.

CROSS-LISTING: ASSC 1000.03

### INFX 1606.03: Introduction to Web site creation.

See calendar description for INFX 1601.03 in the Informatics section of this calendar.

CROSS-LISTING: CSCI 1206.03

EXCLUSION: INFX 1600.18

### INFX 1615.03: Concepts of Computing.

This course introduces some key concepts in computing and places them in context with a survey of applications. The skills developed in this course include research, redaction, problem solving and abstraction. The themes covered are the following: Data and storage, operating systems, networking and the Internet, database systems, artificial intelligence and computer graphics. This course is eligible to partially cover the writing requirement for students in the Bachelor of Computer Science, the Bachelor of Informatics and Bachelor of Science, Computer Science.

### INFX 1616.03: Applications of Computing.

This course covers professional aspects of the computing industry. The main themes are: project management, software engineering and computer languages. It explores how technological advances impact the workplace for non-technical people. It also includes a module on proofreading and editing. This course is

eligible to partially cover the writing requirement for students in the Bachelor of Computer Science, the Bachelor of Informatics and Bachelor of Science, Computer Science.

## II. Degree Programs

### A. Academic Regulations

For all variations of the Bachelor of Computer Science degree:

- of the 19 half-credit CSCI classes required at all levels, at least 10 must be chosen from Dalhousie CSCI class offerings, and
- of the 11 half-credit CSCI classes required at the 3000 and 4000 level, at least six must be chosen from Dalhousie CSCI class offerings.

### B. Bachelor of Computer Science

#### 1. Bachelor of Computer Science

The following regulations apply to students starting the program in September 2010 or after.

#### Faculty Requirements

##### 1000 Level

- CSCI 1100.03: Computer Science I
- CSCI 1101.03: Computer Science II

##### 2000 Level

- CSCI 2100.03: Communication Skills: Oral and Written
- CSCI 2110.03: Computer Science III
- CSCI 2112.03: Discrete Structures I
- CSCI 2121.03: Computer Organization with Assembly Language
- CSCI 2132.03: Software Development
- CSCI 2141.03: Introduction to Database Systems

##### 3000 Level

- CSCI 3101.03: Social, Ethical and Professional Issues in Computer Science
- CSCI 3110.03: Design and Analysis of Algorithms I
- CSCI 3120.03: Operating Systems
- CSCI 3130.03: Introduction to Software Engineering
- CSCI 3136.03: Principles of Programming Languages
- CSCI 3171.03: Network Computing

##### Other Required Classes:

- MATH 1000.03: Differential and Integral Calculus I
- MATH 1010.03: Differential and Integral Calculus II or CSCI 2113.03 Discrete Structures II
- MATH 2030.03: Matrix Theory and Linear Algebra I
- STAT 2060.03: Introduction to Probability and Statistics I
- One full credit or two half credits of a science class with a lab from a list provided by the Faculty of Computer Science
- One full credit to satisfy the writing requirement
- One half-credit class in humanities or social science at or above the 1000 level
- Two half-credit classes in business, science, or engineering at or above the 1000 level
- One half-credit class in business, science or engineering at or above the 2000 level
- Two half-credit electives of computer science at or above the 3000 level
- Three half-credit electives of computer science at or above the 4000 level
- Two free half-credit electives at or above the 1000 level
- Seven free half-credit electives at or above the 2000 level

CSCI 1502.03 may not be counted towards a Bachelor of Computer Science degree.

#### 2. Bachelor of Computer Science Honours

The purpose of the Honours program is to provide a more challenging degree program that prepares students for graduate school. The program provides greater rigour and more analytic content than the Bachelor of Computer Science degree.

To enter the Honours program a student must consult with the Honours Student Advisor and obtain the approval of the Faculty of Computer Science.

Each computer science class at or above the 3000 level must be passed with a grade of at least 2.0 (C). The cumulative GPA across all classes must be at least 3.0 (B).

The Honours program may be combined with co-op education.

#### Faculty Requirements

In addition to the normal requirements of the Bachelor of Computer Science degree, class selection must include six classes chosen as follows:

- five half-credit classes of computer science at or above the 4000 level chosen in consultation with the thesis supervisor to ensure that the student has the appropriate background
- CSCI 8873.03 (i.e., successfully complete and present an Honours Thesis)

Students who meet these requirements and who obtain a GPA of 3.7 (A-) or higher in all computer science classes will receive the degree Bachelor of Computer Science with First Class Honours.

#### 3. Minors for the Bachelor of Computer Science

Students in the Bachelor of Computer Science program may add a Minor in many subjects from the Faculties of Arts and Social Sciences, Management, Science and the College of Sustainability. Minors in the Faculty of Arts and Social Sciences are available in Classics, English, French, German, History, International Development Studies, Music, Philosophy, Political Science, Sociology and Social Anthropology, Spanish, Theatre, Gender and Women's Studies. Minors in the Faculty of Management are Business and Management. Minors in the Faculty of Science are available in Biology, Chemistry, Earth Sciences, Economics, Environmental Studies, Mathematics, Physics, Psychology, and Statistics. The minor in the College of Sustainability is Environment, Sustainability and Society. Environment, Sustainability and Society can be Subject B of a BSc double major or combined honours degree in Computer Science.

Students who are seeking the requirements for a minor in any of the above subject areas should consult the corresponding department's section of the undergraduate calendar or <http://www.cs.dal.ca>. The minor requirements are in addition to the normal Bachelor of Computer Science requirements. Students wishing to pursue a minor in any of these subjects should consult the relevant department and a Faculty of Computer Science academic advisor.

#### 4. Co-operative Education Programs

All programs in Computer Science have a Co-operative Education option. This requires the completion of three Co-op work terms.

The Co-op office receives requests from employers for Co-op placements and advertises these to qualifying students. Students apply for these positions and are interviewed by the employer.

Students interested in the Co-op program should apply to register for CSCI 8890.00 in their second year.

#### 5. Specializations

The following three specializations have been approved within the Bachelor of Computer Science Programs:

- Graphics, Gaming, and Media
- Artificial Intelligence and Intelligent Systems
- Communication Technologies and Cyber Security

The above three specializations have been approved for the following Bachelor of Computer Science programs: BCSC, BCSC Co-op, BCSC with Honours, BCSC Honours with Co-op, BCSC Honours Conversion, BCSC Honours Conversion with Co-op.

The specializations have the following requirements:

**Graphics, Gaming, and Media** specialization requires a student to take three compulsory and two electives from a list of elective classes. Required classes are:

- CSCI 3161: Introduction to Computer Graphics with Animation
- CSCI 3162: Digital Media
- CSCI 4168: Game Design and Development

Elective classes are:

- CSCI 3154: AI and Games
- CSCI 4160: Computer Graphics
- CSCI 4166: Visualization
- CSCI 4167: Advanced Computer Animation

**Artificial Intelligence and Intelligent Systems** specialization requires a student to take two compulsory and two electives at the fourth year level from a list of elective classes. Required classes are:

- CSCI 3151: Web Intelligence
- CSCI 3154: AI with Gaming Applications

Elective classes are:

- CSCI 4141: Information Retrieval
- CSCI 4144: Data Mining and Data Warehousing
- CSCI 4152: Natural Language Processing
- CSCI 4155: Machine Learning with Robots

**Communication Technologies and Cyber Security** specialization requires a student to take two required classes and three electives from a set of elective classes. Required classes are:

- CSCI 3120: Operating Systems
- CSCI 3171: Network Computing

Elective classes are:

- CSCI 3172: Web-Centric Computing
- CSCI 4116: Cryptography
- CSCI 4171: Networks and Communications
- CSCI 4174: Network Security
- CSCI 4176: Mobile Computing

### Degree Requirements and Specialization Requirements

Note that to obtain a degree, the degree requirements must be satisfied. To obtain a specialization certificate, requirements for the specialization, in addition to the degree requirements, must be satisfied. Students need to contact the Undergraduate Administrator to request a certificate and a note on their transcript.

Additional information on the specializations is available at <http://www.cs.dal.ca/undergraduate/specializations>.

## 6. Entry Points to Bachelor of Computer Science

There are multiple entry points into the Bachelor of Computer Science program.

**First-Year Entry**-Students are advised to apply directly to the Faculty of Computer Science but may take their classes within the BSc first year and transfer to Computer Science at the beginning of their second year.

Students who wish to transfer to the Bachelor of Computer Science program from other disciplines may be able to do so, but will have to make up any required classes that are missing.

See also the Academic Regulations section for the Faculty of Computer Science on page 31.

## 7. Accreditation and the Profession

Of particular importance to the Faculty is the accreditation of the undergraduate program by the Computer Science Accreditation Council (CSAC), which is responsible for accreditation of computer science programs in Canada. Accreditation provides our graduates with an accelerated path towards achieving the professional designation of Information Systems Professional of Canada (I.S.P.).

The Bachelor of Computer Science, Bachelor of Computer Science with Co-op, Bachelor of Computer Science with Honours, and Bachelor of Computer science with Honours and Co-op are accredited by CSAC.

The co-operative program offers work terms to our students, thus providing an additional link between the Faculty and the Profession.

## C. Bachelor of Science and Bachelor of Arts with Computer Science

### 1. Bachelor of Science Major in Computer Science

The Faculty of Computer Science offers a Bachelor of Science degree with a Major in Computer Science. The program of studies is similar to the Bachelor of Computer Science, but with more flexibility in selection of elective classes. The program may be of benefit for students who want to use it as a basis to enter other professional programs such as Education, Medicine, or Law. However, unlike the Bachelor of Computer Science degree, it does not meet CSAC accreditation requirements. Students interested in this degree option will find further

information on the Faculty website at <http://www.cs.dal.ca> and should consult with a Faculty advisor.

## 2. Double Majors and Combined Honours

The following degree programs are available to students interested in interdisciplinary studies where the larger number of majors credits is Computer Science: Bachelor of Science (20 credit) with Double Major, Bachelor of Science (20 credit) with Combined Honours, Bachelor of Arts (20 credit) Double Major and Bachelor of Arts (20 credit) Combined Honours.

### Combined Honours

Students interested in taking honours in Computer Science and another subject as a combined program should consult the honours advisor through whom a suitable class of study can be arranged.

A combined honours program may well be an appropriate choice for many students. If a student is contemplating graduate work, it should be borne in mind that the work in either subject of a combined honours program may be insufficient for entry to a regular graduate program, and that a qualifying year may be necessary.

Students who wish to arrange interdisciplinary programs (with fields such as Mathematics, Physics, Psychology, and others) are invited to discuss their interests with the appropriate department and the Undergraduate Chair of the Faculty of Computer Science.

## D. Scholarships

Scholarships and bursaries are available to both new and returning students. See the Awards and Financial Aid section of this calendar.

## E. Minor in Computer Science for Non-Computer Science Major BSc

The Minor in Computer Science is available to students registered in the BSc 20 credit major and honours programs offered by the Faculty of Science. The requirements are as for the appropriate program with the completion of the following classes to fulfil the Computer Science Minor:

- CSCI 1100.03
- CSCI 1101.03
- CSCI 2110.03
- CSCI 2132.03
- Two of CSCI 3110.03, CSCI 3120.03, CSCI 3130.03, CSCI 3136.03 and CSCI 3171.03
- One additional CSCI half-credit at or above the 3000 level
- One and one half additional CSCI credits at or above the 2000 level

The selection of CSCI classes for a minor in computer science excludes CSCI 2100.03 and CSCI 3101.03

## III. Class Descriptions

### CSCI 1100.03: Computer Science I.

This class provides a general introduction to computer science and the hardware and software of computers. The main focus is on programming skills and how to apply these skills in solving a variety of problems. Algorithmic concepts are stressed.

**PREREQUISITE:** Nova Scotia PreCalculus or Calculus Math or equivalent  
**EXCLUSION:** CSCI 1202.03

### CSCI 1101.03: Computer Science II.

This class is a continuation of CSCI 1100.03. It focuses on programming and linear data structures.

**PREREQUISITE:** CSCI 1100.03 or INFX 1600.03 or INFX 1604.03

### CSCI 1106.03: Animated Computing.

The Animated computing course is a hands-on introduction to animated computing. Students will use applications to create web pages with animation and progress to the design of animated games and control of robots.

### CSCI 1107.03: Social Computing.

A hands-on course on technologies and the underlying infrastructure for social computing, including digital collaboration media, social networks and visualization, and their social impact. Students will use various applications, such as Twitter, YouTube, and wikis to examine their functionalities, and explore

infrastructure technologies including databases, computer networks and Web-servers that facilitate their execution.

### **CSCI 1200.03: Introduction to Computing for Non-Majors.**

This is a class of technical computer literacy. Students can expect to learn about computers in a general way and how computers affect the way we live and work. Students will be given an opportunity to become familiar with typical applications of software such as word processors, spreadsheets and database applications. Other topics will include the use of the internet, creation of web pages, and simple programming concepts. No previous computer experience is required. This class is open to Arts and Social Sciences and Health Education students only.

NOTE: This class cannot be counted towards the Bachelor of Commerce or a Minor in Business.

CROSS-LISTING: ASSC 1000.03

### **CSCI 2100.03: Communication Skills: Oral and Written.**

This class is designed to help students become more successful communicators by examining the communication process from both a theoretical and practical viewpoint. Students learn to formulate communication goals, to examine their audience and to deliver accurate, effective messages. Written assignments and oral presentations allow for the development of these skills through practice. Students ultimately learn to communicate effectively and with confidence in a variety of settings.

PREREQUISITE: Students are expected to have completed their Writing Requirement.

CROSS-LISTING: ENGL 2100.03

EXCLUSION: COMM 2701.03, COMM 1701.03, COMM 1702.03

### **CSCI 2110.03: Computer Science III.**

This course provides a comprehensive introduction to data structures and algorithms, including their design, analysis, and implementation. In discussing design and analysis there is a strong emphasis on abstraction. In discussing implementation, general approaches that are applicable in a wide range of procedural programming language are emphasized, in addition to a focus on the details of implementations. Topics include an introduction to asymptotic analysis and a review of basic data structures (stacks, queues, lists, vectors), trees, priority queues, dictionaries, hashing, search trees, sorting (MergeSort, QuickSort, RadixSort) and sets, and graphs (traversals, spanning trees, shortest paths).

PREREQUISITE: CSCI 1101.03

### **CSCI 2112.03: Discrete Structures I.**

See the class description for MATH 2112.03 in the Mathematics section of this calendar.

CROSS-LISTING: MATH 2112.03

### **CSCI 2113.03: Discrete Structures II.**

See the class description for MATH 2113.03 in the Mathematics section of this calendar.

PREREQUISITE: See Mathematics section

CROSS-LISTING: MATH 2113.03

### **CSCI 2121.03: Computer Organization with Assembly Language.**

This class deals with the fundamentals of computer organization; assembly language is used as an aid to studying computer organization. Topics include digital logic, ALU and CPU design, object code, microprogramming, CISC, RISC, and parallel computers.

PREREQUISITE: CSCI 1101.03

CO-REQUISITE: CSCI 2112.03 and CSCI 2132.03

### **CSCI 2132.03: Software Development.**

This course presents techniques for programming and software development in a procedural language. It reviews the basics of procedural programming and introduces students to source code management, testing strategies, debugging, and basic scripting techniques.

PREREQUISITE: CSCI 1101.03 or suitable prior programming experience

### **CSCI 2141.03: Introduction to Database Systems.**

This course introduces students to the concepts of database management systems and database design. Topics include: Database (DB) components, DB design using entity-relationship (relational and object oriented), SQL, and transactional properties and techniques to support them. The concepts will be reinforced using one or more Database Management Systems.

PREREQUISITE: CSCI 1100.03

CROSS-LISTING: INFX 2640.03

EXCLUSION: CSCI 2140.03

### **CSCI 3101.03: Social, Ethical and Professional Issues in Computer Science.**

Computers can enable people to do things that our present laws and policies were not formulated to cover (hacking, sharing files on the internet, and companies sharing data). In such cases, people need to be able to decide for themselves the best course of action, and defend such decisions. This course aims at developing the ethical reasoning skills and sensitivities that computer professionals will need to make good decisions and to justify them. The course includes a general introduction to ethical theories and their use in making and justifying decisions.

We then consider various issues and case studies, illustrating the kinds of problems that can arise from the use and misuse of computers and technology: the responsibilities of computing professionals; ethics on the internet (hacking, computer crime, netiquette); privacy and information; intellectual property; social and political issues (digital divide, computers and work, the internet as a democratic technology).

CROSS-LISTING: PHIL 2490.03

### **CSCI 3110.03: Design and Analysis of Algorithms I.**

This class covers techniques for the design and analysis of efficient algorithms and data structures. Topics include asymptotic analysis, divide and conquer algorithms, greedy algorithms, dynamic programming, data structure design, optimization algorithms, and amortized analysis. The techniques are applied to problems such as sorting, searching, identifying graph structure, and manipulating sets.

PREREQUISITE: CSCI 2110.03 and CSCI 2112.03

### **CSCI 3111.03: Introduction to Numerical Linear Algebra.**

Floating point arithmetic. Numerical solution of linear systems of equations; Gauss elimination methods and iterative methods; condition numbers of problems and of algorithms; estimation of condition numbers. Numerical calculation of eigenvalues; QR and LR algorithms; singular value decomposition; Gram Schmidt orthogonalization. Use is made of program libraries such as Linpack, Eispack and Matlab.

PREREQUISITE: MATH 2030.03 and CSCI 1101.03

CROSS-LISTING: MATH 3170.03

### **CSCI 3120.03: Operating Systems.**

This class includes a review of I/O and interrupt structures. Topics covered include dynamic procedure activation, system structure and evaluation, memory management, process management, process scheduling, recovery procedures, concurrency, deadlocks, resource allocation, protection, and operating systems implementation.

PREREQUISITE: CSCI 2110.03, CSCI 2121.03, and CSCI 2132.03

### **CSCI 3121.03: Computer Systems Architecture.**

The primary objective of this course is to give a comprehensive understanding of the structure and function of a computer system from an architecture and integration viewpoint. It focuses on two broad architectural perspectives: the internal perspective, which entails the architecture and design integration of the data path logic, control path logic, memory and I/O; and the external perspective, which provides consumer views and system selection aspects. Examples of real machines are used in the course.

PREREQUISITE: CSCI 2121.03

EXCLUSION: ECED 3403.03

### **CSCI 3130.03: Introduction to Software Engineering.**

The class examines the process of software development, from initial planning through implementation and maintenance. A brief survey of available tools and techniques will be presented covering the topics of analysis, planning, estimating, project management, design, testing, and evaluation. Particular emphasis will be given to organizing and planning, team participation and management, top-down design and structure charts, system and information flow diagrams, walk-throughs and peer review, and testing and quality control.

PREREQUISITE: CSCI 2110.03, CSCI 2132.03, or INFX 3600.03

CROSS-LISTING: INFX 3630.03

### **CSCI 3132.03: Object Orientation and Generic Programming.**

This class deals with the fundamental concepts of object-oriented programming: behaviour, inheritance, encapsulation and polymorphism. There is a discussion of

the history of object-oriented programming, and introduction to some currently used object-oriented programming languages.

PREREQUISITE: CSCI 2110.03 and CSCI 2132.03

### **CSCI 3136.03: Principles of Programming Languages.**

This course provides a comparative study of advanced programming language features. Topics include statement types, data types, variable binding and parameter passing mechanisms. Formal methods for syntactic and semantic description of programming languages are examined.

PREREQUISITE: CSCI 2110.03, CSCI 2112.03, and CSCI 2132.03

### **CSCI 3151.03: Web Intelligence.**

The Web and on-line digital libraries constitute the largest repository of interconnected knowledge in text form mankind ever created. Search engines have made this knowledge accessible to the lay person. Social networks further enhance the exchange of knowledge among individual Web users. Mining the Web and associated digital libraries is the next challenge that promises to change the nature of scientific discovery, and to dramatically impact the way business is conducted. This course will introduce the core Artificial Intelligence concepts and algorithms in the context of Web and text mining: machine learning, natural language processing, semantic web, social networks and web usage mining.

PREREQUISITE: CSCI 2112.03, CSCI 2141.03, STAT 2060.03, and MATH 2030.03

### **CSCI 3154.03: Introduction to Artificial Intelligence with Gaming Application.**

This class covers the breadth of Artificial Intelligence techniques and as such is divided into roughly two parts: Symbolic AI and Machine Learning. Throughout the course the problem of decision making for Non-Play Characters in computer games will form the case study and application examples used to illustrate the AI techniques studies. Symbolic AI will cover First-order Logic, Forward/Backward chaining, Rule-based systems and Fuzzy Logic. The relative trade offs in the application of such architectures to NPC decision making will be developed. The role of Planning systems in Goal orientated decision making will also be introduced, where this also makes use of search based problem solving and the A\* algorithm. Search and its utility in evaluation of next moved in turn-wise games will also be specifically investigated as well it introduction to Bayesian Decision making will be made, where this leads to causal reasoning and adaptation. The second half of the course will introduce Machine Learning from the basic design decisions of Representation, Credit assignment and Cost Function. Two paradigms will be investigated in particular - Gradient decent Neural Networks and Evolutionary computation - where these illustrate the relative trade offs implicit in the three ML design decisions. Case studies and laboratories illustrating these properties include learning to play checkers, recognizing Poker hands, learning NPC behaviors through evolution.

PREREQUISITE: CSCI 2110.03, CSCI 2112.03, and CSCI 2132.03

EXCLUSION: CSCI 4154.03

### **CSCI 3160.03: User Interface Design.**

This class deals with concepts and techniques underlying the design of interactive systems. Both human factors and the technical methods of user interface design are covered. Students will learn how to apply various techniques through the design, creation, and testing of a prototype system.

PREREQUISITE: CSCI 2132.03 or INFX 1616.03

CO-REQUISITE: CSCI 2140.03 or CSCI 2141.03

### **CSCI 3161.03: Computer Animation.**

The course provides students with a practical foundation in high-level computer animation programming. Through the development of a significant project using industry standard graphics libraries, students will learn proven techniques that have become common currency in the field of computer animation.

PREREQUISITE: CSCI 2110.03, CSCI 2132.03 and MATH 2030.03

### **CSCI 3162.03: Digital Media.**

This class covers technical aspects of digital media, including images, video, and sound. Topics covered include digital representation, processing, compression, and multimedia generation.

PREREQUISITE: MATH 1000.03, MATH 2030.03, CSCI 2110.03

EXCLUSION: CSCI 4165.03

### **CSCI 3171.03: Network Computing.**

This class gives students a foundation in computer networks. It presents a top-down view of the layered architectural elements of communication systems, focusing on the Internet and TCP/IP. Topics include client/server systems, packet

switching, protocol stacks, queuing theory, application protocols, socket programming, remote service calls, reliable transport, UDP, TCP, and security.

PREREQUISITE: CSCI 2110.03, CSCI 2132.03 and STAT 2060.03

### **CSCI 3172.03: Web-Centric Computing.**

This course provides a solid grasp of core WWW technologies and a conceptual framework for understanding the development of the WWW and working with future web technologies. The course explores interactive and non-interactive web applications built using various technologies and architectural models. We explore the significance of web design and programming concepts in terms of accessibility issues both from the perspective of web robots and end-users. Web caching, proxy techniques, and security issues are also discussed.

PREREQUISITE: (CSCI 2140.03 or CSCI 2141.03) and CSCI 3171, or INFX 2691.03 and INFX 2601.03

CO-REQUISITE: CSCI 3171.03 may be taken as a co-requisite

### **CSCI 3190.03: Community Outreach.**

This is a project-oriented class where the result of the project is a real-world implementation that meets the requirements of a community group such as a charity, non-profit organization, or educational institution. Students work in teams on the entire application development life cycle from requirements analysis through to maintenance. Lectures cover a range of topics such as practical application of requirements analysis, systems design, and database design methodological skills developed in prerequisite courses or from prior equivalent experience. This course cannot be counted towards a Bachelor of Informatics degree.

PREREQUISITE: CSCI 2100.03, CSCI 2132.03, and (CSCI 2140.03 or CSCI 2141.03)

### **CSCI 3191.03: Community Outreach II.**

CSCI 3191 is a continuation of CSCI 3190, allowing students to undertake projects lasting two terms or to work on a second, more advanced project. When CSCI 3190 and CSCI 3191 are offered concurrently, they are jointly scheduled, and project teams are drawn from both classes, with more responsibility given to students enrolled in CSCI 3191 (e.g., team leadership). This course cannot be counted towards a Bachelor of Informatics degree.

PREREQUISITE: CSCI 3190.03 or permission of the instructor

### **CSCI 4112.03: Theory of Computation.**

This is a class on formal languages and computational models. Topics covered include finite automata, pushdown automata, Turing machines, undecidability and recursive and recursively enumerable functions. Some applications to computer science are also discussed such as compiler design and text processing.

PREREQUISITE: CSCI 2112.03 and CSCI 3136.03

CROSS-LISTING: MATH 4660.03

### **CSCI 4113.03: Design and Analysis of Algorithms II.**

This class covers advanced techniques for the design and analysis of efficient algorithms. Problems are taken from a wide range of areas including combinatorics, numerical computation, graph algorithms, string matching, approximation algorithms, computational geometry, and NP-Completeness.

PREREQUISITE: CSCI 3110.03

CROSS-LISTING: MATH 4130.03

### **CSCI 4114.03: Formal Aspects of Software Engineering.**

This class deals with formal specifications of software, techniques for verification of computer programs and software testing.

PREREQUISITE: CSCI 3130.03

### **CSCI 4115.03: Topics in Graph Theory.**

See the class description for MATH 4330 in the Mathematics section of this calendar.

PREREQUISITE: See Mathematics section

CROSS-LISTING: MATH 4330.03

### **CSCI 4116.03: Cryptography.**

See the class description for MATH 4116 in the Mathematics section of this calendar.

PREREQUISITE: See Mathematics section

CROSS-LISTING: MATH 4116.03

### **CSCI 4117.03: Advanced Data Structures.**

Data structures play a central role in many modern applications, and are essential building blocks of efficient algorithms. This course covers classical results and

recent advancements on data structures. Topics covered include the  $O(\lg n)$  barrier in sorting and searching, online optimization of search structures, fast text retrieval, space efficient data structures for large data sets, and persistent data structures.

PREREQUISITE: CSCI 3110.03

### **CSCI 4121.03: Advanced Computer Architecture.**

The class will focus on the basic principles of computer architecture with an emphasis on quantitative analysis of the effect of architectural design decisions on system performance and the price/performance trade-offs necessary in real computer design. This includes instruction set design issues (CISC vs. RISC), instruction level parallelism, implementation methods, pipelining, pipeline hazards, interrupts, the relationship with compiler technology, and memory system design. Several representative architectures will be used as examples, with emphasis on modern RISC processors.

PREREQUISITE: CSCI 3121.03

### **CSCI 4122.03: Software Design Methods for Real Time Systems.**

This class will include the following topics: real time executives, architectures for real time systems, design methods, concurrency and synchronization, resource allocation, error handling and safety issues.

PREREQUISITE: CSCI 3120.03, CSCI 3130.03 and permission of the instructor

### **CSCI 4126.03: Ubiquitous Computing.**

Ubiquitous Computing moves computing off the desktop and into the fabric of our everyday lives. This course explores both systems and human-centric advances in Ubiquitous Computing, including sensing, middleware, locative applications, smart environments, ambient displays, and tangible interaction. Students will design and implement a Ubiquitous computing application prototype.

PREREQUISITE: CSCI 3160.03 and CSCI 3171.03

### **CSCI 4131.03: Compiler Construction.**

An introduction to the major methods used in compiler implementation. Topics include lexical analysis and parsing methods, symbol table construction, run-time storage management, and code optimization.

PREREQUISITE: CSCI 2110.03, CSCI 2121.03, CSCI 2132.03 and CSCI 3136.03

### **CSCI 4134.03: Software Architecture.**

Software Architecture is an important discipline for designers of software systems. It describes the abstractions, classifies the alternatives, enables tool support, and offers guidance about making choices appropriate to the software system design process. As software systems grow larger, good architectural design will play a major role in determining the success of a software system. This class covers four areas in software architectures: foundations of software architectures, tools for architectural design, analysis of software architectures, and "industry-rich" case studies.

PREREQUISITE: CSCI 3120.03 and CSCI 3130.03

### **CSCI 4136.03: Software Testing and Quality Assurance.**

This class addresses systematic testing for software defects. The purpose of this kind of testing is risk reduction. The course explores risks and techniques for reducing them. Topics include software testing processes in practice, including unit, integration and systems level testing as well as exploratory and regression testing; software testing methods and deliverables; software test tools; managing test technology; and other approaches to software quality assurance.

PREREQUISITE: CSCI 2132.03 and CSCI 3130.03

### **CSCI 4137.03: Software Deployment, Maintenance, and Evolution.**

This class addresses issues arising after the Factory Acceptance Test: deployment, field support, and upgrades. Commercial software products (especially product lines) are delivered to many sites in many versions and are subject to an ongoing schedule of enhancements. Enterprise applications with many users must evolve, may run at different sites, and may require different versions. Topics include technical challenges of rollout, technical challenges of maintenance and evolution, and technical challenges of upgrading fielded systems.

PREREQUISITE: CSCI 3130.03

### **CSCI 4138.03: Empirical Performance Modelling.**

This class addresses the testing of actual or simulated systems for quantitative measurement and prediction from empirical models. Topics include motivations for quantitative assessment; measures of load and performance; instrumentation

and challenges in measuring attributes of software artifacts; design of experiments for efficiently measuring software; and methods for analysis of observed data and interpretation of results.

PREREQUISITE: CSCI 3110.03 and either ENGM 2032.03 or STAT 2060.03

### **CSCI 4140.03: Advanced Database Systems.**

This course covers advanced Database (DB) topics including, but not limited to: DB design, normalization query processing and optimization, transaction processing, concurrency control and recovery, and distributed databases.

Additional topics may include object-oriented databases, multi-databases, data integration and data warehousing.

PREREQUISITE: CSCI 2141.03

EXCLUSION: CSCI 3140.03

### **CSCI 4141.03: Information Retrieval.**

This class examines information retrieval within the context of full text databases.

Topics include the major models of information retrieval, evaluation, searching and clustering, and hypertext.

PREREQUISITE: CSCI 2110.03 and (CSCI 2140.03 or CSCI 2141.03)

### **CSCI 4144.03: Introduction to Data Mining and Data Warehousing.**

This course reviews main concepts in data mining and data warehouses including objectives, architectures, algorithms, implementations, and applications. The topics covered include operational information process, decision-oriented information process, data warehousing and On-Line Analytical Process (OLAP), characterization mining, association rule mining, classification and predication and clustering. Selected system tools for data mining and data warehousing are introduced.

PREREQUISITE: CSCI 2141.03 or CSCI 3140.03

### **CSCI 4152.03: Natural Language Processing.**

This class presents strategies and techniques for natural language understanding by machines. The class will cover a selection of topics taken from the following three areas: parsing techniques used to represent sentence structure and discover ambiguities, the representation of word meanings and how sentence meaning can be derived from word meanings, and the application of context and world knowledge to the interpretation of language.

PREREQUISITE: CSCI 3110.03

### **CSCI 4155.03: Machine Learning with Robotics.**

This course discusses learning theories and demonstrates these strategies with robots. The topics include supervised learning, in particular maximum likelihood estimation in stochastic models and statistical learning theory including support vector machines, unsupervised learning which includes generative models, expectation maximization, and Boltzmann machines, and reinforcement learning including Markov decision processes and temporal difference learning. The course includes introductions to the MATLAB programming environment, a refresher of basic probability theory, and the use of a robotics environment.

PREREQUISITE: MATH 2030.03, CSCI 3154.03, STAT 2060.03

EXCLUSION: CSCI 4150.03

### **CSCI 4160.03: Computer Graphics.**

This class presents the theory and mathematical algorithms required to develop and build a graphics package. Emphasis is on either two or three dimensions and the transformations and manipulations necessary to lead to animation. The design platform and language are left as a student choice to ensure immediate familiarity and future development advantages.

PREREQUISITE: CSCI 2110.03 and CSCI 3130.03

### **CSCI 4163.03: Human-Computer Interaction.**

Human-computer interaction deals with human-computer communication and how to facilitate it. This class begins with a discussion of information processing characteristics important to human-computer interaction and formal models of human-computer interaction. Subsequent topics include dialogue techniques, response times and display rates, information presentation, interaction devices, computer training, help systems, computer supported co-operative work, information search and visualization, hypermedia, and the world wide web.

PREREQUISITE: CSCI 3160.03

### **CSCI 4166.03: Visualization.**

This course focuses on graphical techniques for data visualization that assist in the extraction of meaning from datasets. This involves the design and development of efficient tools for the exploration of large and often complex information domains. Applications of visualization are broad, including computer science, geography,

the social sciences, mathematics, science and medicine, as well as architecture and design. The course will cover all aspects of visualization including fundamental concepts, algorithms, data structures and the role of human perception.  
PREREQUISITE: CSCI 3161.03 or CSCI 4160.03

### **CSCI 4167.03: Advanced Computer Animation.**

The course introduces students to fundamental and advanced techniques and algorithms in Computer Animation. Topics include interpolation based and kinematic techniques, physically based modelling, motion capture, and character animation.  
PREREQUISITE: CSCI 3161.03

### **CSCI 4168.03: Game Design and Development.**

This course covers the fundamentals of digital game design with an emphasis on team-based development. In this course students will produce a significant game using techniques and principles derived from established state-of-the-art industry practices. Topics include an examination of game design theories, programming architectures, audio-visual design and game production.  
PREREQUISITE: CSCI 2110.03 and CSCI 3130.03

### **CSCI 4169.03: Usable Security.**

Human factors play an important role in the effectiveness of security and privacy solutions, and it is important for security and privacy experts to have an understanding of how people will interact with the systems they develop. This course is designed to introduce students to a variety of usability and user interface problems related to privacy and security, and to give them experience in designing studies aimed at helping to evaluate usability issues in security and privacy systems. Topics include human threat identification, security warning design, location privacy, privacy policies, web browser privacy and security, phishing, passwords, and secure communication.  
PREREQUISITE: CSCI 3160.03

### **CSCI 4171.03: Networks and Communication.**

The primary objective of this class is to give the student a comprehensive understanding and specialized knowledge in the field of computer networks and communications. The class teaches through a systems approach to networks by examining the hardware and protocol components that comprise a network. The class also examines the interactions and interdependencies between protocols. Topics covered in this class include network principles and concepts, transmission principles, network architecture, routers and routing protocols, direct link networks, wireless networks, internetworking, and emerging network technologies.  
PREREQUISITE: CSCI 2121.03 and CSCI 3171.03

### **CSCI 4174.03: Network Security.**

Security stands out as a critical issue in the design and deployment of information systems in general, and networks in particular. This class will deal with the design of secure information systems with emphasis on secure networking and secure information transfer. It will also include topical and emerging areas in security such as the establishment of an organization-wide security plan and bio-metric identification systems.  
PREREQUISITE: CSCI 3171.03

### **CSCI 4176.03: Mobile Computing.**

This course covers the principles of mobile computing and the concepts and techniques underlying the design and development of mobile computing applications. Mobile computing is discussed from technological, application, and user perspectives. Topics include mobile and wireless communication technologies, development environments, application design for resource limited and failure-prone environments, user interface issues in the mobile computing setting, and the future of mobile computing.  
PREREQUISITE: CSCI 2121.03 and CSCI 3171.03

### **CSCI 4180.03: Introduction to Computational Biology and Bioinformatics.**

This course introduces biology-related applications of computer science. No background in biology is assumed. The topics covered include the following: introductory molecular biology and evolution, genomics, similarity and homology, multiple sequence alignments, phylogenetics, structural bioinformatics and gene expression. The emphasis is on the applications of computer science to biology.  
PREREQUISITE: CSCI 2132 and STAT 2060

### **CSCI 4181.03: Bioinformatics Algorithms.**

The discipline of bioinformatics applies sophisticated computational and statistical techniques to problems in the biological domain. This course will focus on a few biosequence-related challenges in depth, examining the complexity and efficiency of different approaches, the relationship between statistical optimality and biological reality, and the consistency (or lack thereof) among methods.  
PREREQUISITE: CSCI 3110 or permission by instructor

### **CSCI 4190.03: Special Topics in Computer Science.**

This class examines topics determined by the interests of the students and the instructor.  
PREREQUISITE: Permission of the instructor

### **CSCI 4191.03: Application Development Project.**

This is a project-oriented class for students to participate in distributed software development projects, such as the Undergraduate Capstone Open Source Project ([www.ucosp.ca](http://www.ucosp.ca)) initiative. Students work as part of a development team on new or existing projects for real-world applications. In this class students learn how to work in large development teams, which may be geographically distributed. Students implement portions of a large software project and give a public presentation on their work. Students work under supervision of a faculty member. A specific development project must be approved by the undergraduate chair in consultation with the instructor.  
PREREQUISITE: (CSCI 3120.03, CSCI 3130.03 and CSCI 3171.03) or INFX 4600.03

### **CSCI 4192.03: Directed Studies.**

This class is a study of specific academic subject area not covered in another class offered at Dalhousie University, under close supervision of a faculty member. It typically consists of predetermined readings, discussions with the instructor, and a term paper summarizing the studied material. A specific directed studies class must be approved by the undergraduate chair in consultation with the instructor.  
PREREQUISITE: CSCI 3110.03, CSCI 3120.03, CSCI 3130.03, CSCI 3136.03, CSCI 3171.03

### **CSCI 8873.03: Honours Seminar.**

This is a class through which students complete their Honours Thesis requirements. Honours students in Computer Science must register for this class or CSCI 8871/72. In this class, students complete their thesis research, write their honours theses, and give public presentations of their work. In a normal course sequence, the student should have taken CSCI 4192 under the direction of their thesis supervisor. During this course, the student should have acquired the necessary background knowledge for their thesis research and formulated a research plan for their thesis work. Deviations from this sequence are possible.  
PREREQUISITE: Permission of the Honours Coordinator

### **CSCI 8890.00: Co-Op Seminar.**

Students in the Bachelor of Computer Science Co-operative Education Programme must register for this class, which orients students to the co-op system. Pass/fail grading applies to this class.  
PREREQUISITE: Permission of the Faculty of Computer Science

### **CSCI 8891.00: Co-op Work Term 1.**

This class is the first work term for students in the Bachelor of Computer Science Co-operative Education Programme. Pass/fail grading applies to this class.  
PREREQUISITE: CSCI 8890.00

### **CSCI 8892.00: Co-op Work Term 2.**

This class is the second work term for students in the Bachelor of Computer Science Co-operative Education Programme. Pass/fail grading applies to this class.  
PREREQUISITE: CSCI 8891.00

### **CSCI 8893.00: Co-op Work Term 3.**

This class is the third work term for students in the Bachelor of Computer Science Co-operative Education Programme. Pass/fail grading applies to this class.  
PREREQUISITE: CSCI 8892.00

# Informatics

## I. Introduction

Informatics is the multidisciplinary study of how people transform technology, and how technology transforms us. It lies at the intersection of people, technology and information systems and focuses on the expanding relationship between information systems and the daily lives of people, both at home and at work.

Informatics helps develop new uses for information technology in order to design solutions that reflect the way people create, use and find information, and it takes into account the social, cultural and organizational settings in which those solutions will be used.

Informatics professionals have very diverse jobs. Some typical activities include:

- assess information needs of organizations
- manage information projects
- solve organizational information flow problems
- make software packages talk to each other
- model the information flows among a group of people
- design innovative user interfaces
- track health care resources
- design professional websites
- improve health care information systems
- develop business solutions

## II. Degree Programs

### A. Bachelor of Informatics

#### 1. Program Structure

There is a choice of majors: Environment, Sustainability and Society, Specialization of your own design and Software Systems. Students should consult with the Faculty of Computer Science for details on other options that are being developed.

Elective classes are any eight classes of your own choosing, although no more than four may be at the 1000 level. The electives allow you to explore possible specializations and to follow personal interests.

A **minor in Management** is available to students registered in the BInf program. For further information, please see page 459 in the Management section of this calendar.

The co-operative education program is a mandatory component of the Bachelor of Informatics. Students are required to complete three co-op work terms as part of their bachelor degree.

The co-op office receives requests from employers for co-op placements and advertises these to qualifying students. Students apply for these positions and are interviewed by the employer.

Co-op work terms are scheduled after terms 5, 6 and 7.

The normal academic sequence of terms follows:

Yr/Term	Fall	Winter	Summer
Year 1	AT1	AT2	FREE
Year 2	AT3	AT4	FREE
Year 3	AT5	WT1	AT6
Year 4	WT2	AT7	WT3
Year 5	AT8		

AT = Academic study term

WT = Co-op work term

#### 2. General Requirements

- STAT 1060.03 Introduction to Statistics
- CSCI 1100.03 Computer Science I

- CSCI 1101.03 Computer Science II
  - INFX 1606.03: Introduction to Web site Creation
  - INFX 1615.03 Concepts of Computing
  - INFX 1616.03 Applications of Computing
  - CSCI 2100.03 Communication Skills
  - CSCI 2112.03: Discrete Structures I
  - INFX 2601.03: Introduction to Information Security
  - INFX 2640.03: Use and Design of Databases
  - INFX 2670.03: Introduction to Server Side Scripting
  - INFX 2690.03: Integrated Studies 1
  - INFX 2691.03: Integrated Studies 2
  - HAHF 3100.03: Research Methods (or equivalent)
  - CSCI 3160.03: User Interface Design
  - CSCI 3172.03: Web-Centric Computing
  - INFX 3600.03: Project 3
  - INFX 3601.03: Project 4
  - INFX 3630.03: Software Engineering and Project Management
  - INFX 4600.03: Project 5
  - INFX 4601.03: Project 6
  - six full credits in credits specified by the major
  - two full credits of free electives at or above the 1000 level
  - 1.5 full credits of free electives at or above the 2000 level
  - Completion of three co-op work terms
- \* Neither CSCI 3190.03 nor CSCI 3191.03 can be counted towards a Bachelor of Informatics degree.

### 3. Major in Software Systems

The Major in Software Systems follows the general Bachelor of Informatics requirements and must include the following classes:

- CSCI 2110.03: Computer Science III
- CSCI 2132.03: Software Development
- CSCI 3132.03: Object Orientation and Generic Programming
- CSCI 4140.03: Advanced Database Systems
- CSCI 3171.03: Network Computing
- Three full credits of CSCI classes at or above the 3000 level

### 4. Major in Environment, Sustainability and Society

The College of Sustainability offers a Major in Environment, Sustainability and Society in the BInf program. For complete details about the College, its programs and classes please see the College of Sustainability section on page 44 of the Calendar.

The Major in Environment, Sustainability and Society follows the general Bachelor of Informatics requirements and must include the following classes:

- SUST 1000.06 (one full credit in fall term)
- SUST 1001.06 (one full credit in winter term)
- SUST 2000.06 or SUST 2001.06
- three full credits from the approved list (at least two credits above 2000 level)

### 5. Specialization of Your Own Design

The Specialization of your own design follows the general Bachelor of Informatics requirements and must include the following:

- It is your responsibility to develop and submit to the Faculty a written proposal for these 14 classes.
- The 14 classes must be chosen from at least two disciplines other than Computer Science. Two of the disciplines must account for at least four classes each and at least 10 classes together.
- Your proposal must be developed in consultation with one undergraduate adviser from each of the other disciplines and the Director of Informatics.
- Your proposal must include career goals, a list of class, a timeline, and a coherent justification for the proposal. It must be approved by the Faculty.
- At least five full credits must be at the 2000 level or higher.
- At least three full credits must be at the 3000 level or higher.

### 6. Entry Points to Bachelor of Informatics

There are two main entry points into the Bachelor of Informatics program:

- First-Year Entry - Students are advised to apply directly to the Faculty of Computer Science. Consult the first-year entry requirements on page 12.
- Second-Year Entry - Students can enter the normal second year of the program if they meet the second-year entry requirements or equivalent, and have
  - a grade point average of at least 2.0
  - CSCI 1100.03: Computer Science I

- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- CSCI 2112.03: Discrete Structures I
- One full credit writing classes and demonstrable communication skill
- One half credit of electives

Students who are missing some of these requirements may still qualify for second-year entry; consult the Faculty of Computer Science advisors for further information.

### III. Class Descriptions

#### **INFX 1606.03: Introduction to Web site creation.**

See calendar description for INFX 1601.03 in the Informatics section of this calendar.

CROSS-LISTING: CSCI 1206.03

EXCLUSION: INFX 1600.18

#### **INFX 1615.03: Concepts of Computing.**

This course introduces some key concepts in computing and places them in context with a survey of applications. The skills developed in this course include research, redaction, problem solving and abstraction. The themes covered are the following: Data and storage, operating systems, networking and the Internet, database systems, artificial intelligence and computer graphics. This course is eligible to partially cover the writing requirement for students in the Bachelor of Computer Science, the Bachelor of Informatics and Bachelor of Science, Computer Science.

#### **INFX 1616.03: Applications of Computing.**

This course covers professional aspects of the computing industry. The main themes are: project management, software engineering and computer languages. It explores how technological advances impact the workplace for non-technical people. It also includes a module on proofreading and editing. This course is eligible to partially cover the writing requirement for students in the Bachelor of Computer Science, the Bachelor of Informatics and Bachelor of Science, Computer Science.

#### **INFX 1690.03: Project Management Theory and Practice.**

This course provides the basics of Informatics and technology project management. This course treats both the theory required and allows for practical experience. Students work in project teams to solve practical informatics problems. This course is the first in a series of project courses that gives students the opportunity to develop technical and professional skills. Students are expected to take this course in their first year of study.

EXCLUSION: INFX 1600.18

#### **INFX 2601.03: Introduction to Information Security.**

See the class description for INFX 2601.03 in the Informatics section of this calendar.

CROSS-LISTING: CSCI 2201.03

#### **INFX 2640.03: Introduction to Database Systems.**

This course introduces students to the concepts of database management systems and database design. Topics include: Database (DB) components, DB design using entity-relationship (relational and object oriented), SQL, and transactional properties and techniques to support them. The concepts will be reinforced using one or more Database Management Systems.

PREREQUISITE: CSCI 1100.03

EXCLUSION: CSCI 2141.03

#### **INFX 2670.03: Introduction to Server Side Scripting.**

A server side scripting language is used to create web pages with dynamic content. The course provides the technology necessary for connecting client web pages to web servers and processing and storing information obtained using forms during web sessions.

PREREQUISITE: CSCI 1100.03 and INFX 1606.03

CROSS-LISTING: CSCI 2170.03

CO-REQUISITE: INFX 2640.03 or CSCI 2141.03

#### **INFX 2690.03: Integrated Studies 1.**

Students work in project teams to solve a practical informatics problem. Team members are drawn from all years of study. The project gives students an opportunity to develop their technical and professional skills.

PREREQUISITE: INFX 1606.03, INFX 1615.03, and INFX 1616.03

#### **INFX 2691.03: Integrated Studies 2.**

This class is a continuation of INFX 2690.03

PREREQUISITE: INFX 2690

#### **INFX 3600.03: Integrated Studies 3.**

This class is a continuation of INFX 2691.03 with the development of leadership skills.

PREREQUISITE: INFX 2640.03, INFX 2670.03, INFX 2691.03

#### **INFX 3601.03: Integrated Studies 4.**

This class is a continuation of INFX 3600.03

PREREQUISITE: INFX 3600.03

#### **INFX 3630.03: Introduction to Software Engineering.**

See the class description for CSCI 3130.03 in the Computer Science section of this calendar.

PREREQUISITE: CSCI 2110.03, CSCI 2132.03, or INFX 3600.03

CROSS-LISTING: CSCI 3130.03

#### **INFX 3690.03: Research Methods.**

Organizational needs for information may not be known a priori, and may need to be established by surveys. This class prepares students to conduct research requiring measurement, sampling, and data analysis and reporting. It also deals with ethical issues and research design.

#### **INFX 4600.03: Integrated Studies 5.**

Continuation of INFX 3601.03

PREREQUISITE: CSCI 3130.03, INFX 2690.03, and (INFX 3601.03 or CSCI 3191.03)

#### **INFX 4601.03: Integrated Studies 6.**

Continuation of INFX 4600.03

PREREQUISITE: INFX 4600.03

# Faculty of Engineering

Location: Sexton Campus, Room MA 108

Leon, L. J., BSc, MSc, PhD (Dalhousie), PEng  
Location: Room MA115, Sexton Campus  
Telephone: (902) 494-3267  
Fax: (902) 429-3011

## Associate Dean, Undergraduate Studies and Associated Universities

Cyrus, J. P., BSc (Eng) (UWI), MAsC, PhD (TUNS), PEng  
Location: Room MA 108, Sexton Campus  
Halifax, NS B3J 1B6  
Telephone: (902) 494-6084  
(902) 494-6199  
Fax: (902) 429-3011

## Assistant Dean of Students

Thorburn, J., BSc (UNB), MSc (Alberta), PhD (Dalhousie), PEng  
Location: Room D236, Sexton Campus  
Halifax, NS B3J 1Z1  
Telephone: (902) 494-3938  
(902) 494-6199  
Fax: (902) 429-3011

## Assistant Dean, Planning

Kuzak, S. G., BEng, MEng (McGill), PhD (TUNS), PEng  
Location: Room F214, Sexton Campus  
Halifax, NS B3J 2X4  
Telephone: (902) 494-3253  
(902) 494-6199  
Fax: (902) 429-3011

## Director, Core Program

Jarjoura, G., BEng (TUNS), MAsC, PhD (Dalhousie), PEng  
Location: Room 332  
Sir James Dunn Building  
Halifax, NS B3H 3J5  
Telephone: (902) 494-8339  
(902) 494-2344  
Fax: (902) 429-3011

## I. Engineering as a Profession

Engineering is an important profession. Virtually all aspects of modern life are involved with this fascinating discipline. Engineering education at Dalhousie is demanding, because the engineering profession is demanding. Society expects its technical problem solvers to offer answers to some of the most difficult questions around, questions related to the environment, productivity, information technology, communications, transportation, and more. In general, the engineering enterprise contributes not only to human welfare, but also to the sustainable development of our resources. Engineering education provides great rewards for the engineer of the future. Specifically, there is the personal satisfaction of following a career where one's personal expertise can benefit fellow humans and contribute to the making of a better world.

The Faculty of Engineering at Dalhousie University prepares its students with the problem-solving skills needed for lifelong exploration in a field that answers some

of today's most pressing concerns. The Faculty of Engineering has an excellent tradition of providing engineering education for students in the Atlantic Provinces that started in 1907 with the founding of the Nova Scotia Technical College. Our graduates occupy many important positions throughout Canada and in many other countries.

The Faculty of Engineering offers undergraduate curricula leading to the degree of Bachelor of Engineering in the following disciplines:

- Chemical Engineering
- Civil Engineering
- Electrical Engineering
- Environmental Engineering
- Industrial Engineering
- Materials Engineering
- Mechanical Engineering
- Mineral Resource Engineering

The Faculty also offers a Bachelor of Applied Science in Food Science (admission suspended, pending review), and post-graduate studies at the master's and doctoral level.

For students who are eligible, the Faculty of Engineering offers a Bachelor of Engineering Co-operative Education program that integrates academic study with university approved industrial experience. Graduation from this program requires satisfactory performance in both areas. The schedule of study and work terms varies according to the discipline, details of which are outlined in Section E of the Engineering curricula in this calendar.

The co-operative education system requires students to alternate periods of study with periods of university approved, full-time, paid employment. The period of employment is called a work term and is normally four months (16 weeks) in length. Some programs combine two or more four month work terms. Work terms have academic requirements that must be completed in addition to the requirements of the employer.

The co-op degree program covers almost five calendar years, comprising eight or nine terms (depending on the area of specialization) each consisting of about four months' duration of university work on campus which are pursued alternately with four-month terms of supervised training in the practical experiences fundamental to the development of the graduate engineer. In a typical program of study, the total time spent in academic study is the same as that encountered in the usual class of four academic years.

Graduation from the University is the beginning of a lifelong learning experience. After completion of formal studies leading to the Bachelor of Engineering degree, and being admitted as an Engineer in Training (EIT) by an Association of Professional Engineers in Canada, four years of suitable experience are required as a condition of admission to the profession of Engineering.

The practice of engineering is regulated, by statute, in all Canadian provinces and territories. To become a Professional Engineer you must satisfy the requirements of the licensing bodies. These requirements include a degree from an accredited program, successful completion of a professional practice (law and ethics) examination, and suitable experience. Accreditation of the degree programs by the CEAB is the mechanism by which graduates qualify for registration as Professional Engineers without the need to undertake additional examinations in specific technical subject areas. The BEng programs described in this calendar have been specifically designed to satisfy the criteria of the Profession and are evaluated regularly by the Canadian Engineering Accreditation Board (CEAB) of Engineers Canada. The Faculty will not graduate any student who does not meet these requirements because this would jeopardize accreditation for the program. The department responsible for the appropriate program will use these requirements in determining the suitability of student elective class selections. The baccalaureate programs in all disciplines are accredited by the Canadian Engineering Accreditation Board.

## II. Degree Programs

### A. Undergraduate

#### 1. Engineering

##### 1.a Bachelor of Engineering

Students who have successfully completed the academic study program in any of the disciplines will be granted the degree of Bachelor of Engineering.

##### 1.b Bachelor of Engineering with Distinction

Students who have successfully completed the requirements for the degree of Bachelor of Engineering, and have obtained a Cumulative Grade Point average of at least 3.7, will be granted the degree of Bachelor of Engineering with Distinction.

##### 1.c Bachelor of Engineering with Sexton Distinction

Dr. F.H. Sexton was the President of the Nova Scotia Technical College since its establishment in 1909 until his retirement in 1947. To honour his contributions, the Faculty of Engineering awards the designation of Sexton Distinction to each undergraduate student who has taken a full class load and obtained a cumulative Grade Point Average of at least 3.85 or higher with no failed marks during their program beginning in Academic Term 5.

##### 1.d Co-operative Program Designation

Students who have successfully completed the requirements for the degree of Bachelor of Engineering and who, in addition, have successfully completed three four-month work terms, each of a minimum of 14 weeks, with a minimum of 35 hours per week, or equivalent as determined by the Department and the Co-op office, will receive the "Co-operative Education" designation on their degree.

##### 1.e Diploma of Engineering

Students who have successfully completed the academic study program in the first four terms in any of the disciplines will be granted the Diploma of Engineering.

##### 1.f Combined Bachelor of Science/Diploma of Engineering

Students may register in a combined Bachelor of Science/Bachelor of Engineering program. Those who successfully complete the requirements as outlined in the Concurrent Programs sections on page 137 will be awarded the Diploma in Engineering and the 15 credit Bachelor of Science Degree.

##### 1.g Combined Bachelor of Arts/Diploma of Engineering

Students may register in a combined Bachelor of Arts/Bachelor of Engineering program. Those who successfully complete the requirements as outlined in the Concurrent Programs sections on page 137 will be awarded the Diploma in Engineering and the 15 credit Bachelor of Arts Degree.

#### 2. Food Science

##### Bachelor of Applied Science

This is a standard 20 credit curriculum. Consult the Food Science section (page 364).

### B. Graduate

#### 1. Master of Applied Science

Students who have successfully completed the class requirements for the degree and who have submitted and defended orally an acceptable thesis, will be awarded the degree of Master of Applied Science.

#### 2. Master of Engineering

Students who have successfully completed the class requirements for the degree and submitted an acceptable project report, will be awarded the degree of Master of Engineering.

#### 3. Master of Engineering (Internetworking)

This is a 10 month plus internship/project interdisciplinary Master's Degree program focused on the theory and technology of the Internet. This program has been designed to prepare individuals to play an active role in the rapidly expanding field of Internetworking. Students who complete the prescribed ten classes and a project class will be awarded the MEng (Internetworking).

#### 4. Master of Science

Students who have successfully completed the class requirements for the degree in Engineering Mathematics or Food Science and who have submitted and defended orally an acceptable thesis or project report, shall be awarded the degree of Master of Science.

#### 5. Doctor of Philosophy

Students who have successfully completed the class requirements for the PhD degree, passed their comprehensive examination, and submitted and defended orally a satisfactory thesis, will be awarded the degree of Doctor of Philosophy.

# Engineering

## I. The Associated University Program

Students who have completed the degree requirements for a Diploma of Engineering or a Certificate of Applied Science from one of the Associated Universities are admissible to the Upper Division in the Faculty of Engineering. Admission to specific programs is competitive and is based on the students' academic standing. The Associated Universities are:

### Acadia University

Wolfville, Nova Scotia  
A. Mitchell, Director  
The Ivan Curry School of Engineering

### Cape Breton University

Sydney, Nova Scotia  
E. MacLellan, Director  
Diploma in Engineering Program

### St. Francis Xavier University

Antigonish, Nova Scotia  
F. Comeau, Chairman  
Department of Engineering

### Saint Mary's University

Halifax, Nova Scotia  
R. Singer, Director  
Division of Engineering

### University of Prince Edward Island

Charlottetown, Prince Edward Island  
A. Trivett, Chairman  
Engineering Department

Each of the Associated Universities establishes its own entrance requirements. Dalhousie University recognizes all of the Associated Universities and ensures proper standards of achievement by means of the Associated Universities Directors of Engineering Committee. The program at each Associated University contains classes fulfilling the minimum entrance requirements established by the Senate of Dalhousie University. Students who complete the applied science or engineering program at an Associated University may receive a Certificate or Diploma and are normally admitted to the programs in Chemical, Civil, Electrical, Environmental, Industrial, Materials, Mechanical, or Mineral Resource at Dalhousie without examination. Students should ensure that their class selection at the Associated Universities include the discipline specific classes relevant to their program of choice. Not all Associated Universities offer all discipline specific classes, and students should contact the office of the Associate Dean, Faculty of Engineering at the Sexton location, for details. Students who have completed equivalent university studies elsewhere may also be admitted subject to Dalhousie University Regulations.

Please refer to the Graduate/Professional Calendar for details of graduate programs offered by the Faculty of Engineering.

## II. Academic Regulations

Students are reminded that the academic regulations stated in the calendar are abridged for reference. In addition to the Academic Regulations section of this calendar and the regulations stated below, the current Faculty of Engineering Working Rules also apply to all students.

### Classes on Letters of Permission

The academic program for a student will normally contain a maximum of two classes on a letter of permission.

### Class Grades

A student must achieve a grade of D or greater in each class of the curriculum and satisfy the regulations set out herein in order to graduate. Where Faculty regulations permit, a student who achieves a grade of FM in a required class may write a supplementary examination to attempt to raise the grade to D or greater. If the grade is not raised to at least D by means of a supplementary examination or if a supplementary examination is not permitted, the student must repeat the class. See also Supplementals, page 36.

A student is permitted to repeat a failed mandatory class only once. In the case of a failed elective class, a student may choose either to repeat the class or to substitute another elective class in lieu of the failed class. In the case of a substituted class only one such substitution is allowed. A student will be academically dismissed if the grade achieved in the repeated mandatory class or the repeated elective class or the substituted class is less than D.

### Readmission After Academic Dismissal

A student who has been academically dismissed only once from their program may apply to be readmitted to the same program after a minimum of eight months from the time of dismissal, or, such a student may apply to be admitted to a different engineering program starting immediately. Readmission may be granted by the Faculty on the recommendation of the Department concerned. A department may readmit a student who has been academically dismissed, subject to special academic conditions set by the department, which are based on an evaluation of the student's academic record. See also Academic Dismissal, page 37.

### Scholarships

Only those students who are registered for a full load of classes as measured by the curriculum of the program concerned will be eligible for scholarships and awards in the Faculty of Engineering.

### Supplementary Examinations

Supplementary examinations may be offered to students in order (1) to raise a class grade to at least D, (2) to raise a term GPA to at least C. In the case of raising the term GPA, the supplementary examination will be offered in a class with a grade lower than C. A student who is on Academic Dismissal is not eligible to write a supplementary examination.

Only one supplementary examination will be permitted per session. It must be written on the first scheduled date for writing supplementaries for that student's particular class and cannot be postponed or carried forward to a later session.

Supplementary examinations will not necessarily be available for all classes. In addition, the minimum reported final mark required to write a supplementary examination is FM. The Faculty will determine the classes in which supplementary examinations are not available and a list of those classes will be published early in the term.

The class mark resulting from a supplementary examination will replace the original class mark for all purposes.

When a supplementary examination is offered, the mark obtained on the supplementary examination will normally replace the final examination mark in calculating the class grade.

### Repeating Students

If changes are made in the curriculum, repeating students will be required to satisfy the new curriculum.

### Auditing a Class

See definition of "audit student", page 3.

Students who are registered for a degree in the Faculty must have the approval of the Faculty to audit a class. Such approval can be obtained by submitting a written request to the Dean, who will refer the matter to the Faculty for a decision.

Students who are not registering for a degree in the Faculty must obtain the approval of the Department to audit a class.

### Medical Notes for Final Examinations

Students who miss final examinations for medical reasons must submit medical notes to the Undergraduate Studies Office for consideration by the Associate Dean of Engineering. The medical note is verified and the professor advised if they may

submit the grade of ILL before arrangements for special examinations or rewrites may be made. Meanwhile, the student will be given the grade earned in the class, minus the value of the missed examination. A detailed description of the content of the medical note is described in Article 16.8 Special Arrangements for Examinations, Tests and Assignments (see Academic Regulations section of this calendar).

## Fees

Information pertaining to fees and expenses is given in the “Fees” section of this Calendar.

## Financial Assistance

Information pertaining to Financial Assistance is given in the “Awards and Financial Aid” section of this Calendar.

# III. Undergraduate Programs

## A. Bachelor of Engineering

### 1. Introduction

The engineering program is designed for students who have completed senior matriculation (Nova Scotia Grade XII) including mathematics, physics, and chemistry, and rank well in their class. Students may be admitted with advanced placement.

At Dalhousie, students benefit from our unique approach to undergraduate engineering education. Renowned for innovation in education, the unique undergraduate engineering curricula at Dalhousie University provide a sound basis in Mathematics and pure Science and in Engineering Science and Design, that are a foundation for success in any engineering career. A substantial part of the work of the first and second years is common to all programs. The content of many of these classes will change very little over the class of an engineer's career; they will become a sound basis of life-long learning.

The Faculty of Engineering has five engineering departments and one service department, the Department of Engineering Mathematics and Internetworking. Civil and Resource Engineering administers degree programs in the disciplines of Civil and Mineral Resource Engineering. The Department of Electrical Engineering administers the program in Electrical Engineering and the Department of Process Engineering and Applied Science administers degree programs in the disciplines of Environmental, Chemical, and Materials. The remaining departments are Industrial Engineering and Mechanical Engineering.

At the end of Year 1, students apply for discipline choice indicating the order of their preferences. The Faculty of Engineering will inform students who have met the criteria of promotion from Year 1 to Year 2 of their conditional placement in one of the accredited programs. The curriculum for each of the basic programs combines required ‘core’ subjects essential to the field, and ‘elective’ subjects permitting considerable diversity in individual programs of study. An important part of the curriculum is a series of Complementary Studies classes. The curriculum for the first two years of Engineering is indicated below. **Students should refer to the appropriate departmental chapter of the calendar once a field of specialization has been determined for subsequent years.**

### 2. Admission to an Engineering Discipline

A student must apply to be admitted into one of the engineering disciplines. Application must be made by April 30 of any year, for conditional acceptance into year two of a specified engineering program.

Every engineering discipline has a defined maximum enrollment; therefore places are assigned on a competitive basis. The criterion for this competition is the average grade over all credits completed to date in the curriculum of the Diploma of Engineering.

The procedure is as follows:

1. By April 30, each student must specify ordered preferences for three or more engineering disciplines. The application is for conditional acceptance into year two of an engineering discipline.
2. Any student who has completed all of the entry requirements for an engineering discipline, with a GPA of 3.30 or better, will be guaranteed a place in that engineering discipline.

3. In a single competition, students with a GPA greater than or equal to 2.00 and less than 3.30 will be assigned conditional places (year two) in engineering disciplines, proceeding in strict order of GPA, subject to discipline capacities.
4. Any student with a GPA of less than 2.00 will not be admitted to a discipline.

## B. BSc/BEng

Students who meet the admission requirements for the Bachelor of Science program and the Bachelor of Engineering program are eligible to select this concurrent degree option. Students wishing specific advice should consult the Assistant Dean, Faculty of Science and the Associate Dean, Faculty of Engineering. Students accepted will complete the 15 credit BSc and the first two years of engineering studies leading to the Diploma in Engineering concurrently in a period of three calendar years. At the end of the three year period, both the degree and the diploma will be awarded to successful candidates. This opportunity should appeal to students with career objectives in multi-disciplinary fields such as Biomedical Engineering, Environmental Science, or Materials Science (among others). It is thus possible to complete the requirements for the Bachelor of Science and Bachelor of Engineering degrees concurrently in a time period of five years in total (or up to six years for Co-op programs).

## C. BA/BEng

Students wishing to do so may complete the 15 credit BA degree program and the first two years of engineering studies leading to the Diploma in Engineering concurrently in a period of three calendar years. At the end of the three year period, both the degree and the diploma will be awarded to successful candidates. It is thus possible to complete the requirements for the Bachelor of Engineering and the Bachelor of Arts degrees concurrently in a time period of five years in total (or up to six years for Co-op programs).

Classes in the fourth and fifth years are those required to finish the Bachelor of Engineering degree.

## D. Diploma of Engineering

Students who have successfully completed the academic study program in the first four terms in any of the disciplines may be eligible to apply for the Diploma of Engineering. This means a student must have a minimum GPA of 2.0, and have completed, with a minimum grade of D, the required classes as specified in the discipline curriculum.

## Curricula for Terms 1 - 4

### Year 1—Term 1 Fall

- ENGI 1101 Engineering Design and Graphics I
- MATH 1280 Engineering Mathematics I
- ENGM 1081 Computer Methods
- CHEM 1021 Engineering Chemistry I
- PHYC 1190 Introduction to Physics I

### Year 1—Term 2 Winter

- ENGI 1202 Mechanics of Materials
- MATH 1290 Engineering Mathematics II
- ENGM 1041 Applied Linear Algebra
- PHYC 1290 Introduction to Physics II
- CHEM 1022 Engineering Chemistry II

### Year 2—Term 3 Fall

- BIOL 1030 Biology for Engineers
- HSTC 1800 History of Engineering I
- ENGM 2101 Applied Vector Calculus
- ENGM 2032 Probability and Statistics
- ECED 2000 Electric Circuits
- ENGI 2102 Thermo-Fluid Engineering I

### Year 2—Term 4 Winter

- ENGI 2203 Engineering Design II
- HSTC 1801 History of Engineering II
- ENGM 2022 Applied Differential Equations
- Three discipline-specific electives

## Discipline-Specific Choices

### Chemical Engineering

- PEAS 2201 Fundamentals of Process Engineering

- PEAS 2202 Fundamentals of Environmental Engineering
- CHEM 2441 Organic Chemistry

### Civil Engineering

- ENGI 2400 Mechanics II: Dynamics
- MINE 2200 Geology for Engineers
- ENGI 2103 Thermo-Fluid Engineering II

### Electrical Engineering

- ECED 2001 Circuit Analysis
- ECED 2200 Digital Circuits
- IENG 2005 Engineering Economics

### Environmental Engineering

- PEAS 2201 Fundamentals of Process Engineering
- PEAS 2202 Fundamentals of Environmental Engineering
- CHEM 2441 Organic Chemistry

### Industrial Engineering

- IENG 2005 Engineering Economics
- Any two electives from the following:
- ECED 2001 Circuit Analysis
- ECED 2200 Digital Circuits
- PEAS 2201 Fundamentals of Process Engineering
- PEAS 2202 Fundamentals of Environmental Engineering
- ENGI 2400 Mechanics II: Dynamics
- CHEM 2441 Organic Chemistry

- MINE 2200 Geology for Engineers
- ENGI 2103 Thermo-Fluid Engineering II

### Materials Engineering

- PEAS 2201 Fundamentals of Process Engineering
- PEAS 2202 Fundamentals of Environmental Engineering
- CHEM 2441 Organic Chemistry

### Mechanical Engineering

- ENGI 2400 Mechanics II: Dynamics
- IENG 2005 Engineering Economics
- ENGI 2103 Thermo-Fluid Engineering II

### Mineral Resource Engineering

- MINE 2200 Geology for Engineers
- IENG 2005 Engineering Economics
- Any one elective from the following:
- ECED 2001 Circuit Analysis
- ECED 2200 Digital Circuits
- PEAS 2201 Fundamentals of Process Engineering
- PEAS 2202 Fundamentals of Environmental Engineering
- ENGI 2400 Mechanics II: Dynamics
- CHEM 2441 Organic Chemistry
- ENGI 2103 Thermo-Fluid Engineering II

The elective choices are summarized in the table below.

	Discipline-Specific Electives	Environmental	Chemical	Civil	Electrical	Industrial	Mechanical	Materials	Mineral Resource
ECED 2001	Circuit Analysis				1	*			**
ECED 2200	Digital Circuits				1	*			**
PEAS 2201	Fundamentals of Process Engineering	1	1			*		1	**
PEAS 2202	Fundamentals of Environmental Engineering	1	1			*		1	**
ENGI 2400	Mechanics II: Dynamics			1		*	1		**
CHEM 2441	Organic Chemistry	1	1			*		1	**
MINE 2200	Geology for Engineers			1		*			1
IENG 2005	Engineering Economics				1	1	1		1
ENGI 2103	Thermo-Fluid Engineering II			1		*	1		**
* any two electives for Industrial ** any one elective for Mineral Resource									

## E. Engineering Co-op Program

The Faculty of Engineering offers a Bachelor of Engineering Co-operative Education program (BEng Co-op) that integrates academic study with university approved industrial experience. Graduation from this program requires satisfactory performance in both areas. The schedule of study and work terms varies according to the discipline, details of which are outlined below.

BEng Co-op is a selective program. Students interested in participating in the Engineering Co-op Program must register for the Engineering Co-op Orientation course by January 15th for the following programs: Chemical, Environmental, Materials and Mechanical, and by May 15th for Civil, Electrical, Industrial and Mineral Resource.

Co-operative education is based on the principle that an academic program combined with work experience in alternating terms, is desirable for effective professional preparation. Work term employment, which varies from sector to sector and location to location, allows students to acquire experience in their areas of career interest, while study terms are devoted primarily to fundamental and theoretical studies. These practical experiences and academic studies complement each other.

Students interested in participating in the Co-op Program, should be aware that work terms exist in a variety of public and private settings. Students compete for jobs four months prior to the start of the work term. Students will be assisted by the Dalhousie University Engineering Co-op Office, and efforts will be made to find suitable opportunities for eligible students. There are, however, no assurances that each student will secure a Co-op position. Students with high CGPAs, enthusiasm, and professional potential have typically had the greatest success in securing Co-op work terms. For other regulations pertaining to the co-op program, please refer to the Policies section of the Engineering Co-op website.

### The Study and Work Schedule

The co-operative system requires students to alternate periods of study with periods of university approved, full-time, paid employment. The period of employment is called a work term and is normally four months (16 weeks) in length. Some programs combine two or more four-month work terms. Work terms have academic requirements that must be completed in addition to the requirements of the employer.

Each discipline has a specific work and study term schedule which students are required to follow (see the study and work sequence chart below). Work terms do not begin until third year of the program. All programs end on an academic term rather than a work term to allow for the formal integration of workplace and classroom learning.

## Study and Work Sequences

Study and Work Sequences								
Discipline	Fall	Winter	Summer	Fall	Winter	Summer	Fall	Winter
Civil	Study	Study	Work	Work	Free	Work	Study	Study
Electrical	Study	Work	Study	Work	Study	Work	Study	
Industrial	Study	Work	Study	Work	Study	Work	Study	Study
Mineral Resource	Study	Study	Work	Work	Study	Work	Study	
Chemical, Environmental, Materials, Mechanical	Work	Study	Work	Study	Work	Work	Study	Study

### Eligibility

Students who meet the admission requirements for Co-op:

1. Are registered in the Bachelor of Engineering Program;
2. Have attained a minimum cumulative grade point average (CGPA) of 2.3 (or equivalent) in the Diploma of Engineering program;
3. Have completed all requirements for a Diploma of Engineering or equivalent (ie. Have no deficiencies at the beginning of the term in which the job search starts);
4. Are eligible to work in Canada;
5. Have met all the academic pre-requisites for the particular co-op term, including passing all previous work terms;
6. Have successfully completed the Co-op Orientation course;

Students must also meet the following criteria to be eligible to compete for a work term and continue in the program:

- register for the work term class(s);
- submit Co-op work permit applications if they are international students;
- maintain a minimum CGPA of 2.3;
- have met all the academic pre-requisites for the particular co-op term;
- submit a signed Co-op Agreement Form;
- be registered as a full-time co-operative education students in their program;
- be able to complete three work terms in the schedule prescribed by their discipline;
- adhere to the job competition regulations in the Policies section of the Engineering Co-op website;
- keep the Co-op Office informed of their employment status;
- maintain professional conduct at all times with respect to employers and co-op staff;
- refrain from deliberately misrepresenting themselves in academic or employment matters pertaining to the co-op program;
- receive a passing grade for all previous work terms;
- meet performance expectations of previous co-op employers.

**Students who opt out of co-op will not be re-admitted.**

### Obtaining Employment

It is the student's responsibility to arrange suitable work term employment that is pre-approved by the Co-op Office. Students must be prepared to conduct their own job search in addition to competing for the employment opportunities that the Co-op Office solicits and advertises through the online myCareer system. The employment success rates of co-op students vary from program to program and from term to term based on prevailing labour market conditions. Employment statistics, by program, are available on the Engineering Co-op website.

The employment process is highly competitive; students are competing for jobs with their classmates and with students in other co-op programs across the country. Factors such as academic performance, skills, motivation, maturity, attitude, professional conduct, flexibility and performance potential, determine whether or not a student is offered employment. To be successful, students must review the job and interview notices daily, apply to an adequate number of opportunities, check and respond promptly to all Co-op Office correspondence, conduct their own job search, and maintain realistic expectations of job content, geographic locations and salary. Students should be aware that some co-op employers conduct criminal and/or driving record checks or other screening procedures. In some cases, it is the student's responsibility to have such procedures completed.

Work term employment agreements are between the student and the employer. Dalhousie University is not a party to these agreements and assumes no financial or legal responsibility with regard to events or actions by either party that affect the employment situation for any co-op student (eg. layoffs, intellectual property issues, confidentiality agreements, strikes, etc.). Students are responsible for knowing all the terms and conditions of employment before accepting a job.

### Work Term Conduct

Because the University relies heavily on maintaining long-term successful relationships with employers to provide work terms, students on work terms must consider themselves to be ambassadors of the program. As such, students will:

- abide by the policies and procedures of their employer as well as the policies and procedures of the University and the Co-op Office;
- fulfill the entire time commitment required for each co-operative education work term;
- attempt to resolve with the employer any difficulties which arise during the work term and notify the Co-op Office immediately if they cannot be resolved;
- contact the Co-op Office prior to making any decision affecting their employer and/or employment;
- assist the Co-op Office with scheduling a work site meeting with the supervisor;
- maintain professional conduct with all co-workers, clients and supervisors.

### Work Term Evaluation

Work terms are considered academic terms. Students must complete a set of academic requirements, as prescribed by their discipline, in addition to the work required by their employment supervisor. Students are given a Pass/Fail grade for each four-month work term. All disciplines have the following minimum requirements, some disciplines have additional requirements:

1. Complete the work term monitoring process.
2. Engineering-in-Training (EIT) Monthly experience records.
3. A work term report.
4. A performance appraisal completed by the supervisor.

Students must achieve a satisfactory grade for each item in order to achieve a passing grade for the work term. The specific guidelines for each of these items are available from a variety of sources including the Co-op Office and Engineering Departmental websites.

### Graduation

To graduate with a "Co-operative Education" designation on their degree, students must successfully complete three work terms.

### Fees

Students are charged a non-refundable co-operative education program fee. Consult the Co-op Office for complete details.

## IV. Class Descriptions

### ECED 2000.03: Electric Circuits.

This is an introductory class in electric circuit analysis. The material covered starts with a review of the fundamental circuit variables such as voltage, current, charge, power and energy. Kirchhoff's laws are introduced and developed into node and loop analysis techniques. Terminal behavior and circuit equivalence including Thevenin and Norton circuits are covered. Analysis with controlled sources and energy storage elements is developed including steady state and transient response for first order networks. Phasors and sinusoidal steady state are introduced. Students are introduced to circuit simulation tools such as p-spice.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: MATH 1290.03, PHYC 1290.03 or equivalent

### ECED 2001.03: Circuit Analysis.

This class covers advanced circuit analysis techniques, starting with sinusoidal excitation. The concepts of phasors and complex impedance are fully developed. Mutual inductance and magnetically coupled coils are used to introduce transformer behavior and performance. Real and reactive power flow is covered before the introduction of balanced three phase circuits for power distribution. Symmetrical components are introduced as a means of dealing with unbalanced networks. The concepts of grounding and harmonics are also introduced.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: ECED 2000.03

**ECED 2200.03: Digital Circuits.**

This class includes an introduction to: Boolean algebra, encoders, decoders, shift registers, asynchronous and synchronous counters, together with timing considerations. Design of asynchronous circuits, synchronous sequential circuits, and finite state machines, is covered. Karnaugh mapping techniques and state tables and diagrams are taught. Programmable logic is introduced. Contemporary computer aided design and analysis software is used throughout the class.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: ECED 2000.03

**ENGI 1101.045: Engineering Design I.**

The Objective of the class is to provide students with conceptual design experience, team work experience, computer drafting experience and to develop skills in engineering free-hand sketching, 3-D visualization, and reading/drafting of engineering drawings. An integral part of the class is the Design Project, focused on design as the essence of engineering, and the process of design and reporting. Also included are lectures on technical writing and presentation skills, study skills, examination skills and an introduction to the variety of disciplines of engineering and academic regulations for engineering.

FORMAT: Lecture 4 hours, seminar 1 hour, lab 3 hours

**ENGI 1202.045: Mechanics of Materials.**

This class teaches the concept of stress, strain and deformation of a solid body subjected to static forces. Topics considered include: stresses and strains under axial, bending, torsional and combined loadings, transformation relations for stresses and strains, Mohr's circle for stress and strain, strain gauges, mechanical properties of materials and failure theories. Also considered are introduction to the engineering profession, engineering ethics and professional responsibility as well technical writing and presentation skills. An individual design project is a major component of this class.

FORMAT: Lecture 4 hours, seminar 1 hour, lab 3 hours

PREREQUISITE: PHYC 1280.03, MATH 1280.03

**ENGI 2102.03: Thermo-Fluid Engineering I.**

This course introduces the engineering sciences of thermodynamics and fluid mechanics in an integrated manner. A unified approach to energy transfer in thermal and mechanical systems is presented. The course covers basic properties of fluids, fluid statics, simplified analyses of fluid motion, the basic laws of thermodynamics, and the application of control volume techniques to engineering problems. Power systems are introduced through a study of the Rankine cycle.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGI 1202.045; CHEM 1022.03; MATH 1290.03, PHYC 1290.03

EXCLUSION: ENGI 2800.03

**ENGI 2103.03: Thermo-Fluid Engineering II.**

This course builds on the fluid mechanics introduction presented in Thermo-fluids I to present engineering concepts of fluid mechanics and energy. The course covers dimensional analysis, completes fluid statics from Thermo-Fluids I, puts a large emphasis on the notion of control volume needed to properly solve thermal fluid problems using the conservation laws presented as integral relations, treats flow in ducts putting emphasis on head losses (friction and minor) and presents a practical theory of turbomachinery. The different concepts studied during the course are brought together at the end in a series of design examples and design problems.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGI 1101.045; ENGI 2102.03, CHEM 1021.03, CHEM 1022.03; MATH 1290.03

**ENGI 2203.03: Engineering Design II.**

This class provides a project-based exercise in the engineering design process. Students work in teams and as individuals on defined projects which apply knowledge and skills in all areas of engineering studied in semesters 1 to 3. The projects encompass the design method, conceptual design, design selection, detailed analysis, CAD and simulation tools, engineering drawings, safety and preparation of professional technical reports. Discipline-specific projects are assigned. All projects involve evaluation/testing of student designs, depending on the discipline section either through (i) construction and testing of a physical prototype or (ii) development and testing of an engineering simulation model.

INSTRUCTOR(S): Lecture 3 hours, lab 3 hours

PREREQUISITE: ENGI 1101.045, ENGI 1202.045 and ENGM 1081.03

EXCLUSION: MECH 2100 and ECED 2900

**ENGI 2400.03: Mechanics II.**

This second class in Engineering Mechanics considers the kinematics and kinetics of a single particle and a single rigid body. The class builds on the concepts introduced in ENGI 1400.03 (Mechanics I). Both vector and scalar methods are used. Topics include kinematics of a particle, kinetics of a particle, kinematics of a rigid body in plane motion, and planar kinetics of a rigid body.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: ENGI 1081.03; MATH 1290.03; PHYC 1280.03, 1290.03

**ENGI 8890.00: Co-op Orientation and Job Competition Preparation.**

This on-line course introduces aspects of career development including, self-assessment, resume and cover letter writing, interviewing skills and job search techniques. It also provides students with an overview of the graduate attributes, the Pre-Grad EIT work credit, and co-op program policies and procedures. This class is available every term and is a pre-requisite for all engineering co-op classes. It must be completed one term prior to the first work term. The grade will be Pass/Fail.

FORMAT: Online

**ENGM 1041.03: Applied Linear Algebra.**

This class covers geometric vectors in three dimensions, dot product, cross product, lines and planes, complex numbers, systems of linear equations, matrix algebra, matrix inverse, determinants, Cramer's rule, introduction to vector spaces, linear independence and bases, rank, linear transformations, orthogonality and applications, Gram-Schmidt algorithm, eigenvalues and eigenvectors.

FORMAT: Lecture 3 hours, lab 2 hours

**ENGM 1081.03: Computer Programming.**

This class covers fundamental programming principles including flow control, modularity, and structured programming. The student will implement significant programs in the C language to solve engineering problems.

FORMAT: Lecture 3 hours, lab 2 hours

**ENGM 2032.03: Applied Probability and Statistics.**

The topics covered include probability laws and the interpretation of numerical data, probability distributions and probability densities, functions of random variables, joint distributions, inferences concerning mean and variance, tests of hypotheses, and introduction to linear regression. The class emphasizes engineering applications and makes extensive use of statistical computer packages.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: MATH 1280.03 and MATH 1290.03

**ENGM 2101.03: Applied Vector Calculus.**

This class covers space curves, arclength, curvature, functions of several variables, partial derivatives, implicit functions, constrained and unconstrained extrema, multiple integrals, line, surface, and volume integrals, change of variables in multiple integrals, scalar and vector fields, gradient, divergence and curl, Stokes Theorem, the Divergence Theorem, and applications to heat flow, electrostatics and fluid flow. Programming skills are developed using software tools to solve practical problems.

FORMAT: Lecture 3 hours, tutorial 2 hours

PREREQUISITE: MATH 1280.03 and MATH 1290.03

EXCLUSION: ENGM 2062.03 and ENGM 2262.03

**IENG 2005.03: Engineering Economics.**

This class is designed to provide students with the fundamentals of engineering economics. Engineers must function as managers in the real world of decision making where the criteria include not only technological excellence, but cost. Time value of money, project screening, and a variety of discounting analysis techniques are presented. Make versus buy decisions and repair versus replace decisions are discussed. The tax effects on project cash flow and viability are also presented. This class is designed to introduce students to these fundamentals, and apply them through the use of software and projects.

FORMAT: Lecture 3 hours, lab 2 hours

**PEAS 2201.03: Fundamentals of Process Engineering.**

The main objective of this course is to develop the student's ability to perform mass and energy balances on non-reactive and reactive processes. Introductory topics include systems of units and a study of process variables such as temperature, pressure and flow rate. Also covered are fundamental properties of multiphase systems, including phase equilibrium, vapour pressure, and Raoult's

and Henry's Laws. Emphasis is placed on developing problem solving skills and adopting a consistent approach to the analysis of process systems.  
 FORMAT: Lecture 3 hours, tutorial 2 hours  
 EXCLUSION: CHEE 2404.03

### PEAS 2202.03: Fundamentals of Environmental Engineering.

The class will focus on sources of environmental pollutants, the effects of pollutants on living and non-living systems, and the processes by which pollutants are generated or by which their effects can be minimized or remediated. Lectures are supplemented by tutorials which include guest speakers, case studies and field trips.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: CHEM 1021.03, CHEM 1022.03

CROSS-LISTING: ENVE 3000.03

### CPST Series: Complementary Studies Classes

#### CPST 3030.03: Engineering in Society II.

The class provides an overview of the concepts and interrelationships among sustainable development, environmental stewardship and public health and safety in relation to engineering practice. These concepts will be examined through historical examples and current theory and practice of the engineering profession. Lectures and discussion will consider global ecosystem functions, human interactions with the environment, methods of reducing human impacts; methods of achieving sustainability, engineering challenges to enhance sustainable development; and factors that influence occupational health and safety from engineering and management viewpoints. Students will be exposed to management methods and tools such as environmental auditing, ISO 14000, risk analysis and WHMIS and will be expected to consider class topics in relation to their own area of engineering specialization.

FORMAT: Lecture 3 hours

## Chemical Engineering

### Department Head, Process Engineering and Applied Science

Pegg, M. J., BSc, PhD (Leeds), PEng

### Undergraduate Program Co-ordinator

Ghanem, A., BScEng (UNB), PhD (Cornell), PEng

## I. Introduction

The Chemical Engineering program prepares students for careers in the chemical and process industries and in a variety of related fields. These encompass, among others, the traditional areas of environmental control, plastics and polymers, pulp and paper, instrumentation and process control, petrochemicals, petroleum and natural gas processing, and energy conversion and utilization, as well as the growing fields of biotechnology, food processing, composite materials, corrosion and protective coatings, and manufacture of microelectronic components.

The responsibilities assumed by Chemical Engineers include a wide range of activities such as research and development of novel products and processes, the design, development and operation of process plants, and management of technical operations and sales.

The curriculum is designed to provide the student with a broad background in the underlying sciences of Chemistry, Physics and Mathematics. This is then combined with a detailed knowledge of engineering principles and practice, along with a good appreciation of social and economic factors. Thorough understanding of the principles is accomplished through lecture, tutorial and laboratory activities, and extensive use is made of the departmental computing facilities. Laboratory involvement is considered an important component of the students' education. Emphasis in the laboratory is placed on team work and on the development of problem-identification and problem-solving skills. The Department stresses the preparation of students for independent work and the development of interpersonal skills necessary for professional engineers. Elective classes provide the student with the opportunity to obtain additional training in one of the following areas: computers and process control, biotechnology, environment, energy resources and utilization, and research and development.

In the later academic terms, students have an opportunity to work under conditions similar to those encountered in consulting and engineering organizations, particularly in the computer-aided-design and process design classes.

Research opportunities leading to the Master's and Doctorate degrees are offered in a wide range of topics within the Department as well as in conjunction with other departments and a number of research centres on the campus. Detailed information regarding the graduate program can be obtained from the Department.

Students have the option of joining either the co-op or non co-op undergraduate programs.

## II. Curriculum and class descriptions

Refer to sections IIB and IIIB, Chemical Engineering Programs in the Process Engineering and Applied Science section of this calendar, page 375.

### III. Co-operative program and schedule

Refer to section E. Engineering Co-op Program, in the Engineering section of this calendar page 346.

### IV. Admissions

Admission requirements are those specified by the Faculty of Engineering.

Rand, J., CAS (Acadia), BEng, PhD (Dalhousie)

#### Professor Emeritus

Jaeger, L. G., BA, MA (Cantab), PhD, DSc (London), DEng (Carleton, MUN, TUNS)(hc), PEng

## I. Introduction

The Department of Civil and Resource Engineering consists of the Civil Engineering Program and the Mineral Resource Engineering Program. The Department currently offers two accredited professional degree programs:

BEng in Civil Engineering, co-op and non co-op programs;  
BEng in Mineral Resource Engineering, co-op and non co-op programs.

For additional information on these programs and the nature of the engineering studies involved, the reader is referred to individual program listings in the Faculty of Engineering section of this calendar.

## II. Program Guides

### A. Civil Engineering

Years 1 and 2 follow the program that is outlined in the 'Faculty of Engineering' section of this calendar. The two Options, Earth and Environment and Infrastructure, contain a strong common core in those aspects of engineering considered to be crucial for all civil engineering baccalaureates, irrespective of specialization. Terms 5 and 6 are the same for both Options. In Terms 7 and 8 students will have the opportunity to select some courses from a list of technical electives based on their specific interests in focus areas of Civil Engineering.

#### Non Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	FREE
4	Study Term 7	Study Term 8	

#### Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	Work Term 1
4	Work Term 2	FREE	Work Term 3
5	Study Term 7	Study Term 8	

### 1. Infrastructure Option:

#### Year 3 Term 5 (Fall)

- CIVL 3101.03 Soil Mechanics
- CIVL 3300.03 Hydraulics
- CIVL 3505.03 Structural Systems I-Form and Analysis
- CIVL 3705.03 Mechanics of Structural Materials & Components
- CIVL 3725.03 Construction Materials & Methods
- CIVL 3830.03 Surveying & Applied Geomatics

#### Year 3 Term 6 (Winter)

- CIVL 3200.03 Transportation Engineering
- CIVL 3310.03 Engineering Hydrology
- CIVL 3451.03 Water Quality & Treatment
- CIVL 3515.03 Structural Systems II-Loads & Behaviour
- CIVL 3740.03 Computations & Systems Modelling
- IENG 2005.03 Engineering Economics

#### Year 4 Term 7 (Fall)

- CIVL 4111.03 Geotechnical Engineering
- CIVL 4515.03 Reinforced Concrete Design
- CIVL 4525.03 Design of Steel Structures
- CIVL 4801.005 Senior Project I

\*Technical Electives (choose two from the list below)

#### Year 4 Term 8 (Winter)

- CIVL 4710.03 Construction Planning
- CIVL 4802.025 Senior Project II
- CPST 3030.03 Engineering in Society II

\*Technical Electives (choose three from the list below)

\*Infrastructure Option Technical Electives:

Total number of technical electives must equal five.

Total of five (minimum of four) electives may be chosen from the following courses (schedule permitting):

- CIVL 4200.03 Transportation Systems
- CIVL 4250.03 Highway Engineering
- CIVL 4350.03 Hydraulic Engineering
- CIVL 4410.03 Engineering Hydrogeology
- CIVL 4431.03 Water Distribution & Sewerage Systems
- CIVL 4440.03 Water & Wastewater Treatment
- CIVL 4460.03 Solid Waste and Landfill Engineering
- CIVL 4541.03 Applications of Finite Element Method
- CIVL 4560.03 Special Topics in Structural Systems
- ENGM 4675.03 Risk Assessment Management
- MINE 3620.03 Petroleum Engineering

Total of one elective may be chosen from the following courses (schedule permitting):

- ARCH 3104.03 Foundations in Architectural History and Theory
- ARCH 3105.03 Architectural History and Theory - 20th Century
- ENVE 3412.03 Energy and Environment
- ENVE 4421.03 Biogeochemistry & Bioremediation
- ENVE 4651.03 Solar Energy Utilization
- EARTH 3500.03 Geoscience Info Management
- IENG 4500.03 Operation Research
- IENG 4547.03 Company Operations and Management
- IENG 4558.03 Project Management
- MINE 3520.03 Introductory Mining Engineering
- MINE 3530.03 Mineral Processing
- MINE 4710.03 Mine Excavation Systems
- MINE 4812.03 Mine Production Engineering
- PLAN 1001.03 Intro to Community Design 1

Other courses require Department approval.

### 2. Earth and Environment Option:

#### Year 3 Term 5 (Fall)

- CIVL 3101.03 Soil Mechanics
- CIVL 3300.03 Hydraulics
- CIVL 3505.03 Structural Systems I-Form and Analysis
- CIVL 3705.03 Mechanics of Structural Materials & Components
- CIVL 3725.03 Construction Materials & Methods
- CIVL 3830.03 Surveying & Applied Geomatics

#### Year 3 Term 6 (Winter)

- CIVL 3200.03 Transportation Engineering
- CIVL 3310.03 Engineering Hydrology
- CIVL 3451.03 Water Quality & Treatment
- CIVL 3515.03 Structural Systems II-Loads & Behaviour
- CIVL 3740.03 Computations & Systems Modelling
- IENG 2005.03 Engineering Economics

#### Year 4 Term 7 (Fall)

- CIVL 4440.03 Water & Wastewater Treatment
- CIVL 4801.005 Senior Project I
- ENVE 4772.03 Environmental Assessment & Management

\*Technical Electives (choose three from the list below)

#### Year 4, Term 8 (Winter)

- CIVL 4410.03 Engineering Hydrogeology
- CIVL 4802.025 Senior Project II
- CPST 3030.03 Engineering in Society II

\* Technical Electives (choose three from the list below)

\*Earth and Environment Option Technical Electives:

Total number of technical electives must equal six.

Total of six (minimum of five) electives may be chosen from the following courses (schedule permitting):

- CIVL 4200.03 Transportation Systems
- CIVL 4359.03 Form and Process in Alluvial Channels
- CIVL 4410.03 Engineering Hydrogeology
- CIVL 4541.03 Applications of Finite Element Method
- CIVL 4250.03 Highway Engineering
- CIVL 4350.03 Hydraulic Engineering

- CIVL 4431.03 Water Distribution & Sewerage Systems
- CIVL 4440.03 Water & Wastewater Treatment
- CIVL 4460.03 Solid Waste and Landfill Engineering
- CIVL 4111.03 Geotechnical Engineering
- ENGM 4675.03 Risk Assessment Management
- MINE 3620.03 Petroleum Engineering

Total of one elective may be chosen from the following courses (schedule permitting):

- ARCH 3104.03 Foundations in Architectural History and Theory
- ARCH 3105.03 Architectural History and Theory - 20th Century
- ENVE 3412.03 Energy and Environment
- ENVE 4651.03 Solar Energy Utilization
- EARTH 3500.03 Geoscience Information Management
- IENG 4500.03 Operation Research
- IENG 4547.03 Company Operations and Management
- IENG 4558.08 Project Management
- MINE 3520.03 Introductory Mining Engineering
- MINE 3530.03 Mineral Processing
- MINE 4710.03 Mine Excavation Systems
- MINE 4812.03 Mine Production Engineering
- PLAN 1001.03 Introduction to Community Design 1

Other courses require Department approval.

#### NOTES:

1. One or more graduate classes may be included as technical electives in Term 8; however, permission of the instructor and department is required in order to register for such classes.
2. Not all of the technical elective classes will be offered each year.
3. Many classes have pre-requisites (see section IV following). If it is felt, however, that an equivalent course of study has been taken, a waiver of the pre-requisite requirement can be sought from the instructor.
4. Some classes have co-requisites. A co-requisite can also be completed before the class in question (instead of being done concurrently).

### A. Mineral Resource Engineering

Years 1 and 2 follow the common program outlined in the Engineering section of this calendar

#### Non Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	FREE
4	Study Term 7	Study Term 8	

#### Co-op Program:

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Study Term 6	Work Term 1
4	Work Term 2	Study Term 7	Work Term 3
5	Study Term 8		

#### Year 3 Term 5 (Fall)

- CIVL 3101.03 Soil Mechanics
- CIVL 3830.03 Surveying & Applied Geomatics
- CPST 3030.03 Engineering in Society II
- MINE 3520.03 Introductory Mining Engineering
- MINE 3530.03 Mineral Processing
- MINE 3605.03 Mining Geology I

#### Year 3 Term 6 (Winter)

- MINE 3600.03 Equipment Selection & Materials Handling
- MINE 3611.03 Rock Mechanics
- MINE 3612.03 Rock Penetration & Fragmentation
- MINE 3620.03 Petroleum Engineering
- MINE 4706.03 Mining Geology II

\* Choose one technical elective as listed

#### Year 4 Term 7 (Winter)

- CIVL 3740.03 Computations System Modelling
- MINE 4711.03 Mine Ventilation & Environment Control
- MINE 4750.03 Senior Design Project I
- MINE 4815.03 Mining and the Environment
- MINE 4835.03 Mineral Economics and Mine Product

\* choose one technical elective as listed

#### Year 5 Term 8 (Fall)

- IENG 4500.03 Operations Research for Systems Engineering
- MINE 4850.03 Senior Design Project II

\* Choose three technical electives, two of which must be from Mineral Resource Engineering (MINE xxxx), as listed below.

#### Technical Electives:

- CIVL 4111.03 Geotechnical Engineering
- CIVL 4410.03 Engineering Hydrogeology
- CIVL 4710.03 Construction Planning
- CHEE 4773.3 Industrial Safety and Loss
- ENVE 3461.03 Measurement and Analysis
- ENVE 4772.03 Environmental Assessment Management
- IENG 4558.03 Project Management and Control
- IENG 4574.03 Decision and Risk Analysis
- MINE 4710.03 Mine Excavation Systems
- MINE 4801.03 Advanced Topics in Rock Mechanics
- MINE 4816.03 Mining Engineering Project
- MINE 4820.03 Surface Mine Slope Stability
- MINE 4822.03 Advanced Petroleum Engineering
- MINE 4823.03 Offshore Drilling and Projection
- MINE 4830.03 Advanced Mineral Processing
- MINE 4832.03 Flotation

Other approved class.

## III. Class Descriptions

### A. Civil Engineering Series

#### CIVL 3101.03: Soil Mechanics I.

This class is concerned with the physical and mechanical properties of soils. It includes topics of soil chemistry and soil fabric, soil classification, compaction, hydraulic conductivity, one-dimensional and two-dimensional seepage, soil compressibility, time dependant deformation of soils, and shear strength behaviour of soils. Laboratory sessions involve experimentally evaluating the engineering properties of several different soil types and the application of these results to engineering problems.

FORMAT: Lecture 3 hours, lab 1 hour, tutorial 1 hour

PREREQUISITE: MINE 2200.03, ENGI 1202.045, ENGI 2102.03

#### CIVL 3200.03: Transportation Engineering.

This class commences with an introduction to Transportation Engineering in the context of planning, design and operations of urban and rural systems. The class also provides an introduction to route location with special emphasis on Canadian standards and specifications. It also includes detailed study of road design elements, vehicle motion, vehicle/pavement interaction, and principles of roadway capacity.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: CIVL 3830.03

CO-REQUISITE: CIVL 3830.03

#### CIVL 3300.03: Hydraulics.

Fluid mechanics principles are applied to practical hydraulic problems involving flow in closed conduits and in open channels. Topics in pipe flow include losses in pipes, pipes in series and parallel, and network analysis. Topics in open channel flow deal with classification of flows, open channels and their properties, energy and momentum principles, uniform flow, design of erodible and non-erodible channels, and gradually varied flow. These aspects are explained in lectures and validated by laboratory measurements and demonstrations.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: ENGI 2300.03 or (ENGI 2102.03 and ENGI 2103.03)

#### CIVL 3310.03: Engineering Hydrology.

The emphasis in this class is on quantitatively describing the physical processes in the hydrologic cycle. Such processes include precipitation, evaporation,

infiltration, groundwater movement, surface runoff, as well as lake/reservoir routing effects. A working rainfall-runoff model is developed, and by convolution is used to produce a design hydrograph. The size of a detention ponds, statistical hydrology, and snow hydrology are also discussed.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGI 2102.03, ENGM 2022.03, ENGM 2032.03, CIVL 3300.03, MINE 2200.03

### **CIVL 3451.03: Water Quality and Treatment.**

The class expands on the student's previous experience in aqueous chemistry and fluid mechanics. The class provides an Engineering perspective on: (i) water quality analysis, specifically on the physical, chemical and biological characteristics of water; (ii) significance and interpretation of water quality properties; (iii) modeling water quality in natural and engineered systems; and (iv) water treatment systems at the introductory level.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: CHEM 1021.03 and CHEM 1022.03, ENGI 2103.03

### **CIVL 3505.03: Structural Systems I: Form and Analysis.**

This course begins with a review of the analysis of trusses and shear and moment in beams. Majority of the course covers the calculation of elastic deformations for statically determinate structures and various methods for analyzing statically indeterminate structures focusing on slope deflection method and moment distribution method. The application of matrix analysis in computer modeling using a typical commercially available structural analysis program will be introduced. Also the concept of influence lines for moving loads on statically determinate structures will be discussed.

FORMAT: Lecture 3 hours, tutorial 2 hours

PREREQUISITE: PHYC 1280.03, ENGI 1202.045

### **CIVL 3515.03: Structural Systems II: Loads and Behaviour.**

The objective of the class is to provide students with a solid background in the fundamentals of structural design used for typical civil engineering structures such as trusses, building frames and floor systems. The background and application of the National Building Code of Canada provisions for structural design will be emphasized. The student will be able to size basic tension, compression and flexural elements using steel, concrete and timber, for representative structures.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: CIVL 3505.03, CIVL 3705.03, CIVL 3725.03

### **CIVL 3705.03: Mechanics of Structural Materials and Components.**

The content is focused on the application of the principles of the mechanics of solids in the design and analysis of structural materials and components. Building on engineering skills gained in the first two years, the class will examine general stress analysis, failure criteria, flexure, shear, torsion, compression buckling and plasticity as these aspects apply to structural components constructed of timber, steel, concrete and fibre-reinforced polymers.

FORMAT: Lecture 3 hours, tutorial 2 hours

PREREQUISITE: PHYC 1280.03, ENGI 1202.045, ENGI 2400.04, ENGM 1041.03, ENGM 2101.03

### **CIVL 3725.03: Construction Materials and Methods.**

The purpose of this class is to provide students with knowledge of residential and commercial building techniques and materials. In it, the properties and applications of common construction materials, components, and systems that relate to wood, steel, and concrete-frame structures are examined.

FORMAT: Lecture 3 hours, lab 3 hours

### **CIVL 3740.03: Computations and Systems Modeling.**

This class introduces the application of various computational methods for solving a range of practical problems in civil engineering. Basic numerical methods for solving algebraic equations, non-linear and eigen-value problems, as well as numerical differentiation and integration are introduced. Curve-fitting and non-linear regression techniques are presented. Computational tools such as MatLab, MathCad, Excel, and Mathematica are introduced and used to analyze structural stability, the behaviour of space-frames, dynamics, vibrations, and other topics of interest in infrastructure systems.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 2101.03, ENGM 1041.03

### **CIVL 3830.03: Surveying and Applied Geomatics**

An introduction to the principles, calculations and equipment used in surveying and geomatics is presented with focus on their applications to civil and mineral resource engineering. Topics include fundamentals of distance measurement and surveying, leveling, traverses, corrections, GPS and Total Station instruments, coordinate systems and geodetic reductions, Geographic Information Systems, and engineering applications of geomatics with particular focus on common civil engineering and mining construction activities. Laboratory exercises will cover the basics of surveying techniques, building up to an exercise in combining a measured GPS data set to a pre-existing GIS database for engineering design considerations of a facility.

FORMAT: Lecture 3 hours, lab 3 hours

EXCLUSION: CIVL 0124 and CIVL 4830

### **CIVL 4111.03: Geotechnical Engineering.**

This class is concerned with the geotechnical aspects of temporary and permanent retaining walls for infrastructure or environmental works, deep and shallow foundations, soil-pipeline interaction, and design/analysis of natural cuts, embankments, and earth dams. The application of these design/analyses to particular infrastructure and environmental structures are emphasized in the laboratory sessions.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: CIVL 3101.03

### **CIVL 4200.03: Transportation Systems.**

This class covers urban transportation planning, transportation demand and supply, transportation management. The environmental impact of transportation systems such as noise and air pollution will be examined. Methods to measure, predict, and evaluate impact of transportation modes will be covered.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: CIVL 3200.03

### **CIVL 4250.03: Highway Engineering.**

This class provides introduction to route location with special emphasis on Canadian standards and road design elements. It includes a surveying workshop. The purpose of workshop is to expose students to operation and application of surveying instrumentation. It includes topics of vertical and horizontal curves, roadway design elements and classification, alignment and cross section elements, drainage and earthwork operations, highways materials and pavement design.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: CIVL 4200.03

### **CIVL 4350.03: Hydraulic Engineering.**

This class deals with the application of hydraulics in civil engineering design. The topics include design of culvert systems, storage dams (gravity dams, arch dams, buttress dams, earth dams and rock-fill dams), overflow and chute spillways with emphasis on design of stilling basins. Hydraulic machinery (pumps and turbines) will be discussed with an emphasis on the selection a machine for a given application. Design of single port and multi-port outfall structures for effluent disposal in rivers and in oceans will also be discussed. Regular lectures and tutorial sessions will be supplemented with expert speakers from the industry and field trips.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: CIVL 3300.03

### **CIVL 4359.03: Form and Process in Alluvial Channels.**

This class will consider various aspects of fluvial geomorphology from a civil engineering point-of-view. This will include discussion of hydraulic resistance based on quantitative estimates of channel roughness, regime concepts for artificial and natural rivers, uses of boundary shear stress and unit stream power in bed-load estimations, the hydraulics and statistics of suspended sediment, numerical versus physical modelling, and a review of case histories of responses of rivers to human activity. The hydraulics of fish habitat assessment is also considered. The application of HEC RAS to a bridged brook is done as a group project.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: CIVL 3300.03 and CIVL 3310.03 (minimum), CIVL 4350.03 (preferable)

CROSS-LISTING: CIVL 6159.03

EXCLUSION: CIVL 6159.03

### **CIVL 4410.03: Engineering Hydrogeology.**

This relatively quantitative introduction to hydrogeology begins with a review of key definitions and hydraulic principles pertaining to flow through porous media. This is followed by consideration of well hydraulics in the context of the

evaluation and management of groundwater resources. The theory and application of numerical methods are discussed in relation to simple groundwater systems, and this is followed by discussion of the chemistry of both natural and contaminated systems.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: CIVL 3300.03, CIVL 3310.03, CIVL 3101.03, and MINE 2200.03; ENGM 2022.03

### **CIVL 4431.03: Water Distribution and Sewerage Systems.**

This design-oriented introduction to municipal engineering is concerned with the hydraulic and hydrologic basis for our water-related urban infrastructure.

Specifically, the design of potable water distribution systems, wastewater collection systems, and storm water management systems is presented. The minimization of the environmental impacts associated with the construction of a subdivision is also presented, both qualitatively and quantitatively.

FORMAT: Lecture 3 hours, tutorial 3 hours

PREREQUISITE: CIVL 3300.03, CIVL 3310.03

### **CIVL 4440.03: Water and Wastewater Treatment.**

The focus of the class is on design of water treatment and municipal pollution control plants. Lectures and laboratory periods are on physical chemical and microbiological qualities of water and municipal wastewater. Lectures include various unit operations and unit processes of water and domestic wastewater treatment. Field visits to local and water and wastewater treatment plants are included.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: CIVL 3451.03 or PEAS 2202.03

### **CIVL 4460.03: Solid Waste & Landfill Engineering.**

This class provides the students with an understanding of the types of solid waste generation, physical and chemical properties of solid waste, solid waste treatment and disposal alternatives, design and operation of a landfill (including landfill components and configuration, landfill siting, liner system, leachate control and treatment, and gas collection and control system).

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: CIVL 3101.03

CO-REQUISITE: CIVL 3451.03

### **CIVL 4515.03: Reinforced Concrete Design.**

This class will provide students with a basic understanding of the behaviour and analysis of reinforced concrete as a structural material, elementary skills and concepts necessary for designing a variety of common structural elements, and appropriate analysis techniques and code approximations. Current design code provisions related to flexure, shear and compression members will be reviewed leading to practical design examples for one-way floor systems, columns, footings, and cantilever retaining walls.

FORMAT: Lecture 3 hours, lab 2 hour

PREREQUISITE: CIVL 3515.03

### **CIVL 4525.03: Design of Steel Structures.**

This introductory design class emphasizes the behaviour and design of steel members resisting tensile, compressive, and flexural loads and simple connections of these elements. Members subject to combined loading will also be studied. Upon class completion, the student will be able to design building elements to CSA-S16.1-01. Although most design examples will be based on framed buildings, many of the concepts apply equally to other types of structures; e.g. bridges, towers, and submarine hulls.

FORMAT: Lecture 3 hours, tutorial 2 hours

PREREQUISITE: CIVL 3515.03

### **CIVL 4541.03: Application of Finite Element Method in Static & Dynamic Systems.**

This class presents an introduction to the theory and application of the finite element method. The basic linear elasticity, principles of minimum work and energy methods will be used in developing the methodology. Students will gain practical experience, using a commercial software package, to treat a balance set of real-life two and three-dimensional stress deformation problem under static and dynamic loading systems that are of specific interest to structural engineers.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: CIVL 3505.03, CIVL 3705.03, CIVL 3740.03

### **CIVL 4560.03: Special Topics in Structural Systems.**

Basic knowledge acquired from introductory design classes will be extended and synthesized in the analysis and design of aggregate systems including two-way

concrete floor systems, pre-stressed concrete girders, and composite systems incorporating concrete and steel materials. Basic engineering concepts in the design of masonry structures will be introduced and extended to the design of masonry beams, columns, walls and building systems.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: CIVL 3515.03

CO-REQUISITE: CIVL 4515.03

### **CIVL 4710.03: Construction Planning.**

This class deals with construction administration, bidding procedures, cost controls, planning and execution of civil Engineering construction projects. The class also covers planning and scheduling techniques such as CPM and PERT. The class presents basic methods of estimating construction costs, with applications to buildings, bridges, foundations, highways and earthworks.

FORMAT: Lecture 3 hours, lab 2 hours

### **CIVL 4801.005: Senior Project I.**

This class develops the senior project requires for CIVL 4802. Topics include introduction to potential senior project topics elects, case studies of design projects by industry representatives, client meetings to discuss refine project scopes, project management of design projects, team building, and report writing and oral presentation requirements for various deliverables of CIVL 4801 and CIVL 4802. The deliverable for this class, a formal proposal, must be prepared to a professional standard of engineering practice. Students are also expected to formally present their proposal to the class and faculty.

### **CIVL 4802.025: Senior Project II.**

The objective of this class is to provide experience in the application of engineering principles to the solution of specific problems in Civil Engineering. Under the supervision of a faculty member, students execute a project that may include laboratory and/or field experiments, design work, numerical simulations, technical communications on state-of-the-art technologies, or analysis of case histories. Students prepare a formal report according to faculty standards for report preparation and make an oral presentation of their project.

PREREQUISITE: CIVL 4801.005

## **B. Mineral Resource Engineering Series**

### **MINE 2200.03: Geology for Engineers.**

This class deals with the fundamental principles of geology. Topics include mineralogy, rock-forming processes, weathering, erosion, groundwater, glaciating, mass wasting, running water, deserts, shorelines, geologic structures, tectonism, and Earth's interior. The links between geology, engineering and the environment are explored through case studies. Laboratory exercises covering the identification and interpretation on minerals, rocks, landforms (using topographic maps and remote sensing images) and geologic map structures are an important part of the class.

FORMAT: Lecture 3 hours, lab 2 hours

EXCLUSION: MINE 3500.03, EARTH 1080.03 and EARTH 1090.03

### **MINE 3520.03: Introductory Mining Engineering.**

This class is an introduction to the mineral industry and mining engineering. Emphasis is placed on unit operations, equipment and surface and underground mining methods. Summaries of the national and global mineral industries, innovative technologies and practices, and the relationships between mining and mineral processing are included. Laboratory periods are used to view audio-visual presentations of mineral industry processes, prepare limited projects on mining operations and review mine plans.

FORMAT: Lecture 3 hours, lab 3 hours

### **MINE 3530.03: Mineral Processing.**

This class is concerned with the principles of unit operations employed in the physical processing of minerals: examination of mineral characteristics on which mineral separation methods are based, liberation of minerals, crushing, grinding, screening and classification. Mineral separation methods include: gravity, dense medium, magnetic and high tension separations, radiometric sorting, flotation and selective flocculation. Laboratory tests, their interpretations, and assessment of separation performance are covered.

FORMAT: Lecture 3 hours, lab 3 hours

### **MINE 3600.03: Equipment Selection and Materials Handling.**

This class deals with mining equipment, analysis of parameters influencing the performance of equipment, and equipment selection. Included are cost analysis and estimation, unit costs, compressed air and hydraulic power systems

applications in mining, pump selection, materials handling systems in underground and surface mining operations, ore and waste pass systems, and storage bins.

FORMAT: Lecture 3 hours, lab 2 hours

### **MINE 3605.03: Mining Geology I.**

This class covers the topics of mineralogy, geologic structures, petrology of igneous, sedimentary and metamorphic rocks and tectonic processes. Emphasis is placed on the relationships between these topics and mining engineering.

Laboratory exercises and assignments cover petrographic analysis, geologic maps and sections, stereographic projection and mineral stoichiometry.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: MINE 2200.03

### **MINE 3611.03: Rock Mechanics.**

Concepts of mechanical behaviour and intact strength properties of rock masses are discussed. Classification systems and failure criteria for rocks are described.

The principles of engineering design for underground and surface mine structures are covered. Stereographic projections and numerical methods are used to analyze surface and underground rock stability. Rock mechanics instrumentation is discussed. Laboratory sessions cover sample preparation and rock testing.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: MINE 3605.03

### **MINE 3612.03: Rock Penetration and Fragmentation.**

This class presents the principles and theories of rock drilling and blasting in both underground and surface mining applications. It covers the properties of explosives and the principles for selection of explosives for different situations.

The transportation methods, loading techniques and priming procedures for explosives are discussed. Current trends in drilling and blasting practices are considered as well as controlled blasting and blast monitoring methods. State-of-the-art techniques in rock penetration and fragmentation are presented.

FORMAT: Lecture 3 hours

### **MINE 3620.03: Petroleum Engineering.**

This class is designed to provide a comprehensive overview of the engineering aspects of the petroleum industry. Similarities between mining and petroleum engineering are stressed. Major topics cover well planning, rotary drilling techniques, drilling optimization, well cementing, well completion, and production methods. Equipment selection and design procedures follow each unit operation.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: MINE 2200.03

### **MINE 4706.03: Mining Geology II.**

The Physical characteristics and origins of the main types of mineral deposits are covered. Individual mineral deposits are described in terms of their mineralogy, rock types, structures and geologic factors affecting mining engineering.

Assignments and laboratory exercises concentrate on the three-dimensional analysis of mineral deposits using hand specimens, maps, sections, structure contours and modelling of reserves. Case studies are covered in assigned readings

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: MINE 3605.03, MINE 3520.03

EXCLUSION: MINE 4705.03

### **MINE 4710.03: Mine Excavation Systems.**

This class deals with several specialized mining topics related to mine excavation including mine drainage in underground and surface operations, tunneling and shaft sinking equipment and techniques, mining related soil mechanics, pressure grouting, ground freezing and mine backfilling.

FORMAT: Lecture 3 hours, lab 2 hours

### **MINE 4711.03: Mine Ventilation and Environment Control.**

This class presents the main principles of total mine air conditioning: air quality, air quantity, and temperature-humidity control in underground mines. Health hazards such as mine dusts, gases, radiation, and heat stress are discussed. Design of airflow in single openings, circuit analysis, and ventilation network design are studied using manual and computer based techniques. Temperature-humidity control systems design is discussed. Mine illumination and noise control are studied as part of the total mine environment.

FORMAT: Lecture 3 hours, lab 2 hours

### **MINE 4750.03: Senior Design Project I.**

This is the first part of a two-part senior project. Methods of mineral /exploration are introduced. Methods of resources/reserves estimation are discussed. Surface and drillhole data are provided. Mineral deposit is outline by exploration together with information on site description, property rights, stratigraphy and structure, map and cross-sections. Students will use the provided data to create ore bodies and estimate ore reserves. Industrial software will be used to complete the project.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: MINE 3520.03 and MINE 3605.03

### **MINE 4801.03: Advanced Topics in Rock Mechanics.**

This class deals with several specific topics in rock mechanics related to ground stability control in surface and underground mines. It covers ground failure, ground movement monitoring, "in-situ" stress management, application of numerical modelling methods, and back-analysis techniques in mining engineering. Theory and state-of-the-art of relevant techniques are discussed. Case studies are introduced to discuss practical problems.

FORMAT: Lecture 2 hours, lab 3 hours

PREREQUISITE: MINE 3611.03 or permission by instructor

### **MINE 4815.03: Mining and the Environment.**

This class covers environmental practices, problems and solutions in the mineral industry. Topics include regulations, reclamation, mine closure, acid rock drainage, surface subsidence, nuclear waste disposal and coal mine explosions. Case studies are used to highlight these topics. Class participation is emphasized through oral and written presentations.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: MINE 2200.03

### **MINE 4816.03: Mining Engineering Project.**

This project allows interested students to investigate a mining topic, which may also be oriented towards geology, mineral processing, environmental issues, or petroleum engineering. The topic must be original and acceptable to the department. A detailed written report of the investigation is required, which is evaluated by two professionals, one of whom is the student advisor.

FORMAT: Lab 5 hours

### **MINE 4820.03: Surface Mine Slope Stability.**

This class deals with the fundamentals of slope stability analysis in surface mining. A brief discussion is first given to field data collection and the mechanism of slope failure. Various techniques for solving slope problems encountered in the mining industry are then introduced, including plane failure, wedge failure, toppling, and rotational failure.

FORMAT: Lecture 2 hours, lab 3 hours

PREREQUISITE: MINE 3611.03 MINE 3520.03

### **MINE 4821.03: Petroleum Reservoir Engineering.**

This class discusses the theory and calculations in petroleum reservoir engineering. Major topics include petroleum composition, formation, migration and trapping mechanisms, classification and properties of reservoir rocks and fluids, fluid flow through porous media, phase behaviour diagrams, reservoir energy and recovery mechanisms, reservoir evaluation, as well as geological and reservoir considerations in drilling, and production engineering. An introduction to petroleum exploration methods, and data interpretation techniques is also included.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: MINE 2200.03, MINE 3605.03

### **MINE 4822.03: Advanced Petroleum Engineering.**

This class is an advanced study of petroleum reservoir engineering, drilling and development. Topics include analysis and prediction of oil and gas reservoir performance under a variety of production methods, theory and practice of well testing and pressure analysis techniques, well planning, drilling optimization, enhanced recovery mechanisms, displacement theory and modelling. Students will have to complete a term project dealing with one of these topics.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: MINE 3620.03, MINE 4821.03

CROSS-LISTING: MINE 6008.03

### **MINE 4823.03: Offshore Drilling and Production.**

This class is oriented toward the practical applications of offshore drilling, production and completion technology in the ocean environment. Emphasis is placed on the types, applications and limitations of offshore rigs, platforms and subsea production systems. The technical aspects of offshore islands, breakwaters, safety and fire protection, loading and transportation systems are also covered.

The decision making process based on economics and developing technology regarding offshore field development and production is presented as a case study.  
 FORMAT: Lecture 3 hours, lab 2 hours  
 PREREQUISITE: MINE 3620.03, MINE 4821.03  
 CROSS-LISTING: MINE 6009.03

### **MINE 4830.03: Advanced Mineral Processing.**

The objective of this class is to teach how unit operations of mineral processing may be integrated into overall plant operation. The topics considered are: the influence of ore characteristics on the choice of process, concentration methods applicable to various ores with reference to flow diagrams and operations in existing concentrators, basic principles of mineral processing plant design and development of a process flow sheet of a plant based on laboratory test work.  
 FORMAT: Lecture 2 hours, lab 3 hours  
 PREREQUISITE: MINE 3530.03

### **MINE 4832.03: Flotation.**

This class provides detailed study of flotation and is designed for students who intend to work in mineral processing or related fields. The topics covered are: interfaces involved in a flotation system; interfacial energies; contact angle; electrical double-layer effects; stability of suspensions; adsorption mechanisms; collectors, others, activators and depressants; modulation of collectors; froth stability; fines entrapment in froth lamellae; flotation kinetics; flotation machines; flotation of sulphides, oxides, salines and nonmetallic minerals, and flotation circuit design.  
 FORMAT: Lecture 2 hours, lab 3 hours

### **MINE 4835.03: Mineral Economics and Mine Production.**

Major topics in Mineral Economics include the influence of mineral industry on the economy and mineral policy, marketing of minerals, price mechanisms, mine project evaluations and financing. Mine Production will cover topics on mine management, techniques to increase mine productivity, operating units analysis, mine maintenance, production scheduling and optimization.  
 FORMAT: Lecture 3 hours, tutorial 3 hours  
 PREREQUISITE: MINE 3520.03  
 EXCLUSION: MINE 4713.03 and MINE 4812.03

### **MINE 4850.03: Senior Design Project II.**

This is the second part of the two-part senior design project. Based on the work completed in part one, students, working in groups, will select proper mining methods, design mine structures of an underground and/or surface mine, select mining equipment, surface infrastructures and mineral processing facilities. This is followed by environmental considerations, mine evaluation and risk assessment. Regular progress reports, a final report and group presentations are required. Design projects in petroleum engineering with equivalent amount of work may be considered at the beginning of this course  
 FORMAT: Lecture 1 hour, lab 4 hours  
 PREREQUISITE: MINE 4750.03 and Completion of all courses prior to Term 8 in the program. Exception may only be made to those with proven knowledge and industrial experience.

Ali, N. A., BSc (Baghdad), MSc, PhD (N.Carolina State), PEng

## **I. Introduction**

Civil engineering deals with the design, construction, and maintenance of the infrastructure of human civilization. Civil engineers are engaged in addressing two fundamental questions. First, how do we protect our society and its infrastructure from the impacts of the natural environment? Second, what are the impacts of society and its infrastructure on our natural environment? The infrastructure considered may be at the feasibility or the design stage, or already in existence.

First, humans need protection from the elements to thrive on this planet. With the growth of centers of population and highly organized societies, the need for very diverse kinds of 'shelter' has also dramatically increased – now routinely including hospitals, schools, skyscrapers, factories, and theatres. Cities and other centres require energy and must be connected, giving rise to the need for such ancillary infrastructure as hydro-dams, road networks, bridges, and airports. The results of the design work of the civil engineer are therefore quite visible and a source of enduring pride. However, nature sometimes deals harshly with our infrastructure, striking it with hurricanes and/or ice storms. Even if the basic designs are sound, a significant maintenance effort by engineers who are knowledgeable about the basis for the original designs is implied.

Second, Civil engineers must recognize that humans are biological entities that consume resources and generate waste. They need water, they generate wastewater. They buy consumer goods, they generate solid waste. How can we ensure that our water is pure, and that it stays pure? How can we ensure that the waste from our cities is handled in such a way that damage to the environment and risks to our own health are minimized, or perhaps even nullified? Nature metes out drought and heat, floods and freezing temperatures. How can we prepare society for such eventualities? The fact that our water and other planetary resources are also finite, can be badly or well-managed, and have been abused in the past all raise additional questions and endeavours that come under the purview of civil engineering. That the undergraduate civil engineering program at Dalhousie University has two options (the Infrastructure Option and Earth & Environment Option) is a reflection of the long-standing relevance and importance of the role of Civil engineers in addressing the above questions.

Although civil engineering is only one among many engineering disciplines available at Dalhousie, as an applied science it is characterized by exceptional technical diversity, great breadth and depth of subject matter, and a propensity for proactively addressing the practical needs of society. It is therefore natural that a BEng. in civil engineering is an excellent way to start 'life in the universe'. It is often used by our graduates as a launching pad for post-graduate studies in very diverse realms of study. Civil engineers are found in all levels of government, in private consulting companies, in public utilities, in global enterprises, and in a wide range of fields that has included technology management, business administration, and even biomedical engineering.

The Department of Civil and Resource Engineering has about 60 graduate students. They are involved in a wide-range of projects that will affect engineering practice. Our experienced and diversely-trained faculty members therefore have many research outcomes upon which they can draw when coming to the classroom or the laboratory and in doing so are eminently able to keep the undergraduate program current and modern.

### A. Infrastructure Option

In this option, the following aspects of civil engineering are emphasized: structural engineering and design, materials of construction (steel, concrete, timber, masonry, asphalt, fibre reinforced polymers), transportation engineering, construction management, and soil mechanics.

### B. Earth and Environment Option

In this option the following aspects of civil engineering receive some emphasis: environmental engineering, water and wastewater treatment, water resources and hydrogeology, geo-environmental engineering, and waste management.

## II. Curriculum and class descriptions

Refer to sections IIA and IIIA, Civil Engineering Program, in the Civil and Resource Engineering section of this calendar, page 350.

### Dean

Leon, L. J., BSc, MSc, PhD (Dalhousie), PEng

### Department Head

Chen, Z., BEng (Fuzhou), MSc (Southeast), PhD (Ottawa), PEng, FIEEE, FCAE

### Professor Emeritus

Marble, A. E., BEng, MAsC, PhD (TUNS), PEng

### Professors

Cada, M., Dipl. Ing., MSc, PhD (Prague), PEng  
Chen, Z., BEng (Fuzhou), MSc (Southeast), PhD (Ottawa), PEng, FIEEE, FCAE  
El-Hawary, M. E., BEng (Alexandria), PhD (Alberta), PEng, FIEEE, FCAE, FEIC  
El-Masry, E. I., BEng (Alexandria), MSc (Alexandria), PhD (Man), PEng  
Gu, J., BSc (Hefei), MSc (Shanghai), PhD (Alberta), PEng (Co-op Advisor)  
Hughes, F. L., BSc (Carleton), MSc, PhD (Newcastle upon Tyne)  
Ilow, J., BSc (Poland), MAsC, PhD (Toronto), PEng (Graduate Coordinator)  
Leon, L. J., BSc, MSc, PhD (Dalhousie), PEng  
Schlegel, C., BEng (Switzerland), MSCE, PhD (Notre Dame, US)

### Associate Professors

El-Sankary, K., BSc (LU, Lebanon), MSc (U of Quebec), PhD (U of Montreal), PEng  
Little, T. A., BScEng (UNB), MEng (Memorial), PhD (UNB), PEng (Undergraduate Program Co-ordinator)  
Ma, Y., BSc, MEng (Southeast), MSc, PhD (Alberta)  
Ponomarenko, S., Dipl. Phyc. (Russia), PhD (U of Rochester)

### Assistant Professor

Gonzalez-Cueto, J., BEng, MSCE (Cuba), PhD (UNB)

### Adjunct Professors

Baird, C. R., BEng (TUNS), MAsC (UBC), PhD (UNB), PEng  
Gashus, O. K., BSc, PhD (Glas), PEng  
Marble, A. E., BEng, MAsC, PhD (TUNS), PEng

### Adjunct Associate Professors

Beslin, O., BSc (CAEN), MSc (LAUM), PhD (INSA)  
Nie, H., MEng (Tsinghua), PhD (UBC), PEng  
Vallee, R., MEng (Carleton), PhD (TUNS)

### Adjunct Assistant Professors

Grabtchak, S., PhD (Guelph)  
Isenor, G., BSc (Dal), BEng (TUNS), MAsC (TUNS), PhD (Dalhousie)  
Linney, N., BSc (Mt. A), BEng, MAsC, PhD (TUNS)  
Marabet, A., BEng (U of Annaba), MSc (Nantes), PhD (Quebec)

### Cross Appointment

Hill, I., (from Faculty of Science, Physics), BSc, PhD (Queen's)

## I. Introduction

No other branch of engineering can claim to have such an impact on modern society as Electrical & Computer Engineering. The ease, speed and precision by which electrical energy and electrical signals can be transmitted, transformed and controlled has influenced not only the daily life of people, but has also changed the class of many other disciplines. Over only a few decades, Electrical & Computer Engineering has grown to a multi-branch discipline with significant applications in the areas of power systems, communication systems, microelectronics, photonics, and computers. This rapid growth, coupled with major advances in technology and material science, has made the field very dynamic, and poses a challenge to the student, to the educator and to the practicing Electrical & Computer Engineer for the breadth of its activities.

The Electrical and Computer Engineering curriculum is based on the physical and mathematical principles which constitute the unchanging foundation of the discipline. Classes apply these foundational principles to state-of-the-art applications within specialized areas of the field.

In the final year, technical elective classes are provided to enable the student to obtain a deeper, more detailed understanding of current technology in a field of interest. Technical electives may also be chosen from listed classes offered by other Departments. Also during the final year the students, usually in teams of two, work on a project requiring the application of knowledge to a realistic engineering problem. The projects are submitted by professionals in local industrial and research facilities who then provide supervision in conjunction with an assigned Faculty Advisor.

Laboratory sessions form an integral part of most Electrical & Computer Engineering classes. These sessions are conducted in laboratories housed in C Building.

Students enrolled in the Electrical and Computer Engineering Degree Programs may take part in Co-Operative Education where they can apply for up to three four-month work placements in industry. Students participating in the Co-op Program will require two years and four months to complete their degree while students not in the Co-op Program can finish in one year and eight months.

Students participating in our program may pursue either the Electrical or the Computer options as listed below.

## II. Degree Programs

### A. Electrical Engineering Option

Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

#### Term 5 (Fall)

- ECED 3003.03 Networks & Systems
- ECED 3201.03 Introduction to Electronics
- ECED 3204.03 Microprocessors
- ECED 3300.03 Electromagnetic Fields
- ECED 3500.03 Signal Analysis
- ENGM 3282.03 Data Structures and Numerical Methods

#### Work Term 1 (Winter)

#### Term 6 (Summer)

- ECED 3101.03 Power Systems I
- ECED 3202.03 Analog Electronics
- ECED 3301.03 Electromagnetic Waves and Propagation
- ECED 3511.03 Communication Systems
- ECED 3600.03 Modern Control Systems
- ECED 3901.03 Electrical Engineering Design II

#### Work Term 2 (Fall)

#### Term 7 (Winter)

- ECED 4502.03 Digital Signal Processing
- ECED 4513.03 Communication Networks
- ECED 4900.03 Senior Year Project I
- Humanities Elective
- Technical Elective

- Technical Elective

#### Work Term 3 (Summer)

#### Term 8 (Fall)

- CPST 3030.03 Engineering in Society II
- ECED 4102.03 Electromechanics
- ECED 4601.03 Digital Control Systems
- ECED 4901.03 Senior Year Project II
- Technical Elective

## B. Computer Engineering Option

Students follow the Electrical Engineering program for Terms 1 to 3. In Year 2, Term 4, the student starts the Computer Engineering program.

#### Term 5 (Fall)

- ECED 3003.03 Networks & Systems
- ECED 3201.03 Introduction to Electronics
- ECED 3204.03 Microprocessors
- ECED 3401.05 System Analysis
- ECED 3500.03 Signal Analysis
- ENGM 3282.03 Data Structures and Numerical Methods

#### Work Term 1 (Winter)

#### Term 6 (Summer)

- CSCI 3120.03 Operating Systems
- ECED 3202.03 Analog Electronics
- ECED 3403.03 Computer Architecture
- ECED 3511.03 Communication Systems
- ECED 3600.03 Modern Control Systems
- ECED 3901.03 Electrical Engineering Design II

#### Work Term 2 (Fall)

#### Term 7 (Winter)

- ECED 4404.03 Computer Networks & Communications
- ECED 4502.03 Digital Signal Processing
- ECED 4513.03 Communication Networks
- ECED 4900.03 Senior Year Project I
- Humanities Elective
- Technical Elective

#### Work Term 3 (Summer)

#### Term 8 (Fall)

- CPST 3030.03 Engineering in Society II
- ECED 4102.03 Electromechanics
- ECED 4901.03 Senior Year Project II
- ECED 4402.03 Real Time Systems
- Technical elective

## C. Co-op Program

The schedule for the cooperative education program includes eight study terms and three work terms, as follows:

Yr/Term	Fall	Winter	Summer
Year 1	Study Term 1	Study Term 2	FREE
Year 2	Study Term 3	Study Term 4	FREE
Year 3	Study Term 5	Work Term 1	Study Term 6
Year 4	Work Term 2	Study Term 7	Work Term 3
Year 5	Study Term 8		

## D. Non-Co-op Program

Yr/Term	Fall	Winter	Summer
Year 1	Study Term 1	Study Term 2	FREE
Year 2	Study Term 3	Study Term 4	FREE
Year 3	Study Term 5	FREE	Study Term 6
Year 4	Study Term 8	Study Term 7	

## E. Technical Electives

- ECED 4071.03 Analog Filter Design
- ECED 4082.03 MOS Switched-Capacitor Circuits
- ECED 4130.03 Electric Power Systems II
- ECED 4140.03 Power Systems III
- ECED 4260.03 IC Design and Fabrication
- ECED 4350.03 Optical Electronics
- ECED 4421.03 Technology and Applications of Fiber Optics
- ECED 4460.03 Communications Electronics
- ECED 4504.03 Digital Transmission Theory
- ECED 4760.03 Biomedical Engineering

## III. Class Descriptions

### ECED 2000.03: Electric Circuits.

This is an introductory class in electric circuit analysis. The material covered starts with a review of the fundamental circuit variables such as voltage, current, charge, power and energy. Kirchhoff's laws are introduced and developed into node and loop analysis techniques. Terminal behavior and circuit equivalence including Thevenin and Norton circuits are covered. Analysis with controlled sources and energy storage elements is developed including steady state and transient response for first order networks. Phasors and sinusoidal steady state are introduced. Students are introduced to circuit simulation tools such as p-spice.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: MATH 1290.03, PHYC 1290.03 or equivalent

### ECED 2001.03: Circuit Analysis.

This class covers advanced circuit analysis techniques, starting with sinusoidal excitation. The concepts of phasors and complex impedance are fully developed. Mutual inductance and magnetically coupled coils are used to introduce transformer behavior and performance. Real and reactive power flow is covered before the introduction of balanced three phase circuits for power distribution. Symmetrical components are introduced as a means of dealing with unbalanced networks. The concepts of grounding and harmonics are also introduced.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: ECED 2000.03

### ECED 2200.03: Digital Circuits.

This class includes an introduction to: Boolean algebra, encoders, decoders, shift registers, asynchronous and synchronous counters, together with timing considerations. Design of asynchronous circuits, synchronous sequential circuits, and finite state machines, is covered. Karnaugh mapping techniques and state tables and diagrams are taught. Programmable logic is introduced. Contemporary computer aided design and analysis software is used throughout the class.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: ECED 2000.03

### ECED 3003.03: Networks & Systems.

This class provides the basic networks and systems analysis skills required in subsequent classes in the Electrical and Computer Engineering program. It covers topics such as signals and systems modelling concepts; applications of Laplace transform in network analysis, Bode plots, block diagram; state-variable analysis; generalized two-port parameters; properties and analysis of linear time-invariant (LTI) systems, the convolution integral and Eigenfunction and Eigenvalues of LTI systems.

FORMAT: Lecture 3 hours/tutorial 2 hours

PREREQUISITE: ECED 2001.03, ENGM 2202.03

### ECED 3101.03: Power Systems I.

This class presents the development of the models of each of the components making up a power system including: transformer behavior (power, control and instrument transformers), synchronous machine behavior (cylindrical rotor and salient pole theory) and transmission line behavior (lumped and distributed parameter). Per unit normalization is covered. The equipment models are compiled to present network models that can be used to study power system operation. Load flow is discussed as well as fault estimation and circuit protection.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: ECED 2001.03

### ECED 3201.03: Introduction to Electronics.

The class gives an introduction to semiconductor physics. The theory of operation of semiconductor diodes, bipolar junction transistors (BJTs), and junction and metal oxide field effect transistors (MOSFETs), is covered in detail. The analysis and design of diode, BJT, and MOSFET circuits is covered including voltage multipliers, voltage regulators, and low frequency small signal amplifiers. Contemporary computer aided design and analysis software is applied to the aforementioned circuits.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: ECED 2000.03

### ECED 3202.03: Analog Electronics.

This class covers behaviour of real op-amps, BJTs and FETs in high-frequency and multistage applications. Topics include linear and non-linear op-amp circuits; current mirrors, active loads and biasing; multistage amplifier design; feedback in amplifiers; high-frequency narrow-band amplifier tuning, coupling and matching; crystal, resonant, phase-shift and relaxation oscillators; waveform generation; class A, AB, B, C and D power amplifiers; voltage regulator design; heatsinking; design of MOSFET motor control circuits and pulse-width modulators. In addition, filtering, noise and distortion are introduced.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: ECED 3003.03 and ECED 3201.03

### ECED 3204.03: Microprocessors.

This class introduces a currently available microprocessor system. Topics include microcontrollers as a type of microprocessor, microprocessor architecture, address, data and control buses, allocation of external memory modules, use of decoders, latches, flip-flops and other elements of a microprocessor system, CPU bus cycle, cycle-by-cycle execution, timing diagrams, I/O methods, I/O allocation, asynchronous serial communication, RS-232 standard, parallel port interfacing, handshaking protocols, timers, timer functions, interrupts, interrupt priority, assembly programming, software development and debugging.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: ECED 2200.03

### ECED 3300.03: Electromagnetic Fields.

This class forms an introduction to basic electromagnetic principles upon which Electrical Engineering is based. The laws underlying the theory are presented in integral and differential form. A classical development of electrostatics, steady state current, and magnetostatics will lead to Maxwell's equations. The theory developed is applied to calculating circuit parameters such as resistance, capacitance, and inductance for any electronic or magnetic structure.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: ENGM 2101.03

### ECED 3301.03: Electromagnetic Waves & Propagation.

This class presents the basic theory and applications of propagation of electromagnetic waves. Major topics include: time-varying Maxwell's equations, electromotive force, electromagnetic spectrum, transmission of plane waves, reflection and refraction, polarization, radiation, transmission line theory, standing wave ratio, Smith Chart, impedance matching, guided wave structures, modes and cut-off frequencies.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: ECED 3300.03

EXCLUSION: ECED 4301.03

### ECED 3401.03: System Analysis.

Requirement analysis, specifications, concepts of transforming an ill-defined problem into a set of specifications. Functional decomposition and data dictionaries. Top down structured and object oriented analysis techniques. Laboratory and assignment work will address the analysis of relatively complicated systems using the different techniques.

FORMAT: Lecture 3 hours, lab 2 hours  
 PREREQUISITE: ECED 2200.03  
 EXCLUSION: ECED 2400.03

### **ECED 3403.03: Computer Architecture.**

This class deals with controllers, processor instruction sets, and memory systems. The student will study design methods, implementation techniques, modelling techniques, and performance analysis. Reduced instruction set architectures (RISC), pipelining, pipeline hazards, and their implementation for modern high speed applications will be studied. The student project will require a team to design and implement (or simulate) a RISC architecture.

FORMAT: Lecture 3 hours, lab 2 hours  
 PREREQUISITE: ECED 3400.03 or ECED 3204.03

### **ECED 3500.03: Signal Analysis.**

Transformation theory and frequency domain representation of continuous-time signals including Fourier series, Fourier transform and Laplace transformation. Discrete-time signals, sampling theorem, aliasing and frequency domain representation of discrete-time signals including the z-transformation. Introduction to communication systems, exponential and sinusoidal amplitude modulation.

FORMAT: Lecture 3 hours/tutorial 1 hour  
 PREREQUISITE: ENGM 1041.03 and ENGM 2022.03 and ENGM 2101.03

### **ECED 3511.03: Communication Systems.**

This course examines the principles of communication theory as applied to the transmission of information in the presence of noise. Statistical underpinnings of communication system design are presented for analog and digital modulation schemes with the emphasis on binary and M-ary signalling at the baseband and passband. Powerbandwidth efficiency tradeoffs are documented. The course combines a rigorous development of the fundamental principles in transceiver implementations with examples of modulation schemes that are used in modern communication systems.

FORMAT: Lecture 3 hours, lab 3 hours  
 PREREQUISITE: ECED 3500.03

### **ECED 3600.03: Modern Control Systems.**

This class deals with control systems analysis and design aspects. Techniques for analyzing the performance of analog systems are introduced. Emphasis is on the use of the Laplace transform and state space techniques in evaluating system performance indicators including its stability. Tools introduced include frequency response methods, and the root locus. Practical examples involving design of controllers for small systems to achieve desired response are discussed.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours  
 PREREQUISITE: ECED 3003.03  
 EXCLUSION: ECED 4600.03

### **ECED 3901.03: Electrical Engineering Design II.**

This class covers advanced aspects of design, interdisciplinary design and failure analysis. Students gain experience in the design of complex systems. The class culminates in a design contest in which groups of students design and implement a system to meet design objectives, and present and defend their design in an oral design review. The class will consist of both classroom and lab work. The classroom component will use case studies, design reviews and conventional lectures. The lab component is devoted to the design and implementation of a solution to the contest challenge.

FORMAT: Lecture 2 hours, lab 3 hours  
 PREREQUISITE: ENGI 2203.03

### **ECED 4071.03: Analog Filter Design.**

This class deals with the theory and design of active filters, for audio-frequency applications, using op amps. It consists, basically, of two phases. Phase I deals with the realization of a given transfer function using cascade of first and/or second-order RC-op amps circuits. In phase II, the transfer functions of filters are studied in combination with frequency-response approximations such as Butterworth, Chebyshev, Inverse-Chebyshev, Caver (or Elliptic) and Bessel-Thompson. The design of Monolithic MOS switched-capacitor filters is also introduced.

FORMAT: Lecture 3 hours/tutorial 2 hours  
 PREREQUISITE: ECED 3003.03 and ECED 3202.03

### **ECED 4082.03: MOS Switched-Capacitor Circuits.**

Metal-oxide-semiconductor (MOS) switched-capacitor (SC) techniques are the most common approach for realizing analog integrated circuits due to their high degree of accuracy and linearity. This class deals with the theory, analysis and design of SC circuits. It covers the following topics: fundamentals of sampled-data systems, MOS technologies, MOS devices for linear analog integrated

circuits, Parasitic-capacitances, systematic analysis techniques, basic building blocks of SC filters, synthesis and design of SC filters.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours  
 PREREQUISITE: Permission of instructor

### **ECED 4102.03: Electromechanics.**

This class covers the principles of electromechanical energy conversion and electric motors. A review of magnetic field behavior leads to magnetic circuit calculations and permanent magnet circuit behavior. Energy balance principles are used to develop force and torque relationships for many electromechanical applications including relays, meter movements and motor operation. Basic principles of motor operation such as rotating magnetic fields, efficiency and machine ratings are given as a prelude to an in depth presentation of AC and DC motor behavior. Emphasis is placed on motor control and application.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours  
 PREREQUISITE: ECED 2001.03 or ECED 3101.03  
 EXCLUSION: ECED 3100.03

### **ECED 4130.03: Electric Power Systems II.**

Analysis of Interconnected Systems, Power Flow problem, and iterative methods for its solution. Power System Protection, Power System Stability, Optimal Operation of Electric Power Systems.

FORMAT: Lecture 3 hours, lab 2 hours  
 PREREQUISITE: ECED 3101.03

### **ECED 4140.03: Power Systems III.**

The class covers topics such as load curves and forecasting, characteristics and peak demand forecasting, weather-load models, discounted multiple regression and ARMA models, introduction to power system reliability evaluation, generating capacity reserve evaluation, contingency evaluation and an introduction to long-range power system expansion planning packages and production costing.

FORMAT: Lecture 3 hours, lab 2 hours

### **ECED 4260.03: IC Design and Fabrication.**

The theory of operation of MOS transistors is reviewed. Processing technologies such as diffusion, ion implantation, and etching are presented with an emphasis on CMOS circuit fabrication. Electrical and physical characteristics of circuits and clocking and I/O structures are studied. Subsystem design of PLA's, adders, counters, ROM, and RAM will be examined. Extensive use of CAD tools will give the student hands-on experience with systems typical of those used in industry.

FORMAT: Lecture 3 hours, lab 2 hours  
 PREREQUISITE: ECED 2200.03 and ECED 3201.03

### **ECED 4350.03: Optical Electronics.**

This class deals with the fundamentals of generation and detection of light in semiconductor materials as they pertain to optoelectronic devices such as light emitting diodes, laser diodes, photo detectors, and optocouplers. Major topics include: review of semiconductor properties; photo detectors such as PIN photodiodes and avalanche photodiodes (APDS); spontaneous emission and injection luminescence in light emitting diodes (LEDs); and stimulated emission and optical gain in laser diodes (LDS). Typical materials, structures, characteristics and parameters of these devices are discussed with relation to various applications in fiber optics, sensing and consumer products.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

### **ECED 4402.03: Real Time Systems.**

This class reviews system analysis and design techniques and then addresses real time implementation methods. Real time operating system (RTOS) requirements are covered. Topics include message queuing, resource sharing, priority assignments, event flags, interrupts, memory allocation, and typical RTOS configurations. Examples in engineering and networking will be discussed. A significant design and implementation project will be undertaken.

FORMAT: Lecture 2 hours, lab 3 hours  
 PREREQUISITE: ECED 3400.03 or ECED 3204.03, and CSCI 3120.03

### **ECED 4404.03: Computer Networks & Communications.**

Network architecture and topology, ISO, physical and data link layers, LANS, ATM, routing, quality of service, and emerging technologies. The laboratory and assignments will require implementation of network software and evaluation of current technologies.

FORMAT: Lecture 3 hours, lab 2 hours  
 PREREQUISITE: ECED 3400.03 or ECED 3204.03

### **ECED 4421.03: Technology and Applications of Fiber Optics.**

This class deals with the basic principles and applications of optical fiber communications. Major topics include: ray theory and electromagnetic modes in optical fiber waveguides; step-index and graded-index multimode and single-mode fibers; transmission characteristics of optical fibers such as attenuation (absorption, scattering, bending), dispersion (multipath, waveguide, material, profile), and polarization (random, preserved); optical fiber communication systems (transmitter, receiver, digital and analog system design); advanced systems; non-communications applications.

FORMAT: Lecture 3 hours, lab 2 hours

### **ECED 4460.03: Communications Electronics.**

This class provides an introduction to the theory and design of electronic circuits for communications systems. Topics include: the realization of passive components for high frequency applications; small signal amplifier design and characterization employing s-parameter techniques; large signal circuit design realization and analysis employing volterra series and harmonic balance nonlinear analysis procedure; the realization and characterization of non-linear circuits as high efficiency power amplifiers, oscillators, frequency converters, and modulator/demodulator subsystems; the integration of appropriate subsystems into analog and digital terrestrial and space borne radio communication systems.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: ECED 3202.03, ECED 4301.03

### **ECED 4502.03: Digital Signal Processing.**

This class introduces the basics of filtering and analysis of discrete time signals and systems. The synthesis and implementation of analog filters is discussed. An overview of the sampling theorem is followed by a discussion of the discrete Fourier transform and the z-transform. The analysis of discrete time signals is introduced, and synthesis of digital filters is covered. Contemporary signal processing hardware and design software is introduced.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ECED 3500.03

### **ECED 4504.03: Digital Transmission Theory.**

Topics covered will include detailed analysis of channel and source coding techniques with derivation of bit error rates for various modulation schemes and power-bandwidth efficiency trade-offs. Design of optimum receivers is examined. Coding gains of error control coding schemes are calculated. Power Spectral Density of communications waveforms is presented. Channel fading and performance degradations are discussed. Information Theory issues are examined. Teletraffic analysis is presented for both circuit and packet switched networks.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: Permission of instructor

### **ECED 4513.03: Communication Networks.**

This course focuses on the fundamentals of data communication networks. It covers the layered architecture of packet networks and their network elements (switches, routers, bridges). The protocols used to enable transmission of packets through the Internet are examined in detail. Analysis and design of protocols to enhance the efficiency of data transmission in the context of information theory is also presented. Students will gain an appreciation of implementing voice over IP, DVB and WiFi transmissions.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ECED 3511.03

### **ECED 4601.03: Digital Control Systems.**

This class deals with digital control systems analysis and design aspects. Techniques for analyzing the performance of sampled data systems are introduced. Emphasis is on the use of the Z-transform in evaluating system performance indicators including its stability. Tools introduced include frequency response methods, and the root locus. Practical examples involving design of controllers for digital control systems to achieve desired response are discussed.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: ECED 4600.03 or ECED 3600.03

### **ECED 4760.03: Biomedical Engineering.**

Basic anatomy and physiology of the cardiovascular, respiratory and neurophysiological systems, and their contemporary mathematical and electrical models. Physiological transducers and data acquisition systems. Biophysical signal conditioning and processing. Biotelemetry. The computer in biomedical instrumentation. Electrical safety of medical equipment. Guest lectures in the areas of electrocardiography, echocardiography, respiratory technology, hospital engineering and neurophysiological measurements.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

### **ECED 4900.03: Senior Year Project I.**

This class develops the use of fundamental theory in the detailed design of a suitable project selected by the student in consultation with the department. The student is expected to take the project from its preliminary stage through the various design stages to the ultimate completion of the design, which include a detailed report with calculations, drawings, possibly a model and verbal presentation.

FORMAT: Lecture 1 hour, lab 5 hours

PREREQUISITE: Successful completion of all third year courses

### **ECED 4901.03: Senior Year Project II.**

This class is a continuation of Senior Year Project I leading to a final report and formal presentation. The presentation will be made to fellow students and departmental staff members.

FORMAT: Lecture 1 hour, lab 5 hours

PREREQUISITE: ECED 4900.03

Mansour, S., BSc (U of Balamand, Lebanon), MSc, PhD (Dalhousie)

## I. Introduction

The Department provides the Applied Mathematics classes required to support the engineering programs offered by the other departments. It also provides a specialized graduate program in Engineering Mathematics and Internetworking with several specializations offered with the co-operation of Engineering Departments and the Faculty of Computer Science.

The technical subjects offered by the Engineering Departments depend upon a sound knowledge of mathematical principles. Classes in Engineering Mathematics are therefore offered to students in each of the Engineering Departments. Emphasis is placed on the application of mathematical techniques to the description and solution of engineering problems. The lectures are supplemented by tutorial sessions and, when appropriate, are illustrated by application of techniques that require use of the available computing facilities.

## II. Class Descriptions

### ENGM 1011.03: Engineering Mathematics I.

This class covers functions, limits, continuity, differentiation and integration of polynomials, exponential, logarithmic and trigonometric functions, product, quotient and chain rules applications of differentiation to graphing, maximum-minimum problems and related rate problems, definite and indefinite integrals, and the fundamental theorem of Calculus.

FORMAT: Lecture 3 hours, lab 2 hours

### ENGM 1012.03: Engineering Mathematics II.

This class covers applications of integration including areas, volumes, moments, pressure and work, techniques of integration, numerical integration, length of curves, surfaces of revolution, parametric equations, polar coordinates, sequences and series, and Taylor series.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 1011.03

### ENGM 1041.03: Applied Linear Algebra.

This class covers geometric vectors in three dimensions, dot product, cross product, lines and planes, complex numbers, systems of linear equations, matrix algebra, matrix inverse, determinants, Cramer's rule, introduction to vector spaces, linear independence and bases, rank, linear transformations, orthogonality and applications, Gram-Schmidt algorithm, eigenvalues and eigenvectors.

FORMAT: Lecture 3 hours, lab 2 hours

### ENGM 1081.03: Computer Programming.

This class covers fundamental programming principles including flow control, modularity, and structured programming. The student will implement significant programs in the C language to solve engineering problems.

FORMAT: Lecture 3 hours, lab 2 hours

### ENGM 2022.03: Applied Differential Equations.

This class covers first order linear and non-linear differential equations, differential equations of higher order with constant coefficients, applications to Engineering problems, Laplace transforms, periodic functions, applications of Laplace transforms to linear systems, Fourier Series, the line spectrum.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: MATH 1280.03 and MATH 1290.03

### ENGM 2032.03: Applied Probability and Statistics.

The topics covered include probability laws and the interpretation of numerical data, probability distributions and probability densities, functions of random variables, joint distributions, inferences concerning mean and variance, tests of hypotheses, and introduction to linear regression. The class emphasizes engineering applications and makes extensive use of statistical computer packages.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: MATH 1280.03 and MATH 1290.03

### ENGM 2101.03: Applied Vector Calculus.

This class covers space curves, arclength, curvature, functions of several variables, partial derivatives, implicit functions, constrained and unconstrained extrema, multiple integrals, line, surface, and volume integrals, change of variables in multiple integrals, scalar and vector fields, gradient, divergence and curl, Stokes Theorem, the Divergence Theorem, and applications to heat flow, electrostatics and fluid flow. Programming skills are developed using software tools to solve practical problems.

FORMAT: Lecture 3 hours, tutorial 2 hours

PREREQUISITE: MATH 1280.03 and MATH 1290.03

EXCLUSION: ENGM 2062.03 and ENGM 2262.03

### ENGM 3032.03: Applied Statistics.

This class deals with some statistical techniques and their application to engineering problems. Topics included are: review of statistical inference, linear regression and correlation, analysis of variance, the design of experiments and nonparametric statistical methods.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 2032.03

### ENGM 3052.03: Applied Numerical Methods.

This class provides an introduction to Numerical Analysis with emphasis on solution of Engineering problems. The class covers the following topics: a brief review of Computer Programming; concepts of software engineering; approximations and errors; roots of linear and non-linear equations; LU

decomposition, Singular value decomposition, condition number; curve fitting; numerical differentiation and integration; and numerical solution of ordinary differential equations.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 2021.03, ENGM 2062.03, ENGM 2081.03

### **ENGM 3202.03: Data Structures and Numerical Methods.**

This class introduces the student to system analysis, and software techniques.

Topics covered include objects, stacks, queues, multiple linked lists, searching and sorting algorithms and their implementations in the C++ programming language. The students use linear algebra and numerical methods in engineering examples while learning to implement properly structured solutions.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 1081.03, ENGM 2101.03, ENGM 2022.03

### **ENGM 3271.03: Engineering Mathematics V.**

This class has three parts. The first is complex analysis, including the residue theorem and its applications. The second part concerns transform theory including Fourier Series, Fourier Transform, the frequency domain representation of signals, impulse response, and transfer function. The third part concerns partial differential equations including the classification of equations and boundary conditions, separation of variables, the wave equation, Laplace's equation, and applications to electrical engineering problems.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 2021.03, ENGM 2041.03, ENGM 2262.03

CROSS-LISTING: ECED 3500.03

### **ENGM 3282.03: Data Structures and Numerical Methods.**

This class introduces the student to system analysis, and software techniques.

Topics covered include objects, stacks, queues, multiple linked lists, searching and sorting algorithms and their implementations in the C++ programming language. The students use linear algebra and numerical methods in engineering examples while learning to implement properly structured solutions.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 1041.03, ENGM 1081.03

### **ENGM 3356.03: Numerical Methods and Partial Differential Equations.**

This class provides an introduction to Numerical Analysis and Partial Differential Equations with emphasis on solution of problems related to Mechanical Engineering. The following topics are covered: approximations and errors; roots of non-linear equations; systems of equations, curve fitting; numerical integrational and differentiation.; numerical solution of ordinary differential equations; partial differential equations, separation of variables, solution of the the equation, wave equation, and Laplace's equation with various boundary conditions; numerical solutions of partial differential equations.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 1081.03, ENGM 2101.03, ENGM 2022.03

### **ENGM 3361.03: Engineering Mathematics IVc.**

This class covers space curves, arclength, curvature, functions of several variables, partial derivatives, implicit functions, constrained and unconstrained extrema, multiple integrals, line, surface, and volume integrals, scalar and vector fields, gradient, divergence and curl, Stokes Theorem, the Divergence Theorem, and applications to heat flow and fluid flow, boundary value problems, partial differential equations, separation of variables, solution of the heat equation, wave equation, and Laplace's equation with various boundary conditions.

FORMAT: Lecture 4 hours, lab 1 hour

PREREQUISITE: ENGM 2021.03

### **ENGM 4675.03: Risk Assessment and Management.**

This class introduces the risk assessment and system reliability methodologies, from classical event trees to simulation. Examples of risk-based decision making analyses will be covered, ranging from oil exploration to environmental site remediation. The student will carry out a risk assessment involving design decisions on a project of their own choosing.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 2032.03

### **ENGM 4680.03: Ecosystem Modelling of Marine and Freshwater Environments.**

Students develop and apply mathematical models of marine and freshwater ecosystems to study biological production, biogeochemical cycling etc. Lectures provide theoretical background for coupling nutrient and plankton dynamics, including parameterizing biological processes and physical effects. Computer sessions provide hands-on modelling experience. Students also learn to critique modelling literature in a journal-club setting.

FORMAT: Lecture 3 hours, lab 2 hours

CROSS-LISTING: ENGM 6680.03, OCEA 5680.03

## I. Introduction

Environmental Engineering is a rapidly growing discipline within the engineering profession. The program is intended to satisfy the needs of interested students and the environmental industry. The curriculum is designed to train professionals in multidisciplinary approaches to environmentally-based design, waste management, water and soil quality, energy conservation and renewables, and air quality.

Sustainable environmental approaches to production and management systems will continue to be required by industry, government and the consulting sector at the provincial, regional, national and international level. Challenging Environmental Engineering career positions are found in national and international petroleum companies and power utilities, manufacturers of environmental and energy efficient products, environmental consulting companies, provincial and national Government departments such as Natural Resources, Environment, Forestry, Agriculture and Food to name just a few.

## II. Curriculum and class descriptions

Refer to sections IIC and IIIC, Environmental Engineering Program, in the Process Engineering and Applied Science section of this calendar, page 375.

## III. Co-operative program and schedule

Refer to section E, Technical Co-op Program, in the Engineering section of this calendar, page 346.

## IV. Admissions

- Students who have successfully completed first year engineering at a recognized university will be eligible for admission in Year II of the Environmental Engineering program.
- Students who have completed a first year science program will be considered for admission into Environmental Engineering.
- Students who have completed two or more years of university studies will be considered for admission on the basis of transfer of credits.

Pegg, M. J., BSc, PhD (Leeds), PEng

### Undergraduate Program Co-ordinator

Budge, S. M., BSc (Acadia), PhD (MUN)

## I. Introduction

Food Science is a discipline that combines a basic knowledge of science and engineering principles in the study of food products and preservation technologies. Food scientists have training in and employ the principles of the basic sciences such as physics, mathematics, chemistry, biology, biochemistry, and microbiology. Food Science is the application of the basic sciences and engineering to food processing, preservation and safety.

**A Minor in Food Science is available to students registered in the BSc 20 credit major and honours programs. See page 379.**

## II. Curriculum and class descriptions

Refer to sections IID and IIID, Food Science Program, in the Process Engineering and Applied Science section of this calendar, page 375.

## III. Admissions

Students from Canadian High schools are recommended to take the following subjects in high school: Pre-calculus Math and English and two or more of Physics, Chemistry, Food Science or Biology. The admission requirements are the same as for admission to the Bachelor of Science program. Many of our students have traditionally been transfer students. Please contact the program chair for advice on this matter.

## I. Introduction

Industrial Engineers design systems to enable people and society to improve productivity, efficiency, effectiveness and quality. All engineers work at planning, designing, implementing and controlling the systems that enable people to use technology. The systems that industrial engineers design are broad and are characterized by a need to integrate both the physical and decision making capabilities of humans with all other aspects of the system design. Problems range from the design of a work method and work station, to the design of a factory layout and methods of controlling the flow of materials on the factory floor, to the design of an overall corporate plan involving materials procurement, production, inventory and distribution. The idea of a factory is also extended to include communications, systems, energy systems, health care systems, municipal systems, transportation systems; in fact all the systems that are essential to the functioning of modern society. To facilitate effective decision-making and achieve

high performance in areas such as scheduling, inventory and quality control, industrial engineers are often required to design and implement computer based information systems.

Human behaviour and capabilities are key elements in the systems industrial engineers work with. In designing the layout of a production line for an automobile manufacturer, the checkout counter for a supermarket, the organization of work flow for a bank or the materials handling system for a steel plant, the engineer must consider both physical requirements and cost parameters, and the physiological and behavioural performance of the human operators. The industrial engineer has a dual role, both to extend human capability to operate, manage and control the overall production system, and to ensure the safety and well being of those working in the system.

Design and development of these systems requires the unique background of the industrial engineer. The process of engineering always starts with measurement. Where other engineers might measure temperatures, pressures, or loads, the industrial engineer measures the time of a work cycle, dollar values of expenditures, rates of machine failures, and demand processes for finished goods. Usually the mathematical analysis must take into account risk and uncertainty to a larger extent than in other engineering fields. Computer simulation and optimization are often required. The concepts and techniques found in the Industrial Engineering curriculum have been selected to assist the student to develop the skills that meet the specific challenges of systems which involve managerial activities.

Students begin the Industrial Engineering program with a background in engineering fundamentals studied during their initial two years. In the latter portion of the IE program, they are introduced to the fundamental approaches of work place design and operations research, while at the same time enhancing their mathematical and computer background. Later, more advanced modelling approaches are examined together with classes more directly related to the management process. Production scheduling, inventory control, quality management and plant layout are studied, as are the factors which influence human performance. Students are provided with the opportunity to study such areas as manufacturing, service systems, or maintenance through the Department's elective class offerings.

In their final year, all students undertake a major design project. Projects are drawn from companies or institutions outside the University and are treated as a consulting assignment. Students are evaluated on their ability to achieve an innovative solution by drawing upon the analytical skills developed throughout their program of studies. They must also, of course, satisfy the practical requirements of the client.

Job opportunities for industrial engineers are both plentiful and widely based. Former graduates are currently practising industrial engineering in all types of work activity ranging from semi-conductor manufacturing and airlines, to utilities and hospitals. Invariably, the work assigned is original in its nature, demanding that the industrial engineer be creative in applying his or her many abilities to achieve the best solution. Managers require such results if they are to keep their costs under control in this increasingly competitive world. This requirement will sustain the high demand for industrial engineers well into the future.

## II. Program Guide

Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

### Co-op Program

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 5	Work Term 1	Study Term 6
4	Work Term 2	Study Term 7	Work Term 3
5	Study Term 8	Study Term 9	

## Non Co-op Program (Accelerated Program)

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	Study Term 6
3	Study Term 5	Study Term 7	FREE
4	Study Term 8	Study Term 9	

Students not wishing to participate in the co-op program are able to structure their academic program over a two-year time period. To do so requires the student to begin the program at the beginning of the summer study term, which commences the first week of May (Study Term 6). The student then completes Study Term 5 in the fall, and then Study Term 7 in the winter. After a summer “off”, the student would complete the final two study terms in the same order as students in the co-op program thus completing the five study or academic terms within two calendar years.

### Year 3, Term 5 (Fall)

- IENG 3301.03 Fundamentals of Industrial Engineering
- IENG 3303.03 Ergonomics and Work Design
- IENG 3305.03 Computational Methods and Algorithms for IE
- IENG 3344.03 Operations Research: Linear Models
- IENG 4548.03 Systems Engineering

### Year 3, Work Term 1 (Winter)

### Year 3, Term 6 (Summer)

- IENG 3316.03 Design of Information Management Systems
- IENG 3320.03 Analysis of Design of Production Systems
- IENG 3321.03 Manufacturing Processes and Materials
- IENG 3334.03 Industrial Statistics
- IENG 3345.03 Operations Research: Stochastic and Non-Linear Models

### Year 4, Work Term 2 (Fall)

### Year 4, Term 7 (Winter)

- IENG 4432.03 Simulation of Industrial Systems
- IENG 4443.03 Quality Control and Reliability
- IENG 4445.03 Facilities Design
- IENG 4454.03 Design of Inventory Systems
- IENG 4558.03 Project Management and Control

### Year 4, Work Term 3 (Summer)

### Year 5, Term 8 (Fall)

- IENG 4529.03 Industrial and Organizational Psychology
- IENG 4581X/Y.06 Industrial Engineering Design Project
- IE Elective
- IE Elective

### Year 5, Term 9 (Winter)

- IENG 4547.03 Company Operations and Management
- IENG 4581X/Y.06 Industrial Engineering Design Project
- IE Elective
- IE Elective

### Industrial Engineering Electives

- IENG 4544.03 Routing and Scheduling
- IENG 4562.03 Maintenance Engineering and Management
- IENG 4564.03 Design and Optimization of Service Systems
- IENG 4571.03 Computer Integrated Manufacturing Systems
- IENG 4573.03 Industrial Biomechanics
- IENG 4574.03 Decision and Risk Analysis
- IENG 4575.03 Stochastic Processes and Queueing
- IENG 4578.03 Organizational Aspects of Quality Management
- IENG 4579.03 Supply Chain Management
- IENG 4580.03 Modelling and Performance Analysis of Computer Networks
- IENG 4599.03 Special Topics in Industrial Engineering

## III. Class Descriptions

### IENG 2005.03: Engineering Economics.

This class is designed to provide students with the fundamentals of engineering economics. Engineers must function as managers in the real world of decision making where the criteria include not only technological excellence, but cost. Time value of money, project screening, and a variety of discounting analysis techniques are presented. Make versus buy decisions and repair versus replace decisions are discussed. The tax effects on project cash flow and viability are also presented. This class is designed to introduce students to these fundamentals, and apply them through the use of software and projects.

FORMAT: Lecture 3 hours, lab 2 hours

### IENG 3301.03: Fundamentals of Industrial Engineering.

This course introduces students to fundamentals of industrial engineering. The history, development and theoretical basis of industrial engineering will be discussed, as well as the social and environmental impact of engineering decisions. Students will be introduced to the concept of systems and systems thinking. Fundamental industrial engineering techniques will be covered, including motion study, work measurement of standards, and operations evaluation and analysis.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 2032.03

EXCLUSION: IENG 3311.03

### IENG 3303.03: Ergonomics and Work Design.

Ergonomics is the science of applying knowledge of the capabilities and limitations of humans into the design of products, work spaces and systems we use every day. Topics in this course will include the musculoskeletal system, anthropometry, manual material handling, work physiology, the effect of work environment on performance, human/machine interaction, cognition and information processing. Design principles based on this knowledge will be presented. This course will include labs and final design project.

FORMAT: Lecture 3 hours, lab 3 hours

CROSS-LISTING: KINE 3476.03

EXCLUSION: IENG 3313.03, IENG 3347.03

### IENG 3305.03: Computational Methods and Algorithms for IE.

An overview of advanced programming methods is presented with an introduction to algorithms used in industrial engineering applications. Topics covered include sorting, searching, data structures, shortest paths, random number generation, simulated annealing, matrix operations, curve fitting and geometric algorithms. Algorithms for solving several classes of equations are considered. Techniques for writing and debugging large programs, and controlling numerical errors are taught. The C programming language will be used for implementation.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 1081.03

### IENG 3316.03: Design of Information Management Systems.

Techniques used in the design of information management systems to support decision making are taught. This includes the principles of systems analysis, software engineering and requirements analysis. The design of relational database systems, user interfaces and documentation are covered. Current technologies for computer hardware, software, networking and communications are reviewed. Students are taught how to program database applications in a fourth generation environment. Software development projects will be assigned.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 1081.03

### IENG 3320.03: Analysis and Design of Production Systems.

This course provides the student with an introduction to issues in planning and control of production systems and scheduling techniques used in production environments. Topics include aggregate planning models, performance measurement, materials requirements planning, production lot-sizing, just-in-time (JIT) models and other pull control systems, and job scheduling and sequencing. Programs currently practiced in industry, such as Lean Manufacturing and Six-Sigma, will also be introduced.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: ENGM 1081.03, ENGM 2022.03, ENGM 2032.03, IENG 2005.03, IENG 3345.03 (may be taken concurrently)

### IENG 3321.03: Manufacturing Processes and Materials.

The class deals with properties of manufacturing materials, casting and forming, traditional and non-traditional machining processes, welding and computer-integrated manufacturing (CIM). Theoretical background is provided that includes equilibrium diagrams, heat treatment, tool life and wear, and dimensioning and tolerance analysis. There will be lab experiments, video presentations and manufacturing plant visits.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGI 1101.045, ENGI 2203.03

### IENG 3334.03: Industrial Statistics.

This class covers hypothesis testing, chi-square tests and nonparametric techniques, analysis of variance and experimental design, as well as simple and multiple linear regression. Numerical examples are solved by straightforward calculation as well as by computer software, and various applications are presented. Time series and forecasting techniques are taught. A project concerns the building and testing of a multiple linear regression model.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 2032.03

### IENG 3344.03: Operations Research: Linear Models.

This class is an introduction to linear programming and its applications to industrial engineering design. The simplex method and duality theory are covered in detail. Formulation, solution algorithms, and applications of several problem classes are presented including network models and integer programs. Through a class project, students are introduced to the process of developing an optimization model, including the ideas of database, matrix generators, and report writers.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: ENGM 2101.03, ENGM 1041.03, ENGM 1081.03

### IENG 3345.03: Operations Research: Stochastic and Non-Linear Models.

This class consists of an analysis of important probabilistic and nonlinear models in operational research. These include dynamic programming, queuing models and reliability models. Aspects of Markov processes and nonlinear programming are introduced. Application of these methods is reinforced through a term project.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 2032.03, ENGM 1081.03

### IENG 4432.03: Simulation of Industrial Systems.

This class covers discrete event systems simulation. Model development includes validation and verification methods, the generation of pseudo-random numbers from continuous and discrete distributions, selection of probability distributions and variance reduction techniques. Statistical output analysis and inference are studied for effective interpretation of results. Applications in areas such as manufacturing, service operations, project management and system design are reviewed. Simulation software is used throughout the course.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: IENG 3305.03, IENG 3334.03, IENG 3345.03

EXCLUSION: IENG 3432.03

### IENG 4443.03: Quality Control and Reliability.

This class evaluates aspects of production to ensure that products meet specifications. Statistical quality control, which is used to determine process capability and to detect process changes, involves the design and use of different types of control charts. Sampling inspection, which is used to separate good lots from poor lots, covers the design of sampling plans. Reliability is concerned with the design of products and reliability testing.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 2032.03, IENG 3334.03

EXCLUSION: IENG 3443.03

### IENG 4445.03: Facilities Design.

This class deals with the principles, concepts and methods of plant layout and materials handling for the optimum design of a facility. The topics include information requirements for facility design, conventional and newer quantitative techniques for analyzing material flow, facilities location, space determination, computerized plant layout techniques, the unit load concept, materials handling equipment selection and automatic storage and retrieval systems. A project involves facilities design for the manufacture and assembly of a mechanical device.

FORMAT: Lecture 3 hours, lab 2 hours

EXCLUSION: IENG 3445.03

### IENG 4454.03: Design of Inventory Systems.

This course introduces a number of quantitative methods for the analysis and of inventory systems. These include deterministic and probabilistic economic order quantity (EOQ) models and variants, single and multiple period inventory models, exchange curves, and other advanced inventory models. Forecasting algorithms applicable to inventory systems are also covered.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: IENG 2005.03, IENG 3320.03, IENG 3334.03, IENG 3345.03

### IENG 4500.03: Operations Research Methods for Systems Engineering.

This course will introduce non-industrial engineering students to operations research models and methodologies to optimize the design, development and operation of engineered systems. The objectives of this course will be to provide students with the skills to solve a variety of linear and non-linear models and the ability to recognize how such models can be applied in a wide variety of engineering disciplines. Topics to be covered include linear programming, integer programming, network models, decision analysis, dynamic programming, queuing models, and non-linear optimization. Applications will focus on diverse areas of engineering including mining, transportation, and environmental management.

PREREQUISITE: ENGM 2032.03

### IENG 4529.03: Industrial and Organizational Psychology.

Individual behaviour and group processes are reviewed, particularly as they relate to activities in organizations. Perception, learning, motivation and attitudes are covered. The implications of different personality types at work are taught. Organizational issues such as group dynamics, communication, power and conflict are studied. Applications include job analysis, team effectiveness, personnel selection and training, job enrichment, leadership and career management.

FORMAT: Lecture 3 hours, lab 2 hours

### IENG 4544.03: Routing and Scheduling.

Optimization techniques for solving vehicle routing and scheduling problems are covered. Elementary concepts and notation for graphs, networks, maps and geographic information systems (GIS) are presented. Specific issues include NP-complete problems, shortest paths and travelling salesperson problems. Vehicle routing and scheduling with capacity constraints, time windows, pick-up and delivery constraints are also discussed. Applications in manufacturing and transportation are reviewed.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: IENG 3305.03, IENG 3344.03

### IENG 4547.03: Company Operations and Management.

The purpose of this class is to introduce the student to the management and operation of large and small businesses. Topics include the business environment in Canada, entrepreneurship, small business startup and financing, organizational theory, management cycle, managing projects, human resources, industrial relations, management finance, marketing and sales. A term project is an integral part of this class.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: IENG 2005.03

### IENG 4548.03: Systems Engineering.

This class places the industrial engineering viewpoint in the context of systems theory. The class begins with an introduction to the general concepts of systems, and then examines classical linear systems theory as applied traditionally in engineering. It is shown how industrial engineering design can be viewed as a control system problem. The concepts of systems engineering are in turn applied to industrial engineering design. Systems dynamics simulation is used to explore these ideas. Issues of capacity planning, hierarchical production planning and control, short term scheduling and data envelopment analysis are presented.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 2022.03, ENGM 2032.03

### IENG 4558.03: Project Management and Control.

This class identifies the common aspects and peculiarities of projects and then illustrates the application of analytical approaches to meet the challenges of achieving effective project management. The following topics are covered: feasibility studies, project planning, cost estimation, bidding, use of professional engineering and other types of consultants, organization and control, resource

allocation and project life cycle concepts. The role of the professional engineer in society and the impact that engineering in all its forms makes on the environmental, social, economic and cultural aspirations of society are discussed.  
 FORMAT: Lecture 3 hours, lab 2 hours

### **IENG 4562.03: Maintenance Engineering and Management.**

The class deals with basic maintenance systems of equipment and buildings, maintenance job planning and scheduling, maintenance work measurement/universal maintenance standard (UMS), breakdown versus preventive maintenance, total productive maintenance (TPM), budgets and cost control, computerized maintenance management information system, reliability measurement based on the Weibull distribution, maintainability measures and managing maintenance.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 2032.03, IENG 2005.03

### **IENG 4564.03: Design and Optimization of Service Systems.**

This class will focus on the design of systems in Canada's largest industry: healthcare. Throughout the class, examples drawn from healthcare will be used to illustrate how industrial engineering techniques can be applied in a wide variety of settings. Topics to be discussed include capacity planning, service distribution, quality, decision analysis, scheduling, and waiting line models.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: IENG 3301.03, IENG 3345.03

### **IENG 4571.03: Computer Integrated Manufacturing Systems.**

Techniques are introduced for the analysis and design of computer integrated manufacturing systems. The architecture of CIM systems is discussed, including machining stations, material handling, robotics, computer control and information systems. Specific topics include manufacturing simulation, automated material handling, warehouse management, robotics, manufacturing planning and control, just-in-time systems, group technology, cellular manufacturing, flexible manufacturing systems, concurrent engineering, computer aided process planning and information system design.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: IENG 3320.03, IENG 3321.03, IENG 4432.03

### **IENG 4573.03: Industrial Biomechanics.**

The class primarily deals with the functioning of the structural elements of the human body and the effects of external and internal forces on the body. Due emphasis is given to the biomechanical approach to job design. This takes into account human motor capabilities and limitations, work physiology, task demands, equipment and workplace characteristics in an integrated manner. Use of bioinstrumentation and applications of biomechanics in work, industry and rehabilitation are discussed.

FORMAT: Lecture 3 hours, lab 2 hours

### **IENG 4574.03: Decision and Risk Analysis.**

This class teaches the principles and applications of decision analysis. The cognitive processes involved with information acquisition, judgement, value assessment, and decision-making are presented. Methods for scoping a decision-making problem, decomposing it into elements, establishing criteria, and evaluating the options are discussed. Probability assessment under uncertainty, decision trees, value of information, utility theory, and multiple-agent contexts are explored to address increasingly complex scenarios.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGM 2032.03

### **IENG 4575.03: Stochastic Processes and Queueing.**

This class covers the analysis of stochastic models. After a review of the relevant aspects of probability theory, the class examines discrete-time Markov chains, Poisson processes, continuous-time Markov chains, and renewal theory. The class also touches on applications of the theory to queueing, inventory, and reliability.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: IENG 3344.03, IENG 3345.03

### **IENG 4578.03: Organizational Aspects of Quality Management.**

In this class, quality is investigated as a strategic initiative for organizations. The concept of quality is described in relation to the philosophies of Shewart, Deming, and Juran. The organizational structures needed to support Total Quality

Management (TQM) programs are described. Tools for process analysis and improvement are discussed, as is the concept of change management. The class concludes with an evaluation of current quality certification protocols, particularly the ISO 9000 series of standards.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: IENG 3301.03 or IENG 4500.03, IENG 4443.03

### **IENG 4579.03: Supply Chain Management.**

This class will consider the design, analysis and operational control of manufacturing supply chain systems. Models of the supply chain at the strategic, tactical and operational levels are examined as well as the incorporation of these models in a variety of decision support systems. The role of information technology, including enterprise resource planning software, is studied in the supply chain context.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: IENG 3320.03, IENG 3344.03, IENG 4454.03

### **IENG 4580.03: Modeling and Performance Analysis of Computer Networks.**

The fundamentals of computer network operation and design are covered. Topics include protocols, wide area networks, local area networks, internetworks, performance measurement, and data network simulation. A network design project will be assigned.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: IENG 4432.03

### **IENG 4581X/Y.06: Industrial Engineering Design Project.**

In this class, the students work in pairs on an actual industrial engineering design problem from an organization outside the university. The problem may be in a manufacturing plant, a consulting firm, or a service industry. The ability to solve problems and communicate with the client organizations and with professional Industrial Engineers is stressed. Students are required to maintain a professional log, to prepare an interim report, and to demonstrate their presentation skills.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab 6 hours

PREREQUISITE: Completion of all classes except those in the last two academic terms of the Industrial Engineering program.

### **IENG 4599.03: Special Topics in Industrial Engineering.**

This senior year elective course will include special topics in Industrial Engineering that are not included in the regular offerings of the department. The course will be a lecture course, not directed studies. Topics may vary each year, and therefore students should consult with the department for more information before registering.

FORMAT: Lecture 3 hours/lab 2 hours

composites, automotive alloys, aerospace materials, electronic materials, corrosion, wear, and near-net-shape materials processing technologies.

## I. Introduction

Metals and materials are found in every aspect of society today. Materials have always been central to the advancement of civilization so it is not surprising that entire eras are named after them (bronze age, iron age). The importance of developing new, advanced materials is truly a global issue with societal demands for things such as more fuel efficient vehicles and faster computer processors reaching all time highs. Materials Engineers are the driving force behind such developments, having an unsurpassed understanding of the respective structure, properties and processing of materials. Consequently, graduates are employed in practically all industries. Principals amongst these are primary metal production, automotive, aerospace, government research establishments and consulting firms. Literally all graduates find immediate employment - historically, over 70% have secured full time positions before the start of their final academic term. These niche individuals are highly respected within the companies that they work for and many advance into upper managerial and executive positions.

The program has been designed to give students extensive coverage of this highly unique field which in itself is very broad. The principal branches of Materials Engineering in which students receive instruction include (i) Extractive Processing of Materials, (ii) Structure of Materials, and (iii) Mechanical Properties and Testing of Materials; usually the graduating engineer chooses to specialize in one of these three. Students learn about all of the major classes of materials including metals, ceramics, polymers, and composites - graduates are true "Materials Experts." In doing so, the respective curricula are designed to provide in-depth knowledge of engineering and more importantly, extensive coverage of discipline-specific areas. Students' understanding of the field is further accentuated by the fact that average class sizes are on the order of 20 to 25 students ensuring each an exceptional level of attention from faculty members and one on one interaction.

In 1979, Materials Engineering was the first discipline in the faculty to offer the now highly popular Co-op Program. Students are able to obtain a Bachelor of Materials Engineering with Co-Op distinction in two years following the completion of a Diploma in Engineering. There are two Co-op programs offered in Metallurgical Engineering. One is a Bachelor of Engineering, the other a combined BEng/MASc Degree. The undergraduate curriculum is the same for both programs.

The BEng/MASc was developed in light of the program's strong commitment to research and to permit the identification of students interested in graduate studies before they completed their undergraduate classes. In this regard, all faculty members are actively involved in international research and development initiatives. Consequently, students may also choose to pursue Master's and Doctoral degrees in Materials engineering at Dalhousie in many technically challenging fields of global importance. Included are ceramic and metal matrix

## Adjunct Assistant Professor

Molloy, S., BEng (Concordia), MEng, PhD (MUN)

## Senior Instructor

Warner, R. A., BEng (TUNS), PEng

## I. Introduction

Mechanical Engineering covers a very broad field of professional activity in such areas as land, sea, air, and space transportation; primary and secondary manufacturing industries; energy supply, conversion and utilization; environmental control; and industrial management. In these areas, the Mechanical

Engineer may become involved with design, construction, operation, development, research, planning, sales and management.

The curriculum is designed to develop an understanding of the fundamental principles of Mechanical Engineering through lecture, tutorial, and laboratory activities. Well-instrumented laboratories in thermofluids, energy conversion, stress analysis, vibrations, and control systems provide experience in measurements and applications, to ensure a thorough understanding and appreciation of the subject matter. Classes in mathematics, and various non-technical subjects are offered to broaden the student's outlook and understanding of the profession.

Laboratory involvement is considered an important component of mechanical engineering students' education. Emphasis in the laboratory is placed on project work in which design, development and testing are combined in term projects. The laboratory facilities include extensive equipment which is available for use by both undergraduate and graduate students. Measurement techniques and interpretation of test data are emphasized in the laboratories which include several testing machines, photoelastic equipment and strain gage facilities. The control systems laboratories include hydraulic, pneumatic and electronic control systems and components. Several test cells are available for engine testing and a well instrumented, low turbulence wind tunnel is available.

Most undergraduate laboratories use high-speed PC-based digital data acquisition and control systems with graphical interfaces for lab experiments and computations, and the Department has several advanced computer graphics systems.

A design project is an integral part of the senior year curriculum. This involves the student in the original design of a machine or system. Generally, the material learned in several classes must be applied in an imaginative way to achieve the required objective. Non-credit machine-shop practice classes are available to aid the design and construction of projects. Many design projects are sponsored by industry. Most projects involve hardware and typically result in construction and testing of prototypes.

Postgraduate studies in the Department are concentrated in the areas of renewable energy, conversion and storage, stress analysis, heat transfer, multi-phase flow, fluid and thermal power, dynamics of rotating machines, robotics, MEMS and computer aided design and manufacturing. Research and project master's degrees as well as the doctoral degree are offered.

## II. Program Guide

Mechanical Engineering offers two versions of the BEng Program:

1. Co-op Program
2. Non Co-op Program

### A. Co-op Program

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	Free
2	Study Term 3	Study Term 4	Free
3	Work Term 1	Study Term 5	Work Term 2
4	Study Term 6	Work Term 3	Work Term 4
5	Study Term 7	Study Term 8	

Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

### Year 3, Work Term 1 (Fall)

### Year 3, Study Term 5 (Winter)

- MECH 3010.03 Machine Design: Loading of Components
- MECH 3500.03 Dynamics of Machines
- MECH 3805.03 Mechanical Engineering Thermodynamics
- CPST 3030.03 Engineering in Society II
- ENGM 3356.03 Numerical Methods and Partial Differential Equations
- MATL 3500.03 Materials Engineering

## Year 3, Work Term 2 (Summer)

### Year 4, Study Term 6 (Fall)

- MECH 3020.03 Machine Design: Power Components
- MECH 3305.03 Fluid Mechanics
- MECH 3660.03 Finite Element Method in Mechanical Design
- MECH 3705.03 Heat Transfer
- MECH 3900.03 Systems I
- \*Humanities Class

### Year 4, Work Term 3 (Winter)

### Year 4, Work Term 4 (Summer)

### Year 5, Study Term 7 (Fall)

- MECH 4015.05 Design Project I
- MECH 4300.03 Stress Analysis
- MECH 4600.03 Engineering Measurements
- MECH 4805.03 Thermo-Fluid Engineering III
- Technical Elective I

### Year 5, Study Term 8 (Winter)

- MECH 4025.05 Design Project II
- MECH 4500.03 Vibrations
- MECH 4900.03 Systems II
- Technical Elective II
- Technical Elective III
- \* Humanities Class

Classes in the following departments meet the requirement for the humanities credit: Canadian Studies, Classics, Gender and Women's Studies, History, History of Science and Technology, Music, Philosophy, Political Science, Psychology, Religious Studies, Sociology, Theatre.

## B. Non Co-op Program

Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	FREE
2	Study Term 3	Study Term 4	FREE
3	Study Term 6	Study Term 5	FREE
4	Study Term 7	Study Term 8	

Non co-op students take the same academic program as the co-op students; however, Study Term 6 may be taken before Study Term 5 if desired. In this way, the program can be done in a total of four years.

## C. Technical Elective Choices

- MECH 4000.03 Manufacturing
- MECH 4340.03 Energy Management I
- MECH 4430.03 Turbomachines
- MECH 4440.03 Principles of Marine Craft Design
- MECH 4444.03 Mechatronics
- MECH 4450.03 Marine Craft Design and Construction
- MECH 4521.03 Applied Dynamics
- MECH 4530.03 Mechanics of Composite Materials
- MECH 4540.03 Aerodynamics
- MECH 4560.03 Space Systems
- MECH 4631.03 CAD/CAM
- MECH 4638.03 Computer Aided Toler. & Dimensioning
- MECH 4640.03 Robotics
- MECH 4650.03 Biomechanical Engineering
- MECH 4652.03 Kinematics of Human Motion
- MECH 4660.03 Finite Element Method in Mechanical Design
- MECH 4810.03 Energy Conversion Systems
- MECH 4820.03 Energy from Renewable Resources
- MECH 4830.03 Reciprocating Internal-Combustion Engines
- MECH 4840.03 Steam Plant Engineering
- MECH 4851.03 Heating, Ventilating & Air Conditioning
- MECH 4880.03 Introduction to Nuclear Engineering
- MECH 4910.03 Fluid Power
- MECH 4950.03 Advanced Control Engineering
- MECH 4960.03 Computational Methods in Engineering

## NOTES:

1. Not all of these classes will be offered every year.
2. Seniors may take a postgraduate class as a Technical Elective with the approval of the Department Head and the professor offering the class.
3. Technical Electives may be taken from another engineering department with the permission of the Head of the Mechanical Engineering Department, and the professor offering the class.

## III. Class Descriptions

### MECH 3010.03: Machine Design: Loading of Components.

The application of basic methods and concepts of strength of materials to machine design including design concepts, stress, and theories of failure is developed. Topics include: load analysis, materials, static stresses, strain and deflection, failure, impact, fatigue, surface damage. Applications include: screw fastenings, springs.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 2100.03 or ENGI 2203.03, ENGI 2400.03

### MECH 3020.03: Machine Design: Power Components.

The use of engineering principles in the design of machine power components is developed. Topics include: Lubrication and sliding bearings, roller bearings, spur gears, helical, bevel and worm gears, shafts, clutches and brakes, power transmissions such as belts and chains.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 2100.03 or ENGI 2203.03, ENGI 2400.03

### MECH 3300.03: Fluid Dynamics.

This class presents an introduction to turbines, pumps, fans and compressors. The concept of ideal fluid flow is introduced. Velocity potential and stream function solutions are obtained for inviscid flows. Boundary layer theory is presented. Numerical methods for solving fluid flow problems are given.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: ENGI 2300.03 or ENGI 2103.03, ENGI 2800.03 or ENGI 2102.03, ENGM 3361.03 or ENGM 2101.03

### MECH 3305.03: Fluid Mechanics.

This class presents the dynamic governing equations of fluid flow in differential forms: continuity, Navier-Stokes and energy. Concepts of stream function, vorticity and velocity potential are also introduced. The physics and modeling of Turbulence in fluid systems is shown. The boundary layer theory is shown and flow past immersed bodies are studied: concepts of drag and lift forces are presented. Compressible flow is introduced: speed of sound, nozzle and diffuser, shock waves, Rayleigh and Fanno flow are all studied.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: ENGI 2102.03, ENGI 2103.03

### MECH 3500.03: Dynamics of Machines.

The class focuses on design of mechanism, their motion, static and dynamic loads, and power transmission. It includes planar and spatial 4-bar and 6-bar linkages, cam mechanisms, gear trains, rotor systems, and manipulators. Linkage inversion, transformation, and synthesis are used for design of new mechanisms. Graphic, analytical, computer, and physical modeling techniques are used. Many real life mechanisms are analyzed.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: ENGI 2400.03, MECH 2100.03, or ENGI 2203.03, ENGM 1041.03, ENGI 1400.03 or PHYC 1280.03

### MECH 3660.03: Finite Element Method in Mechanical Design.

Class deals with the application of the finite element method to stress analysis problems encountered in mechanical design. Introduction to the finite element method is followed by extensive applications to the design of machine and structural components. Mechanical and thermal stresses in trusses, beams, axisymmetric, shell, and 3D solid elements are considered. Professional finite element modeling best practices are discussed. A finite element pre-processor, code, post-processor are introduced and used in the class assignments.

FORMAT: Lecture 3 hours/ lab, tutorial 2 hours

PREREQUISITE: ENGI 2400.03

### MECH 3700.03: Heat Transfer I.

This class is an introduction to the three modes of heat transfer: conduction, convection, and radiation. Topics covered in conduction include steady-state

conduction, in one and two dimensions. In convection heat transfer forced internal and external flows are examined. Some basic concepts of natural convection are introduced. The fundamentals of radiant heat transfer are covered, including solar radiation and radiative heat transfer between simple geometric objects.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: ENGI 2800.03 and ENGI 2300.03

### **MECH 3705.03: Heat Transfer.**

This class is an introduction to the three modes of heat transfer: conduction, convection and radiation. Topics covered in conduction include steady-state and transient conduction, in one and two-dimensional system, and the study of extended surfaces. Force and free convection for internal and external flows are examined. The fundamentals of radiation heat transfer are covered, including blackbody radiation, gray surfaces, Kirchhoff's law and radiation exchange between surfaces.

FORMAT: Lecture 3 hours/lab/tutorial

PREREQUISITE: ENGI 2102.03, ENGI 2103.03

### **MECH 3805.03: Mechanical Engineering Thermodynamics.**

This class builds on the thermodynamics concepts presented in Thermo-Fluid Engineering I. Introductory concepts of cycles, processes, heat and work are reviewed. The first and second law of thermodynamics are applied to open and closed systems, both steady-state and transient processes. Availability and exergy analysis are presented. Vapour and gas power and refrigeration cycles are studied; absorption refrigeration cycles and refrigerants are also discussed.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: ENGI 2102.03, ENGI 2103.03

### **MECH 3900.03: Systems I.**

The class deals with the analysis of dynamic physical systems. Ordinary-differential-equation models are developed for mechanical, thermal, fluid and electrical systems. System equations are solved using classical methods and Laplace-transform techniques. S-plane characteristics are introduced, as are block-diagram & state-space representations. Systems are simulated by digital computer in the laboratory portion.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: ENGM 2021.03 or ENGM 2022.03, ENGM 1081.03 or ENGM 2081.03

### **MECH 4000.03: Manufacturing.**

The class starts with a manufacturing process overview and a detailed process study in the following areas: manual assembly, machining, injection molding, thermoforming and casting. A relationship between process and design is examined and design for manufacturing methodologies is introduced. Quality control and quality assurance issues are overviewed. The principles of cell design for assembly and machining are introduced and part redesign for process and system is studied.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 3020.03

### **MECH 4010.03: Design Project I.**

This class develops the use of fundamental theory in the detailed design of a suitable project selected by the student in consultation with the department. The student is expected to take the project from its preliminary stage through the various design stages to the ultimate completion of the design, which include a detailed report with calculations, drawings, possibly a model and a verbal presentation.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 3010.03 or MECH 3020.03

### **MECH 4015.03: Design Project I.**

This class provides a project-based exercise in the engineering design process in a real world engineering context. Students work in teams and are expected to take the project from its preliminary stage through the design stages to the ultimate completion of the design including: technical reports with calculations, engineering drawings, peer evaluation, oral presentations and possibly a physical prototype or model.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 3010.03 or MECH 3020.03

### **MECH 4020.03: Design Project II.**

This class is a continuation of Design Project I leading to a final report and formal presentation. The presentation will be made to fellow students and departmental staff members prior to the last day of lectures.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 4010.03

### **MECH 4025.05: Design Project II.**

This class is a direct continuation of Design Project I leading to the implementation of the student team design. All projects involve evaluation/testing of student designs, this is usually done via a constructed physical prototype or a model. Students produce a final technical report, conduct peer evaluations and give a formal presentation.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: MECH 4015.05

### **MECH 4300.03: Stress Analysis.**

Class topics include: general state of stress, equilibrium equations, stress-strain-temperature relations, plane stress, axisymmetrical stress problems, thick cylindrical pressure vessels, rotating disks, bending of rectangular and circular plates, torsion of non-circular members, membrane analogy, thin-walled hollow sections, non-symmetrical bending, properties of cross-sections, shear center, composite beams, plastic hinge. Energy Methods, Castigliano's and theorems, statically indeterminate problems.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: ENGI 2200.03

### **MECH 4340.03: Energy Management I.**

The purpose of this course is to introduce the concepts and techniques of energy management and conservation. The subjects that will be discussed are energy supply and demand, energy pricing, scope of the energy problem and approaches to provide solutions; energy auditing; improving energy utilization in space conditioning, and steam, hot water and compressed air systems; insulation; and electrical energy conservation. An interdisciplinary approach will be employed in this course to provide a wider understanding of the subject.

FORMAT: Lecture 3 hours, tutorial 2 hours

PREREQUISITE: MECH 3300.03 or MECH 3305.03, MECH 3700.03 or MECH 3705.03, MECH 3800.03 or MECH 3805.03

CROSS-LISTING: MECH 6340.03

### **MECH 4430.03: Turbomachines.**

Various types of turbomachines, from wind turbines to high-ratio compressors are studied. Although hydraulic pumps and turbines are treated, the majority of the class time is devoted to compressible flow turbomachines and their characteristics. Emphasis is placed on practical design and performance parameters.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

### **MECH 4440.03: Principles of Marine Craft Design.**

This class covers the fundamentals of hydrostatics and hydrodynamics of marine craft. Topics include: hydrostatics and stability calculations for marine craft; dimensional analysis and modelling of marine systems; resistance estimation of low-speed and high-speed craft; sail power, marine propellers and jet propulsion; directional stability and control and wave theory and motion in waves.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: MECH 3300.03 or MECH 3305.03

### **MECH 4444.03: Mechatronics.**

This course deals with the integration of mechanical, electrical, computer and control engineering which is increasingly becoming an important part of engineering design. Topics include Mechanical and Electrical Actuation Systems, Sensors, and Signal Conditioning, Microprocessors and Programming and Control. A major part of the course is project-based enabling students to apply the concepts studied in the course.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 3900.03, MECH 3020.03

EXCLUSION: BIOE 4312.03

### **MECH 4450.03: Marine Craft Design and Construction.**

This class deals with design and construction methods for marine craft. Each student completes a preliminary design of a small marine vessel. Topics include: engineering and economic principles governing selection of dimensions and coefficients for marine craft, computer-aided design, design and generation of hull forms, performance and operability in the ocean environment, construction methods for glass-fibre, wood, aluminum and steel marine craft, and structural analysis and design.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: MECH 4440.03 or instructor's consent

**MECH 4500.03: Vibrations.**

Single and multiple degree of freedom lumped parameter systems subjected to harmonic and transient excitation are examined. Analytical as well as numerical solutions are covered. Vibrations of continuous systems such as beams and shafts are introduced. Laboratory experiments deal with vibration of lumped parameter physical models as well as vibrations of rotating machinery. Vibration control in industrial applications is emphasized and the effects of whole body vibration on humans is treated as a safety issue.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 3500.03, MECH 3900.03

**MECH 4510.03: Mechanics of Composite Materials.**

The class introduces classification of composite materials, fabrication processes and applications of composites; the basic relations of elasticity of anisotropic materials, and the macro- and micromechanical modeling of composites. The elastic behaviour of laminated and fibre-reinforced composites is studied; the effective moduli theory and the strength of composite materials are considered. Smart composite structures and their constituents are introduced.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 3010.03 and MECH 4300.03

CROSS-LISTING: MECH 6530.03

**MECH 4521.03: Applied Dynamics.**

This class begins with a review of planar kinematics and kinetics of rigid bodies. These concepts are extended to kinematics and kinetics of rigid bodies undergoing general three dimensional motion. Euler's Equations are applied to a wide range of engineering problems including vehicular and gyroscopic dynamics. Energy methods for bodies undergoing three dimensional motion are applied to multi-degree-of-freedom systems. Single-degree-of-freedom systems subjected to random and shock inputs are analyzed.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

CROSS-LISTING: MECH 6521.03

**MECH 4540.03: Aerodynamics.**

The class deals with the fundamentals of aerodynamics and the theory of flight. Material covered includes: the standard atmosphere; airfoil coefficients and section properties; finite wings and induced drag; airplane performance - power required, rate of climb, range and endurance; basics of stability and control.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 3300.03 or MECH 3305.03

**MECH 4560.03: Space Systems.**

This class deals with the engineering design and analysis of space systems and their interrelationships. Topics include orbital mechanics, satellite perturbations, satellite actuator and sensor systems, satellite access and coverage.

FORMAT: Lecture 3 hours, tutorial 2 hours

PREREQUISITE: MECH 3900.03

CROSS-LISTING: MECH 6560.03

**MECH 4600.03: Engineering Measurements.**

The static and dynamic characteristics of first and second order transducers and measurement systems are examined. The experimental versus theoretical approach to engineering problems is studied. Topics include data acquisition, analysis, and presentation, including the probabilistic nature of engineering measurements. The class is laboratory intensive covering measurements of force, strain, temperature, pressure, velocity, and fluid flow. Computers are used extensively in the laboratory experiments.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: ENGM 2032.03

**MECH 4631.03: CAD/CAM - Computer Aided Design/Computer Aided Manufacturing.**

The student is introduced to the concept of automation with application to design, production, and manufacturing systems. The use of digital computers is considered in design, including peripheral equipment and types of languages. Other topics include numerical control manufacturing systems such as Direct Numerical Control (DNC), Computer Numerical Control (CNC), Adaptive Control and Industrial Robots. Due to the diverse nature of the class content, various personnel from both the academic and industrial community aid in the class presentation.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: MECH 3020.03

**MECH 4638.03: Computer Aided Tolerancing and Dimensioning.**

This class deals with dimensioning and mechanical tolerances to international standards - key factors in quality production. Topics covered include: review of basic manufacturing processes and tools, fundamental dimensioning and tolerances techniques, working and assembly drawings, CAD/CAM drawings for computer numerical control, geometric and positional tolerancing, quantity production, parts assembly, quality control and application of statistical and probabilistic methods. Biweekly assignments requires use of Auto-CAD, interactive computer programs for geometrical dimensioning/tolerancing, and a Coordinate Measuring Machine (CCM).

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: MECH 3010.03, MECH 3020.03

**MECH 4640.03: Robotics.**

The prime objective of the class is to provide a survey of the state-of-the-art in robotics. A large portion of the class is focused on the robot hardware. However, robotics in an inherently interdisciplinary field and the class will also involve robotics control and application. Topics covered include kinematics and dynamics of the robot arm and gripper, drives, robot position measuring systems, external sensors and feeding, storage, changing position and clamping devices, all of which, together with the robot itself, constitute a "robotized" workplace.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 3500.03, MECH 3900.03

CROSS-LISTING: BIOE 4011.03

**MECH 4650.03: Biomechanical Engineering.**

Engineering analysis of biological systems provides novel insight into evolutionary design of animals and plants and into the intelligent design of medical devices. This class examines the structure and function of the cardiovascular, pulmonary, and musculoskeletal systems using tools from solid and fluid mechanics. Topics include the heart as a pump, blood flow, arterial pulse propagation, the mechanics of breathing lung elasticity, muscle contraction, tissue mechanics, basic skeletal design, locomotion, and engineering of surgical implants.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

**MECH 4652.03: Kinematics of Human Motion.**

The science of biomechanics is based on mechanical models and biological experiments. Students will explore the application of classical mechanics to the analysis of human motion related to athletics, orthopaedics, and rehabilitation. Emphasis is also placed on numerous experimental facts collected from the biomechanical research literature. Topics include kinematic geometry of a single body, the description of joint configuration, and differential kinematics of biokinematic chains. Three-dimensional kinematics of individual joints (i.e., the knee, hip and elbow) is emphasized from the perspective of total joint replacement design.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

**MECH 4660.03: Finite Element Method in Mechanical Design.**

Class deals with the application of the finite element method to stress analysis problems encountered in mechanical design. Introduction to the finite element method is followed by the necessary relationships from linear elasticity, beam and plate theory. Various categories of structural elements are discussed in order of increasing complexity. Stresses in one- and two-dimensional trusses, beams, axisymmetric solids, and plates are considered. Finite element program is introduced and used in the class assignments.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: ENGI 2200.03 or ENGI 1202.03, ENGM 3352.03 or ENGM 3356.03

CROSS-LISTING: MECH 6660.03

**MECH 4805.03: Thermo-Fluid Engineering III.**

This class builds on the thermodynamics concepts presented in Thermo-Fluid Engineering I. Introductory concepts of cycles, processes, heat and work are reviewed. The first and second law of thermodynamics are applied to open and closed systems, both steady-state and transient processes. Availability and exergy analysis are presented. Vapour and gas power and refrigeration cycles are studied; absorption refrigeration cycles and refrigerants are also discussed.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: MECH 3705.03, MECH 3305.03, MECH 3805.03

**MECH 4810.03: Energy Conversion Systems.**

Application of basic principles of thermodynamics, fluid mechanics and heat transfer to the analysis and synthesis of energy conversion systems are studied. Primary energy sources and global energy demand are examined. Principles of conventional methods, thermal systems, fuel types, combustors, and gas turbines, initial planning of a hydroelectric power plant, selection of turbines and other components, nuclear fission and fusion, clean energy production, and environmental aspects of energy production are covered.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: MECH 3300.03 or MECH 3305.03, MECH 3700.03 or MECH 3705.03, MECH 3800.03 or MECH 3805.03, ENGI 2103.03 or ENGI 2300.03

**MECH 4820.03: Energy from Renewable Resources.**

This class concentrates on the theoretical and practical aspects of solar, wind, tidal and wave sources of energy with particular emphasis on their availability and use in the Atlantic Provinces. Design feasibility studies are undertaken on particular aspects of energy conversion from these sources. The impact of the environment on consumption of conventional energy forms is investigated. The nature and magnitude of energy consumption world-wide and locally is considered.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 3700.03 or MECH 3705.03

**MECH 4830.03: Reciprocating Internal-Combustion Engines.**

The major topics of this class are basic engine types, test methods and pressure measurements, combustion, ideal cycles and model processes, equilibrium charts, fuel specifications and tests, engine knock, exhaust analysis, fuel systems, ignition systems, engine performance and supercharger matching. Hands-on laboratory work is an integral part of this class.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: MECH 3800.03 or MECH 3805.03

**MECH 4840.03: Steam Plant Engineering.**

This class aims to provide basic fundamental and practical information to engineering students to design and operate thermal power plants. The following topics are covered: classification of steam generators; comparison of water tube and fire tube boilers; energy sources: nuclear and fossil fuel; fuels and combustion; thermal analysis of furnaces, superheaters, economizers, and air pre-heaters; boiler efficiency calculations; description of different types of heat exchangers; evaporators and condensers; steam generation systems: Pulverized, Cyclone, Fluidized beds; auxiliary equipment (fans, stacks); control system; cooling system design; environmental considerations.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: ENGI 2102.03 or ENGI 2800.03

**MECH 4851.03: Heating, Ventilating and Air Conditioning.**

This is an introduction to the design of thermal systems for indoor climate control. The major topics include: human comfort requirements, outdoor climate variables, heating and dehumidification loads, cooling and dehumidification loads, ventilation requirements and criteria, central system types and selection, energy sources and costs, piping, pumps, ducts, fans, and control systems. Computer programs will be introduced for design calculations involving heating and cooling load, piping, ducting and energy consumption.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 3305.03 or MECH 3800.03

**MECH 4880.03: Introduction to Nuclear Engineering.**

The purpose of this course is to introduce the concepts of nuclear engineering and the resulting applications. The subjects that will be discussed are the fundamentals of particle physics: proton, neutron, electron, photon and neutrino, and the atomic model; radioactivity and radiation detection, protection and shielding; principle of nuclear energetic: fission and fusion; nuclear reactor kinetics and control; nuclear reactor design and cooling; nuclear propulsion, nuclear waste disposal.

FORMAT: Lecture 3 hours, tutorial 2 hours

PREREQUISITE: MECH 3700.03 or MECH 3705.03, MECH 3800.03 or MECH 3805.03

**MECH 4900.03: Systems II.**

Response characteristics of open loop and feedback control systems are studied. Various controller types and their uses are analyzed. Techniques such as root-locus diagrams and Bode & Nichols plots are used for stability and performance evaluation. Digital simulations and experiments on computer-based control systems are done in the laboratory portion.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 3900.03

**MECH 4910.03: Fluid Power.**

This is an introductory course to fluid power systems covering the principles of power hydraulics, hydraulic fluids, hydraulic actuators and power generation transducers. The concept of pressure controls, volume controls and directional controls is also covered, including an introduction to electro-hydraulic servos and the design of basic open and closed-center circuits. The time domain analysis of feedback systems is introduced. The student is introduced to the design and compensation of systems using both s-plane and time domain methods. Other topics include simulation and analysis of control systems using graphics terminal computer facilities.

FORMAT: Lecture 3 hours, lab 3 hours

**MECH 4950.03: Advanced Control Engineering.**

The class develops the students' capabilities in system simulation and feed forward/feedback control-system design and implementation. Topics include: system-parameter identification, control-system hardware, computer-based control systems, design techniques for multiple-input multiple-output systems, and adaptive control. The class is supported by computer-based simulation activities and design procedures, and by hands-on laboratory experience.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: MECH 3900.03

CROSS-LISTING: MECH 6950.03

**MECH 4960.03: Computational Methods in Engineering.**

The class presents basic computer methods of application of mathematical tools to solve engineering problems. Numerical methods such as finite differences, series expansions, and numerical integration are introduced. Numerical solutions of ordinary and partial differential equations with applications to equilibrium, eigenvalue and propagation problems in engineering are considered. Application of mathematical libraries, X-window system and the software tools associated with the Unix system are included.

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: ENGM 3356.03 or ENGM 3361.03

CROSS-LISTING: MECH 6960.03

Jones, D. S., Dip. Eng (MUN), BEng (TUNS), MBA (Western), PhD (TUNS)

## I. Introduction

The Mineral Resource Engineering Program concentrates on the technical, environmental and economic aspects of the extraction and processing of the Earth's mineral resources. Students can pursue options in mineral resource engineering, petroleum engineering and mineral processing.

The main employers for Mineral Resource Engineering graduates are the mineral resource industries, oil and gas industries, financial and government institutions, consulting companies, mining equipment manufacturers and dealerships, marketing mine service companies, mineral investment and financial institutions, and research and teaching institutions. The development of an analytical attitude, team work and communication skills are important aims of the Mineral Resource Engineering Program. Participation in field trips to mining and petroleum operations in the Maritime region is a degree requirement and each student is required to share costs.

Opportunity also exists to continue in the MSc, MEng, and PhD programs for those who would like to specialize in areas of Mineral Extraction, Mineral Processing and Petroleum Engineering at Dalhousie.

## II. Curriculum and class descriptions

Refer to sections IIB and IIIB, Mineral Resource Engineering Programs, in the Civil and Resource Engineering section of this calendar, page 350.

Pegg, M. J., BSc, PhD (Leeds), PEng

## Professors Emeriti

Ackman, R. G., BA (Toronto), MSc (Dalhousie), DIC (Imperial Coll.), PhD (London), LLD (Hon) (Dalhousie)  
Caley, W. F., BSc (Eng), MSc (Eng) (Queen's), PhD (Toronto), PEng  
Chen, B. H., BSc (Nat. Taiwan), MEng, PhD (McGill), PEng  
Hancock, H. A., BASc, MASc, PhD (Toronto), PEng  
McMillan, A. F., BSc, MSc (Queen's), PhD (MIT), PEng

## Professors

Amyotte, P. R., BEng (RMC), MSc (Eng) (Queen's), PhD (TUNS), PEng (Co-op Advisor, Chemical Engineering)  
Ben Abdallah, N., BSc (Texas, A&M), MASc, PhD (UBC), PEng (Undergraduate Program Co-ordinator, Environmental Engineering)  
Bishop, D. P., MASc, PhD (TUNS), PEng (Coop Advisor, Materials Engineering)  
Corbin, S. C., MASc (TUNS), PhD (McMaster), PEng  
Ghaly, A. E., BScEng, MScEng (Alex), PhD (McGill), PEng  
Gill, T. A., BSc, MSc (Guelph), PhD (UBC)  
Kipourous, G. J., DipEng (Athens), MASc, PhD (Toronto), PEng (Co-ordinator, Graduate Programs)  
Paulson, A. T., BSc (Agr), MSc, PhD (UBC)  
Pegg, M. J., BSc, PhD (Leeds), PEng  
Plucknett, K. P., BSc, PhD (Warwick)  
Speers, R. A., BSc (Agr), MSc, PhD (UBC)  
Truelstrup Hansen, L., Cand. brom., PhD (Royal Vet Agr Univ Denmark) (Undergraduate Program Co-ordinator, Food Science)  
Watts, K. C., BSA, MSc (Guelph), PhD (Wat), PEng (Co-op Advisor, Biological and Environmental Engineering)  
Yemenidjian, N. B., BEng, PhD (Concordia), PEng

## Associate Professors

Budge, S. M., BSc (Acadia), PhD (MUN) (Undergraduate Program Co-ordinator, Food Science)  
Brooks, S. L., BTech (Massey), PhD (Cambridge)  
Farhat, Z., BASc, MASc, PhD (Windsor), PEng (Undergraduate Program Co-ordinator, Materials Engineering)  
Ghanem, A., BSc, Eng (UNB), PhD (Cornell), PEng  
Jamieson, R., BEng (TUNS), MASc (Dalhousie), PhD (Guelph), PEng  
Kuzak, S. G., BEng, MEng (McGill), PhD (TUNS), PEng  
Mazzanti, G., BSc (U de America), MSc, PhD (Guelph)

## Assistant Professors

Donaldson, A., BASc, MASc, PhD (Ottawa)  
Gibson, M., BA (Sheffield Hallam), MSc, PhD (Strathclyde)  
Gordon, R., BSc, MSc (McGill), PhD (Guelph, PEng, PAg)  
Haelssig, J., BASc, PhD (Ottawa)  
Jarjoura, G., BEng (TUNS), MASc, PhD (Dalhousie)

## Adjunct Professors

Al Taweel, A. M., BSc (Alexandria), MSc, PhD (Colorado), PEng  
 Gordon, R., BSc, MSc (McGill), PhD (Guelph), PEng, PAg  
 Khan, F., BSc Engg (Aligarh Muslim U), ME (U of Rorokes), PhD (Pondicerry U)  
 Madani, A., BSc (Pahlavi U, Iran), MSC (UBC), PhD (Washington State U)  
 Miadonye, A., BSc (U of Southbank UK), PhD (Loughborough Univ UK)  
 Pink, D. A. H., BSc (Hons) (St. FX), PhD (UBC)  
 Yildiz, I., BSc, MSc, MSME, PhD (OSU)

## Adjunct Associate Professors

Kalmokoff, M., BSc (Guelph), MSc (Saskatchewan), PhD (Queen's)  
 Rupasinghe, V., BSc (Peradeniya, Sri Lanka), MSc (Iowa State), PhD (Guelph)

## Adjunct Assistant Professors

Bezanson, G., BSc (Mt. A), MSc (Dalhousie), PhD (Carlton)  
 Blouin, S., BAsC (Laval), MASc (Ecole Polytechnique), PhD (Queen's)  
 Gillis, M., BSc, MSc (UNB), PhD (U of Saskatoon)  
 Lake, J., BSc, PhD (Dalhousie)  
 Patterson, R. N., BSc (RMC), BAsC (Toronto), MASc (TUNS), PhD (Dalhousie)  
 Price, G., BSc (UBC), MSc, PhD (Guelph)  
 Ripley, R., BAsC, MASc, PhD (Waterloo)

## I. Introduction

The Department of Process Engineering and Applied Science prepares students for professional careers in a wide range of fields related to the process industries. Process science and engineering is concerned with the development of new materials and processes to meet the specific needs to develop a given product. A process engineer could be working in research and development on the creation of added-value products or in an industrial setting on modification and optimization of existing processes, systems and process equipment to improve their safety, quality, cost effectiveness with special attention to environmental protection and sustainability.

Process Engineering graduates are actively being employed in the bioprocess industry (food, fiber, pharmaceutical, ...), materials process industry (metals, ceramics, composites, ...), petrochemical process industry (oil, gas, plastics, ...), energy engineering (energy efficiency, renewable sources ...), and several others.

The Department of Process Engineering and Applied Science currently offers three undergraduate professional degree programs to meet the needs of the increasing types and numbers of process industries. These degree programs are:

1. BEng in Chemical Engineering, co-op and non co-op programs
2. BEng in Environmental Engineering, co-op and non co-op programs
3. BEng in Materials Engineering, co-op and non co-op programs.

For a description of each of the above programs, admission requirements and more information on the opportunities for employment, refer to individual program listings in the Faculty of Engineering section of this calendar.

Opportunities exist within the Department for graduate studies and research leading to the master and doctorate degrees. Consult the Graduate Calendar, Dalhousie University for more details on these graduate programs.

## II. Program Guides

### A. Chemical Engineering

Chemical Engineering offers two versions of the BEng Program:

1. Co-op Program
2. Non Co-op Program

## Co-op Program

Sequencing			
Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	Free
2	Study Term 3	Study Term 4	Free
3	Work Term 1	Study Term 5	Work Term 2
4	Study Term 6	Work Term 3	Work Term 4
5	Study Term 7	Study Term 8	

Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

### Year 3, Work Term 1 (Fall)

#### Year 3, Term 5 (Winter)

- IENG 2005.03 Engineering Economics
- CHEE 3522.03 Mechanical Unit Operations
- CHEE 3525.03 Separation Processes
- CHEE 3544.03 Computer-Aided Process Design
- PEAS 3500.03 Process Thermodynamics

### Year 3, Work Term 2 (Summer)

#### Year 4, Term 6 (Fall)

- CHEE 3601.03 Thermal Unit Operations
- CHEE 3634.03 Chemical Reaction Engineering
- ENGM 3052.03 Applied Numerical Methods
- MATL 3500.03 Materials Engineering
- PEAS 3600.03 Transport Phenomena
- PEAS 3700.03 Law & Ethics in Engineering

### Year 4, Work Term 3 (Winter)

#### Year 4, Work Term 4 (Summer)

#### Year 5, Term 7 (Fall)

- CHEE 4704.03 Separation Processes II
- CHEE 4702.03 Unit Operations Lab I
- CHEE 4741.03 Process and Plant Design I
- CHEE 4773.03 Industrial Safety & Loss Management
- CHEE 4803.03 Process Dynamics & Control
- Technical elective I

#### Year 5, Term 8 (Winter)

- CHEE 4802.03 Unit Operations II
- CHEE 4803.03 Oil and Gas Processing
- CHEE 4842.03 Process and Plant Design II
- MATL 4840.03 Corrosion and Degradation of Materials
- Technical Elective II
- Technical Election III

#### Technical Electives

This list is not exhaustive, nor does it imply that each class will be offered every year. Students should check with the Undergraduate Program Co-ordinator.

- BIOE 4312.03 Microcomputer Interfacing
- BIOE 4391.03 Polymeric Biomaterials
- CHEE 4760.03 Fundamentals of Combustion
- CHEE 4854.03 Computer Process Control
- CIVL 4440.03 Water and Wastewater Treatment
- ENVE 4411.03 Indoor Environment Control and Air Quality
- ENVE 4612.03 Waste Disposal and Utilization
- ENVE 4651.03 Solar Energy Utilization
- ENVE 4772.03 Environmental Assessment and Management
- FOSC 4081.03 Brewing Science
- IENG 4529.03 Industrial and Organizational Psychology
- IENG 4547.03 Company Operations and Management
- IENG 4558.03 Project Management and Control

- IENG 4574.03 Decision and Risk Analysis
- MATL 4703.03 Non-Metallic Materials
- MECH 4820.03 Energy from Renewable Resources
- MECH 4840.03 Steam Plant Engineering

There are also a number of graduate classes that students have taken, mainly in Chemical Engineering, Biomedical Engineering, and Petroleum Engineering.

Notes:

1. Seniors may take a postgraduate class as a Technical elective with the approval of the Undergraduate Program Coordinator and the professor offering the class.
2. Not all technical electives are available each year and other elective classes may be available. Please check with the department prior to registration.

### Non Co-op Program

Sequencing			
Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	Free
2	Study Term 3	Study Term 4	Free
3	Study Term 6	Study Term 5	Free
4	Study Term 7	Study Term 8	
Non co-op students take the same academic program as the co-op students; however, Term 6 may be taken before Term 5 if desired. In this way, the program can be done in a total of four years.			

## B. Environmental Engineering

Environmental Engineering offers two versions of the BEng Program:

1. Co-op Program
2. Non Co-op Program

### Co-op Program

Sequencing			
Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	Free
2	Study Term 3	Study Term 4	Free
3	Work Term 1	Study Term 5	Work Term 2
4	Study Term 6	Work Term 3	Work Term 4
5	Study Term 7	Study Term 8	
Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.			

During their senior year, Environmental Engineering students can specialize in one or more of the following areas: Air Quality and Pollution Control, Energy and the Environment, Soil and Water Quality and Management, and Waste Utilization and Management.

Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.

### Year 3, Work Term 1 (Fall)

#### Year 3 - Term 5 (Winter)

- CHEE 3522.03 Mechanical Unit Operations
- ENVE 3500.03 Air Quality
- ENVE 3251.03 Environmental & Industrial Microbiology
- IENG 2005.03 Engineering Economics
- MINE 2200.03 Geology for Engineers
- PEAS 3500.03 Process Thermodynamics

### Year 3, Work Term 2 (Summer)

#### Year 4, Term 6 (Fall)

- CIVL 3101.03 Soil Mechanics
- CIVL 3830.03 Applied Geomatics
- ENGM 3052.03 Applied Numerical Methods
- ENVE 3412.03 Energy and Environment
- ENVE 3452.03 Soil and Water Engineering
- PEAS 3600.03 Transport Phenomena

### Year 4, Work Term 3 (Winter)

#### Year 4, Work Term 4 (Summer)

#### Year 5, Term 7 (Fall)

- CHEE 4773.03 Industrial Safety & Loss Management
- CIVL 4440.03 Water & Wastewater Treatment
- ENVE 4401.03 Design Project for Environmental Engineering I
- ENVE 4772.03 Environmental Assessment & Management
- PEAS 3700.03 Law & Ethics in Process Engineering
- Technical Elective

#### Year 5, Term 8 (Winter)

- CHEE 4872.03 Air Pollution Control
- CIVL 4410.03 Engineering Hydrogeology
- ENVE 3432.03 Waste Management
- ENVE 4402.03 Design Project for Environmental Engineering II
- Technical Elective

### Environmental Engineering—Recommended Technical Electives

- BIOE 4342.03 Industrial Biotechnology
- CIVL 4460.03 Solid Waste Management and Landfill Design
- ENVE 4000.03 Small Watershed Hydrology
- ENVE 4411.03 Indoor Environmental Control and Air Quality
- ENVE 4421.03 Biogeochemistry and Bioremediation
- ENVE 4612.03 Waste Disposal and Utilization
- ENVE 4641.03 Contaminant Fate & Transport
- ENVE 4651.03 Solar Energy Utilization
- ENGM 4675.03 Risk Assessment & Management **OR**
- IENG 4574.03 Decision and Risk Analysis
- ERTS 3402.03 Practical Hydrogeology
- IENG 4547.03 Company Operations & Management
- IENG 4558.03 Project Management and Control
- MINE 4815.03 Mining and the Environment
- MINE 4818.03 Mine Waste Management

Notes:

1. Technical classes from other departments may be selected subject to availability and the approval by the departments concerned.
2. Technical electives in any one year will depend on demand and staff availability.

### Non Co-op Program.

Sequencing			
Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	Free
2	Study Term 3	Study Term 4	Free
3	Study Term 6	Study Term 5	Free
4	Study Term 7	Study Term 8	
Non co-op students take the same academic program as the co-op students; however, Term 6 may be taken before Term 5 if desired. In this way, the program can be done in a total of four years.			

## C. Materials Engineering

Materials Engineering offers two versions of the BEng Program:

1. Co-op Program
2. Non Co-op Program

## Co-op Program

Sequencing			
Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	Free
2	Study Term 3	Study Term 4	Free

5	Study Term 7	Study Term 8	
Years 1 and 2 follow the core program outlined in the Engineering section of this calendar.			

### Year 3, Work Term 1 (Fall)

### Year 3, Term 5 (Winter)

- IENG 2005.03 Engineering Economics
- MATL 3500.03 Materials Engineering
- MATL 3510.03 Extraction of Materials
- MATL 3520.03 Structure of Materials
- PEAS 3500.03 Process Thermodynamics

### Year 3, Work Term 2 (Summer)

### Year 4, Term 6 (Fall)

- ENGM 3052.03 Applied Numerical Methods
- MATL 3600.03 Mechanical & Physical Behavior of Materials
- MINE 3530.03 Mineral Processing
- PEAS 3600.03 Transport Phenomena
- PEAS 3700.03 Law and Ethics in Process Engineering
- Technical Elective I

### Year 4, Work Term 3 (Winter)

### Year 4, Work Term 4 (Summer)

### Year 5, Term 7 (Fall)

- CHEE 3634.03 Chemical Reaction Engineering
- CHEE 4773.03 Industrial Safety & Loss Management
- MATL 4700.03 Materials Design Project I
- MATL 4710.03 Ferrous Alloys & Joining of Materials
- MATL 4720.03 Industrial Processing of Materials
- Technical elective II
- Graduate Class I (for combined BEng/MASc Students Only)

### Year 5, Term 8 (Winter)

- MATL 4800.03 Materials Design Project II
- MATL 4810.03 Materials Process Design
- MATL 4820.03 Non-Metallic Materials
- MATL 4830.03 Non-Ferrous Alloys
- MATL 4840.03 Corrosion and Degradation of Materials
- Technical Election III
- Graduate Class II (for combined BEng/MASc Students Only)

### Year 5, Term 9 (Summer) (for combined BEng/MASc; Optional for BEng)

- Technical Elective I
- Technical Elective II
- Technical Elective III
- Graduate Class III (for combined BEng/MASc Students Only)

## Non Co-op Program

Sequencing			
Year	Fall	Winter	Summer
1	Study Term 1	Study Term 2	Free
2	Study Term 3	Study Term 4	Free
3	Study Term 6	Study Term 5	Free
4	Study Term 7	Study Term 8	
Non co-op students take the same academic program as the co-op students; however, Term 6 may be taken before Term 5 if desired. In this way, the program can be done in a total of four years.			

## Combined BEng - MASc Program Guide

### 1. Program Entrance Requirements

To be eligible to enter the Combined BEng/MASc Program, a student must be able to demonstrate an overall average of 70% based on the subjects in the first three academic terms of the Materials Engineering Program.

Since the first two academic terms of the BEng and combined BEng/MASc Programs are common, students enrolled in the BEng Program may apply for entrance into the combined degree program at any time before the beginning of the seventh academic term.

### 2. Financial Support

All students accepted into the BEng/MASc Program will be eligible for financial assistance beginning at the start of the seventh academic term. The assistance will be spread over the remainder of the academic terms and may have a total value of approximately \$15,000.

Part of the financial assistance is derived from money obtained to further specific research objectives on which the student is expected to work for his or her Master's Thesis. The remainder of the financial support is normally derived from assigned duties as Part-Time Teaching Assistants. A class work Master's Program (MEng) can be followed but the amount of financial assistance will be considerably reduced.

### 3. Maintenance of Standing

In order to retain standing in the Combined BEng/MASc Program, students must continue to maintain an academic average of B-. Failing this, a student may obtain a BEng Degree only by completing the required classes, but will not be eligible for further financial assistance from the Department. However, on graduation should the student attain an average of B, he/she may be eligible to pursue graduate studies in the department.

### 4. Scholarships

Students in the Combined BEng/MASc Program are encouraged to apply for the usual scholarships and bursaries in order to partially augment the financial support received. Contact the Department for details.

### 5. Combined BEng/MASc Scheduling

The combined BEng/MASc Degree follows the program as indicated for the BEng with the addition of two academic terms as follows:

### Year 6, Term 10 (Fall)

- Graduate Class IV
- Thesis

### Year 6, Term 11 (Winter)

- Thesis

### 6. Technical Electives

Choose 3:

- MECH 4330.03 Mechanical Design
- MATL 4805.03 Electrochemical Processing of Materials
- MATL 4806.03 Particulates in Materials Engineering

- MATL 4813.03 Iron and Steel Production
- MATL 4825.03 Solidification and Casting
- MATL 4826.03 Physical Metallurgy and Ceramics
- MINE 4830.03 Advanced Mineral Processing

Technical electives from other departments may be selected subject to availability and the approval by the departments concerned.

Not all technical electives will be offered every year.

#### D. Minor in Food Science for BSc Major or Honours

The Minor in Food Science is available to students registered in the BSc 20 credit major and honours programs. The requirements are as for the appropriate program with the completion of the following classes to fulfill the Food Science Minor:

- FOSC 1000 Concepts in Food Science
- Eight classes from the following list:
  - BIOE 3051.03 Principles of Food Engineering
  - BIOE 3241.03 Industrial Biotechnology
  - BIOL 3226.03 Plants and Civilization
  - CPST 2000.03 Technical Communication
  - CPST 3030.03 Engineering in Society II
  - ENVE 3000.03 Fundamentals of Environmental Engineering
  - FOSC 2010.03 Food Commodities
  - FOSC 3010.03 Food Chemistry
  - FOSC 3020.03 Food Analysis
  - FOSC 3030.03 Food Quality Assurance
  - FOSC 3070.03 Food Processing
  - FOSC 3080.03 Food Microbiology
  - FOSC 4020.03 Chemistry - Fats, Oils, Lipids
  - FOSC 4030.03 Food Product Development
  - FOSC 4081.03 Brewing Science
  - FOSC 4091.03 Food Safety and Biotechnology
  - FOSC 4500.03 Seminar in Food Science
  - FOSC 4250.03 Food Product Development Project
  - HPRO 2250.03 Human Nutrition

### III. Class Descriptions

#### A. Biological Engineering Series

##### BIOE 3051.03: Principles of Food Engineering.

This class presents principles of engineering and applications to food processing unit operations. This class is intended for primarily food science majors, and other non-engineering students. Topics covered are units and dimensions, unit operations in food processing, material balance, thermodynamics and energy balance, fluid flow, heat transfer, and mass transfer.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: MATH 1280.03 and 1290.03, or ENGM 1011.03 and 1012.03, PHYC 1300X/Y.06

##### BIOE 4341.03: Food Science for Engineers.

This class introduces the fundamental chemical, nutritional and microbiological aspects of food processing. Emphasis is placed on food quality, deterioration and principles of its preservation. Topics covered include: constituents of food (properties, significance, and nutritive aspects); factors related to quality and deterioration; fats and oils; food additives; and the requirements for food preservation, packaging and storage.

FORMAT: Lecture 2 hours, lab 3 hours

PREREQUISITE: BIOE 3251.03

##### BIOE 4342.03: Industrial Biotechnology.

This class introduces students to industrial applications of biotechnology. Basic biochemistry and molecular biology are covered in addition to stoichiometry and kinetics for bioprocesses. Modern tools and approaches of biotechnology are presented, followed by application of biotechnology to diverse areas (e.g. the environment, medicine, agriculture, pharmaceutical and food processing industries). This class is suitable for engineering/science students who may wish to pursue employment in the biotechnology sector with little/no prior knowledge of biotechnology or genetic engineering.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: CHEM 2441.03

EXCLUSION: BIOE 3241.03, BIOE 3342.03

##### BIOE 4351.03: Bioprocess Engineering.

This class focuses on the process design of unit operations involved in bioprocessing. Topics include fluid flow and mixing, transport phenomena in bioprocess systems, design and analysis of biological reactors, and bioseparation processes. Examples encompass various areas of bioprocessing. Simulation of a bioprocess is demonstrated using a software package.

FORMAT: Lecture 3 hours, lab 2 hours

##### BIOE 4352.03: Food Engineering.

This class focuses on the process design of unit operations in food processing, preservation, packaging and storage. Topics include mass and energy balances, reaction kinetics modelling, size reduction, emulsification, food dehydration, packaging and storage, extrusion processes, freezing and thawing, evaporation and freeze concentration, crystallization, thermal process calculations and microwave heating. As a term project, a food process is simulated using a software package.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: BIOE 3252.03 or equivalent

##### BIOE 4391.03: Polymeric Biomaterials.

his class provides an introduction to the characterization, fabrication and use of synthetic and naturally-derived polymeric materials to replace or regenerate tissues and organs in the human body. Classes will include a discussion of natural and synthetic macromolecular structure, properties (chemical, physical, mechanical), synthesis, and interactions with the human body. The design and application of polymeric materials in tissues engineering, drug delivery, and prosthetics will also be discussed using specific examples including: blood vessel replacement, artificial pancreas, skin substitutes, and nerve regeneration.

FORMAT: 3 lecture hours

PREREQUISITE: PHYC 1280.03/1290.03 and CHEM 1021.03 and CHEM 1022.03, or the equivalents

#### B. Chemical Engineering Series

##### CHEE 3522.03: Mechanical Unit Operations.

This class introduces the student to the principles and practices involved in contacting, conveying, separating and storing single and multiphase systems. It includes the flow of incompressible and compressible fluids in conduits and past immersed bodies, as well as the transportation, metering, and mixing of fluids.

Unit operations involved in the contacting and separation of phases, such as fluidization, sedimentation and centrifugation, are also studied.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: ENGI 2102.03, PEAS 2201.03

##### CHEE 3525.03: Separation Processes.

This class provides an introduction to cascade theory and develops fundamentals for design and analysis of staged operations such as leaching, liquid-liquid extraction and distillation. Topics include single-stage operations, multi-stage, counter-current cascade with and without reflux, and binary and multi-component distillation.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: ENGI 2102.03, PEAS 2201.03, ENGM 2101.03

##### CHEE 3530.03: Chemical Engineering Thermodynamics.

The class deals with theory and practice of chemical thermodynamics. A brief review is given of concepts in physical chemistry: partial molal quantities and vapour-liquid equilibria in ideal and non-ideal systems including miscible and partially miscible components. The class also deals with thermophysical properties of pure liquids, properties of solutions, and a comprehensive study of vapour-liquid equilibrium and equilibrium constants in chemical reactions.

FORMAT: Lecture 3 hours, lab 2 hours

##### CHEE 3544.03: Computer-Aided Process Design.

The class aims to develop the student's ability to solve process design problems using packaged software. Major emphasis is placed on how to translate a flow sheet into a suitable form for simulation and design. Other topics include relational data bases, and design of specific unit operations using both available software and student-developed programs.

FORMAT: Lecture 2 hours, lab 4 hours

PREREQUISITE: PEAS 2201.03, ENGM 1081.03

##### CHEE 3550.03: Process Dynamics and Control.

This class provides an introduction to control of chemical processes. The dynamics of behaviour of simple processes is analyzed through transfer functions

and means of determining the dynamic performance of feedback control systems are presented. An introduction to stability of control systems is made. Procedures for selecting and designing proportional, proportional-integral and proportional-integral-derivative controllers are discussed

FORMAT: Lecture 2 hours, lab 2 hours, tutorial 1 hour

### **CHEE 3601.03: Thermal Unit Operations**

In this class students will learn how to apply the fundamental concepts of momentum and energy transfer to the design of thermal processing unit operations. Examples include double pipe heat exchanger, shell and tube heat exchanger, plate heat exchangers, air cooled heat exchangers, cooling towers, condensers, and boilers.

FORMAT: Lecture 3 hours/tutorial 2 hours

CO-REQUISITE: PEAS 3600.03

### **CHEE 3624.03: Heat Transfer.**

This class deals mainly with theories of heat transfer and their applications. The class includes heat transfer by steady and unsteady conduction in solids, convection heat transfer and an introduction to radiation heat transfer. Evaporation and design of heat exchangers are also discussed.

FORMAT: Lecture 3 hours, lab 2 hours

### **CHEE 3634.03: Chemical Reaction Engineering.**

This class introduces the subject of chemical reaction engineering. Classical reaction kinetics concerning rates, mechanisms, temperature effects and multiple reactions are studied. The concepts of batch, continuous stirred-tank and plug flow reactors are introduced for the ideal case. Non-isothermal reactors and non-ideal flow are considered in the design of chemical reactor systems. Heterogeneous reactors and catalysis are also discussed. Emphasis is placed on computational techniques for reactor problem solutions.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: PEAS 2201.03, CHEM 2441.03, ENGM 2022.03, ENGM2032.03

### **CHEE 4702.03: Unit Operations Lab 1.**

In this class, students will apply the principles of Unit Operations in the Laboratory using pilot scale equipment. An emphasis is placed on experimental, analysis and reporting.

FORMAT: Lecture 1 hour/lab 4 hours

PREREQUISITE: CHEE 3522.03, CHEE 3601.03, CHEE 3525.03, CHEE 3634.03, PEAS 3500.03

### **CHEE 4703.03: Process Dynamics and Control.**

This class deals with the control and mathematical modeling of chemical processes. The dynamics of behaviour of processes is analyzed through transfer functions and means of determining the dynamic performance of feedback control systems are presented. Stability and Root Locus Analysis and design considerations, and multivariable systems are covered.

PREREQUISITE: ENGM 2022.03, CHEE 3544.03

### **CHEE 4704.03: Separation Processes II.**

In this class, students will learn how to apply the fundamental concepts of momentum, energy and mass transport to the design of unit operations designed for separations of chemical streams. This is intended as a continuation of CHEE 3525: Separation Processes. Unit operations including but not limited to absorption/desorption, adsorption, solvent extraction, drying, humidification/dehumidification, solvent extraction, leaching and ion exchange will be covered.

PREREQUISITE: PEAS 3600.03, CHEE 3525.03, PEAS 3500.03

### **CHEE 4720.03: Unit Operations Laboratory.**

In this class, students apply the principles of Unit Operations in the laboratory using pilot scale equipment. An emphasis is placed on experimental planning, analysis and reporting.

FORMAT: Lecture 1 hour, lab 4 hours

PREREQUISITE: CHEE 3522.03, CHEE 3525.03, CHEE 3530.03, CHEE 3624.03, CHEE 3634.03, CHEE 4726.03

### **CHEE 4726.03: Mass Transfer.**

Unit operations based on the theory of diffusional mass transfer are discussed. Emphasis is on engineering applications and the understanding of basic design theory. Topics include molecular and turbulent diffusion, interfacial mass transfer, simultaneous heat and mass transfer, and design of mass transfer equipment.

FORMAT: Lecture 3 hours, lab 2 hours

### **CHEE 4741.03: Process and Plant Design I.**

This class aims to develop the student's abilities in the synthesis of processing elements into an integrated plant that is capable of achieving a prescribed goal. Various design projects are undertaken to emphasize: process selection and economic evaluation, and detailed design of process equipment as well as optimization of processing subsystems such as distillation systems.

FORMAT: Lecture 2 hours, lab 4 hours

PREREQUISITE: ENGI 2203.03, CHEE 3522.03, CHEE 3525.03, CHEE 3544.03, MATL 3500.03, CHEE 3634.03, IENG 2005.03, CHEE 3601.03 or CHEE 3624.03,

### **CHEE 4752.03: Process Modelling, Simulation & Control.**

This class deals with formulation of mathematical models describing the dynamic behaviour of chemical processes. Numerical methods for analyzing the dynamic response of lumped parameter and distributed parameter systems on digital computers are presented. Frequency response techniques are used to analyze and design control systems. Design methods for control of processes with dead time, inverse response and those requiring control of more than one variable are discussed.

FORMAT: Lecture 2 hours, lab 2 hours, tutorial 1 hour

PREREQUISITE: CHEE 3550.03

### **CHEE 4760.03: Fundamentals of Combustion.**

This class is an introduction to the principles of combustion processes. The properties of premixed gas flames are examined. Diffusion flames and the burning of liquid and solid fuels are studied. Ignition phenomena and spontaneous combustion, with particular reference to safety in the chemical process industries, are examined.

FORMAT: Lecture 2 hours, lab 3 hours

### **CHEE 4772.03: Environmental Assessment and Management.**

This class examines the ecological impacts of human activities with regard to water, air and soil pollution. Ecological theory and practice are reviewed and methods of environmental regulation and management considered in the light of the concepts of sustainability and maintenance of biodiversity. Lectures will include presentations by government and corporate regulators and managers. Tutorials will be devoted to the preparation and presentation of hypothetical environmental impact statements and assessments.

FORMAT: Lecture 3 hours, tutorial 2 hours

CROSS-LISTING: ENVE 4772.03

### **CHEE 4773.03: Industrial Safety and Loss Management.**

Topics covered in this class include: history of health and safety; causes and effects of loss; policy development; loss control and health basics; emergency preparedness and standards; hazard identification; safe process design; inspection and investigation processes; measurement, evaluation and audits of OH&S program elements; legislation.

FORMAT: Lecture 3 hours, tutorial 2 hours

PREREQUISITE: CHEE 2420.03 or PEAS 2201.03; PEAS 3700.03

EXCLUSION: CHEE 6701.03

### **CHEE 4791.03: Research Project I.**

The class objective is to provide experience in the application of engineering principles to the solution of a specific problem in Chemical Engineering. A research project is chosen in collaboration with a particular faculty member. The student then prepares a work plan, carries out a literature search pertinent to the problem, designs and experimental setup, if needed, and arranges for the acquisition of necessary equipment. Interim and final progress reports are required in both written and oral formats.

FORMAT: Lecture 2 hours, lab 3 hours

### **CHEE 4802.03: Unit Operations Lab II.**

This class is a continuation of CHEE 4702.03 where additional Unit Operations experiments will be conducted, analyzed and reported.

FORMAT: Lecture 1 hour/lab 4 hours

PREREQUISITE: CHEE 4702.03

### **CHEE 4803.03: Oil and Gas Processing.**

This class provides an overview of the oil and gas industry as a whole, introducing the typical technologies, processes and unit operations. Topics covered include: natural gas recovery and purification; and the properties of bitumen, its recovery,

and subsequent refinement. Specific emphasis is placed on detailed design of unit operations for petroleum upgrading and the interrelation between processing steps for optimized petrochemical fuels production.

PREREQUISITE: CHEE 3601.03, CHEE 4701.03, CHEE 3634.03 or instructor approval

### **CHEE 4842.03: Process and Plant Design II.**

This class is a continuation of Process and Plant Design I, but emphasizes the synthesis of whole systems. Design projects cover process identification and selection, material and energy balance, system sensitivity to various parameters and preliminary process optimization, design and specification of processing units, plant layout, costing and economic evaluation.

FORMAT: Lecture 2 hours, lab 3 hours

PREREQUISITE: CHEE 4741.03

CO-REQUISITE: MATL 4840.03

### **CHEE 4854.03: Computer Process Control.**

This class deals with digital computer control of chemical processes. Methods for analyzing and designing control systems using z-transforms are covered.

Experience is provided in the use of currently popular control methods, such as model predictive control. An introduction is given for other advanced techniques, such as adaptive control, optimal control and stochastic control.

FORMAT: Lecture 2 hours, lab 3 hours

PREREQUISITE: CHEE 4752.03 or instructor's permission

### **CHEE 4856.03: Process Optimization.**

The class deals with the study and application of optimization techniques to engineering problems, with particular emphasis on chemical processes. Topics include analytical and numerical techniques for optimization of single and multi-dimensional problems, linear programming, nonlinear programming and dynamic programming. The class employs available computer software and student-developed programs to solve the problems.

FORMAT: Lecture 2 hours, lab 3 hours

### **CHEE 4862.03: Fundamentals of Combustion Engineering.**

In this class, the principles of combustion processes (studied in Fundamentals of Combustion) are applied to industrial applications. The properties of solid, liquid and gaseous fuels are discussed. Various burner systems and the importance of combustion aerodynamics in boilers, furnaces and kilns are studied. The method of determining boiler and furnace efficiency and an introduction to pollution control are presented.

FORMAT: Lecture 2 hours, lab 3 hours

PREREQUISITE: CHEE 4760.03

### **CHEE 4872.03: Air Pollution Control.**

This class deals with air pollution from the standpoint of its generation and control, measurement of pollutant concentrations, and dispersion calculations. Both gaseous and particulate matter emitted from combustion and industrial sources are considered. Other aspects of air pollution such as urban smog, acid rain and the greenhouse effect and possible remedial measures are also discussed.

FORMAT: Lecture 2 hours, tutorial 3 hours

### **CHEE 4892.03: Research Project II.**

This class is a continuation of Research Project I. The student conducts the planned research work, analyses the data obtained and critically evaluates the findings. Written and oral progress reports are required at mid-term. A written report and an oral presentation are required at the end of the term.

FORMAT: Lecture 2 hours, lab 3 hours

PREREQUISITE: CHEE 4791.03

## **C. Environmental Engineering Series**

### **ENVE 3251.03: Environmental and Industrial Microbiology.**

The principles of microbial communities are applied to biological systems. Emphasis is placed on microbial populations in air, soil and water. Further investigation includes microorganisms found in food, aquaculture and mining industries. Applications of microbial ecology to agriculture, industry, biotechnology and environment are examined.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: BIOL 1030.03

### **ENVE 3412.03: Energy and Environment.**

This class deals with energy sources and consumption in various systems. Energy conservation and utilization of renewable energy sources are emphasized.

Environmental impacts of energy development and consumption are examined. To acquire self study skills and develop oral and written communication skills, each student will undertake a term project in which the environmental impact of energy utilization and/or conservation in a particular system is examined. Students are expected to carry out a literature search on the subject. A written and an oral presentation are required.

FORMAT: Lecture 2 hours, lab 3 hours

PREREQUISITE: ENGI 2102.03

### **ENVE 3432.03: Waste Management.**

This class deals with sources of pollution and their effects on air, water, and soil qualities. The physical, chemical and biological treatment processes of various types of waste are discussed in relation to pollution control. Physical, chemical and microbiological analyses of various types of wastes are done in the laboratory periods. This class includes a term project, field trips, and seminars.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: ENVE 3251.03

### **ENVE 3452.03: Soil and Water Conservation Engineering.**

The prediction, nature, effects and control of natural surface and sub-surface waters and non-point source pollutants in catchments are considered. Design flood hydrograph, flood routing, porous media flow and soil erosion prediction techniques are presented. Energy dissipating structures used to control flood flows which are discussed include terraces, chutes, drop inlets, grassed waterways, culverts and small earth dams. An earth dam design project extends over the class duration.

FORMAT: Lecture 4 hours, lab 2 hours

PREREQUISITE: ENGI 2102.03

### **ENVE 3500.03: Air Quality.**

This class covers sources, the impact on health and the environment, atmospheric chemistry, fate and transport and the measurement and modeling of atmospheric pollutants. The application of regulatory computer models to air quality case studies will be demonstrated in laboratory classes. In addition, field and laboratory classes will provide hands on experience of measuring and characterizing air pollutants. Problem solving sessions are used to illustrate the application of meteorology, measurements and models to determine the sources and impact of air pollutants at various receptors found both outdoors and indoors.

FORMAT: Lecture 3 hours/lab 3 hours

PREREQUISITE: PEAS 2202.03

EXCLUSION: ENVE 4621.03

### **ENVE 4000.03: Small Watershed Hydrology.**

Following an overview of the nature of hydrologic data and models, emphasis is placed on deterministic mathematical modelling of component processes and the synthesis of complete hydrographs. Components examined include precipitation, infiltration, evapotranspiration, surface and subsurface flow. The structure and application of selected current models are presented.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: A first class in engineering hydrology and microcomputer experience

### **ENVE 4401.03: Design Project for Environmental Engineers I.**

The objective of the class is to provide students with first hand experience in applying engineering design principles, biogeochemical analyses and environmental assessment techniques to the solution of specific environmental problems related to air, soil and water pollution control. Students are expected to display a high level of initiative and ingenuity in carrying out the project.

FORMAT: Lecture 1 hour, lab 5 hours

PREREQUISITE: Senior students only

### **ENVE 4402.03: Design Project for Environmental Engineers II.**

This is a continuation of ENVE 4401 leading to a final presentation in both oral and written format.

FORMAT: Lecture 1 hour, lab 5 hours

PREREQUISITE: BIOE 4401.03

### ENVE 4411.03: Indoor Environment Control and Air Quality.

The class deals with the design of heating, ventilating and air conditioning systems for controlled environment facilities such as: animal housing, residential and commercial buildings. Indoor air quality for humans and animals is discussed in relation to current methods of environmental control and energy conservation in buildings. Completion of an assigned term project is a part of this class.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: PEAS 3600.03 or equivalent

### ENVE 4421.03: Biogeochemistry and Bioremediation.

Following an overview of fresh water and ocean geochemistry, the primary production and nutrient cycles in rivers, lakes and the ocean are studied. Oil spills, their impact on the ecosystem and remedial measures are investigated. Design and maintenance of wetlands as treatment systems are presented. The sources of environmental pollutants and the health, environmental, and socio-economic implication of pollutants are studied. The application of various bioremediation technologies to restore contaminated sites is discussed.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: BIOE 3251.03 and BIOE 3432.03

### ENVE 4612.03: Waste Disposal and Utilization.

The physical, chemical and biological properties of liquid and solid wastes are discussed and related to current handling and disposal methods. Solution to problems of pumping liquid waste, lagoon design and holding facilities are presented. Methods of land application of wastes are compared based on pollution problems and fertilizer issues. Technological advances of utilization of wastes for the production of compost, single cell protein, alcohol, fertilizer, biogas, and chemicals are discussed. The class includes a term project, field trips, and seminars.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: BIOE 3252.03 or equivalent

### ENVE 4621.03: Atmospheric Air Quality.

This course will cover fundamentals of air quality. Sources and characteristics of atmospheric pollutants will be introduced as well as methods for sampling/measuring air pollutants and atmospheric processes. The thermodynamics and fluid mechanics of the planetary boundary layer, and the behaviour of plumes, will be primary focus. Contaminant transformations in the atmosphere, as well as wet and dry deposition of pollutants, will be covered. Other topics will include computer models, standards/legislation and climate change.

FORMAT: Lectures 3 hours, lab 2 hours, tutorial 1 hour

PREREQUISITE: CHEM 2441.03 and ENGI 2103.03

### ENVE 4641.03: Contaminant Fate and Transport.

This course focuses on the quantitative analysis of mechanisms that control the fate and transport of contaminants in the environment. The occurrence, movement, and transformation of contaminants in a variety of environmental media, including surface waters, terrestrial environments, and the atmosphere are covered. A 3-d field lab will be held at the beginning of the semester, in which students will gain experience in: (i)sampling environmental media, and (ii)characterizing transport processes in terrestrial and aquatic environments.

FORMAT: Lecture

PREREQUISITE: ENVE 3452.03/CIVL 3310.03, PEAS 2202.03/CIVL 3450.03, ENGM 3052.03/CIVL 4720.03

### ENVE 4651.03: Solar Energy Utilization.

The objective of the class is to provide students with the principles for the design and performance analysis of active and passive solar heating systems. Topics covered include: estimation of solar radiation availability, analysis of solar collectors and sun spaces, sensible and latent heat thermal storages. Procedures for the design and optimization of solar thermal systems are presented. A design project on the application of solar energy in residential, industrial or agricultural sector is required.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: PEAS 3600.03 or equivalent

### ENVE 4772.03: Environmental Assessment and Management.

This class examines the ecological impacts of human activities with regard to water, air and soil pollution. Ecological theory and practice are reviewed and methods of environmental regulation and management considered in the light of the concepts of sustainability and maintenance of biodiversity. Lectures will include presentations by government and corporate regulators and managers.

Tutorials will be devoted to the preparation and presentation of hypothetical environmental impact statements and assessments.

FORMAT: Lecture 3 hours, tutorial 1 hour

CROSS-LISTING: CHEE 4772.03

## D. Food Science Series

### FOSC 1000.03: Concepts in Food Science.

This class will present an overview of the discipline of Food Science and Food Processing. The overview will include discussions of topics such as food processing, food preservation and safety, seafood processing, quality assurance, and food packaging. Selected food processing operations will also be discussed in further detail. Food safety issues such as food infection and intoxication and HACCP will be introduced.

FORMAT: Lecture 3 hours, lab 3 hours

CO-REQUISITE: BIOL 1010.03, BIOL 1011.03

### FOSC 2010.03: Food Commodities.

This class will study the basic scientific principles underlying the processing of varying food commodities. General preservation methods such as freezing, dehydration, thermal processing, irradiation and microwave heating and their applicability to various foods will be examined during lectures and tours to industrial food processing plants. The practices of food manufacturing, preservation, distribution, and marketing of food materials will be related to basic food science principles.

FORMAT: Lecture 3 hours, lab 3 hours

### FOSC 3010.03: Food Chemistry.

This class will examine the molecular behaviour of basic constituents common to food products and relate this behaviour to the structure and properties of food constituents. Topics covered will include water, carbohydrates, proteins and lipids and micro nutrients such as vitamins and minerals, pigments and flavours. Chemical processes such as browning, enzyme reactions and emulsification will also be examined. The function of ingredients, additives and nutraceuticals will be examined.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: CHEM 2441.03

### FOSC 3020.03: Food Analysis.

This class will cover the theory and practice used in modern food analysis. The analysis of proteins, lipids and carbohydrates will be presented. As well, the principles of spectroscopy, titration, electrophoresis and chromatography will be discussed and demonstrated using various foods. Other analytical techniques specific to foods such as reflective colorimetry, texture profile analysis and water activity measurement will be presented.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: CHEM 2441.03

### FOSC 3030.03: Food Quality Assurance.

This class will examine techniques employed to ensure the processing and delivery of quality foodstuffs. Topics covered will include quality management systems, statistical quality control, government regulation and food legislation. Details of Hazard Analysis Critical Control Point (HACCP) planning will be covered in detail. Quality assurance systems employed in government and the food industry will be examined.

FORMAT: Lecture 3 hours, tutorial 3 hours

PREREQUISITE: STAT 1060.03, FOSC 2010.03

### FOSC 3070.03: Food Processing.

This class will examine various unit operations in food processing. Topics examined will include thermal processing via general and formula methods, blanching, pasteurization, beverage processing and food packaging. Other food processing techniques including drying and freezing will be examined. The unit operations of various food and seafood commodities will be examined in detail.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: FOSC 2010.03, BIOE 3051.03

### FOSC 3080.03: Food Microbiology.

This class is designed to introduce students to current aspects of food microbiology with special emphasis on spoilage organisms and foodborne pathogens. Subjects covered will include food infection and intoxication, factors affecting microbial growth and death, sanitation and predictive microbiology. Special emphasis will be given to the microbial ecologies associated with foods from agricultural and marine sources. The characteristics of emerging food

pathogens and their influence on the safety of the food supply will be examined. Rapid methods of detection of foodborne microorganisms will be studied.  
 FORMAT: Lecture 3 hours, lab 3 hours  
 PREREQUISITE: BIOL 2004.03 or MICI 2100.03

### **FOSC 4020.03: Chemistry - Fats, Oils, Lipids.**

The difference in physical and chemical properties of natural fatty acids are correlated with the physical nature of fats, oils and lipids, and the chemical combinations of fatty acids with glycerol, fatty alcohols, sterols and other chemical materials. Methods of separation such as chromatography, solubility and crystallization are explained in terms of the molecular properties. Important industrial processes and products are included.  
 FORMAT: Lecture 3 hours, lab 3 hours  
 PREREQUISITE: FOSC 3020.03 or CHEM 2201.03  
 CROSS-LISTING: FOSC 6329.03

### **FOSC 4030.03: Food Product Development.**

This class examines the process of food product development and techniques used to measure food sensory aspects, shelf life and food stability. Topics covered will include food structure, colorimetry, shelf life modelling and sensory analysis. This class has been designated as a "capstone" class and it will incorporate concepts from other food science classes to develop problem solving and critical thinking abilities.  
 FORMAT: Lecture 3 hours, lab 3 hours  
 PREREQUISITE: FOSC 3030.03

### **FOSC 4081.03: Brewing Science.**

This course will examine unit operations employed during the production of malt and beer. Brewing, fermentation and packaging aspects of beer production as well as brewing quality assurance, colloidal, flavour and haze stability will be discussed.  
 FORMAT: Lecture 3 hours, lab 3 hours  
 PREREQUISITE: FOSC 3080.03

### **FOSC 4091.03: Food Safety and Biotechnology.**

This course will teach students biological aspects of safety in our food and water supply. The course is divided into three modules: (1) Introduction to molecular biology and biotechnology methods used to detect disease causing microorganisms, create genetically modified organisms and manipulate food related organisms, (2) Food hygiene and sanitation, and (3) Current issues in public health and safety of our food and drinking water supply.  
 FORMAT: Lecture 3 hours, lab 3 hours  
 PREREQUISITE: FOSC 3080.03  
 EXCLUSION: FOSC 4090.03

### **FOSC 4250.03: Food Product Development Project.**

The objective of this class is to provide the student with experience in the application of food product development techniques. The student will be expected to develop a novel food product from initial stages through to pilot plant trials and shelf life evaluation. A final report and presentation will be required.  
 FORMAT: Lecture 2 hours, lab 3 hours  
 PREREQUISITE: FOSC 4030.03  
 EXCLUSION: FOSC 4750.03

### **FOSC 4500X/Y.03: Seminar in Food Science.**

The objective of this class is to allow the student to gain experience in verbal and written presentation of selected food science topics. Students will be encouraged to select topics which reflect their academic and food industry experience. Oral presentations and written reports will be required.  
 NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.  
 FORMAT: Lecture 1 hour  
 CO-REQUISITE: FOSC 4750X/Y.06 or FOSC 4250.03

### **FOSC 4750X/Y.06: Food Science Research Project.**

The objective of this class is to provide experience in the application of Food Science principles to an academic or industrial research question or problem. The project will be chosen in conjunction with a supervising faculty member. The student will then devise and follow a work plan and write a project report. A critical statistical evaluation of the findings are an inherent part of this class.  
 NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.  
 FORMAT: Lecture 2 hours, lab 3 hours  
 PREREQUISITE: FOSC 3010.03, FOSC 3020.03, FOSC 3030.03, FOSC 3070.03, FOSC 3080.03

EXCLUSION: FOSC 4250.03

## **E. Materials Engineering Series**

### **MATL 3500.03: Materials Engineering.**

This class correlates properties of engineering materials with their structure. Laboratory objectives include preparation of reports in publication format and illustration of lecture material. Basic concepts of crystallography, chemical bonding and binary phase diagrams are introduced. These are used to describe properties of metallic and nonmetallic materials and how these may be controlled by engineers. Materials discussed include ferrous and nonferrous metals and alloys, ceramics, composites and semiconductors.  
 FORMAT: Lecture 3 hours, lab 3 hours

### **MATL 3510.03: Extraction of Materials.**

The lecture portion of this class covers the fundamental principles involved in the high temperature extraction of materials from their ores. Included are descriptions of the equipment used in unit operations such as roasting, smelting and refining and the application of these operations to the production of iron and steel and the more common nonferrous metals. The laboratory portion of this class consists of practice in stoichiometric mass balance and thermochemical calculations of common pyrometallurgical processes for extracting materials.  
 FORMAT: Lecture 3 hours, lab 3 hours

### **MATL 3520.03: Structure of Materials.**

This class presents the following topics: the electronic structure of materials, fundamentals of crystallography, electron motion in the space lattice, introduction to composites, X-ray diffraction and X-ray diffraction techniques, and the crystal structure of crystalline materials. Typical binary phase diagrams are discussed from the structural point of view. Laboratory experiments include preparation and evaluation of X-ray films and diffractometer charts, structural investigation of binary alloys, and crystallite size structure.  
 FORMAT: Lecture 2 hours, lab 3 hours  
 PREREQUISITE: MATL 3500.03  
 EXCLUSION: MATL 3601.03

### **MATL 3600.03: Mechanical and Physical Behaviour of Materials.**

This course is designed to give students a fundamental understanding of how materials deform and the mechanisms that can be engineered within the atomic structure so as to alter this behaviour. Core topics include basic crystallography, dislocation theory, strengthening mechanisms (dislocations, dispersoids, precipitation hardening, and ceramic reinforcements), and mechanical testing. For the latter, specific emphasis is placed on the techniques of tensile, creep, and fatigue testing.  
 FORMAT: Lecture 3 hours/Lab 3 hours  
 EXCLUSION: Students that have passed MATL 3620.03 and MATL 3621.03 can not register for this course.

### **MATL 3611.03: Corrosion and Degradation of Materials.**

This class covers the basic theories of corrosion and their application to its prevention. It includes a description of corrosion testing methods, failure of materials arising from corrosion processes and design factors affecting corrosion. Laboratory experiments are used to illustrate the processes involved in degradation of materials.  
 FORMAT: Lecture 2 hours, lab 2 hours

### **MATL 3612.03: Thermodynamics of Materials.**

The class covers the application of thermodynamic concepts such as entropy, enthalpy, free energy, and activities and phase diagram relations, to the understanding of high temperature reactions in chemical processing of materials. The application of computer programs to the analysis of chemical thermodynamics is demonstrated. Problem solving sessions are used to illustrate the applications of these concepts materials processing.  
 FORMAT: Lecture 3 hours, lab 3 hours

### **MATL 3620.03: Introduction to Physical Metallurgy.**

Crystallography, solid solutions and mechanical properties of metals are reviewed. Stereographic projection is introduced. Deformation twinning, martensite formation and the shape memory effect are studied as practical examples. Binary phase diagrams are reviewed. Vacancies, diffusion, and nucleation and growth phenomena are discussed. Solidification and growth phenomena are introduced.

Dislocation interactions are examined to describe work hardening and precipitation hardening. Laboratory exercises illustrate lecture material and provide experience in metallography.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: MATL 3500.03

### **MATL 3621.03: Mechanical Behaviour of Materials.**

This class includes a review of the Mohr's stress and strain circles. Three-dimensional stress and strain concepts are considered, including plane stress and plane strain. Flow theories, fracture, fatigue and creep of materials are studied. Emphasis is on metallic materials, although polymers, composites and ceramics are also studied.

FORMAT: Lecture 3 hours, lab 3 hours

### **MATL 4700.03/4800.03: Materials Design Project.**

The class objective is to provide experience in the application of engineering principles to the solution of a specific problem in Materials Engineering. A research project is chosen in collaboration with a particular faculty member. The student then prepares a work plan, carries out a literature search, designs experimental setup as needed, and arranges for the acquisition of necessary equipment. The student conducts the planned research work, analyses the data obtained and critically evaluates the findings. Oral progress reports are required. A written report and an oral presentation are required at the end of the term.

FORMAT: Lab 6 hours

EXCLUSION: MATL 4704.03/4804.03

### **MATL 4700.03/4800.03: Materials Design Project.**

The class objective is to provide experience in the application of engineering principles to the solution of a specific problem in Materials Engineering. A research project is chosen in collaboration with a particular faculty member. The student then prepares a work plan, carries out a literature search, designs experimental setup as needed, and arranges for the acquisition of necessary equipment. The student conducts the planned research work, analyses the data obtained and critically evaluates the findings. Oral progress reports are required. A written report and an oral presentation are required at the end of the term.

FORMAT: Lab 6 hours

EXCLUSION: MATL 4704.03/4804.03

### **MATL 4710.03: Ferrous Alloys and Joining of Materials.**

The class reviews the iron-carbon system, including the transformation products of austenite, alloying elements and combined thermo-mechanical treatments. Specific classes of steels, ranging from the simple plain carbon steels to the duplex stainless steels, are considered. The class also discusses the fusion welding of a representative selection of steels. Fusion welding process variables are studied together with the metallurgy of the weld metal and the heat-affected zone.

FORMAT: Lecture 3 hours, lab 2 hours

EXCLUSION: MATL 4722.03

### **MATL 4710.03: Ferrous Alloys and Joining of Materials.**

The class reviews the iron-carbon system, including the transformation products of austenite, alloying elements and combined thermo-mechanical treatments. Specific classes of steels, ranging from the simple plain carbon steels to the duplex stainless steels, are considered. The class also discusses the fusion welding of a representative selection of steels. Fusion welding process variables are studied together with the metallurgy of the weld metal and the heat-affected zone.

FORMAT: Lecture 3 hours, lab 2 hours

EXCLUSION: MATL 4722.03

### **MATL 4720.03: Industrial Processing of Materials.**

The fundamentals of metal working in relation to rolling, forging, extrusion, and drawing are studied. In each scenario the physical and mechanical metallurgy principals involved are considered as in the role of tribology. Case studies for a variety of alloys are considered. Hands-on laboratory experiments are included to reinforce key topics.

PREREQUISITE: MATL 3500

EXCLUSION: MATL 4824.03

### **MATL 4800.03: Materials Design Project II.**

The objective of this class is to provide experience in the design of materials to the solution of a specific problem. A research design project is chosen in collaboration with a particular faculty member. The student then prepares a work plan, carries out a literature search, and designs an experimental setup. The student conducts the planned research, analyses the data and critically evaluates the results.

Students communicate their findings through written reports and an oral talk at the end of the term.

FORMAT: Lab 6 hours

PREREQUISITE: MATL 3500.03 and (MATL 4700.03 or MATL 4704.03)

### **MATL 4802.03: Metallurgical Process Design.**

This class focuses on the design of new metallurgical plants, processes and products based on knowledge acquired in previous core classes. Material and heat balances, metal economics, design and optimization aspects are covered. Groups of students undertake design projects aiming at modernization of existing plants or establishing new plants operating on new technology. Emphasis is placed on process selection and economic evaluation, detailed design of process equipment, sizing, costing and optimizing the processing units.

FORMAT: Lecture 2 hours, lab 3 hours

### **MATL 4805.03: Electrochemical Processing of Materials.**

The class discusses principles of electrochemistry and electrochemical engineering as they apply to the design of processes for the production of materials. The theory and application of various electrochemical techniques such as electroplating, electroforming, electromachining, electrefining, and fused-salt electrolysis are included. A brief overview on the development of electrochemical sensors and devices using solid state electrolytes is presented. Surface modification by electrochemical means is also discussed.

FORMAT: Lecture 2 hours, lab 3 hours

CROSS-LISTING: MATL 6805.03

### **MATL 4806.03: Particulates in Materials Engineering.**

The class covers the preparation, characterization, physical and chemical properties and processing of powders in materials processing including agglomeration, gas-solid reactions, sintering and hot pressing.

FORMAT: Lecture 2 hours, lab 3 hours

CROSS-LISTING: MATL 6806.03

### **MATL 4810.03: Materials Process Design.**

This class focuses on the design of new metallurgical plants, processes and products based on knowledge acquired in previous core classes. Material and heat balances, metal economics, design and optimization aspects are covered. Groups of students undertake design projects aiming at modernization of existing plants or establishing new plants operating on new technology. Emphasis is placed on process selection and economic evaluation, detailed design of process equipment, sizing, costing and optimizing the processing units.

FORMAT: Lecture 2 hours/Lab 3 hours

PREREQUISITE: MATL 3500.03

EXCLUSION: MATL 4802.03

### **MATL 4813.03: Iron and Steel Production.**

This class discusses factors affecting the global iron and steel industry with particular reference to Canadian participation. These factors include the supply of raw materials, new technology, environmental concerns and economics. The future of any metallurgical industry is influenced by many concerns, not all of which are technical.

FORMAT: Lecture 2 hours, lab 3 hours

PREREQUISITE: MATL 3510.03

### **MATL 4817.03: Metallurgical Processing.**

This class covers the principal practices related to metallurgical processing and the marketing of metals, including modification of concentrates (sintering, pelletizing, briquetting). Descriptive outlines of metallurgical processes such as iron and steel, lead, aluminum and zinc production are presented, along with utilization of fuels for metallurgical purposes (coal, coke, oil).

FORMAT: Lecture 3 hours

### **MATL 4820.03: Non-Metallic Materials.**

This class includes a description of the chemical and structural characteristics of various common non-metallic materials as well as manufacturing methods. A number of applications for such materials are considered including glass, composites, refractors, solid electrolytes and electronic materials. The chemistry of multi-component systems are also discussed. The laboratory experiments are designed to illustrate the lecture material.

FORMAT: Lecture 2 hours, lab 2 hours

EXCLUSION: MATL 4703.03

**MATL 4820.03: Non-Metallic Materials.**

This class includes a description of the chemical and structural characteristics of various common non-metallic materials as well as manufacturing methods. A number of applications for such materials are considered including glass, composites, refractors, solid electrolytes and electronic materials. The chemistry of multi-component systems are also discussed. The laboratory experiments are designed to illustrate the lecture material.

FORMAT: Lecture 2 hours, lab 2 hours

EXCLUSION: MATL 4703.03

**MATL 4825.03: Solidification and Casting.**

The fundamental principles of solidification and practical applications in the casting industry are dealt within this class. The topics covered are nucleation processes, the growth of single crystals, plane front, cellular and dendritic solidification in single and polyphase alloys, solidification of castings, ingot moulding and core making processes, moulding sands, design of risers and gates, and the melting of metals. The laboratory experiments cover the growth of single crystals of pure metals, alloys, and semiconductors; pattern, mould and core making; and, the casting of commercial alloys.

FORMAT: Lecture 2 hours, lab 3 hours

**MATL 4826.03: Physical Metallurgy and Ceramics.**

The first portion of this class covers the physical metallurgy, properties and uses of the principle industrial alloys. The remainder of the class deals with the structure of important ceramic materials such as glass, porcelain and refractors, their properties, and the processing and applications of ceramics. The laboratory experiments will illustrate the principles discussed in the lectures. />

FORMAT: Lecture 2 hours, lab 3 hours

**MATL 4830.03: Non-Ferrous Alloys.**

The objective of this class is to introduce students to the structure, properties, and processing of different types of non-ferrous alloys. Alloys of principal interest include those that are premixed on aluminum, copper, nickel, and titanium. Select applications for these industrially-important material are also reviewed.

FORMAT: Lecture 3 hours/lab 3 hours

PREREQUISITE: MATL 3500.03

EXCLUSION: MATL 4823.03

**MATL 4840.03: Corrosion and Degradation of Materials.**

This class introduces the students to the basic theory of corrosion as well as the basic principles of hydrometallurgy. Students will also be introduced to the different types of corrosion and the practices of corrosion prevention and remediation.

FORMAT: Lecture 3 hours/lab 3 hours/tut 3 hours

PREREQUISITE: MATL 3500.03 and (MATL 3612.03 or PEAS 3500.03)

EXCLUSION: Students that have passed MATL 3611.03 can not register for this course.

**F. Process Engineering Series****PEAS 2201.03: Fundamentals of Process Engineering.**

The main objective of this course is to develop the student's ability to perform mass and energy balances on non-reactive and reactive processes. Introductory topics include systems of units and a study of process variables such as temperature, pressure and flow rate. Also covered are fundamental properties of multiphase systems, including phase equilibrium, vapour pressure, and Raoult's and Henry's Laws. Emphasis is placed on developing problem solving skills and adopting a consistent approach to the analysis of process systems.

FORMAT: Lecture 3 hours, tutorial 2 hours

PREREQUISITE: ENGI 2102.03

EXCLUSION: CHEE 2404.03

**PEAS 2202.03: Fundamentals of Environmental Engineering.**

The class will focus on sources of environmental pollutants, the effects of pollutants on living and non-living systems, and the processes by which pollutants are generated or by which their effects can be minimized or remediated. Lectures are supplemented by tutorials which include guest speakers, case studies and field trips.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: CHEM 1021.03 and CHEM 1022.03 or CHEM 1011.03 and CHEM 1012.03

**PEAS 3500.03: Process Thermodynamics.**

The class covers the application of thermodynamic concepts such as entropy, enthalpy, free energy, activities and phase diagram relations, for pure substances and solutions (aqueous and molten) in biological, chemical and materials processing systems. The application of computer programs to the analysis of thermodynamics in chemical reactive systems is demonstrated. Problem solving sessions are used to illustrate the applications of these concepts in processing.

FORMAT: Lecture 3 hours/tutorial 3 hours

PREREQUISITE: ENGI 2102.03, PEAS 2201.03, ENGM 2101.03

**PEAS 3600.03: Transport Phenomena.**

This class covers the physical, chemical and thermal factors affecting the mechanisms of heat and mass transfer in biological, chemical and materials processing systems. The principles of physical and mathematical modeling are demonstrated in real applications in the fields of biological, chemical and materials engineering. Problem solving sessions to illustrate the application of the above concepts to processing are given.

FORMAT: Lectures 3 hours/tut 3 hours

PREREQUISITE: PEAS 2201.03, ENGM 2021.03 or ENGM2022.03

**PEAS 3700.03: Law and Ethics in Process Engineering.**

This course will provide students with the legal and ethical framework for the practice of engineering. The section on ethics will introduce ethical theories and demonstrate how these theories are embodied in various engineering codes of ethics. It will also show how these theories, as well as the codes of ethics, can be used to address real ethical dilemmas that can arise in the practice of engineering. Cases studies will be used extensively to guide the students through this. The course will also introduce the subject of law in its relation to the practice of engineering. It will cover the basics of what the students should know about contract law, professional liability and tort law, and intellectual property law. Because the students will be required to submit a good number of written assignments, the first third of the course will focus on improving their writing skills.

# Faculty of Health Professions

## Dean

Webster, W. G., PhD

## Associate Dean (Research and Academic)

Unruh, A., BSc (OT) (Western), MSW (Carleton), PhD (Dalhousie)

## Academic Integrity Officer

Unruh, A., BSc (OT) (Western), MSW (Carleton), PhD (Dalhousie)

## Interprofessional Experience Coordinator

Godden-Webster, A., MSc (Appl.)

## Financial Manager

Moors, K., CMA, MPA

## Human Resources Consultant

Smith-Gillis, C. E.

## Office Manager

Weir, B. L.

## Manager, Research Support and Special Projects

Officer, S., BEd, MA

## I. Introduction

The Faculty of Health Professions consists of the School of Health and Human Performance, School of Health Administration, School of Human Communication Disorders, School of Social Work, School of Nursing, School of Occupational Therapy, School of Physiotherapy, College of Pharmacy, and the School of Health Sciences. The various undergraduate programs are described in the College, School, and other program sections of this Calendar. Details of the graduate programs in the Clinical Vision Science program and offered in the Schools are described in the Calendar of the Faculty of Graduate Studies.

In addition to the policies listed, please refer to the following other student related policies at <http://healthprofessions.dal.ca/>:

- Allegation of Professional Unsuitability Policy
- FHP Immunization Policy
- Occupational Health and Infectious Diseases: Pre-clinical Placement Requirements for Health Care Worker Students
- Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability
- Guidelines for Personal Safety in Fieldwork Placements

## Policy Statement on Affirmative Action

The Faculty of Health Professions recognizes that Affirmative Action is required to increase the admission of and number of graduates from underrepresented groups; Aboriginal peoples, African Canadians and Persons with (dis)Abilities. The constituent Units of the Faculty will develop and implement Affirmative Action policies that are consistent with the Human Rights Commission.

As a matter of priority, the Faculty will develop strategies to identify and create recruitment and support systems that will encourage and support members of these underrepresented groups to apply to and graduate from the Faculty of Health Professions

## Policy Statement on Interprofessional Health Education.

Students in the Faculties of Dentistry, Health Professions and Medicine are required to participate in interprofessional health education activities. These activities, together with specific program requirements, are currently evolving and in transition and are integrated into the curricula of individual programs. Participation is mandatory. The objective of interprofessional education in the Faculty of Health Professions include developing:

- knowledge and understanding of, and respect for, the expertise, roles and values of other health and human service professionals.
- understanding the concept and practice of patient/client/family-centred care.
- effective communication, teamwork and leadership skills applied in interprofessional contexts.
- positive attitudes related to the value of collaboration and teamwork in health and human service contexts.
- an understanding, from a multi-disciplinary perspective, of the Canadian health and social systems, the legal and regulatory foundation of professional practice, how health and human service institutions are organized and operate, and how different health and human service professions contribute to the systems and institutions.

Students in the entry-to-practice programs in the Faculty of Health Professions, are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions Interprofessional Health Education) for the duration of their studies. Successful completion of this class is a requirement for graduation in these programs, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration; to be presented by the Faculty of Health Professions. For more information, students should contact their specific school/college.

## Statement Regarding Criminal Records Check

The Faculty of Health Professions of Dalhousie University does not require a Criminal Records Check or other screening procedure (e.g., Vulnerable Sector Screen) as a condition of admission into its programs. However, **students should be aware that such record checks or other screening procedures may be required by facilities outside the University used for clinical, fieldwork or co-op placements or experiences related to an academic class assignment, which, in some instances, may be a requirement for graduation.** It is the student's responsibility to have such procedures completed.

Such facilities may refuse to accept students on the basis of information contained in the record check or other screening procedures. If the student is unable to complete a clinical requirement due to a failure to meet the record check or screening requirements of the facility, or if the student is refused access to the facility on the basis of the information provided, such a student may fail the class, and as a result, in some instances, may not be eligible for progression or graduation.

Students should check with their School/College for details concerning any record checks or screening requirements relevant to clinical, fieldwork, or placements in their particular program. Note that facility requirements may change from time to time and are beyond the control of the University.

Students should also be aware that some professional regulatory bodies may require a satisfactory record check as a condition of professional licensure.

## Practicum/Fieldwork Placements Outside Halifax

Students enrolled in programs of study in the Faculty of Health Professions (Health Sciences, Nursing, Health and Human Performance, Social Work and Pharmacy) are advised that they may have to do some or all of their required clinical education/fieldwork at sites outside Halifax, and hence may have to incur additional personal expenses for travel and temporary accommodation.

In some situations, sites may require a payment to the site for support of clinical education/fieldwork supervision, and some sites may require separate disability insurance in lieu of eligibility for Worker Compensation coverage. Such costs are the responsibility of the student.

## Student Disclosure of Health Information

### Faculty of Health Professions

Students registered in this Faculty are encouraged to inform both the School/ College and the field work learning sites if they have a health concern that has the potential to compromise client, student and/or agency personnel safety and/or has the potential for limiting their ability to learn and perform their role as learner.

For the purposes of this policy, the term health concern refers to any cognitive, affective, and/or physical health problem, injury, or condition that may place the student and/or others at risk and/or inhibit the student's learning ability and performance.

### A. Guidelines for Disclosure

The student has the right to decide if disclosure of health information is appropriate. The method, timing, and extent of the disclosure is at the student's discretion (for consultation options, see below). Early disclosure of the following information regarding the health concern may be helpful to students in the academic and/or field work sites.

To disclose this information:

1. Clearly describe the nature of the health concern and the potential limitations with regard to the learning tasks expected in either the academic or field work site. Appropriate verification of the information may be required.
2. List any adaptations, modifications, and/or safety procedures that may be required in planning the student's learning experiences in either setting.
3. Provide clear and appropriate advice regarding the management of this health concern.

If the disclosure of health information in field work and/or academic sites produces difficulties, students are encouraged to report these difficulties immediately to the appropriate person(s) within both the field work site and/or within their educational program (see below). Discrimination in any form will not be tolerated.

Students are advised to make the initial contact with the person with whom they are most comfortable from the lists below. These individuals would be available for consultation/advocacy:

- Academic /faculty advisor
- Field work coordinator(s)
- Director of the School or College where student is enrolled
- Dean of the Faculty of Health Professions
- Advisor to Students with Disabilities, Dalhousie University
- Dalhousie/King's Association of Students with Disabilities
- Human Rights Commission

### College of Pharmacy

- Preceptor
- Site coordinator
- Externship administrator

### School of Nursing

- Clinical instructor
- Class professor
- Associate Director, Undergraduate Student Affairs
- Nurse Practitioner/Arctic Nursing Program Coordinator

### School of Occupational Therapy

- Preceptor
- Field site director
- Provincial or Atlantic Region fieldwork education coordinators

### School of Physiotherapy

- Clinical supervisor
- Facility clinical coordinator
- Provincial coordinator

### School of Social Work

- Agency field instructor
- Program coordinator
- Faculty field instructor

### School of Health Administration

- Preceptor

### School of Human Communication Disorders

- Clinical Educator

### School of Health and Human Performance

- Student Services Administrator

### QEII - Dalhousie School of Health Sciences

## Certificate in Disability Management

### I. Introduction

The Faculty of Health Professions offers a Certificate Program in Disability Management to students currently enrolled in an academic program at Dalhousie or another Canadian university.

The Certificate Program is built around the philosophy of disability management and early assistance as the most effective means by which to assist injured and ill workers to attain their maximum level of functioning and ability to return to work. Disability Management is designed to benefit injured workers through its participatory and proactive problem-solving process incorporating strategies that ensure workers timely and safe return to work. All classes in the Certificate Program are offered via distance learning technology.

### A. Purpose of Program

The Certificate in Disability Management addresses specific goals and objectives for the education of prospective disability case managers and vocational rehabilitation consultants by providing an understanding of injury, its impact and recovery processes. In addition, the Program responds to changes in workplace health & safety programs, in legislation, regulations, and practices, in changes in the health care system in general. While the main paradigm of the program is grounded in the health, rather than the medical model, its conceptual basis has roots in health and medical sciences, the social sciences, and the physical sciences as related to ergonomics and human kinetics.

The goal of the Certificate in Disability Management program is to prepare Disability Management team members who: provide effective, efficient and safe coordination of services, facilitate a team-oriented approach, convey understanding of the health impact of injury, convey an understanding of the impact of injury on work, develop decision-making skills and develop management skills.

### B. What is Disability Management

Returning to work for injured workers can be influenced by many medical, physical and psychological factors that may impede recovery. There is the belief that the needs of workers and their employers are central to the disability management process, and workers must play an active role. A requirement in the worker-centered process is the need to ensure that all the facts about injuries/illnesses, treatments, and entitlements are known to these injured workers can that clear decision-making is exercised by all parties to ensure both continuity in the return to work process and establishment of trusting relationships among injured workers, their employers, and the disability management team.

### C. Career Opportunities

Graduates of a Disability Management program will typically work as Disability Managers, Return to Work Facilitators, and Vocational Consultants.

### D. Learning Principles for Program Development and Delivery

Learning activities in classes will reflect the disability management philosophy and be integrated throughout the program with a case-oriented approach to problem-solving. Assessment of learning will include non-traditional examination approaches and activities will stimulate critical discourse which combines practical situation analyzed against learned theories, concepts and frameworks. Learning activities will foster personal growth through critical reflection of student's attitudes and decision making patterns.

## II. Regulations

Students registered in the classes of the Disability Management Certificate Program (CDM) are bound by the University and Faculty regulations in the same manner as all Dalhousie students. The University and Faculty of Health Professions (FHP) regulations are found in the University Regulations section of the Dalhousie University Calendar. Academic regulations are found in the Academic Regulations section of the Calendar. It is the responsibility of each CDM student to become familiar with both the University and FHP regulations.

Please make note of the "Acceptable Use Policy" found in the University Regulations section of the Dalhousie Calendar. Because of the distance learning component of this Program, students should pay particular attention to regulations designed to respect the rights of other computer users.

### A. Class Grades

The minimum passing grade for all of the CDM classes is 50%. A class may be repeated only once, with a maximum of two repeated classes permitted. A student who fails the same class twice will not be awarded the Certificate.

### B. Appeals

On occasion, conflict or disagreement on final grades or evaluative procedures may arise. All students are expected to familiarize themselves with the processes available to them for academic appeals. Timeliness is of the essence for presentation and consideration of all appeals and, in all instances, the first level of appeal will be at the informal level.

Formal appeals of a final grade or a procedural problem must follow the regulations as stated in the University Calendar and such appeals will only be considered after failure to resolve the issue at the informal level has occurred. Students who do not follow these procedures will automatically forfeit their right to further consideration of their appeal and the original decision will remain in effect.

### Informal Process

For each instance, the student and instructor, with guidance for the CDM Academic Director, are expected to attempt to resolve the matter informally within 15 days of the matter giving rise to the appeal.

### Formal Process

If the matter cannot be resolved informally, the student may initiate a formal appeal by following the procedures set down in the University Calendar (see Regulation 16.7 of the Academic Regulations section for appeals of grades, and Regulation 25.6 of the Academic Regulations section for the Faculty of Health Professions appeals process).

Note that both the Dalhousie University Calendar and the Faculty of Health Professions policies appear on the Dalhousie University website at [www.dal.ca/academiccalendar](http://www.dal.ca/academiccalendar).

## III. Certificate Requirements

Students must complete all four disability management classes, DISM3010, DISM4010, DISM4040 and DISM4050, as described below.

Please note that the Disability Management Certificate classes are taken as electives throughout a student's academic studies. Once the four classes have been successfully completed, the Disability Management office will issue the Certificate. This Certificate is not honoured at Convocation. Students must submit the Request for Certificate Form to the Disability Management office in order to be considered and to receive the Certificate. This form is available on the CDM website: <http://www.dal.ca/dmcert>

## IV. Class Descriptions

### DISM 3010.03: Introduction to Occupation and Disability Management.

This course asks the following questions in seeking to understand the meaning and importance of occupation to individuals. What is occupation? What is the meaning of occupation? What is the meaning of work injury and loss of occupation? It also explores: What is disability management? What are some of the professional and ethical issues, as well as the philosophy, roles, conceptual framework for program? What are levels of disability management in organizational systems, injury prevention, and on-site management?

FORMAT: Distance Education

CROSS-LISTING: KINE 3010.03

### DISM 4010.03: Return to Work Planning and Communication.

This course will consider processes including factors that create resistance among workers. Introduction to return to work planning and communication processes in understanding resistance and compliance/motivation in workers.

FORMAT: Distance Education

### DISM 4040.03: Strategies for Alternative Work and Prevention.

In situations where return to a worker's former occupation is impossible, learners will identify strategies to assist the client. Such strategies include dealing with issues of job loss, vocational rehabilitation and employment for persons with disabilities. Students will look at prevention strategies in dealing with job loss, vocational rehabilitation, employment for persons with disabilities, meaningful occupation, case closure, and prevention strategies within systems, structures and organizations.

FORMAT: Distance education

### DISM 4050.03: Psycho-social Issues in Disability Management.

Many complex psycho-social issues involve the injured worker's family, community and employer dynamics. Topics studied in this course include: family, community and unemployed persons, psycho-social dynamics, employer dynamics employer/employee relationships, societal trends, dependence and disability categorization, and medical authorization.

FORMAT: Distance education

## Diploma in Disability Management

**Note: A proposal has been submitted to approve the suspension and ultimate termination of this program.**

### I. Introduction

The Faculty of Health Professions offers a range of diploma and degree-earning programs for health professionals, including programs for rehabilitation practitioners. Dalhousie's expertise within the health professions, and its understanding of occupation and rehabilitation offers academic guidance and training of professionals in injury prevention and disability management.

The diploma program is built around the philosophy of disability management and early assistance as the most effective means by which to assist injured and ill individuals to attain their maximum level of functioning and ability to return to work. Disability management is designed to benefit injured workers through its participatory and proactive problem-solving process incorporating strategies that ensure workers timely and safe return to work. **All classes in the diploma program are offered via distance learning technology.**

#### A. Purpose of Program

The Diploma Program in Disability Management addresses specific goals and objectives for education of disability managers who desire a more extensive background in understanding injury, its impact and recovery processes. In addition, the program responds to changes in workplace health & safety programs, in legislation, regulations, and practices, and in changes in the health system in general. While the main paradigm of the program is grounded in the health, rather than the medical model, its conceptual basis has roots in health and medical sciences, the social sciences, and the physical sciences as related to ergonomics and human kinetics.

The goal of the Diploma Program in Disability Management is preparation of Disability Management team members who: provide effective, efficient and safe co-ordination of services, facilitate a team oriented approach, convey understanding of the health impacts of injury, convey an understanding of the impact of injury on work, develop decision-making skills, and develop management skills. Prospective students in the Disability Management Diploma program must be presently working for a Canadian Workers Compensation Board, or performing similar work with a public or private agency dealing with the return to work process for injured workers. Students who do not meet this criteria may be eligible for the Diploma in Disability Management Mentorship Program. For more information regarding the DDM Mentorship Program, please consult the DDM Website: <http://www.dal.ca/ddm>.

### B. What is Disability Management

Returning to work for injured workers can be influenced by many medical, physical and psychological factors that may impede recovery. There is the belief that the needs of workers and their employers are central to the disability management process, and workers must play an active role. A requirement in the worker-centered process is the need to ensure that all the facts about injuries/illnesses, treatments, and entitlements are known to these injured workers and that clear decision-making is exercised by all parties to ensure both continuity in the return to work process and establishment of trusting relationships among injured workers, their employers, and the disability management team.

### C. Career Opportunities

An exemplary program in Disability Management will assist Disability Managers to reduce the human, social and economic costs of disability to workers and employers on a national scale. Students and graduates of the DDM Program typically work as Disability Managers, Return to Work Facilitators, and Vocational Rehabilitation Consultants.

### D. Learning Principles for Program Development and Delivery.

In order for program graduates to achieve the intended learning outcomes, learning will be applied around the following Adult Education Principles. Learning activities in classes will reflect the disability management philosophy and be integrated throughout the program with a case-oriented approach to problem-solving. Assessment of learning will include non-traditional examination approaches and activities will stimulate critical discourse which combines practical situation analyzed against learned theories, concepts, and frameworks. Learning activities will foster personal growth through critical reflection of student's attitudes and decision making patterns.

## II. Regulations

Students registered in the Diploma Program in Disability Management (DDM) are bound by the University and Faculty regulations in the same manner as all Dalhousie students. The University and Faculty of Health Professions (FHP) regulations are found in the University Regulations section of the Dalhousie University Calendar. Academic regulations are found in the Academic Regulations section of the Calendar. It is the responsibility of each DDM student to become familiar with both the University and FHP regulations.

Please make note of the "Acceptable Use Policy" found in the University Regulations section of the Dalhousie Calendar. Because of the distance learning component of the Disability Management Diploma Program, students should pay particular attention to regulations designed to respect the rights of other computer users.

### A. Class Grades

The minimum passing grade for all DDM classes is 50%. A class may be repeated once only, with a maximum of two repeated classes allowed in the entire DDM program. A student who fails the same class twice will be required to withdraw from the DDM program.

### B. Appeals

On occasion, conflict or disagreement on final grades or evaluative procedures may arise. All students are expected to familiarize themselves with the processes available to them for academic appeals. Timeliness is of the essence for presentation and consideration of all appeals and, in all instances, the first level of appeal will be at the informal level.

Formal appeals of a final grade or a procedural problem must follow the regulations as stated in the University Calendar and such appeals will only be considered after failure to resolve the issue at the informal level has occurred. Students who do not follow these procedures will automatically forfeit their right to further consideration of their appeal and the original decision will remain in effect.

### Informal Process

In each instance, the student and instructor, with guidance from the DDM Academic Director, are expected to attempt to resolve the matter informally within 15 days of the matter giving rise to the appeal.

### Formal Process

If the matter cannot be resolved informally, the student may initiate a formal appeal by following the procedures set down in the University Calendar (see Regulation 16.7 of the Academic Regulations section for appeals of grades, and Regulation 25.6 of the Academic Regulations section for the Faculty of Health Professions appeals process). For more information please visit <http://www.ug.cal.dal.ca/UREG.htm>.

Note that both the Dalhousie University Calendar and the Faculty of Health Professions policies appear on the Dalhousie University website: <http://www.ug.cal.dal.ca/UREG.htm>.

## III. Diploma Requirements

Students must complete all ten half credits however may choose between DISM 4060 and DISM 4070.

## IV. Class Descriptions

### DISM 3010.03: Introduction to Occupation and Disability Management.

This course asks the following questions in seeking to understand the meaning and importance of occupation to individuals. What is occupation? What is the meaning of occupation? What is the meaning of work injury and loss of occupation? It also explores: What is disability management? What are some of the professional and ethical issues, as well as the philosophy, roles, conceptual framework for program? What are levels of disability management in organizational systems, injury prevention, and on-site management?

FORMAT: Distance Education

CROSS-LISTING: KINE 3010.03

### DISM 3020.03: Workers and the Work Environment.

This course identifies what is normal human function in the workplace in relation to occupational health and injury prevention. The class looks at normal human function in work processes, ergonomic support, Health and Safety Acts, injury prevention in the workplace, occupation health, organization of the workplace, and interpersonal factors.

FORMAT: Distance Education

RESTRICTION: Restricted to Disability Management students

### DISM 3030.03: Understanding Occupational Injury and Disability.

In this class learners gain an Understanding of Occupational Injury and Disability by examining mechanisms and processes involved when injury does occur, that either allow for recovery and return to work, or precipitate a further decline into impairment, disability or handicapping processes. Topics addressed are: mechanisms of injury, recovery processes, impairment, disability, handicap, types of physical injuries, mental disorder/disabilities, and occupational illness.

FORMAT: Distance Education

RESTRICTION: Restricted to Disability Management students

### DISM 3040.03: Occupational Assessment.

Following an Introduction to Occupational Assessment, learners will be given the opportunity to build skills around carrying out Occupational Assessment based on existing data and using a case study approach. Case studies will assist students in using existing data, coordinating information, worker participation, employer participation, communication/collaboration, grief issues and self-reflection on difficult cases.

FORMAT: Distance Education

RESTRICTION: Restricted to Disability Management students

### DISM 4010.03: Return to Work Planning and Communication.

This course will consider processes including factors that create resistance among workers. Introduction to return to work planning and communication processes in understanding resistance and compliance/motivation in workers.

FORMAT: Distance Education

### DISM 4020.03: Referral, Co-ordination and Follow-up.

This course provides an opportunity to build on competencies and utilize health professionals and other services to assist the injured worker to return to employment. This looks at team building, group dynamics, using medical and health professional information, prevention of re-injury and examination of professional and ethical issues.

FORMAT: Distance education

RESTRICTION: Restricted to Disability Management students

### DISM 4030.03: Return to Work.

Resources may be required from within the community and may need to be applied in actual return to work situations with modifications made to the job-related activity and/or to the workplace. Topics include functional restoration programs & work conditioning, workplace modification, ease-back programs, work hardening, employer responsibility.

FORMAT: Distance education

RESTRICTION: Restricted to Disability Management students

### DISM 4040.03: Strategies for Alternative Work and Prevention.

In situations where return to a worker's former occupation is impossible, learners will identify strategies to assist the client. Such strategies include dealing with issues of job loss, vocational rehabilitation and employment for persons with disabilities. Students will look at prevention strategies in dealing with job loss, vocational rehabilitation, employment for persons with disabilities, meaningful occupation, case closure, and prevention strategies within systems, structures and organizations.

FORMAT: Distance education

### DISM 4050.03: Psycho-social Issues in Disability Management.

Many complex psycho-social issues involve the injured worker's family, community and employer dynamics. Topics studied in this course include: family, community and unemployed persons, psycho-social dynamics, employer dynamics employer/employee relationships, societal trends, dependence and disability categorization, and medical authorization.

FORMAT: Distance education

### DISM 4060.03: Program Evaluation in Disability Management.

The principal objective of this course is to prepare the student to be an informed participant in, and consumer of, program evaluations. This includes the ability to contribute as a stakeholder or sponsor representative to the effective design of a program evaluation. It also involves development of the knowledge required to be an informed consumer of evaluation reports, to be able to interpret and apply assessment outcomes and recommendations, and to recognize when inadequate methodologies have been employed and identify the resulting limitations of the findings.

FORMAT: Distance education

RESTRICTION: Restricted to Disability Management students

### DISM 4070.03: Disability Management of Mental Health Issues in the Workplace.

This course is aimed at enhancing the learner's understanding of the impact of mental illness on the individual and the workplace, and the intervention strategies designed to facilitate the return to work process.

FORMAT: Distance Education

RESTRICTION: Restricted to Disability Management students

The School of Health Administration offers a Diploma in Health Services Administration and a Diploma in Emergency Health Services Management.

## I. Introduction - Diploma in Health Services Administration (DHSA)

The Diploma in Health Services Administration (DHSA) program is designed to prepare students for a career in healthcare at the managerial level. It meets the needs of students interested in health services administration and of those currently employed in the healthcare sector in a managerial capacity, particularly, middle managers in medium and large institutions, administrators in small facilities, and employees in community health, long-term care, primary care, multi-service centres, and community health boards.

The program provides a conceptual background for the increasingly complex managerial tasks performed in health institutions, agencies, and health-related government departments. Every effort is made to balance political, social, economic, cultural, medical, and ethical approaches to understanding the healthcare delivery system with those of the management sciences.

All students must observe the University and Academic Regulations described in the calendar.

Students may complete the DHSA on a full-time or part-time basis.

The program is conducted through the Internet and Web-based conferencing with a learning platform called BbLearn. BbLearn is a distance education class management system. It provides a learning environment where students direct their learning. BbLearn consists of a suite of tools which provide mechanisms for interactive exercises, such as group discussions, presentations, and information sharing.

NOTE: Classes offered through the online format are assessed a per class Distance Education Fee (DEF) in addition to the class-based tuition.

### A. Application Procedure

Applicants must meet the Dalhousie University undergraduate admission requirements to warrant consideration into this program. Applicants require university preparation (you may not apply from high school). In addition to transcripts, students are required to submit a current resume and at least one letter of reference with their application to the Diploma program.

Applications should be submitted as early as possible, and not later than July 1 for September admission, November 15th for January admission and March 15 for May admission.

Students may be considered for advanced placement if they have completed classes equivalent to the required or elective classes. Application for advanced placement must be made in writing after an applicant has been accepted to the program.

Further information on the Diploma in Health Services Administration program may be obtained from: School of Health Administration, Dalhousie University, 5161 George Street, Suite 700, PO Box 15000, Halifax, NS B3H 4R2, (902) 494-7097. Application forms are available online at [www.dal.ca/admissions/](http://www.dal.ca/admissions/) apply.html

### B. Curriculum

The one-year program features both an academic and outcome-oriented curriculum. Students accepted into the DHSA program take the following half-credit classes:

#### Fall term

- HESA 4000.03: Canadian Health Care Delivery System
- HESA 4002.03: Health Human Resource Management
- HESA 4003.03: Quality Management
- HESA 4004.03: Health Care Planning
- HLTH 4040.03: Health Law for Non-Lawyers

#### Winter term

- HESA 4001.03: Management Roles and Competencies
- HESA 4005.03: Health Care Financial Management
- HESA 4200.03: Epidemiology for Managers

#### Summer term

- HESA 4400.03: Introduction to Health Care Economics
- One half credit elective as approved by the School

## II. Introduction - Diploma in Emergency Health Services Management (DEHSM)

The School of Health Administration offers an undergraduate diploma program in Emergency Health Services Management. The program meets the need for an educational program for students interested in emergency health services management and for mid-career managers working in the Emergency Health Services systems in Canada. The academic objectives of the program are to provide education in emergency health services management for potential managers of large and small emergency health services organizations, and to provide access to further education in Health Services Administration and Emergency Health Services for such individuals.

The program is designed for professionals working in emergency and/or first responder settings.

The program is conducted through the Internet and Web-based conferencing with a learning platform called BbLearn. BbLearn is a distance education class management system. It provides a learning environment where students direct their learning. BbLearn consists of a suite of tools which provide mechanisms for interactive exercises, such as group discussions, presentations, and information sharing.

NOTE: Classes offered through the online format are assessed a per class Distance Education Fee (DEF) in addition to the class-based tuition.

## A. Application Procedure

Applicants must meet the university's undergraduate admission requirements to be considered for admission into the program. Applicants require university preparation (you may not apply from high school). Prospective students should submit a letter outlining their work experience and other activities with their application, fee and high school transcripts. In addition, students are required to submit a current resume and at least one letter of reference with their application to the diploma program.

Students may be considered for advanced placement if they have completed classes equivalent to the required or elective classes. Application for advanced placement must be made in writing after an applicant has been accepted to the program.

Further information on the Diploma in Emergency Health Management program may be obtained from: School of Health Administration, Dalhousie University, 5161 George Street, Suite 700, PO Box 15000, Halifax, NS B3H 4R2 (902) 494-7097. Application forms are available online at [www.dal.ca/admissions/apply.html](http://www.dal.ca/admissions/apply.html). Deadline for September admission is July 1, November 15 for January admission and March 15 for May admission.

## B. Curriculum

### Fall term

- HESA 4000.03: Canadian Health Care Delivery System
- HESA 4010.03: Management Process and Human Resource Issues in EHS
- HESA 4004.03: Health Care Planning
- HESA 4020.03: Quality Improvement in EHS
- HLTH 4040.03: Health Law for Non-Lawyers

### Winter term

- HESA 4005.03: Health Care Financial Management
- HESA 4200.03: Epidemiology for Managers

### Summer term

- HESA 4030.03: EHS System Design
- HESA 4040.03: Principles of Community-Based EHS
- HESA 4400.03: Introduction to Health Care Economics

## Class Description

### HESA 4000.03: Canadian Healthcare Delivery System.

The class is designed to provide an overview of healthcare in Canada, and more specifically in Nova Scotia, where the health reform process will be addressed. Aimed specifically at supervisors, middle management, and administrators the existing trends in healthcare from a national and provincial perspective will be reviewed. The goal of this class is to provide the student with a snapshot view of the existing healthcare system, its past development, and future direction. CROSS-LISTING: CANA 4300.00

### HESA 4001.03: Management Roles and Competencies.

This class seeks to help students to examine what managers do to add value to their organizations. As a starting point we will briefly explore the evolution of management theories, comparing the founding theories with more recent literature. We will also examine the role of managers in public organizations such as hospitals. Finally, we will examine specific skills and duties of healthcare managers including: leadership, power, motivation, decision making, communication, teamwork, conflict resolution, organizational change, and others. Learning is facilitated through a mix of individual study and group discussions, and direct feedback from the instructor.

### HESA 4002.03: Health Human Resource Management.

This class will provide the student with a working knowledge of the day to day operational management of human resources. The class will focus on the requirements of a manager to mentor, lead and manage the organization's human resources. The interaction and interdependencies between the manager and the human resource department will be examined. Topics include labor management relations; human rights and labor related legislation; recruitment and selection; performance development and management; professional development and training; compensation related issues; collective bargaining and dealing with special employment related issues. Approved with Canadian Studies.

PREREQUISITE: HESA 4000.03

CROSS-LISTING: HESA 4010.03

### HESA 4003.03: Quality Management.

This class will provide an introduction to the concept of quality improvement. Students will be exposed to the various methods to measure and assess quality in healthcare and be provided exposure with tools and techniques utilized in practice. A focus on safety and risk, patient satisfaction, team leadership as well as accreditation will be undertaken to ensure students gain practical understanding of the drivers of quality in Canadian healthcare. Approved with Canadian Studies.

PREREQUISITE: HESA 4000.03

CROSS-LISTING: HESA 4020.03

### HESA 4004.03: Healthcare Planning.

This class will use lectures, readings and case discussion to explore issues and methods related to health planning and evaluation. Emphasis will be placed on learning how to apply theory to practice at the system, organization, and service levels.

### HESA 4005.03: Healthcare Financial Management.

This class will introduce the student to financial management concepts. The key concepts of financial resource management will be explored with particular emphasis on implementation in the healthcare sector. Introduction of the basic components will enable the student to understand the concepts within the larger framework of strategic and organizational resource planning and utilization. Topics covered include preparing, managing, and evaluating department budgets, payment systems, and fiscal accountability.

### HESA 4010.03: Management Process and Human Resource Issues in EHS.

The course is designed to develop skills in the eight core management processes required to effectively manage an EHS operation. The core management skills taught in this course include: Interpersonal Communications and Coaching, Building Effective Teams, Monitoring and Managing Performance, Project Management, Leading Others, productivity Improvement, Influencing and Negotiating with Others, and Managing Innovation and Change. The overall aim of this course is to provide EHS practitioners with the skills required to manage people effectively. The course has two principle goals: provide EHS practitioners with the management and human resource skills necessary to manage effectively in their own work environment, and introduce EHS practitioners to innovations in EHS systems design and management practices.

PREREQUISITE: HESA 4000.03

CROSS-LISTING: HESA 4002.03

### HESA 4020.03: Quality Improvement in EHS.

The objectives of this course are to (1) lead EHS managers through a step by step process to design, plan, implement, monitor and evaluate a continuous quality improvement initiatives, (2) link continuous quality improvement principles to the concepts and practices of Higher Performance Systems (HPS), (3) apply the principles, practices and tools of continuous quality improvement to an EHS operation, and (4) create a team based continuous quality improvement environment. Participants will be introduced to and will apply the concepts of healthcare improvement teams throughout the course.

PREREQUISITE: HESA 4000.03

CROSS-LISTING: HESA 4003.03

### HESA 4030.03: EHS System Design.

The advent of the high performance EHS system makes it evident that it is possible to "do more with less", however, that possibility requires sensible design tempered by the political realities of the services area. It also requires the use of CQI practices to modify the design and ever vigilant system status management to maintain high performance. This course will consider first the public policy issues that bear upon EHS system design. This course will consider first the structure issues, both external and internal, that bear upon EHS system design. Then the course will consider the different designs originated from organizational theory. In

the second half of the course the various system components will be presented. Finally, the course will consider disaster management of EHS systems. The objectives of this course are: (1) provide managers and management-bound students a broad perspective of the process of providing EHS services, (2) identify the scope of factors that influence, create and alter the design of EHS systems, (3) provide a foundation for system evaluation, and (4) challenge students to anticipate the factors that will affect system design when disaster strikes.

### **HESA 4040.03: Principles of Community-Based EHS.**

Emergency Health Service (EHS) systems face challenging environments. However, strategies can be developed that go beyond merely reacting to what occurs in the environment. This course presents public relations planning so that a disaster or even a scandal can be turned into an opportunity. In addition, the course offers a basic understanding of marketing strategies that can help offset market pressures and demands.

The objectives of the course are: (1) appreciate how marketing strategies vary when designed for the public good or a public service, (2) develop a marketing plan specific to the student's emergency health service system, (3) develop and evaluate an emergency health services public relations plan, and (4) facilitate a collaborative activity between the student's emergency health organization and some of its stakeholders.

### **HESA 4200.03: Epidemiology for Managers.**

This class is a general, introductory course in the principles of epidemiology. Discussion will concentrate on the occurrence of disease and injuries in human populations, examine methods of determining the causes of illness and death, and analyze conclusions which have been gained through the application of epidemiological studies.

PREREQUISITE: HESA 4000.03

### **HESA 4400.03: Introduction to Healthcare Economics.**

This class is an introduction to economic issues in the Canadian Health Care System. The purpose of this class is to provide students with economic tools with which to examine issues affecting the Canadian health system. Specific topics to be examined include: the supply of, and demand for, healthcare; investment appraisal; healthcare systems and markets; health insurance schemes; rationing healthcare services; human resource planning; health technology assessment; and, outcome measurement and evaluation.

Robinson, L. M., BSc Honours 1st. class (UVIC), MA, PhD (Simon Fraser)  
Westwood, D. A., BSc, MA, PhD (Waterloo)

#### **Assistant Professors**

Barnes, L. J., BPE, MSc (Dalhousie)  
Dechman, G., BSc (Physio) Honours, PhD (McGill). Major appointment with School of Physiotherapy  
Dithurbide, L., BA (St. Mary's), MA (Brock), PhD (Michigan State)  
Keats, M., BA (Calgary), MA (Alberta), PhD (Calgary)  
Kimmerly, D.S., BSc (Hons) (Univ. of Waterloo), MSc, PhD (Univ. of Western Ontario)  
Ladouceur, M., BSc, MSc (Sherbrooke), PhD (McGill)  
Martin, D., BRec (MUN), MA, PhD (Dalhousie)  
Moreside, J., BSc (UBC), MHK (Windsor), PhD (Waterloo)  
Rainham, D.G.C., BES (Hons) (Waterloo), MSc (Alberta), PhD (Univ. of Ottawa).  
Major appointment - Elizabeth May Chair in Sustainability and Environmental Health  
Stone, M., BPHE, BSc (Queen's), MSc (Sask), PhD (Exeter)  
Welch, J., BA, BSc Honours (Carleton), MSc (Alberta), PhD (Purdue Univ.)

#### **Adjunct Professors**

Bayers, L., BA, BEd (Dalhousie), MA (SMU), PhD (South Australia)  
Boe, S., BPhEd (Brock), MSc, PhD, MPT (Western Ontario). Major appointment with School of Physiotherapy  
Holt, L., BSc, MSc (Springfield Coll.), PhD (Southern Illinois)  
Landry, S., BScH (Acadia), BEng, PhD (Dalhousie)  
Neupert, A., MSc (Calgary)  
Steeves, D., BEd (UNB), MSc (Dalhousie)

Sullivan, A. M., BRec (Dalhousie), MA (Waterloo), PhD (Guelph)  
 Thornley, L., BSc (Univ of Brighton), MSc (Dalhousie)  
 Willgress, S., BSc, MSc (Calgary)

## I. Introduction

### A. Purposes of the School

The School's mission is to develop professionals and scholars who can generate, disseminate and apply knowledge to advance health and human performance. We do this by offering undergraduate and graduate programs as well as by conducting research in health promotion, kinesiology and recreation/leisure studies.

### B. Limited Enrolment

All programs offered by the School of Health and Human Performance have enrolment limits.

### C. Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900.00 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. Successful completion is a requirement for graduation, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

### D. Affirmative Action Admission Policy

#### Purpose of the Policy

This policy is intended to create opportunities for the admission of under-represented African Canadians, Aboriginal peoples, and persons with disabilities, in the School of Health and Human Performance.

#### Eligibility

Persons eligible to be considered under this policy must self-identify as African Canadian, Aboriginal, or a person with a disability. Although the School of Health and Human Performance is committed to supporting eligible students from across Canada, preference will be given to those who are a resident of Atlantic Canada or who have a parent residing in Atlantic Canada at the time of application.

Consideration for admission under this policy is optional. Applicants wishing to be considered under this policy must identify themselves to the Admissions Committee on the School of Health and Human Performance Supplemental Form submitted to the Registrar's Office.

#### Requirements

To be considered for admission under this policy, the following criteria must be met:

1. Those applying directly from high school must have attained a minimum grade of 65% in each of the prerequisites listed for the program of choice. Transfer students (i.e., individuals having completed post secondary classes) must have achieved a minimum overall GPA of 2.3 (C+).
2. The applicant would otherwise not have been admitted through the regular admission process.
3. The application, Supplemental Form, and a written statement outlining his/her motivation for applying must be submitted to the Registrar's Office no later than March 15.

#### Support Services

Once admitted to the School, students wishing to access the following support services must identify their need to the Student Services Administrator, or the class professor.

#### 1. School of Health and Human Performance:

- a) The Student Services Administrator will meet regularly with students to assist with advising, administrative needs, and other concerns.
- b) Faculty members will facilitate extra support or instruction for their class content if necessary.
- c) Faculty members who are members of the designated groups, or who are closely affiliated with those groups, will be asked to provide academic mentorship if required.

- d) Faculty whose office is in a building that might be inaccessible to students with a physical disability will arrange an alternative, more accessible, space for meeting with those students.

### 2. Dalhousie University offers a variety of services to students

For further information go to [www.dal.ca/campus\\_life/student\\_services.html](http://www.dal.ca/campus_life/student_services.html)

## II. School of Health and Human Performance Regulations

1. All students must observe the University and Academic Regulations described in this Calendar.

### 2. Attendance

All students must attend the classes of their prescribed class regularly and punctually. When the work of a student becomes unsatisfactory or attendance is irregular, the student may be required to discontinue the class concerned.

### 3. Workload

The maximum class load for any fall or winter term is 15 credit hours (five half-credits) and during spring and summer terms, the maximum class load for each is 6 credit hours. Students wishing to exceed the maximum class load must receive permission from the academic advisor within the School. Permission will not normally be granted to any student in his or her first year of study or to any student who does not have a cumulative GPA of 3.00 or above. Other requests based on extenuating circumstances will be considered.

### 4. Grade Point Average Requirements

The grade point average system is described in the Academic Regulations.

### 5. Supplemental Examinations

The School of Health and Human Performance does not offer supplemental examinations in any of its programs.

### 6. Academic Appeals Procedures

A student wishing to appeal a decision based on School regulations should in the first instance attempt to resolve the issue with the instructor(s) concerned before proceeding as per School Appeal Procedures, See Academic Regulation 24.6.

#### 6.a School Committee on Undergraduate Student Appeals

A School-wide Committee on Undergraduate Student Appeals exists for the purpose of hearing initial student appeals of academic decisions.

The student appellant is responsible for the preparation of all documentation in support of his/her appeal.

The student must submit the appeal to the Chair, Committee on Undergraduate Student Appeals.

The student has the right to appear before the Committee on Undergraduate Student Appeals and he/she should notify the Chair of his/her desire to do so. The student also has the right to be represented by an advocate of his/her choice.

The decision of the Committee on Undergraduate Student Appeals shall be conveyed to the student, in writing, by the Chair, Committee on Undergraduate Student Appeals within three working days after the conclusion of the appeal. If the student's appeal is being denied, this notification should include information about procedures to appeal to the Committee on Undergraduate Student Appeals of the Faculty of Health Professions (see Academic Regulation 25.6). It should be noted that this appeal to the Faculty Committee on Undergraduate Student Appeals must be presented within 30 days of notification from the School of the disputed academic decision.

### 7. Student Advisory Programs

Although many classes are compulsory in the School's programs, considerable latitude exists for the development and extension of individual interests. To help in planning a total personal program each student is assigned to the Student Services Administrator. He/she can help students to select classes, avoid common pitfalls, interpret regulations, and solve various types of problems. Although students are responsible for their own programs and for maintaining high academic standards, they should consult their advisor regularly.

### III. Degree Programs

The School offers eight undergraduate degree programs:

- A. BSc (Health Promotion)
- B. BSc (Health Promotion) with Honours\*
- C. BSc (Kinesiology)
- D. BSc (Kinesiology) with Honours\*
- E. BSc (Recreation)\*\*
- F. BSc (Recreation)/Bachelor of Management\*\*\*
- G. BSc (Recreation) with Honours\*
- H. BSc (Recreation) with Honours\*/Bachelor of Management\*\*\*

\* Application is made to the Honours Coordinator by November 15 for HPRO, Rec (TR), Rec/Mgmt and April 1 for Kinesiology, of the student's third year. Consult department for further information.

\*\* The BSc (Recreation) is a degree in Therapeutic Recreation.

\*\*\*This is a five-year combined degree in which the student will graduate with both a Bachelor of Science (Recreation) and Bachelor of Management degree.

NOTE 1: Students entering into any of the above degree programs from high school should refer to the Admission Requirements section of this calendar.

NOTE 2: Students who are transferring into any of the above degree programs with previous academic work will formulate a program of study with the Student Services Administrator, based on previous work and area of concentration. Students transferring into the BSc (Health Promotion), BSc (Recreation) and BSc (Recreation)/BManagement programs should note that the internship experiences required in the final year of these programs are normally only offered in the fall and winter terms.

#### A. School of Health and Human Performance Classes

The following classes are required for certain degree programs within the School. Please refer to the Required Classes section of the specific degree program of interest:

• HAHP 1000.03	3
• HAHP 2000.03	3
• HAHP 3000.03	3
• HAHP 3100.03	3

#### HAHP Class Descriptions

##### HAHP 1000.03: Introduction to Health, Health Promotion and Health Professions.

This class provides the philosophical and practical scope of the School's unique perspective on health. It includes an examination of theories, research, politics and practices that have helped to define health, and health promotion as an umbrella for health-related activities. An historical perspective of health and healthcare is offered and current international, national and local issues are considered. Also included is an introduction to the professional streams offered in the School and how they fit into health promotion and the Canadian healthcare system.

FORMAT: Lecture/seminar

##### HAHP 2000.03: Human Growth and Development.

A study of factors influencing human growth and development from birth to maturity and throughout the lifespan, as revealed by observational and experimental studies.

FORMAT: Lecture/3 hours

RESTRICTION: Restricted to students in the School of Health and Human Performance, and Bachelor of Health Science students. Others by permission of instructor with priority to Health Professions students.

##### HAHP 3000.03: Community Development.

This class examines the nature and process of community development, reviews differing interpretations and approaches to community development, and provides students the opportunity to develop skills to catalyze and engage in the process. The class will investigate current Canadian initiatives and projects that encourage the practice of community development, and provide the opportunity to witness and become involved in local health-related projects that foster the principles of community development.

FORMAT: Lecture/discussion/tutorial/3 hours

RESTRICTION: Restricted to students in the School of Health and Human Performance.

##### HAHP 3100.03: Introduction to Research Methods.

This class provides students with basic knowledge for conducting research in health professions. The content covers ethics associated with research, research design, issues in measurement, sampling, data collection strategies, data analysis and report writing. Students will learn about different approaches to research from the classical scientific model to more subjective interpretative models of inquiry. Testing, as well as written assignments will serve as evaluative techniques.

FORMAT: Lecture/discussion 3 hours

EXCLUSION: HSCE 3010.03

RESTRICTION: Restricted to students in the School of Health and Human Performance, and Bachelor of Health Informatics students.

#### A. Bachelor of Science (Health Promotion)

The Bachelor of Science (Health Promotion) is a four-year degree program. The goal of health promotion is to educate health promotion professionals in promoting, maintaining and improving the health and well-being of individuals, families and communities. As a profession, Health Promotion is principally devoted to employing health promotion processes and to fostering healthy behaviors.

The responsibilities of health promoters include: assessing health promotion needs; planning, conducting and evaluating health promotion programs; coordinating health promotion activities and resources; promoting health promotion throughout the community; and professional development.

The BSc (Health Promotion) program guides students in attaining: (1) knowledge, attitudes and practices conducive to a healthy lifestyle; (2) professional preparation for a career in community health promotion; and (3) academic preparation for advanced study and research in health promotion or health-related fields.

##### Program of Study

NOTE: On admission into the BSc (Health Promotion) program, all students will be issued a Program of Studies Form. It is the responsibility of the student to ensure that all of the requirements for the degree as outlined on the form are completed for graduation.

##### Required Classes - BSc (Health Promotion)

##### Stream Requirements

###### Common Year One

HAHP 1000.03	3
HPRO 1195.03	3

Health Related Electives\*\*\*\* 12

**Year Four**

Health Related Elective\*\*\*\* 9

Open Elective(s)\*\* 6

HPRO 4495.15 15

\* Language/Humanities Elective - see list under Degree Requirements Section in the Academic Calendar.

\*\* Open Electives can be chosen from any available class at Dalhousie

\*\*\*HPRO A, B, C (as per program of study form available from the School of Health and Human Performance).

\*\*\*\* Health Related Electives - To ensure the classes you select fill this requirement, please check with an advisor.

\*\*\*\*\* See list of writing requirement classes under Degree Requirements Section in the Academic Calendar. If students take SOSA 1050 in Year One, the Writing Requirement becomes six credit hours of open electives.

At graduation, valid Standard First Aid and CPR Level C Certification are required. Students must submit copies of valid certification to the Student Services Administrator before the end of their final term.

## B. Bachelor of Science (Health Promotion) with Honours

Students wishing to be considered for entrance into the Honours Program must meet the minimum requirements listed below. *Acceptance to the program after meeting these requirements will depend on a faculty member being willing to supervise the honours thesis.*

1. Completed a minimum 90 credit hours towards his/her undergraduate degree<sup>1</sup>.
2. Obtained a GPA of 3.5 based on the previous 60 credit hours of work.
3. Completed HAHP 3100 with a minimum grade of B.
4. Completed a 3000 level or higher HPRO class most related to the area of research.
5. Completed the Financial, Technical, Equipment and Space Support Form indicating the financial needs of the thesis can be met.

Application is made by November 15th of the student's third year.

NOTE: Students accepted into the Honours program must complete HPRO 4101.03 and HPRO 4102.03

The Honours Program is part of the 120 credit hours required for the Bachelor of Science (Health Promotion) degree. These six credit hours may be attributed as open electives or as health-related electives.

Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

<sup>1</sup> A student who has completed 87 credit hours may apply to the School of Health and Human Performance Committee on Studies for a waiver of the requirement. Successful appeal will depend upon the merits of the argument.

## Honours Conversion

Students who have graduated with a Bachelor of Science (Health Promotion) degree can apply for the Honours Conversion program. Before taking HPRO 4101.03 and HPRO 4102.03, they must have satisfied the requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain prerequisite classes concurrently with HPRO 4101.03 and HPRO 4102.03. Application is made through the Honours Coordinator (details in the BSc (Health Promotion) with Honours section). Acceptance into the Honours Conversion program can only be considered provided a faculty member has agreed to supervise the project.

## HPRO Class Descriptions

### HPRO 1195.03: Introduction to Health Promotion.

While students are developing knowledge, understandings, attitudes and appreciations related to health and professional health promotion, they will be improving skills in library research, scholarly writing, and public speaking. In addition to the regular classroom meetings, the class includes a self-study assignment related to the organization and functioning of a charitable community-based health-related agency.

FORMAT: Lecture/discussion/seminar/self-study assignment/3 credit hours

RESTRICTION: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

### HPRO 2110.03: Health Promotion Theory.

This course is designed to encourage those working and studying in the areas of health promotion to better understand the connection between health promotion theory and research, policy and community practice. This course will also provide students with an opportunity to explore and critically analyze the principal methods and theoretical approaches in the evolution and assessment of evidence for effectiveness of health promotion programs and interventions.

PREREQUISITE: HPRO/HEED 1195.03

RESTRICTION: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

### HPRO 2120.03: Health Promotion Policy.

The purpose of the course is to introduce students to the concept of policy and health promotion policy in particular. Students will be exposed to content that describes how policy is developed/approved/changed on the basis of research/evidence and what processes/tools can be used to influence political decision-making as it relates to the adoption of new/changed policy. Through the use of case studies, students will be asked to critically analyze existing health promotion policies and understand issues related to policy interpretation, application and compliance at national, provincial and local levels.

PREREQUISITE: HPRO/HEED 1195.03

RESTRICTION: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

### HPRO 2250.03: Interdisciplinary Class in Human Nutrition.

This course focuses on the science of nutrition and the role of nutrition in health. We study how the body responds to different nutrients including protein, carbohydrate, fat, vitamins, minerals, and water. Current knowledge and controversies regarding the role of diet in disease and optimal health will be explored.

FORMAT: Lecture 3 hours

CROSS-LISTING: KINE 2250.03

### HPRO 2255.03: Drugs and Drug Education.

International, national and regional issues of promotion, prevention, treatment and legislation of drug use are examined. Recreational, over-the-counter and some prescription drugs will be considered. Some strategies and methods of educating about drugs and drug-related issues will be included.

FORMAT: Lecture 3 hours

RESTRICTION: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.

### HPRO 2361.03: Program Planning.

Designing, planning, implementing and evaluating programs is fundamental to both leisure services and health promotion. Both disciplines develop programs to

enhance the quality of life for individuals, groups and communities. This class reviews the principles of program planning, various program planning models, and examples of programs that are pertinent to leisure services and health education/promotion. The planning process will include issues such as targeting specific populations, scanning for needs and assets, partnering, managing stakeholder relationships, and evaluation.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: HPRO/HEED 1195.03 or LEIS 1127.03

CROSS-LISTING: LEIS 2361.03

RESTRICTION: Restricted to Recreation and Health Promotion students

### **HPRO 3325.03: Mental Health Promotion.**

Concepts and issues of mental health are explored through an examination of related theories, research, writings and practices. Emphasis is placed on promoting individual and community mental health, but mental illness and its treatment are included. Mental health-related organizations and services will also be studied.

FORMAT: Lecture/seminar 3 hours

PREREQUISITE: PSYO 1011.03 or 1021.03 and PSYO 1012.03 or PSYO 1022.03, HAHF 2000.03, or permission of instructor

RESTRICTION: Restricted to School of Health and Human Performance students; limited space for other students may be made available.

### **HPRO 3335.03: Introduction to Disease Prevention.**

This class will consider the concept of disease, the study of disease, and the causes of disease from the perspective of prevention. Primary, secondary and tertiary prevention strategies and methods will be examined, along with the role of the health promotion specialist. Selected communicable diseases will be used to illustrate these concepts.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: ANAT 1020.03 or ANAT 1010.03, HPRO/HEED 1195.03, PHYL 1010X/Y.06 or PHYL 1000X/Y.06, or PHYL 2030X/Y.06, or permission of instructor

RESTRICTION: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students

### **HPRO 3345.03: Epidemiological Approach to Disease.**

This class introduces students to the basic concepts of epidemiology - the study of the causes and distribution of disease in human populations. Emphasis will be on disease causation, morbidity and mortality through studying selected chronic conditions. In addition, this course examines social determinants of health and their relationship to chronic conditions.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: ANAT 1020.03, or ANAT 1010.03, HPRO/HEED 1195.03, PHYL 1010X/Y.06 or PHYL 1000X/Y.06 or PHYL 2030X/Y.06, or permission of instructor

RESTRICTION: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students

### **HPRO 3351.03: Injury Prevention and Safety Education.**

Students are introduced to the concept of safety, the causes and effects of injuries, and strategies for reducing same through safety education, engineering and legislation. Specific study of injuries, their causes, and preventive measures and programs is preceded by a review of definitions of health, health promotion/education models and policies. The latter part of the class focuses on community orientations to injury prevention.

FORMAT: Lecture/discussion 3 hours

RESTRICTION: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students

### **HPRO 3360.03: Multicultural Health Promotion Research and Policy.**

The purpose of this course is to provide students with an opportunity to explore the distinct and integrated influence of research and policy on the health of multicultural populations within the Canadian context. In particular, this course will assist students in developing a critical understanding of the intersection of multicultural health with policies and power. Through engagement with multidisciplinary perspectives, students will examine health research and policy issues pertaining specifically to New Canadians (Immigrants), African Canadians, and Aboriginal peoples.

PREREQUISITE: HPRO/HEED 1195.03, HPRO 2110.03

RESTRICTION: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

### **HPRO 3370.03: International Health Promotion Research and Policy.**

The main goal of the course is to introduce students to the ways in which health promotion research questions, methods and ethics, as well as health policies, vary depending upon the specific international context (local and national). A comparative analysis will be undertaken of the disparities in health/well-being between (and within) developed and developing countries while considering the historical development of underdevelopment. Each year the students will choose from a number of cases two that will be examined in-depth by the class. Students will choose from among a variety of key global health issues (e.g. tobacco addiction, health issues for migrant workers, HIV/AIDS and nutrition). Focus will be placed on the social determinants of these health issues/problems, and the types of health promotion research and policy issues needed to address these health problems within particular geographical contexts/countries. One of the central tenets of the course is how societies are organized, and the way in which resources are invested and whose interests the investments serve, affect the health of individuals and populations within the society.

PREREQUISITE: HPRO/HEED 1195.03, HPRO 2110.03

RESTRICTION: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

### **HPRO 3397.03: Community Health Promotion Strategies.**

A broad spectrum of health promotion strategies is available to facilitate health in various community settings and with diverse populations. The class reviews these major strategies and offers students practice in applying them. In addition, the various models and theories of health behaviour change will be examined.

FORMAT: Lecture 3 hours

PREREQUISITE: HPRO/HEED 1195.03, HPRO/HEED 2361.03

RESTRICTION: Restricted to School of Health and Human Performance students; others by permission of instructor with priority to Health Professions students

### **HPRO 4101.03: Advanced Topics in Applied Research Methods in Health Promotion and Policy.**

The purpose of this course is to provide students with an opportunity to develop their understanding of research methodologies and apply their knowledge to a specific health promotion topic. Health policies will be discussed and considered relative to specific health issues.

PREREQUISITE: HPRO/HEED 1195.03, HAHF 3100.03

RESTRICTION: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

### **HPRO 4102.03: Honours Thesis.**

The purpose of the course is to develop research skills by completing a major independent research project and writing a formal research report in the form of a thesis. By way of their research, students will demonstrate skills, knowledge and ability in literature research, research design, data collection/analysis and formal academic writing.

PREREQUISITE: HAHF 3100.03 and HPRO 4101.03 with a grade of B or better in each, and ethical approval by August 1

RESTRICTION: Restricted to Health Promotion honours students.

### **HPRO 4365.03: Health: A Biopsychosocial Approach.**

Health is increasingly recognized as multiply determined by the complex interactions of biological, psychological, and social systems and determinants. Research into these interactions is advancing rapidly. Students in this class are expected to develop an understanding of these processes, be aware of the most recent research and be capable of seeking out new research in the future and applying this knowledge to health problems in Canada.

PREREQUISITE: HPRO 3335.03 or HPRO 3345.03

RESTRICTION: Restricted to Health Promotion students. Others by permission of instructor with priority to Health Professions students.

### **HPRO 4412.03: Human Sexuality.**

This class is concerned with biological, cultural, ethical, historical, psychological, religious and semantic aspects of human sexuality. Four themes are threaded throughout the class - diversity in gender roles and in sexual attitudes, behaviours and customs; critical thinking; making responsible decisions; sexual health. The class is designed to support positive integration of sexuality into the lives of

individuals and to foster the prevention of sexuality-related problems, at all stages of life.

FORMAT: Lecture/discussion 3 hours

CROSS-LISTING: GWST 2412.03

### HPRO 4422.03: Environmental Health.

Individual health and well-being is partially determined by the values we hold and the choices we make as individuals. Equally important is the environment that enables us to make those choices that maintain and enhance our health. This class emphasizes the importance of the environment, both physical and social, and how it is implicated in the work of health promoters and other health professionals. The content reviews principles of natural and social ecology, the role of policy in shaping our environments, and research aimed at understanding the impact of various environmental conditions on health. Students will explore environmental health issues within the community and propose educational strategies to maintain and enhance health and well-being.

FORMAT: Lecture/discussion

RESTRICTION: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students

### HPRO 4450.03: Comprehensive School Health Promotion.

This class will provide students with an overview of the components of a comprehensive health promotion program in the public school system from a community health promotion perspective. The school health curriculum, school health services, and the healthy school environment - and how a community health promoter might interact with the school system will comprise the content of the class.

FORMAT: Lecture/tutorial 3 hours

PREREQUISITE: HPRO 1195.03, HPRO, 2110.03, HPRO 2361.03, HPRO 3397.03; at least two of HPRO 2255, HPRO 4412, HPRO 4365, HPRO 3335, HPRO 3345, or HPRO 3351

RESTRICTION: Restricted to Health Promotion students in their final year of study.

### HPRO 4495.15: Health Promotion Internship.

This class is an extended professional development internship during the final year of study. It requires completion of a 14-week, 40 hours per week internship in a health promotion agency. The internship involves an in-depth agency analysis and the completion of a special service project for the agency, as well as several other academic projects. Details of the goals and specific procedures for the internship are contained in the current Internship Handbook.

FORMAT: : Internship – 14 weeks in the Fall term (September-December), or Winter term (January-April). Spring term (April to mid-July) available only with permission of the Internship Coordinator.

PREREQUISITE: Completion of all other program requirements and approval of the Student Services Administrator.

RESTRICTION: Restricted to Bachelor of Science (Health Promotion) students in their final term.

### HPRO 4700.06/4701.03/4702.03: Senior Seminar.

This class is tailored for small groups of students. It is designed to allow students to focus on a particular issue or set of related issues, that are not part of the regular curriculum. Part of this class could entail a practicum experience. The class will only be offered if a faculty member is available to supervise the work.

FORMAT: Seminar

RESTRICTION: Restricted to Health Promotion students in their final year

### HPRO 4800.06/4801.03/4802.03: Independent Study.

The Independent Study allows students to develop an area of specialization with library, laboratory or field research, under the tutelage of an appropriate faculty member.

NOTE: Students may take no more than a total of 6 credit hours of independent studies.

FORMAT: Research/tutorial 3 or 6 hours

PREREQUISITE: Fourth year status; a GPA of at least 3.00; a "B" grade in an earlier class in the area of study (where appropriate); consent of advisor; consent of tutor. Intention to register for an Independent Study should be confirmed with the undergraduate secretary by April 1st of the preceding academic year.

RESTRICTION: Restricted to School of Health and Human Performance students; others by permission of instructor, with priority to Health Professions students

## C. Bachelor of Science (Kinesiology)

### Program Description

Kinesiology is the study of the structure and function of the human body within the context of human movement and with a focus on the maintenance and enhancement of health and well-being. Students may elect to concentrate in one of three professional areas - ergonomics; fitness and lifestyle; or coaching science\* - or follow a more general stream with a focus on research or other professional areas in which human movement and health are central. The School offers a four-year BSc (Kinesiology) degree as well as a four-year honours degree in Kinesiology (see Section E below).

\* See stream requirements under Program of Study below.

The goals of these degrees are to provide students with:

1. A broad background in various subdisciplines of Kinesiology, including anatomy, physiology, neuropsychology, biomechanics, movement control and psychology of performance;
2. An exposure to several science disciplines which are prerequisite and/or complementary to the kinesiology subdisciplines (e.g., biology, physics, psychology, mathematics);
3. An introduction to the discipline of health promotion and an appreciation of the role kinesiology plays in health and well-being concerns of the individual;
4. An exposure to some aspects of the humanities and social sciences, as a means of enhancing the liberal education of the student and addressing social concerns in relation to health promotion;
5. A solid foundation in research methodology and statistics, including opportunities for independent research if the student should so choose;
6. An understanding of the principles and tools necessary to evaluate human movement from a variety of perspectives and in a variety of settings, as well as hands-on experience in several evaluative procedures;
7. Professional preparation in the areas of fitness and lifestyle; ergonomics; or coaching sciences;
8. Experiences in active and problem-based learning;
9. The necessary background to enable the student to pursue graduate work in kinesiology or other related fields.

### Program of Study

On admission into the BSc (Kinesiology) program, all students will be issued a Program of Studies Form. It is the responsibility of the student to ensure that all of the class requirements for the degree as outlined on the form are completed for graduation.

### Required Classes - BSc (Kinesiology)

• HAHF 2000.03	3
• HAHF 3100.03	3
• ANAT 1020.03	3
• PHYC 1310.03	3
• PHYL 1010.06	6
• KINE 1102.03	3
• KINE 1104.03	3
• KINE 1106.06	3
• KINE 1108.03	3
• KINE 2250.03	3
• KINE 2310.03	3
• KINE 2320.03	3
• KINE 2430.03	3
• KINE 2465.03	3
• KINE 3200.03	3
• KINE 3500.03	3
• KINE 4600.03	3
• MATH/STAT 1060.03	3

Kinesiology Electives \*18

Science Electives\*\*24

Open Electives\*\*\*21

\* Kinesiology electives must be at 3000 or 4000 level courses.

\*\* Science electives must be from the Faculties of Computer Science, Engineering, Science, or Medicine.

12 credit hours of science electives must be selected from the following list:

- BIOL 1010.03: Principles of General Biology I
- BIOL 1101.03: Principles of General Biology II

- PHYC 1320.03: Physics In and Around You
- CHEM 1011.03: General Chemistry Part I
- CHEM 1012.03: General Chemistry Part II
- MATH 1000.03: Differential & Integral Calculus
- MATH 1010.03: Differential & Integral Calculus
- PSYO 1011 or 1021.03: Introduction to Psychology and Neuroscience I
- PSYO 1012 or 1022.03: Introduction to Psychology and Neuroscience II

Six credit hours of the total 24 credit hours must be 2000 level or above.

\*\*\* Open electives must include: (1) six credit hours from Language and Humanities or Sociology (see list in Language & Humanities section under Degree Requirements in the Academic Calendar); (2) at least nine credit hours must be at the 2000 level or above.

Students considering the Honours degree are required to take six credit hours of Math, and are required to have 30 credit hours of science electives, with 12 credit hours of those Science electives at the 2000 level or above by the end of their final year. For further information see section B. Bachelor of Science (Kinesiology) with Honours (P: 348).

### Stream Requirements

Students interested in focusing on Ergonomics; Fitness and Lifestyle; or Coaching Science at an advanced level will be guided into one of three specialty streams. A maximum of 12 students/year/stream will be selected, primarily on the basis of GPA. Students wishing to complete a stream should consult the student advisor.

The following is a list of required classes for each stream. Any classes over the 18 credit hours of required KINE electives can be counted as open electives:

#### Ergonomics Stream

- KINE 3414.03: Physical Fitness Assessment and Program Design
- KINE 3476.03: Principles of Ergonomics
- KINE 3482.03: Care & Prevention of Injuries
- KINE 4466.03: Advanced Biomechanics
- KINE 4577.03: Cognitive Ergonomics
- KINE 4578.03: Physical Ergonomics
- KINE 4588.03: Clinical and Occupational Kinesiology

#### Fitness & Lifestyle Stream

- KINE 3414.03: Physical Fitness Assessment and Program Design
  - KINE 3419.03: Application of Physiological Principles to Human Performance
  - KINE 3485.03: Psychology of Sport
- OR**
- LEIS 3492.03: Counselling for Health and Well-being
  - KINE 4108.03: Mind/Body Connections and Well-being
  - KINE 4412.06: Advanced Fitness Assessment Exercise Prescription and Lifestyle Counselling

#### Coaching Science Stream

- KINE 3320.03: Anatomical Basis of Human Movement
- KINE 3419.03: Application of Physiological Principles to Human Performance
- KINE 3430.03: Principles of Skill Acquisition
- KINE 3482.03: Care and Prevention of Injuries
- KINE 3485.03: Psychology of Sport
- KINE 3740.03: Coaching Science Seminar
- KINE 3741.03: Coaching Science Practicum
- KINE 4740.03: Advanced Coaching Science Seminar
- KINE 4741.03: Advanced Coaching Science Practicum
- MGMT 2401.03: Introduction to Marketing

### D. Bachelor of Science (Kinesiology) with Honours

Students who wish to complete the Honours Program may apply at the end of their third year of study. *Acceptance into the honours program is contingent upon the willingness of a faculty member to serve as the honours thesis advisor.* To be considered for admission into the program, students must have fulfilled the following requirements:

1. Completed MATH/STAT 1060.
2. Completed a minimum of 24 credit hours of science electives, including a math class in addition to the required MATH/STAT 1060. The other math credit can be chosen from any MATH/STAT class at Dalhousie except for

MATH 1001.03, 1002.03, 1110.03, 1120.03, or 1115.03. Of the 24 credit hours of science electives, at least six credit hours must be 2000 level or above.

3. Completed an upper level Kinesiology class (at the 3000 level or above) in the area in which the research will be undertaken (e.g., ergonomics, biomechanics, exercise physiology, neuromuscular physiology) with a grade of at least B;
  4. Obtained an overall GPA of 3.5 on the previous 60 credit hours of work;
  5. Completed HAHF 3100.03 (Research Methods) with a minimum grade of B.
- Application is made through the Honours Coordinator by April 1st of the student's third year.

The completed Honours Program requires 30 credit hours of Science electives, six credit hours of which may be taken in the 4th year. 12 credit hours must be at the 2000 level or above.

NOTE: Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

NOTE: Students accepted into the Honours program must complete KINE 4900.06. This requirement is in lieu of six credit hours of Open Electives listed as part of the requirements for the BSc (Kinesiology).

### Honours Conversion

Students who have graduated with a Bachelor of Science (Kinesiology) degree can apply for the Honours Conversion program. Before taking KINE 4900.06, they must have satisfied the requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain prerequisite classes concurrently with KINE 4900. Application is made through the Honours Coordinator (details in the BSc (Kinesiology) with Honours section). Acceptance into the Honours Conversion program can only be considered provided a faculty member has agreed to supervise the project.

### KINE Class Descriptions

#### KINE 1102.03: Physical Activity and Health.

This course is designed to introduce students to the connection between exercise and health. The lecture portion explores how exercise affects the most prevalent diseases currently afflicting our society. The laboratory portion is designed to help students develop a progressive exercise program for themselves based on their current fitness and strength levels as well as physical activity preferences.

FORMAT: Lecture 3 hours, lab 1.5 hours

RESTRICTION: Restricted to Kinesiology students only

#### KINE 1104.03: Foundations in Kinesiology.

The objective of this class is to introduce students to Kinesiology as a discipline and for them to learn about the sub-disciplines and content areas that contribute to the general body of knowledge in Kinesiology. In addition to understanding what these sub-disciplines are, students will gain an understanding of the interrelationships among these sub-disciplines and the types of careers that students can enter. Students will be exposed to discipline content as well as the methods of measurement and evaluation and the technology involved in each of the disciplines. Problem Based Learning (PBL) will be used as the class instruction method.

FORMAT: Lecture 3 hours, lab 1.5 hours

RESTRICTION: Restricted to Kinesiology students

#### KINE 1106.03: Philosophy and Ethics for Kinesiologists.

Physical activity figures prominently in many aspects of society and culture. Kinesiologists are in a unique position to bridge the gap between the scientific study of physical activity and the implementation of physical activity programs in public and professional contexts. This course develops core principles in philosophy and ethics to help the aspiring kinesiologist think about and evaluate their role in society. Debate and critical analysis will figure prominently in the course.

FORMAT: Lecture 3 hours, tutorial 1 hour

RESTRICTION: Restricted to Kinesiology students only

#### KINE 1108.03: Psychology and Physical Activity.

Physical inactivity is widely recognized as a lifestyle associated with considerable health risk. The challenge of increasing the level of physical activity in the population requires an in-depth understanding of the individual and environmental factors that either promote or inhibit regular activity. Accordingly, this introductory course will provide students with the fundamental knowledge of how psychological concepts are related to physical activity participation and health. The main focus is to provide (a) a basic understanding of various social-

psychological concepts and principles involved in health and exercise psychology, and (b) to see how these concepts and principles might be translated into promoting health and wellness via physical activity participation. Core concepts include the basics of psychology research, theories, motivation, adherence, and behaviour modification.

FORMAT: Lecture 3 hours, lab 1.5 hours

RESTRICTION: Priority given to Kinesiology students

### **KINE 2250.03: Interdisciplinary Class in Human Nutrition.**

This course focuses on the science of nutrition and the role of nutrition in health. We study how the body responds to different nutrients including protein, carbohydrate, fat, vitamins, minerals, and water. Current knowledge and controversies regarding the role of diet in disease and optimal health will be explored.

FORMAT: Lecture 3 hours

CROSS-LISTING: HPRO 2250.03

### **KINE 2310.03: Physiology of Exercise.**

This is an introductory class for students with a basic knowledge of anatomy and physiology. It concentrates on the respiratory, cardiovascular and neuromuscular systems in terms of their involvement during exercise, their adaptation to different types of training and how they limit performance during exercise in different environmental conditions.

FORMAT: Lecture 3 hours, lab 1.5 hours

PREREQUISITE: ANAT 1020.03 or ANAT 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06

RESTRICTION: Restricted to Kinesiology students

### **KINE 2320.03: Kinesiological Anatomy.**

Neuroanatomical and musculoskeletal structures are presented and discussed in order to establish the understandings necessary for an in-depth analysis of human movement.

FORMAT: Lecture 3 hours, lab 1 hour

PREREQUISITE: ANAT 1020.03 or ANAT 1010.03 and PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06

RESTRICTION: Restricted to Kinesiology students

### **KINE 2430.03: Motor Control and Learning.**

This class deals with efficiency in completing movements to achieve a desired goal. It involves systematic changes in perception of the environment, decisions about what movements to make, as well as changes in how these movements are carried out. This class covers what is known about these processes as well as how this information can be applied.

FORMAT: Lecture 3 hours, lab 1.5 hours

RESTRICTION: Restricted to Kinesiology students

### **KINE 2465.03: Introductory Biomechanics.**

The purpose of this class is to introduce students to the area of biomechanics in human motion analysis. Students will be exposed to the concepts of kinematic and kinetic analysis of motion as well as muscle forces and moments of force as applied to the human system.

FORMAT: Lecture 3 hours, lab 1.5 hours

PREREQUISITE: PHYC 1300.06 or PHYC 1310.03

EXCLUSION: PHYC 2610.03

RESTRICTION: Restricted to Kinesiology students

### **KINE 3010.03: Introduction to Disability Management.**

Introduction to Disability Management is designed to provide students with a comprehensive understanding of an occupational injury, its impact and recovery processes. In particular, the class will expose students to levels of disability management in organizational systems, injury prevention and on-site management.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

CROSS-LISTING: DISM 3010.03

### **KINE 3200.03: Sociocultural Issues in Physical Activity.**

This course will provide students with an introduction to social theory, culture, and social psychology as applied to physical activity and sport. While recognizing that physical activity does not take place in a social vacuum, and that social content often influences how physical activity and sport are experienced, this course explores participation in, and perceptions of physical activity and sport according to gender, social class, age, sexual orientation, ethnic group and

nationality. The meaning of physical activity and sport in society, the role of Canadian public policy in promoting and facilitating participation in physical activity, and sport as an agent for social change will also be explored.

FORMAT: Lecture

### **KINE 3320.03: Anatomical Basis of Human Movement.**

The purpose of this class is to integrate information from movement sciences in order to analyze a broad spectrum of human activities, from simple single contractions to complex patterns of both fine motor and gross motor activities. Industrial, recreational, sport and fitness movements will be examined using an integrated digital video/8 channel EMG approach.

FORMAT: Lecture 3 hours

PREREQUISITE: ANAT 1020.03 or ANAT 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06, KINE 1104.03, KINE 2310.03, KINE 2320.03, KINE 2430.03, KINE 2465.03

RESTRICTION: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

### **KINE 3384.03: Physical Activity for Persons with Disabilities.**

The etiology and effects of the more prevalent disabling conditions form the bases of strategies for teaching, coaching and rehabilitating those affected. Emphasis is placed on the physical components of disability and the adaptation of the environment and equipment to facilitate learning of ADL skills and sport. A practicum is required.

FORMAT: Lecture/practicum 3 hours

PREREQUISITE: KINE 2320.03

### **KINE 3414.03: Physical Fitness Assessment and Program Design.**

Evaluation of various methods of physical fitness assessment, designing fitness programs for diverse populations and identifying motivational techniques with emphasis on the areas of cardiovascular fitness, weight reduction, pre- and post-natal programs and the elderly. In addition, laboratory work prepares the student for the Canadian Society for Exercise Physiology (CSEP) Certified Personal Trainer (CPT) theory and practical exams.

FORMAT: Lecture/lab 3 hours

PREREQUISITE: KINE 2310.03

RESTRICTION: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

### **KINE 3419.03: Application of Physiological Principles to Human Performance.**

This course focuses on physiological adaptations made by the body to different kinds of physical training. How selected factors can influence these adaptations is also examined. Students apply their knowledge of exercise physiology to athletic performance in a research project.

FORMAT: Lecture 3 hours, lab 1 hour

PREREQUISITE: KINE 2310.03

RESTRICTION: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

### **KINE 3430.03: Principles of Skill Acquisition.**

This class will provide students with experience in applying the theoretical concepts of motor control and learning. Variables that impact on skill acquisition, practice and instruction will be examined and applied. Real world settings will be used to illustrate the application of the principles of skill acquisition.

FORMAT: Lecture 3 hours

PREREQUISITE: KINE 2430.03

RESTRICTION: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

### **KINE 3440.03: Neural Basis of Sensory and Motor Function.**

This course will provide students with a comprehensive understanding of the neural systems that mediate sensory and motor functions in the human.

Proprioception, vision, somatosensation and vestibular sense will be explored in detail. Spinal reflexes, supraspinal pathways and cortical systems will be analyzed in detail, using case studies to illustrate key principles. Students will learn about the major classes of neurological movement disorders, from assessment to intervention. The course will build upon introductory courses in neural basis of behaviour.

FORMAT: Lecture 3 hours, tutorial 1 hour

PREREQUISITE: KINE 2430 or PSYO/NESC 2470

RESTRICTION: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

### **KINE 3476.03: Principles of Ergonomics.**

This class applies health and human performance concepts in kinesiology to the workplace. The class content includes identifying characteristics of work environments and the effect on performance and health, the design of effective workplaces and the use of training and educational programs to increase productivity and to reduce injuries.

FORMAT: Lecture 3 hours, lab 1.5 hours

PREREQUISITE: KINE 2310.03; KINE 2320.03; KINE 2430.03; KINE 2465.03

RESTRICTION: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

### **KINE 3482.03: Prevention and Care of Injuries.**

An introduction into the fields of Sports Medicine and work-related musculoskeletal disorders, specifically the basic injury mechanisms, early recognition, care and prevention, pathology, tissue healing, emergency care, and basic principles of therapeutic exercise and modalities.

FORMAT: Lecture 3 hours, lab 1.5 hours bi-weekly

PREREQUISITE: ANAT 1020.03 or ANAT 1010.03, PHYL 1010.06 or 1000.06 or PHYL 2030.06, KINE 2320.03

RESTRICTION: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.

### **KINE 3485.03: Psychology of Sport.**

This class offers an awareness and understanding of the phenomena involved in mental preparation in sport. It will systematically analyze, investigate and assess psychological skills, attributes and preparation in this area, and their application in other environments. Emphasis will also be placed upon personal experience and practical application.

FORMAT: Lecture/3 hours

PREREQUISITE: PSYO 1011.03 or 1021.03 and PSYO 1012.03 or 1022.03 or permission of instructor

### **KINE 3500.03: Principles of Measurement and Evaluation.**

An introduction to the fundamentals involved in measurement and evaluation, including writing objectives, designing and administering tests, organizing and analyzing test results. Tests used to measure physical fitness, specific motor skills and health knowledge are investigated.

FORMAT: Lecture 3 hours, lab 1 hour

PREREQUISITE: KINE 1104.03, ANAT 1020.03 or 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06, STAT 1060.03

RESTRICTION: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

### **KINE 3740.03: Coaching Science Seminar.**

The purpose of this class is to provide students with the opportunity to learn about the fundamental principles and concepts of effective coaching planning and practice. Students will explore the role of the coach; the philosophical approaches to coaching pedagogy; the holistic attainment of individual potential; as well as the coaching code of ethics. Identification of issues related to risk management; developmental age; skill analysis and development; and physical preparation will also prepare students to meet the requirements for the Part A and Part B of the Theory component of the National Coaching Certification Programme (NCCP).

FORMAT: Lecture/group activities/3 hours

PREREQUISITE: HAHF 2000, KINE 1104, KINE 2310, KINE 2320, KINE 2430, KINE 2465

### **KINE 3741.03: Coaching Science Practicum.**

The purpose of this class is to provide students with the opportunity to observe, identify, apply and evaluate the fundamental principles and methodologies of coaching that are associated with the creation of an effective practice, and training environment, for the developing athlete. This will be facilitated through the completion of a twelve week placement with a school, or club, mentor coach.

FORMAT: Placement with mentor coach, 3 hours per week

PREREQUISITE: KINE 3740.03

### **KINE 4108.03: Mind/Body Connections and Well-being.**

The connection of mind and body as it relates to well-being is addressed through a survey of complementary (or alternative) healthcare practices including mind/body medicine (e.g., relaxation, meditation), therapeutic systems (e.g.,

chiropractic, homeopathy), herbology, bodywork techniques (e.g., massage, pressure point therapies), movement therapies and exercises (e.g. Alexander, yoga) and integrated medical systems (e.g., Chinese medicine, Ayurveda). Theoretical and scientific bases of each are covered and controversies surrounding these practices are addressed. This class is not designed to train students to be practitioners of any technique.

FORMAT: Lecture 3 hours

PREREQUISITE: HAHF 3100.03

RESTRICTION: Restricted to students enrolled in their final year of study in the School of Health and Human Performance or by permission of instructor

### **KINE 4412.06: Advanced Fitness Assessment, Exercise Prescription and Lifestyle Counselling.**

The objective of this class is to provide the student with advanced techniques to assess physical fitness, design physical activity/exercise programs and lifestyle counselling skills. In addition, this class will assist the student with the theoretical and practical knowledge required to write the Certified Exercise Physiological exam.

SIGNATURE REQUIRED

FORMAT: Lecture 3 hours, lab 1 hour

PREREQUISITE: ANAT 1020.03 or 1010.03, PHYL 1010.06 or PHYL 1000.06 or PHYL 2030.06, KINE 2310.03, KINE 3414.03, KINE 3419.03, CPR

RESTRICTION: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

### **KINE 4466.03: Advanced Biomechanics.**

This class takes a quantitative approach to understanding human movement from a mechanical perspective. Concepts presented in the class will be illustrated with examples taken from the areas of sport, exercise, activities of daily living, and ergonomics. Students will be introduced to several techniques used in biomechanics research.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: KINE 2465.03

RESTRICTION: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

### **KINE 4577.03: Cognitive Ergonomics.**

This class examines the role of cognition in injury prevention and human performance in the workplace. The class generally takes an information processing approach to consider the various topics and related issues. The class requirements include a written test on the content, a data collection project and a class presentation.

FORMAT: Lecture 3 hours

PREREQUISITE: KINE 3476.03

RESTRICTION: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

### **KINE 4578.03: Physical Ergonomics.**

This advanced level class examines the application of the physical sciences in the productivity, health and safety of the workplace. The class will consider the design of work and the workplace from a physical science perspective. Due emphasis will be placed on the importance of the understanding of, and designing for, the capacity and capabilities of the human operator. When possible, the class will consider the present national and international standards in health and safety related to the content areas. The class requirements include a written test on the content, a project and a class presentation.

FORMAT: Lecture 3 hours, lab 1 hour as required

PREREQUISITE: STAT 1060.03 or STAT 2060, KINE 2310.03, KINE 2320.03, KINE 2465.03, KINE 3476.03

RESTRICTION: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

### **KINE 4588.03: Clinical and Occupational Kinesiology.**

This advanced level class examines the role that Kinesiology can play in clinical and occupational settings. In particular, the class will expose the student to an integrated approach in human motion analysis with a primary focus on the use of electromyography and its relationship to other biomechanical and physiological measures. Due emphasis will be placed on the importance of understanding the strengths and weaknesses of present laboratory and field measures of human motion. The class requirements include a written test on the content, a project and a class presentation.

FORMAT: Lecture 3 hours, lab 1 hour

PREREQUISITE: KINE 3414.03, KINE 4466.03

RESTRICTION: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

### KINE 4600.03: Practicum in Kinesiology.

Students take part in a supervised practical experience that links classroom knowledge to professional practice. Under the supervision of a kinesiologist, fitness or training professional, physical or occupational therapist, ergonomist or other related professional, students gain hands-on experience in a fitness/wellness/allied health field. Students document and critically evaluate their experiences.

FORMAT: Field placement/seminar

PREREQUISITE: KINE 1104.03, KINE 2310.03, KINE 2320.03, KINE 2430.03, KINE 2465.03, HAHP 2000.03, HAHP 3100.03, KINE 3500.03, and at least three 3000 or 4000 level kinesiology courses.

RESTRICTION: Restricted to Kinesiology students enrolled in their final year of study in the School of Health and Human Performance.

### KINE 4700X/Y.06/4701.03/4702.03: Senior Seminar.

This class is tailored for small groups of students. It is designed to allow students to focus on a particular issue or set of related issues, that are not part of the regular curriculum. Part of this class could entail a practicum experience. The class will only be offered if a faculty member is available to supervise the work.

NOTE: Students taking KINE 4700 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Seminar

RESTRICTION: Restricted to Kinesiology students in their final year of study.

### KINE 4740.03: Advanced Coaching Science Seminar.

The purpose of this class is to provide students with the opportunity to learn about the advanced principles and concepts of effective coaching planning and practice. Students will design, quantify and monitor a season training plan using PLAN software, addressing the performance factors of speed, strength, suppleness, stamina and skill appropriate to the maturational level of the athlete, as well as the integration of psychological preparation and competitive strategies. The class will also prepare students to meet the requirements for Level Three of the Theory component of the national Coaching Certification Programme (NCCP).

FORMAT: Lecture/group activities/3 hours

PREREQUISITE: KINE 3740.03 and KINE 3741.03, Level 1 Technical, National Coaching Certification Programme. (Students are required, at their own expense, to pursue this certification externally.)

### KINE 4741.03: Advanced Coaching Science Practicum.

The purpose of this class is to provide students with the opportunity to observe, identify, apply and evaluate the advanced principles and methodologies of coaching that are associated with the creation of an effective practice, and training environment, for the developing athlete. This will be facilitated through the completion of a twelve week placement with a varsity, school, or club, mentor coach. Students will also apply an intervention strategy developed to enhance a controllable specific performance factor in a sport of choice.

FORMAT: Placement with mentor coach, 3 hours

PREREQUISITE: KINE 4740.03

### KINE 4800X/Y.06/4801.03/4802.03: Independent Study.

Senior undergraduate students develop an area of specialization under the direction of a faculty member.

FORMAT I: Experimental research (laboratory experiment) or other research study, 3 or 6 hours

FORMAT II: Literature research, 3 or 6 hours

NOTE: Students may take no more than a total of 6 credit hours of independent studies

PREREQUISITE: The same as those for experimental research independent studies described under FORMAT I above, except that classes in research methods and statistics are not required

RESTRICTION: Restricted to Kinesiology students. Others by permission of instructor, with priority to Health Professions students.

### KINE 4900X/Y.06: Honours Thesis.

Students carry out an independent piece of original research in the respective field of expertise of their supervisor. Students become familiar with the experimental procedures involved in data collection, analysis, literature searches and scientific writing.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Independent research.

RESTRICTION: Restricted to Kinesiology honours students.

## E. Bachelor of Science (Recreation) - Therapeutic Recreation

### Program Description

Therapeutic Recreation involves the delivery of change-oriented services to individuals with disabilities, illness and other limitations, with the focus on increasing quality of life through leisure and recreation involvement. The graduates of the Therapeutic Recreation degree will be skilled in the areas of: disability and illness, leisure theory, assessment, planning (program and client planning), program implementation and evaluation, and documentation. Graduates will find employment in both traditional clinical settings such as rehabilitation facilities, psychiatric hospitals and nursing homes, and in community settings such as community mental health centres or associations for community living, etc.

### Objectives

The general objectives of the program are:

1. To provide the student with a broad educational exposure to various social science and humanities disciplines (e.g., Psychology, Sociology, Economics, Political Science, Anthropology, History);
2. To familiarize students with current social science-based research methods and statistics;
3. To provide the student with the necessary skills and knowledge for entry into the roles of leadership, advocacy, constancy and education in recreation and leisure services;
4. To provide the necessary background to enable students to pursue graduate work in leisure studies, management studies or the social sciences and humanities.

### Program of Study

On admission into the BSc (Recreation) program, all students will be issued a Program of Studies Form. It is the responsibility of the student to ensure that all of the class requirements for the degree as outlined on the form are completed for graduation.

### Required Classes BSc (Recreation) - Therapeutic Recreation

• HAHP 2000.03	3
• HAHP 3000.03	3
• HAHP 3100.03	3
• ANAT 1020.03	3
• PHYL 1010.06	6
• KINE 3384.03	3
• LEIS 1127.03	3
• LEIS 2127.03	3
• LEIS 2130.03	3
• LEIS 2361.03	3
• LEIS 2384.03	3
• LEIS 3127.03	3
• LEIS 3296.03	3
• LEIS 3426.03	3
• STAT 1060.03/MATH 1060.03	3
• LEIS 3492.03	3
• LEIS 4365.03	3
• LEIS 4597.15	15

### Required Arts & Social Science Classes

• PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03	6
• PSYO 2220.03	3
• SOSA 1000.06 or SOSA 1050.06 or SOSA 1200.0	6

### Therapeutic Recreation Electives

Two of the following:

• LEIS 4482.03	3
• LEIS 4512.03	3
• LEIS 4540.03	3
• LEIS 4563.03	3
• Designated Elective*	3
• Open Electives**	27

\* Designated electives can be chosen from the classes in the Language/Humanities list (under Degree Requirements at the front of the calendar), Health Professions or Interdisciplinary Health Professions, Health Services Administration or Social Sciences.

\*\*12 of the 27 credit hours of the open electives must be 2000 level or above.

NOTE: Students should consult the NCTRC website (<http://www.NCTRC.org>) for CTRS Certification requirements.

## F. Bachelor of Science (Recreation)/Bachelor of Management

### Program Description

The curriculum of this combined program was developed in response to guidance from alumni and practicing professionals in the field — it was clear that while graduates entering the field of recreation administration needed the strong grounding in the recreation discipline, they also needed more management skills. The Faculty of Management's Bachelor of Management degree emphasizes an orientation to management in the public and non-profit sector. This combined degree program enhances career options of future recreation students.

The Bachelor of Science (Recreation)/Bachelor of Management is a five-year program comprising 25 full credits (50 half credits). Upon completion of this program, the successful student graduates with a Bachelor of Science (Recreation) degree and a Bachelor of Management degree.

### Objectives

1. To provide the student with a broad educational exposure to various social science and humanities disciplines (e.g., Psychology, Sociology, Economics, Political Science, Anthropology, History);
2. To familiarize students with current social science-based research methods and statistics;
3. To provide the student with the necessary skills and knowledge for entry into the professional roles of leadership, advocacy, education and service delivery in recreation.
4. To provide the necessary background to enable students to pursue graduate work in leisure studies, management studies, or the social sciences and humanities.

### Required Classes - Bachelor of Science (Recreation)/Bachelor of Management

#### Required Health and Human Performance Classes

• HAHP 2000.03	3
• HAHP 3000.03	3
• HAHP 3100.03	3
• LEIS 1127.03	3
• LEIS 2127.03	3
• LEIS 2361.03	3
• LEIS 2384.03	3
• LEIS 3296.03	3
• LEIS 3360.03	3
• LEIS 3362.03	3
• LEIS 3370.03	3
• LEIS 4362.03	3
• LEIS 4597.15	15

#### Required Management Classes

• MGMT 1000.03	3
• MGMT 1001.03	3
• MGMT 1501.03	3
• MGMT 1601.03	3
• MGMT 1702.03	3
• MGMT 2101.03	3
• MGMT 2303.03	3
• MGMT 2304.03	3
• MGMT 2401.03	3
• MGMT 2702.03	3
• MGMT 2801.03	3
• MGMT 2803.03	3
• MGMT 3201.03	3

• MGMT 3501.03	3
• MGMT 3602.03	3
• MGMT 4001.03	3

### Other Required Classes

- ECON 1101.03
- ECON 1102.03
- SOSA 1000.06 or SOSA 1050.06 or SOSA 1100.06 or SOSA 1200.06
- Designated Elective (6)\*
- Open Electives (27)\*\*
- MGMT/LEIS electives (06)\*\*\*

\*Designated electives can be chosen from classes in the Language/Humanities list (under Degree Requirements at the front of the calendar), Health Professions, or Interdisciplinary Health Professions, Health Services Administration, or Social Sciences.

\*\*The equivalent of 27 credit hours chosen from all classes offered in the University. Twelve of the 27 credit hours must be 2000 level or above.

\*\*\*The equivalent of 6 credit hours must be chosen from any MGMT or LEIS class.

NOTE: Students must complete a six credit hour writing requirement. This can be completed by taking either SOSA 1050 for the introductory Sociology requirement in year one or by choosing six credit hours from the list of Writing Classes within the College of Arts and Science Degree requirements.

### Internship Requirement (LEIS 4597.15)

The equivalent of 2.5 (five half credits) fulfills the internship requirement during the student's final year.

## G. Bachelor of Science (Recreation) with Honours and Bachelor of Science (Recreation) with Honours/Bachelor of Management

Students wishing to be considered for entrance into the Honours Program must meet the minimum requirements listed below. Acceptance to the program after meeting these requirements will depend on a faculty member being willing to supervise the honours thesis.

1. Completed a minimum of 75 credit hours towards the Bachelor of Science (Recreation) degree. Normally students will have completed five semesters prior to beginning the honours component of the program.
2. Obtained a GPA of 3.5 based on the previous 45 credit hours of work.
3. Complete HAHP 3100: Research Methods with a minimum grade of B.
4. Completed a 3000 level or higher LEIS class most related to the area of research.
5. Completed the Financial, Technical, Equipment and Space Support Form indicating the financial needs of the thesis can be met.

Application is made by November 15th of the student's third year (for Therapeutic Recreation students) and fourth year (for Recreation Management students).

NOTE: Students accepted into the Honours program must complete LEIS 4101.03 and LEIS 4102.03. These six credit hours may be attributed as open electives or as recreation-related electives.

The Honours Program is part of the 120 credit hours required for the Bachelor of Science (Recreation) degree, or part of the 150 credit hours for Recreation Management.

Students accepted into the Honours program are required to attend an Honours seminar weekly for the first two months, and then monthly.

### Honours Conversion

Students who have graduated with a Bachelor of Science (Recreation) degree can apply for the Honours Conversion program. Before taking LEIS 4101.03 and LEIS 4102.03, they must have satisfied the requirements for the Honours Program. With the approval of the Honours Coordinator, it may be possible to take certain pre-requisite classes concurrently with LEIS 4101.03 and LEIS 4102.03. Application is made through the Honours Coordinator (details in the BSc (Recreation) with Honours section). Acceptance into the Honours Conversion program can only be considered provided a faculty member has agreed to supervise the project.

## LEIS Class Descriptions

### LEIS 1127.03: Foundations of Recreation.

An understanding of the place and potential of leisure for individual Canadians and Canadian society is essential if we are to move beyond the conviction that only labor is to be valued. This class introduces students to concepts including play, sport, recreation and leisure; how they are viewed and valued in our society; and how they relate to health and well-being. The content provides an overview of leisure service delivery, public access to leisure opportunities, variations in leisure involvement due to social and cultural differences, and issues that are important for future leisure service professionals. Students will have the opportunity to increase writing, verbal communication and computer skills, and learn how to use the library effectively. Participation in a professional conference is a component of the learning experience of this class. The students are required to participate in an Orientation to the recreation program that will provide the environment that will create a learning community for the next three to four years of their education experience. Students are also required to join a recreation professional group while enrolled in this class.

FORMAT: Lecture/discussion 3 hours

RESTRICTION: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to health Professions students.

### LEIS 1217.03: Leisure Theory.

This class will provide an introductory analysis of leisure in modern society from sociological, psychological, and social psychological perspectives. The role of leisure in the everyday life of individuals will be discussed in terms of social relationships, life stage, gender, the family, work, attitudes and motivations, etc. In addition, since the role and function of leisure is affected by political, economic, and cultural systems, a main-level perspective on leisure will also be provided by focusing on such topics as the influence of modern technology, the commercialization of leisure, the influence of social institutions and of the mass media.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: SOSA 1000.06 or SOSA 1200.06 or PSYO 1021.03 and PSYO 1022.03 or PSYO 1011.03 and PSYO 1012.03; LEIS 1127.03

RESTRICTION: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.

### LEIS 2130.03: Foundations and Concepts of Therapeutic Recreation.

This class provides the conceptual foundation for the study of therapeutic recreation. Philosophical, conceptual and historical issues related to the delivery of therapeutic recreation services will be discussed in terms of health and health promotion. The class will also involve the examination of professional issues such as standards of practice, ethics, quality assurance, etc.; the scope of therapeutic recreation service delivery; and service delivery settings. Finally, students will be exposed to the variety of therapeutic recreation settings through site visits and observation. Students are required to join a therapeutic recreation professional group or provide the instructor with documentation on their current membership in a therapeutic recreation organization.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: LEIS 1127.03

RESTRICTION: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.

### LEIS 2361.03: Program Planning.

Designing, planning, implementing and evaluating programs is fundamental to both leisure services and health education. Both disciplines develop programs to enhance the quality of life for individuals, groups and communities. This class reviews the principles of program planning, various program planning models, and examples of programs that are pertinent to leisure services and health education/promotion. The planning process will include issues such as targeting specific populations, scanning for needs and assets, partnering, managing stakeholder relationships, and evaluation.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: LEIS 1127.03

CROSS-LISTING: HPRO/HEED 2361.03

RESTRICTION: Restricted to Bachelor of Science (Recreation), Bachelor of Science (Recreation)/Bachelor of Management and Bachelor of Science (Health Promotion) students or with permission of the instructor.

### LEIS 2384.03: Leisure and Individuals with Disabilities.

An introduction of current philosophy, issues and practices relating to leisure opportunities for persons who, due to physical, mental, and social conditions, have difficulty gaining access to community services. An analysis of leisure behaviours, attitudes and attitudinal development, barriers, and needs of individuals with various disabilities and members of the community will be provided throughout the class. Issues related to mainstreaming, integration and normalization will be themes throughout the class. A practicum is required in order to facilitate hands-on experience with individuals with disabilities.

FORMAT: Lecture/discussion/practicum 3 hours

PREREQUISITE: LEIS 1127.03

RESTRICTION: Restricted to School of Health and Human Performance students. Others by permission of instructor, with priority to Health Professions students.

### LEIS 3127.03: Leisure Education.

This class is designed to provide students with the knowledge and skills required to facilitate leisure education interventions designed to bring about desired changes in the leisure behaviour of individuals with disabilities. While the focus of the class is on leisure education, the overarching concepts of health, wellness, and health promotion will be incorporated into the class material. The class will address the following three broad areas: a) concepts and models of leisure education, b) content related to specific skills required for leisure involvement [leisure awareness, values clarification, social skills development, friendship development, stress management, assertiveness, leisure resources, decision making, etc.] and c) instructional and interactional techniques used in leisure education. In addition, students will have the opportunity to plan and facilitate leisure education experiences in class.

FORMAT: Lecture/discussion/lab 3 hours

PREREQUISITE: LEIS 1127.03; LEIS 2130.03; LEIS 2361.03; LEIS 2384.03

RESTRICTION: Restricted to Recreation students. Others by permission of instructor, with priority to Health Professions students.

### LEIS 3296.03: Leadership and Group Dynamics.

This class will focus primarily on the function of leadership and the process of small group dynamics, as applied to recreation and health education service delivery. Emphasis will be placed on the achievement of individual and group goals in health related settings. In addition, effective leadership of individuals and groups within a community, through direct experience and observation, will be emphasized.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: LEIS 1127.03 or HPRO 1195.03

RESTRICTION: Restricted to Health Promotion and Recreation students.

### LEIS 3360.03: Analysis of Leisure Service Delivery Settings.

Reflections on the twentieth century reveal tremendous changes in the way people live. These changes have impacted work, family structure, and mental and physical well-being, and signal the importance and need of opportunities for leisure pursuits. Leisure is one of life's greatest gifts — an important dimension influencing the quality of an individual's life. Similarly, leisure enhances the quality of life available to a society or culture. The growth of the leisure industry reflects the ever increasing value that individuals are placing upon leisure in their lives. It is essential for the student of recreation management to know and understand that leisure delivery and life satisfaction are dependent upon effective organizational analysis and the quality of services provided. This class presents historical and contemporary concepts of the diverse types of agencies and institutions providing leisure services in North America. It will review the nature and effectiveness of services provided by various leisure service agencies in the private, private non-profit, commercial recreation, travel and tourism sectors of the leisure industry. It will seek to (a) evaluate the political, social, physical and economic impact on each of the sectors, (b) determine ways of assessing the assurance of quality service delivery, and (c) find ways of motivating improvements in the identifying and meeting of consumers' leisure needs, today and in the future. Consideration is also given to organizational structure and governance within leisure service settings, and the incorporation of the "benefits based approach" to leisure service delivery.

FORMAT: Lecture/discussion/case study/agency analysis/3 credit hours

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS/HPRO/HEED 2361.03, MGMT 1000.03, MGMT 1001.03, PUAD 2801.03

RESTRICTION: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others by permission of instructor, with priority to Health Professions students.

### LEIS 3362.03: Financial Management and Fundraising.

This course builds on previous functions of management such as program planning and analysis of leisure services by further focusing on the budgeting process, cost analysis, pricing of services, resource inventory and management, fundraising and grant writing. Strategic analysis of economic trends in understanding financial management, purchasing, inventory control, fiscal policy and accountability, and financial auditing will also be examined. Course content will be presented through lecture, case study analysis, budget, and grant proposal development. Such information will be applicable to management of public, private, commercial and/or community non-governmental recreation, health, and/or sport organizations.

PREREQUISITE: LEIS/HPRO/HEED 2361.03, MGMT 2101.03

EXCLUSION: LEIS 4361.03

RESTRICTION: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others with permission of the instructor.

### LEIS 3370.03: Recreation Facility Design and Operations Management.

This class will emphasize the management functions of planning, organizing, and coordinating as it looks at the role of the manager in effectively managing recreation physical facilities and environmental resources. The class will review the new and emerging trends in facility design and cover the management process in the planning, and construction of indoor and outdoor recreation facilities, parks, playgrounds and pools. The class content will also focus on the core operational management competencies essential for the management of recreational facilities: namely, organizational structure and staffing; facility operations and maintenance, control and security; risk management and litigation; equipment procuring and inventory control.

FORMAT: Lectures/guest lectures/facility analysis/practicum experience, 3 credit hours

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS/HPRO/HEED 2361.03, INFO 1601.03, MGMT 2303.03 and MGMT 2304.03

RESTRICTION: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others by permission of instructor, with priority to Health Professions students.

### LEIS 3426.03: Therapeutic Recreation Service Delivery.

Issues related to the delivery of therapeutic recreation services will be the focus of this class. In particular, the following topics will be addressed: documentation in therapeutic recreation; client assessment issues; therapeutic recreation program planning (identifying client needs, selecting appropriate interventions, task and activity analysis, planning change-oriented programs, writing behavioural objectives, etc.); program and client evaluation; written plans of operation. The final component of this class will be the opportunity to work with individuals with disabilities in a program planning context.

FORMAT: Lecture/discussion/practicum 3 hours

PREREQUISITE: LEIS 1127.03, LEIS 2130.03, LEIS/HPRO/HEED 2361.03, LEIS 2384.03, KINE 3384.03

RESTRICTION: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.

### LEIS 3492.03: Counselling for Health and Well-being.

This class is designed to provide students with the knowledge and skills required to utilize effective communication and helping behaviours which are designed to facilitate change in the leisure behaviour of individuals with disabilities or other health problems. While the focus of the class is on facilitation techniques, the overarching concepts of quality of life, health, and health promotion will be incorporated into the class material. The class will address four broad topical areas: a) concepts of quality of life, health, health promotion, and lifestyle; b) concepts and models of helping; c) communication skills and therapeutic techniques; d) lifestyles issues related to health and well-being. Finally, students will have the opportunity to practice counselling techniques through role playing and simulations.

FORMAT: Lecture/discussion/lab 3 hours

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03

RESTRICTION: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.

### LEIS 4101.03: Advanced Research Methods.

The purpose of this course is to provide students with an opportunity to develop their understanding of research methodologies and apply their knowledge to a specific recreation/leisure studies topic. Theories and methodologies will be

discussed with relevance to leisure studies. The students will develop an honours thesis and ethics proposal as part of the course requirements.

PREREQUISITE: LEIS 1127.03, HAHF 3100.03

RESTRICTION: Restricted to Recreation honours students.

### LEIS 4102.03: Honours Thesis.

The purpose of this course is to develop research skills by conducting an independent research project and writing a formal research report based on the findings. Students will demonstrate their knowledge and ability in research methodologies, data collection, analysis, and formal academic writing.

PREREQUISITE: HAHF 3100.03 and LEIS 4101.03 with a grade of B or better in each, and ethical approval by August 1.

RESTRICTION: Restricted to Recreation honours students.

### LEIS 4362.03: Recreation Entrepreneurship and Special Events.

Through lecture, discussion, and case study analysis, this class will provide the student with advanced insight and applied experience in selective people-based management concepts and functions of directing, coordinating and staffing that will be useful to the potential or practicing manager in sport administration, community, or commercial leisure and health service delivery agencies. In particular, a focus will be directed towards special event management and planning, and marketing and business plan development.

PREREQUISITE: LEIS/HPRO/HEED 2361.03, LEIS 3362.03, MGMT 2303.03, MGMT 2401.03

EXCLUSION: LEIS 3361.03

RESTRICTION: Restricted to Bachelor of Science (Recreation)/Bachelor of Management students. Others with permission of the instructor.

### LEIS 4365.03: Administrative Concepts in Therapeutic Recreation.

This class emphasizes the essentials of management that are pertinent to being an effective practicing therapeutic recreation manager in either a clinical setting, a healthcare facility, or a community-based leisure or health service setting. After introducing the student to the theory and discipline of management and related ethical perspectives, the class will examine selective administrative functions in each of the areas of (a) Operational Management, i.e. budgeting and financial management, sources of revenue generation and grant writing, decision making, problem solving and conflict management, etc.; (b) Human Services Management, i.e., staff recruiting and selection, staff training and development, effective communication, motivation, performance appraisal, and volunteer management, etc. (c) Consumer Management, i.e., quality service management, practitioner performance, legal liability and risk management, etc.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03

RESTRICTION: Restricted to Bachelor of Science (Recreation) students. Others by permission of instructor, with priority to Health Professions students.

### LEIS 4482.03: Therapeutic Recreation Specialization: Youth at Risk.

Youth as a sector of society and as a stage in human development is of great significance in the study of leisure. Particularly relevant is the issue of unemployment and underemployment which has created a number of problems such as low self-worth, alcohol abuse, teenage suicide, etc. There are programs being developed to address these problems, many of which are experientially based, e.g., Outward Bound, study service, service learning and national service. This class will study the phenomenon of youth development in the light of experiential educational approaches. During the class there will be an expectation that the students will meet and interact with a variety of youth. A practicum is included.

FORMAT: Lecture/practicum 3 hours. discussion

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03, PSYO 2220.03

RESTRICTION: Bachelor of Science (Recreation) students in their final two years of study.

### LEIS 4512.03: Therapeutic Recreation Specialization: Physical and Developmental Disabilities.

This class is an upper level therapeutic recreation specialization class which takes the concepts and skills learned in the previous therapeutic recreation classes and applies them specifically to clients with physical and developmental disabilities. Initially, issues related to etiology, characteristics, and treatment needs of clients with various physical and developmental disabilities will be discussed. The

implications of these characteristics for therapeutic recreation services and the various service settings in which therapeutic recreation services are provided will then be examined. Finally, the therapeutic recreation service delivery issues specific to physical and developmental disabilities will be examined, including assessment procedures, program intervention techniques, etc. Site visits, observations, and simulations will be used to facilitate the application of this material.

FORMAT: Lecture/discussion/practicum 3 hours

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03, KINE 3384.03

RESTRICTION: Restricted to Bachelor of Science (Recreation) students in their final two years of study. Others by permission of instructor, with priority to Health Professions students.

### **LEIS 4540.03: Therapeutic Recreation Specialization: Addiction and Mental Illness.**

This class is an upper level therapeutic recreation specialization class which takes the concepts and skills learned in the previous therapeutic recreation classes and applies them specifically to clients with mental health problems and/or addiction. Initially, issues related to etiology, characteristics, and treatment needs of clients with addiction and mental illness will be discussed. The implications of these characteristics for therapeutic recreation services and the various service settings in which therapeutic recreation services are provided will then be examined. Finally, the therapeutic recreation service delivery issues specific to mental illness and addiction will be examined, including assessment procedures, program intervention techniques, etc. Site visits, observations, and simulations will be used to facilitate the application of this material.

FORMAT: Lecture/discussion/practicum 3 hours

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03, PSYO 2220.03

RESTRICTION: Restricted to Bachelor of Science (Recreation) students in their final two years of study. Others by permission of instructor, with priority to Health Professions students.

### **LEIS 4563.03: Therapeutic Recreation Specialization: Aging and Lifestyle.**

This class is an upper level therapeutic recreation specialization class which takes the concepts and skills learned in the previous therapeutic recreation classes and applies them specifically to older adults. Initially, issues related to theories of aging, characteristics of older adults and pre-retirement planning will be discussed. The implications of these characteristics for therapeutic recreation services and the various service settings in which therapeutic recreation services are provided will then be examined. Finally, the therapeutic recreation service delivery issues specific to older adults will be examined, including assessment procedures, program intervention techniques, documentation and efficacy of therapeutic recreation service delivery for this population. Site visits, observations, and simulations will be used to facilitate the application of this material.

FORMAT: Lecture/discussion/practicum 3 hours

PREREQUISITE: LEIS 1127.03, LEIS 2127.03, LEIS 2130.03, LEIS 2384.03, LEIS 3127.03, LEIS 3426.03, LEIS 3492.03, PSYO 2220.03

RESTRICTION: Restricted to Bachelor of Science (Recreation) students in their final two years of study. Others by permission of instructor, with priority to Health Professions students.

### **LEIS 4597.15: Recreation Internship.**

This class is an extended professional development internship during the final year of study. It requires the completion of a minimum 16 week, 35 hours per week internship in a recreation service delivery agency. The internship involves an in-depth agency analysis and the completion of a special service project for the agency, as well as several other academic projects. Details of the goals and specific procedures for the internship are contained in the current Internship Handbook.

FORMAT: Internship - 16 weeks in the Fall term (September-December), or

PREREQUISITE: Completion of all other program requirements and approval of the Student Services Administrator. Standard First Aid and Level C CPR certifications.

RESTRICTION: Restricted to Bachelor of Science (Recreation), and Bachelor of Science (Recreation)/Bachelor of Management students in their final term.

### **LEIS 4700.06/4701.03/4702.03: Senior Seminar.**

This class is tailored for small groups of students. It is designed to allow students to focus on a particular issue or set of related issues, that are not part of the regular curriculum. Part of this class could entail a practicum experience. The class will only be offered if a faculty member is available to supervise the work.

FORMAT: Seminar

RESTRICTION: Restricted to Recreation students in their final year of study

### **LEIS 4800X/Y.06/4801.03/4802.03: Independent Study.**

Senior undergraduate students develop an area of specialization under the direction of a faculty member.

NOTE: Students taking 4800X/Y.06 must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

FORMAT: Library survey or other research study 3 or 6 credit hours

PREREQUISITE: A GPA of at least 3.00, a "B" grade in an earlier class in the area in which the project will be conducted (where applicable), consent of advisor, consent of faculty. Intention to register for an Independent Study should be confirmed with the undergraduate secretary by April 1st of the preceding academic year. NOTE: Students may take no more than 6 credit hours of independent studies.

## Health Professions, Interdisciplinary

### HLTH 4040.03: Health Law for Non-Lawyers.

The objective of this course is to provide the non-law student with an overview of significant legal issues that arise in the healthcare context. The first part of the course covers an introduction to the Canadian legal system, the Canadian healthcare system from a legal perspective, and the nature of legal proceedings. The second part focuses on issues of particular relevance in the provision of health services; these issues may include: practice management; confidentiality and disclosure of information, including whistle blowing; consent to treatment, including issues regarding minors and those lacking capacity; mental health law; and the regulation of drugs. Finally, the third part addresses contemporary issues in health law such as cost containment, issues of care at the end of life, and the impact of human rights legislation on healthcare services and delivery.

FORMAT: Fall term BLS

RESTRICTION: Health Profession students only

## Health Sciences

Location: School of Health Sciences, VG Site

Munro, P.  
Murphy, C.  
Pendergast, N.  
Perrin, C.  
Scott, T.  
Sharp, R.

## I. Bachelor of Health Science Degree Program

The BHSc program is a four-year degree program that provides an integrated class of studies including both theory and practice. There is also a post-diploma offering for practising professionals.

The program offers education in six professional streams:

- Diagnostic Cytology
- Diagnostic Medical Ultrasound
- Medical Laboratory Technology (Post-Diploma Only)
- Nuclear Medicine Technology
- Radiological Technology
- Respiratory Therapy

Students follow an integrated curriculum that includes core, interdisciplinary and discipline-specific classes. Clinical practica are included in each year of study requiring a full-time commitment in the May-June time period.

In order to accommodate all third year Respiratory Therapy students in required clinical rotations, classes for this group only will begin on August 28, 2013.

Dalhousie University confers a Diploma in Health Science (for Diagnostic Cytology, Diagnostic Medical Ultrasound, and Respiratory Therapy only) and a Bachelor of Health Science (Specific Discipline) degree. The programs leading to these credentials are accredited. The University *does not* determine eligibility for certification/ registry exams. Rather, through accreditation, the University ensures that graduates of its programs meet the eligibility criteria set by the professional associations. Diagnostic Cytology, Diagnostic Medical Ultrasound (General, Cardiac and Vascular), Nuclear Medicine and Radiological Technology are accredited by The Canadian Medical Association. Respiratory Therapy is accredited by The Council on Accreditation for Respiratory Therapy Education.

### A. For the professions of Diagnostic Cytology, Diagnostic Medical Ultrasound, and Respiratory Therapy

Students are eligible to write the certification/registry exam upon successful completion of Year 3, when all requirements for a diploma exit have been met. They are eligible even if they choose not to exit with a diploma. Students should check with faculty concerning examination dates.

Following degree completion, students in Diagnostic Medical Ultrasound may be eligible to write certification /registry exams in the specialized areas of cardiac and vascular sonography.

### B. For the professions of Nuclear Medicine Technology and Radiological Technology

Students are eligible to write the CAMRT certification exam upon successful completion of the Bachelor of Health Science degree.

## II. The Professions

### Diagnostic Cytology

A cytotechnologist is a health professional who specializes in detecting and diagnosing cancer at a cellular level. A cytotechnologist requires expertise and precise diagnostic skills to identify and accurately evaluate minute changes within cells to provide a diagnosis. A cytotechnologist integrates scientific knowledge, cellular morphology and clinical history to formulate a cytological report. The cytotechnologist must be comfortable with using a compound microscope as this is how s/he must spend a great portion of their day. The cytotechnologist has limited patient contact, but must communicate effectively with other health care professionals in discussing results, procedures and/or policies and practices.

### Diagnostic Medical Ultrasound

The Diagnostic Medical Sonographer utilizes high frequency sound waves, specialized equipment, and other diagnostic techniques to collect detailed information on the anatomical, physiological and pathological state of the patient. This health professional is able to produce and evaluate ultrasound images and related data that are used by specialized physicians to render a medical diagnosis. Sonographers typically provide technical expertise in abdomen, superficial structures, obstetrics/gynecology, vascular and cardiac applications.

### Nuclear Medicine Technology

A nuclear medicine technologist is a health professional responsible for performing diagnostic and therapeutic nuclear medicine procedures. The technologist administers radiopharmaceuticals to the patient most often by way of an intravenous injection while adhering to proper drug preparation techniques, radiation protection guidelines and patient care practices.

The technologist operates a variety of radiation detection equipment, one of which is the gamma camera, in order to provide an assessment of the distribution of the radiopharmaceutical within the patient. By using various computer programs, the technologist analyzes the data to obtain the best information from the study which is then interpreted by a nuclear medicine physician.

Optimum operation of all equipment used in the practice of nuclear medicine is accomplished by the technologist, through the accurate implementation of a quality control program involving the assessment of radiation detection equipment, gamma cameras, and computers.

### Radiological Technology

The radiological technologist is a health professional who utilizes radiation to produce images of patient's anatomical structures. The quality of the image is

critical as it will assist the physician in the diagnosis/treatment of the disease or injury.

The technologist must be knowledgeable and skilled in a wide variety of procedures as all body systems are imaged. Responsibilities include (but are not limited to) positioning the patient for radiologic procedures, care of the patient, appropriate choice and use of equipment, image manipulation, selection of radiation exposure factors, implementation of radiation protection techniques and critique of the radiograph. Whatever the procedure, the technologist must be adaptable to meet challenges presented by the patient's physical or psychological state.

### Respiratory Therapy

A respiratory therapist is a health professional who assists in the diagnosis, treatment and health promotion of patients with cardio-respiratory disorders through therapeutic means. Respiratory therapists provide cardio-pulmonary support, including cardio-pulmonary resuscitation, mechanical ventilation support, administration of medical gases, aerosolized medications, humidity therapy and airway management. The respiratory therapist also performs respiratory assessments of patients, tests and monitors cardio-pulmonary function, assists with the transport of high-risk patients and participates in home care programs.

The therapist plays an important role in the education of patients, families and hospital staff. The therapist is also involved in the maintenance, repair, testing and evaluation of respiratory equipment. The therapist must be able to provide competent assistance in cardio-pulmonary research.

## III. Pre-Enrolment Requirements

**Immunization (current detailed version of policy can be found at <http://www.dal.ca/shs> (current students, Policies & Guidelines))**

1. It is a regulation of the Faculty of Health Professions and affiliated health care agencies that all students must be immunized. This has been instituted to protect patients as well as to protect students and employees.
2. Upon entering the program students must show certification for current immune status against tetanus, diphtheria, measles, mumps, rubella, rubeola and varicella (chickenpox). Evidence of tuberculin testing (Mantoux – two step method) must also be shown. It is also recommended that students be immunized for influenza on an annual basis.
3. The Hepatitis-B vaccination is required for all students. It is a series of three injections: the second and third shots are administered one month and six months after the first injection. The vaccination lasts for several years. This cost (approximately \$105, subject to change) must be paid by the student. The School of Health Sciences arranges for a clinic where Hepatitis-B immunization shots are administered by University Health Services nurses. Information regarding these clinics and payment will be mailed to all students prior to the beginning of each academic year.

### BLS-HCP Certification

- All BHSc students must show proof of Healthcare Provider BLS (in accordance with 2010 Guidelines for CPR & ECC) current certification prior to entry into the program. BLS-HCP must be recertified annually.

### Criminal Record Check

- All BHSc students must provide a criminal record check (obtained within the previous six months) prior to attendance at any Capital Health facility. An additional check may be required depending on clinical site requirements.

### First Aid Certification

- All BHSc students must show proof of Standard First Aid current certification prior to entry into the program. Standard First Aid must be recertified bi-annually.

### N95 Mask Fit Testing

- All BHSc students must be mask fit tested for a particulate respirator according to clinical site requirements. This must be recertified every two years, and may need to be recertified annually, depending on the mask in use at your clinical site. Note: There is a cost to the student for this procedure. Consult your school for details.

## IV. Additional Costs

There are additional costs associated with all professional streams of the BHSc program, including but not limited to Standard First Aid and BLS-HCP certification, immunization, uniforms, membership in professional associations, equipment, fees for writing registry exams, mask-fit testing, criminal record check, and travel to clinical sites. These additional costs are the responsibility of the student. A detailed list is available from the School.

## V. Intellectual, Emotional & Physical Demands

The health professions included in the Bachelor of Health Science program are intellectually, emotionally and physically demanding. It is important that students become familiar with the profession before entering the program so that they are able to function at an acceptable standard. It is common to have to lift and move heavy equipment, position patients, wear lead aprons, manipulate valves and knobs on equipment, remain on your feet for extended periods of time and move frequently from one clinical area to another. It is also common to have to view information displayed on computer monitors or on slides under a microscope. It might be necessary to distinguish fine gradations of color and to respond to alarms and buzzers. There may be emergency situations that arise in the health care setting that require students to respond immediately. Shift work may be required, including rotating 12-hour shifts. Latex gloves are in wide use and chemicals are used in a variety of settings. Refer to <http://www.dal.ca/shs> (Admissions) for Statements of Fitness required for each profession. Students who have concerns about fitness should contact the School for further information.

## VI. Program Outline

### Four-Year Entry-Level Program

The curriculum is comprised of four years of full-time study with each year including core, interdisciplinary, discipline-specific, health professional and basic science classes.

Fourth-year BHSc students must meet the School's clinical skills maintenance requirements and complete the "Record of Clinical Practise for Year 4" each term, until the 4th-year classwork is completed. Students should contact the School for full details.

### Diagnostic Cytology

#### Year 1

- BIOC 1420.03
- BIOL 1020.03
- CHEM 1410.03
- DCYT 1000.03
- DCYT 1010.03
- DCYT 1500.03
- HSCE 1000.03
- HSCE 1010.03
- HSCE 1020.03
- HSCE 1030.03
- IPHE 4900.00
- STAT 1060.03

#### Year 2

- BIOL 2020.03
- DCYT 2001.03
- DCYT 2002.03
- DCYT 2010.03
- DCYT 2500.03
- HESA 4000.03
- HSCE 2000.03
- HSCE 3000.03
- HSCE 3010.03
- IPHE 4900.00
- MICI 1100.03
- Electives (three credit hours)

#### Year 3

- BIOL 3024.03
- BIOL 3430.03

- DCYT 3000.03
- DCYT 3010.03
- DCYT 3020.03

- HESA 4400.03
- HPRO 2361.03/LEIS 2361.03
- HPRO 3335.03
- HPRO 3345.03
- HPRO 3397.03
- RSPT 4000.12
- RSPT 4100.06
- Approved electives (six credit hours)

Note: RSPT 4010, 4020, 4030 are considered “approved electives.”

## BHSc Degree Completion Program

This program requires five full credits (30 credit hours) of university study. It is available only to students who have successfully completed the Dalhousie

diploma portion of the BHSc degree program in the professional stream for which you are applying.

For Admission Requirements see page 14 of the calendar under Faculty of Health Professions, School of Health Sciences (BHSc Degree Completion Program).

## Post Diploma Program

The School of Health Sciences offers a post diploma program leading to a Bachelor of Health Science in any of: Diagnostic Cytology, Diagnostic Medical Ultrasound, Medical Laboratory Technology, Nuclear Medicine Technology, Radiological Technology and Respiratory Therapy. The program has been developed to meet the needs of practicing technologists, sonographers and Respiratory Therapists who have expressed an interest in the opportunity to complete a baccalaureate degree as a means of pursuing life long learning and increasing career opportunities.

Through a guided selection process, students will choose classes that contribute to their professional growth and interest. Students will be provided the opportunity to broaden their knowledge and scope of the Canadian health care system as well as to enhance leadership abilities and to equip themselves for participation in a rapidly changing health care environment.

The post-diploma BHSc curriculum is equivalent to two years of full time university study (60 credit hours). Classes may be completed in the sequence best suited for the student; however, attention must be paid to the class pre-requisites. To accommodate the working professional the post diploma program is available on a full time or part-time basis and most of the classes are delivered via Online Web Learning (OWL). There are university regulations concerning the maximum length of time allowed for degree completion. Refer to Academic Regulation 15.2 (Duration of Undergraduate Studies).

## Required Classes (30 credit hours)

- STAT 1060.03: Introductory Statistics for Science and Health Sciences
- HSCE 1000.03: Introduction to Health Professional Practice
- HSCE 2000.03: Health Care Ethics
- HSCE 3000.03: Culture, Diversity and Health
- HSCE 3010.03: Introduction to Research Methods
- HSCE 4030.03: Leadership in Healthcare
- HESA 4000.03: Canadian Health Care Delivery
- HSCE 4200.03: Foundations in Clinical and Professional Education
- HLTH 4040.03: Health Law for Non-Lawyers
- HSCE 4220.03: Critical Research Evaluation
- Electives (30 credit hours)

Students may choose electives from the Pre-Approved list but are not limited to this list. Contact the Post Diploma Advisor or visit the School website at <http://www.dal.ca/shs>.

## Anaesthesia Assistant Certificate Program has been suspended until further notice.

## VII.Regulations

All students are required to observe the University Regulations and Academic Regulations as described in this calendar.

### A. Academic

#### Workload

The normal workload is five credits per year (30 credit hours) during the regular academic session (September - April). In addition, an eight to 10 week clinical practicum worth one half-credit (three credit hours) takes place in May - June following Years 1, 2, and 3 of the BHSc program:

Fall Term	15 credit hours
Winter Term	15 credit hours
Spring Term (May-June)	three credit hours

Normally, only a full-time class of studies (30 credit hours during the regular academic year and a three credit-hour practicum in the May-June time period) can be taken in the first three years of the four-year entry-level program. Interruption of studies will only be granted for leave of absence or voluntary withdrawal. The fourth year can be pursued on a part-time basis, subject to Academic Regulation 15.2, which regulates duration of undergraduate studies.

It is the responsibility of each individual student to ensure she/he is enrolled in the classes required to complete the BHSc program of study. Therefore students are expected to meet with their academic advisors to seek counselling in this regard, to ensure that class selections and class load are appropriate, and will not cause difficulties later on in the program.

The BHSc post-diploma program is available on a part time basis.

### Permission to carry more than a normal workload

A workload exceeding these credit hours in any given term will be considered an *Overload*.

- Students who wish to take on an overload must have the approval from the School of Health Sciences Committee on Studies. Any student applying for an increased workload (overload) must apply at least four weeks in advance of the start of the semester or year in question.
- In their request, students should include their reasons for seeking an overload and include supporting arguments and evidence, such as their academic record and any other relevant considerations.
- Applications from students who give good reasons for wishing to take an overload will be considered. The Committee on Studies will consult with the 4th Year Academic Advisor on overload requests pertaining to fourth year studies. However, in accordance with Academic Regulation 3.1.3 - such permission will not normally be granted to any student in the first year of study, or to any student who, in the preceding academic term, obtained a grade point average of less than 3.00.
- During Clinical Practicum and/or Clinical Education Classes no additional classes will be permitted without prior approval from the Committee on Studies.
- Such requests require student completion of a Waiver of Academic Regulation Application, available from the Administrator, School of Health Sciences, or the Registrar's Office.
- Students who exceed the normal workload per academic term without Committee on Studies approval, will be required to withdraw from the class.

### Attendance at Classes

Regular and punctual attendance at classes is required; students are expected to notify instructors if they are going to miss a class. When the work of a student becomes unsatisfactory or attendance is irregular, the student may be required to withdraw from the school.

### Grade Requirements

A student must receive a grade of C in each class with a class number in the School of Health Sciences (HSCE, DCYT, DMUT, MDLT, NUMT, RADT, RSPT) in order for that class:

- to be counted as a credit towards the Bachelor of Health Science or Diploma in Health Science
- to be considered as a prerequisite for another class

Since most professional classes are prerequisites for more advanced classes and for clinical practica, the student's academic progress will be severely impacted by a failure. Students must seek academic advice.

Any student failing a required class for the second time must withdraw from the School of Health Sciences. Such a failure will be deemed an academic dismissal. See Regulation 20.2 for information on applying for readmission following an academic dismissal.

Students are reminded of Academic Regulations 18, 19.2 and 20.2 governing good standing, probation and academic dismissal.

### Grade Point Average

A description of the grade point average (GPA) is found in Regulation 17.1.1 in the Dalhousie Undergraduate Calendar. The grade scale and definitions are found in Regulation 17.1.

### Grading of Clinical Classes

Clinical education and speciality practice classes are graded on a letter grade basis.

Students who have been removed from any class due to unsafe or unsatisfactory clinical performance will receive a failing (F) grade.

### Supplemental Exams

In classes with a class number in the School of Health Sciences, supplemental privileges may be granted only at the discretion of the class professor to a student with a final grade of FM (Regulation 16.5, Dalhousie Undergraduate Calendar). Each class outline will state the conditions that must be met in order to be eligible. The supplemental may be practical, written or combined practical/written exam at the discretion of the professor. Students who receive a grade of F are ineligible for supplemental privileges and will be required to repeat the class.

The date and time of the supplemental exam will be negotiated between the student and class professor within the following guidelines: For Fall Term classes, the supplemental exam must be completed before the end of the first week of classes of the Winter Term. For Winter Term classes, the supplemental exam must be passed before the student can begin their clinical placement. In no case will a clinical placement be delayed for more than two weeks.

No more than two supplemental exams for classes with class numbers in the School of Health Sciences will be allowed in one year. Only one supplemental exam is allowed per class.

### Voluntary Withdrawal

Students who voluntarily withdraw from the School of Health Sciences, having satisfactorily completed classes toward the BHSc (specific discipline) degree, with the intention of returning at a later date are advised that re-acceptance is contingent upon there being an available place.

### Leave of Absence

1. Students who apply for a leave of absence (LOA) from their program of study must do so in writing to the School of Health Sciences Committee on Studies. If possible, such applications should be made in advance of the term or year for which a LOA is being requested.
2. A request for Leave of Absence may be for a duration of one term to a maximum of one year in length. Students are eligible for a maximum of one such leave for the duration of their program.
3. Following approval of the application for LOA, the Committee on Studies will notify the following individuals:
  - a) The student;
  - b) Dalhousie University Registrar's Office;
  - c) Students Services office at the School; and
  - d) Student's academic advisor
4. Students may apply to return to the program prior to the designated end of the LOA. At the time students return to the program, the LOA is considered ended.
5. At least two to three months prior to returning to the program, students granted LOA will inform the following, in writing, of their intent to resume their studies:
  - a) Chair, Committee on Studies; and
  - b) Student's academic advisor
 Students should also initiate discussion with his/her academic advisor to discuss plans for resumption of classes and required remedial action plan.
6. The Chair of the Committee on Studies will notify the Dalhousie Registrar's Office and the Student Services office at the School of the student's planned return date to the program.
7. It is important to note that for the duration of a leave of absence, the clock stops on the six year rule for discipline-specific classes, and the 10 year rule for all other classes.
8. No academic credit will be granted towards BHSc class requirements for work completed at another institution during a LOA.
9. If a leave of absence is granted, students must ensure they formally withdraw from classes in accordance with Dalhousie University regulations.
10. Students on approved leave of absence will be considered in abeyance from regular academic programming, and therefore not a student at Dalhousie University, until such time that they reactivate their student status through the Registrar's Office.

### Policy on Students at Academic Risk

The School of Health Sciences is concerned with providing students every opportunity for success in their program. Although the responsibility ultimately lies with the student, processes are in place at the School to identify, and assist students at academic risk.

The School of Health Sciences Studies at Academic Risk Policy aims to identify students at risk and recommend a class of academic and clinical remediation to ensure minimum clinical competencies are maintained.

### Re-Admission of Academically Dismissed Students Policy

The primary goal of the School of Health Sciences and Dalhousie University is to ensure students are successful in their chosen profession while maintaining integrity of the program. Academic Regulation Section 20.1.3 allows for students who have been academically dismissed to apply for readmission to the University. Decisions on readmission to a program in the School of Health Sciences are made in consultation with the individual stream, clinical coordinator, and the Admissions Committee and will include, but not be limited to, consideration of availability of clinical placements.

### Appeal

Students who wish to appeal a decision based on school or university regulations should consult the Chair of the Committee on Studies concerning the correct procedure. Contact the School office for complete terms of reference for the Committee on Studies and the application regarding academic appeals.

## VIII. Clinical Education Components of Health Sciences

Health Sciences education encompasses a broad spectrum of learning experiences that together prepare caring, competent and ethical practitioners able to function in a rapidly changing health care environment. The BHSc program is delivered through an integrated curriculum and students receive clinical education logically sequenced within core, interdisciplinary, discipline-specific, and clinical education classes and clinical practica. Clinical education components enable students to integrate theory with practice, master clinical competencies, develop critical reasoning skills and demonstrate professional behavior in a variety of settings with a diversity of patients.

Successful completion of all clinical components of the program is mandatory. Clinical practica and clinical education classes are required classes in the program of study and it is not possible to exercise the diploma exit option or to receive a BHSc degree without successfully completing these classes. In addition, each of the clinical experiences is a prerequisite for further progress in the program. Class outlines provide specific information about criteria for successful completion and opportunities for remediation.

In preparation for clinical practicum, all students must participate in a workshop dedicated to various aspects of professional behavior.

Two elements of clinical education are:

### 1. Clinical Practicum

The program includes three clinical practica scheduled during the May - early July time period following Years 1, 2, and 3. The Clinical Practicum is designed to provide students with opportunities to develop the knowledge, skills and professional attitudes necessary to function as competent entry-level practitioners within a variety of settings and with a broad range of patients. Students are assigned to various clinical sites, based on their level within the program, the expected learning outcomes of their professional stream, and the availability of appropriate sites.

Clinical placements will be arranged by the Clinical Coordinator for the School of Health Sciences. Students may be assigned to clinical sites located within the Halifax region, throughout the Atlantic provinces, and in various sites across Canada. All expenses related to clinical placement are the responsibility of the student. Students are scheduled in a clinical setting for eight-to-ten consecutive weeks, and are supervised by faculty and/or preceptors. The normal student/preceptor ratio is one-to-one. Evaluation may include, but is not limited to, assessment of skills competencies, demonstration of professional behaviors, and application of theory to practice. Students monitor their personal and professional growth through introspection and reflection by maintaining journals, recording experiences in skills log books, successfully passing examinations or presenting case studies.

### 2. Clinical Education Classes

These classes provide students with an opportunity to gain hands-on experience in a specific area of clinical practice. Scheduling requires full-time rotations in the clinical setting and, depending on the area, may require shift work and/or off-site

rotation. Students may be required to travel to a site outside Halifax in order to meet their clinical learning objectives. Preceptors supervise and guide students through this period of study and skills practice. Faculty continue to support students by facilitating seminars/tutorials, conducting assessments, providing constructive feedback and structuring learning experiences to further develop critical reasoning skills. Medical specialists and practitioners may be invited to share their expertise with students. There may be interprofessional learning experiences designed to enhance students' understanding of the team approach to health care. Evaluation methods may include, but are not limited to, a written examination to assess knowledge of subject matter, and practical assessments to confirm that clinical skills and professional behavior are readily applied at the expected level of performance. Clinical Education Classes are taken in Year 3 at all programs. In addition, Clinical Education Classes are a required part of the Year 4 curriculum for students in Nuclear Medicine Technology and Radiological Technology.

## IX. Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. Successful completion of this class is a requirement for graduation and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

## X. Class Descriptions

### DCYT 1000.03: Diagnostic Cytology Laboratory Applications.

This course provides a comprehensive study of topics relevant to the Diagnostic Cytology laboratory. Safety, collection of specimens, interpretation of clinical data, cytopreparatory techniques, and specimen processing are examined. Topics such as quality assurance, fixation and transportation of biological specimens, record keeping and organization of the Diagnostic Cytology laboratory will be discussed. Laboratory sessions will demonstrate the techniques required to prepare, and process a specimen adequate for cytologic diagnosis. In this context, emphasis will be placed on safe professional practice and the delivery of care.

FORMAT: Lecture 3 hours, lab 2 hours

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

### DCYT 1010.03: Gynecological Cytopathology I.

This course is designed to provide the foundation of gynecological Cytopathology. The purpose of the course is to introduce the basic skills and knowledge required to integrate, interpret and evaluate the cellular morphology of normal histologic tissues, cytologic cellular specimens of normal and benign processes of the female reproductive tract. Emphasis will be placed on the critical evaluation of pathologic and cytologic characteristics of normal and benign processes. The course will further allow students to maintain their professional practice in the role of respect towards the patient.

FORMAT: Lecture 3 hours, lab 4 hours

PREREQUISITE: HSCE 1000.03, DCYT 1000.03, HSCE 1020.03

CO-REQUISITE: HSCE 1030.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

### DCYT 1500.03: Laboratory and Clinical Gynecological Applications I.

This clinical practicum enables the student to integrate theoretical knowledge with application to specimen procurement and normal gynecological diagnoses. The student consolidates concepts, techniques and knowledge required to perform skills introduced in DCYT 1000.03, DCYT 1010.03, HSCE 1000.03. Students are expected to work under direct supervision, assume responsibility for their actions and decisions and to interact effectively with peers, technologists, supervisors and medical staff.

FORMAT: Full time rotations in clinical settings.

PREREQUISITE: BIOL 1010.03 OR 1020.03 and DCYT 1010 and HSCE 1020, and HSCE 1030

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology.

**DCYT 2001.03: Gynecological Cytopathology II**

This course will focus on the cellular morphology and nomenclature of abnormal and malignant disease in gynecological cytology. Emphasis will be placed on the interpretation and critical evaluation of the cellular morphology of normal, benign and malignant disease processes. A variety of therapy modalities and recent advances will be examined.

NOTE: Students taking this class must register in both DCYT 2001 and DCYT 2002 in consecutive terms.

FORMAT: Lecture 3 hours, labs 3 hours

PREREQUISITE: DCYT 1500.03

EXCLUSION: DCYT 2000.06

RESTRICTION: Restricted to the Bachelor of Health Science students in the professional stream of Diagnostic Cytology

**DCYT 2002.03: Clinical Application for Gynecological Cytopathology**

This clinical education course will provide an opportunity for students to integrate theory from DCYT 2001.03 into clinical practice. This course will offer a simulated environment where diagnosis and reporting of gynecologic specimens will be the focus.

FORMAT: Labs 3 hours twice a week

PREREQUISITE: DCYT 1500 and DCYT 2001

EXCLUSION: DCYT 2000.06

RESTRICTION: Restricted to Bachelor of Health Science in the professional stream of Diagnostic Cytology

**DCYT 2010.03: Pathology and Histopathology for Diagnostic Cytology.**

This course provides a basic understanding of the disease process at the tissue level. It provides the appropriate information that will allow a student to recognize conditions and to orient themselves about the origin of the cells. In the General Pathology component, topics covered include: cell injury and adaptation, inflammation and repair, disorders of growth, fluid and hemodynamic arrangements, neoplasia, environmental and nutritional diseases, microbiology and cancer. The Systems Pathology component covers all the body systems and enables the student to identify histologic processes related to various disease processes.

FORMAT: Lecture 3 hours

PREREQUISITE: DCYT 1500.03

RESTRICTION: Restricted to Bachelor of Health Science in the professional stream of Diagnostic Cytology

**DCYT 2500.03: Gynecological Cytopathology Practicum.**

This practicum will prepare the student, in a clinical setting, to integrate and apply knowledge and skills introduced during DCYT 2000. The student consolidates cytologic concepts and microscopy skills necessary to render an accurate cytologic diagnosis. Students are required to diagnose gynecological cases ranging from normal to malignant. Students are expected to assume responsibility for their actions and decisions and to interact effectively with patients, peers, technologists, supervisors and medical staff.

FORMAT: Full-time rotations in clinical settings

PREREQUISITE: DCYT 2000.03, DCYT 2010.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

**DCYT 3000.03: Non-Gynecological Cytopathology I.**

This course provides a high level of study of non-gynecological Cytopathology. The purpose of the course is to introduce and develop the diagnostic skills required to integrate, interpret and evaluate the cellular morphology of normal, benign and malignant processes of non-gynecological specimens with particular emphasis on exfoliative cytology. Students will be introduced to the cellular morphology, nomenclature and diagnostic application of all disease processes diagnosed cytologically from all body sites external to the female reproductive tract. Emphasis will be placed on the critical evaluation of pathologic and cytologic characteristics. The students are placed in a simulated environment where diagnosis and reporting will be the focus. This environment provides an opportunity for active learning, feedback, communication between student and faculty as well as self evaluation. The course further allows students to maintain their professional practice in the role of respect towards the patient.

FORMAT: Lecture 3 hours, labs 3 hours.

PREREQUISITE: DCYT 2500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

**DCYT 3010.03: Non-Gynecological Cytopathology II.**

This course provides a high level of study of non-gynecological Cytopathology and reflects the content provided in DCYT 3000.03. The purpose of the course is to introduce and develop the diagnostic skills required to integrate, interpret and evaluate the cellular morphology of normal, benign and malignant processes of non-gynecological specimens with particular emphasis on Fine Needle Aspiration Biopsy (FNAB) cytology. Students will be introduced to the cellular morphology, nomenclature and diagnostic application of all disease processes diagnosed cytologically from all body sites external to the female reproductive tract. Emphasis will be placed on the critical evaluation of pathologic and cytologic characteristics. The students are placed in a simulated environment where diagnosis and reporting will be the focus. This environment provides an opportunity for active learning, feedback, communication between student and faculty as well as self evaluation. The course further allows students to maintain their professional practice in the role of respect towards the patient.

FORMAT: Lecture 3 hours, labs 3 hours.

PREREQUISITE: DCYT 2500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

**DCYT 3020.03: Issues and Trends in Cytopathology.**

Diagnostic cytology as a specialty of pathology and medicine will be scientifically analyzed. A critical appraisal of the literature relevant to advances in the detection and treatment of cancer will be conducted. Adjunctive techniques and practices will be evaluated. Emphasis will be placed on the understanding and application of research methodology. Research findings will be presented in oral and written format.

FORMAT: Lecture 3 hours

PREREQUISITE: DCYT 3000.03, DCYT 3010.03, DCYT 3200.03, 3024.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

**DCYT 3200.03: Diagnostic Gynecological Cytology Application I.**

This third year course is a 3.0 credit hour gynecological clinical education course. This will provide an opportunity for students to further their abilities, formulate decisions and implement diagnostic expertise in relation to gynecological clinical competencies. This provides an opportunity to implement and enhance knowledge with application to diagnosis. Under supervision, students assume responsibility and build their case load to approximately 70% of that of an entry-level diagnostic cytotechnologist.

FORMAT: Full time clinical rotation

PREREQUISITE: DCYT 2500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

**DCYT 3210.03: Diagnostic Gynecological Cytology Application II.**

This third year course is a 3.0 credit hour gynecological clinical education course. This will provide an opportunity for students to further their abilities, formulate decisions and implement diagnostic expertise in relation to gynecological clinical competencies. This provides an opportunity to implement and build upon knowledge and experience with application to diagnosis gained in DCYT 3200.03. Under supervision, students assume responsibility and build their case load to approximately 80% of that of an entry-level diagnostic cytotechnologist.

FORMAT: Full time clinical rotation

PREREQUISITE: DCYT 3200.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

**DCYT 3220.03: Diagnostic Gynecological Cytology Application III.**

This third year course is a 3.0 credit hour gynecological clinical education course. This will provide an opportunity for students to further their abilities, formulate decisions and implement diagnostic expertise in relation to gynecological clinical competencies. This provides an opportunity to implement and further build upon knowledge and experience with application to diagnosis gained in DCYT 3210.03. Under supervision, students assume responsibility and build their case load to approximately 90% of that of an entry-level diagnostic cytotechnologist.

FORMAT: Full time clinical rotation

PREREQUISITE: DCYT 3200.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

### DCYT 3230.03: Diagnostic Non-Gynecological Cytology Application I.

This third year course is a 3.0 credit hour non-gynecological clinical education course. This will provide an opportunity for students to further their abilities, formulate decisions and implement diagnostic expertise in relation to non-gynecological clinical competencies. This provides an opportunity to implement and further build upon knowledge and experience with application to diagnosis gained in DCYT 3000.03 and DCYT 3010.03. Under supervision, students assume responsibility and build their case load to approximately 80% of that of an entry-level diagnostic cytotechnologist.

FORMAT: Full time clinical rotation

PREREQUISITE: DCYT 3010.03 and DCYT 3200.03, DCYT 3000.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

### DCYT 3240.03: Diagnostic Non-Gynecological Cytology Application II.

This third year course is a 3.0 credit hour non-gynecological clinical education course. This will provide an opportunity for students to further their abilities, formulate decisions and implement diagnostic expertise in relation to non-gynecological clinical competencies. This provides an opportunity to implement and further build upon knowledge and experience with application to diagnosis gained in DCYT 3230.03. Under supervision, students assume responsibility and build their case load to approximately 90% of that of an entry-level diagnostic cytotechnologist.

FORMAT: Full time clinical rotation

PREREQUISITE: DCYT 3010.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Cytology

### DCYT 3500.03: Gynecological and Non-Gynecological Clinical Applications - Practicum III.

This clinical practicum provides the student with an opportunity to integrate the theoretical knowledge and the application of cytopathologic diagnoses to gynecologic and non-gynecologic sites. The purpose of this practicum is to further develop the diagnostic skills required to integrate, interpret and evaluate the cellular morphology of normal, benign and malignant gynecological and non-gynecological disease processes. Emphasis will be placed on the critical evaluation of pathologic and cytologic morphology while continuing to meet the objectives set by the School. The course will further allow the student to maintain their professional practice in the role of respect towards the patient.

FORMAT: Full time rotations in clinical settings.

PREREQUISITE: DCYT 3240.03, DCYT 3220.03, DCYT 3020.03

### DCYT 4000.12/4100.06: Specialty Practice I/Specialty Practice II.

Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. This course can be six or twelve credit hours depending on the nature of the specialty practice. Specialty practice is arranged through consultation with the fourth year/post diploma advisor.

PREREQUISITE: DCYT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTION: Restricted to Bachelor of Health Science students in DCYT. Enrolment may be limited due to clinical site availability.

### DMUT 1000.03: Fundamentals of Sonography I.

This course provides a general overview of organs and structures within the abdominopelvic cavity which are fundamental to sonography. It includes concepts of relational sectional anatomy and basic ultrasound scanning principles. Also included is an historical perspective and discussions involving the national Code of Ethics for the profession of Diagnostic Medical Ultrasound.

FORMAT: Lecture 3 hours, lab 3 hours

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### DMUT 1010.03: Principles and Instrumentation of Diagnostic Medical Ultrasound I.

This course provides the student with the basic knowledge of the physical principles of ultrasound. It examines how diagnostic ultrasound works (how it is generated and how it interacts with tissues). Also covered in this course is the

instrumentation used to transmit, receive and present echo information and the application of these to the practice of Diagnostic Medical Ultrasound.

FORMAT: Lecture 3 hours

CO-REQUISITE: PHYC 1300X/Y.06

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### DMUT 1020.03: Fundamentals of Sonography II.

This course provides a general overview of the normal sonographic appearance of organs and structures of the abdominopelvic cavity which are fundamental to sonography. Where applicable, the sonographic application and normal variants of specific organs and structures within the abdominopelvic cavity are also discussed. Included are reference charts highlighting other common diagnostic tests, normal measurements, and laboratory values associated with each organ and structure of interest.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: DMUT 1000.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### DMUT 1500.03: Clinical Practicum I in Diagnostic Medical Ultrasound.

This clinical practicum introduces students to Diagnostic Medical Ultrasound. Within the Diagnostic Imaging Department, students will develop a knowledge of departmental procedures, an ability to interpret and utilize requisitions and demonstrate proficiency in equipment selection and instrumentation. Students will develop clinical skills in performing abdominal and pelvic ultrasound examinations. Students will apply health professional practice skills when interacting with patients and healthcare professionals.

FORMAT: Full-time rotations in clinical settings

PREREQUISITE: DMUT 1010.03, 1020.03, HSCE 1010.03, PHYC 1300.06, HSCE 1020.03, HSCE 1030.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### DMUT 2000.03: Sonography of the Abdomen/ Superficial Structures I.

This is the first of three courses related to abdomen and superficial structures. This course will focus on the pathology of the vascular system, liver, biliary system and the mammary glands. This course will provide further opportunity to develop skills and integrate knowledge from all discipline specific first year courses. The etiology, incidence, laboratory testing, sonographic presentation, differential diagnosis and treatment modalities will be examined. Documented ultrasound images with relevant pathology will be challenged, analyzed, and reviewed in a simulated clinical laboratory environment. This simulated environment will further provide an opportunity for students to integrate their knowledge of anatomy and pathology to formulate sonographic scanning strategies.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: DMUT 1500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### DMUT 2010.03: Sonography in Gynecology.

This course focuses on the normal structure, development, and pathologies of the female genitourinary system in the non-gravid state. Sonographic scanning techniques, presentation and documentation of normal and abnormal gynecological ultrasound examinations are covered. Critical evaluation of uterine and ovarian pathologies and sonographic characteristics associated with these pathologies will be fully explored.

FORMAT: Lecture 3 hours

PREREQUISITE: DMUT 1500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### DMUT 2020.03: Principles and Instrumentation of Diagnostic Medical Ultrasound II.

This course builds on knowledge and experience gained in DMUT 1010. This class provides the student with principles and instrumentation of continuous-wave/ pulsed-wave Doppler spectral analysis and color-flow imaging. Imaging artifacts, quality assurance, and bioeffects/safety are investigated thoroughly. Application of this knowledge and the development of skills and competence needed in the clinical practice of Diagnostic Medical Ultrasound will be included in this class.

FORMAT: Lecture 3 hours

PREREQUISITE: DMUT 1500.03, HSCE 2010.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### **DMUT 2030.03: Sonography of the Abdomen/ Superficial Structures II.**

This is the second of three courses related to Abdomen and Superficial Structures. The course will focus on the pathology of the: pancreas, adrenals, retroperitoneum, lymphatic system, urinary tract, thyroid and parathyroid glands. Etiology, incidence, laboratory testing, sonographic presentation, differential diagnosis and treatment modalities related to these body systems will be examined. Students will be challenged to analyze, formulate sonographic scanning strategies, and diagnose appropriately relevant pathology viewed in a hospital clinical environment. The course will provide students with the opportunity to integrate skills and concepts learned in previous courses and continue development of professional skills in Diagnostic Medical Ultrasound.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: DMUT 2000.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### **DMUT 2040.03: Sonography in Obstetrics I.**

This course provides the learner with a comprehensive study of normal and abnormal first trimester and normal second trimester obstetrical ultrasound examinations. Critical evaluation of first trimester pregnancy complications and the sonographic appearances in a second trimester obstetrical patient essential to continuing study in DMUT 3000. Multiple gestations, infertility and assisted reproductive technologies are also explored in detail. The study of embryology is an important focus of this course and the sonographic appearance associated with the growing fetus. Ethical issues related to obstetrical ultrasound will be examined and discussed.

FORMAT: Lecture 3 hours

PREREQUISITE: DMUT 1500.03

RESTRICTION: HOLD Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### **DMUT 2500.03: Clinical Practicum II in Diagnostic Medical Ultrasound.**

Practicum II provides students with the opportunity to continue skill development in abdominal and pelvic ultrasound examinations including the recognition, identification and documentation of pathologies. In addition, students will develop clinical skills in performing first and second trimester obstetrical ultrasound examinations. This clinical practicum requires the student to travel to clinical sites outside the Halifax Regional Municipality. Students will be responsible for travel and accommodation arrangements.

FORMAT: Full-time rotations in clinical settings

PREREQUISITE: DMUT 2010.03, 2020.03, 2030.03, HSCE 2040.03, DMUT 2040.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### **DMUT 3000.03: Sonography in Obstetrics II.**

This course provides a comprehensive study of the normal and abnormal second and third trimester ultrasound examinations. Critical evaluation of fetal pathologies and sonographic characteristics associated with these pathologies will be fully explored. Maternal complications associated with pregnancy and antenatal testing will also be covered.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: DMUT 2500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### **DMUT 3010.03: Sonography of Abdomen/ Superficial Structures III.**

The third and final course DMUT 3010, Abdomen and Superficial Structures III, focuses on abdominal pathology of the gastrointestinal tract and organs of the male reproductive system, noncardiac chest, abdominal Doppler, musculoskeletal, extracranial cerebral vascular and lower extremity venous ultrasound. This course will prepare the student for a more advanced level of study and clinical practice in ultrasound interventional biopsy, aspiration techniques and procedures. An integration of previously acquired knowledge and clinical skills will be applied to a more advanced level of theoretical and clinical application using Doppler ultrasound technology.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: DMUT 2500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### **DMUT 3200.03: Abdominal Imaging.**

This clinical education course allows the student to integrate and consolidate knowledge, concepts and skills developed and maintained from previous courses. The expectation is that the student will be able to recognize, identify and document normal and abnormal sonographic images of the abdomen under indirect supervision. This experience will enhance the student's ability to make independent decisions and to critically evaluate images of abdominal organs and related structures. Students are expected to assume responsibility for their actions and decisions. Students are expected to interact effectively with patients and all healthcare team professionals while maintaining accepted professional practice standards in an ultrasound environment.

FORMAT: Full-time rotations in clinical settings

PREREQUISITE: DMUT 3010.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### **DMUT 3210.03: Obstetrical Imaging.**

Building on experience developed in Clinical Practicum II and knowledge and concepts learned in Sonography in Obstetrics and Gynecology I and II, this obstetrical ultrasound clinical education course enhances the student's ability to recognize, identify and document normal and abnormal obstetrical ultrasound examinations. This course provides the opportunity to reflect on their own clinical and professional skills in dealing with the obstetrical patient. Assuming responsibility for their actions and decisions in the clinical setting, the student becomes competent in performing obstetrical sonographic examinations.

FORMAT: Full-time rotation in clinical setting

PREREQUISITE: DMUT 3000.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### **DMUT 3220.03: Gynecological Imaging.**

This clinical course allows the student to integrate knowledge, concepts and skills developed in previous courses and enhance their independent decision making skills. The expectation is for the student to achieve competency in recognizing, identifying, and documenting normal and abnormal sonographic images of the female pelvis under indirect supervision. The student will experientially reflect on their own skills and assume responsibility for their actions and decisions in the clinical setting.

FORMAT: Full-time rotation in clinical setting

PREREQUISITE: DMUT 2500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### **DMUT 3230.03: Superficial Structure Imaging.**

This clinical education course allows the student to integrate and consolidate knowledge, concepts and skills developed and maintained from previous courses. The expectation is that the student will be able to recognize, identify and document normal and abnormal sonographic images of superficial structures under indirect supervision. This clinical experience will enhance the student's ability to make independent decisions and to critically evaluate images of superficial structures. Students are expected to assume responsibility for their actions and decisions. Students are expected to interact effectively with patients and all healthcare professionals while maintaining accepted professional practice standards in an ultrasound environment.

FORMAT: Full-time rotations in clinical settings

PREREQUISITE: DMUT 3010.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### **DMUT 3240.03: Application of Ultrasound Instrumentation.**

This clinical education class further expands the student's ability to analyze and process data. Integrating knowledge, concepts and skills developed in previous courses, the student will enhance their independent decision making skills. The expectation is for the student to achieve competency in their utilization of ultrasound instrumentation in a variety of ultrasound examinations. The student will experientially reflect on their own skills in their application of theory to practice.

FORMAT: Full-time rotation in clinical setting

PREREQUISITE: DMUT 2500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### DMUT 3500.03: Clinical Practicum III in Diagnostic Medical Ultrasound.

Practicum III provides students with the clinical exposure to various specialties which include: related imaging modalities, vascular technology, echocardiography and fetal assessment (biophysicals, amniocentesis etc.). This clinical practicum will provide the student with the opportunity to correlate ultrasound imaging with other imaging specialties. This clinical practicum also allows the student to gain clinical exposure to specialty practice areas which they may choose to pursue in the fourth year.

FORMAT: Full-time rotations in clinical settings

PREREQUISITE: Successful completion of all other third year DMUT courses

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Diagnostic Medical Ultrasound

### DMUT 4000.12/4100.06: Specialty Practice I/Specialty Practice II.

Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. This course can be six or twelve credit hours depending on the nature of the specialty practice. Specialty practice is arranged through consultation with the fourth year/post diploma advisor.

PREREQUISITE: DMUT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTION: Restricted to Bachelor of Health Science students in DMUT. Enrolment may be limited due to clinical site availability.

### DMUT 4010.03: Vascular Ultrasound.

This course builds on knowledge and experience gained in DMUT 2020 (Principles and Instrumentation of Diagnostic Medical Ultrasound II) and DMUT 3010 (Sonography of the Abdomen/Superficial Structures III). The student will review hemodynamics, physics and instrumentation, spectral analysis, colorflow imaging and the use of contrast agents in vascular sonography. Applications in vascular sonography and technology to include, examinations of the cerebral vessels, arteries and veins of the extremities and abdominal vessels will be covered.

FORMAT: Online delivery via BLS

PREREQUISITE: DMUT 3500.03

RESTRICTION: Restricted to Bachelor of Health Sciences students in the professional stream of Diagnostic Medical Ultrasound. Post diploma students by permission of instructor

### DMUT 4020.03: Cardiac Ultrasound.

This course builds on knowledge and experience gained in DMUT 2020 (Principles and Instrumentation of Diagnostic Medical Ultrasound II) and HSCE 2040 (Pathophysiology for Health Sciences). This course provides a comprehensive study of the normal and abnormal cardiac ultrasound examinations. The student will review anatomy and physiology and hemodynamics of the heart and relate theory to echocardiography. General principles of cardiac ultrasound, normal echo examination techniques and standard views will be covered including: two-dimensional, M-mode and Doppler. Clinical indications for echocardiography examinations will be covered as well as congenital and acquired cardiac disease processes evaluated with echocardiography.

FORMAT: Online delivery via BLS

PREREQUISITE: DMUT 3500.03

RESTRICTION: Restricted to Bachelor of Health Sciences students in the professional stream of Diagnostic Medical Ultrasound. Post diploma students by permission of instructor

### HSCE 1000.03: Foundations of Health Care Practice.

This course introduces students in the five BHSc professions to the Canadian Health Care System and the role of the health professional within that system. The course compares the Canadian system to systems from other countries and covers diverse healthcare models such as primary care, palliative care, long term care, etc. The role of the health professional is explored through the study of professionalism, scope of practice, and risk management in an interprofessional context. The course will allow students the opportunity to develop/improve essential skills to help them study and work in a multi-disciplinary system including critical thinking, writing skills, communication and teamwork.

FORMAT: Lecture 3 hours

RESTRICTION: Restricted to Bachelor of Health Science students or by permission of instructor

### HSCE 1010.03: Clinical Skills for Health Sciences.

This course will further the students' understanding of working within a healthcare environment as they learn the skills required to provide patient-centered care. The course provides academic knowledge and laboratory experiences for students to develop clinical skills essential in all five professional streams of the BHSc program.

FORMAT: Lecture 3 hours, lab 1.5 hours

PREREQUISITE: HSCE 1000.03 and one discipline specific course

RESTRICTION: Restricted to Bachelor of Health Science students

### HSCE 1020.03: Human Anatomy and Physiology I.

This course, which is along with HSCE 1030 is designed to provide the student with an understanding of the cellular, organ, and system levels of organization of the human body. It includes a comprehensive study of facts pertaining to the covering, support and movement of the human body. Topics covered will include: organization of the body, the integumentary, skeletal and muscular systems.

FORMAT: Lecture 3 hours

EXCLUSION: ANAT 1010.03, ANAT 1020.03, PHYL 1000.06, PHYL 1010.06

RESTRICTION: None, however priority is given to Health Sciences students.

### HSCE 1030.03: Human Anatomy and Physiology II.

This course studies the systems that serve in maintaining the human body and ensuring its continuity. Topics covered will include: cardiovascular, immune, respiratory, digestive, urinary and reproductive systems. This course will provide students with an appreciation of the complexities of the human function and form, and set the stage for understanding the integration of organ system functions.

FORMAT: Lecture 3 hours

PREREQUISITE: HSCE 1020.03

EXCLUSION: ANAT 1010.03, ANAT 1020.03, PHYL 1000.06, PHYL 1010.06

RESTRICTION: None, however priority is given to Health Sciences students

### HSCE 2000.03: Health Care Ethics.

This is an introductory course in healthcare ethics. Students will be provided with an overview of moral theory and principles; a chance to reflect upon and discuss contemporary ethical issues in healthcare; and an opportunity to acquire the conceptual and practical tools required to make competent ethical decisions in their own practice. Teaching methods will include lecture, group instruction and case analysis.

FORMAT: Lecture 3 hours

RESTRICTION: None, however priority is given to Health Sciences students

### HSCE 2010.03: Digital Imaging.

This course provides an overview of computer basics, digital file structure, digital imaging principles and their applications in radiological technology, magnetic resonance imaging, nuclear medicine technology, and diagnostic medical ultrasound. The principles of image distribution by Teleradiology and Picture Archiving Communication Systems are also provided. The class operates as a distance education class using BLS, with materials being distributed via the Internet. Tutorial sessions are scheduled throughout the term.

FORMAT: On-line delivery via BLS and tutorial sessions

PREREQUISITE: RADT 1010.03 or NUMT 1020.03 or DMUT 1010.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional streams of Diagnostic Medical Ultrasound, Nuclear Medicine Technology and Radiological Technology

### HSCE 2020.03: Radiation Physics.

The purpose of this course is to build on the basic principles of the science of radiation physics with a focus on the concepts that directly apply to the medical radiation fields of nuclear medicine technology and radiological technology.

Topics of study include atomic physics, radioactivity and electromagnetic radiation. The class will explain radiation interaction with matter in relation to attenuation, absorption and dosimetry. X-ray production, as well as fission and reactor production of radioactive materials used in nuclear medicine will be investigated. Students will be provided an opportunity to investigate the newest modalities connected with their fields.

FORMAT: Lecture 3 hours, lab 1.5 hours

CO-REQUISITE: PHYC 1300.03 or Equivalent

RESTRICTION: Restricted to students enrolled in the Bachelor of Health Science; students in the professional streams of Nuclear Medicine Technology and Radiological Technology programs

### HSCE 2030.03: Radiation Biology and Protection.

This course provides a theoretical overview of the bioeffects of radiation. This knowledge is linked to radiation physics principles as applied to the practice of medical radiation technology. Current regulations regarding radioactive

substances and imaging and survey equipment will be presented. Emphasis will be placed on practical means of radiation protection for the technologist, the patient and the general public.

FORMAT: Lecture/student presentations/assignments/team projects

PREREQUISITE: HSCE 2020.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional streams of Nuclear Medicine Technology and Radiological Technology

### **HSCE 2040.03: Pathophysiology for Health Sciences.**

This course is intended to provide a concentrated study of the biological and behavioural interactions of the human body in disease. Emphasis will be placed on the examination of the Pathophysiology of diseases prevalent in Canada. This class will examine various therapeutic strategies used in treating these diseases and their implications for patient care.

FORMAT: Lecture 3 hours

PREREQUISITE: HSCE 1020.03, HSCE 1030.03

RESTRICTION: None, however priority is given to the Health Sciences students

### **HSCE 3000.03: Culture, Diversity and Health.**

Community development, community advocacy, social justice and primary healthcare will be the theoretical frameworks for exploring the Health Science practitioner's role and practice in the context of working with populations in high risk environments. The emphasis is on understanding the issues, collaborating with those involved, and building individual and group capacities to enhance and promote the health and well-being of specific populations.

FORMAT: Online delivery via BLS

RESTRICTION: None, however priority is given to the Health Sciences students

### **HSCE 3010.03: Introduction to Health Research.**

HSCE 3010 is designed to help students make sense of the research they can be expected to encounter in their professional practices. By focusing on the role of research in contemporary health professional practice this course will provide the student with a sound basis in the principles underlying research theory, measurement issues, experimental, exploratory and descriptive research designs, data analysis and communication skills.

FORMAT: Online delivery via BLS

EXCLUSION: HAHF 3100.03

RESTRICTION: None, however priority is given to the Health Sciences students

### **HSCE 3600.01: Clinical Elective.**

This clinical elective is available for visiting students only, in the health professions of diagnostic medical ultrasound, diagnostic cytology, nuclear medicine technology, radiological technology, or respiratory therapy. Contact department for details.

### **HSCE 4030.03: Leadership in Health Care.**

This course will consider various elements of leadership in a complex, multi-professional and rapidly changing healthcare system, and will enable students to assess and strengthen their own leadership style. An understanding of current trends and issues in healthcare will provide a basis for the development of leadership skills. Critical thinking, decision-making processes and other leadership behaviours will be examined.

FORMAT: Online delivery via BLS

RESTRICTION: None, however priority is given to the Health Sciences students

### **HSCE 4040.03: Independent Study.**

The student will carry out an independent study or complete a project related to health sciences. Facilitation is provided by faculty or a course supervisor and is dependent upon the nature of the course of study. Students wishing to pursue HSCE 4040.03 must consult with the fourth year post diploma advisor for approval a minimum of three months prior to the beginning of the term in which they hope to enrol in the course.

This course may not be offered every year and will be contingent upon the availability of faculty.

### **HSCE 4041.03: Independent Study.**

The student will carry out an independent study or complete a project related to health sciences. Facilitation is provided by faculty or a course supervisor and is dependent upon the nature of the course of study. Students wishing to pursue HSCE 4041.03 must consult with the fourth year / post diploma advisor for approval a minimum of three months prior to the beginning of the term in which they hope to enroll in the course.

This course may not be offered every year and will be contingent upon the availability of faculty.

### **HSCE 4200.03: Foundations in Clinical & Professional Education.**

Using an adult education theoretical perspective, this course introduces students to elements of program design, objective setting, selection of instructional methods and assessment strategies for application to their roles as preceptors, patient educators, and lifelong students. This course will discuss a variety of teaching, learning and delivery methods as well as their appropriateness to clinical and professional education.

FORMAT: Online delivery via BLS

RESTRICTION: Restricted to students within the Faculty of Health Professions

### **HSCE 4220.03: Critical Research Appraisal and Practices.**

This course is designed to give students and practicing professionals the opportunity to further develop and practice those skills essential to the competent translation of knowledge into clinical practice. Through evaluation and use of evidence-informed decision making and change management processes students will be prepared to assist their future workplaces in staying at the forefront of clinical practice.

FORMAT: On line delivery via BLS

PREREQUISITE: HAHF 3100 or HSCE 3010 or equivalent

RESTRICTION: None, however priority is given to the Health Sciences students

### **MDLT 4000.12: 4100.06: Specialty Practice I.**

Specialty practice provides students with learning experiences at a level not previously available and affords the opportunity to attain additional competence and knowledge in a specialty practice area. This may include learning directed toward additional certification or clinical and theoretical opportunities that stretch the boundaries of a particular discipline. There are three components to specialty practice: clinical, contextual and theoretical. This course can be six or twelve credit hours depending on the nature of the specialty practice. Six-credit hour specialty practice required 220 clinical hours and twelve credit hours requires 440 clinical hours. Specialty Practice is arranged through consultation with the fourth year/post diploma advisor.

PREREQUISITE: Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTION: Restricted to BHSc students MDLS; Enrollment may be limited due to clinical site availability.

### **NUMT 1000.03: Fundamentals of Nuclear Medicine.**

This course is designed to provide the students with an introduction to nuclear medicine technology by exploring how radiation and detection equipment are used to perform clinical procedures. The course is divided into sections with each section containing content which builds on the previous concepts. Concepts covered include: detectors used in measuring radiation, semiconductors and scintillation detectors with a focus on the gamma camera - components, acquisition techniques, SPECT reconstruction and quality control.

FORMAT: Lecture 3 hours, lab 2 hours

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

### **NUMT 1010.03: Nuclear Medicine Instrumentation I.**

This course is designed to expand on the learner's knowledge of gamma camera instrumentation acquired in NUMT 1000.03. Image acquisition, processing and quantitative image analysis will be explored in detail. Special emphasis will be placed on theory, practical applications, and quality control of Single Photon Emission Computed Tomography (SPECT) as it relates to current clinical practice. Opportunity to apply and expand on the theory will be provided through laboratory and self-directed learning sessions. In addition students will cover the concept of quality assurance and gain the ability to design and critique a Nuclear Medicine quality assurance program.

FORMAT: Lecture 3 hours, lab 3 hours. Online delivery via BLS (some content and supplemental material)

PREREQUISITE: NUMT 1500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

### **NUMT 1020.03: Nuclear Medicine Clinical Procedures I.**

In this course the student will learn the Nuclear Medicine procedures that involve the use of radiopharmaceuticals in the investigation in the function of organs in the skeletal, genitourinary and tumour/inflammatory systems.

FORMAT: Lecture 3 hours, clinical 6 hours

PREREQUISITE: NUMT 1000.03, HSCE 1000.03, HSCE 2020.03, HSCE 1020.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

### **NUMT 1500.03: Nuclear Medicine Clinical Practicum I.**

This clinical practicum introduces students to the Nuclear Medicine and Diagnostic Imaging Department. Students will develop knowledge of departmental procedures and demonstrate health professional practice skills when interacting with patients and healthcare professionals. Emphasis will be placed on development of clinical skills in skeletal, genitourinary and tumor/inflammatory systems. Students will also have opportunities in; image acquisition and critique, patient management/care instrumentation skills and quality control.

FORMAT: Full-time rotations in clinical settings

PREREQUISITE: HSCE 1010.03, HSCE 2030.03, NUMT 1020.03, HSCE 1030.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

### **NUMT 2000.03: Radiopharmacy.**

This course encompasses all aspects of radiopharmaceutical preparation utilized in a nuclear medicine facility. Classification of radiopharmaceuticals, the production of nuclides, generator construction and elution, labeling methods and pharmaceutical standards are covered in detail. Emphasis is placed on preparing, assaying, dispensing, calculating, safe handling and storing of radiopharmaceuticals. A comprehensive quality assurance program is presented, as well as licensing and record keeping.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: NUMT 1010.03, NUMT 2010.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

### **NUMT 2010.03: Nuclear Medicine Clinical Procedures II.**

This course provides students with the knowledge and skills to perform Nuclear Medicine procedures in the central nervous, respiratory and gastrointestinal systems. Image critique and interpretation, radiopharmaceutical distribution, computer analysis, related pathologies and procedural troubleshooting will be covered. Clinical lab sessions will enable students to observe and practice these skills.

FORMAT: Lecture 3 hours, tutorial 1 hour, clinical lab 4.5 hours

PREREQUISITE: NUMT 1500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

### **NUMT 2020.03: Nuclear Medicine Clinical Procedures III.**

In this course the student will learn the Nuclear Medicine procedures that involve the use of radioactive pharmaceuticals in the investigation of the function of organs in the endocrine and cardiovascular systems.

Image critique and interpretation, radiopharmaceutical distribution, computer analysis, related pathologies and procedural troubleshooting will be covered. Clinical lab sessions will enable students to observe and practice these skills.

FORMAT: Lecture 3 hours, clinical 4 hours, tutorial 1.5 hours

PREREQUISITE: NUMT 1010.03, NUMT 2010.03, and HSCE 2010.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

### **NUMT 2500.03: Nuclear Medicine Practicum II.**

This clinical practicum is designed to enable the student to integrate primary nuclear medicine and patient care principles. The student will consolidate concepts, theories and skills in performing nuclear medicine procedures. The student will be exposed to image evaluation, patient management/care as well as radiopharmaceutical preparation and quality control.

FORMAT: Full-time rotations in clinical settings

PREREQUISITE: NUMT 2000.03, 2020.03

RESTRICTION: RESTRICTIONS: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

### **NUMT 3020.03: Positron Emission Tomography.**

The course provides students with advanced knowledge of Positron Emission Tomography (PET) scanner physics, instrumentation, and quality control. Students will also explore cyclotron physics and radiopharmaceutical synthesis in hot cells. A section of the course content involves the use of various PET radiopharmaceuticals in clinical imaging, presented in the larger context of current

PET clinical procedures. Clinical application of fusion imaging with PET/CT will also be covered.

FORMAT: On line delivery through BLS, in weekly tutorials

PREREQUISITE: NUMT 3100.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

### **NUMT 3100.03: CT for Hybrid Technologies.**

This course provides students with knowledge of CT instrumentation, procedures and cross sectional anatomy. CT image acquisition, processing and quantitative analysis will be explored in detail. Processing and post-processing of CT will be contrasted to single photon computed tomography (SPECT) processing and post-processing. Special emphasis will be placed on the role of CT as it relates to current clinical practice in hybrid technologies. Opportunity to apply and expand upon the knowledge gained through lectures will be provided through clinical exposure and self-directed learning sessions.

PREREQUISITE: NUMT 2500.03

RESTRICTION: Restricted to students enrolled in the Bachelor of Health Science Program in the professional stream of Nuclear Medicine Technology.

### **NUMT 3200.03: Radiopharmacy.**

Students will be exposed to the daily operation of a central radiopharmacy. Generator elution, product preparation and performance of quality control procedures will be practiced. Record keeping and documentation of daily operations will be stressed. Emphasis will be on efficiency and organization in order to respond to the demands of the nuclear medicine department. Students will also have exposure to non-routine radiopharmaceutical duties: dilutions, stock-solutions, and radiopharmacy research and development. Quality Control procedures, evaluation and trouble-shooting techniques will be utilized to optimize efficiency and validate results.

FORMAT: Clinical Education Course

PREREQUISITE: NUMT 2500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

### **NUMT 3210.03: Non-Imaging Procedures.**

This clinical course will allow students to apply theory to clinical practice by performing a variety of non-imaging Nuclear Medicine procedures to include: white blood cell labelling; <sup>14</sup>C urea breath tests, and radioiodine therapeutic procedures, including ablations. Proper lab technique will be emphasized. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality Control procedures, evaluation and trouble-shooting techniques will be utilized to optimize efficiency and validate results.

FORMAT: Clinical Education Course

PREREQUISITE: NUMT 3500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

### **NUMT 3220.03: General Imaging I.**

Students will apply theory to clinical practice by performing a variety of procedures. Emphasis will be on the application and evaluation of nuclear medicine general imaging procedures as they relate to the diagnosis and management of patients. Students will be assessed and required to obtain a minimum number of general imaging clinical competencies. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation and troubleshooting techniques will be utilized to optimize efficiency and validate results.

FORMAT: Clinical Education Course

PREREQUISITE: NUMT 2500

RESTRICTION: Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

### **NUMT 3222.03: General Imaging II.**

Students will apply theory to clinical practice by performing a variety of procedures. Emphasis will be on the application and evaluation of nuclear medicine general imaging procedures as they relate to the diagnosis and management of patients. Students will be assessed and required to obtain a minimum number of general imaging clinical competencies beyond those obtained in General Imaging I. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality control procedures, evaluation and troubleshooting techniques will be utilized to optimize efficiency and validate results.

FORMAT: Clinical Education Course

PREREQUISITE: NUMT 3220.03, NUMT 3000.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology.

**NUMT 3230.03: Cardiac Imaging.**

Students will apply theory to clinical practice by performing procedures involving the cardiovascular system. Application and evaluation of acquisition and processing of nuclear cardiology procedures with a focus on stress imaging (treadmill and medication induced) and wall motion imaging will be emphasized. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality Control procedures, evaluation and trouble-shooting techniques will be utilized to optimize efficiency and validate results.

FORMAT: Clinical Education Course

PREREQUISITE: NUMT 2500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

**NUMT 3240.03: Pediatric Imaging.**

Students will focus on nuclear medicine practice in the care of children and their families. Application and evaluation of nuclear medicine procedures relevant to the diagnosis and management of children will be emphasized. Students will be able to assess, modify and apply instrumentation applications for each procedure performed. Quality Control procedures, evaluation and trouble-shooting techniques will be utilized to optimize efficiency and validate results.

FORMAT: Clinical Education Course

PREREQUISITE: NUMT 3500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

**NUMT 3500.03: Clinical Practicum In Nuclear Medicine Technology III.**

Clinical Practicum III is intended to consolidate nuclear medicine theory and practice covered by the end of year three. The students will be provided the opportunity to demonstrate competency in nuclear medicine practice, integrating aspects of all discipline and health science related course theory. This course allows students to expand their knowledge of the healthcare team by providing an opportunity for them to observe and experience healthcare services provided by other professionals.

FORMAT: Full-time rotations in clinical settings

PREREQUISITE: NUMT 3200.03, 3222.03 3230.03, 3020.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

**NUMT 4100.06: Specialty Practice I/Specialty Practice II.**

Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. Specialty Practice is arranged through consultation with the fourth year/ post diploma advisor.

PREREQUISITE: NUMT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology. Enrolment may be limited due to clinical site availability.

**NUMT 4210.03: Professional Practice in Nuclear Medicine Technology I.**

This clinical education course provides the student with the opportunity to assume clinical responsibility and develop leadership skills through two processes. Students will apply professional skills acquired through previous courses to function as a member of the diagnostic team and perform duties associated with a team leader role. Also, through a mentorship program, students will act as role models and support first year nuclear medicine students in an effort to further develop leadership skills.

NOTE: Students cannot be registered in NUMT 4210.03 and NUMT 4220.02 concurrently.

FORMAT: Clinical Education Course

PREREQUISITE: NUMT 4220.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

**NUMT 4220.03: Professional Practice in Nuclear Medicine Technology II.**

This clinical education course provides the student with the opportunity to assume clinical responsibility and to continue development of professional skills in nuclear medicine technology. Students will be scheduled to a variety of imaging areas where they will be responsible, with remote supervision, for functioning as

an integral member of the nuclear medicine team. This course also provides the opportunity for students to become actively involved in the education of patients, as well as the continuing education of both practicing nuclear medicine technologists and affiliate healthcare groups.

NOTE: Students cannot be registered in NUMT 4210.03 and 4220.03 concurrently.

FORMAT: Clinical Education Course

PREREQUISITE: NUMT 3500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Nuclear Medicine Technology

**RADT 1000.03: Skeletal Radiography.**

This course provides the student with the knowledge required to perform basic skeletal radiography examinations. Aspects studied include: patient positioning, alignment of the radiation field, and radiation exposure factors. Radiographic images are analyzed with a focus on structures demonstrated, evaluation criteria, and modifications required to improve sub-optimal images. Students have the ability to develop radiographic skills for positioning and image analysis in lab/ tutorial sessions.

FORMAT: Lecture 3 hours, lab 3 hours, tutorial 2 hours

CO-REQUISITE: RADT 1010.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

**RADT 1010.03: Imaging Fundamentals.**

This course offers an introduction to the processes involved in the production of x-radiation and use of radiation for diagnostic imaging. The basic principles and equipment involved in radiography and fluoroscopy are studied as well as an introduction to the controlling parameters for image production. A major emphasis of the course is an analysis of the radiographic image and the factors that influence its quality. Students have the opportunity to use imaging equipment during lab sessions.

FORMAT: Lecture 3 hours, 5 lab sessions

CO-REQUISITE: RADT 1000.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

**RADT 1020.03: Skeletal and Systems Radiography.**

Skeletal and Systems Radiography provides the student with the knowledge required to perform radiological imaging procedures of the vertebral column, craniofacial structures, body organs and systems. Elements of the course include patient positioning, alignment of the radiation field, patient management, use of contrast media, and image analysis. Images are assessed with a focus on structures demonstrated, evaluation criteria, and modifications required to improve image quality. Students have the opportunity to practice and demonstrate the radiographic positions in a tutorial/simulation setting. Clinical lab sessions are included in this course to link theory to practice and to provide the student with an orientation to the Diagnostic Imaging Department as well as the operating room environment.

FORMAT: Lecture 3 hours, lab 3 hours, tutorial 2.5 hours

PREREQUISITE: RADT 1000.03, 1010.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

**RADT 1500.03: Clinical Practicum I in Radiological Technology.**

This clinical practicum introduces students to radiological technology and a Diagnostic Imaging department. Students will have the opportunity to experience a wide variety of procedures and interact with healthcare professionals and patients. Students will develop skills in skeletal/systems radiography, image evaluation, and patient management/care.

FORMAT: Full-time rotations in clinical settings

PREREQUISITE: RADT 1020.03, HSCE 1010.03, HSCE 1030.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

**RADT 2000.03: Advanced Skeletal & Systems Radiography.**

This course provides the students with the knowledge of advanced skeletal examinations, and imaging examinations of the gastrointestinal, genitourinary, biliary, reproductive, endocrine, cardiovascular, and central nervous systems. Learning labs in which the students reinforce their knowledge of anatomy, physiology, image quality, and radiographic criteria support this course. Clinical labs and tutorial sessions prepare the students to challenge advanced patient examinations.

FORMAT: Lecture 3 hours, lab 4 hours, tutorial 4 hours

PREREQUISITE: RADT 1500

RESTRICTION: Restricted to the Bachelor of Health Science students in the professional stream of Radiological Technology

### **RADT 2010.03: Imaging Equipment.**

This course covers the structure, operating principles, and quality control of the equipment involved in radiological technology. It includes a comprehensive study of x-ray generators, tubes, fluoroscopic, and processing equipment with a focus on technical parameters and clinical applications. This course also covers quality control concepts, equipment used for quality control testing and testing procedures for the imaging equipment in radiological technology.

FORMAT: Lecture 3 hours lab 2 hours

PREREQUISITE: RADT 1500.03, HSCE 2020.03, HSCE 2010.03

CO-REQUISITE: RADT 2020.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

### **RADT 2020.03: Adaption Radiography.**

The Adaption Radiography course provides the student with the knowledge required to adapt imaging procedures for unique clinical situations including trauma, mobile, and operating room examinations, and for patients with special needs (pediatric, geriatric, and disabled). Selected radiographic projections and procedures related to the topics are also studied and pertinent radiographic images are analyzed. Students will have the opportunity to develop radiographic adaption skills in clinical/learning lab sessions and clinical simulation sessions.

FORMAT: Lecture 3 hours, lab 4 hours, tutorial 1 hour

PREREQUISITE: RADT 2000.03

CO-REQUISITE: RADT 2010.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

### **RADT 2500.03: Clinical Practicum II in Radiological Technology.**

This practicum provides students with the opportunity to continue skill development in the clinical examinations/procedures introduced in RADT 1500. In addition, an introduction to specialized clinical procedures is provided, including operating room imaging, computed tomography, and pediatric radiography.

FORMAT: Full-time rotations in clinical settings

PREREQUISITE: RADT 2010.03, 2020.03, HSCE 2030.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

### **RADT 3000.03: Applied Pathology in Radiological Technology.**

This course provides the student with the fundamental knowledge to recognize the radiographic appearances of specific pathologies. This knowledge is directly applicable to the clinical component of the program. The course is presented by lecture and through clinical lab sessions and learning labs where the student studies a variety of images related to pathologic processes. Studies from related diagnostic modalities are reviewed when appropriate.

FORMAT: Lecture 3 hours, lab 3.5 hours

PREREQUISITE: RADT 2500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

### **RADT 3010.03: Specialty Practice Concepts.**

This course provides the foundation for RADT 3210 and RADT 4000 as it focuses on concepts for specialty practice in computed tomography (CT), vascular/interventional imaging, mammography, bone densitometry and magnetic resonance imaging (MRI). Specific topics include: clinical application/procedures, sectional anatomy, radiological image review, patient management, and specialized imaging apparatus. Knowledge obtained in previous courses and clinical practica is also related as applicable. Students will have the opportunity to relate theory to practice during scheduled clinical lab sessions.

FORMAT: Lecture 3 hours, lab 4 hours

PREREQUISITE: RADT 2500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

### **RADT 3210.03: Introduction to Specialty Practice.**

This course provides the students with the opportunity to experience the clinical practice of computed tomography, angiography/interventional imaging and mammography. Under the direction of a preceptor, students will meet the

competencies required in these imaging areas. This class allows the students to apply the theory from the Specialty Practice Concepts course (RADT 3010) and promotes further development of professional skills and behaviors.

FORMAT: Clinical Education Course

PREREQUISITE: RADT 3010.03, RADT 3000.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

### **RADT 3220.03: Gastrointestinal/Genitourinary/Operating Room Imaging.**

This clinical education course will prepare students for the clinical practice of radiological technology in the areas of gastrointestinal, genitourinary and operating room imaging. Under the direction of a preceptor, students will apply acquired knowledge and skills to radiological procedures. The students will develop their skills in providing a high standard of patient care, producing and evaluating images, problem solving and collaboration.

FORMAT: Clinical Education Course

PREREQUISITE: RADT 2500.03, RADT 3000.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

### **RADT 3240.06: General/Adaption Radiography.**

This course provides the student with the opportunity to further develop general radiography skills. Under appropriate direction from a preceptor, students will apply the knowledge and skills acquired in previous courses/practica and adapt routine imaging procedures for challenging clinical situations and patients with special needs. Students will be scheduled to a variety of imaging areas where radiographic adaption is typically required: emergency, and in-patient/mobile procedures. Clinical experience on evening, night, and weekend shifts is provided in this course.

FORMAT: Clinical education course

PREREQUISITE: RADT 2500.03, RADT 3000.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

### **RADT 3500.03: Clinical Practicum III.**

Clinical Practicum III provides students with an opportunity to integrate skills and concepts from previous courses, clinical practica and the clinical education courses. Under appropriate levels of supervision, the student will assume the responsibilities of a radiological technologist and demonstrate competency in radiography and computed tomography. This practicum takes place in a Diagnostic Imaging Department outside the QEII Health Sciences Centre.

FORMAT: Full time rotations in clinical setting

PREREQUISITE: RADT 3210.03, 3220.03, 3240.06

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

### **RADT 4000.12/4100.06: Specialty Practice I/Specialty Practice II.**

Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. This course can be six or twelve credit hours depending on the nature of the specialty practice. Specialty practice is arranged through consultation with the fourth year/post diploma advisor.

PREREQUISITE: RADT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology. Enrolment may be limited due to clinical site availability.

### **RADT 4200.03: Pediatric Radiography.**

This course provides students with the opportunity to meet the competencies required in pediatric radiography. A wide variety of clinical experiences are scheduled at the IWK Health Centre, including mobile and operating room imaging, gastrointestinal and urinary system examinations, and general imaging. Under the direction of preceptors, students will apply theoretical principles and further develop professional skills and behaviours. Students will also have the opportunity to attend pediatric radiology rounds and observe related imaging procedures.

FORMAT: Clinical Education Course

PREREQUISITE: RADT 3500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

### **RADT 4210.03: Professional Skill Development in Radiological Technology.**

This clinical education course provides students with an opportunity to integrate skills/concepts from previous courses, clinical practica, and clinical education courses and continue development of professional skills in radiological technology. Through reflection and self-evaluation, students will develop learning contracts, and under appropriate levels of supervision will perform general radiologic imaging procedures. Various themes of professionalism will also be explored.

FORMAT: Clinical Education Course

PREREQUISITE: RADT 3500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

### **RADT 4220.03: Professional Practice in Radiological Technology.**

This clinical education course provides the student with the opportunity to strengthen radiological technology skills while increasing confidence and independence in clinical practice. Under appropriate direction from a preceptor, students will apply the knowledge and skills acquired in previous courses/practica to further develop clinical judgement and self-confidence. To demonstrate competence, students must successfully complete a summative clinical assessment and comprehensive competency based written examinations. Students will also plan, design, and deliver a professional development session/activity for students and/or radiological technologists.

FORMAT: Clinical Education Course

PREREQUISITE: RADT 3500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Radiological Technology

### **RSPT 1000.03: Respiratory Therapy Instrumentation and Techniques.**

This course provides the student with the fundamental knowledge required to understand the physical principles and concepts necessary for the safe and efficient delivery of physician prescribed therapy. Clinical skills competency through lab simulation is required.

FORMAT: Lecture 3 hours, lab 3 hours

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

### **RSPT 1020.03: Respiratory Therapy Clinical Assessment and Techniques.**

RSPT 1020.03 is designed as a continuation of the knowledge and concepts acquired in Term 1 and the skills competencies completed in RSPT 1000.03. Students will focus on the basic background information and psychomotor skills necessary for understanding the physical principles and concepts associated with the safe handling and efficient operation of respiratory therapy equipment. Limited clinical opportunities may be provided. Clinical skills competency testing through lab simulation is required.

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: RSPT 1000.03, HSCE 1000.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

### **RSPT 1030.03: Cardiopulmonary Physiology I.**

The course presents a modular approach to developing a thorough understanding of normal and abnormal cardiopulmonary function in the human body and is considered a foundation course for all RSPT specific courses in the program.

FORMAT: lecture 4.5 hours, individual and group work with case studies

PREREQUISITE: RSPT 1000.03, HSCE 1020.03, CHEM 1410.03

CO-REQUISITE: BIOC 1420.03

### **RSPT 1500.03: Clinical Practicum I.**

Clinical Practicum I introduces students to clinical practice in the patient care (hospital) environment. Students will have the opportunity to apply theory to skills practice at the defined competency level.

NOTE: Full-time rotations in clinical settings with assigned preceptors. Shift work and weekends may be required. Students will be required to travel to clinical sites outside the Halifax Regional Municipality. Students will be responsible for travel and accommodations

PREREQUISITE: RSPT 1020.03, RSPT 1030.03, HSCE 1010.03, HSCE 1030.03, BIOC 1420.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

### **RSPT 2000.03: Principles of Mechanical Ventilation.**

This course will introduce the students to the delivery of mechanical ventilation by learning the terminology, physical principles and physiologic concepts associated with the application of mechanical ventilation. Equipment operation, function and troubleshooting will be investigated in the lab and clinical setting.

FORMAT: Lecture 3 hours, lab/clinical 3 hours

PREREQUISITE: RSPT 1500.03

CO-REQUISITE: RSPT 2070.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

### **RSPT 2020.03: Application of Mechanical Ventilation.**

Students will be introduced to the background knowledge necessary for understanding the physical principles and concepts governing the operation of mechanical ventilators and adjunct respiratory therapy equipment to ensure the safe and effective delivery of therapy. Clinical skills testing is required.

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: RSPT 2000.03, 2030.03, 2063.03, 2070.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

### **RSPT 2030.03: Cardiopulmonary Physiology II.**

This course is a continuation of the physiological concepts introduced in RSPT 1030 and will examine the intricate chemical and physiological processes of fluid and electrolyte balance, pulmonary function testing, hemodynamics and the cardiopulmonary response to unusual and changing environments. Case study presentations and patient scenarios will complement the learning environment and assist the student in integrating previous knowledge.

FORMAT: Lecture 4.5 hours, individual and group work, presentations, case study scenarios

PREREQUISITE: RSPT 1500.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

### **RSPT 2050.03: Health Practice for Respiratory Therapy.**

This course consists of classroom work, clinical skills testing, guest presentations, community project and an advanced cardiac life support course (ACLS). The learning environment will enhance the understanding of the role of the respiratory therapist in hospitals, healthcare facilities and the community. Basic competency level in the skills required for RSPT 2500 will be achieved through practicing the clinical skills in the lab. Students will be challenged to evaluate and integrate knowledge and skills.

FORMAT: Lecture 3 hours, lab 3 hours. One required weekend workshop in ACLS.

PREREQUISITE: RSPT 2000.03, 2030.03, 2070.03, 2063.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

### **RSPT 2063.03: Respiratory Disease & Therapeutics I.**

The proper assessment, evaluation and treatment of clients with conditions and diseases affecting the cardio-respiratory system are vital to the role of a respiratory therapist. The purpose of this course is for students to gain knowledge and understanding of the incidence, etiology, clinical manifestations, pathophysiology, and differential diagnosis of pathologies treated by respiratory therapists in the acute, chronic and home care environments. While studying each individual disease, the evidence-based treatment and prevention strategies, including pharmacology, will be examined.

FORMAT: Lecture 4.5 hours

PREREQUISITE: RSPT 1500.03

### **RSPT 2065.03: Respiratory Disease & Therapeutics II.**

The proper assessment, evaluation and treatment of clients with conditions and diseases affecting the cardio-respiratory system are vital to the role of a respiratory therapist. The purpose of this course is for students to gain knowledge and understanding of the incidence, etiology, clinical manifestations, pathophysiology, and differential diagnosis of pathologies treated by respiratory therapists in the acute, chronic and home care environments. While studying each individual disease, the evidence-based treatment and prevention strategies, including pharmacology, will be examined.

FORMAT: Lecture and PBL 4.5 hours

PREREQUISITE: RSPT 2063.03

### RSPT 2070.03: Human Pregnancy and Fetal/Newborn Development.

This course contains background information and assessment skills necessary for the progression to more advanced assessment, skills and competency levels in respiratory care of the neonate and child. The integration of this and additional required courses will allow the student to learn and to challenge the competency component of the program as it relates to neonatal/pediatric therapeutics and instrumentation, pathophysiology, applications of mechanical ventilation, pharmacology, and Neonatal Resuscitation Program (NRP).

FORMAT: Lecture 3 hours, and NRP

PREREQUISITE: RSPT 1500.03

RESTRICTION: Restricted to Bachelor of Health Science students enrolled in the professional stream of Respiratory Therapy

### RSPT 2500.03: Clinical Practicum II.

This clinical practicum provides students with the opportunity to continue clinical skill competency development and achieve defined skills by performing in a clinical patient environment. Students will have the opportunity to rotate through assigned clinical placements through 8 and 12 hour day and night shifts including weekends, depending upon the placement requirements.

FORMAT: Full-time rotations in clinical settings with assigned preceptors.

Students will be required to travel to clinical sites outside the Halifax Regional Municipality. Students will be responsible for travel and accommodation arrangements.

PREREQUISITE: RSPT 2020.03, 2050.03, 2065.03, 2070.03, HSCE 2000.03

RESTRICTION: Restricted to Bachelor of Health Science students in the professional stream of Respiratory Therapy

### RSPT 3000X/Y.06: Anesthesia Instrumentation and Clinical Techniques.

This course will consist of two modules; the first being a seminar/lecture series during the first few weeks of the Fall semester and the second being two weeks of full-time clinical application program in the operating room. Students will be precepted by an anesthetist with focus on airway management skills and patient monitoring. Students will also attend an intensive 2-day workshop in management of the difficult airway. Depending on availability of clinical sites, students may be expected to travel outside the metro area at their own expense.

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

PREREQUISITE: RSPT 2500.03

RESTRICTION: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

### RSPT 3010X/Y.06: Neonatal and Pediatric Therapeutics.

This course will consist of two modules; the first being a seminar/lecture series during the first few weeks of the Fall semester and the second being a five week full-time clinical application program. Students will integrate and apply theories and skills in the neonatal and pediatric environment under the guidance of skilled preceptors. Students will be assigned to diverse clinical areas including Neonatal Intensive Care I and II, Pediatric Intensive Care, Birth Unit, and General Wards. Students may be assigned to clinical experiences during twelve hour day or night shifts. Students may be required to travel outside the metro area at their own expense.

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

PREREQUISITE: RSPT 2500.03

RESTRICTION: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

### RSPT 3020X/Y.06: Cardiac and Pulmonary Diagnostics.

This course will consist of two modules; the first being a seminar/lab series during the first few weeks of the Fall semester and the second being a three week full-time clinical application program in the adult and pediatric pulmonary function, arterial blood gas analysis, electrocardiography and sleep laboratories. Students will integrate and apply theories and skills in specialized diagnostic environments. Students will be precepted and evaluated by certified technologists. This course will enable students to become proficient in performing cardio-pulmonary diagnostic testing including spirometry. Students will have exposure to bronchoprovocation testing and exercise stress testing. Students may be required to travel outside the metro area at their own expense.

NOTE: Students taking this course must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

PREREQUISITE: RSPT 2500.03, STAT 1060.03

RESTRICTION: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

### RSPT 3230X/Y.06: Critical Care Instrumentation and Clinical Techniques.

This class will consist of two modules; the first being a seminar/lecture series during the first few weeks of the fall semester and the second being a five week full-time clinical application program in diverse critical care areas. Students will be presented with the concepts and theories relevant to the respiratory care of the critical patient. Students will recall and apply theories and concepts learned in previous courses in order to integrate this knowledge with new information presented. The clinical application program will provide the students with the opportunity to integrate theories and procedures learned in the seminar/lecture series. Students may be assigned to any of the following critical care areas: medical, surgical, neurosurgical, cardiovascular and coronary care. Depending on availability of clinical sites, students may be expected to travel outside the Metro area at their own expense.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: RSPT 2500.03

CO-REQUISITE: RSPT 3000X/Y.06

### RSPT 3250X/Y.06: Health Practice.

This course enables students to apply theories, practice clinical skills and integrate previous learning experiences acquired throughout the three years of the BHSc program. Students will be assigned to a rotating clinical schedule at various clinical sites. Clinical experiences in this course may occur on weekends or night shifts. Students will be evaluated by preceptors at the assigned clinical sites in consultation with faculty. Students may be required to travel outside the metro area at their own expense.

NOTE: Students taking this course must register in both X and Y terms; credit will be given only if both are completed consecutively.

PREREQUISITE: RSPT 2500.03

RESTRICTION: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

### RSPT 3500.03: Clinical Practicum III.

This course enables students to integrate theories and skills acquired throughout the previous three years of the program; including theory, clinical practicum and clinical education courses. Students will be evaluated on skills proficiency, time management, organizational skills, and decision-making at a high level of independence. Students will be assigned to diverse clinical areas and patient populations. Clinical experiences in this course will occur during twelve hour day and night shifts, including weekends.

FORMAT: May also include one weekend workshop in Pediatric Advanced Life Support.

PREREQUISITE: RSPT 3000.06, 3010.06, 3020.06, 3230.06, 3250.06

RESTRICTION: Restricted to Bachelor of Health Science students enrolled in the professional stream Respiratory Therapy

### RSPT 4000.12/4100.06: Specialty Practice I/Specialty Practice II.

Specialty practice affords students the opportunity to attain additional competence and knowledge in a specialty practice area. There are three components to specialty practice: clinical, contextual and theoretical. This course can be six or twelve credit hours depending on the nature of the specialty practice. Specialty practice is arranged through consultation with the fourth year/post diploma advisor.

PREREQUISITE: RSPT 3500.03 for entry level students; Post diploma students must consult with the post diploma advisor to ensure the necessary prerequisites have been met.

RESTRICTION: Restricted to Bachelor of Health Science students in Respiratory Therapy. Enrolment may be limited due to clinical site availability

### RSPT 4010.03: Anaesthesia Technology and Related .

The course will provide advanced knowledge of the function, operation, set-up and quality assurance issues regarding anaesthesia and related equipment. The student will be provided with the knowledge necessary to work with anaesthesia equipment in operating room and related settings.

FORMAT: Online delivery via BLS

PREREQUISITE: RSPT 3500.03

RESTRICTION: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor

**RSPT 4020.03: Anaesthesia Medication Delivery.**

This course will provide in depth knowledge of the modes of delivery and action and interaction of anesthesia pharmacology. The student will be provided with knowledge regarding common medications related to the delivery of anaesthesia and monitoring their effect in the operating room and related settings.

FORMAT: Online delivery via BLS

PREREQUISITE: RSPT 3500.03 or equivalent

RESTRICTION: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor

**RSPT 4030.03: Clinical Anaesthesia.**

This course will provide in-depth knowledge of evaluation, monitoring and interventions for patients receiving anaesthesia under varying conditions. The student will be provided with the knowledge necessary to anticipate the needs of the patient and the assistance required by the anaesthetist during different aspects of the anaesthetic process.

FORMAT: Online delivery via BLS

PREREQUISITE: RSPT 3500.03 or equivalent

RESTRICTION: Restricted to Bachelor of Health Science students in Respiratory Therapy or by permission of instructor

## Interprofessional Health Education

---

**IPHE 2201.03: Introduction to Aboriginal Peoples' Health and Healing.**

This course provides students the opportunity to learn about Aboriginal perspectives regarding health, as well as the multiple and complex challenges facing Aboriginal peoples with respect to key health issues, such as health and social inequities, the epidemiology of disease and culturally appropriate service provision.

INSTRUCTOR(S): D. Martin, TBA

RESTRICTION: Faculty of Health Professions students only

**IPHE 4900.00: Interprofessional Health Education Portfolio.**

This course is intended to prepare students to work in a collaborative and patient/client/community/family-centered work environments. Students in Health Professions undergraduate programs are required to maintain registration in this course for the duration of their studies. The student will be required to have completed, by the end of their program of study, a total number of different, meaningful and relevant interprofessional collaborative learning experiences (as determined and approved by the School/College) equal to two times the number of years or part of years of study in the program. At least one of these experiences will be in a practice setting (in the event there are no students from other professions in any of the student's practice settings, credit may be granted for interactions with non-student professionals which follow an approved structured format). The experiences will include interactions with undergraduate and/or graduate students from a total of at least 4 different related professions with which there are natural affinities or linkages in the professional environment, some professions of which are outside the student's home School/College. In accordance with the guidelines/requirements of the home School/College, students will prepare a portfolio (or comparable document/process) which maps their interprofessional collaborative learning experiences on to the specific requirements of the School/College. The portfolio will be graded by the School/College on a Pass/Fail basis. Successful completion of this course is a requirement for graduation in all programs, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions.

FORMAT: Portfolio overseen by individual FHP School/College

RESTRICTION: Health Professions students only

### Dean

Webster, W. G., PhD

### Director

MacMillan, K., Diploma Nursing, BSc, MA, MSc, PhD (Toronto), RN

### Associate Director, Graduate Studies

MacDonald, M., BN (UNB), MSN (S. Maine), PhD (San Diego), RN

### Associate Director, Undergraduate Studies

Gilbert, C., BS, MBA (S. Illinois), MSN (Case Western Reserve), NP

### Associate Director, Research and International Affairs

Tomblin Murphy, G., BN, MN (Dalhousie), PhD (Toronto), RN

### Assistant Director, Graduate Studies

Tamlyn, D., BN (McGill), MEd (Ottawa), PhD (Dalhousie), RN

### Assistant Director, Undergraduate Studies

Houk, S., BScN (Sask), MN (Dalhousie), RN

### Senior Clinical Coordinator

Bleasdale, B., BN (Dalhousie), RN

### Clinical Coordinator, NP Program

Herbert, K., BN (MUN), MA (Dalhousie), NP

### Professor Emeritus

Keddy, B., BScN (MSVU), MA, PhD

### Coordinator, BScN (Arctic Nursing)

Edgecombe, N., BN (Lethbridge), MN, PhD (Alberta), RN

### Professors

Hughes, J. M., BN (Dalhousie), MS (Boston), PhD (McGill), RN  
Sullivan, P. L., BScN (MSV), MSc (Boston), PhD (Alberta), RN  
Tomblin Murphy, G., BN, MN (Dalhousie), PhD (U of T), RN

### Associate Professors

Aston, M., BNSc, MEd (Queen's), PhD (U of T), RN  
Latimer, M., BA (MAU), BScN, MN (Dalhousie), PhD (McGill), RN  
Martin-Misener, R., DOCHN, BScN, MN (Dalhousie), PhD (Calgary), NP  
Macdonald, M., BN (UNB), MSN (S. Maine), PhD (San Diego), RN  
Sabo, B., BA (Manitoba), MA, PhD (Dalhousie), RN  
Steenbeek, A., BScN (McMaster), MSN, PhD (UBC), RN  
Tamlyn, D., PhD (Dalhousie), MEd (Ottawa), BN (McGill)

### Assistant Professors

Campbell-Yeo, M., BScN, MN (Dalhousie, PhD (McGill), NP  
Chircop, A., BScN, MN, PhD (Dalhousie), RN  
Curran, J., BScN, MEd (MUN), PhD (Dalhousie), RN

Edgecombe, N., BN (Lethbridge), MN, PhD (Alberta), NP  
Fillmore Elbourne, H., Diploma (New Brunswick), BScN (Ryerson), MN (Dalhousie), PhD (Southampton), RN  
Foster, S., BN (MUN), MN (Dalhousie), RN  
Gilbert, C., BS, MBA (S. Illinois), MSN (Case Western), NP  
Goldberg, L., BA (UCCB), MA (Dalhousie), PhD (Alberta), RN  
Hayward, K., BScN, MN (Dalhousie), RN  
Halperin, B., MN (Dalhousie), BNcS (Queen's), RN  
Helpard, H., BN (UNB), MN (Dalhousie), RN  
Houk, S., BScN (Sask), MN (Dalhousie), RN  
Kiberd, C., BN, MN (Dalhousie), MEd (Queen's), RN  
McLeod, D., BN, MN (Dalhousie), PhD (Calgary), RN  
Murphy, N. J., BN (Dalhousie), MSN (UBC), RN  
Price, S., RN Diploma (VGH), BScN (Post-RN), MN (Dalhousie), PhD (Toronto), RN  
Richardson, H., BScN, MA (Dalhousie), RN  
Snelgrove-Clarke, E., BN (MUN), MN (Dalhousie), PhD (McGill), RN  
Vukic, A. R., BN, MN (Dalhousie), RN  
Waldron, I., BA (McGill), MA (London), PhD (Toronto)  
White, M., BN (UNB), MN (Dalhousie), RN  
Wight Moffatt, C. F., BN (MUN), MS (Boston), PhD (Toronto), RN

### Lecturers

Barkhouse-MacKeen, C., BN (Dalhousie), MSc (Texas-Austin), RN  
Duinker, E., BScN, MN (Dalhousie), RN  
Hebert, K., BN (MUN), MN, NP (Athabasca)  
MacIsaac, B., BScN (Alberta), MN (Dalhousie), RN  
Sheffer, C., BN, MN (Dalhousie), RN

### Senior Instructor - Skills Laboratory

Bethune, E., BScN (MSVU), RN

### Instructor - Skills Laboratory

Ritchie, C., BScN, RN

### Adjunct Appointments

Banfield, V., BScN (St. FX), MN (Dalhousie), RN  
Banoub-Baddour, S., BScN, MScN, DNSc (Egypt), RN  
Bayer, M. J., BN (Dalhousie), MEd (Acadia), PhD (Dalhousie)  
Bowes, D., BN, MN (Dalhousie), RN  
Braunstein, J., BScN (Cornell), MPH (Minn)  
Byrne-Surette, D., BScN (Dalhousie), MN (Athabasca), RN  
Campbell, M., BN, MSN (Yale), RN  
Campbell, T., BScN (UPEI), MN (Dalhousie), RN  
Carson, G., BN, MN (Dalhousie), RN  
Cobbett, S., BN, MN (Dalhousie), EdD (Australia), RN  
Cook, E., BScN (UWO), BSc (Iowa), MN (Athabasca)  
Cooper, E., BN, MN (Dalhousie), RN  
Coulter, L., BN, MN (Dalhousie), RN  
Deveau, M., BScN (Dalhousie), MN-ANP (Athabasca), NP  
Doucet, L., BN, MN (Athabasca), RN  
Edwards, N., BScN (Windsor), MSc (McMaster), PhD (McGill), RN  
Forgeron, P., BScN (St. FX), MN (Dalhousie), RN  
Frank, B., BEd, BA, MEd (Acadia), PhD (Dalhousie)  
Garden-Jayasinghe, J., BN, MN (Dalhousie), RN  
Gaudine, A., BSc, MScN (McGill), PhD (Concordia), RN  
Gillis, A., BScN, MAdEd (St. FX), PhD (Texas-Austin), RN  
Graham, K., BScN, MN (U of A), RN

 Packer, T., BSc (Hons), MSc, PhD (Queen's)  
 Rathwell, T., BA (Hons) (York), MA, PhD (Durham)  
 Singleton, J., BA (Waterloo), MS (Penn State), PhD (Maryland), Associate Professor, School of Recreation, Physical & Health Education  
 Sketris, I., BscPhm (Toronto), MPA (Dalhousie), PharmD (Minnesota)  
 Thomas-Bernard, W., BA (MSVU), MSW (Dalhousie), PhD (Sheffield)  
 Townsend, E., BSc (Toronto), MadEd (St. FX), PhD (Dalhousie)  
 Versnel, J., BSc (Toronto), MSc (Ontario), PhD (Queen's)  
 Warner, G., BSc (Elmhurst), MSc, PhD (Case Western Reserve)

## Preceptors

Many nurses and persons in other disciplines, and settings, provide valuable assistance in the education of nursing students. Names can be obtained by contacting the School of Nursing.

## I. Introduction

The School of Nursing opened in 1949 and became a constituent part of the Faculty of Health Professions in 1961. Currently the School offers an undergraduate program for Basic and Post Diploma students, a Bachelor of Science (Arctic Nursing), a Master of Nursing Program and a PhD (Nursing) Program.

### A. School of Nursing Regulations

1. Students are required to observe the University Regulations and Academic Regulations as described in this calendar.
2. Students are assessed in each year on their aptitude and fitness for nursing. Students who, in the judgment of the faculty, fail to attain a satisfactory standard in this assessment may be required to withdraw from the School.
3. Students are responsible for ensuring that they are registered in appropriate classes throughout the program. Incorrect registration, at any time, could cause conflicts in a student's year-to-year progression and/or graduation.
4. Students in the Baccalaureate Program are responsible for (a) the purchase of uniforms including shoes and a watch with a sweep hand or a digital watch with seconds display, (b) cost of accommodation and travel while on clinical experiences. Additional expenses are incurred by students in the Basic Baccalaureate Program for field experience, books, first aid class, CPR class, graduation pin, equipment, and nurse registration examinations and recommended and/or required immunizations and/or testing. Each student must also purchase a name tag from the University.
5. Because of enrolment limits on class size, part-time students who wish to change to full-time status must present this request in writing to the Assistant Director, Admissions & Student Affairs by March 1.
6. Students are assigned to a faculty member from the Academic Advising Committee to help them plan their academic program and to discuss academic progress or difficulties.
7. Students are permitted to repeat a nursing class, exclusive of nursing electives, in the BScN program only once. A second failure will result in dismissal from the program.

8. Students wishing to appeal a decision based on faculty regulations or decisions should follow the School of Nursing Appeal Procedure outlined in the Nursing Student Guide.
9. Supplemental exams will not be available in clinical classes.
10. Because of the nature of the study and practice of Nursing which places Nursing students in a position of special trust, applicants will be asked to complete a screening question related to past criminal convictions which might affect the applicant's suitability for the practice of nursing. Students accepted into the nursing program who provide false information will be disciplined by the university. It is the student's responsibility to inform the Assistant Director (Undergraduate Student Affairs) of any new criminal conviction which could affect the student's suitability for practice.
11. Once enrolled in the Nursing Program it is the students' continuing responsibility to inform the Assistant Director Undergraduate Student Affairs of any criminal conviction or any significant personal circumstance which would adversely affect their ability to continue with their studies or which would make them ineligible for registration within CRNNS upon graduation.

## B. School of Nursing Appeal Procedure

An appeal is a request for alteration of a decision which is based on School or Faculty regulations (academic matters). Both students and faculty have rights and responsibilities and further, that as the University is a complex system, students may experience difficulty in determining how to express dissatisfaction. This document is provided as a guideline for students and faculty in solving dissatisfactions.

The University has established a system which allows students to appeal academic decisions made by faculty. Appeals can be heard at different levels within the University: At the School and at Senate. Appeals are heard in the School by the Student Appeals Committee and at Senate level by the Senate Academic Appeals Committee.

### C. Procedure for Undergraduate Appeals

Undergraduate appeals are heard by the Student Appeals Committee of the School of Nursing. Procedures for undergraduate appeal procedures are available from the School.

## D. Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. Successful completion of this class is a requirement for graduation, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

## II. Degree Options

### A. Bachelor of Science (Nursing) for Basic Students

#### 1. Degree Requirements

Throughout the undergraduate program students must: obtain a minimum cumulative GPA of 2.00; accumulate a minimum of 129 credit hours; successfully complete all compulsory classes, as well as the necessary number of elective classes; and, complete the degree within six years of commencing nursing classes. Credit will be given for non-nursing classes that are up to ten years old by the date the degree is completed.

#### 2. Grade Point Average Standards (GPA)

The grade point average system is described in the Academic Regulations.

#### 3. Grades

The following letter-grade system is used to evaluate performance. Pass in non-nursing classes: **A+**, **A**, **A-**, **B+**, **B**, **B-**, **C+**, **C**, **C-**, **D**, and **P**, except in nursing classes where students must attain a minimum of **C** in both theory and clinical/laboratory components. **FM**, **F**, and **INC** are failing grades. **ILL** and **W** are considered neutral.

#### 4. Requirements for Promotion

Besides meeting the GPA requirements students must meet the following for promotion:

Year I to Year II: A student must pass all 1000-level classes in order to advance to 2000-level nursing classes, including, ANAT 1010.03, PHYL 1010.06, and BIOC 1420.03.

Year II to Year III: A student must pass all second-year nursing classes, MICI 1100.03, and STAT 1060.03.

Year III to Year IV: A student must pass all 3000-level nursing classes.

#### 5. Normal Workload

The program consists of 129 credit hours (21.5 credits); Students can register for a maximum of 15 credit hours per term.

#### 6. Prerequisite for Class Admissions

There are a number of classes that require prerequisites (see class descriptions). Students must successfully complete the required prerequisites for each class or obtain approval from the Committee on Studies prior to registration.

#### 7. Advanced Placement

Incoming students with previous post-secondary work may qualify to complete an accelerated or fast-track BScN stream. *Two Calendar Year, Three Academic Year* and *Three Calendar Year* options are available. To qualify, students must have a GPA of at least 3.0 and specific prerequisites. Space is limited. For more information contact the Undergraduate Admissions Secretary.

### B. Bachelor of Science (Nursing) (Arctic Nursing)

The Arctic Nursing Program, developed collaboratively between Nunavut Arctic College and Dalhousie University, is a four-year program that focuses on nursing in Nunavut. This program is designed for Nunavut residents. The curriculum emphasizes awareness and respect for Inuit culture and will prepare Inuit nurses to be leaders in the health-care system of Nunavut.

To apply or learn more about the program contact the School of Nursing.

### C. Graduate Programs

For details of the Master of Nursing, the joint Master of Nursing/Master of Health Administration programs and the PhD (Nursing) program, please consult the Faculty of Graduate Studies calendar.

## III. Bachelor of Science (Nursing) Degree Program

In response to a health care system based on principles of primary health care, the Bachelor of Science (Nursing) Program prepares nurses to work in partnerships with individuals, families, groups and communities to promote, maintain and strengthen health. Graduates are prepared to respond to a range of health and illness needs in a variety of settings and organizational health care infrastructures. The curriculum is designed to enable graduates to meet the standards of nursing practice in Canada and be eligible for registration in Nova Scotia.

In addition to the Dalhousie Campus, students may complete a BScN degree on site in Yarmouth. Students interested in this option should contact the School for further information.

### Program Objectives

The Bachelor of Science (Nursing) graduate will:

1. Demonstrate application of nursing science through critical inquiry, commitment to life-long learning and evidence-based practice.
2. Practice competently by applying the principles of primary health care with diverse \*clients in a variety of health care contexts and by responding to emerging trends, technology and concepts in health.
3. Communicate, collaborate and partner with \*clients, and other members of the health care team to increase capacity and enhance health of populations.
4. Demonstrate ethical, legal and professional accountability in the practice of nursing and remain committed to professional competence through life-long learning.
5. Influence nursing and health care through a social and political analysis of current health care issues and application of leadership skills.

\*(individuals, family, groups, community and/or populations)

### A. Bachelor of Science (Nursing) for Basic Students

The Bachelor of Science in Nursing degree is a 129 credit hour program.

Graduates are eligible to write examinations for membership in the College of Registered Nurses of Nova Scotia.

#### 1. Immunization

Before commencing first year studies, students are responsible to have complete and current immunizations against diphtheria, polio, tetanus, pertussis, measles, mumps, rubella, Hepatitis B and a 2-step Mantoux. Access to clinical agencies will be denied if immunizations are not current and complete.

#### 2. CPR, (BCLS) & Standard First Aid Certification

Before commencing first year studies, students must have CPR (Health Care Provider Level) and Standard First Aid certification. CPR (Health Care Provider Level) must be recertified annually. A cardio-pulmonary resuscitation (CPR) class and standard first-aid class are the student's responsibilities in time and cost. Access to clinical settings will be denied if certification is not current.

#### 3. Class of Study

The Program is offered at both the Halifax and Yarmouth sites. The following is an outline of classes that are normally taken each year.

Program requirements may change with ongoing curricular revisions.

##### First Year

- ANAT 1010.03
- BIOC 1420.03
- PHYL 1010.06
- NURS 1000.03
- NURS 1030.03
- NURS 1220.03
- NURS 1240.03 (a five-week clinical/class starting in late April or early May with annual variations)
- nine credit hours at the 1000 level from Biology, Chemistry, Philosophy, Psychology and/or Sociology.

##### Second Year

- MICI 1100.03
- NURS 2000.03
- NURS 2035.03
- NURS 2050.03
- NURS 2080.03
- NURS 2090.03
- NURS 2200.03
- NURS 2280.03
- NURS 2220.06 (a six-week clinical nursing intersession taken in May/June or July/August)
- STAT 1060.03

##### Third Year

- NURS 3040.03
- NURS 3060.03
- NURS 3260.03
- NURS 3270.03
- NURS 3280.03
- NURS 3290.06 (a six-week clinical nursing intersession, usually starting in April or early May with annual variations)
- Six credit hours at the 2000 or 3000 level from Biology, Chemistry, Philosophy, Psychology, and/or Sociology
- Three credit hours of general electives may be taken from any class NOT listed as a nursing elective: however, the class must be at the 2000 level or above except in the case of a language (not English) which can be taken at the 1000 level.
- One Nursing elective (three credit hours)

##### Fourth Year

- NURS 4030.03
- NURS 4050.03
- NURS 4060.03
- NURS 4210.03
- NURS 4220.03
- NURS 4250.03
- NURS 4260.03

- One Nursing elective (three credit hours)
- NURS 4240.06 (minimum 280 hour internship beginning in March)

## B. Bachelor of Science (Nursing) for Registered Nurses

Admission to this program has been suspended.

The Bachelor of Science (Nursing) for registered nurses consists of 60 credit hours of study. Students may complete the program at either the Halifax or Yarmouth site through full- or part-time study. The program can be completed in two calendar years of full-time study provided Faculty resources allow required nursing classes to be offered during the summer session. Otherwise, students without transfer credits can complete the program in two full-time and one part-time academic year (September - April). Part-time students who wish to change their status to full-time must write their request to the Associate Director of Undergraduate Student Affairs by March 1.

A clinical major option in oncology nursing may be available as a class component of the BScN (RN) degree program.

The School of Nursing has made a commitment to offer accessible nursing education to registered nurses allowing them to obtain their education in the communities where they live and work.

Check with the Distance Advisor for Post RN students regarding class offerings.

### Course of Study

With the help of an academic advisor, an individual course of study is determined. Course of study may be affected by the actual classes offered in an academic year. Certain classes may have prerequisites as noted in the class descriptions. Part-time students are encouraged to complete most of the required non-nursing classes before starting nursing classes. The course of study varies considerably when the student applies transfer credits toward the degree. Transfer credit regulations are outlined under the Academic Regulations section of the University Calendar.

#### Required Classes

- STAT 1060.03
- NURS 2250.03
- NURS 3030.03
- NURS 4030.03
- NURS 4250.03
- NURS 4260.03
- Nursing Electives (six credit hours)
- The six credit hours of electives may be chosen from Nursing and Interdisciplinary classes. Class selections vary by year. Please consult the current years timetable for class offerings.

#### Optional classes (nine credit hours must be selected)

- NURS 2080.03
- NURS 2240.03
- NURS 3270.03
- NURS 4050.03

Eighteen credit hours must be chosen from at least two of the following non-nursing subjects areas: Anatomy, Biochemistry, Biology, Chemistry, Microbiology, Philosophy, Physiology, Psychology and Sociology

Six credit hours of general electives must be taken from any class NOT listed as a nursing elective; however, the class must be at the 2000 level or above except in the case of a language (not English) which can be taken at the 1000 level. An open elective (either nursing or general) is also required.

## C. Nursing Elective Classes

Basic students are required to complete six credit hours of nursing electives. Post RN students must complete six credit hours of nursing electives. NOT ALL NURSING ELECTIVES ARE OFFERED EVERY YEAR. Please consult the School to ascertain the current offerings. When resources allow, the following are offered:

- NURS 2360.03: The Phenomenon of Pain: Assessment and Management.
- NURS 2390.03: Emergency Preparedness: A Nursing Perspective
- NURS 3080.03: Culture Caring and Health Care.
- NURS 3310.03: Health Informatics.
- NURS 3320.03: Acute Care Specialty Nursing.
- NURS 3345.03: Fundamentals of Oncology Nursing

- NURS 3360.03: Alternative and Complementary Therapies: Implications for Nursing Practice.
- NURS 4091.03: Breast Feeding for Family and Community Health.
- NURS 4330.03: Self-Directed Learning.
- NURS 4351.03: Specialty Practice of Oncology Nursing.
- NURS 4360.03: Management - The Process in Health Care Agencies.
- NURS 4371.03: Addictions Nursing Practice.
- NURS 4380.03: Introduction to Epidemiology Methods in Nursing Practice.
- NURS 4390.03: Intermediate Pathophysiology and Nursing.

## D. Interdisciplinary Nursing Elective Classes

- NURS 4370.03: Women and Aging.
- NURS 4800.03: Interdisciplinary Class in Human Nutrition.

## IV. Class Descriptions

Section 01 is restricted to students registered in the Halifax program.

Section 03 is restricted to students registered in the Yarmouth program.

Section 06 is for students choosing the Distance option.

### ANAT 1010.03: Basic Human Anatomy.

See class description in the Anatomy/Neurobiology section of calendar.

### BIOC 1420.03: Introductory Biochemistry for Nursing Students.

See class description in the Biochemistry/Molecular Biology section of calendar.

### MICI 1100.03 Health Science Microbiology.

See class description in the Microbiology & Immunology section of calendar.

### NURS 1000.03: Introduction to the Foundations of Nursing.

Major concepts of health and professional nursing are introduced. Students begin to develop an awareness of the practice of nursing based on the determinants of health, primary healthcare and major nursing concepts. Emphasis is given to the helping role of nursing. A variety of experiences facilitate learning and students are introduced to the practice of nursing in clinical settings.

FORMAT: Lecture 2 hours, tutorial 1 hour

### NURS 1030.03: Human Development and Health I: Adults and Healthy Aging.

Guided by the principles of Primary Health Care and building on the concepts introduced earlier, students examine the developmental processes experienced by adults. Students focus on the psychosocial, cultural, cognitive, and spiritual health of adults and on nursing practices that promote health in adults at specific developmental stages. Issues of safety and nutrition are specifically addressed. Strategies to promote healthy aging at the individual, family, and community level are explored.

FORMAT: Lecture 3 hours

PREREQUISITE: NURS 1000.03

### NURS 1220.03: Knowledge and Process in Nursing Practice I.

Knowledge and Process in Nursing Practice I. Students develop beginning competence in the use of health assessment. Comprehensive health assessments are integrated as a basis for clinical interventions inherent in the caring role. In addition, students are introduced to the organizational and work role competencies required for clinical practice.

FORMAT: Lecture 2 hours, clinical/lab 4 hours

PREREQUISITE: NURS 1000.03

### NURS 1240.03: Introduction to Nursing Practice.

(Intersession) Students are introduced to healthcare settings where they interact with older adults at various levels of health. As a basis for these experiences the foundations of nursing addressed in NURS 1000.03, NURS 1030.03, and NURS 1060.03 are further developed. Learning experiences are designed to promote beginning knowledge and skills for the practice of nursing with an emphasis on helping relationships.

FORMAT: Lecture/lab and clinical 40 hours/week for 5 weeks

PREREQUISITE: NURS 1030.03, 1220.03

### **NURS 2000.03: Teaching and Learning and the Communication Process.**

Teaching and learning transactions among nurses and individuals, families, groups and communities are integral to health and well-being. The process of communication is central to the teaching-learning process and occurs within the nurse-patient relationship (a collaborative-partnership). The course is designed to assist students to critically analyze and integrate the teaching-coaching domain of nursing practice within the helping role of the nurse. Principles and theories of learning are used to identify strategies to help clients acquire knowledge, skills and attitudes that enable them to attain/maintain optimal levels of health. The course includes an introduction to the counseling role of the nurse with a focus on therapeutic communication strategies necessary to establish partnerships with clients. Students are given opportunities to expand their existing interviewing and communication skills and teaching abilities.

FORMAT: Lecture 3 hours

PREREQUISITE: NURS 1240.03, BIOC 1420.03, PHYL 1010.06, ANAT 1010.03

### **NURS 2035.03: Nursing Research.**

This course requires students to engage in a critical inquiry about how research processes influence the way knowledge is constructed. Students explore dimensions of knowing from multiple perspectives of acquired knowledge, experiential knowledge of nursing practice, conceptual meanings, collaborative practice partnerships and values and beliefs about the contributions of nursing knowledge as transformative in the healthcare system. Sharing new knowledge resulting from the synthesis and transfer of evidence across disciplines and healthcare sectors will be examined. The use of innovative and creative thinking supports students to design ways of communicating and translating research findings for application to practice.

FORMAT: Lecture 3 hours

PREREQUISITE: NURS 1240.03, ANAT 1010.03, PHYL 1010.06, BIOC 1420.03

CO-REQUISITE: STAT 1060.03/MATH 1060.03

### **NURS 2050.03: Pharmacology and Nursing.**

Students are introduced to the pharmacokinetics and pharmacodynamics of the major drug classes with an emphasis on application in the clinical setting. Interdisciplinary and collaborative aspects of the nurse's role in administering and monitoring medications and their effects are explored. Students demonstrate dosage calculation, preparation and administration of medications in the laboratory setting. Legal, ethical and professional principles of accountability are examined.

FORMAT: Lecture 3 hours, lab 2 hours

PREREQUISITE: NURS 1240.03, BIOC 1420.03, PHYL 1010.06, ANAT 1010.03

### **NURS 2080.03: Social and Cultural Determinants of Health.**

Social inequities often make it difficult for individuals, families, groups and communities to attain or maintain health. This class is designed to critically analyze the social and cultural determinants of health. Students explore their own attitudes and beliefs related to topics including racism, poverty, ageism, sexism and classism. Critical social theory, cross cultural nursing, communication, health promotion, health education and social action are included in this course to provide students with the knowledge and skills to influence the social determinants of health in the healthcare system.

FORMAT: Lecture 3 hours

PREREQUISITE: NURS 1240.03, BIOC 1420.03, PHYL 1010.06, ANAT 1010.03

### **NURS 2090.03: Pathophysiology and Nursing.**

This course provides a foundation for understanding human physiological responses to health alterations. An in-depth understanding of structural and functional changes from normal serves as the basis for nursing assessment, intervention, and care.

FORMAT: Lecture 3 hours

PREREQUISITE: BIOC 1420.03, ANAT 1010.03, PHYL 1010.06, NURS 1240.03

CO-REQUISITE: MICI 1100.03

### **NURS 2200.03: Knowledge and Process in Nursing Practice II.**

Students are introduced to theoretical bases of nursing to evaluate health behaviours and outcomes. Students build on health assessment skills, and monitor,

implement and evaluate nursing interventions. Students are introduced to nursing research to guide reflective nursing practice and the safe use of technology and caring approaches in laboratory settings.

FORMAT: Lecture 2 hours, lab 2 hours

PREREQUISITE: NURS 1240.03, ANAT 1010.03, PHYL 1010.06, BIOC 1420.03

### **NURS 2220.06: Nursing Practice II.**

(Intersession) This clinical practicum enables students to continue to integrate primary healthcare principles, nursing knowledge and theory, and nursing processes within nursing practice. Students consolidate concepts, theories and skills in caring for individuals in acute and chronic care settings. Emphasis is placed on collaborating with clients to identify health goals as well as perceptions and attitudes about their health. Students must be prepared to travel beyond the Halifax metropolitan area for part or all of this experience.

FORMAT: Clinical practicum 40 hours/week for 6 weeks

PREREQUISITE: NURS 2000.03, 2035.03, 2200.03, 2280.03, 2050.03, 2080.03, 2090.03, MICI 1100.03

### **NURS 2250.03: Theoretical Perspectives for Contemporary Nursing Practice.**

The purpose of this course is to provide students the opportunity to use theoretical perspectives in nursing to discover knowledge related to the process of nurse-client interaction. Students will examine the development and progress of relevant nursing theories and explore the relationships between nursing theory, nursing science, and nursing knowledge. Students will be introduced to selected methods of theory analysis. The concepts and assumptions of selected nursing theories will be used to describe and explain phenomena relevant to nurse-client interaction.

FORMAT: Lecture 2 hours, clinical 4 hours

RESTRICTION: For POST-RN students only

### **NURS 2280.03: Care of Adults I.**

Students learn to integrate nursing knowledge and processes in the care of adults coping with illnesses. Emphasis is placed on the integration of primary healthcare concepts as related to alterations in health status. Students further develop knowledge and skills during clinical experiences in adult medical and surgical settings.

FORMAT: Lecture 2 hours, 78 hours clinical total

PREREQUISITE: NURS 2050.03, 2090.03, 2200.03, MICI 1100.03

### **NURS 2360.03: The Phenomenon of Pain: Assessment and Management.**

This course challenges students to critically examine their current knowledge and skill in the nursing responsibilities associated with care of clients experiencing pain and to further develop students knowledge, attitudes, skills and competencies in providing effective pain management. Students will improve their ability to identify the client who has pain, perform comprehensive assessments of pain and its impact, initiate nursing interventions to alleviate the pain and evaluate the effectiveness of those interventions. Emphasis is placed on advancing the students ability to assess, analyze and manage this complex phenomenon in order to successfully provide effective pain relief. Critical thinking, interpersonal communication and assessment skills will be enhanced through a variety of learning activities including case studies and weekly online, asynchronous discussions.

FORMAT: Distance

CO-REQUISITE: NURS 2200.03, 2050.03, 2090.03

### **NURS 2390.03: Emergency Preparedness: A Nursing Perspective.**

This course focuses on preparation of future nurses for various hazards using an "all hazards" approach. Local, provincial and national disaster response systems, in the event of a mass casualty, are explored, and the ability to care for victims and responders of all types of hazards is emphasized.

FORMAT: Distance

PREREQUISITE: NURS 2090.03, NURS 2200.03

### **NURS 3030.03: Nursing Research.**

This course requires students to engage in a critical inquiry about how research processes influence the way knowledge is constructed. Students explore dimensions of knowing from multiple perspectives of acquired knowledge, experiential knowledge of nursing practice, conceptual meanings, collaborative partnerships and values and beliefs about the contributions of nursing knowledge as transformative in the healthcare system. Sharing new knowledge resulting from the synthesis and transfer of evidence across disciplines and healthcare sectors will be examined. The use of innovative and creative thinking supports students to

design ways of communicating and translating research findings for application to practice.

FORMAT: Lecture 3 hours

PREREQUISITE: NURS 2220.06 and STAT 1060.03; STAT 1060.03 for Post-Diploma students (NURS 2020.03 strongly encouraged)

### **NURS 3040.03: Human Development and Health II: Children and Youth.**

This course examines concepts and theories of healthy growth and development across the life-span from conception to adolescence. Content is organized around health, nutrition, and the safety of individuals at specific stages in their physical, cognitive, and psychosocial development. Concepts of culture/ethnicity, environment, economic status and other life situations are introduced in terms of their relationship to optimal health.

FORMAT: Lecture 3 hours

PREREQUISITE: NURS 2220.06, STAT 1060.03, MICI 1100.03

### **NURS 3060.03: Legal and Ethical Issues in Nursing Practice.**

Note: This course available starting 2014-2015. This course is designed to promote student understanding and application of ethical and legal concepts and theory within the dimensions of nursing practice. Students focus on decision-making processes and the impact of technology on nursing practice.

FORMAT: Lecture 3 hours

PREREQUISITE: NURS 2220.03, STAT 1060.03/MATH 1060.03

### **NURS 3080.03: Culture Caring and Health.**

This nursing elective promotes students awareness of the international/global impact of culture on health beliefs and client access to healthcare systems. Students explore their own attitudes and approaches to international/global cultures. Through this exploration, students identify strategies for international/global healthcare practices.

PREREQUISITE: NURS 1240 or with instructor's permission.

### **NURS 3260.03: Nursing Practice: Mothers, Infants and Childbearing Families.**

Students focus on the integration of the domains of nursing practice in caring for mothers and newborn infants within the context of the childbearing family. The nature of the childbearing experience is critically analyzed from the perspective of the determinants of health as well as the theoretical bases of maternal-infant attachment and nurse caring. Clinical experience with clients during pregnancy, birthing and post birth in hospital and home settings enable students to focus on health promotion within the context of family-centred care.

FORMAT: Lecture 2 hours, 78 clinical hours total

PREREQUISITE: NURS 2220.06, STAT 1060.03, MICI 1100.03

### **NURS 3270.03: Nursing Practice: Caring for Families.**

Guided by the principles of primary healthcare, students focus on families and family health with an emphasis on a thorough understanding of family assessment and developing family therapeutic relationship skills. Students examine family health and health issues from a nursing, cultural, sociological, psychological and other theoretical perspectives as they relate to nursing practice that focuses on working with families in all settings. Upon completion of the course, students will have developed competencies required to use a systems approach when working with families. Laboratory and clinical experiences that include visiting families in their homes provide the students with opportunities to integrate, discuss and practice family nursing.

FORMAT: Lecture 2 hours, 78 clinical hours total

PREREQUISITE: STAT 1060.03, MICI 1100.03, NURS 2220.06; NURS 2250.03 for post diploma students

### **NURS 3280.03: Care of Adults II.**

This course focuses on family-centered nursing practice with adults who are managing complex health problems. Emphasis is placed on theoretically based nursing strategies incorporating principles of primary healthcare. Students are guided to incorporate theoretical bases into their clinical practice.

FORMAT: Lecture 2 hours, 78 clinical hours total

PREREQUISITE: NURS 2220.06, STAT 1060.03, MICI 1100.03

### **NURS 3290.06: Nursing Practice III.**

(Intersession) This is an opportunity to apply the principles of primary healthcare through reflective practice, the integration and application of theories and family nursing. Students enhance their ability to work with clients through a continuum of care approach. Students must be prepared to travel beyond the Halifax metropolitan area for part or all of this experience.

FORMAT: Clinical practicum 40 hours/week for 6 weeks

PREREQUISITE: NURS 3260.03, 3270.03, 3280.03, 3030.03, 3040.03

### **NURS 3310.03: Health Informatics.**

This nursing elective provides an overview of information technology and systems as they relate to practice, research, and education. Students are introduced to information technology and provided with opportunities to use critical thinking in analyzing the implications of information systems.

FORMAT: Distance

PREREQUISITE: NURS 2220.06; none for Post-RNs; open to students from other departments

### **NURS 3320.03: Acute Care Specialty Nursing.**

This course introduces students to acute care specialty nursing. Students will further develop, critically analyze and apply knowledge gained in previous courses with a focus on the management of critically ill adult clients in specialized settings. Emphasis will also be placed on interpersonal and interprofessional relationships within specialty practice.

FORMAT: Distance

PREREQUISITE: NURS 3280.03

### **NURS 3330.03: Fundamentals of Oncology Nursing.**

This nursing elective provides an introduction to oncology nursing. Beginning with a review of the physiology of the cancer cycle, the course considers cancer control related to: prevention, screening, early detection, diagnosis, treatment, supportive care/rehabilitation, palliative care. The focus of the course is to provide an opportunity for students to understand the cancer experience from the perspective of the patients and their families.

FORMAT: Lecture 3 hours

PREREQUISITE: NURS 2220.06

EXCLUSION: NURS 2350.03

### **NURS 3350.03: Family Centered Supportive Care for Those Who are Living with Cancer.**

This course focuses on families connected to an oncology experience. A family assessment model frames the role of the nurse in family centered supportive care. Supportive care is the provision of the necessary services as defined by those living with or affected by cancer to meet their physical, social, emotional, nutritional, informational, psychological, spiritual and practical needs throughout the spectrum of the cancer experience. These needs may occur during the diagnostic, treatment, or follow-up phases and encompass issues of survivorship, recurrence, palliative care and bereavement.

NOTE: This course fulfills the requirement for NURS 3270.

FORMAT: Lecture 3 hours

PREREQUISITE: NURS 2220.06

CO-REQUISITE: NURS 3345.03

### **NURS 3360.03: Alternative and Complementary Therapies: Implications for Nursing Practice.**

This elective course is designed to advance student knowledge and competencies in caring for clients and families who choose to use complementary and alternative therapies. The use of alternative and complementary therapies is prevalent and popular. Issues such as patient autonomy, freedom of choice, and the principle of non-maleficence are but a few of the ethical challenges faced by nurses and other healthcare practitioners. This course introduces students to alternative/complementary therapies and their associated nursing implications.

The primary therapies to be examined include mind-body interventions, manual healing therapies, botanical healing, diet therapy, native healing and spiritual therapies. Students will also have the opportunity to research non-conventional therapies in relation to cancer treatment and health promotion. This course fills a pressing need for graduating nurses to have a full understanding of these therapies so that they will be prepared to work with clients and families who have chosen to use complementary healthcare practices.

FORMAT: Distance

PREREQUISITE: NURS 2200.03, or completion of second year of study in any Health Professions program

### **NURS 4030.03: Collaborative Leadership for Nursing Practice.**

Based on the view that leadership is integral to the practice of every nurse, the focus of the class is on leadership theories and behaviours essential to nursing practice. Critical thinking, decision-making processes and other leadership behaviours are fostered through experiential and simulated learning methods.

FORMAT: Lecture 2 hours

PREREQUISITE: NURS 3290.06; Second and third year Nursing classes are strongly recommended for Post-Diploma; Post-RN NURS 2250.03

### **NURS 4050.03: Advanced Communication and Counselling.**

This course provides theory related to the counselling role of the nurse and addresses the dynamics of therapeutic communication in complex collaborative situations. Counselling occurs within the nurse-patient relationship viewed as a collaborative partnership which requires the active participation, involvement, and agreement of all partners.

The course is designed to assist students to facilitate and encourage individuals, families or client groups to effectively deal with change related to complex health situations. Application of course content in simulated nurse-client interviews in home, clinic or institutional settings enables the student to develop interactive skills in dealing with complex, collaborative health situations such as those requiring immediacy, confrontation, advocacy, conflict resolution and crisis intervention.

FORMAT: Lecture 2 hours, lab 2 hours

PREREQUISITE: NURS 3290.06; NURS 2250.03 for Post-RN Students

### **NURS 4060.03: Palliative Care Nursing.**

This course provides an overview of the significant issues facing individuals and their families related to life threatening illness, dying, and the promotion of quality of life. An exploration of one's own attitudes, beliefs, and values regarding death and dying provide a foundation for examination and discussion of course content. An analysis of the principles and standards of palliative care, principles of primary healthcare, methods of assessment, and means of pain and symptom management guide delivery of care. Emphasis on communication, collaboration within teams, ethical issues, spiritual and cultural influences, and grief and coping provide opportunities for reflection and discussion. Online resources offer opportunities for students to enhance their knowledge and understanding of course content.

FORMAT: Lecture 2 hours

PREREQUISITE: NURS 3290.06

CROSS-LISTING: NURS 5830.03

### **NURS 4091.03: Breast Feeding for Family and Community Health.**

This nursing elective is designed to promote student understanding of the process of human lactation. Developmental, sociocultural, physiological, psychological dimensions of breast feeding are used to describe and discuss the dynamics and effects of breast feeding on personal, family and community health.

Interprofessional issues and strategies for the protection, promotion and support of breast feeding are explored in the context of primary healthcare and the Canadian healthcare system.

FORMAT: Campus/distance offering, 3 hours

PREREQUISITE: NURS 2220.06 or permission of course instructor for non-nursing student

### **NURS 4210.03: Nursing Practice: Children and Families.**

Students focus on nursing practice in the care of children and families. The determinants of child and family healthcare are examined, as well as the role of nursing practice in health promotion and illness prevention for children. Clinical and family issues associated with childhood illness and hospitalization draw on knowledge of child and family development as well as the art and science of nursing knowledge. Students work in clinical settings where care is provided to children and families experiencing illness.

FORMAT: Lecture 2 hours, 78 clinical hours total

PREREQUISITE: NURS 3290.06

### **NURS 4220.03: Mental Health Nursing Practice.**

Integrating a holistic perspective within a primary healthcare philosophy, this class focuses on the promotion of individual and community mental well-being. Through reflective practice the use of nursing theories and effective communication, students assist clients through the challenges of mental health problems, crisis, and mental disorders. Students critique the social responsibility of the nursing profession through, not only direct care, but also client advocacy.

FORMAT: Lecture 2 hours, 78 clinical hours total

PREREQUISITE: NURS 3290.06

### **NURS 4240.06: Nursing Practice IV Internship.**

Nursing 4240, a clinical internship prior to graduation, provides students with the opportunity to consolidate and apply knowledge and processes within the domains of nursing practice. Students integrate leadership knowledge and behaviours

within social healthcare systems. Collaboration and advocacy with clients, other healthcare professionals and peers are emphasized. In this 8.5 week internship, students are precepted with a staff nurse and work the full-time hours of the preceptor. Students have input into their clinical placements, based on their learning needs and interests. Students must be prepared to travel beyond the Halifax metropolitan area for part or all of this experience.

FORMAT: Clinical internship consists of a minimum of 280 hours

PREREQUISITE: All other nursing and non-nursing requirements for the BScN Program must be completed.

### **NURS 4250.03: Community Health Assessment.**

Community health is a vital component of primary healthcare. The focus of this class is on the integration of community assessment theory and nursing practice in health promotion and illness prevention. Primary healthcare and population-focused health strategies are used as students collaborate with individuals, families, groups, communities and other healthcare professionals in working toward community health goals. Students apply critical thinking in assessing needs and strengths for community development in a variety of community settings.

FORMAT: Lecture 2 hours, clinical 6 hours, tutorial 1 hour

PREREQUISITE: NURS 3290.06; Post-Diploma students NURS 2250.03

### **NURS 4260.03: Community Development and Advocacy.**

This course builds on the content of NURS 4250.03. The focus is on critical thinking, interventions, and the evaluation of community health nursing strategies with client groups and communities. Community development is used as a strategy to put primary healthcare principles into nursing practice. Students are encouraged to work with communities using an empowerment and advocacy approach. Current local, national and international health issues are explored. Clinical experience in a variety of community settings allows students to practice nursing in a reflective manner to improve the health of the community as a whole.

FORMAT: Lecture 2 hours/week, clinical 6 hours/week, tutorial 1 hour

PREREQUISITE: NURS 4250.03

### **NURS 4330.03: Self-Directed Learning.**

Students may carry out independent studies or projects related to the theory or practice of nursing, under the direction of a faculty facilitator. Students are encouraged to systematically identify, plan, execute and evaluate a learning project that is relevant to nursing practice.

FORMAT: Flexible according to study/project

PREREQUISITE: NURS 2220.06

CROSS-LISTING: NURS 5950.03

### **NURS 4351.03: Specialty Practice of Oncology Nursing.**

This nursing elective challenges learners to consider the comprehensive care of a range of health and illness needs of individuals at risk or living with cancer within the existing infrastructure for cancer care. While the focus of this course is on the context of adults with cancer, the course reflects a critical analysis of the existing theoretical and evidence-based perspectives influencing health related behaviours of health promotion, illness prevention and decision-making that span from individual to organizational levels.

FORMAT: Lecture 2 hours

PREREQUISITE: NURS 3345.03 and 3350.03

### **NURS 4360.03: Management - The Process in Health Care Agencies.**

This nursing elective focuses on management of resources to achieve goals within healthcare agencies and institutions. The agency/institution is viewed as a system within which each manager uses a variety of theory and practice based techniques to establish goals, plan and utilize resources and evaluate outcomes. Emphasis is placed on the day-to-day use of management strategies, techniques and skills. Relevant theoretical constructs and research are explained and discussed while examining their implications for practice. Current management problems in nursing are explored through this introductory class in management.

FORMAT: Lecture/seminar

PREREQUISITE: NURS 4030.03, or instructor's permission

### **NURS 4370.03: Women and Aging.**

This interdisciplinary nursing elective explores the issues related to socio-economic factors that are major determinants of the well-being of aging women. Topics include; aging as a process; menopause, violence against older women, older women and housing; self-image and sexuality; health and the aging woman; and older women and poverty.

FORMAT: Lecture/discussion/seminar 2 hours

PREREQUISITE: NURS 2220.03; Non-nursing students should have completed 2 years of university study

CROSS-LISTING: SOSA 3245.03/5245.03, GWST 3810.03, NURS 5850.03

### **NURS 4371.03: Addictions Nursing Practice.**

This nursing elective introduces major concepts associated with addiction nursing practice. It provides a foundation for students pursuing careers in addiction-related care. Within a primary healthcare perspective, students critique models and theories of addiction, consider the interplay between social, gender, cultural environments and addictions and become knowledgeable of a variety of treatment approaches. Universal, selective, and prevention activities at an individual, family and community level are explored.

FORMAT: Distance

PREREQUISITE: NURS 2050.03, NURS 2250.03 strongly recommended for Post RNs

CROSS-LISTING: NURS 5871.03

### **NURS 4380.03: Introduction to Epidemiology Methods in Nursing Practice.**

This introductory course intended to provide students with a working knowledge and understanding of the basic concepts and methods of epidemiology. The focus of this course will be the analysis and interpretation of information about disease and other health related occurrences at a population level within a Public Health Nursing context. This course will also introduce students to concepts for development and evaluating public health programs.

FORMAT: Lecture 3 hours

PREREQUISITE: NURS 2220.03

CROSS-LISTING: NURS 5895.03

### **NURS 4390.03: Intermediate Pathophysiology and Nursing.**

This nursing elective is intended to provide a more in-depth examination of human physiological function in disease than the Introductory Pathophysiology and Nursing (N2090.03). Emphasis is placed on the study of pathophysiology of diseases prevalent in Canada. This class introduces students to up-to-date concepts involved in research on these diseases. In addition, it examines various therapeutic strategies used in treating these diseases and their implications for nursing care.

FORMAT: Lecture/discussion 3 hours per week

PREREQUISITE: Basic - PHYL 1010.06, ANAT 1010.03, MICI 1100.03, NURS 2050.03, and NURS 2090.03

### **NURS 4800.03: Interdisciplinary Class in Human Nutrition.**

The interdisciplinary nursing elective is an interdisciplinary study of the basic principles of nutrition needs throughout the life cycle. Physiological, psychological, socio-economic, physical, educational and cultural determinants are explored to explain why the nutritional status of Canadians can vary and how this variation affects the development of chronic disease. Special emphasis is given to community nutrition in the Atlantic Region.

FORMAT: Lecture 3 hours, week

PREREQUISITE: BIOL 1000.06 or by faculty permission

CROSS-LISTING: PHAR 4950.03, PHYT 3090.03, HPRO 2250.03, NURS 5990.03

### **PHYL 1010X\Y.06: Human Physiology.**

See class description in the Physiology section of calendar.

### **STAT 1060.03: Introductory Statistics for Science and Health Sciences.**

See class description in the Statistics section of calendar.

**NOTE:** A "strong recommendation" to complete one class before another means that some of the content of the new class draws directly on knowledge, skills and experience gained in a previous class. Students should realize that they may have to do some supplementary work in order to meet the expectations of the new class.

New Brunswick: Roussel, M., DipHS (S-L Maillet), BSc, MA (Montreal)

Newfoundland: TBA

Nova Scotia: Saunders, J., BSc (OT) (Dalhousie), MBA (St. Mary's)

Prince Edward Island: Cutcliffe, H., Dip (OT) (Man)

## Adjunct Appointments

### Academic

Basiletti, M., MSc (OT-Post-Professional) (Dalhousie)

Craik, J., BSc (OT) (Queen's), MSc (Toronto)

Edem, D., BSc (OT), MHSA (Dalhousie)

Egan, M., BSc(OT) (Western), MSc (OT) (Alberta), PhD (McGill)

Kirsh, B., BSc (OT), MEd, PhD (Toronto)

Laliberte Rudman, D., BSc (OT) (Toronto), MSc (OT) (Western), PhD (Toronto)

Mitcham, M., Dip (OT) (Northampton), BSc (OT), MHE, PhD (Georgia)

Palmadottir, G., Dip (OT) (Aarhus, Denmark), MSc (OT) (Colorado)

Pranger, T., BSc (OT), MEd, PhD (Toronto)

Taylor, S., Dip (OT) (Queen's), MA (SMU)

VanBruggen, H. Honorary Doctor of Science degree, Univ. of Brighton

Wicks, A., BAS (OT) (Curtin), MHS (OT) (South Australia), PhD (Charles Sturt)

### Professional

Cutcliffe, H., Dip (OT) (Manitoba)

Head, B., BSc (OT) Alberta, MSc (OT - Post-Professional) (Dalhousie)

Roussel, M., DipHS (S-L Maillet), BSc (Montreal), MA (Montreal)

### Cross Appointments

Gahagan, J., BA, BA (Hons) (Carleton), MA (Windsor), PhD (Wayne State)

Hutchinson, S., BA (UVic), MA (Dalhousie), PhD (Georgia)

Manuel, P., BA (Carleton), MSc (McGill), PhD (Dalhousie)

Unruh, A., BSc (OT) (Western), MSW (Carleton), PhD (Dalhousie)

Waldron, I., BA (McGill), MA (U of London), PhD (Toronto)

## I. Introduction

The Atlantic School of Occupational Therapy was established in 1982 as the only occupational therapy education program in Atlantic Canada. The School exists in response to strong regional advocacy, particularly since 1958 when a School was approved in principle by the University Senate. The regional orientation of the School fosters collaborative teaching, research and professional activities linking those at the university with occupational therapy and other service providers, government workers, and citizens in the four Atlantic Provinces. This regional mandate is combined with an international perspective linking Dalhousie with universities and communities for fieldwork and research.

Occupational Therapy is a health profession concerned with social inclusion. Practitioners enhance the occupational performance engagement, health and well-being of individuals, groups, and organizations, particularly where inequities or injustice limit opportunities for meaningful participation in daily life occupations.

Occupation is viewed broadly to include everything we do to "occupy" ourselves in enjoying life, looking after ourselves and others, and contributing to the social and economic productivity of our communities.

Health is viewed broadly as having the ability, opportunity and resources, for quality of life with meaningful occupations in supportive environments.

Occupational therapists use their understanding of occupation, enabling processes, justice and systems to enable individuals, groups and organizations to overcome obstacles that limit their ability to do things they need and want to do. Obstacles addressed by occupational therapists may include illness, injury, physical or mental disability, developmental delay, social disadvantage, old age, cultural, and physical barriers in the home, community and workplace. Using a "partnership" approach, occupational therapists work with individual families, groups, communities, organizations, populations, businesses or governments. The focus can be either on enabling individual change, or enabling change in physical and social environments, policies or legislature to enhance occupational performance and engagement in society. Practice may enable change in skills, attitudes, routines, design of buildings, use of assistive technology, policies, etc.

The role of an occupational therapist is varied and challenging. Occupational issues are never the same because no two people or environments are ever exactly the same. The challenge for occupational therapists is to plan and implement the

"just right" program or strategy for each and every client so that everyone can achieve just opportunities to participate in society.

## II. Degrees Offered

In concert with national standards and requirements for occupational therapy education, the School of Occupational Therapy at Dalhousie University only offers graduate level degree programs. For further information on our occupational therapy degree programs, please refer to the Graduate Calendar.

### 1. Master of Science (Occupational Therapy) - MSc (OT): Master's Program to Enter the Profession

a. MSc (OT) First class accepted into the program in September 2006.

### 2. Master of Science (Occupational Therapy-Post-Professional): Post Professional Master's program for qualified occupational therapists.

a. Research Thesis Stream

b. Practice Leaders Stream

c. Single graduate classes (with instructor's permission)

### 3. PhD

Faculty in the School of Occupational Therapy welcome applications for PhD studies focused on occupational therapy or occupational science. Interested persons should contact individual faculty at the School. Applications will be submitted either to the Faculty of Graduate Studies Interdisciplinary PhD program or the Faculty of Engineering Biomedical Engineering PhD program. Prospective students may be eligible for funding through scholarship programs at NSERC, SSHRC, CIHR, or from the Nova Scotia Health Research Foundation (NSHRF). Within Dalhousie funding possibilities include Killam scholarships.

## III. Class Descriptions

### The School does not currently offer an undergraduate degree.

We will continue to offer undergraduate classes for continuing professional development, refresher education and/or to advance one's knowledge of occupational science. Not all classes are offered each year. Please contact the School for the current class offerings and enrollment in single classes.

### OCCU 2000.03: Occupation and Daily Life.

This introductory course for students in arts, social sciences, science and other fields is designed to explore the meaning of occupation in everyday life. Typically, the term "occupation" refers to categories of paid work. This course will explore a broader meaning of occupation; namely purposeful activity. This concept of occupation will include everything we do to look after and develop ourselves, be involved in meaningful endeavours, contribute to our communities, promote health, advocate for opportunities, generate income and more. Students will be exposed to a broad range of literature on occupation; the motivation, organization and performance of occupation; the environment as a context for occupational performance; and the promotion of health through occupation. Students will gain an appreciation of occupation as the foundation of everyday life through sociological, anthropological and narrative analysis, and experiential activities.

INSTRUCTOR(S): G. Warner

FORMAT: 3 lecture hours/discussion

PREREQUISITE: Instructor permission

RESTRICTION: None. This course is OPEN to non-Occupational Therapy students

### OCCU 2207.03: Occupational Development Across the Life Span.

Theories and processes that explain the complexity and dynamics of occupational development across the lifespan are introduced. The course explores typical patterns of physical, cognitive, and psychosocial development and their occupational implications, as well as contexts for occupational development including roles and environments.

PREREQUISITE: Instructor permission

### OCCU 4402.03: Program Design and Evaluation for Enabling Occupation.

This course enables students to critically assess, plan and design an evaluation for occupational therapy programs in a variety of settings. Students will be provided with the basic knowledge and skills of: strategic planning; program development;

resource management; and program evaluation. As part of this course, students will complete a novice consulting project. This project will provide students with the opportunity to explore the provision of occupational therapy in a non-traditional setting.

PREREQUISITE: Instructor permission

### **OCCU 4420.00: Fieldwork III.**

This eight week fieldwork placement introduces students to occupational therapy practice outside the Atlantic region. There are a limited number of opportunities for International options outside Canada and expanded fieldwork with an off-site occupational therapist preceptor within Atlantic Canada. Students develop competence and increased independence in integrating theoretical knowledge and skills through the full process of Occupational Therapy practice. Under supervision, students assume responsibility for a case load of approximately 40-60% of that of an entry level therapist. All expenses are the responsibility of the student including a placement fee, travel, accommodations, etc.

PREREQUISITE: Instructor permission

### **OCCU 4422.00: Fieldwork Level III (Continued).**

During this six week fieldwork experience students focus on refining professional competencies and seeking new challenges with minimum guidance from a preceptor. Students are expected to develop the capacity to carry 75% or more of the responsibilities of an entry-level occupational therapist by the completion of this fieldwork education placement.

PREREQUISITE: Instructor permission

## **Pharmacy**

### **College of Pharmacy**

Location: George A. Burbidge Building  
5968 College Street  
PO Box 15000  
Halifax, NS B3H 4R2  
Telephone: (902) 494-2378  
Fax: (902) 494-1396  
Website: <http://www.pharmacy.dal.ca>

#### **Dean**

Webster, William G., PhD

### **Academic Staff, 2013/2014**

#### **Director**

Caldwell, R. K., BSc (Pharm), MHSA (Dalhousie)

#### **Associate Directors**

Program Evaluation: Whelan, A. M., BSc (Pharm) (Dalhousie), PharmD (MUSC)  
Research: Sketris, I. S., BSc (Pharm) (Toronto), PharmD (Minn), MPA (HSA) (Dalhousie)

Undergraduate Education: Mansour, S. A., BSc (Pharm), MBA (Dalhousie), PhC

#### **Professors Emeriti**

Duff, J. G., BSP, MSc (Sask), PhD (Fla)

Yung, D. K., BA, BSP, MSc (Sask), PhD (Alta)

#### **Professors**

Jakeman, D. L., BSc, PhD (Sheffield)

Sketris, I. S., BSc (Pharm) (Toronto), PharmD (Minn), MPA (HSA) (Dalhousie)

Whelan, A. M., BSc (Pharm) (Dalhousie), PharmD (MUSC)

Yeung, P. K. F., BSc (Pharm), MSc (Man), PhD (Sask)

#### **Associate Professors**

Agu, R., BPharm, MPharm (Pharmacology) (U Nigeria), MPharm

(Pharmaceutics), PhD (Biopharmaceutics) (Katholieke Universiteit, Belgium)

Bowles, S. K., BScPhm (Toronto), PharmD (SUNY)

Caldwell, R. K., BSc (Pharm), MHSA (Dalhousie)

Doucette, Doug, BSc (Pharm) (Dalhousie), PharmD (U of T)

Gardner, D., BSc (Pharm), PharmD (UBC)

Goralski, K., BSc Hon (Biochem/Micro), PhD (Pharmacology and Therapeutics) (U Manitoba)

Jurgens, T., BSc (Pharm), MSc (Dalhousie), PhD (Miss)

Murphy, Andrea, BSc (Pharm) (Dalhousie), PharmD (UBC)

#### **Assistant Professors**

Iseñor, J. E., BSc (Pharm) (Dalhousie), PharmD (UBC)

Mansour, S. A., BSc (Pharm), MBA (Dalhousie), PhC

Wilson, J., BSc (Pharm) (ACPR) (Dalhousie), PharmD (SC)

#### **Lecturers**

Deal, H., BSc (Chem) (Acadia), BSc (Pharm) (Dalhousie)

Rodrigues, G., BSc (Chem/Biochem), BSc (Pharm) (Dalhousie)

Sponagle, K., Diploma Engineering (Saint Mary's), BSc (Pharm) (Dalhousie)

Walker, L., BSc (Pharm) (Dalhousie)

### **Coordinator of Clinical Education/Regional Residency Coordinator**

Davies, H., BSc (Hons) (Biology) (Acadia), BSc (Pharm) (Dalhousie), MEd (Curriculum Studies) (Acadia), CDE

## Coordinator, Community Experience Program

Harris, N., BSc (Pharm) (Dalhousie)

## Adjunct Appointments

Boyd, T., BIS (St. FX), MMS, PhD (Carleton)

Broadfield, L., BSc (Pharm) (U of T), MHSc (MacMaster)

Lummis, Heather, BSc (Pharm), MSc (CH&E) (Dalhousie)

MacDonald, T., BSc (Biology), BSc (Honours) (Marine Biology), BSc (Pharm) (Memorial), PharmD (Florida)

MacKinnon, N. J., BSc (Pharm), MS (U of Wisconsin), PhD (U of Florida)

Ryan, Jennifer, BA (HonEng) (UNB), BSc (Pharm) (Dalhousie), PharmD (U of Florida)

## PEP Associates

Throughout the Maritime provinces pharmacist preceptors in community and hospital pharmacies participate in structured practice experience programs (PEP). The College of Pharmacy would like to acknowledge the valuable and essential contribution that preceptors make to the education process. Sincere thanks and appreciation is extended to all preceptors for the time and energy they devote to students.

The PEP is administered by the College with the support of the provincial pharmacy regulatory authorities in the Maritimes. Second, third, and fourth year students demonstrate their knowledge and professional competency in practice rotations in community and hospital pharmacy sites.

## I. History

Formal pharmacy education in the Maritime provinces began in 1908, with evening classes in pharmacy and chemistry conducted in the Nova Scotia Technical College. Success of these classes encouraged the Nova Scotia Pharmaceutical Society to establish the Nova Scotia College of Pharmacy in 1911. The College was affiliated with Dalhousie University in 1912.

The New Brunswick Pharmaceutical Society and the Prince Edward Island Pharmaceutical Association were admitted to affiliation with the College in 1917 and 1950, respectively. With the affiliation of the former society, the College was renamed the Maritime College of Pharmacy.

In 1961, the Maritime College of Pharmacy was admitted into Dalhousie University as the College of Pharmacy, a constituent part of the new Faculty of Health Professions. A four-year baccalaureate program was introduced.

In 1966, a Master's program was established, followed by a Doctor of Philosophy program in 1977.

In 1972, a twelve month pharmacy residency program was initiated by Camp Hill Hospital in cooperation with the College of Pharmacy. Programs were initiated at the Halifax Infirmary in 1974, at the Victoria General Hospital in 1981 and at the Saint John Regional Hospital in 1982.

In the fall of 1968, the College of Pharmacy moved into the George A. Burbidge Pharmacy Building. This building, the former Medical Sciences Building was renamed in honour of the first Dean of the College, in recognition of his contribution to pharmacy education in the Maritimes. Present facilities accommodate approximately 360 undergraduate students.

## II. College of Pharmacy Mission Statement

### Mission

Enhancing health through pharmaceutical education, community service and research.

### Vision

The College of Pharmacy is a leader in practice-based pharmacy education and is respected for pharmacy research. The College is also a major enabler in advancing the practice of pharmacy.

We are highly responsive to patient-needs and changes in the health care environment. Our graduates are well prepared to become effective practitioners, researchers and future leaders.

## Accreditation

The Bachelor of Science in Pharmacy Program of the College of Pharmacy, Dalhousie University, has been granted Full Accreditation Status by the Canadian Council for Accreditation of Pharmacy Programs for a six year term, 2010-2016.

## III. College of Pharmacy Regulations

All students are required to observe the University Regulations and Academic Regulations as described in this Calendar. The academic performance of each student in the College is assessed by the Student Promotions Committee.

### A. Academic Requirements

#### Workload

The curriculum is composed of problem-based learning (PBL) and other classes, which may include tutorials, lectures, labs, practice experience and other components. (See IV. Programs offered). To satisfy the requirements for the degree of Bachelor of Science in Pharmacy, a student must achieve a grade of Pass in each prescribed component. PBL classes vary in length from three to seven weeks, and are weighted as either 1.5, 3, or 6 credit hours. Each academic year totals 27, 31.5, or 33 credit hours, with the program total being 123 credit hours.

Students are required to successfully complete all practice experience rotations. These placements may be outside the Halifax/Dartmouth area. Students are responsible for any travel, accommodation and any other costs associated with practice experience rotations.

### B. Academic Recognition

#### 1. Awards

The College of Pharmacy Awards Committee administers a number of awards, each with defined criteria. Selection of award recipients described as the "student who excels" is based on a combination of performance in knowledge assessments and in tutorials. Eligibility for In-class Scholarships is determined on the basis of knowledge assessments alone.

#### 2. Dean's List

Students will be assessed for Dean's List based on their knowledge assessments and class standing in the annual "Progress Exam." No student who has obtained a failing grade (FM or F) will be eligible for the Dean's List in the year in question.

#### 3. Distinction

Students who have been on the Dean's List for three of the four years of the Pharmacy Program and a cumulative GPA of 3.70 or higher will graduate with Distinction.

### C. Assessment

1. Grading is on a Pass/Fail basis, and grades recorded on the official University transcript are "Pass", "Marginal Fail" or "Fail" (P, FM, F). Students must pass all components of the year in which they are registered to proceed to the next year. The passing grade for knowledge assessments is 60% unless otherwise indicated.
2. Student performance will be assessed during and at the end of each PBL class. Assessment will be of both the learning process and the knowledge/skills achieved. Tutors will provide informal assessment of the student's learning process throughout a PBL class and a formal assessment (student tutorial performance assessment) at the completion of a class. Knowledge/skills will be assessed as described in the syllabus provided for each class.
3. To pass a PBL class, a student must pass both the student tutorial performance assessment and the class knowledge assessment.
4. A student who fails no more than one academic class will be assigned a grade of marginal failure (FM) in that class. The student must meet with the Associate Director, Undergraduate Education to discuss remediation and/or support. More than one failure will result in all failed classes being assigned the grade of Fail (F).
5. The Student Promotions Committee of the College of Pharmacy is responsible for monitoring the academic progress of students and providing recommendations to faculty regarding promotion and graduation of students. Students who seek redress for the application of the regulations of the College of Pharmacy should refer to the appeals process described in Appeals section below.

- Attendance at the tutorials, skills laboratory and practice experience program (PEP) is mandatory. Absence must be supported with a valid reason, such as illness with a medical certificate or other reason approved by the Undergraduate Education Committee. Other absences will be reported to the Student Promotions Committee and may be reason for failure.

#### D. Reassessment of a Grade

See Academic Regulation 16.7. In all cases of reassessment, the calculations used to arrive at the final grade will be checked. In those classes where the student has had ample time to consider marks obtained for all work done, except for the final examination, reassessment in such classes shall be done on the final examination only. For other classes, a reassessment shall include the results from all work not previously available to the student during the term.

#### E. Supplemental Assessment

- A student who receives a grade of FM is eligible for remedial work and supplemental assessment.
- A student who fails one PBL student tutorial performance assessment must undertake remedial work during the following class, organized by the Associate Director, Undergraduate Education. If the failure occurs in the final class of the year, remediation will occur during the summer. The student must successfully complete the remedial work and supplemental assessment to achieve a Pass.
- A student who fails the knowledge assessment or other requirement outlined in the syllabus of a PBL or non-PBL class will be required to do remedial work and must pass a supplemental assessment, which will be scheduled by the class coordinator in consultation with the Associate Director, Undergraduate Education and the students involved.
- If a student fails one PBL or non-PBL class, the grade will be recorded as "FM" on the student's transcript. Failure to pass the remedial work and supplemental assessment will lead to conversion of the grade to "F". If the student successfully completes the remedial work and supplemental assessment, the passing grade will then be added to the transcript and recorded as "P" with a notation that the grade was earned by supplemental assessment.
- Failure in a second class (either a PBL or non-PBL class) will negate a pass that may have been achieved by supplemental assessment in the first failed class. (See F.1.a below.)

#### F. Repeating the Year

- Subject to eligibility, a student will be required to repeat the year if:
  - the student has failed any two classes (PBL or non-PBL classes) or
  - the student has failed one class and has not successfully completed the prescribed remedial work and supplemental assessment.
- To be eligible to repeat a year, a student who has failed two classes must satisfactorily complete all other year requirements except the Practice Experience Program. However, a student with two failures will not be eligible to register in the Practice Experience Program.
- Application to repeat the year must be made in writing to the Associate Director, Undergraduate Education by a predetermined date.
- Any student who withdraws voluntarily, due to illness or other personal circumstances, and is allowed to repeat the year, will be considered a student in a repeat year unless the student withdraws before the last day of the first PBL class of the academic year, or the student tutorial performance assessment, if the two do not coincide.
- No student will be allowed more than one repeat year during the undergraduate program. All students who repeat the year will be assessed on performance in the repeated year.

#### G. Leave of Absence

A student who needs to take leave from the pharmacy program must apply to the Director to do so. A leave of absence must be approved in advance by the Director of the College of Pharmacy. Normally, a student who absents himself/herself from the College of Pharmacy without prior permission for an extended period (four weeks or greater) will be presumed to have withdrawn and will have to re-apply for admission to the College of Pharmacy. A leave of absence will be limited to one leave period and will not normally exceed one academic year. A leave of absence will not count towards time in the Pharmacy program.

#### H. Dismissal from the Study of Pharmacy

- Any student who fails more than two classes (PBL or non-PBL classes) of the curriculum in one year will be dismissed from the study of pharmacy.

- A student in a repeat year who does not meet the criteria for promotion will be dismissed. The normal regulation allowing remedial work and supplemental assessment in one class will apply.
- Students are also referred to University Regulations: Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability - Faculty of Health Professions.

#### I. Appeals

Students who wish to raise questions or to register complaints in matters of academic appeal are advised to communicate informally with their instructor within 10 working days of the alleged unfairness or irregularity. If no resolution arises from this (these) meeting(s), the student may initiate a formal appeal.

Students wishing to initiate a formal appeal should follow the appeals procedures as set out by the College of Pharmacy, Undergraduate Student Appeals Committee, Faculty of Health Professions. These procedures are available within the General Office, College of Pharmacy. Application for a formal appeal should be made to the College of Pharmacy Chair, Undergraduate Student Appeals Committee within 20 working days of the matter giving rise to the appeal.

### IV. General Information

#### A. Immunization

Students must show proof\* of current immunization against tetanus, diphtheria, polio, measles, mumps, rubella, Hepatitis B, varicella (if non-immune) and a negative two-step Mantoux (TB) test prior to admission to the College.

Evidence of a negative two-step tuberculin testing (Mantoux) is required before all hospital rotations. Students are responsible for the cost of all tests and immunizations.

\*Students must complete the Faculty of Health Professions' infectious disease and immunization checklist.

Each student is required to maintain their personal immunization record, and submit a copy by a set deadline for their student file. Individual sites may require students to present immunization records prior to acceptance at a practice site. Individual clinical practice sites may have additional immunization requirements. Failure to provide this information may result in a student being denied access to a placement site.

#### B. Career Opportunities

Pharmacy is a health profession in which pharmacists provide care for their patients as one member of the health care team. This care focuses on the patient from the perspective of drug therapy. The pharmacist is responsible to identify, prevent and resolve patient drug therapy problems. Specific activities include: taking medication histories, identifying goals for drug therapy, providing recommendations and education to patients regarding self-medication, providing recommendations to other health care providers on drug therapy, working with patients to maximize benefits and minimize adverse effects of drug therapy, maintaining patient drug profiles, counseling patients on prescribed medication, monitoring drug interactions, adverse drug reactions and patient compliance with their drug treatment. Other activities include the provision of information on drugs to patients and other health professionals, the preparation of suitable materials for use as medicines from natural and synthetic sources, the compounding of drugs and the dispensing of suitable medication.

Pharmacy graduates have a wide range of career opportunities. The majority enter community pharmacy practice. Hospital pharmacy also provides an interesting challenge for pharmacists, particularly in view of their expanding role within the clinical setting. The pharmaceutical industry provides opportunities for pharmacists in the fields of sales and marketing, production, research and quality control.

The increased role of federal and provincial governments in public health provides opportunities for pharmacists in analytical laboratories and in administrative position as consultants, government inspectors and health officers. Opportunities may also be available in universities as teachers and researchers.

A Bachelor of Science in Pharmacy is necessary for those who wish to practice as licensed pharmacists. For those who wish to enter research or teaching, a Master of Science degree or further postgraduate study is usually required.

## C. Practice Requirements

### 1. Licence in Pharmacy

The College of Pharmacy, being purely educational, has no jurisdiction in matters related to licensing or to registration as a Pharmacist. These functions are entirely under the control of the provincial regulatory authority concerned; a period of practical training or apprenticeship is required by the provincial regulatory authority before a graduate in pharmacy is licensed as a pharmacist. Information regarding licensing or registration in each province may be obtained from the respective provincial regulatory authority: New Brunswick Pharmaceutical Society, Unit #8, 1224 Mountain Road, Moncton, NB E1C 2T6; Prince Edward Island Pharmacy Board, PO Box 89, Crapaud, PE C0A 1J0; Nova Scotia College of Pharmacists, Suite 200, 1559 Brunswick Street, Halifax, NS B3J 2G1.

### 2. Pharmacy Examining Board of Canada (PEBC)

The Pharmacy Examining Board of Canada was created by Federal Statute on December 21, 1963, to establish qualifications for pharmacists acceptable to participating pharmacy provincial regulatory authorities. The Board provides for annual examinations and issues a certificate to the successful candidate, which may be filed with a Canadian provincial regulatory authority in connection with an application for license to practice pharmacy under the laws of that province. Baccalaureate graduates from Faculties of Pharmacy accredited by the Canadian Council for Accreditation of Pharmacy Programs are eligible to write these examinations. Successful completion of these examinations is a prerequisite to licensure in Canada. Information relative to the dates of examinations, application forms, etc., may be obtained through the Director's Office, College of Pharmacy.

Individuals who are not graduates of an accredited Canadian Faculty of Pharmacy must first complete the PEBC Qualifying Exam.

The Pharmacy Examining Board of Canada requires proof of language proficiency for all candidates for the Qualifying Examination. All applicants must be proficient in either English or French, both written and spoken. Additional information on language requirements is available in the current PEBC Qualifying Examination Information booklet.

### D. Student Pharmacy Society

The basic aims of the Student Pharmacy Society are to promote a closer liaison with the other societies on campus, to give the pharmacy students a strong position with regard to Student Council activities, to provide a means of communications between students and their respective provincial regulatory authorities in the Maritimes, and to provide an organizational body which plans and finances the various unique Pharmacy Society activities.

Membership in the Pharmacy Society includes membership in the Canadian Association of Pharmacy Students and Interns and membership in the Canadian Pharmacists Association.

## V. Programs Offered

The College of Pharmacy offers a four-year program, following at least one year of general science, leading to the degree of Bachelor of Science (Pharmacy) - BSc (Pharm).

The undergraduate program has a patient-oriented curriculum integrating clinical pharmacy with the pharmaceutical sciences. The curriculum utilizes an integrated problem-based learning format.

Year 1 includes pharmacy law and health care ethics, biomedical and physical sciences (anatomy, biochemistry, microbiology, pharmacology and physiology) in discrete three-to seven-week classes. The pharmaceutical sciences (biopharmaceutics and pharmacokinetics, medicinal chemistry, drug metabolism, toxicology, pharmaceutics and physical pharmacy) with necessary reviews of biomedical content, are integrated in Years 2 through 4, with therapeutics, pharmacoepidemiology, pharmacoconomics, pharmaceutical care, communications, interprofessional relations, law and ethics, social and administrative pharmacy issues, and the role of pharmacy in the health care system.

The College participates with the Queen Elizabeth II Health Science Centre, Halifax, NS, and the Horizon Health Network, NB in providing a Canadian Hospital Pharmacy Residency Board accredited twelve-month post graduate hospital pharmacy residency program.

Through structured rotations in various areas of pharmacy practice, the program aims to prepare pharmacists for exemplary pharmacy practice. Areas of rotation include patient care, drug information, drug distribution, pharmacy administration, a research project and in-service and education. The emphasis is on providing exemplary patient care. Practitioner role models/preceptors are utilized throughout the program to mentor the necessary skills, knowledge and values required to be a pharmacist for application by the resident. A stipend is provided and a certificate is presented to candidates successfully completing the program.

## Undergraduate Curriculum Structure

The PBL curriculum, within the College of Pharmacy, may be scheduled past the posted exam periods. Students are responsible for all costs associated with expenses during this time (i.e., meal plan expiration, residence closure, etc.).

### A. Tutorials

The principal feature of the curriculum is problem-based learning (PBL). Students learn together in tutorial groups of seven to ten.

Each group is facilitated by a trained non (content)-expert tutor who may be faculty, sessional tutors, practitioners or graduate students.

Two-hour tutorials are held three times a week. In tutorial sessions students are presented with a situation for which they must identify their own prior knowledge and set specific learning objectives. Students use the time between tutorial sessions for self-directed learning of the objectives that they have set. They then are responsible for ensuring that other group members learn these objectives.

### B. Classes

A minimal number of classes explain difficult concepts and summarize learning modules. Science laboratory sessions are limited to experiments and demonstrations that enhance student learning of concepts.

### C. Skills Laboratory

The skills laboratory focuses on practical skill development and application of knowledge acquired in the PBL curriculum and critical appraisal series. Activities required for successful completion of the practical experience program are introduced and practiced. Content includes but is not limited to: extemporaneous compounding, sterile technique, prescription filling and assessment, written and verbal communication skills, patient education, device training, and jurisprudence.

A cardiopulmonary resuscitation (CPR) level HCP and standard first aid class are the students' responsibility in cost.

### D. Practice Experience Program (PEP)

A progressive professional field experience complements the PBL curriculum as follows:

#### Year 1 - Community Experience Program (CEP)

- the equivalent of a half day per week in a goal-related service learning in a non-pharmacy health-oriented community site.

#### Year 2 - Practice Experience Program (PEP)

- PHAR 2081.03 - Hospital Rotation (two consecutive weeks)
- PHAR 2082.03 - Community Rotation (two consecutive weeks)

Second year rotations are completed during the months of May - August, after successful completion of all other second year classes. Each rotation is two weeks in length, at a minimum of 35 hours/week. Second year rotations provide students with an opportunity to see pharmacists practice patient focused care in both community and hospital practice settings. Time is also spent on the distributive, legislative and administrative components of pharmacy practice.

#### Year 3 - Practice Experience Program (PEP)

- PHAR 3080.03 - Community Rotation (four consecutive weeks)

This rotation is completed during the months of May - August, after successful completion of all other third year classes. This rotation is four weeks in length at a minimum of 35 hours/week and introduces students to the practical application of the pharmacist's patient care process in a community pharmacy. Rotation objectives address drug information, prescription and non-prescription medications, patient education, and health promotion presentations to community

groups. This rotation is intended to provide an introductory experience to clinical activities including: monitoring patients, identifying drug-related problems, and defining and measuring patient goals and outcomes.

### Year 4 - Practice Experience Program (PEP)

- PHAR 4080.045 – Hospital Rotation (six consecutive weeks)
- PHAR 4085.045 – Community Rotation (six consecutive weeks)

These six-week rotations are the culmination of the student's study. Experiential rotations in hospital and community practice sites allow students the opportunity to apply all the knowledge, skills and values they have developed to the provision of total pharmacy care. The focus of these rotations is patient-based and primarily clinical. Each rotation is six-weeks, at a minimum of 40 hours/week.

For each rotation, from year 2 through to year 4, students are required to travel to sites outside of the Halifax area and will be responsible for any costs incurred as a result of the program.

Students should note that there are very limited PEP rotation sites outside the Maritime Provinces. All PEP rotations must take place within Canada. Students must be prepared to complete all PEP rotations within the Maritimes.

## E. Prescribed Classes

### Year 1

- ANAT 1040.03
- BIOC 1040.06
- CHEM 2442.03
- MICR 1050.03
- PHAC 1470.06
- PHAR 1060.015
- PHAR 1070.03
- PHAR 1080.00
- PHYL 1400.06

### Year 2

- PHAR 2010.03
- PHAR 2015.03
- PHAR 2020.03
- PHAR 2035.06
- PHAR 2040.03

## F. Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. Successful completion of this class is a requirement for graduation, and will be recognized further with the awarding of a special Certificate in

Interprofessional Collaboration to be presented by the Faculty of Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

## VI. Class Descriptions

### ANAT 1040.03: Basic Human Anatomy for Pharmacy Students.

This class is offered by the Department of Anatomy and Neurobiology to students in the College of Pharmacy. Upon successful completion of the class, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. There are no formal laboratory sessions.

INSTRUCTOR(S): D. Marsh

FORMAT: Lecture 3 hours, tutorial 6 hours. 4 weeks

RESTRICTION: Restricted to Pharmacy students

### BIOC 1040.06: Biological Chemistry and Metabolism for Students of Pharmacy.

The structures, significance, and metabolism of the main biologically important compounds are outlined in lectures, with some topics of particular interest studied further in the laboratory. Tutorials aim to develop students' ability to learn biochemistry on their own and in small groups.

INSTRUCTOR(S): D. Byers, P. Briggs

FORMAT: Lecture 4 hours, lab 3 hours, tutorial 6 hours, 7 weeks

CO-REQUISITE: CHEM 2442.03

RESTRICTION: This class is restricted to students in the BSc (Pharm) program.

### CHEM 2442.03: Organic Chemistry for Pharmacy Students.

Aspects of organic chemistry relevant to the requirements for the degree of Bachelor of Science in Pharmacy are presented. This class does not serve as a prerequisite for any other chemistry class.

INSTRUCTOR(S): N. P. Schepp

FORMAT: Lecture 4 hours

RESTRICTION: Restricted to students in the Bachelor of Science in Pharmacy program.

### MICR 1050.03: Basic Microbiology and Immunology for Pharmacy.

This course is only for pharmacy students and involves problem based learning tutorials, lectures and laboratory sessions (demonstrations and exercises). Topics include: concepts of antibiotics and immunity, basic principles of microbial structure, physiology, and genetics in relation to microbial pathogenesis.

INSTRUCTOR(S): L. Murray

FORMAT: Lecture 3 hours, tutorial 6 hours. 3 weeks

PREREQUISITE: BIOL 1000X/Y.06 or (BIOL 1010 or BIOL 1020 and BIOL 1011 or BIOL 1021) or instructor's consent

### PHAC 1470.06: Pharmacology for Pharmacy.

This class will provide an introduction to pharmacology, emphasizing basic mechanisms of drug action and principles of drug-receptor interactions, pharmacokinetics, and drug metabolism.

COORDINATOR: TBA

FORMAT: Lecture 3 hours, tutorial 6 hours. 6 weeks

PREREQUISITE: BIOC 1040.06, MICR 1050.03, PHYL 1400.06

### PHAR 1060.015: Pharmacy Law and Health Care Ethics.

This problem-based learning class focuses on the provincial and federal laws that regulate the practice and profession of pharmacy, and key ethical principles and considerations for the pharmacist. Students will learn through a series of mini-cases based on real-life practice scenarios, with integrated ethical components. Students will be introduced to professionalism and the associated responsibilities of a pharmacist. This class introduces students to the legal and professional framework on which all pharmacists practice. Integrated courses in future classes will build on the law and ethics introduced in this course.

COORDINATOR: C. Connolly

FORMAT: Lecture 3 hours, tutorial 6 hours

### PHAR 1070.03: Pharmacy Skills Lab I.

First year skills labs provide an introduction to skills required by a practicing pharmacist. These include communication skills, pharmacy computer skills,

prescription processing and compounding of select dosage forms.

COORDINATOR: L. Walker

FORMAT: Lecture 1 hour, tutorial and/or lab 3 hours

### **PHAR 1080.00: Community Experience Program.**

This program consists of service learning at a health-related but non-pharmacy site such as the Canadian Cancer Society, CNIB, Special Olympics etc. The purpose is to augment developing communication skills, interpersonal skills, basic work ethics including the importance of teamwork, introduction to client needs and the professional helping ethic. An inter-professional health mentor experience is also part of this course.

COORDINATOR: N. Harris

FORMAT: 3 hours per week

### **PHAR 2010.03: Critical Appraisal Series I.**

Students are introduced to a variety of drug/health information resources including specific websites, texts, journals, bibliographic databases, and the Regional Drug Information Service. They gain experience in evaluating and using these resources efficiently and effectively through assignments and labs. Second term focuses on the fundamentals of clinical research methodology, evaluating research papers and biostatistics.

COORDINATOR: J. Isenor

FORMAT: Lecture/computer training lab

### **PHAR 2015.03: Topical Products (Dermatologicals).**

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy 2015 deals with common dermatological problems seen by pharmacists and the management of these problems.

COORDINATOR: S. Mansour

FORMAT: Lecture 3-5 hours, tutorial 6 hours

PREREQUISITE: Successful completion of all first year classes

### **PHAR 2020.03: Topical Products (Eye and Ear).**

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy 2020 is devoted to common problems of the eye and ear, and include those of an infectious and non-infectious nature.

COORDINATOR: S. Mansour

FORMAT: Lecture 3-5 hours, tutorial 6 hours

PREREQUISITE: Successful completion of all first year classes

### **PHAR 2035.06: Respiratory Tract Complaints.**

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy administration is also integrated. Pharmacy 2035 deals with common infectious and non-infectious respiratory complaints, treated with non-prescription and prescription medications.

COORDINATOR: S. Mansour

FORMAT: Lecture 3-5 hours, tutorial 6 hours

PREREQUISITE: Successful completion of all first year classes

### **PHAR 2040.03: Gastrointestinal Disorders.**

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy 2040 focuses on gastrointestinal ailments, and their management. Topics include acid-pepsin disease, diarrhea, constipation, and inflammatory bowel disease and anemia.

COORDINATOR: S. Mansour

FORMAT: Lecture 3 hours, tutorial 6 hours

PREREQUISITE: Successful completion of all first year classes

### **PHAR 2045.015: Nutrition.**

Students will learn about nutritional needs of healthy clients and special populations. The roles, the daily requirements and sources of various vitamins, and pathological consequences of dietary deficiencies will be addressed. Special nutritional challenges in pregnancy, infancy, elderly, and grave illness will be examined.

COORDINATOR: S. Mansour

FORMAT: Lecture 5 hours, tutorial 2 hours, self-directed learning.

PREREQUISITE: Successful completion of all first year classes

### **PHAR 2055.015: Drug Disposition.**

The objective of this course is to provide students with an overview of the determinants of drug disposition, including a qualitative and quantitative assessment of drug absorption, distribution, metabolism and excretion. Major topics include hepatic and renal clearance, and factors which alter pharmacokinetics such as protein binding, disease states, age, enzyme induction/inhibition, drug interactions, and obesity, gender, and genetics.

COORDINATOR: K. Gorski

FORMAT: Lecture 27 hours. 3 weeks

PREREQUISITE: Successful completion of all first year classes

### **PHAR 2060.015: Medication Use Management.**

This course introduces the pharmacy student to the "big picture" issues of the medication-use system. The three parts of the course are as follows: (1) an overview of the medication-use system, (2) discussion of the problems with the medication-use system and (3) exploration of potential solutions to these problems.

COORDINATOR: a. Murphy

FORMAT: Lecture Approx 27 hrs, 3 weeks

PREREQUISITE: Successful completion of all first year pharmacy.

### **PHAR 2070.03: Pharmacy Skills Lab II.**

Pharmacy 2070 expands upon the skills learned in first year. Emphasis is on application of material from the PBL curriculum and Critical Appraisal Series. Students develop communication, assessment and drug information skills that facilitate identifying drug therapy problems and developing therapeutic plans. Students examine social, ethical and professional practice issues. Successful completion of a cardiopulmonary resuscitation (CPR) level HCP and standard first aid class is a requirement for a passing grade.

COORDINATOR: G. Rodrigues

FORMAT: Lecture/lab - 4 hours

PREREQUISITE: Successful completion of all first year classes

### **PHAR 2081.03: Practice Experience Program (PEP) I.**

This rotation provides students with an opportunity to see patient centered pharmacy care in a hospital practice setting. Specific units focus on drug information, hospital pharmacy services provided as part of the healthcare team, sterile procedures and IV admixtures, medication safety, and interprofessional education opportunities. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

COORDINATOR: H. Davies

FORMAT: Minimum 35 hours/week x 2 consecutive weeks (May-Aug)

PREREQUISITE: Successful completion of second year classes (see College of Pharmacy Regulation F2)

### **PHAR 2082.03: Practice Experience Program (PEP) II.**

This rotation provides students with an opportunity to participate in patient care in a community pharmacy setting. Pharmacy law, narcotics and controlled drugs, third party insurers, processing prescriptions, provincial formularies, drug information and systems management are key areas of this rotation. This rotation provides students with an opportunity to participate in patient care in a community pharmacy setting. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

COORDINATOR: H. Davies

FORMAT: Minimum 35 hours/week x 2 consecutive weeks (May-Aug)

PREREQUISITE: Successful completion of second year classes (see College of Pharmacy Regulation F2)

### **PHAR 3010.03: Critical Appraisal Series II.**

This course advances and reinforces the topics learned in PHAR 2010.03. The first term focuses on research methods and biostatistics seen in various trial designs. Students learn to critically evaluate the medical literature and write a term paper reviewing the evidence behind a clinical decision. The second term will focus on applying the tenets of evidence-based clinical practice. Through a journal club setting, students will evaluate the strengths and weaknesses seen in the literature as they relate to a clinical situation. Students are expected to use these skills in their problem-based learning classes.

COORDINATOR: TBA

FORMAT: Lecture and small group work – 2 hours

PREREQUISITE: PHAR 2010.03 or consent of instructor

### **PHAR 3020.03: Women's Health Issues.**

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceuticals and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products

discussed. PHAR 3020.03 deals with common women's health issues such as contraception, osteoporosis and menopause and the management of these problems.

COORDINATOR: H. Deal

FORMAT: Lecture 3-5 hours, tutorial 6 hours

PREREQUISITE: Successful completion of all second year classes

### PHAR 3030.03: Infectious Diseases.

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. PHAR 3030.03 is devoted to miscellaneous infectious diseases.

COORDINATOR: H. Deal

FORMAT: Lecture 5 hours, tutorial 6 hours

PREREQUISITE: Successful completion of all second year classes

### PHAR 3040.06: Cardiovascular Diseases.

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. PHAR 3040.06 addresses cardiovascular diseases such as hypertension, ischemic heart disease, congestive heart failure and thromboembolism, and the pharmacologic management of these conditions.

COORDINATOR: H. Deal

FORMAT: Lecture 3-5 hours, tutorial 6 hours

PREREQUISITE: Successful completion of all second year classes

### PHAR 3050.03: Pain and Rheumatology.

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. PHAR 3050.03 deals with the understanding and management of acute and chronic pain of various origins.

COORDINATOR: H. Deal

FORMAT: Lecture 3-5 hours, tutorial 6 hours

PREREQUISITE: Successful completion of all second year classes

### PHAR 3055.06: CNS and Behavioral Disorders.

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. PHAR 3055.06 involves the study of an array of conditions ranging from depression to seizure disorders.

COORDINATOR: H. Deal

FORMAT: Lecture 3-5 hours, tutorial 6 hours

PREREQUISITE: Successful completion of all second year classes

### PHAR 3060.03: Endocrine Disorders.

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Disorder included in PHAR 3060.03 are diabetes and thyroid conditions.

COORDINATOR: H. Deal

FORMAT: Lecture 3-5 hours, tutorial 6 hours

PREREQUISITE: Successful completion of all second year classes

### PHAR 3070.03: Pharmacy Skills Lab III.

Third year skills lab expands on the concepts learned in skills lab I and II. An added emphasis will be placed on written communication skills and prescription therapeutics as covered in the PBL curriculum. Students are expected to use materials learned in CAS for the purposes of therapeutic-decision making and patient education. Lectures and device training will complement the PBL curriculum. Standardized patients will be used for teaching purposes as well as for the final objective structured clinical exam. COORDINATOR: K. Sponagle

FORMAT: Lecture/lab/seminar/4 hours

PREREQUISITE: Successful completion of all second year classes

### PHAR 3080.03: Practice Experience Program (PEP) III.

This rotation focuses on the practical implementation of patient centered pharmacy care in community practice. Students will complete a variety of patient care work-ups. Provision of drug information, prescription and non-prescription medications, patient education and health promotion are integral components of this rotation. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

COORDINATOR: H. Davies

FORMAT: Minimum 35 hours/week x consecutive 4 weeks (May-Aug)

PREREQUISITE: Successful completion of third year classes (see College of Pharmacy Regulations F2)

### PHAR 4010.015: Critical Appraisal Series III.

This is a continuation of PHAR 3010.03. Students will combine their skills from the previous courses in this series as well as knowledge and skills derived from their problem-based learning curriculum and skills lab courses in a variety of tasks over the term. The ability to follow an evidence-based approach for supporting clinical decisions will be emphasized.

COORDINATOR: D. Gardner

FORMAT: Lecture/small group – 2 hours

PREREQUISITE: Successful completion of all third year classes

### PHAR 4025.06: Pathocytologic Disorders.

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy administration is also integrated. This class deals with the pharmacotherapy of common cancers and includes issues such as pain control.

COORDINATOR: TBA

FORMAT: Lecture 3-5 hours, tutorial 6 hours

PREREQUISITE: Successful completion of all third year classes

### PHAR 4035.06: Disorder of the Liver and Genitourinary Systems.

Students learn the medicinal chemistry, pharmaceuticals, biopharmaceutics and pharmacokinetics, and pharmacology, as well as the pathophysiology and pharmacotherapeutic principles pertaining to the problems and products discussed. Pharmacy administration is also integrated. This class deals with hepatitis, various other liver disorders, renal disease and men's health issues related to the genitourinary tract.

COORDINATOR: TBA

FORMAT: Lecture 3-5 hours, tutorial 6 hours

PREREQUISITE: Successful completion of all third year classes

### PHAR 4060.03: Advanced Patient Health Management.

Three major areas of patient health management will be discussed in this class: (1) the Canadian healthcare system and pharmacy benefit management; (2) pharmacoeconomics and formulary decision making; and (3) human resource management and leadership principles and practices in pharmacy.

COORDINATOR: A. Murphy

FORMAT: Lecture 6 hours, tutorial 3 hours.

PREREQUISITE: Successful completion of third year pharmacy.

### PHAR 4070.015: Pharmacy Skills Lab IV.

Skill Lab IV expands upon the skills learned in Skills Lab I, II and III. Students must apply the knowledge learned in other components of the curriculum and specific activities include but are not limited to: patient interviewing, assessment and education. Standardized patients will be used for teaching purposes as well as for the final objective structured clinical exam.

COORDINATOR: H. Deal

FORMAT: Lecture/lab/seminar/3 hours

PREREQUISITE: Successful completion of all third year classes

### PHAR 4080.045: Practice Experience Program (PEP) IV.

This clinical rotation focuses primarily on the provision of patient focused pharmacy care in hospital or long-term care practice. The student will apply the knowledge, skills and values that have been learned in their academic study and previous PEP rotations, using a patient-centered approach. Students will serve as a member of the healthcare team incorporating professionalism, ethical principles, drug information, patient education and health promotion in the application of patient focused pharmacy care. Students will be required to complete a full patient care work-up on several patients and present the cases to a health professional audience. Students will expand their educational role by preparing and presenting an in-service on a relevant topic to a health professional audience. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

COORDINATOR: H. Davies

FORMAT: Minimum 40 hours/week x 6 consecutive weeks (first or second rotation, 4th year, second term)

PREREQUISITE: successful completion of fourth year classes (see College of Pharmacy Regulation F2)

## PHAR 4085.045: Practice Experience Program (PEP) V.

This clinical rotation focuses primarily on the practical provision of patient centered pharmacy care in community practice. As with the hospital rotation, students will apply the knowledge, skills and values that have been acquired throughout academic study and previous PEP rotations using a patient-centered approach. Interaction with family physicians and other healthcare professionals in the community is a key component of this rotation. Students should have the opportunity to interact with patients in the physician's office, pharmacy and/or home environment. Students will serve as a member of the healthcare team and incorporate professionalism, ethical principles, drug information, patient education and health promotion in the application of patient focused pharmacy care. Students will be required to complete full patient care work-ups on several patients and present the cases to a health professional audience. Students will expand their educational role by preparing and presenting a relevant health promotion/disease prevention topic to a community audience. Students are required to travel to sites outside the Halifax area and are responsible for all associated costs.

COORDINATOR: H. Davies

FORMAT: Minimum 40 hours/week x 6 consecutive weeks (first or second rotation in 4th year, second term)

PREREQUISITE: Successful completion of fourth year classes (see College of Pharmacy Regulation F2)

## PHYL 1400.06: Human Physiology.

This course is designed to give Pharmacy students a broad understanding of normal human physiology using pathophysiologic scenarios. Selected topics in physiology and biophysics will be presented in tutorials as case studies and in lectures. The central themes include: respiratory, endocrine/reproductive, gastrointestinal, neuromuscular, nervous system, renal and cardiovascular. Students will be provided with means for self-evaluation throughout the unit. Evaluation will be based on tutorial performance as well as mid- and end-of-unit examinations. This class is only for Pharmacy students.

DIRECTOR: M. Murphy and other staff members

FORMAT: A 7-week comprehensive unit with 6 hours tutorial and 4 hours lecture per week

PREREQUISITE: ANAT 1040.03

# Social Work

## The School of Social Work

Location: Mona Campbell Building, Suite 3201  
1459 LeMarchant Street  
PO Box 15000  
Halifax, NS B3H 4R2  
Telephone: (902) 494-3760  
Fax: (902) 494-6709  
Email: [social.work@dal.ca](mailto:social.work@dal.ca)  
Website: <http://www.socialwork.dal.ca>

## Dean

Webster, William G., PhD

## Academic Staff

### Director of the School

Fook, J.

### Associate Director

Richard, B. K.

### Undergraduate Coordinator

Brown, M.

### Professor Emeritus

Wein, F. C., BA (Queen's), MA, PhD (Cornell)

### Professors

Fook, J., BSW (SNSW), MSWC (Sydney), PhD (S'ton)  
Karabanow, J., BA, MA (McGill), PhD (Wilfrid Laurier)  
Thomas Bernard, W., BA (MSVU), MSW (Dalhousie), PhD (Sheffield)  
Ungar, M., BA, BSW, MSW (McGill), PhD (Wilfrid Laurier)

### Associate Professors

Brown, C., BA, MA (Manitoba), MSW (Carleton), PhD (U of T)  
Brown, M., BA, BSW, MSW (Dalhousie), PhD (MUN)  
MacDonald, J., BSW (St. Thomas), MSW (Carleton), PhD (MUN)  
Richard, B. K., BA (M.A.), MSW (Dalhousie)

### Assistant Professors

Baikie, G., BSW, MSW, PhD candidate (MUN)  
Campbell, C., BSc (King's), BEd, (Acadia), MSW (Carleton), PhD (MUN)  
Hanrahan, C., BA (McGill), MS, PhD (U of Toronto)  
MacDonald, N., BA, BSW, MSW (Dalhousie), PhD Candidate (Dal)  
Weinberg, M., BA (U of T), MSW (Smith College), PhD (U of T)

### Adjunct Professors

Briggs, T., BA (Waterloo), MSW (U of T)  
Cromwell, G., BA (SMU), MSW, MPA, BEd (Dalhousie)  
Gilroy, J., BS (Dalhousie), MSW (King's), MA (U of T)  
Harbison, J., BA, BSS (Dublin, Trinity College), Grad Dip SW (Edinburgh), PhD (Toronto)  
Marsman, V., BA, BSW, MSW (Dalhousie)  
O'Hara, P., BA (St. Thomas), MSW (Dalhousie)  
Wilson, L., BA (UCCB), BSW, MSW (Dalhousie)

### Agency Field Instructors

Many individuals throughout the municipality, province, and country contribute to the education of Social Work students through offering and supervising student placements. They represent a wide range of agencies and organizations including:

community based, non-profit, government, physical/mental health and addiction prevention and treatment services. Their invaluable assistance is gratefully acknowledged and appreciated.

## I. Introduction

The School of Social Work's vision is a commitment to building a socially just society, defined as one that upholds and validates the values of equality, diversity, inclusiveness, democracy and concern for human welfare. We manifest and advance curricula, scholarship and school culture that are congruent with those values.

The BSW degree program is accredited by the Canadian Association for Social Work Education. It embraces a critical and anti-oppressive approach to social work practice that includes an emphasis on social policy, research skills and critical analysis, professional values, theoretical perspectives and practice methods. While the program has evolved within the context of the people, communities and service network of the Maritime Provinces, graduates are qualified to practice social work throughout Canada and beyond.

### A. BSW Delivery Options

The BSW is a 20 credit degree program and is offered on campus and by distance delivery online. Both delivery methods include field placement experience. The application deadline is February 15th of each year.

### B. Relationship to the MSW Program

The School of Social Work offers a Master of Social Work degree for advanced specialized study in social work practice. The academic prerequisite for the MSW degree is a BSW or a Master's degree in a related field of study.

### C. Continuing Education

The School offers a Continuing Education Program (non-credit) of thematic workshops.

### D. Nova Scotia Association of Social Workers

Provincial legislation requires that only persons who are registered with the Nova Scotia Association of Social Workers (NSASW) can practice as social workers within Nova Scotia. To become fully registered and use the title of Social Worker after award of the BSW degree, at least 3,858 hours of paid supervised social work experience is necessary.

## II. Bachelor of Social Work Degree Program Admission

Information on academic preparation, admission and application procedures is contained in the Admission Requirements section of the calendar. Enrolment is limited to a specified number of places that are offered once a year to the best qualified candidates, selected by the School's Admissions Committee. Equal consideration is given to part-time and full-time applications.

### Prior Criminal Conviction

BSW applicants should be aware that a prior criminal conviction may render them unable to obtain a license in their field of study upon graduation, or unable to participate in some clinical field work experiences throughout their class of study.

### A. Affirmative Action

The School of Social Work has an affirmative action policy for applicants who are Acadian, Aboriginal, African Canadian, members of other racially visible groups, and persons with (dis)Abilities. The school is committed to admitting and graduating the highest possible number of students who qualify under this policy. Members of these groups who have five general (non social work) university credits that average B- are encouraged to apply under this policy. Applicants may self identify in a place provided on the Social Work Statement cover sheet, which is part of the BSW application package. Each candidate is considered individually on the basis of her/his qualifications, rather than in relation to other applicants. The admissions prerequisites and selection criteria are otherwise the same for all candidates.

### B. Program Objectives

Upon successful completion of the BSW program, students will:

1. Have an understanding of equity and justice through critical analysis.

2. Develop intellectual skills, scholarly attributes, and professional characteristics and values, including but not limited to, curiosity, open-mindedness, effective communications, judgment, rigor, respect, humility, embracing of difference, acceptance, integrity, compassion, self-care and ethical action.
3. Develop insight into the complex, contextual, and sometimes contradictory nature of social work theory, practice, policy, ethics and research.
4. The development of practice theory and skills "required to analyze situations, establish accountable relationships, intervene appropriately with clients and related systems and evaluate one's social work interventions" (CASWE, 2007) This includes an understanding of a range of life events and processes that may impact peoples' development, personalities and potentials.
5. Develop a critical understanding of the personal and professional "use of self."

## C. Program Requirements

The five admission credits that form the basic BSW academic prerequisite reduces the 20 degree requirement to 15 credits for all students.

### Required Classes

- SLWK 2010.03: Introduction to Community Social Work
- SLWK 2111.06: Development of Canadian Social Work and Social Welfare
- SLWK 2222.03: Advancing Social Justice
- SLWK 2333.06: Beginning Social Work Practice
- SLWK 2444.03: Life Processes: Conceptualizations and Practices for Critical Social Work
- SLWK 3030.06: Theoretical Foundations of Social Work Practice
- SLWK 3012.03: Perspectives on Social Welfare Policy
- SLWK 3083.03: Introduction to Research Methods and Statistics
- SLWK 3084.03: Understanding Research Methods in Social Work
- SLWK 3220.03: Cross-Cultural Issues in Social Work Practice
- SLWK 4010.06: Advanced Social Work Practice
- SLWK 4033.09: Field Practicum and Seminar
- Social Work Elective
- Social Work Elective

Distance students are required to take SLWK 2333, Beginning Social Work Practice onsite at Dalhousie University. The class is a combination of online study with a two week onsite residency component. This class is scheduled in the Spring session, normally in early May. Students complete this requirement in their first year of study.

### Interprofessional Health Education

Students are required to maintain enrolment in IPHE 4900 (see calendar section on Health Professions, Interprofessional Health Education) for the duration of their studies. Successful completion of this class is a requirement for graduation, and will be recognized further with the awarding of a special Certificate in Interprofessional Collaboration to be presented by the Faculty of Health Professions. Students are asked to consult with their individual school/college to determine the specific guidelines and expectations regarding the required portfolio.

Because of the nature of this class, registration in IPHE 4900 does not constitute a class overload.

### Transfer Credit Policy

The 15 credits may be further reduced by the amount of transfer credits for which a student is eligible. Suitable university credits that have been completed with a cumulative average of 2.7 (or B-) are eligible for transfer credit consideration. The following procedures guide the assignment of transfer credit:

- a. A maximum of five transfer credits (30 credit hours) can be awarded.
- b. As a general rule, transfer credit is assigned first to Elective Classes and then to Required Classes within the BSW curriculum.
- c. Transfer credit for university Social Work classes taken prior to a student's admission to the SSW may be assigned to required classes within the BSW curriculum. For this to occur students are required to submit the class outlines for these classes (calendar descriptions are not sufficient).
- d. No matter where transfer credit is assigned, all students must complete at least 10 credits offered by the SSW to complete the BSW degree.
- e. The only exception to the above will be students transferring from other BSW programs. Transfer credits for these students will be assigned following an individual file review of the student's previous class outlines to determine equivalency of content and credit value within the SSW curriculum. Transfer credit is assigned as fairly and appropriately as possible, although some loss of

credit usually occurs. Students who transfer from other BSW degree programs are governed by the regulation that any student with a previous degree is required to complete a minimum of six credits (36 credit hours) under Dalhousie instruction, and that any student without a degree is required to complete a minimum of 7.5 credits (45 credit hours) under Dalhousie instruction.

## D. Class Load and Sequencing

### 1. Length of Program

Most students accepted to the BSW program have a degree on entry with the required cumulative grade point average. Such students normally require 10 credits (60 credit hours) to complete the BSW degree. Students studying on campus may register on a full-time basis for two years of study, or on a part-time basis (to a maximum of ten years). Distance students may register for a two-year (24 month) full-time program of study, or a three-year part-time program of study (to a maximum of 10 years).

Students registered who have only five credits on entry (usually persons with related work experience) are required to complete three full-time years of study (90 credit hours) or the part-time equivalent.

Students registered with six credits or more on entry but less than 15 credits, (36-90 credit hours), complete a two-to-three year program as determined by the number of prior credits in relation to the School's transfer credit policy.

Class load and sequencing may vary from student to student depending upon the number of transfer credits and full or part-time status.

### 2. On-Campus Delivery

- For full-time students the usual load is 15 credit hours (i.e., five .03 credit classes) in the Fall and Winter terms.
- For part-time study the class load may be as minimal as one .03 credit class per term.
- The only Social Work classes offered in the Spring semester consist of one Social Work elective and Field Practicum and Seminar.
- It is important to pay close attention to the pre or co-requisites for each class. These are indicated in the class descriptions.

### 3. Distance Delivery

Distance Students are strongly encouraged to maintain their class sequencing schedule. Any changes must be in accordance with pre- and co-requisites as outlined in the calendar and are dependent upon availability of class offerings, especially electives. Students studying by distance will be assessed distance delivery fees in addition to tuition.

## E. Registration

Registration is completed online for all students regardless of delivery method. For more information, go to <http://www.dal.ca/registration> and <http://www.dal.ca/online>.

The academic timetable is available online each year. On-campus Social Work classes have section numbers of 01 or 02. Online Distance Social Work classes have section numbers of 07 or 08, and a notation of "DR".

**IMPORTANT:** Please note that it is not possible to transfer between onsite and the online delivery or to register for classes other than those which apply to the delivery method for which the student has been accepted.

## F. Field Education

The Field Practicum and Seminar class consists of a 700 hour placement at a community agency plus participation in a concurrent integrated seminar. For a full explanation of the placement process, roles and responsibilities please download the Field Manual at <http://socialwork.dal.ca/Prospective%20Students/>

Field Placements are organized by the Field Education Coordinator at the School of Social Work.

## G. Advising Sessions for New Students

New on campus students are expected to attend Orientation which is scheduled prior to the commencement of classes. Students can meet individually with the Student Services Coordinator to review the curriculum advising forms and ask questions pertaining to the BSW program. Distance students are provided with an

online orientation and information site and should contact the Distance Coordinator regarding their program schedule and questions.

## III. School of Social Work Regulations: BSW Degree Program

All Bachelor of Social Work students are required to observe the University and Academic Regulations of Dalhousie University and the Faculty of Health Professions set forth in the annual Undergraduate Calendar. The website location is <http://www.registrar.dal.ca> - Undergraduate Calendar - Academic Regulations, University Regulations.

### 1. Grade Point Average Requirements

Faculty of Health Professions' academic regulations applies to the BSW degree requirements. Students require a cumulative GPA of 2.0 to graduate. In addition, the School's grade requirements specified in Items 2 & 3 below apply to components of the Social Work curriculum.

### 2. Grade Requirements for Social Work Classes

The minimum grade requirement for satisfactory completion of a Social Work class is C-. A student who earns a grade of less than C- but is otherwise still eligible to continue in the program must repeat the class until a grade of at least C- is attained. Social Work classes are all classes taken under BSW study other than those designated as general admission credits.

### 3. Required Withdrawal: Academic Dismissal

A student who fails to meet sessional GPA standards as defined in the Academic Regulations - Faculty of Health Professions must withdraw from the School for at least 12 months. (Please refer to Academic Regulations - Good Standing, Probation and Academic Dismissal, Dalhousie Undergraduate Calendar).

- A student who fails a repeated academic class must normally withdraw from the BSW Program.
- A student who fails SLWK 4033, Field Practicum and Seminar is required to withdraw from the BSW Program.

### 4. Required Withdrawal on Grounds of Unsuitability

See University Regulations: Suspension or Dismissal from a Program on the Grounds of Professional Unsuitability - Faculty of Health Professions.

### 5. Consideration of Readmission

Students are normally required to complete their undergraduate studies within ten years of their first registration and comply with the program requirements at the time of first registration. If a student is readmitted and cannot complete the program within 10 years they may be required to comply with the new program requirements.

#### 5.a Request for Readmission After Dismissal

Students who have been required to withdraw from the School of Social Work on the basis of academic dismissal may apply for readmission by the annual February 15 admissions deadline date that follows a minimum of 12 month's absence from the School. Due to the competitive nature of the enrolment process, readmission of students is not guaranteed.

#### 5.b Request for Readmission After Voluntary Withdrawal

Students in good standing who have not registered in the program for 36 months or less and who wish to be reinstated are required to submit a new application form to be returned with a letter to the Undergraduate Program Coordinator requesting re-admission to resume their BSW degree studies. Students in good standing who have not registered in the program for 37 months or more and who wish to be reinstated are required to reapply by the February 15 admission deadline date. The application and all supporting documentation must be accompanied by a letter explaining the reasons for the interruption in the student's studies and the decision to request readmission to the BSW degree program.

## 6. Appeals

A student wishing to appeal a decision based on School regulations, should consult with the Chair of the Committee on Undergraduate Studies for advice on appeal procedures.

## 7. Duration of Undergraduate Study

Students are normally required to complete the BSW degree within 10 years of their first registration (see Academic Regulation—Duration of Undergraduate Studies).

## 8. Workload Regular Academic Year

Five full-credit (i.e., 30 credit hours) per academic year shall be regarded as constituting a normal workload for a full-time student. Permission of the Undergraduate Program Coordinator is required if this workload is to be exceeded, or if the planned workload in any one term (Fall or Winter) would amount to more than five half-credits (i.e., 15 credit hours per term).

On-campus, part-time students may register for a minimum of one .03 credit (three credit hours) per term. Part-time status applies to students registered for no more than a total of 2.5 credits (15 credit hours) in the Fall and/or Winter terms. All new students are required to register in the first Fall term following their acceptance in order to maintain their place in the program.

## 9. Workload Summer Session (includes May-June and July-August)

Dalhousie regulations permit students to take one full credit (a total of six credit hours) in each of the May-June and July-August parts of Summer term. Social Work students may, following consultation with the Field Coordinator, register for the Field Practicum and Seminar class during this session.

The School usually offers one .03 credit Social work class in the May/June period for BSW campus students, provided that minimum enrollment requirements are met. Students in distance delivery take their elective classes in the summer sessions. Consult the timetable for current class offerings.

Permission of the Undergraduate Program coordinator is required to exceed the two-credit limit for the two summer terms.

## 10. Students in Other Degree Programs (applicable for on-campus students only)

Students enrolled in degree programs at Dalhousie may, in conformance with their program regulations, choose their degree electives from Social Work Field of Practice electives. Permission from the instructor is required; class prerequisites and class size limitations apply. Students are able to enroll in Social Work electives only to the maximum credit value allowable for open electives by their degree requirements. Any additional Social Work classes would be considered on the same basis as "No Degree."

## 11. Special Students "Non-Degree" (applicable for on-campus students only)

Social Work classes are not available to persons on a "no degree" basis, with the exception of agency field instructors and other qualified Social Work professionals who are able to satisfy normal admission requirements. Permission of the Undergraduate Coordinator is also required.

Students enrolled in other Social Work degree programs may be permitted to enroll in specific classes, by application for admission as a visiting student with letter(s) of permission from the home university. Class prerequisites and size limitations apply. Further information may be obtained from the Student Services Coordinator.

## 12. Deferral Policy

Newly accepted applicants who, for reasons beyond their control, are unable to take up their position on the date from which they were accepted, may request a deferral of one, two, or three terms. No student may receive more than one deferral.

Requests for a deferral of admission should be sent in writing to the Admissions Coordinator of the School of Social Work by August 15th for the year in which they were offered admission. When submitting a request for deferral, an applicant should clearly state the reason for their deferral and, where relevant or appropriate, provide additional documentation to support the request (for example, medical certificates). All deferrals are subject to the approval of the Undergraduate Program Coordinator.

## 13. Audit by Agency Field Instructors

The School of Social Work permits Agency Field Instructors to audit Social Work classes. Prior permission of the instructor concerned is required. In order for the audit to show on a University transcript, the agency field instructor must abide by the audit and fee regulations as outlined in Academic Regulation—Audit of Classes.

## 14. Tuition Fees

Detailed information concerning tuition and fees is available in the Fees section of this calendar as well as <http://www.dal.ca/studentaccounts>.

## IV. Class Descriptions

The following classes are restricted to Social Work students.

### SLWK 2010.03: Introduction to Community Social Work.

Community Development within social work is the facilitation of meaningful change within communities to improve the quality of life for members of those communities. This course considers various conceptions of community, elements of change processes, and specific change strategies.

### SLWK 211X/Y.06: Development of Canadian Social Work and Social Welfare.

This is an introductory survey course, offering a beginning examination of topics and issues that will be examined in greater depth in other classes during the BSW program. By reviewing the historical development of the politics, principles, policies, practices, values, and ethics of Canadian social work and social welfare students appreciate the contextual, complex, and sometimes contradictory nature of the social work profession.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term. This course is delivered online for campus students.

### SLWK 2222.03: Advancing Social Justice.

This course introduces students to the central concepts of a social justice perspective including historical and current manifestations of inequity and injustice. It considers how the profession of social work has both advanced and impeded social justice. Particular attention is given to exploring the role of individuals in the promotion of equitable social relationships. This is a Pass/Fail course that attends to cognitive, affective, and spiritual learning processes.

### SLWK 233X/Y.06: Beginning Social Work Practice.

This course introduces students to the processes and practices of the social work profession including a range of beginning practice skills, social work values and ethics, the varied contexts of social work practice, and the roles and responsibilities of professional social workers. This multi-faceted course may include classroom instruction, simulations, seminars, workshops, contact with practicing social workers, visits to various social service agencies, and exposure to "first voice" experiences. This class requires 40 hours of self-directed learning activity time to be completed outside regularly scheduled class time.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: /Co-requisite: SLWK 2111, SLWK 2222

### SLWK 2444.03: Life Processes: Conceptualizations and practices for Critical Social Work.

This course critically explores a range of life events and processes that may impact peoples' development, personalities and potentials. Attention is given to how ethnicity, race, social class, ability, gender, sexual orientation, age, religion, and other social variables intersect with the individual development. The need for differential reactions from workers in response to clients varied life experiences will also be considered.

PREREQUISITE: /Co-requisite: SLWK 2111, SLWK 2222

### SLWK 3012.03: Perspectives on Social Welfare Policy.

As an introduction to social policy analysis, this course surveys a variety of perspectives on social problems and social policy issues, with a focus on contemporary debates. The impact of policy on service users is a central theme of the course.

PREREQUISITE: /Co-requisite: SLWK 2111, SLWK 2222

### SLWK 3030.06: Theoretical Foundations of Social Work Practice.

The central theme of this course is the integration of theory and practice, recognizing that theory guides practice and practice informs theory. The first term consists of the theoretical foundations of social work, understanding their relation to social work practice from social, political, economic and historical positions. The second term offers an in depth examination of the theoretical foundations of a

variety of critical perspectives. Case applications are explored from a variety of practice situations and problem definitions.

PREREQUISITE: /Co-requisite: SLWK 2111, SLWK 2222

### **SLWK 3083.03: Introduction to Research Methods and Statistics in Social Work.**

This class provides an introduction to both quantitative and qualitative research methods, with particular attention to examples from social work research. Students become familiar with the whole of the research process from the identification of the problem to the presentation of results, including the application of statistics. Students will be exposed to the full range of alternative research designs, including both quantitative and qualitative research methods.

### **SLWK 3084.03: Understanding Research and Research Methods in Social Work.**

This course provides students with the research methods required to evaluate social work practice at the case and program level. Students will learn how to evaluate organizations, casework, plan evaluations, and analyze quantitative and qualitative approaches to evaluations. Emphasis will be placed on evaluating benefits and outcomes of interventions for clients.

PREREQUISITE: SLWK 3083.03 is required

### **SLWK 3220.03: Cross-Cultural Issues and Social Work Practice.**

This course provides an opportunity to critically examine theoretical frameworks for viewing marginalized racial, ethnic and cultural groups in society, to examine personal values as they relate to the above groups, to develop skills in working effectively with these groups, and to understand related social policies.

PREREQUISITE: SLWK 2222, SLWK 2111, SLWK 2333, SLWK 3012

### **SLWK 4010.06: Advanced Social Work Practice.**

Building on a number of preceding courses this course considers numerous advanced practice theories and skills including a critical analysis of ethics. Student will become proficient in applying a critical social work practice framework at the beginning practitioners' level.

PREREQUISITE: SLWK 2111, SLWK 2222, SLWK 2333, SLWK 2444

CO-REQUISITE: SLWK 3030

### **SLWK 4033.09: Field Practicum and Seminar.**

This course includes a 700 hour agency based practice placement, integrated seminars and the opportunity to develop a broad range of practice knowledge and skills sufficient to meet the requirements of an entry level professional position. The field practicum is done at the end of a student's program. Students are responsible to stay in touch with the Field Coordinator during the coordination process and comply with various requirements of placement sites (for example: immunizations, CRC, Child Abuse Registry). Some sites may require separate disability insurance in lieu of eligibility for Worker Compensation Coverage. Such costs are the responsibility of the student.

PREREQUISITE: SLWK 2111.03, SLWK 2222.03, SLWK 2333.03, SLWK 2444.03

CO-REQUISITE: SLWK 3030.03, SLWK 4010.03

## **V. Electives**

In keeping with the overall program goals of the BSW program of SSW, all elective classes are designed to help students develop a critical analysis of the major themes and current issues related to the class topic. In addition, all electives explore the differential impact of social constructs such as race, gender, class, age, sexual orientation, and ability on the particular issue or practice field.

There are no pre or co-requisites for Social Work Field of Practice Electives. The format is generally a combination of lecture, discussions and small group activities. Participation of non-social work students is dependent upon approval of their home School/Department, class enrollment and the permission of the instructor. Not all electives are offered every year; check the timetable for each year's offerings.

### **Possible Elective Offerings**

- SLWK 3110.03: Africentric Perspectives in Social Work
- SLWK 3120.03: International Social Work
- SLWK 3130.03: Women and Violence
- SLWK 3135.03: Social Work and Mental Health
- SLWK 3140.03: Crisis Counseling
- SLWK 3150.03: Poverty and Inequality

- SLWK 3160.03: Social Work with Aboriginal Populations
- SLWK 3170.03: Feminist Counselling (Cross Listed with GWST)
- SLWK 3200.03: Law and Social Work
- SLWK 3230.03: Women and Social Change
- SLWK 3245.03: Queer-Centred Social Work Practice
- SLWK 3250.03: Social Work in Corrections
- SLWK 3270.03: Social Work in Addictions
- SLWK 3290.03: Advanced Counseling in Social Work Practice
- SLWK 3320.03: Social Work and Aging
- SLWK 3330.03: Independent Study
- SLWK 3350.03: Social Work with Groups
- SLWK 3360.03: Social Work and Adolescents
- SLWK 3370.03: Child Welfare
- SLWK 3375.03: Child Welfare with Aboriginal Populations
- SLWK 4380.03: Disability Policy and Service

## Faculty of Management

Location: 6100 University Avenue  
PO Box 15000  
Halifax, NS B3H 4R2  
Telephone: (902) 494-2582  
Fax: (902) 494-1195  
Website: <http://management.dal.ca>

### Dean

Cunningham, P., BA (Queen's), MBA (Calgary), PhD (Texas A&M)  
Suite 3050  
Telephone: (902) 494-7487

### Directors

#### Rowe School of Business

Hebb, G., BA (McGill), MBA (Queen's), PhD (Texas A&M)  
Suite 4004  
Telephone: (902) 494-7080

#### School of Information Management

Spiteri, L., BA, MA (York), BEd (Toronto), MLIS (Western), PhD (Toronto)  
Suite 4010  
Telephone: (902) 494-3656

#### School of Public Administration

Quigley, K., BA (Queen's), MSc (London School of Economics), PhD (Queen's University Belfast)  
Suite 3010  
Telephone: (902) 494-3782

#### School for Resource and Environmental Studies

Tyedmers, P. H., BSc (Waterloo), LLB, PhD (UBC)  
Suite 5010  
Telephone: (902) 494-6517

The Faculty of Management includes four schools - Rowe School of Business, School of Information Management, School of Public Administration, and School for Resource and Environmental Studies, as well as the Marine Affairs Program. The Faculty has two undergraduate program options - BComm in the Rowe School of Business and BMgmt offered jointly by the four schools. The commerce degree has a mandatory co-operative education format.

Students wishing to enrol in programs offered by the Faculty should address themselves directly to the Schools concerned for further information or for help in planning classes of study; for the Bachelor of Management program, contact the Undergraduate Academic Advising Office at (902) 494-3710.

## Commerce

### Rowe School of Business

Location: 6100 University Avenue  
PO Box 15000  
Halifax, NS B3H 4R2  
Telephone: (902) 494-7080  
Fax: (902) 494-1107

The Rowe School of Business provides quality programs at both the undergraduate and master's levels that prepare students to contribute to and take leading positions in business and society. Graduates of the programs are competitive in the global, diverse and continually changing workplace. Teaching, scholarship and service link theory and practice to benefit students, the University and the business community in Canada and abroad.

#### Specific objectives are to:

- Attract, retain and educate students of high calibre from Nova Scotia, elsewhere in Canada and internationally.
- Develop students' knowledge of key concepts and issues in business operations, as well as in-depth knowledge within specialized business disciplines.
- Develop students' analytical and decision-making skills through a mix of theoretical and applied approaches including lectures, discussion groups, individual research projects, team projects and casework, as well as comprehensive field projects.
- Enhance students' team and communication skills, which are needed to succeed in careers and management.
- Develop knowledge through research and association with the academic and professional communities.
- Maintain strong ties with both the private and public sectors.

The undergraduate commerce program includes studies in the humanities and social sciences as well as in the functional areas of business. It is offered on a co-operative education (work/study) basis.

Tetreault, B., BA (Corneil), MA (Chicago)

## I. Bachelor of Commerce Program

The Rowe School of Business offers a four-year, Bachelor of Commerce (Co-operative Education) Program that is accredited by both the Association to Advance Collegiate Schools of Business (AACSB) and the Canadian Association for Co-operative Education (CAFCE). It is one of the few mandatory co-op business degree programs in Canada. Cooperative education is an academic strategy that integrates on-campus study with off-campus work experience. The schedule for the Bachelor of Commerce Co-op Program includes seven academic terms (AT) and three work terms (WT), as follows:

	Fall	Winter	Summer
Year 1	AT1	AT2	FREE
Year 2	AT3	WT1	AT4
Year 3	WT2	AT5	WT3
Year 4	AT6	AT7	

The co-op program in Commerce requires a broad and general range of studies, including required and elective classes provided by the Faculty of Arts and Science. The program also allows students to choose a major in a variety of special areas. The Commerce program does not offer Minors or Double Majors.

The three work-terms each receive credit, but constitute a full work load. (See the Regulations section of this calendar for "overload" limits and conditions.)

### A. Degree Requirements

- Four-year program - seven academic terms and three work-terms
- Total credits required - 20 full credits
- Required GPA for graduation 2.00
- Required core area classes - 10 1/2 credits.

**Note:** A suitable replacements for MATH 1115.03 is MATH 1000.03

- Commerce electives - four credits;
- Work-terms - 1 ½ credits
- COMM 1010.03
- COMM 1101.03
- COMM 1502.03
- COMM 1710.03
- COMM 1720.03
- COMM 2102.03
- COMM 2202.03
- COMM 2203.03
- COMM 2303.03
- COMM 2401.03
- COMM 2501.03
- COMM 2502.03
- COMM 2603.03
- COMM 3501.03
- COMM 3511.03
- COMM 4351.03
- COMM 4352.03
- ECON 1101.03
- ECON 1102.03
- MATH 1115.03
- PHIL 2081.03
- Non-commerce electives - three full credits (of which 1½ credits must be at or above the 2000 level) selected from all classes offered in the University other than commerce, management and business.
- Free electives - one full credit (can be commerce, at or above the 2000 level, or non-commerce at any level)

NOTE: Students readmitted to the Commerce program will be subject to the Academic Regulations as stated in the Calendar for the year of readmission. For further information, contact the Rowe School of Business, Undergraduate

Advising Office, 6100 University Avenue, Suite 2086, (902) 494-3710. Email: [bcomadvising@dal.ca](mailto:bcomadvising@dal.ca)

## B. Program Guide

Students normally follow a fixed program of study, as outlined below:

### Academic Term One

- COMM 1010.03: Business in a Global Context
- COMM 1101.03: Financial Accounting
- COMM 1502.03: Core Business Applications
- ECON 1101.03: Principles of Microeconomics
- One non-Commerce elective

### Academic Term Two

- COMM 1710.03: Business Communications I
- COMM 2102.03: Managerial Accounting
- ECON 1102.03: Principles of Macroeconomics
- MATH 1115.03: Mathematics for Commerce
- One non-Commerce elective

### Academic Term Three

- COMM 1720.03: Business Communications II
- COMM 2202.03: Managerial Finance
- COMM 2401.03: Intro to Marketing
- COMM 2501.03: Statistics I
- One non-Commerce elective

### Work Term I - COMM 2801.03

#### Academic Term Four

- COMM 2203.03: Intermediate Finance
- COMM 2303.03: Organizational Behaviour
- COMM 2502.03: Statistics II
- COMM 2603.03: Legal Aspects of Business
- PHIL 2081.03: Business Ethics

### Work Term II - COMM 3801.03

#### Academic Term Five

- COMM 3501.03: Operations Management
- COMM 3511.03: Management Information Systems
- Three commerce electives
- One non-commerce elective

### Work Term III - COMM 3802.03

#### Academic Terms Six and Seven

- COMM 4351.03 and 4352.03
- Five commerce electives
- Two non-commerce electives
- Two free electives

During their fifth, sixth and seventh academic terms, students can either pursue a customized program of study, by choosing electives from a wide range of the functional areas of business, or they can follow a more specialized program, taking their elective classes towards a major.

### Major in Accounting

Students **must** complete the following six classes:

- COMM 3105.03
- COMM 3111.03
- COMM 3114.03
- COMM 3116.03
- COMM 4101.03
- COMM 4120.03

**Plus** two of:

- COMM 3203.03
- COMM 3207.03
- COMM 4102.03
- COMM 4103.03
- COMM 4112.03
- COMM 4121.03
- COMM 4511.03

The professional accounting bodies allow certain exemptions in respect of classes taken in the Rowe School of Business. These differ from province to province. Particulars can be obtained from the provincial offices of the Association of Certified General Accountants, the Institute of Chartered Accountants, the Society of Management Accountants, and the Chartered Institute of Secretaries.

Students must obtain COMM 1101 and 2102 with an average of at least B-.

### Major in Managing People and Organizations

Students **must** complete the following:

- SOSA 1002.03 and SOSA 1003.03 or SOSA 1100.06 or SOSA 1200.06 or PSYO 1011.03 and PSYO 1012.03
- COMM 3303.03
- COMM 3309.03
- COMM 3310.03
- COMM 4315.03
- COMM 4510.03
- COMM 4306.03 or COMM 4340.03

Note: Classes outside of commerce, such as SOSA and PSYO, are counted as non-commerce electives or free electives

### Major in Entrepreneurship

Students **must** complete the following six classes:

- COMM 3307.03
- COMM 3308.03
- COMM 3309.03
- COMM 3203.03 or COMM 3409.03
- COMM 3401.03 or COMM 3404.03
- COMM 4301.03

Note: Students must also complete either an entrepreneurial work term, as defined by the Norman Newman Centre for Entrepreneurship and Management Career Services; or an approved work term in an entrepreneurial setting.

### Major in Finance

Students **must** complete the following three classes:

- COMM 3203.03
- COMM 3206.03
- COMM 4240.03

**Plus** three of:

- COMM 3207.03
- COMM 4201.03
- COMM 4202.03
- COMM 4250.03
- COMM 3100.03 or COMM 3105.03 or ECON 2200.03 or ECON 2201.03

Note: Classes outside of commerce, such as economics, are counted as non-commerce electives or free electives

### Major in International Business

Students **must** complete the following:

- Language Requirement; six credit hours (at a level appropriate to knowledge, as determined by department concerned)

**Plus** the following:

- COMM 3405.03
- COMM 4201.03
- COMM 4315.03
- COMM 4701.03

**Plus** one of the following:

- ECON 2213.03
- ECON 2219.03
- ECON 2334.03

Students must also complete one academic term or one work term in a country that is not their primary residence.

Note: Classes outside of commerce, such as economics, are counted as non-commerce electives or free electives.

### Major in Marketing Logistics

Students **must** complete the following five classes:

- COMM 3404.03
- COMM 3407.03
- COMM 3408.03
- COMM 3405.03
- COMM 4401.03

Plus one of:

- COMM 3401.03
- COMM 3409.03
- COMM 3410.03

Students must obtain COMM 2401, COMM 3404 and COMM 3407 with an average of at least B-.

### Major in Marketing Management

Students **must** complete the following five classes:

- COMM 3401.03
- COMM 3402.03
- COMM 3404.03
- COMM 3407.03
- COMM 4401.03

Plus one of:

- COMM 3405.03
- COMM 3408.03
- COMM 3409.03
- COMM 3410.03

Students must obtain COMM 2401, COMM 3401 and COMM 3404 with an average of at least B-.

Students interested in majoring should consult the School's website for further details before beginning their fifth academic term.

## C. Co-op Work Terms

(For more information visit: <http://www.dal.ca/mcs>)

A work term is a period of time when a student gains practical experience in a business-related work environment. Each passed work term is an academic half credit and must meet the requirements listed below. Three passed work terms are required to graduate.

During a work term a student is considered an employee of their work term employer with reference to the conditions of their employment and is a student with respect to academic evaluation only. The university does not accept liability for the student's work environment.

Students are remunerated according to employer policy and the labour laws of the jurisdiction in which they work.

Career and Recruitment Specialists conduct mid-term reviews with both the employers and students to ensure the work term objectives are being met.

### Work Term Requirements

Students receive academic credit upon completion of the following for each work term:

1. Students must register for each work term (Comm 2801, Comm 3801 and Comm 3802) via Dal on-line.
2. Students must also register electronically on Management Career Services' job posting database for each work term.
3. A work term must total no less than 12 weeks with a cumulative total of 42 weeks over three work terms. A work term must be a minimum of 35 hours per week.
4. All jobs, including self-developed jobs must be approved by a Career and Recruitment Specialist within Management Career Services (MCS).
5. Students are responsible for finding suitable employment and students sign a Co-op Education Program Agreement prior to the first work term accepting this responsibility. (Aid in the job search is provided by Management Career

Services and some job opportunities are posted through Management Career Services' job posting database.)

6. Employers commit to completing and submitting an evaluation detailing the student's performance level.
7. Work Term One only: Students must complete and submit a career portfolio.
8. Work Term Two only: Students must submit an acceptable analytical work term report pertaining to a student's area of study or employment.
9. Work Term Three only: Students must submit an acceptable Reflective Report and Career Action Plan.
10. Work term report guidelines and policies are available online at [http://bcomm.management.dal.ca/Co-op\\_Work\\_Terms/](http://bcomm.management.dal.ca/Co-op_Work_Terms/).

### Work Term Eligibility

Only students who meet the prerequisites (see **Section II: Classes Offered** of this calendar) are eligible to go out on a work term. Students whose grades drop below a 1.70 GPA overall will be **required to withdraw** from the program. Also refer to the university regulation regarding probation.

### Co-operative Education Fee

Students are charged a Co-operative Education Fee. In an effort to balance the cost, the fees are charged on each academic term until completion of the degree. While no fee is charged for the actual work term, any student taking an academic class during the work term will be charged an additional pro-rated fee. Co-op fees are prorated for part-time students.

These fees are non-refundable after the deadline dates listed in the University Calendar. Students who transfer into the program from another department or another institution are responsible for back payments.

Students taking a full academic term on a Letter of Permission are also responsible for the payment of co-op fees. Before the Letter of Permission can be granted, students must sign a form available from the Undergraduate Advising Office, which states they will pay the full co-op fees for terms done at another university.

Payment of all instalments is required to obtain a Bachelor of Commerce Degree. Consult the Fees section of the Dalhousie University Calendar for details.

#### The Co-op fee covers:

- Administration of the co-op work term including, but not limited to;
  - Job search assistance (cover letters and resume building, interview preparation and debrief, coaching for self-developed job search strategies)
- Orientation workshops and other training
- Networking opportunities with employers (including special events, competitions, information sessions, corporate tours, mentoring etc)
- Work term monitoring and mediation of unsatisfactory situations
- Post work term debrief
- Development of job opportunities
- Access to on-line job posting site and job posting administration
- Interview space and co-ordination
- Facilitation of job offers
- Tracking of eligibility and job search activity

## D. Management Information Systems

All faculty members and staff have their own personal computers and students have access to a computer lab with 63 personal computers. All personal computers in the School are based on the Intel family of processors (currently Pentium IV, 1.6 GHz). They are fully networked and run Windows software and the latest Windows-based applications. All machines have full access to the Internet and students have a choice of web browsers. Students have a choice of printing on black-and-white or colour laser printers. There is also a full-sized color scanner available free of charge.

## E. Exchange Programs

Dalhousie offers Commerce students the opportunity to study abroad in a variety of countries all over the world, including Denmark, France, Sweden, Norway, Korea and Germany (a complete list of partnerships can be found at [citt.management.dal.ca](http://citt.management.dal.ca)). While participating in this extremely popular program, students develop international contacts, immerse themselves in a different culture, and gain valuable international experience. For more information, please contact Tim Richard, Student Exchange Coordinator, by email at [tim.richard@dal.ca](mailto:tim.richard@dal.ca) or by telephone at (902) 494-2224.

## II. Class Descriptions

NOTE: Consult the current timetable to determine in which term(s) each class is offered. It may not be possible to offer all the electives listed below every year. Students should bear this in mind when planning their program.

### COMM 1010.03: Business in a Global Context.

This class provides an introduction to the national and international context of Canadian political, economic and business activity. It presents a sampling of the most relevant issues facing managers in business, labour and public sector organizations. Emphasis is placed on developing an understanding of Canada's competitive position today, and of the historical background and current influences on this position. The focus of the class will be on lectures, the text, guest speakers, and more specifically what is said in class by your instructor as well as in tutorials by your tutorial leader and your colleagues. Leading edge ideas and concepts - many of which are not confined exclusively to any one particular text or article - will be introduced by your instructor during the lectures, and may be reinforced through hand-outs from time to time.

NOTE: Students in BComm Program can not receive credit for MGMT 1000.03 or MGMT 1001.03

FORMAT: Lecture 3 hours.

EXCLUSION: COMM 1000.03

### COMM 1101.03: Introductory Accounting I. (Financial).

An introduction to the principles and practices used by accountants in processing and communicating data, both within and outside the organization. Emphasis is on financial accounting and reporting, with the following objectives:

To introduce the theoretical framework upon which financial statements are based, and examine the major underlying concepts and principles;

To demonstrate basic financial accounting methodologies, and develop the analytical and procedural skills related thereto;

To understand the information content of conventional financial statements, and the inherent limitations of accounting data.

FORMAT: Lecture 3 hours. Plus tutorials, as required. Written and computer-based assignments.

EXCLUSION: MGMT 2101.03

### COMM 1502.03: Core Business Applications: Introduction to Computers.

The class focuses on how business applications, notably word processors, spreadsheets and data visualization applications, contribute to the management and analysis of data with respect to business processes. This class begins with an over view of Management Information Systems, before proceeding through several modules that involve data-to-document transformations, along with application integration between word processing, spreadsheets and data visualization applications. We use spreadsheets to perform, to automate routine business calculations, visualize the data using business digital dashboards. The analyses are then collated and summarized using features of word processors to produce a final report for each business case that is analyzed. Each successive module increases the complexity of the analyses and reports. As the class progresses, business simulations will be used in assignments to provide experiential and immersive learning opportunities. The class is taught with both in-class lectures and self-paced laboratory exercises.

NOTE: ASSC 1000 or CSCI 1200 will not be counted in the Commerce program.

EXCLUSION: COMM 1501.03, INFO 1601.03, ASSC 1000.03, CSCI 1200.03

### COMM 1710.03: Business Communications I.

Students will learn how to be effective speakers and presenters. The primary goal of this class is to introduce the first-year students to the types of oral communication used in today's workplace. The course will start with introducing a philosophy for lean, effective, and ethical communication, how to construct analyses, develop arguments and lead to self reflection and individual value proposition. The class will cover a variety of topics such as networking, creating effective job application cover letters and resumes, interviewing, formal and informal presentations, job search skills, listening, team dynamics and conducting meetings, while doing research on potential employers. Students will have the opportunity to practice their skills and evaluate the skills of others.

FORMAT: Lecture 3 hours

EXCLUSION: COMM 2701.03, INFO 1002.03, ENGL 2100.03, ENGL 2110.03, CSCI 2100.03 Students taking COMM 1710 cannot receive credit for these classes.

### COMM 1720.03: Communications II.

This class follows COMM 1710.03. While the primary goal of this class is to teach students how to properly prepare written business correspondence, second-year students will also learn about academic writing (the concept of intellectual property, library resources, essay writing, and critical thinking). The course will again start with introducing a philosophy for lean, effective and ethical communication, how to construct analyses, develop arguments, make strategic choices on sentence structure, choice of channel, type of message, gain an understanding of the audience, the context and present culturally sensitive and ethically correct messages in the appropriate channel and form. Additionally, they will learn about communication theory and the importance of communication in the workplace so that they will learn about critical listening, critical reading, and how to be strategic writers. By the end of the course, students will be able to understand business contexts and know how to make choices of medium, channel, form and also how to write business memos, e-mail messages, letters, reports, and proposals, analytical reports, participate and learn about group work.

FORMAT: Lecture 3 hours

PREREQUISITE: COMM 1710.03

EXCLUSION: INFO 1003.03, ENGL 2100.03, CSCI 2100.03

Students taking COMM 1720 cannot receive credit for these classes.

### COMM 2102.03: Introductory Accounting II. (Managerial).

An introduction to the use of accounting information by managers, within the organization. Emphasis is on management accounting and analysis, with the following objectives

- To develop an understanding of the kinds of accounting information managers need;
- To examine managerial accounting methodologies and develop the analytical and procedural skills related thereto;
- To prepare accounting reports which are useful for management planning, control and decision-making;
- To develop an awareness of the limitations of managerial accounting information.

FORMAT: Lecture 3 hours. Plus tutorials as required. Written and computer-based assignments.

PREREQUISITE: COMM 1101.03 or MGMT 2101.03

EXCLUSION: MGMT 2102.03

### COMM 2202.03: Finance I.

An introduction to the problems faced by business managers in the acquisition and effective use of the firm's resources, and analytical concepts for evaluating financial decisions. Topics covered are: financial planning, time value of money, working capital management, risk and return, and valuation of debt and equity instruments.

FORMAT: Lecture 3 hours

PREREQUISITE: COMM 1010.03 and COMM 2102.03; ECON 1101.03 and ECON 1102.03; MATH 1115.03 or MATH 1000.03

EXCLUSION: MGMT 3201.03

### COMM 2203.03: Finance II.

This class provides students with an overview of the theory of corporate finance and its application to the problems faced by financial managers. This class covers an in-depth study of capital budgeting and long term investment decisions in national and international contexts, capital structure, dividend policy, lease financing, and the fundamentals of options and futures.

FORMAT: Lecture 3 hours

PREREQUISITE: COMM 2202.03

EXCLUSION: MGMT 3201.03

### COMM 2303.03: Introduction to Organizational Behaviour.

This class will provide an overview of organizational behaviour theory, as well as an introduction to the practical application of that theory, within the context of the external and organizational forces that impact management. Through mini lectures, cases and discussion, students will be introduced to the theoretical basis of managing people in organizations. Key topics will include individual factors, such as personality and perception; organizational processes, such as appraisal and performance management; and contextual issues, such as organizational culture and change. Experiential exercises will be incorporated to link theory with practice.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: COMM 1010.03

EXCLUSION: COMM 2301.03, MGMT 2303.03 and MGMT 2304.03

### COMM 2401.03: Introduction to Marketing.

The objective of this class is to familiarize you with marketing's mode of inquiry—the way marketers look at the world. As a marketer you should be able to: 1) ask the right questions about markets; 2) organize data into relevant information; 3) discover market opportunities; 4) set goals; 5) create a marketing plan that includes clear target markets, as well as product, price, distribution and communication strategies; and 6) implement and control a marketing program. Students work in groups and run a business in an online marketing simulation. This provides students with hands-on group decision making and data analysis skills, and they are specifically responsible for making product, pricing, promotion and placement strategies for a brand or group of brands. The class will also train you in a number of skills that are necessary for higher level classes and career advancement (i.e., case analysis and analytical report writing).

FORMAT: Lecture 3 hours

PREREQUISITE: COMM 1010.03, COMM 1502.03, ECON 1101.03 and ECON 1102.03, or permission of the instructor.

CROSS-LISTING: MGMT 2401.03

### COMM 2501.03: Statistics for Business I.

An introduction to the principles and applications of statistics relevant to commerce students, with emphasis on making inferences based on observed data. Topics covered include descriptive statistics, probability, random variables, estimation, hypothesis testing, statistical software.

FORMAT: Lecture 3 hours

PREREQUISITE: COMM 1010.03 and COMM 1502.03; ECON 1101.03 and ECON 1102.03; MATH 1115.03 or MATH 1000.03

CROSS-LISTING: MGMT 2501.03

EXCLUSION: MGMT 1501.03 and MGMT 2502.03; MATH 1060.03 or MATH 2060.03; STAT 1060.03 or STAT 2060.03; ECON 2260.03; ENGM 2032.03

### COMM 2502.03: Statistics for Business II.

This class is a follow-up to COMM 2501.03. It concerns mostly the relationship of two or more measurements. Topics covered in detail are analysis of variance, simple and multiple regression, and time series. Statistical software is featured prominently throughout the class for statistical computations.

FORMAT: Lecture 3 hours

PREREQUISITE: COMM 2501.03 or MATH 1060.03 or STAT 1060.03 or ECON 2260.03

CROSS-LISTING: MGMT 2502.03

EXCLUSION: MGMT 1501.03 and MGMT 2502.03, MATH 2080.03, STAT 2080.03, ECON 2280.03

### COMM 2603.03: Legal Aspects of Business.

This class provides an appreciation of some of the legal problems that might be faced by the business community. It examines the meaning and sources of law, the machinery of justice, the law of torts, various aspects of the law of contracts and application of principles from equity, the law of agency, the law relating to the sale of goods, bailment, contracts of employment, negotiable instruments, real property, mortgages, partnerships, international transactions, corporations and secured transactions. Students must make extensive use of the law library in writing reports on a series of cases.

FORMAT: Lecture 3 hours

PREREQUISITE: At least second-year standing.

### COMM 2801.03: Work-Term One, Bachelor of Commerce Co-op.

Unless written permission is obtained, in advance, from the Commerce Program Manager, this must be done in the Winter term of the second year.

PREREQUISITE: At least 6 1/2 full credits, which must include COMM 1502.03, COMM 1710.03 and COMM 1720.03 plus at least 4 other full credits which must be in the Core Area (COMM, ECON 1101.03 and ECON 1102.03 and MATH 1115.03 or MATH 1000.03)

### COMM 3100.03: Financial Reporting and Statement Analysis.

This course is intended for non-accounting students. The approach is analytical rather than procedural, with an emphasis on a user perspective. Topics include analysis of financing, investing and operating activities, profitability, and credit risk. Accounting topics include pensions, inter-corporate investments, leases, earnings per share, and cash flow.

FORMAT: Lecture 3 hours

PREREQUISITE: COMM 1101.03 and 2102.03 or permission of instructor

EXCLUSION: COMM 3105.03 and COMM 3111.03

### COMM 3105.03: Intermediate Financial Accounting I.

This course and its follow-up, COMM 3111.03: Intermediate Financial Accounting II, are meant to provide a solid understanding of the corporate financial reporting model and related conceptual issues. The class develops expertise in financial reporting issues related to revenue and expense recognition and a wide range of asset accounting issues, including receivables, inventories, and capital assets.

FORMAT: Lecture 3 hours

PREREQUISITE: COMM 2101.03 and 2102.03 with an average of at least B-  
EXCLUSION: COMM 3100.03

### COMM 3111.03: Intermediate Financial Accounting II.

In conjunction with its prerequisite, Commerce 3105.03: Intermediate Financial Accounting I, this course is intended to provide an understanding of the corporate financial reporting model and related conceptual issues. The class will develop expertise in accounting and reporting issues related to liabilities and shareholders' equity, including complex debt and equity instruments, corporate income taxes, leases, pensions and other post-retirement obligations, earnings per share, and restatements.

FORMAT: Lecture/3 hours

PREREQUISITE: COMM 3105.03 with a minimum grade of C-

CROSS-LISTING: BUSI 6108.03

EXCLUSION: COMM 3100.03

### COMM 3114.03: External Auditing.

This course covers the theory and practice of public auditing according to generally accepted auditing standards (GAAS). The class emphasizes the recent harmonization with International Auditing Standards (IAS) and considers the forces impacting on the setting of standards and the current level of standards. This includes pronouncements of the accounting profession, reporting standards, professional ethics, statute laws, legal liability and responsibilities, audit planning, risk assessment, standards for examination of internal control in both manual and computerized environments, standards for the quality of evidence, statistical sampling and the sufficiency of evidence, documentation and working papers. The course considers typical audit programs for examination of financial statement elements and fraud awareness.

FORMAT: Lecture 3 hours

PREREQUISITE: COMM 3105.03 or COMM 3100.03 or permission of the instructor.

CROSS-LISTING: BUSI 6101.03

### COMM 3116.03: Cost Management.

The major objective of this course is to develop a deeper understanding of the key topics in cost/managerial accounting and their management control implications. The selected topics to be covered include costing systems, cost-volume-profit analysis, cost and profit variance analysis, control and performance evaluation in decentralized organizations. This class is intended primarily for students who plan to major in the accounting area.

FORMAT: Lectures/case discussions 3 hours

PREREQUISITE: COMM 1101.03 and 2102.03, with at least a B- average

### COMM 3203.03: Financial Institutions.

This class is designed to introduce students to the structure and operations of financial institutions and the role they play in the growth and operation of capital markets. The class content includes reviewing the operation and functioning of various types of financial institutions and their roles in the economy. An emphasis will be put on measuring different types of risks and methods for managing these risks for financial institutions, particularly the banks. The topics include (but are not limited to) interest rate risk management, credit risk management, liquidity risk management, market risk management, and so forth. The role of derivative securities in various hedging strategies will also be reviewed.

FORMAT: Lecture 3 hours

PREREQUISITE: COMM 2202.03 and COMM 2203.03

### COMM 3206.03: Investment and Money Management.

This class is designed to provide the students with an overview of current investment theories and their application to the real world. In particular, a considerable effort will be made to compare and contrast the activities of money managers with the ones that are suggested in various theoretical models. The intention is to provide our students with the needed skills to successfully face the challenging world of portfolio and money management.

FORMAT: Lecture/seminar 3 hours

PREREQUISITE: COMM 2202.03 and COMM 2203.03

### COMM 3207.03: Canadian Securities.

The topics covered in this class include an overview of capital markets and the financial services industry; financial statement analysis; an overview of the Canadian economy; fixed income securities; equity securities; investment funds; derivatives; security analysis; financing, listing and regulation; financial planning and taxation issues; and, portfolio management. Upon meeting the CSI's requirements, the student will earn the Canadian Securities Course designation.

NOTE: This course is offered via Distance Education. Students will have to register with the Canadian Securities Institute and will incur an additional fee.

PREREQUISITE: COMM 2202.03 or permission of instructor

EXCLUSION: COMM 3202.03

### COMM 3303.03: Introduction to Human Resource Management.

The role of human resource management and administration of the personnel function are analyzed, along with the major aspects of the personnel function: job analysis, human resource planning, recruitment and selection, training, performance appraisal, compensation, employment relations, and occupational safety and health. Knowledge and the processes is supplemented by the development of analytical skill in coping with various human resource problems and in the integration of the processes with the many other functions required in the organization. This "system and process" analysis builds upon the skill and knowledge acquired in COMM 2303.03.

FORMAT: Lecture 3 hours

PREREQUISITE: COMM 2303.03; or (MGMT 2303.03 and MGMT 2304.03)

### COMM 3307.03: New Venture Creation.

This class is about venturing - the process of creating new ventures in both the for-profit and not-for-profit environment. The target audience is students, in any discipline, who have the desire to venture. The class is designed to expose students to the issues, problems and challenges of creating new ventures and to provide students with the opportunity, within the framework of a formal class, to explore and develop venture ideas as they have been considering or wish to investigate. Experiential exercises enable the student to better understand themselves, their venture potential and the merits of their new venture ideas. A major field project requires the development of a detailed plan for the new venture.

FORMAT: Lecture

PREREQUISITE: COMM 1010.03 and COMM 2401.03, or permission from instructor

CROSS-LISTING: MGMT 3907.03

### COMM 3308.03: Managing the Family Enterprise.

Managing the Family Enterprise is about the special problems and issues that confront family businesses. It explores the family system, the business system, the ownership system and their interactions - functional and dysfunctional. Specific topics, examined from the family business perspective, include: the decision to join a family firm, management succession, ownership succession, the role of key non-family employees, strategic planning and other issues especially relevant for family firms. The class also addresses conflict and communication in the family and the business.

The class has two purposes. First, it provides an organized framework for students to understand the dynamics and special issues of family firms. Second, it is designed to allow students to explore their interest in joining a family firm.

Therefore, it is especially intended for students who come from families which are in business or for students considering joining a family business. Others who wish to explore a key segment of Canadian business are also welcome.

The class relies on field projects, guest speakers, case studies, videos, research papers and extensive class discussion to explore the territory of managing family businesses.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: COMM 1101.03 and COMM 3801.03, or permission of the instructor.

CROSS-LISTING: BUSI 6006.03

### COMM 3309.03: Management Skills Development.

This class will expose students to key knowledge, skills, and attitudes (KSAs) considered critical to managerial success. Such an exposure is designed to provide the students with behaviours to help ensure that, when managing human resources, staff will perform at or near peak capabilities. Topic areas include: understanding what the successful manager needs to know, understanding the personal self, communications, interpersonal negotiations, goal setting, managing innovation and change, handling conflict and anger, performance evaluation, counselling and feedback, and management attitudes needed for success.

Significant amounts of classroom time will be devoted to behaviour modelling exercises, role plays, case studies, and group discussions.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: COMM 2303.03, or permission of the instructor

EXCLUSION: MGMT 3309.03

### COMM 3310.03: Reflections on Leadership.

Course focuses on the study of leadership as a process of influencing people, rather than dealing with leadership at the organizational level. The class covers a study of existing and emerging theories of leadership and will offer students an opportunity to observe effective and ineffective leadership through case studies, films, and various exercises and readings. The parameters of ethical leadership will be emphasized.

PREREQUISITE: COMM 1010.03 and COMM 2303.03 or (MGMT 2303.03 and MGMT 2304.03)

### COMM 3401.03: Consumer Behaviour.

In view of the very competitive situation in modern business, the firm that is successful designs and sells products that meet the desires of specific consumer segments. Thus, analysis and prediction of consumer behaviour are increasing in importance and sophistication. An extensive body of research evidence from marketing and the behavioral sciences is explored and evaluated to assess the marketing implications of elements of consumer behaviour. Emphasis in class will be focused on how to incorporate an understanding of consumer behaviour into strategic marketing plans.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: COMM 2401.03

### COMM 3402.03: Marketing Communications.

This class is designed to provide students with an understanding of how the major types of marketing communication messages are created and delivered. This means students should come away knowing the strengths and weakness of the major marketing communication functions (e.g. advertising, public relations, direct response, sales promotion, social marketing, packaging, etc.) and the major media used by them. By the end of the course, the student will have the ability to:

(1) establish a knowledge base of researching and evaluating a company's marketing and promotional situations; (2) gain hands-on experiences in the creation of an integrated marketing communication campaign that impact customer relationships and brands; and (3) develop effective communication strategies and programs for real company situations. For those students who are not marketing majors, this class will also provide a basic understanding of persuasive skills which can be used no matter what vocation they choose in the future.

FORMAT: Lecture/case method/applied project work 3 hours

PREREQUISITE: COMM 2401.03

### COMM 3404.03: Marketing Research.

Students learn the scientific method in solving marketing problems and creating marketing intelligence from data. Emphasis is on planning and formulating research problems, research design, application of sampling methods, and analysis of data collected. The class uses cases and a real world project to hone skills needed for a wide range of marketing positions in industry.

FORMAT: Lecture/discussion 3 hours and three or four 1.5 hour tutorials early in the semester.

PREREQUISITE: COMM 2401.03 and COMM 2502.03

### COMM 3405.03: Export Marketing.

The class will discuss reasons why Canadian companies get involved in exporting, and will focus on the development of marketing plans for the export of Canadian goods and services. Also discussed will be barriers faced by companies engaging in international trade, and government agencies providing support services to facilitate international transactions. Students will be responsible for completing an export marketing plan for a local company.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: COMM 2102.03 and COMM 2401.03

### COMM 3407.03: Logistics & Supply Chain Management.

An examination of the decisions faced by managers within the supply chain: the channels of distribution, the transportation and storage of products/services, and the communications and data processing systems, in order to minimize the total cost of these activities and satisfy the marketing requirements of the firm and its customers. Topics include: the integrated logistics & supply chain management concept, customer service, transportation, distribution centres, inventory management, materials management, packaging, purchasing, order processing and

information systems, financial control, logistics organization, international logistics, reverse distribution and recycling, and the strategic logistics supply chain plan.

PREREQUISITE: COMM 3801.03

### **COMM 3408.03: Transportation Modes and Policy.**

This class will introduce the student to the business of managing a transport enterprise. It will focus on understanding the regulatory (policy) environment and customer requirements prior to exploring operational considerations across a number of transport modes. The intent will be to explore the impacts of policy and modal structure on marketing the transportation company and structuring it for growth. The class is suitable for students wishing to work in the transport industry, in the supply chain activities of a transport customer or, tangentially, in the strategic management of any service business.

FORMAT: Lecture/case method 3 hours

PREREQUISITE: COMM 2401.03

### **COMM 3409.03: Personal Selling and Sales Management.**

This class is designed to provide an understanding of the tasks and problems facing today's sales professionals and sales managers and to familiarize one with current personal selling and sales force management practices. Specifically, this class provides an exposure to personal selling concepts, techniques and procedures used in buyer-seller relations such as prospecting, sales call planning, negotiation skills, overcoming obstacles, persuasion and closing skills. It also covers sales management topics including the organization of the sales force, personnel management, selection, sales training, motivation, compensation, evaluation and supervision, budgets, quotas, territories and sales control. Sales role-plays, mock sales presentations, case studies and classroom discussion are used to extend the basic text material and examine other points of view.

FORMAT: Lecture/case method/field work 3 hours

PREREQUISITE: COMM 2401.03

### **COMM 3410.03: Services Marketing.**

Intangible services play an increasingly important role in the global economy, and most especially in the economies of developed countries. Yet, business school curriculae have customarily emphasized the marketing of tangible products in consumer and industrial markets. A basic premise of the elective class is that services (versus tangible goods) share a number of attributes that present unique challenges for marketing.

The class seeks to prepare students to face those challenges. It is ideal for students who wish to work in a service industry (e.g., banking, insurance, travel, hospitality, consulting) or in a service capacity in the manufacturing sector (e.g., sales, customer relations).

Emphasis will be placed on understanding the distinctive characteristics of services, the implications of these distinctions for marketing, the role of service quality as a determinant of customer satisfaction, and the measurement of these phenomena. Examples will be drawn from North American and European service industries.

PREREQUISITE: COMM 2401.03

### **COMM 3411.03: Direct Marketing.**

The focus of marketing has shifted from the use of advertising, promotion and long distribution channels to more direct forms of communication and distribution. These changes have been a result of the traditional power struggle among channel members and the manufacturers of products and services, where manufacturers have sought to maintain direct contact with their customer. The move toward direct marketing is fueled today largely by technological developments in database storage and mining, the development of relationship marketing, and the introduction of new media such as the Internet.

The skills required in direct marketing are in strong demand within the Canadian economy. This class focuses on the development of a direct marketing strategy that requires an understanding of the tools of direct marketing, the creative process, and how direct marketing fits into the total marketing strategy.

This is a very applied class that will have guest speakers and industry projects. It is designed to complement the Marketing Informatics class that focuses more on the total information needs, acquisition and usage within a firm for purposes of marketing.

PREREQUISITE: COMM 2401.03 and COMM 3801.03

### **COMM 3412.03: Internet Marketing.**

As more business is conducted online, it is important that marketers understand technology developments and their impact. That is the goal of this course. It begins by developing a framework so that the forces driving use of the Internet in marketing and business are understood. With this foundation in place, a series of

online marketing themes are explored, including such topics as customer support and online quality; personalization; and traffic and brand building. Finally, a series of problem areas will be explored such as distribution channel conflicts and legal problems.

FORMAT: Lectures/discussions/group projects

PREREQUISITE: COMM 2401.03

### **COMM 3501.03: Production/Operations Management.**

"Production" is one of the basic functions of any organization, whether it provides goods or services. Consequently, all managers, whatever their specialist interests, should have an understanding of some of the key concerns in managing operations, particularly if they aspire towards senior/general management positions. The purpose of this class is to provide such an understanding. It begins at a basic level by examining various types of production processes and continues by considering key aspects of inventory, supply chains and quality assurance. It concludes by examining production planning and strategy.

NOTE: MGMT 3501.03 will not be counted in the Commerce program

FORMAT: Two 1.5 hour lectures (or case discussions)

PREREQUISITE: COMM 2203.03, COMM 2303.03, COMM 2401.03, and COMM 2501.03

EXCLUSION: MGMT 3501.03 (MGMT 3501.03 will not be counted in the Commerce program)

### **COMM 3511.03: Management Information Systems.**

Information is a key resource for businesses, other organizations, and professionals in both the contemporary and emerging worlds. Innovative uses of information are often keys to survival in an increasingly competitive economy. In addition, information systems account for an increasing larger share of assets in most organization. The ability to harness and manage information resources and information technologies demands a sound understanding of a broad range of concepts, terms, and challenging issues in a constantly evolving context. This class is designed to help students acquire the essential skills and conceptual background to become an effective client, user, and planner of Management Information Systems. It will help students develop a broad understanding of how information systems are used in organizations, the technologies that influence their use, how they need to be managed, and the impact that they can have on organizations' and professionals' competitive positions.

PREREQUISITE: COMM 1010.03, COMM 1502.03

### **COMM 3801.03: Work-Term Two, Bachelor of Commerce Co-op.**

Unless written permission is obtained, in advance, from the Commerce Program Manager, this must be done in the Fall term of the third year.

PREREQUISITE: At least 9 full credits earned, including COMM 2801.03 and at least 7 ½ other credits in the Core Area (Commerce, ECON 1101.03 and ECON 1102.03, MATH 1115.03 or MATH 1000.03, PHIL 2081.03)

### **COMM 3802.03: Work-Term Three, Bachelor of Commerce Co-op.**

Unless written permission is obtained, in advance, from the Commerce Program Manager, this must be done in the Summer term of the Third year.

PREREQUISITE: At least 11.5 full credits earned, including COMM 3801.03 and at least 10 other credits in the Core Area (Commerce, ECON 1101.03 and ECON 1102.03, MATH 1115.03 or MATH 1000.03, PHIL 2081.03)

### **COMM 4000.03: Directed Reading and Research.**

This class offers the student the opportunity to explore in greater detail a particular area of interest. The content of the class is negotiated with the individual instructor involved. The student and instructor must develop a proposal, and submit it to the Curriculum Committee for approval. Guidelines are available from the Undergraduate Advising Office, Suite 2086, Rowe Building.

### **COMM 4101.03: Advanced Topics in Accounting I.**

This course provides a theoretical framework for the study of accounting policy. Case analysis is an integral part of the course. Topics covered include accounting policy choice in a dynamic framework, partnerships, standard setting, not-for-profit accounting and fund accounting. As well, the class may consider various practical and theoretical topics, and current topics, as appropriate.

FORMAT: Lecture 3 hours

PREREQUISITE: COMM 3105.03 and COMM 3111.03, or permission of the instructor

CROSS-LISTING: BUSI 6110.03

EXCLUSION: COMM 3113.03

**COMM 4102.03: Advanced Topics in Accounting II.**

This course provides an in-depth study of the interrelated topics of intercorporate investments, business combinations, consolidated financial statements, foreign currency transactions and foreign operations. The class also covers segmented reporting and bankruptcy.

FORMAT: Lecture 3 hours

PREREQUISITE: COMM 3105.03 and COMM 3111.03, or permission of the instructor

CROSS-LISTING: BUSI 6109.03

**COMM 4103.03: Management Accounting Seminar.**

Topics in this class are of interest to students who are planning to pursue a career in managerial accounting. The class will explore ethics in the management accounting profession, governance and risk assessment. A major focus is internal audit, along with various product and process design and management issues, combined with quantitative techniques to assess risk and uncertainty. The class also is concerned with government reporting and analysis issues, supply chain issues, and special topics as warranted. The class will follow a seminar format, including presentations and case analysis.

FORMAT: Lecture 3 hours, with significant emphasis on student presentations

PREREQUISITE: COMM 3116.03

**COMM 4112.03: Accounting Research.**

This class considers the fundamental issues of financial reporting, establishing the reasons that accounting is valuable, and how financial reporting can best describe the economic value and economic performance of enterprises. Topics include accounting under ideal conditions, complications caused by information asymmetry, including adverse selection and moral hazard, challenges in the decision-based models of accounting information users, standard setting frameworks and mechanisms and governance and social responsibility implications of reporting issues. The class will follow a seminar format, including presentations and analysis of current events. Students will be required to formulate a research proposal as a major class deliverable.

FORMAT: Lecture 3 hours, with significant emphasis on student presentations.

PREREQUISITE: COMM 2102.03, COMM 3105.03, COMM 3111.03

**COMM 4120.03: Taxation.**

An introduction to the taxation system in Canada, with special reference to the provisions of the Income Tax Act and their effects on business decisions. The measurement processes used to determine the tax base are examined, and the basic elements in the calculation of tax payable for individuals and corporations are discussed.

FORMAT: Lecture 3 hours, with significant effort directed to the solving of short case problems.

PREREQUISITE: COMM 1101.03 or MGMT 2101.03; ECON 1101.03 and ECON 1102.03

CROSS-LISTING: BUSI 6102.03

**COMM 4121.03: Advanced Taxation.**

The class involves analysis of income tax in Canada. The class is a follow-up class to COMM 4120.03, and accordingly revisits certain aspects of corporate tax structure. Integrative exercises are used to accomplish this objective. In addition, specialized topics including rollovers, taxation of partnerships, trust and estate tax issues, GST/HST tax systems and various current topics are included in the course.

FORMAT: Lecture 3 hours, with significant effort directed to the solving of short case problems.

PREREQUISITE: COMM 4120.03

**COMM 4201.03: International Financial Management.**

The purpose of the class is to present some techniques which have been developed to help managers manage sets of cash flows of different currencies. The first section of the class is a description of the financial transactions associated with international trade. Some models dealing with the interaction between international trade and currency prices are described. The second section of the class examines properties of currency exchange rates. It presents models for forecasting exchange rates and describes the economic justifications for the models, the arbitrage opportunities presented by the models, and practical limitations of the models. The third section presents models for assessing foreign exchange risk: so-called transaction, economic, and translation exposure. Implications for the operation of the firm subject to the different types of foreign exchange exposure are also presented. Some implications of international equity investments will also be presented. The fourth section examines techniques for hedging foreign exchange risk. Foreign exchange derivative products, such as

forward contracts, futures contracts, call and put options, and currency swaps are examined.

PREREQUISITE: COMM 2202.03 and COMM 2203.03

**COMM 4202.03: Derivatives.**

This class is an introduction to derivatives and the main applications of derivatives for both investment purposes and corporate finance use. As an introductory or first class in derivatives, the goal is to cover the central concepts and issues that will permit the student to start using the products and understanding the main advantages, as well as the issues with derivative transactions. The class covers both quantitative pricing issues, as well as the many practical qualitative issues involved with the use of derivatives. Students should be comfortable with basic statistics and algebra. Knowledge of calculus is not required for this course. Students should also be comfortable with Excel spreadsheets and basic Excel mathematical functions.

PREREQUISITE: COMM 2202.03 and COMM 2203.03

**COMM 4240.03: Advanced Corporate Finance.**

This class will help students learn to apply fundamental ideas of corporate finance to real-life problems of business valuation and financial decision. Topics that will be discussed include valuation, mergers and acquisitions, financial distress, capital structure, payout policy, securities issuance, and corporate governance. The class builds on concepts and techniques that students have learned in finance, accounting, statistics, and economics. Case studies will be used to bridge the gap between finance theory and its applications to practical problems in corporate finance.

PREREQUISITE: COMM 2202.03 and COMM 2203.03

**COMM 4250.03: Theory of Finance.**

This class is designed to complement other finance courses that have been previously offered to finance majors. It covers core theory of capital markets and corporate finance. Topics include functions and operations of capital markets, analysis of consumption-investment decisions, diversification and portfolio selection, valuation theory and equilibrium pricing of risky assets, and investment and financing decisions of firms. Theoretical foundation for further study and practical applications will be emphasized.

FORMAT: Seminar 3 hours

PREREQUISITE: COMM 3206.03

CROSS-LISTING: BUSI 6250.03

**COMM 4301.03: Managing the Venturing Process.**

Managing the Venturing Process is a capstone class that explores the strategic elements required to venture successfully. Delivery is in a seminar format with students taking significant responsibility for their own learning. The constructs of venture stage, venture process and venture context are used to frame the discussion and a simulation (capstone) is used as a practical way for students to build competence in managing a large venture strategically.

PREREQUISITE: COMM 3307.03 or MGMT 3907.03, or permission of instructor

CROSS-LISTING: MGMT 4901.03

**COMM 4306.03: Organizational Change, Theory and Design.**

This class will provide students with an understanding of contemporary organizational theories relating to organizational structure, design and change.

The main thrust of the class will be a practical analysis of why organizations change, why organization/structures evolve and the impact of change on individuals. The objective of the class is for students to fine-tune those analytical and decision-making skills necessary for the effective introduction of change into complex organizations.

NOTE: This class replaces COMM 4305.03

PREREQUISITE: COMM 2303.03 (or COMM 2301.03) and COMM 3309.03

EXCLUSION: COMM 4305.03, COMM 4302.03, MGMT 3320.03

**COMM 4315.03: International and Intercultural Management.**

This senior level class is designed to provide students with the knowledge and skills necessary for effective membership and management in global as well as culturally diverse domestic workplaces. The growing importance of international business and escalating levels of involvement in global competitiveness necessitates that the manager of the 21st century acquire additional skills and abilities for effective international and intercultural interactions at home and abroad.

The course content includes such topics as: introduction to comparative and cross-cultural management, variations on cultural orientations and value, cross-cultural

communications, employee attitude, motivational issues in cross-cultural settings, training for international assignments, cross-cultural staffing, inter-cultural negotiations, leadership and gender differences, ethics and social responsibility, expatriation and repatriation management, and designing global structure.

RECOMMENDED: COMM 3303.03 and COMM 3309.03

FORMAT: Lecture 3 hours, cases, exercises

PREREQUISITE: COMM 2303.03

### COMM 4340.03: Corporate Governance.

The central focus of corporate governance is the relationship between the top management team (TMT), the board of directors (BoD), and other stakeholders, especially stockholders. The collapse of once successful, large corporations across the globe illustrates the frankishness of their board members and the degree of their lack of concern for stockholders' interests. The reputation of audit and consulting companies associated with these ill-fated corporations suffered a great setback, leaving stakeholders wondering whom to trust to safeguard their interests.

Students will take an in-depth look at the corporate governance triad, as indicated above, that controls the modern corporation. Accordingly, this course will deal with the control, composition, functions, roles, and structure of boards; board responsibility and accountability; CEO tenure and compensation, shareholder and other stakeholder representation; corporate board's vis-à-vis social responsibility and ethics; and comparative corporate governance across North America, Europe, and selected Asian countries.

FORMAT: Lecture

PREREQUISITE: COMM 4351.03

### COMM 4351.03: Competitive Strategy.

Competitive Strategy focuses on how a firm competes at various levels; that is, functional, business, corporate, and international. The class is designed to analyze the sources of competitive advantage among firms and to develop knowledge and skills necessary for effectively analyzing and formulating strategy. Accordingly, the class examines the role of the general manager in the organization; environmental and industry factors; organizational resource and capability constraints; the creation of value through functional-, business-, and corporate-level strategies, and, finally, how an organization leverages its resources and capabilities to extend its product and geographic scope internationally. Building upon this foundation, students will practice formulating well thought-out strategy recommendations that are specific and actionable. Throughout the term, students will be exposed to a wide variety of organizations through readings, case studies, and experiential exercises.

PREREQUISITE: At least 12.5 full credits earned, including COMM 3802.03 and at least 9 other full credits in the core area (Commerce, ECON 1101.03 and ECON 1102.03, MATH 1115.03 or MATH 1000.03, PHIL 2081.03 are core area courses)

EXCLUSION: MGMT 4001.03

### COMM 4352.03: Strategic Management.

Strategic Management builds on COMM 4351.03: Competitive Strategy. After conducting a brief review of the external environment faced by the organizations, the focus of this capstone class turns to the examination of the internal workings of an organization. More specifically, this class is about the general manager's task of implementing competitive strategy and managing strategic changes. This class is integrative, as it deals with the organization as a holistic entity.

In COMM 4352.03, various pedagogical methods are used to develop and enhance your analytical, writing, and presentation skills required in today's business environment. It also emphasizes analytical tools and conceptual frameworks that aid in the development of judgment. Although it draws on specific concepts, tools, and techniques from other core courses in the Bachelor of Commerce program, its basic purpose is to sharpen students' expertise and skills at developing judgments to help guide managerial actions in the face of uncertainty and complexity. Therefore, students are strongly encouraged to leverage and apply those concepts, tools, and techniques in this course.

PREREQUISITE: COMM 4351.03

EXCLUSION: MGMT 4002.03

### COMM 4401.03: Marketing Strategy.

This class is intended for marketing majors who wish to deepen their understanding of how marketing strategy is formulated and implemented. This involves high-level, long time-frame decisions, since the product and market strategies are at issue. The class aims to improve decision-making skills in managing product/market portfolios and implementing marketing strategies. As a capstone course, it is designed to permit the integration of learning from other marketing courses. Instruction is mostly through case study discussions, report writing, and group presentations.

FORMAT: Seminar 3 hours

PREREQUISITE: Prerequisites for major in Marketing Logistics: COMM 2401.03, COMM 3404.03 and COMM 3407.03 with an average of at least B- in these three courses.

Prerequisite for Major in Marketing Management: COMM 2401.03 and COMM 3401.03 and COMM 3404.03 with an average of at least B- in these three courses

### COMM 4413.03: Marketing Informatics.

Marketing Informatics is an applications, not theoretical based class that provides the student with skills applicable to a wide range of marketing positions within an organization. It provides the student with the ability to analyze large data sets generated internally through customer accounts (for communications, retail and utility companies) and through loyalty programs offered by most service and retail organizations.

Following on what was learned in COMM 3404.03: Marketing Research, the student conducts segmentation analysis, and develops predictive models using Excel, Access and industry standard statistical software. The class works with an industry client who supplies a data set for analysis. The emphasis is on the student developing real world skills and many of those who have attended this class in the past have found exciting careers as market analysts in firms across Canada.

FORMAT: Lecture/discussion 3 hours and three or four 1.5 hour tutorials early in the semester

PREREQUISITE: COMM 2401.03 and COMM 3404.03

### COMM 4510.03: Corporate Communication.

By the end of this course, students will have learnt about various communication strategies adopted and deployed by corporations. Students will have competently demonstrated their ability to devise a corporate communications portfolio for stakeholders they will adopt in particular case scenarios. This portfolio will include formulating & delivering internal and external communications, developing and authoring press releases, creating a strategy document for managing press conferences and media relations, creating a post-incident marketing campaign, and writing incident and preliminary investigative reports (with financial and accounting analysis as evidence where available). Student teams will then make team presentations to possibly hostile audiences, and outline how to manage internal and external public relations, both day-to-day and in crisis conditions.

PREREQUISITE: COMM 1710.03, COMM 1720.03 and COMM 2303.03, OR MGMT 2304.03 and MGMT 3602.03

### COMM 4511.03: Business Process Integration using ERP Systems.

Enterprise Systems are comprised of a unified database with shared analysis and reporting tools allowing for real time business intelligence across global operations. Emphasis in this class is equally on learning business processes and integration between different functional areas as it is about the technology that facilitates this. This class will be taught in the teaching labs with a combination of individual and group simulations interspersed with short lectures.

An active learning approach in this class will include hands-on learning using SAP ERP, as well as ERPSim, a game-based SAP ERP simulation. Here you will learn to manage companies from end-to-end using the actual SAP ERP in a real-time simulated competitive environment and will learn the processes, gain technical skills with SAP and playfully learn how Enterprise Systems facilitate Business Intelligence which can be used to lead a company in a competitive environment.

PREREQUISITE: COMM 3501.03 and COMM 3511.03

### COMM 4523.03: Project Management.

This course provides an introduction to principles, concepts, and software applications as well as an actual experience of project management in a practical project team setting. The course also introduces theories and practices of project management as related to project objectives, lifecycle stages, and control variables such as time, cost, and scope. Students will gain insight into the realities of managing a project and will learn to adapt to varying financial, political and cultural challenges encountered within project teams and organizations.

PREREQUISITE: COMM 3501.03

CROSS-LISTING: MGMT 4333.03

### COMM 4538.03: Applied Multivariate Analysis.

The convenience of packaged statistical programs (e.g. SPSS) has opened the area of data analysis to researchers with a wide variety of backgrounds. Since it is possible to operate "canned" programs without understanding advanced mathematics, there is a need for a class that introduces the user to the concepts underlying the techniques. Students use and interpret statistical programs with

data sets from such business areas as marketing, finance and organizational behaviour.

PREREQUISITE: COMM 1502.03, and MATH 1115.03 (or MATH 1000.03), and COMM 2502.03, or permission of instructor

CROSS-LISTING: BUSI 6504.03

### **COMM 4701.03: International Business Strategy.**

The objective of this class is to help the students understand why firms expand overseas and how foreign operations differ from domestic ones. It provides the students with the necessary knowledge for a career or further study in international business. The class introduces the basic concepts of international business from a manager's perspective. It examines the issues and problems that arise when business operations extend across national boundaries and become international in scope or character. The emphasis is two-fold. First, consideration is given to the characteristics and contemporary dynamics of the world economy. Second, analysis is made of the development of the multinational firm and of the adaptation of the basic managerial functions due to internationalization. The class orientation is pragmatic and managerial. Through case studies, class discussions, assigned readings, and lectures, the students are expected to develop the skills for analyzing situations and formulating solutions in an international business context.

PREREQUISITE: COMM 3802.03 or MGMT 4001.03

EXCLUSION: COMM 3701.03

### **Faculty**

Faculty are drawn from all four Schools that comprise the Faculty of Management: Business Administration, Information Management, Public Administration, and Resource and Environmental Studies.

## **I. General**

The Faculty offers a curriculum of undergraduate and graduate studies designed to prepare students for careers in the fields of business, public administration, environmental and information management.

The undergraduate management degree includes studies from the humanities and social sciences as well as in the functional areas of management.

In co-operation with the School of Health and Human Performance, the Faculty also offers a combined, five-year program in which the student receives both degrees upon graduation. Please refer to Faculty of Health Professions on page 403 for more information on the Bachelor of Science (Recreation)/Bachelor of Management.

## **II. Bachelor of Management**

The Bachelor of Management provides undergraduate education in the management of organizations and human activities, in public sector management, environmental management, information management, and enterprise management.

This degree recognizes that managers work and move across borders between these sectors of management. Drawing of faculty from all four schools in the Faculty of Management, the program recruits students locally, nationally and internationally.

### **The objectives of the Bachelor of Management program are to:**

- Develop students' knowledge of key concepts and issues that arise in formulating and implementing strategy in organizations.
- Develop students' analytical and decision making skills.
- Develop students' teamwork and communication skills.
- Develop students' awareness of their strengths, career aspirations and personal goals.
- Prepare students to graduate with management skills that can be applied in general management, information management, environmental management, public sector management, not-for-profit management, and enterprise management.

## A. Degree Requirements

- Four year program
- Total credits required - 20
- Required GPA for graduation - 2.00
- Required core area classes - 10.5 credits:
  - ECON 1101.03
  - ECON 1102.03
  - MGMT 1000.03
  - MGMT 1001.03
  - MGMT 1501.03
  - MGMT 1601.03
  - MGMT 1702.03
  - MGMT 2101.03
  - MGMT 2303.03
  - MGMT 2304.03
  - MGMT 2401.03
  - MGMT 2402.03
  - MGMT 2601.03
  - MGMT 2702.03
  - MGMT 2801.03
  - MGMT 2803.03
  - MGMT 3201.03
  - MGMT 3501.03
  - MGMT 3602.03
  - MGMT 4001.03
  - MGMT 4002.03
- Required Management electives
  - three half credit classes in management electives are required
  - one full credit Writing Class (see Section C.)
- Open Electives
  - seven full credits (14 half credits), chosen from all classes offered in the University
  - A maximum of three full credit (six half credits) classes at the 1000 level is permitted.
  - A maximum of three full credit (six half credits) classes in Commerce is permitted.
  - Strongly advise students to choose a class in ethics (e.g., PHIL 2081 Business Ethics, PHIL 2485 Technology and the Environment).

## B. Program Guide

Students will normally follow the classes as listed in the table below:

Year	Fall Sept - Dec (A)	Winter Jan - Apr (B)
Year 1	Writing Requirement ECON 1101.03 MGMT 1000.03 MGMT 1601.03 or MGMT 1501.03 Open Elective.03	Writing Requirement ECON 1102.03 MGMT 1001.03 MGMT 1501.03 or MGMT 1601.03 MGMT 1702.03
Year 2	MGMT 2101.03 MGMT 2303.03 MGMT 2801.03 MGMT 2401.03 Open Elective.03	MGMT 2601.03 MGMT 2304.03 MGMT 2803.03 MGMT 2402.03 MGMT 2702.02
Year 3	MGMT 3201.03 MGMT Elective .03 or MGMT 3602.03 Open Elective .03 Open Elective .03 Open Elective .03	MGMT 3602.03 or MGMT Elective.03 MGMT 3501.03 MGMT Elective .03 Open Elective .03 Open Elective .03
Year 4	MGMT 4001.03 MGMT Elective .03 Open Elective .03 Open Elective .03 Open Elective .03	MGMT 4002.03 Open Elective .03 Open Elective .03 Open Elective .03 Open Elective .03

## C. Writing Class

One of the first five credits chosen should be selected from a list of classes in which written work is considered frequently and in detail. These writing classes are approved by the Writing Across the Curriculum committee and are listed on page 131 of the academic calendar.

Classes which satisfy the Writing Requirement are identified by the following symbol and notation in their formal description:

✍ Writing Requirement

## D. Combined Degree

The School of Health and Human Performance and the Faculty of Management offer a five-year program in which a student graduates with both degrees, Bachelor of Science (Recreation)/Bachelor of Management. Please consult the School of Health and Human Performance in the calendar (page 403) for more information.

## E. Majors

During their fifth, sixth, seventh and eighth academic terms, students can either pursue a general program of study, by choosing electives from a wide range of the functional areas, or they can follow a more specialized program, taking their elective classes towards a major. Seven interdisciplinary thematic majors are available to students who focus their studies in specific aspects of management.

### Entrepreneurship and Innovation Major

#### Required Classes

- MGMT 2102.03: Managerial Accounting
- MGMT 3907.03/COMM 3307.03: New Venture Creation
- COMM 3308.03: Managing the Family Enterprise
- MGMT 3309.03: Management Skills Development
- MGMT 4901.03: Managing the Venturing Process [capstone]

### Leadership and Organization Major

#### Required Classes:

One of:

- SOSA 1100.06: Introduction to Anthropology
- SOSA 1200.06: Introduction to Sociology
- PSYO 1011.03/1012.03: Introduction to Psychology and Neuroscience I and II
- PSYO 1021.03/1022.03: Introduction to Psychology and Neuroscience I and II

#### Plus:

- MGMT 3309.03: Management Skills Development
- COMM 3310.03: Leadership and Strategic Change
- MGMT 3320.03: Organizational Theory
- MGMT 4309.03: Strategic Leadership [capstone]

### Management and Globalization Major

#### Required Classes:

- One full credit from second-year Political Science
- COMM 4315.03: International/Intercultural Management
- COMM 4701.03: International Management Strategy [capstone]

### Public Sector Management Major

#### Required Classes:

- MGMT 2502.03: Statistics for Managers II
- MGMT 3810.03: Government Policy towards Business
- MGMT 3802.03: Public Policy
- ECON 2216.03: Economics of Global Warming or ECON 2217.03: Women and the Economy

### Knowledge Management Major

#### Required Classes:

- MGMT 3601.03: Information in a Networked World
- MGMT 3603.03: Beyond Google
- MGMT 4601.03: Advanced Knowledge Management [capstone]
- MGMT 4540.03/INFO 6540.03: Database Management Systems or INFX 2640.03: Use and Design of Databases

### Sustainable Resources and the Environment Major

#### Required Classes:

- MGMT 3701.03: Resource/Environment Problem-Solving 1: Sustainable Ecosystems
- MGMT 3702.03: Resource/Environment Problem-Solving 2: Sustainable Industries
- MGMT 2502.03: Statistics for Managers II
- MGMT 4701.03: Advanced Resource/Environmental Management 1
- MGMT 4702.03: Advanced Resource/Environmental Management 2

## Environment, Sustainability and Society

Location: College of Sustainability  
 Telephone: (902) 494-4581  
 Fax: (902) 494-1123  
 Email: sustainability@dal.ca  
 Website: http://www.ess.dal.ca

### Degree Programs

The College of Sustainability offers a Major in the BMgmt program. For complete details about the College, its programs and classes please see the College of Sustainability section on page 44 of the Calendar.

#### Required Classes:

- SUST 1000.06
- SUST 2000.06 or SUST 2001.06
- Three full credits from the Approved ESS Electives list: at least two of these credits must be above 2000 level, and at least two of these credits must be from outside MGMT

See the College of Sustainability on page 46 for class descriptions and the list of Approved ESS Electives.

## F. Majors - Electives

### Major in Entrepreneurship and Innovation

Students need three half credits from list. A minimum of one half credit from each of columns A and B.

Column A	Column B
COMM 2603.03 Legal Aspects of Business	ECON 2213.03 Economic Rise of China & India
COMM 3310.03 Leadership and Strategic Change	ECON 3310.03 Economics Growth in Historical Perspective
COMM 3401.03 Consumer Behaviour	ECON 3315.03 Labour Economics
COMM 3402.03 Marketing Communications	ECON 3319.03 Industrial Organizations
COMM 3404.03 Marketing Research	LEIS 4362.03 Recreational Entrepreneurship & Special Events
COMM 3409.03 Sales Management	MGMT 3810.03 Government Policy Towards Business
COMM 4120.03 Taxation	PHIL 2081.03 Ethics in the World of Business
MGMT 3902.03 Starting Lean	SOSA 3005.03 Knowledge, Work & Culture in the Contemporary World
MGMT 4333.03 Project Management	

### Major in Knowledge Management

Students need four half credits from list.

COMM 3511.03 Management Information Systems
CSCI 1107.03 Social Computing
INFX 2601.03 Information Security
MGMT 4300.03/INFO 6300.03 Information Resources in Government
MGMT 4370.03/INFO 6370.03 Records Management
MGMT 4611.03/INFO 6610.03 Information Policy
MGMT 4620.03/INFO 6620.03 Electronic Text Design
MGMT 4681.03/INFO 6681.03 Geospatial Information Management

### Major in Leadership and Organizations

Students need four half credits from list.

COMM 2603.03 Legal Aspects of Business
COMM 3303.03 Introduction to Resource Management
ECON 2217.03 Women and the Economy
ECON 2218.03 The Canadian Economy in the New Millennium: Economic Policy Debates for the Next Decade
ECON 3315.03 Labour Economics
ECON 3319.03 Industrial Organization

LEIS 3296.03 Leadership and Group Dynamics
MGMT 2102.03 Managerial Accounting
MGMT 3601.03 Information In a Networked World
MGMT 4333.03 Project Management
PHIL 2081.03 Ethics in the World of Business
PSYO 2080.03 Social Psychology
PSYO 2130.03 Introduction to Cognitive Psychology
PSYO 2770.03 Brain and Behaviour
SOSA 2002.06 The Sociological Perspective: Thinking and Doing Sociology
SOSA 3005.03 Knowledge, Work and Culture in the Contemporary World
SOSA 3060.03 Social Change and Development
SOSA 3165.03 People & Cultures/Area Study
SOSA 3206.03 Ethnicity, Nationalism, Race
SOSA 3284.03 Living Cities

### Major in Management and Globalization

Students need four half credits from list. A minimum of one half credit from each of columns A and B.

Column A International Development Focus	Column B International Business Focus
ECON 2213.03 Economic Rise of China & India	COMM 3405.03 Export Marketing
ECON 2334.03 Globalization & Economic Development	COMM 4201.03 International Financial Management
ECON 3317.03 Poverty and Inequality	ECON 2217.03 Women and the Economy
GWST 2217.03 Women and the Economy	ECON 2219.03 Euros and Cents
One of: INTD 2001.03 Introduction to Development I INTD 2002.03 Introduction to Development II INTD 3002.03 Introduction to Development IV	ECON 2239.03 European Economic History
INTD 2045.03 Indian Society: Continuity and Change	ECON 3326.03 Money and Banking
INTD 2106.03 Africa: An Introduction	ECON 3330.03 International Trade
INTD 3000 or above	ECON 3331.03 International Finance
INTD 3114.03 Environment and Development	GWST 2217.03 Women and the Economy
INTD 3115.03 Global Health	MGMT 2102.03 Managerial Accounting
MGMT 2102.03 Managerial Accounting	PHIL 2081.03 Ethics in the World of Business
PHIL 2475.03 Justice in Global Perspective	POLI 2300.06 Comparative Politics
POLI 2300.06 Comparative Politics	POLI 2520.03 World Politics
POLI 2520.03 World Politics	POLI 3321.03 Politics of the European Union
POLI 3360.03 Politics in Latin America	POLI 3544.03 Political Economy of South Africa
POLI 3385.03 Politics of the Environment	A minimum half credit language class (Arabic, Chinese, French, German, Greek, Italian, Latin, Russian, Spanish)
A minimum half credit language class (Arabic, Chinese, French, German, Greek, Italian, Latin, Russian, Spanish)	

### Major in Public Sector Management

Students need four half credits from list. A minimum of one half credit from each of columns A and B.

Students are strongly recommended to take a full credit of French or Spanish. Note that it is also possible to obtain a certificate of proficiency in French (see page 195) or Spanish (see page 316).

Column A	Column B
COMM 3511.03 Management Information Systems	CANA 2000.06 The Idea of Canada
ECON 2200.03 Intermediate Microeconomics	ECON 2216.03 Economics of Global Warming

ECON 3326.03 Money and Banking	ECON 2217.03 Women and the Economy
ECON 3330.03 International Trade	ECON 2218.03 The Canadian Economy in the New Millennium
ECON 3500.03 Public Economics	HIST class 2000 or above
MGMT 2102.03 Managerial Accounting	LAW 2500.06 Introduction to Law
MGMT 4300.03/INFO 6300.03 Information Resources in Government	PHIL 2020.03 Legal Thinking
	PHIL 3211.03 Philosophy of Law
	POLI 2210.03 Unity and Diversity: The Dynamics of Canadian Federalism
	POLI 2300.06 Comparative Politics
	POLI 3208.03 Canadian Provincial Politics
	POLI 3224.03 Canadian Political Parties
	POLI 3231.03 Urban Governance in Canada
	POLI 3321.03 Politics of European Union
	SOSA 2002.06 The Sociological Perspective
	A minimum half credit language class (Arabic, Chinese, French, German, Greek, Italian, Latin, Russian, Spanish)

### Major in Sustainable Resources and the Environment

Students need three half credits from column A, B, or C.

Column A Policy Focus
ENVS 3200.03 Introduction to Environmental Law
MGMT 3802.03 Public Policy
MGMT 4039.03/ENVI 5039.03 Indigenous Peoples and Natural Resource Issues
MGMT 4205.03/ENVI 5205.03 Law and Policy for Resource and Environmental Management
MGMT 4500.03/ENVI 5500.03 Socio-political Dimensions of Resource and Environmental Management

PLAN 2001.03 Landscape Analysis
PLAN 3001.03 Landscape Ecology

## G. Minors

### For Bachelor of Management students

Bachelor of Management students can undertake a minor from various departments within the Faculty of Arts and Social Science, the Faculty of Science or the Faculty of Computer Science. They should consult advisors in those

faculties for the most current information on the requirements for particular minors.

#### Minor Subject Areas Faculty of Arts and Social Sciences

Chinese Studies  
Classics  
English  
Film Studies  
French  
Gender and Women's Studies  
History  
International Development Studies  
Philosophy  
Russian Studies  
Spanish  
Theatre

#### Minor Subject Areas Faculty of Science

Biology  
Earth Science  
Economics  
Mathematics  
Physics  
Psychology

#### Minor Subject Areas other Faculties

Journalism Studies  
Law and Society

### For students registered in the BA, BSc, Blnf and BCSc programs

The minor in management is available to students registered in the BA, BSc, Blnf and BCSc programs. The requirements are as for the appropriate degree program with completion of the following classes:

#### Required classes:

- MGMT 1000.03: Introduction to Management Issues I
- MGMT 1001.03: Introduction to Management Issues II
- ECON 1101.03: Micro Economics
- ECON 1102.03: Macro Economics
- MGMT 1501.03: Statistics for Managers

#### Any three half-credits chosen from:

- MGMT 2101.03: Financial Accounting
- MGMT 2303.03: People, work and organizations: Micro Organizational Behaviour
- MGMT 2401.03: Introduction to Marketing
- MGMT 2601.03: Knowledge Management
- MGMT 2702.03: Resource and Environmental Management
- MGMT 2801.03: Government Structure

Plus an additional two full credits of MGMT classes at or above the 2000 level.

## H. Optional Internship

The Bachelor of Management (BMgmt) internship is a minimum of 32 weeks (approximately eight months) of consecutive, full time work experience related to your studies. Internships can be at large multi-national corporations or small offices, at a not-for-profit organization or a government department. We will work with you to find the right internship for you.

Bachelor of Management students currently in the **second year** of their program are eligible to apply for the Internship Program. Please meet with your Program Administrator/Academic Advisor, Margie Muise (margie.muise@dal.ca) or Katie Haigh (katie.haigh@dal.ca) to discuss your course plan.

Acceptance to participate in the Internship Program will be assessed on the following criteria:

1. Completion of Application Form
2. Statement of Intent
3. Resume
4. GPA of 2.70 or higher in the two terms preceding application submission
5. Positive recommendations from references
6. Personal interview with Management Career Services (to be arranged once complete application is reviewed)

7. Full participation in the Internship Prep Seminar, MGMT 4895 (no credit value) which is held each fall

#### Internship Fee

Students accepted into the Internship Program are charged an Internship Fee. This fee is non-refundable after the deadline date provided by Management Career Services.

The Internship Fee covers:

Administration of the internship including, but not limited to:

- Job search assistance (cover letters and resume building, interview preparation and debrief, coaching for self-developed job search strategies)
- MGMT 4895, the Internship Prep Seminar
- Networking opportunities with employers (including special events, competitions, information sessions, corporate tours, mentoring, etc)
- Internship monitoring and mediation of unsatisfactory situations
- Post internship debrief
- Development of job opportunities
- Access to on-line job posting site and job posting administration
- Interview space and co-ordination
- Facilitation of job offers
- Tracking of eligibility and job search activity

### I. Career Development Fee

Bachelor of Management students have access to specialized career development services through the Management Career Services unit. This service is covered through the payment of a mandatory Management Career Services Fee. This fee is prorated for part-time students. The fee covers the following:

- Individual Resume and Cover Letter Reviews
- Career Related Workshops including: Winning Resumes, Effective Interviewing, Job Search Strategies and Networking
- On Campus Grad Recruitment
- Employer Information Sessions
- Special Events (i.e. Interview Competition, Recruiting Events such as Super Wednesday and Tap the Talent and Corporate Tours, both locally and in other cities)
- Strong Interest Inventory (career assessment tool)
- Bachelor of Management Internship Program Application Processing

Students have access to a Career & Recruitment Specialist within Management Career Services. There are six Career & Recruitment Specialists (CRS), each responsible for a specific area, and currently there are two CRS staff dedicated to work with Bachelor of Management students and are responsible for the administration of the optional internship program. Bachelor of Management students may also access another CRS if they require specific information on an area.

Career & Recruitment Specialists work with students individually or in group sessions to help with the following:

- Identifying student strengths, interests and priorities
- Helping students establish which career path and work environment is right for them
- Planning a job search strategy
- Writing effective resumes and cover letters
- Building and interacting with a network of contacts
- Preparing for interviews
- Providing support, advice and monitoring of the work term
- Providing job search assistance for graduating students

Career Recruitment Specialists can also guide students through a process that provides the ability and knowledge needed to develop their careers. These set of skills will serve students well now, and in the nearest future. It is also based on the principle that students are each best equipped to know what they want in their individual careers.

Career Recruitment Specialists are trained to mentor and guide students during the often frustrating time when students are trying to make career decisions and are searching for the right job. In typical situations, they assist by:

- Listening to students' ideas or concerns
- Providing feedback to help students gain insight
- Advising students on how to develop strategies
- Supporting and encouraging students to meet their individual goals.

## III. Class Descriptions

### MGMT 1000.03: Managing Organizational Issues I.

The course places management in its broadest context and helps students from diverse disciplines understand the complex social, economic, ecological, political and technological forces shaping 21st century leadership in the public, private and non profit sectors. Key themes explored in the course include systems thinking, values based approaches to management, and personal and professional development. We see those who successfully complete MGMT 1000/1001 as holistic, critical and strategic thinkers, acting with integrity to engage stakeholders, individually and in teams, to achieve personal, organizational and societal goals through interdisciplinary approaches. MGMT 1000/1001 graduates will possess the ability to think globally, strategically, boldly, holistically and inter-disciplinarily, while considering local ecological, economic and cultural differences.

EXCLUSION: HESA 4001.03

### MGMT 1001.03: Managing Organizational Issues II.

A continuation of MGMT 1000.03.

PREREQUISITE: MGMT 1000.03

EXCLUSION: ASSC 1100.03, SCIE 1100.03

### MGMT 1501.03: Statistics for Managers I.

An introduction to the principles and applications of statistics relevant to managers, with emphasis on making inferences based on observed data. Topics covered include descriptive statistics, probability, random variables, estimation, hypothesis testing and statistical software.

NOTE: Students enrolled in the Bachelor of Management must register for this class.

EXCLUSION: COMM 2501.03 and COMM 2502.03, MATH 1060.03 and MATH 2080.03 or STAT 1060.03 and STAT 2080.03, ECON 2260.03, ECON 2222.03

### MGMT 1601.03: Electronic Information Management.

This class will teach students how to use computer applications to structure and process data so that they may create and communicate information and knowledge, and it will teach them the role of business applications in the management environment. Students will master the word processing, spreadsheet, database, and presentation software in an integrated office suite. They will also learn to design and create web pages with html. It is strongly recommended that students complete this class in their first year of study.

NOTE: ASSC 1000 or CSCI 1200 will not be counted in the Bachelor of Management program

### MGMT 1702.03: Ecosystem Goods and Services.

The course explores the ecosystem goods and services on which our societies and economies depend, and the environmental basis of those goods and services. The course will cover the nature and function of: matter, energy, ecosystems, primary producers, natural resources, biodiversity, ecological footprints, and feedback loops; and their importance for managers.

EXCLUSION: MGMT 1700.06, ENVI 1100X/Y.06, ENVS 1000.06

### MGMT 2101.03: Financial Accounting.

This class focuses on the accounting principles used in the measurement and reporting of an organization's operating, financing and investing activities to the parties' external to that organization that have a need for this information. The organizational context includes business, government and not-for-profit settings. The coverage includes an examination of the accounting process, basic issues in financial reporting, the financial statement disclosure requirements, and techniques for analyzing the financial statements

PREREQUISITE: MGMT 1000.03, MGMT 1001.03, or professor approval

EXCLUSION: COMM 2101.03/COMM 1101.03

### MGMT 2102.03: Managerial Accounting.

This class examines how accounting can provide information to assist management in their planning, decision-making and performance evaluation activities -- whether for businesses, governments, not-for-profit organizations or special projects. Both qualitative and quantitative information supports this decision-making. Topics will include the understanding and determination of cost behaviours, an examination of the problems of tracing and allocating costs to the purpose(s) their incurrence was intended to serve, and the criteria for determining which costs are relevant to various types of decisions or areas of responsibility.

PREREQUISITE: MGMT 2101.03

EXCLUSION: COMM 2102.03

## MGMT 2104.01: Public Sector Financial and Managerial Accounting.

This is required for all students who have completed COMM 2101.03 or COMM 1101.03. It covers the components that are covered in the MGMT classes and absent from typical private sector accounting classes.

PREREQUISITE: COMM 2101.03 or COMM 1101.03

## MGMT 2303.03: People, Work, and Organizations: Micro Organizational Behaviour.

Organizational behaviour and the study of work organizations and management draw on a number of disciplines within social sciences to help us to understand and make sense of individual behaviour and human action in groups and organizations. Through a combination of individual and group work and a blend of classroom based activities supplemented by additional resources and materials available via BLS, this class will explore concepts and theories relating to micro aspects of organizational behaviour. Topics include: individual motivation, personality, perception, attitudes and values, and the relationships between individual choices and actions. Links will also be made to practice and processes in organizations (for example: rewards, appraisal, feedback and organizational commitment).

PREREQUISITE: MGMT 1000.03 and MGMT 1001.03

EXCLUSION: COMM 2303.03

\*Students who have taken COMM 2303.03 Introduction to Managing People are currently required to take MGMT 3309.03 (Management Skills Development) for full exclusion to MGMT 2303.03 and MGMT 2304.03.

## MGMT 2304.03: People, Work and Organizations: Macro Aspects of Organizational Behaviour.

Mgmt 2304.03 builds on the concepts and principles identified in Mgmt 2303.03. This course takes a macro perspective that will consider the relationships between structural, cultural, social, economic and political factors and managing and organizing work. Topics include: organizational structure and processes; leadership, power and politics; organizational cultures, processes of organizational change, and legal and ethical issues and frameworks. To achieve a balance between theoretical and practical learning, the teaching methods will combine mini-lectures with in-class/on-line exercises, cases, presentations and group facilitated discussions.

PREREQUISITE: MGMT 2303.03 or equivalent: MGMT 2304.03 is a continuation of MGMT 2303

EXCLUSION: COMM 2301.03/2302.03, COMM 2303.03\*, COMM 3301.03 and MGMT 2301.03

\* Please note: where a student is transferring from Commerce to Management and has taken COMM 2303.03, they will need to take the complementary course MGMT 3309.03 (Management Skills Development) to receive full credit for MGMT 2303.03 and 2304.03.

## MGMT 2401.03: Introduction to Marketing.

The objective of this class is to familiarize you with marketing's mode of inquiry—the way marketers look at the world. As a marketer you should be able to: 1) ask the right questions about markets; 2) organize data into relevant information; 3) discover market opportunities; 4) set goals; 5) create a marketing plan that includes clear target markets, as well as product, price, distribution and communication strategies; and 6) implement and control a marketing program. Students work in groups and run a business in an online marketing simulation. This provides students with hands-on group decision making and data analysis skills, and they are specifically responsible for making product, pricing, promotion and placement strategies for a brand or group of brands. The class will also train students in a number of skills that are necessary for higher level classes and career advancement (i.e., case analysis and analytical report writing).

NOTE: Students enrolled in the Bachelor of Management must register for this class under its MGMT designation. Only students enrolled in the Bachelor of Management are permitted to take MGMT 2401.03

PREREQUISITE: MGMT 1000.03, MGMT 1001.03, ECON 1101.03, ECON 1102.03

CROSS-LISTING: COMM 2401.03

EXCLUSION: COMM 2401.03

## MGMT 2402.03: Marketing Applications in the Not-for-Profit Sectors.

This class is intended to further the student's understanding of the ways in which the discipline of marketing can be applied to a number of public policy, environmental, professional and non-profit management areas. It will integrate the basic theory and concepts covered in the introductory marketing class with the knowledge gained in the introductory classes in environmental and public policy

management or in introductory classes in a number of professional fields. The class will maintain an overall managerial perspective in examining the ways in which various constituencies fulfill their strategic organizational objectives through the application of marketing practices. Topic areas examined will be: micro-marketing (firm perspective) vs. macro-marketing (societal perspective); non-profit, cause-related, "green" and social marketing; de-marketing (e.g. anti-smoking, etc.); the use of marketing communications in the electoral and public policy-making process; ethics in marketing; marketing and development. The class may also examine the application of the discipline of marketing to a number of professional fields, such as sports/recreation and health sciences. Learning activities might include: lectures, videos, seminars, internet exercises, examinations and field assignments.

PREREQUISITE: MGMT 2401.03

## MGMT 2502.03: Statistics for Managers II.

A continuation of MGMT 1501.03. The main topics covered are analysis of variance, goodness of fit tests, simple and multiple regression, time series, statistical software.

PREREQUISITE: MGMT 1501.03

EXCLUSION: COMM 2501.03 and COMM 2502.03, MATH 1060.03 and MATH 2080.03, STAT 1060.03 and STAT 2080.03; ECON 2260.03, ECON 2222.03

## MGMT 2601.03: Knowledge Management.

An introduction to the ways in which organizations create, identify, capture, process, and distribute knowledge. Topics include knowledge generation and coordination, knowledge markets, knowledge transfer and skills, and knowledge management principles. Discussion also covers new organizations and intellectual capital; the integration of human resources, training and development, information systems and security, and business units to implement knowledge management strategies; and new roles and responsibilities for knowledge workers.

PREREQUISITE: MGMT 1000.03, MGMT 1001.03, Second year students

## MGMT 2702.03: Resource and Environmental Management.

This course provides an overview of principles and techniques and explores challenging cases of environmental and resource management. Sustainable development provides a framework for examining the issues involved in the extraction, manufacture, use and disposal of materials, energy and products, and the management tools available for addressing those issues.

PREREQUISITE: MGMT 1702.03

EXCLUSION: MGMT 1700.06, ENVI 1100.06 or ENVS 1000.06

## MGMT 2801.03: Government Structure.

This class introduces students to the organizing principles and structures of the three levels of Canadian government; federal, provincial and municipal. The focus is particularly directed at the permanent public service and seeks to examine the collective "whole of government" influence on Canadian affairs. For those interested in business this is an important course as it provides an understanding of the core structures business must understand when dealing with government. As citizens this course provides a framework for understanding how you might protect your rights.

PREREQUISITE: Second year student; MGMT 1000 and MGMT 1001

EXCLUSION: PUAD 2249.03

## MGMT 2803.03: Management in the Public Sector.

This class provides an introduction to the principles and methods used in the management of financial, human, and information resources in public sector organizations, with an emphasis on leadership in the Canadian context. It is designed to meet the educational needs of undergraduate students who are interested in a career in public service, the arts, or non-profit organizations, and who wish an exposure to modern management practices in the public sector.

FORMAT: WebCT

PREREQUISITE: MGMT 2801.03 or instructor's approval

## MGMT 3201.03: Financial Management.

This class is an introduction to the techniques and core principles for making optimal financial decisions for profit, not for profit and public sector organizations. The emphasis is on understanding the role of finance in an integrated management framework. Concepts covered include stakeholder analysis, financial planning, valuation and triple bottom line analysis.

PREREQUISITE: ECON 1101.03, ECON 1102.03, MGMT 2101.03, MGMT 1501.03

EXCLUSION: COMM 2202.03 and COMM 2203.03

**MGMT 3308.03: Managing the Family Enterprise.**

Managing the Family Enterprise is about the special problems and issues that confront family businesses. It explores the family system, the business system, the ownership system and their interactions - functional and dysfunctional. Specific topics, examined from the family business perspective, include: the decision to join a family firm, management succession, ownership succession, the role of key non-family employees, strategic planning and other issues especially relevant for family firms. The course also addresses conflict and communication in the family and business.

The course has two purposes. First it provides an organized framework for students to understand the dynamics and special issues of family firms. Second it is designed to allow students to explore their interest in joining a family firm.

Therefore, it is especially intended for students who come from families which are in business or for students considering joining a family business. Others who wish to explore a key segment of Canadian business are also welcome.

The course relies on field projects, guest speakers, case studies, videos, research papers and extensive class discussion to explore the territory of managing family businesses.

PREREQUISITE: or CO-REQUISITE: MGMT 210.03

**MGMT 3309.03: Management Skills Development.**

This class will expose students to key knowledge, skills, and attitudes (KSAs) considered critical to managerial success. Such an exposure is designed to provide the students with behaviours which will help ensure that, when managing human resources, staff will perform at or near peak capabilities. Topic areas include: understanding what the successful manager needs to know, understanding the personal self, communications, interpersonal negotiations, goal setting, managing innovation and change, handling conflict and anger, performance evaluation, counselling and feedback, and management attitudes needed for success.

Significant amounts of classroom time will be devoted to behaviour modelling exercises, role plays, case studies, and group discussions.

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: MGMT 2303.03 and MGMT 2304.03

CROSS-LISTING: COMM 3309.03

**MGMT 3320.03: Organizational Theory.**

In this course we will examine how organizations function, how the environment in which they operate affects them, and how organizational design and change strategies can increase their effectiveness. The objective of the course is to provide students with conceptual skills to understand organizations and practical skills to influence organizational behavior.

PREREQUISITE: MGMT 2303.03, MGMT 2304.03

EXCLUSION: COMM 4306.03

**MGMT 3501.03: Operations Management.**

This class introduces the student to some of the standard techniques used in managing operations in manufacturing, services, as well as not-for profit organizations. Topics include: inventory, supply chains, project management, quality and queueing. Cases are used to build general skills, illustrate the application of techniques and general approaches to managing operations in the public and private sector.

PREREQUISITE: MGMT 1000.03, MGMT 1001.03, MGMT 2401.03, MGMT 1501.03, MGMT 3201.03

EXCLUSION: COMM 3501.03

**MGMT 3601.03: Information in a Networked World.**

This course provides an introduction to the economic, political, and social dimensions of today's networked information economy. It considers the historical development of information and knowledge production, issues related to control versus the free flow of information, the ethical and legal aspects of information management, and organizational use of information management for storing and processing information, managing knowledge, and making decisions.

PREREQUISITE: MGMT 2601.03

**MGMT 3602.03: Professional Communication Skills.**

This course will introduce students to the broad range of written and oral communication skills needed by managers, including how to adapt a document or presentation for a particular audience and purpose, how to select a suitable method of organization, how to make good use of graphics, how to work effectively as part of a collaborative project team. Students will have the opportunity to practice their communication skills and techniques in pairs, small groups, and in formal presentations before the whole class.

PREREQUISITE:  Writing Requirement

EXCLUSION: (COMM 1701.03 and COMM 1702.03) or (LIBS 1002.03 and LIBS 1003.03) or (INFO 1002.03 and INFO 1003.03) or (MGMT 1002.03 and MGMT 1003.03)

RESTRICTION: Third year student

**MGMT 3603.03: Beyond Google.**

Contextually relevant information is essential to support decision making and strategic planning by individuals, groups and organizations. This course discusses the theory and practice of searching for information, from the level of needs assessment though to systematically scanning through electronic, print and human sources efficiently, effectively and ethically. The use of technologies to streamline search processes will be emphasized, as well as the behavioural, affective and cognitive aspects of human information behaviour.

PREREQUISITE: MGMT 2601.03

**MGMT 3620.03: User Centred Design.**

This course takes a human-centred perspective in an analysis of the design of the technologies we use, from out cell phones to web pages and the tools of everyday life. Over the course of the term, students will examine what makes good and bad design and will explore how to integrate ultimate use into the design process. Students will learn how to use simple prototyping techniques and how to evaluate interfaces.

FORMAT: Lectures/discussions/in-class activities

PREREQUISITE: MGMT 1601.03 or permission of instructor.

**MGMT 3701.03: Resource/Environmental Problem-Solving 1: Sustainable Ecosystems.**

The class introduces students to concepts and methods for analyzing ecosystem sustainability across a spectrum of intensities of use from full legal protection to intensive urban and industrial development. Students learn how the abiotic and biotic components of the environment interact, and how to integrate analyses of biodiversity, soil, air and water in assessing ecosystem sustainability. Climate change is explored as a major driver of ecosystem change. A range of management and policy mechanisms for protecting ecosystems and fostering their sustainability in the face of multiple stresses is explored.

PREREQUISITE: MGMT 1700.06 or ENVI 1100.06 or ENVS 1000.06 or MGMT 1702.03 and MGMT 2702.03

**MGMT 3702.03: Resource/Environmental Problem-Solving 2: Sustainable Industries.**

The class introduces students to concepts and methods for analyzing industrial sustainability based on both renewable (e.g., forests, fisheries, agriculture) and non-renewable (e.g., minerals, fossil fuels) resources. Students learn how natural resources are managed and used, and how sustainable businesses and innovative economic enterprises can be based on sustainable resource use. A range of management and policy mechanisms for ensuring resource sustainability is explored.

PREREQUISITE: MGMT 1700.06 or ENVI 1100.06 or ENVS 1000.06, or MGMT 1702.03 and MGMT 2702.03

**MGMT 3802.03: Public Policy.**

This class serves as an introduction to the public policy process with an emphasis on the interplay between policy and the four thematic areas of study and professional practice upon which the Faculty of Management has been formed – the private sector, the environment, the public sector and information technology. Students assume the role of a policy analyst during the course and pursue a policy problem of their choosing through the policy process that culminates in a policy project briefing and paper.

PREREQUISITE: MGMT 1000.03, MGMT 2801.03 and MGMT 2803.03 or equivalent political science courses with a focus on Canada, with the permission of the instructor

**MGMT 3810.03: Government Policy Toward Business.**

The focus of this course is twofold: first, how governments shape business behaviour through policy, regulation, state ownership, and other forms of intervention; and secondly, why collaboration is a growing reality enjoining public sector and private sector organizations and the implications for each sector and society as a whole. The course aims to understand the fundamental difference between the public interest and the private interest and how such differences are sorted out through contemporary governance systems involving public, private and civic actors. While the emphasis will be on the Canadian environment, a comparative perspective will also be used in light of many issues that are increasingly transnational in scope. Students will be able to develop a critical view of government intervention and grow a sense of when and where government action is warranted and when and where it is not.

FORMAT: Lecture/seminar

PREREQUISITE: MGMT 2801.03, MGMT 2803.03, ECON 1101.03, ECON 1102.03 or equivalent

### **MGMT 3902.03: Starting Lean.**

This course provides real world, hands-on learning on what it's like to actually start a scalable company or enterprise. This class is not about how to write a business plan. It's not an exercise on how smart you are in a classroom, or how well you use the research library to size markets. And the end result is not a PowerPoint slide deck for a VC presentation. This is a practical class - essentially lab, not a theory or 'book' class. You will be getting your hands dirty talking to customers, partners, competitors, as you encounter the chaos and uncertainty of how a startup actually works. You'll work in teams learning how to turn a great idea into a great company. You'll learn how to use a business model to brainstorm each part of a company and customer development to get out of the classroom to see whether anyone other than you would want/use your product. Each day will be a new adventure outside the classroom as you test each part of your business model than share you hard earned knowledge with the rest of the class.

PREREQUISITE: MGMT 3907.03

### **MGMT 3907.03: New Venture Creation Entrepreneurship.**

This class is about venturing - the process of creating new ventures in both the for-profit and not-for-profit environment. The issue of Social Entrepreneurship will receive specific attention. The target audience is students, in any discipline, who have the desire to venture. The course is designed to expose students to the issues, problems and challenges of creating new ventures and to provide students with the opportunity, within the framework of a formal class, to explore and develop venture ideas as they have been considering or wish to investigate. Experiential exercises enable the student to better understand themselves, their venture potential and the merits of their new venture ideas. A major field project requires the development of a detailed plan for the new venture.

PREREQUISITE: MGMT 1000.03 and MGMT 1001.03, or COMM 1010.03,

MGMT 2401.03 or permission from the Professor

CROSS-LISTING: COMM 3307.03

### **MGMT 4001.03: Strategy Formulation.**

This is a capstone course which draws upon all previous courses in the BMgmt program, with a focus on the strategic choices facing public and private organizations today. The course introduces students to different theoretical frameworks for the development of strategy. Moving through the analysis phase, by way of external and internal scans of the environment and of the organization, itself, students progress to the Formulation phase of Strategy design through lectures, presentations, case studies and class discussions. Knowledge will be consolidated through the preparation and presentation of a major project based on the experiences of a real organization. The course also examines strategic sustainability by drawing upon the four thematic areas of study and professional practice upon which the Faculty of Management has been formed - the private sector, the environment, the public sector and information technology.

PREREQUISITE: All required first, second, and third year core classes for the

Bachelor of Management program.

EXCLUSION: COMM 4351.03

### **MGMT 4002.03: Strategy Implementation.**

This class is a continuation of MGMT 4001.03 and involves an analysis of the major components of strategy implementation which contribute to effective organizational performance. This class includes case examples from all three sectors - public, private and not-for-profit, as well as from a variety of institutional settings. Assignments and a major project will provide students with research tools to understand the complexity and uncertainty provided by "real world" issues and constraints in the implementation of strategy.

PREREQUISITE: MGMT 4001.03

EXCLUSION: COMM 4352.03

### **MGMT 4050.03: Directed Reading and Research.**

This class offers the student the opportunity to explore in greater detail a particular area of interest. The content of the class is negotiated with the individual instructor involved. The student and instructor must develop a proposal, and submit it to the Programme Committee for approval. Guidelines are available from the Bachelor of Management Programme Administrator.

### **MGMT 4309.03: Strategic Leadership.**

The study of organizational leadership from the perspective of senior managers who steer their organization toward creating value in the long term. Strategic leadership practices are engaged via a case study approach supported by

contemporary readings on both organizational leadership and strategy. Students also consider emerging issues related to how senior organizational leaders create value in terms of entrepreneurship, innovation, markets, strategy, human resources, design, and sustainability.

PREREQUISITE: MGMT 3320.03

### **MGMT 4333.03: Project Management.**

This course provides an introduction to principles, concepts, and software applications as well as an actual experience of project management in a practical project team setting. The course also introduces theories and practices of project management as related to project objectives, lifecycle stages, and control variables such as time, cost, and scope. Students will gain insight into the realities of managing a project and will learn to adapt to varying financial, political and cultural challenges encountered within project teams and organizations.

PREREQUISITE: MGMT 3501.03

CROSS-LISTING: COMM 4523.03

### **MGMT 4601.03: Advanced Knowledge Management.**

A study of knowledge management that integrates knowledge gained through previous coursework and experience and builds on that conceptual foundation through integrative analysis, practical application, and critical thinking. Emerging issues in knowledge management are considered. Key issues in knowledge management are highlighted by means of case studies, projects, and discussion.

PREREQUISITE: MGMT 2601.03

### **MGMT 4701.03: Advanced Resource and Environmental Management 1.**

A study of resource and environmental management that integrates knowledge gained through previous coursework and experience and builds on that conceptual foundation through integrative analysis, practical application, and critical thinking. Emerging issues in resource and environmental management are considered. Tactical and strategic management issues are highlighted by means of case studies, projects, and discussion.

PREREQUISITE: MGMT 3701.03, MGMT 3702.03

### **MGMT 4702.03: Advanced Resource and Environmental Management 2.**

A study of resource and environmental management that integrates knowledge gained through previous coursework and experience and builds on that conceptual foundation through integrative analysis, practical application, and critical thinking. Emerging issues in resource and environmental management are considered. Tactical and strategic management issues are highlighted by means of case studies, projects, and discussion.

PREREQUISITE: MGMT 3701.03, MGMT 3702.03, MGMT 4701.03

### **MGMT 4895.03: Internship Prep Seminar.**

Upon acceptance into the Bachelor of Management Optional Internship Program (Winter Term), students register for MGMT 4895 for the Fall Term. This course is designed to introduce internship students to aspects of career development and preparation for their internship experience.

NOTE: This course carries zero credit hours. Details on the Bachelor of

Management Internship Program are available at

[www.dal.ca/mcs/internship](http://www.dal.ca/mcs/internship)

### **MGMT 4896.03: Management Internship.**

The optional internship will take place between academic year 3 and the final academic year. It is designed to offer opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.

NOTE: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree.

PREREQUISITE: MGMT 3602.03

### **MGMT 4897.03: Management Internship.**

The optional internship will take place between academic year 3 and the final academic year. It is designed to offer opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.

NOTE: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree.

PREREQUISITE: MGMT 3602.03

### **MGMT 4898.03: Management Internship.**

The optional internship will take place between academic year 3 and the final academic year. It is designed to offer opportunity to combine relevant job

experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.

NOTE: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree.

PREREQUISITE: MGMT 3602.03

### **MGMT 4899.03: Management Internship.**

The optional internship will take place between academic year 3 and the final academic year. It is designed to offer opportunity to combine relevant job experience with classroom studies. Students can work with professionals in their chosen field which will increase employability after graduation.

NOTE: This is a Pass/Fail course with only a maximum of six credit hours to be applied to the Bachelor of Management degree.

PREREQUISITE: MGMT 3602.03

### **MGMT 4901.03: Managing the Venturing Process.**

Managing the Venturing Process is a capstone course that explores the strategic elements required to venture successfully. Delivery is in a seminar format with students taking significant responsibility for their own learning. The constructs of venture stage, venture process and venture context are used to frame the discussion and a simulation (capstone) is used as a practical way for students to build competence in managing a large venture strategically.

PREREQUISITE: MGMT 3907.03 or COMM 3307.03 or permission of instructor

CROSS-LISTING: COMM 4301.03

## I. General Information

Dalhousie Medical School was organized in 1868, but medical teaching was carried out by the independent Halifax Medical College from 1875 to 1911, when the Faculty of Medicine was re-established by the University.

The Faculty provides a complete medical training leading to the degree of Doctor of Medicine (MD). Nationally accredited postgraduate training in family medicine and specialty training is provided in University-affiliated hospitals in Nova Scotia, Prince Edward Island and New Brunswick. Continuing Medical Education is provided to the practitioners of the three Maritime Provinces.

The Faculty is fully accredited by the Liaison Committee on Medical Education and the Committee on Accreditation of Canadian Medical Schools.

The Medical School has strong research programs in basic biomedical sciences, clinical sciences, population health and medical education.

### A. Mission Statement

Serving Maritime Canada, the Faculty of Medicine enables excellence in health care through our medical education and research programs in partnership with government, health authorities and health care providers.

The Department of Medical Neurosciences provides facilities for advanced study and research in Neuroscience, Histology, Embryology, Cell Biology, Neuroendocrinology and Evolutionary Biology.

The goals of the graduate program are to provide in-depth research training in a particular aspect of anatomy, neurobiology or a related field, and to introduce the student to methods of teaching anatomy.

## I. Class Descriptions

### ANAT 1010.03: Basic Human Anatomy.

This class is offered by the Department of Anatomy and Neurobiology primarily to students in the Schools of Nursing (Section 01). A limited number of seats are available for Special Health Professions, Arts and Science, or Non-Degree

students. Note that this class is also offered by DISTANCE EDUCATION (ANAT: 1010.03, Section 02) during the Regular Term (Fall or Winter). Upon successful completion of the class, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. This class uses an online Virtual Anatomy Laboratory.

INSTRUCTOR(S): G.V. Allen

FORMAT: Lecture: 3 hours

RESTRICTION: Section 01 is restricted to Nursing students and a limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students.

### ANAT 1020.03: Basic Human Anatomy.

This class is offered by the Department of Anatomy and Neurobiology primarily to student in Recreation, Physical and Health Education and Kinesiology. A limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students. Note that this class is also offered by DISTANCE EDUCATION (ANAT 1010.03, Section 02) during the Regular Term (Fall or Winter). Upon successful completion of this class, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. This class uses an online Virtual Anatomy Laboratory.

NOTE: This class is NOT offered during the summer term.

INSTRUCTOR(S): G.V. Allen

FORMAT: Lecture 3 hours

RESTRICTION: Restricted to student in Recreation, Physical and Health Education and Kinesiology. A limited number of seats are available for Special Health Professions, Arts & Science, or Non-Degree students.

### ANAT 1040.03: Basic Human Anatomy for Pharmacy Students.

This class is offered by the Department of Anatomy and Neurobiology to students in the College of Pharmacy. Upon successful completion of the class, the student will be able to explain and describe, at a basic level, the gross anatomy and histology of the human body. There are no formal laboratory sessions.

INSTRUCTOR(S): D. Marsh

FORMAT: Lecture 3 hours, tutorial 6 hours. 4 weeks

RESTRICTION: Restricted to Pharmacy students

### ANAT 2160.03: Introduction to Human Histology.

Histology is the study of the structure of cells, tissue and organ systems, and utilized information derived from both light and electron microscopy. This class complements studies in anatomy, cell biology, physiology, and biochemistry, broadening the understanding of how organisms function.

INSTRUCTOR(S): F. Smith (Dept. of Anatomy and Neurobiology)

FORMAT: Lecture 2 hours, lab 2 hours

PREREQUISITE: BIOL 2020.03 or permission of instructor

CROSS-LISTING: BIOL 3430.03

### ANAT 3421.03: Comparative Vertebrate Histology.

An advanced histology class surveying the whole range of vertebrate tissues and organs. The material is approached from a comparative perspective, considering tissue and organ histology throughout the major vertebrate classes.

INSTRUCTOR(S): F.M. Smith (Dept. of Anatomy and Neurobiology)

FORMAT: Lecture 2 hours, lab 2 hours

PREREQUISITE: BIOL 3430.03 or ANAT 2160.03 or equivalent

CROSS-LISTING: BIOL 3421.03

Pohlmann-Eden, B., MD, PhD (U of Heidelberg, Germany), Major Appointment in Neurology  
Pollak, P. T., MD, PhD (Western Ontario), Major Appointment in Pharmacology and Cardiac Services, U of Calgary  
Rupasinghe, H. P. V., BSc (U of Peradeniya, Sri Lanka), MSc (Iowa State U., USA), PhD (Guelph), Major Appointment Department of Environmental Sciences, Nova Scotia Agricultural College  
Rusak, B., BA (Toronto), PhD (Berkeley), Major Appointments in Departments of Psychiatry and Psychology

## I. Introduction

Pharmacology is the study of the actions and fates of drugs in biological systems. Studies of the interaction of drugs with their receptors and the elucidation of the cellular mechanisms underlying the resulting responses are central to Pharmacology. It is also important to understand how drugs are handled in the body, why they produce adverse effects, and how they interact with each other. In addition, scientists often use drugs as tools to determine the basic mechanisms that underlie both normal and pathological conditions in biology. A solid understanding of the principles of Pharmacology is essential for any scientist who wishes to use drugs as tools properly. The experimental approaches used in Pharmacology are varied, ranging from bioassay, electrophysiology, chemical and biochemical analyses to molecular biology.

## II. Degree Programs

Students intending to pursue graduate training in Pharmacology are encouraged to study pharmacology at the undergraduate level. In addition, a solid background in pharmacology can open the door to employment in numerous sectors, most notably the pharmaceutical industry. The Department of Pharmacology does not offer an honours pharmacology degree program as such. However, it does provide classes that may be taken for credit within various other honours degree programs, including Biology, Biochemistry, Psychology (Neurosciences) and Microbiology & Immunology. In addition, students can conduct honours thesis research projects in the laboratories of Pharmacology faculty. Finally, undergraduate students may, with permission of their home department and the class instructor, take certain graduate specialty classes which are offered in the Department of Pharmacology.

## III. Class Descriptions

### BIOL 4404.03: Introduction to Pharmacology I.

This introductory class is designed to acquaint students with the actions of drugs on physiological and biochemical functions in mammals including humans. Factors which affect the blood levels of drugs (absorption, distribution, metabolism, and elimination) will be considered, together with the mechanisms by which drugs act and their potential uses. The interaction of drugs with various body systems is covered, including the central and peripheral nervous systems and the cardiovascular system. Drugs that assist or regulate host defence mechanisms will also be studied.

COORDINATOR: M.E.M. Kelly

FORMAT: Lecture 3 hours

PREREQUISITE: This class is restricted to third or fourth year students, or graduate students. Other students may be admitted with permission of the class coordinator. A previous class in biochemistry and in physiology is recommended. Extra reading will be required of students without these classes.

CROSS-LISTING: PHAC 5406.03, BIOC 4804.03, and NESC 4374.03

### BIOL 4407.03: Introduction to Pharmacology II.

This class is intended to cover specific aspects of drug action not covered in BIOL 4404.03. The class includes: drug receptor signaling, ion channels, second messengers, G-proteins, and immunopharmacology, plus specific consideration of drugs used for pain, inflammation, cancer, diabetes, and asthma.

COORDINATOR: D. Dupré

FORMAT: Lecture 3 hours

PREREQUISITE: BIOL 4404.03 (with a grade of B or better)

CROSS-LISTING PHAC 5409.03, BIOC 4806.03, and NESC 4376.03

EXCLUSION: BIOL 4405.03

Sapp, J. L., BSc (Toronto), BSc Med, MD (Dalhousie), FRCP(C), Major appointment - Dept. of Medicine

## Senior Instructor

Penney, C., BSc, PhD (Dalhousie)

## I. Introduction

The Department of Physiology and Biophysics offers a wide range of undergraduate classes in addition to those restricted to students in the faculties of Medicine and Dentistry. Students who have previously taken biology, chemistry, physics will be best equipped to study physiology.

The classes listed below are aimed at providing the student with an understanding of the functioning of the human body. The Distance Education class 1000X/Y.06 is open to all students. PHYL 2030 or its component parts 2031.03 or 2032.03 is the recommended prerequisite for science students interested in taking higher level physiology classes. Students wishing to enrol in other specialized classes require permission from the Course Director or Department Head.

## II. Class Descriptions

### PHYL 1000X/Y.06: Human Physiology.

A full-credit Distance Education class equivalent to PHYL 1010X/Y.06. The functions of body organs and body systems, as well as integrative functions of the whole organism are studied. The class is based on a selected textbook and is supported by extensive blackboard content including a step-by-step guide, learning objectives, assignments, and virtual laboratories. The class is normally given in the Regular session (Sept - Apr), as well as in the Summer session (May - June, PHYL 1000). Distance Education classes have an additional fee over and above the listed tuition fees.

DIRECTOR: C. Penney

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

### PHYL 1010X/Y.06: Human Physiology.

This is a full-credit introductory human physiology class equivalent to PHYL 1000X/Y.06. The functions of body organs and body systems, as well as integrative functions of the whole organism are studied. This course is intended primarily for students in the Health Professions.

DIRECTOR: C. Penney

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term. This course cannot be used as a prerequisite course for 3rd and 4th year physiology courses, nor as a co-requisite for PHYL 2570.03 (Cellular Neurophysiology).

FORMAT: Lectures 3 hours/weekly assignments and readings/virtual labs, and BLS

### PHYL 1400.06: Human Physiology.

This course is designed to give Pharmacy students a broad understanding of normal human physiology using pathophysiologic scenarios. Selected topics in physiology and biophysics will be presented in tutorials as case studies and in lectures. The central themes include: respiratory, endocrine/reproductive, gastrointestinal, neuromuscular, nervous system, renal and cardiovascular. Students will be provided with means for self-evaluation throughout the unit. Evaluation will be based on tutorial performance as well as mid- and end-of-unit examinations. This class is only for Pharmacy students.

DIRECTOR: M. Murphy and other staff members

FORMAT: A 7-week comprehensive unit with 6 hours tutorial and 4 hours lecture per week

PREREQUISITE: ANAT 1040.03

### PHYL 2031.03: Human Physiology A.

This is a survey course outlining the principles of human physiology. Function of organs and body systems is presented in lectures and laboratory work. Emphasis is placed on integration of function in the human body. In this term, the following topics are covered: cell and muscle physiology, neurophysiology and special senses, and endocrinology and reproductive physiology. This is a prerequisite for 3rd and 4th year physiology courses.

### PHYL 2032.03: Human Physiology B.

This is a survey course outlining the principles of human physiology. function of organs and body systems is presented in lectures and laboratory work. Emphasis is placed on integration of function in the human body. In this term, the following topics are covered: respiratory physiology, cardiovascular physiology, renal physiology and gastrointestinal physiology. This is a prerequisite course for 3rd and 4th year physiology courses.

**PHYL 2570.03: Cellular Neurophysiology.**

This course provides an introduction to the function of the nerve cells of the brain, which forms the basis for explaining features of brain function in terms of activity of individual cells and their membrane properties, as well as small networks of neurons. The course is designed for all students wishing to take more advanced courses in, or to major in, Neuroscience. Although the course covers topics of neuroscience at all levels, the content is directed towards cellular neuroscience; detailed coverage of the strictly developmental systems or molecular levels of neuroscience is provided in other courses.

DIRECTOR(S): S. Adamo and S. Barnes

FORMAT: Lecture

PREREQUISITE: PSYO 2470.03 or NESC 2470.03 or PHYL 2031.03

CROSS-LISTING: NESC 2570.03, PSYO 2570.03

CO-REQUISITE: PHYL 2030.06, or permission of the class director

**PHYL 3120.03: Exercise Physiology in Health and Disease.**

The function and dysfunction of body organ systems are reviewed, and the short- and long-term responses of these systems to physical exercise are analyzed.

Factors affecting physical performance are considered, and the preventive and therapeutic use of exercise for a wide range of clinical conditions is examined.

DIRECTOR: T.F. McDonald

FORMAT: Lecture/tutorial: average 4 hours per week

PREREQUISITE: PHYL 2030.06 or permission of the class director

**PHYL 3320.03: Human Cell Physiology.**

Events at the cellular and molecular level determine the activities of tissues, organs, and systems. This course examines key physiological principles at the cellular level, and uses this information to develop understanding of important body functions. Lectures focus on signaling within individual cells, membrane transport, electrical excitability and electrical signaling, communication between cells, muscle contractility, and epithelial transport.

DIRECTOR: TBA

FORMAT: Lectures 3 hours

PREREQUISITE: PHYL 2030.06 or 2031.03 or permission of course director

**PHYL 3420.03: Sensory Physiology.**

This course will describe the physiological and biophysical basis of human sensory systems including vision, audition, vestibular, olfaction, gustation, and somatosensory (skin and proprioception). Emphasis will be on the transduction of physical stimuli and the early neural processing that occurs in sensory cells and immediately associated tissues.

DIRECTOR: S. Barnes and guest lecturers

FORMAT: Seminar 2 hours

PREREQUISITE: NESC 2470 or PHYL/NESC 2570 or equivalents

**PHYL 3520.03: Core Concepts in Medical Physiology.**

Through didactic (lectures) and problem-solving (tutorial) sessions, students will gain a deeper understanding of the functions of various organ system physiologies. In addition, the integration of a number of organ system functions will also be discussed. Where appropriate, the physiology of disease processes will underscore the consequences of a malfunction of a physiological process.

Organ systems covered include cardiovascular, renal, respiratory and gastrointestinal. A firm understanding of physiological principles is essential for any student contemplating a career in the health professions.

DIRECTOR: N.S. Morgunov

FORMAT: Lectures/tutorial 4 hours per week

PREREQUISITE: PHYL 2030.06, PHYL 2032.03 or permission of course director

**PHYL 4000.03: Current Advances in Synaptic Function and Plasticity.**

Key recent research studies in cellular and system neurophysiology are presented and discussed. Emphasis is placed on synaptic function, and plasticity, excitability, dendritic integration, neural networks and relevant advances in experimental methods. Newly published papers within these areas are reviewed weekly, followed by a more extensive critique of two publications.

INSTRUCTOR(S): S. Krueger, A. Fine

FORMAT: Seminar 2 hours

PREREQUISITE: NESC 2570/PHYL 2570 or permission of course directors

CROSS-LISTING: NESC 4185.03

**PHYL 4324.03: Endocrine Physiology.**

This class is designed to provide intermediate and advanced undergraduates with a basic understanding of the function of the endocrine system. The class will

progress from a consideration of basic concepts and mechanisms to the physiological function of specific endocrine systems. Interactions between organ systems will be emphasized.

DIRECTOR: P.R. Murphy

PREREQUISITE: PHYL 3320.03 or permission of the class director

**PHYL 4328X/Y.03: Directed Project in Physiology.**

This class allows the advanced undergraduate student to pursue more specialized with student interest and faculty expertise. A student wishing to take this class must find a faculty member who is prepared to supervise a directed project. Before registering for this class, a student must provide the Course Director with a letter from the faculty member describing the project and agreeing to serve as supervisor. Class approval will not be given until this is done.

DIRECTOR: P. Linsdell

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: PHYL 2030.06 and permission of the class director

**PHYL 4680.03: Cardiovascular Physiology.**

This class provides an overview of key principles of cardiovascular physiology. Topics include cardiac anatomy/ultrastructure, cardiac pump-function, cardiac electrophysiology, excitation-contraction coupling, cardiac mechanics, cardiac energy metabolism and regulation of the vasculature. Cardiac diseases will be addressed.

INSTRUCTOR(S): R.A. Rose

FORMAT: Lecture 3 hours, week

PREREQUISITE: One of PHYL 2030 or PHYL 3320 or PHYL 3520 or permission of the course director

EXCLUSION: PHYL 4326

## I. Introduction

Dalhousie's Faculty of Science, the primary centre in the region for science education and research, is part of the College of Arts and Science and consists of 10 departments and three programs. The principal mission of the Faculty is the discovery, organization, dissemination and preservation of knowledge and understanding of the natural world. The Faculty is dedicated to excellence in the pursuit of this mission. Students in the Faculty of Science develop a capacity for inquiry, logical thinking and analysis; cultivate an ability to communicate with precision and style; and acquire skills and attitudes for lifelong learning.

Undergraduate students in the Faculty of Science normally develop these abilities by concentrating their studies in one or more of the following areas: Biochemistry & Molecular Biology, Biology, Chemistry, Earth Sciences, Economics, Environmental Science, Marine Biology, Mathematics, Meteorology,

Microbiology & Immunology, Neuroscience, Ocean Sciences, Physics and Atmospheric Science, Psychology, and Statistics. It is possible to combine studies in many of these areas with minor programs in other areas of science or in areas outside the main faculty (see Minor Programs, page 134) or with a Co-op Education in Science option. (This requires work term opportunities.) Details concerning particular programs of study are found in the departmental entries.

## II. Departments and Programs of the Faculty of Science

### Departments:

Biochemistry & Molecular Biology\* (also in the Faculty of Medicine), Biology\*, Chemistry\*, Earth Sciences\*, Economics\*, Mathematics and Statistics\*, Microbiology & Immunology\* (also in the Faculty of Medicine), Oceanography, Physics and Atmospheric Science\*, and Psychology

### Programs:

Environmental Science\*, Marine Biology\*, Neuroscience

\* Co-op Option available.

Syvitski, R., BSc, MSc (Thunder Bay), PhD (UBC), Research Officer, NRC, Halifax

## I. Introduction

Biochemistry is the study of biological function at the molecular level. Although biochemical processes follow the basic laws of physics and chemistry, living organisms, because of their complexity, operate on a set of distinct principles that are not found in simple isolated chemical systems. The goal of biochemistry is to elucidate these principles. The department offers an integrated series of classes that will provide students with an up-to-date view of modern biochemistry & molecular biology ranging from evolution of genomes to structure-function relationships in macromolecules to the dynamic aspects of metabolism. The core programs can be adapted to emphasize different biochemical specialties such as structural biology, metabolism, molecular biology and cell signaling. Students wishing to pursue advanced studies in Pharmacology or related sciences for which there is no undergraduate program can include classes in Physiology, Pharmacology and/or Pathology in their programs. Greater flexibility is available in combined degree programs of Biochemistry & Molecular Biology with another subject; most often with Chemistry, Microbiology, Biology, Neuroscience, Psychology or Environment, Sustainability and Society. Specific programs developed with the Department of Microbiology & Immunology provide coordinated studies of metabolism, enzymology and molecular biology with bacteriology, virology and immunology. These programs provide the foundation for molecular genetics, genetic engineering, biotechnology, biomedical research and medicine.

Laboratory Exercises: Some of the classes offered by the Department of Biochemistry & Molecular Biology include a laboratory component. The laboratory exercises provide an opportunity to develop laboratory skills, as well as to illustrate the theoretical principles taught in class. This process culminates in fourth year, with a supervised research project required for honours Biochemistry & Molecular Biology students. Although no exercise involves live animals, experiments may use materials derived from animal sources, as well as from plants and micro-organisms. Laboratory experiments will often be performed in groups, but writing of reports is expected to be an individual effort, meeting the guidelines on plagiarism set out in the University Regulations in the Calendar and the Department Policy on Plagiarism.

## II. Degree Programs

NOTE: Students interested in a Biochemistry & Molecular Biology degree should first read the Undergraduate handbook on the Department website that describes all of the programs available and the special requirements relating to them. Degree programs must be planned in consultation with a departmental advisor ([advisor@webmail.biochem.dal.ca](mailto:advisor@webmail.biochem.dal.ca))

Note that all Biochemistry classes have prerequisites.

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, page 131 of this calendar.

## A. BSc (20 credit) Honours in Biochemistry & Molecular Biology

This is a special concentrated Honours Program in which emphasis may be placed on different areas of biochemistry such as protein chemistry, metabolism or molecular genetics. Because Biochemistry and Chemistry are closely interwoven both conceptually and experimentally, the list of required classes includes both subjects. Additional chemistry classes beyond those required for the honours degree may be taken as electives. For entrance to BIOC 2300.03 and BIOC 2610.03, students require minimum grades of B- in BIOL 1010.03 and BIOL 1011.03 and CHEM 1011.03 and 1012.03 (or equivalents). Students should also note the minimum grade requirements specified in the prerequisites for all 3rd year and some fourth year Biochemistry & Molecular Biology classes. Honours students must meet the general degree requirements of the Faculty.

### Departmental Requirements

#### 1000 level

- CHEM 1011.03 and 1012.03 (or equivalent) - minimum passing grade B-
- BIOL 1010.03 and 1011.03 (or equivalent) - minimum passing grade B-
- MATH 1000.03 or 1215.03 and MATH 1010.03 or 1060.03
- or, in lieu of the above, SCIE 15XX

#### 2000 level

- BIOL 2020.03
- BIOL 2030.03
- BIOC 2300.03
- BIOC 2610.03
- CHEM 2201.03
- CHEM 2401.03 and 2402.03

#### 3000 level

- BIOC 3300.03
- BIOC 3400.03
- CHEM 3601.03 or one half credit in Biochemistry at the 3000 or 4000 level
- BIOC 3700.03

#### 4000 level

- BIOC 4604.03 and 4605.03
- One and a half credits from BIOC 40XX, 43XX, 44XX, 45XX, 47XX
- One additional credit in Biochemistry at the 4000 level

#### Other requirements

A pass is required in the Honours Qualifying examination. Students should also ensure that they have enrolled in any 2000 or 3000 level classes that are prerequisites for advanced classes they intend to take (see appropriate calendar entries).

## B. BSc or BA (20 credit) Combined Honours in Biochemistry and Another Subject

Biochemistry & Molecular Biology may be chosen along with one of Biology, Chemistry, Environmental Science, Mathematics, Microbiology, Physics, Psychology, or possibly another subject, for a Combined Honours Program.

### Departmental Requirements

#### 1000 level

- As specified in A except MATH 1000 and 1010 are required when combined with Chemistry

#### 2000 level

- BIOL 2020.03
- BIOL 2030.03
- CHEM 2401.03 and 2402.03
- BIOC 2300.03
- BIOC 2610.03

#### 3000 level

- BIOC 3300.03
- BIOC 3400.03
- BIOC 3700.03

#### 4000 level

- One credit from BIOC 40XX, 43XX, 44XX, 45XX, 47XX

Consult an Undergraduate Advisor for details of recommended classes of study.

## C. BSc or BA (20 credit) Major in Biochemistry & Molecular Biology

Please consult the Degree Requirements section II., for detailed information.

Although Dalhousie University does not require formal application for its 20 credit Major programs, this Department requires that all those registering with a view to completing such a degree must first consult with an Undergraduate Advisor from the Department of Biochemistry & Molecular Biology.

The department offers a four-year, 20 credit program of study leading to a BSc Major degree. The program, while not designed as a preparation for graduate study in Biochemistry & Molecular Biology, nevertheless introduces students to all main aspects of the subject, as well as meeting the general degree requirements of the Faculty. Students should also note the minimum grade requirements specified in the prerequisites for all third year and some fourth year Biochemistry classes.

### Departmental Requirements

#### 1000 level

- BIOL 1010.03 and 1011.03 (or equivalent) - minimum passing grade B-
- CHEM 1011.03 and 1012.03 (or equivalent) - minimum passing grade B-
- One full credit in mathematics
- or, in lieu of the above, SCIE 15XX

#### 2000 level

- BIOL 2020.03
- BIOL 2030.03
- BIOC 2300.03
- BIOC 2610.03
- CHEM 2201.03
- CHEM 2401.03 and 2402.03

#### 3000 level

- BIOC 3300.03
- BIOC 3400.03
- BIOC 3700.03

#### 4000 level

- Two full credits in Biochemistry at the 4000 level
- One half credit in BIOC 3XXX or 4XXX

## D. BSc or BA (20 credit) Double Major in Biochemistry & Molecular Biology and Another Subject

\*See notes in C, above.

The Department will approve the combination of Biochemistry with a wide variety of other fields of study, subject to confirmation by an Undergraduate Advisor from the Department of Biochemistry & Molecular Biology.

### Departmental Requirements

#### 1000 level

- as for Single Major, above

#### 2000 level

- BIOL 2020.03
- BIOL 2030.03
- BIOC 2300.03
- BIOC 2610.03
- CHEM 2401.03 and 2402.03

#### 3000 level as for Single Major, above

#### 4000 level

- A minimum of one full credit in Biochemistry at the 4000 level.

## E. Co-operative Education in Biochemistry & Molecular Biology

Co-operative Education in Science (Science Co-op) is a program where academic study is combined with paid career-related work experience. Students alternate three to four work terms throughout their academic study terms and graduate with a Bachelor of Science Co-op. Science Co-op enables students to apply their knowledge directly while providing them with work experience that assists in making educated career choices. Students should apply to join Science Co-op before their second year of study. If accepted into the Science Co-op program, students are required to register for and attend the Science Co-op Seminar Series (SCIE 2800.00) in the fall term of the year they join.

See the "Co-operative Education in Science" section of this calendar, or <http://www.sciencecoop.dal.ca>, for information on Science Co-op such as Science Co-op requirements, eligibility, how to apply, deadlines and other related information.

Admission to the Biochemistry Co-op program requires a GPA of at least 3.00 in first year classes. Continuance in the Biochemistry Co-op program and graduation with the Co-op designation requires that students maintain a GPA of 3.00 in the classes specified as departmental requirements.

Biochemistry Work - Study program:

Year	Fall	Winter	Summer
1	Acad	Acad	—
2	Acad	Acad	W1
3	Acad	Acad	W2
4	W3	Acad	W4 (optional)
5	Acad		

For further information, please see <http://www.sciencecoop.dal.ca>.

Co-op Academic Advisor in Biochemistry: Dr. McLeod  
Email: [roger.mcleod@dal.ca](mailto:roger.mcleod@dal.ca)

## F. Minor in Biochemistry & Molecular Biology

Departmental requirements:

- three full credits in advanced level BIOC classes

Note: Some non-BIOC classes such as BIOL 2020, BIOL 2030, CHEM 2401 and CHEM 2402 are required for Biochemistry & Molecular Biology degree programs. These non-BIOC classes cannot be counted as part of the three BIOC credits required for a minor.

## G. Minors and Other Programs

Minor programs allow students to develop subject specialities, especially ones taught outside their main Faculty, that complement their major or honours subjects. Minors are normally added to a four-year major or concentrated honours program. If a minor is added to a double major or a combined honours program, students may find that they need to take more than 20 credits to complete all of their degree requirements. Combined with a four-year degree program in Biochemistry & Molecular Biology, minor programs are available in the following subject areas.

### Minor Subject Areas

- Business (BA or BSc)
- Canadian Studies (BSc only)
- Community Design (BA or BSc)
- Computer Science (BSc only)
- Environmental Studies (BA or BSc)
- Film Studies (BA or BSc)
- Food Science (BSc only)
- Health Studies (BA only)
- Journalism (BA or BSc)
- Law and Society (BA only)
- Management (BA or BSc)

Any student wishing to pursue a minor in these subjects should consult with the College of Arts and Science Degree Requirements section of the Undergraduate Calendar, starting on page 134, as well as the particular subject area of the calendar.

## III. Class Descriptions

The Department also teaches students in Dentistry and Medicine; these classes are described in the appropriate sections of the Calendar.

NOTE: Not all classes are offered every year. Please consult the current timetable for this year's offerings.

### BIOC 1040.06: Biological Chemistry and Metabolism for Students of Pharmacy.

The structures, significance, and metabolism of the main biologically important compounds are outlined in lectures, with some topics of particular interest studied further in the laboratory. Tutorials aim to develop students' ability to learn biochemistry on their own and in small groups.

INSTRUCTOR(S): D. Byers, P. Briggs

FORMAT: Lecture 4 hours, lab 3 hours, tutorial 6 hours, 7 weeks

CO-REQUISITE: CHEM 2442.03

RESTRICTION: This class is restricted to students in the BSc (Pharm) program.

### BIOC 1420.03: Introductory Biochemistry for Nursing Students.

Topics discussed include the structure, biosynthesis and functions of biologically important compounds, enzymes, control of metabolism, genetic engineering and nutrition. Medical aspects are stressed.

NOTE: This class cannot be used as a prerequisite for any other biochemistry class and is not normally accepted by the Faculties of Dentistry or Medicine in fulfilment of the requirement of a biochemistry class for admission.

INSTRUCTOR(S): P. Briggs

FORMAT: Lecture 3 hours, tutorial 2 hours

RESTRICTION: This class is restricted to students in the BScN and BHSc programs.

### BIOC 2300.03: Introduction to Biochemistry.

This class surveys basic topics and concepts of Biochemistry. The structures, properties and metabolic inter-relations of proteins, carbohydrates and lipids are considered together with an introduction to nutrition and metabolic control. Although mammalian examples predominate some consideration of special aspects of biochemistry of microbes and plants is included.

COORDINATOR: C. Wallace

NOTE: Students are advised to also take CHEM 2401.03 and 2402.03, or CHEM 2441.03. CHEM 2441 does not satisfy the prerequisite requirement for BIOC 3300.03 and BIOC 3700.03

FORMAT: Lecture 3 hours

PREREQUISITE: BIOL 1010.03 and 1011.03 (or equivalent), CHEM 1011.03 and 1012.03 (or equivalent), all with grades of B- or higher, or instructor's consent.

EXCLUSION: BIOC 2200.03

### BIOC 2610.03: Introductory Biochemistry Lab.

An introduction to fundamental techniques in Biochemistry through the exploration of the properties of essential biomolecules. This class is intended for students in Biochemistry and Molecular Biology and Microbiology Programs.

INSTRUCTOR(S): P. Briggs

FORMAT: Lab 3 hours

PREREQUISITE: BIOL 1010.03 and 1011.03 (or equivalent), CHEM 1011.03 and 1012.03 (or equivalent), all with grades of B- or higher, or instructor's consent.

EXCLUSION: BIOC 2200.03, BIOL 2010.03

CO-REQUISITE: BIOC 2300.03 and CHEM 2401.03 and CHEM 2402.03 or instructor's consent

### BIOC 3300.03: Intermediary Metabolism.

This class covers synthesis and catabolism of carbohydrates, lipids and some nitrogen compounds. Metabolic regulation is emphasized, including factors influencing the rate at which compounds flow through selected pathways. Compartmentalization of, inter-relationships between and environmental impact on metabolic pathways are considered. Laboratory exercises examine the techniques used to study metabolic pathways.

INSTRUCTOR(S): P. Briggs, N. Ridgway, C. Too, R. McLeod (Coordinator)

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: BIOC 2300.03 and BIOC 2610.03 (both with grades of B- or higher) and BIOL 2020.03 and BIOL 2030.03 and CHEM 2401.03 and CHEM 2402.03, or instructor's consent

### BIOC 3400.03: Nucleic Acid Biochemistry and Molecular Biology.

This class focuses on the relationship of structure to function in RNA and DNA. Methods for studying the primary, secondary, and tertiary structures of nucleic acids are explored in lectures and in the laboratory. Topics covered include enzymic mechanisms for biosynthesis, rearrangement, degradation, and repair of nucleic acid molecules, and processes of replication, transcription, and translation. Nucleic acid biochemistry is emphasized as a basis for understanding storage and transfer of biological information.

INSTRUCTOR(S): P. Liu, C. Slamovits, P. Briggs, J. Archibald (Coordinator)

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: CHEM 2401.03 and CHEM 2402.03, or CHEM 2441.03;

BIOL 2020.03 and BIOL 2030.03 (both with grades of B- or higher); BIOC 2300.03; or instructor's consent

### BIOC 3620.03: Experiential Learning in Biochemistry and Molecular Biology.

This class is an outside the classroom learning experience in which the student works in a research laboratory an average of one day per week acquiring biochemistry or molecular biology knowledge and skills.

COORDINATOR: M. Dobson

NOTE: To register in this class, students must first find a faculty member from the Department of Biochemistry & Molecular Biology willing to supervise the work experience and sign a learning agreement with the class coordinator. Grading will be Pass/Fail.

FORMAT: A minimum of 72 hours for the term, representing at least 6-8 hours weekly, working in a research laboratory, an activity log and a final written report.

PREREQUISITE: BIOC 2300, BIOC 2610, BIOL 2020, BIOL 2030 (all with a grade of B- or higher), CHEM 2401 and CHEM 2402.

EXCLUSION: The following may not be used towards BIOC 3620: lab work that is part of another scheduled class at a learning institution, study that would qualify for Special Topics classes, co-op work terms, and paid work. Only one experiential learning class per degree is permitted. The class is only open to students registered in Biochemistry & Molecular Biology Degree programs, either Major or Honours, combined or concentrated. Students may not take BIOC 3620 concurrently with BIOC 4604 or 4605.

### BIOC 3700.03: Biomolecular Chemistry.

This class covers structural and functional properties of biomolecules, including the physical bases for their characterization, thermodynamic principles of protein folding and biomolecular interactions, and the kinetics and mechanisms of enzyme catalysis.

INSTRUCTOR(S): S. Bearne (Coordinator), J. Rainey

FORMAT: Lecture 3 hours, labs 3 hours

PREREQUISITE: BIOC 2300.03 and 2610.03 (both with a grade of B- or higher),

CHEM 2401.03 and 2402.03, or instructor's consent

EXCLUSION: BIOC 3200.03

### BIOC 4001.03: Special Topics in Biochemistry.

Students interested in topics not covered in formal classes may ask the department for special classes to meet their needs. An Undergraduate Advisor will assist students to ascertain if faculty expertise is available to direct reading and the preparation of papers and seminars in a particular subject area.

COORDINATOR(S): C. Too

PREREQUISITE: BIOC 3300.03, 3400.03, and 3700.03 (average of B or higher and consent of coordinator)

### BIOC 4010.03: Bioinformatics.

This class presents the theory and practice of bioinformatics. Topics include: rate of mutation, sequence alignment, database searching, phylogenetic analysis, bioinformatic tools for analyzing genes, genomes and proteins.

INSTRUCTOR(S): A. Roger (Coordinator), C. Blouin

FORMAT: Lecture 3 hours with some computer-based labs

PREREQUISITE: BIOC 3400.03 or instructor's consent

CROSS-LISTING: BIOC 5010.03

### BIOC 4027.03: Molecular Mechanisms of Cancer.

The class focuses on the molecular mechanisms of cancer. Topics include: receptors and downstream signaling, oncogenes and tumor suppressors, cancer metastasis and angiogenesis, cell cycle control, and apoptosis.

INSTRUCTOR(S): P. Lee, D. Waisman

FORMAT: Lectures/student presentations/discussion

PREREQUISITE: Minimum grades of B+ in a 3000 level Biochemistry class and another 3000 level Biochemistry, Microbiology or Pathology class. Permission of instructor required

CROSS-LISTING: PATH 5027.03 and MICI 5027.03/4027.03

### BIOC 4302.03: Biochemistry of Lipids.

The biochemistry and metabolism of a variety of lipids is studied, especially of those, such as fatty acids, glycolipids, eicosanoids, steroids and phospholipids, with specialized physiological or lipid-second messenger functions. Intracellular and inter-tissue transport and regulatory processes are emphasized. The chemistry and physics of insoluble lipids in an aqueous environment are explored and problems in the interaction of lipids with soluble and insoluble enzymes are considered.

INSTRUCTOR(S): N. Ridgway (coordinator), A. Vanderspoel, B. Karten

FORMAT: Lecture 3 hours

PREREQUISITE: BIOC 3300.03 and 3700.03

### BIOC 4305.03: Mechanisms of Signal Transduction.

The emphasis of this class is to introduce concepts and key mediators of signal transduction. Topics include protein kinases, tumour suppressors, oncogenes, G-protein coupled receptors, calcium signalling, lipids in signalling, integration of signalling cascades, cytoskeletal reorganization, cellular metastasis, apoptosis, anoikis, genomic stability, and stem cell biology.

INSTRUCTOR(S): P.A. Marignani (Coordinator), K. Rosen

FORMAT: Lecture 3 hours, oral presentations

PREREQUISITE: BIOC 3300.03, 3400.03, and 3700.03 or instructor's consent

EXCLUSION: BIOC 4301.03

### BIOC 4306.03: Nutritional Biochemistry.

Appropriate nutrition is essential for health and reflects the basic biochemistry of the organism. Changes in the human diet can impact health and disease. This class considers the principles of optimal nutrition in a biochemical context and the role of nutrition in disease etiology and treatment.

INSTRUCTOR(S): R. McLeod

FORMAT: Lectures/student presentations

PREREQUISITE: BIOC 3300.03, BIOC 3400.03, BIOC 3700.03 or instructor's permission

### BIOC 4403.03: Genes and Genomes.

This class discusses the organization of genes into genomes. It deals with (i) compartmentalization of genetic material in nuclear and organellar genomes, (ii) the structure, behaviour and origins of components of both nuclear and organellar genomes which are not genes (transposable and other repetitive elements, introns), (iii) genetic and physical methods for mapping genomes, and (iv) the significance of genetic organization and higher order chromosomal structure and function. The methodology and prospects of genomics are discussed at some length.

INSTRUCTOR(S): P. Liu

FORMAT: Lecture 3 hours

PREREQUISITE: BIOC 3400.03 or instructor's consent

CROSS-LISTING: BIOC 5403.03, MICI 4403.03

### BIOC 4404.03: Gene Expression.

The different mechanisms for regulation of gene expression in bacterial and eukaryotic cells, and their viruses, are emphasized. Particular topics include genomic, transcriptional, and post-transcriptional modes of regulation.

INSTRUCTOR(S): R. Singer

PREREQUISITE: BIOC 3400.03 or instructor's consent

CROSS-LISTING: BIOC 5404.03

### BIOC 4501.03: Medical Biotechnology I.

This class covers fundamental principles of biotechnology from a medical perspective. Topics discussed include: recombinant DNA technology, polymerase-chain reaction-based applications, DNA microarrays, immunochemical techniques and applications, production of transgenic organisms, potential applications for embryonic stem cell and nuclear transfer cloning, business and legal aspects of biotechnology.

INSTRUCTOR(S): M. Dobson

FORMAT: Lecture 3 hours, discussion, presentations

PREREQUISITE: BIOC 3400.03 or instructor's consent

CROSS-LISTING: BIOL 5105.03, and BIOC 5501.03

### BIOC 4604.03: Research Project I.

This class requires original biochemical research in the laboratory of a faculty member, and requires the equivalent of at least one day per week to be spent in the laboratory. A report is submitted at the end of the term.

COORDINATOR(S): S. Bearne

NOTE: This class is intended to be taken in conjunction with BIOC 4605.03 and no credit can be given for one class without the other. The work undertaken in BIOC 4605.03 should be a continuation of that initiated in BIOC 4604.03 and hence the report submitted for BIOC 4605.03 may include data and analysis incorporated in the BIOC 4604.03 report. In exceptional cases, the research project can be done outside the Department of Biochemistry and Molecular Biology. Prior approval must then be obtained from the class coordinator.

FORMAT: Lab 1 day per week

PREREQUISITE: Permission of coordinator and a member of the Department who will serve as supervisor. At least a B average for BIOC 3300.03, 3400.03 and 3700.03.

### **BIOC 4605.03: Research Project II.**

This class requires original biochemical research in the laboratory of a faculty member, and requires the equivalent of at least one day per week to be spent in the laboratory. A report is submitted at the end of the term.

COORDINATOR(S): S. Bearne

NOTE: This class is intended to be taken in conjunction with BIOC 4604.03 and no credit can be given for one class without the other. The work undertaken in BIOC 4605.03 should be a continuation of that initiated in BIOC 4604.03 and hence the report submitted for BIOC 4605.03 may include data and analysis incorporated in the BIOC 4604.03 report. In exceptional cases the research project can be done outside the Department of Biochemistry & Molecular Biology. Prior approval must then be obtained from the class coordinator.

FORMAT: Lab 1 day per week

PREREQUISITE: BIOC 4604.03

### **BIOC 4700.03: Proteins.**

Our theme is the relationship between structure and function. The kinetic and thermodynamic determination of the protein fold is explored. Specific details of how form determines function in binding other molecules both small and large in membranes, and in energy transduction are provided. Protein evolution and turnover are examined.

NOTE: Some weeks, in addition to lectures, students will independently research and write about specialized topics suggested by the instructor and occasionally present these to a class in discussion group format.

INSTRUCTOR(S): C. Wallace

FORMAT: Lecture 3 hours

PREREQUISITE: BIOC 3700; or (CHEM 3601 AND CHEM 2301 AND CHEM 2304), all with grades of B or higher or instructor's consent.

CROSS-LISTING: BIOC 5700.03

### **BIOC 4701.03: Enzymes.**

Fundamental principles of enzyme catalysis and its regulation are examined. Topics include enzyme kinetics, enzyme inhibition and inactivation, isotope effect measurements, site-directed mutagenesis, and the active site architecture and transition state stabilization of selected enzymes. Classic and current papers in the literature are reviewed and the experimental and conceptual approaches are critically appraised.

INSTRUCTOR(S): S. Bearne

FORMAT: Lecture 3 hours

PREREQUISITE: BIOC 3700.03; or (CHEM 3601 AND CHEM 2301 AND CHEM 2304), all with grades of B or higher or instructor's consent.

CROSS-LISTING: BIOC 5701.03

### **BIOC 4702.03: Biophysical Characterization of Macromolecules.**

This class covers methods allowing determination of sub-molecular and atomic-level structure and dynamics of biomacromolecules in physiological settings (e.g. solution-state or lipid bilayers) including: fluorescence, electronic and vibrational circular dichroism and NMR spectroscopy; light vs. X-ray vs. neutron scattering; and, single molecule methods.

INSTRUCTOR(S): J. Rainey

FORMAT: Lecture 2.5 hours Seminar/tutorial 0.5 hours

PREREQUISITE: BIOC 3700.03; or (CHEM 3601 AND CHEM 2301 AND CHEM 2304), all with grades of B or higher or instructor's consent.

Recommended: PHYC 1280.03/1290.03 or 1300.06

CROSS-LISTING: BIOC 5702.03, CHEM 5602.03, CHEM 4602.03

### **BIOC 4804.03: Introduction to Pharmacology I.**

This introductory class is designed to acquaint students with the actions of drugs on physiological and biochemical functions in mammals including humans. Factors which affect the blood levels of drugs (absorption, distribution, metabolism, and elimination) are considered, together with the mechanisms by which drugs act and their potential uses. The interaction of drugs with various

body systems is covered, including the central and peripheral nervous systems and the cardiovascular system. Drugs that assist or regulate host defence mechanisms are also studied.

COORDINATOR(S): M.E.M. Kelly

FORMAT: Lecture 3 hours

PREREQUISITE: This course is restricted to third or fourth year students, or graduate students. Other students may be admitted with permission of the course coordinators. A previous class in biochemistry and in physiology is recommended. Extra reading will be required of students without these classes.

CROSS-LISTING: PHAC 5406.03, BIOL 4404.03, and NESC 4374.03

### **BIOC 4806.03: Introduction to Pharmacology II.**

This class covers specific aspects of drug action not covered in BIOC 4804.03.

The class includes: drug receptor signaling, ion channels, second messengers, G-proteins, plus specific consideration of drugs used for pain, inflammation, cancer, diabetes, asthma, and diseases of the thyroid, eye and gastrointestinal tract.

Special pharmacological topics including addition and drug abuse, treatment of Parkinson's disease, treatment of epilepsy and the use of stem cells in modern medicine are included.

COORDINATOR(S): D. Dupre

FORMAT: Lecture 3 hours

PREREQUISITE: BIOL BIOL 4804.03 (with a grade of B or better)

CROSS-LISTING: PHAC 5409.03, BIOL 4407.03, and NESC 4376.03

EXCLUSION: BIOL 4405.03

### **BIOC 4813.03: Biochemistry of Clinical Disorders.**

This class is an introduction to the pathophysiology of disease. It provides the clinical and biochemical background to disease groups and system disorders and the laboratory approach to their diagnosis. Topics include cardiovascular, renal, gastrointestinal and hepatobiliary disorders, addiction to acid base, carbohydrate, lipid and amino acid disorders; endocrine and rheumatological diseases, as well as tumor markers and toxicology, blood and immune abnormalities.

FORMAT: Lecture and case discussion

PREREQUISITE: BIOC 3300.03 and BIOC 3400.03 and BIOC 3700.03 or consent of instructor

CROSS-LISTING: PATH 5013.03

EXCLUSION: BIOC 4811.03 and BIOC 4812.03

### **BIOC 4835.03: Human Genetics.**

For science students with special interest in human genetics. Topics include errors of metabolism, human development, transmission genetics, DNA structure, gene function, mutation and chromosomal alterations, population genetics, genetics of immunity and cancer, genetic technology in medicine, and ethical and social issues related to medical genetics.

COORDINATOR(S): W.L. Greer

FORMAT: Lecture 3 hours, tutorial 2 hours

PREREQUISITE: BIOC 3400.03 or permission from instructor

CROSS-LISTING: BIOL 4035.03, 5035.03, PATH 5035.03

### **BIOC 8891.00: Co-op work term 1.**

### **BIOC 8892.00: Co-op work term 2.**

### **BIOC 8893.00: Co-op work term 3.**

### **BIOC 8894.00: Co-op work term 4.**

Swain, D. P., PhD (UBC)  
Wang-Pruski, G., BSc (China), PhD (Alberta)  
Wong, M., BSc (Mt. A), PhD (UNB)  
Whoriskey, F., PhD (Brown)

## Honorary Research Associates

Horn, A., PhD (Toronto)  
Weilgart, L., PhD (Dalhousie)

## Senior Instructors

Beauchamp, C., BSc., MSc (Memorial), BEd (Dalhousie)  
Bishop, T., BSc, MSc (MUN)  
McAllister-Irwin, N., PhD (Dalhousie)  
McCarville, M., BSc, MSc (Dalhousie)  
Staples, E., BSc (Dalhousie), BEd (MSVU)  
Welsh, E., BSc, (McMaster), MSc (Guelph), BEd (Dalhousie)  
Van Dommelen, J.A., MSc (Dalhousie)

## Instructors

Cooper, M., PhD (Dalhousie)  
Gass, G., PhD (Toronto)  
Gibson, L., BSc (UVic), MSc (Dalhousie)  
Schmidt, A., MSc (Dalhousie)

## Post Doctoral Fellows

Eddy, T., PhD (UVic)  
Liu, H., PhD (China Agricultural University)  
Park, J.S. PhD (Seoul)  
Roy, D., PhD (V. Windsor)  
Tittensor, D., PhD (Dalhousie)

## Areas of Specialty of Biology Faculty

Animal Biology: S. Iverson, M. Leonard, I. McLaren, A. Pinder, C. Staicer.  
 Cell Biology: P. Côté, T. MacRae, W. Pohajdak, A. Gunawardena, S. Stone.  
 Developmental Biology: B.K. Hall, T. MacRae, A. Pinder, S. Stone  
 Ecology/Environmental Science: P. Bentzen, B. Freedman, J. Hutchings, M. Johnston, P. Lane, H. Lotze, R. Latta, M. Leonard, T. Romanuk, D.E. Ruzzante, R. Scheibling, C. Staicer, S. Walde, H. Whitehead  
 Evolutionary Biology: J. Bielawski, P. Bentzen, C.M. Herbing, J. Hutchings, M. Johnston, R. Latta, D.E. Ruzzante, A. Simpson  
 Genetics: J. Bielawski, P. Bentzen, C.M. Herbing, M. Johnston, R. Latta, D.E. Ruzzante  
 Genomics: J. Bielawski, A. Simpson  
 Marine Biology: P. Bentzen, C.M. Herbing, J. Hutchings, S. Iverson, P. Lane, H. Lotze, A. Pinder, T. Romanuk, D.E. Ruzzante, R. Scheibling, H. Whitehead  
 Molecular Biology: T. MacRae, B. Pohajdak, J. Wright, S. Stone  
 Physiology: S. Iverson, A. Pinder  
 Plant Biology: B. Freedman, A. Gunawardena, M. Johnston, R. Latta, S. Stone  
 Population and Conservation Genetics: P. Bentzen, C.M. Herbing, R. Latta, D.E. Ruzzante  
 Protistology: A. Simpson

## I. Degree Programs

The department offers the following degree programs in Biology:

- BA or BSc (20 credit) Honours (Concentrated, Combined, or Multidisciplinary)\*
- BA or BSc (20 credit) Major\*
- BA or BSc (20 credit) Double Major\*
- BA or BSc (15 credit) Minor

Departmental requirements for these programs are described below. In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, of this calendar.

Departmental Requirements for all Biology programs have changed effective 2005/2006. Please note that a student is governed by the academic regulations in place at the time of initial enrolment as long as the degree is completed within the time permitted, and that subsequent changes in regulations shall apply only if the student so elects. Students applying the old academic regulations should consult the calendar of the appropriate year.

Students should plan their program of study carefully and are encouraged to do so in consultation with a departmental academic advisor.

The department also offers degree programs in Marine Biology. Please consult the Marine Biology section of this calendar.

\* BSc Co-op option available.

## A. Co-operative Education Program in Biology

The Department of Biology offers a Co-operative Education Program for Biology Major, Double Major, and Honours students.

Co-operative Education in Science (Science Co-op) is a program where academic study is combined with paid career related work experience. Students alternate three to four work terms throughout their academic study terms and graduate with a Bachelor of Science, Co-op. Science Co-op enables students to apply their knowledge directly while providing them with work experience that assists in making educated career choices. Students apply to join Science Co-op before their second year of study begins. If accepted into the Science Co-op program, students are required to register for and attend the Science Co-op Seminar Series (SCIE 2800.00) in the fall term of the year they join.

See the "Co-operative Education in Science" section of this calendar, or visit <http://sciencecoop.dal.ca/>, for information on Science Co-op such as Science Co-op requirements, eligibility, how to apply, deadlines and other related information.

Students interested in pursuing a Biology Co-op Degree should contact the Biology Co-op Academic Advisor, Mindy McCarville ([Mindy.McCarville@dal.ca](mailto:Mindy.McCarville@dal.ca)) DURING THEIR FIRST YEAR OF STUDY for program details. A limited number of students will be admitted into this program each year.

## B. BA or BSc (20 credit) Honours Biology

Students will not normally be officially registered into an Honours program until their third year, after they have completed at least most of the required second and third year classes and earned the specified 3.0 GPA in them. Students may be admitted into a program without having completed all of the second and third year required classes but their ultimate graduation with an honours degree will be conditional upon achieving a 3.0 average in these classes.

Students considering doing an honours program are encouraged to consult a departmental honours record form which lists the classes which are required. These forms are available in the Biology Main Office in LSC 2078 and at <http://www.biology.dal.ca> (Undergraduate Program). Students should also attend the Cameron Conference for Honours Students which is held in the department in February of each year. This is an excellent opportunity to talk to honours students who are in the final year of their program and to find out about the thesis research, the process of finding honours supervisors and other issues related to an honours program.

It is the responsibility of students to arrange for a supervisor for their thesis research. Honours theses may be supervised by a faculty member of the Biology department, or by an external scientific investigator, subject to the approval of the Honours committee. A list of external researchers who have previously served as Honours supervisors and are therefore approved to supervise future Honours students is posted on the Honours bulletin board outside the Biology Main Office in LSC 2078 and is on the Honours Website. Students should begin to search for a potential supervisor during their third year of study and **should have completed arrangements by May of their third year**. If students wish to be supervised by someone external to the Department who has not been previously approved by the Honours committee, they must consult with their Honours advisor to determine this potential supervisor's eligibility.

## Departmental Requirements

See the following sections of the calendar: "Academic Regulations," "Degree Requirements" and "Graduation Standing" for the number of classes and the grade level required for Concentrated, Combined, or Multidisciplinary Honours Programs. To register for a Multidisciplinary Program, students meet with the Chairs of each of the Departments with which they wish to design a program. To register for a Concentrated or Combined Honours Program in Biology, students meet with a Biology Honours advisor. ***In addition*** to the University requirements for an Honours degree, students taking **ANY TYPE** of Biology Honours Program, even if Biology is the Allied subject of a Combined program, **MUST TAKE THE FOLLOWING CLASSES.**

### Classes required in all Biology Honours Programs

#### 1000 level

- BIOL 1010.03 or BIOL 1020.03 (minimum grade of C-)
- BIOL 1011.03 or BIOL 1021.03 (minimum grade of C-)
- CHEM 1011.03/1012.03

OR

- SCIE 1515X/Y.36, SCIE 1520X/Y.30 or SCIE 1540.27 (minimum grade of C-)

### A "B" average (3.0) must be attained in the following 2000 and 3000 level required biology classes.

A maximum of two of these required classes may be repeated in an attempt to achieve this grade point average. Students in ANY type of Biology honours program, even if Biology is the Allied Subject and not the major area of concentration, MUST take all of these second and third year required classes and earn a 3.0 GPA.

#### 2000 level

- BIOL 2020.03
- BIOL 2030.03
- BIOL 2040.03 (or BIOL 3041.03 prior to 2005)
- BIOL 2060.03
- BIOL 2003.03 (or 2 of BIOL 2001, 2002, 2101 prior to 2005)
- BIOL 2004.03 (or 2 of BIOL 2001, 2002, 2101 prior to 2005)

#### 3000 level

- At least one class from BIOL 3050.03, BIOL 3078.03 AND BIOL 3079.03, and PHYL 2030X/Y.06 (PHYL 2030X/Y.06 will be counted as a second year level Biology credit)
- See recommendations under II. Class Selection Guidelines

**4000 level**

- BIOL 4900X/Y.06 (for those in Concentrated Honours and Combined Honours programs in which Biology is the major area of study)
- Honours Qualifying exam (graded as Pass/Fail and based on participation in BIOL 4900X/Y.06 class and the Cameron Conference for Honours students)
- NOTE: A minimum of nine credits in Biology above the 1000 level, including two credits above the 2000 level are required for the Honours degree.

**Other Recommended Classes**

- PHYC 1300X/Y.06 or 1280.03 and 1290.303
- STATS 1060.03 and MATH 1000.03 or 1215.03

**C. BA or BSc (20 credit) Major in Biology****Departmental Requirements****1000 level**

- BIOL 1010.03 or BIOL 1020.03 (minimum grade of C-)
- BIOL 1011.03 or BIOL 1021.03 (minimum grade of C-)
- CHEM 1011.03/1012.03

OR

- SCIE 1515.36, SCIE 1520.30 or SCIE 1540.27 (minimum grade of C-)

**2000 level**

- BIOL 2020.03
- BIOL 2030.03
- BIOL 2040.03
- Any TWO of BIOL 2003.03, BIOL 2004.03, BIOL 2060.03
- One additional half (0.5) Biology credit at or above the 2000 level

**3000 level**

- Minimum of three full credits at or above the 3000 level for a BA
- Minimum of four full credits at or above the 3000 level for a BSc
- See recommendations under **II. Class Selection Guidelines**

**D. BA or BSc (20 credit) Double Major in Biology****Departmental Requirements****1000 level**

- BIOL 1010.03 or BIOL 1020.03 (minimum grade of C-)
- BIOL 1011.03 or BIOL 1021.03 (minimum grade of C-)
- CHEM 1011.03/1012.03

OR

- SCIE 1515.36, SCIE 1520.30 or SCIE 1540.27 (minimum grade of C-)

**2000 level**

- BIOL 2020.03
- BIOL 2030.03
- BIOL 2040.03
- Any TWO of BIOL 2003.03, BIOL 2004.03, BIOL 2060.03
- One additional half (0.5) Biology credit at or above the 2000 level

**3000 level**

- Minimum of two Biology full credits at or above the 3000 level
- See recommendations under **II. Class Selection Guidelines**

**E. BA or BSc (15 credit) Minor in Biology**

Departmental requirements for this program are described below. In addition to the departmental requirements, students must satisfy the requirements outlined in the Degree Requirements section of this calendar.

**Departmental Requirements**

BSc degree: A minimum of three and a maximum of six full credits in Biology (BIOL) at the 2000 level or higher.

BA degree: A minimum of three and a maximum of four and a half full credits in Biology (BIOL) at the 2000 level or higher.

Please note that entry into upper level Biology (BIOL) classes requires completion of one full credit with a minimum grade of C- at the first year level (BIOL 1010.03 or BIOL 1020.03) and (BIOL 1011.03 or BIOL 1021.03) or DISP (SCIE 1515.36 or SCIE 1520.30 or SCIE 1540.27) or equivalent.

**F. Minor Program in Biology**

Students in a 20 credit degree program other than Biology or Marine Biology may choose to complete a Minor Program in Biology. A Minor in Biology is offered to students enrolled in other programs within the Faculty of Science and to students from other faculties, provided they complete the requisite classes. NOTE: Classes counted toward a 20 credit Major or Honours program may not be used to fulfill the requirements of a Minor Program.

To obtain a Minor in Biology, a student must successfully complete:

A minimum of three and a maximum of six full credits in Biology (BIOL) at the 2000 level or higher.

Please note that entry into upper level Biology (BIOL) classes requires completion of one full credit with a minimum grade of C- at the first year level (BIOL 1010.03 or BIOL 1020.03) and (BIOL 1011.03 or BIOL 1021.03) or DISP (SCIE 1520.30 or SCIE 1540.27) or equivalent.

**G. Minor Programs available to students enrolled in a Major or Honours Biology Program**

Minor programs allow students to develop subject specialities outside their main area of study. Minors are normally added to a four-year major or concentrated honours program. If a minor is added to a double major or a combined honours program, students may find that they need to take more than 20 credits to complete all of their degree requirements. NOTE: Classes counted toward a 20 credit Major or Honours program may not be used to fulfill the requirements of a Minor Program.

Combined with a four-year degree program in Biology, minor programs are available in the following areas.

*Minors in other Faculty of Science programs (see 5.a, page 135)*

*Minors offered by the Faculty of Arts and Social Sciences (see 5.a, page 135)*

*Minors in other Faculties (see 5.b, page 135)*

**H. BSc/Engineering or BA/Engineering Concurrent Programs**

Students will normally complete the requirements for a 15 credit BSc or 15 credit BA, and the first two years of engineering studies leading to the Diploma in Engineering. The concurrent program can be completed in three years. Details are provided in the College of Arts and Science Degree Requirements in the calendar.

**I. Diplomas, Certificates, and Language Proficiency Certificates**

A number of certificate programs are available to students enrolled in an Honours, Major or Minor program in Biology. NOTE: Classes counted toward a Major, Honours or Minor program may also be used to fulfill the requirements of a Certificate.

**J. Certificates offered by other departments.****1. Certificates offered by the Biology Department:****Certificate in Animal Behaviour**

The certificate program is a collaborative effort of both the Biology and Psychology departments. It provides students an opportunity to take, within their BA or BSc Honours or Major program, a set of classes and a research project that will accord them an animal behavior specialization. Completion of the Certificate will be shown on a student's transcript.

**Certificate requirements:**

1. A minimum grade of a B- is required in **four** mandatory classes:

NESC/PSYO 2160.03 Animal Behaviour

PSYO 2501.03 Statistical Methods 1 or Stat 2080.03 Statistical Methods for Data Analysis and Inference

BIOL 3062.03 Behavioral Ecology

BIOL 3630.03 Field Methods in Animal Behaviour or NESC/PSYO 3161.03 Measuring Behaviour

2. A grade of B- in **two** full credits of elective classes chosen from the following list. One of the two-full credits must be at the 3000/4000 level.

### 2000 Level

NESC/PSYO 2140.03 Learning  
NESC/PSYO 2170.03 Hormones and Behaviour  
NESC/PSYO 2470.03 Systems Neuroscience

### 3000 Level

BIOL 3327.03 Entomology  
BIOL 3622.03 Ornithology  
BIOL 3067.03 Ecology and Evolution of Fishes  
BIOL 3626.03 Field Studies of Marine Mammals  
NESC/PSYO 3000.06 Independent Research in Modern Psychology (Animal Behaviour topic)  
NESC/PSYO 3001.03 Directed Research Project in Psychology (Animal Behaviour topic)  
NESC/PSYO 3043.03 Neurobiology and Learning  
NESC/PSYO 3044.03 Laboratory Methods of Learning and Conditioning  
NESC/PSYO 3162.03 Advanced Animal Behaviour (subject to approval)  
NESC/PSYO 3165.03 Neuroethology  
NESC/PSYO 3180.03 Psychoneuroimmunology/Ecological Immunology  
NESC/PSYO 3670.03 Genes, Brain and Behaviour

### 4000 Level

NESC/PSYO 4160.03 Topics in Behavioural Biology  
BIOL 4060.03 Marine Mammalogy  
BIOL 4806.03, BIOL 4807.03 Special topics (Animal Behavior topic)

3. A grade of B- in **one half credit or more** of independent research in Animal Behaviour.

The research topic must be pre-approved by the Certificate Coordinator prior to the start of their research class (i.e., NESC/PSYO 3000.06, NESC/PSYO 3001.03, NESC/PSYO 4500.06, BIOL 4800XY.06, BIOL 4806.03, BIOL 4007.03, or BIOL 4900.06). Honours students are encouraged to complete their Honours thesis on a topic in Animal Behaviour to fulfill this requirement.

Students are also encouraged to further develop their study design and analysis skills by taking additional classes such as BIOL 4061.03 (Design of Biological Experiments) or BIOL 4062.03 (Analysis of Biological data).

4. Enrollment in the 'Certificate in Animal Behaviour' program should be undertaken by students in their third or fourth year of studies when they are seeking approval of the research topic by the Certificate Coordinator.

The Certificate Coordinator will be named by the Animal Behaviour Working Group (S. Adamo, S. Gadbois, M. Leonard, C. Staicer).

## 2. Certificate in Environmental Impact Assessment (EIA)

The Faculty of Science offers a Certificate in Environmental Impact Assessment for students majoring in environmental areas and wishing to pursue additional training in EIA. This certificate is also available for students in International Development Studies (IDS) in the Faculty of Arts and Social Sciences and the College of Sustainability. Completion of the Certificate will be shown on a student's transcript.

Students must have received a minimum grade of B for all classes counted toward the certificate.

The Certificate requires four full credits for completion in the following categories:

1. Required EIA CLASS: BIOL 4001.03 or ENVS 4001.03 or ENVE 4772.03 (0.5 credits) to be taken in the fourth year.
2. Introductory Class in Science or IDS (Table 1) (minimum of 0.5 credits)
3. 3rd Level Environmental Classes with largely theoretical content from Table 2 (minimum of 1.5 credits)
4. 3rd Level Methods Classes that provide field, laboratory, statistical, modelling and related experience from Table 3 (minimum of 0.5 credits)
5. 3rd and 4th Level Supplementary Classes in Major and Related Disciplines from Table 4 (minimum of 1.0 credits)

Note: As usual, students will be required to meet the stated pre-requisites of all classes listed below or the permission of the instructor. Several classes on Tables 1-4 include cross-listings that are given in parentheses. No class can be included twice for the Certificate using different cross-listings.

Disclaimer: This Certificate in EIA has been developed within Dalhousie University and it is not designed to fulfil any governmental and/or professional requirements outside of the university in Canada or abroad.

### Certificate Requirements:

**Table 1. Introductory Classes (minimum of 0.5 credits from the following list)**

BIOL 2060.03 Introductory Ecology  
ERTH 2410.03 Environmental Issues in Earth Science  
ENVS 1000X/Y.06 Introduction to Environmental Science  
GEOG 2100 X/Y.06 Environment and Culture (SOSA 2100.06)  
INTD 2001.03 Introduction to Development 1 (GEOG 2201.03)  
INTD 2002.03 Introduction to Development 2 (GEOG 2202.03)  
OCEA 2000X/Y.06 (or OCEA 20001.03 + OCEA2002.03) The Blue Planet  
SUST 2000.06 Humanity in the Natural World  
SUST 2001.06 Environment, Sustainability and Governance: A Global Perspective

**Table 2. Theory-Based Classes (minimum of 1.5 credits from the following list)**

BIOL 3060.03 Environmental Ecology  
BIOL 3061.03 Communities and Ecosystems  
BIOL 3062.03 Behavioural Ecology  
BIOL/MARI 3063.03 Resource Ecology  
BIOL 3065.03 Conservation Biology  
BIOL 3069.03 Population Ecology  
BIOL 3601.03 Nature Conservation  
ERTH 3400.03 Fundamentals of Hydrogeology  
ERTH 3410.03 Environmental Geology II  
ERTH 4440.03 Geomorphology and Landscape Evolution  
ENVS 3200.03 Introduction to Environmental Law  
ENVS 3501.03 Environmental Problem Solving I  
ENVS/ERTH 3601.03 Global Biogeochemical Cycles  
GEOG/ERTH 3440.03 Geomorphology  
INTD/GEOG 3114.03 Environment and Development  
MARI/BIOL 3067.03 Ecology and Evolution of Fishes  
MARI/BIOL 3761.03 Marine Ecology  
MGMT 3701.03 Resource and Environmental Problem Solving 1: Sustainable Ecosystems  
MGMT 3702.03 Resource and Environmental Problem Solving 2: Sustainable Industries  
OCEA 3001.03 Introduction to Physical Oceanography  
OCEA 3002.03 Introduction to Chemical Oceanography  
OCEA 3003.03 Introduction to Biological Oceanography  
PLAN 3010.03 Urban Ecology  
SOSA 2260.03 Society, Politics and Culture  
SOSA 3060.03 Social Change and Development  
SUST 3000.03 Global Approaches to Environmental Decision-Making

**Table 3. Field and Methods-based Classes (minimum of 0.5 credits from the following list)**

BIOL 2601.03 The Flora of Nova Scotia  
BIOL/MARI 3003.03 Dynamics of Biological Oceanography  
BIOL/MARI 3221.03 Diversity of Algae

 OCEA/BIOL/MARI 4335.03 Environmental Impacts in Marine Ecosystems  
 SUST 4000.06 ESS Capstone

### 3. Certificate in Geographic Information Science

The Environmental Science programs and the Departments of Earth Sciences and Biology offer a Certificate in Geographic Information Science. The certificate is intended to reflect that the student has completed classes of study in geographic information systems and geomatics that are appropriate for further study or employment related to geographic information science. This Certificate can be completed by a student in a BSc program, in addition to the student's regular program requirements and completion of such a Certificate would be shown on the student's transcript.

Students should enrol in the "Certificate in Geographic Information Science" by contacting the Certificate Coordinators (Charlie Walls, Earth Sciences or Dr. Daniel Rainham, Environmental Science or Dr. Cindy Staicer, Biology). Students can enrol when in their second, third or fourth year of the BSc program, but early enrolment is advised.

#### Certificate Requirements:

- Students must complete the following classes, with a minimum grade of B- in each:  
 EARTH/GEOG/ ENVS 3500.03 Geoscience Information Management  
 EARTH/GEOG 4520.03 GIS Applications to Environmental and Geological Sciences
- In addition students must complete at least two of the following classes, with a minimum grade of B- in each:  
 GEOG 2000.03: Cartography  
 GEOG 2006.03: Space, Place and GIS  
 ENVS 2100.03: Environmental Informatics  
 ENVS/GEOG 3400.03: Environment and Human Health  
 BIOL/ENVS/GEOG 3633.03 Spatial Information and GIS in Ecology  
 EARTH/GEOG 4530.03 Environmental Remote Sensing

- In addition, students must complete a research project with an emphasis in geomatics or geographic information science (as pre-approved by the Certificate Coordinators) via one of the following sets of classes, with a minimum grade of B-:

#### Set A: Earth Sciences

- ERTH 3500.03 (cross-listed with GEOG 3500.03 and ENVS3500.03)  
 OR EARTH 4530.03 (cross-listed with GEOG 4530.03)  
 OR EARTH 4100.06 (Research Project)  
 OR EARTH 4200.06 (Honours Thesis)

#### Set B: Environmental Science

- ENVS 3400.03 (cross-listed with GEOG 3400.03)  
 OR ENVS 3801.03 (Directed Reading)  
 OR ENVS 4901.03 (Honours Thesis)  
 OR ENVS 4902.03 (Honours Thesis)

#### Set C: Biology

- BIOL/MARI 4900.06 Honours Thesis  
 OR BIOL/MARI 4901.03 Honours Thesis  
 OR BIOL/MARI 4902.03 Honours Thesis  
 OR BIOL/MARI 4806.03 Special Topics  
 OR BIOL/MARI 4807.03 Special Topics

## II. Class Selection Guidelines

Biology is a large and diverse field, and students enroll in Biology programs with a corresponding diversity of interests and goals. While we encourage students to sample broadly across the various biological disciplines during their undergraduate years, we recognize that many students wish to emphasize one or more general areas within Biology. To help students select classes that fit their interests and goals, we have identified three general areas in Biology: **A. Ecology and Evolution, B. Organismal Biology, C. Cell/Molecular Biology.** Below, we list classes associated with each area, and provide recommendations for designing individual programs at the third and fourth year levels.

**IMPORTANT: Students should choose 2000 level classes in their second year with care, so that they will have the necessary pre-requisites to enroll in third and fourth year classes in their interest areas.**

**NOTE: THESE ARE NOT REQUIREMENTS. STUDENTS MAY SELECT CLASSES FROM ANY OR ALL AREAS, PROVIDED THEY MEET REQUIREMENTS FOR THEIR DEGREE PROGRAM.**

### A. Ecology and Evolution

Ecology and Evolution (E&E) spans a broad range of concepts and applications from ecosystem ecology through population ecology to molecular evolution. A well-rounded class of study in Ecology or Evolution or both will include some classes in basic principles applicable to all organisms and habitats/ecosystems, as well as more specific classes on the details of how these principles play out in particular situations (e.g. taxa, habitats), and how these principles are applied to real world problems. In addition, a well-trained student in E&E should have both well developed numerical skills as well as exposure to the application of E&E in broader society.

It is recommended that students wishing to emphasize E&E in their degree program select third and fourth year classes as follows:

- Three half credits from the Principles group (see below)
- At least one half-credit from each of
  - Biodiversity
  - Ecosystems or Evolution
  - Applications
  - Methods and Data Skills
- Two half credits of Statistics (Stat 1060 and 2080)
- A half-credit in calculus (MATH 1000 or MATH 1215)
- One half-credit class with a field component (marked <sup>F</sup> below)

**Principles:** BIOL 3042, BIOL 3044, BIOL 3046, BIOL 3061, BIOL 3062, BIOL 3065, BIOL 3069, BIOL 3101

**Biodiversity:** BIOL 3067, BIOL 3221, BIOL 3301, BIOL 3322, BIOL 3327, <sup>F</sup>BIOL 3620 <sup>F</sup>BIOL 3622, <sup>F</sup>BIOL 3626, BIOL 4060

**Ecosystems:** BIOL 3101, <sup>F</sup>BIOL 3664, <sup>F</sup>BIOL 3761, BIOL 4370, BIOL 4661, BIOL 4666, OCEA 3001, OCEA 3002, OCEA 3003, OCEA 3004

**Evolution:** BIOL 3102, BIOL 3326, EARTH 2205, EARTH 2420

**Applications:** BIOL 3060, BIOL 3063, BIOL 3225, BIOL 3226, BIOL 3580, BIOL 3600, BIOL 3601, <sup>F</sup>BIOL 3623, <sup>F</sup>BIOL 3624, BIOL 4065, BIOL 4160, PSY 2670, HSTC 2204

**Methods & Data Skills:** <sup>F</sup>BIOL 3664, <sup>F</sup>BIOL 3680, BIOL 4034, BIOL 4061, BIOL 4062, BIOL 4063

## B. Organismal Biology

Organismal biology includes areas such as development, physiology and anatomy, as well as the study of particular taxonomic groups. Students interested in organismal biology are encouraged to select classes from the following:

**Developmental Biology:** BIOL 3050, BIOL 4050

**Physiology/Anatomy:** BIOL 3078, BIOL 3079, BIOL 3326, BIOL 3421, BIOL 3430, PHYL 3120, PHYL 3140, BIOL 4074, BIOL 4404

**Microbes:** BIOL 2004, BIOL 3101, BIOL 3102, BIOL 3113, BIOL 4020

**Algae/plants:** BIOL 3221, BIOL 3225, BIOL 3226

**Animals:** BIOL 3067, BIOL 3301, BIOL 3322, BIOL 3326, BIOL 3327, BIOL 3622, BIOL 3626, BIOL 4060, EARTH 2420

**Organisms in the environment:** BIOL 3062, BIOL 3101, BIOL 3600, BIOL 3615, BIOL 3620, BIOL 3623, BIOL 3630, BIOL 3664, BIOL 4369, BIOL 4370

**General:** BIOL 3024, BIOL 3404, BIOL 3503, BIOL 3580, BIOL 4061, BIOL 4062, BIOL 4063, BIOL 4664

## C. Cell/Molecular Biology

Cell/molecular biology includes areas such as cell biology, molecular biology, genetics, biochemistry, microbiology, development, evolution and biotechnology. Students interested in cell/molecular biology are encouraged to consider classes from selections in the following departments.

**Biology:** BIOL 3020, BIOL 3046, BIOL 3102, BIOL 4035

**Microbiology:** \*MICI 2100, \*MICI 3033, \*MICI 3114, \*MICI 3115

**Biochemistry:** \*BIOC 2300, \*BIOC 2610, \*BIOC 3200, \*BIOC 3300, \*BIOC 3400, \*BIOC 4010, \*BIOC 4301, \*BIOC 4302, \*BIOC 4501, \*BIOC 4403, \*BIOC 4404

**Neuroscience:** NESC 2570, NESC 2670, NESC 3970

**Physiology:** \*PHYL 3320, \*PHYL 3520, \*PHYL 2030

Required in addition to the Biology core: BIOC 2300, BIOC 2610, CHEM 2441 or 2401/2402 as these are pre-requisites for advanced classes in biochemistry and microbiology

\*Classes offered by other departments (e.g. Microbiology), but for which Biology credit may be obtained

## III. Enrolment Limitations

Students intending to enroll in programs in Biology and Marine Biology should note that there are limitations on the number of students that can be accepted into 2000 and higher level classes in any given year. Passing the introductory Biology classes with the required grade of C- does not guarantee a place in any of these classes. Lecture classes are limited by room size. Additional size restrictions are imposed on laboratory classes because of equipment limitations and the much closer supervision required. Size limitations on 2000 and 3000 level laboratory classes are specified under the timetable listings for those classes.

Students are advised to register as early as possible during the registration period to secure their space within their desired classes.

Please note also that being registered for a class does not guarantee late admission. Students not appearing on the first day of class may be deleted from class lists.

## IV. Class Descriptions

The normal entry requirement for admission to upper level classes in Biology is a grade of C- or better in each of BIOL 1010.03 or BIOL 1020.03 and BIOL 1011.03 or 1021.03 or in SCIE 1515.36, SCIE 1520.30 or SCIE 1540.27. Students

with a grade lower than a C- and extenuating circumstances may appeal to the department Undergraduate Curriculum committee. Students should go to the Biology Main Office for further details.

NOTE: Not all classes are offered every year. Please consult the current timetable for this year's offerings.

Consult the Biology Department's website for updates on new classes and suggested class combinations.

NOTE: Due to the combined pressures of student numbers and a dearth of available space in some classes, the names of students not appearing on the first day of class may be deleted from class lists. Students are advised that being signed into a class is no guarantee of late admission.

Biology classes are grouped into four general categories:

### 1. 1000 Level Classes

(BIOL 1010.03 or 1020.03) and (BIOL 1011.03 or 1021.03). These classes are the introductory university-level classes in biology. For entry into upper level Biology classes, a minimum of C- must be obtained in both first year classes.

### 2. 2000 Level Classes

All Biology majors (15, 20 credit and Honours) are required to take a core program at the 2000 level. Students should normally complete these core classes in their second year. The core program is designed to provide a basis for more advanced studies in Biology as well as to ensure that all majors are exposed to the general discipline or subject areas of biology. A variety of skills including writing, oral presentation, computer literacy, library use, and problem solving are integrated into the curriculum of these core classes along with 'hands-on' activities in the laboratory or field. The second-year core program covers five discipline areas:

1. Cell Biology - BIOL 2020.03
2. Diversity of Organisms (animals, plants and microbes)
  - BIOL 2003.03
  - BIOL 2004.03
3. Ecology - BIOL 2060.03
4. Evolution - BIOL 2040.03
5. Genetics and Molecular Biology - BIOL 2030.03

Students interested in biochemistry are advised to take the second-year biochemistry class offered by the Biochemistry & Molecular Biology departments. This class is not part of our core-program but is a prerequisite for entry into some higher level classes.

Students majoring in subjects other than Biology can design their own programs and will not have to conform to these 2000 level core requirements. All students should ensure they have the necessary prerequisite classes required for entry into 3000 level classes.

### 3. 3000 Level Classes

These classes are mainly for second- and third-year students. No student whose minor is in Biology will be allowed to register in any 3000 or 4000 level class without having completed, or being registered in 2000 level classes in biology totalling at least two full credits.

### 4. 4000 Level Classes

These classes are primarily for honours or major students. They are open to others with the permission of the instructor. Where biology classes are identified as being given in another department (eg. Anatomy), that department should be consulted for details.

### 5. Other Classes

The following classes given by other departments may be taken as a Biology class toward BA, BSc, and BSc (Honours) Biology degrees.

Any class cross-listed as a BIOL class.

Anatomy (ANAT):	All ANAT classes 2000 level or higher
Biochemistry (BIOC):	All BIOC classes 2000 level or higher
Environmental Sciences (ENVS):	3217, 3225, 3226, 3615, 3623, 3624, 3632, 3664, 4001
History (HIST):	2074, 2995, 3073, 3074
History of Science and Technology (HSTC):	1200, 2200, 3212, 3331
Microbiology (MICI):	All MICI classes 2000 level or higher

Neuroscience (NESC):	3125, 3440, 4374, 4375, 4376, 4377
Marine Biology (MARI):	All MARI classes
Oceanography (OCEA):	3003, 4140, 4160, 4230, 4330, 4331, 4335, 4370
Physiology (PHYL):	All PHYL classes 2000 level or higher
Philosophy (PHIL):	3420
Planning (PLAN):	3225
Science, Interdisciplinary (SCIE):	2000, 4001
Statistics (STATS):	4570

Note: to calculate the required honours GPA, the Registrar will use ALL Biology classes and ALL classes which are cross-listed with Biology or can be counted as Biology credits. That is, the GPA will be determined from all Biology classes and not just the best nine or 11.

### **BIOL 0010.00: University Prep Biology.**

This class is designed for students who have never taken biology, or who want to improve their knowledge before taking a university biology class. Students will gain a solid foundation in the subject by learning the major concepts of cell biology, genetics, development, the nervous system and evolution.

NOTE: BIOL 0010.00 is offered by the College of Continuing Education.

Students register and pay at the College of Continuing Education located at 1220 LeMarchant Street, 2nd Floor or by calling (902) 494-2375 (see page 40, College of Continuing Education, for more details). This class is accepted by Dalhousie University as equivalent to Nova Scotia Grade 12 Biology.

FORMAT: Lecture and lab

### **BIOL 1010.03: Principles of Biology Part I.**

This class, which prepares students for more advanced classes in biology and allied subjects, surveys the fundamental principles of biology with an emphasis on those features common to all organisms. Topics covered include cell and molecular biology, genetics, and evolution. Knowledge of high school mathematics, chemistry and biology is recommended.

COORDINATOR: T. Bishop

NOTE: Students wishing to continue as biology or marine biology majors should complete BIOL 1010 (or 1020) and BIOL 1011 (or BIOL 1021) in the first year of study. Students planning to take further classes in Biology or Marine Biology should read the Programme Requirements for these degrees.

INSTRUCTOR(S): B. Pohajdak, J. Wright, A. Simpson, T. Bishop, G. Gass, J. Van Dommelen

FORMAT: Lecture 3 hours, lab 2 hours

EXCLUSION: BIOL 1000.06, BIOL 1020.03 or DISP (15XX)

### **BIOL 1011.03: Principles of Biology Part II.**

Biology 1011 broadens the background laid down in BIOL 1010 to include plant and fungi form and function, animal form and function, and ecology. Knowledge of high school mathematics, chemistry and biology is recommended.

COORDINATOR: G. Gass

NOTE: Students wishing to continue as biology or marine biology majors should complete BIOL 1010 (1020) and BIOL 1011 (1021) in the first year of study. Students planning to take further classes in Biology or Marine Biology should read the Programme Requirements for these degrees.

INSTRUCTOR(S): M. Johnston, M. Leonard, S. Walde, T. Bishop, G. Gass, J. Van Dommelen

FORMAT: Lecture 3 hours, lab 2 hours

EXCLUSION: BIOL 1000.06, BIOL 1021.03 or DISP (15XX)

### **BIOL 1020.03: Introductory Biology I: Cells, Genetics & Evolution.**

Biology 1020.03 is the online distance education equivalent of BIOL 1010.03, and is offered in the fall, winter and summer terms. Topics include cell and molecular biology, genetics, and evolution. High school mathematics, chemistry, and biology is recommended. Learning activities include readings, quizzes, interactive multimedia, online labs and home labs.

NOTE: Students planning to take further classes in Biology or Marine Biology should read the Program Requirements for these degrees.

INSTRUCTOR(S): J. Van Dommelen/ G. Gass

FORMAT: Online (OWL, e-mail). Please go to <http://biology.dal.ca/online> for more details about taking this online class, including the technology and software requirements.

EXCLUSION: BIOL 1010.03 or DISP (15XX)

### **BIOL 1021.03: Introductory Biology II: Organismal Biology & Ecology.**

Biology 1021.03 is the online distance education equivalent of BIOL 1011.03, and is offered in the fall, winter and summer terms. Topics include diversity of eukaryotic life, ecology, and plant and animal biology. High school mathematics, chemistry, and biology are recommended. Learning activities include readings, quizzes, interactive multimedia, online labs and home labs.

NOTE: Students planning to take further classes in Biology or Marine Biology should read the Program Requirements for these degrees.

INSTRUCTOR(S): J. Van Dommelen, G. Gass

FORMAT: Online (OWL, e-mail). Please go to <http://biology.dal.ca/online> for more details about taking this online class, including the technology and software requirements.

EXCLUSION: BIOL 1011.03 or DISP (15XX)

### **BIOL 1030.03: Biology for Engineers.**

An introduction to Biology as it relates to Engineering, including a basic understanding of Cell Structure and Function, Genetics, Ecology, the relationship between living systems and the man-made environment, and the relevance of Biology to industrial and engineering applications.

NOTE: This class is restricted to students registered in an Engineering program.

INSTRUCTOR(S): M. Cooper, B. Latta

FORMAT: Lecture 3 hours, lab 2 hours

EXCLUSION: BIOL 1010.03, BIOL 1011.03, BIOL 1020.03, BIOL 1021.03 or DISP (SCIE 15XX)

### **BIOL 1031.03: Introduction to Biology II.**

A continuation of introductory Biology. Assumes a background in Cell Biology and Ecology. Topics presented at an introductory level include Genetics, Molecular Biology, Evolution, Organismal Diversity, and Plant and Animal Form and Function.

NOTE: Signature required; together with BIOL 1030.03 or SCIE 150.27, this class provides the same introduction to Biology as BIOL 1010.03 and 1011.03

INSTRUCTOR(S): C. Stacier

PREREQUISITE: Either SCIE 1530.27 or BIOL 1030.03 and CHEM 1011.03 or CHEM 1021.03 and (MATH 1000.03 or STAT 1060.03 or MATH 1215.03)

### **BIOL 1050.03: Biology and Society.**

For non-majors students interested in Biology, this class introduces the basics of cell biology, genetics and evolution and how they affect our society. The class will build a foundation for life-long learning and critical thinking in science through lectures, and hands-on lab activities.

INSTRUCTOR(S): E. Welsh

FORMAT: Lecture/lab

PREREQUISITE: None

EXCLUSION: BIOL 1010.03, BIOL 1020.03, DISP (SCIE 15XX))

### **BIOL 2003.03: Diversity of Life I.**

Surveys the diversity of forms and function in invertebrate and vertebrate animals. Emphasis is placed on the invertebrate phyla and fish of marine environments, and on arthropods, birds and mammals on land. The class takes a phylogenetic approach, exploring the evolutionary relationships, and introduces examples of the different life forms.

INSTRUCTOR(S): T. Romanuk, A. Pinder, L. Gibson

FORMAT: Lecture 3 hours, Lab 3 hours

PREREQUISITE: BIOL 1010 or BIOL 1020.03 (C- or better) and BIOL 1011.03 or BIOL 1021.03 (C- or better), or SCIE 1515.36, or SCIE 1520.30 or SCIE 1540.27 (C- or better) or equivalent

### **BIOL 2004.03: Diversity of Life II.**

Introduces the main domains of plant, fungal and microbial life, based on modern phylogenetic taxonomy. Examines the diversity, structure, physiology and ecology of non – animal life forms. Reviews the origins of the main lineages of living things – Archaea, Eubacteria and Eukaryota, as well as the main groups of eukaryotes.

NOTE: Starting in the 2009-2010 academic year, BIOL 2004 will no longer serve as a pre-requisite for admission to 3rd year MICI courses (for which MICI 2100 will be required)

INSTRUCTOR(S): A. Simpson, A. Gunawardena, L. Gibson

FORMAT: Lecture 3 hours, Lab 3 hours

PREREQUISITE: BIOL 1010 or BIOL 1020.03 (C- or better) and BIOL 1011.03 or BIOL 1021.03 (C- or better), or SCIE 1515.36 or SCIE 1520.30 or SCIE 1540.27 (C- or better) or equivalent

### BIOL 2020.03: Cell Biology.

An introduction to the eukaryotic cell. Major cell components and activities are described at ultrastructural and molecular levels with emphasis on mammalian systems. The concept of the cell as an integrated structural, functional unit is developed.

INSTRUCTOR(S): P. Côté, B. Pohajdak, M. McCarville

FORMAT: Lecture 3 hours, Lab 3 hours

PREREQUISITE: BIOL 1010 or BIOL 1020.03 (C- or better) and BIOL 1011.03 or BIOL 1021.03 (C- or better), or SCIE 1515.36 or SCIE 1520.30 or SCIE 1540.27 (C- or better) or equivalent

RECOMMENDED: CHEM 1011.03 and 1012.03

### BIOL 2030.03: Genetics and Molecular Biology.

The power and prominence of modern genetics have grown from a blend of classical and molecular approaches; both approaches are emphasized. Topics include: Mendelian, population and quantitative genetics; chromosome structure and variation; structure and function of nucleic acids; DNA replication, transcription and translation; gene expression; gene mutations; and genetic engineering.

INSTRUCTOR(S): E. Staples, J. Wright, C.M. Herbinger, J. Bielawski, P. Bentzen

FORMAT: Lecture 3 hours, lab/tutorial 3 hours

PREREQUISITE: BIOL 1010 or BIOL 1020.03 (C- or better) and BIOL 1011.03 or BIOL 1021.03 (C- or better), or SCIE 1515.36 or SCIE 1520.30 or SCIE 1540.27 (C- or better) or equivalent

RECOMMENDED: CHEM 1011.03 and 1012.03

### BIOL 2040.03: Evolution.

A thorough overview of the process of evolution. Genetic variation and changes in genetic composition of populations, the relationship between genetic and phenotypic change. Adaptation at various levels of organization (DNA to species), speciation, phylogeny, and macroevolutionary patterns. Introduces the full breadth of evolutionary concepts, preparatory to more advanced courses.

INSTRUCTOR(S): M. Johnston, R. Latta, E. Welsh

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: BIOL 1010 or BIOL 1020.03 (C- or better) and BIOL 1011.03 or BIOL 1021.03 (C- or better), or SCIE 1515.36 or SCIE 1520.30 or SCIE 1540.27 (C- or better) or equivalent

EXCLUSION: BIOL 3041.03

### BIOL 2060.03: Introductory Ecology.

Ecology examines interactions of plants and animals, including humans, with each other and with their non-living world. Topics include population growth, competition, predation, food webs, metapopulation dynamics, biodiversity and ecosystem function. The class has a quantitative approach providing a foundation for further work in ecology, marine biology and environmental science.

INSTRUCTOR(S): S. Walde, D. Ruzzante, H.K. Lotze, B. Worm, A. Schmidt

FORMAT: Lecture 3 hours, lab/tutorial 2 hours

PREREQUISITE: BIOL 1010 or BIOL 1020.03 (C- or better) and BIOL 1011.03 or BIOL 1021.03 (C- or better), or SCIE 1515.36 or SCIE 1520.30 or SCIE 1530.30 (C- or better) or SCIE 1540.27 (C- or better) or ENVS 1000.06 (C- or better) or BIOL 1030.03 (C- or better) in consultation with the instructor.

### BIOL 2601.03: The Flora of Nova Scotia.

Introduction to the biodiversity of flowering plants (Angiosperms) found in Nova Scotia. A wide range of plant communities are visited on several day-long field trips. A focus on plant identification is supplemented with lessons in plant ecology, floral biology, pollination mechanisms, natural history, and human uses (e.g., edible, poisonous, medicinal).

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

INSTRUCTOR(S): Staff

FORMAT: Lecture/lab/field

PREREQUISITE: One year of university classes

### BIOL 2605.03: Introduction to Marine Life of Nova Scotia.

Introduction to the variety of marine life found in Nova Scotia. The diversity and zonation of invertebrates and macroalgae is explored on field trips to different shore environments, including a salt marsh, rocky shore and sandy beach. Lectures and laboratory-based investigations on live marine organisms complement the field trips.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see

[seaside.science.dal.ca](http://seaside.science.dal.ca). Marine Biology students may NOT use this class as part of their major degree requirements. This class is aimed at non-majors who have completed at least one year of university.

INSTRUCTOR(S): Staff

FORMAT: Lecture/lab/field

PREREQUISITE: One year of university classes

### BIOL 3003.03: Introduction to Field Oceanography.

See class description for OCEA 3003.03 in the Oceanography section of the calendar.

### BIOL 2020.03: Advanced Cell Biology.

The eukaryotic cell is a complex array of interconnected organelles. Topics include the processing of proteins during trafficking, how the cell interacts with its environment and how it integrates information, with an emphasis on signaling pathways. Lectures are supplemented with assigned readings of original research articles for discussion in class.

INSTRUCTOR(S): Côté, P.

FORMAT: Lecture 1.5 hours/ discussion 1.5 hours

PREREQUISITE: BIOL 2020.03 with a minimum grade of B or instructor's consent)

### BIOL 3024.03: Microscopy.

See class description for MICI 3024.03 in the Microbiology and Immunology section of the calendar.

### BIOL 3036.03: Transgenic Organisms.

Transgenics are created by inserting foreign genes into organisms by genetic engineering. This class will include: Recombinant DNA technologies, the history of transgenics, methods of production/selection (plant and animal) and human gene therapy. Problems, ethics and controversy (e.g. Frankenfood) associated with this technology will be discussed.

INSTRUCTOR(S): B. Pohajdak

FORMAT: Lecture 3 hours

PREREQUISITE: BIOL 1010 or BIOL 1020.03 (C- or better) and BIOL 1011.03 or BIOL 1021.03 (C- or better), or SCIE 1515.36 or SCIE 1520.30 or SCIE 1540.27 (C- or better)

### BIOL 3042.03: Molecular Ecology.

We survey techniques of molecular genetic analysis and consider how they can be used to identify species, populations, sexes, individuals and family relationships, and study population attributes such as historical dispersal, contemporary connectivity, mating behaviour and effective population size. Evaluation is based on assignments, a test and a final exam.

INSTRUCTOR(S): P. Bentzen, D. Ruzzante

PREREQUISITE: A grade of B- or better in each of BIOL 2030, BIOL 2040, and BIOL 2060.

EXCLUSION: BIOL 4042

### BIOL 3044.03: Ecological Genetics.

An advanced examination of genetic variation in ecologically important (especially quantitative) traits. Topics will include determining whether a trait is inherited; natural selection in the wild; specialist vs. generalist strategies; how variation is maintained in the face of selection; trade-offs between competing selective pressures and selection for diversification.

INSTRUCTOR(S): R. Latta

FORMAT: Lecture 3 hours

PREREQUISITE: BIOL 2040.03 or BIOL 3041.03

EXCLUSION: BIOL 4044.03

### BIOL 3046.03: Molecular Evolution.

This class examines the process of evolutionary change at the molecular level. It begins with the sources of mutation, and moves on to dynamics of population variation. The class culminates with a macro-evolutionary perspective on topics such as adaptive evolution and genetic co-option. This class is complementary to BIOL 4010(Bioinformatics).

INSTRUCTOR(S): Bielawski, J.P.

FORMAT: Lecture 3 hours

PREREQUISITE: BIOL 2030.03, BIOL 2040.03

### BIOL 3050.03: Developmental Biology.

Lectures describe development as a sequence of processes and events, in which 'simple' structures such as fertilized eggs are progressively transformed into complex organisms. These events are governed by developmental 'rules' which have been determined through experimental study of animal and plant model organisms. Laboratories use live material whenever possible.

INSTRUCTOR(S): M. Cooper, S. Stone  
 FORMAT: Lecture/discussion 3 hours/lab 3 hours  
 PREREQUISITE: BIOL 2020.03, BIOL 2030.03

### BIOL 3060.03: Environmental Ecology.

The ecological effects of pollution, disturbance, and other stressors, both anthropogenic and natural. Major subject areas are air pollutants, toxic metals, acidification, eutrophication, oil spills, pesticides, forestry, warfare, urban ecology, risks to biodiversity, and resource degradation. The overarching context of the class is ecological sustainability of the human economy.  
 INSTRUCTOR(S): B. Freedman  
 FORMAT: Lecture 3 hours, tutorial 3 hours  
 PREREQUISITE: BIOL 2060.03 (or see instructor)  
 CROSS-LISTING: BIOL 5060.03

### BIOL 3061.03: Communities and Ecosystems.

Part 1 includes ecosystem history and theory, complex systems, community structure descriptors, interactions, stability, and food webs. Part 2 discusses the ecosystem approach, environmental management, ecosystem health and integrity, environmental indicators, ecological footprint, resilience theory.  
 INSTRUCTOR(S): P.A. Lane  
 FORMAT: Lecture 3 hours and BbLearn  
 PREREQUISITE: BIOL 2060.03, or INTD 2001.03 or INTD 2002.03  
 CROSS-LISTING: BIOL 5261.03

### BIOL 3062.03: Behavioral Ecology.

This class examines animal behaviour from an evolutionary perspective. Using the theory of natural selection as a basis, we will examine foraging, grouping patterns, territorial behaviour, parenting, mating behaviour, social organization, aggression and cooperation. There will be tutorials and essay assignments.  
 INSTRUCTOR(S): M. Leonard, A. Horn  
 FORMAT: Lecture 3 hours  
 PREREQUISITE: BIOL 2060.03

### BIOL 3063.03: Resource Ecology.

This class considers the ecology, utilization, and management of natural resources in fisheries, wildlife and forest management, agriculture and aquaculture. Topics include population dynamics, community interactions, and ecosystem support of resources as well as the history of resource utilization, practices of controlling production, pests, and predators, and sustainable management strategies.  
 INSTRUCTOR(S): H. K. Lotze  
 FORMAT: Lecture 2 hours, tutorial 2 hours  
 PREREQUISITE: BIOL 2060.03, MATH 1000.03 (or DISP), STAT 1060.03 (or DISP)  
 CROSS-LISTING: MARI 3063.03

### BIOL 3065.03: Conservation Biology.

This class offers an introduction to conservation biology: the science of understanding and conserving biodiversity on Earth. Students learn how biodiversity change is assessed and what tools are used to prevent the extinction of species and the disruption of ecosystems. Tutorials involve oral presentations as well as a written essay.  
 INSTRUCTOR(S): B. Worm  
 FORMAT: Lecture 2 hours, tutorial 2 hours  
 PREREQUISITE: BIOL 2060.03

### BIOL 3067.03: Ecology and Evolution of Fishes.

This class will examine selected topics on the ecology and evolution of marine and freshwater fishes. Topics shall include systematics, functional morphology, evolutionary ecology, behaviour, life history strategies, population biology, fisheries science, and conservation biology.  
 INSTRUCTOR(S): J. Hutchings  
 FORMAT: Lecture 3 hours, lab 2.5 hours  
 PREREQUISITE: BIOL 2003.03, BIOL 2060.03  
 CROSS-LISTING: BIOL 5067.03, MARI 3067.03

### BIOL 3069.03: Population Ecology.

An examination of selected topics in population ecology, including the effects of species interactions on population fluctuations, cycles and extinction. Case studies (hare cycles, forest insect outbreaks and elephant dynamics) will be studied in light of current ecological theory. Written assignments and exams will contribute to evaluation.  
 INSTRUCTOR(S): S. Walde  
 FORMAT: Lecture/tutorial 3 hours  
 PREREQUISITE: BIOL 2060.03 (minimum grade of B), (STAT 1060.03 and (MATH 1000.03 or MATH 1215.03) or DISP)

### BIOL 3078.03: Principles of Animal Physiology Part I.

Lectures on the mechanisms which coordinate the activities of cells within multicellular organisms and permit such organisms to remain in homeostatic balance. The emphasis is on the mechanisms most widely distributed throughout the animal kingdom. The laboratories are designed to illustrate these principles in a variety of organisms.  
 NOTE: Students must complete 3078.03 before 3079.03  
 INSTRUCTOR(S): N. McAllister-Irwin, TBA  
 FORMAT: Lecture 3 hours, lab 3 hours  
 PREREQUISITE: BIOL 2003.03, BIOL 2020.03  
 EXCLUSION: BIOL/MARI 3074.03

### BIOL 3079.03: Principles of Animal Physiology Part II.

This class is a continuation of a discussion of the mechanisms which coordinate the activities of cells within multicellular organisms which began in BIOL 3078.03. This term emphasizes the urinary, cardiovascular and respiratory systems. The laboratories reflect the approaches taken to study these systems in a variety of organisms.  
 INSTRUCTOR(S): N. McAllister-Irwin, A. Pinder  
 FORMAT: Lecture 3 hours, Lab 3 hours  
 PREREQUISITE: BIOL 3078.03 or MARI 3074.03  
 EXCLUSION: MARI 3076.03

### BIOL 3101.03: Microbial Ecology.

Lectures on the ecology of bacteria, viruses and protists. Community structure, food web nutrient cycling, biogeochemical cycles, competition, succession and symbiosis are discussed with examples from marine, fresh-water and soil habitats. There is an emphasis on marine organisms.  
 INSTRUCTOR(S): J. Laroche  
 FORMAT: Lecture 3 hours  
 PREREQUISITE: BIOL 2004.03 or MICI 2100.03, and BIOL 2060.03

### BIOL 3102.03: Microbial Eukaryotes: Biodiversity and Evolution.

Microbial eukaryotes are of tremendous ecological, evolutionary and medical/veterinary importance. This class provides a comprehensive understanding of the biodiversity and evolution of both algal and protozoan eukaryotes, and examines important aspects of their organismal biology, including cell and genome organization, life histories, trophic strategies, locomotion and symbiosis.  
 INSTRUCTOR(S): A. Simpson  
 FORMAT: Lecture/lab 4 hours (alternate weeks 2 hour lab or lecture)  
 PREREQUISITE: BIOL 2020.03 and BIOL 2004.03 or MICI 2100.03

### BIOL 3221.03: Diversity of Algae.

This is a taxonomic introduction to the major algal groups (macrophytic and microscopic) with an emphasis on the marine seaweeds. Basic taxonomic differences are covered, along with an introduction to macrophyte ecology, human uses and symbioses. Laboratory sessions focus on morphology and reproduction.  
 INSTRUCTOR(S): B. Hymes  
 PREREQUISITE: BIOL 2004.03 or equivalent  
 CROSS-LISTING: MARI 3221.03  
 EXCLUSION: BIOL 3212.03, MARI 3212.03

### BIOL 3301.03: Invertebrate Biology.

A survey of the diversity, ecology and evolutionary history of the major invertebrate groups. Lectures will emphasize phylogenetics and diversity of body plans. Labs will emphasize identification and anatomy through dissections and observations.  
 INSTRUCTOR(S): T. Romanuk  
 FORMAT: Lecture 2 hours, lab 3 hours  
 PREREQUISITE: BIOL 2003.03  
 CROSS-LISTING: MARI 3301.03

### BIOL 3322.03: Parasitology.

The class emphasizes the parasite-host relationships, evolution of the parasites and adaptations to the host, modifications of physiology, structure and life cycle for a parasitic existence. Since the most extensive research pertains to parasites of man, the emphasis is on human parasites.  
 INSTRUCTOR(S): T. Rossolimo  
 FORMAT: Lecture 2 hours, lab 3 hours  
 PREREQUISITE: BIOL 1010 or BIOL 1020.03 (C- or better) and BIOL 1011.03 or BIOL 1021.03 (C- or better), or SCIE 1515.36 or SCIE 1520.30 or SCIE 1540.27 (C- or better)

### BIOL 3326.03: Vertebrate Design: Evolution and Function.

Vertebrate Design explores 600 million years of vertebrate evolution, with particular attention to origins of major groups and the anatomical and functional innovations associated with their rise and diversification. Functional morphology of swimming, flying and terrestrial locomotion is also covered, along with the effect of body size on function.

INSTRUCTOR(S): A.W. Pinder

FORMAT: Lecture 3 hours

PREREQUISITE: BIOL 2003.03 and BIOL 2040.03

### BIOL 3327.03: Entomology.

The class is an introduction to the study of insects. Topics include insect classification, evolutionary diversity, biology, ecology, behaviour, and various applied aspects. Through this survey of the insects, students will gain an appreciation of insect biodiversity as well as their economic and ecological importance.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

INSTRUCTOR(S): T. Rossolimo

FORMAT: Lecture, labs, field trips

PREREQUISITE: BIOL 2003.03

### BIOL 3328.03: Medical Entomology.

Medical Entomology covers direct injuries caused by arthropods such as phobias, annoyance, allergies, toxins, venoms and myiasis, arthropod transmission of vertebrate parasites, epidemiology of arthropod-borne diseases. Students study transmission of diseases, methods of surveillance of diseases, management by vector control and other methods of arthropod-borne diseases.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca)

INSTRUCTOR(S): T. Rossolimo

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: BIOL 3327.03 or BIOL 3322.03 or permission of instructor

### BIOL 3329.03: Applied Entomology.

Insects not only comprise more than half of the world's biodiversity, but influence human health and economic well-being in many ways. In this class students are introduced to insect pest management, agricultural, forest and medical entomology, forensic entomology, and insects in food science, beneficial and harmful insects.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

INSTRUCTOR(S): T. Rossolimo

FORMAT: Lecture/labs/field trips

PREREQUISITE: BIOL 3327.03 or the permission of the instructor

### BIOL 3421.03: Comparative Vertebrate Histology.

See class description for ANAT 3421.03 in the Anatomy and Neurobiology section of this calendar.

### BIOL 3430.03: Introduction to Human Histology.

See class description for ANAT 2160.03 in the Anatomy and Neurobiology section of the calendar.

### BIOL 3503X/Y.06: Introduction to the History of Science.

See class description for HSTC 2200X/Y.06 in the History of Science & Technology section of the calendar.

### BIOL 3580.03: Philosophy of Biology.

See class description for PHIL 3420.03 in the Philosophy section of this calendar.

### BIOL 3600.03: Aquaculture.

Through lectures, laboratories and field trips (additional fees apply), this class offers an introductory overview of aquaculture, the culturing of aquatic plants and animals. The following topics are covered with both a Maritimes and global perspective: overview, physico-chemistry of water, engineering, culture techniques, health, nutrition, genetics, environmental and socio-economic considerations.

INSTRUCTOR(S): C. Herbinger

FORMAT: Lecture 3 hours, Lab 3 hours, Field trips (2 Sundays)

PREREQUISITE: BIOL 2003.03

CROSS-LISTING: MARI 3600.03

### BIOL 3601.03: Nature Conservation.

This interdisciplinary class explores relationships between humans and the natural world, including damage caused to species and ecosystems. The class looks at environmental ethics and world views, environmental philosophy, sustainability, the cultural expression of natural values (literature, music, art) and conservation science and actions, including the establishment of protected areas.

INSTRUCTOR(S): B. Freedman

FORMAT: Lecture 3 hours, tutorial 1 hour

PREREQUISITE: BIOL 1010.03 or 1020.03 and BIOL 1011.03 or BIOL 1021.03 or SCIE 1515.36 or SCIE 1520.30 or SCIE 1540.27 or permission of instructor

### BIOL 3615.03: Methods in Ecology.

Through participation in several class projects, students obtain experience conducting field studies and laboratory experiments. Projects include a range of ecological questions, techniques, organisms, and ecosystems. Students collect, analyze, and interpret their own data in formal scientific reports. Recommended for students interested in ecological research, or environmental field sampling.

NOTE: Additional fees are charged to cover the cost of field trip transportation.

FORMAT: Field and Lab intensive

PREREQUISITE: BIOL 2060, MATH/STAT 1060 (or DISP) and at least one diversity class (e.g. BIOL 2003 or 2004)

RECOMMENDED: STAT 2080

CROSS-LISTING: ENVS 3615

EXCLUSION: BIOL 3614

### BIOL 3620.03: Field Survey of Terrestrial Biodiversity.

Measuring and interpreting trends in the biodiversity of organisms in terrestrial environments. Field-intensive, with one week spent camping at a field station. Techniques for identification of major groups (lichens, mosses, higher plants, insects, amphibians, birds, mammals), sampling presence and abundance of species, and relating trends to natural and anthropogenic variation.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

FORMAT: Field intensive, labs, lectures

PREREQUISITE: BIOL 2003.03 and BIOL 2060.03 or permission of instructor

### BIOL 3622.03: Ornithology.

Overview of avian biology and techniques for the scientific study of bird populations, including identification by sight and sound. Field-intensive, with 8 days in the field, including one week camping at a field station in southwestern Nova Scotia to conduct research on birds in their natural habitats.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

INSTRUCTOR(S): C. Staicer

FORMAT: Field intensive, labs, lectures

PREREQUISITE: BIOL 2003.03 or BIOL 2060.03 or DISP or permission of instructor

### BIOL 3623.03: Applied Coastal Ecology.

Impacts of anthropogenic inputs on the structure and function of coastal ecosystems. Through field trips and other classwork, students examine ecosystem health, e.g., in macroalgal communities on rocky shores, in seagrass beds on sedimentary shores, and learn basic experimental design, principles of environmental assessment and monitoring, and coastal habitat remediation.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca). Not offered every year.

FORMAT: Field intensive, labs, lectures

PREREQUISITE: BIOL 2003.03 and BIOL 2060.03

CROSS-LISTING: ENVS 3623.03, MARI 3623.03

### BIOL 3624.03: Urban Freshwater Systems.

Ecology of urban freshwater systems with a focus on understanding how they respond to human-caused stresses within their watersheds. Students conduct case studies at nearby lakes and/or streams to monitor water quality and characterize resident communities of plants and animals. Evaluation is based on individual and group research reports.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

FORMAT: Field intensive, labs, lectures

PREREQUISITE: BIOL 2060.03 and (MATH 1060.03 or STAT 1060.03 or DISP) or permission of instructor  
CROSS-LISTING: ENVS 3624.03

### **BIOL 3626.03: Field Studies of Marine Mammals.**

Hands-on introduction to research on marine mammals. Lectures provide an overview of marine mammal adaptations, evolution, population biology, social organization, conservation, and management. Labs include a necropsy and techniques of photographic identification of individuals. On a several-day camping trip, students observe marine mammals from whale-watch boats and conduct research projects.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

FORMAT: Field intensive, labs, lectures

PREREQUISITE: BIOL 2060.03 and BIOL 3062.03 (or BIOL 3630.03 or PSYO 2160.03), MATH 1060.03 or STAT 1060.03

CROSS-LISTING: MARI 3626.03

### **BIOL 3630.03: Field Methods in Animal Behaviour.**

First-hand experience in studying animal behaviour in the field. Day-long field exercises teach basic methods, then students plan, conduct, write up, and orally present a 5-day project of their own.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

INSTRUCTOR(S): A. Horn

FORMAT: Field intensive, labs, lectures

PREREQUISITE: BIOL 3062.03 or PSYO 2160.03 or PSYO 3160X/Y.06 or permission of instructor

### **BIOL 3632.03: Applied Field Methods in Fish Ecology.**

Practical experience conducting field research on fishes with field trips to streams and shallow water marine/freshwater habitats. Techniques include collecting fish, designing and conducting surveys, studying behaviour, measuring phenotypic variability, quantifying temporal and spatial variation, planning for statistical analysis, and weighing tradeoffs between data quality, quantity, costs and ethical/environmental considerations.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

INSTRUCTOR(S): Staff

FORMAT: Field intensive, labs, lectures

PREREQUISITE: BIOL 2060.03 and (STAT 1060.03 or MATH 1060.03 or DISP) or their equivalents or permission of instructor

CROSS-LISTING: MARI 3632.03, ENVS 3632.03

### **BIOL 3633.03: Spatial Information and GIS in Ecology.**

A hands-on approach to understanding and using spatial information, this class introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address and applied problem in ecology.

NOTE: Offered in the summer through SEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

INSTRUCTOR(S): Staff

FORMAT: Labs, lectures

PREREQUISITE: BIOL 2060.03

CROSS-LISTING: ENVS 3633.03, GEOG 3633.03

### **BIOL 3634.03: Agroforestry.**

Agroforestry is a land-use system in which trees or shrubs are grown in association with agricultural crops or livestock. As practiced in the tropics, agroforestry generates numerous ecological, environmental and economic benefits. This hands-on, field-intensive class provides a foundation for understanding this traditional practice and its applications in North America.

NOTE: Offered in summer through SEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca)

PREREQUISITE: BIOL 2060.03 (Halifax campus) or AGRI 1000.03 (Faculty of Agriculture) or BIOL 3001.03 (Faculty of Agriculture) or permission of the Instructor. An additional class on the biology, ecology, diversity or physiology of plants is recommended.

### **BIOL 3664.03: Intertidal Ecology and Diversity.**

Hands-on, intensive introduction to ecological research on rocky shores, tidal flats, and sandy beaches. Relevant ecological concepts, sampling techniques for flora and fauna, and statistical skills are learned. Field sampling on day and camping trips is followed by lab work (e.g., identification of seaweeds, invertebrates), statistical analysis, and report preparation.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

INSTRUCTOR(S): Staff

FORMAT: Field intensive, labs, lectures

PREREQUISITE: BIOL 2060.03 and (STAT 1060.03 or MATH 1060.03 or DISP) and BIOL 2003.03

CROSS-LISTING: ENVS 3664.03, MARI 3664.03

EXCLUSION: BIOL 3662.03, BIOL 3663.03

### **BIOL 3665.03: Food Web Assembly and Modelling.**

In "Food Webs" the student will examine the structure and functioning of ecological communities through a lens of "who eats whom" predator-prey feeding interactions through field studies, experiments, and computer simulations.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

INSTRUCTOR(S): T. Romanuk

FORMAT: Lectures, labs, field trips

PREREQUISITE: MATH 1060.03 or STAT 1060.03, BIOL 2060.03

EXCLUSION: For third year and above or with permission of the instructor

### **BIOL 3666.03: Species Invasions.**

Students will examine species invasions, the establishment of non-native species in new communities, using an interdisciplinary framework incorporating impacts, theory, and management and control of invasive species.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

INSTRUCTOR(S): T. Romanuk

FORMAT: Lectures/labs/field trips

PREREQUISITE: BIOL 2003

EXCLUSION: For third year and above or with permission of the instructor

### **BIOL 3680.03: Scientific Diving Methods for Marine Ecology.**

This class introduces students that are certified divers to the practice of underwater research using SCUBA. It combines lectures with supervised dives in various marine habitats to demonstrate the application of standard sampling and experimental procedures in marine ecology, with an emphasis on logistical considerations and diving safety.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

INSTRUCTOR(S): R. Scheibling, A. Pinder, J. Lindley

FORMAT: Field Intensive, Lab and Lecture

PREREQUISITE: BIOL 2003.03, BIOL 2060.03, STAT 1060.03 or DISP,

internationally recognized diving certification, diving physical; recommended: BIOL 3212.03 or 3321.03, BIOL 3301.03

CROSS-LISTING: MARI 3680.03

### **BIOL 3761.03: Marine Ecology.**

Building upon an understanding of basic ecological and evolutionary principles, and a familiarity with the major marine invertebrate and algal taxa, this class examines patterns and processes at the organismal, population and community levels that determine the diversity and distribution of life in the sea.

INSTRUCTOR(S): R. Scheibling

FORMAT: Lecture/Lab

PREREQUISITE: BIOL 2060.03 and (BIOL 2003.03 or BIOL 2004.03) and OCEA 2000X/Y.06 or (OCEA 2001.03 and OCEA 2002.03)

CROSS-LISTING: MARI 3761.03

RESTRICTION: This class is restricted to 3rd and 4th year students.

### **BIOL 3762.03: Terrestrial Ecology.**

This class provides a conceptual framework for understanding the function of terrestrial ecosystems. One week at a field station in Nova Scotia provides practical experience with forest, bog and agroecosystems. Topics include soil profiles and nutrients; plant productivity and interactions; and ecological roles of microorganisms, lichens, fungi, insects, and vertebrates.

NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times, and special registration procedures see [seaside.science.dal.ca](http://seaside.science.dal.ca)

INSTRUCTOR(S): R. Rajaselvam

FORMAT: Field intensive, lecture, lab

PREREQUISITE: BIOL 2003.03 or BIOL 2004.03, and BIOL 2060.03

### BIOL 3800.03: Experiential Learning.

Experiential Learning recognizes the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the class coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and a timetable.

NOTE: To register in this class, a student must first find a suitable supervisor and sign a learning agreement between the class coordinator, the student and the supervisor.

FORMAT: A minimum of 84 hours of work experience should be documented.

For example students could spend 7-8 hours per week throughout a regular term or complete the 84 hours in a more concentrated period during the summer. Grading is pass/fail.

PREREQUISITE: Students must be registered in a Biology or Marine Biology program, have completed a minimum of three full credits in Biology above the 1000 level and have a minimum cumulative GPA of 2.4 or permission of coordinator.

CROSS-LISTING: MARI 3800.03

EXCLUSION: Scheduled classes at a learning institution, study that would qualify for a Special Topics class, an Honours project, co-op work terms and paid work. Only one experiential learning class per degree is permitted.

### BIOL 4001.03: Environmental Impact Assessment.

This class provides an opportunity to explore all aspects of environmental impact assessment (EIA) as practiced in Canada and in other countries. The class traces the development of EIA over the past 30 years and critically examines the scientific, procedural and political dimensions.

NOTE: All students taking BIOL 4001.03 or ENVS 4001.03 must have completed 90 credits and be in their fourth year of study or have permission of instructor.

FORMAT: Lecture 3 hours (fall and winter), lab 3 hours (winter only)

PREREQUISITE: ENVS 1000X/Y.06 or BIOL 2060.03 or EARTH 2410.03 or GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or INTD 2002.03 or OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03) or SUST 2000.06 or SUST 2001.06.

CROSS-LISTING: ENVS 4001.03

### BIOL 4035.03: Human Genetics.

See BIOC 4835 in the Biochemistry section of the calendar.

### BIOL 4050.03: Advanced Topics in Developmental Biology.

This class examines the molecular-genetic basis of development using model organisms, e.g., *Drosophila* and *Arabidopsis*, and the use of current techniques to identify key genes controlling development and explores how genes, proteins and cells interact in development of animals and plants.

INSTRUCTOR(S): S. Stone

FORMAT: Lecture 3 hours

PREREQUISITE: BIOL 3050.03 (or instructor's permission and BIOL 2020.03, BIOL 2030.03)

CROSS-LISTING: BIOL 5050.03

### BIOL 4060.03: Marine Mammalogy.

The class will examine the characteristics that mammals brought with them when they returned to the ocean, the evolution of the different groups of marine mammals, some of their special adaptations, the roles of marine mammals in oceanic ecosystems and general principles of the marine mammal population biology. Students will use information on the biology of marine mammals to explore conservation/management issues.

INSTRUCTOR(S): T. Wimmer

FORMAT: Lecture 3 hours

PREREQUISITE: BIOL 2060.03

CROSS-LISTING: BIOL 5651.03

### BIOL 4061.03: Design of Biological Experiments.

This class introduces students with previous training in univariate statistics to the practice and pitfalls of experimental design and data analysis in biology. Lectures and take-home exams are used to demonstrate the fundamentals of design and analysis, with emphasis on potential problems and how they are overcome.

INSTRUCTOR(S): R. Scheibling

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2080.03 or STAT 2080.03 or ECON 2280.03 (Grade of B+ or higher); offered to well prepared honours students as well as graduate students

CROSS-LISTING: BIOL 5061.03

### BIOL 4062.03: Analysis of Biological Data.

The class introduces students to techniques available for the analysis of biological data, including regression, general linear models and multivariate methods.

Emphasis is on the practical use of these techniques rather than derivations. Students analyze real and realistic data sets, and are assessed on write-ups of these analyses.

INSTRUCTOR(S): H. Whitehead

PREREQUISITE: STAT 2080.03 or ECON 2280.03

CROSS-LISTING: BIOL 5062.03

### BIOL 4065.03: Sustainability and Global Change.

Sustainability emphasizes equitable societies, protected environments, and robust economies. Most countries pursue Sustainable Development yet the concept remains controversial, and defined differently in the North and the South. The global trends focus on those that relate to environment and sustainability. Discussion format with Blackboard Learning/Internet assignments.

INSTRUCTOR(S): P. Lane

FORMAT: Lecture and discussion 3 hours

PREREQUISITE: BIOL 2060.03 and one of BIOL 3003.03, BIOL 3060.03, BIOL 3061.03, BIOL 3062.03, BIOL 3063.03, BIOL 3065.03, BIOL 3066.03, BIOL 3067.03, BIOL 3068.03, BIOL 3069.03, BIOL 3101.03, BIOL 3601.03, BIOL 3614.03, BIOL 3615.03, BIOL 3601.03, or BIOL 3623.03, BIOL 3624.03, BIOL 3664.03, BIOL 3761.03 or BIOL 3762.03, or INTD 2001.03 or INTD 2002.03 or permission of instructor

CROSS-LISTING: BIOL 5065.03

### BIOL 4160.03: Political Ecology.

Political ecology (PE) examines the politics of the environment but not on specific policies, political theories, or ideologies. PE considers an interacting array of political and socio-economic forces that shape human-environmental relationships. International case studies will be evaluated using several PE tools. Discussion format with Blackboard Learning/Internet assignments.

INSTRUCTOR(S): P. Lane

FORMAT: Discussion 3 hours in class and BbLearn

PREREQUISITE: BIOL 2060.03 and one of BIOL 3003.03, BIOL 3060.03, BIOL 3061.03, BIOL 3062.03, BIOL 3063.03, BIOL 3065.03, BIOL 3067.03, BIOL 3069.03, BIOL 3101.03, BIOL 3601.03, BIOL 3623.03, BIOL 3624.03, BIOL 3761.03, BIOL 3762.03, or INTD 2001 or INTD 2002 or consent of instructor

CROSS-LISTING: BIOL 5160.03

### BIOL 4220.03: Plant Cell Biology.

This class covers the structure, function, and dynamic properties of plant cellular components including constituent organelles, cytoskeleton, and the cell wall.

Current areas of research such as programmed cell death, cell signalling and cellular trafficking are discussed in depth. The class consists of lectures, student seminars, and report writing.

INSTRUCTOR(S): A. Gunawardena

FORMAT: Lecture 3 hours per week

PREREQUISITE: BIOL 2020.03, and one of BIOL 2003.03 or BIOL 2004.03 or BIOL 3050.03 or BIOL 3218.03 with a minimum of B- in these classes or permission of the instructor

CROSS-LISTING: BIOL 5220.03

### BIOL 4302.03: Molecular Immunology.

See class description for MICI 4302.03 in the Microbiology and Immunology section of this calendar.

### BIOL 4335.03: Environmental Impacts in Marine Ecosystems.

See class description for OCEA 4335.03, in the Oceanography section of this calendar.

### BIOL 4369.03: Fisheries Oceanography.

See class description for OCEA 4160.03 in the Oceanography section of this calendar.

**BIOL 4370.03: Deep Sea Biology.**

See class description for MARI 4370.03 in the Marine Biology section or OCEA 4370.03 in the Oceanography section of this calendar.

**BIOL 4404.03: Introduction to Pharmacology I.**

See class description for BIOL 4404.03, in the Pharmacology section of the calendar.

**BIOL 4407.03: Introduction to Pharmacology II.**

See class description for BIOL 4407.03, in the Pharmacology section of the calendar.

**BIOL 4661.03: Biological Oceanography.**

See class description for OCEA 4140.03, in the Oceanography section of this calendar.

**BIOL 4662.03: Biology of Phytoplankton.**

See class description for OCEA 4230.03 in the Oceanography section of this calendar.

**BIOL 4664.03: History of Marine Sciences.**

See class description for MARI 4664.03 in the Marine Biology section, or SCIE 4001.03 in the Science, Interdisciplinary section of this calendar.

**BIOL 4666.03: Benthic Ecology.**

See class description for OCEA 4663.03 in the Oceanography section of the calendar.

**BIOL 4667.03: Census of Marine Life.**

The Census of Marine Life recorded over 250,000 known species of eukaryotes in the world's oceans. In this class, the Senior Scientist for Census 2010 examines the diversity, distribution and abundance of marine biota globally and reviews new approaches to discover new species and to monitor responses to climate change.

INSTRUCTOR(S): R. O'Dor

FORMAT: Lecture with discussions

PREREQUISITE: BIOL 2003.03 and BIOL 2060.03 and six half credits of BIOL, MARI, or OCEA classes

CROSS-LISTING: MARI 4667.03

**BIOL 4806.03: Special Topics in Biology.**

Independent study intended for students who wish to study an area of biology not covered in other classes. Students should first consult with a faculty member to arrange the topic of study. An outline of the class content must be approved by the Chair of the Biology Undergraduate Curriculum Committee.

NOTE: For registration forms and further information see: <http://biology.dal.ca/Undergraduate/index.htm>

**BIOL 4807.03: Special Topics in Biology.**

Independent study intended for students who wish to study an area of biology not covered in other classes. Students should first consult with a faculty member to arrange the topic of study. An outline of the class content must be approved by the Chair of the Biology Undergraduate Curriculum Committee.

NOTE: This class is for students who have already completed one Special Topics Class. For registration forms and further information see: <http://biology.dal.ca/Undergraduate/index.htm>

**BIOL 4900X/Y.06: Honours Research and Thesis.**

This class is required of, and restricted to, all Biology Honours programmes in which Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class.

NOTE: The class grade is based on the results of the research which are submitted in April as an Honours Thesis, an oral presentation about the research to the class, and an oral or poster presentation at the Honours Cameron Conference in February. Co-op students attend this class by registering for Biology 4901 and 4902. See details about selecting a supervisor for the honours research under the general requirements for Biology honours programmes at the beginning of Biology's calendar entry or on the honours page of Biology's website <http://biology.dal.ca/honours/index.htm>

INSTRUCTOR(S): G. Crossin and staff

FORMAT: Weekly class meetings (1.5 - 3.0 hrs) and an independent research project

CROSS-LISTING: MARI 4900X/Y.06

RESTRICTION: Honours students normally in their final year of study.

**BIOL 4901.03: Honours Research and Thesis I.**

This is required of, and restricted to, all Biology Co-op Honours programmes. The class description is the same as for Biology 4900X/Y. Students attend BIOL 4901 in the Winter term of their 4th year and BIOL 4902 in the Fall term of their 5th year to accommodate their work terms.

NOTE: 4901 and 4902 must be taken in consecutive winter/fall terms to get a grade for either class. No grade will be recorded for Biol. 4901 until 4902 is also completed and the final Honours Thesis has been evaluated - usually in April following the fall class of 4902. Students normally give a poster presentation about their previous work term at the Honours Cameron Conference in February.

INSTRUCTOR(S): G. Crossin and staff

FORMAT: Weekly seminars 1.5 - 3.0 hours

CROSS-LISTING: MARI 4901.03

EXCLUSION: BIOL 4900.06 and MARI 4900.06

RESTRICTION: Students in the Biology Co-op Honours Programme, normally in their final year of study.

**BIOL 4902.03: Honours Research Thesis II.**

This is the 2nd half of the required class for Biology Co-op honours students. The class description is the same as for Biology 4900X/Y. Students attend 4902 in the fall of their 5th year.

NOTE: 4901 and 4902 must be taken in consecutive winter/fall terms to get a grade for either class. No grade will be recorded for Biol. 4901 until 4902 is also completed and the final Honours Thesis has been evaluated - usually in April following the fall class of 4902.

INSTRUCTOR(S): G. Crossin and staff

FORMAT: Weekly seminars 1.5 - 3.0 hours

CROSS-LISTING: MARI 4902.03

EXCLUSION: BIOL 4900.06 and MARI 4900.06

RESTRICTION: Students in the Biology Co-op Honours Programme, normally in their final year of study.

**BIOL 8891.00: Co-op Work term I.**

PREREQUISITE: SCIE 2800.03

**BIOL 8892.00: Co-op Work term II.**

PREREQUISITE: SCIE 2800.03, BIOL 8891.00

**BIOL 8893.00: Co-op Work term III.**

PREREQUISITE: SCIE 2800.03, BIOL 8892.00

**BIOL 8894.00: Co-op Work term IV.**

PREREQUISITE: SCIE 2800.03, BIOL 8893.00

## Dean

Moore, C., BA (Hons) (Cambridge), PhD (Cambridge), Professor (Psychology)

## Chairperson of Department

Zwanziger, J. W.

## Graduate Coordinator

Stradiotto, M.

## Co-op Academic Advisor

Zhang, P.

## Faculty Undergraduate Advisors

Cozens, F. L. (494-6582)  
Grundy, K. R. (494-3409) (Transfer Credits)  
Laws, P. (494-6143) (First year Advisor)  
MacDonald, J. L. (494-2440)  
Wentzell, P. D. (494-3708)  
Zhang, P. (Co-op Academic Advisor)

## Professors Emeriti

Aue, W. A., PhD (Vienna), FCIC  
Coxon, J. A., BA (Cambridge), MSc, PhD (East Anglia)  
Knop, O., DSc (Laval), FCIC  
Kwak, J. C. T., BSc, MSc, PhD (Amsterdam), FCIC

## Professors

Bearne, S. L., BSc (Acadia), PhD (Toronto), MDCM (McGill), cross-appointment from Biochemistry & Molecular Biology  
Becke, A. D., BSc (Queen's), MSc, PhD (McMaster), FRSC, FRS, FCIC, Killam Chair in Computational Science, Shirreff Chair of Chemistry  
Boyd, R. J., BSc (UBC), PhD (McGill), FCIC, Alexander McLeod Professor of Chemistry  
Burnell, D. J., BSc, MSc (Carleton), PhD (UNB)  
Dahn, J. R., BSc (Dalhousie), MSc, PhD (UBC), Canada Research Chair in Battery and Fuel Cell Materials, NSERC/3M Canada Inc. Industrial Research Chair and cross-appointment from Physics and Atmospheric Science  
Jakeman, D. L., BSc, PhD (Sheffield), cross-appointment with College of Pharmacy  
Martin, R. V., BS (Cornell), MSc (Oxford), PhD (Harvard), cross-appointment with Physics and Atmospheric Science  
Stradiotto, M., BSc, PhD (McMaster), Faculty of Science Killam Professor  
Thompson, A., BSc (Leicester), PhD (Sheffield), Faculty of Science Killam Professor  
Weaver, D. F., MD, PhD (Queen's), FRCP(C) (Dalhousie), FCIC, Canada Research Chair in Clinical Neuroscience and cross-appointment with the Division of Neurology  
Wentzell, P. D., BSc (Dalhousie), PhD (Mich State)  
White, M. A., BSc (Western), PhD (McMaster), FCIC, University Research Professor and cross-appointment with Physics and Atmospheric Science  
Zwanziger, J. W., BA (Chicago), PhD (Cornell), Canada Research Chair in NMR Studies of Materials, cross-appointment with Physics and Atmospheric Science

## Associate Professors

Andreas, H. A., BSc, PhD (Calgary)  
Cozens, F. L., BSc (York), PhD (Toronto)  
Doucette, A. A., BSc (Dalhousie), PhD (Alberta)  
Grundy, K. R., BSc, MSc, PhD (Auckland)  
Obrovac, M. N., BSc (SFU), MSc, PhD (Dalhousie), Industrial Research Chair in Materials Science, cross-appointment with Physics and Atmospheric Science  
Rainey, J. K., BSc (Guelph), MSc, PhD (Toronto) Director of NMR-3, cross-appointment with Biochemistry & Molecular Biology  
Schepp, N. P., BSc, PhD (Toronto)  
Turculet, L., BSc (MIT), PhD (Berkeley)  
White, R. L., BSc (Dalhousie), PhD (McMaster), FCIC  
Zhang, P., BSc, MSc (Jilin U., China), PhD (Western)

## Assistant Professor

Welch, G. C., BSc (Calgary), PhD (Windsor)

## Senior Instructors

Alemán Milán, G., BEng (Superior Polytechnic Institute of Havana), MSc, PhD (Dalhousie)  
Barkhouse, S. A., BSc (MSVU), BEd, MBA (Dalhousie)  
Byers, C. M., BSc (Dalhousie)  
Laws, P. A., BSc (Acadia), MSc (Dalhousie), BEd (MSVU)  
Thompson, K. E., BSc (Acadia), MBA (SMU)

## Instructors

MacDonald, J. L., BSc, BTech (CBU), PhD (Dalhousie)  
Moya Barrios, R., BSc (U of Havana, Cuba), MSc, PhD (Dalhousie)  
Whalen, M., BSc (Dalhousie), PhD (McMaster)

## Adjunct Professors

Burford, N., BSc (Wales, Cardiff), PhD (Calgary), FCIC, University of Victoria, Victoria, BC  
Cameron, T. S., BA, MA, DPhil (Oxon), Dalhousie University, Halifax, NS  
Chatt, A., BSc (Calcutta), MSc (Roorkee), MSc (Wat), PhD (Toronto), FCIC, Dalhousie University, Halifax, NS  
Grindley, T. B., BSc, MSc, PhD (Queen's), FCIC, Dalhousie University, Halifax, NS  
Grossert, J. S., BSc, MSc, PhD (Natal), FCIC, Dalhousie University, Halifax, NS  
Hellou, J., BSc (Montreal), MSc, PhD (UBC), Bedford Institute of Oceanography, Dartmouth, NS  
Kralovec, J., MSc (U of Chemical Technology, Prague); PhD (Czech Academy of Sciences, Prague), Ocean Nutrition, Dartmouth, NS  
Matta, C., B. Pharm. Sci. (Alexandria U, Egypt), Graduate Diploma in Health and Hospital Administration (National Institute of Management, Egypt), PhD (McMaster), Mount Saint Vincent University, Halifax, NS  
Pacey, P. D., BSc (McGill), PhD (Toronto), FCIC, Dalhousie University, Halifax, NS  
Pincock, J. A., BSc, MSc (Man), PhD (Toronto), FCIC, Dalhousie University, Halifax, NS  
Pinto, D. M., BSc (McGill), PhD (Alberta), Institute for Marine Biosciences, Halifax, NS  
Pottie, I. R., BSc (SMU), PhD (MUN), Mount Saint Vincent University, Halifax, NS  
Quilliam, M., BSc, PhD (Manitoba), National Research Council, Institute for Marine Biosciences, Halifax, NS  
Ramaley, L., BA (Colorado), MA, PhD (Princeton), FCIC, Dalhousie University, Halifax, NS  
Syvitski, R., BSc, MSc (Lakehead), PhD (UBC), Institute for Marine Biosciences, Halifax, NS  
Werner-Zwanziger, U., Vordiplom (Mathematics), Diploma (Chemistry), PhD (Westfälische Wilhelms-Universität Münster, Germany), Dalhousie University, Halifax, NS

## Part-time Academics

Grindley, T. B., BSc, MSc, PhD (Queen's)  
Perrott, A., BSc, PhD (Dalhousie), BEd (Acadia)  
Pincock, J. A., BSc, MSc (Man), PhD (Toronto)

## Postdoctoral Fellows, Research Associates/ Assistants

Banfield, S., BSc (Acadia), PhD (UWO)  
 Barden, C. J., BSc (James Madison U), PhD (U of Georgia)  
 Chen, R., BSc (U of Sha Shi, China), MSc, PhD (China U of Petroleum)  
 Cordes, R. E., BSc (Dalhousie), MSc (UBC)  
 Crawford, S. M., BSc (UVic), PhD (Dalhousie)  
 Fisher, L., BS (The College of New Jersey), PhD (U of Delaware)  
 Hatchard, T., BSc, BComm (SMU), MSc, PhD (Dalhousie)  
 Hawco, C., BSc (SMU), MSc (Dalhousie)  
 Johnson, M., BSc (Dalhousie), MSc (UWO)  
 Marchal, E., BSc, MSc (Nancy U, France), PhD (Rennes U, France)  
 Meek, A., BSc, MSc, PhD (Dalhousie)  
 McGrath, A., BSc (UNB), MSc (Queen's)  
 Reed, M., BSc (Reading, UK), D.Phil (Sussex, UK)  
 Robertson, K., BSc, MSc, PhD (Dalhousie)  
 Senadhi Pathiranalag, T. K., Graduateship course (Institute of Chemistry, Ceylon, Sri Lanka)  
 Smithen, D. A., MChem, PhD (Cardiff U, Wales)  
 Tang, G., BSc, MSc (Tong Ji U, China), PhD (Chinese Academic Science, China)  
 Wang, Y., BS (PLA's Medical College, China)  
 Weaver, C., BSc, MSc (Queen's)  
 Wu, F., PhD (Research Institute of Petroleum Processing, Beijing, P.R. China)

## I. Introduction

Chemistry is often called the central science because of its relevance to so many other disciplines. Understanding the composition and properties of matter, as well as the manner in which one substance is transformed into another, is essential to the study of our physical and natural worlds. As such, chemistry is often a starting point for many different careers in science. A variety of programs are available, ranging from focused studies to interdisciplinary options to suit the interests of the student.

A chemistry degree involves considerable breadth of training in the major branches of chemistry. These include organic, inorganic, physical, analytical and biological chemistry. In addition to establishing a solid foundation in the fundamental principles of chemistry, students who undertake a chemistry degree develop essential skills that include problem solving, critical thinking, organization, data analysis, and written and oral communication. The laboratories associated with classes develop the necessary experience with laboratory procedures, equipment and safety, and serve to reinforce the concepts learned in lecture.

## II. Degree Programs

The Department of Chemistry offers five main degree programs as either a BSc or BA: an Honours degree, a Combined Honours degree, a 20 Credit Major degree, a 20 Credit Double Major degree and a 15 Credit degree. Other programs include a Science Co-op degree, a 15 Credit degree concurrent with a Diploma in Engineering, a Multidisciplinary Honours degree, and a Minor in Chemistry.

The Honours degree and 20 Credit Major degree in Chemistry, as well as corresponding Co-op programs, are accredited by the Canadian Society for Chemistry (CSC). CSC accreditation ensures that graduates of these programs have met certain criteria concerning the quantity and quality of their instruction. It qualifies such graduates for membership in the CSC and to practice chemistry as professionals.

The sections below list the specific departmental requirements for various degree programs. In addition, students must satisfy the College of Arts and Science requirements that are outlined in the Undergraduate Calendar. Students who participated in the Dalhousie Integrated Science Program (DISP) in their first year should consult the Undergraduate Calendar for first-year class equivalencies in each class of study. For further information, it is suggested that students contact the department and speak with a Chemistry Advisor if necessary.

### A. Concentrated Honours Degree (20 Credit)

This program is intended to provide a broad training in chemistry while at the same time making provision for the individual interests of students. All honours students must consult with an academic advisor and obtain approval of their class selection.

For the Honours degree, all credits in the honours subject must be passed with a grade of at least C, except CHEM 4901, which requires a minimum grade of B- for honours qualification. The minimum GPA for classes in the honours subject is 3.00.

### Departmental Requirements

- CHEM 1011.03/1012.03, or CHEM 1021.03/1022.03, or DISP (SCIE 15XX)
- CHEM 2101.03, CHEM 2201.03, CHEM 2301.03, CHEM 2304.03, CHEM 2401.03, CHEM 2402.03
- CHEM 3103.03, CHEM 3201.03 or 3202.03, CHEM 3301.03, CHEM 3401.03 or 3404.03, CHEM 3601.03
- A minimum of 2.5 additional credits in chemistry above the 1000 level
- CHEM 4901.06

### Other Required Classes

- MATH 1000.03/1010.03 or equivalent
- MATH 2001.03
- MATH 2030.03
- PHYC 1100.06 or PHYC 1300.06 or PHYC 1280.03/1290.03 or equivalent

### B. Combined Honours Degree (20 Credit)

Students who want to study chemistry in conjunction with another subject may wish to pursue a Combined Honours degree program. The other subject may be any discipline from the Faculty of Science or the Faculty of Arts and Social Sciences, or may be a program in Computer Science or Environment, Sustainability and Society. Chemistry may be the primary subject (defined as the subject with the larger number of honours credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA. Students are advised that some of the College of Arts and Science requirements for a Combined Honours degree differ for the BA and BSc (see Undergraduate Calendar).

Students enrolled in the Combined Honours program must have their program of study approved by advisors in both subject areas. A minimum GPA of 3.00 is required for science classes in the honours subject(s); a minimum GPA of 2.70 is required for Arts and Social Sciences classes in the honours subject.

Students must complete an Honours Qualifying Examination in one of the two subject areas with a minimum grade of B- for honours qualification. This requirement is usually, but not necessarily, completed in the primary subject area. For chemistry, this requirement is satisfied through CHEM 4901.

For chemistry as the primary subject area, the requirements are listed below

### Departmental Requirements (Chemistry as Primary Subject)

- CHEM 1011.03/1012.03, or CHEM 1021.03/1022.03, or DISP (SCIE 15XX)
- CHEM 2101.03, CHEM 2201.03, CHEM 2301.03/2304.03, CHEM 2401.03/2402.03
- A minimum of three additional credits in chemistry above the 1000 level, including two credits above the 2000 level
- Honours Qualifying Examination (if taken in chemistry through CHEM 4901.06, this counts as one of the 3 additional credits above).

### Other Required Classes (Chemistry as Primary Subject)

- MATH 1000.03/1010.03
- A minimum of five credits in the secondary subject above the 1000 level, including two credits above the 2000 level. Consult with the secondary department for specific requirements.

For chemistry as the secondary subject area, the first-year requirements are as listed above. A minimum additional five unspecified credits in chemistry are required beyond the 1000 level, including two credits beyond the 2000 level.

For the Combined Honours degree, a minimum of 11 credits beyond the 1000 level are required in the two subject areas, with not less than five or more than nine in either. At least two credits in each subject must be above the 2000 level. Students are advised to consult the specific requirements of the other department involved.

## C. Major Degree (20 Credit)

The 20 Credit Major degree is suited to students who want to focus on chemistry but wish to have a program that is somewhat less constrained than the Honours degree. Like the Honours degree, this program is accredited by the Canadian Society for Chemistry. The departmental requirements are listed below.

### Departmental Requirements

- CHEM 1011.03/1012.03, or CHEM 1021.03/1022.03, or DISP(SCIE 15XX)
- CHEM 2101.03, CHEM 2201.03, CHEM 2301.03/2304.03, CHEM 2401.03/2402.03
- CHEM 3103.03, CHEM 3201.03 or CHEM 3203.03, CHEM 3305.03, CHEM 3401.03 or CHEM 3404.03, CHEM 3601.03
- A minimum of two additional credits in chemistry above the 1000 level including a half credit in chemistry above the 2000 level

### Other Required Classes

- MATH 1000.03/1010.03 or equivalent
- A total of one credit from a combination of MATH (above 1000 level), STAT (any class) or CSCI 1100.03
- PHYC 1100.06 or PHYC 1300.06 or PHYC 1280.03/1290.03 or equivalent

## D. Double Major Degree (20 Credit)

As with the Combined Honours degree, the Double Major degree allows students to combine a program of study in chemistry with another subject area, but with fewer constraints than the Honours program. The other subject may be any discipline from the Faculty of Science or the Faculty of Arts and Social Sciences, or may be a program from Computer Science or Environment, Sustainability and Society. Chemistry may be the primary subject (defined as the subject with the larger number of credits), or the secondary subject. If the primary subject area is from the Faculty of Arts and Social Sciences, the degree granted will be a BA. Students are advised that some of the College of Arts and Science requirements for a Double Major degree differ for the BA and BSc (see the Undergraduate Calendar).

For chemistry as the primary subject area, the requirements are listed below

### Departmental Requirements (Chemistry as Primary Subject)

- CHEM 1011.03/1012.03, or CHEM 1021.03/1022.03, or DISP(SCIE 15XX)
- CHEM 2101.03, CHEM 2201.03, CHEM 2301.03 or CHEM 2304.03, CHEM 2401.03
- A minimum of three additional credits in chemistry above the 1000 level including two credits in chemistry above the 2000 level

### Other Required Classes (Chemistry as Primary Subject)

- MATH 1000.03 and one of MATH 1010.03 or MATH 1060.03
- A minimum of five credits in the secondary subject above the 1000 level, including two credits above the 2000 level. Consult with the secondary department for specific requirements.

For chemistry as the secondary subject area, the first-year requirements are as listed above. A minimum additional five unspecified credits in chemistry are required beyond the 1000 level, including a minimum of two credits beyond the 2000 level.

For the Double Major degree, a minimum of 10 credits beyond the 1000 level are required in the two subject areas, with not less than five or more than nine in either, including two credits beyond the 2000 level in each subject. Students are advised to consult the specific requirements of the other department involved.

## E. Co-operative Education Program in Chemistry

Co-operative Education in Science (Science Co-op) is a program where academic study is combined with paid career-related work experience. Students undertake three or four work-terms throughout their academic study terms. Science Co-op degree programs enable students to apply their knowledge directly while providing them with work experience that assists in making educated career choices. Students normally apply to join Science Co-op before their second year of study. If accepted into the Science Co-op program, students are required to register for and attend the Science Co-op Seminar Series (SCIE 2800.00) in the fall term of the year they join.

A limited number of students will be admitted into this program each year. Students must be eligible to work in Canada. The minimum GPA of 3.00 is

required for admission to and continuation in the Co-op program. Students must apply before August 1, but should, however, register their intention to enter the program with the Chemistry Office in the Spring of their first year if possible. Registration details are available from the DalChem Co-op Academic Advisor or the Co-operative Education office. For more information, please see <http://www.sciencecoop.dal.ca>.

### Departmental Requirements

Students in the Co-op program will be enrolled in one of the 20 credit programs: Honours, Combined Honours, 20 Credit Major, or 20 Credit Double Major. Degree requirements are the same as outlined for these programs, plus any additional requirements (seminars, work-terms, reports, etc.) stipulated by the Co-op program. It should be noted that, because of the scheduling of work-terms, Co-op degrees normally require 4.3 years to complete.

Students must consult with the Chemistry Co-op Academic Advisor to have their program of classes and work-terms approved.

## F. BSc or BA (15 credit) Minor in Chemistry

The 15 credit degree with a minor in Chemistry is appropriate for students who want to study some chemistry but do not wish to complete the conventional four-year program. This degree provides a specialization in chemistry at a minimum level and does not generally qualify the student for graduate studies in chemistry. It is possible for students who obtain this degree to upgrade it to a 20 credit major or honours degree with additional study.

### Departmental Requirements

- CHEM 1011.03/1012.03, or CHEM 1021.03/1022.03, or DISP (SCIE 15XX)
- A minimum of three additional credits in Chemistry above the 1000 level, excluding courses that do not lead to a Chemistry degree. (CHEM 2441 may be applied with the Diploma in Engineering.)

### Other Required Classes

- MATH 1000.03 and one of MATH 1010.03 or MATH 1060.03

## G. Minor in Chemistry

The Minor in Chemistry is intended for students in non-chemistry degree programs who wish to include a significant component of chemistry as part of their studies. The Minor in Chemistry may be combined with any of the 20 credit degree programs within the College of Arts and Science, but students should note that it may be difficult to obtain with Combined Honours or Double Major degrees without additional credits. For the acceptability of the Minor in Chemistry in other faculties, please consult the appropriate section of the Undergraduate Calendar.

### Departmental Requirements

Any three credits in chemistry beyond the 1000 level, except courses that do not lead to a chemistry degree.

## H. Certificate in Materials Science

The Department of Chemistry is a participant in a certificate program offered through the Faculty of Science - a Certificate in Materials Science.

A Certificate can be completed by a student in a BSc program, in addition to the student's regular program requirements. Completion of such a Certificate would be noted at Convocation, and shown on the student's transcript.

The purpose of a "Certificate in Materials Science" is to show that the graduate has appropriate training in the breadth and depth of materials science, in addition to their BSc program. It is particularly suited for students in Chemistry, Earth Sciences and Physics programs at Dalhousie University.

Students should enrol in the "Certificate in Materials Science" by contacting the Certificate Coordinator, Dr. Mary Anne White ([mawhite@dal.ca](mailto:mawhite@dal.ca)). Students can enrol when in their second, third or fourth year of the BSc program, but early enrolment is advised.

### Departmental Requirements

During the BSc program, students in the "Certificate in Materials Science" must complete at least four of the following classes, with a minimum grade of B- in each:

- CHEM 3305.03 (or its former version, CHEM 3303.03): Materials Science
- CHEM 4502.03: Polymer Science
- CHEM 4311.03: Fundamental and Applied Electrochemistry

- EARTH 2001.03: Earth Materials Science I
- EARTH 2002.03: Earth Materials Science II
- PHYC 3303.03: Materials Science
- PHYC 3900.03: Introduction to Soft Condensed Matter Physics
- PHYC 4230.03: Introduction to Condensed Matter
- BIOE 4391.03: Polymeric Biomaterials
- BMNG 5110.03: Biocompatibility and Biomaterials Design
- MATL 3500.03: Materials Engineering
- MATL 3510.03: Extraction of Materials
- MATL 3601.03: Structure of Materials
- MATL 3611.03: Corrosion and Degradation of Materials
- MATL 3612.03: Thermodynamics of Materials
- MATL 3620.03: Introduction to Physical Metallurgy
- MATL 3621.03: Mechanical Behaviour of Materials
- MATL 4703.03: Non-Metallic Materials
- MATL 4722.03: Ferrous Alloys and Joining of Materials
- MATL 4805.03: Electrochemical Processing of Materials
- MATL 4806.03: Particulates in Materials Engineering
- MATL 4815.03: Kinetics of Materials Processing
- MATL 4823.03: Non-ferrous Alloys
- MATL 4824.03: Industrial Metallurgy
- MATL 4825.03: Solidification and Casting

### Other Required Classes

In addition, the Certificate in Materials Science students must complete a research project with a materials emphasis (as pre-approved by the Certificate Coordinator) via one of the following sets of classes, with a minimum grade of B-:

- CHEM 4801.03 and CHEM 4802.03  
OR CHEM 4901.06  
OR EARTH 4200.06 OR EARTH 4100.06  
OR PHYC 4800.03 and PHYC 4850.03

### I. Certificate in Medicinal Chemistry

The Department of Chemistry offers a Certificate in Medicinal Chemistry in conjunction with its 20 credit degree programs. This certificate is intended to reflect that the student has completed a class of study in chemistry that is appropriate for employment or further study related to pharmaceutical development and production. Once the requirements have been fulfilled, the certificate will be noted on the student's transcript and presented at convocation. The requirements include the completion of a 20 credit degree program in Chemistry (20 credit major, 20 credit honours, double major, combined honours, etc.), that includes the following classes.

#### Required classes:

- CHEM 2101.03, CHEM 2201.03, CHEM 2301.03 and 2304.03, CHEM 2401.03 and 2402.03
- CHEM 3203.03, CHEM 3401.03 and CHEM 3404.03, CHEM 3601.03
- CHEM 4401.03, CHEM 4601.03
- Any two of: CHEM 3301.03, CHEM 4201.03, CHEM 4205.03, CHEM 4206.03, CHEM 4301.03, CHEM 4402.03

Recommended Electives: CHEM 2488, BIOC 2300, BIOC 2610, BIOC 3200, BIOC 4701

To be awarded the Certificate in Medicinal Chemistry, students should contact their advisor in the Department of Chemistry no later than four weeks after the start of the term in which they intend to graduate, indicating that they wish to have their qualifications for the certificate assessed.

### J. BSc Multidisciplinary Honours (20 Credit)

In rare cases, students may want to study chemistry in conjunction with two or more other subject areas. For these students, the College of Arts and Science offers a Multidisciplinary Honours BSc degree program that may be appropriate. (see the Undergraduate Calendar for more details). Because of the complex nature of this program, students who are considering the Multidisciplinary Honours BSc should consult with an advisor in each of the departments involved to ensure that their program of study is acceptable.

### K. Minors in other subjects

Minor programs allow students to develop subject specialties, especially ones taught outside their main faculty, that complement their major or honours subjects. Minors are normally added to a four-year major or concentrated honours program.

If a minor is added to a double major or a combined honours program, students may find that they need to take more than 20 credits to complete all of their degree requirements.

For a list of subject areas for which minors are available and their requirements, students should consult with the College of Arts and Science Degree Requirements section of the Undergraduate Calendar, as well as the particular subject area of the calendar.

## III. Class Descriptions

Undergraduate classes that are regularly offered by the Chemistry Department are briefly described in this section. More detailed information can be found on the departmental web site at <http://chemistry.dal.ca>. Students should note the following.

- Not all classes are offered every year. Please consult the Academic Timetable for the details of classes offered in a particular academic year.
- The first digit of the class number is the year of a student's program that a class would typically be taken, but this is not meant to be restrictive if a student has the necessary prerequisites or permission of the instructor. For example, a 3000 level class can be taken in the fourth year and 4000 level class can be taken in the third year.
- The second digit of the class number defines the general sub-discipline:
 

0 = General Chemistry	5 = Interdisciplinary
1 = Inorganic Chemistry	6 = Biological Chemistry
2 = Analytical Chemistry	8,9 = Research Classes
3 = Physical Chemistry	
4 = Organic Chemistry	
- The extension following the class number (e.g., XXXX.03) indicates the number of credit hours assigned to the class (e.g., three credit hours). Note that six credit hours are equivalent to one credit.
- All chemistry classes, unless stated otherwise, have a minimum grade requirement of C- for their prerequisite chemistry classes. Students with grades below C- in the prerequisite chemistry classes can only register with the permission of the instructor for the class.
- Unless stated otherwise, the minimum grade requirement for credit in a chemistry class is a D, except for Honours programs, where the minimum grade requirement for chemistry credit is a C (B- for Honours Qualifying Examination).

### Chemistry Resource Centres

First-Year and Advanced Chemistry Resource Centres are located in Rooms 122 and 115, respectively. The former is staffed with advanced undergraduate and graduate students to help with both lab and class material. First-year students are encouraged to make use of the Concept Room, which is located in the First-Year Resource Centre. Here, first-year Instructors will be available at regularly scheduled times to provide aid with class material in a small group or one-on-one atmosphere.

The First-Year Chemistry Resource Centre also houses a number of computers with chemistry-specific programs for students to use. Additionally, there is a selection of resource materials such as molecular model kits and reference texts available to students.

### CHEM 1011.03: Concepts in Chemistry: Structure and Reactivity.

The electronic structures of atoms and molecules are used to explain the reactivity and properties of chemicals. Topics include atomic structure, bonding models, structure and shape of molecules and ions, and acid/base chemistry. It is recommended that students have Nova Scotia grade 12 chemistry or equivalent before taking this class.

COORDINATORS: S. Barkhouse, P. Laws

FORMAT: Lecture 3 hours, lab 3 hours

EXCLUSION: Credit will be given for only one of the following combinations:  
CHEM 1011.03/1012.03 or CHEM 1021.03/1022.03 or DISP (SCIE 15XX)

### CHEM 1012.03: Concepts in Chemistry: Energy and Equilibrium.

The principles of thermodynamics and kinetics are used to explain chemical reactivity and the principles of organic chemistry are used to develop an understanding of organic synthesis. Special topics include electrochemistry,

spectroscopy, chirality, polymers, and the chemistry of living systems to illustrate the relevance of chemistry in everyday life.

COORDINATORS: S. Barkhouse, P. Laws

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: Chemistry 1011.03 or equivalent

EXCLUSION: Credit will be given for only one of the following combinations:  
CHEM 1011.03/ 1012.03 or CHEM 1021.03/ 1022.03 or DISP (SCIE 15XX)

### **CHEM 1021.03: Engineering Chemistry I.**

The electronic structures of atoms and molecules are used to explain the reactivity and properties of chemicals. Topics include atomic structure, bonding models, structure and shape of molecules and ions, and acid/base chemistry. It is recommended that students have Nova Scotia grade 12 chemistry or equivalent before taking this class.

COORDINATORS: S. Barkhouse, P. Laws

FORMAT: Lecture 3 hours, lab 3 hours

EXCLUSION: Credit will be given for only one of the following combinations:  
1011.03/ 1012.03 or 1021.03/ 1022.03 or DISP (SCIE 15XX)

### **CHEM 1022.03: Engineering Chemistry II.**

The principles of thermodynamics and kinetics are used to explain chemical reactivity and the principles of organic chemistry are used to develop an understanding of organic synthesis. Special topics include electrochemistry, spectroscopy, chirality, polymers, and the chemistry of living systems to illustrate the relevance of chemistry in everyday life.

COORDINATORS: S. Barkhouse, P. Laws

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: CHEM 1021.03

EXCLUSION: Credit will be given for only one of the following combinations:  
CHEM 1011.03/ 1012.03 or 1021.03/ 1022.03 or DISP (SCIE 15XX)

### **CHEM 1410.03: Introductory Chemistry Related to Human Health.**

General introductory chemistry topics are covered with an emphasis on their relevance to health related disciplines. Subject matter includes atomic and molecular structure, nuclear chemistry, chemical reactions, energy, gases, solutions, chemical equilibria, acids and bases, and introductory organic chemistry. Basic math skills and some chemistry background are assumed.

NOTE: This class does not qualify as a chemistry credit towards a chemistry degree.

INSTRUCTOR(S): J. MacDonald

FORMAT: Lecture 3 hours, tutorial 1.5 hours

EXCLUSION: CHEM 1410.03 cannot be taken concurrently with or after CHEM 1011.03/1012.03, 1021.03/1022.03 or DISP/SCIE 15XX

### **CHEM 2101.03: Introductory Inorganic Chemistry.**

The fundamentals of inorganic chemistry are covered. Specific topics include ionic bonding and the nature of solids, the structure of atoms and simple bonding theory, coordination chemistry of the transition metals, and selected topics in main group chemistry. The preparation, analysis and observation of inorganic compounds are the laboratory assignments.

INSTRUCTOR(S): K.R. Grundy

FORMAT: Lecture 3 hours, lab 4 hours every second week

PREREQUISITE: CHEM 1011.03/1012.03 or equivalent

### **CHEM 2201.03: Introductory Analytical Chemistry.**

The basic principles of analytical chemistry are presented, including chemical and instrumental methods of analysis. Instrumental techniques covered include mass spectrometry, chromatography, spectroscopy, and electrochemistry. Laboratory experiments explore all of these topics, and illustrate the techniques with practical examples.

INSTRUCTOR(S): A. Doucette

FORMAT: Lecture 3 hours, lab 4 hours

PREREQUISITE: CHEM 1011.03/1012.03 or equivalent

### **CHEM 2301.03: Introduction to Physical Chemistry I.**

The physical principles underlying chemical systems and reactivity are explored, with an emphasis on the forces between molecules and the properties of matter. Principles of thermodynamics are presented, including thermochemistry, entropy and free-energy relationships. Applications include phase equilibria, chemical equilibria, solutions, colligative properties and electrochemistry.

INSTRUCTOR(S): M. Obrovac

FORMAT: Lecture 3 hours, five 4-hour labs every second week

PREREQUISITE: CHEM 1011.03/1012.03 or equivalent; MATH 1000.03 or equivalent

### **CHEM 2304.03: Introductory Physical Chemistry II.**

The physical properties of chemical systems at the level of atoms and molecules are examined. Topics include the quantum mechanical description of atoms and molecules, chemical bonding, experimental and computational methods for studying molecular systems, and the kinetics of chemical processes.

INSTRUCTOR(S): P. Zhang

FORMAT: Lecture 3 hours, lab 4 hours

PREREQUISITE: CHEM 1011.03/1012.03 or equivalent; MATH 1000.03 and MATH 1010.03 or equivalent

### **CHEM 2401.03: Introductory Organic Chemistry: Structure, Concepts of Mechanisms and Spectroscopy.**

Organic chemistry is introduced through an examination of bonding, conformation and stereochemistry. Spectroscopic methods (MS, IR, <sup>1</sup>H and <sup>13</sup>C NMR) are used to determine the structures of compounds. Alkanes, alkenes, alkynes and alkyl halides are presented with an emphasis on the mechanisms of their reactions.

INSTRUCTOR(S): D.J. Burnell

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: CHEM 1011.03/1012.03 or equivalent

### **CHEM 2402.03: Introductory Organic Chemistry: Reactivity of Functional Groups.**

Building on CHEM 2401, the properties and reactions of alcohols, ethers, amines, nitriles, the carbonyl-containing functional groups and aromatic compounds are examined. The reactions are used in synthetic sequences, and reaction mechanisms are stressed. The concepts of resonance and aromaticity become familiar. The use of spectroscopic methods is reinforced.

INSTRUCTOR(S): D.J. Burnell

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: CHEM 2401.03

### **CHEM 2441.03: Foundations of Organic and Biological Chemistry.**

This class develops an understanding for organic chemistry and the role that organic molecules play in a variety of organic systems, including those of living systems. Emphasis is placed on basic ideas, organic functional groups, stereochemistry, simple organic reactions, carbonyl chemistry and the structure relationship of proteins, sugars and DNA.

NOTE: CHEM 2441 does not satisfy a full-year organic chemistry requirement.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: CHEM 1011.03/1012.03 or equivalent

EXCLUSION: CHEM 2441.03 does not qualify as a chemistry credit towards a chemistry degree (except for a 15-credit BSc/Dip Eng)

### **CHEM 2442.03: Organic Chemistry for Pharmacy Students.**

Aspects of organic chemistry relevant to the requirements for the degree of Bachelor of Science in Pharmacy are presented. This class does not serve as a prerequisite for any other chemistry class.

INSTRUCTOR(S): N. P. Schepp

FORMAT: Lecture 4 hours

RESTRICTION: Restricted to students in the Bachelor of Science in Pharmacy program.

### **CHEM 2488.03: Our Organic World.**

Pharmaceuticals, plastics, and some fuels are organic compounds with dramatic roles in our health and economy. Drugs or poisons? Caraway or spearmint? Bendable or stiff? Aspects of organic chemistry are surveyed so that issues such as these can be debated and the chemical facts applied to the world around us.

INSTRUCTOR(S): A. Thompson

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 1000.03 or CHEM 1011.03 or CHEM 1410.03 or equivalent

EXCLUSION: CHEM 2488.03 does not serve as a prerequisite for any other chemistry class nor does it count as a chemistry credit towards any degree with a major in chemistry.

### **CHEM 3103.03: Intermediate Inorganic Chemistry.**

Modern bonding theories are developed using symmetry concepts. These are applied to understanding the molecular structure, reactivity and spectroscopic properties of inorganic compounds, including coordination compounds and

organometallic complexes. The compounds prepared in the laboratory introduce more advanced synthetic procedures for the preparation of inorganic compounds.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours, lab 4 hours

PREREQUISITE: CHEM 2101.03

EXCLUSION: CHEM 3101.03, CHEM 3102.03

### **CHEM 3201.03: Analytical Mass Spectrometry and Separations.**

The most commonly employed instrumental techniques in chemical analysis use spectroscopy in some form or involve separations. Qualitative and quantitative analysis and the instrumentation involved are discussed in some detail for mass spectrometry. Methods of separation including solvent extraction and the various types of chromatography are presented. Laboratory experiments illustrate the above techniques with practical examples.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours, lab 4 hours

PREREQUISITE: CHEM 2201.03

### **CHEM 3202.03: Instrumental Methods of Analysis.**

Modern scientific research depends on instrumentation to achieve accurate measurements. Students will gain experience in several important topics in instrumental analysis: electrochemistry, spectroscopy, sampling theory, and data analysis. Experimental principles, the instrumentation, and analytical applications are examined. The laboratory experiments illustrate the topics covered in the lecture.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours, lab 4 hours

PREREQUISITE: CHEM 2201.03

### **CHEM 3301.03: Quantum Mechanics and Chemical Bonding.**

The fundamentals and postulates of quantum mechanics are developed from first principles, with applications to illustrative model systems, vibrations, rotations, atoms, and molecules.

INSTRUCTOR(S): R. Boyd

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2001.03 and MATH 2030.03, and CHEM 2304.03, and PHYC 1280.03/1290.03.06 or 1300.06

### **CHEM 3305.03: Materials Science.**

This class emphasizes the principles involved in understanding physical properties of materials, such as thermal and mechanical stability, and electrical and optical properties. All phases of matter are examined: gases, liquids, films, liquid crystals, perfect crystals, defective solids, glasses. Important processes such as photography and Xerography are explained.

NOTE: This class is the same as PHYC 3303, except CHEM 3305 has a lab and PHYC 3303 has a major term paper. Also, PHYC 3200.03 could be taken as a corequisite.

INSTRUCTOR(S): M.A. White

FORMAT: Lecture 3 hours, five 4-hour labs every second week

PREREQUISITE: CHEM 2301.03 or PHYC 2520.03 or PHYC 3200.03 (can be a corequisite) or EARTH 2001.03/2002.03 or ENGI 2800.03 or permission of instructor

EXCLUSION: PHYC 3303.03, CHEM 3303.03

### **CHEM 3401.03: Intermediate Organic Chemistry.**

Topics presented include aromatics, heterocycles, amines, enolate anions and other methods for forming C-C bonds, concerted reactions, carbohydrates and some heteroatom chemistry. There is a continuing emphasis on the principles of mechanistic organic chemistry. Students work independently in the laboratory on the preparation of organic compounds.

INSTRUCTOR(S): N.P. Schepp

FORMAT: Lecture 3 hours, lab 4 hours

PREREQUISITE: CHEM 2401.03/2402.03

### **CHEM 3404.03: Intermediate Organic Chemistry — Physical Organic and Spectroscopy.**

This class provides an introduction to concepts in physical organic chemistry that are used to explain structure reactivity relationships. Spectroscopic techniques are also described with an emphasis on NMR spectroscopy. The organic laboratory will focus on organic compound separation and identification.

INSTRUCTOR(S): F.L. Cozens

FORMAT: Lecture 3 hours, lab 4 hours

PREREQUISITE: CHEM 2401.03/2402.03

EXCLUSION: CHEM 3402.03

### **CHEM 3601.03: Chemistry of Living Systems.**

The chemical principles governing a wide variety of biological processes are discussed. Structure and mechanism are emphasized in explanations and predictions of the behavior of organic compounds in nature. Specific topics include proteins, activation of carboxyl groups, peptide synthesis and biosynthesis, enzyme catalysis, coenzymes and prochirality.

INSTRUCTOR(S): F.L. Cozens

FORMAT: Lecture 3 hours per week

PREREQUISITE: CHEM 2402.03

### **CHEM 4101.03: Advanced Main Group Chemistry.**

Following a brief overview of the fundamental aspects of preparation, structure and bonding for familiar systems, selected topics are examined in some detail. An emphasis is placed on novel structure and bonding arrangements in comparison with carbon chemistry.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 3103.03

CROSS-LISTING: CHEM 5101.03

### **CHEM 4102.03: Advanced Transition Metal Chemistry.**

Various themes of modern transition metal chemistry are examined, including but not restricted to: fundamental structure and bonding; spectroscopic characterization methods; as well as reactivity and reaction mechanisms.

INSTRUCTOR(S): M. Stradiotto

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 3103.03

CROSS-LISTING: CHEM 5102.03

### **CHEM 4120.03: Advanced Organometallic Chemistry.**

Catalytic and stoichiometric transition metal mediated reactions of fundamental significance in synthetic chemistry are surveyed. Molecular orbital theory is used to understand structure and bonding in metal complexes and the reactivity properties of these species. Relevant examples from the current chemical literature are introduced.

INSTRUCTOR(S): M. Stradiotto

FORMAT: Lectures 3 hours

PREREQUISITE: CHEM 3103.03

### **CHEM 4201.03: Advanced Topics in Separations.**

Classical methods (solvent extraction and ion exchange) are reviewed for pre-concentration of metal ions prior to their determination by spectroscopic methods. Chromatographic topics include gas, liquid, and supercritical chromatography with emphasis on multidimensional techniques. Examples in environmental and biological analysis are drawn from the current literature.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 2201.03

CROSS-LISTING: CHEM 5201.03

### **CHEM 4205.03: Chemometrics.**

The application of statistical tools to univariate and multivariate chemical measurements is explored. Topics include descriptive statistics, probability and probability distributions, propagation of errors, hypothesis testing, analysis of variance, experimental design, univariate and multivariate calibration, pattern recognition, exploratory data analysis and mixture analysis. Students are introduced to programming in MatLab.

INSTRUCTOR(S): P.D. Wentzell

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 2201.03

CROSS-LISTING: CHEM 5205.03

### **CHEM 4206.03: Analytical Mass Spectrometry.**

This class offers a thorough treatment of modern analytical mass spectrometry instrumentation, with applications towards chemical and biochemical analysis. Specific examples include characterization of pharmaceuticals and biomolecules (proteins, carbohydrates), and discussion of field portable instruments. Reaction mechanisms and spectral interpretation are discussed, but are not emphasized in this applied course.

INSTRUCTOR(S): A.A. Doucette

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 2201.03

CROSS-LISTING: CHEM 5206.03

**CHEM 4301.03: Theory of Chemical Bonding.**

This class develops molecular orbital theory from both qualitative and quantitative perspectives. Topics include the basic principles of the LCAO (Linear Combination of Atomic Orbitals) MO method, qualitative understanding of MOs in simple molecules, orbital symmetries, through to state-of-the-art techniques for computer computations of molecular properties.

INSTRUCTOR(S): R.J. Boyd

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 3301.03

CROSS-LISTING: CHEM 5301.03

**CHEM 4311.03: Fundamental and Applied Electrochemistry.**

This class provides a broad introduction to the fundamentals of electrochemistry, including electrochemical theory, double layer modelling and electrochemical methods. Additionally, important electrochemical applications are discussed, including corrosion, energy production and energy storage (fuel cells, batteries and supercapacitors).

INSTRUCTOR(S): M. Obrovac

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 2301.03 and CHEM 2304.03

CROSS-LISTING: CHEM 5311.03

**CHEM 4401.03: Synthesis in Organic Chemistry.**

A number of important organic reactions are examined in depth with particular attention to regioselectivity and the development of relative or absolute stereochemistry. Applications of these reactions in the synthesis of complex molecules are illustrated with recent examples from the literature.

INSTRUCTOR(S): D.J. Burnell

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 3401.03 or equivalent

CROSS-LISTING: CHEM 5401.03

**CHEM 4402.03: Organic Structure Determination.**

Nuclear magnetic resonance spectroscopy and mass spectrometry are emphasized in solving structural problems. Topics include 2D NMR, correlation of structure with chemical shifts and coupling constants, operation of NMR spectrometers, NMR relaxation, analysis of spectral patterns, the vector model of 1D and 2D experiments and ionization methods in mass spectrometry.

INSTRUCTOR(S): B. Grindley

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 3402.03 or CHEM 3404.03

CROSS-LISTING: CHEM 5402.03

**CHEM 4502.03: Polymer Science.**

Aspects of synthesis, analysis, characterization, structure and uses of synthetic and naturally occurring macromolecules are explored. Emphasis is on the application of standard methods of organic synthesis, analytical separations, and physico-chemical characterization. There is no laboratory, but students will do an independent literature project.

INSTRUCTOR(S): G. Welch

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 2201.03 and 2301.03 and 2304.03 and 2402.03

**CHEM 4504.03: Diffraction Techniques in Solid State Chemistry.**

All chemical elements and compounds can exist as crystalline solids. This class studies the arrangements of atoms and molecules in such solids and examines the methods used to determine these structures. Particular emphasis is placed on the techniques of X-ray crystallography.

INSTRUCTOR(S): Staff

FORMAT: Lecture 2 hours, lab 3 hours

PREREQUISITE: CHEM 2101.03 and MATH 2001.03 and 2030.03

**CHEM 4595.03: Atmospheric Chemistry.**

Fundamental introduction to the physical and chemical processes determining the composition of the atmosphere and its implications for climate, ecosystems, and human welfare. Origin of the atmosphere. Nitrogen, oxygen, carbon, sulfur cycles. Atmospheric transport and turbulence. Stratospheric ozone. Oxidizing power of the atmosphere. Regional air pollution: aerosols, smog, acid rain.

INSTRUCTOR(S): R.V. Martin

FORMAT: Lecture 3 hours

PREREQUISITE: Math 1000, PHYC 1280.03/1290.03 or PHYC 1300 and CHEM 1011/1012

CROSS-LISTING: PHYC 4595.03, OCEA 4595.03, OCEA 5595.03

**CHEM 4601.03: Principles of Biomolecular and Drug Molecule Design.**

The class covers both general principles and biochemical considerations in drug design. The fundamental goal is to give students the necessary tools to design new chemical structures as putative therapeutics for a human or veterinarian pathological problem. Students in chemistry are strongly recommended to take CHEM 3601.03 prior to registering in this class.

INSTRUCTOR(S): D.F. Weaver

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 2402.03

CROSS-LISTING: CHEM 5601

**CHEM 4602.03: Biophysical Characterization of Macromolecules.**

Covers methods allowing determination of sub-molecular and atomic-level structure and dynamics of biomacromolecules in physiological settings (e.g. solution-state or lipid bilayers) including: fluorescence, electronic and vibrational circular dichroism and NMR spectroscopy; light vs. X-ray vs. neutron scattering; and, single molecule methods.

INSTRUCTOR(S): J.K. Rainey

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 1010.03, BIOC 3200.03 or CHEM 3601.03, CHEM 2303.03 or CHEM 2301.03, CHEM 2304.03. Recommended: PHYC 1280.03/1290.03.06 or PHYC 1300.06

CROSS-LISTING: BIOC 4702.03, CHEM 5602.03, BIOC 5702.03

**CHEM 4801.03: Research Project in Chemistry I.**

Students carry out research projects under the supervision of a faculty member, and submit a report and make an oral presentation.

INSTRUCTOR(S): Staff

PREREQUISITE: CHEM 2101.03, 2201.03, 2301.03, 2304.03 (or 2302.03), 2401.03 and 2402.03 plus at least one full credit at the 3000 or 4000 level in the area of interest with an average grade of at least B- or permission of instructor; GPA 3.0

**CHEM 4802.03: Research Project in Chemistry II.**

Students carry out research projects under the supervision of a faculty member and submit a report and make an oral presentation. This class is intended for those students in the Major program who wish greater exposure to independent scientific research.

INSTRUCTOR(S): Staff

PREREQUISITE: CHEM 4801.03

**CHEM 4901X/Y.06: Honours and Major Research Project.**

This class is required for students in the honours program. Students carry out research projects under the supervision of a faculty member and submit reports and make oral presentations to the Department.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term. A minimum GPA of 3.0 is required for this class

INSTRUCTOR(S): A. Doucette

PREREQUISITE: Permission of instructor

 Wach, G., Earth Sciences (494-8019)  
 Zhang, P., Chemistry (494-3323)

## I. Science Co-operative Education

Science Co-operative Education (Science Co-op) is an academic program where academic study is combined with career related work experience. Students complete three to four work terms throughout their academic study terms and graduate with a Bachelor of Science, Co-op. Science Co-op is available in Biochemistry & Molecular Biology, Biology, Chemistry, Earth Sciences, Environmental Science, Economics, Marine Biology, Mathematics, Microbiology & Immunology, Physics and Atmospheric Science, and Statistics. Students may choose a Major, Honours, or Double Major (where only one of the disciplines is a recognized Science Co-operative Education program).

Students who are accepted into Science Co-op generally begin their first work term in January or May of Year II. Work terms are paid employment related to the student's field of study. The program includes three to four work terms and a minimum of eight academic terms comprising 20 academic credits. The Science Co-operative Education degree program normally takes approximately four and a half years, depending upon the field of study chosen.

Students in Science Co-op must plan their academic class load carefully under the guidance of the departmental Co-op Academic Advisor. Science Co-op students have limited opportunity to take certain numbered classes and the choice of classes in the summer academic term may be limited. It is important that students realize that successful completion of the work terms is an integral part of their academic studies and degree.

### A. Eligibility

Students must be eligible to work in Canada and demonstrate sufficient academic potential (B average or better, consult departmental listings). Students apply to this program and approval of the academic department and Science Co-op Office is required for entry. Applications must be received by August 1st. Students must

be able to check their email every week day. With the permission of the Co-op Academic Advisor, some students may be admitted on a probationary basis pending an improvement in their grades. Co-op students whose grades drop below a B average (3.00 GPA) overall may be required to withdraw from the Science Co-op program. Academic departments may, at their discretion, allow a probationary period before the requirement to withdraw is enforced. During this probationary period, the student may not undertake any new work term commitments but may honour pre-existing arrangements.

### B. Science Co-op Seminar Series, SCIE 2800.00

This class is a required prerequisite to the first work term and is a mandatory component of the Science Co-op program. All Science Co-operative Education students are required to register for, and attend this class, upon acceptance into the program. A grade of Pass is required before students undertake the first work term experience. This class is designed to introduce Science Co-op students to aspects of career development and preparation for their work terms. SCIE 2800.00 is a required non-credit class which is offered in the fall term only. Students must register for this class, in addition to their full class load, in the fall term of the year they join Science Co-op. More detailed information about the class may be found at <http://www.sciencecoop.dal.ca>

### C. Work Terms

A work term is a period of study conducted in an employment environment and each work term is offered as a class listing within each academic discipline for registered Science Co-operative Education students only. Although the Science Co-op office has an outstanding job posting record, it is ultimately the responsibility of the student to arrange their work term. Students are expected to conduct their own job search as well. During a work term, the student is an employee in matters pertaining to the conditions of employment and is a student for the purpose of academic evaluation. The university accepts no liability for the working environment of the students work term. Students are remunerated according to employer policy and the labour laws of the province in which the work term takes place. Students must be remunerated, unpaid work terms are not permitted. Upon accepting a job the student must sign a Work Term Acceptance Agreement which acknowledges awareness of Co-op regulations, their responsibility to register for the work term with the Registrar's Office, pay a Co-op Fee\* (consult the fees section of the calendar), complete a Work Term Report, and other related forms. During the work term the student and employer normally receives contact from a Science Co-op staff member to ensure that the academic objectives of the work term are being met. Failure to complete all requirements of a work term will result in a grade of F.

Work terms must be a minimum of 13 weeks at 32.5 hours per week, or an equivalent combination of hours and weeks worked. Three work terms are required for graduation with a Bachelor of Science, Co-op. A fourth work term is optional, space permitting.

\*Please Note: The Co-op Fee is a program fee, not a "work term" fee.

### D. Work Term Sequence

Work terms alternate with study terms in a pattern set by you and your Co-op Academic Advisor, for each program. The work term sequence must be noted on the application to Science Co-op. Any request for change of work term sequence must be approved by the departmental Co-op Academic Advisor and the Director, Science Co-op. Requests must be received by the Science Co-op office 14 weeks before the next scheduled work term i.e., before January 15, May 15, or September 15. Two consecutive work terms are permitted. Three consecutive work terms may not be permitted.

Please consult with the Co-op Academic Advisor, in your discipline of choice, regarding your work term sequence. Work term sequences must be set and approved with your Co-op Academic Advisor and Science Co-op office.

### E. Work Term Reports

At the end of each work term, each student must submit an acceptable work term report. Specific guidelines for writing this report and submission deadlines are available on the Science Co-op website (<http://www.sciencecoop.dal.ca>). Satisfactory work term reports are required for continuation and graduation in the Science Co-op program. Satisfactory performance in the work place is also required and Co-op employers submit an Employer Evaluation for students in the program. The grade for the work term is based upon the work term report,

employer and student evaluations of the work term, and the work term visit. Failure to complete the work term requirements will result in the student being required to withdraw from the Science Co-op program and a failure mark would be given for the work term.

## F. Fees

Science Co-op students are required to register for their work terms and pay Co-op Fees regardless of whether the services of the Co-op office are used. Co-op Fees are program fees, not work term fees, and are due and payable even if the student withdraws, does not secure a work term, or is required to withdraw, from their work term once employment has begun. Consult the Science Co-op office or website for complete details.

## Dean

Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

## Chair of Department

Jamieson, R. A., BSc (Dalhousie), PhD (Mun)

## Undergraduate Advisor

Plug, L. (494-1200)

## Co-op Academic Advisor

Wach, G. (494-8019)

## Graduate Coordinator

Culshaw, N. (494-3501)

## Professors Emeriti

Cooke, H. B. S., MSc, DSc (Witwatersrand)  
Medioli, F. S., PhD (Parma)  
Milligan, G. C., MSc (Dalhousie), PhD (Harv)  
Reynolds, P. H., BSc (Toronto), PhD (UBC)  
Zentilli, M., BSc (Chile), PhD (Queen's), PGeo

## Professors

Gibling, M. R., BA (Oxon), PhD (Ottawa)  
Grujic, D., BSc (Belgrade), PhD (ETH Zurich)  
Jamieson, R. A., BSc (Dalhousie), PhD, (MUN)  
Scott, D. B., BSc (Washington), MSc (Washington State), PhD (Dalhousie)  
Wach, G. D., BA (Western Ontario), MSc (South Carolina), DPhil (Oxford)

## Associate Professors

Culshaw, N., BA (Keele), PhD (Ottawa)  
Fedortchouk, Y., MSc (Mosow State Univ), PhD (Victoria)  
Gosse, J. C., BSc (MUN), PhD (Lehigh University)  
Nedimovic, M., BSc (Belgrade), MSc, PhD (Toronto)

## Assistant Professors

Coutand, L., BSc, PhD, (Univ. of Rennes, France)  
Plug, L., BA (McGill), PhD (Univ. of Alaska - Fairbanks) (cross appointment with College of Sustainability)  
Sterling, S., PhD (Duke Univ.) (cross appointment with Environmental Sciences)

## Senior Instructors

Graves, M., BSc (Univ of Idaho), MSc (Dalhousie)  
Ryan, A. M., BSc (Univ College Dublin), MSc, BEd (Acadia), MEd (MSVU),  
PhD (Dalhousie) cross appointed with Environmental Science  
Walls, C., BSc, MSc (Dalhousie)

## Instructors

Cox, R., BSc Hons (Glasgow Univ.), MSc (Glasgow Univ.), PhD (Mun)  
Young, M., BSc (Dalhousie), MSc, MSC (Queen's)

## Cross Appointment

Rainham, D., PhD (Ottawa), Major appointment in Environmental Programs

## Adjunct Professors

Adam, J., Dip in Geology (Univ. of Clausthal), PhD (Tech. Univ. of Berlin), Royal Holloway

Anderson, A., BSc (Univ. of Windsor), MSc (Manitoba), PhD (Queen's), St. Francis Xavier

Barr, S., BSc (UNB), PhD (UBC), Acadia University

Beltrami, H., BSc (Winnipeg), MSc (Queens), PhD (U de Quebec à Montreal), St. Francis Xavier Univ.

Dehler, S., BSc (Calgary), MSc, PhD (UBC), GSC Atlantic

Deptuck, M., BSc (St. Mary's Univ.), PhD (Dalhousie) Canada-NS Offshore Petroleum Board

Dostal, J., BSc (Charles), PhD (McMaster), St. Mary's University

Fensome, R., BSc (Sask.), MSc (Sask.), PhD (Nottingham), GSC Atlantic

Hanley, J., PhD (Toronto), St. Mary's University

Kellman, L., BA (McMaster), MSc (McGill), PhD (Univ. du Quebec à Montreal), St. Frances Xavier University

Kettanah, Y., BSc (Baghdad Univ.), PhD (Southampton Univ. UK), Selahaddin University

Laroque, C., BSc (Sask.), MSc, PhD (Univ. of Victoria), Mt. Allison University

Melchin, M., MSc (Waterloo), PhD (Western), St. Francis Xavier University

Mosher, D., BSc (Acadia), MSc (Memorial), PhD (Dalhousie) GSC Atlantic

Murphy, J.B., BSc (Dublin), MSc (Acadia), PhD (McGill), St. Francis Xavier University

Parsons, M., BSc (Dalhousie), PhD (Stanford), GSC Atlantic

Pe-Piper, G., BSc (Athens), PhD (Cantab), St. Mary's University

Piper, D. J. W., BA (Hons) (St Catharine's Col, Cantab), MA (Cantab), PhD (Darwin Col, Cantab), GSC Atlantic

Risk, D., BSc (Toronto), MSc (St. FX), PhD (Dalhousie), St. Francis Xavier University

Rochon, A., BSc, MSc, PhD (U de Quebec à Montreal), GSC Atlantic

Salisbury, M. H., BSc (MIT), MSc, PhD (Wash), GSC Atlantic Emeritus Scientist

Siddiqui, Q., BSc (Lucknow), MSc (Lucknow), PhD (Leicester).

Swinden, S., BSc (Dalhousie), MSc, PhD (Memorial), NS Dept of Natural Resources, retired

Zentilli, M., BSc (Univ of Chile), PhD (Queen's)

## Honorary Research Associates

Brown, D., BSc (Dalhousie) Canada-NS Offshore Petroleum Board (CNSOPB)

Clair, T., BSc (Mt. A), MSc (Ottawa), PhD (McMaster)

Clarke, B., BSc, MSc (Toronto), PhD (Edinburgh)

Jansa, L., BSc, MSc (Masaryk State U, Czechoslovakia), PhD (Charles), GSC Atlantic, retired

Kosters, E., BSc (Groningen), MSc (Univ of Amsterdam), PhD (Louisiana State Univ)

Kronfeld, J., BA (Queens College, NY), MSc (Florida State), PhD (Rice) Tel Aviv University

Mudie, P. J., BSc (Cape Town), BSc (Leicester), PhD (Dalhousie)

Ruffman, A., MSc (Dalhousie), Geomarine Associates Ltd.

Shimeld, J., B. Applied Sci (Waterloo), MSc (Dalhousie)

Stockli, D., BSc, MSc (Swiss Federal Inst. of Tech, Eth), PhD (Stanford Univ), Univ of Kansas

Utting, D., BSc (Calgary), MSc (Simon Fraser)

Waldron, J., BA (Cambridge), PhD (Edinburgh), University of Alberta

Webster, T., BSc (UNB), MSc (Acadia), PhD (Dalhousie), NSCC, Lawrencetown

## I. Introduction

Earth Science studies the Earth and deals with many questions, such as: How was the Earth formed? What is its composition? Where do we look for oil? Or nickel? Or reliable water supplies? What changes the Earth now? What moves continents? Why are the ages of all the ocean basins less than one-twentieth the age of the Earth itself? Earth Science is an intellectually exciting discipline, and its study is of enormous economic and environmental importance to Canada.

Classes in Earth Sciences are offered for different types of students. Some will want to make a career in some aspect of the study of the Earth - as geologists, geochemists, geophysicists, oceanographers, or teachers - and work for private industry or government agencies. Some may need instruction in Earth Sciences as an aid to other disciplines: for example, a mining engineer, an environmental scientist interested in groundwater problems, a marine engineer interested in coastal processes, or a biologist interested in protozoa. Other students may be interested in an Earth Sciences degree before they take a professional qualification

such as law or business administration. Several of our classes emphasize computer applications; students who choose these may move on to careers in information technology. Those whose prime interest is the humanities or social sciences will find that introductory classes in Earth Sciences stimulate their awareness of their surroundings, their understanding of the environment and develop their appreciation of science.

## High School Preparation

Students in high school who plan a career in Earth Sciences, should have Advanced Math or Pre-calculus Math, plus Chemistry and Physics. Note that only Mathematics is a prerequisite, but the others are strongly recommended. The student should ideally aim to make up deficiencies in high school preparation in the first year at Dalhousie.

## II. Degree Programs in Earth Sciences

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the "Degree Requirements" section of the calendar.

### A. BSc or BA (20 credit) Honours Degree in Earth Sciences

An Honours degree is almost essential for any professional work in earth sciences, and for graduate study. Students must take the required classes listed below. See "Degree Requirements" section for complete information. Dalhousie Integrated Science Program (see separate entry in this calendar) is an appropriate preparation for entry into the second year of an Earth Sciences program.

### Departmental Requirements

#### 1000 level

Recommended:

- EARTH 1080.03 and any other 1st year EARTH class, EARTH 1090 recommended or SCIE 1502.21 or SCIE 1504.27 or SCIE 1510.33

#### 2000 level

- EARTH 2000.015: Earth Sciences Field School
- EARTH 2001.03: Earth Materials Science I
- EARTH 2002.03: Earth Materials Science II
- EARTH 2110.03 (Prerequisite: EARTH 2000.015): Field Methods
- EARTH 2203.03: Sediments and Sedimentary Rocks
- EARTH 2205.03: Introduction to Paleontology
- EARTH 2270.03: Introduction to Applied Geophysics
- EARTH 2380.03: Geochemistry

#### 3000 level

- EARTH 3000.015: Computing Camp
- EARTH 3010.03: Igneous Petrology
- EARTH 3020.03: Metamorphic Petrology
- EARTH 3140.03: Structural Geology
- EARTH 3302.03: Quaternary Sedimentary Environments
- EARTH 3303.03: Stratigraphy

#### 4000 level

- EARTH 4200X/Y.06: Honours Thesis
- EARTH 4350.03: Tectonics
- Plus other advanced Earth Science credits for a total of nine credits beyond the 1000 level.
- Honours Qualifying Examination

### Other required classes \*

- MATH 1000.03
- MATH 1010.03
- PHYC 1280.03/1290.03, CHEM 1011.03/1012.03

NOTE: PHYC 1280.03/1290.03 and a Mathematics class are prerequisites for EARTH 2270.03, which fits best into Year II of the program.

To satisfy the requirement concerning the Honours Qualifying Examination, a student will complete a thesis as EARTH 4200X/Y.06, followed by an oral examination, based on the general subject area of the thesis.

Theses must be completed by the posted deadline in March of fourth-year. Students who complete after this date must re-register for the following academic

year in EARTH 4200X/Y.06, pay the fees, and graduate at the spring convocation of the next academic year.

Each advanced class in the second, third and fourth year, except electives, must be passed with a grade of C or better.

In five of the advanced classes, a grade of B or better must be achieved, and in three additional advanced classes, a grade of B- or better is required.

A grade of B- or better must be achieved on the Honours Qualifying Examination.

For First-Class Honours, students must achieve a GPA of 3.70 for classes in the honours subject. A grade of A- or better is required on the Honours Qualifying Examination.

## B. Combined Honours

Students wishing to take combined Honours in Earth Sciences and another subject, should discuss their program in detail with the undergraduate advisor. Students must attend the field schools normally taken at the beginning of second-year (ERTH 2000.015) and third-year (ERTH 3000.015).

### Combined Honours: Earth Sciences and Biology

Earth Sciences Honours Program should be followed during Years I-III and students should take either a Biology class or EARTH 4502.03 in place of EARTH 3010.03/3020.03. For Biology classes, consult Biology Department.

### Combined Honours: Earth Sciences and Physics

Students should follow the Earth Sciences Honours Program in years I to III, including EARTH 2270.03 and EARTH 3270.03, but should take a Physics class in place of EARTH 3010.03/3020.03. For Physics classes, consult Physics Department. MATH 2001.03/2002.03 should also be taken in either Year II or III, and MATH 3110.03/3120.03 in Year III or IV.

### Combined Honours: Earth Sciences and Chemistry

Students should follow the Earth Sciences Honours Program in Years I-III, but should take 3000 level Chemistry classes in place of EARTH 3302.03/3303.03 and 2270.03/3270.03. For Chemistry classes, consult Chemistry Department.

### Combined Honours: Earth Sciences and Oceanography

Students should follow the Earth Sciences Honours Program in years one and two. In year two they should start the Oceanography component by taking OCEA 2000.06. Students should also take CHEM 1011.03/1012.03 and PHYC 1280.03/1290.03, preferably in their first year. In the third and fourth years students will take a combination of EARTH and OCEA classes, with a minimum of four credits in OCEA, which may include the Honours thesis.

## C. Co-op Education in Earth Sciences

Co-operative Education in Science (Science Co-op) is a program where academic study is combined with paid career related work experience. Students alternate three to four workterms throughout their academic study terms and graduate with a Bachelor of Science Co-op. Science Co-op enables students to apply their knowledge directly while providing them with work experience that assists in making educated career choices. Students apply to join Science Co-op before their second year of study. A minimum GPA of 3.0 is required. If accepted into the Science Co-op program, students are required to register for and attend the Science Co-op Seminar Series (SCIE 2800.00) in the fall term of the year they join.

See the "Co-operative Education in Science" section of this calendar, or <http://www.sciencecoop.dal.ca>, for information on Science Co-op such as Science Co-op requirements, eligibility, how to apply, deadlines and other related information.

Co-op Academic Advisor in Earth Sciences: Dr. Wach Email: [grant.wach@dal.ca](mailto:grant.wach@dal.ca)

## D. BSc or BA (20 credit) Major in Earth Sciences

### Departmental Requirements

#### 1000 level

- EARTH 1080 and any other 1st year EARTH class; EARTH 1090 recommended or SCIE 1502.21 or SCIE 1504.27 SCIE 1510.33

#### 2000 level

- EARTH 2000.015: Earth Sciences Field School
- EARTH 2001.03: Earth Materials Science I

- EARTH 2002.03: Earth Materials Science II
- EARTH 2110.03 (Prerequisite: EARTH 2000.015): Field Methods
- EARTH 2203.03: Sediments and Sedimentary Rock
- EARTH 2205.03: Introduction to Paleontology

#### 3000 level

- EARTH 3000.015: Computing Camp
- One half-credit in Earth Sciences above the 1000 level
- Four additional credits in Earth Sciences beyond the 2000 level

### Other required classes \*

- MATH 1000.03
- MATH 1010.03 or STAT 1060.03
- CHEM 1011.03, CHEM 1012.03, or CHEM 1021.03 and CHEM 1022.03

A grade of D in an Earth Sciences class precludes admission to classes for which the class is a prerequisite. Where several classes are listed as prerequisites, and a grade of C- or better was not obtained in all, the instructor's consent may be the basis for admission. Students must satisfy the Faculty of Science Writing Requirement and Mathematics Requirement.

## E. 20 Credit Major Co-op

### Departmental Requirements

Same as for the Major above plus the work described in the Co-op program section previously stated.

## F. 20 Credit Double Major: Earth Sciences and Oceanography

Students should follow the requirements for a Combined Honours in Earth Sciences and Oceanography, but replace the Honours thesis with other OCEA/ERTH classes.

## G. BSc or BA (15 credit) Minor in Earth Sciences

Three-year programs with a Minor in Earth Sciences are suitable for students who intend to take subsequent professional training or to enter fields where they are likely to need their geological training as background. A 15 credit degree is not suitable preparation for a career in the earth sciences nor does it meet requirements for Professional Registration as a Geoscientist.

### H. Minor Program in Earth Sciences

Students majoring in other disciplines may wish to explore Earth Sciences in more depth. A Minor in Earth Sciences allows students whose major is another discipline, to develop their earth science background in addition to their major discipline. A Minor in Earth Sciences requires the following:

- One full credit at the 1000 level in Earth Sciences (ERTH), including EARTH 1080 (Geology I)
- Any three full credits above the 1000 level in Earth Sciences (ERTH), at least one of which must be at or above the 3000 level.

## I. Minors offered in other disciplines for Earth Sciences Majors and Double Majors

Students in Earth Sciences 20 credit program may want to consider taking a Minor in another discipline. Minor programs are normally added to a four year major or double major or concentrated honours program. For details on available minors in addition to those listed below, consult the specific departmental section of the calendar.

In addition to Minors in the Faculties of Arts and Social Sciences and Science, the following Minors are offered in combination with a four year degree program in Earth Sciences:

- Business (BA or BSc)
- Community Design (BA or BSc)
- Computer Science (BSc only)
- Film Studies (BA and BSc only)
- Food Science (BSc only)
- Journalism (BA or BSc)
- Law and Society (BA or BSc)
- Management (BA or BSc)

## J. Other Programs

### BSc/Engineering or BA/Engineering Concurrent Programs

Students normally complete the requirements for a 15 Credit BSc or 15 Credit BA, and the first two years of engineering studies leading to the Diploma in Engineering. The concurrent program can be completed in three years. Details are provided in the College of Arts and Science Degree Requirements section of the calendar.

## K. Certificate Programs

There are three Certificate Programs available to students enrolled in an Honours, Major, or Minor program in Earth Sciences. Please click here for a full listing of available Certificates

NOTE: Classes counted toward a Major, Honours or Minor program may also be used to fulfil the requirements of a Certificate.

**Certificate in Geographic Information Science** (Contact Lawrence Plug [Lawrence.plug@dal.ca](mailto:Lawrence.plug@dal.ca))

The Environmental Science programs and the Departments of Earth Sciences and Biology offer a Certificate in Geographic Information Science. The certificate is intended to reflect that the student has completed classes of study in geographic information systems and geomatics that are appropriate for further study or employment related to geographic information science. This Certificate can be completed by a student in a BSc program, in addition to the student's regular program requirements and completion of such a Certificate would be shown on the student's transcript.

Students should enrol in the "Certificate in Geographic Information Science" by contacting the Certificate Coordinators (Charlie Walls, Earth Sciences or Dr. Daniel Rainham, Environmental Science or Dr. Cindy Staicer, Biology). Students can enrol when in their second, third or fourth year of the BSc program, but early enrolment is advised.

#### Certificate Requirements:

- Students must complete the following classes, with a minimum grade of B- in each:  
ERTH/GEOG/ ENVS 3500.03 Geoscience Information Management  
ERTH/GEOG 4520.03 GIS Applications to Environmental and Geological Sciences
- In addition students must complete at least two of the following classes, with a minimum grade of B- in each:  
GEOG 2000.03:Cartography  
GEOG 2006.03:Space, Place and GIS  
ENVS 2100.03:Environmental Informatics  
ENVS/GEOG 3400.03: Environment and Human Health  
BIOL/ENVS/GEOG 3633.03 Spatial Information and GIS in Ecology  
ERTH/GEOG 4530.03 Environmental Remote Sensing
- In addition, students must complete a research project with an emphasis in geomatics or geographic information science (as pre-approved by the Certificate Coordinators) via one of the following sets of classes, with a minimum grade of B-:

#### Set A: Earth Sciences

- ERTH 3500.03 (cross-listed with GEOG 3500.03 and ENVS3500.03)  
OR EARTH 4530.03 (cross-listed with GEOG 4530.03)  
OR EARTH 4100.06 (Research Project)  
OR EARTH 4200.06 (Honours Thesis)

#### Set B: Environmental Science

- ENVS 3400.03 (cross-listed with GEOG 3400.03)  
OR ENVS 3801.03 (Directed Reading)  
OR ENVS 4901.03 (Honours Thesis)  
OR ENVS 4902.03 (Honours Thesis)

#### Set C: Biology

- BIOL/MARI 4900.06 Honours Thesis  
OR BIOL/MARI 4901.03 Honours Thesis  
OR BIOL/MARI 4902.03 Honours Thesis  
OR BIOL/MARI 4806.03 Special Topics  
OR BIOL/MARI 4807.03 Special Topics

**Certificate in Environmental Impact Assessment (EIA)** (Contact Pat Lane [patricia.lane@dal.ca](mailto:patricia.lane@dal.ca))

The Faculty of Science offers a Certificate in Environmental Impact Assessment for students majoring in environmental areas and wishing to pursue additional training in EIA. This certificate is also available for students in International Development Studies (IDS) in the Faculty of Arts and Social Sciences and the College of Sustainability. Completion of the Certificate will be shown on a student's transcript.

Students must have received a minimum grade of B for all classes counted toward the certificate.

The Certificate requires four full credits for completion in the following categories:

- Required EIA CLASS: BIOL 4001.03 or ENVS 4001.03 or ENVE 4772.03 (0.5 credits) to be taken in the fourth year.
- Introductory Class in Science or IDS (Table 1) (minimum of 0.5 credits)
- 3rd Level Environmental Classes with largely theoretical content from Table 2 (minimum of 1.5 credits)
- 3rd Level Methods Classes that provide field, laboratory, statistical, modelling and related experience from Table 3 (minimum of 0.5 credits)
- 3rd and 4th Level Supplementary Classes in Major and Related Disciplines from Table 4 (minimum of 1.0 credits)

Note: As usual, students will be required to meet the stated pre-requisites of all classes listed below or the permission of the instructor. Several classes on Tables 1-4 include cross-listings that are given in parentheses. No class can be included twice for the Certificate using different cross-listings.

Disclaimer: This Certificate in EIA has been developed within Dalhousie University and it is not designed to fulfil any governmental and/or professional requirements outside of the university in Canada or abroad.

#### Certificate Requirements:

##### Table 1. Introductory Classes (minimum of 0.5 credits from the following list)

BIOL 2060.03 Introductory Ecology  
ERTH 2410.03 Environmental Issues in Earth Science  
ENVS 1000X/Y.06 Introduction to Environmental Science  
GEOG 2100 X/Y.06 Environment and Culture (SOSA 2100.06)  
INTD 2001.03 Introduction to Development 1 (GEOG 2201.03)  
INTD 2002.03 Introduction to Development 2 (GEOG 2202.03)  
OCEA 2000X/Y.06 (or OCEA 20001.03 + OCEA2002.03) The Blue Planet  
SUST 2000.06 Humanity in the Natural World  
SUST 2001.06 Environment, Sustainability and Governance: A Global Perspective

##### Table 2. Theory-Based Classes (minimum of 1.5 credits from the following list)

BIOL 3060.03 Environmental Ecology  
BIOL 3061.03 Communities and Ecosystems  
BIOL 3062.03 Behavioural Ecology  
BIOL/MARI 3063.03 Resource Ecology  
BIOL 3065.03 Conservation Biology  
BIOL 3069.03 Population Ecology  
BIOL 3601.03 Nature Conservation  
ERTH 3400.03 Fundamentals of Hydrogeology  
ERTH 3410.03 Environmental Geology II  
ERTH 4440.03 Geomorphology and Landscape Evolution  
ENVS 3200.03 Introduction to Environmental Law  
ENVS 3501.03 Environmental Problem Solving I  
ENVS/ERTH 3601.03 Global Biogeochemical Cycles  
GEOG/ERTH 3440.03 Geomorphology  
INTD/GEOG 3114.03 Environment and Development  
MARI/BIOL 3067.03 Ecology and Evolution of Fishes  
MARI/BIOL 3761.03 Marine Ecology

#### Certificate in IT (Earth Sciences)

To recognize students who have completed classes with a substantial Information Technology component, and to provide these students with a document to present to potential employers who seek graduates with IT skills, the Department of Earth Sciences will award a Certificate in Information Technology to students who meet the following requirements:

- Completion of the 20 Credit Major or Honours program in Earth Sciences;

- Completion of the following classes, with a minimum grade of B, identified by the Department of Earth Sciences as teaching a set of IT skills particularly relevant to geoscientists:
  - EARTH 2001.03
  - EARTH 2270.03 or EARTH 3400.03
  - EARTH 3000.03
  - EARTH 3500.03
  - EARTH 4200.03 or EARTH 4100.03
  - EARTH 4520.03 or EARTH 4530.03 or EARTH 4450.03
  - CSCI 1100.03
  - MATH 2300.03 or MATH 2400.03

To register, complete the registration form found under "IT" at the Faculty of Science URL: [http://science.dal.ca/EDUCATIONAL\\_PROGRAMS/Information\\_Technolo.php](http://science.dal.ca/EDUCATIONAL_PROGRAMS/Information_Technolo.php) and send your completed form to [Science@Dal.Ca](mailto:Science@Dal.Ca) or fax to (902) 494-1123.

### III. Programs and classes for those whose Major is not Earth Sciences

These classes are specially designed for those who want to know something about the Earth, but whose major field of study at Dalhousie will lie elsewhere, e.g., an economics student concerned with resources, a history student interested in the role played by Canada's geological framework in the development of transportation, a biology student interested in faunal environments on the seafloor.

#### A. Elective Classes

- EARTH 1030.03: Introduction to Physical Geography, a class for anyone who wants to learn more about the Earth, its subsystems and regions
- EARTH 1060.03: Earthquakes, Volcanoes and Natural Disasters, a class aimed for nonspecialists, investigates these natural disasters.
- EARTH 2410.03: Environmental Issues in Earth Sciences, open to those with the above prerequisite
- EARTH 2420.03: Dinosaurs: Origin, Evolution and Extinction, open to those with the above prerequisite
- EARTH 2430.03: Forensic and Medical Geology.

### IV. Special Information for Earth Sciences Programs

#### A. Field Work

Field excursions are part of many classes and are conducted at appropriate times during the session. In addition, some optional field excursions may be held each year. Note that some mandatory field trips may be held on Saturdays or Sundays. Field Schools are offered for about 10 days in late August, just before the start of the university Fall term.

#### B. Professional Registration

Professional Registration of Geoscientists (geologists and geophysicists), usually in a joint Association with engineers, is in place in Nova Scotia and across Canada. You should be aware that a program which meets our degree requirements does not necessarily meet criteria for registration. The educational requirements for the professional associations is a four-year degree with a minimum of nine geoscience credits after first year. Our Honours degree meets this requirement. A Major degree can, if nine Earth Sciences credits are taken after first year. Students should note that, in addition to Earth Sciences classes, Registration boards require students to have taken nine half credits in fundamental science which includes: first-year Chemistry, (CHEM 1011.03/1012.03), Calculus (MATH 1000.03 and 1010.03) and Physics (PHYS 1280.03/1290.03). For more information, consult the Earth Sciences Undergraduate Advisor.

### V. Class Descriptions

NOTE: Not all classes are offered every year, please check the current timetable for current class offerings. Note also that some mandatory field trips may be held on Saturdays or Sundays. Check with Instructor.

#### ERTH 1030.03: Introduction to Physical Geography.

This non-lab science course examines the nature of weather and climate, earth's surface features and processes, and internal processes that contribute to landform development. An integral component of the course is an exploration of the

representation and interpretation of physical geographic data through the examination of a variety maps.

NOTE: There are no pre-requisites for this course, and students may take this class in addition to any other first year Earth Science class.

INSTRUCTOR(S): A.M. Ryan, L. Plug

FORMAT: Lecture-class 3 hours each week and 1 hour tutorial weekly. Some classes may include map work

CROSS-LISTING: GEOG 1030.03

### **ERTH 1060.03: Earthquakes, Volcanoes and Natural Disasters.**

Earthquakes, meteorite impacts, rapid climate change, volcanic eruptions, hurricanes, landslides, solar flares, and floods are natural disasters that affect our economy, public policy, and safety. Where, why and how frequently do natural disasters occur? Are predictions possible? Are media portrayals of risk and damage realistic? This course, aimed at the nonspecialist, investigates these intriguing questions. Excerpts of "disaster films", in conjunction with lectures and discussions are used to identify the causes, consequences and sometimes erroneous perceptions of natural hazards. Examples from Atlantic Canada and contemporary disasters are used to assess local risk and real-time events worldwide.

INSTRUCTOR(S): J. Gosse

FORMAT: Lecture 3 hours

CROSS-LISTING: GEOG 1060.03

### **ERTH 1080.03: Geology I.**

This class focuses on the solid earth (geosphere) and how it evolved throughout earth's vast history, and continues to evolve today. The processes involved are recorded in the rocks and minerals of our earth, and we explore these natural processes and materials as a way to understanding our earth.

The class meets the needs of students who require a science class with a lab component, is a required prerequisite class for all Earth Science majors, and serves as an introduction for all those interested in Earth Science. No previous knowledge of geology is required.

INSTRUCTOR(S): A.M. Ryan

FORMAT: Lecture 3 hours, lab 3 hours

EXCLUSION: Credit will be given for only one of ERTH 1080, 1010, 1040 or 1041.

### **ERTH 1090.03: Geology II.**

Earth systems introduced in Geology I are explored in greater detail, with an emphasis on earth resources, and on geologic systems that are connected to human actions. This course provides a strong background to pursue further work in the environmental sciences and is the recommended course for Earth Sciences majors.

INSTRUCTOR(S): A.M. Ryan

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: ERTH 1080 or permission of the instructor is a pre- or co-requisite for ERTH 1090 or ERTH 1091.

EXCLUSION: credit will only be given for one of ERTH 1090, 1091, 1020, or 1050

### **ERTH 1091.03: Geology II.**

ERTH 1091 has the same lecture content and lecture time as 1090, but does not have a corresponding lab session.

NOTE: This class is not offered every year. Please consult department.

INSTRUCTOR(S): A.M. Ryan

FORMAT: 3 hours lecture

PREREQUISITE: ERTH 1080.03 or permission of instructor.

EXCLUSION: Credit will be given for only one of ERTH 1091.03, ERTH 1090.03, ERTH 1020.03 or ERTH 1050.03.

### **ERTH 2000.015: Earth Sciences Field School.**

This class provides 10 to 11 days of introductory field methods in a broad range of Earth Science disciplines. A wide variety of Earth materials and geological processes are examined in the field through thematic excursions throughout southern Nova Scotia led by a variety of Earth Sciences faculty. Skills taught are soil, sediment and rock classification; note-taking, compass, map-reading and traversing; and geological analysis and report writing. The class is held at the end of summer before regular classes in the Fall term and should be taken by those enrolling in second-year level Earth Sciences classes: ERTH 2001.03, 2002.03, 2110.03, 2203.03.

INSTRUCTOR(S): M. Young

FORMAT: Day-long (8-10 hours) field trips based out of Halifax for the duration of the field school.

PREREQUISITE: ERTH 1080.03 and one other 1st year ERTH course; ERTH 1090 recommended; SCIE 1502.21, 1504.27, 1510.33

### **ERTH 2001.03: Earth Materials Science I.**

Materials from the Earth - including minerals, rocks, and the ore and petroleum resources they contain - form the basis of our industrial society and are vital to the Canadian economy. ERTH 2001/2002 introduce students to the origin, distribution, and chemical and physical properties of some important Earth materials. Lectures in the fall term focus on minerals as naturally occurring crystalline materials. Special attention is paid to the fundamental structure and composition of common rock-forming minerals such as quartz, feldspar, and mica, and to materials with special value to society, including iron, copper, and gemstones. Labs include the identification of minerals in hand sample, elements of crystallography, and an introduction to the use of the petrographic microscope. Students gain practical experience in the use of instrumental techniques such as X-ray diffraction and/or electron microprobe analysis to identify one or more unknown minerals. A weekend field trip may be included. This class is a prerequisite for ERTH 2002 and most third-year Earth Science classes. Students who have not already taken CHEM 1010 or its equivalent are strongly encouraged to take this concurrently.

INSTRUCTOR(S): R. Cox

FORMAT: Lecture 3 hours, lab 3 hours, weekend field trip

PREREQUISITE: ERTH 1080 and one other 1st year ERTH course; 1090 recommended; or SCIE 1502.21, 1504.27 or 1510.33, and CHEM 1011.03/1012.03 or CHEM 1021.03/1022.03; Chemistry majors should consult the department.

### **ERTH 2002.03: Earth Materials Science II.**

This class explores the relationships between minerals and rocks, building on the knowledge of mineral chemistry, crystal structure, and identification techniques gained in ERTH 2001. Lectures cover topics such as simple phase diagrams and their application to mineral chemistry and texture, crystal defects and their role in deformation of minerals and rocks, and radioactivity in minerals and its use in geochronology. The use of mineral assemblages and textures to classify rock types is discussed in class and labs. In the labs, students use the petrographic microscope to look at a variety of igneous, sedimentary, and metamorphic rocks in thin section, with an emphasis on gaining familiarity with their constituent minerals and diagnostic textures. Students are introduced to the use of reflected light microscopy to identify opaque (ore-forming) minerals. This class is a prerequisite for some third-year Earth Science classes.

INSTRUCTOR(S): D. Grujic

FORMAT: Lecture 3 hours, lab 3 hours, field trip

PREREQUISITE: ERTH 2001.03

### **ERTH 2110.03: Field Methods.**

This is intended as an introduction to field techniques useful to the practicing geologist, particularly those concepts essential for the accurate field description and identification of rocks and the use and construction of geological maps. Computer techniques and elementary structural geology are also considered. NOTE: Attendance at the Field School (ERTH 2000.015) is mandatory prior to attendance at this class.

INSTRUCTOR(S): N. Culshaw

FORMAT: Lecture 3 hours, lab 3 hours, field trips

PREREQUISITE: ERTH 2000.015

### **ERTH 2203.03: Sediments and Sedimentary Rocks.**

The class deals with physical, chemical and biological processes that generate modern sediments, and their conversion to sedimentary rocks through time. Labs provide a practical introduction to sediment analysis and to a range of sedimentary structures and rock types. Fieldwork includes description of beaches and bedrock in the Halifax area.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: ERTH 1080 and one other 1st year ERTH course; ERTH 1090 recommended

### **ERTH 2205.03: Introduction to Paleontology.**

This class encompasses an introduction to all the major invertebrate groups that are important in the fossil record. It begins with introduction of the first life forms, basic taxonomy and uses of fossils followed by lectures and laboratories on each major group.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours, lab 3 hours, possible field trip

PREREQUISITE: ERTH 2203.03 or permission of the instructor

**ERTH 2270.03: Introduction to Applied Geophysics.**

An Introduction to using physical principles to explore the Earth's subsurface, with an emphasis on near-surface applications. Topics include seismic, gravity, magnetic, electrical, and electromagnetic surveying techniques, and their application in prospecting, hydrogeology, environmental assessments, and well-logging. The geophysics field school, normally conducted during the last week of April, is an integral part of this class.

INSTRUCTOR(S): M. Nedimovic

FORMAT: Lecture 3 hours, tutorial 2 hours, 3-day field school

PREREQUISITE: First year Mathematics and PHYC 1280.03/1290.03 or PHYC 1300X/Y

CROSS-LISTING: PHYC 2270.03

**ERTH 2380.03: Geochemistry.**

An introduction to the principles of chemistry applied to geologic systems, including an overview of the chemistry of rocks and minerals, isotopes in the geologic environment, processes that control the release and mobility of contaminants in the environment, and the use of geochemical data in solving geologic and environmental problems.

FORMAT: Lecture, 1hr/week tutorial

PREREQUISITE: EARTH 1080/1090, EARTH 2001 & CHEM 1011/1012 or equivalent, or permission of the instructor

**ERTH 2410.03: Environmental Issues in Earth Sciences.**

Geology underlies many of the environmental problems facing humanity today. Topics include environmental aspects of energy and mineral resource, geologic hazards, geologic connections to pollution and waste disposal, and the role that water plays in its various guises. Canadian examples are incorporated where appropriate. Approved with Canadian Studies.

NOTE: This class is not offered every year. Please consult department in the spring for further information.

INSTRUCTOR(S): A.M. Ryan

FORMAT: Lecture 3 hours

PREREQUISITE: One of: EARTH 1080, EARTH/GEOG 1030, EARTH/GEOG 1060, ENVS 1000, SUST 1001, or DISP with Earth Sciences

CROSS-LISTING: CANA 2410, ENVS 2410

EXCLUSION: This class is not available for Earth Sciences Majors

**ERTH 2420.03: Dinosaurs.**

Students will consider the origin, evolution and extinction of non-avian dinosaurs. What are dinosaurs? Why were some dinosaurs so big? What did dinosaurs eat? How fast could dinosaurs run? Were dinosaurs good parents? To answer these questions, we will examine the nature of evidence gathered from dinosaur fossils and their surrounding rocks.

INSTRUCTOR(S): M. Graves

FORMAT: Lecture 3 hours

PREREQUISITE: EARTH 1080.03 or any two of EARTH 1010, 1020, 1030, 1040, 1041, 1050, 1060, 1090, 1091, or SCIE 1502.21, 1504.27 or 1510.33, or permission of instructor

**ERTH 2430.03: Forensic and Medical Geology.**

Designed for non-earth sciences majors, this course explores the evolving fields within the realm of geosciences. Forensic and medical geology share a common thread in that both depend upon identifying potential geologic and geoenvironmental sources of evidence, and applying this information to solve a larger problem, either legal or health-related.

NOTE: This class is not offered every year. Please consult department in the spring for further information.

INSTRUCTOR(S): A.M. Ryan

FORMAT: Lecture/tutorial

PREREQUISITE: EARTH 1080 and one other Earth Sciences course or instructor's permission.

**ERTH 3000.015: Computing Camp.**

This class is required for BSc Major, and Honours programs and it is designed to provide the computing skills necessary to meet today's challenges. These skills are learned through a field-mapping project using computers to manipulate data and prepare geologic maps. The class is held the week before classes begin in the third year of a program.

INSTRUCTOR(S): C. Walls, I Coutand

FORMAT: Off Campus, 10 days

PREREQUISITE: EARTH 2000.015, 2001.03, 2002.03, 2110.03, 2203.03, 2205.03

**ERTH 3010.03: Igneous Petrology.**

Igneous petrology is the study of the field relations, mineralogy, texture, and geochemistry of volcanic and plutonic rocks. Lectures discuss the classification and graphical representation of igneous rocks; the production, differentiation, and emplacement of magma in different tectonic environments. Practical work consists of laboratory petrographic examination and two field trips.

INSTRUCTOR(S): Y. Fedortchouk

FORMAT: Lecture 3 hours, lab 3 hours, field trips

PREREQUISITE: EARTH 2001.03, 2002.03 and 2380.03

**ERTH 3020.03: Metamorphic Petrology.**

Metamorphic petrology is the study of the way in which pre-existing igneous, sedimentary, and metamorphic rocks respond to changes in pressure, temperature, and geochemical environment. Metamorphic reactions, deformation and recrystallization, the stability relations of minerals and mineral assemblages under various physical and chemical conditions, and the concept of metamorphic facies are discussed. The relationship of metamorphism to other geological processes is considered. In the labs, microscopic mineralogy and texture are used to decipher the metamorphic history of rocks.

INSTRUCTOR(S): R. Jamieson

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: EARTH 3010.03

**ERTH 3140.03: Structural Geology.**

Introduction to the behaviour of rocks during deformation, stressing the geometrical aspects of rock structures. Students learn: (a) geometrical principles to identify, describe, and interpret common types of structures in outcrop and hand sample; (b) to interpret the mechanical properties of rocks based on their microstructure; (c) construction techniques to calculate and interpret stress and strain in deformed rocks.

INSTRUCTOR(S): D. Grujic

FORMAT: Lecture 3 hours, lab 3 hours, possible field trips

PREREQUISITE: EARTH 2001.03, EARTH 2002.03, EARTH 2110.03, EARTH 2203.03, 2205.03

**ERTH 3270.03: Solid Earth Geophysics.**

An introduction to global geophysics, including the workings of both the Earth's surface and its deep interior. Starting from plate tectonics, this class explores the Earth as a unified dynamic system. The class includes seismology, earthquakes, mantle convection, crustal accretion, isostasy, the Earth's magnetic field, radioactivity, and the Earth's heat budget.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours, tutorial 2 hours

PREREQUISITE: EARTH 2270.03

CROSS-LISTING: PHYC 3270.03

**ERTH 3302.03: Quaternary Sedimentary Environments.**

The class deals with facies models for Quaternary glacial, coastal, deep sea and alluvial sediment. Emphasis is placed on sedimentation processes typical of each depositional setting and the geometry of the resulting deposits. Ancient deposits, including those resulting from glacial events, are examined, and their association with hydrocarbons, coal and sedimentary ores discussed. The labs provide practical experience of techniques used in facies analysis.

INSTRUCTOR(S): D. Scott

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: EARTH 2203.03, 2205.03

**ERTH 3303.03: Stratigraphy.**

Stratigraphy is the backbone of the geological sciences; it brings together sedimentology, paleontology, petrology and structural geology to reconstruct Earth history. We survey the impact of sea-level change, tectonics and climate on sediment accumulation, with emphasis on seismic and sequence stratigraphy. Case studies focus on sedimentary basins across Canada, and practical work includes laboratory and class exercises, as well as field excursions.

INSTRUCTOR(S): G. Wach

FORMAT: Lecture 3 hours, lab 3 hours, field trips

PREREQUISITE: EARTH 2203.03, 2205.03

**ERTH 3400.03: Fundamentals of Hydrogeology.**

The availability of clean water is absolutely essential for the development and maintenance of modern societies. This class deals with the mathematical description of groundwater movement, geophysical and geological methods for groundwater exploration, regional occurrence and chemical quality of groundwater, and the effects of waste disposal on chemical quality. Laboratory

work stresses familiarity with techniques employed in the assessment and exploration of groundwater resources, as well as the analysis and interpretation of water quality data.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: EARTH 2001.03, 2002.03, 2203.03 or permission of instructor

### ERTH 3402.03: Practical Hydrogeology.

This class is designed to build on EARTH 3400.03 to familiarize the student with the practical aspects of groundwater resources development and monitoring system installation, including drilling methods, well design, well hydraulics and aquifer analysis, slug testing, data interpretation, and introduction to groundwater modelling. Actual case history data and problem assignments with practical applications are emphasized.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours, lab/tutorial

### ERTH 3410.03: Environmental Geology II.

The topics are similar to those of EARTH 2410.03. However, this class is designed specifically for students with a strong background in geology, equivalent to that of a third year Earth Sciences major. Selected topics are explored at greater depth using the accumulated geologic knowledge of the participants.

NOTE: This class is not offered every year. Please consult department in the spring for further information. EARTH 3410.03 is the recommended environmental geology course for Earth Science majors.

INSTRUCTOR(S): A.M. Ryan

FORMAT: Lecture/lab/tutorial 3 hours

PREREQUISITE: EARTH 2002.03 and EARTH 2203.03

EXCLUSION: EARTH 3410.03 is the recommended environmental geology course for Earth Science Majors. Credit can only be given for EARTH 2410 or EARTH 3410

### ERTH 3420.03: Geochemistry of Aquatic Environments.

Given the abundance of water at the earth's surface and the wide use both humans and other organisms make of aqueous environments, it becomes imperative for environmentally-oriented scientists to understand the chemistry of natural bodies of water. In particular, we need to comprehend the processes that lead to the observed composition of groundwaters, lakes, rivers and oceans. We also need to be aware of how man's activities can alter these natural systems. Water is also an agent for geologic and environmental change, both on short and long time-scales. Earth and environmental scientists should have an appreciation of these processes (sources, sinks and transport mechanisms) and the resulting geological cycles.

This class is an introduction to the governing principles and processes of aquatic geochemistry. Specific topics will include physical chemistry of natural waters, kinetics (mechanisms & rates) of geochemical reactions, the hydrologic cycle, the dissolved carbonate system and pH controls, redox reactions and the influence of life, rainwater and acid rain, weathering and the formation of soils, mineral-solution equilibria, controls on the composition of rivers, lakes and oceans, sediments and their after-burial changes, and the global cycles of carbon, nitrogen, and sulfur. Students will be taught to approach problems quantitatively through the principles of mass action (Eh-pH and activity-diagrams) and of mass balance (box models and conservation equations).

INSTRUCTOR(S): M. Kienast (Oceanochemistry)

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 1011.03/1012.03 or equivalent and EARTH 1080/1090 or EARTH 1010/1020

CROSS-LISTING: OCEA 3420.03

### ERTH 3440.03: Geomorphology.

Geomorphology is the quantitative study of Earth's surface processes and landforms with applications geology, civil engineering, hydrogeology, and environmental management. We investigate slope stability, weathering and soils, sediment production, wind-driven and coastal environments, tectonic landforms, and river, glacial and permafrost processes.

INSTRUCTOR(S): Plug, L.

FORMAT: Lecture 3 hours, lab 3 hours including mandatory field trips

PREREQUISITE: EARTH 1080 and one other 1st year EARTH course: EARTH 1090 recommended; or SCIE 1502.21, 1504.27 or 1510.33 or permission of instructor AND completion or concurrent enrolment of a 1000-level mathematics class, a 1000-level physics class and a 1000-level chemistry class.

CROSS-LISTING: GEOG 3440.03

### ERTH 3500.03: Geoscience Information Management.

Geographic Information Systems (GIS), as a tool for the management of georeferenced data, have become indispensable for disciplines where location of objects and pattern of processes is important. GIS plays a significant role a wide range of applications, from modeling, to analysis and predictions, to decision making. The class is aimed at a broad base of potential users and draws on examples of the role of GIS in global climate change, mineral exploration, preservation of biodiversity, coastal zone management, resource depletion, and many other present and future environmental issues. The course material will be of interest to those studying geoscience, environmental science, ecology, marine biology, oceanography, epidemiology, urban and rural planning, civil engineering, and any other field involving spatial data.

Laboratory exercises emphasize the principles of raster and vector GIS, and the integration of databases and GPS (global positioning systems) data into GIS. Exercises draw on the diversity of GIS applications in a number of application areas.

INSTRUCTOR(S): C. Walls

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: Two years of university study or equivalent or instructor's permission

CROSS-LISTING: EARTH 5600, GEOG 3500, ENVS 3500

EXCLUSION: Credit will only be given for one of EARTH 3500.03, EARTH 5600.03, GEOG 3500.03, SCIE 3600.03 or ENVS 3500

### ERTH 3601.03: Global Biogeochemical Cycles.

We currently face daunting environmental challenges at the global scale that are expected to worsen in the 21st century, including a global water crisis, climate change and pollution of our waters and atmosphere; this course examines the science behind these environmental issues from the multidisciplinary framework of global biogeochemical cycling. With the global scale as the focus, this course pulls together the many disparate fields that are encompassed by the broad reach of biogeochemistry. You will learn about the processes that drive the movement of carbon, water, nitrogen, phosphorus, and sulphur, through the earth system, and the residency of these elements in the atmosphere, soils, lithosphere, oceans and freshwaters. In the quantitative and analytical exercises you calculate and compare the effects of industrial emissions, land clearing, agriculture, and rising population on the processes driving the Earth's chemical cycles. Weekly journal readings for discussion in laboratory group cover the latest developments in this exciting and rapidly changing field. This course provides an excellent framework for those interested in the science of global change.

INSTRUCTOR(S): S. Sterling

PREREQUISITE: CHEM 1011.03/ CHEM 1012.03 or equivalent, and one of ENVS 1000.06, SUST 1001.06, EARTH 1080.03, or one of SCIE 1502XY.21/ SCIE 1504.27/ SCIE 1510XY.33, and completion of 2 years of an undergraduate degree.

### ERTH 3701.03: Fundamentals of Hydrology.

This course is an introduction to hydrology, emphasizing surface processes and watershed responses. In this course we learn about both the pure and applied uses of hydrology. The course is quantitative and introduces hydrologic processes in the atmosphere, on the land surface, in groundwater and in stream channels.

FORMAT: Lecture 3 hours, tutorial 1.5 hours

PREREQUISITE: MATH 1000.03 or MATH 1214.03 and one of ENVS 1000.06, SUST 1001.06, EARTH 1080.03, or EARTH 1090.03 or one of SCIE 1515X/Y.21, SCIE 1530.27, SCIE 1540X/Y.33 and completion of 2 years of an undergraduate degree. PHYC 1280 and PHYC 1290.03 (or PHYC 1300X/Y.06) and MaTH 1010.03 are recommended.

CROSS-LISTING: ENVS 3701.03

### ERTH 4001.15: Sponsored Geologic Experience.

These Field Trips &/or Laboratory Sessions Introduce students to some of the following: Practical exploration techniques, field and laboratory skills, familiarization with deposit models, related economic and environmental geology, and the business side of Earth-science industries.

FORMAT: At least 10 days in the field/lab. Student presents a report (written and oral presentation) after returning to Dalhousie.

### ERTH 4002.03: Advanced Field School.

This application of the principles of field geology is a comprehensive and intellectually challenging program designed to provide pre-professional field training for senior BSc geoscience students. Multiple field-based projects challenge students to synthesize field observations and solve geological and environmental geoscience problems to gain training that is otherwise difficult to obtain in the classroom or laboratory.

NOTE: The file camp is usually offered in May at selected international settings, and involves mapping exercises and camping over a wide range of climate and topography.

FORMAT: Off campus, four weeks

PREREQUISITE: EARTH 3000.03, EARTH 3140.03 or permission from instructor

### **EARTH 4100X/Y.06: Research Project.**

This class allows students who are not in an Honours program to do a research project.

See class description for EARTH 4200X/Y.06.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

INSTRUCTOR(S): M. Gibling

FORMAT: Lecture 3 hours

### **EARTH 4110.03: Geological Oceanography.**

This class is intended to give a broad survey of topics in marine geology and geophysics. The class content covers recent methods and observations with quantitative applications to an understanding of geophysical and geological processes. Some topics covered are: plate tectonics and seismic, heat flow, gravity, and magnetic methods, patterns and processes of sediment transport and deposition.

NOTE: Some laboratory exercises augment the lectures, including a field cruise to local beaches. Third year and honours undergraduates will be admitted by consent of the instructor. No previous background in Geology or Geophysics is required.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

CROSS-LISTING: OCEA 5110.03, OCEA 4110.03

### **EARTH 4131.03: Advanced Petroleum Geoscience.**

This is an advanced class in petroleum geoscience applications and interpretations for basin/prospect evaluation. Students work in a team interpreting industry data, including well logs and reflection seismic, in a competitive environment. The team submits its findings and recommendations in written and oral presentations.

FORMAT: Lecture/group research project

PREREQUISITE: EARTH 3303.03, EARTH 4153.03, or permission of the instructor

CROSS-LISTING: EARTH 5131.03

### **EARTH 4141.03: Applied Geology, Mineralogy and Geochemistry.**

This class is an introduction to various concepts and techniques used by geoscientists in the search for and evaluation of mineral concentrations, in mining and metallurgy, as well as in environmental aspects of these activities. The successive stages of a mineral exploration project are analyzed, from reconnaissance through exploration geochemistry, claim staking, drilling, mining, estimation of reserves, grades and tonnage, economic aspects, to mine site rehabilitation. Fundamentals of applied ore microscopy are introduced, with emphasis on metallurgy, and acid rock drainage (ARD) prevention. The syllabus varies somewhat from year to year to reflect the interests and backgrounds of the students, and the availability of visiting lecturers. The labs consist of hands-on exercises, visits to analytical labs, problem solving, report writing, and seminar presentations by the students.

NOTE: This class is not offered every year. Please consult department in the spring for further information.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: EARTH 2001.03, EARTH 2002.03, EARTH 2110.03, EARTH 2000.015

CROSS-LISTING: EARTH 5141.03

### **EARTH 4151.03: Mineral Deposits.**

This class is an introduction to the geology of metallic ore and some industrial mineral deposits. Emphasis is given to the ore formation processes that lead to the economic concentrations of commodities. The class integrates many Earth Science disciplines. Laboratory work introduces ore study in reflected light microscopy.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: EARTH 3010.03, 3140.03

CROSS-LISTING: EARTH 5151.03

### **EARTH 4153.03: Petroleum Geology.**

The course provides an introduction to petroleum geology (gas and oil) with some discussion of alternative energy sources. The course provides an introduction to

petroleum geology and petroleum systems with discussion of basin analysis, source rock evaluation, seismic and well log sequence stratigraphy, core and outcrop description, depositional facies analysis, oil sands geology, biostratigraphy, drilling and completions, petrophysics and well log analysis in addition to other topics.

INSTRUCTOR(S): G. Wach

FORMAT: Lecture 3 hours, Lab 3 hours, field trips

PREREQUISITE: EARTH 2270.03, EARTH 3140.03, EARTH 3303.03

### **EARTH 4156.03: Petroleum Geology - Field Methods and Economic Evaluation.**

The course provides an advanced-level overview of petroleum systems. The course includes petroleum geology, basin analysis, source rock evaluation, seismic and well log sequence stratigraphy and depositional facies analysis. The course comprises lecture, presentations, and a one week field seminar.

INSTRUCTOR(S): G. Wach

FORMAT: Field Seminar and lectures

### **EARTH 4200.06: Honours Thesis.**

This class deals with many aspects of written and oral communication of scientific and technical material. In particular, it covers the scientific method, the elements of scientific style (clarity, precision, conciseness, and objectivity), the logical organization and development of ideas and arguments, and the acceptable formats for scientific writing. Attention is also given to techniques of oral presentation.

NOTE: This is a compulsory class for students writing an Honours thesis in Earth Sciences, but is open to students from other disciplines. Field work may be part of thesis research. Credit can only be given for this class if X and Y are completed in consecutive terms.

INSTRUCTOR(S): M. Gibling

FORMAT: Lecture 3 hours

### **EARTH 4350.03: Tectonics.**

This is a required class for Earth Sciences honours students. It is intended to synthesize the various aspects of geology covered in the third year core program. The focus of the class is on tectonic processes and the ways in which these processes create and modify the Earth's crust. We cover the fundamental geological, geophysical, and geochemical controls that operate today, including plate tectonics, and the ways in which these might have differed in the geological past. The tectonic evolution of specific orogenic belts is discussed, including both modern and ancient examples in Canada and other parts of the world.

INSTRUCTOR(S): N. Culshaw

FORMAT: Lecture 3 hours

PREREQUISITE: EARTH 2270.03, 3140.03

CROSS-LISTING: EARTH 5350.03

### **EARTH 4400.03: Advanced Metamorphic Petrology.**

This class deals with selected topics in metamorphism and microtectonics, chosen to reflect current topics of interest in the disciplines and/or specific interests of participants. The focus is on the interaction of metamorphism and deformation, and on the constraints provided by microstructural and metamorphic data on tectonic processes in general. Examples of topics that might be covered include: porphyroblast-matrix relationships in metamorphic rocks; quantitative P-T methods in metamorphism; geochronology of metamorphic rocks; construction and interpretation of metamorphic P-T-t paths; intracrystalline deformation, recrystallisation, and deformation mechanisms in some common rock-forming minerals; origin and interpretation of lattice-preferred orientation; natural microgauges. The class is offered as number warrant (4 students minimum). It is suitable for students who are doing honours or graduate work in the general areas of metamorphic and/or structural geology and/or tectonics.

NOTE: This class is not offered every year. Please consult department in the spring for further information.

INSTRUCTOR(S): R. Jamieson, D. Grujic

FORMAT: Lecture 3 hours

PREREQUISITE: EARTH 3020.03, EARTH 3140.03 (or equivalent), or permission of instructors

CROSS-LISTING: EARTH 5400.03

### **EARTH 4440.03: Geomorphology and Landscape Evolution.**

Ripple-to mountain range-scale landforms evolve under predictable internal and external forces that are modulated by the physical and chemical properties of the rock. The purpose of this course is to provide a thorough examination of the development of landscapes by tectonics and surficial processes involving weathering, mass wasting, streams, and glaciers. The concepts of equilibria, climate and vegetation change, and rock character are recurring themes

throughout the course. Dating and thermochronology methods are discussed in the context of rates of landscape change. Early classic viewpoints of landform development are contrasted with the latest numerical simulations of landscape evolution. The labs are mostly field-oriented with emphasis on Quaternary stratigraphy, describing and interpreting soils, local geomorphology, and geomorphometrics.

NOTE: This class is not offered every year. Please consult department in the spring for further information.

INSTRUCTOR(S): J. Gosse

FORMAT: Lecture 3 hours, Lab 3 hours

PREREQUISITE: EARTH 1080 and any 1st year EARTH class; EARTH 1090 recommended. Must be a 4th year Science student familiar with Excel, or with instructor's permission

CROSS-LISTING: EARTH 5440.03, GEOG 4440.03

### **ERTH 4450.03: Introduction to Landscape Simulation.**

We examine different approaches to numerical modelling of earth-surface processes such as erosion and landslides, melting permafrost, and braided rivers. Using class and/or individual projects as examples, the selection of variables, sensitivity testing, and methods for testing models against nature are discussed. We use Matlab; programming experience is very useful but not essential.

INSTRUCTOR(S): L. Plug

FORMAT: Lecture 3 hours

PREREQUISITE: EARTH 3440.03, MATH 1010 or 1400, PHYC 1280.03/1290.03X/Y and three courses at the 3000-level in the physical sciences (chemistry, earth science, physics) or with consent of instructor

CROSS-LISTING: EARTH 5450, GEOG 4450

### **ERTH 4470.3: Introduction to Seismic Imaging.**

This class teaches the basic techniques of the reflection seismic method for imaging of earth structures such as those used in hydrocarbon exploration. Lectures introduce concepts and techniques that are applied in computer lab to the processing of a multi-channel seismic dataset. Concepts covered include: source and receiver geometry, digital filtering, deconvolution, velocity analysis, stacking, and migration.

INSTRUCTOR(S): M. Nedimovic and K. Loudon

FORMAT: Lecture/lab

PREREQUISITE: EARTH 3270.03 or consent of instructor

CROSS-LISTING: EARTH 5470.03, OCEA 4470.03, PHYC 4470.03, PHYC 5470.03

### **ERTH 4480.03: Advanced Seismic Imaging.**

This class teaches more advanced techniques of seismic imaging of earth structures. Lectures introduce techniques that will be applied in the computer lab to the processing of multi-channel reflection and wide-angle refraction seismic datasets. Concepts covered include: multiple removal, pre-stack migration in time and depth, amplitude analysis, velocity modeling and inversion.

NOTE: This class is not offered every year. Please consult department in the spring for further information.

INSTRUCTOR(S): M. Nedimovic

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: EARTH 4470.03 or consent of instructor

CROSS-LISTING: EARTH 5480.03, OCEA 4480.03, PHYC 4480.03, PHYC 5480.03

### **ERTH 4502.03: Micropaleontology and Global Change.**

This class provides a systematic study of major groups of microfossils (principally foraminifera, ostracoda and calcareous nanoplankton). Particular emphasis is placed on the distribution and ecology of recent microfossils, and on laboratory techniques for sampling and studying them. Quaternary paleo-oceanography and faunal distribution is examined based on knowledge of the tolerances of the living organisms.

NOTE: This class is not offered every year. Please consult department in the spring for further information.

INSTRUCTOR(S): D. Scott

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: EARTH 3302.03/3303.03

CROSS-LISTING: EARTH 5502.03, OCEA 4115.03

### **ERTH 4510.03/4511.03: Directed Reading.**

This class is intended to permit further study of a specific topic of interest, or to correct a deficiency in a student's program. The class should be supervised by a regular faculty member and the class content and marking scheme must be submitted to and approved by the chairperson in the first week of classes. Further

guidelines for directed reading classes are available from the undergraduate advisor or the Earth Sciences office.

FORMAT: As required

PREREQUISITE: Permission of Department

### **ERTH 4520.03: GIS Applications to Environmental and Geological Sciences.**

Geographic information systems (GIS) provide a rich set of new tools to the geologist and environmental scientist, not only to solve conventional problems, but also to explore questions not readily answered by other means. This class builds on the fundamentals of GIS taught in EARTH 3500.03 to explore analytical tools that aid in decision-making processes encountered in mineral exploration, hydrogeology, site selection, environmental assessment, and global change analysis. The class concentrates on case studies and problem solving, including those requiring multi-criteria and multi-objective decision making processes.

NOTE: This class is not offered every year. Please consult department in the spring for further information.

INSTRUCTOR(S): C. Walls

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: GEOG 3500.03, ENVS 3500, EARTH 3500.03; EARTH 5600, or SCIE 3600.03; STAT 1060.03

CROSS-LISTING: GEOG 4520.03, EARTH 5520.03

### **ERTH 4530.03: Environmental Remote Sensing.**

The goal of this class is to introduce students to the role of remote sensing as a technique provide environmental and geologic information. Particular emphasis will be placed on examining the potential and limitations of remote sensing methods and data in this context. The lectures discuss the fundamentals of remote sensing with an emphasis on multi-spectral satellite systems. In the lab, students use computerized techniques of digital image enhancement and thematic information extraction to process images derived from optical, radar, and hyperspectral remote-sensing systems. The integration of remote-sensing information with GIS (Geographic Information Systems) is stressed in both the labs and lectures.

NOTE: This class is not offered every year. Please consult department in the spring for further information.

INSTRUCTOR(S): C. Walls

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: EARTH 3500.03, GEOG 3500.03, ENVS 3500.03 or EARTH 5600.03 or SCIE 3600.03

CROSS-LISTING: GEOG 4530.03, EARTH 5530.03

## **VI. Co-op Workterms**

Each work-term is a prerequisite of the succeeding work-term.

### **ERTH 8891.00: Work-Term I.**

### **ERTH 8892.00: Co-op Work-Term II.**

### **ERTH 8893.00: Wo-op Work-Term III.**

### **ERTH 8894.00: Co-op Work-Term IV. (optional)**

# Economics

Location: 6206, 6214 and 6220 University Avenue  
PO Box 15000  
Halifax, NS B3H 4R2  
Administrative Offices: 6214 University Avenue  
Telephone: (902) 494-2026

## Dean

Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

## Chairperson of Department

Osberg, L., BA (Hons) (Queen's), MPhil, PhD (Yale)

## Faculty Advisors

Cyrus, T., Undergraduate Coordinator, Co-op Academic Advisor  
(494-6992)

Cross, M., Graduate Coordinator (494-6867)

## Professor Emeritus

Sinclair, A., BA (Dalhousie), MA, BPhil (Oxon), PhD (Harvard)

## Professors

Burton, P., BSc (Saskatchewan), MA, PhD (UBC)

Dasgupta, S., BA (Calcutta), MA (Delhi), MA, PhD (Rochester)

Iscan, T., BA (Middle East Tech.), MA, PhD (Cornell)

Lesser, B., BComm (Dalhousie), MA, PhD (Cornell)

Osberg, L., BA (Hons) (Queen's), MPhil, PhD (Yale), McCulloch Professor of  
Economics

Phipps, S. A., BA (Hons) (Victoria), MA, PhD (UBC), Maxwell Chair of  
Economics

Xu, K., Dip. (Beijing Teachers' Univ.), MBA, PhD (Concordia)

## Associate Professors

Cross, M. L., AA (Dawson College), BA (Montana), MA (SFU), PhD (Texas  
A&M)

Cyrus, T., BA (UCLA), PhD (Berkeley)

Kotlyarova, Y., Dip. Software Eng (Lviv Poly. Inst.), MSc (U of Illinois - Urbana),  
PhD (McGill)

## Assistant Professors

Akbulut-Yuksel, M., BS (Middle East Tech.), MA, PhD (Houston)

Giusto, A., Laurea in Economics (Bologna), PhD (Oregon)

Rosenblum, D., BA (Williams College), MA, MPhil, PhD (Yale)

Ward, C., BA (Saskatchewan), MA (Queen's), PhD (Toronto)

Warman, C., BA (Combined Hons), MA, PhD (Carleton)

Yuksel, M., BSc (METU), MA, PhD (Houston)

## Adjunct Professors

Amirkhalkhali, S. I., BA Hons (Shiraz), MA, PhD (Dalhousie), SMU

de Lamirande, P., BA, MA (Laval), PhD (Montreal)

Dufour, M., PhD (Massachusetts), MA (UBC)

Hoddinott, J., BA (Hons) (Toronto), MA (York), MA, DPhil (Oxon)

Huber, P. B., BA, MA, PhD (Yale)

MacDonald, M., BA (Dalhousie), PhD (Boston College), SMU

Marfels, C. T., Diplom-Volkswirt, Dr.Rer.Pol. (Berlin)

McAllister, R. I., MA (Oxon), MA (Cantab)

Rankaduwa, W., BA, MSc (Sri Lanka), MA, PhD (Dalhousie), UPEI

Sinclair, A. M., BA (Dalhousie), MA, BPhil (Oxon), PhD (Harvard), Professor  
Emeritus

## Instructors

Aleem, A., PhD (Universite Paris 13)

Boulaltoff, C., MS (Université Catholique de l'Ouest), PhD (Utah State)

Forsdyke, R., BSc (Hons) Biochemistry, BEd, MA (Queen's), PhD (Simon Fraser)

## Cross-Appointed Faculty

Clark, S., BA (Guelph), MSc (Saskatchewan), PhD (North Carolina), Faculty of  
Agriculture

Yiridoe, E. I., BSc (Univ Science and Tech Ghana), MSc, PhD (Guelph), Faculty  
of Agriculture

Zhao, Y., MSc (Western Kentucky), PhD (British Columbia), Professor of  
Finance, Faculty of Management

## I. Introduction

Economics is a social science - a science because it involves a rigorous intellectual effort to derive logical conclusions from basic facts and propositions; a social science because it has human beings and their welfare as its ultimate concern. The basic facts of Economics cannot be knowable and measurable with the same precision as those of the physical sciences - human society and its motivations are far too complex to permit this - but none of the sciences surpasses economics in its relevance to our needs, problems and goals.

Economics analyzes the equity, efficiency, and sustainability of human behavior in the production, distribution, and consumption of commodities. Economics is not an easy science; indeed, it is one of the most complex, difficult (and fascinating) areas of study when you pursue it beyond its elementary levels, but some basic knowledge of economics is essential for any educated person. A more extensive knowledge of the subject is an invaluable complement to other fields of specialization such as law, commerce, politics and other studies in social sciences or humanities, and a specialization in the field can lead to a variety of interesting career opportunities.

## II. Degree Programs

The department offers BA and BSc programs, described below. A student may graduate with either a BA or a BSc degree, but not both. In all programs, the student must ensure that the classes selected satisfy the overall faculty requirements for the relevant general degree (BA or BSc).

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, page 131 of this calendar.

### A. General Principles

Two principles have particular weight: (a) students should strike a balance between breadth of coverage among disciplines and depth of specialization in economics; (b) students taking economics as a minor or as a component of another specialization should be allowed a reasonable degree of flexibility in their choice of economics classes.

### B. BSc (20 credit) Honours Degree in Economics

#### Departmental Requirements

##### 1000 level

- ECON 1101.03
- ECON 1102.03

##### 2000 level

- ECON 2200.03
- ECON 2201.03

##### 3000 level

- ECON 3338.03
- ECON 3339.03
- ECON 3700.03
- One half credit in ECON 3310.03 or ECON 3349.03 or ECON 2233.03 or 2239.03

##### 4000 level

- ECON 4200.06
- ECON 4420.03
- ECON 4421.03

- 3.5 other Economics credits at or above the 2000 level for a minimum of nine advanced Economics credits.

### Other required classes

- MATH 1000.03
- MATH 1010.03
- MATH/STAT 1060.03
- MATH 2030.03
- MATH/STAT 2080.03 (ECON 2280.03)
- An Honours Thesis is also required

For current deadlines, requirements, and application forms, see the department's website (<http://economics.dal.ca>)

## C. BA (20 credit) Honours Degree in Economics

### Departmental Requirements

#### 1000 level

- ECON 1101.03
- ECON 1102.03

#### 2000 level

- ECON 2200.03
- ECON 2201.03

#### 3000 level

- ECON 3338.03
- ECON 3339.03
- ECON 3700.03
- One half credit in ECON 3310.03 or ECON 3349.03 or ECON 2233.03 or ECON 2239.03

#### 4000 level

- ECON 4200.06
- ECON 4420.03
- ECON 4421.03
- 3.5 other Economics credits at or above the 2000 level for a minimum of nine advanced Economics credits

### Other required classes

- MATH 1000.03
- MATH 1010.03
- MATH/STAT 1060.03
- MATH 2030.03
- MATH/STAT 2080.03 (ECON 2280.03)
- An Honours Thesis is also required

For current deadlines, requirements, and application forms, see the department's website (<http://economics.dal.ca>)

## D. Combined Honours

Combined honours programs, BA or BSc, may be arranged with other departments such as Biology, Earth Sciences, History, Journalism, Mathematics, Political Science, Statistics, or Sociology. For combined Honours programs with Economics, students must also consult the other departments concerned.

If Economics is the primary field in the combined honours, the student is required to take all the classes that are required for single honours. If Economics is the secondary field in the combined honours, the student must take at least five credits beyond the introductory level, including ECON 3338.03 and 2.5 additional credits beyond the 2000 level.

## E. BSc (20 credit) Major in Economics

### Departmental Requirements

#### 1000 level

- ECON 1101.03
- ECON 1102.03

#### 2000 level

- ECON 2200.03
- ECON 2201.03
- One other economics credit at or above the 2000 level

#### 3000 level

- ECON 3338.03
- 2.5 other economics credits at or above the 3000 level, for a minimum of five advanced credits in Economics

### Other required classes

- MATH 1000.03
- MATH 1010.03
- MATH/STAT 1060.03
- MATH 2030.03
- MATH/STAT 2080.03 (ECON 2280.03)

A student who wants the option of converting a Major to an Honours degree should select classes in accordance with the list of honours core classes given above and should consult regulations 11.4 and 22. Besides additional core classes, the Honours program requires an honours thesis and a higher academic standing than the Major. An Honours program can be converted to a Major at the student's discretion. The Major, however, allows a maximum of only 10 credits in economics while the Honours program allows a maximum of 11.

## F. BA (20 credit) Major in Economics

### Departmental Requirements

#### 1000 level

- ECON 1101.03
- ECON 1102.03

#### 2000 level

- ECON 2200.03
- ECON 2201.03
- One other credit in Economics at or above the 2000 level

#### 3000 level

- Three credits in Economics at or above the 3000 level, for a minimum of five advanced credits in Economics

### Other required classes

- MATH 1000.03
- STAT 1060.03

While the total number of credits required for the Major is the same as for an Honours degree, the honours program in economics requires an honours thesis and includes a larger core of classes in economics. In addition, the Honours program requires a *higher academic standing* than does the Major. However, the Major provides a comprehensive program not available with the 15 credit minor. Major students are strongly encouraged to consult with members of the department to ensure an integrated and coherent program.

A student who wants the option of converting a Major to an Honours degree should select classes in accordance with the list of honours core classes and should consult regulations 11.4 and 22. An Honours program can be converted to a Major at the student's discretion. The Major allows a maximum of nine or 10 credits in economics while the honours program allows a maximum of 11.

Combined programs may also be arranged with economics as the major or minor subject in association with other fields such as political science, sociology, history, earth sciences, biology, mathematics, statistics - and possibly others.

## G. BSc or BA (20 credit) Double Major

Economics is available as part of a BSc or BA double major program. All of the requirements for a single major apply. The student must complete a minimum of 10 advanced credits in the two subjects together.

## H. BSc or BA(15 credit) Minor in Economics

### Departmental Requirements

#### 1000 level

- ECON 1101.03
- ECON 1102.03

#### 2000 level

- Minimum of three, maximum of six credits at the 2000 level or above.

Students who wish to keep open the option of transferring into the Honours or Majors programs should select classes consistent with the requirements of these programs.

## I. Co-op Education in Economics

Co-operative Education in Science (Science Co-op) combines academic study with paid career-related work experience. The program integrates eight academic terms with three to four work terms. On completion of a Science Co-op program, a student graduates with a Bachelor of Science Co-op. Science Co-op enables students to apply their knowledge directly while providing them with work experience that assists in making educated career choices. Students apply to join Science Co-op by August 1st. before their second year of study. If accepted into the Science Co-op program, students are required to register for, and attend, the Science Co-op Seminar Series (SCIE 2800.00) in the fall term of the year they join.

The co-operative education program begins in the second year of study, and a GPA of 3.0 is required for admission. In addition to completing three to four work terms, a student must fulfil the requirements of either a 20 Credit BSc Major program while maintaining at least a B average, or a 20 Credit BSc Honours Program. Departmental approval and Science Co-op Program approval is required to obtain admission to the Co-operative Education Program in Economics. Interested students should inquire about the program before beginning their second year of study.

See the “Co-operative Education in Science” section of this calendar, or <http://www.sciencecoop.dal.ca>, for information on Science Co-op such as Science Co-op requirements, eligibility, how to apply, deadlines and other related information.

## J. Minors and Interdisciplinary Opportunities

Minor programs allow students to develop subject specialities, especially ones taught outside their main faculty, that complement their major or honours subjects. Minors are normally added to a four-year major or concentrated honours program. If a minor is added to a double major or a combined honours program, students may find that they need to take more than 20 credits to complete all of their degree requirements. Combined with a four-year degree program in Economics, minor programs are available in the following subject areas.

### Minor Subject Areas

- Business (BA or BSc)
- Canadian Studies (BSc only)
- Community Design (BA or BSc)
- Computer Science (BSc only)
- Environmental Studies (BA or BSc)
- Film Studies (BA or BSc)
- Food Science (BSc only)
- Health Studies (BA only)
- Journalism (BA or BSc)
- Law and Society (BA only)
- Management (BA or BSc)

Any student wishing to pursue a minor in these subjects should consult with the College of Arts and Science Degree Requirements section of the Undergraduate Calendar, starting on page 134, as well as the particular subject area of the calendar.

### Minor in Economics

A minor in Economics requires a minimum of any three credits in Economics above the 1000 level.

### BSc/Engineering or BA/Engineering Concurrent Programs

Students will normally complete the requirements for a 15 Credit BSc or 15 Credit BA, and the first two years of engineering studies leading to the Diploma in Engineering. The concurrent program can be completed in three years. Details are provided in the College of Arts and Science Degree Requirements starting on page 131 of the calendar.

### Diplomas, Certificates, and Language Proficiency Certificates

In combination with a BA or BSc there are certificates or diplomas that can be obtained to emphasize areas of proficiency. For a complete list and details refer to the College of Arts and Science Degree Requirements starting on page 131 of the calendar.

## K. Graduate Studies

The Department offers a graduate program leading to the MA, MDE and PhD degrees. Details of these programs, including a list of graduate classes, are given in the Calendar of the Faculty of Graduate Studies. Senior undergraduates may be admitted to some graduate classes at the discretion of the instructors concerned.

## III. Class Descriptions

Not all classes are offered on a regular basis. Please consult the department for details. Recent class outlines are available on the department's website (<http://economics.dal.ca>)

### ECON 1101.03: Principles of Microeconomics.

How do you decide whether or not to go to university? Why does the price of pizza change so much less than the price of oil? What will better help prevent climate change: a carbon tax, or a cap-and-trade system? Microeconomic analysis, which considers the behaviour of individuals and businesses, can answer questions like these.

FORMAT: Lecture 3 hours

### ECON 1102.03: Principles of Macroeconomics.

Why are some countries rich and others poor? If high oil prices cause the loonie to rise, how are Ontario manufacturers affected? Why were mortgage interest rates above 20% in 1981 but below 5% in 2011? Macroeconomic analysis, which considers the behaviour of the entire economy, can answer questions like these. NOTE: ECON 1101.03 is not required before taking ECON 1102.03.

ECON 1101.03 and 1102.03 (together) satisfy the Principles of Economics requirement for Economics majors and for Bachelor of Commerce and Bachelor of Management students.

FORMAT: Lecture 3 hours

### ECON 2200.03: Intermediate Microeconomics.

This course covers consumer behaviour, the theory of the firm, factor markets, and general equilibrium welfare analysis. The course serves as the microeconomic prerequisite for higher-level classes in economics.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 1101.03 (grade of C- or better)

EXCLUSION: ECON 2220.03

### ECON 2201.03: Intermediate Macroeconomics.

An extension of macroeconomic theory of income, unemployment, the exchange rate, inflation and financial markets that satisfies the minimum macroeconomic theory requirement for majors in economics. Serves as the macroeconomic prerequisite for higher-level classes in economics.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 1102.03 (grade of C- or better)

### ECON 2213.03: Emerging Giants: The Economic Rise of China and India.

This course examines the economic history, current issues, and future trends of China and India, answering such questions as: What explains China's and India's growth? How is climate change affected by this growth? How are global labour markets affected? Must growth lead to rising inequality? Is democracy required for development?

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 1101.03, ECON 1102.03

CROSS-LISTING: CHIN 2290.03

### ECON 2216.03: Economics of Global Warming.

This course uses economic principles to investigate such questions as: What are the benefits and costs of various time paths for abating emissions? How do we value the well-being of future generations? How do we balance helping the poor with environmental sustainability? What policies can align incentives with environmental sustainability?

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 1101.03

EXCLUSION: ECON2850.06, PHYC2850.06

### ECON 2217.03: Women and the Economy.

This class studies questions such as: Have economic conditions improved for women in Canada over the past 30 years? Is there gender discrimination in the Canadian labour market? What are the economic consequences of divorce? Are women more likely than men to be poor? Are there inequalities within families? NOTE: Approved with Canadian Studies.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 1101.03, ECON 1102.03 (grade of C- or better)  
CROSS-LISTING: GWST 2217.03

### **ECON 2218.03: The Canadian Economy in the New Millennium: Economic Policy Debates.**

Canada's economy today faces many problems: unemployment, productivity, income distribution, environmental protection, trade relations, federal-provincial fiscal relations, maintenance of social programs, etc. What are the most important economic policy issues that Canada now faces? What is the appropriate policy role for government?

NOTE: Approved with Canadian Studies.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 1101.03, ECON 1102.03

CROSS-LISTING: CANA 2218.03

### **ECON 2219.03: Euros and Cents: From Common Market to European Union.**

The European Union is a grand experiment to unite countries in a single market. The stepwise evolution from customs union to common market to economic and monetary union with a single currency, the Euro, is reviewed and analyzed. Learn more about an economic integration that is unparalleled in history.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 1101.03, ECON 1102.03 or permission of instructor

### **ECON 2220.03: Microeconomic Theory.**

This course covers the economic behaviour of individual decision makers, such as a consumer, a worker or a firm. Emphasis is on theoretical ideas, while applications of these ideas are also considered. Of particular interest to those planning to major or to do honours in economics.

NOTE: Students may not receive credit for both 2200.03 and 2220.03.

FORMAT: Lecture 3 hours

PREREQUISITE: Econ 1101.03 (grade of C- or better), MATH 1000.03 (or equivalent)

### **ECON 2231.03: Health Economics.**

This course introduces students to the role of economics in health, health care, and health policy. It comprises a survey of major topics in health economics and an introduction to the ongoing debate over health care policy. Topics include the economic determinants of health, the market, the market for medical care, the market for health insurance, the role of government in health care, and health care reform.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 1101.03, ECON 1102.03

### **ECON 2233.03: Canadian Economic History.**

An examination of the economic history of Canada from the time of Confederation to WWI. Major topics explored include: the economic reasons for Confederation, the building of the CPR, the Wheat Boom, foreign trade and investment and the roots of regional disparities.

NOTE: Approved with Canadian Studies. The student is recommended to have some knowledge of history prior to taking this class.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 1101.03, ECON 1102.03

CROSS-LISTING: CANA 2233.03

### **ECON 2239.03: The European Economy Since 1900.**

This class applies economic theories to interpret quantitative economic changes in major European countries during the turbulent 20th century. Issues addressed include sources of growth and unevenly improved welfare, war, inflation, depression; Nazi economy; Communism's nature, success, and ultimate failure; reparations and the transfer 'problem'; and the 'transition.'

NOTE: Approved with Canadian Studies

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 1101.03, ECON 1102.03

### **ECON 2260.03: Statistics I.**

See class description for MATH 2060.03, in Mathematics section of this calendar.  
PREREQUISITE: MATH 1000.03 or MATH 1215.03 and either MATH 1010.03 or 2030.03 or DISP

CROSS-LISTING: MATH 2060.03, STAT 2060.03

EXCLUSION: ENGM 2032.03

### **ECON 2280.03: Statistics II.**

See class description for MATH 2080.03, in Mathematics section of this calendar.  
PREREQUISITE: STAT 1060.03 or Equivalent

CROSS-LISTING: MATH 2080.03, STAT 2080.03

### **ECON 2334.03: Globalization and Economic Development: Current Debates.**

Economists have long debated whether the task of development should be entrusted largely to market forces, or whether there was role for the state in directing a nation's economic affairs. These debates over development continue. We assess critiques of the economic analysis of development. Students will be encouraged to debate these issues and come to their own conclusions.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 1101.03, ECON 1102.03

### **ECON 2400.03: Economics of Retirement.**

This course aims to explain how households save for retirement and manage their finances once retired. It applies a modified version of standard economic theory of shed light on the adequacy of households discussion-making. It appraises defined benefit and defined contribution pensions, and proposes ways of mitigating their shortcomings.

FORMAT: Lecture

PREREQUISITE: ECON 1101.03 and ECON 1102.03

### **ECON 2850.06: The Science and Economics of Climate Change.**

This course examines how climate change will impact the environment and human activities, and how to formulate and implement economically realistic solutions. It integrates the physical and biological science with economics in order to analyze the response options as we move towards a carbon-neutral society.

FORMAT: Lecture

CROSS-LISTING: PHYC 2850.06

EXCLUSION: PHYC 2800.03, ECON 2216.03

### **ECON 3310.03: Economic Growth in Historical Perspective.**

This course examines the sources of long-run economic growth and development in a historical perspective. Topics covered include invention, innovation, culture, legal institutions governing access to resources, demography, fertility, mortality, and alternative modes of production.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 2200.03 or ECON 2220.03, ECON 2201.03

### **ECON 3315.03: Labour Economics.**

This course considers the theory, evidence and policy of labour economics from a Canadian perspective. Topics include: How does EI affect the Canadian labour market? Do minimum wages reduce employment? What is economic discrimination and does it exist in Canada? How well do immigrants fare in the Canadian labour market?

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 2200.03 or ECON 2220.03, and ECON 2201.03

### **ECON 3317.03: Poverty and Inequality.**

Why are some people poor, while others are rich? Why do some nations have more poverty or inequality than others? What can or should be done? This course examines the extent of poverty and inequality in contemporary societies, and the theories underlying alternative measures and explanations.

NOTE: Approved with Canadian Studies. The student is advised to take ECON 3315 before taking ECON 3317.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 2200.03 or ECON 2220.03, and ECON 2201.03

### **ECON 3319.03: Industrial Organization.**

The course provides an overview of the organization of production. Market structure, firm conduct, and performance affect each other in complex ways; the degree of horizontal and vertical integration affects the ability to set prices, for example. Governments regulate firms in order to reduce socially harmful anticompetitive behaviour.

NOTE: Approved with Canadian Studies.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 2200.03 or 2220.03

### **ECON 3326.03: Money and Banking.**

The class concerns the nature and operation of the financial system, with particular reference to Canadian experience. It treats financial instruments (including money) and institutions and the social control of the supply of money and credit.

NOTE: Approved with Canadian Studies.

FORMAT: Lecture 3 hours  
PREREQUISITE: ECON 2201.03

### **ECON 3330.03: International Trade.**

This course examines the theory and empirics of international trade, including standard historical trade theories, more recent theories, and evidence regarding these theories. The course investigate factor movements, the welfare effects of trade policies in both industrial and developing countries, and the institutions that have developed to regulate those policies.

FORMAT: Lecture 3 hours  
PREREQUISITE: ECON 2200.03 or ECON 2220.03

### **ECON 3331.03: International Finance.**

This course covers the theory and empirics of international macroeconomics. It examines the determination of exchange rates, international capital flows, and risk; the effectiveness of fiscal and monetary policy in an open economy; modern international policy coordination; and the determination of the current account and net foreign assets.

FORMAT: Lecture 3 hours  
PREREQUISITE: ECON 2201.03

### **ECON 3332.03: Resource Economics.**

This class focuses on intertemporal economics and the economics of market failure as they pertain to the use of natural resources. A selection of resource sectors will also be discussed. Fisheries, agriculture, forestry, and energy represent possibilities, but this will vary from year to year.

NOTE: Approved with Canadian Studies.  
FORMAT: Lecture 3 hours  
PREREQUISITE: ECON 2200.03 or ECON 2220.03, MATH 1000.03 or equivalent

### **ECON 3333.03: Theories of Economic Development.**

This class surveys current applications of economic theory to the problem of economic development. Topics covered include recent advances in theory of economic growth, theories of poverty and inequality and their relation to economic performance, theories of fertility and population growth, and the microeconomics of peasant agriculture.

FORMAT: Lecture 3 hours  
PREREQUISITE: ECON 2200.03 or 2220.03, ECON 2201.03

### **ECON 3335.03: Environmental Economics.**

This class serves as an introduction to environmental economics. Topics include social decision making, externalities and public goods, regulatory approaches (standards, charges, tradable permits), forms of value derived from the environment and measurement techniques.

FORMAT: Lecture 3 hours  
PREREQUISITE: ECON 2200.03 or 2220.03

### **ECON 3338.03: Econometrics I.**

The theory of some quantitative methods commonly used by economists is discussed in the context of the classical linear model. Estimation problems caused by violations of the assumptions of the classical model are studied including heteroscedasticity and autocorrelation.

FORMAT: Lecture 3 hours  
PREREQUISITE: MATH 1000.03 (or equivalent) and ECON 2280.03/MATH 2080.03/STAT 2080.03

### **ECON 3339.03: Econometrics II.**

This class is an extension of ECON 3338.03 and covers a range of econometric methods that are used in economic research. The topics for this class include: Logit, Probit, Tobit, Distributed Lags, Panel Data, Simultaneous Equations and Time Series.

FORMAT: Lecture 3 hours  
PREREQUISITE: ECON 3338.03

### **ECON 3344.03: Public Finance.**

This class studies the economics of public expenditure, tax and transfer programs in a federal state such as Canada. The core issue addressed is when and how public policy can (or cannot) improve equity and efficiency.

NOTE: Approved with Canadian Studies. In addition to the prerequisites, the student is advised to take ECON 2201.03 before taking ECON 3344.03  
FORMAT: Lecture 3 hours  
PREREQUISITE: ECON 2200.03 or ECON 2220.03

### **ECON 3349.03: History of Economic Thought.**

This course will examine theories of value, production, distribution, and growth as developed in classical political economy and neoclassical economics. Theories of equilibrium and stability, the links between classical political economy and macroeconomic theory, and reactions to classical and neoclassical economics will be considered as time permits.

FORMAT: Lecture 3 hours  
PREREQUISITE: ECON 2200.03 or ECON 2220.03, ECON 2201.03

### **ECON 3350.03: Social Cost Benefit Analysis.**

Social cost benefit analysis is used to evaluate public projects and private sector regulations. It is similar to the revenue cost accounting used by firms but takes into account external costs and benefits such as environmental damages. This course explains the methodology in the context of case studies after which students apply the method to evaluate a public policy problem.

FORMAT: Lecture 3 hours  
PREREQUISITE: ECON 2200.03 or 2210.03

### **ECON 3360.03: Ethics, Justice, and Economics.**

Assumptions of Neoclassical economic theory are critically examined, with a focus on the ethical and distributional consequences of using markets as an allocation mechanism. We discuss the major conceptions of economic justice, including utilitarianism and social choice theory, Rawlsian egalitarianism, Nozickian libertarianism, Sen's capabilities approach, and equality of opportunity.

FORMAT: Lecture 3 hours  
PREREQUISITE: ECON 2200.03, ECON 2201.03  
CROSS-LISTING: PHIL 3361.03

### **ECON 3500.03: Public Economics.**

Analyzes the role of government in problems of resource allocation due to market failure. Concentrates on theories of public goods, collective choice, potential of conflict and cooperation in individually-motivated actions, incentive structures capable of realizing rational, cooperative, group outcomes. Provides theoretical underpinnings of many applied fields. Involves mathematical methods.

NOTE: While a background of ECON 3700 is helpful, it is not a prerequisite.  
FORMAT: Lecture 3 hours  
PREREQUISITE: ECON 2200.03 or ECON 2220.03, MATH 1000.03 or instructor permission

### **ECON 3600.03: Strategic Behaviour in Economics.**

Many economic questions (such as price competition, tax policy, research and development decision, bargaining) can be interpreted as games, in which each player's action affects payoffs of other players. The students learn how to recognize various strategic interactions in economics, and how to evaluate the outcomes of such interactions.

FORMAT: Lecture  
PREREQUISITE: ECON 2200.03 or ECON 2200.03, MATH 1000.03 or equivalent

### **ECON 3700.03: Mathematics for Economists.**

This course presents mathematical methods used in modern economics. The lectures concentrate on the basic concepts of analysis, comparative statics and optimization theory. Topics include an introduction to set theory and matrix algebra, the implicit function theorem, unconstrained optimization, constrained optimization with equality and inequality constraints, and intertemporal choice.

FORMAT: Lecture  
PREREQUISITE: ECON 2200.03 or ECON 2220.03, ECON 2201.03, MATH 1000.03 or permission of the instructor  
CROSS-LISTING: MATH 3700.03

### **ECON 3800.03: Financial Economics.**

This class is an introduction to decision making by investors under uncertainty, portfolio theory, asset pricing, financial markets, and instruments. The course covers both the theoretical and practical aspects of investment, surveys the techniques available for economists, and emphasizes "hands-on" learning using Canadian and international case studies.

FORMAT: Lecture 3 hours  
PREREQUISITE: ECON 2200.03 or ECON 2220.03, ECON 2201.03  
CROSS-LISTING: MATH 3800.03

### **ECON 3900.03: Financial Mathematics.**

See class description for MATH 3900.03 in the Mathematics section of this calendar.

PREREQUISITE: MATH 2060.03 and (MATH 2120.03 or MATH 3110.03) or instructor's permission  
CROSS-LISTING: MATH 3900.03

### **ECON 4002.03: Experiential Learning (in Economics).**

Experiential learning recognized the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the class coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and timetable.

PREREQUISITE: ECON 1101.03, ECON 1102.03, ECON 2200.03 or ECON 2220.03, ECON 2201.03, ECON 3338.03, ECON 3339.03. To be eligible, students should have a minimum average GPA of 3.0 in Economics.

EXCLUSION: Scheduled classes at a learning institution, study that would qualify for co-op work terms and paid work. Only one experiential learning class per degree is permitted.

### **ECON 4200.06: Honours Thesis.**

This course is required for honours students, and helps students define, research, and write an original research project under the supervision of an economics faculty member. Students develop a topic, critique current literature, run statistical tests, and present their results in a public conference. Attendance at weekly department seminars is mandatory.

FORMAT: Seminar 1.5 hours for both terms

PREREQUISITE: ECON 2200.03 or ECON 2220.03, ECON 2201.03, ECON 3338.03, ECON 3339.03 and permission of instructor

### **ECON 4420.03: Microeconomic Theory.**

In-depth study of outcomes of decision-making by agents, individually, collectively or as an interdependent system. Selects topics from: linear and non-linear optimization and applications to theory of consumers and firms, general equilibrium, game theory, alternative solution concepts, comparative statics, stability, welfare, market failures, collective choice, intertemporal economics, uncertainty.

NOTE: Students who have taken courses which are adjudged to be equivalent to the prerequisites, and/or who plan to take such courses during the same term (as co-requisites), may be allowed to take this class, at the discretion of the instructor. Students may find that some background in elementary Matrix Theory/Linear Algebra, at the level of MATH 2030.03 for example, is useful.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 2200.03 or ECON 2220.03, ECON 3700.03, MATH 1000.03 (or equivalent) and MATH 1010.03

### **ECON 4421.03: Macroeconomic Theory.**

Students are introduced to contemporary issues in macroeconomics including aggregate growth accounting; neoclassical growth models; monetary policy, inflation and unemployment; theories of consumption and investment; and trade and exchange rates. Mathematical methods are applied extensively and their application to economic problems will be stressed at both the theoretical and intuitive levels.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 2201.03, ECON 3700.03, MATH 1000.03 (or equivalent), MATH 1010.03

### **ECON 4426.03: Monetary Policy.**

Assuming a basic knowledge of monetary institutions and macroeconomics, a critical analysis of the objectives and effectiveness of monetary policy is developed. Particular attention is given to the Canadian experience and the effectiveness of Canadian policy. Approved with Canadian Studies.

FORMAT: Lecture 3 hours

PREREQUISITE: ECON 2201.03 and ECON 3326.03

### **ECON 8891.00: Co-op Work-Term I.**

### **ECON 8892.00: Co-op Work-Term II.**

### **ECON 8893.00: Co-op Work-Term III.**

### **ECON 8894.00: Co-op Work-Term IV.**

## **Environmental Science**

Location: Life Sciences Centre, Room 822  
PO Box 15000  
Halifax, NS B3H 4R2  
Telephone: (902) 494-7117  
Fax: (902) 494-1123  
Website: <http://www.dal.ca/environment>

### **Dean**

Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

### **Director**

Gibling, M., PhD (University of Ottawa)  
Telephone: (902) 494-2355  
Email: [martin.gibling@dal.ca](mailto:martin.gibling@dal.ca)

### **Faculty**

Gass, S., PhD (Open University, UK)  
Telephone: (902) 494-4530  
Email: [susan.gass@dal.ca](mailto:susan.gass@dal.ca)

Mushkat, P., LLB (Dalhousie) (Co-op Academic Advisor)  
Telephone: (902) 494-8056  
Email: [pwm@dal.ca](mailto:pwm@dal.ca)

Rainham, D., PhD (University of Ottawa)  
Telephone: (902) 494-1286  
Email: [daniel.rainham@dal.ca](mailto:daniel.rainham@dal.ca)

Sterling, S., PhD (Duke University) (major appointment in Earth Sciences)  
Telephone: (902) 494-7741  
Email: [shannon.sterling@dal.ca](mailto:shannon.sterling@dal.ca)

Wright, T., PhD (University of Alberta)  
Telephone: (902) 494-3683

### **Undergraduate Advisor**

Susan Gass

### **Administrative Assistant**

Hall, Dawn  
Telephone: (902) 494-7117  
E-mail: [dhall@dal.ca](mailto:dhall@dal.ca)

### **Supporting Faculty**

Environmental Science draws on faculty from the departments below:

Biology  
Chemical Engineering  
Chemistry  
Earth Sciences  
Economics  
Environmental Engineering  
International Development Studies  
Mathematics  
Oceanography  
Philosophy  
Physics and Atmospheric Science  
Political Science  
School for Resource and Environmental Studies  
School of Planning  
Sociology and Social Anthropology  
Statistics

NOTE: This field is rapidly expanding. Students interested in these types of programs should ask about classes related to the environment, other than those listed on the following pages, through the departmental contacts noted above.

## I. Introduction

Environmental Science in the Faculty of Science offers several programs. These include a BSc Honours/Major in Environmental Science, a Minor in Environmental Studies, a Double Major in Environmental Science and Community Design, and a BSc or BA Double Major or Combined Honours in Environmental Science and any Major/Honours subject in the Faculty of Arts and Social Sciences (FASS) or with Environment, Sustainability & Society (ESS). The Faculty of Arts and Social Sciences (FASS), the Faculty of Science, the Faculty of Computer Science and the Faculty of Architecture and Planning offer a Minor in Environmental Studies which is administered through Environmental Science.

Environmental Science applies the findings and principles from multiple disciplines to environmental questions and problems. Environmental Science, by nature, is multidisciplinary and interdisciplinary. Most environmental scientists develop expertise in a particular discipline, and work co-operatively with specialists in other disciplines to solve environmental problems. They work in a variety of institutions in both the public and private sectors: municipal, provincial and federal government departments, consulting and engineering companies, development aid organizations in the non-governmental sector and activist community organizations. In all of these institutions they must integrate their scientific knowledge into the prevailing political, economic and legal systems.

The classes required for the BSc Environmental Science stress the links among the fields of study that the students acquire. Thus, students graduate with a combination of depth and breadth of knowledge and the ability to solve problems in the real world.

## II. Degree Programs

A strong high school background in science (mainly Biology, Chemistry, Physics) is an asset, as are senior high school classes in Geography, Mathematics and English. For those considering these programs it is important to keep a number of options open as long as possible by taking the appropriate classes in Year 1. In each of the Science degree programs outlined below, the **Dalhousie Integrated Science Program (DISP)** is highly recommended.

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, page 131 of this calendar. SCIE 1111.03 is recommended to satisfy the writing requirement in all programs.

### A. BSc (20 credit) Major and Honours in Environmental Science

#### Departmental Requirements

##### 1. 1000 Level

- DISP (SCIE 1515.36, 1520.30, 1530.27, 1540.27)

OR

- BIOL 1010.03 or BIOL 1020.03
- MATH 1000.03 or MATH 1215.03
- STAT 1060.03 or MATH 1010.03 or MATH 2030.03
- CHEM 1011.03
- CHEM 1012.03
- EARTH 1080.03
- ENVS 1000.06
- SCIE 1111.03\*

\*An alternative writing class may be taken - see list on page 131 of this calendar. Students are encouraged to take one half of their language/humanities requirement (which is one credit in total) in their first year.

The classes listed above should be taken in the first year, if possible, if ENVS 1000.06 is not taken in the first year, it should be taken in the second year.

Also required but usually taken in the second year.

- ECON 1101.03 or ECON 1102.03

##### 2. Common Core Classes

Completed at various times over a four year degree program, the Common Core Classes introduce students to the scope and magnitude of environmental science

and are designed to provide students with an appreciation of the scientific, cultural, economic, historic, legal and social aspects of environmental issues.

- STAT 2080.03 or STAT 2060.03\*
- BIOL 2060.03
- PHIL 2480.03\*\*
- PHYC 2310.03
- ENVS 2000.03
- ENVS 2100.03
- ENVS 3001.03
- ENVS 3200.03
- ENVS 3500.03
- ENVS 3501.03
- ENVS 3502.03
- ENVS 3601.03
- ENVS 4001.03

\*STAT 2080.03 and ECON 1101.03 or ECON 1102.03 together satisfy the degree requirements for one credit in social science.

\*\*PHIL 2480.03 satisfies half of the degree requirement of one full credit in Language and Humanities.

### 3. Area of Emphasis (AOE) - four Credits

After completing the first year, students must choose an Area of Emphasis within the Faculty of Science. Students may choose from:

- Earth Sciences
- Environmental Economics
- Marine Biology
- Biology
- Ecology
- Chemistry and the Environment
- Statistics and the Environment
- Atmospheric Science
- Oceans and Global Change - First year and core class requirements differ from those listed above. See Section 5 for specific requirements.

A listing of the required classes for each Area of Emphasis is available from the Environmental Science Undergraduate Advisor or from the Environmental Science website (<http://www.dal.ca/environment>).

### 4. Electives

By presenting a wide range of topics inherent in the theme of human-environment relationships in the Common Core and Area of Emphasis classes, students will be encouraged to assess their own interests and learning goals. Through the selection of electives, students can prepare themselves for learning experiences and careers that will meet their individual needs.

### 5. Specific departmental requirements for Area of Emphasis in Oceans and Global Change.

#### a. 1000 level

- BIOL 1010.03 or BIOL 1020.03
- BIOL 1011.03 or BIOL 1021.03
- MATH 1000.03
- MATH 1010.03
- CHEM 1011.03
- CHEM 1012.03
- EARTH 1080.03
- EARTH 1090.03
- PHYC 1100XY.06 OR PHYC 1300XY.06

#### b. Core requirements

- OCEA 2000XY.06
- OCEA 2800.03
- STAT 1060.03
- STAT 2080.03
- ECON 1101.03 or ECON 1102.03\*
- PHIL 2480.03 \*\*
- ENVS 2100.03
- ENVS 3001.03
- ENVS 3501.03
- ENVS 3502.03
- ENVS 3200.03
- ENVS 4001.03
- ENVS 4901.03
- ENVS 4902.03

\*This class satisfies one half credit of the degree requirement of one full credit in a Social Science. One more half credit in Social Science must be taken as an elective.

\*\*This philosophy class satisfies the degree requirement of half a credit in Languages and Humanities

### c. Area of Emphasis Requirements (four credits)

Honours students are required to complete an honours thesis. The thesis is conducted in association with two required classes:

- ENVS 4901.03
- ENVS 4902.03

The Honours Qualifying Exam is determined as a pass or fail in the honours thesis presentation.

- OCEA 3001.03
- OCEA 3002.03
- OCEA 3003.03
- OCEA 3004.03
- OCEA 4000.03
- OCEA 4335.03
- OCEA 4380.03
- PHYC 4520.03

## 6. Honours Program

Students must have a minimum of nine and maximum of 12 credits of required ENVS classes above the 1000 level. Students who have not fulfilled this requirement in their Common Core and Area of Emphasis Credits must choose enough electives from the list of Approved Environmental Science Equivalent Classes to meet this requirement (classes do not have to have an ENVS designation, but must be picked from a list of approved electives to count toward the minimum and maximum requirements for the program). A list of approved Environmental Science Equivalent Classes is available from the Director of Environmental Programs or online (<http://www.dal.ca/environment>). Each ENVS, ENVS-equivalent and Area of Emphasis class above the 1000 level must be passed with a grade "C" or better, and the average GPA for these classes must be at least 3.0. A cumulative GPA of 3.5 in the first two years is required to enter the Honours Program.

## 7. Major Students

Students must have a minimum of seven and maximum of 10 credits of ENVS classes above the 1000 level. Students who have not fulfilled this requirement in their Common Core and Area of Emphasis credits must choose enough electives from the list of Approved Environmental Science Equivalent Classes to meet this requirement (classes do not have to have an ENVS designation, but must be picked from a list of approved electives to count toward the minimum and maximum requirements for the program). A list of approved Environmental Science equivalent classes is available from the Director of Environmental Science Programs or online (<http://www.dal.ca/environment>).

## B. BSc (20 credit) Double Major or Combined Honours in Environmental Science

Students may complete a BSc Double Major/Combined Honours in Environmental Science and any Major/Honours subject from the Faculty of Arts and Social Science (FASS), or Environment, Sustainability and Society (ESS). See section C for combinations with ESS. Beside the general requirements for all BSc programs, students must meet the Faculty degree requirements for the BSc with Double Major, which includes 10-14 full credits in the major subjects beyond the 1000 level, with no more than nine nor fewer than five in either subject. Students must complete at least two full credits at the 2000 level in each major subject. Combined honours require 11-14 credits in the honours subjects beyond the 1000 level, with no more than nine nor fewer than five in either subject.

### Departmental Requirements

#### 1. 1000 Level

- DISP (SCIE 1515.36, 1520.30, 1530.27, 1540.27)
- OR
- BIOL 1010.03 or BIOL 1020.03 (C- or better)
  - MATH 1000.03 or MATH 1215.03
  - STAT 1060.03 or MATH 1010.03 or MATH 2030.03
  - EARTH 1080.03
  - CHEM 1011.03

- CHEM 1012.03
- ENVS 1000.06
- SCIE 1111.03\*

\*This constitutes the writing class. An alternative writing class may be taken - see list on page 131 of this calendar. Students are encouraged to take one half of their language/humanities requirement (which is one credit in total) in their first year.

The classes listed above should be taken in the first year, if possible. If ENVS 1000.06 is not taken in the first year, it should be taken in the second year.

Also required but normally taken in the second year:

- ECON 1101.03 or ECON 1102.03

## 2. Common Core Classes

In addition to the Common Core Classes listed in Section A.2, one additional full credit of ENVS is required

## 3. Subject B Classes

Chosen from any Major/Honours subject in the Faculty of Arts and Social Sciences. A minimum of five and maximum of seven credits above 1000-level are required. See Subject B department academic advisor for specific requirements.

## 4. Electives

By presenting a wide range of topics inherent in the theme of human-environment relationships in the Common Core classes, students will be encouraged to assess their own interests and learning goals. Through the selection of electives, students can prepare themselves for learning experiences and careers that will meet their individual needs.

## C. 20 Credit BSc Double Major and Combined Honours in Environmental Science (ENVS) and Environment, Sustainability and Society (ESS)

ENVS as (A) subject, ESS as (B) subject

### Departmental Requirements

#### 1. 1000 Level

- ENVS 1000.06
- BIOL 1010.03 or BIOL 1020.03
- MATH 1000.03 or MATH 1215.03
- STAT 1060.03 or MATH 1010.03 or MATH 2030.03
- CHEM 1011.03
- CHEM 1012.03
- EARTH 1080.03
- SUST 1000.06\*

\*This class also serves as the writing class.

Also required but usually taken in the second year:

- ECON 1101.03 or ECON 1102.03

## 2. Common Core Classes

In addition to the ENVS classes listed in A2:

- SUST 2000.06 or SUST 2001.06
- three credits taken from the list of approved ESS electives (page 46 of this calendar), not including required ENVS classes.

Honours students also require:

- ENVS 4901.03
- ENVS 4902.03

Area of Emphasis classes in ENVS are not required.

ESS as (A) subject, ENVS as (B) subject

### Departmental Requirements

#### 3. 1000 Level

- ENVS 1000.06
- BIOL 1010.03 or BIOL 1020.03
- STAT 1060.03
- EARTH 1080.03

- SUST 1000.06\*
- SUST 1001.06

\* This class also serves as the writing class.

### Common Core Classes

- STAT 2080.03
- ENVS 2000.03
- ENVS 2100.03
- ENVS 3501.03
- ENVS 4001.03
- 1.5 credits of other ENVS classes, 1.0 above the 2000 level
- SUST 2000.06
- SUST 2001.06
- SUST 3000.03
- SUST 3502.03
- SUST 4000.06
- three credits taken from the list of approved ESS electives (page 44 of this calendar), not including required ENVS classes.

### D. BSc (20 credit) Double Major in Environmental Science and Community Design

Space in this program is limited. Students must receive approval from the School of Planning Undergraduate Coordinator for admission to this program.

#### Departmental Requirements

##### 1. 1000 Level

- DISP (SCIE 1515.36, 1520.30, 1530.27, 1540.27)
- ECON 1101.03 or ECON 1102.03
- PLAN 1001.03 and 1002.03

OR

- BIOL 1010.03 and 1011.03 or 1020.03 and 1021.03
- MATH 1000.03 or MATH 1215.03
- MATH 1010.03 or MATH 2030.03 or STAT 1060.03
- EARTH 1030.03
- PLAN 1001.03
- PLAN 1002.03
- ECON 1101.03\* or ECON 1102.03\*
- one full credit in a first year single subject chosen from chemistry, physics, environmental science OR one additional half-credit in Earth Sciences.

\*This class satisfies one half credit of the degree requirement of one full credit in a Social Science. One more half credit in Social Science must be taken as an elective.

##### 2. Common Core Classes

In addition to the Common Core Classes listed in Section A.2, one additional full credit in ENVS is required.

##### 3. Community Design Classes (four credits)

- PLAN 2001.03
- PLAN 2002.03
- PLAN 2005.03
- PLAN 3001.03
- PLAN 3002.03
- PLAN 3005.03
- PLAN 3006.03
- One additional half-credit in PLAN

##### 4. Electives

By presenting a wide range of topics inherent in the theme of human-environment relationships in the Common Core classes, students will be encouraged to assess their own interests and learning goals. Through the selection of electives, students can prepare themselves for learning experiences and careers that will meet their individual needs.

### E. BA (20 credit) Double Major or Combined Honours in Environmental Science

Students may complete a BA Double Major/Combined Honours in Environmental Science and any Major/Honours subject from the Faculty of Arts and Social Sciences (FASS), or Environment, Sustainability and Society (ESS).

Beside the general requirements for all BA programs, students must meet the Faculty degree requirements for the BA with Double Major, which include 10-14 full credits in the major subject beyond the 1000 level, with no more than eight nor fewer than five in either subject. Students must complete at least two full credits above the 2000 level in each major subject.

Combined Honours requires 11-14 credits in the honours subjects beyond the 1000 level, with no more than eight nor fewer than five in either subject.

For the BA Double Major/Combined Honours in Environmental Science and Faculty of Arts and Social Sciences (FASS), the following are required:

#### Departmental Requirements

##### 1. 1000 Level

- ENVS 1000.06 (B or better)
- One credit in a first-year science subject chosen from BIOL, CHEM, PHYC, EARTH, ECON
- STAT 1060.03

##### 2. 2000 Level

- ENVS 2000.03
- ENVS 2100.03

##### One credit chosen from:

- BIOL 2003.03
- BIOL 2004.03
- BIOL 2060.03
- GEOG 2800.03
- CHEM 2505.03
- OCEA 2000.06
- ECON 2216.03
- EARTH 2410.03

##### 3. 3000 and 4000 Level

- ENVS 3200.03
- ENVS 3501.03
- ENVS 3502.03\*
- ENVS 4001.03

##### 4. At least one credit from:

- ENVS 3000.03
- ENVS 3001.03
- ENVS 3210.03
- ENVS 3225.03
- ENVS 3226.03
- ENVS 3301.03
- ENVS 3400.03
- ENVS 3500.03
- ENVS 3801.03
- BIOL 3060.03
- BIOL 3061.03
- BIOL 4160.03
- CHEM 4203.03

\* If ESS is the A subject, this requirement is waived.

##### 5. Subject B Classes

Chosen from any Major/Honours subject in the Faculty of Arts and Social Sciences. A minimum of five and maximum of seven credits above 1000 level are required. See Subject B department academic advisor for specific requirements.

##### 6. Electives

By presenting a wide range of topics inherent in the theme of human-environment relationships in the Common Core classes, students will be encouraged to assess their own interests and learning goals. Through the selection of electives, students can prepare themselves for learning experiences and careers that will meet their individual needs.

For the BA Double Major/Combined Honours in Environmental Science and Environment, Sustainability and Society (ESS), with either subject as (A) or (B), the requirements are the same as for the BSc program (section C) with the exception that the only required MATH or STAT class is STAT 1060.03.

## F. BA, BSc, BCD, BCSc (20 credit) Minor in Environmental Studies

Students in the following 20 credit degree programs may do a Minor in Environmental Studies:

- Major or Honours Bachelor of Science, except Environmental Science
- Major or Honours Bachelor of Arts
- Honours Bachelor of Community Design
- Major or Honours Bachelor of Computer Science, with/without Co-op
- Double Major or Combined Honours in any two departments in the Faculty of Arts and Social Science or the Faculty of Science, except Environmental Science.

Students doing a Minor in Environmental Studies must get approval of their class selections from the Environmental Science Undergraduate Advisor. The rules governing the selection of classes are given below.

### 1. BA with Minor in Environmental Studies

See listing in Faculty of Arts and Social Sciences section of this calendar (page 187).

### 2. BSc with Minor in Environmental Studies

BSc students must take three full credits of required classes, plus two full credits from the approved list of elective classes below. Note: In planning their programs students must take into account the prerequisites which apply to many of the elective classes listed below. The following rules apply to the selection of classes for the Minor:

- No class can fulfil a requirement of both the Major or Honours subject and the Minor.
- A maximum of one half-credit class in the Major/Honours subject (i.e., a class beyond those required for the Major/Honours) can count toward the Minor.
- At least one half credit beyond the required classes must be at the 3000 level or above.

Additions to the Electives list will be made as relevant classes become available.

#### Required Classes:

- ENVS 1000.06: Intro to Environmental Science OR Dalhousie Integrated Science Program, SCIE 1515.36, 1520.30, 1530.03, 1540.27
- PHIL 2480.03: Environmental Ethics
- ENVS 3501.03: Environmental Problem Solving I
- ENVS 3502.03: Environmental Problem Solving II
- ENVS 3200.03: Introduction to Environmental Law

#### Electives (two full credits from the list)

- BIOL 2601.03: The Flora of Nova Scotia
- BIOL 2605.03: Introduction the Marine Life of Nova Scotia
- BIOL 3063.03: Resource Ecology
- BIOL 3225.03: Plants in the Human Landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 3xxx.03: Any ecology-related class at 3000-level or above
- BIOL 4065.03: Sustainability and Global Change
- BIOL 4104.03: Environmental Microbiology
- BIOL 4160.03: Political Ecology
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- CHEM 4595.03: Atmospheric Chemistry
- CTMP 3210.03: Intersecting Bodies, Selves and Environment
- CTMP 3220.03: The Aesthetics of Nature
- EARTH 2203.03: Sediments and Sedimentary Rocks
- EARTH 2410.03: Environmental and Resource Geology I
- EARTH 3302.03: Quaternary Sedimentary Environments
- EARTH 3400.03: Fundamentals of Hydrogeology
- EARTH 3402.03: Practical Hydrogeology
- EARTH 3410.03: Environmental Geology 2
- EARTH 3420.03: Geochemistry of Aquatic Environments
- EARTH 3440.03: Geomorphology
- EARTH 3500.03: Geoscience Information Management
- EARTH 4450.03: Introduction to Landscape Simulation
- EARTH 4502.03: Micropaleontology and Global Change
- EARTH 4520.03: GIS Applications to Environmental and Geological Sciences

- EARTH 4530.03: Environmental Remote Sensing
- ECON 2210.03: Emerging Giants: the Economic Rise of China and India
- ECON 2216.03: Economics of Global Warming
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- ENVS 2100.03: Environmental Informatics
- ENVS 3000.03: Environmental Science Internship
- ENVS 4210.03: Administrative Environmental Law: Natural Justice and Unnatural Acts
- ENVS 3220.03: International Law for Environmental Scientists
- ENVS 3225.03: Plants in the Human Landscapes
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3301.03: Enterprise Sustainability
- ENVS 3400.03: Human Health and Sustainability
- ENVS 3500.03: Geoscience Information Management
- ENVS 3615.03: Methods in Ecology
- ENVS 3632.03: Applied Field Methods in Fish Ecology
- ENVS 3801.03: Directed Readings in Environmental Science
- ENVS 4001.03: Environmental Impact Assessment
- GEOG 2800.03: Climate Change
- HIST 3370.03: North American Landscapes
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- INTD 3304.03: Sustainable Development in Cuba
- MICI 4104.03: Environmental Microbiology
- OCEA 2000.06: The Blue Planet
- OCEA 2800.03: Climate Change
- OCEA 4110.03: Introduction to Geological Oceanography
- OCEA 4120.03: Introduction to Physical Oceanography
- OCEA 4130.03: Introduction to Chemical Oceanography
- OCEA 4140.03: Introduction to Biological Oceanography
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2485.03: Technology and the Environment
- PHYC 2310.03: Energy and the Environment
- PHYC 2451.03: Astronomy I: The Sky and Planets
- PHYC 2800.03: Climate Change
- PLAN 2001.03: Landscape Analysis
- PLAN 3001.03: Landscape Ecology
- PLAN 3002.03: Reading the City
- PLAN 3005.03: Cities and the Environment in History
- PLAN 3010.03: Urban Ecology
- PLAN 3020.03: Landscape Design
- PLAN 4106.03: Transportation Planning
- POLI 3380.03: Politics of Climate Change
- POLI 3385.03: Politics of the Environment
- POLI 3589.03: Politics of the Sea I
- POLI 3590.03: Politics of the Sea II
- SOSA 2100.06: Environment and Culture
- SOSA 3211.03: Continuity and Change in Rural Society
- SOSA 3220.03: Coastal Communities in the North Atlantic

### 3. Bachelor of Community Design (BCD) with Minor in Environmental Studies

See listing in Faculty of Architecture and Planning section of this calendar (page 124).

### 4. Bachelor of Computer Science (BCSc) with a Minor in Environmental Studies

BCSc students must take three full credits of required classes, plus two full credits from the approved list of elective classes below. Note: In planning their programs students must take into account the prerequisites which apply to many of the elective classes listed below. The following rules apply to the selection of classes for the Minor:

- No class can fulfill a requirement of both the Major or Honours subject and the Minor.
- At least one half credit beyond the required classes must be at the 3000 level or above.
- Additions to the following lists will be made as relevant classes become available.

**Required classes:**

- ENVS 1000.06: Introduction to Environmental Science OR DISP (SCIE 1515.36, 1520.30, 1540.27)
- ENVS 2480.03: Environmental Ethics
- ENVS 3501.03: Environmental Problem-Solving I
- ENVS 3502.03: Environmental Problem-Solving II
- ENVS 3200.03: Introduction to Environmental Law

**Electives (two full credits from the list):**

- BIOL 2605.03: Introduction to Marine Life of Nova Scotia
- BIOL 3063.03: Resource Ecology
- BIOL 3225.03: Plants in the Human Landscape
- BIOL 3226.03: Economic Botany, Plants and Civilization
- BIOL 3601.03: Nature Conservation
- BIOL 4065.03: Sustainability and Global Change
- CHEM 2505.03: Environmental Chemistry I
- CHEM 4203.03: Environmental Chemistry II
- CHEM 4595.03: Atmospheric Chemistry
- CTMP 3210.03: Intersecting Bodies, Selves and Environments
- ECON 2213.03: Emerging Giants: The Economic Rise of China and India.
- ECON 2216.03: Economics of Global Warming
- ECON 3332.03: Resource Economics
- ECON 3335.03: Environmental Economics
- EARTH 2410.03: Environmental Issues in Earth Sciences
- EARTH 3440.03: Geomorphology
- EARTH 4450.03: Introduction to Landscape Simulation
- EARTH 4520.03: GIS Applications to Environmental and Geological Sciences
- EARTH 4530.03: Environmental Remote Sensing
- ENVS 2100.03: Environmental Informatics
- ENVS 3000.03: Environmental Science Internship
- ENVS 3220.03: International Law for Environmental Scientists
- ENVS 3226.03: Economic Botany, Plants and Civilization
- ENVS 3300.03: Contaminated Site Management
- ENVS 3301.03: Enterprise Sustainability
- ENVS 3400.03: Human Health and Sustainability
- ENVS 3500.03: Geoscience Information Management
- ENVS 3801.03: Directed Readings in Environmental Science
- ENVS 4210.03: Administrative Environmental Law: Natural Justice and Unnatural Acts
- INTD 2001.03: Introduction to Development I
- INTD 2002.03: Introduction to Development II
- OCEA 2000.06: The Blue Planet
- OCEA 2800.03: Climate Change
- PHIL 2475.03: Justice in Global Perspective
- PHIL 2485.03: Technology and the Environment
- PHYC 2310.03: Energy and the Environment
- PHYC 2800.03: Climate Change
- PLAN 3010.03: Urban Ecology
- POLI 3380.03: Politics of Climate Change
- POLI 3385.03: Politics of the Environment
- POLI 3589.03: Politics of the Sea I
- SOSA 2100.06: Environment and Culture
- SOSA 3211.03: Continuity and Change in Rural Society
- SOSA 3220.03: Coastal Communities in the North Atlantic

## G. Co-operative Education Program in Environmental Science

Co-operative Education in Environmental Science (Co-op) is a program that combines academic study with career-related work experience. Students complete three workterms and graduate with a BSc, Co-op. The program requires a minimum of three workterms. A fourth workterm is optional.

A student in the co-op program must complete SCIE 2800.00, a mandatory non-credit interdisciplinary seminar in the fall semester of their second year. The student must also register each workterm as ENVS 8891.00, ENVS 8892.00, ENVS 8893.00, or ENVS 8894.00, depending on how many workterms have already been completed. At least one workterm must not be during the summer term.

Co-op begins in the second year of study. A GPA of at least 3.0 for the first year of study is required for admission. In addition to completing at least three workterms,

a student in the co-op must fulfill the requirements of either a 20 Credit BSc Major/Honours or a 20 Credit BSc Combined Honours or Double Major in Environmental Science while maintaining a minimum GPA of 3.0. Departmental and Science Co-op Office approval is required to be admitted to Co-op in Environmental Science. Interested students should inquire about the program before beginning their second year of study. Application deadline is August 1st.

Additional information may be found in the calendar under the heading “Co-operative Education in Science” or visit <http://www.science.coop.dal.ca>

## H. Other programs

### Minors

Minor programs allow students to develop subject specialties, especially ones taught outside their main faculty, that complement their major or honours subjects. Minors are normally added to a four-year major or concentrated honours program. If a minor is added to a double major or a combined honours program, students may find that they need to take more than 20 credits to complete all of their degree requirements. Combined with a four-year degree program in Environmental Science, minor programs are available in the following subject areas.

#### Minor Subject Areas

- Business (BA or BSc)
- Canadian Studies (BSc only)
- Community Design (BA or BSc)
- Computer Science (BSc only)
- Film Studies (BA or BSc)
- Food Science (BSc only)
- Geography (BA or BSc)
- Health Studies (BA only)
- Journalism (BA or BSc)
- Law and Society (BA only)
- Management (BA or BSc)

Any student wishing to pursue a minor in these subjects should consult with the College of Arts and Science Degree Requirements section of the Undergraduate Calendar, starting on page 135, as well as the particular subject area of the calendar.

### BSc/Engineering or BA/Engineering Concurrent Programs

Students will normally complete the requirements for a 15 Credit BSc or 15 Credit BA, and the first two years of engineering studies leading to the Diploma in Engineering. The concurrent program can be completed in three years. Details are provided in the College of Arts and Science Degree Requirements starting on page 131 of the calendar.

## I. Diplomas, Certificates, and Language Proficiency Certificates

In combination with a BA or BSc there are certificates or diplomas that can be obtained to emphasize areas of proficiency. For a complete list and details refer to the College of Arts and Science Degree Requirements starting on page 131 of the calendar.

Certificates that may be of particular interest to students in Environmental Science include:

- Certificate in Environmental Impact Assessment
- Certificate in Geographic Information Science

(see Biology Department entries)

Lists of requirements and checklists can also be found on the Environmental Science website (<http://www.dal.ca/environment>).

Students should enrol in these certificates by contacting C. Wells or D. Rainham (for GIS Certificate), P. Lane (for EIA Certificate), or the Environmental Science Advisor. Students can enrol when in their second, third or fourth year of the BSc program, however; early enrolment is advised because it may otherwise be difficult to meet the requirements within four years.

## J. Minor programs in Environmental Science

(available for students not registered in that particular department)

Any three full credits above the 1000 level in Environmental Science (ENVS classes).

## K. Minor programs available to students enrolled in a Major or Honours in Environmental Science

(see appropriate Calendar entries)

- Minors in other Faculty of Science programs
- Minors offered by the Faculty of Arts and Social Sciences
- Minors in other Faculties

## III. Class Descriptions

### ENVS 1000X/Y.06: Introduction to Environmental Science.

This full year class introduces numerous topics including biogeochemical cycles, food webs, biodiversity, human population growth, soil, agriculture, climate, pollution, toxicology, energy, water, forests, oceans, minerals, law, waste management and urban issues. Tutorials reinforce and supplement lectures and allow small group discussion and debate.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

INSTRUCTOR(S): S. Gass

FORMAT: Lecture 3 hours, tutorial

EXCLUSION: ENVI 1100X/Y.06

### ENVS 2000.03: Urban Field School.

This field class offers an introduction to urban environmental science by examining the role of humans in ecosystems and how humans change ecosystem processes and functions within urban areas. Students gain hands-on experience in environmental science techniques during excursions in different urban settings with the Halifax Regional Municipality.

NOTE: Offered in early May. Daily field trips and/or labs. An auxiliary fee is charged to cover field expenses.

INSTRUCTOR(S): S. Gass

FORMAT: Field intensive, labs, lectures

PREREQUISITE: ENVS 1000.06 and open only to students in the BSc Environmental Science Program

### ENVS 2100.03: Environmental Informatics.

Environmental Informatics is the knowledge skills and tools which enable information to be collected, managed and disseminated to support research in environmental science. Students develop skills for the analysis, evaluation and synthesis of knowledge in environmental science. Information systems, tools, and techniques are introduced and applied to current environmental challenges.

INSTRUCTOR(S): D. Rainham

FORMAT: Lecture 3 hours and labs

PREREQUISITE: ENVS 1000X/Y.06

### ENVS 2410.03: Environmental Issues in Earth Sciences.

Geology underlies many of the environmental problems facing humanity today. Topics include environmental aspects of energy and mineral resource, geologic hazards, geologic connections to pollution and waste disposal, and the role that water plays in its various guises. Canadian examples are incorporated where appropriate. Approved with Canadian Studies.

NOTE: This class is not offered every year. Please consult department in the spring for further information.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: One of: EARTH 1080, EARTH/GEOG 1030, EARTH/GEOG 1060, ENVS 1000, SUST 1001, or DISP with Earth Sciences

CROSS-LISTING: CANA 2410, EARTH 2410

EXCLUSION: This class is not available for Earth Sciences Majors

### ENVS 3000.03: Environmental Science Internship.

This class allows students to gain hands-on experience while addressing a question of personal and academic interest relevant to the field of environmental science by working as interns for 8 hours a week over a twelve-week period on a specific project at a sponsoring agency.

NOTE: It is the student's responsibility to consult with Environmental Program at least 3 weeks prior to the term in which the internship will take place to arrange for a placement and to make sure that the details of the internship are in accordance with university standards.

INSTRUCTOR(S): P. Mushkat

FORMAT: Internship

PREREQUISITE: Open ONLY to students in Minor in Environmental Studies, Honours/Major/Double Major/Combined Honours in Environmental Science

### ENVS 3001.03: Environmental Science Field School.

Daily field trips introduce methods used in environmental science and environmental processes at diverse sites within Nova Scotia. Involves full-day trips from Halifax and a multi-day camping trip away from Halifax. Offered during the last 2 weeks before Labour Day.

INSTRUCTOR(S): S. Gass and Staff

FORMAT: Full-day and overnight field trips.

PREREQUISITE: Open ONLY to students in BSc or BA Environmental Science

### ENVS 3200.03: Introduction to Environmental Law.

This class will take a look at how environmental law operates in Nova Scotia within the Federal framework and it will illustrate some of the multi-disciplinary aspects which make this area of law part science, part art and part soothsaying.

INSTRUCTOR(S): P. Mushkat

FORMAT: Lecture 3 hours

PREREQUISITE: Must be a third year student

### ENVS 3225.03: Plants in the Human Landscape.

The use of plants for human recreation and aesthetic purposes in gardens, public parks, suburban and urban landscapes. Topics include: history of gardens, garden design, plant materials, edible landscaping, plants and human health. The course includes field trips and group work and students complete a design project.

INSTRUCTOR(S): Staff

FORMAT: Lecture/tutorial

PREREQUISITE: BIOL 1010.03 or BIOL 1020.03 (C- or better) and BIOL 1011.03 or BIOL 1021.03 (C- or better) or DISP or PLAN 2001.03

CROSS-LISTING: PLAN 3225, BIOL 3225

### ENVS 3226.03: Economic Botany, Plants and Civilization.

The story of the human use of plants for food, fibre and fuel including the botany, domestication, development, distribution, production, processing, history, economic and social impacts of the major world crops (cereals, fruits, vegetables, flowers and industrial crops) and the development of novel plant based bioproducts (bio-fuels, etc).

INSTRUCTOR(S): Staff

FORMAT: Lecture/lab

PREREQUISITE: BIOL 1010.03 or BIOL 1020.03 (B- or better) and BIOL 1011.03/BIOL 1021.03 (B- or better)

CROSS-LISTING: BIOL 3226.03

### ENVS 3300.03: Contaminated Site Management.

Scientists, engineers and planners should have a basic understanding of the issues surrounding environmental site assessment given the potential environmental and socio-economic impacts. Topics include phased assessments, risk assessment, remediation and monitoring. Case studies, projects, guest speakers and field trips augment the class. Class offered in alternate years.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours, occasional field trips

PREREQUISITE: CHEM 1011.03/1012.03; EARTH 1010.03/1020.03; OR permission of the instructor

### ENVS 3301.03: Enterprise Sustainability.

Integration of sustainability into corporate environment is reviewed from perspectives of practical application of pollution prevention (P2). Tools for data collection, communication, analysis, and presentation will be taught. Field trip(s) will provide practical experience and form foundation for major project. Guest speakers will supplement the course. Class offered in alternate years.

INSTRUCTOR(S): J. Rod

FORMAT: Lecture/hands-on exercises and field trip.

PREREQUISITE: /CO-REQUISITES: ENVS 1000X/Y.06 or ENVS 2001.03

### ENVS 3400.03: Environment and Human Health.

This course examines the relationships between the health of populations and health determinants in the context of environmental sustainability. Weekly laboratory exercises will teach students how geomatics (GIS, GPS, and remote sensing technologies) and epidemiological tools can be used to assess the links between the health of human populations and the health of the environment, and how to use these tools for environmental health research.

INSTRUCTOR(S): D. Rainham

FORMAT: Lecture 3.0 hours, Lab 1.5 hours

PREREQUISITE: Must be a third year student or have permission of instructor

CROSS-LISTING: GEOG 3400.03

**ENVS 3500.03: Geoscience Information Management.**

See class description for EARTH 3500 in the Earth Sciences section of the calendar.

**ENVS 3501.03: Environmental Problem Solving I.**

This class introduces students to concepts and methods for analyzing environmental problems. Students will learn analytical approaches for problem solving that are appropriate for a wide range of environmental issues and apply these to the analysis of case studies.

INSTRUCTOR(S): T. Wright

PREREQUISITE: ENVS 1000.06 (with a grade of B or better) or ENVS 2001.03.

Must be a 3rd year student OR have permission of instructor

**ENVS 3502.03: Environmental Problem Solving II: The Campus as a Living Laboratory.**

In this course the campus serves as a living laboratory for identifying, evaluating and assessing indicators of progress toward greater campus sustainability. Working in groups, students apply problem solving models to case studies using qualitative and quantitative research methods and make recommendations for improvements on campus based on their analyses.

INSTRUCTOR(S): T. Wright

PREREQUISITE: ENVS 3501.03 or permission of instructor

**ENVS 3601.03: Global Biogeochemical Cycles.**

An interdisciplinary class that examines example global cycles of water, carbon, nitrogen, phosphorus, and sulphur, and human impacts on these cycles, as manifested in our atmospheric, soil, ocean and freshwater environments. This class involves discussion of the latest developments in this rapidly changing field and will provide a framework for those interested in global change.

INSTRUCTOR(S): S. Sterling

PREREQUISITE: An introductory Chemistry class and one of ENVS 1000.06,

SUST 1001.06, EARTH 1080.03, or EARTH 1090.03

CROSS-LISTING: EARTH 3601.03

**ENVS 3615.03: Methods in Ecology.**

See class description for BIOL 3615 in the Biology section of the calendar.

**ENVS 3623.03: Applied Coastal Ecology.**

See class description for BIOL 3623 in the Biology section of the calendar.

**ENVS 3624.03: Urban Freshwater Systems.**

See class description for BIOL 3624 in the Biology section of the calendar.

**ENVS 3632.03: Applied Field Methods in Fish Ecology.**

See class description for BIOL 3632 in the Biology section of the calendar.

FORMAT: Field intensive. Lecture and lab.

**ENVS 3633.03: Spatial Information and GIS in Ecology.**

A hands-on approach to understanding and using spatial information, this class introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address and applied problem in ecology.

NOTE: Offered in the summer through DEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

INSTRUCTOR(S): Field intensive, labs, lectures

PREREQUISITE: BIOL 2060.03

CROSS-LISTING: BIOL 3633.03, GEOG 3633.03

**ENVS 3664.03: Intertidal Ecology and Diversity.**

See class description for BIOL 3664 in the Biology section of the calendar.

**ENVS 3801.03: Directed Readings in Environmental Science.**

This class is intended for third and fourth-year students who wish to study in an area of environmental science not covered in other classes offered at the university. It involves independent study supervised by a faculty member. Class content and marking scheme must be approved by the Director of Environmental Programs during the first week of the academic term in which the credit is being sought. It is the student's responsibility to consult with Environmental Programs at least 2 weeks prior to the term in which the Directed Readings course will take place.

INSTRUCTOR(S): S. Gass

PREREQUISITE: ENVS 1000X/Y.06 or ENVS 2001.03 and third year student status.

**ENVS 4001.03: Environmental Impact Assessment.**

This class provides an opportunity to explore all aspects of environmental impact assessment (EIA) as practiced in Canada and in other countries. The class traces the development of EIA over the past 30 years and critically examines the scientific, procedural and political dimensions.

NOTE: All students taking BIOL 4001.03 or ENVS 4001.03 must have completed 90 credits and be in their fourth year of study or have permission of instructor.

INSTRUCTOR(S): P. Lane

FORMAT: Lecture 3 hours and lab 3 hours (winter only)

PREREQUISITE: ENVS 1000X/Y.06 or BIOL 2060.03 or EARTH 2410.03 or

GEOG 2100X/Y.06 or GEOG 2201.03 or GEOG 2202.03 or INTD 2001.03 or

INTD 2002.03 or OCEA 2000X/Y.06 (or OCEA 2001.03 and OCEA 2002.03)

or SUST 2000.06 or SUST 2001.06.

CROSS-LISTING: ENVE 4772.03 (winter session only), BIOL 4001.03

**ENVS 4002.03: The Science of Wetland Ecosystems.**

An interdisciplinary introduction to wetland ecosystems, with emphasis on the relationship between wetlands and the surrounding watershed. This relationship determines wetland type, function and in developed landscapes, wetland health. Inversely, wetland type, function and health can affect the developed landscapes. Students will gain an appreciation of the physical relationship through an examination of wetland hydrology, chemical cycling, and ecology. Management of wetlands in the landscape through policy and engineering will also be studied.

FORMAT: Lecture

PREREQUISITE: CHEM 1011.03/1012.03 or CHEM 1021.03/1022.03 and BIOL 2060.03

CROSS-LISTING: BIOL 4002.03

**ENVS 4210.03: Environmental Law: Natural Justice and Unnatural Acts.**

Environmental Science in Canada is largely defined by statutes and regulations.

The class will consider administrative processes, the role of legislation, the function of administrative boards and tribunals and the general principles of judicial review. Offered every odd winter term.

INSTRUCTOR(S): P. Mushkat

FORMAT: Lecture 3 hours

PREREQUISITE: ENVS 3200.03 with a grade of A-

**ENVS 4220.03: International Environmental Law for Scientists.**

The problems posed by environmental issues are global requiring solutions that are only achievable through multi-lateral collaboration. Over 20 years, there has been an explosion of international agreements intended to either redress or avoid environmental disasters. Some of these are based on sound science, some on politics. How do these two elements mix at the international level? Can international law accommodate the inherent uncertainty in scientific hypotheses? Offered every even winter term.

INSTRUCTOR(S): P. Mushkat

FORMAT: Lecture/seminar

PREREQUISITE: ENVS 3200.03 with a grade of A-

EXCLUSION: ENVS 3220.03

**ENVS 4901.03: Honours Thesis Part A.**

Mastery of the basic skills of problem definition, proposal preparation and project implementation is the key to dealing with a wide range of "real-life" situations, both on and off the career path. Includes lectures and tutorials on proposal writing, research design and methodologies, and an independent environmental science research project carried out under the supervision of an approved faculty member. Required for Honours Environmental Science.

INSTRUCTOR(S): S. Sterling

FORMAT: Lecture/seminar

PREREQUISITE: Fourth year Environmental Science and permission of Instructor/Director

**ENVS 4902.03: Honours Thesis Project Part B.**

Independent research project carried out under the supervision of an approved faculty member or affiliated research scientists.

Required for Honours Environmental Science.

INSTRUCTOR(S): S. Sterling

FORMAT: Independent research

PREREQUISITE: ENVS 4901.03

### ENVS 4950.03: Advanced Topics in Environmental Science.

This class will address current interdisciplinary issues in environmental science with topics varying each semester. Details as to the content of the class will be announced by Environmental Programs at least one month in advance of the course offering. The course will be taught by Dalhousie faculty, and/or visiting scholars.

FORMAT: Lecture/seminar

PREREQUISITE: This class is restricted to students in the Honours/Major/Double Major in Environmental Science, or permission of the Director of Environmental Programs.

### IV. Co-op Workterms

Each workterm is a pre-requisite of the succeeding workterm. See Environmental Programs Co-op Academic Advisor for details.

**ENVS 8891.00: Co-op Workterm 1.**

**ENVS 8892.00: Co-op Workterm 2.**

**ENVS 8893.00: Co-op Workterm 3.**

**ENVS 8894.00: Co-op Workterm 4. (optional)**

## Environment, Sustainability and Society

---

Location:	College of Sustainability
Telephone:	(902) 494-4581
Fax:	(902) 494-8923
Email:	sustainability@dal.ca
Website:	www.ess.dal.ca

### I. Degree Programs

The College of Sustainability offers a BSc Double Major and Combined Honours with any major/honours subject in the Faculty of Science and the Faculty of Computer Science. For complete details about the College, its programs and classes please see the College of Sustainability section on page 44 of the Calendar.

#### BSc, Double Major/Combined Honours, Environment, Sustainability and Society

##### i. *Environment, Sustainability and Society as Subject A*

###### Subject A: Environment, Sustainability and Society

- SUST 1000.06 (one full credit in fall term)
- SUST 1001.06 (one full credit in winter term)
- SUST 2000.06 (one full credit in fall term)
- SUST 2001.06 (one full credit in winter term)
- SUST 3000.03
- SUST 3502.03
- SUST 4000.06
- three full credits from the approved list (at least two credits outside subject B)

Additional requirements for Combined Honours:

- SUST 4900.06
- Cumulative GPA in Honours subject classes above 1000 level of 3.3, with no individual grade less than C

###### Subject B: Any Major/Honours subject in the Faculty of Science

For detailed requirements please consult the calendar and academic advisor for your allied subject.

##### ii. *Environment, Sustainability and Society as Subject B*

###### Subject A: Any Major/Honours subject in the Faculty of Science or the Faculty of Computer Science

For detailed requirements please consult the calendar and academic advisor for your allied subject.

Additional requirements for Combined Honours: Must comply with Honours requirements for Subject A.

###### Subject B: Environment, Sustainability and Society

- SUST 1000.06 (one full credit in fall term)
- SUST 1001.06 (one full credit in winter term)
- SUST 2000.06 or SUST 2001.06
- three full credits from the approved list (at least two credits outside subject A and at least two credits above 2000 level)

# Food Science

## I. Minor in Food Science for BSc Major or Honours

The Minor in Food Science is available to students registered in the BSc 20 Credit Major and Honours programs.

## II. Requirements

The requirements are as for the appropriate program with the completion of the following classes to fulfill the Food Science Minor:

- FOSC 1000.03: Concepts in Food Science
- Eight classes from the following list:
  - BIOE 3051.03: Principles of Food Engineering
  - BIOE 3241.03: Industrial Biotechnology
  - CPST 2000.03: Technical Communication
  - CPST 3030.03: Engineering in Society II
  - ENVE 3000.03: Fundamentals of Environmental Engineering
  - FOSC 2010.03: Food Commodities
  - FOSC 3010.03: Food Chemistry
  - FOSC 3020.03: Food Analysis
  - FOSC 3030.03: Food Quality Assurance
  - FOSC 3070.03: Food Processing
  - FOSC 3080.03: Food Microbiology
  - FOSC 4020.03: Chemistry - Fats, Oils, Lipids
  - FOSC 4030.03: Food Product Development
  - FOSC 4081.03: Brewing Science
  - FOSC 4091.03: Food Safety and Biotechnology
  - FOSC 4500.03: Seminar in Food Science
  - FOSC 4250.03: Food Product Development Project
  - HPRO 2250.03: Interdisciplinary Class in Human Nutrition
  - Other electives as approved by the Food Science Coordinator

# Geography

Location: School of Planning  
5410 Spring Garden Road  
PO Box 15000  
Halifax, NS B3H 4R2  
Telephone: (902) 494-3260  
Fax: (902) 423-6672  
Website: <http://archplan.dal.ca/planning>

There is no degree in Geography at Dalhousie University, however, it is possible to do a Minor in Geography through the Faculty of Science, Faculty of Arts and Social Science, and Faculty of Architecture and Planning. Classes in geography may be taken by students in any program, and if cross-listed with science courses, may be used to meet the life or physical science subject requirement of a BA degree. Similarly, classes in geography cross-listed in the Faculty of Arts and Social Sciences may be used to meet the Social Sciences and Humanities requirement of a BSc degree.

Geography at Dalhousie University is overseen by the Faculties of Architecture and Planning, Arts and Social Sciences and Science, and each Faculty has a Geography Coordinator.

## Deans

Macy, C., BA (Arch) (Calif. At Berkeley), MArch (MIT)  
Moore, C., BA (Hons), PhD (Cambridge) Professor, Psychology  
Summerby-Murray, R., ATCL Dip (Trinity College, London), BA, MA (Canterbury), PhD (Toronto)

## Geography Coordinators

Architecture and Planning: Manuel, P., BA (Carleton), MSc (McGill), PhD (Dalhousie), MCIP, LPP ([patricia.manuel@dal.ca](mailto:patricia.manuel@dal.ca))

Arts and Social Sciences: Sommerby-Murray, R., ARCL Dip (Trinity College, London, BA, MA (Canterbury), PhD (Toronto) ([fassdean@dal.ca](mailto:fassdean@dal.ca))

Science: Ryan, A. M., BSc (Univ College Dublin), MSc, BEd (Acadia), MEd (MSVU), PhD (Dalhousie) ([amryan@dal.ca](mailto:amryan@dal.ca))

## I. Minor in Geography

The minor in Geography is available to students registered in the BA, BSc or BCD (20 credit) degree programs. To fulfill the requirements for a Minor in Geography, students must complete the following:

- GEOG 1030.03: Introduction to Physical Geography (cross-listing EARTH 1030.03)
- GEOG 1035.03: Introduction to Human Geography
- GEOG 2000.03: Cartography

Additional seven half credits from the following list: at least four of which must be at the 3000 level or higher.

**NOTE: Students in the BCD program may not select PLAN cross-listed courses that are required courses for their degree program**

- GEOG 2001.03: Landscape analysis (cross-listing: PLAN 2001.03)
- GEOG 2006.03: Space, Place, and Geographic Information Systems (cross-listing: PLAN 2006.03)
- GEOG 2070.03: Area Studies on Mexico and Central America (cross-listing HIST 2070.03)
- GEOG 2100X/Y.06: Environment and Culture (cross-listing: SOSA 2100.06)
- GEOG 2201.03: Introduction to Development (cross-listing: INTD 2001.03)
- GEOG 2202.03: Introduction to Development II (cross-listing INTD 2002.03)
- GEOG 2206.03: Africa: An Introduction (cross-listing INTD 2106.03)
- GEOG 2336.03: Regional Development (cross-listing ECON 2336.03)
- GEOG 2800.03: Climate Change (cross-listing PHYC 2800.03)
- GEOG 3001.03: Landscape Ecology (cross-listing PLAN 3001.03)
- GEOG 3002.03: Reading the City (cross-listing PLAN 3002.03)

- GEOG 3005.03: Cities and the Environment (cross-listing PLAN 3005.03)
- GEOG 3006.03: Reading the Landscape (cross-listing PLAN 3006.03)
- GEOG 3110.03: Migration and Development (cross-listing INTD 3110.03)
- GEOG 3114.03: Environment and Development (cross-listing INTD 3114.03)
- GEOG 3165.03: Peoples and Cultures of the World: Selected Area Studies (cross-listing SOSA 3165)
- GEOG 3210.03: Canadian Cultural Landscapes (cross-listing HIST 3210.03 and CANA 3020.03)
- GEOG 3220.03: Coastal Communities in the North Atlantic (cross-listing SOSA 3220.03)
- GEOG 3284.03: Living in cities (cross-listing SOSA 3284.03)
- GEOG 3370.03: North American Landscapes (cross-listing HIST 3370.03)
- GEOG 3400.03: Human Health and Sustainability (cross-listing ENVS 3400.03)
- GEOG 3440.03: Geomorphology (cross-listing EARTH 3440)
- GEOG 3500.03: Exploring Geographic Information Systems (cross-listing EARTH 3500, ENVS 3500, EARTH 5600)
- GEOG 3633.03: Spatial Information and GIS in Ecology (cross-listing ENVS 3633.03, BIOL 3633.03)
- GEOG 4440.03: Geomorphology and Landscape Evolution (cross-listing EARTH 4440.03)
- GEOG 4450.03: Introduction to Landscape Simulation (cross-listing EARTH 4450.03)
- GEOG 4520.03: GIS Applications to Environmental and Geological Sciences (cross-listing EARTH 4520.03)
- GEOG 4530.03: Environmental Remote Sensing (cross-listing EARTH 4530.03)

## II. Class Descriptions

### GEOG 1030.03: Introduction to Physical Geography.

This non-lab science course examines the nature of weather and climate, earth's surface features and processes, and internal processes that contribute to landform development. An integral component of the course is an exploration of the representation and interpretation of physical geographic data through the examination of a variety of maps.

NOTE: There are no pre-requisites for this course and students may take this class in addition to any other first year Earth Sciences class.

INSTRUCTOR(S): A.M. Ryan, L. Plug

FORMAT: Lecture-class 3 hours each week, and 1 hour tutorial weekly. Some classes may include map work

CROSS-LISTING: EARTH 1030.03

### GEOG 1035.03: Introduction to Human Geography.

Human geography examines the ways that people perceive, use, and alter the landscapes they occupy. Two themes run throughout the class. One theme deals with the aspects of culture that characterize different social groups. These are matters of material culture as well as group behaviour, and belief systems. The second theme has to do with the systems of production, livelihood, spatial organization, and administration that societies erect. Interwoven with these themes is the interaction of human societies with each other and their environments. The class introduces the principal tools of human geographers: maps, demography, and analysis of cultural patterns.

NOTE: This class cannot be used to meet the life or physical science subject requirement for the BA degree.

INSTRUCTOR(S): J. Boxall

FORMAT: Lecture 3 hours

### GEOG 1060.03: Earthquakes, Volcanoes and Natural Disasters.

Earthquakes, meteorite impacts, rapid climate change, volcanic eruptions, hurricanes, landslides, solar flares, and floods are natural disasters that affect our economy, public policy, and safety. Where, why and how frequently do natural disasters occur? Are predictions possible? Are media portrayals of risk and damage realistic? This course, aimed at the nonspecialist, investigates these intriguing questions. Excerpts of "disaster films", in conjunction with lectures and discussions are used to identify the causes, consequences and sometimes erroneous perceptions of natural hazards. Examples from Atlantic Canada and contemporary disasters are used to assess local risk and real-time events worldwide.

INSTRUCTOR(S): J. Gosse

FORMAT: Lecture 3 hours

CROSS-LISTING: EARTH 1060.03

### GEOG 2000.03: Cartography.

Maps, which are visual representations of our world, are essential aids to disciplines that span archaeology to zoology. Navigation is the art and science of finding one's way through both natural and built landscapes. This class primarily uses hands-on assignments to investigate how maps are constructed and interpreted (including concepts of spatial reference systems, scale, projections, symbols, and design), how maps can distort perceptions, and can influence one's decisions. Students also study navigation by compass, global positioning systems (GPS), and dead-reckoning.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours plus occasional field trips as appropriate

PREREQUISITE: EARTH/GEOG 1030, or EARTH 1080

### GEOG 2001.03: Landscape Analysis.

Designers and planners need to understand the influence of physical, biological, and cultural systems in landscape evolution, and the relevance of that information in analyzing land capability. Students develop inventory and analysis tools for understanding environmental processes and their implications for design and planning. There will be field trips and a lab component.

INSTRUCTOR(S): P. Manuel

FORMAT: Lecture/lab 3 or 4 hours

PREREQUISITE: EARTH 1030.03

CROSS-LISTING: PLAN 2001.03

### GEOG 2006.03: Space, Place and Geographic Information Systems.

Planners use Geographical Information systems (GIS) for data collection, coordination, and analysis. Properly interpreted, GIS data contribute to informed decision-making. This course explores the application of GIS in planning within a project-centred setting. Students learn to use GIS to address and use and site planning issues. The course also considers mapping standards used within the field of planning, and examines legal, privacy, and ethical implications of using GIS data in the public realm.

INSTRUCTOR(S): Rapoport, E.

FORMAT: Lectures/labs. Three hours weekly

PREREQUISITE: PLAN/GEOG 2001

CROSS-LISTING: GEOG 2006.03

### GEOG 2070.03: Area Studies on Mexico and Central America.

Following an examination of the indigenous heritage, and the colonial legacy of the conquistadors, the class deals principally with the contemporary period, examining the Mexican Revolution and its aftermath, the Somoza dynasty, Nicaragua under the Sandinistas, the U.S. role in the region, the human rights situation in Central America, and probable developments in the region. The class is designed to provide an understanding of the contemporary reality of this volatile region, in many ways a microcosm of the crucial situation of Latin America as a whole.

INSTRUCTOR(S): J. Kirk

FORMAT: Lecture/discussion 2 hours/conducted in English

PREREQUISITE: No prerequisites. Open to students in all departments. No

knowledge of Spanish necessary

CROSS-LISTING: HIST 2383.03

### GEOG 2100X/Y.06: Environment and Culture.

Concern about the environment is a widespread phenomenon as virtually everyone is confronted by environmental issues -- be they global warming, the depletion of the ozone layer or the continuing problems of water pollution and solid waste disposal. Furthermore, we are becoming increasingly aware of that environmental issues often have global implications. The efforts of cities in Canada to deal with environmental pollution, for example, may lead to conflicts with rural regions. Similarly, rural regions, in their use of various chemical agents, may find themselves affecting the lives of city dwellers. This class will explore key relationships between human culture and the physical environment. Topics to be examined include: historical, social, and legal aspects of contemporary environmentalism, food and agriculture, environmental ethics, health, traditional ecological knowledge, sustainable forestry, waste management, public participation and environmental movements.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, SOSA 1050X/Y.06, SOSA 1100X/Y.06, SOSA 1200 X/Y.06

CROSS-LISTING: SOSA 2100.06

### **GEOG 2201.03: Introduction to Development I.**

Poverty, inequality and injustice are widespread throughout the contemporary developing world. This course will examine how this situation came to be. It begins by analyzing the different meanings of the term "development" and then examines the major approaches that have shaped practical development initiatives on the ground in the Global South over the past 60 years. The course also examines the legacies of history for contemporary development efforts in the Global South through specific case studies.

FORMAT: Lectures/ tutorial

PREREQUISITE: Completion of five full credits at the 1000 level or permission of the instructor

CROSS-LISTING: INTD 2001.03

### **GEOG 2202.03: Introduction to Development II.**

This course builds upon the core concepts and approaches studied in INTD 2001 (i.e. different theoretical approaches to development and the historical creation of underdevelopment). The course examines key contemporary issues in the field of development and analyses the connections between them: debt, global trade rules, foreign aid, hunger and malnutrition, rural and urban livelihoods, population growth. The course also examines the principle actors involved in development and the strategies they have used to promote and resist development, including: governments, non-governmental organizations (NGOs), the World Bank and IMF, and popular social movements in the Global South and North.

FORMAT: Lectures/tutorial

PREREQUISITE: Completion of five credits at the 1000 level or permission of the instructor

CROSS-LISTING: INTD 2002.03

### **GEOG 2206.03: Africa: An Introduction.**

This course will focus on contemporary Africa. Stereotypical portrayals of Africa will be examined and critiqued with the goal of emphasizing the immensity, diversity and complexity of the continent in order to better understand the opportunities and challenges of African development in the twenty-first century.

FORMAT: Lecture/tutorials

CROSS-LISTING: INTD 2106.03

### **GEOG 2336.03: Regional Development.**

Most countries have richer and poorer regions. Economic development issues, policies, and theories facing more industrialized nations are analyzed with particular focus on Canada (especially the Atlantic region), the European Economic Community, U.S.A., Japan, and Australia. Approved with Canadian Studies. In addition to the prerequisites, the student is advised to take one class in Political Science and one class in Canadian History before taking ECON 3336.

FORMAT: Seminar 2.5 hours/tutorials

PREREQUISITE: ECON 1101.03 and 1102.03

CROSS-LISTING: ECON 2336.03

### **GEOG 2800.03: Climate Change.**

Most models of the atmosphere predict that increasing concentrations of greenhouse gases will continue to warm the surface of the earth and the oceans in the twenty-first century. The magnitude of the warming and its consequences are still very controversial. This class will discuss, mainly from a nonmathematical viewpoint, the reasons for the greenhouse effect, the current warming in the context of the historical record of climate change, and sources of natural climate variability such as the El Nino Southern Oscillation. It will also review arguments that attribute the warming that has occurred in the Twentieth century to natural variability, and those that attribute the warming to increased human emission of greenhouse gases.

INSTRUCTOR(S): G. Lesins

FORMAT: 3 hours

CROSS-LISTING: PHYC 2800.03

EXCLUSION: ECON2850.06, PHYC2850.06

### **GEOG 3001.03: Landscape Ecology.**

Landscapes reflect the interaction of natural and cultural processes. This course introduces the principles of ecology to landscape analysis. It explores relationships between environmental components in the landscape to inform community design and land use planning applications.

INSTRUCTOR(S): P. Manuel

FORMAT: Lecture/lab 3 or 4 hours

PREREQUISITE: PLAN 2001.03 or GEOG 2001.03 or permission of the instructor

CROSS-LISTING: PLAN 3001.03

### **GEOG 3002.03: Reading the City.**

Any city reflects the history of its topography, cultural traditions, and design interventions. This course introduces the principles, theories, and methods of urban form analysis in the local urban context. Students explore the local urban environment to interpret what the city means, and how it comes to take the shape it does.

INSTRUCTOR(S): S. Guppy

FORMAT: Lecture/lab 3 or 4 hours

CROSS-LISTING: PLAN 3002.03

### **GEOG 3005.03: Cities and the Environment.**

The contemporary landscape reflects a long history of human activities on the land and design and planning interventions through time. Civilizations rise and fall, often because of their degradation of the ecosystems that support them. This course examines the relationship of cities with the environment to enhance our understanding of landscape change, urban form and patterns in human settlements through the ages.

INSTRUCTOR(S): J. Grant

FORMAT: Lecture/seminar 3 hours

CROSS-LISTING: PLAN 3005.03

### **GEOG 3006.03: Reading the Landscape.**

Any landscape reflects its natural and cultural history. This course explores principles, theories, and methods of landscape interpretation. These approaches will be applied to community design problems in local landscapes.

INSTRUCTOR(S): S. Guppy

FORMAT: Lecture/lab 3 or 4 hours

PREREQUISITE: PLAN 3001.03, 3002.03, or GEOG 3001.03, 3002.03

CROSS-LISTING: PLAN 3006.03

### **GEOG 3110.03: Migration and Development.**

The purpose of this course is to explore and better understand the connections between migration and development in contemporary societies. Classes will introduce or further explore one main theme or issue, such as development-induced displacement, labour migration, and HIV/AIDS and migration. Each class will centre on one or more discussion questions, exchange insights from relevant experiences of class participants or focus on a case study

FORMAT: Lecture/seminar

CROSS-LISTING: INTD 3110.03

### **GEOG 3114.03: Environment and Development.**

This course will examine the interconnections between the natural environment and different forms of social and economic development with a specific focus on developing countries. Various perspectives will be used to analyze the links between environmental issues and poverty, inequality, wealth, economic globalization and the ways in which different cultures understand and interact with the environment.

FORMAT: Lecture/seminar

CROSS-LISTING: INTD 3114.03

### **GEOG 3165.03: Peoples and Cultures of the World: Selected Area Studies.**

This class examines a specific geographic and/or culture area. The class begins with background material on geography and history. Its focus is on the people themselves, their social organization and political, economic, and cultural systems. How they relate to globalization and development will also be examined. Consult the Department to find which region is to be covered in a particular year. Approved with International Development Studies.

FORMAT: Lecture

PREREQUISITE: SOSA 1000X/Y.06; 1050X/Y.06; 1100X/Y.06; 1200X/Y.06

CROSS-LISTING: SOSA 3165.03

EXCLUSION: SOSA 2370.03

### **GEOG 3210.03: Canadian Cultural Landscapes.**

This course explores the origins of one "signature" landscape in each province. Contact with different geographies shaped distinctive regional histories; but at the same time, the story of each place is tied to the national narrative. These landscapes also illuminate how nature has been understood, used, and transformed since the fifteenth century.

INSTRUCTOR(S): C. Campbell

FORMAT: Lecture and Discussion

CROSS-LISTING: HIST 3210.03, CANA 3020.03

### **GEOG 3220.03: Coastal Communities in the North Atlantic.**

Coastal communities as a social/ecological type are examined as populations, and social structures (territorial, economic, occupational, political) as they have developed in response to particular ecological and social circumstances. Various perspectives which have been applied to coastal communities are examined with regard to the contribution they may make to understanding the dynamics of these communities. The focus is on North Atlantic communities.

FORMAT: Lecture

PREREQUISITE: One of SOSA 1000X/Y.06, 1050X/Y.06, 1100X/Y.06 or 1200X/Y.06

CROSS-LISTING: SOSA 3220.03

### **GEOG 3284.03: Living in Cities.**

2008 marked the first time in history that more of the global population lived in cities than in rural areas. What perspectives to anthropology and sociology offer on cities and their inhabitants? This course explores the social dynamics that constitute 'the city' and surveys how social scientists have studied and engaged with cities and city-dwellers. It approached 'the city' both as a whole and through its constituent parts: people landplaces. Examples may be drawn from cities large and small, near and far - including Halifax.

INSTRUCTOR(S): M. Radice

FORMAT: Lecture and Seminar

PREREQUISITE: One of SOSA 1000.06, SOSA 1050.06, SOSA 1100.06 SOSA 1200.06 FYP or PLAN 2005.06

CROSS-LISTING: SOSA 3284.03

### **GEOG 3370.03: North American Landscapes.**

Landscapes are the product of human culture ordering nature for economic, social, political, religious, recreational, and artistic purposes. Landscape history analyzes and interprets the use and design of such features as fields and woodlands, roads and waterways, settlements and buildings, towns and suburbs, and parks and cities. This class examines the use and meaning of the spatial environment among the various societies in North America from the sixteenth to the twentieth centuries. Among the topics are the meaning of area resources for indigenous peoples, the occupation and settlement of colonial populations, transportation and continental expansion, town planning, the politics of water and land in the West, preservation movements, scenic tourism, and the literary and artistic stylization of landscapes. The class welcomes non-history students with an interdisciplinary interest in issues regarding planning and design, cultural ecology, and the governance of resources.

INSTRUCTOR(S): C. Campbell

FORMAT: Lecture/discussion 3 hours

CROSS-LISTING: HIST 3370.03

### **GEOG 3400.03: Human Health and Sustainability.**

This course examines the relationships between the health of populations and health determinants in the context of environmental sustainability. Weekly laboratory exercises will teach students how geomatics (GIS, GPS, and remote sensing technologies) and epidemiological tools can be used to assess the links between the health of human populations and the health of the environment, and how to use these tools for environmental health research.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3.0 hours, Lab 1.5 hours

PREREQUISITE: Must be a third year student or have permission of instructor

CROSS-LISTING: ENVS 3400.03

### **GEOG 3440.03: Geomorphology.**

Geomorphology is the quantitative study of Earth's surface processes and landforms applies to geology, civil engineering, hydrogeology, and environmental management. We investigate slope stability, weathering and soils, sediment production, wind-driven and coastal environments, tectonic landforms, and river, glacial and permafrost processes.

INSTRUCTOR(S): L. Plug, J. Gosse

FORMAT: Lecture 3 hours, lab 3 hours including mandatory field trips

PREREQUISITE: EARTH 1080 and one other 1st year EARTH course; 1090 recommended; or SCIE 1502.21, or 1503.21, or SCIE 1504.27, or SCIE 1510.33 or permission of the instructor AND completion or concurrent enrollment of a 1000-level mathematics class, a 1000-level physics class, and a 1000-level chemistry class.

CROSS-LISTING: EARTH 3440.03

### **GEOG 3500.03: Exploring Geographic Information Systems.**

Geographic Information Systems (GIS), as a tool for the management of georeferenced data, have become indispensable for disciplines where location of objects and pattern of processes is important. GIS plays a significant role a wide range of applications, from modeling, to analysis and predictions, to decision making. The class is aimed at a broad base of potential users and draws on examples of the role of GIS in global climate change, mineral exploration, preservation of biodiversity, coastal zone management, resource depletion, and many other present and future environmental issues. The course material will be of interest to those studying geoscience, environmental science, ecology, marine biology, oceanography, epidemiology, urban and rural planning, civil engineering, and any other field involving spatial data.

Laboratory exercises emphasize the principles of raster and vector GIS, and the integration of databases and GPS (global positioning systems) data into GIS.

Exercises draw on the diversity of GIS applications in a number of application areas.

INSTRUCTOR(S): C. Walls

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: Two years of university study or equivalent or instructor's permission

CROSS-LISTING: EARTH 3500, EARTH 5600, ENVS 3500

EXCLUSION: Credit will only be given for one of GEOG 3500, SCIE 3600, EARTH 3500, EARTH 5600, ENVS 3500

### **GEOG 3633.03: Spatial Information and GIS in Ecology.**

A hands-on approach to understanding and using spatial information, this class introduces students to Geographic Information Systems (GIS) as a tool to answer ecological questions. Together, students conduct a major field project, collecting data, creating maps using GIS, and interpreting spatial patterns, to address and applied problem in ecology.

NOTE: Offered in the summer through DEASIDE. an auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see [seaside.science.dal.ca](http://seaside.science.dal.ca).

INSTRUCTOR(S): Field intensive, labs, lectures

PREREQUISITE: BIOL 2060.03

CROSS-LISTING: ENVS 3633.03, BIOL 3633.03

### **GEOG 4440.03: Geomorphology and Landscape Evolution.**

Ripple-to mountain range-scale landforms evolve under predictable internal and external forces that are modulated by the physical and chemical properties of the rock. The purpose of this course is to provide a thorough examination of the development of landscapes by tectonics and surficial processes involving weathering, mass wasting, streams, and glaciers. The concepts of equilibria, climate and vegetation change, and rock character are recurring themes throughout the course. Dating and thermochronology methods are discussed in the context of rates of landscape change. Early classic viewpoints of landform development are contrasted with the latest numerical simulations of landscape evolution. The labs are mostly field-oriented with emphasis on Quaternary stratigraphy, describing and interpreting soils, local geomorphology, and geomorphometrics.

INSTRUCTOR(S): J. Gosse

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: EARTH 1080 and one other 1st year EARTH course; 1090 recommended. Must be a 4th year Science student familiar with excel, or with instructor's permission

CROSS-LISTING: EARTH 4440.03

### **GEOG 4450.03: Introduction to Landscape Simulation.**

We examine different approaches to numerical modelling of earth-surface processes such as erosion and landslides, melting permafrost, and braided rivers. Using class and/or individual projects as examples, the selection of variables, sensitivity testing, and methods for testing models against nature are discussed. We use Matlab; programming experience is useful but not essential.

INSTRUCTOR(S): L. Plug

FORMAT: Lecture 3 hours, lab

PREREQUISITE: EARTH 3440.03, MATH 1010 or 1400, PHYC 1280.03/1290.03X/Y and three courses at the 3000-level in the physical sciences (chemistry, earth science, physics) or with consent of instructor

CROSS-LISTING: EARTH 4450

### **GEOG 4520.03: GIS Applications to Environmental and Geological Sciences.**

Note: This class is not offered every year. Please consult department in the spring for further information.

Geographic information systems (GIS) provide a rich set of new tools to the geologist and environmental scientist, not only to solve conventional problems, but also to explore questions not readily answered by other means. This class builds on the fundamentals of GIS taught in EARTH 3500.03 to explore analytical tools that aid in decision-making processes encountered in mineral exploration, hydrogeology, site selection, environmental assessment, and global change analysis. The class concentrates on case studies and problem solving, including those requiring multi-criteria and multi-objective decision making processes.

INSTRUCTOR(S): C. Walls

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: GEOG 3500.03, ENVS 3500, EARTH 3500.03; EARTH 5600, or SCIE 3600.03; STAT 1060.03

CROSS-LISTING: EARTH 4520.03

### **GEOG 4530.03: Environmental Remote Sensing.**

The goal of this class is to introduce students to the role of remote sensing as a technique provide environmental and geologic information. Particular emphasis will be placed on examining the potential and limitations of remote sensing methods and data in this context. The lectures discuss the fundamentals of remote sensing with an emphasis on multi-spectral satellite systems. In the lab, students use computerized techniques of digital image enhancement and thematic information extraction to process images derived from optical, radar, and hyperspectral remote-sensing systems. The integration of remote-sensing information with GIS (Geographic Information Systems) is stressed in both the labs and lectures.

INSTRUCTOR(S): C. Walls

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: EARTH 3500.03, ENVS 3500.03, or EARTH 5600.03 or SCIE 3600.03 or GEOG 3500.03

CROSS-LISTING: EARTH 4530.03

## **Humanistic Studies in Science**

Attention is drawn to the following classes, offered in several departments. All of these classes are concerned with the humanistic aspects of scientific thought and its development. For complete class descriptions please consult the appropriate department listing in this calendar.

NOTE: Not all classes are offered every year. Please consult the current timetable for this year's offerings.

### **History of the Sciences**

- BIOL 3503.06, HSTC 2200.06, SCIE 2000.06: Introduction to the History of Science
- BIOL 4664.03/OCEA 4331.03/SCIE 4001.03/HIST 3073.03/HSTC 3331.03: History of Marine Sciences

### **Philosophy of the Sciences**

- PHIL 3420.03, BIOL 3580.03: Philosophy of Biology
- PHIL 2560.03: Minds & Machines: Introduction to cognitive Science
- PHIL 2660.03 Logic: Understanding Scientific Reasoning
- BIOL 3601.03: Nature Conservation
- PHIL 2130.03: Logic
- PHIL 3051.03: Epistemology
- PHIL 3670.03: Philosophy of Science

# Integrated Science Program

This program is under review. Please contact the Registrar's Office for more information.

Location: (See below for locations of the offices of the  
Director, Student Coordinator and Secretary.)  
Telephone: (902) 494-2373  
Fax: (902) 494-1123  
Email: disp@dal.ca

## I. Introduction

Dalhousie's Integrated Science Program is an alternative and unique way for a serious, well-prepared student to complete the first year of a BSc. In addition to learning the core material of several first-year science subjects, students gain an interdisciplinary perspective, develop transferable skills, and conduct research, all in their first year. The goals of the program are:

1. To introduce students to scientific methodology.
2. To provide sufficient background in the core of scientific knowledge to enter second-year classes.
3. To point out the interrelationships among the science disciplines.
4. To indicate how the history and philosophy of scientific thought helps us to understand science.
5. To indicate the relevance of science in students' lives and the links between science and society.

This first-year program exposes students to a broader range of science disciplines than is possible in regular classes and does so in an integrated way. Students learn from a team of instructors representing most of the departments in the Faculty of Science at Dalhousie University. Instructors meet weekly to coordinate their teaching efforts and track learning outcomes. While teaching the material from regular first-year science classes, Integrated Science instructors highlight the

natural links among their disciplines and help students to apply the scientific method and quantitative techniques to questions and problems across the sciences.

Integrated Science teaches components that are equivalent to regular first-year science classes in a given subject. As members of a small cohort (70-80 BSc students), Integrated Science students take all of their classes together, separate from other BSc students. The class schedule varies each week, to use the time available efficiently for organizing lectures and labs, and to allow flexibility to link particular subjects when appropriate. Most lectures are given in the afternoons and most labs given are in the mornings. For some subjects, students are split into smaller sections for lab activities. For example, students alternate between Biology and Chemistry labs on Friday mornings. The flexible schedule also allows field trips to be scheduled on certain days.

The four Integrated Science options (SCIE 1515.36, SCIE 1520.30, SCIE 1530.27, and SCIE 1540.27) provide students with some flexibility in preparing for second year science classes. Each option incorporates a slightly different suite of subjects and is designed to prepare students for a certain range of degree programs at Dalhousie (see Choosing an Integrated Science Option).

Emphasis on scientific research methods and communication skills, along with a broad introduction to science, makes Integrated Science an excellent foundation for an honours program, a combined honours, or a major or a double major in science. Particular options are excellent preparation for certain degree programs, certain professional programs, or a career in Medicine. Integrated Science is a good choice for students who are interested in many sciences but are unsure about a major, for students who want to major in more than one science, and for students who want a broad background in science in order to pursue a career, for example, in biomedical ethics, law, teaching, or scientific journalism.

Students concurrently take PHIL 1050.03 (Ethics in Science), a half-credit humanities class offered only to Integrated Science students. This class provides an introduction to ethical questions that arise in the practice of science and uses examples that link with topics they study in their science classes. Regular instruction, practice, and feedback in writing are integrated across PHIL 1050 and the Writing In Science component of Integrated Science. Students develop scientific writing skills through formal writing assignments in the Biology component in the fall and research project assignments in winter.

Integrated Science candidates should be highly-motivated and have a strong interest in science. They should find the idea of being immersed in science very stimulating; they should want to learn to think across the discipline boundaries as well as to master discipline-specific material at the first-year level; they should be enthusiastic about being part of a small cohort of students intent on learning how to work and think like scientists; they should want to be cooperative and effective team members; they should have good study, work, and time-management skills; and they should welcome challenges to work hard, to think critically, and to solve problems.

Integrated science students will have a heavier workload than regular first-year BSc students. A heavier workload is unavoidable considering the larger number of disciplines studied, the integrated writing class, and the research project component. The workload is managed, however, so students have less work than if taking all of the equivalent components as separate classes. The workload, including assignments and tests, is spread out as evenly as possible through the week and the term. Students should note that the heavier workload is excellent preparation for higher workloads in second year of the BSc. The workload differs among the Integrated Science options, with SCIE 1515 having the highest workload and SCIE 1540 having a more normal workload.

Students wishing to enter this program normally must have a minimum Grade 12 average of 80%, with a minimum of 80% in Calculus or Pre-calculus and 75% English, and a minimum of 75% in Grade 12 Chemistry. Grade 12 Biology is recommended but not required. The average high school marks of incoming students is around 90%. Students must apply for the program as well as be accepted to the BSc at Dalhousie.

Grade 12 Physics is highly recommended. Applicants lacking an appropriate Physics background should take a university preparatory class, such as PHYC 0010.00 (<http://collegeofcontinuing.dal.ca/>). For other options, please contact the Integrated Science program office or email the program director. Applicants with the equivalent of Grade 12 Physics will have priority.

On their transcripts, students receive a single letter grade for the entire program. A breakdown of marks is provided, upon request, for the purpose of transferring to professional programs or other universities.

During the first term, students may switch between certain options with permission of the Director and the Dean's office.

## II. Choosing an Integrated Science Option

Each option includes a range of subjects, taught either as a full-year (full credit) or half year (half credit) component. Subjects common to all options are Biology, Chemistry, Mathematics, Physics, Statistics, and Writing. Some options are less Physics and Math-intensive, with only a half-credit of each. All options, however, do satisfy the first-year Math requirement for science students. Certain options include one or two terms of Earth Science. Three options include Psychology and these satisfy the Social Science requirement at Dalhousie.

All options satisfy the full-year Writing Class requirement at Dalhousie, through the Writing in Science component and the companion Philosophy class. The latter satisfies *half* of the full-credit Humanities or Language requirement at Dalhousie; this means students will need to take another half-credit of Humanities or Language (note: this does not need to be a writing class) anytime before they graduate with a B.Sc.

### First-year Prerequisites Satisfied by each Option (SCIE 15XX).

All are full-credit (full year) equivalents unless otherwise noted.

First-year equivalent component	Integrated Science SCIE 1515.36	Integrated Biomedical Science SCIE 1520.30	Integrated Physical Science SCIE 1530.27	Integrated Life Science SCIE 1540.27
<b>Biology</b>	BIOL 1010/1011	BIOL 1010/1011	BIOL 1030*	BIOL 1010/1011
<b>Chemistry</b>	CHEM 1011/1012	CHEM 1011/1012	CHEM 1011/1012	CHEM 1011/1012

<b>Humanities</b>	PHIL 1050 *	PHIL 1050 *	PHIL 1050 *	PHIL 1050 *
<b>Number of 1st year credits**</b>	6.5	5.5	5.0	5.0

\* Half-credit components, equivalent to a one-term class.

\*\* Note that students register and pay for one full-credit less than the sum of full-credit components in any option. The rationale is that Integrated Science students spend less time in class and do less work than would a student who took separate classes in all of the different subjects included in an option. They do, however, get the same prerequisites.

The different options incorporate a different suite of subjects and are designed to prepare students for a range of degree programs at Dalhousie. The following table indicates which of the Integrated Science options gives the best preparation for specific programs.

### Recommended Integrated Science options for incoming first-year students:

Dalhousie Science Degree or Professional School Program	Integrated Science 1515.36	Integrated Biomedical Science 1520.30	Integrated Physical Science 1530.27	Integrated Life Science 1540.27

Pharmacy*				+
Physics	+	+	+	
Physiotherapy**	+	+	+	(+)
Psychology	+	+		+
Statistics	+	+	+	

+ recommended option (+) would need to take a second term of physics later

\*\* Graduate-level programs, require undergraduate degree or several years of study.

To prepare for any BSc program, students can take SCIE 1515. Students interested in majoring in *Environmental Science* should take SCIE 1515 or 1540, depending on their particular area of emphasis. In addition to a full-credit Biology component, both include an Earth Science component that allows students to continue in Environmental Science in lieu of taking ENVS 1000.

Students interested in majoring in one or more of the physical sciences (e.g., *Chemistry*, *Physics*, or *Engineering*) or obtaining a joint honours degree with *Oceanography*, should take SCIE 1515 or SCIE 1530. Note that SCIE 1530 includes only a half-credit Biology component, equivalent to Biology for Engineering students.

Students interested in majoring in *Biology*, *Biochemistry and Molecular Biology*, *Microbiology and Immunology*, *Marine Biology*, *Neuroscience*, or *Psychology* will need an option with a full year of biology. Those who want a full year of physics and calculus (e.g., to prepare for Medicine) should take SCIE 1520. Otherwise, they should take SCIE 1540.

The Integrated Science writing class will serve in lieu of ENGL 1000 for entry to Pharmacy.

### III. Class Descriptions

#### SCIE 1515X/Y.36: Integrated Science.

This full-time program provides comprehensive first-year preparation for any science major or honours degree. Concepts and techniques at the first-year introductory level are integrated across Biology, Chemistry, Mathematics, Physics, Earth Science, Psychology, and Statistics. This program is a full credit overload and includes a full-year writing class and a research project.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Writing requirement. Lecture approx. 17 hours/lab and other activities approx. 12 hours/tutorials 4 hours (optional)

PREREQUISITE: Grade 12 Physics. Students lacking this prerequisite should take a university preparation course in Physics, such as PHYC 0010.00 (<http://collegeofcontinuing.dal.ca>) or the equivalent

CROSS-LISTING: BIOL 1010.03/1011.03, CHEM 1011.03/1012.03, EARTH 1080.03/1090.03, MATH 1000.03/1010.03, PHYC 1190.03/1290.03, PSYO 1011.03/1012.03, SCIE 1111.03, and STAT 1060.03

CO-REQUISITE: PHIL 1050.03

#### SCIE 1520X/Y.30: Integrated Biomedical Science.

This full-time program provides comprehensive first-year preparation for major or honours degrees in the life sciences and Medicine, with full-years of physics and calculus. Introductory level concepts and techniques are integrated across Biology, Chemistry, Mathematics, Physics, Psychology, and Statistics, a full-year writing class, and a research project in the winter term.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Writing requirement. Lecture approx. 15 hours/Lab and other activities approx. 8 hours/tutorials 4 hours (optional)

PREREQUISITE: Grade 11 or 12 Physics. Students lacking this prerequisite should take a university preparation course in Physics, such as PHYC 0010.00 (<http://collegeofcontinuing.dal.ca>) or the equivalent

CROSS-LISTING: BIOL 1010.03/1011.03, CHEM 1011.03/1012.03, MATH 1000.03/1010.03, PHYC 1190.03/1290.03, PSYO 1011.03/1012.03, SCIE 1111.03, and STAT 1060.03

CO-REQUISITE: PHIL 1050.03

#### SCIE 1530X/Y.27: Integrated Physical Science.

This full-time program provides comprehensive first-year preparation for any major or honours degree in the physical sciences. Introductory level concepts and techniques are integrated across four full-year components (Chemistry, Mathematics, Physics, Earth Science), two half-year components (Biology and Statistics), a full-year writing class, and a research project in the winter term.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Writing requirement. Lecture approx. 13 hours/Lab and other activities approx. 9 hours/Tutorials 4 hours (optional)

PREREQUISITE: Grade 12 Physics. Students lacking this prerequisite should take a university preparation course in Physics, such as PHYC 0010.00 (<http://collegeofcontinuing.dal.ca>) or the equivalent

CROSS-LISTING: BIOL 1030.03, CHEM 1011.03/1012.03, EARTH 1080.03/1090.03, MATH 1000.03/1010.03, PHYC 1190.03/1290.03, SCIE 1111.03, and STAT 1060.03

CO-REQUISITE: PHIL 1050.03

#### SCIE 1540X/Y.27: Integrated Life Science.

This full-time program provides comprehensive first-year preparation for any major or honours degree in the life sciences. Introductory level concepts and techniques are integrated across three full-year components (Biology, Chemistry, and Psychology), four half-year components (Mathematics, Physics, Earth Science, and Statistics), a full-year writing class, and a research project.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Writing requirement. Lecture approx. 12 hours/Lab and other activities approx. 8 hours/tutorials 2 hours (optional)

PREREQUISITE: Grade 12 Physics. Students lacking this prerequisite should take a university preparation course in Physics, such as PHYC 0010.00 (<http://collegeofcontinuing.dal.ca>) or the equivalent

CROSS-LISTING: BIOL 1010.03/1011.03, CHEM 1011.03/1012.03, EARTH 1080.03/1090.03, MATH 1000.03, PHYC 1190.03, PSYO 1011.03/1012.03, SCIE 1111.03, and STAT 1060.03

CO-REQUISITE: PHIL 1050.03

## I. Introduction

The Marine Biology Program is an integral part of the Biology department at Dalhousie. Students obtain a basic grounding in Biology in their first two years, and use their third and fourth years to study in greater depth the diversity, ecology, physiology, and other aspects of marine animals and plants. Marine Biology students often also take classes in the biology, chemistry or physics of the ocean, offered through the Oceanography department. A Combined Honours in Marine Biology and Oceanography is available. "Ocean studies" is an area of special emphasis for Dalhousie University, and thus many faculty members have active research programs in marine science. In addition, many marine scientists at local research institutions, including the Bedford Institute of Oceanography and the Institute for Marine Biosciences are affiliated with us, and serve as supervisors of our Honours and graduate students. Our students thus participate in research on a broad range of marine-related topics; examples can be viewed on our website.

The Biology department is located adjacent to the sea in the Life Sciences Centre. All eight floors have running sea water, and we have a 15m pool tank and a 10m deep tower tank. Within a 30 km radius there are salt marshes, rocky shores, estuaries, and sand beaches for field work.

We offer Honours and 20 credit major degree programs in both a regular and Co-operative Education format in Marine Biology. The 20 credit major degree prepares students for technical positions in government laboratories, research institutes, scientific consultants, and aquaculture facilities. The Honours degree requires more Marine Biology credits, a GPA of 3.0 or higher, a research project and thesis in the final year, and should be taken by students wishing to continue on to graduate studies. The Co-operative Education degree provides an integrated program of eight academic terms with three to four workterms in industry, government or university laboratories, ecotourism, etc. The workterms, each of four months duration, enable students to apply their knowledge of marine biology while providing them with work experience for making informed career choices. The Co-op degree normally takes four and 1/3 years to complete.

## High School preparation

Students from Canadian high schools are recommended to take the following subjects in high school: Biology, Chemistry, Pre-calculus Math, English, plus Physics (optional) or other acceptable classes (see list in the Admissions section of the undergraduate calendar) and obtain an overall average of 75%, with 65% or higher in English and Math.

## II. Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, page 131 of this calendar.

### A. Co-operative Education BSc (20 credit) Program in Marine Biology, Honours and Major

Co-op Academic Advisor in Marine Biology: N. McAllister-Irwin  
Email: [nancy.mcallister-irwin@dal.ca](mailto:nancy.mcallister-irwin@dal.ca)

Co-operative Education in Science (Science Co-op) is a program where academic study is combined with paid career related work experience. Students alternate three to four workterms throughout their academic study terms and graduate with a Bachelor of Science Co-op. Science Co-op enables students to apply their knowledge directly while providing them with work experience that assists in making educated career choices. Students apply to join Science Co-op typically before their second year of study. If accepted into the Science Co-op program, students are required to register for and attend the Science Co-op Seminar Series (SCIE 2800.00) in the fall term of the year they join.

See the "Co-operative Education in Science" section of this calendar, or <http://www.sciencecoop.dal.ca>, for information on Science Co-op such as Science Co-op requirements, eligibility, how to apply, deadlines and other related information.

### Marine Biology Work-Study Program

Year	Fall	Winter	Summer
1	AT	AT	Free
2	AT	AT	WT1
3	AT	WT2	AT
4	WT3	AT	WT4
5	AT		

AT = Academic Term

WT = Work Term

The academic program and required classes for Co-op students are essentially the same as those for the non Co-op program (listed below). Students in the third and fourth year of their Science Co-op program will have difficulty taking full year classes during the academic year because of their work terms.

To ensure employment opportunities, Science Co-op students may include some classes (or minor) in biochemistry, business, computer science, environmental science, microbiology, or statistics as employers are often seeking expertise in these areas.

**ADMISSION** to the Marine Biology Science Co-op program should be sought in winter of first year. Applications must be submitted by August 1st.

Science Co-op application forms for Marine Biology are available from the Science Co-op website: <http://www.sciencecoop.dal.ca>. A limited number of students will be accepted into the program each year to reflect the current job market. Students must be eligible to work in Canada. Students wishing to apply for the Honours and Major Co-op programs should have at least an overall GPA of 3.00 or higher from all first year classes and a grade of B+ in BIOL 1010.03/1011.03 or equivalent. Successful applicants will be informed in late August before the beginning of the fall term.

For further information, please see <http://www.sciencecoop.dal.ca>.

### B. BSc (20 credit) Honours in Marine Biology

Program Advisors:

A. Pinder (494-3822) [alan.pinder@dal.ca](mailto:alan.pinder@dal.ca).

C. Herbinger (494-1397) [christophe.herbinger@dal.ca](mailto:christophe.herbinger@dal.ca)

Honours students must take a minimum of nine and a maximum of 11 credits in their honours subject (Marine Biology/Biology) above the 1000 level in addition to the general rules of the College of Arts and Science (see degree requirements in the College of Arts and Science section of this calendar).

It is the responsibility of all students to arrange for supervisors for their research. Honours theses may be supervised by a faculty member within the Biology department, or by an external scientific investigator, subject to the approval of the

honours committee. Students not in co-op should begin to search for a potential supervisor during their third year of study and should have completed arrangements by May of their third year. Co-op students will normally do their Honours research in the summer of their fourth year or in their fifth year and should consult with their advisor. If students wish to be supervised by someone external to the department, they must consult with their honours advisor to determine the potential supervisor's eligibility prior to starting their research.

For the standing required for Honours please see "Graduation Standing" section "Academic Regulations" given earlier in this calendar.

**PLEASE NOTE: A B average must be attained in the following 2000 and 3000 level required classes:**

- BIOL 2003.03
- BIOL 2004.03
- BIOL 2020.03
- BIOL 2030.03
- BIOL 2040.03
- BIOL 2060.03
- MARI 3074.03/3076.03 or BIOL 3050.03

A maximum of two of these required classes may be repeated in an attempt to achieve this GPA.

## Departmental Requirements

### 1000 level

- BIOL 1010.03 or 1020.03 (C- or better)
- BIOL 1011.03 or 1021.03 (C- or better)
- CHEM 1011.03/1012.03
- COMM 1502.03 (recommended for students not fully familiar with microcomputers, but not required).
- MATH 1000.03 or MATH 1215.03
- STAT 1060.03

OR

- SCIE 1515.36 or SCIE 1520.30 or SCIE 1540.27 (C- or better)

### 2000 level

- BIOL 2003.03
- BIOL 2004.03
- BIOL 2020.03
- BIOL 2030.03
- BIOL 2040.03
- BIOL 2060.03
- OCEA 2000.06 or 2001.03/2002.03
- STAT 2080.03

### 3000 and 4000 level

- MARI 3067.03
- MARI 3074.03/3076.03 or BIOL 3050.03
- MARI 3212.03 or 3221.03 (strongly recommended but not required)
- MARI 3301.03
- MARI 3761.03
- MARI 3626.03 or 4060.03 (recommended but not required)
- MARI 4900X/Y.06 or 4901.03/4902.03

In addition to the required Biology credits (3.0) and Marine Biology credits (3.5 - 4.5), students must select 1.5 - 2.5 more full credits from the list of Marine Biology (MARI) classes or BIOL classes with some marine emphasis to fulfill the university requirement of a minimum of nine credits beyond the 1000 level in the Honours subject.

Other Biology classes with some marine emphasis: BIOL 3042.03, 3102.03, 3326.03, 3615.03, 4061.03, 4063.03, 4074.03, 4661.03. Please speak with an advisor for a more comprehensive list of acceptable class.

## C. Honours Co-op BSc in Marine Biology

### Departmental Requirements

Same as for regular Marine Biology Honours as above in addition to the following:

- SCIE 2800.00 (Science Co-op Seminar Series)
- MARI 8891.00, 8892.00, 8893.00, 8894.00 (Co-op Work terms)

Co-op students will normally do their Honours research in the summer of their fourth year or in their fifth year and should arrange this with the Honours co-op advisor. To obtain the Honours research and thesis credit, co-op students normally attend and register for MARI 4901.03 in the Winter term of their fourth year and MARI 4902.03 in the Fall term of their fifth year to accommodate their work-terms. If students wish to be supervised by someone external to the department, they must consult with the honours advisor, prior to starting the research, to determine supervisor and project's eligibility.

## D. Combined Honours BSc in Marine Biology and Another Subject

Students planning a Combined Marine Biology program should consult with a Marine Honours advisor before registering for their third year classes.

### Departmental Requirements

If Marine Biology is chosen as the **primary** subject in Combined Honours degree, at least six and no more than nine credits in Biology and Marine Biology beyond the 1000 level including the following classes:

#### 1000 Level

- BIOL 1010.03 and BIOL 1011.03 or BIOL 1020.03 and BIOL 1021.03, CHEM 1011.03/1012.03, MATH 1000.03 or MATH 1215.03, STAT/MATH 1060.03 or SCIE 1515.36 or SCIE 1520.30 or SCIE 1540.27 (with a minimum grade of C-)

#### 2000 Level

- BIOL 2003.03, 2004.03, 2020.03, 2030.03, 2040.03 and 2060.03

#### 3000 and 4000 Level

Minimum of at least 2.5 full credits at or above the 3000 level in Marine Biology (MARI); normally including MARI 3067.03, MARI 3301.03 and MARI 3761.03. Classes that are strongly recommended, but not required, include MARI 3212.03 or MARI 3221.03, MARI 3626.03 or MARI 4060.03, MARI 3074.03/3076.03 and STAT 2080.03

If Marine Biology is the secondary area in a Combined Honours degree, the same requirements apply as when Marine Biology is the primary subject except that two full credits are required at or above the 3000 level.

A Combined Honours degree, with Oceanography as the second subject, is described in the Oceanography section of this calendar.

Please note: A B average must be attained in the same classes as listed for the 20 Credit Honours in Marine Biology (above) when those classes are included in a Combined Honours degree.

Please note: A double major in Marine Biology and Biology is not offered.

## E. BSc or BA (20 credit) Major in Marine Biology

Program Advisors:

R. Scheibling (494-2296) robert.scheibling@dal.ca

B. Worm (494-2478) boris.worm@dal.ca

G. Gass (494-8445) gillian.gas@dal.ca

A. Schmidt (494-1638) allison.schmidt@dal.ca

Major students are required to take a minimum of seven and a maximum of 10 credits above the 1000 level in their minor subject (Marine Biology) including four credits above the 2000 level, in addition to the general rules for Majors which are listed in the degree requirements section of the College of Arts and Science regulations in this calendar.

### Classes required in Major

#### 1000 level

- BIOL 1010.03 or 1020.03 (C- or better)
- BIOL 1011.03 or 1021.03 (C- or better)
- CHEM 1011.03/1012.03
- COMM 1502.03 (recommended for students not fully familiar with microcomputers)
- MATH 1000.03 or MATH 1215.03
- STAT 1060.03

OR

- SCIE 1515.36 or SCIE 1520.30 or SCIE 1540.27 (C- or better)

### 2000 level

- BIOL 2003.03
- BIOL 2004.03
- BIOL 2020.03
- BIOL 2030.03
- BIOL 2040.03
- BIOL 2060.03
- OCEA 2000.06

### 3000 and 4000 level

Minimum of four full credits, or an equivalent number of half credits, to be selected from Marine Biology (MARI) classes or any “marine emphasis” field class offered by our summer field class Institute, SEASIDE, or any other recognized field class institute/station in Canada or overseas.

## F. BSc (20 credit) Major Co-op in Marine Biology

### Departmental Requirements

Same as for regular Major in Marine Biology as above in addition to the following:

- SCIE 2800.00 (Science Co-op Seminar Series)
- MARI 8891.00, 8892.00, 8893.00, 8894.00 (Co-op Work terms)

## G. BSc (20 credit) Double Major in Marine Biology

### Department Requirements

#### 1000 Level

- BIOL 1010.03 and BIOL 1011.03 (or BIOL 1020.03 and 1021.03) and CHEM 1011/1012.03, MATH 1000.03 or MATH 1215.03, MATH/STAT 1060.03 or SCIE 1515.36 or SCIE 1520.30 or SCIE 1540.27 (with a minimum grade of C-)

#### 2000 Level

- BIOL 2003.03, 2020.03, 2030.03, 2040.03 and 2060.03

#### 3000 and 4000 Level

- Minimum of 2.5 full credits at or above the 3000 level from Marine Biology (MARI) classes

Please note: A double major in Marine Biology and Biology is not offered.

## H. BA or BSc (15 credit) Minor in Marine Biology

Departmental requirements for this program are described below. In addition to the departmental requirements, students must satisfy the requirements outlined in the Degree Requirements section of the calendar.

### Department Requirements

A minimum of three and a maximum of six full credits in Marine Biology (MARI) at the 2000 level or higher.

Please note that entry into upper level Biology (BIOL) classes requires completion of one full credit with a minimum grade of C- at the first year level (BIOL 1010.03 or BIOL 1020.03) and (BIOL 1011.03 or BIOL 1021.03) or DISP (SCIE 1515.36, SCIE 1520.30 or SCIE 1540.27) or equivalent and several prerequisite 2000 level classes.

## I. Minor in Marine Biology

Students in a 20 credit degree program other than Marine Biology may choose to complete a Minor Program in Marine Biology. A Minor in Marine Biology is offered to students enrolled in other programs within the Faculty of Science and to students from other faculties, provided they complete the requisite classes. NOTE: Classes counted toward a 20 credit Major or Honours program may not be used to fulfill the requirements of a Minor Program.

To obtain a Minor in Marine Biology, a student must successfully complete:

A minimum of three and a maximum of six full credits in Marine Biology at the 2000 level or higher.

Please note that entry into upper level Biology (BIOL) classes requires completion of one full credit with a minimum grade of C- at the first year level (BIOL 1010.03 or BIOL 1020.03) and (BIOL 1011.03 or BIOL 1021.03) or DISP (SCIE 1515.36, SCIE 1520.30 or SCIE 1540.27) or equivalent and several prerequisite 2000 level classes.

## J. Minor Programs available to students enrolled in a Major or Honours Marine Biology Program

Minor programs allow students to develop subject specialities, outside their main area of study. Minors are normally added to a four-year major or concentrated honours program. If a minor is added to a double major or a combined honours program, students may find that they need to take more than 20 credits to complete all of their degree requirements. NOTE: Classes counted toward a 20 credit Major or Honours program may not be used to fulfill the requirements of a Minor Program.

Combined with a four-year degree program in Marine Biology, minor programs are available in the following areas.

### 1. Minors in other Faculty of Science programs (see 5.a, page 135)

### 2. Minors offered by the Faculty of Arts and Social Sciences (see 5.a, page 135)

### 3. Minors in other Faculties (see 5.b, page 135)

## K. BSc/Engineering or BA/Engineering Concurrent Programs

Students will normally complete the requirements for a 15 credit BSc or 15 credit BA, and the first two years of engineering studies leading to the Diploma in Engineering. The concurrent program can be completed in three years. Details are provided in the College of Arts and Science Degree Requirements on page 131 of the calendar.

## L. Diplomas, Certificates, and Language Proficiency Certificates

A number of certificate programs are available to students enrolled in an Honours, Major or Minor program in Marine Biology. Please see page 137 for a full listing of available certificates. Note: Classes counted toward a Major, Honours or Minor program may also be used to fulfill the requirements of a Certificate.

## III. Class Descriptions

The normal entry requirement for upper level classes in Biology and Marine Biology is a grade of C- or better in BOTH terms of first year Biology or in DISP. Students with extenuating circumstances may appeal to the departmental curriculum committee.

NOTE: Not all classes are offered every year. Please consult the current timetable for this year's offerings.

### MARI 3003.03: Introduction to Field Oceanography.

See class description for OCEA 3003.03 in the Oceanography section of the calendar.

### MARI 3063.03: Resource Ecology.

This class considers the ecology, utilization, and management of natural resources in fisheries, wildlife and forest management, agriculture and aquaculture. Topics include population dynamics, community interactions, and ecosystem support of resources as well as the history of resource utilization, practices of controlling production, pests, and predators, and sustainable management strategies.

INSTRUCTOR(S): H. K. Lotze

FORMAT: Lecture 2 hours, tutorial 2 hours

PREREQUISITE: BIOL 2060.03, MATH 1010.03, (STAT 1060.03 or DISP)

CROSS-LISTING: BIOL 3063.03

### MARI 3067.03: Ecology and Evolution of Fishes.

This class will examine selected topics on the ecology and evolution of marine and freshwater fishes. Topics shall include systematics, functional morphology, evolutionary ecology, behaviour, life history strategies, population biology, fisheries science, and conservation biology.

INSTRUCTOR(S): J. Hutchings

FORMAT: Lecture 3 hours, lab 2.5 hours

PREREQUISITE: BIOL 2003.03, BIOL 2060.03

CROSS-LISTING: BIOL 3067.03

### MARI 3074.03: Physiology of Marine Animals, Part I.

Animals in a marine environment are quite different from those found in air or fresh water, but the “physiological principles” are similar. This class deals with the

same principles as BIOL 3078, but emphasizes the special characteristics of marine animals and the techniques necessary to study them in laboratories.  
 INSTRUCTOR(S): N. McAllister-Irwin, N. Hamacher  
 FORMAT: Lecture 3 hours, lab 3 hours  
 PREREQUISITE: BIOL 2003.03, BIOL 2020.03  
 EXCLUSION: BIOL 3070X/Y.06, BIOL 3071X/Y.06, MARI 3071X/Y.06, BIOL 3078.03

### **MARI 3076.03: Physiology of Marine Animals Part II.**

Animals in a marine environment are quite different from those found in air or fresh water, but the “physiological principles” are similar. This class deals with the same principles as BIOL 3079, but emphasizes the special characteristics of marine animals and the techniques necessary to study them in laboratories.  
 INSTRUCTOR(S): N. McAllister-Irwin, N. Hamacher  
 FORMAT: Lecture 3 hours, Lab 3 hours  
 PREREQUISITE: BIOL 2003.03 and BIOL 2020.03  
 EXCLUSION: BIOL 3070.06, BIOL/MARI 3071.06, BIOL 3079.03

### **MARI 3101.03: Microbial Ecology.**

Lectures on the ecology of bacteria, viruses, protists. Community structure, food web nutrient cycling, biogeochemical cycles, competition, succession and symbiosis are discussed with examples from marine, fresh-water and soil habitats. There is an emphasis on marine organisms.  
 INSTRUCTOR(S): J. Laroche  
 FORMAT: Lecture 3 hours  
 PREREQUISITE: BIOL 2004.03 or MICI 2100.03, and BIOL 2060.03  
 CROSS-LISTING: BIOL 3101.03

### **MARI 3221.03: Diversity of Algae.**

This class is a taxonomic introduction to the major algal groups (macrophytic and microscopic) with an emphasis on the marine seaweeds. Basic taxonomic differences are covered, along with an introduction to macrophyte ecology, human uses and symbioses. Laboratory sessions focus on morphology and reproduction.  
 INSTRUCTOR(S): B. Hymes  
 PREREQUISITE: BIOL 2004.03 or equivalent  
 CROSS-LISTING: BIOL 3221.03  
 EXCLUSION: BIOL 3212.03, MARI 3212.03

### **MARI 3301.03: Invertebrate Biology.**

A survey of the diversity, ecology, and evolutionary history of the major invertebrate groups. Lectures will emphasize phylogenetics and diversity of body plans. Labs will emphasize identification and anatomy through field trips to local sites, computer aided learning, and group projects to construct food-webs for local invertebrate communities.  
 INSTRUCTOR(S): L.T. Romanuk  
 FORMAT: Lecture 3 hours, lab 3 hours  
 PREREQUISITE: BIOL 2003.03  
 CROSS-LISTING: BIOL 3301.03  
 EXCLUSION: BIOL 3321X/Y.06

### **MARI 3600.03: Aquaculture.**

Through lectures, laboratories and field trips (additional fees apply), this course offers an introductory overview of aquaculture, the culturing of aquatic plants and animals. The following topics are covered with both a Maritimes and global perspective: overview, physico-chemistry of water, engineering, culture techniques, health, nutrition, genetics, environmental and socio-economic considerations.  
 INSTRUCTOR(S): C. Herbinger  
 FORMAT: Lecture 3 hours, Lab 3 hours, Field trips (2 Sundays)  
 PREREQUISITE: BIOL 2003.03  
 CROSS-LISTING: BIOL 3600.03

### **MARI 3623.03: Applied Coastal Ecology.**

Impacts of anthropogenic inputs on the structure and function of coastal ecosystems. Through field trips and other classwork, students examine ecosystem health, e.g., in macroalgal communities on rocky shores, in seagrass beds on sedimentary shores, and learn basic experimental design, principles of environmental assessment and monitoring, and coastal habitat remediation.  
 NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca. Not offered every year.  
 FORMAT: Field and Lab  
 PREREQUISITE: BIOL 2003.03 and BIOL 2060.03  
 CROSS-LISTING: BIOL 3623.03, ENVS 3623.03

### **MARI 3626.03: Field Studies of Marine Mammals.**

Hands-on introduction to research on marine mammals. Lectures provide an overview of marine mammal adaptations, evolution, population biology, social organization, conservation, and management. Labs include a necropsy and techniques of photographic identification of individuals. On a several-day camping trip, students observe marine mammals from whale-watch boats and conduct research projects.  
 NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.  
 FORMAT: Lab and field intensive  
 PREREQUISITE: BIOL 2060.03, BIOL 3062.03 (or BIOL 3630.03 or PSYO 2160.03), STATS 1060.03 (or equivalent)  
 CROSS-LISTING: BIOL 3626.03

### **MARI 3627.03: Biology and Conservation of Sharks, Skates and Rays.**

This class offers a combination of lectures, labs, and field trips that explore the elements of elasmobranch (shark, skate and ray) biology and conservation. Students are introduced to current methods used in shark research, such as tagging, and learn about the role of sharks in ecosystems.  
 NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca  
 INSTRUCTOR(S): Staff  
 FORMAT: Lectures, labs and field trips  
 PREREQUISITE: BIOL 2020.03 and BIOL 2003.03

### **MARI 3632.03: Applied Field Methods in Fish Ecology.**

Practical experience conducting field research on fishes with field trips to streams and shallow water marine/freshwater habitats. Techniques include collecting fish, designing and conducting surveys, studying behaviour, measuring phenotypic variability, quantifying temporal and spatial variation, planning for statistical analysis, and weighing tradeoffs between data quality, quantity, costs and ethical/environmental considerations.  
 NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.  
 FORMAT: Field intensive. Lecture and lab.  
 PREREQUISITE: BIOL 2060.03 or BIOL 2003.03 and STAT 1060.03 or their equivalents or permission of instructor (STAT 2080 recommended)  
 CROSS-LISTING: BIOL 3632.03, ENVS 3632.03

### **MARI 3664.03: Intertidal Ecology and Diversity.**

Hands-on, intensive introduction to ecological research on rocky shores, tidal flats, and sandy beaches. Relevant ecological concepts, sampling techniques for flora and fauna, and statistical skills are learned. Field sampling on day and camping trips is followed by lab work (e.g., identification of seaweeds, invertebrates), statistical analysis, and report preparation.  
 NOTE: Offered in summer through SEASIDE. An auxiliary fee is charged to cover field expenses. For dates, times and special registration procedures, see seaside.science.dal.ca.  
 FORMAT: Field and Lab intensive  
 PREREQUISITE: BIOL 2060.03 and BIOL 2003.03 and (MATH/STAT 1060.03 or DISP)  
 CROSS-LISTING: BIOL 3664.03, ENVS 3664.03  
 EXCLUSION: BIOL 3662.03, 3663.03

### **MARI 3680.03: Scientific Diving Methods for Marine Ecology.**

This class introduces students that are certified divers to the practice of underwater research using SCUBA. It combines lectures with supervised dives in various marine habitats to demonstrate the application of standard sampling and experimental procedures in marine ecology, with an emphasis on logistical considerations and diving safety.  
 NOTE: Offered every other summer through the SEASIDE program. An auxiliary fee is charged to cover costs of dive trips. For dates, times and special registration procedures, see seaside.science.dal.ca.  
 INSTRUCTOR(S): R. Scheibling, A. Pinder, J. Lindley  
 FORMAT: Field Lab and Lecture  
 PREREQUISITE: BIOL 2003.03, BIOL 2060.03, STAT 1060.03, internationally recognized diving certification, diving physical; recommended: BIOL 3212.03 or BIOL/MARI 3221.03, BIOL 3301.03  
 CROSS-LISTING: BIOL 3680.03

**MARI 3761.03: Marine Ecology.**

Building upon an understanding of basic ecological and evolutionary principles, and a familiarity with the major marine invertebrate and algal taxa, this class examines patterns and processes at the organismal, population and community levels that determine the diversity and distribution of life in the sea.

INSTRUCTOR(S): R. Scheibling

FORMAT: Lecture/lab

PREREQUISITE: BIOL 2060.03 or BIOL 2003.03, and OCEA 2000X/Y.06 or (OCEA 2001.03 and OCEA 2002.03)

CROSS-LISTING: BIOL 3761.03

RESTRICTION: This class is restricted to 3rd and 4th year students.

**MARI 3800.03: Experiential Learning.**

Experiential Learning recognizes the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the class coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and a timetable.

NOTE: To register in this class, a student must first find a suitable supervisor and sign a learning agreement between the class coordinator, the student and the supervisor.

FORMAT: A minimum of 84 hours of work experience should be documented.

For example students could spend 7-8 hours per week throughout a regular term or complete the 84 hours in a more concentrated period during the summer. Grading is pass/fail.

PREREQUISITE: Students must be registered in a Biology or Marine Biology program, have completed a minimum of three full credits in Biology above the 1000 level and have a minimum cumulative GPA of 2.4 or permission of co-ordinator.

CROSS-LISTING: BIOL 3800.03

EXCLUSION: Scheduled classes at a learning institution, study that would qualify for a Special Topics class, an Honours project, co-op work terms and paid work. Only one experiential learning class per degree is permitted.

**MARI 3800.03: Experiential Learning.**

Experiential Learning recognizes the learning experience relevant to the program outside the scheduled curriculum. Students are responsible for drafting a learning agreement with the class coordinator and supervisor to specify learning outcomes, activities designed to accomplish these outcomes, a quantifiable assessment strategy and a timetable.

NOTE: To register in this class, a student must first find a suitable supervisor and sign a learning agreement between the class coordinator, the student and the supervisor.

FORMAT: A minimum of 84 hours of work experience should be documented.

For example students could spend 7-8 hours per week throughout a regular term or complete the 84 hours in a more concentrated period during the summer. Grading is pass/fail.

PREREQUISITE: Students must be registered in a Biology or Marine Biology program, have completed a minimum of three full credits in Biology above the 1000 level and have a minimum cumulative GPA of 2.4 or permission of co-ordinator.

CROSS-LISTING: BIOL 3800.03

EXCLUSION: Scheduled classes at a learning institution, study that would qualify for a Special Topics class, an Honours project, co-op work terms and paid work. Only one experiential learning class per degree is permitted.

**MARI 4060.03: Marine Mammalogy.**

The class examines the characteristics that mammals brought with them when they returned to the ocean, their evolution, special adaptations, and roles in oceanic ecosystems and general principles of the marine mammal population biology. The biology of marine mammals is used to explore conservation/management issues.

INSTRUCTOR(S): D. Austin, T. Wimmer

FORMAT: Lectures 3 hours

PREREQUISITE: BIOL 2060.03

CROSS-LISTING: BIOL 5651.03, BIOL 4060.03

**MARI 4335.03: Environmental Impacts in Marine Ecosystems.**

See class description for OCEA 4335.03, in the Oceanography section of this calendar.

**MARI 4369.03: Fisheries Oceanography.**

See class description for OCEA 4160.03, in the Oceanography section of this calendar.

**MARI 4370.03: Deep Sea Biology.**

See class description for OCEA 4370.03, in the Oceanography section of this calendar.

**MARI 4661.03: Biological Oceanography.**

See class description for OCEA 4140.03, in the Oceanography section of this calendar.

**MARI 4662.03: Biology of Phytoplankton.**

See OCEA 4230.03 in the Oceanography section of the calendar.

**MARI 4664.03: History of Marine Sciences.**

This class describes the development of the marine sciences from biological, chemical, physical and geological knowledge going back to the 17th century or earlier. It includes the important voyages of exploration, the development of marine biology, ocean circulation and plate tectonics, also the importance of technological changes upon marine science.

INSTRUCTOR(S): E.L. Mills

FORMAT: Lecture 3 hours

PREREQUISITE: Instructor's consent

CROSS-LISTING: BIOL 4664.03, OCEA 4331.03/5331.03, HIST 3073.03, HSTC 3331.03, SCIE 4001.03

**MARI 4666.03: Benthic Ecology.**

See class description for OCEA 4330.03, in the Oceanography section of this calendar.

**MARI 4667.03: Census of Marine Life.**

The Census of Marine Life recorded over 250,000 known species of eukaryotes in the world's oceans. In this class, the Senior Scientist for Census 2010 examines the diversity, distribution and abundance of marine biota globally, and reviews new approaches to discover new species and to monitor responses to climate change.

INSTRUCTOR(S): R. O'Dor

FORMAT: Lecture with discussions

PREREQUISITE: BIOL 2003.03 and BIOL 2060.03 and six half credits of BIOL, MARI, or OCEA classes.

CROSS-LISTING: BIOL 4667.03

**MARI 4806.03: Special Topics in Marine Biology.**

Independent study intended for students who wish to study an area of marine biology not covered in other classes. Students should first consult with a faculty member to arrange the topic of study. An outline of the class content must be approved by the Biology Undergraduate Curriculum Committee Chair.

NOTE: For registration forms and further information go to: <http://biology.dal.ca/Undergraduate/index.htm>

**MARI 4807.03: Special Topics in Marine Biology.**

Independent study intended for students who wish to study an area of marine biology not covered in other classes. Students should first consult with a faculty member to arrange the topic of study. An outline of the class content must be approved by the Biology Undergraduate Curriculum Committee Chair.

NOTE: This class is for students who have already completed one Special Topics Class. For registration forms and further information go to: <http://biology.dal.ca/Undergraduate/index.htm>

**MARI 4900X/Y.06: Honours Research and Thesis.**

This class is required of, and restricted to, all Marine Biology Honours programmes in which Marine Biology is the major area of study. Students conduct a research project supervised by a research scientist and attend weekly meetings of the class.

NOTE: The class grade is based on the results of the research which are submitted in April as an Honours Thesis, an oral presentation about the research to the class, and an oral or poster presentation at the Honours Cameron Conference. Co-op students attend this class by registering for Marine Biology 4901 and 4902. See details about selecting a supervisor for the honours research under the general requirements for Marine Biology honours programmes at the beginning of Marine Biology's calendar entry or on the honours page of Biology's website <http://biology.dal.ca/honours/index.htm>

INSTRUCTOR(S): G. Crossin, C. Herbinger

FORMAT: Weekly class meetings (1.5 - 3.0 hrs) and an independent research project

CROSS-LISTING: MARI 4901.03 AND MARI 4902.03, BIOL 4900X/Y and BIOL 4901.03 AND BIOL 4902.03

RESTRICTION: Honours students normally in their final year of study.

**MARI 4901.03: Honours Research and Thesis I.**

This is required of, and restricted to, all Marine Biology Co-op Honours programmes. The class description is the same as for MARI 4900X/Y. Students attend MARI 4901 in the Winter term of their 4th year and MARI 4902 in the Fall term of their 5th year to accommodate their work terms.

NOTE: 4901 and 4902 must be taken in consecutive winter/fall terms to get a grade for either class. No grade will be recorded for MARI 4901 until 4902 is also completed and the final Honours Thesis has been evaluated - usually in April following the fall class of 4902. Students normally give a poster presentation about their previous work term at the Honours Cameron Conference in February.

**MARI 4902.03: Honours Research Thesis II.**

This is the 2nd half of the required class for Marine Biology Co-op honours students. The class description is the same as for MARI 4900X/Y. Students attend 4902 in the fall of their 5th year.

NOTE: 4901 and 4902 must be taken in consecutive winter/fall terms to get a grade for either class. No grade will be recorded for MARI 4901 until 4902 is also completed and the final Honours Thesis has been evaluated - usually in April following the fall class of 4902.

**MARI 8880.00: Honours Qualifying Examination.**

This is an additional requirement of all Biology and Marine Biology Honours students. Students cannot register for this class but it appears at the end of students' transcripts after they have successfully completed and satisfied all the requirements for BIOL/MARI 4900X/Y, or BIOL/MARI 4901 AND 4902.

NOTE: The grade assigned is a Pass/Fail which is based on mandatory attendance at all weekly meetings of the honours class for two academic terms (attendance is recorded) and participation in the full day Honours Cameron Conference in February.

INSTRUCTOR(S): G. Crossin, C. Herbingier

FORMAT: Weekly seminars 1.5 - 3.0 hours

RESTRICTION: Honours students normally in their final year of study

**MARI 8891.00: Co-op Workterm I.**

PREREQUISITE: SCIE 2800.03

**MARI 8892.00: Co-op Workterm 2.**

PREREQUISITE: MARI 8891.00

**MARI 8893.00: Co-op Workterm 3.**

PREREQUISITE: MARI 8892.00

**MARI 8894.00: Co-op Workterm 4.**

PREREQUISITE: MARI 8893.00

## Dean

Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

## Chairperson of Department

Dilcher, K., PhD (Queen's)

## Director of Division

Milson, R., PhD (McGill) (Co-op Academic Advisor)

## Faculty Advisors

Iron, D., PhD (UBC) (Honours)  
Milson, R., PhD (McGill)

## I. General Interest Classes

The Division offers several classes for non-majors who would like to know something about Mathematics.

- MATH 1000.03/1010.03: These core calculus classes are the starting point for any degree program in the sciences.
- MATH 1001.03/1002.03: This class is designed especially for BA students and others who wish to know about the historical and cultural aspects of mathematics.
- MATH 1060.03: This class serves as an introduction, through examples drawn from a wide variety of disciplines, to the basic ideas of statistics.
- MATH 1115.03: Linear algebra and calculus are arranged to meet the needs of commerce students, but of interest to anyone wishing a brief introduction to either of these topics.
- Math 1215.03: This class emphasizes the application of calculus to the life sciences.
- MATH 2112.03: Whereas calculus deals with continuous phenomena, this class deals with discrete objects, especially varieties of ways to count.
- MATH 2030.03/2040.03: These classes serve as introductions to matrix theory, linear equations and linear algebra, topics of importance in many fields.

## II. Degree Programs

One full credit in Mathematics is required for a BSc degree but none of the following classes may be used to satisfy this requirement:  
MATH 1001.03, 1002.03, 1003.03, 1115.03

Students in any Mathematics program are strongly urged to include CSCI 1100.03, 1101.03.

Note that many programs include MATH 2060.03/2080.03. These classes may also be taken as STAT 2060.03/2080.03 and can then count as electives.

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, page 131 of this calendar.

## III. Student Advising

For general advising and career information, students are encouraged to visit the department website: <http://www.mathstat.dal.ca> and click on "Student Advising."

## A. BSc (20 credit) Honours in Mathematics

In addition to satisfying the Faculty of Science regulations for Honours Programs, all Honours programs in mathematics must include the following classes.

### Departmental Requirements

#### 2000 level

- MATH 2001.03/2002.03
- MATH 2030.03/2135.03 and 2505.03
- Two other credits in mathematics at or above the 2000 level - not including classes listed below

#### 3000 level

- MATH 3030X/Y.06
- MATH 3500X/Y.06

#### 4000 level

- MATH 4950.03/Honours Research Project
- Two other credits at or above the 4000 level

Students may choose programs with a concentration in Applied Mathematics or Mathematics. Students wishing to include Computer Science should consider Combined Honours in Mathematics and Computer Science. Students wishing to include Statistics should consider Combined Honours in Mathematics and Statistics. All Honours programs must be approved by the Honours advisor.

Students interested in applied mathematics are advised to select a program that includes, in addition to the required classes above, classes from among the following:

- MATH 2300.03
- MATH 2120.03/MATH 3120.03
- MATH 3210.03
- MATH 3260.03
- MATH 3300.03
- MATH 3330.03
- MATH 3360.03
- MATH 3400.03

Students interested in pure mathematics are advised to select a program that includes, in addition to the required classes above, classes from among the following:

- MATH 2051.03
- MATH 3070.03
- MATH 3080.03
- MATH 2120.03/3120.03
- MATH 3045.03

### Honours Comprehensive Examination

The Honours Comprehensive Examination in mathematics consists of a written paper of about 20-30 pages researched and prepared by the student. The topic is decided on in conjunction with the Honours advisor. The paper is also presented to the honours seminar. The work for this paper also constitutes the work for the required class MATH 4950.03.

## B. BSc Combined Honours

A combined honours program may be appropriate for many students wishing to have a broad range of expertise.

Students interested in taking honours in mathematics and another subject as a combined program should consult the Mathematics Honours advisor. Combined programs in areas such as Mathematics and Statistics, Mathematics and Computer Science, Mathematics and Physics, Mathematics and Chemistry and Mathematics and Economics are common, but combined programs with Mathematics and any subject in the Faculty of Science, Faculty of Arts and Social Science, and Faculty of Computer Science can be arranged. These programs must satisfy University Regulations, but are designed to satisfy the interests and needs of the student.

Students contemplating a combined honours program in Mathematics and another subject should bear in mind that the work in either subject would probably be insufficient for admission to a regular graduate program. A qualifying year would usually be necessary.

## C. BSc or BA (20 credit) Major in Mathematics

### Departmental Requirements - Major

#### 2000 level

- MATH 2001.03 and 2002.03
- MATH 2030.03 and 2040.03 (or 2135.03)
- At least one of MATH 2112.03, 2051.03 or 2505.03
- One additional half credit at or above 2xxx level
- One STAT class at or above 2xxx level

#### 3000 level

- Four other mathematics credits at or above the 3000 level. This selection may not include MATH 3700, MATH 3800.

Students wishing to concentrate in Applied Mathematics should choose the extra mathematics classes from

- MATH 2060.03/MATH 2080.03
- MATH 2300.03
- MATH 2120.03/MATH 3120.03
- MATH 3210.03
- MATH 3260.03
- MATH 3300.03
- MATH 3330.03
- MATH 3400.03

Students wishing to concentrate in Pure Mathematics should choose the extra mathematics classes from

- MATH 2060.03/MATH 2080.03
- MATH 3030X/Y.06
- MATH 3070.03
- MATH 3080.03
- MATH 2120.03/MATH 3120.03
- MATH 3045.03

Students contemplating a career in Mathematics Education should choose the extra mathematics classes from

- MATH 2051.03
- MATH 2060.03/MATH 2080.03
- MATH 2112.03/MATH 2113.03
- MATH 2300.03
- MATH 3030X/Y.06
- MATH 3070.03
- MATH 3080.03
- MATH 3140.03
- MATH 3150.03
- MATH 3300.03
- MATH 3330.03
- MATH 3400.03

## D. BSc Double Major in Mathematics and another Science subject, Double Major in Mathematics and a BA Subject

Student completing a double major with Mathematics can fulfil the Mathematics requirements by following one of two programs below. In both cases, students are advised to consult with the department.

### Pure Mathematics

#### 2000 level

- MATH 2001.03 and 2002.03
- MATH 2030.03 and 2040.03 (or 2135.03)
- At least one of MATH 2112.03, 2051.03, 2505.03

#### 3000 level

- Two other mathematics credits at or above the 3000 level. This selection may not include MATH 3700, MATH 3800.

### Applied Mathematics

#### 2000 level

- MATH 2001.03
- MATH 2030.03, 2040.03
- MATH 2120.03

- At least one of MATH 2060.03 or 2080.03

### 3000 and 4000 level

- MATH 3120.03
- At least three of MATH 3080.03, 3210.03, 3260.03, 3300.03, 3330.03, 3400.03, 3900.03, 4190.03, 4220.03, 4230.03, 4250.03, 4320.03, 4540.03

## E. Co-op Education in Mathematics

Co-operative Education in Science (Science Co-op) is a program where academic study is combined with paid career related work experience. Students alternate three to four work terms throughout their academic study terms and graduate with a Bachelor of Science Co-op. Science Co-op enables students to apply their knowledge directly while providing them with work experience that assists in making educated career choices. Students apply to join Science Co-op before their second year of study. If accepted into the Science Co-op program, students are required to register for and attend the Science Co-op Seminar Series (SCIE 2800.00) in the fall term of the year they join.

See the “Co-operative Education in Science” section of this calendar, or <http://www.sciencecoop.dal.ca>, for information on Science Co-op such as Science Co-op requirements, eligibility, how to apply, deadlines and other related information.

There are three Major and three Honours Co-op programs available within the Department, in the areas of:

- Mathematics
- Statistics
- Combined programs

A Combined Honours Co-op degree, combining Mathematics or Statistics and Computer Science or another appropriate subject, is possible and may be appropriate for many students. Students interested in such a program should consult the Mathematics Co-op Academic Advisor or the Science Co-op office.

For further information, please see <http://www.sciencecoop.dal.ca>

Co-op Academic Advisor in Mathematics:  
Dr. Milson (494-6366) [rmilson@dal.ca](mailto:rmilson@dal.ca)

## F. Minors and Other Programs

### Minors

Minor programs allow students to develop subject specialities, especially ones taught outside their main faculty, that complement their major or honours subjects. Minors are normally added to a four-year major or concentrated honours program. If a minor is added to a double major or a combined honours program, students may find that they need to take more than 20 credits to complete all of their degree requirements. Combined with a four-year degree program in Mathematics, minor programs are available in the following subject areas:

#### Minor Subject Areas

- Business (BA or BSc)
- Canadian Studies (BSc only)
- Community Design (BA or BSc)
- Computer Science (BSc only)
- Environmental Studies (BA or BSc)
- Film Studies (BA or BSc)
- Food Science (BSc only)
- Health Studies (BA only)
- Journalism (BA or BSc)
- Law and Society (BA only)
- Management (BA or BSc)

Any student wishing to pursue a minor in these subjects should consult with the College of Arts and Science Degree Requirements section of the Undergraduate Calendar, starting on page 131, as well as the particular subject area of the calendar.

### Minor in Mathematics

The minor in Mathematics is available to students registered in the BA, BSc and BCS 20 credit major, honours or 15 credit minor programs. The requirements are as for the appropriate program with the completion of the following classes:

- MATH 1000
- MATH 1010
- MATH 1500 X/Y (this replaces the requirement for MATH 1000/1010)

- MATH 2001
- MATH 2030
- MATH 2120
- One and one half additional MATH credit at or above the 2000 level

## BSc/Engineering or BA/Engineering Concurrent Programs

Students will normally complete the requirements for a 15 Credit BSc or 15 Credit BA, and the first two years of engineering studies leading to the Diploma in Engineering. The concurrent program can be completed in three years. Details are provided in the College of Arts and Science Degree Requirements on page 131 of the calendar. The departmental requirements for this program are as outlined above for the 15 Credit BSc with Minor in Mathematics.

Alternatively, eligible students can complete the following departmental requirements:

- ENGM 2021, ENGM 2022, ENGM 2062
- MATH 2300.03
- At least one of MATH 2135.03, 2112.03, or 2051.03
- Any two full MATH credits at the 3000 or 4000 level, except MATH 3110.03, 3700.03, and 3800.03

(All ENGM require a minimum grade of B-.)

## Certificate in Actuarial and Financial Mathematics

This program addresses many of the learning objectives and fundamental mathematical and statistical skills required to complete the first two classes (and examinations) of the Society of Actuaries accreditation program. This program also prepares students for employment in general financial institutions where modeling, quantitative risk analysis, management of investment instruments, asset and liability management, life contingencies and insurance assessment, and other complex financial calculations are required. You must register your intent to complete the requirements with the department before graduation. The requirements are:

1. Completion of the 20 Credit Major or Honours program in Mathematics and/or Statistics.
2. Completion of the following mathematics classes: MATH 1000, MATH 1010, MATH 2001, MATH 2002, MATH 2030, MATH 2120 or MATH 3110, MATH 2600, MATH 3300 and MATH 3900;
3. Completion of the following four statistics classes: STAT 2060, STAT 2080, STAT 3340 and STAT 3360.

## Certificate in Applied and Computational Mathematics

This program is concerned with the development of the core mathematical and computational skills required in science, government and industry. Areas of application include everything from mathematical modeling to operations research to cryptography to software development. You must register your intent to complete the requirements with the department before graduation. The requirements are:

1. Completion of the 20 Credit Major or Honours program in Mathematics or an equivalent program;
  2. Completion of the following mathematics classes:
    - MATH 1000, MATH 1010, MATH 2001, MATH 2002, MATH 2030, MATH 2040, MATH/CSCI 2112, MATH 2120;
  3. Completion of at least four of:
    - MATH 3120, MATH 3210, MATH 3260, MATH 3300, MATH 3330, MATH 3400;
  4. Completion of at least two of:
    - MATH 4116, MATH 4220, MATH 4230, MATH 4250, MATH 4320
- Additional recommended classes: MATH 2300, STAT 2060, STAT 2080.

## IV. Class Descriptions

Class descriptions for Statistics can be found in the calendar under Statistics.

Credit may not be obtained twice for the same class even if the numbers have been changed.

Classes with the designation (MLC) are supported by the tutorial services of the Math Learning Centre.

Not all classes are offered every year. Please consult the current timetable for this year's offerings.

The following three classes below the 1000 level are offered by the College of Continuing Education. Students register and pay for them at the College of continuing Education located at 1220 LeMarchant Street, 2nd Floor or by calling

(902) 494-2375 (see page 40, College of Continuing Education, for more details).

### **MATH 0009.00: Academic Math.**

This non-credit grade 12 math class is intended for students who want to upgrade their math skills for admission to the Bachelor of Commerce, Management or Nursing programs or the pre-calculus plus math course. The course contains a thorough investigation of elementary functions. Probability and geometry topics round out this course.

FORMAT: Class 3 hours, tutorial 1 hour

PREREQUISITE: At least grade 10 academic math or equivalent

### **MATH 0010.00: Pre-Calculus Mathematics (NS Grade 12 Pre-Calculus Math).**

This fast paced 1 term course has been designed for calculus bound students who have a firm grasp of grade 11 and 12 math skills. Focus is placed on key pre-calculus concepts, such as derivative and limit. Composite, Inverse, Polynomial and Rational functions, exponential functions with base  $e$ , and trigonometry using radian measure are studied.

FORMAT: Class 3 hours, tutorial 1 hour

PREREQUISITE: Recommend at least 75% in grade 11 advanced and 12 advanced math

### **MATH 0011.00: Pre-calculus Plus ( NS Grade 12 pre-calculus).**

This full year course has been designed for the majority of students, either requiring Pre-calculus for admittance to the Dalhousie BSc program or as preparation for Calculus 1000. In addition to a more in depth coverage of the pre-calculus topics presented in Math 0010.00, a review of the relevant math 11 and 12 material is provided.

FORMAT: Class 3 hours, tutorial 1 hour

PREREQUISITE: Solid understanding of Grade 11 and 12 math or equivalent

### **MATH 1000.03: Differential and Integral Calculus I.**

This class offers a self-contained introduction to differential and integral calculus. The topics include functions, limits, differentiation of polynomial, trigonometric, exponential and logarithmic functions, product, quotient and chain rules, applications of differentiation, antiderivatives and definite integrals, integration by substitution. A sequel to this class is MATH 1010.03.

The XY version of this class covers the same material, but the course duration is spread over the Fall and Winter term. The format of the XY course (1.5 hour workshops twice a week, and the smaller class size) allows for a more interactive learning environment than in a regular lecture format.

FORMAT: Lecture 3 hours, MLC

PREREQUISITE: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus.

Pre-calculus is highly recommended.

EXCLUSION: MATH 1215.03, MATH 1280.03, MATH 1500X/Y.06

### **MATH 1001.03: Mathematics for Liberal Arts Students I.**

For students who wish to become acquainted with mathematics as an art rather than as a tool for the sciences. A selection of elementary topics will be discussed with a view to illuminating historical and cultural aspects of the subject. Required work will include a series of written reports on assigned readings and a major essay. This class cannot be used to partially satisfy the BSc mathematics requirement.

FORMAT: Lecture 3 hours, MLC

### **MATH 1002.03: Mathematics for Liberal Arts Students II.**

Same as 1001.03 above, but with a different set of topics. Either one or both of 1001.03 and 1002.03 may be taken for credit. This class cannot be used to partially satisfy the BSc mathematics requirement.

FORMAT: Lecture 3 hours, MLC

### **MATH 1010.03: Differential and Integral Calculus II.**

A continuation of the study of calculus with topics including: Riemann sums, techniques of integration, elementary differential equations and applications, parametric equations and polar coordinates, sequences and series, Taylor series.

FORMAT: Lecture 3 hours, tutorial 1 hour, MLC

PREREQUISITE: MATH 1000.03

### **MATH 1060.03: Introductory Statistics for Science and Health Sciences.**

See class description for STAT 1060.03 in the Statistics section of this calendar.

### **MATH 1115.03: Mathematics for Commerce.**

An introduction to matrices, linear programming, mathematics of finance, probability and differential calculus. All topics are taught with an emphasis on applications to business.

FORMAT: Lecture 3 hours, MLC

PREREQUISITE: Nova Scotia Advanced Mathematics 11 or 12 or equivalent

EXCLUSION: MATH 1110.03, MATH 1120.03

\* This class may not be used to partially satisfy the BSc Mathematics requirements

### **MATH 1215.03: Life Sciences Calculus.**

This course emphasizes the application of calculus to the life sciences. The concepts and content studied include derivatives, techniques of differentiation, logarithmic and exponential functions, optimization, basic ordinary differential equations, integration, and techniques and applications of integration.

NOTE: Students who have already received credit for MATH 1215.03 cannot subsequently receive credit for MATH 1115.03.

FORMAT: Lecture/tutorial

PREREQUISITE: Nova Scotia Mathematics 11 and 12 or pre-calculus is highly recommended.

EXCLUSION: MATH 1000.03, MATH 1500X/Y.06

### **MATH 1280.03: Engineering Mathematics I.**

This forms an introduction to differential and integral calculus for Engineering students. All topics of Math 1000.03 are covered, but in greater depth. In addition, this course covers functions, differentiation of polynomial, trigonometric, exponential and logarithmic functions, product, quotient and chain rules, Taylor series, antiderivatives and definite integrals, Riemann sums, polynomial approximations, and numerical approximations of integrals.

NOTE: Students who have already received credit for MATH 1280.03 cannot subsequently receive credit for MATH 1000.03 or MATH 1115.03

FORMAT: Lecture/tutorial 5hr.

PREREQUISITE: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus.

Pre-calculus is highly recommended.

EXCLUSION: MATH 1000.03, MATH 1215.03

### **MATH 1290.03: Engineering Mathematics II.**

This class is a sequel to MATH 1280. All topics of Math 1010.03 are covered, but in greater depth. This course also introduces the students to the application of mathematics in engineering problems.

NOTE: 1: Students who have already received credit for MATH 1290.03 cannot subsequently receive credit for MATH 1010.03

NOTE 2: Due to the course format and content, Math 1010.03 is not equivalent to Math 1280.03

FORMAT: Lecture/tutorial 5hr.

PREREQUISITE: MATH 1280.03

### **MATH 1500X/Y.06: Calculus.**

This class is intended primarily for students who are considering a majors or an honours program in the physical or mathematical sciences. The topics of MATH 1000/MATH 1010 are covered, but in greater depth. MATH 1500 is equivalent as a credit to MATH 1000/MATH 1010.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture 3 hours

PREREQUISITE: Nova Scotia Mathematics advanced 11 and 12 or pre-calculus.

Pre-calculus is highly recommended.

EXCLUSION: Credit can be given for only one of MATH 1000/MATH 1010 and MATH 1500.

### **MATH 1600.03: Spectrum of Mathematics.**

This course teaches basic mathematical reasoning, and highlights topics that are not part of the standard first year mathematics curriculum. Topics may include: logic and computers, symmetry in science, prime numbers and cryptology, finite fields and communication error, knots, surfaces and the shape of space.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 1000.03, advanced placement in Calculus, or permission of instructor.

### **MATH 2001.03: Intermediate Calculus I.**

Topics include review of parametric equations, polar coordinates, conic sections, coordinate systems and vectors, dot product and cross product, vector functions, derivatives and integrals of vector functions, arc length and curvature, functions of

several variables and partial derivatives, directional and double and triple integrals.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 1010.03

### **MATH 2002.03: Intermediate Calculus II.**

Topics include multiple integrals and changes of variables, and vector calculus, with an emphasis on Green's and Stokes' theorems. The course also includes an introduction to second order ordinary differential equations.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2001.03

### **MATH 2030.03: Matrix Theory and Linear Algebra I.**

This class is a self-contained introduction to Matrix Theory and Linear Algebra. Topics include: subspaces, linear transformations, determinants, eigenvalues and eigenvectors, systems of linear equations. Students should note that this is a second-year class and, although it has no formal first-year prerequisites, certain mathematical maturity is expected.

FORMAT: Lecture 3 hours, MLC

PREREQUISITE: Nova Scotia advanced Mathematics 11 or 12

### **MATH 2040.03: Matrix Theory and Linear Algebra II.**

This class is a continuation of MATH 2030.03. Topics include: vector spaces and linear transformations, eigenvalues and eigenvectors, similarity and diagonalization, inner product spaces and orthogonal transformations, diagonalization of symmetric matrices and quadratic forms.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2030.03, and 1000.03 or 1500X/Y.06 or 1215.03

EXCLUSION: MATH 2135.03

### **MATH 2051.03: Problems in Geometry.**

This is a basic class for all students interested in geometry. Topics from Euclidean and non-Euclidean geometry may include: transformation geometry, symmetry groups, frieze groups, wallpaper groups and the crystallographic restrictions, similarities; projective geometry and the classical theorems of Menelaus, Ceva, Desargues, Pappus, Pascal; hyperbolic geometry.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 1010.03 or 1500X/Y.06

### **MATH 2060.03: Introduction to Probability and Statistics I.**

See class description for STAT 2060.03 in the Statistics section of this calendar.

### **MATH 2080.03: Statistical Methods For Data Analysis & Inference.**

See class description for STAT 2080.03 in the Statistics section of this calendar.

### **MATH 2112.03: Discrete Structures I.**

This class together with MATH 2113.03 offers a survey of the following areas: set theory, mathematical induction, number theory, relations, functions, algebraic structures and introductory graph theory. The topics to be discussed are fundamental to most areas of Mathematics and have wide applicability to Computer Science.

FORMAT: Lecture 3 hours

PREREQUISITE: Nova Scotia Mathematics 441 or equivalent

CROSS-LISTING: CSCI 2112.03

### **MATH 2113.03: Discrete Structures II.**

This class continues CSCI2112.03/MATH2112.03. This class covers some basic concepts in discrete mathematics which are of particular relevance to students of computer science, engineering, and mathematics. The topics to be covered will include solution of recurrence relations, generating functions, number theory, chinese remainder theorem, trees and graphs, finite state machines, abstract algorithms, boolean algebra.

FORMAT: Lecture 3 hours

PREREQUISITE: CSCI 2112.03 or MATH 2112.03

CROSS-LISTING: CSCI 2113.03

### **MATH 2120.03: Methods for Ordinary Differential equations.**

A comprehensive introduction to the theory of ordinary differential equations (ODEs), which is a broad field in pure and applied mathematics with numerous applications in other sciences. The topics include: special types of ODEs of 1st order, homogeneous and inhomogeneous linear ODEs with constant coefficients, Laplace transforms, systems of ODEs.

PREREQUISITE: MATH 1010.03 or MATH 1500X/Y.06 or permission of the instructor

EXCLUSION: MATH 3110.03

CO-REQUISITE: MATH 2030.03

### **MATH 2135.03: Linear Algebra.**

This course is a continuation of Math 2030.03 with an emphasis on foundations and the theory of vector spaces and linear transformations. Additional topics include symmetric and orthogonal transformations, bilinear forms, inner product spaces, and various applications in mathematics, physics and computer science.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2030.03 and 1000.03

EXCLUSION: MATH 2040.03

### **MATH 2300.03: Mathematical Modelling I.**

By using fundamental calculus concepts in a modelling framework, the student investigates practical problems chosen from common experiences encompassing many academic disciplines, including the mathematical sciences, operations research, engineering and the management and life sciences. A significant part of the class is learning to use MAPLE as a mathematical tool.

FORMAT: Lecture 3 hours, MLC

PREREQUISITE: MATH 1000.03

CROSS-LISTING: STAT 2300.03

CO-REQUISITE: MATH 2030.03

### **MATH 2505.03: Introductory Analysis.**

This course is for honours students and other serious students of mathematics. Topics include: the axioms for the real number system, geometry and topology of Euclidean space, limits, continuity, differentiability, the inverse and implicit function theorems.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2001.03

### **MATH 2600.03: Theory of Interest and Life Contingencies.**

Simple and compound interest are covered in detail. Topics include: nominal and effective rates of interest/discount, force of interest, annuities, perpetuities, and bonds.

FORMAT: Lecture 3 hours, MLC

PREREQUISITE: MATH 1010.03, 1115.03 or 1500X/Y.06

CROSS-LISTING: STAT 2600.03

### **MATH 3030X/Y.06: Abstract Algebra.**

In this first class in abstract algebra the following topics are treated: groups, subgroups, factor groups, homomorphisms, rings, ideals, Euclidean domains, polynomial rings, fields, unique factorization, irreducible polynomials, Sylow theorems, solvability of polynomial equations, Galois theory, and the Jordan canonical form.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2040.03 or 2135.03

### **MATH 3045.03: Curves and Surfaces.**

The course is designed as an introduction to differential geometry, the study of geometric objects by means of analysis. It presents a comprehensive study of curves and surfaces in Euclidean space. Topics include: Frenet frame and equations, curvature, torsion, first and second fundamental forms, shape operator, Gauss-Weingarten equations.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2002.03 and (MATH 2040.03 or MATH 2135.03) or consent of instructor

### **MATH 3070.03: Theory of Numbers.**

Topics include: congruences and residues; elementary properties of congruences, linear congruences, theorems of Fermat, Euler and Wilson, Chinese remainder theorem, quadratic residues, law of quadratic reciprocity, Legendre, Jacobi and Kronecker symbols, arithmetic functions, algebraic fields, algebraic numbers and integers, uniqueness of factorization, elementary properties of ideals, and class number.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2040.03 (or 2135.03)

**MATH 3080.03: Introduction to Complex Variables.**

An introduction to the basic elements of complex analysis. Topics include: complex numbers, functions, differentiation and integration in the complex plane, some special mappings, series in general, Taylor and Laurent Series, residues, some principles of conformal mapping theory.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2002.03

**MATH 3120.03: Differential Equations.**

The topics discussed are of great importance to any student interested in applied mathematics. Areas include Fourier series, orthogonal polynomials, Sturm-Liouville problems, the classical partial differential equations, and some applications to physics, chemistry and engineering.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2120.03 or MATH 3110.03 or PHYC 2140.03

**MATH 3140.03: Introduction to Wavelets.**

Wavelet analysis provides an extremely powerful and highly flexible tool for the compression, denoising, and recognition of both audio and image signals. This course will develop many of the essential mathematical ideas behind Fourier analysis and wavelets. Many applications will also be discussed and examined.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2002.03 and MATH 2030.03

**MATH 3210.03: Introduction to Numerical Analysis.**

This course covers the practice as well as theory of basic numerical techniques. Topics may include: root finding, interpolation, integration, initial value problems, linear and nonlinear fitting, boundary value problems. We will emphasize error analysis and stability of methods, as well as practical implementation on a computer.

PREREQUISITE: Math 2001 or (MATH 2120 and MATH 2030)

**MATH 3260.03: Mathematical Modelling II.**

The course looks at several different applications of differential equations. Each application is chosen to learn a basic mathematical technique. Topics include: dimensional analysis, phase plane methods, multiple scales, boundary layers, delay differential equations, synchronization, chaos.

PREREQUISITE: MATH 2120 or consent of the instructor

**MATH 3300.03: Optimization.**

An introduction to the concepts and applications of linear and nonlinear programming. Topics include the simplex method for linear programming, duality and sensitivity analysis, convex programming, Kuhn-Tucker and Lagrange multiplier conditions, numerical algorithms for unconstrained and constrained problems. Some of these topics are illustrated by means of interactive computer packages.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2001.03 and MATH 2030.03

**MATH 3330.03: Applied Graph Theory.**

This course offers an introduction to graph theory, with an emphasis on applications and modelling. Topics include: paths and cycles, shortest route problem, connectivity and trees, minimum spanning trees, network flow, planar graphs, matchings, assignment problem, graph colouring and applications to scheduling, Hamilton cycles, and the Travelling Salesman Problem.

PREREQUISITE: MATH 2112.03 or MATH 2030.03

**MATH 3340.03: Regression and Analysis of Variance.**

See class description for STAT 3340.03 in the Statistics section of this calendar.

**MATH 3350.03: Design of Experiments.**

See class description for STAT 3350.03 in the Statistics section of this calendar.

**MATH 3360.03: Probability.**

See class description for STAT 3360.03 in the Statistics section of this calendar.

**MATH 3380.03: Sample Survey Methods.**

See class description for STAT 3380.03 in the Statistics section of this calendar.

**MATH 3400.03: Classical Game Theory.**

This course will cover the important concepts of classical game theory: game trees, dominance, zero-sum games, saddle points, utility theory, non-zero sum games, Nash equilibrium, non-competitive solutions, Prisoner's dilemma, Chicken, Newcomb's problem. There will be applications to many areas including anthropology, biology, business, economics and philosophy.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2030.03, or permission of the instructor

**MATH 3460.03: Intermediate Statistical Theory.**

See class description for STAT 3460.03 in the Statistics section of this calendar.

**MATH 3500X/Y.06: Intermediate Analysis.**

MATH 3500.06 continues the analysis sequence begun in MATH 2505.03. Topics include: number systems, metric spaces, compactness, continuous functions on metric spaces, Stone-Weierstrass theorem, Arzela-Ascoli theorem, sequences and series of functions and their properties, inverse and implicit function theorems, extrema, co-ordinate transformations.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2135.03, 2505.03

**MATH 3700.03: Mathematics for Economics.**

See class description for ECON 3700 in the Economics section of this calendar.

**MATH 3800.03: Financial Economics.**

See class description for ECON 3800.03 in the Economics section of this calendar.

**MATH 3900.03: Financial Mathematics.**

This class is an introduction to derivative pricing. Topics include: binomial tree model, stochastic calculus, Itô calculus, Black-Scholes model, market price of risk, log-normal models.

PREREQUISITE: MATH 2060.03 and (MATH 2120.03 or MATH 3110.03), or permission of the instructor

CROSS-LISTING: ECON 3900.03

**MATH 4010.03: Introduction to Measure Theory and Integration.**

A discussion of Lebesgue's theory of measure and integration. The topics include: the extended real number system, the definition of measurable sets, Lebesgue measure and the existence of non-measurable sets, the Lebesgue integral, differentiation of monotonic functions (e.g. the Cantor function), absolute continuity, the classical Lebesgue spaces.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3500X/Y.06

CROSS-LISTING: MATH 5010.03

**MATH 4020.03: Analytic Function Theory.**

Topics include: review of analytic complex functions including topological properties of the plane, Möbius mappings, exponential, logarithmic, trigonometric and related functions, integration and the Cauchy theorem. Cauchy's integral formula, residues, harmonic functions, analytic continuation, entire and meromorphic functions, some results of conformal mapping, including the Riemann mapping theorem.

PREREQUISITE: MATH 2002.03 (MATH 3080.03 recommended)

CROSS-LISTING: MATH 5020.03

**MATH 4025.03: Commutative Algebra I.**

This introduction to commutative algebra includes a selection of the following topics: prime and maximal ideals, primary decomposition, Noetherian rings, Hilbert's Basis Theorem and the Nullstellensatz.

FORMAT: Lecture/3 hours

PREREQUISITE: Math 3030X/Y.06 or equivalent

CROSS-LISTING: MATH 5025.03

**MATH 4045.03: Advanced Algebra I.**

Topics may include: Euclidean rings, principal ideal domains, unique factorization domains, polynomial rings, modules, classification of modules over principal ideal domains, and Jordan and rational canonical forms.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3030X/Y.06

CROSS-LISTING: MATH 5045.03

**MATH 4055.03: Advanced Algebra II.**

Topics may include: groups, group actions, quotient groups, Sylow theorems, field theory and field extensions, and Galois theory.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3030X/Y.06

CROSS-LISTING: MATH 5055.03

**MATH 4065.03: Algebraic Geometry.**

This is a first course in algebraic geometry and will introduce students to the basic properties of affine and projective varieties. Topics covered will include a selection from: local properties of plane curves, elliptic curves, Bezout's Theorem, Riemann-Roch Theorem.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3030X/Y.06

CROSS-LISTING: MATH 5065.03

**MATH 4066.03: Advanced Statistical Theory I.**

This class, together with STAT 5067.03 provides a solid basis in the theory of statistical inference. After a review of some probability and distribution theory, the Bayesian and classical theories of estimation and testing are introduced.

PREREQUISITE: STAT 3460.03 or MATH 3460.03

CROSS-LISTING: MATH 5066.03, STAT 4066.03/5066.03

**MATH 4070.03: Topics in Number Theory.**

The course begins with a detailed discussion of quadratic reciprocity. The main topics from analytic number theory will be arithmetic functions and Dirichlet L-series, resulting in a proof of Dirichlet's theorem on primes in arithmetic progressions. Fundamental properties of algebraic number fields will be discussed, emphasizing quadratic and cyclotomic fields.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3070.03

CROSS-LISTING: MATH 5070.03

**MATH 4090.03: Probability.**

See class description for STAT 4090.03 in the Statistics section of this calendar.

**MATH 4116.03: Cryptography.**

This class is an introduction to modern cryptographic techniques and its mathematical foundations. The material covered includes: elementary number theory and algebra, classical cryptosystems, probability, the Data Encryption Standard, prime number generation and primality tests, public key cryptosystems, and further applications, such as digital signatures and identification.

PREREQUISITE: MATH 1000.03, 1010.03, 2030.03, and at least one full-year mathematics course beyond the first year or permission of the instructor

CROSS-LISTING: CSCI 4116.03

**MATH 4130.03: Analysis of Algorithms.**

See class description for CSCI 4113.03 in the Computer Science section of this calendar.

**MATH 4135.03: Introduction to Category Theory.**

Categories, functions, natural transformations and adjointness are introduced with emphasis on examples drawn from undergraduate Mathematics and theoretical Computer Science. The calculus of diagram chasing, limits, colimits and Kan extensions is explored in detail.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3030X/Y.06 or permission of the instructor.

CROSS-LISTING: MATH 5135.03

**MATH 4136.03: Topics in Category Theory.**

Topics of current interest in category theory will be discussed with an emphasis on open problems. No previous knowledge of category theory is required. The necessary concepts will be discussed in the context of their applications. However, a certain familiarity with the basic concepts of modern abstract mathematics such as found in courses on algebra and topology would be an asset.

PREREQUISITE: Math 3030X/Y.06 and consent of instructor

CROSS-LISTING: MATH 5136.03

**MATH 4140.03: Introduction to Functional Analysis.**

An introduction to the basic principles of functional analysis including the following topics: infinite dimensional vector spaces, normed spaces, inner-product spaces, Banach and Hilbert spaces, linear and continuous linear functionals, the Hahn-Banach Theorem, the principle of uniform boundedness, dual spaces, weak\* topology, and the Alaoglu theorem, the open mapping and closed graph theorems, and consequences and applications.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2135.03 and 3500X/Y.06

CROSS-LISTING: MATH 5140.03

**MATH 4165.03: Mathematical Methods of Physics.**

Topics discussed include: complex variable theory, Fourier and Laplace transform techniques, special functions, partial differential equations.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3120.03, or permission of instructor.

CROSS-LISTING: PHYC 4160.03, PHYC 5160.03

**MATH 4170.03: General Topology.**

An introduction to topological spaces that includes the following topics: classification in terms of cardinality of bases, separation, etc., product spaces, Tychonoff theorem, compactness, compactifications, Tychonoff spaces, metrization.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3500X/Y.06

CROSS-LISTING: MATH 5170.03

**MATH 4175.03: Topics in Mathematical Physics.**

This class is a continuation of MATH 4165.03 and deals with special topics in mathematical physics selected from areas such as the green's function technique for solving ordinary and partial differential equations, scattering theory and phase shift analysis, diffraction theory, group theory, tensor analysis and general relativity.

PREREQUISITE: PHYC 4165.03

CROSS-LISTING: PHYC 4170.03, PHYC 5170.03

**MATH 4180.03: Introduction to Algebraic Topology.**

An introduction to algebraic topology including the following topics: the definitions, properties and methods of computation of the fundamental group of a topological space; simplicial, singular and cellular homology groups; basic properties and methods of computation of homology groups; a selection of application such as the classification of surfaces and fixed point theorems.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 4170.03

CROSS-LISTING: MATH 5180.03

**MATH 4190.03: Ordinary Differential Equations.**

A graduate-level introduction to ordinary differential equations. Topics covered include flows, existence and uniqueness theorems, continuity of solutions, coordinate transformations, symmetry methods and reductions, linearization of dynamical systems, and ODEs on manifolds.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3120.03 and MATH 2505.03 or permission of the instructor

CROSS-LISTING: MATH 5190.03

**MATH 4195.03: Topics in Topology and Functional Analysis.**

Topology is the mathematical subject that allows one to make precise the concept of continuity. Rudin defines functional analysis as the study of certain topological-algebraic structures and of the methods by which knowledge of these structures can be applied to analytic problems. He adds that the subject is huge and growing rapidly and, accordingly, we offer a "topics" class.

RECOMMENDED: MATH 3030X/Y.06

CROSS-LISTING: MATH 5195.03

**MATH 4200.03: Ordinary Differential Equations - Qualitative Theory.**

Qualitative theory is concerned determining the behaviour of solutions of differential equations without finding explicit solutions. Topics are selected from Liapunov stability theory, stable and unstable manifolds of singular points and periodic solutions, classification of plane singular points, structural stability and Hamiltonian systems. Other topics at the instructor's discretion.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 4190.03

CROSS-LISTING: MATH 5200.03

**MATH 4220.03: Introduction to Partial Differential Equations.**

This course is a basic introduction to the theory of partial differential equations. Topics covered include: modelling physical systems, method of characteristics, Laplace, wave and heat equations, separation of variables, eigenfunction expansions, integral transforms, maximum principles and Ritz Raleigh theory.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2120.03 or MATH 3110.03

CROSS-LISTING: MATH 5220.03

**MATH 4230.03: Partial Differential Equations.**

This course will provide students with an introduction to advanced topics in partial differential equations in a variety of settings. Topics may include: reaction diffusion systems, pattern formation, numerical methods, applications to physical sciences, variational methods, Sobolev Theory.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3120.03 or permission of the instructor

CROSS-LISTING: MATH 5230.03

**MATH 4250.03: Asymptotic Analysis.**

Most mathematical models of physical systems cannot be solved exactly. Often such systems have a naturally occurring small parameter which may be exploited using asymptotic analysis techniques. In this course, we will study a variety of physical systems which illustrate many of the common approaches used in asymptotic analysis. Focus will be on applications to ordinary and partial differential equations.

FORMAT: Lecture 3 hours

PREREQUISITE: (MATH 2002.03 OR MATH 2120.03) AND MATH 2030.03

**MATH 4320.03: Combinatorial Optimization.**

Various graph algorithms will be presented and analyzed. Specifically we will treat the algorithms for the problems: minimum spanning tree, shortest path, maximal flow, minimum cost flow, maximum matching. For each problem, various algorithms will be presented and compared. The link with Linear Programming, especially LP-Duality, will receive special attention.

PREREQUISITE: MATH 2030.03, some knowledge of linear programming and the theory of algorithms is recommended.

CROSS-LISTING: MATH 5320.03

**MATH 4330.03: Topics in Graph Theory.**

This class is intended for math and computer science students. Items to be selected from the following topics: graphs and matrices, graphs and groups, network analysis, extremal graph theory, enumeration problems, and algebraic methods in graph theory.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3330.03 or CSCI 3110.03 or permission of the instructor

CROSS-LISTING: MATH 5330.03, CSCI 4115.03

**MATH 4340.3: Discrete Random Structures.**

This course will cover basics of probability and stochastic processes, and then focus on areas where probability and combinatorics interact. Topics include: probabilistic method, stochastic graph models for complex networks, probabilistic algorithms. Probabilistic techniques include: expectation and concentration of random variables, stochastic processes, conditional expectation, Markov chains, martingales, branching processes.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 4330.03/5330.03 or MATH 2113.03 or permission from the instructor

CROSS-LISTING: MATH 5340.03

**MATH 4360.03: Combinatorial Modeling.**

This course introduces a common framework for combinatorial structures (graphs, digraphs, hypergraphs, posets, preorders, lattices, finite topologies, simplicial complexes), with an emphasis on how to model these structures with other fields of mathematics, such as matrix theory and linear algebra, commutative algebra, topology, analysis, probability and logic.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2060.03 and MATH 3030X/Y.06

CROSS-LISTING: MATH 5360.03

**MATH 4370.03: Combinatorics: Techniques and Structures**

We introduce counting techniques and combinatorial structures, and show their application and use in all branches of mathematics. Counting techniques include combinations and permutations, the pigeonhole principle, inclusion/exclusion. Advanced techniques include recurrence relations, generating functions and power series. Structures include partial orders, set systems and transversals, and finite geometries

FORMAT: Lecture

PREREQUISITE: MATH 2112.03 or MATH 2051.03 or MATH 3070.03 or MATH 3330.03

CROSS-LISTING: MATH 5370.03

**MATH 4410.03: Cosmology.**

A self-contained introduction to cosmology will be given and no prior knowledge of differential geometry or general relativity will be assumed (although some knowledge of elementary differential equations will be useful). A cosmological model is a model of the universe, as a whole, on the largest scales; the emphasis of the class will be on the modelling aspects of cosmology.

FORMAT: Lecture 3 hours

PREREQUISITE: Instructor's permission

CROSS-LISTING: MATH 5410.03, PHYC 4660.03/5660.03

**MATH 4500.03: Introduction to Harmonic Analysis.**

This course covers the basic elements of L-spaces, convolution, interpolation, maximal functions, Fourier analysis of functions, and the theory of generalized functions, or distributions. Further topics may include L2-Sobolev spaces, boundary values of harmonic functions, spherical harmonics, singular integral operators, or multipliers.

FORMAT: Lecture

PREREQUISITE: MATH 4010/5010, or MATH 3500 with permission of instructor

CROSS-LISTING: MATH 5500.03

**MATH 4530.03: Differential Geometry.**

This course is a self-contained introduction to manifold theory. Topics include: elements of surface theory, the tangent space, vector fields, differential forms and more general tensors, the Lie derivative, connections, Riemannian geometry, applications in mechanics and general relativity.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3045.03 or 3500.03 or permission of the instructor

CROSS-LISTING: MATH 5530.03

**MATH 4540.03: Applied Analysis.**

This course is an introduction to the methods of modern applied analysis. This course is suitable for advanced undergraduate and graduate students. The topics include classification of planar dynamical systems, nonlinear dynamics, and equilibria, global nonlinear techniques, closed orbits and limit cycles. Calculus of Variations: first and second variations, symmetries, conservation laws and Noether's theorem, Hamiltonian formalism. Time permitting, other topics in Applied Analysis such as tensor calculus will be covered.

FORMAT: Lecture

PREREQUISITE: MATH 3120.03 or consent of instructor

CROSS-LISTING: MATH 5540.03

**MATH 4650.03: General Relativity.**

A review of differential geometry will be given followed by an introduction to the general theory of relativity. Various topics will be discussed, including: linearized theory and gravitational radiation, spherically symmetric metrics and the Schwarzschild solution, gravitational collapse, black holes, and cosmology.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3045.03 or permission of the instructor

CROSS-LISTING: MATH 5650.03, PHYC 4650.03/5650.03

**MATH 4660.03: Automata and Computability.**

See class description for CSCI 4112.03 in the Computer Science section of this calendar.

**MATH 4680.03: Topics in Logic and Computation.**

This course covers topics of current interest in logic and/or the foundations of computation. Suitable topics include: formal logic, soundness and completeness, Gödel's incompleteness theorem, formal set theory, the Zermelo-Fraenkel axioms, non-standard models, independence of axioms, lambda calculus and foundations of functional programming languages, proof theory, semantics.

NOTE: Please consult the instructor for the topics offered in a particular year. This course is suitable for advanced undergraduates and graduate students from both mathematics and computer science.

FORMAT: Seminar

PREREQUISITE: MATH 3030X/Y.06 or MATH 3500X/Y.06, or CSCI 3110.03 and CSCI 3136.03, or permission of the instructor.

Suggested prerequisites for math students are algebra or analysis at honours undergraduate level. Students from computer science should be familiar with formal language theory and concepts of programming languages. All students should be comfortable with writing mathematical proofs. When in doubt about prerequisites, please consult the instructor.

CROSS-LISTING: MATH 5680.03

### **MATH 4800.03: Introduction to Mathematical Research.**

This class is intended to introduce students to the science and methodology of research in the mathematical sciences. The class will be organized around topics from a wide spectrum of mathematics from which students will be guided to investigate open problems. Conjectures will be formulated and evidence will be developed.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2002.03, 2040.03 or 2135.03; MATH 3030X/Y.06 or permission of the instructor

CROSS-LISTING: MATH 5800.03, CSCI 4800.03

### **MATH 4900.03: Combinatorial Game Theory.**

This course looks at 2-player games of strategy where there are no chance devices and both players have perfect information. The surprising mathematical structure underlying these games will be introduced along with the evaluation scheme and its application to specific games in the classes of hot, all-small and impartial games.

PREREQUISITE: MATH 2030.03/2040.03, 2001.03/2002.03

CROSS-LISTING: MATH 5900.03

### **MATH 4950.03: Honours Research Project.**

A requirement for the mathematics honours degree, this course consists of a supervised research project culminating in a written report and an oral presentation in the honours seminar. Enrollment must be approved by the mathematics honours coordinator.

NOTE: Students will be required to take two full 4000-level classes in addition to this one.

### **MATH 8891.00: Co-op Work-Term I.**

PREREQUISITE: SCIE 2700.03

### **MATH 8892.00: Co-op Work-Term II.**

PREREQUISITE: MATH 8891.00

### **MATH 8893.00: Co-op Work-Term III.**

PREREQUISITE: MATH 8892.00

### **MATH 8894.00: Co-op Work-Term IV.**

PREREQUISITE: MATH 8893.00

## **Microbiology & Immunology**

Murray, L. (494-6933) lois.murray@dal.ca

Stoltz, D. (494-2590) dstoltz@dal.ca

### **Co-op Academic Advisor**

Stoltz, D. (494-2590) dstoltz@dal.ca

### **Professors**

Anderson, R., PhD (Cologne), (Viral Pathogenesis)

Duncan, R., PhD (Guelph) Graduate Studies Coordinator (Molecular Virology)

Forward, K. R., MD (Memorial), FRCP(C), Pathology (Antimicrobial Resistance; Clinical Diagnostic Microbiology)

Hoskin, D. W., PhD (McGill), (Tumour Immunology; Cancer Biology)

Issekutz, T. B., MD (Dalhousie), FRCP(C), Prof., Pediatrics (Lymphocytes in Autoimmune Disease)

Johnston, G. C., PhD (York), (Molecular Genetics: Regulation of Proliferation)

Lee, P. W. K., PhD (Alberta), (Molecular Virology; Cancer Biology)

Lee, S. F., PhD (Guelph) (Oral Microbiology; Microbial Pathogenesis, Mucosal Vaccines)

Lee, T., PhD (Glasgow) (Immunoregulation, Transplantation Immunology)

Lin, T. -J., PhD (Peking) (Mechanisms of Host Defense Against Pathogen Infection)

Marshall, J. S., PhD (Manchester) (Mast Cells in Inflammation and Cancer)

Richardson, C. D., PhD (British Columbia) (Molecular Virology)

Stadnyk, A. W., PhD (McMaster) (Intestinal Inflammation; Cytokines)

Stoltz, D. B., PhD (McMaster) (Biology of Parasitic Insects; Polydnnaviruses)

### **Associate Professors**

Barnes, C., BA, PhD (Dalhousie), Molecular Genetics)

Davidson, R. J., PhD (Manitoba) (Antimicrobial Mechanisms of Action and Resistance)

Faulkner, G., PhD (Dalhousie) (Ultrastructural Analysis of Infection)

Garduno, R., PhD (Victoria) (Intracellular Pathogens)

Haldane, D. J. M., MBChB (Dundee), FRCP(C) (Medical Microbiology)

Issekutz, A. C., MD (Dalhousie), FRCP(C), Prof., Pediatrics (Inflammation)

Johnston, B., PhD (Calgary) (Inflammation and Immune Response)

Li, Y. H., PhD (Manitoba) (Bacteriology and Molecular Biology)

### **Assistant Professors**

Hatchette, T. F., MD (Memorial), Pathology (Clinical Virology and Influenza)

McCormick, C., PhD (British Columbia) (Viral Oncology)

Rohde, J., PhD (British Columbia) (Bacterial Pathogenesis and Ubiquitin)

Thomas, N., PhD (Queen's) (Molecular Bacterial Pathogenesis)

Wang, J., PhD (McMaster) (Host Defense Mechanisms Against Infection and Cancer and Vaccine Development)

### **Senior Instructor**

Murray, L. E., PhD (Dalhousie) (Molecular Genetics)

## I. Introduction

The Department of Microbiology & Immunology is involved in teaching and research in several vital areas of biomedical endeavour including molecular and medical microbiology, virology, immunology and microbial genetics.

The program is designed to familiarize students with the biology and pathogenesis of viruses, bacteria, yeast and multicellular parasitic organisms. Advanced classes deal specifically with selected aspects of virology, molecular mechanisms of pathogenesis, microbial genetics, cell and molecular biology.

A set of classes in molecular genetics has been identified to meet the needs of honours Microbiology or Biochemistry students who hope to pursue further study in molecular and genetic approaches to fundamental problems. These classes provide solid grounding in bacterial and eukaryotic gene structure and function, regulation and evolution, and both practical and theoretical presentations of recombinant DNA methods (genetic engineering).

They can be taken along with classes in metabolism, enzymology, bacteriology, virology and immunology and provide a good practical grounding for fields as diverse as genetic diagnosis and gene therapy, forensics, industrial microbiology and molecular evolution (see below and the Biochemistry listings and consult departmental advisors).

The Department also has a significant teaching program in Cellular and Molecular Immunology. The Immunology program is designed for students interested in fundamental questions in molecular immunology, tumor immunology, autoimmunity or inflammation, and defences against microbial infection.

These programs provide the education needed for graduate studies or for professional activities after graduation in microbiology and/or immunology.

## II. Degree Programs

There are 20 Credit Major and Double Major programs in Microbiology & Immunology but no 15 credit degree is offered. MICI 2100.03 is a prerequisite for most other microbiology classes offered in this Department. Students interested in an Honours program (see below) must consult a departmental advisor, preferably prior to registration for second year classes. Biology Majors are advised that many classes in Microbiology & Immunology do count toward a BSc in Biology even though they are not cross-listed with the Biology Department.

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, page 131 of this calendar.

The Department wishes to draw the attention of students to the class, SCIE 1111.03, which fulfills the writing class requirement for BSc students. However, the "subject groupings" requirements must still be met. The subject groupings are normally satisfied within the first term credits.

### A. BSc (20 credit) Honours in Microbiology & Immunology

This program is designed to give students the best possible preparation for future graduate work or a professional career in microbiology or immunology. Students applying for admission to this program must normally have obtained a grade of B or better in first year BIOL and CHEM and/or an above median grade in DISP (Dalhousie Integrated Science Program). Students must consult an undergraduate advisor.

#### Departmental Requirements

##### 1000 level

- BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03
- CHEM 1011.03/1012.03
- MATH 1000.03 or MATH 1215.03 and MATH 1010.03 or STAT 1060.03

##### 2000 level

- MICI 2100.03
- BIOL 2020.03
- BIOL 2030.03
- BIOC 2300.03 and 2610.03
- CHEM 2401.03 and CHEM 2402.03

##### 3000 level

- BIOC 3400.03

- MICI 3114.03
- MICI 3115.03
- MICI 3119.03

##### 4000 level

- MICI 4900.06
- One half credit from a fourth year level MICI class
- One half credit from any of the fourth year level classes listed below

A minimum of one and a half additional credits (to make a total of nine) are to be taken from the list provided below (the classes listed are all considered to belong to the discipline of microbiology and/or immunology):

- MICI 2115.03, 3024.03, 3620.03, 4027.03, 4033.03, 4100.03, 4114.03, 4115.03, 4116.03, 4118.03, 4218.03, 4302.03
- BIOC 4010.03, 4403.03, 4404.03, 4501.03, 4835.03
- BIOL 2004.03, 3101.03, 3102.03, 3322.03
- PSYO/NESC 3180.03
- FOSC 3080.03, BIOE 3241.03

Notes:

1. In the following core classes, MICI 2100.03, 3114.03, 3115.03, 3119.03 and MICI 4900.06 -- you must achieve a minimum grade of B in five and a minimum grade of B- in the sixth class.
2. The honours research thesis (MICI 4900.06) for Microbiology and Immunology Honours students will normally be done under the supervision of a Microbiology and Immunology faculty member (including joint and cross appointments). Microbiology and Immunology Honours students who wish to undertake their honours research project in another department will need to first have the project approved by the Undergraduate Studies Committee. Microbiology and Immunology and Biochemistry and Molecular Biology Combined Honours students may undertake honours research in the Microbiology and Immunology or Biochemistry and Molecular Biology Departments.
3. Students should also note that certain advanced classes require that a particular grade be achieved in the prerequisite class and/or that permission of the instructor be obtained for registration in the class, or both.
4. If you do not meet the prerequisites listed for a class (or fail to obtain permission from an instructor), the Registrar's Office will be informed and your name will be deleted from the class list.
5. If Banner lists two or more tutorial sessions, sign up for only one of them.

### B. BSc with Combined Honours in Microbiology & Immunology and Biochemistry & Molecular Biology

Students in this program must complete 11 credits above the 1000 level in Microbiology & Immunology and Biochemistry & Molecular Biology.

#### Departmental Classes Required at Upper Levels

- CHEM 2401.03 and 2402.03
- BIOC 2300.03 and 2610.03
- MICI 2100.03
- BIOL 2020.03, 2030.03
- BIOC 3300.03, 3400.03, 3700.03
- MICI 3114.03, 3115.03, 3119.03
- BIOC 4603.03
- one credit from BIOC 40XX, 43XX, 44XX, 45XX, or 47XX
- half credit from MICI 4XXX

Either MICI 4900.06 or BIOC 4604.03 and BIOC 4605.03 (either of which, with approval, can be carried out in either department).

### C. BSc Combined Honours in Microbiology & Immunology and Biology

Students in this program must complete the core requirements of each department. Students are required to maintain an average grade of B in core classes with no grade lower than B- (see note 1 above). BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03 or BIOL 1001.06 should be taken in year 1, and MICI 2100.03 in year two. Research thesis work can be carried out in either Department, subject to approval of the Undergraduate Studies Committee.

## D. 20 Credit Major and Double Major in Microbiology & Immunology

Students should consult a departmental Undergraduate Studies Advisor.

### Departmental Core Classes Required

#### 1000 level

- BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03
- CHEM 1011.03/1012.03
- MATH 1000.03 or MATH 1215.03 and MATH 1010.03 or STAT 1060.03

#### 2000 level

- MICI 2100.03, BIOL 2020.03, BIOL 2030.0, BIOC 2300.03, BIOC 2610.03, CHEM 2401.03 and CHEM 2402.03.

#### 3000 level

- BIOC 3400.03, MICI 3114.03, MICI 3115.03 and MICI 3119.03 with a grade of C- or better.

#### 4000 level

- One half credit from a MICI 4th year level class (i.e. from MICI 4027.03, 4033.03, 4100.03, 4114.03, 4115.03, 4116.03, 4118.03, 4218.03, 4302.03)

Students in a major degree program are required to have a total of 3.5 credits in the discipline beyond the 2000 level.

Students in a double major degree program require two credits beyond the 2000 level in each of the two disciplines.

#### Notes:

Students should be aware that certain advanced classes require a particular grade to be achieved in the prerequisite class and/or permission of the instructor to be obtained for registration in the class or both.

## E. Co-op Education in Microbiology & Immunology

Co-operative Education in Science (Science Co-op) is a program in which academic study is combined with career related work experience. Students alternate three to four work terms throughout their academic study terms and graduate with a Bachelor of Science Co-op. Science Co-op enables students to apply their knowledge directly while providing them with work experience that assists in making educated career choices. Students typically apply to join Science Co-op before their second year of study. If accepted into the Science Co-op program, students are required to register for and attend the Science Co-op Seminar Series (SCIE 2800.00) in the fall term of the year they join.

See the "Co-operative Education in Science" section of this calendar, or <http://www.sciencecoop.dal.ca>, for information on Science Co-op such as Science Co-op requirements, eligibility, how to apply, deadlines and other related information. Note that not all students who apply will be admitted; much will depend on predicted job availability. Admission into Microbiology & Immunology Co-op requires permission from the Microbiology & Immunology Co-op Academic Advisor and Science Co-op Director. In addition, a GPA of 3.30 in first year classes is required, as is a grade of at least B in MICI 2100.03. Students must also maintain a cumulative GPA of 3.30 for continuance in the program. Please consult with the Microbiology & Immunology Co-op Academic Advisor regarding possible work term sequences.

For further information, please visit the Co-op website at <http://www.sciencecoop.dal.ca>

Co-op Academic Advisor in Microbiology/Immunology:

Dr. Stoltz (494-2590) [dstoltz@dal.ca](mailto:dstoltz@dal.ca)

## F. Minors and Other Programs

For students wishing to pursue a minor in Microbiology & Immunology (this is for non-Microbiology & Immunology majors only), the basic requirement is three full credits in Microbiology & Immunology at or above the 2000 level; this must include MICI 2100. Also required, as pre-requisite classes: BIOL 2020 and 2030, BIOC 2300, and either CHEM 2401/2402 or CHEM 2441.

Students wishing to pursue a minor in another subject should consult with an academic advisor, and see the College of Arts and Science Degree Requirements section of the Undergraduate Calendar, starting on page 131, as well as the particular subject area of the Calendar.

## III. Class Descriptions

For more detailed information on the following classes please see the departmental webpage <http://microbiology.medicine.dal.ca>

NOTE: Owing to the combined pressures of student numbers and a dearth of available space, the names of students absent from the first day of class may be deleted from class lists; students are therefore advised that being signed into a class is no guarantee of continued registration.

### MICI 1050.03: Basic Microbiology and Immunology for Pharmacy.

This course is only for pharmacy students and involves problem based learning tutorials, lectures and laboratory sessions (demonstrations and exercises). Topics include: concepts of antibiotics and immunity, basic principles of microbial structure, physiology, and genetics in relation to microbial pathogenesis.

INSTRUCTOR(S): L. Murray

FORMAT: Lecture 3 hours, tutorial 6 hours. 3 weeks

PREREQUISITE: BIOL 1000X/Y.06 or (BIOL 1010 or BIOL 1020 and BIOL 1011 or BIOL 1021) or instructor's consent

### MICI 1100.03: Health Science Microbiology.

An introduction to microbiology and infectious diseases designed for healthcare professionals. It includes a study of the structure and physiology of microorganisms, the ways microorganisms cause disease in man and the way they affect man's well being.

NOTE: This class is also offered by distance education.

INSTRUCTOR(S): D. Haldane (L. Veinotte for distance education)

FORMAT: Lecture 3 hours

RESTRICTION: This class is restricted to students in 2nd Year Nursing; Kinesiology and Diagnostic Cytology.

### MICI 1200.03: Introduction to General and Oral Microbiology.

See class description in the Dental Hygiene section of the Dentistry, Law and Medicine Calendar (DEHY 2850.03).

### MICI 2100.03: Introductory Microbiology and Immunology.

An introduction to the basic concepts of microbiology and immunology. Topics include: structure, genetics and biology of microorganisms, basic immunology and host defence mechanisms. The course is designed to interrelate the major research themes within the Department (bacteriology and microbial pathogenesis, immunology, microbial and molecular genetics, virology and cancer biology).

NOTE: Students cannot enter this class after labs have commenced.

INSTRUCTOR(S): N. Thomas

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: Grade of B or better in BIOL 1010.03 and 1011.03, CHEM 1011.03 and CHEM 1012.03

### MICI 2115.03: Human Organs and Tissues.

Using a histology approach, students look at how tissues and organs are constructed and function at the cellular level normally and in disease. The course does not cover all histology topics. Instead, the subject matter has been selected for its relevance and potential for complementing advanced courses in microbiology/immunology.

INSTRUCTOR(S): R. Garduno, J. F. Legare, R. Liwski, S. Pasternak, P. Marcato, K. West

FORMAT: Lecture 3 hours

PREREQUISITE: Grade of B or better in MICI 2100.03

### MICI 3024.03: Microscopy.

Biological ultrastructural analysis concentrating on transmission and scanning electron microscopy. Topics include: physical and chemical principles governing technical procedures such as fixation, staining, freeze-fracture, immunocytochemistry, autoradiography, X-ray microanalysis and photography. During laboratory periods, students have the opportunity through individual projects to participate in some techniques covered in lectures.

INSTRUCTOR(S): G.T. Faulkner, R. Garduno, D. O'Neil, D. Stoltz, R. Garduno, P. Li

FORMAT: Lecture 3 hours, lab project

PREREQUISITE: A grade of B or better in MICI 2100.03 and BIOL 2020.03

CROSS-LISTING: BIOL 3024.03

**MICI 3114.03: Virology.**

Viruses play important roles in infectious diseases and cancer as well as in model systems for gene regulation, molecular evolution and gene therapy. Topics include: virus structure, assays, classification, gene organization and expression, host-cell interactions, cell transformation, gene therapy and molecular mechanisms of pathogenesis.

INSTRUCTOR(S): R. Anderson, R. Duncan, D.B. Stoltz

FORMAT: Lecture 3 hours, tutorial 1 hour

PREREQUISITE: Includes all of MICI 2100.03, BIOC 2300.03 and BIOC 2610.03, BIOL 2020.03 and BIOL 2030.03 (a B average in these classes with a minimum B- in any one). BIOC 3400.03 must be taken either prior to or concurrently with this class; the same grade requirement applies.

**MICI 3115.03: Immunology.**

An introduction to cellular and molecular immunology. Topics include: cells and tissues of the immune system, the structure and synthesis of antibodies, complement pathways, lymphocyte subsets and their functions, hypersensitivity reactions, and the genetics of the immune response.

INSTRUCTOR(S): D.W. Hoskin, A. Stadnyk

FORMAT: Lecture 3 hours

PREREQUISITE: Includes all of MICI 2100.03, BIOC 2300.03 and BIOC 2610.03, BIOL 2020.03 and BIOL 2030.03 (a B average in these classes with a minimum B- in any one class)

**MICI 3119.03: Physiology of the Prokaryotic Cell.**

An introduction to the bacterial physiological processes required for interactions with other organisms and the environment. Topics include: molecular architecture and assembly of bacterial cell components, metabolism and energy production, utilization of energy, adaptation responses to host and environmental challenges, and host-pathogen interactions.

INSTRUCTOR(S): S. F. Lee, J. Rohde

PREREQUISITE: MICI 2100, BIOC 2300 and BIOC 2610, BIOL 2020 and 2030, (a B average in these classes with a minimum B- in any one).

**MICI 3620.03: Experiential Learning in Microbiology and Immunology.**

This lab-based class is designed to give students an introduction to general lab procedures, molecular and cell biological techniques in bacterial pathogenesis, cancer cell biology, immunology, molecular genetics or virology. In collaboration with the research supervisor and the course coordinator, students will draft a learning agreement specifying learning outcomes and how these will be achieved. NOTE: To register in this class students will need to find a research supervisor and receive approval from the Undergraduate Committee.

FORMAT: A minimum of 84 hours per term, normally to be carried out over 1 day per week for the term.

PREREQUISITE: Includes all of MICI 2100.03, BIOC 2300.03, BIOC 2610.03, BIOL 2020.03, BIOL 2030.03 (a B average in these classes with a minimum of a B- in any one).

EXCLUSION: The following may not be used towards MICI 3620: lab work that is part of another scheduled class, co-op workterms, and paid employment. Only one experiential learning course per degree is permitted. The class will normally be restricted to students registered in a Majors or Honours degree in Microbiology and Immunology; any other students interested should consult the course coordinator (C. Barnes); students may not take MICI 3620 concurrently with MICI 4900, MICI 4700, MICI 4901, MICI 4902, or a co-op work term.

**MICI 4027.03: Molecular Mechanisms of Cancer.**

This advanced course focuses on the molecular mechanisms of cancer and consists of lectures and student presentations based on review articles and current research papers. Topics include: receptors and downstream signaling, oncogenes and tumor suppressors, cancer metastasis and angiogenesis, cell cycle control, and apoptosis

INSTRUCTOR(S): P. Lee and D. Waisman

FORMAT: Lecture/student presentations/discussion

PREREQUISITE: Minimum grades of B+ in a 3000 level Microbiology, Pathology or Biochemistry class. Permission of instructor required.

CROSS-LISTING: MICI 5027.03/PATH 5027.03/BIOC 4027.03

**MICI 4033.03: Advanced Microbial Genetics.**

This advanced class focuses on select aspects on bacterial gene regulation including bacterial viruses. Topics include gene transfer, transposon biology, bacterial cell signaling, activators and repressors, molecular and chemical approaches to genetic analysis and regulation of bacterial gene expression.

INSTRUCTOR(S): J. Rohde and C. Barnes

FORMAT: Lecture 3 hours

PREREQUISITE: A grade of B- or better in MICI 3119.03 or instructor's consent is required.

**MICI 4100.03: Processes and Mediators of Inflammation.**

This advanced course focuses on the cellular and molecular mechanisms of inflammation and consists of lectures and student presentations based on review articles and current research papers. Topics include: inflammatory mediators and receptors, complement, steroids, tissue remodeling and transplant modulation. Current research questions and emerging treatments are emphasized.

INSTRUCTOR(S): B. Johnston

FORMAT: Lecture/presentation/discussion

PREREQUISITE: MICI 3115.03 with a grade of B+ or better and instructor's consent is required

CROSS-LISTING: MICI 5100.03, PATH 5100.03

**MICI 4114.03: Advanced Topics in Molecular and Medical Virology.**

This advanced course focuses on selected aspects of molecular and medical virology and consists of lectures and student presentations based on review articles and current research papers. Topics include: Hepatitis C virus and innate immunity, influenza virus pathogenesis, virus interactions with host cells, viruses as vectors for gene therapy and vaccines.

INSTRUCTOR(S): R. Duncan

FORMAT: Lecture/presentation/discussion 3 hours

PREREQUISITE: Students enrol in the Fall semester, but must attend the first class where final admittance is determined. Restricted enrollment based on performance in MICI 3114.03 (minimum B+).

CROSS-LISTING: MICI 5114.03

**MICI 4115.03: Immunology of Host Resistance.**

This advanced course focuses on mechanisms involved in the host immune response to pathogens and tumour cells and consists of lectures and student presentations based on review articles and current research papers. Topics also include: allergic inflammation and transplantation immunology.

INSTRUCTOR(S): J. Wang and Microbiology and Immunology faculty members

FORMAT: Lecture/discussion 3 hours

PREREQUISITE: Minimum grade of B+ in MICI 3115.03 or instructor's consent

**MICI 4116.03: Current Topics in Mucosal Immunology.**

This advanced course focuses on the mucosal immune system, which maintains a state of tolerance to environmental antigens while mounting a strong immune response to infectious agents. The course consists of lectures and student presentations based on review articles and research papers. Topics include: immune mechanisms in the gastrointestinal tract and respiratory and genitourinary systems.

INSTRUCTOR(S): A. Stadnyk

PREREQUISITE: MICI 3115.03 with a grade of B+ or better or instructor's consent

CROSS-LISTING: MICI 5116.03

**MICI 4118.03: Molecular Bacterial Pathogenesis.**

This advanced course focuses on the molecular basis of bacterial pathogenesis and consists of lectures and student presentations based on landmark articles and current research papers. Topics include: the regulation of genes encoding virulence factors, the function of these factors in surface colonization, invasion, intracellular growth and toxin production.

INSTRUCTOR(S): R. Garduno

PREREQUISITE: MICI 3119.03

CROSS-LISTING: MICI 5118.03

**MICI 4218.: Clinical Bacteriology.**

This advanced course covers all aspects of clinical microbiology including bacteriology, virology, parasitology, mycology and molecular diagnostics. The emphasis will be placed on bacteriology. Topics include epidemiology and transmission, laboratory management and identification, antimicrobial testing and resistance, treatment and prevention of infectious diseases.

INSTRUCTOR(S): R. Davidson

FORMAT: Lecture

PREREQUISITE: A grade of B- or better in MICI 3119.03 or Instructor's consent.

EXCLUSION: MICI 3118

**MICI 4302.03: Molecular Immunology.**

This advanced course focuses on understanding the generation and expression of immune responses. Topics include: regulation of cytokines, antibody diversity by immunoglobulin gene rearrangement, course switching, structure/function of cell surface receptors including the T cell antigen receptor, MHC and adhesion molecules, receptor signaling and the genetics of immune regulation.

INSTRUCTOR(S): T.J. Lin

FORMAT: Lecture/student presentations/discussion

PREREQUISITE: MICI 3115.03 with a grade of B+ or instructor's consent

CROSS-LISTING: BIOL 4302.03/5302.03, MICI 5302.03

**MICI 4403.03: Genes and Genomes.**

See class description for BIOC 4403.03 in the Biochemistry and Molecular Biology section of this calendar.

CROSS-LISTING: BIOC 4403.03, BIOL 4010.03, BIOC 5403.03

**MICI 4404.03: Gene Expression.**

See class description for BIOC 4404.03 in the Biochemistry and Molecular Biology section of this calendar.

**MICI 4700X/Y.06: Directed Research Project.**

Students spend at least one day per week performing laboratory research in the lab of approved departmental faculty. This course is not for students in a regular BSc program. Approval is required from the departmental undergraduate committee.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

INSTRUCTOR(S): Undergraduate Studies Committee

FORMAT: Lab 1 day per week

PREREQUISITE: Permission of the Undergraduate Studies Committee and a member of the Department who will serve as a supervisor. At least a B average for MICI, 3114.03, 3115.03 and 3119.03 (or equivalent)

**MICI 4701.03: Advanced Topics in Microbiology and Immunology.**

This advanced course is an independent studies course that is not part of the regular BSc program. Approval is required from the departmental undergraduate committee.

INSTRUCTOR(S): Undergraduate Studies Committee

FORMAT: Independent study

PREREQUISITE: Permission of the Undergraduate Studies Committee and a member of the Department who will supervise the independent study program.

**MICI 4702.03: Advanced Topics in Microbiology and Immunology.**

This advanced course is an independent studies course that is not part of the regular BSc program. Approval is required from the departmental undergraduate committee.

INSTRUCTOR(S): Undergraduate Studies Committee

FORMAT: Independent study

PREREQUISITE: Permission of the Undergraduate Studies Committee and a member of the Department who will supervise the independent study program.

**MICI 4900X/Y.06: Honours Research and Thesis.**

This advanced course requires at least one day per week of laboratory research in the lab of approved departmental faculty. This course is for students in a MICI or combined MICI BSc Honour's program. Students must meet with the MICI Undergraduate Coordinator prior to registering for the course.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

INSTRUCTOR(S): Undergraduate Studies Coordinator

FORMAT: Lab 1 day per week

PREREQUISITE: Permission of the Undergraduate Studies Committee and a member of the Department who will serve as a supervisor.

**MICI 4901.03/4902.03: Honours Research and Thesis.**

See description for MICI 4900X/Y.06

**MICI 8891.00: Co-op Work Term I.****MICI 8892.00: Co-op Work Term II.****MICI 8893.00: Co-op Work Term III.****MICI 8894.00: Co-op Work Term IV (optional).****MICI 8895.00: Co-op Work Term V (optional).**

# Neuroscience

Location: Department of Psychology and Neuroscience  
Life Sciences Centre  
1355 Oxford Street  
PO Box 15000  
Halifax, NS B3H 4R2

## Dean

Moore, C.L., BA, PhD (Cantab)

## Program Advisors

To contact a program advisor, please go to the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263), telephone (902) 494-3417, or visit the Psychology and Neuroscience website.

For a complete listing of faculty members in the Department of Psychology and Neuroscience, please see the Psychology Program section on page 571.

## I. Introduction

The last four decades have witnessed the emergence of a new, interdisciplinary field called Neuroscience. Its primary goal is the understanding of the brain. Neuroscience is a rapidly developing research area which includes all aspects of the structure and function of nervous systems. Neuroscience involves a variety of experimental strategies to understand nervous systems. These include molecular, biochemical, behavioural, anatomical, physiological, and developmental approaches. Although firmly grounded in the natural sciences, the scope of Neuroscience also encompasses fundamentally important philosophical issues, such as the nature of human thought and its mechanism. The programs outlined below represent all of these approaches, with an emphasis on behaviour as the adaptive product of neural activity. Knowledge obtained from research in Neuroscience is applied to a variety of human health problems, including Alzheimer disease, Parkinson disease, and a variety of drug- or injury-induced behavioural disorders. Research in Neuroscience is also contributing new information related to the major psychiatric disorders, including affective disorders and the schizophrenias.

## II. Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, page 131 of this calendar.

### A. BSc or BA (20 credit) Honours in Neuroscience

This program, which is offered through the Department of Psychology and Neuroscience, is intended to serve as a preparation for graduate work in Neuroscience, biological psychology, medicine, human communication disorders and related fields. Its interdisciplinary nature is reflected in the participation of faculty from several departments in the program.

#### Structure

In the first year of study, students are required to take classes which provide a firm grounding in the physical and biological sciences. In subsequent years, the program includes credits in classes drawn from Neuroscience, Psychology and Biology. These include a number of required core classes that emphasize the acquisition and application of laboratory skills.

It is recommended that students interested in taking an Honours degree in Neuroscience follow the class sequence specified for Honours students. They should consult with Dr. T. Perrot in January of their third year and complete a departmental Honours Application Form. Admission to Honours in January will require a grade of B or better in NESC 2007.03 and an A- average in the last six

completed Neuroscience half credits. Applications may be delayed until the end of the third year, in which case, a grade of B or better in NESC 2007.03 and an A- average in the last nine completed Neuroscience half credits will be required. Potential Honours students should try to locate a thesis advisor and begin laying the groundwork for their thesis research (e.g., background reading, acquiring laboratory methodology) as early as possible in their third year. The supervisor should be a member (or eligible for membership in) the Neuroscience Institute. A detailed description of the Honours application process may be found on the departmental website:

[http://psychology.dal.ca/Programs/Neuroscience\\_Program.php](http://psychology.dal.ca/Programs/Neuroscience_Program.php).

### Grade Requirements

All students wishing to take Psychology/Neuroscience classes numbered 2000 or above for which Introductory Psychology or Introductory Biology or DISP is a prerequisite must have a grade of B- in the required class(es) (PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03, or SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27).

NOTE: PSYO 2501.03 (Statistical Methods I) does not fulfil any part of the Faculty of Science Mathematics requirement.

### Departmental Requirements

#### 1000 level

- MATH 1000.03 (preferred) or MATH 1215.03
- One other half credit in Mathematics (ideally, but not necessarily, MATH 1010.03)
- BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03
- CHEM 1011.03/1012.03
- Either PSYO 1011.03 or 1021.03 and PSYO 1012.03 or 1022.03, or PHYC 1280.03/1290.03 or 1300X/Y.06
- Or in lieu of the above, SCIE 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27

Students are strongly recommended to take both PHYC 1280.03/1290.03 or PHYC 1300X/Y.06 and PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03 prior to finishing their degree.

#### 2000 level

- NESC 2007.03
- NESC 2470.03
- NESC 2570.03
- PSYO 2501.03 (or STAT 2080.03)
- BIOL 2020.03
- Two half credits selected from: NESC 2130.03, 2140.03, 2150.03, 2160.03, 2170.03, BIOC 2300.03, BIOL 2030.03, PHYC 2250.03

#### 3000 level

- Two half credits of laboratory classes selected from NESC 3044.03, 3051.03, 3137.03, 3161.03, 3370.03, 3371.03, 3440.03, 3775.03
- PSYO 3502.03
- Two additional half credits selected from NESC 3043.03, 3052.03, 3131.03, 3132.03, 3133.03, 3134.03, 3162.03, 3165.03, 3180.03, 3190.03, 3227.03, 3237.03, 3260.03, 3264.03, 3270.03, 3670.03, 3770.03, 3790.03, 3970.03, BIOC 3200.03, BIOL 3020.03

#### 4000 level

- NESC 4500X/Y.06
- Two half credits selected from NESC 4000.03, 4007.03, 4050.03, 4070.03, 4130.03, 4160.03, 4170.03, 4177.03, 4185.03, 4230.03, 4374.03, 4376.03, 4740.03
- Two half credits from NESC 3000- or 4000-level classes
- Honours Qualifying Exam

### B. BSc or BA (20 credit) Combined Honours in Neuroscience

It is possible for students to take an Honours degree combining Neuroscience with another Science subject (other than Psychology) such as Biology or Biochemistry. Students proposing to take such a class of study must consult with an Honours advisor in both departments to arrange program details.

**If Neuroscience is chosen as the *primary* subject in a Combined Honours degree, the following classes are required.**

**1000 level**

- MATH 1000.03 (preferred) or MATH 1215.03
- One other half credit in Mathematics (ideally, but not necessarily, MATH 1010.03)
- BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03
- CHEM 1011.03/1012.03
- Either PSYO 1011.03 or 1021.03 and PSYO 1012.03 or 1022.03, or PHYC 1280.03/1290.03 or 1300X/Y.06
- Or, in lieu of the above, SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27 with a B- in the Psychology or Biology component

Students are strongly recommended to take both PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, and PHYC 1280.03/1290.03 or PHYC 1300X/Y.06 prior to finishing their degree.

**2000 level**

- NESC 2007.03
- NESC 2470.03
- NESC 2570.03
- PSYO 2501.03 (or STAT 2080.03)
- BIOL 2020.03\*
- One half credit selected from: NESC 2130.03, 2140.03, 2150.03, 2160.03, 2170.03, BIOC 2300.03, BIOL 2030.03, PHYC 2250.03

**3000 level**

- Two half credits of laboratory classes selected from NESC 3044.03, 3051.03, 3137.03, 3161.03, 3370.03, 3371.03, 3440.03, 3775.03
- PSYO 3502.03
- At least one additional half credit selected from NESC 3043.03, 3052.03, 3131.03, 3132.03, 3133.03, 3134.03, 3162.03, 3165.03, 3180.03, 3190.03, 3227.03, 3237.03, 3260.03, 3264.03, 3270.03, 3670.03, 3770.03, 3790.03, 3970.03, BIOC 3200.03, BIOL 3020.03

**4000 level**

- NESC 4500X/Y.06
- Two half credits selected from NESC 4000.03, 4050.03, 4070.03, 4130.03, 4160.03, 4170.03, 4177.03, 4185.03, 4230.03, 4374.03, 4376.03, 4740.03
- Honours Qualifying Exam

If Neuroscience is chosen as the *secondary* subject in a Combined Honours degree, the following second and third-year classes are required.

**2000 level**

- NESC 2007.03
- NESC 2470.03
- NESC 2570.03
- PSYO 2501.03 (or STAT 2080.03)
- BIOL 2020.03\*

**3000/4000 level**

- Two half credits of laboratory classes selected from NESC 3044.03, 3051.03, 3137.03, 3161.03, 3370.03, 3371.03, 3440.03, 3775.03
- One additional full credit (or two half credits) in Neuroscience classes at the 3000/4000 level

\* If students undertake another program of study that requires BIOL 2020.03, they should substitute another half-credit elective in a Neuroscience topic at the 2000 level for BIOL 2020.03.

**C. BSc or BA (20 credit) Major in Neuroscience**

This program is intended to provide a four-year survey of Neuroscience, and is designed for students not anticipating subsequent experimental graduate-level training in Neuroscience or related disciplines. The Major program thus differs from the Honours program in not having thesis (and related) requirements, and in having fewer credits of required Neuroscience classes in each of the second, third and fourth years.

**Grade Requirements**

All students wishing to take Psychology/Neuroscience classes numbered 2000 or above for which Introductory Psychology or Introductory Biology or DISP is a prerequisite must have a grade of B- in the required class(es) (PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03, or SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27).

Note: For the BSc, a minimum of seven and a maximum of 10 (including four at or above the 3000 level) credits in the Major are required.

**Departmental Requirements****1000 level**

- MATH 1000.03 (preferred) or MATH 1215.03
- One other half credit in Mathematics (ideally, but not necessarily, MATH 1010.03)
- BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03
- CHEM 1011.03/1012.03
- PSYO 1011.03 or 1021.03 and PSYO 1012.03 or 1022.03
- Or, in lieu of the above, SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27

Students are strongly recommended to take PHYC 1280.03/1290.03 or PHYC 1300X/Y.06 prior to finishing their degree.

**2000 level**

- NESC 2007.03
- NESC 2470.03
- NESC 2570.03
- PSYO 2501.03 (or STAT 2080.03)
- BIOL 2020.03
- Two half credits selected from: NESC 2130.03, 2140.03, 2150.03, 2160.03, 2170.03, BIOC 2300.03, BIOL 2030.03, PHYC 2250.03

**3000 /4000 level**

- Two half credits of laboratory classes selected from NESC 3044.03, 3051.03, 3137.03, 3161.03, 3370.03, 3371.03, 3440.03, 3775.03
- Two more half credits selected from NESC 3043.03, 3052.03, 3131.03, 3132.03, 3133.03, 3134.03, 3162.03, 3165.03, 3180.03, 3190.03, 3227.03, 3237.03, 3260.03, 3264.03, 3270.03, 3670.03, 3770.03, 3790.03, 3970.03, 4374.03, 4376.03
- Two additional full credits (or four half credits) in Neuroscience classes at the 3000/4000 level

Note: The following can be counted as NESC classes: BIOC 2300.03, 3200.03, BIOL 2030.03, 3020.03, PHYC 2250.03.

**D. BSc or BA (20 credit) Double Major in Neuroscience**

It is possible for students to take a degree combining a Major in Neuroscience with another subject (other than Psychology) such as Biology or Biochemistry.

If Neuroscience is chosen as the *primary* subject in a Double Major degree, the following classes are required.

**1000 level**

- MATH 1000.03 (preferred) or MATH 1215.03
- One other half credit in Mathematics (ideally, but not necessarily, MATH 1010.03)
- BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03
- CHEM 1011.03/1012.03
- PSYO 1011.03 or 1021.03 and PSYO 1012.03 or 1022.03
- Or, in lieu of the above, SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27

Students are strongly recommended to take PHYC 1280.03/1290.03 or PHYC 1300X/Y.06 prior to finishing their degree.

**2000 level**

- NESC 2007.03
- NESC 2470.03
- NESC 2570.03
- PSYO 2501.03 (or STAT 2080.03)
- BIOL 2020.03\*

**3000/4000 level**

- Two half credits of laboratory classes selected from NESC 3044.03, 3051.03, 3137.03, 3161.03, 3370.03, 3371.03, 3440.03, 3775.03
- Two more half credits selected from NESC 3043.03, 3052.03, 3131.03, 3132.03, 3133.03, 3134.03, 3162.03, 3165.03, 3180.03, 3190.03, 3227.03, 3237.03, 3260.03, 3264.03, 3270.03, 3670.03, 3770.03, 3790.03, 3970.03, 4374.03, 4376.03
- One additional full credit (or two half credits) in Neuroscience classes at the 3000/4000 level

Note: The following can be counted as NESC classes: BIOC 2300.03, 3200.03, BIOL 2030.03, 3020.03, PHYC 2250.03.

If Neuroscience is chosen as the *secondary* subject in a Double Major degree, the following classes are required.

#### 1000 level

- MATH 1000.03 (preferred) or MATH 1215.03
- One other half credit in Mathematics (ideally, but not necessarily, MATH 1010.03)
- BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03
- CHEM 1011.03/1012.03
- PSYO 1011.03 or 1021.03 and PSYO 1012.03 or 1022.03
- Or, in lieu of the above, SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27

Students are strongly recommended to take PHYC 1280.03/1290.03 or PHYC 1300X/Y.06 prior to finishing their degree.

#### 2000 level

- NESC 2007.03
- NESC 2470.03
- NESC 2570.03
- PSYO 2501.03 (or STAT 2080.03)
- BIOL 2020.03\*

#### 3000/4000 level

- Two half credits of laboratory classes selected from NESC 3044.03, 3051.03, 3137.03, 3161.03, 3370.03, 3371.03, 3440.03, 3775.03
- One additional full credit (or two half credits) in Neuroscience classes at the 3000/4000 level

\* If students undertake, as part of a Double Major degree, another program of study that requires BIOL 2020.03, they should substitute another half-credit elective in a Neuroscience topic at the 2000 level for BIOL 2020.03.

### E. Neuroscience Minor

Students in a 20 credit degree programs other than Neuroscience and Psychology may choose to complete a Minor Program in Neuroscience. A Minor in Neuroscience is offered to students enrolled in other programs within the Faculty of Science and to students from other Faculties, provided they complete any three full credits in Neuroscience classes above the 1000 level other than NESC 2007.03 which is restricted to students in the Major or Honours program. Note that if a Minor is added to a Double Major or a Combined Honours program, students may find that they need to take more than 20 credits to complete all of their degree requirements.

### F. Minor Programs available to students enrolled in a Major or Honours Neuroscience Program

Minor programs allow students to develop subject specialities outside their main subject of study. Minors are normally added to a four year (20 credit) Major or Honours program. A student enrolled in a Major or Honours Neuroscience program may enroll in any of the Minors offered by other programs in the Faculty of Science, or in Minors offered by other Faculties.

NOTE: Classes counted toward a 20 credit Major or Honours program may not be used to fulfill the requirements of a Minor program.

#### Minors in other Faculty of Science programs (see 5.a. page 135)

#### Minors offered by the Faculty of Arts and Social Sciences (see 5.a. page 135)

#### Minors in other Faculties (see 5.b. page 135)

### BSc/Engineering or BA/Engineering Concurrent Programs

Students will normally complete the requirements for a 15 Credit BSc or 15 Credit BA, and the first two years of engineering studies leading to the Diploma in Engineering. The concurrent program can be completed in three years. Details are provided in the College of Arts and Science Degree Requirements starting on page 131 of the calendar.

### Diplomas, Certificates, and Language Proficiency Certificates

In combination with a BA or BSc there are certificates or diplomas that can be obtained to emphasize areas of proficiency. For a complete list and details refer to the College of Arts and Science Degree Requirements starting on page 131 of the calendar.

#### Certificate in Animal Behaviour

The Certificate program is a collaborative effort of both the Biology and the Psychology and Neuroscience departments. It provides students an opportunity to take, within their BA or BSc Honours or Major program, a set of classes and a research project that will accord them an animal behaviour specialization. Completion of the Certificate will be shown on a student's transcript.

Note: It is the responsibility of students in the Certificates Program to complete the class sequence specified, and to provide the Certificate Coordinator with confirmation that the necessary classes have been taken, by the end of the examination period in their final year of study.

#### Certificate requirements:

1. A minimum grade of a B- is required in four mandatory classes:  
NESC/PSYO 2160.03: Animal Behaviour  
PSYO 2501.03: Statistical Methods I or STAT 2080.03: Statistical Methods for Data Analysis and Inference  
BIOL 3062.03: Behavioural Ecology or PSYO/NESC 3162.03: Advanced Animal Behaviour Theories and Applications  
BIOL 3630.03: Field Methods in Animal Behaviour or NESC/PSYO 3161.03: Measuring Behaviour
2. A grade of B- in two full credits of elective classes chosen from the following list. One of the two full credits must be at the 3000/4000 level.

#### 2000 level

NESC/PSYO 2140.03: Learning  
NESC/PSYO 2170.03: Hormones and Behaviour  
NESC/PSYO 2470.03: Systems Neuroscience

#### 3000 level

BIOL 3327.03: Entomology  
BIOL 3622.03: Ornithology  
BIOL 3067.03: Ecology and Evolution of Fishes  
BIOL 3626.03: Field Studies of Marine Mammals  
NESC/PSYO 3000.06: Independent Research in Modern Psychology (Animal Behaviour topic)  
NESC/PSYO 3001.03: Directed Research Project in Psychology (Animal Behaviour topic)  
NESC/PSYO 3043.03: Neurobiology and Learning  
NESC/PSYO 3044.03: Laboratory Methods of Learning and Conditioning  
NESC/PSYO 3162.03: Advanced Animal Behaviour  
NESC/PSYO 3165.03: Neuroethology  
NESC/PSYO 3180.03: Psychoneuroimmunology/Ecological Immunology  
NESC/PSYO 3670.03: Genes, Brain and Behaviour

#### 4000 level

NESC/PSYO 4160.03: Topics in Behavioural Biology  
BIOL 4060.03: Marine Mammalogy  
BIOL 4800.06: Special Topics (Animal Behaviour topic)  
BIOL 4804.03, 4806.03, 4807.03: Special Topics (Animal Behaviour topic)

3. A grade of B- in one half credit or more of independent research in Animal Behaviour.

The research topic must be pre-approved by the Certificate Coordinator prior to the start of their research class (i.e., NESC/PSYO 3000.06, NESC/PSYO 3001.03, NESC/PSYO 4500.06, BIOL 4800.06, BIOL 4806.03, BIOL 4807.03, or BIOL 4900.06). Honours students are encouraged to complete their Honours thesis on a topic in Animal Behaviour to fulfill this requirement.

Students are also encouraged to further develop their study design and analysis skills by taking additional classes such as BIOL 4061.03 (Design of Biological Experiments) or BIOL 4062.03 (Analysis of Biological Data).

4. Enrollment in the Certificate in Animal Behaviour program should be undertaken by students in their third or fourth year of studies when they are seeking approval of the research topic by the Certificate Coordinator.

The Certificate Coordinator will be named by the Animal Behaviour Working Group (S. Adamo, S. Gadbois, A. Horn, M. Leonard, C. Staicer).

### III. Class Descriptions

In 2006/2007, the full-credit Introduction to Psychology classes were divided into two half-credit classes. PSYO 1000X/Y.06 became PSYO 1021.03 and 1022.03, and PSYO 1001X/Y.06 became PSYO 1011.03 and 1012.03. If a class now requires PSYO 1011.03 or 1021.03 and PSYO 1012.03 or 1022.03 as prerequisites, this requirement may also be met by either PSYO 1000.06 or PSYO 1001.06.

#### NESC 2007.03: Neuroscience Principles and Methods.

This class introduces methods used to investigate contemporary issues in Neurobiology. Characteristics of these methods, including their strengths and limitations, are presented conceptually in lectures, and then practically in the form of supervised laboratory experiments where students implement in the lab what they encountered first in lectures.

INSTRUCTOR(S): K.R. Duffy and S. Gadbois

FORMAT: Lecture 3 hours, Research Lab 2 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27, or BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03 (with a grade of B- or better)

EXCLUSION: PSYO 2000.03

#### NESC 2130.03: Introduction to Cognitive Psychology.

Lectures focus on the processes involved in transforming sensory information into the meaningful everyday world that we know. Initially, emphasis is on the visual system, and how information within that system is structured and organized, followed by a consideration of the character of internal representations used in thinking and remembering.

INSTRUCTOR(S): O. Krigolson

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27 (with a grade of B- or better)

CROSS-LISTING: PSYO 2130.03

#### NESC 2140.03: Learning.

Lectures focus on several goals: (1) providing general principles of learning; (2) understanding the behaviour of particular species; (3) direct application to human problems. Emphasis is on understanding why researchers in animal learning do what they are currently doing (given the goals and the historical context).

INSTRUCTOR(S): V. LoLordo

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27 (with a grade of B- or better)

CROSS-LISTING: PSYO 2140.03

#### NESC 2150.03: Perceptual Processes.

Perception deals with the way in which our senses provide us with information about our environment. This class focuses on the process by which sensory experiences are coded, how they are interpreted by the nervous system, and how experience modifies perception.

INSTRUCTOR(S): N. Crowder

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27, or BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03 (with a grade of B- or better)

CROSS-LISTING: PSYO 2150.03

EXCLUSION: NESC/PSYO 3005.03

#### NESC 2160.03: Animal Behaviour.

Using concepts from behavioural biology and psychology, animal behaviourists attempt to explain why animals behave the way they do. The class examines topics such as mating and social systems, mate choice, the evolution of behaviour, and animal communication. The behaviour of a wide range of animals is studied.

INSTRUCTOR(S): S. Adamo or S. Gadbois

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27, or BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03 (with a grade of B- or better)

CROSS-LISTING: PSYO 2160.03

#### NESC 2170.03: Hormones and Behaviour.

How chemical signals of the neural, endocrine, and immune systems interact to influence the brain and behaviour. How neurotransmitters, cytokines, and hormones control neural and behavioural development, sexual, aggressive, and maternal behaviour. Hormone receptors in the brain, reproduction, puberty, brain sex differences, and stress are also examined.

INSTRUCTOR(S): R.E. Brown

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27, or BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03 (with a grade of B- or better)

CROSS-LISTING: PSYO 2170.03

#### NESC 2470.03: Systems Neuroscience.

This class provides an introduction to the functional systems of the brain. We examine neural systems (e.g., the sensory systems, motor system, neurotransmitter-specific systems) individually. We explore their anatomy and function, neurobiological properties that make each unique, and factors that are common to all neural systems (e.g., development and plasticity).

INSTRUCTOR(S): D. Philips

FORMAT: Lecture 3 hours

PREREQUISITE: NESC/PSYO 2570.03 or instructor's consent

CROSS-LISTING: PSYO 2470.03

EXCLUSION: PSYO 2770.03

#### NESC 2570.03: Cellular Neuroscience.

This class explores the brain at the neuronal level. Material covered includes: the ionic basis of resting potentials; the electrical activity of neurons; synaptic transmission and plasticity; synthesis and action of synaptic transmitters; and drug actions. Cellular phenomena relevant to healthy and neurologically-dysfunctional systems are also discussed.

INSTRUCTOR(S): S. Adamo

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.27, 1540X/Y.27, or BIOL 1010.03/1011.03 or BIOL 1020.02/1021.03 (with a grade of B- or better)

CROSS-LISTING: PSYO 2570.03, PHYL 2570.03

#### NESC 3000X/Y.06: Independent Research in Neuroscience.

Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in NESC 2007.03 or PSYO 2000.03, a high level of performance in other Neuroscience classes, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project.

Note: This class cannot be used to fulfill the department's research laboratory requirement.

SIGNATURE REQUIRED

COORDINATOR: J. Stamp

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab 4 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03 or NESC/PSYO 2470.03, PSYO 2501.03 or STAT 2080.03, and previous or concurrent enrolment in two other NESC/PSYO 3000-level classes, and Coordinator's consent.

CROSS-LISTING: PSYO 3000X/Y.06

EXCLUSION: NESC/PSYO 3001.03

#### NESC 3001.03: Directed Project in Neuroscience.

Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in NESC 2007.03 or PSYO 2000.03, a high level of performance in other Neuroscience classes, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project.

Note: This class cannot be used to fulfill the department's research laboratory requirement.

SIGNATURE REQUIRED

COORDINATOR: J. Stamp

NOTE: This class provides only a half-year research experience. Students wanting a full-year research experience in a lab should register for NESC 3000X/Y.06

FORMAT: Lab 4 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03 or NESC/PSYO 2470.03, PSYO 2501.03 or STAT 2080.03, and previous or concurrent enrolment in two other NESC/PSYO 3000-level classes, and Coordinator's consent.  
CROSS-LISTING: PSYO 3001.03  
EXCLUSION: NESC/PSYO 3000X/Y.06

### **NESC 3010X/Y.06: Advanced General Psychology.**

An active learning class for suitably-qualified senior students. Students complete a series of oral and written assignments designed to consolidate critical thinking and communication skills in Psychology/Neuroscience. After instructional training, assignments include preparing and delivering lab material to a small group (~30) of PSYO 1011.03 and 1012.03 students.  
SIGNATURE REQUIRED

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

INSTRUCTOR(S): H. Schellinck

FORMAT: Lecture/Seminar 2 hours, Skills Lab 1 hour

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, advanced classes in Psychology or Neuroscience, and instructor's consent.

CROSS-LISTING: PSYO 3010X/Y.06

### **NESC 3043.03: Neurobiology of Learning.**

This class examines the neurobiological processes underlying various forms of learning such as classical and operant conditioning, song learning by birds, spatial learning, and fear conditioning. Different methods used to study the neurobiology of learning, and the evolutionary origins of these systems are also considered.

INSTRUCTOR(S): L. Phillmore

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and one of NESC/PSYO 2140.03 or NESC/PSYO 2470.03 or PSYO 2770.03

CROSS-LISTING: PSYO 3043.03

### **NESC 3044.03: Laboratory Methods of Learning and Conditioning.**

A hands-on class on techniques used to test learning and memory in animals, including operant conditioning and spatial memory, and an exposure to the neurobiological systems involved. Students work in pairs to conduct a series of experiments, analyze data as a class, but write individual laboratory reports on each experiment.

NOTE: Students should be aware that some data collection occurs outside of class time.

INSTRUCTOR(S): L. Phillmore

FORMAT: Research Lab 4 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and one of NESC/PSYO 2140.03 or NESC/PSYO 2470.03 or PSYO 2770.03

CROSS-LISTING: PSYO 3044.03

EXCLUSION: PSYO 3042.03

### **NESC 3051.03: Sensory Neuroscience I. Vision.**

This class examines the neural basis for the perception of light, colour, movement, depth, and form. The class covers developmental events important for vision, and the extent to which vision is constrained by anatomical and physiological development.

INSTRUCTOR(S): N. Crowder

FORMAT: Lecture 3 hours, Research Lab 1 hour

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, NESC/PSYO 2470.03 or PSYO 2770.03, and NESC/PSYO 2150.03

CROSS-LISTING: PSYO 3051.03

### **NESC 3052.03: Sensory Neuroscience II. Hearing and Speech.**

This class explores hearing at levels that include stimulus parameters and their psychophysical correlates, middle ear function, cochlear biophysics, central auditory neurophysiology, and principles of speech perception. We emphasize mechanisms of normal hearing and speech, but address pathology wherever it helps us understand the relation between neurophysiology and perception.

INSTRUCTOR(S): D.P. Phillips

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and NESC/PSYO 2470.03

CROSS-LISTING: PSYO 3052.03

### **NESC 3131.03: Research Methods in Attention.**

The methods, findings, and theories that underpin our understanding of attention (alertness, preparation, selection, and control of information processing) are

covered. Behavioural and neuroscientific evidence as well as computational models are examined in the lectures. Laboratories emphasize behavioural methods used to isolate and reveal the components of attention.

INSTRUCTOR(S): R. Klein

FORMAT: Lecture 3 hours, Research Lab 2 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and NESC/PSYO 2130.03 or NESC/PSYO 2150.03

CROSS-LISTING: PSYO 3131.03

EXCLUSION: NESC/PSYO 3130.06

### **NESC 3132.03: Research Methods in Visual Cognition.**

Visual cognition is the study of how we extract meaning from our visual environment and use it to direct our behaviour. Emphasis is placed on object, face, and word recognition as revealed by normal behaviour, and by neuroimaging techniques and neuropsychological studies of brain-damaged individuals who have lost these recognition abilities.

INSTRUCTOR(S): P. McMullen

FORMAT: Lecture 3 hours, Research Lab 2 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and NESC/PSYO 2130.03 or NESC/PSYO 2150.03

CROSS-LISTING: PSYO 3132.03

EXCLUSION: NESC/PSYO 3130.06

### **NESC 3133.03: Research Methods in Memory.**

This class examines human memory from the perspective of cognitive psychology and, to a lesser extent, cognitive neuroscience. Lectures emphasize cognitive approaches to the study of memory with an explicit focus on empirical research methods, data, and interpretation of results.

INSTRUCTOR(S): T. Taylor-Helmick

FORMAT: Lecture 3 hours, Research Lab 2 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and NESC/PSYO 2130.03

CROSS-LISTING: PSYO 3133.03

EXCLUSION: NESC/PSYO 3130.06

### **NESC 3134.03: Research Methods in Psycholinguistics.**

Provides hands-on experience with various methodologies employed in the study of language processing, and uses these to explore topics in psycholinguistics in greater depth. Methods covered may include reaction time, priming, self-paced reading, computational modeling, corpus-based research, and event-related brain potentials. Students serve as experimenters and participants in class experiments.

INSTRUCTOR(S): A. Newman

FORMAT: Lecture 3 hours, Research Lab 2 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and NESC/PSYO 3190.03

CROSS-LISTING: PSYO 3134.03

EXCLUSION: NESC/PSYO 3130.06

### **NESC 3137.03: Research Methods in Cognitive Neuroscience.**

An overview of neuroimaging and other techniques of cognitive neuroscience (including fMRI, ERP, and others) focusing on how they work, how they are applied, and their inherent limitations. Labs include experience collecting and analyzing ERP data, demonstrations of fMRI scanning, and analysis of fMRI data.

INSTRUCTOR(S): A. Newman

FORMAT: Lecture 3 hours, Research Lab 2 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and NESC/PSYO 2130.03

CROSS-LISTING: PSYO 3137.03

### **NESC 3161.03: Measuring Behaviour.**

Measuring behaviour is essential in the study of ethology, behavioural neuroscience, developmental, social and clinical psychology. The function of this laboratory class is to teach methods of observing and scoring behavior using qualitative and quantitative methods. Sampling methods, behavior description and analysis will be done in laboratory and naturalistic settings.

INSTRUCTOR(S): R. E. Brown

FORMAT: Research Lab 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03

CROSS-LISTING: PSYO 3161.03

### NESC 3162.03: Advanced Animal Behaviour: Theories and Applications.

This class focuses on advanced theories and applications of animal behaviour, with a focus on proximate, integrative and applied questions. It offers a more in-depth analysis of topics covered in NESC/PSYO 2160.03 and explores trends and issues in contemporary ethology, animal psychology and behavioural ecology.

INSTRUCTOR(S): S. Gadbois

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007 or BIOL 3062.03 or BIOL 3630.03, and NESC/PSYO 2160.03

CROSS-LISTING: PSYO 3162.03

### NESC 3165.03: Neuroethology.

Neuroethology explores how assemblies of neurons work together to produce behaviour. Neural control of selected behaviours from a wide range of animals, both invertebrate and vertebrate, are examined. From this comparative perspective an attempt is made to tease out common themes in the physiological control of behaviour.

NOTE: All experiments in the accompanying lab involve insects. Students are required to handle insects during the lab.

INSTRUCTOR(S): S. Adamo

FORMAT: Lecture 2 hours, Research Lab 2 hours

PREREQUISITE: NESC/PSYO 2160.03 or BIOL 3062.03; and NESC/PSYO 2570.03 or BIOL 3078.03 and BIOL 3079.03 or MARI 3074.03 and MARI 3076.03; and PSYO 2000.03 or NESC 2007.03 or one of following Biology classes: 2003.03, 2004.03, 2020.03, 2030.03, 2060.03

CROSS-LISTING: PSYO 3165.03

### NESC 3180.03: Psychoneuroimmunology/Ecological Immunology.

Our behaviour can influence how well we resist disease, and infection can alter behaviour. This class examines how immune systems and nervous systems interact in both vertebrates and invertebrates. Evolutionary forces that have led to the existence of these interactions are also examined.

INSTRUCTOR(S): S. Adamo

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and either NESC/PSYO 2470.03 or PSYO 2770.03 or MICI 2100.03; OR BIOL 2020.03

CROSS-LISTING: PSYO 3180.03

### NESC 3190.03: Psycholinguistics.

Explores the cognitive and neural bases of human language processing. Topics include: human language and other communication systems; phonology; morphology; semantics; syntax; discourse; first and second language acquisition; relationship of language to general cognitive functions such as music and mathematics; signed languages such as American Sign Language, and non-linguistic gesture.

INSTRUCTOR(S): A. Newman

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and NESC/PSYO 2130.03

CROSS-LISTING: PSYO 3190.03

EXCLUSION: NESC/PSYO 2190.03

### NESC 3227.03: Principles of Human Neuropsychology.

Clinical neuropsychologists study the organization of cognitive, emotional, and social functions in the brain to understand how brain damage alters human behaviour across the lifespan. We examine how clinicians diagnose and rehabilitate persons with brain diseases and disorders. Assignments emphasize application of textbook/lecture-based knowledge, critical thinking, and group presentation skills.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and NESC/PSYO 2470.03 or PSYO 2770.03; NESC/PSYO 2130.03 is helpful

CROSS-LISTING: PSYO 3227.03

### NESC 3237.03: Drugs and Behaviour.

An introduction to behavioural psychopharmacology. The lectures involve basic anatomy, physiology, and chemistry of the nervous system. Behavioural effects and underlying mechanisms of various psychoactive drugs are discussed. Specific topics covered are alcohol, tobacco, amphetamines, cocaine, opiates, hallucinogens, tranquilizers, and antipsychotic drugs.

INSTRUCTOR(S): S. Barrett

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and one of NESC/PSYO 2170.03, 2470.03, 2570.03, or PSYO 2770.03

CROSS-LISTING: PSYO 3237.03

### NESC 3260.03: Biological Rhythms.

Daily (circadian) clocks generate rhythms in many functions, including sleep, reproduction, and intellectual performance. This class examines the nature of these biological clocks, their neural mechanisms, and their roles in regulating sleep and other aspects of physiology and in pathological conditions, including sleep disorders, jet lag, and psychiatric disorders.

INSTRUCTOR(S): B. Rusak

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03 or BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03, and either NESC/PSYO 2170.03 or NESC/PSYO 2470.03 or PSYO 2770.03

CROSS-LISTING: PSYO 3260.03

### NESC 3264.03: The Science of Sleep.

This class reviews: how sleep is studied; sleep characteristics across the lifespan and among species; cultural and societal impacts on human sleep; circadian, homeostatic, neural and endocrine mechanisms that regulate sleep; functions of sleep; impacts of sleep loss. Sleep disorders may be discussed to illuminate aspects of sleep regulation.

INSTRUCTOR(S): B. Rusak

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and either NESC/PSYO 2470.03 or PSYO 2770.03; OR BIOL 2020.03

CROSS-LISTING: PSYO 3264.03

### NESC 3270.03: Developmental Neuroscience.

This class presents the fundamentals of development in complex and simple nervous systems. Cell differentiation, pattern regulation, proliferation, migration, and circuit development are discussed. Special attention is given to later developmental events such as neuronal growth cones, cell death, growth factors, neuron-target interactions, and synapse formation.

INSTRUCTOR(S): K. Duffy

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, NESC/PSYO 2470.03 and NESC/PSYO 2570.03

CROSS-LISTING: PSYO 3270.03

### NESC 3370.03: Neuroscience Laboratory I.

Introduction to several neurophysiological techniques used in contemporary neuroscience, employing extracellular and intracellular electrical recording and stimulation methods on nervous system preparations, both sensory and motor. After introductory instruction, students in groups of 2 or 3 get to perform quite sophisticated practical experiments themselves, enabled by computer-based data acquisition.

INSTRUCTOR(S): Staff

FORMAT: Lab 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, NESC/PSYO 2470.03 and 2570.03, or NESC/PSYO 3270.03

CROSS-LISTING: PSYO 3370.03

### NESC 3371.03: Neuroscience Laboratory II.

Introduction to several techniques used in contemporary neuroscience. Students work under supervision in groups of 2 or 3 in regular labs that introduce neuroanatomical analyses using the following: Golgi impregnation, immunocytochemistry, dye-tracing of connections, electronmicroscopy of the retina, and neurotransmitter determinations using HPLC.

INSTRUCTOR(S): I. Meinerzhagen

FORMAT: Lab 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, NESC/PSYO 2470.03 and 2570.03, or NESC/PSYO 3270.03

CROSS-LISTING: PSYO 3371.03

### NESC 3440.03: Neuroanatomy.

This is a survey of the structure and function of the human central nervous system (CNS, the brain and spinal cord). The laboratory component provides the opportunity to dissect the human brain and to study the microscopic anatomy of the CNS. This course provides the lecture and laboratory component for the graduate class ANAT 5100 Human Neuroanatomy.

ORGANIZER: W. Baldrige

INSTRUCTOR(S): Members of the Department of Anatomy & Neurobiology

FORMAT: Lecture/lab 3 hours per week  
 PREREQUISITE: BIOL 2020.03 or permission of the instructor

### NESC 3670.03: Genes, Brain and Behaviour.

The application of genetic techniques to the study of cognitive abilities, psychopathology, personality disorders, stress-related illnesses, and ethical issues in genetic research. The role of genetic factors in eating and drug abuse problems, as well as methods used to study gene-environment interactions are explored.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: NESC/PSYO 2470.03 or PSYO 2770.03, AND BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03 or SCIE 1515X/Y.36, 1520X/Y.30, or 1540.27 (with a grade of B or better); BIOL 2020.03 and BIOL 2030.03 are useful

CROSS-LISTING: PSYO 3670.03

EXCLUSION: NESC/PSYO 2670.03

### NESC 3770.03: Behavioural Neuroscience.

Behavioural neuroscience explores the neural and hormonal mechanisms underlying a variety of behavioural phenomena. The class focuses on neural correlates of social and emotional behaviour, motor behaviour and patterns, and behavioural toxicology processes (neurotoxins and endocrine disruptors).

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and NESC/PSYO 2470.03 or PSYO 2770.03

CROSS-LISTING: PSYO 3770.03

### NESC 3775.03: Behavioural Neuroscience Laboratory.

Students motivated to pursue a career in Neuroscience, or in a related biomedical discipline, gain direct experience studying the nervous system in relation to behaviour. Students acquire skills in animal handling, ethics, and measuring behaviour. Emphasis is placed on histological/molecular analysis of the brain including examining protein and/or mRNA levels.

SIGNATURE REQUIRED

INSTRUCTOR(S): T. Perrot

FORMAT: Research Lab 3+ hours

PREREQUISITE: PSYO 2000.03 or NESC 2007, NESC/PSYO 2470.03 or PSYO 2770.03, PSYO 2501.03, and one of NESC/PSYO 2160.03 or NESC/PSYO 2170.03 or NESC/PSYO 3237.03 or NESC/PSYO 3770, and instructor's consent

CROSS-LISTING: PSYO 3775.03

### NESC 3790.03: Neurolinguistics.

The class covers: (1) brain damage and language disorders; (2) aphasia; (3) localization of lesions in the human brain; (4) neuroimaging; (5) intracranial electric stimulation experiments; (6) event-related brain potential experiments; (7) PET, fNMR scan experiments; (8) neural models of language processing.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: NESC/PSYO 2470.03 or PSYO 2770.03

CROSS-LISTING: PSYO 3790.03

### NESC 3970.03: Molecular Neuroscience.

This class examines the development, function, and pathology of the brain at the molecular level. Model systems are examined from the perspective of ion channels, messengers, receptors, intracellular signaling cascades, transcription factors, and genes. The concepts underlying basic cellular and molecular neuroscience tools are emphasized.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: NESC/PSYO 2570.03

CROSS-LISTING: PSYO 3970.03

### 4000-level Seminars

The following seminars are intended for fourth-year Honours students. Third-year Honours students are eligible provided they obtain permission from the instructor, and the needs of all the fourth-year Honours students have been met. The topics covered in these classes vary from year to year. Go to the departmental website (<http://psychology.dal.ca/>) for more detail about the topics to be covered in the current academic year.

### NESC 4000.03: Senior Seminar.

An individually tailored reading or study class designed to allow Honours students to focus on a particular issue, or a set of related issues, that are not part of the

regular program. Enrolment is contingent upon securing a faculty member to supervise the study program.

SIGNATURE REQUIRED

COORDINATOR: J. Stamp

FORMAT: Seminar 2 hours

CROSS-LISTING: PSYO 4000.03

### NESC 4007.03: Contemporary Issues in Neuroscience.

This is a seminar class that focuses on a significant theme or topic in the research literature in Neuroscience. Topics vary from year to year. Consult the department for the details about class content.

SIGNATURE REQUIRED

INSTRUCTOR(S): N. Crowder

FORMAT: Seminar 2 hours

PREREQUISITE: NESC Honours student, permission of the instructor.

### NESC 4050.03: Topics in Perception.

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

PREREQUISITE: NESC/PSYO 3051.03 or instructor's consent

CROSS-LISTING: PSYO 4050.03

### NESC 4070.03: Chemical Neurobiology.

The goal is to acquaint the student with neurotransmitters (excitatory amino acids, acetylcholine, monoamines, neuropeptides). Anatomical, biochemical, physiological, pharmacological, behavioral, and clinical aspects of individual neurotransmitter systems are discussed. Lectures are given by the instructors. Students are expected to write an examination and a review, and give a presentation.

INSTRUCTOR(S): K. Semba

FORMAT: Seminar 2 hours

PREREQUISITE: NESC/PSYO 2470.03 and 2570.03, or NESC/PSYO 3270.03, or instructor's consent

CROSS-LISTING: PSYO 4070.03, ANAT 5070.03

### NESC 4130.03: Topics in Human Information Processing.

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

CROSS-LISTING: PSYO 4130.03

### NESC 4160.03: Topics in Behavioural Biology.

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

CROSS-LISTING: PSYO 4160.03

### NESC 4170.03: Topics in Behavioural Neuroendocrinology.

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

CROSS-LISTING: PSYO 4170.03

RESTRICTION: Restricted to NESC/PSYO Honours Students

### NESC 4177.03: Theoretical Neuroscience.

An introduction to basic concepts and research questions in computational neuroscience. This includes cellular mechanisms such as spike generation and synaptic plasticity, network-level concepts such as perceptrons and associative attractor networks, and system-level concepts such as memory, learning and anticipation. This class includes an introduction to MATLAB programming.

NOTE: SIGNATURE REQUIRED

INSTRUCTOR(S): T. Trappenberg

FORMAT: Seminar

PREREQUISITE: Intended for third- or fourth-year Neuroscience students.

### NESC 4185.03: Current Advances in Synaptic Function and Plasticity.

Key recent research studies in cellular and system neurophysiology are presented and critically discussed. Emphasis is placed on plasticity, synaptic function, excitability, dendritic integration, neural networks and relevant advances in experimental methods. Newly published papers within these areas are reviewed weekly, followed by a more extensive critique of two publications.

INSTRUCTOR(S): S. Krueger and A. Fine

FORMAT: Seminar 2 hours

PREREQUISITE: NESC 2570/PHYL 2570 or permission of course instructors  
CROSS-LISTING: PHYL 4000.03

### **NESC 4230.03: Human Performance Topics.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

CROSS-LISTING: PSYO 4230.03

### **NESC 4374.03: Introduction to Pharmacology I.**

This introductory class is designed to acquaint students with the actions of drugs on physiological and biochemical functions in mammals including humans. Factors which affect the blood levels of drugs (absorption, distribution, metabolism, and elimination) will be considered, together with the mechanisms by which drugs act and their potential uses. The interaction of drugs with various body systems will be covered, including the central and peripheral nervous systems and the cardiovascular system. Drugs that assist or regulate host defence mechanisms will also be studied.

COORDINATOR: M.E.M. Kelly

FORMAT: Lecture 3 hours

PREREQUISITE: A previous course in physiology and biochemistry is recommended. Extra reading may be required for students without these courses.

CROSS-LISTING: PHAC 5406.03, BIOC 4804.03, and BIOL 4404.03

### **NESC 4376.03: Introduction to Pharmacology II.**

This class is intended to cover specific aspects of drug action not covered in NESC 4374.03. The class includes: drug receptor signaling, ion channels, second messengers, G-proteins and immunopharmacology, plus specific consideration of drugs used for pain, inflammation, cancer, diabetes, and asthma.

COORDINATOR: D. Dupre

FORMAT: Lecture 3 hours

PREREQUISITE: NESC 4374.03 (with a grade of B or better)

CROSS-LISTING: PHAC 5409.03, BIOC 4806.03, and BIOL 4407.03

### **NESC 4500X/Y.06: Honours Thesis.**

Under a staff member's supervision, each student conducts original research in experimental neuroscience. Students meet to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports.

SIGNATURE REQUIRED

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

INSTRUCTOR(S): T. Perrot, P. McMullen

PREREQUISITE: Fourth-year Honours students, and instructor's consent

CROSS-LISTING: PSYO 4500X/Y.06

RESTRICTION: Restricted to Honours students in their graduating year

### **NESC 4740.03: Topics in the Neurobiology of Learning and Memory.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

PREREQUISITE: NESC/PSYO 2470.03, NESC/PSYO 2140.03

CROSS-LISTING: PSYO 4740.03

## **Ocean Sciences**

\* Pending MPHEC approval.

See Oceanography for contact information and a list of faculty.

### **I. Introduction**

Ocean Sciences includes study of the physics, biology, geology, chemistry, and meteorology of the marine environment. Topic areas include ocean currents, waves, tides, marine sediments, oceanic crustal structure, nutrient cycling, acoustics, ocean-atmosphere coupling, biological production, and seawater properties, among others. Students enrolled in the Ocean Sciences program will be educated in the core oceanographic sub-disciplines of physical, geological, chemical, and biological oceanography, while also being exposed to issues in marine policy, law, and management. Graduates of the Ocean Sciences program will have gained an appreciation of the interdisciplinary and collaborative approaches often required to arrive at meaningful solutions to environmental problems relating to the oceans. They will have developed strong quantitative and practical skills, as well as a breadth of knowledge across ocean science disciplines. Ocean scientists are employed in research laboratories, universities, government agencies, and private industry. Career paths include environmental prediction, environmental monitoring and assessment, marine technology, marine surveying, marine resource use and extraction, and marine conservation.

### **II. Degree Programs**

The Department of Oceanography offers a number of degree programs in Ocean Sciences, including Major, Double Major, Concentrated Honours, Combined Honours, and Minor options. In addition to the departmental requirements detailed below, students must satisfy the degree requirements of the College of Arts and Science (outlined in the College of Arts and Science section of this calendar).

#### **A. BSc (20 credit) Major in Ocean Sciences**

##### **Departmental Requirements**

###### **1000 level**

- PHYC 1280.03/1290.03 or PHYC 1300.06
- MATH 1000.03/1010.03
- STAT 1060.03
- Any two of the following three course sequences: BIOL 1010.03/1011.03, CHEM 1011.03/1012.03, EARTH 1080.03/1090.03

OR

- One of: SCIE 1515.36, SCIE 1520.30, 1530.27

OR

- SCIE 1540.27
- MATH 1010.03
- PHYC 1320.03

###### **2000 level**

- OCEA 2000.06 or OCEA 2001.03/2002.03
- OCEA 2020.03/2021.03

###### **3000 and 4000 level**

- OCEA 3003.03
- A minimum of one credit from each of three Ocean Science Areas (three credits total). See IV. Ocean Science Areas.
- OCEA 4000.03
- OCEA 4401.03/4402.03

#### **B. BSc (20 credit) Double Major in Ocean Sciences**

##### **Departmental Requirements**

Same as for 20-credit BSc Major in Ocean Sciences.

## C. BSc (20 credit) Concentrated Honours in Ocean Sciences

### Departmental Requirements

#### 1000 level

- PHYC 1280.03/1290.03 or PHYC 1300.06
- MATH 1000.03/1010.03
- STAT 1060.03
- Any two of the following three course sequences: BIOL 1010.03/1011.03, CHEM 1011.03/1012.03, EARTH 1080.03/1090.03

OR

- One of: SCIE 1515.36, SCIE 1520.30, 1530.27

OR

- SCIE 1540.27
- MATH 1010.03
- PHYC 1320.03

A “B+” average (3.7) must be attained in the following 2000-, 3000- and 4000-classes. Additionally, a “B” (3.0) must be attained in the required 2000 classes.

#### 2000 level

- OCEA 2000.06 or OCEA 2001.03/2002.03
- OCEA 2020.03/2021.03

#### 3000 and 4000 level

- OCEA 3003.03
- A minimum of one credit from each of three Ocean Science Areas (three credits total). See IV. Ocean Science Areas.
- One additional credit from the Ocean Science Areas. See IV. Ocean Science Areas.
- OCEA 3001.03 or OCEA 4120.03 must be included in one of the preceding two requirements.
- OCEA 4000.03
- OCEA 4401.03/4402.03
- OCEA 4200.06
- Honours Qualifying exam (graded as Pass/Fail) based on participation in OCEA 4200.06

## D. BSc (20 credit) Combined Honours in Ocean Sciences (A) and another subject (B)

### Departmental Requirements

#### 1000 level

- PHYC 1280.03/1290.03 or PHYC 1300.06
- MATH 1000.03/1010.03
- STAT 1060.03
- Any two of the following three course sequences: BIOL 1010.03/1011.03, CHEM 1011.03/1012.03, EARTH 1080.03/1090.03

OR

- One of: SCIE 1515.36, SCIE 1520.30, 1530.27

OR

- SCIE 1540.27
- MATH 1010.03
- PHYC 1320.03

A “B+” average (3.7) must be attained in the following 2000-, 3000- and 4000-classes. Additionally, a “B” (3.0) must be attained in the required 2000 classes.

#### 2000 level

- OCEA 2000.06 or OCEA 2001.03/2002.03
- OCEA 2020.03/2021.03

#### 3000 and 4000 level

- OCEA 3003.03
- OCEA 3001.03 or OCEA 4120.03
- One credit chosen from: OCEA 3002.03, OCEA 4110.03, OCEA 4140.03
- One and one-half (1.5) additional credits from the Ocean Science Areas. See IV. Ocean Science Areas.
- OCEA 4000.03
- OCEA 4401.03/4402.03
- OCEA 4200.06
- Honours Qualifying exam (graded as Pass/Fail) based on participation in OCEA 4200.06

## E. BSc (20 credit) Combined Honours in a subject (A) and Ocean Sciences (B)

### Departmental Requirements

#### 2000 level

- OCEA 2000.06 or OCEA 2001.03/2002.03
- OCEA 2020.03/2021.03

#### 3000 and 4000 level

- OCEA 3003.03
- A minimum of one credit from each of three Ocean Science Areas (three credits total). See IV. Ocean Science Areas.
- OCEA 4000.03

## F. Minor programs in Ocean Sciences

Students enrolled in a 20-credit degree program other than Ocean Sciences or students enrolled in a 15-credit degree program may choose to complete a Minor in Ocean Sciences.

To obtain a Minor in Ocean Sciences, a student must successfully complete three full credits in Ocean Sciences (OCEA) classes at or above the 2000 level.

## G. Minor programs available to students enrolled in a Major or Honours Ocean Sciences program

Minor programs allow students to develop subject specialities outside their main subject of study. A student enrolled in a Major or Honours Ocean Sciences program may enroll in any of the Minors offered by the university.

NOTE: Classes counted toward a 20-credit Major or Honours program may not be used to fulfill the requirements of a Minor program.

- G.1. Minors in other Faculty of Science programs
- G.2. Minors in the Faculty of Arts and Social Sciences
- G.3. Minors in other faculties

## H. BSc (20 credit) in Environmental Science: Oceans and Global Change

See Environmental Science Programs.

### I. Certificate programs

In combination with a BA or BSc, there are certificates that can be obtained to emphasize areas of proficiency. For a complete list of offerings refer to Certificate Programs in the College of Arts and Science section of the calendar.

## III. Ocean Science Areas

NOTE: Classes marked with an asterisk\* are required in that area.

### A. Physical Oceanography

OCEA 3001.03 and/or OCEA 4120.03\*, OCEA 4210.03, OCEA 4220.03, OCEA 4222.03, OCEA 4311.03, OCEA 4411.03, OCEA 4412.03, OCEA 4505.03, OCEA 4520.03, OCEA 4541.03, OCEA 4550.03

### B. Biological Oceanography

OCEA 4140.03\*, OCEA 4160.03, OCEA 4230.03, OCEA 4330.03, OCEA 4335.03, OCEA 4370.03, OCEA 4380.03

### C. Chemical Oceanography

OCEA 3002.03\*, OCEA 3420.03 (NOTE: this class may fulfill a half-credit requirement in either this Ocean Science Area or the Geological Oceanography Ocean Science Area, but not both), OCEA 4130.03, OCEA 4595.03

### D. Geological Oceanography

OCEA 3004.03, OCEA 3420.03 (NOTE: this class may fulfill a half-credit requirement in either this Ocean Science Area or the Chemical Oceanography Ocean Science Area, but not both), OCEA 4110.03\*, OCEA 4115.03, OCEA 4470.03, OCEA 4480.03

See Oceanography section for class descriptions.

## Dean

Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

## Chairperson of Department

Lewis, M. R. (494-1435)

## Undergraduate Advisor

Metaxas, A. (494-3021)

## Graduate Studies Coordinator

Kelley, D. (494-1694)

## Professors Emeriti

Bowen, A. J., MA (Cantab), PhD (Scripps), FRSC  
Fournier, R. O., MSc (Wm. & Mary), PhD (URI)  
Mills, E., BSc (CARL), MS, PhD (Yale), FLS

## Professors

Beaumont, C., BSc (Sussex), PhD (Dalhousie), Canada Research Chair  
Boudreau, B. P., BSc (UNB), MS (Texas A & M), PhD (Yale), FRSC Killam  
Professor & Dean of Graduate Studies  
Cullen, J., AB (Calif), PhD (Scripps), (NSERC/Atlantic Research Chair) (Killam  
Chair in Ocean Studies)  
Grant, J., BSc (Duke), PhD (South Carolina)  
Hay, A., BSc, MSc (Western), PhD (UBC)  
Hill, P. S., AB (Dartmouth), MSc, PhD (Wash)  
Kelley, D., BSc (Mt. A), PhD (Dalhousie)  
Lewis, M. R., BS, MS (UMd), PhD (Dalhousie)  
Louden, K. E., BA (Oberlin), MEd (Temple), PhD (MIT)  
Metaxas, A., BSc (McGill), MSc (UBC), PhD (Dalhousie) (NSERC UFA)  
Moore, R. M., BA (Oxon), PhD (Southampton)  
Ruddick, B. R., BSc (UVic), PhD (MIT)  
Sheng, J., BSc (East China Tech. Univ.), MSc, PhD (MUN) (LRET Chair)  
Taggart, C. T., BSc (Carleton), MSc (York), PhD (McGill)  
Thomas, H., MSc (Düsseldorf), PhD (Rostock)  
Thompson, K. R., BSc, MSc (UManc), PhD (Liv) (jointly with Mathematics and  
Statistics), Canada Research Chair  
Wallace, D. W., BSc (U of East Anglia), PhD (Dalhousie), Canada Excellence  
Research Chair (CERC)

## Associate Professors

Fennel, K., MSc, PhD (Rostock), Canada Research Chair  
Folkins, I., BSc (Dalhousie), MSc, PhD (Toronto) (cross appointment with  
Department of Physics and Atmospheric Science)  
Kienast, M., BSc (Clausthal), MSc (Kiel), PhD (UBC) (CIFAR Scholar)  
Ross, T., BSc, PhD (Manitoba) (NSERC UFA)

## Assistant Professor

Engleman, W. C., BEng (McGill), PhD (Dartmouth) (cross appointment with  
Engineering Mathematics)

## Adjunct Professors

Azetsu-Scott, K., BSc, MSc (Japan), PhD (Dalhousie)  
Boyd, C. M., MA (Ind), PhD (Scripps)  
Cranford P., BSc, PhD (Dalhousie)  
DiBacco, C., BSc, MSc (Dalhousie), PhD (Scripps)

Frank, K. T., BSc, PhD (Toledo)  
Greenberg, D. A., MMath (Waterloo), PhD (Liverpool)  
Hannah, C. G., BAsC, PhD (UBC)  
Hebert, D., MS (U Vic), PhD (Dalhousie)  
Hines, P., BS/BEng (Dalhousie), PhD (U Bath)  
Johnson, B., BEng (North Carolina), PhD (Dalhousie)  
Kienast, S., MSc (Kiel), PhD (UBC)  
Lee, H., BSc (Dalhousie), MSc, PhD (U of T)  
Li, W. K. W., BSc (UBC), PhD (Dalhousie)  
Lu, Y., B.Eng (Tsinghua), MSc (Qingdao), MSc (Memorial), PhD (UVic)  
Mosher, D. C., BSc (Acadia), MSc (MUN), PhD (Dalhousie)  
Oakey, N., BSc (McGill), MSc (Sask), PhD (McMaster)  
Piper, D. J. W., BA, MA, PhD (Cantab)  
Ritchie, H., BSc (Mt. A), BA (Oxford), MSc, PhD (McGill)

## Adjunct Research Associates

Brillant, S., PhD (U Sydney)  
Craig, S. E., BSc, PhD (Strathclyde)  
McIntyre, H., MA (U Texas), PhD (U Delaware)  
Smedbol, R. K., BSc (Dalhousie), MSc, PhD (Memorial)  
Turk, D., Dipl. Eng (Slovenia), PhD (Dalhousie)  
Vanderlaan, A., MSc (U Vic), PhD (Dalhousie)

## I. Introduction

Oceanography is an inter-disciplinary science that includes studies of tides and currents, the chemistry of sea water, plants and animals that live in the sea, and ocean bottom sediments and underlying crustal structures. Career oceanographers are employed in Canadian universities, in various federal laboratories that are engaged in both basic research and applied problems which meet a national need, such as fisheries investigations, exploration for offshore mineral resources, and studies of ice in navigable waters, and in a number of private companies interested in marine environmental protection or exploration.

The Department of Oceanography offers undergraduate training in Oceanography as part of Combined Honours Degrees with the Departments of Biology and Marine Biology, Chemistry, Earth Sciences, Mathematics, Statistics, and Physics and Atmospheric Science. Honours students in these Combined Honours Programs have an opportunity to complement their training in their chosen scientific field with a background in Oceanography, thus enhancing their career and employment opportunities. Students considering graduate study in Oceanography should also consider a Combined Honours degree. Further training in Oceanography occurs at the graduate level only.

In addition, many of the classes listed below can be taken as part of a Minor in Environmental Studies or included within the Minor in Environmental Science. Consult the Environmental Programs section of this calendar for details. Some of the classes listed here are required for students seeking a Diploma in Meteorology. Details for this class of study are found in the Physics and Atmospheric Science section of this calendar.

A good background in basic science is a necessary prerequisite for students wishing to prepare for studies in Oceanography. There are introductory classes which survey the entire field and advanced classes in each of the major specialties -- physical, chemical, geological, biological oceanography and atmospheric sciences. Students are encouraged to select electives from the 3000 and 4000 level classes below as appropriate to their selected Undergraduate Honours and/or Major degree.

NOTE: Not all classes are offered every year. Please consult the current timetable for this year's offerings.

## II. Degree Programs

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, page 131 of this calendar.

### A. Combined Honours Program: Marine Biology/Oceanography

Oceanography is intended to be the second or four credit honours subject and Marine Biology is intended to be the primary or seven credit honours subject. The requirements for a combined honours program in Marine Biology/Oceanography are that the students take a minimum of 11 credits beyond 1000-level in two the

subjects with not more than nine nor fewer than four in either. Core Biology requirements for the current Marine Biology Program (e.g. 1000-3000 level classes in the Calendar) are unchanged. Other classes currently required by the Marine Biology Program in Chemistry, Mathematics, and Statistics are unchanged; however, the Oceanography Department strongly recommends completion of higher level mathematics and statistics classes.

To fulfill the requirements for the combined program, students will take two credits from required classes listed below. In addition, students will need to choose a minimum of two elective credits either from the required classes or elective listed below to complete the program. Finally, students working with faculty in Oceanography or Marine Biology on their honours research would be required to enroll in BIOL 4900.06 as well as BIOL 8880.00.

#### Required Classes

- OCEA 2000X/Y.06: The Blue Planet
- OCEA 2800.03: Climate Change
- OCEA 3001.03: Introduction to Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 3003.03: Introduction to Biological Oceanography
- OCEA 3004.03: The Last Billion Years
- OCEA 4140.03: Biological Oceanography
- BIOL 4900.06: Honours Thesis/Project
- BIOL 8880.00: Honours Qualifying Examination

#### Electives

- OCEA 3420.03: Geochemistry of Aquatic Environments
- OCEA 4000.03: Oceans and Global Change
- OCEA 4160.03: Fisheries Oceanography
- OCEA 4230.03: Biology of Phytoplankton
- OCEA 4330.03: Benthic Ecology
- OCEA 4331.03: History of Marine Sciences
- OCEA 4335.03: Environmental Impacts in Marine Ecosystems
- OCEA 4370.03: Deep Sea Biology
- OCEA 4380.03: Marine Modelling

## B. Combined Honours Program: Chemistry/Oceanography

Oceanography is designated as the four credit component of the Combined Honours Degree. At least 11.5 credits beyond the 1000 level are required in Chemistry and Oceanography/Related Sciences. CHEM 2101.03, 2201.03, 2301.03, 2302.03, 2401.03, and 2402.03 must be part of this combined honours program and must be passed with a grade of C or better.

The additional eight credits must be chosen in consultation with the two departments involved, specifically the Honours Student Advisor in Chemistry and the Undergraduate Coordinator in Oceanography before registering in the combined program. Students should also consult the handbook "Undergraduate Studies in Chemistry" for more information.

Classes for Combined Honours with Oceanography degree.

Required marked with an asterisk (\*).

#### First Year

- \*CHEM 1011.03 + 1012.03: Concepts in Chemistry I & II or
- CHEM 1021.03 + 1022.03: Engineering Chemistry I & II
- \*MATH 1000.03 + 1010.03: Differential and Integral Calculus I & II
- \*PHYC 1100.06 or 1300.06: Intro or Physics in and Around You
- \*Writing Class - Language or Humanities
- \*Social Science

#### 2000 level classes (chemistry)

- \*CHEM 2101.03 + 2201.03: Intro. Inorganic + Intro. Analytical
- \*CHEM 2301.03 + 2304.03: Thermodynamics + Kinetics and Dynamics
- \*CHEM 2401.03/2402.03: Organic Chemistry

#### 3000 and 4000 level classes (chemistry)

- \*CHEM 3201.03: Spectroscopy & Separations
- \*CHEM 4205.03: Chemometrics
- Three classes from CHEM 31XX, 33XX, 34XX, 4304†
- \*CHEM 4901‡: Honours Research Project

#### Oceanography and related classes

- \*OCEA 2000.06: The Blue Planet

- OCEA 2800.03: Climate Change
- EARTH 2400.03<sup>1</sup>: Marine Geoscience
- \*OCEA 3001.03: Introduction to Physical Oceanography
- \*OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 3003.03<sup>2</sup>: Introduction to Biological Oceanography
- OCEA 3004.03<sup>3</sup>: The Last Billion Years
- OCEA 3420.03<sup>4</sup>: Geochemistry of Aquatic Environments
- \*OCEA 4130.03: Chemical Oceanography
- OCEA 4331.03<sup>5</sup>: History of Marine Sciences
- OCEA 4520.03: Introduction to Atmospheric Sciences
- OCEA 4595.03<sup>6</sup>: Atmospheric Chemistry
- \*OCEA 4200.06: Honours Research Project

† - CHEM 4205 is not taught every year; students may need to take it in the third year of their program.

‡ Students will conduct their Honours thesis work as OCEA 4200, but will defend their project in the Chemistry Department as part of CHEM 4901

1 - students are required to take EARTH 1080+1090 first

2 - students are required to take OCEA 3001 and OCEA 3002 first

3 - Students are required to take EARTH 1080+1090 first

4 - students are advised to take EARTH 1080+1090 first

5 - as available

6 - students are advised to take OCEA 4520 first

7 - students are required to take OCEA 4130 first

Students must take a total of 1.5 credits of non-required CHEM classes and 1.0 credits of non-required OCEA and related classes.

In addition, one credit from MATH 2001+2002 (calculus), or 1060+2080 (stats).

Recommended other classes (please review prerequisites):

- BIOL 1000, 3060, 4068
- EARTH 1080+1090, 1040+1050, 2410
- MATH 1400, 2001-2202, 2030-2300, 3110-3120-3260

Note: in the future, we could be adding a Methods and Instruments class and a Isotope Chemistry class

## C. Combined Honours Program: Earth Sciences/Oceanography

Oceanography is designated as the four credit component of the Combined Honours Degree. As a minimum, students must choose 11 credits beyond 1000-level in two subjects with not more than seven nor fewer than four in either; at a maximum, student will choose 13 credits beyond 1000-level in two subjects with not more than nine nor fewer than four in either.

#### Four Required Oceanography Credits taken from:

- OCEA 2000.06: The Blue Planet
- OCEA 2800.03: Climate Change
- OCEA 3001.03: Introduction to Physical Oceanography
- OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 3004.03: The Last Billion Years
- OCEA 3420.03: Geochemistry of the Aquatic Environments
- OCEA 4110.03: Geological Oceanography
- OCEA 4331.03: History of Marine Sciences
- OCEA 4470.03: Introduction to Seismic Imaging
- OCEA 4200.06: Honors Thesis \*

\*Students registered for this class must take instruction in thesis writing along with students registered in EARTH 4200.06

These Oceanography credits must be combined with core Earth Sciences classes, which constitute five credits:

- EARTH 2000.015: Field School
- EARTH 2001.03: Earth Materials Science I
- EARTH 2002.03: Earth Materials Science II
- EARTH 2050.03: Principles of Geophysics I
- EARTH 2110.03: Field Methods
- EARTH 2203.03: Sediments and Sedimentary Rocks
- EARTH 2205.03: Introduction to Palaeontology
- EARTH 3000.015: Computer Camp
- EARTH 3140.03: Structural Geology
- EARTH 3303.03: Stratigraphy
- EARTH 4000.00: Advanced Field School (NB: 0 credit hours)
- EARTH 4350.03: Tectonics

Additional credits EARTH credits will be chosen from the following list so that the total of OCEA and EARTH classes is between 11 and 13 credits.

- EARTH 2400.03: Marine Geosciences (recommended)
- EARTH 3010.03: Igneous Petrology
- EARTH 3020.03: Metamorphic Petrology
- EARTH 3302.03: Quaternary Sedimentary Environments
- EARTH 3500.03: Exploring GIS
- EARTH 4152.03: Fossil Fuels
- EARTH 4270.03: Applied Geophysics
- EARTH 4430.03: Quaternary Dating and Palaeoclimatology
- EARTH 4502.03: Micropalaeontology and Global Change
- EARTH 4520.03: GIS Applications to Environmental
- EARTH 4530.03: Environmental Remote Sensing

## D. Combined Honours Program: Mathematics/Oceanography

Mathematics is intended to be the primary or seven credit honours subject and Oceanography the second or four credit subject. The requirements for a combined honours program in Mathematics/Oceanography are that the students take a minimum of 11 and a maximum of 13 credits beyond the 1000 level in the two subjects with not more than seven nor fewer than four in each. Oceanography classes must be chosen in consultation with the Honours Project advisors.

### Required Classes

- MATH 2001.03/2002.03: Intermediate Calculus
- MATH 2030.03/2135.03: Linear Algebra
- MATH 2505.03: Analysis
- One of:
  - MATH 3030.06: Abstract Algebra or
  - MATH 3500.06: Analysis)
- One full credit in MATH at 4000 level.
- OCEA 2000.06: The Blue Planet
- OCEA 3001.03: Introduction to Physical Oceanography
- Plus MATH 4950 or OCEA 4200 (Honours Research Project)

### Recommended Mathematics Classes

- MATH 2120.03/3120.03: Differential Equations
- MATH 3210.03: Introduction to Numerical Analysis
- MATH 4220.03/4230.03: Partial Differential Equations

### Remaining Oceanography Electives Should Be Chosen From:

- OCEA 2800.03: Climate Change
- OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 3003.03: Introduction to Biological Oceanography
- OCEA 3004.03: The Last Billion Years
- OCEA 4110.03: Geological Oceanography
- OCEA 4140.03: Biological Oceanography
- OCEA 4160.03: Fisheries Oceanography
- OCEA 4210.03: Time Series Analysis in Oceanography and Meteorology
- OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans
- OCEA 4221.03: Ocean Dynamics
- OCEA 4222.03: Estuary, Coast and Shelf Dynamics
- OCEA 4250.03: Acoustical Oceanography
- OCEA 4290.03: Advanced Chemical Oceanography
- OCEA 4311.03: Fluid Dynamics I
- OCEA 4335.03: Environmental Impacts in Marine Ecosystems
- OCEA 4380.03: Marine Modelling

## E. Combined Honours Programs: Physics/Oceanography

Oceanography is designated as the four credit component of the Combined Honours Degree. At least 11 credits beyond the 1000 level are required in Physics and Oceanography. The additional nine credits must be chosen in consultation with the two departments involved, specifically the Honours Student Advisor in Physics and the Undergraduate Coordinator in Oceanography, before registering in the combined program.

Required Physics classes are:

### 2000 level:

- PHYC 2140.03: Physics Tools: Theory

- PHYC 2150.03: Physics Tools: Experiment.
- PHYC 2515.03: Modern Physics
- PHYC 2510.03: Electricity and Magnetism.

### 3000 level:

- PHYC 3000.03/3010.03: Experimental Physics
- PHYC 3200.03: Thermodynamics
- PHYC 3210.03: Statistical Mechanics
- PHYC 3590.03: Advanced Classical Mechanics
- PHYC 3540.03: Optic and Photonics

### 4000 level:

- PHYC 480.03/485.03 two Honours Projects<sup>†</sup>
- PHYC 4160.03: Math Methods in Physics
- PHYC 4100.03: Electrodynamics.

Other required classes as dictated by pre-requisites for the different physics classes offered:

- CHEM 1011.03/1012.03: Concepts in Chemistry I/II
- MATH 1000.03/1010.03: Differential and Integral Calculus I/II
- MATH 2001.03/2002.03: Intermediate Calculus I/II
- MATH 2030.03: Matrix Theory and Linear Algebra I and (MATH 2135.03: Linear Algebra or MATH 2300.03: Mathematical Modelling I or MATH 2400.03: Introduction to Numerical Computing)
- MATH 3110.03/3120.03: Differential Equations I/II

A full-credit class in scientific computer programming (e.g. PHYC 2050: Computer Simulations in Science) is recommended to be taken before the end of the second year.

<sup>†</sup> the 2nd honours projects (PHYC4850) can be a continuation of the first one (PHYC 4800). The projects need to have a strong oceanographic component, with a supervisor or co-supervisor chosen from the faculty members in the Department of Oceanography.

The Oceanography component is comprised of the following classes:

### Required Oceanography Classes:

- OCEA 2000X/Y.06 or 2001A/2002B: The Blue Planet
- OCEA 4120.03: Physical Oceanography
- OCEA 4311.03: Fluid Dynamics I

The following classes are available to fill the remaining OCEA credits\*:

- OCEA 4130.03: Chemical Oceanography
- OCEA 4210.03: Time Series Analysis in Oceanography and Meteorology
- OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans
- OCEA 4221.03: Ocean Dynamics
- OCEA 4222.03: Estuary, Coast and Shelf Dynamics
- OCEA 4250.03: Acoustical Oceanography
- OCEA 4520.03: Introduction to Atmospheric Science
- OCEA 5680.03: Ecosystem Modelling of Marine and Freshwater Environments (cross-listed as ENGM4680)

\* Students are responsible for fulfilling all pre-requisite classes or obtaining the permission of the instructor to enroll. Students in the program must consult regularly with the Undergraduate Coordinator in each Department.

## F. Combined Honours Program: Statistics/Oceanography

Oceanography is designated as the four credit component of the Combined Honours Degree. As a minimum, students must choose 11 credits beyond the 1000 level in two subjects, with not more than seven nor fewer than four credits in either. At a maximum, the student will choose 13 credits beyond the 1000 level in two subjects, with no more than nine, nor fewer than four in either. Oceanography classes must be chosen in consultation with the Honours Project supervisors.

### Required Oceanography Credits taken from:

- OCEA 2000.06: The Blue Planet  
(or equivalently OCEA 2001.03/OCEA2001.03)
- OCEA 3001.03: Introduction to Physical Oceanography

**Elective Oceanography classes<sup>1</sup> taken from the following list so that the total number of OCEA credits is at least four.**

- OCEA 2800.03: Climate Change
- OCEA 3002.03: Introduction to Chemical Oceanography
- OCEA 3003.03:<sup>2</sup> Introduction to Biological Oceanography
- OCEA 3004.03: The Last Billion Years
- OCEA 4110.03: Geological Oceanography
- OCEA 4140.03:<sup>2</sup> Biological Oceanography
- OCEA 4160.03: Fisheries Oceanography
- OCEA 4210.03/ STAT4390.03: Time Series Analysis in Oceanography and in Meteorology
- OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans
- OCEA 4221.03: Ocean Dynamics
- OCEA 4222.03: Estuary, Coast and Shelf Dynamics
- OCEA 4250.03: Acoustical Oceanography
- OCEA 4311.03: Fluid Dynamics I
- OCEA 4330.03: Benthic Ecology
- OCEA 4335.03: Environmental Impacts in Marine Ecosystems
- OCEA 4370.03: Deep Sea Biology
- OCEA 4380.03: Marine Modelling

**Required Statistics/Mathematics Classes**

- MATH 2001.03: Intermediate Calculus I
- MATH 2002.03: Intermediate Calculus II
- MATH 2030.03: Matrix Theory and Linear Algebra I
- MATH 2040.03: Matrix Theory and Linear Algebra II
- STAT 2050.03: Exploratory Data Analysis
- STAT 2060.03: Introduction to Probability and Statistics
- STAT 2080.03: Statistical Methods for Data Analysis and Inference
- STAT 3340.03: Regression and Analysis of Variance
- STAT 3360.03: Probability
- STAT 3460.03: Intermediate Statistical Theory

At least two half classes chosen from:

- STAT 4066.03: Advanced Statistical Theory I
- STAT 4350.03: Applied Multivariate Analysis
- STAT 4620.03: Data Analysis
- STAT 4390.03/OCEA4210.03: Time Series Analysis I

**Elective Statistics/Mathematics classes taken from the following list so that the total of OCEA and STAT credits is at least 11.**

- MATH 3110.03: Differential Equations
- STAT 3345.03: Environmental Risk Assessment
- STAT 4066.03: Advanced Statistical Theory I
- STAT 4350.03: Applied Multivariate Analysis
- STAT 4620.03: Data Analysis
- STAT 4390.03/OCEA4210.03: Time Series Analysis I

**Either**

- OCEA 4200.06:<sup>3</sup> Honours Thesis
- or
- STAT 4950.03:<sup>3</sup> Honours Research Project

<sup>1</sup> - Students should be aware of prerequisites or permissions needed for any of these classes.

<sup>2</sup> - Only one of OCEA 3003 and OCEA 4140 can be counted towards the Combined Honours degree. OCEA 3003 is currently given in the summer session.

<sup>3</sup> - Students in the program must have co-supervisors in each Department, unless the advisor is Cross- or Joint-Appointed or holds Adjunct status in the other Department.

Note: Cross-listed classes can only be counted once for the fulfillment of degree requirements.

**G. BSc (20 credit) Double Major: Marine Biology/ Oceanography, Chemistry/Oceanography, Earth Science/Oceanography, Mathematics/Oceanography, Physics/Oceanography, Statistics/Oceanography**

Students should follow the requirements for a Combined Honours program (see sub-section B - G, above), but replace the Honours thesis with other MARI/ OCEA, CHEM/OCEA, EARTH/OCEA, MATH/OCEA, PHYC/OCEA, STAT/ OCEA classes.

**III. Class Descriptions**

**OCEA 1000X/Y.06: Conversations with Ocean Scientists.**

Students engage with working ocean scientists about their research, its relevance, and how to communicate science to different audiences. In addition to regular writing exercises that include journaling, blogging, and lab reporting, students compose a research paper and follow it through the process of submission and peer-review for an in-class journal.

FORMAT: ✍ Writing requirement. Lecture 1.5 hours, tutorial 1.5 hours

CO-REQUISITE: MATH 1000.03 or MATH 1215.03

**OCEA 2000X/Y.06: 2001.03, 2002.03: The Blue Planet.**

This class provides a general survey of oceanography. It is designed to develop an understanding of the ocean and of the science of oceanography. Students learn about the geological, chemical, physical and biological processes at work in the sea. Consideration is also given to human impacts.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms. The exception is for Marine Biology Co-op students, who can enroll in OCEA 2001X.03 and OCEA 2002Y.03 in non-consecutive terms if their program demands conflict with a full-year enrollment.

INSTRUCTOR(S): P. Hill

FORMAT: Lecture 3 hours

EXCLUSION: OCEA 2001.03/2002.03, OCEA 2850.06, OCEA 2851.03/2852.03

**OCEA 2001.03: The Blue Planet I.**

This class provides a general survey of oceanography. It is designed to develop an understanding of the ocean and of the science of oceanography. Students learn about the geological, chemical, physical and biological processes at work in the sea. Consideration is also given to human impacts.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms. The exception is for Marine Biology Co-op students, who can enroll in OCEA 2001.03 and OCEA 2002.03 in non-consecutive terms if their program demands conflict with a full-year enrollment.

INSTRUCTOR(S): P. Hill

EXCLUSION: OCEA 2000.06, OCEA 2850.06, OCEA 2851.03/2852.03

**OCEA 2002.03: The Blue Planet II.**

This class provides a general survey of oceanography. It is designed to develop an understanding of the ocean and of the science of oceanography. Students learn about the geological, chemical, physical and biological processes at work in the sea. Consideration is also given to human impacts.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms. The exception is for Marine Biology Co-op students, who can enroll in OCEA 2001.03 and OCEA 2002.03 in non-consecutive terms if their program demands conflict with a full-year enrollment.

INSTRUCTOR(S): P. Hill

**OCEA 2020.03: Tools and Concepts in Ocean Sciences I.**

Students gain applications-based insights into concepts introduced in OCEA 2000.06 through hands-on experience with data acquisition and analysis, instrumentation, and wet-lab experiments. Quantitative skills are developed and applied to ocean examples. Topics include determining the age of the earth, seawater chemistry, acidification, water mass variation, waves and tides.

PREREQUISITE: MATH 1000.03; STAT 1060.03; PHYC 1280/1290.03 (or PHYC 1300.06); at least 1 credit from BIOL 1010/1011 or (BIOL 1020.03/ 1021.03), or CHEM 1011.03/1012.03, EARTH 1080.03/1090.03 ; or permission of instructor.

CO-REQUISITE: OCEA 2000.06 (or OCEA 2001.03/2002.03); or permission of instructor.

### OCEA 2021.03: Tools and Concepts II.

Following from OCEA 2020.03, students further develop quantitative skills applied to topics that include ocean optics, ocean productivity and biomass, sedimentation, remote sensing, and biological modelling. Students build their own ocean sensors that are used to measure various states and rates during labs throughout the term.

FORMAT: Lab 3 hours

PREREQUISITE: OCEA 2020.03

CO-REQUISITE: OCEA 2000.06 (or OCEA 2001.03/2002.03); or permission of instructor

### OCEA 2800.03: Climate Change.

See class description for PHYC 2800.03 in the Physics and Atmospheric Science section of this calendar.

CROSS-LISTING: PHYC 2800.03, GEOG 2800.03

EXCLUSION: ECON2850.06, PHYC2850.06

### OCEA 3001.03: Introduction to Physical Oceanography.

This course introduces Ocean Physics, focusing on issues of interest to undergraduates in ocean-related disciplines. The approach is to bind facts together with ideas, often starting with thought experiments and proceeding to simple mathematical models.

INSTRUCTOR(S): D. Kelley

FORMAT: Lecture 3 hours

PREREQUISITE: OCEA 2000.06 (or OCEA 2001.03/2002.03); OCEA 2020.03;

OCEA 2021.03; or permission of Instructor

EXCLUSION: OCEA 3170

### OCEA 3002.03: Introduction to Chemical Oceanography.

This course provides students with a basic understanding of the composition of seawater and the processes that leads to this composition. This understanding is both qualitative and quantitative through the use of thermodynamic, kinetic and box models to describe the balances that produce the observed chemical distributions.

INSTRUCTOR(S): H. Thomas

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 1011.03 and CHEM 1012.03 or equivalents, and OCEA 2000.06 (or OCEA 2001.03/2002.03); OCEA 2020.03; OCEA 2021.03; or

permission of instructor

EXCLUSION: OCEA 3170

### OCEA 3003.03: Introduction to Field Oceanography.

This class explores interrelationships between living organisms in the sea and the ocean environment. Biological processes are introduced in the context of the physical and chemical oceanography. The emphasis is on sea-going field work on day trips in local marine waters and hands-on laboratory investigation.

INSTRUCTOR(S): M. Lewis

FORMAT: Lecture 3 hours

PREREQUISITE: OCEA 2000

CROSS-LISTING: MARI 3003.03, BIOL 3003.03

### OCEA 3004.03: The Last Billion Years.

This class examines major events in Earth history. The geological evidence of major events will be described, and the hypothesized causes of the events will be examined. The goal of this course is to develop on the part of students an understanding of the functioning of the earth/ocean/atmosphere system.

INSTRUCTOR(S): P. Hill

PREREQUISITE: OCEA 2000X/Y or EARTH 1080

### OCEA 3420.03: Geochemistry of Aquatic Environments.

This class is an introduction to the governing principles and processes of aquatic geochemistry. Specific topics will include physical chemistry of natural waters, kinetics of geochemical reactions, the hydrologic cycle, the carbonate system and pH, redox reactions, weathering and mineral-solution equilibria, controls on the composition of rainwater, rivers, and oceans.

INSTRUCTOR(S): M. Kienast

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 1011.03/1012.03 or equivalent and EARTH 1080.03/1090.03

CROSS-LISTING: EARTH 3420.03

### OCEA 4000.03: Oceans and Global Change.

This course examines the role and response of the Oceans to global change, including alterations in currents and circulation, increases in sea level and storm surges, changes in ocean chemistry, modification to the types and patterns of sediment deposition, alterations in the abundances and distributions of organisms, and overall productivity. The course will discuss means of predicting these changes and their effects.

INSTRUCTOR(S): M. Kienast, K. Fennel, H. Thomas

FORMAT: Lecture 3 hours

PREREQUISITE: OCEA 3001.03, OCEA 3002.03, OCEA 4110.03, OCEA 4140.03 or permission of Instructor

### OCEA 4110.03: Geological Oceanography.

This class is intended to give a broad survey of topics in marine geology and geophysics. The class content covers recent methods and observations with quantitative applications to an understanding of geophysical and geological processes. Some topics covered are: plate tectonics; seismic, heat flow, gravity, and magnetic methods; patterns and processes of sediment transport and deposition.

NOTE: Some laboratory exercises may augment the lectures. Third year and honours undergraduates will be admitted by consent of the instructor. No previous background in Geology or Geophysics is required.

INSTRUCTOR(S): M. Kienast

FORMAT: Lecture 3 hours

PREREQUISITE: OCEA 2000.06 (or OCEA 2001.03/2002.03); OCEA 2020.03; OCEA 2021.03; or permission of instructor.

CROSS-LISTING: OCEA 5110.03, EARTH 4110.03

### OCEA 4115.03: Micropaleontology and Global Change.

See course description for EARTH 4502 in the Earth Sciences section of this calendar.

CROSS-LISTING: EARTH 4502.03

### OCEA 4120.03: Physical Oceanography.

This course introduces undergraduate students to the physical properties and dynamics of the oceans. Topics range from global circulation down to the small scales of turbulence. Fact and theory are blended throughout. Quantitative problem solving is emphasized in assignments.

INSTRUCTOR(S): D. Kelley

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 1000.03, MATH 1010.03, classic calculus or equivalent, and permission of the instructor

CROSS-LISTING: OCEA 5120.03

RESTRICTION: Third- and fourth-year students only

### OCEA 4130.03: Chemical Oceanography.

This class covers the major and minor constituents of sea water, the controls on its chemical composition, nutrient cycling, gas exchange and the influence of the oceans on atmospheric chemistry. Other topics included are chemical tracers, and radiochemical dating methods, stable isotope studies, chemical speciation and chemical models of sea water.

INSTRUCTOR(S): D. Wallace

FORMAT: Lecture 3 hours, some labs

PREREQUISITE: OCEA 2000, OCEA 3002 or instructor's consent

CROSS-LISTING: OCEA 5130.03

### OCEA 4140.03: Biological Oceanography.

The goal is to describe how physical, chemical and biological processes interact to determine the species composition, biogeochemical activities, and trophic structure of marine communities. Outstanding problems currently facing biological oceanographers and earth systems scientists are discussed, as are current attempts and methodologies to address them.

NOTE: Biological oceanography is a quantitative science and extensive problem solving is required. Students should be competent in mathematics through calculus. Permission of instructor is required.

INSTRUCTOR(S): J. Grant

PREREQUISITE: OCEA 2000.06 (or OCEA 2001.03/2002.03); OCEA 2020.03; OCEA 2021.03; or permission of instructor

CROSS-LISTING: OCEA 5140.03, BIOL 4661.03, 5661.03, MARI 4661.03

### OCEA 4160.03: Fisheries Oceanography.

Oceanographic influences on ecology of marine fish: on population dynamics, distribution, abundance, reproduction, life history, feeding, growth, metabolism, mortality, and recruitment. Emphasis on contemporary hypotheses and primary

literature and some on fishery management. Primary-publication-style research paper required. Competence with fundamental population dynamics, ecology, physical oceanography, mathematics, and statistical analyses expected.

INSTRUCTOR(S): C.T. Taggart

FORMAT: Lecture 3 hours, some practicums/tutorials

PREREQUISITE: OCEA 2000.06 or 2001.03 or 2002.03, BIOL 2060.03 and/or 3067.03 or equivalent. MATH/STAT 1060.03 and/or 2080.03 or equivalent or instructor's consent.

CROSS-LISTING: BIOL 4369.03, MARI 4369.03, OCEA 5160.03

### **OCEA 4200X/Y.06: Honours Research.**

This class is required for students enrolled in the Concentrated Honours in Ocean Sciences, and certain streams of the Combined Honours in Oceanography program. It consists of a research project under the supervision of a faculty member, including an original component in oceanography. A written thesis is submitted to the Department.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

PREREQUISITE: Permission of Honours Coordinator.

### **OCEA 4210.03: Time Series Analysis in Oceanography and Meteorology.**

This course describes the application of advanced time series analysis in oceanography and meteorology. Time and frequency domain approaches are covered. Students will develop their own computer programs to analyze real observations. Specific topics include stationarity, auto and cross covariance functions, power and cross spectra, and state space models.

INSTRUCTOR(S): M. Dowd

FORMAT: Lecture 3 hours

PREREQUISITE: Instructor's consent

CROSS-LISTING: STAT 4390.03/5390.03, OCEA 5210.03

### **OCEA 4220.03: Numerical Modelling of Atmospheres and Oceans.**

This class discusses numerical modelling techniques for simulating atmospheric and oceanic circulations. Material includes: review of governing equations; finite difference, finite element, and spectral methods; Eulerian, semi-implicit and semi-Lagrangian time integration techniques; accuracy and stability analyses; data assimilation and ensemble prediction methods; and boundary treatment for ocean models.

INSTRUCTOR(S): J. Sheng

FORMAT: Lecture/3 hours

PREREQUISITE: 1000-level calculus class and instructor's consent

CROSS-LISTING: OCEA 5220.03

### **OCEA 4221.03: Ocean Dynamics.**

An advanced class for students in Physical Oceanography and Atmospheric Science that studies the basic equations governing rotating geophysical flows, plus applications. Topics include geostrophy, conservation of potential vorticity, quasi-geostrophic dynamics, geostrophic adjustment, response to surface forcing (steady and unsteady).

INSTRUCTOR(S): A. Hay

CROSS-LISTING: OCEA 5221.03

### **OCEA 4222.03: Estuary, Coast and Shelf Dynamics.**

This class discusses the physical processes that operate on continental shelves to create long waves, tides, tidal mixing, thermohaline circulation, wind forcing, upwelling, etc. Both observations and models for these processes are discussed.

INSTRUCTOR(S): J. Sheng

FORMAT: Lecture/3 hours

PREREQUISITE: OCEA 4120.03

CROSS-LISTING: OCEA 5222.03

### **OCEA 4230.03: Biology of Phytoplankton.**

The role of phytoplankton as primary producers of organic material in the sea, and as agents of biogeochemical transformations, explored in the context of interactions with physical and chemical oceanographic processes.

INSTRUCTOR(S): J. Cullen

FORMAT: Lecture 3 hours, some labs

PREREQUISITE: Instructor's consent

CROSS-LISTING: BIOL 4662.03, OCEA 5230.03, MARI 4662.03

### **OCEA 4290.03: Advanced Chemical Oceanography.**

This class presents research topics in chemical oceanography, taught as 3-4 self-contained modules. Examples include, the oceanic CO<sub>2</sub> system and its relation to

climate change, chemical reactions in sediments, photochemistry in the upper ocean, and inferring the chemistry of ancient oceans through the isotope record in sediments.

INSTRUCTOR(S): R. Moore

PREREQUISITE: Students will have completed all required 3000 level courses in Oceanography, OCEA 4130, and have the consent of the instructor of this class.

CROSS-LISTING: OCEA 5290.03

RESTRICTION: Open only to students enrolled in the combined Honours in Chemistry and Oceanography

### **OCEA 4311.03: Fluid Dynamics I.**

An introduction to the theory of fluid dynamics, with some emphasis on geophysically important aspects. Contents: tensor mathematics, flow kinematics, equations of motion, viscous flow, potential flow, convection, turbulence, and basic aerodynamics. Occasional reference will be made to current research topics, especially those in Physical Oceanography.

INSTRUCTOR(S): T. Ross

FORMAT: Lecture 3 hours

PREREQUISITE: Intended for first-year graduate students in physical

oceanography, but graduate students or senior undergraduates in Mathematics or Physics are invited to take it (subject to instructor approval)

CROSS-LISTING: PHYC 4311.03, PHYC 5311.03, OCEA 5311.03

### **OCEA 4330.03: Benthic Ecology.**

A graduate/fourth year undergraduate class on major problems of benthic ecology, such as food supply to benthic animals, and geomicrobiological processes in sediments. Classes consist of two lectures per week and one journal paper discussion session. The last three weeks of the class are devoted to a class research project.

INSTRUCTOR(S): J. Grant

FORMAT: Lecture 3 hours

PREREQUISITE: Instructor's consent

CROSS-LISTING: BIOL 4666.03, OCEA 5330.03, MARI 4666.03

### **OCEA 4331.03: History of Marine Sciences.**

This class describes the development of the marine sciences from biological, chemical, physical and geological knowledge going back to the 17th century or earlier. It includes the important voyages of exploration, the development of marine biology, ocean circulation and plate tectonics, also the importance of technological changes upon marine sciences.

INSTRUCTOR(S): E.L. Mills

FORMAT: Lecture 3 hours

PREREQUISITE: Instructor's consent

CROSS-LISTING: BIOL 4664.03, OCEA 5331.03, SCIE 4001.03, HIST 3073.03, HSTC 3331.03, MARI 4664.03

### **OCEA 4335.03: Environmental Impacts in Marine Ecosystems.**

Consideration of various activities in marine environments, with focus on ecosystem level influences: dispersion, elemental fluxes, benthic impacts, food webs, biodiversity. Simulation modelling of ecosystems is undertaken using Simile OOP software. Classes include lectures, modelling examples, and discussion of research papers. Course requirements consist of problem sets and modelling project.

INSTRUCTOR(S): J. Grant

FORMAT: Lecture

CROSS-LISTING: OCEA 5335.03, BIOL 4335.03, MARI 4335.03

CO-REQUISITE: BIOL 2060.03, MATH 1000.03, STAT 1060, or permission of the instructor.

### **OCEA 4370.03: Deep Sea Biology.**

We focus on the biology of organisms inhabiting the deep sea: physiological adaptations to the physicochemical and geological environment; spatial and temporal distributions of biological assemblages; and regulatory factors of these assemblages, such as currents, food availability, reproduction and recruitment. Also, we delve into unique habitats, such as hydrothermal vents.

INSTRUCTOR(S): A. Metaxas

PREREQUISITE: BIOL 2060.03 and OCEA 2000.06

CROSS-LISTING: BIOL 4370.03, MARI 4370.03, OCEA 5370.03

### **OCEA 4380.03: Marine Modelling.**

This class provides a survey of modelling techniques applied to physical, biological and biogeochemical problems in oceanography. Lecture material covers the philosophy of modelling, dimensional analysis, parameterization of various

processes, numerical approaches to solving differential equations, etc. Students are given the opportunity to study topics of particular interest to them.

INSTRUCTOR(S): K. Fennel

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 1000.03; MATH 1010.03; OCEA 2020.03; OCEA 2021.03; and permission of instructor

CROSS-LISTING: OCEA 5380.03

### **OCEA 4401.03: Marine Management I.**

This class exposes students with a marine science background to the increasing need for marine scientists and ocean managers and policy makers to work collaboratively to address the interdisciplinary nature of the problems confronting the world's oceans. This class is restricted to 4th year students with a marine science background.

FORMAT: Lecture

PREREQUISITE: OCEA 2000.06 (or OCEA 2001.03/2002.03)

RESTRICTION: Restricted to 4th year students

### **OCEA 4402.03: Marine Management II.**

Students focus on the linkages between ocean governance and ocean science to understand the role of marine science in informing and influencing decisions affecting coastal and marine space and resources at multiple geographic and jurisdictional scales. This class is restricted to 4th year students with a marine science background.

PREREQUISITE: OCEA 2000.06 (or OCEA 1002.03/2002.03)

### **OCEA 4411.03: Atmospheric Dynamics I.**

See course description for PHYC 4411.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITE: PHYC 2140.03 and MATH 3110.03, or instructor's consent

CROSS-LISTING: OCEA 5411.03, PHYC 4411.03/5411.03

### **OCEA 4412.03: Atmospheric Dynamics II.**

See course description for PHYC 4412.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITE: OCEA 4411.03/5411.03 or PHYC 4411.03/5411.03, or instructor's consent

CROSS-LISTING: OCEA 5412.03, PHYC 4412.03/ PHYC 5412.03

### **OCEA 4470.03: Introduction to Seismic Imaging.**

See course description for EARTH 4470.03 in the Earth Sciences section of this calendar.

PREREQUISITE: EARTH 3270.03, or instructor's consent

CROSS-LISTING: OCEA 5470.03, EARTH 4470.03/5470.03

### **OCEA 4480.03: Advanced Seismic Imaging.**

See course description for EARTH 4480.03 in the Earth Sciences section of this calendar.

PREREQUISITE: EARTH 4470.03, or instructor's consent

CROSS-LISTING: EARTH 4480.03, EARTH 5480.03, OCEA 5480.03

### **OCEA 4505.03: Atmospheric Physics.**

See course description for PHYC 4505.03 in the Physics & Atmospheric Science section of this calendar.

CROSS-LISTING: OCEA 5505, PHYC 4505/5505

### **OCEA 4520.03: Introduction to Atmospheric Science.**

See course description for PHYC 4520.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITE: PHYC 2140.03, or instructor's consent

CROSS-LISTING: OCEA 5520.03, PHYC 4520.03/5520.03

### **OCEA 4541.03: Synoptic Meteorology I.**

See course description for PHYC 4540.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITE: At least one third-year Physics class

CROSS-LISTING: OCEA 5541.03, PHYC 4541.03/5541.03

CO-REQUISITE: OCEA 4220.03

### **OCEA 4550.03: Synoptic Meteorology II.**

See course description for PHYC 4550.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITE: OCEA 4541.03, or PHYC 4540

CROSS-LISTING: OCEA 5550.03, PHYC 4550.03/5550.03

### **OCEA 4595.03: Atmospheric Chemistry.**

See course description for PHYC 4595.03 in the Physics and Atmospheric Science section of this calendar.

PREREQUISITE: PHYC 2140.03 and a first-year chemistry class

CROSS-LISTING: OCEA 5595.03, PHYC 4595.03, PHYC 5595.03, CHEM 4595.03

van Donkelaar, A., PhD (Dalhousie)

## I. Introduction

Physics is the study of the fundamental properties of energy and matter. It attempts to describe and explain the great diversity of nature with the fewest and simplest hypotheses, and to show the underlying similarities of seemingly diverse phenomena. It requires imagination and its success is judged by whether or not nature confirms its predictions when tested by experiment. An understanding of physics must be built on a good foundation. The various programs are arranged to do this in an orderly, efficient way.

The Honours program is a focussed, intensive program aimed at those intending to pursue either graduate study or professional research work either in physics or in allied sciences. The various Majors programs provide the opportunity to pursue a broad education in both physics and other areas. Such programs provide a suitable background for employment in industry, and for further studies in such fields as meteorology, engineering, education, law, medicine, dentistry, health sciences, and business.

### First Year Classes

There are three first year classes. PHYC 1450X/Y.06 is a general interest class for BA students and is not acceptable as a prerequisite for further classes in physics. PHYC 1190.03/1290.03, and 1300X/Y.06 both give a general introduction to physics, but each has its own particular approach and selection of topics.

PHYC 1190.03/1290.03 is primarily for students intending to make a study of a physical science or engineering; it has regular labs, occasional tutorials, uses calculus, and is accepted as a prerequisite for advanced physics classes. Nova Scotia Grade XII Physics or its equivalent is a prerequisite. It is recommended that 1190/1290 be taken consecutively, but 1190 is not a prerequisite for 1290.

PHYC 1300X/Y.06 is an introductory class which is oriented towards the health sciences and is primarily intended for students in biology, pre-medicine, pre-dentistry and allied health sciences. The class incorporates labs and tutorials, and is accepted as a prerequisite for advanced physics classes when Mathematics 1000.03 and 1010.03 are taken concurrently. It is a good preparation for the Medical College Admission Test (MCAT). Nova Scotia Grade XII Physics or its equivalent is highly recommended.

### Second Year Classes

There are four 2nd year core physics classes (PHYC 2140, 2150, 2510, 2515). These classes are also suitable for students in other disciplines who would like to enhance their knowledge of physics. In particular, PHYC 2150 provides an opportunity to gain more laboratory experience, which is extremely valuable in many jobs.

### Third and Fourth Year Classes

Not all classes are offered each year. Students should take careful note of the year in which each of these classes is planned to be offered. This information can be found at the department website (<http://www.physics.dal.ca>)

Prizes are awarded to the top students in each year of the program. Please refer to Section IV. 9 on page 647 for the full listing of Physics and Atmospheric Science awards.

## II. Degree Programs

There are two main programs: The 20 Credit Honours in Physics and the 20 Credit BSc with a Major in Physics. In addition, there are combined Honours and Major Programs, a Co-operative Education Program in Physics and a 15 Credit BSc with a Minor in physics. Our Department also offers a one year Diploma in Meteorology, leading to a career as a professional meteorologist. This diploma program can also be taken as part of a 20 Credit BSc. Details of each program are given below.

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, page 131 of this calendar.

### A. BSc with Honours in Physics

All students who intend to take a BSc with Honours in Physics are encouraged to discuss their program with staff members of the department, and should consult with the Undergraduate Advisor by the beginning of the second year.

#### Departmental Requirements

A Concentrated Honours Program in Physics will normally include the following classes:

##### 1000 level

- PHYC 1190.03/1290.03 or 1300X/Y.06 or SCIE 1501X/Y.27 or 1510X/Y.33

##### 2000 level

- PHYC 2140.03/2150.03
- PHYC 2515.03/2510.03

##### 3000 level

- PHYC 3000.03/3010.03
- PHYC 3640.03/3590.03
- PHYC 3200.03/3210.03

##### 4000 level

- PHYC 4800.03/4850.03
- PHYC 4151.03
- PHYC 4160.03/4100.03

#### Classes from other departments

- CHEM 1011.03/1012.03
- MATH 1000.03/1010.03
- MATH 2001.03/2002.03
- MATH 2030.03 and (MATH 2120.03 or MATH 2135.03 or MATH 2300.03 or MATH 2400.03)
- MATH 3120.03
- One or more of PHYC 3050.03, PHYC 3250.03, or PHYC 4250.03
- Two other physics half credits at the 3000 or 4000 level, other than PHYC 3160.03, PHYC 3170.03, PHYC 3330.03, PHYC 4540.03, PHYC 4550.03

Students with a special interest in Applied Physics should take PHYC 3000.03/3010.03 and 3540.03. Up to five full credits may be chosen as general electives from the Faculty of Engineering. Participation in the Co-op Program is encouraged.

### B. Combined Honours

Students interested in both physics and another science may wish to take a BSc with Honours in Physics and the other subject combined. In recent years, students have followed programs combining physics with:

- Mathematics
- Biology
- Earth Sciences
- Chemistry
- Computer Science
- History of Science and Technology
- Contemporary Studies

As so many possibilities exist, we do not list specific programs here. Any combined honours program involving Physics must include the classes specified under "BSc (15 credit) Minor in Physics" below.

A combined Honours Degree may be an appropriate choice for your particular interests. However, if you opt for a combined degree, make sure that you are adequately educated in the areas of your future career. It is possible that if you don't select the correct classes, you might have to do a qualifying year before being able to enter a regular graduate program.

Students contemplating such a program should, in any case, consult the departments before the beginning of their second year of study. Examples of such programs can be found on our website: <http://www.physics.dal.ca>.

### C. BSc (20 credit) Major in Physics

A BSc (20 credit) Major in Physics will normally include the following classes:

##### 1000 level

- PHYC 1190.03/1290.03 or 1300X/Y.06 or SCIE 1501X/Y.27 or 1510X/Y.33

##### 2000 level

- PHYC 2140.03/2150.03
- PHYC 2515.03/2510.03
- Two other physics half credits at or above the 2000 level

##### 3000 level

- Eight physics half credits at the 3000 level or above; which must include one or more of PHYC 3050.03, PHYC 3250.03, or PHYC 4250.03

#### Classes from other departments

- MATH 1000.03/1010.03
- MATH 2001.03/2002.03
- CHEM 1011.03/1012.03

## D. BSc (15 credit) Minor in another subject

Please see requirements below, section III. D. Minors in Physics.

The BSc (15 credit) can be combined with a Diploma in Engineering (see also III below)

Completion of the BSc (15 credit) with appropriate physics classes can lead to admission into the Diploma in Meteorology Program (see IV).

## E. Co-op Education in Physics

Co-operative Education in Science (Science Co-op) is a program where academic study is combined with paid career related work experience. Students incorporate three or four work terms in their academic study terms and graduate with a Bachelor of Science Co-op. Science Co-op enables students to apply their knowledge directly while providing them with work experience that assists in making educated career choices. Students apply to join Science Co-op before their second year of study. If accepted into the Science Co-op program, students are required to register for and attend the Science Co-op Seminar Series (SCIE 2800.00) in the fall term of the year they join.

The scheduling of Science Co-op work terms must be taken into account in planning class selection. Consult with the Physics Co-op Academic Advisor for your work term sequence.

See the “Co-operative Education in Science” section of this calendar, or <http://www.sciencecoop.dal.ca>, for information on Science Co-op such as Science Co-op requirements, eligibility, how to apply, deadlines and other related information.

For further information on the Physics Co-op program, please see <http://www.physics.dal.ca> and follow the links to the Science Co-op website.

Co-op Program Advisor in Physics:  
D. Labrie (494-2322) [daniel.labrie@dal.ca](mailto:daniel.labrie@dal.ca)

## F. Honours Co-op in Physics

### Departmental Requirements

Same as for the regular Honours in Physics as above with the addition of the following:

- Three or four supervised work-terms: PHYC 8891.00, 8892.00, 8893.00, 8894.00
- Co-op Seminar: SCIE 2800.00

This is required and is a prerequisite to the first work term.

- Continuous standing of at least B

It is strongly recommended that students take a full credit in scientific computer programming in their second year.

Please consult the Department's website (<http://www.physics.dal.ca>) for complete program listing.

## III. Interdisciplinary Opportunities

In addition to combined honours, opportunities exist to combine other degrees in physics with the many programs Dalhousie offers. Below are listed interdisciplinary opportunities which may be of particular interest. Please contact the Undergraduate Advisor for details.

### A. Physics and Engineering Concurrent Programs

If you wish to enter one of these concurrent programs, you should register for the standard first year Engineering program and consult the Undergraduate Advisor in Physics in order to plan your class selection. Additional details, can be found in the Degree Requirements section.

The following Programs can be taken concurrently:

1. BSc/DipEng: Students can complete the requirements for the BSc (15 credit) and the DipEng in as little as three years.
2. BSc/BEng: Students can complete the BSc (15 credit) and the BEng degrees in as little as five years.
3. A BSc (Honours Physics)/BEng combination is also possible (see <http://www.physics.dal.ca> for more information).

## B. Geophysics

For those interested in Geophysics, it is recommended that they take the classes required for a Combined Honours in Physics and Earth Sciences, or for Honours Physics, and choose as their electives a selection of the following classes: EARTH 2270.03, 3270.03, 4470.03, 4480.03.

## C. Minors and Other Programs

Minor programs allow students to develop subject specialities, especially ones taught outside their main faculty, that complement their major or honours subjects. Minors are normally added to a four-year major or concentrated honours program. If a minor is added to a double major or a combined honours program, students may find that they need to take more than 20 credits to complete all of their degree requirements. Combined with a four-year degree program in Physics and Atmospheric Science, minor programs are available in the following subject areas.

### Minor Subject Areas

- Business (BA or BSc)
- Canadian Studies (BSc only)
- Community Design (BA or BSc)
- Computer Science (BSc only)
- Environmental Studies (BA or BSc)
- Film Studies (BA or BSc)
- Food Science (BSc only)
- Health Studies (BA only)
- Journalism (BA or BSc)
- Law and Society (BA or BSc)
- Management (BA or BSc)

Any student wishing to pursue a minor in these subjects should consult with the College of Arts and Science Degree Requirements section of the Undergraduate Calendar, starting on page 131, as well as the particular subject area of the calendar.

### Bachelor of Computer Science with Minor in Physics

The requirements for the Minor are as specified for the 15 Credit BSc with Minor in Physics.

### Diplomas, Certificates, and Language Proficiency Certificates

In combination with a BA or BSc there are certificates or diplomas that can be obtained to emphasize areas of proficiency. For a complete list and details refer to the College of Arts and Science Degree Requirements on page 131 of the calendar.

## D. Minors in Physics

Students from other disciplines that have any three credits in Physics above the 1000 level, will obtain a Minor in Physics.

## IV. Diploma in Meteorology

### A. BSc or BA (20 credit) Major in Physics combined with a Diploma in Meteorology

This is an integrated Physics/Meteorology program. The student follows the regular 20 Credit BSc in Physics. The minimum requirements are:

- PHYC 1190.03/1290.03
- PHYC 2140.03/2150.03
- PHYC 2515.03/2510.03
- PHYC 3050.03 or PHYC 3250.03 or PHYC 3590.03 or PHYC 4311.03
- PHYC 3200.03
- One other half credit at the 2000 level or above in physics
- MATH 1000.03/1010.03
- MATH 2001.03/2002.03
- MATH 2030.03
- MATH 2040.03 or MATH 2120.03 or MATH 2135.03 or MATH 2300.03 or MATH 2400.03
- CHEM 1011.03/1012.03
- Plus 13 half-credit electives (some of which could be additional physics classes)

The required Meteorology classes are:

- PHYC 4505.03/PHYC 4570.03
- PHYC 4540.03/4550.03

- PHYC 4411.03/4412.03
- PHYC 4520.03/4595.03
- OCEA 4120.03
- OCEA 4220.03 or other classes approved by Program Coordinator to total one additional half credit.

Students are encouraged to ensure that their program meets the requirements for the 15 Credit BSc, by the end of Year 3.

## B. Diploma in Meteorology

For admission into this program, a general 15 Credit BSc degree in Physics, Mathematics, or Chemistry, with appropriate Physics classes, is required. A strong background in Physics and Mathematics is necessary, and classes taken should cover Vector Calculus and differential equations. To obtain the Diploma, the ten half-credit Meteorology classes listed above are required.

More information on the Diploma in Meteorology program is available at: [http://atm.dal.ca/Diploma\\_in\\_Meteorology/](http://atm.dal.ca/Diploma_in_Meteorology/)

## C. Atmospheric Science

After completion of the Diploma program, students are eligible to be considered for admission to a graduate program in Atmospheric Science at Dalhousie.

## V. Class Descriptions

NOTE: Not all classes are offered every year. Please consult the current timetable for this year's offerings.

### PHYC 0010.00: University Prep Physics.

This class can be used as a prerequisite for PHYC 1100X/Y.06 and PHYC 1300X/Y.06. The class will develop problem-solving techniques in preparation for topics to be covered in PHYC 1100X/Y.06 and PHYC 1300X/Y.06. This class is offered by the College of Continuing Education. Students may register and pay for this course at the College of Continuing Education located at 1220 LeMarchant Street, 2nd Floor or by calling (902) 494-2375. This class is offered in the Fall and Summer sessions only (see College of Continuing Education for more details <http://collegeofcontinuinged.dal.ca>).

PREREQUISITE: Grade 12 Pre-Calculus Math

### PHYC 1190.03: Introduction to Physics.

This class concentrates on mechanics (forces and motion). Primarily for students interested in Physical Sciences and Engineering. Students entering this class must be familiar with algebra, graphs, and trigonometry, and should be taking calculus (MATH 1000.03/1010.03 or MATH 1280.03/1290.03) concurrently. Ideas are introduced through in-class demonstrations enabling students to relate physical theory to events in the real world. Students explore many concepts via hands-on labs.

INSTRUCTOR(S): J. Dahn, T. Duck

FORMAT: Lecture 3 hours, lab 3 hours (number of labs = 12)

PREREQUISITE: High School Physics equivalent to the Nova Scotia 12 level.

Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term. The College of continuing Education at: <http://collegeofcontinuinged.dal.ca>

EXCLUSION: Credit will be given for only one of 1190.03, 1280.03, or 1310.03

### PHYC 1290.03: Introduction to Physics.

This class concentrates on oscillations and waves, optics, electricity and magnetism. Primarily for students interested in Physical Sciences and Engineering. This class is required for all Engineering programs. Students entering this class must be familiar with algebra, graphs, and trigonometry, and should be taking calculus (MATH 1000.03/1010.03 or MATH 1280.03/1290.03) concurrently.

Ideas are introduced through in-class demonstrations enabling students to relate physical theory to events in the real world. Students explore many concepts via hands-on labs.

INSTRUCTOR(S): J. Dahn, T. Duck

FORMAT: Lecture 3 hours, lab 3 hours (number of labs = 12)

PREREQUISITE: High School Physics equivalent to the Nova Scotia 12 level.

Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term. The College of continuing Education at: <http://collegeofcontinuinged.dal.ca>

EXCLUSION: Credit will be given for only one of 1190.03/1290.03, 1280.03/1290.03, 1300X/Y.06, or 1310.03/1320.03

### PHYC 1300X/Y.06: Physics In and Around You.

An introduction to physics for students in Biology, Psychology, Arts and Environmental Sciences, and for students preparing for MCAT, and Medicine, Dentistry and Applied Health Sciences. It is accepted as a prerequisite to advanced classes in physics when combined with MATH 1000.03 and 1010.03. Basic concepts in physics are applied, where possible, to realistic biological models, e.g. forces and torques are related to muscles and joints, electricity to cellular activity, fluids to blood circulation, etc.

NOTES:

1. This class is not acceptable in the Engineering program.

2. Students taking this class must register in both X and Y in consecutive terms; credit will be given only if both are completed consecutively.

3. Labs do not start until the second week of classes.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

INSTRUCTOR(S): T. Monchesky, S. Wells

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: High School Physics equivalent to Nova Scotia Grade 12 level is highly recommended. Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term, the College of Continuing Education at: <http://collegeofcontinuinged.dal.ca>.

EXCLUSION: Credit will be given for only one of PHYC 1000X/Y.06, 1100X/Y.06, 1190.03/1290.03, 1280.03/1290.03, 1300X/Y.06, or 1310.03/1320.03

### PHYC 1310.03/1320.03: Physics In and Around You.

These two half classes are, as a pair, equivalent to PHYC 1300X/Y.06. They are available ONLY to accommodate special circumstances; permission from the Department is required for students not in Kinesiology. PHYC 1310.03 is strongly recommended for all first year Kinesiology students. PHYC 1320.03 is strongly recommended for Kinesiology students considering the Ergonomics stream. See the Health and Human Performance section of this calendar.

INSTRUCTOR(S): T. Monchesky, S. Wells

PREREQUISITE: High School Physics equivalent to Nova Scotia Grade 12 level is highly recommended. Students not having a physics credit equivalent to Nova Scotia Grade 12 Physics are strongly advised to take PHYC 0010.00 available in the summer and in the fall term see The College of Continuing Education at: <http://collegeofcontinuinged.dal.ca>.

EXCLUSION: Credit will be given for only one of PHYC 1000X/Y.06, 1100X/Y.06, 1190.03/1290.03, 1280.03/1290.03, 1300X/Y.06, or 1310.03/1320.03

### PHYC 1320.03/1310.03: Physics In and Around You.

These two half classes are, as a pair, equivalent to PHYC 1300X/Y.06. They are available ONLY to accommodate special circumstances; permission from the Department is required for students not in Kinesiology. PHYC 1310.03 is strongly recommended for all first year Kinesiology students. PHYC 1320.03 is strongly recommended for Kinesiology students considering the Ergonomics stream. See the Health and Human Performance section of this calendar.

INSTRUCTOR(S): T. Monchesky, S. Wells

EXCLUSION: Credit will be given for only one of PHYC 1000X/Y.06, 1100X/Y.06, 1190.03/1290.03, 1280.03/1290.03, 1300X/Y.06, or 1310.03/1320.03

### PHYC 1450X/Y.06: Astronomy: The Evolving Universe.

Both the universe and our understanding of it are evolving. Topics include naked eye" astronomy, underlying laws of nature, the revolution in our understanding of the solar system (planets, moons, origin), and the recently discovered "other" planetary systems. We examine our advances in the study of stars, galaxies, and the universe at large. Finally, we introduce the weird and the wonderful - black holes, dark matter and dark energy.

NOTE: This class meets the science distribution requirements for BA students.

The class does not count as a prerequisite for any other science class. Algebra and geometry are used only when helpful. Credit can only be given for this class if X and Y are completed in consecutive terms.

INSTRUCTOR(S): P. Kelly

FORMAT: Lecture 3 hours

EXCLUSION: Not open to students taking or having taken PHYC 2450X/Y.06, or 2451.03 or 2452.03. BSc students should take PHYC 2451.03 and 2452.03 instead.

### PHYC 1600.03: Understanding Weather.

The changing weather is a topic of almost universal interest. This course provides an introductory explanation for the basic processes that comprise the day to day weather changes in a non-mathematical way. Topics include weather maps and the wide range of atmospheric phenomena.

INSTRUCTOR(S): G. Lesins  
 FORMAT: Lecture 3 hours

### PHYC 2140.03: Physics Tools: Theory.

The character of physical laws is most lucidly expressed in mathematical terms. The objective of this course is the acquisition of mathematical tools and gainful proficiency in their use. Topics will include complex numbers, partial derivatives, vector calculus, linear transformations and differential equations. Theorems and proofs will be kept to a minimum. Instead, lectures, homework and tutorials will be largely driven by example problems from a wide variety of physics fields. Text book: Boas, Mathematical Methods in the Physical Sciences.

INSTRUCTOR(S): E. Yaz

FORMAT: Lecture 3 hours, tutorial 1 hour

PREREQUISITE: PHYC 1280.03/1290.03 or 1300X/Y.06 and a 1000 level calculus class or permission from the instructor.

### PHYC 2150.03: Physics Tools: Experiment.

Introducing experimental tools and techniques within a theoretical framework, this course explores concepts in oscillations, waves, electricity and magnetism. The aim is to learn and apply techniques commonly used in Physics research. The following experimental tools and techniques are explored: Instrumentation; Fourier series; Data analysis; building AC and DC circuits; Detection and production of ultrasonic, acoustic, visible, microwaves; Mechanical systems. For example, the concept of resonance is applied to electronic (e.g. Radio), optical, acoustic (e.g. Music), mechanical and nuclear (e.g. MRI) systems in the lab. Textbook: An Introduction to Error Analysis, John R. Taylor.

INSTRUCTOR(S): L. Kreplak

FORMAT: Lecture 1 hrs, Lab 5 hrs

PREREQUISITE: PHYC 1280.03/1290.03 or 1300X/Y.06 or SCIE 1500X/Y.30 and a 1000-level calculus class, or permission of instructor

### PHYC 2250.03: Physics of Biological and Medical Technology.

This class focuses on the nature of different forms of radiation and their interactions with living organisms. Particular attention is given to imaging techniques for the examination of internal organs, and the resulting effects of radiation. Topics may include ultrasound, nuclear medicine, X-ray tomography, magnetic resonance imaging, and exposure to ultraviolet and nuclear radiation.

INSTRUCTOR(S): K. Hewitt

FORMAT: Lecture 3 hours

PREREQUISITE: PHYC 1280.03/1290.03 or 1300X/Y.06: MATH 1000.03/1010.03 or SCIE 1500X/Y.30, 1501X/Y.30, 1501X/Y.27, 1502X/Y.21 1503X/Y.21, 1504X/Y.27, or 1510X/Y.33 or permission of the instructor.

### PHYC 2310.03: Energy and the Environment.

The physical principles and limitations of renewable energy source utilization and energy conversion. A quantitative introduction to energy conversion and storage systems, including solar power and heating, wind, tidal, geothermal, hydroelectric, nuclear power, hydrogen technology, electrical and mechanical energy storage. The input of these energy options on the global climate and environment will be discussed.

INSTRUCTOR(S): R. Dunlap

FORMAT: Lecture/3 hours

PREREQUISITE: PHYC 1280.03/1290.03 or PHYC 1300X/Y.06, MATH 1010.03, CHEM 1011.03 or permission of the instructor.

EXCLUSION: Students who have previously taken PHYC 3330 can not take PHYC 2310.

### PHYC 2451.03: Astronomy I : The Sky and Planets.

An introduction to astronomy for science students.

If you have ever marvelled at the beauty of the night sky and yearned to learn a little about how Science can help us understand it, then this class (and its companion PHYC 2452.03) is for you.

After learning the fundamentals, (observation of the sky, gravitation, radiation and telescopes), we will study the Solar System, primarily the planets and their major satellites.

INSTRUCTOR(S): D.A. Tindall

FORMAT: Lecture 3 hours

PREREQUISITE: A first year science class

EXCLUSION: PHYC 2450.06 X/Y

### PHYC 2452.03: Astronomy II: Stars and Beyond.

This class is the second part of an introduction to astronomy for science students.

This class builds on the knowledge gained in the first half of PHYC 2451.03 to study the nearest star (the sun) and develops this to explain the behaviour of objects outside the Solar System like stars, pulsars, quasars and black holes. Finally, galaxies and the Universe as a whole (cosmology) are studied with questions like, "will the universe expand forever - or will it collapse in the Big Crunch"? How do we know all of this and how well do we know it?

INSTRUCTOR(S): D.A. Tindall

FORMAT: Lecture 3 hours

PREREQUISITE: PHYC 2451.03 or permission of the instructor

EXCLUSION: PHYC 2450X/Y.06

### PHYC 2510.03: Electricity and Magnetism.

The class will develop the vector calculus needed for the description of electric and magnetic fields. Other topics include scalar and vector potentials, forces on charges, magnetic induction and Maxwell's equations. The class will give students the necessary foundation for an understanding of more advanced topics in electricity and magnetism.

INSTRUCTOR(S): T. Monchesky

FORMAT: Lecture 3 hours, tutorial

PREREQUISITE: PHYC 2140.03, a multi-variable calculus class (MATH

2001.03/2002.03, which can be taken concurrently), or permission of the instructor

### PHYC 2515.03: Modern Physics.

This course introduces two physics revolutions: Einstein's theory of special relativity and the theory of quantum mechanics. Important early experiments are considered throughout the course. We consider length contraction, time dilation, and relativistic kinematics. Then, to account for wave-like properties of matter, we introduce complex wave functions in one-dimension and show how they lead to energy quantization, Schrodinger's equation, and penetration into classically forbidden regions. Other topics of modern physics, such as random walks (transport theory) may be introduced. A tutorial is offered.

INSTRUCTOR(S): S. Chapman

FORMAT: Lecture 3 hours, tutorial 1.5 hours

PREREQUISITE: PHYC 1280.03/1290.03 or PHYC 1300.06 or SCIE 1500.03, and a 1000 level calculus class

### PHYC 2610.03: Introduction to Biomechanics.

This course provides an introduction to mechanical and analytical concepts applied to the study of biological systems, particularly human movements and tissues.

It expands on the knowledge acquired in PHYC 1310, the mechanics as it applies to the human body. It deals with the muscle forces required for the different tasks, the role of the centre of mass in balance and motion and the stresses and strains endured by the different biological tissues.

The primary goal of the course is to learn to apply basic mechanical concepts to human movements.

FORMAT: Lecture

PREREQUISITE: PHYC 1300.06 or PHYC 1310.03 or PHYC 1280.03 or permission of the instructor

EXCLUSION: KINE 2465.03

### PHYC 2800.03: Climate Change.

The workings of the Earth's climate system are examined and then applied to help understand contemporary climate change. The role of numerical climate models is discussed with the aim of interpreting climate change predictions for the coming decades. Finally the impacts of climate change are studied with a focus on the various mitigation and adaptation strategies needed.

INSTRUCTOR(S): G. Lesins

FORMAT: 3 hours

CROSS-LISTING: GEOG 2800.03, OCEA 2800.03

EXCLUSION: ECON2850.06, PHYC2850.06

### PHYC 2850.06: The Science and Economics of Climate Change.

This course examines how climate change will impact the environment and human activities, and how to formulate and implement economically realistic solutions. It integrates the physical and biological science with economics in order to analyze the response options as we move towards a carbon-neutral society.

INSTRUCTOR(S): G. Lesins, R. Forsdyke

FORMAT: Lecture

CROSS-LISTING: ECON 2850

EXCLUSION: PHYC 2800, ECON 2216

### PHYC 3000.03: Experimental Physics I.

This class introduces students to electronics and measuring techniques. Topics include digital electronics: logic gates, clocks, shift registers, counters, memory; analog electronics; R.C.L. circuits, operational amplifiers; electronic systems: A/D and D/A chips, computer chips, and displays. The class also introduces students to modern data acquisition methods (including LabVIEW), skills which will be applied in the design and execution of experiments that illustrate fundamental concepts in physics. This class is open to Honours students only.

NOTE: This class has no final examination. Student evaluation is through performance on assignments and projects, and evaluation of written lab reports.

INSTRUCTOR(S): D. Labrie

FORMAT: Lecture 3 hours, lab 6 hours

PREREQUISITE: PHYC 2150.03 and PHYC 2515.03

### PHYC 3010.03: Experimental Physics II.

Designed to give the students a chance to do non-set experiments and thereby encounter and solve the problems of experimentation. Original approaches by the students are encouraged. As the number of experiments is small (three) students should achieve a real understanding of a few physical phenomena. Lecture topics include a survey of experimental techniques as encountered in the different areas of physics. This class is open to students only.

INSTRUCTOR(S): D. Labrie

FORMAT: Lecture 1.5 hours, lab 6 hours

PREREQUISITE: PHYC 3000.03 with a minimum grade of B, or permission of instructor

### PHYC 3050.03: Introduction to Numerical Programming.

This class explores computer programming for numerical computation. It introduces a modern programming language and it uses it to model simple physical systems (for example, projectile motion with realistic drag). Techniques are introduced to solve the governing equations. An important aspect is the interpretation of modelled results and comparison with experiment.

INSTRUCTOR(S): J. Kyriakidis

FORMAT: Lecture/3 hours

PREREQUISITE: PHYC 1280.03/1290.03 or equivalent, or MATH 1010.03 or equivalent

### PHYC 3180.03: Contemporary Physics.

This class covers a variety of topics related to areas of current interest in physics. Presently, topics include high temperature superconductivity, quantum hall effect, neutrino oscillations, gravitational radiation and fusion reactors.

INSTRUCTOR(S): R. Dunlap

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 2001.03 and at least one of PHYC 2515.03 or PHYC 2150.03 or permission of the instructor

### PHYC 3200.03: Thermodynamics.

An introduction to the basic concepts and laws of thermodynamics. There will be a short survey of required Mathematics (partial derivatives). Topics include: thermometry, equations of state, energy and entropy, thermodynamic potentials, heat engines, thermodynamic efficiency and phase transitions.

INSTRUCTOR(S): T. Duck

FORMAT: Lecture 3 hours, tutorial 1.5 hours

PREREQUISITE: PHYC 2140.03, MATH 2001.03/2002.03, or permission of the instructor.

### PHYC 3210.03: Statistical Mechanics.

Using statistical entropy, we will explore how macroscopic thermodynamic behavior emerges from microscopic models. We will consider the microcanonical, canonical, and the grand canonical statistical ensembles. We will examine two-state systems as well as non-interacting Fermionic and Bosonic systems. Finally, we will learn about deceptively simple interacting systems such as the Ising model.

INSTRUCTOR(S): S. Bonev

PREREQUISITE: PHYC 3200.03 or equivalent; MATH 2001.03/2002.03

### PHYC 3250.03: Computational Methods in Physics.

The objective of this class is to teach students the use of computers in physical analysis. The UNIX operating system will be introduced and used throughout the course. A modern programming language will be applied to a selection of problems drawn from physical theory and experiment. This is a hands-on, practical, and interactive class with an emphasis on the development of computational skills that scientists use.

INSTRUCTOR(S): J. Kyriakidis

PREREQUISITE: PHYC 1280.03/1290.03 or equivalent, MATH 1010.03 or equivalent, PHYC 3050.03 or equivalent

### PHYC 3303.03: Materials Science.

The emphasis is on the principles involved in understanding physical properties of materials, such as thermal and mechanical stability, and electrical and optical properties. All phases of matter are examined: gases, liquids, films, liquid crystals, perfect crystals, defective solids, glasses. Important processes such as photography and Xerography are explained.

INSTRUCTOR(S): M.A. White

FORMAT: Lecture 3 hours

PREREQUISITE: CHEM 2301.03 or PHYC 3200.03 (which may be taken concurrently) or ERTD 2001.03/2002.03 or ENGI 2800.03 or permission of the instructor

CROSS-LISTING: CHEM 3305.03

### PHYC 3340.03: Electronics.

Topics include digital electronics: logic gates, clocks, shift registers, counters, memory; analog electronics: R.C.L. circuits, operational amplifiers; electronic systems: A/D and D/A chips, computer chips, and displays.

NOTE: Credit cannot be given for both PHYC 3000.03 and PHYC 3340.03

INSTRUCTOR(S): D. Labrie

FORMAT: Lecture 3 hours, lab 3 hours

PREREQUISITE: PHYC 2150.03; or ENGI 2001.03

### PHYC 3640.03: Quantum Physics I.

This course introduces the formal structure of quantum mechanics as well as quantum mechanical calculations. The emphasis is on problem solving.

The course starts with quantum measurement, then considers particles in a box and the quantum harmonic oscillator. The course starts with one-dimensional quantum mechanics and ends with higher dimensional problems. The course introduces quantum mechanical operators, time-evolution, quantum angular momentum, and the solution of the hydrogen atom.

INSTRUCTOR(S): K. Hall

PREREQUISITE: MATH 2002.03, MATH 2030.03, PHYC 2515.03 and PHYC 2140.03

### PHYC 3810.03: Microcomputers and the Real World.

Subject material: measurement theory, modern sensors, microcomputer architecture, and software simulation of digital electronic circuits. Interfacing techniques including serial, parallel USB and GPIB ports. The graphical programming language is used throughout.

FORMAT: Lecture 3 hours, computer lab 3 hours

PREREQUISITE: PHYC 2150.03, PHYC 3340.03

CROSS-LISTING: CSCI 3122.03

### PHYC 3900.03: Introduction to Soft Condensed Matter Physics.

The aim of this course is to provide an introduction to some concepts used in soft condensed matter physics through the study of three systems, polymers, colloids and liquid crystals.

The course will be divided in four modules:

- I) Brownian dynamics and diffusion
- II) Polymers shape, molecular mass distribution, osmotic pressure, gel, entropic elasticity
- III) Colloids: van der Waals and electrostatic interactions, Hamaker constant, DLVO theory, polymer layers (brushes), gel electrophoresis
- IV) Liquid crystals: order parameter, optical properties of nematics (birefringence), phase transitions, LCD

INSTRUCTOR(S): L. Kreplak

FORMAT: Lecture

PREREQUISITE: MATH 2001.03, 2002.03: Intermediate Calculus I and II

### PHYC 4151.03: Quantum Physics II.

This class is a continuation of PHYC 3640.03. Topics include: the spin-1/2 problem, quantum dynamics, entanglement and the EPR Paradox, perturbation theory, identical particles, and the quantised radiation field.

INSTRUCTOR(S): J. Kyriakidis

FORMAT: Lecture 3 hours

PREREQUISITE: PHYC 3640.03

CROSS-LISTING: PHYC 5151.03

**PHYC 4160.03: Mathematical Methods of Physics.**

Topics discussed include: complex variable theory, Fourier and Laplace transform techniques, special functions, partial differential equations.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3120.03, PHYC 2140.03 or permission of instructor.

CROSS-LISTING: PHYC 5160.03, MATH 4165.03

**PHYC 4230.03: Introduction to Condensed Matter.**

An introduction to the basic concepts of solid state physics which are related to the periodic nature of the crystalline lattice. Topics include crystal structure, X-ray diffraction, phonons and lattice vibrations, the free electron theory of metals, energy bands, magnetism and superconductivity.

INSTRUCTOR(S): S. Bonev

FORMAT: Lecture 3 hours

PREREQUISITE: PHYC 3640.03 and 3210.03 which may be taken concurrently, or permission of instructor

CROSS-LISTING: PHYC 5230.03

**PHYC 4311.03: Fluid Dynamics I.**

An introduction to the theory of fluid dynamics with some emphasis on geophysically important aspects. Contents: tensor mathematics, flow kinematics, equations of motion, viscous flow, potential flow, convection, turbulence, and basic aerodynamics.

INSTRUCTOR(S): D. Kelley

FORMAT: Lecture 3 hours

PREREQUISITE: Subject to instructor approval.

CROSS-LISTING: PHYC 5311.02, OCEA 4311.03/5311.01

**PHYC 4411.03: Atmospheric Dynamics I.**

The basic laws of fluid dynamics are applied to studies of atmospheric motion, including the atmospheric boundary layer and synoptic scale weather disturbances (the familiar highs and lows on weather maps). Emphasis will be placed on the blend of mathematical theory and physical reasoning which leads to the best understanding of the dominant physical mechanisms.

INSTRUCTOR(S): I. Folkins

FORMAT: Lecture 3 hours

PREREQUISITE: PHYC 2140.03 and MATH 3120.03 or permission of the instructor

CROSS-LISTING: PHYC 5411.03, OCEA 4411.03/5411.03.

**PHYC 4412.03: Atmospheric Dynamics II.**

The approach is the same as for PHYC 4411.03, with emphasis on synoptic-scale wave phenomena, frontal motions and the global circulation. Additional topics including tropical meteorology, middle atmospheric dynamics, severe storms, mesoscale meteorology and numerical weather prediction may be included.

INSTRUCTOR(S): I. Folkins

FORMAT: Lecture 3 hours

PREREQUISITE: PHYC 4411.03 or permission of the instructor.

CROSS-LISTING: PHYC 5412.03, OCEA 4412.03/5412.03

**PHYC 4505.03: Atmospheric Physics.**

Moist thermodynamics is applied to a variety of atmospheric phenomena. These include aerosols, cloud droplets, precipitation formation, convection, supercells, hurricanes, lightning, and the boundary layer. We also discuss the radar equation and the interpretation of radar images.

FORMAT: Lecture

PREREQUISITE: PHYC 2140 and PHYC 4520, or permission of the instructor

CROSS-LISTING: PHYC 5505, OCEA 4505/5505

**PHYC 4520.03: Introduction to Atmospheric Science.**

The general overview of the atmosphere provides the student with an understanding of the composition and thermal structure of the atmosphere, air mass and frontal theory and weather generating physical processes and their consequences. Other topics include atmospheric radiation, dynamic meteorology, climatology and the physics of clouds and storms.

INSTRUCTOR(S): M. Earle

FORMAT: Lecture 3 hours

PREREQUISITE: PHYC 2140.03 or permission of instructor

CROSS-LISTING: PHYC 5520.03, OCEA 4520.03/5520.03

**PHYC 4540.03: Synoptic Meteorology I.**

This class introduces the practical skills of meteorological observation and analysis. Emphasis is on developing skills in drawing and interpreting weather maps, and on studying the three-dimensional structure of weather systems.

Satellite and radar remote sensing of the atmosphere is also introduced. Case

studies of atmospheric systems and processes are carried out during the tutorial-laboratory period.

INSTRUCTOR(S): L. Titus

FORMAT: Lecture 2 hours, tutorial-lab 3 hours

PREREQUISITE: At least one third-year physics class

CROSS-LISTING: PHYC 5540.03, OCEA 4541.03/5541.03

CO-REQUISITE: OCEA 4220.03

**PHYC 4550.03: Synoptic Meteorology II.**

This class extends the analysis and diagnosis of atmospheric dynamics and weather processes introduced in PHYC 4540.03. Emphasis is on the practical application of meteorological theory, particularly in the area of diagnosing the cases of weather events. Modern computer and statistical methods are discussed, and students receive an introduction to weather forecasting.

INSTRUCTOR(S): L. Titus

FORMAT: Lecture 2 hours, tutorial-lab 3 hours

PREREQUISITE: PHYC 4540.03

CROSS-LISTING: PHYC 5550.03, OCEA 4550.03/5550.03

**PHYC 4570.03: Light Scattering, Radiative Transfer, and Remote Sensing.**

The equations of radiative transfer through the atmosphere will be developed and used. Special topics include transfer of infrared radiation. Mie scattering, absorption by atmospheric gases and aerosols, transfer through clear and cloudy atmospheres. Also remote sensing techniques and radiative transfer models are covered.

INSTRUCTOR(S): G. Lesins

FORMAT: Lecture 3 hours

PREREQUISITE: PHYC 2140.03, PHYC 2510.03

CROSS-LISTING: PHYC 5570.03, OCEA 5570.03

**PHYC 4595.03: Atmospheric Chemistry.**

A fundamental introduction to the physical and chemical processes determining the composition of the atmosphere and its implications for climate, ecosystems, and human welfare. Origin of the atmosphere.

Nitrogen, oxygen, carbon, sulfur cycles. Climate and the greenhouse effect.

Atmospheric transport and turbulence. Stratospheric ozone.

Oxidizing power of the atmosphere. Regional air pollution: aerosols, smog, acid rain.

INSTRUCTOR(S): R. Martin

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 1000, PHYC 1280.03/1290.03 or PHYC 1300 and CHEM 1011/1012

CROSS-LISTING: PHYC 5595.03, CHEM 4595.03, OCEA 4595.03/5595.03

**PHYC 4650.03: General Relativity.**

A review of differential geometry will be given followed by an introduction to the general theory of relativity. Various topics will be discussed, including: linearized theory and gravitational radiation, spherically symmetric metrics and the Schwarzschild solution, gravitational collapse, black holes, and cosmology.

FORMAT: Lecture 3 hours

PREREQUISITE: MATH 3045.03 or permission of the instructor

CROSS-LISTING: PHYC 5650.03, MATH 4650.03/5650.03

**PHYC 4660.03: Cosmology.**

A self-contained introduction to cosmology will be given and no prior knowledge of differential geometry or general relativity will be assumed (although some knowledge of elementary differential equations will be useful). A cosmological model is a model of the universe, as a whole, on the largest scales; the emphasis of the class will be on the modeling aspects of cosmology.

FORMAT: Lecture 3 hours

PREREQUISITE: Instructor's permission

CROSS-LISTING: PHYC 5660.03, MATH 4410.03/5410.03

**PHYC 4800.03: Honours Research Project I.**

Students in the honours stream in Physics and Atmospheric Science will do a research project under the direction of a faculty member. A research plan, interim progress reports and a formal final report are required. The final grade will be based on an evaluation of the reports and an oral presentation. Students in the major stream can apply to the department to take this course.

COORDINATOR: H. Rotermond

INSTRUCTOR(S): I. Hill

FORMAT: Independent research, typically 6 hours a week. This course can be taken in either the first or second semester.

PREREQUISITE: PHYC 3010 and permission of the coordinator and supervisor.

### PHYC 4850.03: Honours Research Project II.

Students in the honors stream will do a second research project or continue the project started in PHYC 4800 under the direction of a faculty member. A research plan, interim progress reports and a formal, final report are required. The final grade will be based on an evaluation of the reports and an oral presentation.

COORDINATOR: H. Rotermund

INSTRUCTOR(S): I. Hill

FORMAT: Independent research, typically 6 hours/week.

PREREQUISITE: PHYC 4800 and permission of the coordinator and supervisor.

### PHYC 8891.00: Co-op Work-Term I.

PREREQUISITE: SCIE 2800.00

### PHYC 8892.00: Co-op Work-Term II.

### PHYC 8893.00: Co-op Work-Term III.

### PHYC 8894.00: Co-op Work-Term IV.

## VI. Graduate Studies

The Department of Physics and Atmospheric Science provides classes of study leading to MSc and PhD degrees. Areas of research include condensed matter, geophysics, medical physics, soft matter, low temperature physics, theoretical physics, atmospheric physics and oceanography. Consult the Graduate Studies Calendar, the Graduate Coordinator for the Physics and Atmospheric Science Department, or the Physics and Atmospheric Science Website at <http://www.physics.dal.ca>.

## Psychology and Neuroscience

Location: Life Sciences Centre  
1355 Oxford Street  
PO Box 15000  
Halifax, NS B3H 4R2  
Telephone: (902) 494-3417  
Fax: (902) 494-6585  
Website: <http://psychology.dal.ca/>

### Dean

Moore, C. L., BA, PhD (Cantab)

### Chairperson of Department

Klein, R. M., BA (SUNY), MA, PhD (Oregon), University Research Professor

### Academic Advisors

To contact an academic advisor, please go to the Psychology and Neuroscience Main Office (LSC 3263), telephone (902) 494-3417, or visit the Psychology and Neuroscience website.

### Professors Emeriti

LoLordo, V. M., AB (Brown), PhD (Penn)

Mitchell, D. E., BSc, MAppSc (Melb), PhD (Berkeley)

### Professors

Adamo, S., BSc (Toronto), PhD (McGill), Faculty of Science Killam Professor in Psychology

Brown, R. E., BSc (Victoria), MA, PhD (Dalhousie), University Research Professor

Bryson, S. E., BA (Guelph), PhD (McGill), Major appointment in Pediatrics, Joan and Jack Craig Chair in Autism Research

Chambers, C. T., BSc (Dalhousie), MA, PhD (UBC), Joint appointment in Pediatrics; Canada Research Chair in Pain and Child Health

Finley, G. A., BSc, MD (Dalhousie), Major appointment in Anaesthesia

Kay-Raining Bird, E., BA (Queen's), MSc (Columbia Univ.), PhD (U. Wisconsin - Madison), Major appointment in the School of Human Communication Disorders

Kieft, M., BA (Memorial), MSc, PhD (Alberta), Major appointment in the School of Human Communication Disorders

Klein, R.M., BA (SUNY), MA, PhD (Oregon), University Research Professor

McGrath, P., BA, MA (Sask), PhD (Queen's), Canada Research Chair in Pediatric Pain

McMullen, P., BSc, MSc (Toronto), PhD (Waterloo)

Meinertzhagen, I. A., BSc (Aberdeen), PhD, DSc (St. Andrews), University Research Professor

Moore, C. L., BA, PhD (Cantab), Faculty of Science Killam Professor in Psychology

Phillips, D. P., BSc, PhD (Monash)

Rusak, B., BA (Toronto), PhD (Berkeley), FRSC, Joint appointment in Psychiatry

Semba, K., BEd, MA (Tokyo), PhD (Rutgers), Major appointment in Anatomy and Neurobiology

Stewart, S., BSc (Dalhousie), PhD (McGill), Joint appointment in Psychiatry

Taylor-Helmick, T. L., BA (Calgary), MSc, PhD (Dalhousie)

Tibbo, P., BSc (Mt. A), BMedSc, MD (Memorial), Major appointment in Psychiatry

Ungar, M., BA, BSW, MSW (McGill), PhD (Wilfrid Laurier), Major appointment in the School of Social Work

### Associate Professors

Abbass, A., BSc (Ottawa), MD (Dalhousie), FRCPC (Toronto), Major appointment in Psychiatry

Barrett, S. P., BA (St. FX), PhD (McGill), Clinical PhD Program Associate  
Director of Training  
Corkum, P. V., BSc (Dalhousie), MA, PhD (OISE at Toronto), Clinical PhD  
Program Co-Director of Training  
Deacon, S. H., BSc (UPEI), PhD (Oxon)  
Duffy, K., BA (St. Thomas), PhD (McMaster)  
Earhard, B., BA, MA, PhD (Toronto), Undergraduate Program Coordinator  
Eskes, G. A., BA, PhD (Berkeley), Major appointment in Psychiatry  
Good, K., BSc (UNB), MSc, PhD (UBC), Major appointment in Psychiatry  
Ingles, J., BA (Queen's), PhD (Dalhousie), Major appointment in the School of  
Human Communication Disorders  
Jacques, S., BA (McGill), MA, PhD (Toronto)  
Johnson, S., BA (Kalamazoo), MSc, PhD (Victoria), Clinical PhD Program Co-  
Director of Training  
McGlone, J., BA, MA, PhD (Western)  
Newman, A. J., BA (Winnipeg), MSc, PhD (Oregon)  
Perrot, T. S., BSc, PhD (Western)  
Robinson, L., BSc (Victoria), MA, PhD (Simon Fraser), Major appointment in the  
School of Health and Human Performance  
Sherry, S. B., BA (York), MA (UBC), PhD (Saskatchewan), Graduate Program  
Coordinator  
Smith, I., BA (Dalhousie), MSc (Brown), PhD (Dalhousie), Major appointment in  
Pediatrics

### Assistant Professors

Aitken, S., BA, MSc, PhD (Toronto), Major appointment in the School of Human  
Communication Disorders  
Boe, S., BPhEd (Brock), PhD, MPT (Western), Major appointment in the School  
of Physiotherapy  
Chorney, J., BSc (Dalhousie), MA, PhD (West Virginia), Major appointment in  
Anesthesiology  
Crowder, N. A., BSc, PhD (Alberta)  
Krigolson, O. E., BEd (Victoria), MSc (Indiana), PhD (Victoria)  
Phillmore, L., BA (UWO), MA, PhD (Queen's)  
Rosen, N. O., BA (Queen's), PhD (McGill)  
Weaver, I. C. G., BSc (Alberdeen), MSc (Bristol), PhD (McGill)  
Westwood, D. A., BSc, MA, PhD (Waterloo), Major appointment in the School of  
Health and Human Performance

### Senior Instructors

Gadbois, S., BSc, MAPs (Univ de Moncton), PhD (Dalhousie)  
Juckes, T., BA, MA (Natal), PhD (Dalhousie)  
Schellinck, H., BSc, MSc, PhD (Dalhousie)  
Stamp, J., BSc (Dalhousie), PhD (Cambridge)

### Adjunct Professors

Backman, J., BA (Dalhousie), MA, PhD (Carleton), Erica Baker Psychological  
Services  
Barresi, J., BSc (Brown), MA (S. Calif.), MS, PhD (Wisc), Psychology and  
Neuroscience/Dalhousie  
Chipman, K., BA (UPEI), MA, PhD (Western), Neuropsychology Service/Nova  
Scotia Hospital  
Church, E., BA (St. John's), MA, PhD (Toronto), School Psychology/Mount Saint  
Vincent  
Cohen, A. J., BA (McGill), MA, PhD (Queen's), Psychology/UPEI  
D'Arcy, R. C. N., BSc (Victoria), MSc, PhD (Dalhousie), Engineering and  
Computing Science/Simon Fraser  
Ebert, P., BSc, MSc (Toronto), PhD (Victoria), Seniors Memory Clinic/Ontario

Moore, C. L., BA, PhD (Cantab)

## I. Introduction

Psychology is an experimental science: Its purpose is to discover the conditions which control the activities of animals and people, to measure these conditions and the responses they produce, and to use this knowledge to invent ways of predicting behaviour and changing it. It is a subject for inventive but also scientifically rigorous people, better suited to those who want to find out for themselves than to those who want to be told what to believe.

Psychology at Dalhousie treats behaviour as a natural phenomenon, and in that sense shares much with the other life sciences. Today, for example, the boundary that historically has separated psychology from zoology, physiology, or even cellular biology has begun to blur. On the other hand, important ties are being made to such disciplines as anthropology, sociology, and philosophy. The student will find that the diverse subject matter includes three major levels of analysis: the organism, the organism's biological machinery, and the broader social-environmental context in which particular behaviour patterns are expressed. Meaningful integration of these diverse levels and forms of analysis is an intellectual challenge of major proportions. Similarly, the time perspectives of immediate causation, development, evolution, and function all contribute to the modern approach to behavioural science and each must be evaluated in relation to the others.

### A. Enrolment Limitations

Psychology is a popular program, and we have a high enrolment of students. Potential Major and Honours students, and those intending to enrol in the 15 Credit BA or BSc Minor program, in Psychology should note that there are limitations on the number of students that can be accepted into these programs in any given year. Passing introductory psychology classes with the required grade of B- and declaring an intent to Major in Psychology does not guarantee a place in any of these programs. Students are advised to register as early as possible for required classes to secure a space within a program.

There are strict size restrictions on individual classes. Lecture classes are limited by room size. Additional size restrictions are imposed on laboratory classes because of equipment limitations and the much closer supervision required. Because of size limitations on 3000 level laboratory classes, Major and Honours students, and those enrolled in the 15 Credit BA or BSc Minor program, should take 2000 level prerequisites for at least two 3000 level laboratory classes. Laboratory classes fill rapidly, and not all laboratory classes are offered every year.

### B. Enrolment of Other Students

Only Major and Honours students in Psychology may enrol in PSYO 2000.03, 2770.03 and 2501.03, and such students are given preference in other second-year classes. All students must have at least a B- in a full-credit of introductory psychology classes, or the psychology component of a DISP class, in order to register in any second-year class in Psychology.

### C. Laboratories

Several classes include a laboratory component, of which there are two types. One type is a research laboratory in which students will conduct research, collect data

and write reports on the results of the research. All Major and Honours students must take the second-year research laboratory class (PSYO 2000.03) and at least one third-year research laboratory class (full credit for Honours students.)

The other type is a proficiency or skills laboratory, which usually involves additional work in computer exercises related to the lecture material and class readings.

## II. Degree Programs

The department offers the following degree programs:

- BA and BSc (20 credit) Honours in Psychology
- BA and BSc (20 credit) Major in Psychology
- BA and BSc (15 credit) Minor in Psychology

While these programs are described below, a more detailed and up-to-date description is available from the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263) in a pamphlet titled "A Student's Guide to Psychology Classes" (also available online at the Department's website: <http://psychology.dal.ca/>).

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, page 131 of this calendar.

### A. BA or BSc (20 credit) Honours in Psychology

Students enrolled in either the BA or BSc Honours program must take nine to 11 full credits (or half-credit equivalents) in Psychology classes beyond the 1000 level.

Students should follow the class sequence recommended below. Although there is considerable flexibility for the student, it is important to plan carefully (this is especially true for those considering graduate work in Psychology). Additional information or advice about the program can be obtained from an Honours Advisor. Students can be put in touch with an academic advisor by contacting the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263 or 494-3417). Detailed descriptions of the Honours application process may be found on the departmental website: <http://psychology.dal.ca/Programs/Psychology.php>.

Registration Notes:

1. Students wishing to undertake an Honours program must meet with an Honours advisor, and complete a Departmental Honours Application form. The earliest students can apply for admission to the Honours program is in January of their third year of study. Admission to Honours in January will require a grade of B or better in PSYO 2000.03 and an A- average in the last six completed Psychology half credits. Application may be delayed until the end of the third year, in which case, a grade of B or better in PSYO 2000.03 and an A- average in the last nine completed Psychology half credits will be required. Both Departmental (and then University) approval is required for formal admission to the Honours program. A detailed description of the Honours application process can be found on the departmental website: <http://psychology.dal.ca/Programs/Psychology.php>
2. It is recommended that students in the Honours program obtain the agreement of a willing thesis research supervisor, and begin laying the groundwork for their thesis research (e.g., background reading, learning laboratory methodology, submission of ethics forms), no later than during the summer preceding the thesis year.
3. Students taking an Honours degree in Psychology cannot use cross-listed Neuroscience classes as electives.
4. Laboratory classes focusing on human psychology typically require students to serve as participants and/or as experimenters in class projects. Students who do not wish to participate in such projects should ensure that they have the prerequisites necessary to register in alternative laboratory classes.

## Departmental Requirements

### 1000 level

- PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27 with a grade of B- or better

### 2000 level

A normal second-year program will include three required half-credit classes and three elective half-credit classes in Psychology. Care should be taken in selecting second-year elective classes to ensure they will provide the necessary prerequisites for classes intended to be taken in the third and fourth years of study.

**Required Second-Year Classes are:**

- PSYO 2000.03: Methods in Experimental Psychology, with a grade of B or better
- PSYO 2501.03: Statistical Methods I (or STAT 2080.03)
- PSYO 2770.03: Brain and Behaviour (recommended for students planning to take advanced Psychology classes)

**OR**

PSYO 2470.03: Systems Neuroscience (recommended for students planning to take advanced Neuroscience classes)

**Elective Second-Year Classes are:**

- Three half credits required from -
- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2170.03: Hormones and Behaviour
- PSYO 2220.03: Abnormal Behaviour
- PSYO 2570.03: Cellular Neuroscience

(Total = three full or six half credits)

**3000 level**

- PSYO 3502.03: Statistical Methods II
- Additional 2.5 full credits, or five half credits, selected from classes in Categories A and B. Two of the half credits must be in designated laboratory (LAB) classes. Students are also encouraged to take either a full-credit Independent Research in Modern Psychology class (PSYO 3000.06) or a half-credit Directed Project in Psychology class (PSYO 3001.03) from Category C to obtain experience that will assist them in preparing for their 4000-level Honours thesis. In planning their program, students should keep in mind that two half-credit classes must be completed in each of Category A and Category B prior to graduation.

**Category A. Brain, Language, Learning, and Cognition**

PSYO 3043.03: Neurobiology of Learning  
 PSYO 3044.03: Lab Methods of Learning and Conditioning (LAB)  
 PSYO 3051.03: Sensory Neuroscience I. Vision (LAB)  
 PSYO 3052.03: Sensory Neuroscience II. Hearing and Speech  
 PSYO 3084.03: Social Cognition  
 PSYO 3131.03: Research Methods in Attention (LAB)  
 PSYO 3132.03: Research Methods in Visual Cognition (LAB)  
 PSYO 3133.03: Research Methods in Memory (LAB)  
 PSYO 3134.03: Research Methods in Psycholinguistics (LAB)  
 PSYO 3137.03: Research Methods in Cognitive Neuroscience (LAB)  
 PSYO 3161.03: Measuring Behaviour (LAB)  
 PSYO 3162.03: Advanced Animal Behaviour  
 PSYO 3165.03: Neuroethology (LAB)  
 PSYO 3180.03: Psychoneuroimmunology/Ecological Immunology  
 PSYO 3190.03: Psycholinguistics  
 PSYO 3227.03: Principles of Human Neuropsychology  
 PSYO 3237.03: Drugs and Behaviour  
 PSYO 3260.03: Biological Rhythms  
 PSYO 3264.03: The Science of Sleep  
 PSYO 3270.03: Developmental Neuroscience  
 PSYO 3370.03: Neuroscience Laboratory I (LAB)  
 PSYO 3371.03: Neuroscience Laboratory II (LAB)  
 PSYO 3670.03: Genes, Brain and Behaviour  
 PSYO 3770.03: Behavioural Neuroscience  
 PSYO 3775.03: Behavioural Neuroscience Laboratory (LAB)  
 PSYO 3790.03: Neurolinguistics  
 PSYO 3970.03: Molecular Neuroscience

**Category B. Clinical, Developmental, History, Personality, and Overviews of Psychology**

PSYO 3010.06: Advanced General Psychology  
 PSYO 3030.03: Psychometrics (LAB)  
 PSYO 3082.03: Experimental Social Psychology (LAB)  
 PSYO 3091.03: Methods in Developmental Psychology (LAB)  
 PSYO 3092.03: Early Development  
 PSYO 3093.03: Development of Language and Literacy Abilities  
 PSYO 3122.03: Methods in Experimental Clinical Psychology (LAB)

PSYO 3129.03: Childhood Psychopathology  
 PSYO 3220.03: Clinical Psychology  
 PSYO 3224.03: Forensic Psychology  
 PSYO 3225.03: Health Psychology  
 PSYO 3280.03: Personality  
 PSYO 3390.03: Cognitive Development  
 PSYO 3581.03: History of Psychology I  
 PSYO 3582.03: History of Psychology II

**Category C. Directed Research Classes for Potential Honours Students**

PSYO 3000.06: Independent Research in Modern Psychology  
 PSYO 3001.03: Directed Project in Psychology

(Total = three full or six half credits—exclusive of an independent research class)

**4000 level**

- PSYO 4500.06: Honours Thesis
- Two half credits of 4000-level seminars, plus
- One more full credit, or half-credit equivalents, of 3000- or 4000-level classes.

(Total = three full or six half credits)

Overall Total = nine full-credit or 18 half-credit classes

**B. BA or BSc (20 credit) Combined Honours**

It is possible for students to take an Honours degree combining Psychology with another subject (other than Neuroscience). Students proposing to take such a class of study must consult with an Honours advisor in both departments to arrange program details.

If Psychology is chosen as the **primary** subject in a Combined Honours program, the following classes should be taken.

**2000 level**

- PSYO 2000.03: Methods in Experimental Psychology, with a grade of B or better
- PSYO 2501.03: Statistical Methods I (or STAT 2080.03)
- PSYO 2770.03: Brain and Behaviour (recommended for students planning to take advanced Psychology classes)

**OR**

PSYO 2470.03: Systems Neuroscience (recommended for students planning to take advanced Neuroscience classes)

- Three additional half-credit, second-year classes

**3000 level**

- PSYO 3502.03: Statistical Methods II
  - Two half-credit 3000-level laboratory classes
  - One additional full credit, or two half credits, in 3000-level Psychology classes
- In choosing the above classes, a minimum of one half credit must be selected from each of the Category A and the Category B list.

**4000 level**

- PSYO 4500.06: Honours Thesis
- Two half credits in 4000-level seminar classes.

Overall Total = 7.5 full credits or 15 half-credit classes.

If Psychology is chosen as the **secondary** subject in a Combined Honours program, the following classes should be taken.

**2000 level**

- PSYO 2000.03: Methods in Experimental Psychology, with a grade of B or better
- PSYO 2501.03: Statistical Methods I (or STAT 2080.03)
- PSYO 2770.03: Brain and Behaviour (recommended for students planning to take advanced Psychology classes)

**OR**

- PSYO 2470.03: Systems Neuroscience (recommended for students planning to take advanced Neuroscience classes)
- Three additional half-credit, second-year classes

**3000 level**

- Two full credits, or four half credits, at or above the 3000 level are required to graduate. Students must take a minimum of one half-credit class from each of Category A and Category B classes, and must complete a designated half-credit laboratory (LAB) class.

### C. BA or BSc (20 credit) Major in Psychology

BA students must take at least seven and no more than nine full credits (or half-credit equivalents) in Psychology classes beyond the 1000 level. BSc students must take at least seven and no more than ten full credits (or half-credit equivalents) in Psychology classes beyond the 1000 level. All Major students must complete four full credits (or half-credit equivalents) in classes numbered 3000 or above.

Students should plan carefully and, if required, obtain advice from an academic advisor. Advisors can be consulted by contacting the Psychology and Neuroscience Main Office (Life Sciences Centre, Room 3263 or 494-3417). Students should be aware that laboratory classes focusing on human psychology typically require students to serve as participants and/or as experimenters in class projects. Students not wishing to participate in such projects should ensure that they have the prerequisites necessary to register in alternative laboratory classes

NOTE: Students who Major in Psychology cannot use cross-listed Neuroscience classes as electives.

#### Departmental Requirements

##### 1000 level

- PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27 with a grade of B- or better

##### 2000 level

A normal second-year program will include three required half-credit classes and three elective half-credit classes in Psychology. Care should be taken in selecting second-year elective classes to ensure they will provide the necessary prerequisites for classes intended to be taken in the third and fourth years of study.

##### Required Second-Year Classes are:

- PSYO 2000.03: Methods in Experimental Psychology
- PSYO 2501.03: Statistical Methods I (or STAT 2080.03)
- PSYO 2770.03: Brain and Behaviour (recommended for students planning to take advanced Psychology classes)

##### OR

PSYO 2470.03: Systems Neuroscience (recommended for students planning to take advanced Neuroscience classes)

##### Elective Second-Year Classes are:

- Three half credits required from -
- PSYO 2080.03: Social Psychology
- PSYO 2090.03: Developmental Psychology
- PSYO 2130.03: Introduction to Cognitive Psychology
- PSYO 2140.03: Learning
- PSYO 2150.03: Perceptual Processes
- PSYO 2160.03: Animal Behaviour
- PSYO 2170.03: Hormones and Behaviour
- PSYO 2220.03: Abnormal Behaviour
- PSYO 2570.03: Cellular Neuroscience

(Total = three full or six half credits)

##### 3000 level

- Four full credits or eight half credits at or above the 3000 level are required. Students must take a minimum of two half-credit classes in each of Category A and Category B, and complete a designated half-credit laboratory (LAB) class. Classes in Category C are intended for students planning to enter the Honours program.

#### Category A. Brain, Language, Learning, and Cognition

PSYO 3043.03: Neurobiology of Learning  
 PSYO 3044.03: Lab Methods of Learning and Conditioning (LAB)  
 PSYO 3051.03: Sensory Neuroscience I. Vision (LAB)  
 PSYO 3052.03: Sensory Neuroscience II. Hearing and Speech  
 PSYO 3084.03: Social Cognition  
 PSYO 3131.03: Research Methods in Attention (LAB)  
 PSYO 3132.03: Research Methods in Visual Cognition (LAB)  
 PSYO 3133.03: Research Methods in Memory (LAB)  
 PSYO 3134.03: Research Methods in Psycholinguistics (LAB)  
 PSYO 3137.03: Research Methods in Cognitive Neuroscience (LAB)  
 PSYO 3161.03: Measuring Behaviour (LAB)  
 PSYO 3162.03: Advanced Animal Behaviour  
 PSYO 3165.03: Neuroethology (LAB)  
 PSYO 3180.03: Psychoneuroimmunology/Ecological Immunology

PSYO 3190.03: Psycholinguistics  
 PSYO 3227.03: Principles of Human Neuropsychology  
 PSYO 3237.03: Drugs and Behaviour  
 PSYO 3260.03: Biological Rhythms  
 PSYO 3264.03: The Science of Sleep  
 PSYO 3270.03: Developmental Neuroscience  
 PSYO 3370.03: Neuroscience Laboratory I (LAB)  
 PSYO 3371.03: Neuroscience Laboratory II (LAB)  
 PSYO 3670.03: Genes, Brain and Behaviour  
 PSYO 3770.03: Behavioural Neuroscience  
 PSYO 3775.03: Behavioural Neuroscience Laboratory (LAB)  
 PSYO 3790.03: Neurolinguistics  
 PSYO 3970.03: Molecular Neuroscience

#### Category B. Clinical, Developmental, History, Personality, and Overviews of Psychology

PSYO 3010.06: Advanced General Psychology  
 PSYO 3030.03: Psychometrics (LAB)  
 PSYO 3082.03: Experimental Social Psychology (LAB)  
 PSYO 3091.03: Methods in Developmental Psychology (LAB)  
 PSYO 3092.03: Early Development  
 PSYO 3093.03: Development of Language and Literacy Abilities  
 PSYO 3122.03: Methods in Experimental Clinical Psychology (LAB)  
 PSYO 3129.03: Childhood Psychopathology  
 PSYO 3220.03: Clinical Psychology  
 PSYO 3224.03: Forensic Psychology  
 PSYO 3225.03: Health Psychology  
 PSYO 3280.03: Personality  
 PSYO 3390.03: Cognitive Development  
 PSYO 3581.03: History of Psychology I  
 PSYO 3582.03: History of Psychology II

#### Category C. Directed Research Classes for Potential Honours Students

PSYO 3000.06: Independent Research in Modern Psychology  
 PSYO 3001.03: Directed Project in Psychology  
 (Total = four full or eight half credits)

Overall Total = seven full-credit or 14 half-credit classes

### D. BA or BSc (20 credit) Double Major in Psychology

Students may combine a Major in Psychology with a Major in another subject such as Biology or Biochemistry. A minimum of 10 and a maximum of 13 full credits above the 1000 level are required in the two subjects chosen. No more than nine and no fewer than five full credits must be taken in either subject.

The minimum required classes in Psychology are:

##### 2000 level

- PSYO 2000.03: Methods in Experimental Psychology
- PSYO 2501.03: Statistical Methods I (or STAT 2080.03)
- PSYO 2770.03: Brain and Behaviour (recommended for students planning to take advanced Psychology classes)

##### OR

- PSYO 2470.03: Systems Neuroscience (recommended for students planning to take advanced Neuroscience classes)
- Three additional half-credit, second-year classes

##### 3000 level

- Two full credits, or four half credits, at or above the 3000 level are required to graduate. Students must take a minimum of one half-credit class from each of Category A and Category B classes, and must complete a designated half-credit laboratory (LAB) class.

### E. BA or BSc (15 credit) Minor in Psychology

The Department of Psychology and Neuroscience does not encourage students to take the 15 credit degree, although that option is available to students who wish only a limited exposure to Psychology. Students are strongly urged to take a 20 credit Major or Honours degree. The 15 credit program requires students to complete a Minor consisting of at least three full credits in Psychology classes above the 1000 level other than those (PSYO 2000.03 and PSYO 2501.03) which are restricted to students in the Major or Honours program.

## F. Minor Program in Psychology

Students in 20 credit degree programs other than Psychology and Neuroscience may choose to complete a Minor Program in Psychology. A Minor in Psychology is offered to students enrolled in other programs within the Faculty of Science and to students from other Faculties, provided they complete the requisite classes.

To obtain a Minor in Psychology, a student must successfully complete any three full credits in Psychology above the 1000 level other than those (PSYO 2000.03 and PSYO 2501.03) which are restricted to students in the Major or Honours program. Admission to classes at the 2000 level requires completion of PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30, or 1540X/Y.27 with a grade of B- or better. Note that if a Minor is added to a Double Major or a Combined Honours program, students may find that they need to take more than 20 credits to complete all of their degree requirements.

## BSc/Engineering or BA/Engineering Concurrent Programs

Students will normally complete the requirements for a 15 Credit BSc or 15 Credit BA, and the first two years of engineering studies leading to the Diploma in Engineering. The concurrent program can be completed in three years. Details are provided in the College of Arts and Science Degree Requirements on page 131 of the calendar.

## G. Minor Programs available to students enrolled in a Major or Honours Psychology program

Minor programs allow students to develop subject specialities outside their main subject of study. Minors are normally added to a four year (20 credit) Major or Honours program. A student enrolled in a Major or Honours Psychology program may enroll in any of the Minors offered by other programs in the Faculty of Science, or in Minors offered by other Faculties.

NOTE: Classes counted toward a 20 credit Major or Honours program may not be used to fulfill the requirements of a Minor program.

*Minors in other Faculty of Science programs (see 5.a. page 135)*

*Minors offered by the Faculty of Arts and Social Sciences (see 5.a. page 135)*

*Minors in other Faculties (see 5.b. page 135)*

## H. Certificate Programs

A number of Certificate programs are available to students enrolled in an Honours, Major, or Minor program in Psychology. Please click here for full listing of available certificates (see page 137).

NOTE: Classes counted toward a Major, Honours or Minor program may also be used to fulfill the requirements of a Certificate.

Certificates offered through the Department of Psychology and Neuroscience include:

### Certificate in Animal Behaviour

(Contact Dr. Shelley Adamo, shelley.adamo@dal.ca)

The Certificate program is a collaborative effort of both the Biology and the Psychology and Neuroscience departments. It provides students an opportunity to take, within their BA or BSc Honours or Major program, a set of classes and a research project that will accord them an animal behaviour specialization. Completion of the Certificate will be shown on a student's transcript.

Note: It is the responsibility of students in the Certificate Program to complete the class sequence specified, and to provide the Certificate Coordinator with confirmation that the necessary classes have been taken, by the end of the examination period in their final year of study.

#### Certificate requirements:

1. A minimum grade of a B- is required in four mandatory classes:

PSYO/NESC 2160.03: Animal Behaviour

PSYO 2501.03: Statistical Methods I or STAT 2080.03: Statistical Methods for Data Analysis and Inference

BIOL 3062.03: Behavioural Ecology or PSYO/NESC 3162.03: Advance Animal Behaviour: Theories and Applications

BIOL 3630.03: Field Methods in Animal Behaviour or NESC/PSYO 3161.03: Measuring Behaviour

2. A grade of B- in two full credits of elective classes chosen from the following list. One of the two full credits must be at the 3000/4000 level.

#### 2000 level

PSYO/NESC 2140.03: Learning

PSYO/NESC 2170.03: Hormones and Behaviour

PSYO/NESC 2470.03: Systems Neuroscience

#### 3000 level

BIOL 3327.03: Entomology

BIOL 3622.03: Ornithology

BIOL 3067.03: Ecology and Evolution of Fishes

BIOL 3626.03: Field Studies of Marine Mammals

PSYO/NESC 3000.06: Independent Research in Modern Psychology (Animal Behaviour topic)

PSYO/NESC 3001.03: Directed Research Project in Psychology (Animal Behaviour topic)

PSYO/NESC 3043.03: Neurobiology and Learning

PSYO/NESC 3044.03: Laboratory Methods of Learning and Conditioning

PSYO/NESC 3162.03: Advanced Animal Behaviour

PSYO/NESC 3165.03: Neuroethology

PSYO/NESC 3180.03: Psychoneuroimmunology/Ecological Immunology

PSYO/NESC 3670.03: Genes, Brain and Behaviour

#### 4000 level

PSYO/NESC 4160.03: Topics in Behavioural Biology

BIOL 4060.03: Marine Mammalogy

BIOL 4800.06: Special Topics (Animal Behaviour topic)

BIOL 4806.03, 4807.03: Special Topics (Animal Behaviour topic)

3. A grade of B- in one half credit or more of independent research in Animal Behaviour.

The research topic must be pre-approved by the Certificate Coordinator prior to the start of their research class (i.e., PSYO/NESC 3000.06, PSYO/NESC 3001.03, PSYO/NESC 4500.06, BIOL 4800.06, BIOL 4806.03, BIOL 4807.03, or BIOL 4900.06). Honours students are encouraged to complete their Honours thesis on a topic in Animal Behaviour to fulfill this requirement.

Students are also encouraged to further develop their study design and analysis skills by taking additional classes such as BIOL 4061.03 (Design of Biological Experiments) or BIOL 4062.03 (Analysis of Biological Data).

4. Enrollment in the Certificate in Animal Behaviour program should be undertaken by students in their third or fourth year of studies when they are seeking approval of the research topic by the Certificate Coordinator.

The Certificate Coordinator will be named by the Animal Behaviour Working Group (S. Adamo, S. Gadbois, A. Horn, M. Leonard, C. Staicer).

## III. Class Descriptions

NOTE: Not all of the classes listed below are offered every year. Please consult the current timetable to determine if a class is offered.

In 2006/2007, the full-credit Introduction to Psychology classes were divided into two half-credit classes. PSYO 1000X/Y.06 became PSYO 1021.03 and 1022.03, and PSYO 1001X/Y.06 became PSYO 1011.03 and 1012.03. If a class now requires PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03 as prerequisites, this requirement may also be met by either PSYO 1000.06 or PSYO 1001.06.

### PSYO 1011.03: Introduction to Psychology and Neuroscience I: From Neuron to Person.

Material covered includes historical background, research methodology, neural mechanisms that underlie behaviour, sensory and perceptual processes, states of consciousness, learning, and memory. The class is taught by several different instructors with expertise in the topics covered. Biweekly labs add depth to the material covered in lectures.

NOTE: To enrol in 2000-level Psychology classes, a grade of B- is required in PSYO 1011.02 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03.

COORDINATOR: H. Schellinck

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours, Required Biweekly Lab 1 hour

EXCLUSION: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1021.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27

### **PSYO 1012.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology.**

This class extends the coverage offered in PSYO 1011.03 or 1021.03 and includes material on development, cognition, intelligence, motivation, personality, social behaviour, and psychopathology. The class is taught by several different instructors with expertise in the topics covered. Biweekly labs add depth to the material covered in lectures.

NOTE: To enrol in 2000-level Psychology classes, a grade of B- is required in PSYO 1011.02 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03.

COORDINATOR: H. Schellinck

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours, Required Biweekly Lab 1 hour

EXCLUSION: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1022.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27

### **PSYO 1021.03: Introduction to Psychology and Neuroscience I: From Neuron to Person.**

Material covered includes historical background, research methodology, neural mechanisms that underlie behaviour, sensory and perceptual processes, states of consciousness, learning, and memory. The class is taught by one or two different instructors with expertise in the topics covered. This class has no accompanying laboratory/tutorial.

NOTE: To enrol in 2000-level Psychology classes, a grade of B- is required in PSYO 1011.02 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

EXCLUSION: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1011.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27

### **PSYO 1022.03: Introduction to Psychology and Neuroscience II: From Social Interaction to Psychopathology.**

This class extends the coverage offered in PSYO 1011.03 or 1021.03 and includes material on development, cognition, intelligence, motivation, personality, social behaviour, and psychopathology. The class is taught by one or two different instructors with expertise in the topics covered. This class has no accompanying laboratory/tutorial.

NOTE: To enrol in 2000-level Psychology classes, a grade of B- is required in PSYO 1011.02 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

EXCLUSION: PSYO 1000X/Y.06, PSYO 1001X/Y.06, PSYO 1010X/Y.06, PSYO 1012.03, SCIE 1500X/Y.30, SCIE 1501X/Y.27, SCIE 1503X/Y.21, SCIE 1504X/Y.27, SCIE 1510X/Y.33, SCIE 1515X/Y.36, SCIE 1520X/Y.30, SCIE 1540X/Y.27

### **PSYO 2000.03: Methods in Experimental Psychology.**

The class provides a thorough grounding in scientific research methods used by psychologists. Lectures explore analytic procedures commonly employed to investigate human and animal behaviour. Students conduct and analyze in written reports a series of experiments in the laboratory to illustrate important concepts discussed in class.

NOTE: Restricted to students registered in Psychology Major or Honours programs. Students should endeavor to take PSYO 2501.03, Statistical Methods I, or STAT 2080.03 concurrently with PSYO 2000.03. Students must attend the first lecture session.

INSTRUCTOR(S): S. Gadbois, J. Christie

FORMAT: Lecture 3 hours, Lab 2 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27 (with a grade of B- or better)

EXCLUSION: NESC 2007.03

### **PSYO 2080.03: Social Psychology.**

The class undertakes a critical analysis of social theory and research promoting a close and skeptical evaluation of our knowledge, our obedience and rebellion, our affections and hostilities, our willingness to help and injure, our attempts to explain ourselves and others, our erotic orientations, and our gender roles.

INSTRUCTOR(S): J. Stamp

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27 (with a grade of B- or better)

### **PSYO 2090.03: Developmental Psychology.**

People change with age. This class examines the changes that occur in humans from conception through adolescence. Biological, social, cognitive, and linguistic aspects of development are considered. Theory, research, and practical implications are integrated throughout the class.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27 (with a grade of B- or better)

### **PSYO 2130.03: Introduction to Cognitive Psychology.**

Lectures focus on the processes involved in transforming sensory information into the meaningful everyday world that we know. Initially, emphasis is on the visual system, and how information within that system is structured and organized, followed by a consideration of the character of internal representations used in thinking and remembering.

INSTRUCTOR(S): O.E. Krigolson

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27 (with a grade of B- or better)

CROSS-LISTING: NESC 2130.03

### **PSYO 2140.03: Learning.**

Lectures focus on several goals: (1) providing general principles of learning; (2) understanding the behaviour of particular species; (3) direct application to human problems. Emphasis is on understanding why researchers in animal learning do what they are currently doing (given the goals and the historical context).

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27 (with a grade of B- or better)

CROSS-LISTING: NESC 2140.03

### **PSYO 2150.03: Perceptual Processes.**

Perception deals with the way in which our senses provide us with information about our environment. This class focuses on the process by which sensory experiences are coded, how they are interpreted by the nervous system, and how experience modifies perception.

INSTRUCTOR(S): N. Crowder

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27 (with a grade of B- or better), or BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03

CROSS-LISTING: NESC 2150.03

EXCLUSION: PSYO/NESC 3005.03

### **PSYO 2160.03: Animal Behaviour.**

Using concepts from behavioural biology and psychology, animal behaviourists attempt to explain why animals behave the way they do. The class examines topics such as mating and social systems, mate choice, the evolution of behaviour, and animal communication. The behaviour of a wide range of animals is studied.

INSTRUCTOR(S): S. Adamo or S. Gadbois

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27 (with a grade of B- or better), or BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03

CROSS-LISTING: NESC 2160.03

### **PSYO 2170.03: Hormones and Behaviour.**

How chemical signals of the neural, endocrine, and immune systems interact to influence the brain and behaviour. How neurotransmitters, cytokines, and

hormones control neural and behavioural development, sexual, aggressive, and maternal behaviour. Hormone receptors in the brain, reproduction, puberty, brain sex differences, and stress are also examined.

INSTRUCTOR(S): R.E. Brown

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27 (with a grade of B- or better), or BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03

CROSS-LISTING: NESC 2170.03

### PSYO 2220.03: Abnormal Behaviour.

This class involves the study of a broad range of manifestations of abnormal behaviour in adults (e.g., anxiety disorders, substance abuse/dependence, schizophrenia, affective disorders, personality disorders). Causes of abnormal behaviour and the scientific techniques developed to better understand and intervene with various forms of behavioural dysfunction are appraised.

INSTRUCTOR(S): S. Sherry

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27 (with a grade of B- or better)

### PSYO 2470.03: Systems Neuroscience.

This class provides an introduction to the functional systems of the brain. We examine neural systems (e.g., the sensory systems, motor system, neurotransmitter-specific systems) individually. We explore their anatomy and function, neurobiological properties that make each unique, and factors that are common to all neural systems (e.g., development and plasticity).

INSTRUCTOR(S): D. Phillips

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO/NESC 2570.03 or instructor's consent

CROSS-LISTING: NESC 2470.03

EXCLUSION: PSYO 2770.03

### PSYO 2500.03: Contemporary Research Problems in Psychology.

A continuation PSYO 2000.03, this class introduces prospective Honours students to the design, execution, and analysis of independent research projects. Each student works with a supervisor on a one-to-one basis preparing a research project that the student then conducts and describes in a formal written report.

FORMAT: Lecture 2 hours, Lab 2 hours

PREREQUISITE: PSYO 2000.03, with grade of B or better, and permission of the instructor

### PSYO 2501.03: Statistical Methods I.

This class provides an introduction to research design and statistics within Neuroscience and Psychology. Particular emphasis is placed on conducting and interpreting various statistical procedures, including descriptive and inferential statistics (z-test, t-test, ANOVA, chi-square tests), frequently used in these fields. NOTE: Only students undertaking a Major or Honours degree in Psychology or Neuroscience are eligible for enrolment. This class does not fulfil any part of the Faculty of Science Mathematics requirement.

INSTRUCTOR(S): S. Jacques

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03 (may be taken concurrently), or instructor's consent

EXCLUSION: PSYO 3501.03, STAT 2080.03

### PSYO 2570.03: Cellular Neuroscience.

This class explores the brain at the neuronal level. Material covered includes: the ionic basis of resting potentials; the electrical activity of neurons; synaptic transmission and plasticity; synthesis and action of synaptic transmitters; and drug actions. Cellular phenomena relevant to healthy and neurologically-dysfunctional systems are also discussed.

INSTRUCTOR(S): S. Adamo

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.27 or 1540X/Y.27 or BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03 (with a grade of B- or better)

CROSS-LISTING: NESC 2570.03, PHYL 2570.03

### PSYO 2770.03: Brain and Behaviour.

This class examines the brain's role in controlling experience and behaviour in both animals and humans. It focuses on the functional anatomy of brain systems:

in particular on neural pathways involved in motivation, mood, memory, and sensation/perception. Recent research findings and methodologies for studying brain systems are emphasized.

NOTE: This class is designed for students in Psychology Major and Honours programs. Students planning to take advanced Neuroscience classes should register for NESC/PSYO 2470.03.

INSTRUCTOR(S): S. Gadbois

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27 (with a grade of B- or better)

EXCLUSION: PSYO/NESC 2470.03, PSYO/NESC 2270.03

### PSYO 3000X/Y.06: Independent Research in Modern Psychology.

Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in PSYO 2000.03, a high level of performance in other Psychology classes, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project.

Note: This class cannot be used to fulfill the department's research laboratory requirement.

SIGNATURE REQUIRED

COORDINATOR: J. Stamp

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Lab 4 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, previous or concurrent enrolment in two other PSYO/NESC 3000-level classes, and Coordinator's consent.

CROSS-LISTING: NESC 3000X/Y.06

EXCLUSION: PSYO/NESC 3001.03

### PSYO 3001.03: Directed Project in Psychology.

Primarily for Honours students wishing research experience. Requirements include a minimum grade of B in PSYO 2000.03, a high level of performance in other Psychology classes, an overall B+ (GPA 3.30) average, and securing a faculty advisor to supervise the research project.

Note: This class cannot be used to fulfill the department's research laboratory requirement.

SIGNATURE REQUIRED

COORDINATOR: J. Stamp

NOTE: This class provides only a half-year research experience. Students wanting a full-year research experience in a lab should register for PSYO 3000X/Y.06.

FORMAT: Lab 4 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, previous or concurrent enrolment in two other PSYO/NESC 3000-level classes, and Coordinator's consent.

CROSS-LISTING: NESC 3001.03

EXCLUSION: PSYO/NESC 3000X/Y.06

### PSYO 3010X/Y.06: Advanced General Psychology.

An active learning class for suitably-qualified senior students. Students complete a series of oral and written assignments designed to consolidate critical thinking and communication skills in Psychology/Neuroscience. After instructional training, assignments include preparing and delivering lab material to a small group (~ 30) of PSYO 1011.03 and 1012.03 students.

SIGNATURE REQUIRED

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

INSTRUCTOR(S): H. Schellinck

FORMAT: Lecture/Seminar 2 hours, Skills Lab 1 hour

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, advanced classes in Psychology or Neuroscience, and instructor's consent.

CROSS-LISTING: NESC 3010X/Y.06

### PSYO 3030.03: Psychometrics.

This class focuses on the theory and method of psychological measurement. Basic and advanced analytic methods employed in quantifying human abilities, traits, and syndromes are examined. Students contribute to the design of, and report on, a new measure of behaviour in the laboratory component of the class.

INSTRUCTOR(S): Staff

FORMAT: Lecture 2 hours, Research Lab 2 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and PSYO 2501.03 or STAT 2080.03

**PSYO 3043.03: Neurobiology of Learning.**

This class examines the neurobiological processes underlying various forms of learning such as classical and operant conditioning, song learning by birds, spatial learning, and fear conditioning. Different methods used to study the neurobiology of learning, and the evolutionary origins of these systems are also considered.

INSTRUCTOR(S): L. Phillmore

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and one of PSYO/NESC 2140.03 or PSYO/NESC 2470.03 or PSYO 2770.03

CROSS-LISTING: NESC 3043.03

EXCLUSION: PSYO 3041.03

**PSYO 3044.03: Laboratory Methods of Learning and Conditioning.**

A hands-on class on techniques used to test learning and memory in animals, including operant conditioning and spatial memory, and an exposure to the neurobiological systems involved. Students work in pairs to conduct a series of experiments, analyze data as a class, but write individual laboratory reports on each experiment.

NOTE: Students should be aware that some data collection occurs outside of class time.

INSTRUCTOR(S): L. Phillmore

FORMAT: Research Lab 4 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and one of PSYO/NESC 2140.03 or PSYO/NESC 2470.03 or PSYO 2770.03

CROSS-LISTING: NESC 3044.03

EXCLUSION: PSYO 3042.03

**PSYO 3051.03: Sensory Neuroscience I. Vision.**

This class examines the neural basis for the perception of light, colour, movement, depth, and form. The class covers developmental events important for vision, and the extent to which vision is constrained by anatomical and physiological development.

INSTRUCTOR(S): N. Crowder

FORMAT: Lecture 3 hours, Research Lab 1 hour

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO/NESC 2470.03 or PSYO 2770.03, and PSYO/NESC 2150.03

CROSS-LISTING: NESC 3051.03

**PSYO 3052.03: Sensory Neuroscience II. Hearing and Speech.**

This class explores hearing at levels that include stimulus parameters and their psychophysical correlates, middle ear function, cochlear biophysics, central auditory neurophysiology, and principles of speech perception. We emphasize mechanisms of normal hearing and speech, but address pathology wherever it helps us understand the relation between neurophysiology and perception.

INSTRUCTOR(S): D.P. Phillips

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and PSYO/NESC 2470.03

CROSS-LISTING: NESC 3052.03

**PSYO 3082.03: Experimental Social Psychology.**

This class attempts to develop students' skill level in empirical analysis of social psychology phenomena. Students complete two research projects during the term. The projects involve testing subjects, coding data, computer data analysis, and report writing. Familiarity with computer-based statistical analysis and text processing is strongly recommended.

INSTRUCTOR(S): J. Stamp

FORMAT: Lecture 1 hour, Research Lab 2 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and PSYO 2080.03

**PSYO 3084.03: Social Cognition.**

This class focuses on the understanding people develop of themselves and others as social beings. The contributions of evolution, historical, and cultural factors are considered. The ways in which human development of social perception and cognition differs from that of other species are also examined.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and one of PSYO 2080.03 or PSYO 2090.03 or PSYO 2220.03

**PSYO 3091.03: Methods in Developmental Psychology.**

This class provides a survey of research methods in developmental psychology. It assumes knowledge of basic methodology and design, and concentrates on methods of relevance to the study of human development. In addition to lectures, students conduct a number of research exercises to gain experience in conducting research with children.

INSTRUCTOR(S): S. Jacques

FORMAT: Lecture 2 hours, Research Lab 1 hour

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and PSYO 2090.03

**PSYO 3092.03: Early Development.**

This class examines development in infancy and the preschool period. The main theme of the class is to examine the integration of perceptual, cognitive, emotional, social, and linguistic changes occurring during the first five years of life.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and PSYO 2090.03

**PSYO 3093.03: Development of Language and Literacy Abilities.**

This class examines the cognitive and linguistic processes underlying language acquisition and how they interact in influencing the development of language and literacy abilities.

INSTRUCTOR(S): S. H. Deacon

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and PSYO 2090.03

**PSYO 3122.03: Methods in Experimental Clinical Psychology.**

Students learn how to conduct research on topics in applied clinical psychology. Students conduct a series of research projects in the laboratory by serving both as subjects and experimenters, and analyze the results of these studies in written lab reports. Research studies serve to illustrate concepts discussed in class.

INSTRUCTOR(S): S. Barrett

FORMAT: Lecture 2 hours, Research Lab 2 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and PSYO 2220.03

**PSYO 3129.03: Childhood Psychopathology.**

This class examines a wide range of mental health disorders in children (e.g., reading disability, autism, ADHD). The goal is to gain a better understanding of the nature of these disorders, to learn about evidence-based assessment and treatment, and to review research findings in relation to children's mental health.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03; PSYO 2220.03 is recommended

**PSYO 3131.03: Research Methods in Attention.**

The methods, findings, and theories that underpin our understanding of attention (alertness, preparation, selection, and control of information processing) are covered. Behavioural and neuroscientific evidence as well as computational models are examined in the lectures. Laboratories emphasize behavioural methods used to isolate and reveal the components of attention.

INSTRUCTOR(S): R. Klein

FORMAT: Lecture 3 hours, Research Lab 2 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and PSYO/NESC 2130.03 or PSYO/NESC 2150.03

CROSS-LISTING: NESC 3131.03

EXCLUSION: PSYO/NESC 3130.06

**PSYO 3132.03: Research Methods in Visual Cognition.**

Visual cognition is the study of how we extract meaning from our visual environment and use it to direct our behaviour. Emphasis is placed on object, face, and word recognition as revealed by normal behaviour, and by neuroimaging techniques and neuropsychological studies of brain-damaged individuals who have lost these recognition abilities.

INSTRUCTOR(S): P. McMullen

FORMAT: Lecture 3 hours, Research Lab 2 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and PSYO/NESC 2130.03 or PSYO/NESC 2150.03  
 CROSS-LISTING: NESC 3132.03  
 EXCLUSION: PSYO/NESC 3130.06

### **PSYO 3133.03: Research Methods in Memory.**

This class examines human memory from the perspective of cognitive psychology and, to a lesser extent, cognitive neuroscience. Lectures emphasize cognitive approaches to the study of memory with an explicit focus on empirical research methods, data, and interpretation of results.

INSTRUCTOR(S): T. Taylor-Helmick

FORMAT: Lecture 3 hours, Research Lab 2 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and PSYO/NESC 2130.03

CROSS-LISTING: NESC 3133.03

EXCLUSION: PSYO/NESC 3130.06

### **PSYO 3134.03: Research Methods in Psycholinguistics.**

Provides hands-on experience with various methodologies employed in the study of language processing, and uses these to explore topics in psycholinguistics in greater depth. Methods covered may include reaction time, priming, self-paced reading, computational modeling, corpus-based research, and event-related brain potentials. Students serve as experimenters and participants in class experiments.

INSTRUCTOR(S): A. Newman

FORMAT: Lecture 3 hours, Research Lab 2 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and PSYO/NESC 3190.03

CROSS-LISTING: NESC 3134.03

EXCLUSION: PSYO/NESC 3130.06

### **PSYO 3137.03: Research Methods in Cognitive Neuroscience.**

An overview of neuroimaging and other techniques of cognitive neuroscience (including fMRI, ERP, and others) focusing on how they work, how they are applied, and their inherent limitations. Labs include experience collecting and analyzing ERP data, demonstrations of fMRI scanning, and analysis of fMRI data.

INSTRUCTOR(S): A. Newman

FORMAT: Lecture 3 hours, Research Lab 2 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, and PSYO/NESC 2130.03

CROSS-LISTING: NESC 3137.03

### **PSYO 3161.03: Measuring Behaviour.**

Measuring behaviour is essential in the study of ethology, behavioural neuroscience, developmental, social and clinical psychology. The function of this laboratory class is to teach methods of observing and scoring behaviour using qualitative and quantitative methods. Sampling methods, behaviour description and analysis will be done in laboratory and naturalistic settings.

INSTRUCTOR(S): R. E. Brown

FORMAT: Research Lab 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03

CROSS-LISTING: NESC 3161.03

### **PSYO 3162.03: Advanced Animal Behaviour: Theories and Applications.**

This class focuses on advanced theories and applications of animal behaviour, with a focus on proximate, integrative and applied questions. It offers a more in-depth analysis of topics covered in PSYO/NESC 2160.03 and explores trends and issues in contemporary ethology, animal psychology and behavioural ecology.

INSTRUCTOR(S): S. Gadbois

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03 or BIOL 3062.03 or BIOL 3630.03, and PSYO/NESC 2160.03

CROSS-LISTING: NESC 3162.03

### **PSYO 3165.03: Neuroethology.**

Neuroethology explores how assemblies of neurons work together to produce behaviour. Neural control of selected behaviours from a wide range of animals, both invertebrate and vertebrate, are examined. From this comparative perspective an attempt is made to tease out common themes in the physiological control of behaviour.

NOTE: All experiments in the accompanying lab involve insects. Students are required to handle insects during the lab.

INSTRUCTOR(S): S. Adamo

FORMAT: Lecture 2 hours, Research Lab 2 hours

PREREQUISITE: PSYO/NESC 2160.03 or BIOL 3062.03; and PSYO/NESC 2570.03 or BIOL 3078.03 and 3079.03, or MARI 3074.03 and 3076.03; and PSYO 2000.03 or NESC 2007.03 or one of following Biology classes: 2003.03, 2004.03, 2020.03 2030.03 2060.03

CROSS-LISTING: NESC 3165.03

### **PSYO 3180.03: Psychoneuroimmunology/Ecological Immunology.**

Our behaviour can influence how well we resist disease, and infection can alter behaviour. This class examines how immune systems and nervous systems interact in both vertebrates and invertebrates. Evolutionary forces that have led to the existence of these interactions are also examined.

INSTRUCTOR(S): S. Adamo

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and either PSYO 2770.03 or PSYO/NESC 2470.03 or MICI 2100.03; OR BIOL 2020.03

CROSS-LISTING: NESC 3180.03

### **PSYO 3190.03: Psycholinguistics.**

Explores the cognitive and neural bases of human language processing. Topics include: human language and other communication systems; phonology; morphology; semantics; syntax; discourse; first and second language acquisition; relationship of language to general cognitive functions such as music and mathematics; signed languages such as American Sign Language; and non-linguistic gesture.

INSTRUCTOR(S): A. Newman

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and PSYO/NESC 2130.03

CROSS-LISTING: NESC 3190.03

EXCLUSION: PSYO/NESC 2190.03

### **PSYO 3220.03: Clinical Psychology.**

A survey of professional issues relevant to the practice of clinical psychology in hospitals, private practice, schools, the court system, and the community. Students gain knowledge about psychological services, and an understanding of the training, ethics, and expertise that clinical psychology brings to the delivery of mental health and healthcare.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and PSYO 2220.03

EXCLUSION: PSYO 2120.03

### **PSYO 3224.03: Forensic Psychology.**

This class provides an introduction to the application of psychology to the various areas of the criminal justice system (i.e., courts, corrections, policing). In addition, consideration is given to professional and ethical issues that arise when psychological knowledge is applied in forensic contexts.

INSTRUCTOR(S): J. Christie

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 1011.03 or PSYO 1021.03 and PSYO 1012.03 or PSYO 1022.03, or SCIE 1515X/Y.36, 1520X/Y.30 or 1540X/Y.27 (with a grade of B- or better), AND any 2000-level Psychology class.

### **PSYO 3225.03: Health Psychology.**

A study of psychological influences on how people stay healthy and how they respond when they become ill. Using a biopsychosocial model, this class examines topics such as health behaviours and prevention, stress and coping, the patient in treatment settings, and management of chronic and terminal illness.

INSTRUCTOR(S): N. Rosen

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and PSYO 2220.03

### **PSYO 3227.03: Principles of Human Neuropsychology.**

Clinical neuropsychologists study the organization of cognitive, emotional, and social functions in the brain to understand how brain damage alters human behaviour across the lifespan. We examine how clinicians diagnose and rehabilitate persons with brain diseases and disorders. Assignments emphasize application of textbook/lecture-based knowledge, critical thinking, and group presentation skills.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and PSYO/NESC 2470.03 or PSYO 2770.03; PSYO/NESC 2130.03 is helpful  
CROSS-LISTING: NESC 3227.03

### **PSYO 3237.03: Drugs and Behaviour.**

An introduction to behavioural psychopharmacology. The lectures involve basic anatomy, physiology, and chemistry of the nervous system. Behavioural effects and underlying mechanisms of various psychoactive drugs are discussed. Specific topics covered are alcohol, tobacco, amphetamines, cocaine, opiates, hallucinogens, tranquilizers, and antipsychotic drugs.

INSTRUCTOR(S): S. Barrett

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and one of PSYO/NESC 2170.03, 2470.03, 2570.03, or PSYO 2770.03

CROSS-LISTING: NESC 3237.03

### **PSYO 3260.03: Biological Rhythms.**

Daily (circadian) clocks generate rhythms in many functions, including sleep, reproduction, and intellectual performance. This class examines the nature of these biological clocks, their neural mechanisms, and their roles in regulating sleep and other aspects of physiology and in pathological conditions, including sleep disorders, jet lag, and psychiatric disorders.

INSTRUCTOR(S): B. Rusak

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03 or BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03, and one of PSYO/NESC 2170.03 or PSYO/NESC 2470.03 or PSYO 2770.03

CROSS-LISTING: NESC 3260.03

### **PSYO 3264.03: The Science of Sleep.**

This class reviews: how sleep is studied; sleep characteristics across the lifespan and among species; cultural and societal impacts on human sleep; circadian, homeostatic, neural and endocrine mechanisms that regulate sleep; functions of sleep; impacts of sleep loss. Sleep disorders may be discussed to illuminate aspects of sleep regulation.

INSTRUCTOR(S): B. Rusak

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and either PSYO 2770.03 or PSYO/NESC 2470.03; OR BIOL 2020.03

CROSS-LISTING: NESC 3264.03

### **PSYO 3270.03: Developmental Neuroscience.**

This class presents the fundamentals of development in complex and simple nervous systems. Cell differentiation, pattern regulation, proliferation, migration, and circuit development are discussed. Special attention is given to later developmental events such as neuronal growth cones, cell death, growth factors, neuron-target interactions, and synapse formation.

INSTRUCTOR(S): K. Duffy

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and PSYO/NESC 2470.03 and PSYO/NESC 2570.03

CROSS-LISTING: NESC 3270.03

### **PSYO 3280.03: Personality.**

Personality deals with questions such as: Is a science of persons possible? Are there types of personalities, or is each individual's personality unique? Is an individual's life history an expression of his or her personality, or is personality description merely a summary statement of behaviour whose cause lies elsewhere?

INSTRUCTOR(S): S. Sherry

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and one of PSYO 2080.03 or PSYO 2090.03 or PSYO 2220.03

### **PSYO 3370.03: Neuroscience Laboratory I.**

Introduction to several neurophysiological techniques used in contemporary neuroscience, employing extracellular and intracellular electrical recording and stimulation methods on nervous system preparations, both sensory and motor. After introductory instruction, students in groups of 2 or 3 get to perform quite sophisticated practical experiments themselves, enabled by computer-based data acquisition.

INSTRUCTOR(S): Staff

FORMAT: Lab 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO/NESC 2470.03 and 2570.03, or PSYO/NESC 3270.03

CROSS-LISTING: NESC 3370.03

### **PSYO 3371.03: Neuroscience Laboratory II.**

Introduction to several techniques used in contemporary neuroscience. Students work under supervision in groups of 2 or 3 in regular labs that introduce neuroanatomical analyses using the following: Golgi impregnation, immunocytochemistry, dye-tracing of connections, electronmicroscopy of the retina, and neurotransmitter determinations using HPLC.

INSTRUCTOR(S): I. Meinertzhagen

FORMAT: Lab 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO/NESC 2470.03 and 2570.03, or PSYO/NESC 3270.03

CROSS-LISTING: NESC 3371.03

### **PSYO 3390.03: Cognitive Development.**

In this class we trace the development of the child's knowledge from birth to adolescence. Piaget's theory provides the background for the study of recent progress in our understanding of children's concepts of the physical world.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and PSYO 2090.03

### **PSYO 3502.03: Statistical Methods II.**

This class is the continuation of PSYO 2501.03, with the examination of more complex, but commonly used, inferential statistics. Topics include factorial ANOVA, ANCOVA, and multiple regression. This class is intended primarily for Honours students in Psychology or Neuroscience. Class work includes computer-based assignments.

INSTRUCTOR(S): J. Christie

FORMAT: Lecture 4 hours, Skills Lab 1-2 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO 2501.03 or STAT 2080.03, or instructor's consent

### **PSYO 3581.03: History of Psychology I.**

Drawing on writings from antiquity to the early years of the 20th century, we explore the nature of historical explanation, explanation in science, knowledge and truth, life, human nature, the domains of animal and man, neuroscience, and personality. Usually offered in the Fall term.

INSTRUCTOR(S): T. Juckes

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or Instructor's consent

EXCLUSION: PSYO 3580.06

### **PSYO 3582.03: History of Psychology II.**

Drawing on writings from antiquity to the early years of the 20th century, we explore the nature of learning, thinking, memory, intelligence, mental illness and treatment, the unconscious, dreams, development, and the self. Usually offered in the Winter term. Familiarity with ideas developed in PSYO 3581 is helpful.

INSTRUCTOR(S): T. Juckes

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or instructor's consent

EXCLUSION: PSYO 3580.06

### **PSYO 3670.03: Genes, Brain and Behaviour.**

The application of genetic techniques to the study of cognitive abilities, psychopathology, personality disorders, stress-related illnesses, and ethical issues in genetic research. The role of genetic factors in eating and drug abuse problems, as well as methods used to study gene-environment interactions are explored.

INSTRUCTOR(S): I. Weaver

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO/NESC 2470.03 or PSYO 2770.03, AND BIOL 1010.03/1011.03 or BIOL 1020.03/1021.03 or SCIE 1515.X/Y36, 1520X/Y.30, or 1540X/Y.27 (with a grade of B- or better); BIOL 2020.03 and BIOL 2030.03 are useful

CROSS-LISTING: NESC 3670.03

EXCLUSION: PSYO/NESC 2670.03

### **PSYO 3770.03: Behavioural Neuroscience.**

Behavioural neuroscience explores the neural and hormonal mechanisms underlying a variety of behavioural phenomena. The class focuses on neural correlates of social and emotional behaviour, motor behaviour and patterns, and behavioural toxicology processes (neurotoxins and endocrine disruptors).

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, and PSYO/NESC 2470.03 or PSYO 2770.03

CROSS-LISTING: NESC 3770.03

**PSYO 3775.03: Behavioural Neuroscience Laboratory.**

Students motivated to pursue a career in Neuroscience, or in a related biomedical discipline, gain direct experience studying the nervous system in relation to behaviour. Students acquire skills in animal handling, ethics, and measuring behaviour. Emphasis is placed on histological/molecular analysis of the brain including examining protein and/or mRNA levels.

SIGNATURE REQUIRED

INSTRUCTOR(S): T. Perrot

FORMAT: Research Lab 3+ hours

PREREQUISITE: PSYO 2000.03 or NESC 2007.03, PSYO/NESC 2470.03 or PSYO 2770.03, PSYO 2501.03, and one of PSYO/NESC 2160.03 or PSYO/NESC 2170.03 or PSYO/NESC 3237.03 or PSYO/NESC 3770, and instructor's consent

CROSS-LISTING: NESC 3775.03

**PSYO 3790.03: Neurolinguistics.**

The class covers: (1) brain damage and language disorders; (2) aphasia; (3) localization of lesions in the human brain; (4) neuroimaging; (5) intracranial electric stimulation experiments; (6) event-related brain potential experiments; (7) PET, fNMR scan experiments; (8) neural models of language processing.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO/NESC 2470.03 or PSYO 2770.03

CROSS-LISTING: NESC 3790.03

**PSYO 3970.03: Molecular Neuroscience.**

This class examines the development, function, and pathology of the brain at the molecular level. Model systems are examined from the perspective of ion channels, messengers, receptors, intracellular signaling cascades, transcription factors, and genes. The concepts underlying basic cellular and molecular neuroscience tools are emphasized.

INSTRUCTOR(S): Staff

FORMAT: Lecture 3 hours

PREREQUISITE: PSYO/NESC 2570.03

CROSS-LISTING: NESC 3970.03

**4000-Level Seminars**

The following seminars are intended for fourth-year Honours students. Third-year Honours students are eligible provided they obtain permission from the instructor, and the needs of all the fourth-year Honours students have been met. The topics covered in these classes vary from year to year. Go to the departmental website (<http://psychology.dal.ca/>) for more detail about the topics to be covered in the current academic year.

**PSYO 4000.03: Senior Seminar.**

An individually tailored reading or study class designed to allow Honours students to focus on a particular issue, or a set of related issues, that are not part of the regular program. Enrolment is contingent upon securing a faculty member to supervise the study program.

SIGNATURE REQUIRED

COORDINATOR: J. Stamp

CROSS-LISTING: NESC 4000.03

**PSYO 4001.03: Contemporary Issues in Psychology.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

**PSYO 4040.03: Learning Applications in Clinical and Social Psychology.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

**PSYO 4050.03: Topics in Perception.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

PREREQUISITE: PSYO/NESC 3051.03

CROSS-LISTING: NESC 4050.03

**PSYO 4070.03: Chemical Neurobiology.**

The goal is to acquaint the student with neurotransmitters (excitatory amino acids, acetylcholine, monoamines, neuropeptides). Anatomical, biochemical, physiological, pharmacological, behavioral, and clinical aspects of individual neurotransmitter systems are discussed. Lectures are given by the instructors. Students are expected to write an examination and a review, and give a presentation.

FORMAT: Seminar 2 hours

PREREQUISITE: PSYO/NESC 2470.03 and 2570.03, or PSYO/NESC 3270.03, or instructor's consent

CROSS-LISTING: NESC 4070.03/5070.03, ANAT 5070.03

**PSYO 4080.03: Topics in Social Psychology and Personality.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

**PSYO 4090.03: Development of Social Behaviour.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

**PSYO 4092.03: Topics in Developmental Psychology.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

**PSYO 4120.03: Topics in Clinical Psychology.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

**PSYO 4130.03: Topics in Human Information Processing.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

CROSS-LISTING: NESC 4130.03

**PSYO 4140.03: Animal Learning Topics.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

**PSYO 4160.03: Topics in Behavioural Biology.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

CROSS-LISTING: NESC 4160.03

**PSYO 4170.03: Topics in Behavioural Neuroendocrinology.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

CROSS-LISTING: NESC 4170.03

RESTRICTION: Restricted to PSYO/NESC Honours Students

**PSYO 4224.03: Topics in Forensic Psychology.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

RESTRICTION: Restricted to Psychology Honours students

**PSYO 4230.03: Human Performance Topics.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

CROSS-LISTING: NESC 4230.03

**PSYO 4500X/Y.06: Honours Thesis.**

Under a staff member's supervision, each student conducts original research in experimental psychology. Students meet to describe their proposed research and progress. A formal written report of the completed research is required. The final grade is based on originality and skill with emphasis on the written and oral reports.

SIGNATURE REQUIRED

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

INSTRUCTOR(S): P. McMullen, T. Perrot

PREREQUISITE: Fourth-year Honours students, and instructor's consent

CROSS-LISTING: NESC 4500X/Y.06

RESTRICTION: Restricted to Honours students in their graduating year

**PSYO 4740.03: Topics in the Neurobiology of Learning and Memory.**

SIGNATURE REQUIRED

FORMAT: Seminar 2 hours

PREREQUISITE: PSYO/NESC 2470.03, PSYO/NESC 2140.03

CROSS-LISTING: NESC 4740.03

# Science, Interdisciplinary

## Dean

Moore, C., BA (Hons), PhD (Cambridge), Professor (Psychology)

## I. Class Descriptions

### SCIE 1111.03: Writing for the Sciences.

This class satisfies the Faculty of Science Writing Requirement. The class covers the history of writing and information theory, grammar and punctuation, sentences and paragraphs, scientific style, proposals, the scientific paper, citations and references, graphics, posters, and ethics. Weekly assignments/quizzes develop and reinforce writing skills introduced in lectures.

INSTRUCTOR(S): T. Juckes

FORMAT: ✍ Writing requirement for Faculty of Science BSc students only.

Lecture 3 hours/tutorial 1 hour (mandatory)

### SCIE 1515X/Y.36: Integrated Science.

This full-time program provides comprehensive first-year preparation for any science major or honours degree. Concepts and techniques at the first-year introductory level are integrated across Biology, Chemistry, Mathematics, Physics, Earth Science, Psychology, and Statistics. This program is a full credit overload and includes a full-year writing class and a research project.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: Writing requirement. Lecture approx. 17 hours/lab and other activities approx. 12 hours/tutorials 4 hours (optional)

PREREQUISITE: Grade 12 Physics. Students lacking this prerequisite should take a university preparation course in Physics, such as PHYC 0010.00 (<http://collegeofcontinuing.dal.ca>) or the equivalent

CROSS-LISTING: BIOL 1010.03/1011.03, CHEM 1011.03/1012.03, EARTH 1080.03/1090.03, MATH 1000.03/1010.03, PHYC 1190.03/1290.03, PSYO 1011.03/1012.03, SCIE 1111.03, and STAT 1060.03

CO-REQUISITE: PHIL 1050.03

### SCIE 1520X/Y.30: Integrated Biomedical Science.

This full-time program provides comprehensive first-year preparation for major or honours degrees in the life sciences and Medicine, with full-years of physics and calculus. Introductory level concepts and techniques are integrated across Biology, Chemistry, Mathematics, Physics, Psychology, and Statistics, a full-year writing class, and a research project in the winter term.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: ✍ Writing requirement. Lecture approx. 15 hours/Lab and other activities approx. 8 hours/tutorials 4 hours (optional)

PREREQUISITE: Grade 11 or 12 Physics. Students lacking this prerequisite should take a university preparation course in Physics, such as PHYC 0010.00 (<http://collegeofcontinuing.dal.ca>) or the equivalent

CROSS-LISTING: BIOL 1010.03/1011.03, CHEM 1011.03/1012.03, MATH 1000.03/1010.03, PHYC 1190.03/1290.03, PSYO 1011.03/1012.03, SCIE 1111.03, and STAT 1060.03

CO-REQUISITE: PHIL 1050.03

### SCIE 1530X/Y.27: Integrated Physical Science.

This full-time program provides comprehensive first-year preparation for any major or honours degree in the physical sciences. Introductory level concepts and techniques are integrated across four full-year components (Chemistry, Mathematics, Physics, Earth Science), two half-year components (Biology and Statistics), a full-year writing class, and a research project in the winter term.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: ✍ Writing requirement. Lecture approx. 13 hours/Lab and other activities approx. 9 hours/Tutorials 4 hours (optional)

PREREQUISITE: Grade 12 Physics. Students lacking this prerequisite should take a university preparation course in Physics, such as PHYC 0010.00 (<http://collegeofcontinuing.dal.ca>) or the equivalent

CROSS-LISTING: BIOL 1030.03, CHEM 1011.03/1012.03, EARTH 1080.03/1090.03, MATH 1000.03/1010.03, PHYC 1190.03/1290.03, SCIE 1111.03, and STAT 1060.03

CO-REQUISITE: PHIL 1050.03

### SCIE 1540X/Y.27: Integrated Life Science.

This full-time program provides comprehensive first-year preparation for any major or honours degree in the life sciences. Introductory level concepts and techniques are integrated across three full-year components (Biology, Chemistry, and Psychology), four half-year components (Mathematics, Physics, Earth Science, and Statistics), a full-year writing class, and a research project.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

FORMAT: ✍ Writing requirement. Lecture approx. 12 hours/Lab and other activities approx. 8 hours/tutorials 2 hours (optional)

PREREQUISITE: Grade 12 Physics. Students lacking this prerequisite should take a university preparation course in Physics, such as PHYC 0010.00 (<http://collegeofcontinuing.dal.ca>) or the equivalent

CROSS-LISTING: BIOL 1010.03/1011.03, CHEM 1011.03/1012.03, EARTH 1080.03, MATH 1000.03, PHYC 1190.03, PSYO 1011.03/1012.03, SCIE 1111.03, and STAT 1060.03

CO-REQUISITE: PHIL 1050.03

### SCIE 2000X/Y.06: Introduction to the History of Science.

This class is a broad introductory survey of the central developments in the history of science, open to first and higher level students whatever their fields, and may be an introduction to further study in the history of science. It examines the most revolutionary figures from the Greeks to the modern period. The work of each of these had such a profound influence upon their own era and upon subsequent times that students in the humanities will find this class clarifies the nature of science and its cultural importance. Students in the sciences will recognize that their contributions have been permanently woven into the fabric we call science. In uncovering the sources and character of each of these transformations in the theory and practice of science, the class will challenge conventional views about the nature and place of science. This class may be taken as an arts or science credit.

NOTE: Credit can only be given for this class if X and Y are completed in consecutive terms and partial credit cannot be given for a single term.

INSTRUCTOR(S): D. Lehoux, S. Snobelen, G. McOuat

FORMAT: Lecture/tutorial

CROSS-LISTING: BIOL 3503X/Y.06, HIST 3074X/Y.06, HSTC 1200/2200X/Y.06

EXCLUSION: HSTC 2201.03, BIOL 3502.03, HIST 3072.03, SCIE 4000.03

### SCIE 2800.00: Science Co-op Seminar Series.

This class is designed to introduce Science Co-op students to aspects of career development and preparation for their work terms. This class is a prerequisite to the first work term and is a mandatory component of the Science-Cooperative Education program; all Science Co-operative Education students are required to register for and attend in the fall term of the year they join Science Co-op. A grade of Pass is required before students undertake the first work term experience. SCIE 2800.00 is a required non-credit class which is offered in the fall term only. Co-operative Education seminars are required by the Canadian Association for Co-operative Education. Students are required to have a Dalhousie University e-mail address with their name in it. Students must be able to check their e-mail every weekday. See [www.sciencecoop.dal.ca](http://www.sciencecoop.dal.ca) for further information

INSTRUCTOR(S): L. Galway, T. Myra

FORMAT: Seminars, 3 hours each

### SCIE 3600.03: Exploring Geographic Information Systems.

This class provides a general overview of Geographic Information Systems (GIS), examining what GIS is, what it can do, and how it works. The class is aimed at students studying in all disciplines and will involve creating, understanding, manipulating and displaying geographic data. Topics will include data models, analysis of vector and raster data, creation of spatial databases, the Global Positioning System and other aspects of spatial data. Lectures (3 per week) will explore basic aspects of GIS in detail and introduce material to be covered in the labs. Labs are held once per week and will provide practical experience in data manipulation and problem solving.

INSTRUCTOR(S): C.C. Walls

PREREQUISITE: Two years of university study

EXCLUSION: EARTH 3500.03, ENVS 3500.03, GEOG 3500.03, EARTH 5600.03

### SCIE 4001.03: History of Marine Sciences.

Oceanography did not take definable form until late in the 19th century. Its roots lie not in the Challenger Expedition of the 1870s, the popular stereotype, but partly in ancient cosmologies and geography. In this class, the history of marine sciences, including oceanography, is traced from the ancients to the 20th century. The cosmologies of the ancient world, voyages of discovery from the 15th through the 18th centuries, the scientific revolution of the 17th century, the development of biology, physics, chemistry and geology in the late 18th and 19th centuries, all contributed to a gradual enlargement and transformation of human interest in the oceans.

INSTRUCTOR(S): E.L. Mills

FORMAT: Lecture 3 hours

PREREQUISITE: Instructor's consent

CROSS-LISTING: BIOL 4664.03, OCEA 4331.03/5331.03, HIST 3073.03, HSTC 3331.03, MARI 4664.03

Dowd M., MBA, PhD (Dalhousie) (Co-op Academic Advisor)

### Professor Emeritus

Field, C.A., MSc, PhD (Northwestern)

### Professors

Hamilton, D. C., MA, PhD (Queens)

Smith, B., MSc (Calgary), PhD (Berkeley)

Susko, E., PhD (Waterloo)

Thompson, K., MSc (Manchester), PhD (Liverpool) - (jointly with Oceanography)

### Associate Professors

Beiko, R., PhD (Ottawa) - (cross appointment with Computer Science)

Bielewski, J., MA, PhD (Texas A & M) - (jointly with Biology)

Dowd M., MBA, PhD (Dalhousie)

Gu, H., MSc (Peking), PhD (Hong Kong)

Herbinger, C., MSc (Paris), PhD (Dalhousie) - (jointly with Biology)

Mills-Flemming, J., MSc (TUNS), PhD (Dalhousie)

Zhao, Y., MSc (Western Kentucky), PhD (British Columbia) - (cross appointment with Management)

### Assistant Professors

Kenney, T., BA (Hons), MMath, PhD (Cambridge) (cross appointment with Mathematics)

Sarhan, A., PhD (Ghansk)

### Adjunct Professors

Cole, D. (U of T)

Gupta, R. P. (Dalhousie)

Millar, M. (MSVU)

Sneddon, G. (MSVU)

Yung, W. (StatCan)

### Postdoctoral Fellow

Wang, H., PhD (Ottawa)

Xu, Ximing, PhD (Toronto)

### Statistical Consultant

Jones, C., MSc (Dalhousie)

Please refer to the entry for the Department of Mathematics & Statistics in this calendar for a full listing of the members of the Department and information on other programs offered by the Department.

## I. Degree Programs

Statistics is the discipline which is concerned with the collection, organization, display and interpretation of data. Statisticians are in high demand in government, industry and in research institutions.

There are several honours programs, and a 20 Credit Major program in Statistics available to students. In addition, there is a Co-op program. Any student interested in such a class of study should consult the Undergraduate Advisor for Statistics, Department of Mathematics & Statistics.

In addition to the departmental requirements listed below, students must satisfy the requirements outlined in the Degree Requirements section, page 131 of this calendar.

## A. Honours in Statistics

The Honours program in Statistics will provide students with a comprehensive knowledge of both theoretical and applied statistics and will enable students to move easily into challenging employment or graduate work in statistics.

### Departmental Requirements

#### 1000 level

- MATH 1000.03 or MATH 1215.03/1010.03
- STAT 1060.03\*
- CSCI 1100.03/1101.03\*\*

#### 2000 level

- MATH 2001.03
- MATH 2002.03
- MATH 2030.03/2040.03 or 2135.03
- STAT 2060.03
- STAT 2080.03\*\*\*
- Two to five other half credits in Statistics at or above the 2000 level but not including classes listed below.

#### 3000 level

- STAT 3340.03
- STAT 3350.03
- STAT 3360.03
- STAT 3380.03
- STAT 3460.03
- Two 3000 level Mathematics classes chosen in consultation with the statistics honors advisor.

#### 4000 level

- STAT 4066.03
- One of STAT 4350.03 4390.03 4620.03
- STAT 4950.03

## B. Combined Honours

Students interested in taking honours in Statistics combined with another subject should consult the Faculty Advisor through whom a suitable class of study can be arranged.

## C. BSc or BA (20 credit) Major in Statistics

### Departmental Requirements

#### 1000 level

- MATH 1000.03/1010.03
- STAT 1060.03\*
- CSCI 1100.03/1101.03\*\*

#### 2000 level

- MATH 2001.03
- MATH 2002.03
- MATH 2030.03/2040.03 or 2135.03
- STAT 2060.03
- STAT 2080.03

#### 3000 level

- STAT 3340.03
- STAT 3360.03
- STAT 3380.03 or 3350.03
- STAT 3460.06
- At least two more credits in Statistics at or above the 3000 level

\*The requirement to take STAT 1060.03 may be waived for students entering the program in their second year.

\*\*Math 3210 may be taken in place of CSCI 1101

\*\*\*Some students may take STAT 2080.03 in the first year of their degree program.

It is recommended that students take CSCI 3111.03/MATH 3170.03 in the third year of their degree program.

Students interested in double major with statistics as the second subject should consult the Faculty Advisor through whom a suitable class of study can be arranged.

## D. BSc (15 credit) Minor in Statistics

Please see requirements below, section H. Minor in Statistics.

## E. Co-op Education in Science

Co-operative Education in Science (Science Co-op) is a program where academic study is combined with paid career related work experience. Students alternate three to four work terms throughout their academic study terms and graduate with a Bachelor of Science Co-op. Science Co-op enables students to apply their knowledge directly while providing them with work experience that assists in making educated career choices. Students apply to join Science Co-op before their second year of study. If accepted into the Science Co-op program, students are required to register for and attend the Science Co-op Seminar Series (SCIE 2800.00) in the fall term of the year they join.

The scheduling of Science Co-op work terms must be taken into account in planning class selection. Consult with the Statistics Co-op Academic Advisor for your work term sequence.

See the "Co-operative Education in Science" section of this calendar, or <http://www.sciencecoop.dal.ca>, for information on Science Co-op such as Science Co-op requirements, eligibility, how to apply, deadlines and other related information.

For further information, please see <http://www.sciencecoop.dal.ca>

Co-op Academic Advisor in Statistics:

Dr. Dowd (494-1048) [mdowd@mathstat.dal.ca](mailto:mdowd@mathstat.dal.ca)

## F. Honours Co-op in Statistics

### Departmental Requirements

Same as for the regular Honours in Statistics as above with the addition of the following:

- Three Co-op Work Terms: STAT 8891.00, 8892.00, 8893.00
- Co-op Seminar: SCIE 2800.00

## G. Major Co-op in Statistics

### Departmental Requirements

Same as for the regular Major in Statistics with the addition of the following:

- Three Co-op Work Terms: STAT 8891.00, 8892.00, 8893.00
- Co-op Seminar: SCIE 2800.00

More details on the Co-op program appear under the Co-operative Education in Science entry in this calendar.

## H. Minor in Statistics

- three credits in statistics at the 2000 level or above, of which one credit must be at the 3000 level or above.
- Students whose major or honours area of concentration is other than Mathematics may count MATH 2001 and MATH 2003 among the three credits.

## I. Other Programs

### Minors

Minor programs allow students to develop subject specialties, especially ones taught outside their main faculty, that complement their major or honours subjects. Minors are normally added to a four-year major or concentrated honours program. If a minor is added to a double major or a combined honours program, students may find that they need to take more than 20 credits to complete all of their degree requirements. Combined with a four-year degree program in Statistics, minor programs are available in the following subject areas.

### Minor Subject Areas

- Business (BA or BSc)
- Canadian Studies (BSc only)
- Community Design (BA or BSc)
- Computer Science (BSc only)
- Environmental Studies (BA or BSc)
- Film Studies (BA or BSc)
- Food Science (BSc only)
- Health Studies (BA only)
- Journalism (BA or BSc)
- Law and Society (BA or BSc)
- Management (BA or BSc)

Any student wishing to pursue a minor in these subjects should consult with the College of Arts and Science Degree Requirements section of the Undergraduate Calendar, starting on page 131, as well as the particular subject area of the calendar.

### BSc/Engineering or BA/Engineering Concurrent Programs

Students will normally complete the requirements for a 15 Credit BSc or 15 Credit BA, and the first two years of engineering studies leading to the Diploma in Engineering. The concurrent program can be completed in three years. Details are provided in the College of Arts and Science Degree Requirements on page 131 of the calendar.

### Diplomas, Certificates, and Language Proficiency Certificates

In combination with a BA or BSc there are certificates or diplomas that can be obtained to emphasize areas of proficiency. For a complete list and details refer to the College of Arts and Science Degree Requirements on page 131 of the calendar.

## II. Class Descriptions

Certain classes have been approved for use in fulfilling the educational requirements of the Associate Statistician (A.Stat.) designation of the Statistical Society of Canada (SSC). See the Department or the SSC website (<http://ssc.ca/en/accreditation/apply/suggested-classes-use-towards-astat-designation>) for details.

Credit may not be obtained twice for the same class even if the numbers have been changed.

### SCIE 2800.00: Science Co-op Seminar Series.

This class is designed to introduce Science Co-op students to aspects of career development and preparation for their work terms. This class is a prerequisite to the first work term and is a mandatory component of the Science-Cooperative Education program; all Science Co-operative Education students are required to register for and attend in the fall term of the year they join Science Co-op. A grade of Pass is required before students undertake the first work term experience. SCIE 2800.00 is a required non-credit class which is offered in the fall term only. Co-operative Education seminars are required by the Canadian Association for Co-operative Education. Students are required to have a Dalhousie University e-mail address with their name in it. Students must be able to check their e-mail every weekday. See [www.sciencecoop.dal.ca](http://www.sciencecoop.dal.ca) for further information.

INSTRUCTOR(S): L. Galway, T. Myra

FORMAT: Seminars, 3 hours each

### STAT 1060.03: Introductory Statistics for Science and Health Sciences.

This class gives an introduction to the basic concepts of statistics through extensive use of examples. The topics include experimental design, descriptive statistics, simple linear regression and the basics of statistical inference. Students will learn to use the statistical package MINITAB.

NOTE: Students who have already taken university level Calculus should consider taking STAT 2060.03 instead of STAT 1060.03.

FORMAT: Lecture 3 hours, tutorial 1 hour, MLC

PREREQUISITE: Academic or advanced Grade 12 Mathematics (or pre-calculus) or equivalent

CROSS-LISTING: MATH 1060.03

EXCLUSION: COMM 2501.03, MGMT 2501.03, DISP

### STAT 2060.03: Introduction to Probability and Statistics.

Rigorous introduction to probability and statistical theory. Topics covered include elementary probability, random variables, distributions, estimation and hypothesis testing. Estimation and testing are introduced using maximum likelihood and the generalized likelihood ratio. Natural sequels for this class are STAT 2080.03 and 3360.03

FORMAT: Lecture 3 hours, MLC

PREREQUISITE: MATH 1000.03 or MATH 1215.03 and either MATH 1010.03 or 2030.03, or DISP (except SCIE 1540X/Y.27)

CROSS-LISTING: MATH 2060.03, ECON 2260.03

EXCLUSION: ENGM 2032.03

### STAT 2080.03: Statistical Methods for Data Analysis and Inference.

The usual sequel to STAT 1060.03 or STAT 2060.03. This class introduces a number of techniques for data analysis and inference commonly used in the experimental sciences. Topics covered include model building in linear models, multiple regression, analysis of variance, factorial designs, analysis of covariance using the general techniques for linear models and two and three way tables along with logistic regression. A natural sequel for this class is STAT 3340.03.

FORMAT: Lecture 3 hours, MLC

PREREQUISITE: STAT 1060.03 or STAT 2060.03 or DISP

CROSS-LISTING: MATH 2080.03, ECON 2280.03

EXCLUSION: COMM 2502.03, MGMT 2502.03

### STAT 2300.03: Introduction to Mathematical Modelling I.

See class description for MATH 2300.03 in the Mathematics section of this calendar.

### STAT 2600.03: Theory of Interest.

See class description for MATH 2600.03 in the Mathematics section of this calendar.

PREREQUISITE: MATH 1010.03 or Equivalent

### STAT 3340.03: Regression and Analysis of Variance.

A thorough treatment of the theory and practice of regression analysis. Topics include: fitting general linear models using matrices, optimality of least squares estimators (Gauss-Markov theorem), inferences, simple and partial correlation, analysis of residuals, case-deletion diagnostics, polynomial regression, transformations, use of indicator variables for analysis of variance and covariance problems, model selection, and an introduction to nonlinear least squares. This class makes extensive use of computer packages.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 2080.03, MATH 2030.03 and either MATH 1010.03 or STAT 2060.03 or DISP (except SCIE 1540X/Y.27)

CROSS-LISTING: MATH 3340.03

### STAT 3345.03: Environmental Risk Assessment.

Statistical methods for assessing risk are discussed, including dose-response models, survival analysis, relative risk analysis, bioassay, estimating methods for zero risk trend analysis and association risks. Case studies are used to illustrate the methods.

PREREQUISITE: MATH 1000.03 or MATH 1215.03, STAT 2080.03 or equivalent

### STAT 3350.03: Design of Experiments.

The aim of the class is to develop the fundamental statistical concepts required for designing efficient experiments to answer real questions. The first main subject is unit variation and control. The basic concepts of replication, blocking and randomization are each examined. The second main subject is treatment questions and structure. The ideas of factorial designs, split-plot and incomplete plot designs are presented. We conclude with a look at response surface methodology.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 2080.03, MATH 2030.03 and either MATH 1010.03 or STAT 2060.03 or DISP (except SCIE 1540X/Y.27)

CROSS-LISTING: MATH 3350.03

### STAT 3360.03: Probability.

The concepts and application of probability. Topics include the classical discrete and continuous distributions, including the binomial, hypergeometric, multinomial, Poisson, uniform, exponential and normal; definitions and properties of random variables; independence; sums of independent random variables,

including the law of large numbers and central limit theorem; conditional probability; and the bivariate normal distribution. Examples will be taken from the natural and physical sciences.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 2060.03 and MATH 2001.03

CROSS-LISTING: MATH 3360.03

### **STAT 3380.03: Sample Survey Methods.**

The development of design and analysis techniques for sample surveys. Topics include simple, stratified and systematic random sampling, ratio and regression estimation, sub-sampling with units of equal and unequal size, double-multistage and multiphase sampling, non-sample errors and non-respondents.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 2060.03

CROSS-LISTING: MATH 3380.03

### **STAT 3460.03: Intermediate Statistical Theory.**

This class provides an intermediate level coverage of statistical theory to provide a framework for valid inferences from sample data. The methods developed are based on the likelihood function and are discussed from the frequentist, likelihood, and Bayesian approaches. The problems of point estimation, interval estimation and hypothesis testing and the related topics of sampling distributions, sufficiency, and Fisher Information are discussed.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 3360.03

CROSS-LISTING: MATH 3460.03

### **STAT 4066.03: Advanced Statistical Theory I.**

This class, together with STAT 5067.03 provides a solid basis in the theory of statistical inference. After a review of some probability and distribution theory, the Bayesian and classical theories of estimation and testing are introduced.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 3460.03 or instructor's consent

CROSS-LISTING: MATH 4066.03/5066.03, STAT 5066.03

### **STAT 4070.03: Multivariate Distributions.**

This class deals with the distribution theory of the observations on more than one variable. Topics covered include: The multivariate normal distribution, the Wishart distribution, Hotelling's  $T^2$  distributions associated with regression, canonical correlations and discriminant analysis.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 3460.03

### **STAT 4090.03: Probability.**

The theory of probability in Euclidean space. Topics include measure and integration, probability measures, the definitions and properties of random variables and distribution functions, convergence concepts, Borel-Cantelli lemmas, laws of large numbers, characteristic functions and central limit theorems, conditional probability and expectation.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 3360.03 and a third year analysis class, instructor's consent

CROSS-LISTING: MATH 4090.03/5090.03, STAT 5090.03

### **STAT 4100.03: Survival Analysis.**

This class is an introduction to survival analysis methods and will cover both the statistical theory behind the methods, and the application of various techniques. Topics to be discussed include survivorship and hazard functions and their relationship to lifetime distributions and densities; modes of censoring; the Kaplan-Meier estimate of the survivor function; parametric survival time distributions; proportional hazard models and their semi-parametric estimation; accelerated life models, log rank tests, including the Mantel-Haenszel test; and goodness of fit measures.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 3340.03 and STAT 3460.03, or equivalent

CROSS-LISTING: STAT 5100.03

### **STAT 4210.03: Time Series Analysis in Oceanography and Meteorology.**

CROSS-LISTING: STAT 5210.03

### **STAT 4300.03: Topics in Statistics and Probability.**

CROSS-LISTING: STAT 5300.03

### **STAT 4350.03: Applied Multivariate Analysis.**

The class deals with the stochastic behaviour of several variables in systems where their interdependence is the object of analysis. Greater emphasis is placed on practical application than on mathematical refinement. Topics include classification, cluster analysis, categorized data, analysis of interdependence, structural simplification by transformation or modelling and hypothesis construction and testing.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 3340.03 and MATH 2135.03 or 2040.03

CROSS-LISTING: STAT 5350.03

### **STAT 4360.03: Robust Statistics.**

Robust statistics are those which provide protection against violation of assumptions underlying the statistical procedure. We will develop basic concepts including sensitivity, influence and breakdown of estimates and tests. Classical procedures will be evaluated in terms of robustness and alternate techniques developed based on weighted least squares and/or median based generalizations. We will also consider robust techniques in time series.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 3460.03 and 3340.03

CROSS-LISTING: STAT 5360.03

### **STAT 4370.03: Stochastic Processes.**

The theory and application of stochastic processes. Topics to be discussed include the Poisson process, renewal theory, discrete and continuous time Markov processes, and Brownian motion. Applications will be taken from the biological and physical sciences, and queueing theory.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 3360.03 or instructor's consent

CROSS-LISTING: STAT 5370.03

### **STAT 4390.03: Time Series Analysis I.**

Time series analysis in both the time and frequency domain is introduced. The class is applied and students are required to develop their own computer programs in the analysis of time series drawn from real problems. Topics to be discussed include the nature of time series, stationarity, auto and cross covariance functions, the Box-Jenkins approach to model identification and fitting, power and cross spectra and the analysis of linear time-invariant relationships between pairs of series.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 3340.03, 3460.03, or instructor's consent

CROSS-LISTING: OCEA 4210.03/5210.03, STAT 5390.03

### **STAT 4570.03: Statistical Genetics.**

Statistical aspects of several ideas in genetics are discussed. Topics of some or all the following: gene frequency estimation, Hardy-Weinberg equilibrium, linkage analysis, association studies, quantitative traits, microarrays.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 3460 or permission of instructor

CROSS-LISTING: STAT 5570

### **STAT 4620.03: Data Analysis.**

A variety of statistical models which are useful for the analysis of real data are discussed. Topics may include: generalized linear models, such as logistic regression and Poisson regression, models for multidimensional contingency tables, ordered categories and survival data.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 3340.03, 3460.03, or instructor's consent

CROSS-LISTING: STAT 5620.03

### **STAT 4701.03: Actuarial Models I.**

This class develops the theoretical basis of a number of probabilistic models useful for the study of life contingencies, including survival models, Markov chains, Poisson processes, with application to life insurances and annuities.

FORMAT: Lecture - 3 hours

PREREQUISITE: STAT 3360.03

### **STAT 4703.03: Actuarial Models II.**

This class focuses on the development of statistical methods for the estimation and validation of actuarial models. Topics to be discussed include: methods of estimation, properties of estimators, goodness of fit, credibility theory, survival estimators, measures of risk, estimation of severity and ruin models.

FORMAT: Lecture 3 hours

PREREQUISITE: STAT 3460 or STAT 4701.03

**STAT 4950.03: Honours Research Project.**

This class is required for students in the honours program. It will consist of a research project carried out under the supervision of a faculty member. The results of the research will be submitted to the statistics honours advisor as a written report. Students wishing to enroll in this class must have a suitable background in statistics, and must meet with, and obtain the approval of, the statistics honours co-ordinator before undertaking their project.

**STAT 8892.00: Co-op Work-Term II.****STAT 8893.00: Co-op Work-Term III.**

## Centres and Institutes

A number of centres and institutes for study and research in specific fields are based at the University. These are:

### Atlantic Health Promotion Research Centre

Managing Director: Sandra Crowell, MPA  
Scientific Director: Lois Jackson, PhD  
Other: Project Coordinators, Research Associates, Research Assistants, and students  
Tel: (902) 494-2240  
Fax: (902) 494-3594  
Website: <http://www.ahprc.dal.ca>

The Atlantic Health Promotion Research Centre (AHPRC) is a leading Canadian health promotion research centre based at Dalhousie University. AHPRC was established in 1993 to conduct interdisciplinary, collaborative population health and prevention research that informs policies and programs to improve the health of Canadians.

The centre is conducting research on health services and health systems, healthy eating and physical activity, knowledge translation, prevention of chronic illness and disability, oral health of seniors, youth obesity, aboriginal health, and harm reduction.

The AHPRC is currently supported by the Faculties of Health Professions, Dentistry and the Office of the Vice President Academic and Provost at Dalhousie University. Support for specific research projects comes from agencies such as Canadian Institutes for Health Research, Social Sciences and Humanities Research Council of Canada, Nova Scotia Health Research Foundation, and Heart and Stroke Foundation of Canada.

### Atlantic Institute of Criminology

Director: D.H. Clairmont, BA, MA, PhD

The Atlantic Institute of Criminology (AIC) is a research institute that is heavily policy-oriented in the field of crime and the criminal justice system. Its mandate is to foster the exchange of information among researchers and policy makers in those areas. Consultative services are provided to fellow scholars and researchers, including graduate students and visiting professors, with respect to the planning and execution of research projects and related undertakings. The AIC is an entity that itself conducts extensive research in criminology, especially with respect to policing, the administration of justice, youth justice issues, race, ethnic and equity issues in justice. It has produced a significant body of policy-oriented research on Aboriginal and African-Canadian justice issues. The AIC Dalhousie website (Dalhousie - SOSA-AIC), which is regularly updated, provides a clear indication of the research products of recent years even though the website is largely restricted to research output that does not include articles in professional journals or edited books available elsewhere.

### Atlantic Research Centre (ARC)

Director: Neale Ridgway  
Phone: (902) 494-7133  
Website: <http://arc.medicine.dal.ca/>

Established in 1967, the ARC conducts basic biomedical research in the fields of lipid metabolism and cell signalling, areas of fundamental importance to a variety of disorders including cancer, neurological, heart and infectious diseases. It also provides education and expertise in these fields to undergraduate and graduate students, other researchers, and the general public. The ARC houses state-of-the-art facilities for biochemical and molecular biological research, including a regional proteomics service facility (DalGEN, <http://genomics.medicine.dal.ca/pms>), and is affiliated with the IWK Cheminformatics & Drug Discovery

Laboratory. The Centre's staff hold appointments in the Departments of Pediatrics and Biochemistry & Molecular Biology in the Faculty of Medicine. Research at the ARC is supported by agencies such as the CIHR, NSERC, CFI, Heart and Stroke Foundation, National Cancer Institute, Atlantic Innovation Fund, and the IWK Health Centre.

### Brain Repair Centre

Chair: Dr. Ivar Mendez, (Professor and Head, Division of Neurosurgery, Department of Surgery and Cross-appointment in Department of Medical Neuroscience, Faculty of Medicine)  
Website: <http://www.brainrepair.ca/>

The Brain Repair Centre (BRC) is a collaboration of Dalhousie University, the Capital District Health Authority and the IWK Health Centre. The BRC is a multi-disciplinary unit focusing on research that can lead to the diagnosis, treatment, and repair of the brain to overcome the effects of neurological and psychiatric disorders such as Parkinson's disease, Huntington's disease, Amyotrophic Lateral Sclerosis (ALS), Epilepsy, Muscular Sclerosis (MS), stroke and spinal cord injury. The BRC grew out of the clinical Neural Transplantation Program, collaboration between basic neuroscientists and clinicians interested in treating Parkinson's disease. The success of the Neural Transplantation Program led clinical and basic neuroscientists to decide to form the Brain Repair Centre. The BRC was formed in 1999 and has focused on stem cell transplantation, Parkinson's disease, spinal cord injury, psychotic disorders, stroke and neuroimaging as areas of innovation at Dalhousie University, Capital Health and the IWK Health Centre.

Examples of BRC achievements include:

- Attracted capital funding from private donors, institutions and the public sector to support construction and fit-up of the new Life Sciences Research Institute scheduled to open in early 2011. When the LSRI is completed, the Brain Repair Centre will become the anchor tenant of this new research and commercialization building with state-of-the-art research, equipment and facilities.
- Establishment of collaboration agreements with research teams at McLean Hospital/Harvard University; Jilin University, China; Cardiff University, Wales; and Neurodyn, Inc.
- Establishment of a \$12 million magnetic resonance imaging facility with the national Research council's Institute for Biodiagnostics (NRC-IBD).
- In 2006, the BRC was awarded \$5.5 million for infrastructure from the Canadian Foundation for Innovation, the largest such award to date in Atlantic Canada. Also in 2006, BRC received a \$3 million Atlantic Innovation Fund award for research, a follow-on to an earlier \$3 million research award.
- Dr. David Clarke, a member of the Brain Repair Centre used a virtual model of a patient's brain to remove a simulated brain tumour before removing the actual tumour the following morning. Developed by a partnership of the National Research Council and a team of about 50 people in 10 Centres across Canada, this was the first such surgery performed in the world.
- Medtronic Canada, Capital District Health Authority, QEII Foundation, and the Brain Repair Centre established a Canadian Centre of Excellence and Training at the Halifax Infirmary. This new \$3.5 million centre provides important new clinical facilities for training and development in imaging, spinal cord and neuromodulation.
- In the neurotransplantation field, the BRC is unique in Canada and one of only four centres worldwide involved in clinical application of neural transplantation, with the "Halifax Protocol" accepted as the world gold standard.
- The BRC is an innovative collaboration that integrates its research expertise with pioneers in the fields of imaging, neurology, stem cell neurobiology, vision, molecular neurobiology, pharmacology, psychiatry, clinical trials and cognitive neuroscience.
- The BRC brings together the expanding fields of neuroimaging and stem cell technologies with application to the treatment of neurological and psychiatric disorders.
- The BRC is the Atlantic Canada presence in the Stem Cell Network, a National Centre of Excellence in stem cell research.

The BRC places emphasis on moving basic science research from the bench to the clinical bedside and from the bedside back to the bench. A key objective of the BRC is to produce innovative technologies that will be commercialized.

## Canadian Institute of Fisheries Technology (CIFT)

Director: A.T. Paulson, PhD  
 Telephone: (902) 494-3280  
 Fax: (902) 420-0219  
 Website: <http://cift.engineering.dal.ca>

CIFT was established in 1979 at the former Nova Scotia Technical College (later TUNS). The federal Department of Fisheries and Oceans provided much of its early specialized laboratory and seafood pilot scale processing equipment, and Industry Canada provided start-up funding and designated CIFT a centre of excellence. As a government-approved laboratory for advanced technology, it also provides R&D services on a cost-recovery basis to industry and to various governmental agencies. The Institute promotes technology transfer and the development of advanced technologies aimed at more effective commercial utilization of both marine and terrestrial resources in Canada and throughout the world.

In addition, CIFT offers unique opportunities for post-graduate training and research through the Food Science program. Major areas of emphasis are: food biochemistry and microbiology; fats, oils, nutraceuticals and other bioactives; physical properties of foods; fish/food process engineering; food safety and preservation; food rheology, food fermentation and beverage science.

### Facilities

CIFT is located in the MacDonald building of Sexton Campus at 1360 Barrington Street in downtown Halifax. The Institute's facilities include:

- fats and oils laboratory
- food chemistry laboratory
- food development laboratory
- sensory evaluation laboratory
- food process engineering pilot plant
- low temperature storage facility
- food physical properties laboratory
- food microbiology laboratory

These areas contain specialized instrumentation and food processing equipment to enable experimental processing, laboratory analysis, and product storage evaluation. In addition to a computer-controlled cold-storage facility, the pilot plant is equipped for experimental processing including freezing, chilling, thermal processing, drying, centrifugal separation, and meat-bone separation.

The pilot plant is well equipped for thermal processing with an automated retort capable of steam, steam-air, or water immersion processing research. The specially designed cold-storage facility is computer controlled and particularly useful for the study of changes in foods as a result of frozen storage history. The pilot plant is also equipped with a custom-built computer-controlled heat pump dryer that is used in food dehydration experiments.

Specialized laboratory equipment includes: automated high performance and fast protein liquid chromatography systems, gas chromatography/mass spectroscopy system, preparative ultracentrifuge, multi-purpose refrigerated centrifuge, microtube centrifuge, analytical and preparative electrophoretic/isoelectric focusing equipment, pulsed field electrophoresis system, thermocycler, DNA gel electrophoresis, Hoefer Daltsix for 2D electrophoresis, Image Master 2D elite software, capillary electrophoresis system, ultra-low temperature freezer, universal texture testing machine, various colorimeters, U.V. and visible spectrophotometer, spectrofluorometer, electrokinetic analyzer, workstation for mathematical modelling and computer simulation, Linkham shearing stage/microscope, Nikon microscope (various attachments), controlled stress rheometer with a high temperature/pressure attachment, controlled rate rheometer, Viscomat, and a rolling ball viscometer.

### Educational Opportunities

Graduate (MSc and PhD) programs are available through the Food Science and Technology program. Also post-doctoral research opportunities are offered. Graduate level class work and research opportunities relate to food science, seafood processing technology, marine oils, engineering design, packaging technology, fish post-mortem biochemistry, food microbiology, food rheology and food process science. Students with degrees in food science, engineering, chemistry/biochemistry, microbiology or biology are invited to apply.

## Centre for African Studies

Phone: (902) 494-3814/1377  
 Fax: (902) 494-2105  
 Director: Theresa Ulicki, PhD

This Centre, established in 1975, advances instruction, publication, research and development education programs in African Studies. Associated faculty offer classes through the Departments of History, International Development Studies, Political Science, French, Sociology and Social Anthropology and Philosophy. The Centre organizes academic and informal seminars and public policy conferences on Africa and encourages interdisciplinary interaction at all levels on African subjects and issues. It co-operates with the International Development Studies department and with the International Research and Development office.

## Centre for Comparative Genomics and Evolutionary Bioinformatics

Director: Andrew J. Roger, PhD  
 Coordinator: Wanda Danilchuk  
 Phone: (902) 494-2620  
 Fax: (902) 494-1355  
 Website: <http://www.cgeb.dal.ca>

The Centre for Comparative Genomics and Evolutionary Bioinformatics (CGBE) at Dalhousie University encompasses an interdisciplinary group of researchers in the Faculties of Medicine, Science and Computer Science. Although microbial genome evolution and diversity is at the heart of many of the CGBE researchers' activities, our work spans computational biology, computer science, statistical modeling and comparative genomics, with a strong focus on method and theory. The application of DNA sequencing technologies to characterize the genomes of a wide diversity of microbes has generated vast quantities of genome sequence data. Now the intellectual challenge is to develop from this enormous resource more comprehensive and theoretically robust phylogenetic, genetic and ecological models to further our understanding of the many roles of microbes in the biological world.

CGBE researchers are united by the common goal of using this vast resource of genomic information to elucidate evolutionary patterns and processes: the pathways by which microbial organisms have diversified over the last 3.5 billion years of Earth's history and through which they continue to shape the global environment. Only through the integration of experimental genomic approaches and sophisticated bioinformatic modeling will we be able to achieve this goal.

CGBE researchers and trainees are supported by grants from the Canadian Institutes for Health Research (CIHR), Natural Sciences and Engineering Research Council (NSERC), the Nova Scotia Health Research Foundation (NSHRF). The Centre itself is supported by funding from the Tula Foundation (<http://www.tula.ca>), the Faculties of Medicine, Science and Computer Science. CGBE is also supported by a large grant from the Tula Foundation (<http://www.tula.ca>) that provides funds for training top-notch postdoctoral and graduate trainees in the CGBE research specialties. We also have a regular seminar series that brings world renowned scientists to speak at Dalhousie University and interact with faculty members and trainees.

## Centre for Environmental and Marine Geology

Director: Professor D. B. Scott

This Centre was originally founded as the Centre for Marine Geology in 1983 to promote interdisciplinary studies of various types of problems in marine Geology, capitalizing on our unique position in Canada with links to related departments such as Oceanography, Physics, Biology, the Bedford Institute of Oceanography and our hosting of the Canadian office of the Ocean Drilling Program. Since 1983 the role of the Centre has changed, reflected in the new name, which better describes the work being done now where marine geology is combined with environmental problems. We have three new faculty that expand our expertise into new chronological techniques and permafrost as well as strengthening our capacity in the petroleum-related environmental geology. Some of the objectives of the Centre are to: 1) continue to expand our participation in a revitalized east coast offshore energy related problems; 2) continue our climate-change work with a variety of approaches both offshore and on land; 3) expand into Arctic regions both with major oceanographic and shore-based programs; and 4) expand our capacity to help solve some of the many environmental geology problems associated with urbanization.

## Centre for European Studies

Co-Directors: Julia Wright and Jerry White  
(Canada Research Chair in European Studies)  
Email: jerry.white@dal.ca

The Centre for European Studies was established in 2007 to promote research on all aspects of European society and its relations with the rest of the world. The Centre facilitates the work of Europeanist scholars at Dalhousie, including the participating Canada Research Chairs in European Studies, enables research collaboration with scholars from Canada and around the world on projects related to Europe and the European Union.

## Centre for Foreign Policy Studies

Director: David R. Black, PhD  
Lester B. Pearson Professor, International Development Studies

Established in 1971 the Centre is concerned with teaching, research, publication, policy advice and other professional activities in the various aspects of foreign policy, security studies, development studies, and international politics.

The Centre's work is concentrated in the areas of Canadian and comparative maritime security and oceans policy, Canadian and American foreign and security policies, and global security and international development. Its geographical specializations include Canada, North America, Europe, and the South (especially Africa, Asia, and the Caribbean). The Centre encourages activities in these areas by Faculty, Research, and Doctoral Fellows, and advances communication among local and international communities in these fields through seminars, workshops conferences and colloquia, often in collaboration with local, national, and/or international organizations. It publishes occasional papers and monographs on Maritime Security, Canadian Defence and Security, and Global Security issues.

The Centre is an integral part of the Department of Political Science. Centre faculty offer classes through the Department in foreign and defence policy, international relations and development, and maritime affairs at both undergraduate (majors & honours) and graduate (MA and PhD) levels. They also supervise masters and doctoral theses in these fields.

For further information, consult the Centre's website:  
<http://centreforforeignpolicystudies.dal.ca>

## Centre for Innovation in Infrastructure

Director: John Newhook, PhD, P.Eng.  
Location: Room B233, Sexton Campus  
1360 Barrington Street  
PO Box 1000  
Halifax, NS B3J 2X4  
Phone: (902) 494-2847  
Email: forgeron@dal.ca

The Centre for Innovation in Infrastructure is an industry-oriented research centre with the Faculty of Engineering and with strong affiliations with the Department of Civil and Resource Engineering. Established in 1983 as the Nova Scotia CAD/CAM Centre, the Centre originally focussed on assisting Atlantic Canadian industry with the integration of computer added manufacturing and computer aided design technology in their operations. Since the 1990's the Centre has continued to evolve to meet the needs of industry in other areas and to take a more active role in research and development in civil infrastructure.

Today the Centre act as a focal point for research, innovation and technology transfer in Civil Infrastructure related areas. The major funding partnerships are with the Atlantic Canadian departments of transportation, industries related to bridge and structural engineering and with companies developing new materials and products for infrastructure.

Our combined areas of expertise and research interests include:

- Structural Analysis and Design
- Structural Health monitoring
- Bridge engineering and innovations
- Soil-steel structures
- Fibre reinforced polymers
- Fibre reinforced concrete
- NDT of bridge decks and pavements
- Sustainable asphalt technology

The Centre has acquired and maintains significant testing equipment related to these research areas and contributes to the maintenance and operation of the research facilities within the Department of Civil and Resource Engineering.

## Centre for International Trade and Transportation

Location: 6100 University Avenue  
Suite 2060  
PO Box 15000  
Halifax, NS B3H 4R2  
Director: Daniel Lynch, PhD  
Phone: (902) 494-6248  
Email: dan.lynch@dal.ca  
Student Exchange Coordinator: Tim Richard  
Phone: (902) 494-2224  
Email: tim.richard@dal.ca

Fax: (902) 494-1483  
Website: <http://citt.management.dal.ca>

The Centre was established in 1975 with a mission to foster international business teaching and research and enhance Canada's global competitiveness through innovative programs and outreach services. CITT supports a wide range of learning experiences including academic exchanges, the Student Research Symposium, the International Case Competition. The Centre recently partnered with Michigan State University's Canadian Studies Program to work towards increasing global trade between the US and Canada (the world's largest trading partners).

## Centre for Marine Vessel Development and Research (CMVDR).

Contact: Josh Leon, Dean of Engineering  
The mandate for this Centre is under review.

## Centre for Water Resources Studies

Location: Office D-514  
1360 Barrington Street  
Telephone: (902) 494-607  
Email: cwrs@dal.ca

The Centre for Water Resources Studies was established in December, 1981, by a resolution of the Board of Governors (TUNS). The objectives of the Centre are to carry out applied research which contributes to the effective and sustainable protection of water resources in Atlantic Canada, nationally and internationally, and to facilitate the transfer of new knowledge to potential users. Research programs directed by the Centre address the design of cost-effective on-site wastewater systems, soil erosion processes, drinking water treatment, the use of roofwater cisterns for domestic water supply, eutrophication, watershed management and the computer modeling of hydrodynamic and hydrochemical processes. The Centre also has a number of research advisory panels, which involve professionals from industry, government and academia in applied research related to water use and water management.

### Facilities

The Centre for Water Resources Studies is located on the fifth floor of "D" Building on Sexton Campus. Laboratory and office space is available for specific graduate research topics, as well as ongoing research carried out by Centre personnel. Analytical equipment includes instrumentation for determining low levels of major ions and nutrients, as well as trace quantities of metal ions in water. The Centre has apparatus for laboratory investigation and pilot scale testing of innovative water treatment methods using Dissolved Air Floatation (DAF) and ozonation and has worked with local consultants and municipalities to develop new applications of the technologies. The Centre is a North American leader in the development of on-site sewage disposal and has had an active research program in this area since 1987. In conjunction with the Nova Scotia Agricultural College, the Centre has a field laboratory investigating sloping sand filters and septic disposal.

### Educational Opportunities

The Centre co-operates with academic units in the training of undergraduate and graduate students who have an interest in water resources. The Centre also participates in the program leading to a dual degree in water resources engineering and planning, in conjunction with the School of Planning into the Faculty of Architecture and Planning.

## Dalhousie Institute for Society and Culture (DISC)

Director: Associate Dean  
Research in the Faculty of Arts and Social Sciences  
Email: [discfass@dal.ca](mailto:discfass@dal.ca)  
Website: <http://arts.dal.ca/Research>

Established in 2008, the Dalhousie Institute on Society and Culture serves as the virtual home for the many divergent research activities and initiatives within the Faculty of Arts and Social Sciences. Its primary function is to support research within the Faculty through various fellowship programs, publicity and fund raising initiatives, publishing ventures, conferences and lecture series, and cross-disciplinary exchanges.

The Institute encompasses two broad and overlapping research clusters: *Societies in Local, National, and Global Contexts*, and *Cultural Representations and Presentations*. The former cluster aims to develop new knowledge about political, social, and economic transformations, about national and regional identities, and about global relations, whereas the latter seeks to investigate and preserve cultural traditions, literatures, and languages, to foster studies and theories of cultural identity, to stimulate artistic innovation, to examine the shaping influence of beliefs and religions, and to contribute to the cultural life and profile of the province. These two clusters, with a flexibility and breadth unequalled in Eastern Canada, are uniquely equipped to analyze social and cultural change.

## Eco-Efficiency Centre, Faculty of Management

Program Manager: Penny Slight  
Phone: (902) 461-6704  
Website: <http://www.dal.ca/eco-efficiency>

The Eco-Efficiency Centre (EEC) was established in 1998 as a partnership with Nova Scotia Power, Inc., and in 2005 was approved as a university centre in the Faculty of Management. It is currently linked to business, engineering, and resource and environmental studies programs. The EEC has achieved a national and international profile for its work in promoting research and action in relation to eco-efficiency and industrial ecology, especially in its application to industrial parks.

The objectives of the Centre are to:

1. develop and sustain eco-efficiency, industrial ecology, and corporate sustainability research programs at Dalhousie University;
2. provide education, research and employment opportunities for students;
3. develop and provide information and resources related to eco-efficiency, industrial ecology and corporate sustainability to business and government;
4. develop models of environmentally sustainable industrial development thereby improving environmental and financial performance of small and medium enterprises (SMEs) and larger corporate entities; and
5. foster sustainable business practices as models and develop local case studies for teaching purposes.

The research of the Centre provides small and medium-sized enterprises (SMEs) with the tools necessary to increase the overall sustainability of their operations by investigating and applying techniques such as pollution prevention, life cycle analysis and eco-industrial networking. At the same time the Centre researches the drivers and barriers to sustainability strategies providing data that influences the development of new government policies at all levels. The EEC provides opportunities for students to learn, faculty to collaborate in new action research initiatives and businesses to improve their environmental performance.

Areas of collaboration in research include:

**Environmental Studies** - Life cycle analysis, energy and material metabolism, industrial symbiosis, ecological footprint analysis.

**Business** - input/output analysis, supply chain management, reverse logistics, environmental accounting, eco-efficiency studies, supply chain management, education of personnel, and corporate sustainability.

**Engineering** - process optimization, energy and material balances, pollution prevention, industrial symbiosis, environmentally friendly building materials, product and process design.

**Planning** - green building design and construction, industrial park planning, zoning, land use standards, infrastructure design.

**Information Management** - geographic information systems, life cycle and industrial metabolism database management.

**Public Policy and Law** - economic and industrial development policies, regulations, economic instruments.

The continuing involvement of students and the increased focus on graduate research and research partnerships will assist in developing the research capacity and promote long term progress towards sustainability in Atlantic Canada and Canada generally. Co-op students from the Faculty of Management and Faculty of Engineering are hired regularly as are interns from the Master of Resource and Environmental Management and Master of Environmental Studies Programs.

Sustainability has been identified as a priority at all levels of government, particularly the federal government and agencies such as the Atlantic Canada Opportunities Agency and Industry Canada. The Centre has had working relationships with the Atlantic Canada Opportunities Agency, Natural Resources Canada's Office of Energy Efficiency, Environment Canada, the Nova Scotia Department of Environment, the Nova Scotia Department of Economic and Rural Development, and the Resource Recovery Fund Board Nova Scotia Inc.

## European Union Centre of Excellence

Director: Ruben Zouoth  
Phone: (902) 494-7558  
Fax: (902) 494-1909  
Email: [euce@dal.ca](mailto:euce@dal.ca)  
Website: <http://www.euce.dal.ca>

Established in 2006, the European Union Centre of Excellence (EUCE) seeks to promote greater awareness of the European Union (EU) in Canada. The centre coordinates academic and public outreach activities such as exchanges of faculty and students, conferences, workshops, symposia, and other projects involving the Faculties of Arts and Social Sciences Law, Management, and Science. The Centre supports research in areas such as Canada and EU Arctic policy, transatlantic trade negotiations, migration policies in Europe, EU Copyright legislation, the EU and the economic crisis, public health policy in EU and Canada.

## Global Health Office

Director: Shawna O'Hearn  
Location: C-241 5849 University Avenue  
PO Box 1500  
Halifax, NS B3H 4R2 Canada  
Phone: (902) 494-1965  
Fax: (902) 494-2799  
Email: [gho@dal.ca](mailto:gho@dal.ca)  
Website: <http://gho.medicine.dal.ca>

Working through an interprofessional lens, the Global Health Office is committed to training global health leaders who strengthen health systems for vulnerable populations in Canada and abroad. The office prepares students, residents and faculty doing clinical electives, training or research with our international partners as well as leads summer programs in Tanzania, Thailand and The Gambia.

- Events focusing on relevant and timely global health issues are organized through the office including journal clubs, speaker series, conferences.
- Opportunities to become involved in research and mentorship.
- In 2012, the innovative "Advocates in Global Health" program was started to encourage leadership within the student population in core global health competencies.
- Annual awards are presented to a student, resident and faculty member who demonstrate leadership in global health
- Partnerships with organizations strengthen the global reach including CSIH (Canadian Society for International Health), CCGHR (Canadian Coalition for Global Health Research), National Network on MNCH (Maternal, Newborn and Child Health), ACIC (Atlantic Council for International Cooperation), GHEC (Global Health Education Consortium), and International Centre (Dalhousie)

## Health Law Institute

Director: Constance MacIntosh, BA, MA, LLB  
Location: Dalhousie University  
6061 University Avenue  
PO Box 15000  
Halifax, NS B3H 4R2  
Phone: (902) 494-6881  
Fax: (902) 494-6879  
Email: [hli@dal.ca](mailto:hli@dal.ca)  
Website: <http://www.dal.ca/hli>

An Interdisciplinary Institute of the Faculties of Law, Medicine, Health Professions, and Dentistry, the Institute is committed to the advancement of health law and policy and the improvement of health care practice and health systems through scholarly analysis, professional education, and public service. Its objectives are:

1. To foster strong and innovative health law and policy scholarship by:
  - contributing to research in health law and policy
  - providing external consultation services on matters having a significant impact on health law or policy
2. To advance health law and policy education by:
  - designing and implementing education programs for law, medicine, health professions and dentistry students
  - providing continuing education opportunities for health professionals and legal practitioners
3. To serve the public in our areas of expertise by:
  - contributing to the societal understanding of health law and policy issues
  - providing expertise to organizations in the public sector
  - engaging in the policy-making process at local, regional, and national levels.

## Institute for Research in Materials (IRM)

Director: Richard A. Dunlap, PhD  
 Administrative Offices: 6414 Coburg Road  
 PO Box 15000  
 Halifax NS B3H 4R2  
 Phone: (902) 494-6373  
 Fax: (902) 494-8016  
 URL: <http://irm.dal.ca>

Established in 2002, IRM is made up of over 100 faculty members in seven faculties (Science, Engineering, Dentistry, Medicine, Architecture and Planning and Management and Health Professions) and 17 departments. The goals of the Institute include advancing the collective interdisciplinary research efforts in materials science and engineering at Dalhousie University, facilitating interdisciplinary teaching in materials science within the existing discipline structure, and enhancing interactions between materials researchers at Dalhousie University with relevant government laboratories and industry, especially within the region. The Institute leads collaboration within the university on interdisciplinary applications to funding agencies for major equipment and research infrastructure, and collaborates with external organizations to pursue research opportunities.

All Dalhousie University faculty members carrying out research in the area of materials are eligible to be Members of IRM. Postdoctoral fellows and graduate students associated with these research groups are invited to become Associate Members of IRM.

In addition to equipment operated by individual members of the Institute, IRM has established (2003) the Facilities for Materials Characterization, an \$11 million suite of instruments managed by the Institute.

The equipment includes:

- High-field solid-state NMR spectrometer (managed jointly with the Nuclear Magnetic Resonance Research Resource)
- Scanning electron microscope
- Focused ion beam
- X-ray photoelectron spectrometer (XPS)
- Secondary ion mass spectrometer (SIMS)
- Sputtering system
- Ultra-high speed optical systems
- Physical property measurement system (PPMS)
- Scanning thermal microscope (SThM)
- Ultrasonic immersion testing equipment
- Hot press
- Grindo Sonic
- High-speed motion recorder/analyzer.

These facilities are open to external users. Please contact [IRM@dal.ca](mailto:IRM@dal.ca) for details.

IRM offers an NSERC CREATE program called DREAMS (Dalhousie Research in Energy, Advanced Materials and Sustainability). Students accepted into the program carry out collaborative interdisciplinary research in world-leading laboratories with innovative new classes and direct experience working with

industrial partners. DREAMS scholarships are available to graduate students in Chemistry, Physics and Mechanical Engineering. See DREAMS website for details at [DREAMS.irm.dal.ca](http://DREAMS.irm.dal.ca)

## Law and Technology Institute

Director: Robert J. Currie, BA, MA, LLB, LLM  
 Associate Director: Michael Deturbide, BSc, BJ, LLB, LLM  
 Location: Schulich School of Law  
 6061 University Avenue  
 PO Box 15000  
 Halifax, NS B3H 4R2  
 Phone: (902) 494-1469  
 Fax: (902) 494-1316  
 Email: [lynda.corkum@dal.ca](mailto:lynda.corkum@dal.ca)  
 Website: <http://law.dal.ca/lati/>

The Law and Technology Institute was established at Dalhousie Law School in 2001 to provide teaching, research, and continuing education on technology law issues to students, faculty members, and the practicing Bar. The Institute participates, with the faculties of Computer Science and Management, in Dalhousie's Master of Electronic Commerce Program, and has been involved in collaborative projects with the private sector and governments on information technology issues. Also, in conjunction with Dalhousie's Industry Liaison and Innovation Office, the Institute offers a student placement program in intellectual property and commercialization. Its faculty members provide graduate supervision to students interested in the developing field of technology law issues, and are active in law and technology organizations, such as IT.Can, and the International Society for Law and Technology. Faculty members of the institute are writers of the English edition of IT.Can bi-weekly newsletter. The Institute hosts an Eminent Speakers Series, which brings leading IT lawyers and academics to Dalhousie to share their expertise. The Institute is home to the Canadian Journal of Law and Technology, co-edited by Professors Deturbide and Reynolds. The CJLT is the pre-eminent technology law review in Canada.

### Classes Offered:

- Law and Technology
- Internet and Media Law
- Privacy Law
- Intellectual Property Law
- Information Technology Transactions
- Entertainment Law
- Intellectual Property and Commercialization Placement
- Special Topics on Intellectual Property (IPII)
- Copyright Law
- Patent law

Students also have the opportunity to pursue specialized interests in fields such as health law and alternate dispute resolution, as they relate to law and technology.

## Marine & Environmental Law Institute

Location: Schulich School of Law  
 6061 University Avenue  
 PO Box 15000  
 Halifax, NS B3H 4R2  
 Phone: (902) 494-1988  
 Fax: (902) 494-1316  
 Email: [MELAW@dal.ca](mailto:MELAW@dal.ca)  
 Website: <http://www.dal.ca/law/MELAW>

The Institute, which is housed in the Law School, carries out research capacity-building and consultancy activities and also directs the MELP academic specialization. MELAW provides a specialization in marine and/or environmental law to JD students. In addition to their scholarly research and publication activities, MELAW faculty, associates and staff carry out research projects and provide advisory services to agencies of the United Nations, international non-governmental organizations, and regional organizations as well as assisting government departments, private sector institutions and non-governmental organizations in Canada and overseas.

The Marine & Environmental Law Institute is also the editorial office of the Ocean Yearbook, a major international interdisciplinary annual, devoted to ocean affairs published in collaboration with the International Ocean Institute in Malta. Dalhousie law students have the chance to gain experience working as research

assistants on the Institute's research projects and workshops, and assisting with editing the Ocean Yearbook.

MELAW supports student collaboration in addressing environmental issues through the Environmental Law Students Society and the East Coast Environmental Law Association, a non-governmental organization dedicated to environmental law education and advocacy. MELAW encourages interdisciplinary collaborations within the Dalhousie community including the School for Resource and Environmental Studies (SRES), the Marine Affairs Program (MAP), the International Development Studies (IDS) Program, the Centre for Foreign Policy Studies, the Ocean Tracking Network (OTN) led by the Department of Oceanography and the recently established Halifax Marine Research Institute. MELAW also promotes national collaborations, for example, through the Ocean Management Research Network (OMRN). International linkages include among others, the Global Forum on Oceans, Coasts and Islands and the IUCN Academy of Environmental Law as well as numerous sister institutions in Asia, Caribbean, Europe, South America and the United States.

## Minerals Engineering Centre

Director: Georges J. Kipourou, PhD, PEng  
Phone: (902) 494-6100  
Location: 1360 Barrington Street  
G. Building, Sexton Campus  
PO Box 15000  
Halifax, NS B3H 4R2  
Phone: (902) 494-3955  
Fax: (902) 494-3506  
Website: <http://minerals.engineering.dal.ca>  
Email: [mec@dal.ca](mailto:mec@dal.ca)

The Minerals Engineering Centre was established from the Laboratory for the Investigation of Minerals. The Minerals Engineering Centre provides research, analytical and advisory services to industries, universities, and government bodies in Atlantic Canada, Canada and International. The Centre is located in G Building on Sexton Campus and is affiliated with the Materials Engineering program. The services offered include:

- Sample preparation of ores, soils, silts, rocks, cores, clay fraction and wood pellets
- Size analysis, including screening, sieving, and sub-sieve analysis
- Minerals separation using dense liquids
- Physical and chemical analytical methods using atomic adsorption, XRD, ICP-OES, AA, x-ray fluorescence spectrophotographic, wet chemical techniques and carboy/sulphur analysis
- Analysis of samples including geological, metalliferous ores, industrial minerals, coals, metals, alloys and water
- Mineral processing test work covering the whole range of investigative techniques from bench scale to pilot plant, including crushing, grinding, classification, gravity separation, dense medium separation, magnetic separation, electrostatic separation, flotation, flocculation, thickening, filtration, and drying
- Evaluation of biomass fuels calorific value of raw material and wood pellet.

The Minerals Engineering Centre provides opportunities for undergraduate and graduate students to learn various analytical and testing techniques applicable in their course of studies. It also offers services to faculty members to assist in their teaching and research activities.

Further information may be obtained from the Director of the Centre.

## Neuroscience Institute

Director: Alan Fine, V.M.D., PhD  
Contact: [neuroscience.institute@dal.ca](mailto:neuroscience.institute@dal.ca)  
Website: <http://www.neuroscience.dal.ca>

The Neuroscience Institute was founded in 1990 to promote and coordinate research in neuroscience, the modern interdisciplinary study of the brain and nervous system.

It serves as an umbrella organization to foster research and training in neuroscience at Dalhousie. A major objective is to increase understanding of the functions of the nervous system in health and disease. To this end, the Institute coordinates the activities of neuroscientists in the Faculty of Medicine, the Faculty

of Science, the Faculty of Computer Science and the School of Biomedical Engineering, facilitating collaboration between clinical and basic scientists in these Faculties. Some foci of current research activity include: development and plasticity of the nervous system; cognitive neuroscience; motor control; autonomic function; synaptic function; and sensory physiology. The Institute also provides a vehicle to seek new sources of funding, and encourages new initiatives in all areas of neuroscience research at Dalhousie. In addition, the Institute promotes and coordinates training programs in neuroscience currently offered through its constituent departments at both the undergraduate and graduate levels. It sponsors seminar series annually, and coordinates a variety of community outreach events.

## Norman Newman Centre for Entrepreneurship

Director: Ed Leach, BComm (Dalhousie), MBA (Ivey), PhD  
(Nova Southeastern)  
Coordinator: Paulette Dun  
Entrepreneur in Residence: Brian Lowe  
Lead Researcher: Dr. Mary Kilfoil  
Phone: (902) 494-6975  
Website: <http://entrepreneurship.dal.ca>

The mission of Norman Newman Centre for Entrepreneurship (NNCE) is "To build a vibrant entrepreneurial culture among students, faculty and the community at large that embraces innovation in creating value for society led by leaders who manage with integrity, focus on sustainability and make things happen."

This will be accomplished by:

- Supporting the academic programs and courses taught within the Rowe School of Business
- Supporting the entrepreneurial community.
- Providing opportunities for Dalhousie students to work with the entrepreneurial community.
- Facilitating the incubation of student business ideas.

The NNCE is attached to the Rowe School of Business, within the Faculty of Management, Dalhousie University. NNCE promotes entrepreneurship in its many forms, through innovative curriculum, applied research and collaborative extension work (outreach). Our definition of entrepreneurship is broad and includes the development or growth of enterprises for profit, for social benefit and for sustainability. Our research is field-based and involves working with real ventures, on real projects, using state-of-the-art methodologies. Our extension work is multi-disciplinary and ranges from internships with entrepreneurs to collaborations with other faculties throughout the university.

All of our programs are designed to enhance the student's entrepreneurial knowledge, skills, and networks. In addition to supporting technology and technical start-ups through mentoring, coaching and training efforts, the NNCE will provide mentoring, coaching and training to entrepreneurial students, create exemplars of technology and technical entrepreneurship through research projects and further expand the relationship with the business community.

## Nuclear Magnetic Resonance Research Resource (NMR3)

Director: J. K. Rainey, BSc, MSc, PhD  
Facility Coordinator: M. D. Lumsden, BSc, PhD  
Solid-state NMR Coordinator: U. Werner-Zwanziger, BSc, PhD

Established in 1982 with assistance from the Natural Sciences and Engineering Research Council, the Resource is located in the Department of Chemistry and is used by faculty, researchers and graduate students in all Maritime universities, the NRC, local industry and many Dalhousie Departments. It is concerned with applications of magnetic resonance spectroscopy to problems in chemistry, materials science, biology, biochemistry and related areas. Its current instrumentation includes Bruker AC-250 (Tecmag upgrade), Avance 300 and Avance 500 NMR spectrometers for liquids and Bruker Avance DSX 400 and Avance 700 NMR spectrometers for solids. NMR-<sup>3</sup> users also have direct access to a Bruker Avance III 700 NMR spectrometer with cryoprobe capabilities for liquids experiments. The Avance 500 and Avance 700 NMR spectrometers were

installed in 2003 with funding from NSERC, the Canadian Foundation for Innovation and the Atlantic Innovation Fund. The cryoprobes on the Avance III 700 were purchased in 2009 by Dalhousie University through an Atlantic Canada Opportunities Agency Grant. The Resource offers facilities for hands-on use by researchers and also provides NMR spectra and expertise to scientists throughout the Atlantic Region and beyond.

For more information see: <http://nmr3.chemistry.dal.ca>

### **Trace Analysis Research Centre**

Director: A. Doucette, BSc, PhD

The Trace Analysis Research Centre (TARC) was established in 1971 with the assistance of a grant from the National Research Council. Its mission is to train analytical chemists and, through research, to contribute to the advancement of analytical chemistry. Members of TARC from Dalhousie and associated institutions comprise a group with expertise in a wide range of chemical analysis techniques in areas such as spectroscopy, chromatography, mass spectrometry, electrochemistry, and nuclear analytical chemistry.

# Resources and Services

## 1. Advising and Access Services Centre (AASC)

Our academic advising team provides advising, academic planning and personal coaching to current Dalhousie University students. The Advising and Access Services Centre is also Dalhousie's centre for expertise for student accessibility and accommodation. As part of our ongoing efforts to facilitate a successful transition to and throughout your university experience, we offer several points of contact for students including summer transitions/orientation programs, ABLE @ Dal - a workshop exclusively for students with disabilities, and one-on-one advising appointments, all delivered through a 'coaching as advising' model to help students develop strategies for academic success from first-year to graduation.

We help you build on your ability to make decisions that positively impact your academic and career success. We promote the Learn Well @ Dal philosophy by providing accessible and thorough advising and coaching for students accessing our services.

Early consultation is encouraged to ensure appropriate planning for your needs which may include accommodations. AASC Advisors meet with you to determine areas to facilitate your success, and if accommodations are required, we ensure those accommodations are put into place by working with your course instructors.

For further information, please visit our website [www.dal.ca/learnwell](http://www.dal.ca/learnwell), call (902) 494-3077 or email [access@dal.ca](mailto:access@dal.ca).

## 2. Alumni Association/Alumni Relations

The Alumni Association is comprised of over 110,000 graduates of Dalhousie University. A global network of volunteers keeps alumni informed and involved with the university. By providing many programs and services, the Association fosters a strong relationship between Dalhousie and its alumni.

Dalhousie alumni play a vital role in the health and future of the university. Many alumni return to Dalhousie regularly to hire graduating students. They also serve as advocates, ambassadors and student mentors. The financial support provided by our alumni helps ensure that Dalhousie will continue to provide exceptional post-secondary education to future generations.

The Alumni Association's Board of Directors works with the Dalhousie Alumni Relations Office, located in the Macdonald Building (902 494-8801/1-800-565-9969/[alumni@dal.ca](mailto:alumni@dal.ca)). Together, the Association and Alumni Relations strive to identify opportunities for alumni involvement, and to foster an environment that invites alumni to participate fully in Dalhousie's well-being. Visit the website at [www.dal.ca/alumni](http://www.dal.ca/alumni).

## 3. Athletics and Recreational Services

Dalhousie offers a wide array of programs, facilities and services to suit the diverse sport, recreation and wellness needs of our students. Located on the Studley Campus, Dalplex is the university's primary fitness centre. Dalplex membership is included in full-time student fees, so students can simply bring their DalCard and swipe it in the turnstile for access to: the Cardio Plus Centre, two climbing facilities, two weight rooms, over 35 weekly fitness classes, an eight lane, 50m indoor pool, a 1/6 mile indoor track, drop-in times for recreational basketball and volleyball, racquet courts, an outdoor tennis and beach volleyball court and the Fun Zone play area for children. The F.H. Sexton Memorial Gymnasium includes a fitness centre, a gym with hardwood courts, group fitness classes, two squash courts and change rooms with lockers for easy access for students on the Sexton Campus. The Langille Athletic Centre is the sport and recreation facility for students on the Agricultural Campus.

Athletics and Recreational Services also offers many climbing, fitness and outdoor recreation programs, classes and trips each term, along with a broad range of intramural leagues and tournaments. Intramural sports are fun, free and an excellent way to meet other students. Sports offered include soccer, flag football

and hockey in the fall, to curling, basketball and inner tube water polo in the winter term - and that's just the tip of the iceberg! Dalhousie offers you the opportunity to take part in more than 20 different recreational and competitive sports clubs, which are organized and run by students. The Rams varsity program represents the Agricultural Campus, offering competitive teams in badminton, basketball, women's rugby, soccer, women's volleyball and woodsmen. The Tigers varsity program on the Halifax campus consists of 14 teams (men's and women's basketball, cross country, hockey, soccer, swimming, track and field and volleyball) who compete regionally in the Atlantic University Sport (AUS) conference and nationally in Canadian Interuniversity Sport (CIS). For more information about sport, fitness and recreation opportunities at Dalhousie visit [www.athletics.dal.ca](http://www.athletics.dal.ca).

## 4. Black Student Advising Centre (BSAC)

The Centre strives to foster a sense of community among all students, especially those who are Black/African descent. The BSAC hosts programs such as peer and professional mentorship, in-house tutoring and writing support as well as events to promote intercultural awareness. Providing confidential counselling services, personal and community support, advocacy, and relevant resource materials are a few of the roles of the BSAC Advisor. The Advisor also provides information about scholarships, bursaries, employment and makes referrals to additional resources for student success. The BSAC includes a study space, a small computer lab and a lounge. For further information, drop by the Centre in room 418 of the Student Union Building, contact us at (902) 494-6648 or [bsac@dal.ca](mailto:bsac@dal.ca) or visit us online at [www.dal.ca/bsac](http://www.dal.ca/bsac).

## 5. Career and Leadership Development Centre

The Career and Leadership Development Centre assists you in:

- exploring a full range of career and work possibilities that match your career goals;
- preparing job-search documents to present yourself effectively as a candidate for employment;
- obtaining information on employment opportunities and prospective employers;
- connecting with career opportunities through campus interviews, job and volunteer listings, referrals, direct application, networking, job search events, publications, and/or information technology; and
- developing and maintaining relationships with organizations that provide career development and employment opportunities for you.

Drop by the Career and Leadership Development Centre on the fourth floor of the Student Union Building in Halifax or in the Dairy Building on the Agricultural Campus, or visit us online at [www.dal.ca/cldc](http://www.dal.ca/cldc) for more information on programs and services.

## 6. Centre for Learning and Teaching

The Centre for Learning and Teaching (CLT) works in partnership with academic units, faculty members, and graduate students to enhance the practice and scholarship of learning and teaching at Dalhousie University. CLT takes an evidence-based approach to advocating for effective learning and teaching practices, curriculum planning, services to support the use of technology in education, and institutional policies and infrastructure to enhance the Dalhousie learning environment.

*Programming:* Workshop series, presentations, discussion groups, and demonstrations are scheduled to address the full spectrum of educational issues, including curriculum design, evaluation of student learning, teaching and learning strategies, and the effective integration of instructional technology.

*Confidential Consultations:* Educational developers at CLT provide confidential consultation services to teaching assistants, faculty, and administrators on a wide range of learning and teaching issues.

*Annual Events:* On an annual basis, CLT coordinates New Academic Staff Orientation, TA Days, Teaching Dossier Workshops, and the Dalhousie Conference on University Teaching and Learning that brings together presenters from across the University and the country to explore issues related to specific themes. CLT also administers several university-wide teaching awards, including the Dalhousie Educational Leadership Award, the Alumni Award of Excellence for Teaching, Sessional and Part-Time Instructor Award of Excellence for Teaching, and the President's Graduate Teaching Assistant Award.

*Certificate in University Teaching and Learning:* The Certificate program is offered to graduate students by the CLT in collaboration with the Faculty of

Graduate Studies. The purpose of the program is to assist academic departments in preparing students for their teaching responsibilities and to enhance their professional development opportunities for other careers.

*Student Ratings of Instruction (SRI):* Higher education institutions in Canada and abroad encourage faculty to use teaching evaluations to rate their teaching for effectiveness. The CLT is responsible for the administration of the university-wide Student Rating of Instruction. The ratings are administered online towards the end of each term. Quantitative and qualitative data are collected and the opportunity for departments and individual instructors to add questions to the form is available. Students may access the universal question part of the form when individual instructors opt-in to release the results of their own course(s).

*Grants:* The CLT administers the Teaching and Learning with Technology grants that are intended to encourage and support faculty members who are seeking new and innovative ways to incorporate technology into their teaching practice.

*Publications:* The CLT newsletter, Focus on University Teaching and Learning, is published three times a year and is available online on the CLT website ([www.learningandteaching.dal.ca](http://www.learningandteaching.dal.ca)). CLT's lending library includes both print and video resources on topics related to teaching that may be borrowed by faculty, teaching assistants, and administrators. CLT's LibGuide of links to electronic sources can be found at <http://dal.ca/libguides.com/clt>

*Teaching and Learning with Technology:* A division of the Centre for Learning and Teaching, Instructional Media Services (IMS), offers expertise and support to the university in the areas of classroom design, media production, presentation technology, and technical services.

- IMS supplies equipment, training, and support to students, staff, and faculty. AV Staff provide technical support for classrooms and operate equipment loan pools on Studley and Sexton campuses, as well as assist with classroom design and equipment installations across all three campuses.
- Video and Audio Production Services offers a full range of creative and production services for educational or other academic purposes.
- Technical Services repairs and services electronic equipment and provides expert advice on the design and installation of classroom technology systems. For IMS locations and contact information see <http://learningandteaching.dal.ca/ims.html>.

For further information, teaching resources, or a confidential consultation, you are invited to contact the Centre for Learning and Teaching, located at Suite G90, Killam Library, 6225 University Avenue, (902) 494-1622, [CLT@dal.ca](mailto:CLT@dal.ca), or you can visit the CLT website at: <http://learningandteaching.dal.ca>

## 7. Counselling Services

As a student you'll find that most of the time you can deal with the everyday issues that pop up while attending university. But, life can sometimes challenge you in unexpected ways and when it does, the Dalhousie Counselling Services Centre can help. We can help you resolve problems and learn new skills in a confidential, supportive environment. Also, if you are struggling with your classes or assignments and suspect you may have a learning disability, staff in the Counselling Centre can pre-screen for learning disabilities, attention-deficit hyperactivity disorder (ADHD) and/or Asperger's disorder, and can suggest various learning strategies that you may find helpful. Career Counselling is a confidential and collaborative process we offer, in which you work with a career counsellor who assists you in your educational and career decision-making.

Counselling is provided by professionally trained counsellors and psychologists and is available for individuals and on a group basis.

For information about the making an appointment, hours of operation or any of the other services, programs and events provided by the Dalhousie Counselling Centre, please visit us online at [www.dal.ca/counselling](http://www.dal.ca/counselling).

## 8. Dal Allies/LGBTQ Support

At Dalhousie we encourage and support a respectful and inclusive campus community. Allies work with students, staff and faculty to offer programs, services, training, support, referrals and resources to members of the Dalhousie Rainbow community. For confidential discussions feel free to contact Dalhousie's Peer Ally ([peerally@dal.ca](mailto:peerally@dal.ca)). We can help, if you:

- question (or have questions about) sexuality or gender identity and need information
- need support in coming out
- need help dealing with issues you are experiencing on campus

- want to be yourself and not have to hide your identity when seeking services or support
- want to discuss issues without fear of judgment

Contact us [dalally@dal.ca](mailto:dalally@dal.ca) or visit us online at [www.dal.ca/dalally](http://www.dal.ca/dalally) for more information.

## 9. DalCard

The DalCard (also referred to as the Dalhousie University ID Card) is a convenient multi-purpose card, which gives the cardholder access to various facilities and services on and off campus. The DalCard is an identification card and also serves as a debit card for retail and vending purchases on and off campus; for printing at Academic Computer Labs; printing and photocopying at the Libraries; Dalplex membership and access card; and a residence meal plan and access card - all in one! The DalCard must be presented to write an officially scheduled examination or to use the library facilities. In addition, some services such as the issuance of bursary or scholarship cheques, require the presentation of a valid DalCard.

The DalCard Office is located at 1443 Seymour Street. Students on the Sexton campus may obtain the DalCard at the Student Service Centre, B Building, 1360 Barrington Street (accessible location). See [www.dal.ca/dalcard](http://www.dal.ca/dalcard) for more information.

## 10. Dalhousie Arts Centre

Designed as a multipurpose facility, the Dalhousie Arts Centre is home to four University departments: Dalhousie Arts Centre (Rebecca Cohn Auditorium), Dalhousie Art Gallery, and the two academic departments of Music and Theatre. The Arts Centre is an integral part of the cultural experience in our community and stands as the only arts complex of its kind in Nova Scotia.

Of the numerous performing arts spaces in the Dalhousie Arts Centre, the Rebecca Cohn Auditorium, is the most familiar and prestigious. The 1,040 seat concert hall is the home of Symphony Nova Scotia, as well as the venue of choice for a wide variety of performers ranging from The Royal Winnipeg Ballet to Blue Rodeo, The Chieftains, and Stomping Tom to name a few. Other performing and visual arts spaces in the Arts Centre include: The Sir James Dunn Theatre (240 seats), the David Mack. Murray Studio, Studio II, The MacAloney Room, and the Art Gallery.

The Dalhousie Art Gallery offers the public access to national and international touring exhibitions and initiates many ambitious and exciting exhibition programs.

The Dalhousie Music Department presents weekly noon hour recitals in the Arts Centre. The Department also maintains a full production season including a faculty recital series and student ensemble concerts with music ranging from classical to jazz and contemporary. Further information on the Music and Theatre Departments can be found in their separate listings.

## 11. Dalhousie Multifaith Centre

The Dalhousie Multifaith Centre strives to explore the fundamental issues and concerns of the world from a religious perspective in a setting that encourages open and free discussion, values the raising of questions and doubts, and appreciates divergent histories, attitudes, options, and values. A complete education addresses the whole person: body, mind, and spirit.

The Centre is a non-threatening space where students, staff, and faculty can address the basic questions of meaning and purpose in their lives - no matter what their faith, philosophy, or doubt may be.

For more information about the services and supports we offer, or to speak with a chaplain, drop by the Centre at 1321 Edward Street or visit us online at [www.dal.ca/dmc](http://www.dal.ca/dmc).

## 12. Dalhousie Student Union

Every Dalhousie student is automatically a member of the Dalhousie Student Union. The Student Union is recognized by an agreement with the University Administration and by an Act of the Nova Scotia legislature as the single voice of Dalhousie students. All student activities on campus are organized through the Student Union, and the Student Union is the focus of all student representation. The business of the Student Union is conducted by a Council made up of 40 members. Every student is represented by one or more representatives of their faculty, elected within their faculty in the spring. As well, a number of other

constituency groups are represented on the Council because they are uniquely affected by many campus issues. Also on the Council are the student representatives elected to the Senate and Board of Governors.

One of the most important resources of the Student Union is the Student Union Building (SUB) located at 6136 University Avenue between Seymour and LeMarchant Streets. The SUB, which is owned by the University and administered, managed and controlled by the Student Union and is paid for through Student Union fees, was opened in 1968 as a centre for student activity on campus. The Student Union Building provides a wide range of services for students including the Student Advocacy Service, Travel Cuts, The Grawood, Campus Copy, food services, and much more. Every student has the opportunity to take advantage of the Union's financial, physical and organizational resources. Students have an opportunity to become involved in committees dealing with various student issues. The DSU also offers over 175 clubs, societies and organizations for students to participate in. All students are invited to satisfy their curiosity by visiting the Student Union Council offices. The Student Council office is located on the second floor of the SUB in room 222 and is open from 8:30 am to 4:30 pm Monday through Friday, telephone number (902) 494-1106 or email [dsu@dal.ca](mailto:dsu@dal.ca). Check out the website at [www.dsu.ca](http://www.dsu.ca), or [my.dsu.ca](http://my.dsu.ca).

### 13. Housing/Residence Services

The University is pleased to guarantee residence in University-owned properties for all new Dalhousie undergraduate students who complete the residence application process by June 30th. It's important that students planning to attend Dalhousie think well in advance about their accommodation needs.

Students should be aware of several important points of reference in regard to residence accommodation. Upon admission to a program of study, all students will receive university residence information. They will also be asked to pay an admission deposit. It's important to apply to residence (online) and to pay the admission deposit promptly as the dates these are received will determine when the Residence Application is considered. Residence applications will not be considered from individuals who have not gained admission to a program of study, or paid their admission deposit and residence application fee.

Students with disabilities are encouraged to contact the Residence Office at (902) 494-1054, or email: [residence@dal.ca](mailto:residence@dal.ca), for information and assistance.

The traditional style residences at Dalhousie are chiefly for undergraduate students. All students living in traditional style residences are required to purchase one of the meal plan options available.

The information below gives a description of 1. traditional on-campus residences, 2. non-traditional on-campus residences, which includes apartment style housing owned by the university, 3. the services offered by the Off-Campus Housing office, and 4. general information. For information on residence fees, see the Fees section of the Calendar.

It is the responsibility of the individual student in all cases to make a separate online application to the university housing of her/his choice, or utilize the services provided by the Off-Campus Housing office.

#### 1. Traditional On-Campus Residence

##### A. Studley (Main) Campus

###### i. Howe Hall

Howe Hall is centrally located on Studley Campus and is the largest residence. Howe Hall is broken into six houses: Bronson House (1959), Cameron House (1967), Fountain House (2002), Henderson House (1964), Smith House (1958), Studley House (1967). Each house has its own identity and student government. The houses are all co-ed and feature a single and double (two single beds) rooms. Facilities include a 24-hour front desk, dining hall, television lounges, kitchenettes, a large multi-function study area/common lounge, laundry rooms, hockey equipment and bike storage room.

###### ii. Shirreff Hall

Shirreff Hall provides accommodation to 440+ students. Located in a quiet corner of the campus, it is minutes from classes, the library, Dalplex and other facilities. Shirreff Hall is divided into four areas: the Annex, Newcombe House (female only), while Old Eddy & New Eddy are co-ed. Old Eddy and New Eddy have mostly single and double rooms while Newcombe and the Annex have single rooms only.

Shirreff Hall offers a dining room, an elegant library and visitors' lounge, study areas, games room, television lounges, kitchenettes, laundry room, and 24-hour front desk. ResNet (high speed Internet/wireless), local telephone service and cable TV service are provided within each room. Students also have access to a piano.

###### iii. Eliza Ritchie Hall

Opened in 1987, Eliza Ritchie Hall is a co-ed residence. It provides traditional residence accommodation for 92 students in predominantly single rooms.

This three-storey building is located close to the Dalplex and to Shirreff Hall, where students normally have their meals. Facilities include study rooms, a multipurpose room, reception area, laundry facilities, leisure lounges with kitchenettes and, within each room, ResNet (high speed Internet/wireless). Local telephone service and cable TV service are also provided.

###### iv. Residence Houses

Dalhousie also has two residence houses, which are co-ed. Formerly single family homes, each house has kitchen, living room and washroom facilities, which are shared among the residents in the house. The character of these homes has been maintained as much as possible.

These houses have only single rooms, each with a bed, wardrobe, study desk, lamp and chair. Linen, cooking utensils and small appliances are not provided. The Residence Houses are now part of the Mini-Residence community. All houses require meal plans and have full kitchens, ResNet (high speed Internet), local telephone service and cable TV service are provided in each room.

###### v. Risley Hall

Risley Hall is located on LeMarchant Street, behind the Student Union Building, and offers 490 single rooms, primarily to undergraduate students. Services include a dining room, laundry rooms, television lounges, and a 24-hour front desk. Each room comes equipped with ResNet (high speed Internet/wireless), local telephone service and cable TV service.

###### vi. Lyall House, DeMille House, Colpitt House

These properties, which were former faculty offices, have been converted into three mini-residences with a shared courtyard. There are a total of 49 single rooms in a co-ed living environment, with comfortable common space available to residents of each house. As in other traditional residences, a meal plan is required and meals can be eaten at any dining hall. Services include a shared laundry area and ResNet (high speed Internet), local telephone service and cable TV service are offered in each room.

#### B. Sexton Campus

##### i. Gerard Hall

Gerard Hall is a 12-story traditional style co-ed residence that houses 241 students in single, super single, and double rooms. It is located in the heart of downtown Halifax on the corner of Morris and Queen Streets. Gerard Hall offers laundry facilities, a big screen TV, DVD player and satellite access in the main lounge. Within residence rooms, ResNet (high speed Internet/wireless), local telephone service and cable TV service are provided. Gerard Hall residents commonly use the O'Brien Hall dining hall, only seconds away, or may use the dining halls in Howe, Risley or Shirreff Halls.

##### ii. O'Brien Hall

O'Brien Hall is a co-ed residence located in the heart of downtown Halifax. There are approximately 115 Dalhousie students residing in a combination of single and double rooms in O'Brien.

Facilities include a dining hall and laundry facilities. Within residence rooms, ResNet (high speed Internet/wireless), local telephone service and cable TV service are provided.

#### C. Agricultural Campus - Truro

There's no better way for you to get connected to university life than by living in one of our three residences located on campus: Trueman, Fraser and Chapman Houses all offer co-ed living with the option of same sex and quiet sections. These three houses are conveniently located within a few minutes walk of classes, labs, meal hall, the library, the farm and our athletic center. Residence is a great place to meet new friends while developing a good study routine. The residence complex and dining hall are located together around Horseshoe Crescent and are minutes from classes, the athletic center and the library. All houses offer co-ed and female

sections. Meal plans are mandatory. Each room is equipped with ResNet (high speed internet/wireless), local phone and cable TV service.

#### **i. Fraser House**

Fraser House accommodates 125 students in single, super single, and double rooms. Services include comfortable lobby area, TV/games lounge, quiet/study lounge, laundry room and kitchenette.

#### **ii. Chapman House**

Chapman House accommodates 133 students in single, super single, and double rooms. Services include comfortable lobby area, TV/games lounge, quiet/study lounge, laundry room and kitchenette.

#### **iii. Trueman House**

Trueman House accommodates 79 students in single, super single and double rooms. It is the smallest house in the complex and tends to offer quieter atmosphere. Services include comfortable lobby area, TV/games lounge, two small quiet/study lounges and a laundry room.

## **2. Non-Traditional On-Campus Housing**

### **A. Studley (Main) Campus**

#### **i. Glengary Apartments**

Located on the Studley Campus on Edward Street, Glengary Apartments is a four-storey brick building offering co-ed accommodation for 40+ students.

Glengary has 12 furnished apartments. Each apartment includes a kitchen, living room and bathroom. There are also four furnished bachelor apartments, which are always in high demand. Laundry facilities are located in the basement, where there is also a limited amount of storage space. ResNet (high speed Internet/wireless), local telephone and cable TV service are provided in all apartments.

### **B. Sexton Campus**

#### **i. Graduate House**

This residence is home to 13 returning students, normally in single rooms. It is located next door to O'Brien Hall and is a short walk from Gerard Hall on Morris Street. ResNet (high speed Internet/wireless), local telephone service and cable TV service are provided in each room.

Meal plans are not mandatory but may be purchased for use at any dining hall on campus including O'Brien Hall, which is next door.

### **C. Agricultural Campus - Truro**

#### **i. Trueman House Mature/Graduate Unit**

Located on the ground level in Trueman House, this unit accommodates 12 students in single and super single rooms. Services include a fully equipped kitchen, tv lounge and laundry room (shared with all students living in Trueman House). Each room is equipped with ResNet (high speed internet/wireless), local phone and cable tv service. A meal plan is not mandatory

## **3. Living Off-Campus**

Dalhousie's Off-Campus Housing has a website: <http://www.dal.ca/och>. The site features a wide variety of housing resources available for students on both the Halifax and Truro campuses.

There is an Off-Campus Housing office for the Halifax campuses located in Risley Hall and offers help to students in finding off-campus accommodations.

The Off-Campus Housing office provides centralized information on available housing in the Halifax metro area including apartments, shared accommodations, rooms, condos and houses. Telephones for calling landlords and material such as maps and transit schedules are available at the office.

Based on the relatively low vacancy rate in Halifax, it is advised that students start looking for off-campus housing well ahead of the academic year.

## **4. General Information**

A non-refundable \$50 fee is payable when applying for residence. If you are submitting your residence application online, you can make the payment at <http://www.dal.ca/studentaccounts>. Select "Payments" and follow the links to "Pay Online." If you are submitting a paper application, the fee can be paid using cheque or Money Order (payable to Dalhousie University), Visa, MasterCard or American Express.

All new Dalhousie undergraduate students are guaranteed a place in residence if they complete the residence application process by June 30<sup>th</sup>.

For further information on living at Dalhousie, or for a hard copy of the residence application form, do not hesitate to contact:

### **The Residence Office**

## **14. Information Technology Services (ITS)**

Information Technology Services (ITS) empowers the success of students, faculty and staff through an overall focus on service, advising and consulting. ITS supports university instructional, research and administrative requirements. The department is responsible for all centrally managed computing, networking and telecommunications facilities including university email, MyDal, the central information system (Banner), online learning systems, wired and wireless network connections and student computer labs.

Need help with a technical problem? Visit one of three Help Desks located on the Halifax campus, or our Help Desk at the Dalhousie Agricultural Campus in Truro.

Personal computers and related supplies can be purchased by students and Dalhousie employees through PCPC, the campus computer store ([www.pcpc.dal.ca](http://www.pcpc.dal.ca)).

With a range of new and emerging technologies, ITS staff will help you explore options to make the most of your experience at Dalhousie. See [www.its.dal.ca](http://www.its.dal.ca) for more information.

## **15. International Centre**

The International Centre (IC) is committed to welcoming, supporting and serving the needs of new and continuing international degree-seeking and exchange students at Dalhousie. Advisors are available to meet with you on a variety of matters including finances, immigration, exchange opportunities, health insurance and personal issues. Referrals are made to other resources and services on campus when necessary. The IC organizes orientation activities that assist international and exchange students in adjusting to a new culture and in achieving their educational and personal goals. A variety of social, cultural and information programs are held throughout the year. During the fall and winter terms, an International Student Advisor is also available to meet, by appointment, at the Student Service Centre (Sexton Campus) at 1360 Barrington Street. Agriculture students may contact the International Student Coordinator on the Truro Campus at (902) 893-6905.

Student exchange and study-abroad services are facilitated by the Study Abroad and Exchange Advisors at the IC. This branch of the office promotes student mobility by assisting departments and faculties with the establishment of student exchange agreements; managing university-wide exchange programs; advising students on international study, work and volunteer opportunities; providing pre-departure and re-entry services; administering the Study Work International Fund (SWIF) and the George Burris Study in England Bursary; and maintaining the International Opportunities Resource Library.

Drop by the Centre at 1321 Edward Street in Halifax, or contact us at [International.Centre@dal.ca](mailto:International.Centre@dal.ca) or (902) 494-1566, or visit us online at [www.dal.ca/international](http://www.dal.ca/international).

## 16. Libraries

The Dalhousie University Library System is organized to accommodate the needs of the undergraduate teaching programs, graduate and faculty research projects, and professional schools. The Dalhousie Libraries are: [the Killam Memorial Library](#) - Humanities, Social Sciences and Science, [the Sir James Dunn Law Library](#), [the Kellogg Health Sciences Library](#), [the MacRae Library](#) - Agriculture, and the [Sexton Design and Technology Library](#) - Architecture, Engineering, and Planning, as well as the [University Archives](#) and [Geographical Information Sciences Centre](#) (both located in the Killam Memorial Library).

Staff in all five libraries provide reference and research services. Access to materials outside of the Dalhousie Libraries is available through the [Document Delivery Service](#). All of the libraries have public access computers and WiFi access. Most of the libraries have bookable study rooms for groups as well as individual carrels for private study. As of December 2012, the holdings of the Dalhousie Libraries include over 1,877,524 print and electronic monographs, 628,763 materials in alternate formats and 76,365 serials titles in print or electronic formats.

The website, [libraries.dal.ca](http://libraries.dal.ca), provides access to collections, databases, subject guides and other services. The Dalhousie University Library System also has a [Copyright Office](#) that provides guidance to students on copyright issues.

Dalhousie libraries participate in Novanet, a network of all Nova Scotian university and college libraries, which shares a single automated online catalogue of the holdings of the member libraries. Users borrow from Novanet libraries upon presentation of their University ID card.

## 17. Mature Student Services

Applicants who are Canadian Citizens or permanent residents and 21 years of age or older, by the first day of classes, and are not eligible for admission on the basis of regular admission requirements, may apply for admission as a mature applicant. In order to be eligible, the applicant must either have no university-level study, or have attempted less than one year of transferable classwork. The student cannot have been in full-time university-level study for a minimum period of two years.

Applicants must provide a completed application for admission, high school or post-secondary transcripts, any other relevant documents (e.g. SAT scores, if available), and a letter outlining life and work experiences since last attending full-time study. Applicants will be expected to clearly outline their education goals and motivation to succeed at university study. All factors will be considered in the admission decision.

Admission under this policy is restricted to first year of undergraduate programs. Applicants must have completed grade 12 English (or equivalent) with a minimum grade of 65. Admission to some programs will require completion of other required subjects.

A student admitted on this basis may be restricted in the number of classes he/she can register in during the first year. Otherwise, these students have the same rights, privileges and responsibilities as other students within their program.

Services include pre-admission counselling and university preparation classes such as Writing Skills for Academic Study, Chemistry, Physics, Academic Math and Pre-Calculus. For more information call (902) 494-2375 or visit <http://collegeofcontinuing.dal.ca>.

## 18. Native Post-Secondary Education Counselling Unit

The Native Post-Secondary Education Counselling Unit is open to students of First Nations descent. We can help you form support networks in your studies, and we also host social activities, cultural events and information sessions. Visit our Halifax office (6286 South Street, 2nd floor) to enjoy some coffee or tea, take advantage of advising with the Native Post-Secondary Liaison, and meet other Native students, or contact us by phone at (902) 494-8863. In Truro, Agriculture students can contact the Special Cohort Coordinator at [havery@dal.ca](mailto:havery@dal.ca)

## 19. Office of Human Rights, Equity & Harassment Prevention

The overall mandate of the Office of Human Rights, Equity & Harassment Prevention is to foster and support an inclusive working and learning environment where all members of the University community share responsibility for establishing and maintaining a climate of respect.

The Office is responsible for administering a number of University policies including: the Accommodation Policy; the Employment Equity Through Affirmative Action Policy; complaints based on the Statement on Prohibited Discrimination; the Personal Harassment Policy; and the Sexual Harassment Policy. The Human Rights & Equity Advisor and the Advisor, Harassment Prevention/Conflict Management also liaise with the Office of the Vice-President, Student Services, regarding the Code of Student Conduct.

Other initiatives in the Office of Human Rights, Equity & Harassment Prevention include education and training on topics such as diversity, accommodation, harassment awareness and prevention, conflict resolution and more. Workshops are offered regularly for students, faculty and staff.

The website for the Office of Human Rights, Equity & Harassment Prevention offers downloadable versions of each of the policies, information on the education and training opportunities offered, and additional resources including an annual Mosaic Calendar featuring a variety of religious and cultural holidays.

Contact: Lisa DeLong, Advisor, Human Rights & Equity  
(902) 494-2704  
Gayle Wishart, Advisor, Harassment Prevention/Conflict Management  
(902) 494-1137  
Phone: (902) 494-6672 (office line)  
Fax: (902) 494-1179

Website: [www.hrehp.dal.ca](http://www.hrehp.dal.ca)

## 20. Office of the Ombudsperson

Our senior student Ombudspersons are advisors, mediators and investigators who recommend options and discuss solutions if you're having problems such as those associated with finances, academics, or accommodations. We have access to relevant information and resources across campus to help you. When you come to us with a question or complaint, we ensure the utmost in confidentiality and we consider all sides of a question in an impartial manner to try and find a resolution. Contact us by email at [ombudsperson@dal.ca](mailto:ombudsperson@dal.ca), by phone at (902) 494-6583 or visit us online at [www.dal.ca/ombudsperson](http://www.dal.ca/ombudsperson).

## 21. Registrar's Office

The Registrar's Office is responsible for high school liaison, admissions, awards and financial aid, registration, maintenance of student records, scheduling and coordinating formal examinations, and convocation. Of greater significance to students, however, is the role played by members of the staff who provide information, advice, and assistance. They offer advice on admissions, academic regulations and appeals, financial aid and budgeting and the selection of programs. In addition, they are prepared to help students who are not quite sure what sort of assistance they are looking for, referring them as appropriate to departments for advice about specific major and honours programs or to the office of Student Services or to specific service areas such as the Counselling Services Centre.

Students can access the services of the Registrar's Office at three locations. The main office is located in Room 133 of the Henry Hicks Academic Administration Building on the Studley Campus. Students attending classes on the Sexton or Agricultural Campus can also access Registrar's Office services in Building B

(Student Service Centre), Sexton Campus or Cox Institute (Enrolment Services Centre), Agricultural Campus.

Enquiries may be directed to:

The Registrar, Dalhousie University  
PO Box 15000  
Halifax, NS Canada B3H 4R2  
Telephone: (902) 494-2450  
Fax: (902) 494-1630  
Email: [admissions@dal.ca](mailto:admissions@dal.ca)

## 22. South House

A DSU service and Halifax's only full-time women's centre. A volunteer-driven, student-funded, gender-inclusive safe space for all members of the Dalhousie community. South House is a trans- and queer-positive, wheelchair-accessible space that offers a resource centre, library, and free meeting space for woman-positive and anti-oppression organizing and gathering. Visit us online at [www.dalwomenscentre.ca](http://www.dalwomenscentre.ca) or drop by the Centre on the first floor of 6286 South Street.

## 23. Student Advocacy Service

The Dalhousie Student Advocacy Service helps ensure that students receive fair and reasonable decisions on issues dealing with academic appeal and discipline matters. Our volunteer advocates advise students about their case, help them draft and edit any written submissions, prepare them for hearings and formal appeals, and provide support through the process and articulates matters of importance during the oral hearing. This year-round service is confidential and operated entirely by students. Contact us at the Student Union Building (Room 310), by phone at (902) 494-2205 or visit us online at [www.dsu.ca](http://www.dsu.ca)

## 24. Student Clubs and Organizations

Extracurricular activities and organizations at Dalhousie are as varied as the students who take part in them. Organizations range from small informal groups to large well organized ones; they can be residence- based, within faculties, or university wide and interest based. Some are decades old with long traditions, others arise and disappear as students interests change. A list of clubs, societies and organizations is available every fall to new students who are encouraged to select and participate, this list can be found at <http://tigersociety.dsu.ca>. If there is not a society that meets your interests, the Dalhousie Student Union encourages and will help you to make your own. For more information on DSU societies please contact the society co-ordinator at [society.coordinator@dal.ca](mailto:society.coordinator@dal.ca) or by telephone at (902) 494-1106 or visit [www.dsu.ca](http://www.dsu.ca).

## 25. Student Dispute Resolution

Dalhousie's Office of Student Dispute Resolution works with students, community and campus partners to help resolve disputes in a restorative and respectful manner. Referrals come from Campus Security, Code of Conduct Complaints, Halifax Regional Police and the Crown Prosecutors Office (as part of the Dalhousie Restorative Justice Pilot Project) and from Residence Life Managers. Following the principles of respect, responsibility and community, we work with groups to help restore relationships and find satisfactory resolutions. Visit us online to find out more about the resources available through the Student Dispute Resolution office at [www.dal.ca/think](http://www.dal.ca/think).

## 26. Student Health Promotion

Located in the Live Well @ Dal office just inside Dalplex's main lobby, Student Health Promotion staff and volunteers can give you unbiased advice and information to help you live a healthier lifestyle. Find out more about quitting smoking, rethinking your alcohol and substance use, managing your stress, increasing your personal fitness, coping with eating disorders and many other areas of student wellness by contacting us by phone at (902) 494-6830 or visit us online at [www.dal.ca/studenthealth](http://www.dal.ca/studenthealth).

## 27. Student Services

The Vice-President, Student Services (VPSS), is Dalhousie University's chief officer of student affairs. Working with an integrated team of specialists across campus, the office of the VPSS coordinates programs and delivers services in support of students' academic achievement, personal and professional development and community engagement.

Our efforts to enrich the Dalhousie student experience are focused in four key areas: Learning Connections; Community Connections; Wellness Connections;

and Leadership and Career Connections. Within each area, professionally trained staff, counsellors and advisors are available to assist you at every step of your journey here at Dal, providing information, resources, programs and services that are tailored to your individual needs and consistent with your educational and life goals.

## 28. Studying for Success (SFS)

Our primary goal is to assist you in becoming a more efficient and effective learner. Studying for Success offers workshops to small groups of students to develop or enhance personal learning strategies and, when applicable, workshops are customized to focus on particular disciplines or fields of study ensuring that the workshop content is relevant to your needs.

Topics regularly covered include time management, getting the most from lectures, critical reading, problem-solving, preparing for and writing exams. Study Skills coaches offer personal coaching either by appointment or on a drop-in basis during regularly scheduled hours, and will refer students to other academic resources when appropriate. For further information, drop by our office at the Killam Library, call (902) 494-3077 to book an appointment or (902) 494-2468 to speak with the SFS Coordinator, or visit us online at [www.dal.ca/sfs](http://www.dal.ca/sfs).

## 29. University Bookstore

The University Bookstore, owned and operated by Dalhousie, is a service and resource centre for the university community and the general public. The Bookstore has required and recommended texts, reference books and supplies, as well as workbooks, self-help manuals and other reference material. As well, you can find titles by Dalhousie authors.

The Bookstore carries all necessary and supplementary stationery and supplies. Also available are gift items, mugs, clothing and crested wear, cards, jewelry, class rings and backpacks with new items being introduced on a regular basis. A Special Order department is located within the main Bookstore where you can place orders for customized clothing and customized general merchandise. We can also order and ship almost any book worldwide and work with faculties and departments to meet their specific needs.

The main Bookstore is situated on the lower level of the Student Union Building on University Avenue, and is open year round, Monday to Saturday (hours vary throughout the year).

The Health Sciences Bookstore has the largest and most complete medical book section in Atlantic Canada, with over 2,000 titles in stock. Thousands of other titles are specially ordered annually, and the department ships out books to consumers and hospitals throughout the world. The Health Sciences Bookstore is located in the Dentistry building, 5981 University Avenue, and is open year round, Monday to Saturday. Hours vary throughout the year.

The Sexton Campus Bookstore is located in the Student Service Centre at 1360 Barrington Street (Building B) and is open from 9am - 4pm Monday to Friday. It supplies texts and reference books required for Architecture and Engineering students as well as crested clothing, stationery and other supplies.

The Dalhousie Agricultural Campus Bookstore is located in the Cox Institute at 50 Pictou Road, Room 142, Truro. The bookstore is open year round Monday to Friday. Hours vary throughout the year and is closed for a couple times during the summer months for about a week.

The Bookstore website has online ordering capabilities, for both textbooks and general merchandise. Visit the Bookstore online at [www.dal.ca/bookstore](http://www.dal.ca/bookstore).

## 30. University Health Services

The University operates a medical clinic in Howe Hall, 6230 Coburg Road (corner of LeMarchant and Coburg), staffed by family doctors and nurses. Further specialists' services are available and will be arranged through Health Services when indicated. Student information collected by Health Services is completely confidential and may not be released without signed permission of the student.

Appointments are made during the clinic's open hours, from 8:30 am to 10:00 pm, Monday to Friday and 10:00 am to 6:00 pm, Saturday and Sunday, by calling (902) 494-2171. In the event of an urgent medical problem, students may seek medical advice during clinic hours. After hours, students should seek assessment by calling 811 to speak to a registered nurse, or visit the local emergency room. The QEII emergency room on Summer Street is the closest emergency room for students on the Halifax campus. For students in Truro, the clinic accepts walk-in patients and appointments. For details on the hours the services are offered, please

visit Health Services online via [www.dal.ca/agstudentservices](http://www.dal.ca/agstudentservices). Any student who has had a serious illness within the last 12 months, or who has a chronic medical condition, may wish to contact and advise Health Services; preferably with a statement from the doctor.

All students must have medical and hospital coverage. All Nova Scotia students are covered by the Nova Scotia Medical Services Insurance. All other Canadian students must maintain coverage from their home provinces. This is especially important for residents of any province requiring payment of premiums. All non-Canadian students must be covered by medical and hospital insurance prior to registration. Details of suitable insurance may be obtained from the Student Accounts office prior to registration. Further information is available online at [www.dal.ca/healthservices](http://www.dal.ca/healthservices).

### 31. University Secretariat

The University Secretariat provides professional and administrative support and advice to the Board of Governors and University Senate so as to facilitate their effective governance of the University.

The Secretariat manages, coordinates and informs the effective operation of the Board and Senate by:

- Supporting the operations of the University's governance bodies and their respective standing and ad hoc committees;
- Proposing and developing objectives and plans to establish and achieve priorities;
- Advising on governance issues and developing and implementing policies, procedures and processes that reflect governance best practices;
- Developing, implementing, managing and coordinating the University academic integrity, student discipline & academic appeals policies and processes, and maintaining official records relative to these processes;
- Serving as a repository for University policies and information and data on matters relating to University governance; and
- Facilitating communication and collaboration with key stakeholders.

Visit the website at [www.secretariat.dal.ca](http://www.secretariat.dal.ca)

### 32. Writing Centre

The Writing Centre's programs recognize that students in all disciplines are required to write clearly to inform, persuade, or instruct an audience in term papers, laboratory reports, essay examinations, critical reviews and other academic assignments. Students benefit from discussing their work with supportive instructors and peer tutors.

The Centre currently offers a number of services. The main office in the Killam Library's Learning Commons allows students to obtain advice on writing issues. Tutors also work part of the week at Sexton and the Law School Library. Students on the Agricultural Campus can visit the Writing Centre on the main floor of the library. Seminars are held throughout the university year on topics such as essay writing, science writing, mechanics of writing, English as a second language issues, admission applications, etc.

Contact the Writing Centre by visiting the main office in the Killam Learning Commons, calling (902) 494-1963 or emailing at [writingcentre@dal.ca](mailto:writingcentre@dal.ca). For more information, online writing resources or to book an appointment online, visit [www.dal.ca/writingcentre](http://www.dal.ca/writingcentre).

#### March

10 Last day for partial refund for winter term

NOTE: Please consult the online summer school timetable for the summer school registration schedule.

### Website

<http://www.moneymatters.dal.ca>

## I. Introduction

The following section of the calendar outlines the University Regulations on academic fees for both full-time and part-time students enrolled in programs of study during the fall, winter and summer terms. A section on University residence and housing fees is also included. Students wishing to register for the summer term should consult the summer school timetable online at <http://www.dal.ca> for information on registration dates and fees.

All fees are subject to change with approval of the Board of Governors of Dalhousie University. The 2013/2014 Academic Fee Schedule will be available in June 2013, at <http://www.moneymatters.dal.ca>.

NOTE: Student tuition fees and other fees published herein are applicable only to regular students admitted to a program through the normal application process.

Other students who are admitted to Dalhousie under a special program or policy will be charged student tuition and other fees in accordance with such special program or policy. For further information regarding these fees, please contact Student Accounts or the Dean's office of the applicable faculty.

Students should make special note of the academic dates contained in the front section of the calendar as well as fee dates. Students should also be aware that additional fees and/or interest will be charged when deadlines for payment of fees as contained herein are not met.

All the regulations in this section may not apply to Graduate Students. Please refer to the Faculty of Graduate Studies section of the Graduate Calendar.

## II. University Regulations

The following general regulations are applicable to all payments made to the University in respect of fees. Please refer to our website for additional information on payment options: <http://www.moneymatters.dal.ca>.

- Fees must be paid in Canadian funds by cash, electronic bank transfer, interac, negotiable cheque or money order.
- Money transferred to a student's account should not exceed the annual charges associated with tuition and ancillary fees.
- If payment by cheque is returned by the bank as non-negotiable, there will be an additional fee of \$20 and the account will be considered unpaid. Furthermore, if the bank returns a cheque that was to cover payment of tuition, the student's registration may be cancelled and, if permitted to re-register, a late fee will apply.
- Accounts in arrears must be paid by cash, certified cheque, money order or interac prior to registration in a future term.

### A. Admission Deposits

A non-refundable deposit of \$200 is payable on acceptance to all new undergraduate and graduate programs. Undergraduate students admitted by April 20 are required to pay the deposit by May 15. Undergraduate students accepted after April 20 must pay the deposit within three weeks of receiving an offer of admission. Graduate students must pay the deposit within four weeks of receiving an offer of admission.

Undergraduate Medicine students are required to pay a \$500 non-refundable, admission deposit.

International Dentistry, Qualifying Dentistry and Internetworking students are required to pay a \$2,500 non-refundable admission deposit.

Admission deposits are credited towards tuition and fees for the applicable term.

### B. Registration

A student is considered registered after selection of class(es).

Selection of class(es) is deemed to be an agreement by the student for the payment of all assessed fees.

Non attendance does not constitute withdrawal. Students must ensure that they cancel registration in all classes if they choose to withdraw.

#### 1. Identification Cards (DalCard)

All full and part-time students should obtain identification cards upon registration and payment of appropriate fees. If a card is lost, a fee of \$15 is charged. Regular session ID cards are valid until August 31.

#### 2. Audit Classes

All students auditing a class pay one-half of the regular tuition fee plus full auxiliary fees, if applicable. In such cases, the student is required to complete the usual registration process.

A student who is registered to audit a class who during the session wishes to change their registration to credit must receive approval from the Registrar. This must be done on or before the last day for withdrawal without academic penalty. The same deadline applies for a change from credit to audit. Graduate students please see Section 6.6.4 for audit information.

### C. Late Registration

Students are expected to register on or before the specified registration dates. Students wishing to register after these dates must receive the approval of the Registrar. A late registration fee of \$50 will apply if registration and payment of

fees has not been completed by specified dates. This fee is payable at time of payment and will be in addition to regular fees.

## 1. Class Changes and Withdrawals

Please consult Student Accounts for all financial charges and the Registrar's Office for academic regulations.

Students withdrawing from all classes must submit written notification to the Registrar's Office. Non attendance does not constitute withdrawal, you must ensure classes are dropped. Refunds due to class withdrawals will be effective the date a class(es) is dropped online at <http://www.dal.ca/online> or written notification is received at the Registrar's Office. Please contact Student Accounts to have your refund processed.

In the Faculty of Health Professions, students who wish to withdraw from the University must obtain written approval from the appropriate school or college and submit the appropriate forms to the Registrar. Students in these faculties should continue to attend class until their withdrawal has been approved.

## D. Academic Fees

**Note: These rates are for 2012/2013 (for information only)**

### 1. Fee Schedule

Upon approval of the 2013/2014 academic fees, a complete schedule showing the required payments of the academic fees and deposits will be made available. The official schedule will be available in June 2013 at <http://www.moneymatters.dal.ca>. Students are advised that fees are subject to change by approval of the Board of Governors, and it is likely that tuition and fees will increase during each year of study.

NOTE: Students registered in more than one program are required to pay separate academic fees for each program. Additional course specific auxiliary fees may apply, as well as fees for online courses (or programs) related to distance delivery.

The 2012/2013 fee schedule currently online is expected to be updated in June of 2013 with the approved academic fees for 2013/2014.		

## 2. Exchange Students

Outbound exchange students whose fees are paid to Dalhousie University will be assessed tuition and fees for 15 credit hours in their faculty.

## E. International Students

### 1. Differential Fee

Registered students, who are not Canadian Citizens or permanent residents are required to pay an additional "Differential Fee" to a maximum of \$3,981 per term, subject to increase in 2013/2014. There is a proportional charge for part-time international students. International Dentistry, Qualifying Dentistry and Internet working students are exempt. Graduate Students please see Section 5.7 of the Graduate Studies Calendar to determine the number of years a student is required to pay the differential fee.

If a student receives landed immigrant status, the differential fee will not be assessed for the current term and beyond. In order to process a retroactive reimbursement of differential fees in a current term, acceptable proof of residency must be submitted to the Registrar's Office prior to the last business day of December, April, and August for each term.

## 2. Health Insurance

International students will be charged for an International Student Health Insurance Plan when they register. If a student already has comparable health coverage, they can apply to opt out of the International Student Plan at the DSU Health Plan Office before September 20, 2013. Costs for the health plan change annually. More details on the international student health plan costs and opt out process can be found at [www.dsu.ca](http://www.dsu.ca). Full-time students will also be assessed the extended DSU Health and Dental plans, see 11.F.2.

Health Insurance - International Students (2012/2013 rates, for information only)

- Single - \$491 per year
- Family - \$1,227 per year

## F. Student Fees

In addition to tuition and course related fees, the following mandatory incidental fees may apply. These fees are non-refundable beyond the due date for each term. In cases of late cancellations or retro-active withdrawal, the mandatory incidental fees remain payable.

### 1. Student Union Fee

Every student registered at Dalhousie is a member of the Student Union and required to pay a Student Union fee as part of their registration procedure. These fees have been approved by students in referenda and, along with other revenue of the Union, are allocated each year by the Student Council budget.

For information only, 2012/2013 full-time student union fees are \$60.90 per term.

### 2. Health and Dental Insurance

Every fall term, full time students are assessed the DSU Health and Dental Plan. This provides extended coverage from September through August. The current rate is \$253 per year.

Students with separate health insurance may apply to the DSU for reimbursement. For more information please contact the Student Union Office in Room 222 of the Student Union Building (SUB), phone: (902) 494-2850 or visit their website at <http://www.dsu.ca>

### 3. Student Service Fee

Student Service provides and supports various Dalhousie Services including health services and athletics. For information only, 2012/2013 Student Service fee is \$123 per term for full-time students.

The following services will be provided without additional charges unless specified:

- Change from Audit to Credit
- Confirmation of Enrolment
- Confirmation of Fee Payment
- Dalplex Membership
- Leave of Absence Fee
- Letter of Permission
- Replacement Tax Receipt
- Transcripts (maximum of 5 requested at one time)

All students are assessed a facilities renewal fee of \$75 per term; \$25 per term for part-time students. 2012/2013 rates provided for information only; subject to increase with approval from the Board of Governors.

### 4. University Bus Pass Fee (UPass)

All eligible, full-time students will receive a Metro-Transit bus pass (UPass). The fee in 2012/2013 is \$142.50 and is effective September through April. Please refer to <http://www.upass.dal.ca> for further information.

### 5. Laboratory Deposits

A deposit for the use of laboratory facilities in certain departments is required. The deposit is determined and collected by these departments. Students will be charged for careless or willful damage regardless of whether or not a deposit is required.

### 6. Additional Student Fees

Departments may also charge additional fees on a cost recovery basis not included in the fee schedule. Examples include, but are not limited to, print or copy fees, transportation costs and material fees. Students registered in online classes and distance programs will be assessed additional fees for delivery of these classes.

Miscellaneous fees are charged as outlined in the table below.

Miscellaneous Fees 2012/2013		
Fee	Amount	Payable at
Late Registration	\$50	Student Accounts
Reinstatement Fee	\$50	Student Accounts
Returned Cheque	\$20	Student Accounts
Admission Deposit	\$200	Student Accounts
Undergraduate Medicine Admission Deposit	\$500	Student Accounts
Application Fee	*\$65	Registrar
Late Graduation Application	\$50	Registrar
Replacement ID	\$15	DalCard Office
Replacement Bus Pass	\$15	DalCard Office or Student Accounts
Transcript	**\$5	Registrar
Fax Fees		
Metro	\$5	Registrar

** Where appropriate, contact Registrar's Office for details		
Note: Fees are subject to change after publication of this calendar.		

## G. Statements and Monthly Notices

Students with current activity will be issued electronic statements. Students will be notified through their official Dalhousie email account when a new statement is available. Subsequent monthly payment reminders will be sent to the student's official Dalhousie email address. Refer to <http://www.moneymatters.dal.ca> for more information.

## H. Release of Student Financial Information

Student Accounts is often asked to disclose financial information on a student's account by parents and others so they can make accurate tuition payments.

University policy recognizes the financial account as belonging to the student and therefore, to protect student privacy, account information is considered confidential. For more information on granting permission for financial information to be released to a third party (such as a parent), please contact Student Accounts at (902) 494-3998 or visit our website at <http://www.moneymatters.dal.ca>.

## I. Payment

The payment of academic fees will be received at the Student Accounts Office located on the basement level of the Henry Hicks Academic Administration building or the Student Service Centre on Sexton Campus.

For the convenience of students, Canadian cheques and money orders, payable to Dalhousie University, are accepted by mail. Fees paid by mail must be received by Student Accounts on or before the term due date to avoid late payment and/or delinquency charges.

The following regulations apply to the payment of academic fees. For further information on regulations regarding withdrawal of registration, please refer to II.K:

- All students must pay the applicable deposit in accordance with Section A.
- Those holding external scholarships or awards paid by, or through, Dalhousie must provide documentation of the scholarship or award before term fees are due.
- Those whose fees are paid by a government (or other agency) must have the third party billing form completed and submit to Student Accounts by September 20 or January 17 for the respective term. This form is available online at <http://www.moneymatters.dal.ca>

- d. Those paying the account balance by Canada Student Loan must negotiate the loan by September 20 or January 17 for the respective term. Interest will be charged after these dates and a late registration fee will apply.
- e. Those whose fees are paid by Dalhousie University staff tuition fee waiver must present the appropriate waiver form and pay applicable incidental fees by September 20 or January 17, for the respective term.
- f. Those who are Canadian citizens (or permanent residents), 65 years of age (or over) and enrolled in an undergraduate degree program will have their tuition fees waived, but must pay the applicable incidental fees.
- g. Scholarships or awards paid by, or through, Dalhousie University will be applied to academic and residence fees.
- h. When a Canada Student Loan, provincial loan or co-payable bursary is presented at the Student Accounts Office, any unpaid charges will be deducted.
- i. Fees cannot be deducted from salaries paid to students employed at Dalhousie University.
- j. Any payments made to a student account is first applied to past due balances.

## 1. Canada Student Loans

Students planning to pay by Canada Student Loan should apply to their province in April or May so that funds will be available by the time payment is required. The University will deduct fees/charges from the loan at the time of endorsement. Please contact the appropriate provincial office to determine eligibility as well as course load requirements. A late fee of \$50 will apply if the loan is negotiated after September 20, 2013, (January 17, 2014 for students registered for winter term and May 12, 2014 for students registering for the summer term).

## 2. Provincial Bursaries and University Scholarships

These cheques are distributed by the Student Accounts Office. Any unpaid fees and/or temporary loans along with charges, if applicable, are deducted and payment will be issued following endorsement for any balance remaining. A valid Dalhousie University ID and Social Insurance Number must be presented in order to receive cheques. Please contact the appropriate provincial office to determine eligibility as well as courseload requirements for provincial bursaries.

For more information on student loans, bursaries or scholarships, inquiries should be directed to the Registrar's Office, Henry Hicks Academic Administration Building, Room 130.

## J. Receipts

The amount of academic fees constituting an income tax credit is determined by Canada Revenue Agency.

A special income tax certificate (T2202A) will be available annually through Web for Student at <http://www.dal.ca/online> no later than February 28 for the previous calendar year.

## K. Refunds

**Students withdrawing from all classes must submit written notification to the Registrar's Office. Non attendance does not constitute withdrawal, you must ensure classes are dropped. Refunds due to class withdrawals will be effective the date a class(es) is dropped online at <http://www.dal.ca/online> or written notification is received at the Registrar's Office. Please contact Student Accounts to have your refund processed.**

In the Faculty of Health Professions, students who wish to withdraw from the University must obtain written approval from the appropriate school or college and submit the appropriate forms to the Registrar. Students in these faculties should continue to attend class until their withdrawal has been approved.

### 1. Refund Conditions

Refunds will be processed as follows:

- a. Based on the withdrawal date, tuition is refunded based on percentages outlined in the refund schedule at <http://www.moneymatters.dal.ca>.
- b. No fee adjustment will be made for a student changing their degree or program as follows:
 

Regular (Sept - April) and Fall Terms	After September 20
Winter Term	After January 17
Summer Term	After May 12
- c. No refunds will be made for 30 days when payment has been made by personal cheque or 60 days for a cheque drawn on a bank outside of Canada.
- d. Refunds will be made to the appropriate Student Loan service provider if a student has paid with a student loan and no longer meets eligibility criteria.

- e. A student who is dismissed from the University, for any reason, is not entitled to a refund of fees.
- f. Refunds will be prorated on fees paid by Dalhousie scholarships and/or tuition waiver.
- g. A valid Dalhousie University ID must be presented in order for the student to receive a refund.

## 2. Refund Schedule

The most current version of the refund schedule is available at [www.moneymatters.dal.ca](http://www.moneymatters.dal.ca)

### Important Information Regarding Refunds

- A portion of fees as outlined in the refund schedule will be assessed if withdrawal from a class occurs after September 20 (Fall Term) and January 17 (Winter Term). Withdrawals before these dates will be completely refunded, but no substitutions will be allowed from a financial perspective after these dates.
- Non-attendance does not constitute withdrawal and fees will be payable.
- The refund schedule does not apply to the University of King's College Journalism Program.
- For financial charge inquiries, contact Student Accounts at (902) 494-3998 or [Student.Accounts@dal.ca](mailto:Student.Accounts@dal.ca).

## L. Delinquent Accounts

Accounts are considered delinquent when the balance of fees has not been paid by September 20 for the fall term or January 17 for the winter term.

Interest, at a rate set by the University, will be charged weekly on delinquent accounts for the number of days overdue.

Effective July 1, 2012 the rate of interest is 6.0% per annum, compounded monthly.

A student whose account is delinquent for more than 30 days will be denied University privileges including access to transcripts. A student will be reinstated upon payment of the fees outstanding, the arrears interest and a \$50 reinstatement fee. Students will not be permitted to register in future terms until all outstanding amounts are paid in full. Subsequently, if the bank does not honour the payment, the student may be deregistered.

Graduating students whose accounts are delinquent on April 15 will not receive their degree/diploma parchment. For fall graduation the deadline is September 1. Transcripts are withheld until payment is received in full.

Accounts which become seriously delinquent may be placed in collection or further legal action may be taken against the individual. Students will be responsible for charges incurred as a result of such action.

## III. Residence Fees

Residence rates vary depending on the location and style of accommodations available. For up-to-date residence options and rates, please visit <http://www.dal.ca/residence>. All residence rates include local telephone service with voice mail features, cable TV service and ResNet (high-speed Internet/wireless). Rates **do not** include the non-refundable \$50 Residence Application Fee or, in the case of traditional residences, the Residence Council Fee.

It is important to note that traditional residences have a mandatory meal plan; however, there are several options available for students. Traditional residences on the Halifax campuses include: Howe Hall, Risley Hall, Shirreff Hall, Eliza Ritchie Hall, Gerard Hall, O'Brien Hall, Mini Residences and Residence Houses. Traditional residences on the Truro campus include: Chapman House, Fraser House, and Trueman House. Non-traditional residence options on the Halifax campuses include: Glengary Apartments and the Grad House. On the Truro campus a section of Trueman House is reserved for non-traditional accommodations. Meal plans are not required in non-traditional residences but are recommended. For up-to-date meal plan options and rates, please visit <http://www.foodservices.dal.ca>.

Important:

- Once offered admission to an academic program of study at Dalhousie, students are eligible to submit a residence application with the required \$50 non-refundable fee. **The application will not be processed until both the \$200 admission deposit and \$50 residence application fee have been paid.**
- Students must be registered full-time at Dalhousie to apply to residence.

- No refund will be made to any resident who is dismissed for misconduct. Discretionary power in exceptional circumstances remains with the Director, Residence Operations, in conjunction with the Director, Residence Life or their designates.
- All residence students, new and returning, who have received notification of their room assignment, must pay a \$500 deposit to confirm their acceptance. The deposit is due within the time frame specified by the Residence Office.
- The \$500 deposit is non-refundable.
- The \$50 residence application fee and \$500 deposit can be paid by credit card (Mastercard, Visa, Amex) by visiting <http://www.dal.ca/admissions.html>. For more payment options, please visit [www.dal.ca/admissions.html](http://www.dal.ca/admissions.html).
- No residence room will be held based on post-dated or “insufficient fund” cheques.
- Deposits or fees cannot be deducted from scholarships, fellowships, or similar awards.
- Residence agreements are for 8-month terms (September – April). Please note, residences close during the December break.

## A. Residence Term

The residence term commences the day before classes begin in September in the College of Arts and Science and ends on the last day of the examination period in the College of Arts and Science in April. Students must vacate the residence 24 hours after their last exam and residences are closed over the December break.

If required, an additional fee is payable by all residents who are registered in a Faculty where the academic session commences before or continues after the session of the College of Arts and Science. Special arrangements are to be made with the appropriate Residence Life Manager for accommodation for periods prior to or following the session as defined above.

## B. Payment of Residence Fees

Payment may be made in full at registration or in two instalments. The first instalment must be paid in full by September 20, 2013. Interest is assessed weekly at a rate as set by the University and will be charged on all accounts outstanding after September 20, 2013 and on any second instalment outstanding after January 17, 2014. The student will not be permitted to register for another session until all accounts are paid in full. A student whose account is delinquent for more than 30 days will be denied university privileges including access to transcripts. The student will be reinstated upon payment of the fees outstanding, the arrears interest, and a \$50 reinstatement fee. For additional information regarding outstanding or delinquent accounts, please see II. Fees, Section K.

All residence fees can be paid at the Student Accounts Office, the Student Service Centre (Sexton Campus), or online at <http://www.dal.ca/admissions.html>.

Students should make an appointment as soon as possible with the Assistant Manager of Student Accounts if they are having financial difficulties.

## C. Residence Communications

All residences are wired for high-speed Internet/wireless, local telephone service and cable TV access. The cost is included in residence fees. Check out the website at <http://www.dal.ca/rescomm>.

# Awards

## Scholarships, Awards, Financial Aid and Bursaries

The Registrar's Office is responsible for:

- Undergraduate Scholarships
- Undergraduate Bursaries
- Temporary Loans
- Canada Student Loans
- Provincial Loans
- US Dept. of Education Loans
- Awards and Financial Aid Advice & Information

**IMPORTANT NOTE:** The University is reviewing the policy governing undergraduate awards. Consequently, portions of the following statement of policy may be modified or substantially altered and may be implemented during the class of the academic year of this Calendar.

### A. Some Helpful Terms

#### 1. Admissions Average

This is the average of the subjects which were used for entry to the Dalhousie academic program and is governed by admission requirements for the degree/diploma selected.

#### 2. Adjusted Average

This number is the sum of the Admissions Average, plus points which are assigned to the level of class difficulty and the number of university-preparatory subjects beyond the minimum five.

#### 3. Faculty Groupings

There are eight: agriculture, architecture and planning; arts and social sciences; computer science; engineering; health professions; management; and science.

### B. Types of Awards

1. **Scholarships:** A monetary award, at entrance or in-class and/or graduating level based on academic excellence (in specific subject or group of subjects) and on the recognition of additional relevant attributes.
2. **Bursary:** An award granted on the basis of financial need.
3. **Medal:** An award based on recognition of an outstanding academic record at Dalhousie for a specific degree program in a particular subject.
4. **Prize:** A monetary award of any value, or a non-monetary award, based on general academic excellence, or proficiency in a specific area of study or competition.
5. **External Award:** An award given to the student of the university by an external agency. (The University may share in the selection, administration and/or payment of such an award).

### I. General Policy

Applicable to those awards administered by the Registrar's Office. Selection criteria may be different for those awards administered by individual faculties/schools/departments.

#### A. Where Dalhousie Scholarships can be Used

Dalhousie University scholarships can be used only at Dalhousie unless the Will or Trust Deed should otherwise permit. (The University of King's College has its own scholarship program.) Insofar as scholarships, bursaries and governmental student loans are concerned, Dalhousie and King's are separate. In order to receive Dalhousie funds you must be a registered Dalhousie University student.

### B. Portability of Undergraduate Scholarships

Many entrance and in-class scholarships are portable among all Dalhousie undergraduate programs. Please contact the Awards Office prior to changing programs.

### C. Scholarship Payments and Rebates

To receive scholarship funds, a student must be registered at least as a full-time student (minimum nine credit hours) at Dalhousie during the term(s) in which they are receiving the funds. Students registered in Graduate Studies, Medicine, Law and Dentistry (with the exception of Diploma in Dental Hygiene students), are ineligible to receive in-class scholarships or renew an existing scholarship. These faculties have their own awards programs.

1. **Payments:** Dalhousie University scholarships of \$3,000 or greater are credited towards students' accounts in two installments first and second term. Awards less than \$3,000 are credited in full first term. Awards are applied first to tuition and prescribed fees, and secondly for residence fees.
2. **Rebates:** The portion of scholarship money in excess of the above charges will be refunded to the student. Refunds are made by the Student Accounts Office in late October.

### D. Award Duration

Dalhousie offers both renewable and non-renewable Entrance Awards. Non-renewable awards are held for one year. Renewable entrance awards are typically renewable for a maximum of four years. Holders of renewable awards are notified of either the renewal or the non-renewal of their awards. Please note that holders of renewable scholarships are NOT also entitled to hold Dalhousie in-class scholarships. (Please also refer to section "Graduation and Renewable or In-Class Scholarships" on page 616.)

### E. Eligible Classes for Scholarship Assessment

The Registrar's Office (Awards) considers those Dalhousie classes which are taken for credit in a designated degree/diploma program during the academic year (or term in the Co-op program) as eligible classes for scholarship assessment.

Correspondence classes are considered for scholarship purposes.

Unless taken on Letter of Permission, transfer credits do not count towards the credit hours reviewed for scholarship assessment.

Please note that classes taken at other institutions are counted, to a maximum of one class per term, for scholarship assessment if such classes are taken on Letter of Permission towards an eligible degree/diploma at Dalhousie.

### F. Scholarship GPA Calculation

The Scholarship GPA (SGPA) will be calculated for students who have completed a minimum of 30 credit hours of work over two terms within the preceding academic year. The Scholarship GPA will include all eligible classes attempted during this time period. Please note that the Scholarship GPA and the Sessional GPA normally differ.

The Scholarship GPA, expressed to two decimal places, does **not** show on a student's transcript.

### G. Renewable Scholarships

Unless otherwise advised, an SGPA of 3.70 is required to maintain a renewable scholarship. Students must complete a full class load (a minimum of 30 credit hours) over two terms within the previous academic year and achieve a minimum SGPA of 3.70 to be considered eligible for renewal. Co-op students who are on a work term during the calendar year, must also complete 30 credit hours over two terms to be eligible. Students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term and achieve a minimum term GPA of 3.70 to be considered. In those cases where students have taken more than 30 credit hours, assessment is based on all classes taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment.

Students who fail to re-qualify for their renewable scholarship will be notified in writing or via email. If a student achieves the required 3.70 SGPA in the next academic year, or in any academic year within four of the original offer, the scholarship will be reinstated.

Students registered in Graduate Studies, Medicine, Dentistry (with the exception of Diploma in Dental Hygiene students), or Law are ineligible to receive in-class scholarships or renew an existing scholarship.

## H. Qualifying for In-Class Scholarships

All undergraduate Dalhousie students not on a renewable scholarship, in eligible programs in the participating faculties, who have completed a full class load (a minimum of 30 credit hours) over two terms within the previous academic year and achieved a minimum SGPA of 3.70 will be considered eligible for in-class scholarships. Co-op students who are on a work term during the calendar year, must also complete 30 credit hours over two terms to be eligible. Students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term and achieve a minimum term GPA of 3.70 to be considered eligible. In those cases where students have taken more than 30 credit hours, assessment is based on all classes taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment.

Students registered in Graduate Studies, Medicine, Dentistry (with the exception of Diploma in Dental Hygiene students), or Law are ineligible to receive in-class scholarships or renew an existing scholarship.

## I. International Exchanges

Students who have permission to study for one or two terms outside of Canada in an approved exchange program, and are considered to be full-time (normally 30 credit hours), can be considered eligible for in-class or renewable scholarship assessment.

Please direct specific questions to the Registrar's Office - Awards.

## J. Scholarship Assessment

Students on renewable scholarships will be assessed for renewal in either June or September depending on completion of two academic terms. All other undergraduate students are assessed for in-class scholarships in June or September depending on completion of two academic terms.

## K. Changing Degree Programs

Changing degree/diploma programs can have implications for scholarship consideration. Scholarship holders considering degree changes should consult the Registrar's Office - Awards.

## L. Reduced Class Load and Retention of Scholarship

Scholarship holders considering taking a reduced class load should consult the Registrar's Office - Awards. Students must complete a minimum of 30 credit hours over two terms within the academic year to qualify for renewal of their scholarships or an in-class scholarship. Also refer to sections G and H.

## M. Record of Scholarships

Awards are recorded on academic transcripts. The University retains the right to reassign the source funding of a student's scholarship as circumstances may warrant (but there would be no reduction in the amount).

## N. Graduation and Renewable or In-Class Scholarships

If you hold a renewable scholarship and you choose to graduate earlier than originally expected, and then you decide to return to upgrade your degree to a four-year degree, you must submit a request to access your scholarship for the final year. In addition, if you graduate and then decide to upgrade your degree, you cannot be assessed for an in-class scholarship until a further 30 credit hours over two terms within the same academic year is completed and a minimum SGPA of 3.70 is achieved.

## O. Transfer Students

With the exception of the First Nations & Indigenous Black Students Entrance Scholarship, transfer students are ineligible for scholarships in the year of transfer. After one full year, students would be considered on the same basis as other students for in-class awards. Please refer to section H. Qualifying for In-Class Scholarships.

## P. Taxation

As long as you are a registered full or part-time student, you are not required to claim financial awards (i.e. scholarships, bursaries) as income on your taxes.

## Q. Withdrawing

Award funds are credited to your student account with the expectation that you will remain registered at Dalhousie at least as a full-time student (minimum nine credit hours) within the applicable term. Therefore, if you reduce your class load or withdraw, these funds are expected to be returned to the University. However, depending on the time of the withdrawal, you may be entitled to retain a prorated portion of the scholarship. Contact us prior to your withdrawal and we can review your specific circumstances.

## R. Scholarship Appeals

The deadline to appeal a scholarship decision for an entrance/in-class/renewable scholarship or entrance bursary is October 31.

Students may appeal under the following grounds:

- extraordinary or compassionate circumstances;
- unfair scholarship decision under the circumstances; and/or,
- inconsistent scholarship decision compared to other offers/decisions

Students must submit their appeal, in written form, to the Assistant Registrar, Awards, in the Registrar's Office, by the deadline noted above. The letter should clearly outline the grounds for appeal and the remedy being sought. Students should include documentation, if applicable, to support the basis of their appeal. The decision of the Appeals Committee is final.

## II. Entrance Awards

(Applicable to those scholarships administered by the Registrar's Office. Selection criteria may be different for those administered by individual faculties/schools/departments.)

1. Entrance scholarships are available to students applying to Dalhousie directly from high school. Transfer students are not eligible for entrance scholarships with the exception of the First Nations and Indigenous Black Students Scholarship. Entrants coming from Year II of a CEGEP are considered to be transfer students.
2. To be considered for entrance awards, applicants must submit a completed Dalhousie application for admission, a scholarship application including supporting documents (available through DalOnline), and an official transcript to the Registrar's Office by **March 15th**.
3. Students must be admitted, with a minimum 80% admission average (or 26 predicted points for IB diploma candidates), to one of the following faculties to be eligible for entrance award consideration: Architecture and Planning, Arts and Social Sciences, Computer Science, Engineering, Health Professions, Management or Science.
4. Students are first assessed for grades-based entrance scholarships using their first term final grades or midterm grades in the case of non-semestered schools.
5. An **admission average** is then calculated using the grades of the five classes required for admission to the applicable program.
6. An **adjusted average** is then calculated for all students which can add up to two additional points onto the admission average. Students can receive up to one additional point for taking/completing AP or IB level classes and up to another additional point for taking/completing more than the required five university-preparatory classes.
7. Eligible students who submit the scholarship application and supporting documents by March 15th will be evaluated for entrance awards based on some or all of the following criteria: academic merit, extra-curricular activities, financial need, initiative to fund your own education, and leadership experience. For more information visit [dal.ca/scholarships](http://dal.ca/scholarships).

## A. Entrance Scholarship Funds

It is University practice to distribute scholarships among as many students as possible.

Please note: Students entering the Faculty of Agriculture should refer to "Entrance Awards", "B. Faculty of Agriculture", page 614 ; for available entrance scholarships.

Please note: Students entering third year Engineering (including students entering from Associated Universities) should refer to “In-Class Scholarships”, section “F. Faculty of Engineering” for available scholarships.

## 1. Entrance Awards (application required)

Those awards marked with an asterisk (\*) are not administered by the Registrar's Office. All awards administered by the Registrar's Office require a minimum admission average of 80% and a General Entrance Award Application submitted by March 15th unless otherwise stated to be eligible.

### ***The Bissett Scholarship***

A scholarship valued at \$24,000 (\$6,000 per year) was established by Mr. David Bissett with the intention of encouraging scholastic achievement by providing an incentive to capable high school students. Candidates for the Bissett Scholarship must be graduating from Cole Harbour District High School in Nova Scotia and be eligible for admission to the first year of an undergraduate program leading to a first degree at Dalhousie University. They must also intend to pursue a program of full-time studies as Dalhousie. A nomination for a Bissett Scholarship will not interfere with consideration of the nominee for other University scholarships. A student may not, however, hold a Bissett Scholarship and another Dalhousie scholarship at the same time. Students must be nominated by their school to be considered for this scholarship.

### ***George Burris Scholarship\****

The scholarship was established by Mary Burris and Grace Burris in memory of their father, George Burris, to support Dalhousie students wishing to study in England as part of their academic program. Scholarships are awarded on the basis of academic and extracurricular excellence, financial need, and international experience.

Scholarships are open to Canadian students accepted into the First Year Study Abroad Program at the International Study Centre (ISC), at Herstmonceux Castle, England. Scholarship value: up to \$5,000. Interested students should complete an application a minimum of one month prior to departure, available from the International Student and Exchange Services Office.

### ***Dalhousie Alumni Leadership Association Scholarships***

A number of these scholarships, ranging in value from \$1,000 to \$2,000, are open to entering students who have achieved a good scholastic record at high school. An admissions average of at least 80% is required. Candidates must have played a leadership role in extracurricular activities such as community service, student government, athletics, or the visual or performing arts.

### ***DSU Accessibility Bursary***

The Dalhousie Student Union established this \$1,000 renewable bursary assistance for an entering Dalhousie student with a permanent disability and demonstrated financial need. This bursary is administered and awarded in combination with the Johnson Foundation Bursary. The recipient will typically receive \$1,000 from the DSU Bursary and an additional \$1,500 annually from the Johnson Foundation Bursary for a combined annual amount of \$2,500. To be considered, students must submit medical documentation regarding the nature of their disability, with a complete General Entrance Award application.

### ***Jeff D. & Martha Edwards Scholarship for Black Canadian & Bermudian Students***

Jeff Edwards was 21 in 1910 when he and many other blacks left Oklahoma for Canada seeking an escape from segregation and prejudice in the American South. He and his wife Martha homesteaded as pioneers at Amber Valley, Alberta where they raised 10 children and contributed enormously to the community. Mr. Edwards embraced his new citizenship with pride, and when he died in 1973 at the age of 90, was remembered as a proud Canadian citizen who epitomized the spirit of black pioneers who settled the Canadian West. While Hugh Maccagno established this scholarship to honour the memory of Jeff & Martha Edwards, he also dedicated it to his late father who in the late 1940's in a small northeastern Alberta town spoke to his sons of “a fine gentleman by the name of Mr. Jeff Edwards.” This scholarship, valued at \$8,000 (\$2,000 per year), is awarded to an entering Dalhousie student with preference to Canadian students of Black African descent (second preference to native Black Bermudian students). Scholarships will be awarded on the basis of financial need and citizenship.

### ***Evanov Radio Group Scholarship\****

Two annual \$2,000 scholarships will be awarded to students entering a Music degree program or Artist Diploma program. Students must demonstrate artistic excellence and a commitment to performing arts in the community. To be eligible,

students must be Canadian citizens or landed immigrants. Administered by the Department of Music.

### ***Facilities Management Employee Scholarship***

Established by the Department of Facilities Management employees at Dalhousie, this scholarship supports up to two entering students each year who are children, grandchildren or spouses of Facilities Management Employees. Selection is based on financial need and community involvement.

### ***Fairfax Financial Holdings Limited Entrance Award***

Two renewable awards of \$20,000 (\$5,000 per year) each, are awarded annually to assist worthy candidates entering an undergraduate program at Dalhousie University. The scholarships were established to encourage scholastic achievement by providing an incentive to capable high school students who wish to obtain a university education and who might otherwise be prevented due to the cost of attending the university. Candidates must be a Canadian citizen or have been granted permanent residence in Canada. Students will be selected on the basis of financial need but outstanding academic achievement, independently documented outstanding achievement, commitment in community and other extracurricular activities could also be influential. The scholarship is tenable for the duration of an undergraduate program or a maximum of four years (whichever comes first) based on a 3.00 SGPA over a full class load.

### ***First Nations & Indigenous Black Students Scholarships***

Ten renewable entrance scholarships of \$12,000 (\$3,000 per year) each are available to First Nations and Indigenous Black students, who are residents of Nova Scotia, New Brunswick or Prince Edward Island, and are entering Dalhousie for the first time. Scholarships are available to students who are applying directly from high school as well as those who have attended another post-secondary institution. Scholarships will be awarded on the basis of a student's financial need and academic standing.

### ***Forsyth Family Nova Scotia Undergraduate Scholarship***

A Dalhousie Law graduate established this scholarship in support of black high school students from Nova Scotia wanting to pursue post secondary education at Dalhousie. This is one of our highest valued scholarships for entering undergraduates at a value of up to \$20,000 per year to cover tuition, housing and books; recipients receive up to \$80,000 over four years. One entering student is selected each year based on academic excellence, financial need and demonstrated participation in extra-curricular activities, preferably leadership, and a social conscience within his or her community.

### ***General Dynamics Canada Corporate Partners Scholarship\****

The General Dynamics Canada Corporate Partners Scholarship in the amount of \$5,000 is awarded to a student who is entering any undergraduate program offered by the Faculty of Computer Science. The student will receive \$3,000 upon entering the program and will receive the remaining \$2,000 at the beginning of the second year of the program.

Applicants are required to have completed high school education in Nova Scotia and preference will be given to students who have successfully completed CP-12 university preparatory class in any Nova Scotia high school with an average of 80%, and has demonstrated initiative through volunteering and extra-curricular activities.

### ***International Baccalaureate (IB) Scholarships***

Renewable scholarships are offered to top students entering from high school who studied the International Baccalaureate program. Students should complete the General Entrance Award Application.

### ***International Baccalaureate (IB) Prizes***

Ten \$1,000 prizes will be awarded for the top short answer responses on the General Entrance Scholarship Application.

### ***Johnson Foundation Bursary***

Established by the Johnson Scholarship Foundation, this endowment provides four renewable bursaries of \$10,000 (\$2,500 per year) annually to students entering Dalhousie with permanent disabilities and demonstrated financial need. The number and value of bursaries may vary from year to year. To be considered, students must submit medical documentation regarding the nature of their disability, and a complete General Entrance Award Application.

### ***The Lockward Memorial Scholarships***

These scholarships have been established from an endowment by the late Reginald and Anne T. Lockward of Liverpool, NS Ten renewable scholarships

valued at \$16,000 (\$4,000 per year), plus a number of \$4,000 non renewable scholarships are awarded annually. Candidates for Lockward Memorial Scholarships must be graduates of a high school in Nova Scotia and be eligible for admission to the first year of an undergraduate course of study leading to a first degree at Dalhousie University. Preference will be given to students in Queen's County. Students will be selected on the basis of academic standing, character and financial need. Recipients of renewable scholarships may have an opportunity to access further funding if later admitted to the Faculty of Medicine at Dalhousie.

#### ***Harrison McCain Scholarships***

The Harrison McCain Foundation fund provides numerous renewable scholarships of \$16,000 (\$4,000 per year) to entering high school students; including one or more to students entering Nursing. Scholarships are awarded to students with demonstrated financial need, a recognized initiative to funding their own education and possess strong leadership abilities. **Please submit a complete Harrison McCain Scholarship application, available online at <http://dal.ca/scholarships>, by March 1.**

#### ***Helen C. McDowell Frandsen Memorial Scholarship***

Up to two scholarships of \$5,000 each are available to students entering Dalhousie who have been a resident of peninsular Halifax for at least the previous three years. Preferably, one will be awarded to a student entering a Bachelor of Science and another to a student entering a Bachelor of Arts. Applicants will be assessed on academic achievement, leadership and financial need.

#### ***Bazil & Madge Lund Scholarship in Business***

Established by David P. Lund in honour of his parents, this scholarship recognizes academic achievement and provides financial support to a student entering the Bachelor of Commerce. First preference is given to students entering Dalhousie directly from a high school within Greater Moncton, New Brunswick.

#### ***Constance "Teak" McKibbin Memorial Bursary***

A \$16,000 (\$4,000 per year) renewable bursary is awarded each year to a student entering Dalhousie with demonstrated financial need. Preference is given to students from Atlantic Canada who are the first in their family to attend a post-secondary institution.

#### ***Lottie M. Morrison Scholarship\****

This is an entrance scholarship intended to assist one student beginning the Bachelor of Science (Nursing) program who has the intention of furthering her/his studies in the area of mental health. Contact the School of Nursing for further information.

#### ***J & W Murphy Scholarships***

This scholarship fund was established by the J & W Murphy Foundation to provide renewable scholarships for Nova Scotia residents entering full-time studies in any undergraduate degree program at Dalhousie University. Six renewable scholarships of \$40,000 (\$10,000 per year) are awarded annually to worthy candidates based on community involvement, academic excellence and financial need. First preference will be given to students from Queens County and then to residents of the rest of Nova Scotia. Consideration will also be given to students who are the first in their immediate family to attend university. In addition, several one-time scholarships of \$6,000 are awarded each year to top candidates based on the criteria outlined above. The renewable scholarships are tenable for up to four years based on a 2.7 SGPA over a full class load.

#### ***Richard & Melda Murray Engineering Scholarships***

This scholarship provides the financial support for two Jamaican citizens to enter and complete their Bachelor of Engineering degrees at Dalhousie. Students may be entering the Faculty of Engineering directly from high school or transferring from another institution. Each scholarship will cover the cost of tuition and housing to a maximum of \$22,000 per year, for the duration of each recipient's degree.

#### ***Evelyn Negus Scholarship in Nursing***

This scholarship is awarded annually to a student(s) entering the Bachelor of Science (Nursing). First preference will be given to mature students and to aboriginal peoples (specifically members of the Mi'Kmaq community).

#### ***Warren Ogilvie Scholarships***

This endowment offers two Scholarships of \$16,000 (\$4,000 per year) to students entering the Bachelor of Commerce program. The primary consideration in awarding the scholarship shall be outstanding academic potential and performance and second consideration shall be financial need. Preference will be given to Nova Scotian applicants for at least one scholarship.

#### ***Edward A. Perkins Memorial Bursary***

Florence Perkins established this \$1,000 renewable bursary assistance in memory of her husband, Edward A. Perkins. This bursary is available to an entering Dalhousie student with a permanent disability and demonstrated financial need, with preference to students entering the Faculty of Science. This bursary is administered and awarded in combination with the Johnson Foundation Bursary. The recipient will typically receive \$1,000 from the Edward A. Perkins Memorial Bursary and an additional \$1,500 annually from the Johnson Foundation Bursary for a combined annual amount of \$2,500. To be considered, students must submit medical documentation regarding the nature of their disability, and a complete General Entrance Award application.

#### ***Poole Family Scholarship***

The Poole Family Scholarship, valued at \$5,000 per year and renewable for up to four additional years, is funded by a generous annual gift from the charitable trust established by Mr. Terry Poole, BCom '65 who now resides in Calgary, Alberta. The scholarship will be awarded annually to a full-time undergraduate student entering into their first year of study in any program. To be eligible, candidates must demonstrate financial need and scholarship standing. Preference will be given to candidates who reside in Newfoundland and Labrador, Atlantic Canada, and Alberta. The scholarship is renewable as long as candidates maintain scholarship standing.

#### ***Seymour Schulich Scholarship***

Seymour Schulich, one of Canada's leading philanthropists, established this scholarship fund in 2008 to honour his wife Tanna Goldberg Schulich and her family. The fund provides four renewable scholarships valued at \$39,000 each for students entering the Faculty of Computer Science; two based on academic achievement and two based on community involvement. In addition, several one-time scholarships of \$5,000 are awarded to students entering the Faculties of Computer Science or Science based on academic achievement and community involvement.

#### ***Shad Valley Scholarships***

Two renewable scholarships of \$16,000 (\$4,000 per year) are offered to top high school applicants who have participated in Shad Valley. Automatic consideration if indicated on admission application or contact the Assistant Registrar, Awards to be considered.

#### ***Shatford Memorial Trust Scholarships***

The J.D. Shatford Memorial Trust established a scholarship endowment fund in 1976 to provide assistance with the costs of attendance at Dalhousie University. The University's fund is independent of any other such trusts. Candidates must fulfill the following conditions: a) be coming directly to Dalhousie from high school, b) be undertaking studies leading to their first baccalaureate degree and c) be a bona fide resident of the bequest area (in Hubbards, NS area) for at least three years prior to applying to Dalhousie. A candidate's satisfaction of the residency requirement is currently confirmed by the J.D. Shatford Trust Advisory Committee in Hubbards. Subject to the availability of funds, these awards are renewable to the first degree (or four years maximum), based on a SGPA of 2.0, with a full class load. Please note that the value of a holder's scholarship may vary from year to year.

#### ***The Slight Family Foundation Scholarship for African Students***

The Slight Family Foundation Scholarship for African Students is a renewable scholarship valued at \$25,000 per year and is funded by a very generous gift by the Slight Family Foundation. The scholarship will be awarded annually to a full-time undergraduate student who resides in Africa and is either entering into their first year or returning (current) year of studies in any program at Dalhousie University. To be eligible, candidates must demonstrate financial need, hold good academic standing, and demonstrate involvement in their community.

#### ***Sigma Chi Leadership Award***

The Sigma Chi Leadership Award recognizes the qualities of entering students who meet the standards of Sigma Chi membership, as described by the Jordan Standard: being of high character, a student of fair ability, with ambitious purposes, a congenial disposition, possessed of good morals, having a high sense of honour, and a deep sense of personal responsibility.

#### ***Walker Wood Foundation Science Bursary***

The Walker Wood Foundation established this \$16,000 (\$4,000 per year) bursary in support of a student with demonstrated financial need who is entering the Faculty of Science at Dalhousie. Preference is given to students from high schools within Atlantic Canada.

### ***The Francis Hugh Bell Entrance Scholarship in Science***

This scholarship was established by a bequest from the estate of Barbara Bell who attended Dalhousie in 1923 as a music student. This scholarship is awarded annually to honour her father, the late Mr. Francis Hugh Bell who was one of Dalhousie's earliest graduates.

### ***R. Stanley Cumming Scholarship***

Established through a bequest from the Estate of Marion H. Cumming, in memory of her late husband Prof. R. Stanley Cumming, BA '35. This scholarship, valued at \$20,000 (\$5,000 per year), is awarded to a student entering the Bachelor of Commerce.

### ***Frank R. Davis Memorial Scholarships***

These scholarships are made possible by a fund established by Mrs. Davis in memory of her late husband, the Hon. Frank R. Davis, Minister of Public Health in the government of Nova Scotia and a graduate of this University. The scholarship will be awarded by the University to deserving graduates of Bridgewater High School, on the nomination of the Supervisor of Schools and the Senior High School Staff. In selecting candidates, the governing considerations will be scholastic standing, unselfishness of purpose, and interest in the common good. The fund may also be used for bursaries.

### ***Frederick S. Fountain Scholarship***

An endowment had been established by Frederick S. Fountain for residents of Atlantic Canada who have demonstrated all around distinction. Preference is given to students in the Faculty of Arts and Social Sciences. These scholarships are valued at \$32,000 (\$8,000 per year).

### ***Marjorie Manning Fountain Scholarships***

Two non-renewable entrance scholarships are awarded each year to students from Atlantic Canada enrolling in the Faculty of Management who have demonstrated a high level of academic achievement and financial need.

### ***R.C. Fraser Family Scholarship***

Robert Clifford Fraser (or R.C., as he was known) was born in Pictou County, attended New Glasgow High School and graduated with a Bachelor of Commerce from Dalhousie in 1952. He received his CA designation in 1958 and dedicated many of his working years to Nova Scotia Power, both in Pictou County and Halifax. RC's family ties to Dalhousie span many years and he enjoyed his time here tremendously. This scholarship is offered annually to a North Nova Education Centre, New Glasgow graduate who is entering the Bachelor of Commerce program.

### ***Rowland C. Frazee Scholarships in Business Administration***

Established by Mrs. Marie Frazee, and family, to honour the memory of her late husband Dr. Rowland Frazee (B Comm 1948, LLD 1980). Dr. Frazee was an outstanding alumnus of Dalhousie University and a business leader in Canada for many decades. He joined the Royal Bank of Canada in 1939 as a bank teller and rose to the position of Chairman and CEO in 1980. He attended Dalhousie University following his overseas service in World War II and rejoined the bank in 1948. He retired in 1986 living in Saint Andrew's, New Brunswick until his passing in the fall of 2007. Two scholarships of \$5,000 each are awarded annually to students entering an undergraduate program within the Faculty of Management.

### ***Milton G. Green Memorial Scholarship***

This scholarship, valued at \$8,000 (\$2,000 per year), was established in 1975 by Bowater Mersey in memory of the company's former President, Milton G. Green. Eligible students must have lived in the western area of Nova Scotia for at least three years prior to admission to Dalhousie. This scholarship is not awarded every year.

### ***C.D. Howe Scholarships in Engineering***

The C.D. Howe Memorial Foundation has established an endowment to provide a scholarship of \$6,000. The scholarship is open to matriculants from Nova Scotia high schools who have achieved high academic standing and who are enrolled full-time in the Bachelor of Engineering program. Where candidates are deemed to be of equal merit, preference will be extended to female students. The scholarship is renewable on an annual basis for the duration of the program provided that the holders maintain high academic standing and remain in the engineering program.

### ***Denton Hurdle Scholarship***

This scholarship was established in memory of Denton Gordon Clifford Hurdle, born in Bermuda in 1957, who graduated from Dalhousie in 1980 with a

Bachelor's Degree in Physical Education. He then returned to Bermuda and taught at Warwick Academy until his death in 1985.

One or more scholarships of at least \$2,000 each, are available to Bermudian citizens who are entering Dalhousie directly from high school. First preference will be given to students from Warwick Academy who are entering the School of Health and Human Performance (BSc in Health Promotion, Kinesiology or Recreation).

### ***Christine Irvine Memorial Scholarship***

This entrance scholarship, awarded to students who have demonstrated academic excellence, was established in memory of Christine Irvine, former Dean of Women at Dalhousie, by her brother Leslie M. Irvine. First preference will be given to students from Bridgetown, second preference Annapolis Valley and third preference Nova Scotia.

### ***The A. Murray MacKay Scholarship***

The Scots North British Society has established an annual scholarship of \$1,000 which is open to a student entering Dalhousie from Citadel High School. The Selection Committee will consider candidates on the criteria of academic ability, financial need and leadership. The criteria are weighted equally. The late Dr. MacKay was chairman of the School Board at the time when Queen Elizabeth High School was constructed.

### ***Barbara & James A. McNabb Scholarship***

Barbara McNabb was born in Trenton, NS in 1919 and her husband Jim in 1912. They lived their entire lives in Pictou County. A local businessman, Jim was Mayor of Trenton for 10 years during the 1960s and was also the first pilot trained in Pictou County. An accomplished violinist, Barb played in both the Pictou County Orchestra and the Nova Scotia Symphony. This scholarship is awarded to an entering student with preference given to Canadian citizens from Pictou County, NS.

### ***W.M. Nelson Scholarship***

Under the Will of the late Mr. William M. Nelson of Tatamagouche, funds have been made available to provide a scholarship to Dalhousie University open to students attending North Colchester High School.

### ***Nova Scotia Power Inc. Scholarship***

Since 1995, Nova Scotia Power Inc. has sponsored an annual scholarship in the amount of \$1,500 for full-time study in an undergraduate degree program. The scholarship will be renewable for up to three or four years depending upon the duration of the undergraduate program provided that the student maintains the required academic standing. Recipients are to be Canadian citizens (or landed immigrants) and residents of Nova Scotia for at least three years.

### ***The Hugh J. Potter Scholarship***

An endowment has been established to provide a scholarship to an entering Commerce student who has demonstrated a high level of academic achievement. First preference will be given to residents from Digby County who qualify based on their academic record. The scholarship honours the memory of Joseph Hugh Potter, a native of Digby County, who showed himself to be an exceptional initiator and developer of financial and commercial activity throughout this province in the fields of insurance, securities, shipbuilding, transportation and manufacturing.

### ***Lawrence and Mildred Ridgway Scholarship\****

This scholarship of \$1,000 is awarded on the basis of performance excellence to a student entering university for the first time directly from high school into a course of study leading to an undergraduate degree in music performance. It was established by Karen Woolhouse and Judith Wells in memory of their parents, who lived in Halifax for many years, enjoyed music, and were proud that their two daughters graduated from Dalhousie.

### ***Cicero T. Ritchie and Hazel Robertson Scholarship***

This scholarship was created at the bequest of Hazel Robertson in memory of her husband, a Dalhousie graduate. This \$1,500 entrance renewable scholarship is awarded each year to a student from Dartmouth High School enrolling in the Bachelor of Science. The scholarship is renewable to a maximum of four years provided a SGPA of 3.3 is maintained while carrying a full class load.

### ***The School of Nursing BScN Scholarship***

This entrance scholarship is awarded to the student in the Dalhousie University Basic BScN program with the highest high school academic average.

### ***The School of Nursing BScN Entrance Scholarship for Non-Traditional Students\****

This entrance scholarship is awarded to the student with the highest academic standing who has come to the basic BScN program neither directly from high school nor from a full year of university. Assessment is made by the School of Nursing. Application not required.

### ***School of Nursing BScN Entrance Scholarship for Students with Prior University Experience\****

This entrance scholarship is awarded to the incoming student in the Dalhousie University Basic BScN program with previous university experience and the highest cumulative GPA. Assessment is made by the School of Nursing.

### ***Alexander Sinclair Scholarship***

Under the Will of the late Evangeline Marion Winn, the University received an endowment for the purpose of providing scholarship awards to qualifying students from St. Mary's Municipality, Guysborough County, Nova Scotia. Candidates are recommended by St. Mary's Rural High School in consultation with the Registrar's Office - Awards.

### ***Stanley William Spavold Scholarship***

The purpose of this Scholarship is to honour the memory of Mr. Stanley William Spavold, BA ('51) MA ('53) and recognize the achievements of students entering Dalhousie from Halifax West High School.

Mr. Spavold became head of the Social Science Department at Halifax West in 1968 and was later named Vice Principal. This scholarship is awarded to a student entering the Faculty of Arts & Social Sciences or the Faculty of Management who has demonstrated high academic achievement and a well-rounded approach to their academic and extracurricular activities.

### ***The I.C. Stewart Trust Fund***

From the Estate of Georgie M. Stewart came a trust fund, the annual income from which is to be used for I.C. Stewart Scholarships to qualifying students from St. Mary's District in the County of Guysborough, Nova Scotia. Candidates are recommended by St. Mary's Rural High School in consultation with the Registrar's Office - Awards.

### ***L.A. & Edith Upham Scholarship***

A renewable scholarship valued at \$20,000 (\$5,000 per year) has been established to recognize the long association of the Upham family with Dalhousie University. This scholarship is offered to a Nova Scotia high school graduate enrolling in the Faculty of Arts and Social Sciences.

### ***Marguerite I. Vernon Scholarship***

A trust has been established under the Will of the late Marguerite Vernon whereby, from time to time, a scholarship will be assigned to Dalhousie University for an entering student.

### ***F. Hume Wells Scholarship\****

This scholarship of \$1,000 is awarded on the basis of performance excellence to a student entering university for the first time directly from high school into a course of study leading to an undergraduate degree in music performance. It was established by Judith Wells and Karen Woolhouse in memory of F. Hume Wells, a businessman in Halifax, who was interested in music and thought university education was important. Contact the Department of Music for more information.

### ***Don Wright Scholarship of Excellence\****

This annual scholarship funded by the Lillian and Don Wright Foundation, supports outstanding students who are entering the Department of Music. While preference shall be given to awarding the scholarship to one student per year, if no one student merits the awarding of the scholarship, the awarding committee has the authority to award two scholarships to students who have applied and been accepted to study with the Department of Music. Where there is more than one eligible candidate, first preference shall be given to the candidate deemed to have the most merit as judged by a majority of the Music Department Scholarships Committee.

## **2. Endowments and Annual Givings**

The following endowments and annual givings are used to fund a select number of our Dalhousie Entrance Award programs and are administered by the Registrar's Office in November. Unless noted, applications are not required.

### ***Robert Bruce Scholarships***

The University is a beneficiary of a bequest from the late Robert Bruce of Quebec whereby a portion of the annual income is to be used for both entrance and in-class scholarships, and for bursaries.

### ***James and Abbie Campbell Memorial Scholarships***

A bequest from the late Elsie Alma MacAloney of Halifax made provision for the establishment of the James and Abbie Campbell Memorial Fund. The purpose of this fund is to promote the University's music program through scholarships in music. Academically sound students who have demonstrated competency in music will be selected by the Department for one of several James and Abbie Campbell/Department of Music Scholarships. Other music students will be selected on the basis of their overall academic standing by the Registrar's Office. The fund also provides in-class scholarships also.

### ***Dalhousie Club of New York Scholarships***

A fund for this purpose, established by the Dalhousie Club of New York and placed in the hands of the Board of Governors of the University, endows several scholarships open to students entering the Faculties of Arts & Social Sciences or Science from high school.

### ***Ross Faulkner Scholarships***

The University received from the Estate of Julia L. Faulkner a bequest to provide scholarships in memory of her husband, Dr. Ebenezer Ross Faulkner.

### ***Dr. Mary G. Hickman Memorial Scholarship***

Under the will of Theresa Rose Hickman, this scholarship fund was established in memory of her late daughter Mary Hickman, MD '72. This fund provides scholarships in recognition of academic excellence at Dalhousie.

### ***The Percy Bertram Jollota Scholarships***

From the Estate of Jean Minerva Jollota came a bequest, the annual income of which is to be used to provide scholarships in memory of her late husband, Percy Bertram Jollota. The awardees must be engaged in studies in engineering.

### ***The E. John Jordan Scholarships***

Under the Will of the late E. John Jordan a bequest was left to the University for the purpose of funding entrance and in-class scholarships.

### ***Killam American Scholarship Fund***

This endowment, established in memory of Isaac Walton Killam, provides entrance scholarships to citizens of the United States who are enrolled in undergraduate programs at Dalhousie University.

### ***Frederick A. MacMillen Scholarships***

The late Frederick A. MacMillen bequeathed to Dalhousie University a sum of money, the net income therefrom to be used for scholarships. This fund has been designated for entrance scholarships.

### ***The Hector McInnes Memorial Scholarships***

In December 1937, an anonymous donor gave the University \$50,000 for undergraduate scholarships as a memorial to the late Mr. McInnes.

### ***Nicholas M. MacLeod Memorial Scholarship***

Under the will of Eva Eileen McLeod, this scholarship fund was established in memory of her late husband, Dalhousie alumnus Nicholas W. McLeod, for the purpose of funding entrance and in-class scholarships for students in the Faculty of Arts & Social Sciences.

### ***Silvanus A. Morton Memorial Scholarship***

The Silvanus A. Morton Scholarship Fund was established in 1972 to endow one or more awards. The awards are in memory of Silvanus A. Morton, Principal of the old Halifax Academy, predecessor of the Queen Elizabeth High School. The scholarship is to be awarded on the recommendation of the principal to one or more graduates of Citadel High School upon entrance to Dalhousie University in the College of Arts & Science.

### ***Malcom Mosher Memorial Scholarship***

Under the will of Marial Laura Morse Mosher, this scholarship fund was established in the memory of her father, to award scholarships to students studying in the areas of Social Sciences, Business and Economics.

### ***Harold Oxley Scholarship***

A bequest under the late Mr. Oxley's Will makes possible the funding of a scholarship, which has been allotted to the entrance scholarship plan.

**Arthur S. Payzant Scholarship**

Under the Will of the late Reverend Arthur Silver Payzant a bequest was established for scholarship purposes. The University has allotted this fund to the entrance scholarship plan.

**The Harold A. Renouf Scholarship**

An endowment has been established to provide an annual scholarship for students entering the Bachelor of Commerce program.

**The Lois J. Robertson Scholarships**

The University received a generous bequest from the Estate of the late Lois Robertson. This fund has been allocated to undergraduate scholarships.

**Dr. David M. Soloan Scholarship**

Under the Will of the late Dr. David M. Soloan the University received a sum of money. The Board of Governors decided that the gift be used to provide one or more entrance scholarships in the College of Arts & Science.

**Joseph Duncan Stewart Scholarships**

A bequest under the Will of the late Joseph Duncan Stewart has made possible the funding of undergraduate scholarships.

**The J. Douglas Vair Scholarship**

This scholarship is available to students entering the University for the first time from Pictou County, Queen's County, and rural Halifax County. Failing a candidate from these areas, a student from other areas of Nova Scotia may be selected at the discretion of the Scholarship Committee. The award shall be based on scholarship and need, making it possible for a promising student to obtain a university education. The scholarship may be continued beyond the first year to students from the three preferred areas if standing is maintained, but only if there is no first year student eligible for the award.

**The Women's Division of the Dalhousie Alumni Association Scholarships**

This fund provides two entrance scholarships; one is named the Margaret Florence Newcombe Scholarship, which commemorates the 100th anniversary of the graduation of the first woman graduate of Dalhousie University in 1885. The second scholarship is named the Ruth Skaling Murray Scholarship, in memory of a dedicated alumna of the Dalhousie Women's Division.

**B. Faculty of Agriculture**

For more information on deadlines and application procedures, please visit [www.moneymatters.dal.ca](http://www.moneymatters.dal.ca)

**General Eligibility Requirements:**

1. Entering the first year of a Faculty of Agriculture program directly from high school.
2. A scholarship average of at least 80%
3. A completed application for admission (and scholarship application with supporting documents if required) received by the Registrar's Office by March 15 (unless otherwise listed).

**Atlantic Scholars Awards (tuition and residence fees):** \$40,000 (approximate value based on full tuition and shared residence accommodation). Atlantic Scholars Awards will provide tuition and residence costs (at shared-room rate, for as long as the recipient chooses to live in residence). The scholarship does not cover meals, books, and student fees. Students entering either technical or degree programs are eligible. Only those applicants who have achieved a minimum average of 85% on the courses required for admission shall be considered. Selection criteria include academic performance, geographic distribution, and extracurricular activity. The Atlantic Scholars Awards are tenable for a maximum of four years. Applications must be submitted via DalOnline by March 15.

**Dean's Scholarship (international and residence fees):** \$39,200 (approximate value based on international differential fees and shared residence accommodation). Awarded to the top international applicant.

**Harrison McCain Scholarships:** \$16,000 (\$4,000 per year renewable for three years for degree programs, \$4,000 per year renewable for one year for diploma programs). The scholarships will be awarded to students entering the first year of any program of study and are based on academic performance, financial need, leadership, and initiative to fund own education. These scholarships are open to Canadian high school graduates who are maintaining an 80% average in their senior year of high school. Application is due March 1. See [dal.ca/scholarships](http://dal.ca/scholarships) for an application form.

**Residence Scholarships:** Scholarships valued at the shared-room rate of residence, each renewable for one year, will be awarded to outstanding applicants.

**Guaranteed Entrance Scholarships:** students who have applied to the Faculty of Agriculture by March 15 will automatically be considered for the following entrance scholarships based on academic performance:

High School Average	Value
90% or higher	\$2,500
85% to 89.9%	\$1,500
80% to 84.9%	\$1,000

**IB Scholarships:** IB diploma students who have applied to the Faculty of Agriculture by March 15 will automatically be considered for the following entrance scholarships based on academic performance:

Predicted Points	Value
36 or higher	\$2,500 renewable for a maximum of \$10,000
33-35	\$2,500 renewable at \$1,500 for a maximum of \$7,000
30-32	\$2,500
28-29	\$1,500
24-27	\$1,000

For more information on deadlines and application procedures, please visit [www.moneymatters.dal.ca](http://www.moneymatters.dal.ca)

**Doug Bailey Memorial Bursary**

Farmers Dairy awards bursary to a student in any year of any program who is a family member of a Farmers Dairy shareholder or employee. The bursary is named in memory of Doug Bailey, a former President and CEO. Selection criteria include leadership, extracurricular and community activities, financial need, and a sound academic record.

**Bible Hill Garden Club Bursary**

The Bible Hill Garden Club Bursary is awarded to a student from the Truro area. Preference is given to students in at least the second year of study in Horticulture, preferably a landscape program. Selection criteria include academic performance and financial need.

**Vera Caldwell Memorial Bursary**

The bursary will be awarded annually, based on financial need, to a deserving international student. The bursary is in memory of Vera Caldwell who was a teacher and life-long learner who actively supported education for students from developing nations. Students who are paying international student fees in all programs of study are eligible. Preference will be given to students studying full time in undergraduate or diploma programs.

**Canard Conservation Undergraduate Scholarship**

The Canard Conservation Undergraduate Scholarship is awarded to a first- or second-year BSc (Agr.) student from Kings County, NS, who is planning course and/or project work related to the environment. Selection criteria include: academic performance, demonstrated interest in the environment, and career plans.

**Randy Carey Memorial Scholarship**

A scholarship is awarded annually to a student from the Annapolis Valley entering a degree/diploma program who is interested in pursuing a career in agriculture. As a memorial to Randy Carey, who worked for Stirling Fruit Farms for much of his career, preference will be given to students with interests in the Horticulture industry. Selection criteria include farm background, career plans, and academic performance.

**Chicken Producers of Nova Scotia Bursary**

The Chicken Producers of Nova Scotia Bursary is awarded to an NS student in the Faculty of Agriculture who shows a demonstrated interest in pursuing the study of poultry. Preference will be given to applicants with a farming background. Students in all years of study are eligible. A student may not receive this bursary more than once.

**George & Lottie Cook Memorial Scholarship**

The George and Lottie Cook Memorial Scholarship is awarded annually to an NS student enrolled in the first or second year of any program of study. Selection criteria include academic performance and financial need.

### ***Co-op Atlantic Agricultural Scholarships***

Two scholarships are available to first-year students who are Atlantic Canadian residents: one scholarship to a technology program student and one scholarship to a degree program student. To be eligible, an applicant must be a member or full-time employee of a member co-operative of Co-op Atlantic; or have a parent/guardian who is a member or employee of a member co-operative of Co-op Atlantic. Selection criteria include academic performance, extracurricular and community involvement, work experience and the applicant's exposure to or understanding of agricultural co-operatives.

### ***Dairy Farmers of New Brunswick Scholarship***

Dairy Farmers of NB offer a scholarship to an NB resident who is enrolled in any year of an approved technician or technology diploma or certificate program relating to agriculture. For further information and application form, contact nbmilk@nbmilk.com or (506) 432-4330. Application deadline is June 15.

### ***Dairy Farmers of New Brunswick Memorial Scholarship***

Dairy Farmers of NB offer a scholarship to an NB resident who is enrolled in the first year of a recognized post-secondary agricultural program. For further information and application form, contact nbmilk@nbmilk.com or (506) 432-4330. Application deadline is June 15.

### ***Dykeview Farms Ltd. Scholarship***

Dykeview Farms Ltd. offers a scholarship to NS students entering any program of study. Preference will be given to students from Kings County (with additional preference to students from Northeast Kings Education Centre) planning to study in a program directly related to farming and production agriculture (e.g. Diploma in Business Management - Agriculture; or BSc (Agr.) in Agricultural Business, Plant Science, or Integrated Environmental Management). Selection is based on financial need, community involvement, and academic performance. For further information and application form contact Dykeview Farms Limited, 1225 Middle Dyke Road, Centerville, NS B0P 1J0, phone (902) 582-3822.

### ***Fall River Garden Club Bursary***

The Fall River Garden Club Bursary will be presented to a student entering a program of study relating to horticulture. Selection will be based on financial need and career plans. Preference will be given to students from the Fall River, Waverley, Wellington, Oakfield, Lakeview or Windsor Junction, NS, areas. Other NS students will also be considered.

### ***T. Beverly Milligan Gale Memorial Bursary***

The T. Beverly Milligan Gale Memorial Bursary was established in 2010 in recognition of her spirit and love of the gardens at the Dalhousie Faculty of Agriculture. This bursary will go annually to a student who is enrolled in any year of study and who has shown an interest in horticulture, particularly landscape design and care. Preference will be given to mature students. Selection criteria will include career plans, academic performance, and financial need.

### ***Hants County Exhibition Scholarship***

This scholarship is sponsored by the Windsor Agricultural Society. Applicants must be residents of Hants County, NS, entering any year of any program at a recognized agricultural or veterinary college who have aspirations of working in the agricultural industry. Selection criteria include academic performance, extracurricular activities, part-time employment, and career plans. Application forms with copies of transcripts must be received by August 26 at: Windsor Agricultural Society, PO Box 368, Windsor, NS B0N 2T0.

### ***Kings County Federation of Agriculture Bursary***

The Kings County Federation of Agriculture Bursary is awarded to a resident of Kings County, NS, entering the first year of full-time study at the Dalhousie Faculty of Agriculture. Selection criteria include financial need, academic performance, and contribution to and participation in the agricultural industry of Kings County. The selection will be made by the donor. Applications are available from and must be received by June 1 at: Kings County Federation of Agriculture, PO Box 14, Kentville, NS B4N 3V9.

### ***Kings Mutual Insurance Scholarship***

In memory of Past Directors, the Kings Mutual Insurance Company awards three scholarships to NS students, in any year of any program of study. At least one of the scholarships annually will be available to a student in a technology program of study. Selection criteria include financial need, academic performance, and demonstrated interest in a career in the Agri-food industry as reflected by summer employment and/or extracurricular involvement. This scholarship is not available to students receiving other scholarships totaling \$1,000 or more.

### ***C. C. MacDougall Memorial Scholarship***

This scholarship is awarded to a student pursuing a degree or diploma in Agriculture, Home Economics, or Veterinary Medicine. To be eligible, a student must have been a 4-H member from Kings County, NB, or have parents who raise or breed Guernseys anywhere in New Brunswick.

### ***Bill Mathewson Memorial Bursary***

In memory of Professor Emeritus Bill Mathewson, who taught Animal Science course work for twenty years at Dalhousie Faculty of Agriculture, formerly NSAC, a bursary will be awarded annually to a student in any year of any program to assist in furthering their education through study/travel to another country. This bursary has been made available through generous contributions from students, Faculty of Agriculture colleagues, and friends and associates at church and within the agricultural industry, in particular the sheep breeders of Nova Scotia. In applying for consideration, students will submit a proposal to participate in such activities as a study semester abroad toward their degree/diploma, a specialized training course, an internship or a development project, or to attend a conference to make a presentation.

### ***Donald McInnes Award***

This scholarship is sponsored by Pictou Mutual Insurance Company to commemorate the 40 years of service Donald McInnes provided on their Board of Directors. This award is open to all students in the Faculty of Agriculture. Selection criteria include commitment to and involvement in the community and leadership provided in student activities, academic performance and financial need. A student may not be selected for this award more than once.

### ***Newfoundland and Labrador Federation of Agriculture Scholarships***

To encourage local students to pursue careers in the Agri-products industry, the Newfoundland and Labrador Federation of Agriculture awards two scholarships to Newfoundland and Labrador students (preferably one from the East Coast and one from the West Coast). Selection criteria include academic performance and financial need.

### ***Newfoundland and Labrador Provincial Scholarships***

The Newfoundland and Labrador government, through its Department of Education, awards three scholarships to Newfoundland and Labrador students entering a degree program. Selection will be based on academic performance.

### ***Faculty of Agriculture Alumni Family Bursaries***

Several bursaries will be awarded annually to family members of Faculty of Agriculture alumni studying at the Faculty of Agriculture. Selection criteria include academic performance and financial need. Students in any year of any program are eligible.

### ***Faculty of Agriculture Bursaries***

The Faculty of Agriculture provides bursaries to students in need of financial assistance. To be eligible students must be in good standing, must have spent at least one term of full-time study at Dalhousie Faculty of Agriculture, and must be registered on a full-time basis for both semesters of the academic year. Faculty of Agriculture students in need of financial assistance can apply for a Faculty of Agriculture bursary on an ongoing basis throughout the academic year.

### ***Faculty of Agriculture Renewable Entrance Scholarships to Cobequid Educational Centre Students***

The Faculty of Agriculture Entrance Scholarship for students from the Cobequid Educational Centre will cover the full first-year tuition for the technical or degree program which the student has chosen. The top three students graduating from CEC and entering the first year of study in any program will be awarded a Faculty of Agriculture Entrance Scholarship for CEC Students. Selection will be based on the average from the required courses (minimum average of 80%) combined with the school's final rankings.

Recipients of Dalhousie Faculty of Agriculture Renewable Entrance Scholarships for CEC students are not eligible to receive another guaranteed entrance scholarships.

### ***Faculty of Agriculture Scholarships for International Students***

Scholarships will be awarded to selected international students enrolled in or entering the full year in a program of study at the Faculty of Agriculture. All students paying the international tuition differential are eligible for consideration. The awards are merit-based.

**Nova Scotia Federation of Agriculture 100th Anniversary Scholarship**

In recognition of the 100th anniversary of the Nova Scotia Federation of Agriculture in 1995, a scholarship is awarded to a Nova Scotia student with a farm background who has a solid academic record and financial need. Students studying in any year of any program who have not qualified for other significant awards are eligible.

**Nova Scotia Power Inc. University Scholarship**

The Nova Scotia Power Inc. university entrance scholarship is awarded to a Nova Scotia student entering on a full-time basis the first year of an undergraduate degree program. The scholarship is tenable for up to four years. Selection criteria include academic performance and demonstrated involvement in extracurricular activities.

**Nova Scotia Technology Education Association Scholarship**

The Nova Scotia Technology Education Association is pleased to offer two entrance scholarships to the Bachelor of Technology in Applied Science program. For further information and application form visit [nstea.nstu.ca](http://nstea.nstu.ca)

**Nova Scotia Veterinary Medical Association Bursary**

The Nova Scotia Veterinary Medical Association Bursary will be awarded to a Nova Scotia student in the first year of the Veterinary Technology program. Selection criteria include financial need and academic performance.

**Ted Rose Memorial Bursary**

The Ted Rose Memorial Bursary will be awarded to a student who plans to operate a livestock farm. Selection criteria include a documented commitment to animal welfare, financial need, and sound academic performance.

**George James Schaller Memorial Scholarship**

In memory of George J. Schaller, Class of 1948, a scholarship will be awarded to an outstanding student studying in any year of any program who has not qualified for other significant awards.

**Anna Helvig Schousboe Memorial Scholarship**

This scholarship is awarded to a resident from Kings County, NB, working towards a degree or diploma in Agriculture, Veterinary Medicine, or Home Economics at a post-secondary institution.

**B. S. Sodhi Memorial Bursary**

The B. S. Sodhi Memorial Bursary is awarded annually to a student paying international student fees. Students in all programs of study are eligible. Preference will be given to students in undergraduate and technical programs and selection will be based on financial need.

**Sport Leadership Award**

The Sport Leadership Award recognizes a high school varsity athlete enrolling full-time in a program of study and planning on participating in a sport at the varsity level in the Faculty of Agriculture. Recipients of other major entrance scholarships are not eligible. Selection criteria include financial need, sport skills, and leadership. The Sport Leadership Award may be renewable for one year, upon recommendation of the student's varsity coach.

**Stewiacke Valley Garden Club Bursary**

The Stewiacke Valley Garden Club Bursary is awarded to a student from the Stewiacke Valley area of Nova Scotia. Selection criteria include involvement in extracurricular and community affairs, financial need, and academic performance.

**F. W. Walsh Memorial Scholarship**

In memory of the outstanding agriculturalist F. Waldo Walsh, this scholarship is awarded to a student who is admitted to the first year of a degree program. Selection is based primarily on academic performance. Financial need and participation in school and community affairs will also be considered.

**C. The Canadian Merit Scholarship Foundation**

The program was started in 1989 to identify, recognize and reward well-rounded students who combine distinguished talents with character, leadership potential and a commitment to the community. In 1991 Dalhousie University became a participating member of those institutions where the CMSF National Awards (Loran Awards) are tenable.

The scholarship consists of \$8,000 (paid by the Foundation) and tuition (paid by the University), renewable to a limit of four years of undergraduate study. The scholarships are renewable on the achievement of a Grade Point Average of 3.30

(B+), plus continued evidence of the qualities of character, leadership and service upon which the award is based.

Participating high schools may each nominate one student and forward the requisite documents to the CMSF Area Committee to be received by the November deadline.

Details of the process and criteria are available from your high school. Nominees must meet the admission requirements for Dalhousie University and the program which the student wishes to undertake.

**III. In-Class Scholarships**

All undergraduate Dalhousie students not on a renewable scholarship, in eligible programs in the participating faculties, who have completed a full class load (a minimum of 30 credit hours) over two terms within the previous academic year and achieved a minimum SGPA of 3.70 will be considered eligible for in-class scholarships. Co-op students who are on a work term during the calendar year, must also complete 30 credit hours over two terms to be eligible. Students completing two work terms within one academic year must complete a minimum of 15 credit hours during their one academic term and achieve a minimum term GPA of 3.70 to be considered eligible. In those cases where students have taken more than 30 credit hours, assessment is based on all classes taken within the term(s) being assessed. Transfer credits do not count towards the credit hours reviewed for scholarship assessment.

Students registered in the Faculty of Agriculture should refer to (page 616) for in-class scholarship opportunities.

Students registered in Graduate Studies, Medicine, Dentistry (with the exception of Diploma in Dental Hygiene Students), or Law are ineligible to receive in-class scholarships or renew an existing scholarship.

Applicable to those scholarships administered by the Registrar's Office. Selection criteria may be different for those administered by individual faculties/schools/departments.

Please note that the automatic consideration is either for the renewal of an entrance renewable scholarship or for a one-year scholarship, but not both.

**A. General - All Faculties****Golden Key International Honour Society**

Dalhousie University has a participating chapter in the Golden Key International Society. The Golden Key Society is an academic honours society that recognizes the academic achievements of students. The society provides scholarships and leadership opportunities and career assistance to its student members. Students are invited to become members based upon criteria established by the society. For information please refer to the society's website: [www.GoldenKey.GSU.EDU](http://www.GoldenKey.GSU.EDU).

**Governors' Awards**

In 1992, to mark the 125th anniversary of the founding of the Dalhousie Student Union, and to recognize students' contribution to the quality and vitality of the University, the Board of Governors established a set of awards to be known as Governors' Awards.

Up to four awards can be made each year, for exceptional contributions or leadership in the extracurricular realm in such areas as university governance, development of a sense of community on campus, community service, internationalizing the campus, visual or performing arts, minority access or athletics.

To be eligible, students must have a minimum cumulative GPA of 3.0 or equivalent. Otherwise, all students - undergraduate, graduate, or professional faculty students, full or part-time, at any stage in their academic career, may be considered for an award.

Information is available on the Student Services website [studentservices.dal.ca](http://studentservices.dal.ca) each year starting in December. Nominations are due early to late January

**The following scholarships are administered by the Registrar's Office. Unless otherwise noted, no application required.**

**Aramark Leadership Award**

This award provides scholarships for returning undergraduate students at Dalhousie registered in the Faculty of Architecture & Planning, Arts & Social Sciences, Computer Science, Engineering, Health Professions, Management, Science, or the Diploma of Dental Hygiene who show leadership in the community. Eligible students must have been full-time Dalhousie students during the previous academic year, be in good academic standing, and demonstrate involvement and dedication to the Dalhousie community through leadership, citizenship and/or sportsmanship. Applications are available through DalOnline - Student Awards and Financial Aid section.

**Marjorie Ball Scholarship**

Marjorie Ball was born in Newfoundland in 1912 and attended Dalhousie University in 1934. This scholarship was established by a bequest from the Estate of Marjorie Ball to the Dalhousie University Alumni Association.

**Beta Sigma Phi Scholarship to Dalhousie University**

The Halifax-Dartmouth City Council of Beta Sigma Phi sorority has established an endowment of \$2,000 whereby the annual income will provide for a scholarship to a student studying towards a degree full-time or part-time at either the undergraduate or graduate level. The successful candidate will be selected from the following categories, listed preferentially: first, an active Member; secondly, a daughter, son or husband of an active Member; and thirdly, some other student chosen by the Registrar's Office. Applications are available from sorority members. Due date July 31.

**The Jotham Blanchard Scholarship**

The New Glasgow Literary and Historical Society in 1912 established this scholarship in memory of Jotham Blanchard. The scholarship will be awarded to a student of meritorious standing who is in the second year of an undergraduate program.

**The Isabel Brown Scholarship**

The scholarship was endowed in 1982 by the Brown family under the auspices of the Women's Division of the Dalhousie Alumni Association. The interest provides an annual scholarship ordinarily to a student who is entering the final undergraduate year.

**Minnie F. Burbidge Scholarships**

In her Will the late Minnie F. Burbidge bequeathed the residue of her Estate to Dalhousie University. In 1945 the sum of \$16,000 was endowed to provide undergraduate, usually in-class, scholarships.

**George H. Campbell Memorial Scholarship**

In 1917 Mr. and Mrs. G.S. Campbell established the George H. Campbell Scholarship Fund to provide annual scholarships in memory of their late son, George Henderson Campbell.

**Dharma Master Chuk Mor Memorial Scholarship**

T.Y. Lung established this endowed scholarship in memory of Buddhist monk Chuk Mor (1913-2002) who was an educator and artist well known in the fields of Chinese poetry, Chinese painting and Chinese calligraphy. This in-class scholarship is available to a full-time undergraduate student who has attained a high standard of academic achievement and who has completed a minimum of one year in any undergraduate degree program.

**Marjorie F. Ellis Scholarships**

The late Marjorie F. Ellis bequeathed one-half of the remainder of her estate to Dalhousie University for scholarships to worthy students.

**W.L. Harper Scholarship**

From the Estate of Arta Falconer Harper a bequest to the University makes possible the provision of a number of awards from the annual income.

**Dr. Mary G. Hickman Memorial Scholarship**

Under the will of Theresa Rose Hickman, this scholarship fund was established in memory of her late daughter Mary Hickman, MD '72. This fund provides scholarships in recognition of academic excellence at Dalhousie.

**Mr. & Mrs. H.D. Howitt Scholarship**

This scholarship was created to promote education and advancement of youth, to encourage achievement at the university level in both academic endeavors and in contributions to community life. The funds provide one or more annual scholarships to students enrolled full time in undergraduate degree programs. Awarded based upon academic excellence.

**Killam American Scholarship Fund**

This endowment, established in memory of Isaac Walton Killam, provides in-class scholarships to citizens of the United States who are enrolled in undergraduate programs at Dalhousie University.

**The W. Andrew MacKay Alumni Scholarship**

The Dalhousie Alumni Association established an annual scholarship in honour of Dr. W. A. MacKay, a former president of the University. The scholarships are available to students who have demonstrated high academic standing (GPA of at least 3.30) and who have shown an excellence in qualities of leadership, citizenship and sportsmanship. The award is tenable for one year in the faculties of Arts & Social Sciences, Architecture & Planning, Computer Science, Engineering, Health Professions, Management and Science. Candidates are considered by nomination by their Department or School in the fall of each year.

**Mackenzie Trust Scholarships**

According to the Estate of Thomas George Mackenzie a Trust Fund was established for Archibald F. Mackenzie, and later bequeathed to Dalhousie University to provide in-class scholarships.

**Nicholas M. MacLeod Memorial Scholarship**

Under the will of Eva Eileen McLeod, this scholarship fund was established in memory of her late husband, Dalhousie alumnus Nicholas W. McLeod, for the purpose of funding entrance and in-class scholarships for students in the Faculty of Arts & Social Sciences.

**The Hector McInnes Memorial Scholarships**

In December 1937, an anonymous donor gave the University \$50,000 for undergraduate scholarships as a memorial to the late Mr. Hector McInnes.

**Malcom Mosher Memorial Scholarship**

Under the will of Marial Laura Morse Mosher, this scholarship fund was established in the memory of her father, to award scholarships to students studying in the areas of Social Sciences, Business and Economics.

**The George B. Robertson Phi Delta Theta Fraternity Scholarship**

An endowment has been established to provide a scholarship to a student in full-time study in the third or subsequent years at Dalhousie University. The selection of the awardee is based on several factors including a minimum Grade Point Average of 3.00, demonstrated activity in the Halifax Chapter and financial need. Application required.

**The Lois J. Robertson Scholarships**

The University received a generous bequest from the Estate of the late Lois Robertson. This fund has been allocated to undergraduate scholarships.

**Joseph Duncan Stewart Scholarships**

A bequest under the Will of the late Joseph Duncan Stewart has made possible the funding of undergraduate scholarships.

**The John L. and Glenna E. Towse Scholarships**

A bequest to the University provides for a number of in-class scholarships.

**The Women's Division of the Dalhousie Alumni Association Scholarships**

Open to a returning female student demonstrating academic excellence.

**Sir William Young Scholarship**

This fund was left by Sir William Young for the purpose of endowing scholarships.

**B. Faculty of Agriculture**

For more information on deadlines and application procedures, please visit [www.money matters.dal.ca](http://www.money matters.dal.ca)

**Acadian Seaplants Limited Scholarship**

A scholarship will be presented annually to a senior undergraduate or graduate Aquaculture student, preferably undertaking course or project work related to aspects of marine bioproducts or the plant sciences.

**Animal Nutrition Association of Canada (Atlantic Division) Scholarship**

The Atlantic Division of the Animal Nutrition Association of Canada awards a scholarship to a student who is entering the third year of the B.Sc. (Agr.) program. Selection criteria include academic performance and leadership in student and community affairs.

**Ralph H. Armstrong Memorial Bursary**

The family and friends of the late Ralph Hallett Armstrong award a memorial bursary to a student who has successfully completed at least one year of study at the Faculty of Agriculture. Former and current 4-H club members from Kings and Annapolis counties in Nova Scotia are eligible to apply. Selection is based on financial need and involvement in school, athletic, and/or community organizations.

**Atlantic Council of Crop Life Canada Bursaries**

Two bursaries will be awarded to technical students from agricultural backgrounds who plan to pursue employment in the agricultural sector following studies. Preference will be given to students whose backgrounds, course and project work, summer employment, and career plans reflect an interest in the crop protection industry.

**Atlantic Farm Mechanization Show Scholarship**

The Atlantic Farm Mechanization Show awards a scholarship to a student from the Atlantic Provinces who has completed at least one year of study at the Dalhousie Faculty of Agriculture in the Engineering Diploma program or the Integrated Environmental Management major of the BSc (Agr.) program. The awarding of the scholarship is based on academic performance and the demonstrated potential for a career in the area of mechanization of agriculture.

**Atlantic Land Improvement Contractors Association Bursary**

The Atlantic Land Improvement Contractors Association Bursary is available to Engineering degree students with a demonstrated ability and interest in soil, water, and land improvement.

**Paul Babineau Memorial Scholarship**

The Atlantic Farm Mechanization Show awards a scholarship in memory of Paul Babineau, a long-time director on their board, to a student from the Atlantic Provinces who has completed at least one year of study at the Faculty of Agriculture in the Engineering Diploma program or the Integrated Environmental Management major of the BSc (Agr.) program. The awarding of the scholarship is based on academic performance and the demonstrated potential for a career in the area of mechanization of agriculture.

**Atlantic Poultry Conference Scholarship**

A scholarship will be awarded to a student whose course and project work reflect an interest in poultry. Preference will be given to senior students in the BSc (Agr.) program who have either completed or have plans to complete a poultry-related research project in RESM 4002/4003.

**The Honourable Dr. Roger S. Bacon Scholarship in Agriculture**

In keeping with the Honourable Dr. Roger S. Bacon's lifetime interest in and service to agriculture, a scholarship will be awarded annually to a Nova Scotia student entering the final year of any program who has plans to pursue a long-term career in agriculture. Dr. Bacon was a dairy farmer and blueberry producer from Cumberland County, NS, who served as an MLA for his constituency; during his political career he was a well-respected and long-serving Minister of Agriculture and, for a time, Premier of NS. Selection criteria include career plans, academic performance, and financial need.

**Doug Bailey Memorial Bursary**

Farmers Dairy awards a bursary to a student in any year of any program who is a family member of a Farmers Dairy shareholder or employee. The bursary is named in memory of Doug Bailey, a former President and CEO. Selection criteria include leadership, extracurricular and community activities, financial need, and a sound academic record.

**A. B. Banks Memorial Scholarship**

The A. B. Banks Memorial Scholarship is awarded to the second-year BSc (Agr.) student enrolled in the Animal Science option with the highest average from the first year of study.

**Dr. Kim Beck Memorial Scholarship**

The Turkey Farmers of New Brunswick Marketing Board awards a scholarship in memory of Dr. Kim Beck. The scholarship will be awarded annually to a New Brunswick resident who is enrolled in a post-secondary agricultural program. Selection will be based on academic achievement, financial need, involvement in agriculture, and interest in the poultry or food industry.

**Bible Hill Garden Club Bursary**

The Bible Hill Garden Club Bursary is awarded to a student from the Truro area. Preference is given to students in at least the second year of study in Horticulture,

preferably a landscape program. Selection criteria include academic performance and financial need.

**David W. Brown Memorial Bursaries**

The ACA Co-operative Limited/Eden Valley Farms Limited awards two bursaries to students from either Nova Scotia or Prince Edward Island entering a second year of study. Selection criteria include academic performance, financial need, and interest in farming and the poultry industry in particular.

**Edward Brown Memorial Bursary**

A bursary will be awarded annually to an undergraduate student in financial need studying full-time at the Faculty of Agriculture.

**Dr. John Bubar Scholarships**

Two scholarships will be awarded annually to New Brunswick students in the BSc (Agr.) program in the second or third year of study who are not recipients of other significant scholarships.

**Merle Cail Memorial Scholarship**

The Merle Cail Memorial Scholarship is awarded annually to a senior undergraduate student or a graduate student from Atlantic Canada whose course or project work reflect an interest in organic agriculture. Selection criteria include academic performance, financial need, and commitment to organic agriculture.

**Vera Caldwell Memorial Bursary**

The bursary will be awarded annually, based on financial need, to a deserving international student. The bursary is in memory of Vera Caldwell who was a teacher and life-long learner who actively supported education for students from developing nations. Students who are paying international student fees in all programs of study are eligible. Preference will be given to students studying full time in undergraduate or diploma programs.

**Canard Conservation Undergraduate Scholarship**

The Canard Conservation Undergraduate Scholarship is awarded to a first- or second-year BSc (Agr.) student from Kings County, NS, who is planning course and/or project work related to the environment. Selection criteria include academic performance, interest in the environment, and career plans.

**James Card Memorial Bursaries**

Several bursaries, in memory of James Card, will be awarded annually to students in financial need. Preference will be given to international students.

**Gerard Chiasson Memorial Bursary**

The Inverness County Federation of Agriculture awards a bursary to a Cape Breton student who has completed at least one year of study. The bursary is awarded in memory of Gerard Chiasson, a past president of the NS Federation of Agriculture who was also active in other local farm and community organizations. Selection criteria include financial need, involvement in community activities, and leadership experience. In the event that two or more students possess otherwise equal qualifications, preference will be given to a student from Inverness County.

**Chartwells Scholarships**

Compass Group Canada awards scholarships annually to outstanding students with high academic performance who have not qualified for other significant awards. Preference will be given to students living in residence.

**Chicken Producers of Nova Scotia Bursary**

The Chicken Producers of Nova Scotia bursary is awarded to a Nova Scotia student who shows a demonstrated interest in pursuing the study of poultry. Preference will be given to applicants with a farming background. Students in all years of study are eligible. A student may not receive this bursary more than once.

**Class of 1950 Bursary Fund**

The Class of 1950, in commemoration of their fiftieth anniversary of graduation from the Dalhousie Faculty of Agriculture (formerly NSAC), provides an annual bursary to assist students in financial need.

**Donald E. Clark Memorial Scholarship**

In memory of Donald E. Clark, former Professor and Head of the Engineering Department, one or more scholarships are awarded to final-year students in the Engineering Department. Selection criteria include academic performance, aptitude and interest in the engineering field.

**Cobequid Dog Club Scholarship**

The Cobequid Dog Club awards a scholarship to a Nova Scotia student who is admitted to a veterinary college.

**Colonel Charles Coll Memorial Scholarship**

In memory of Colonel Charles H. Coll, a scholarship is awarded to a student in the final year of an Animal Science option. Selection criteria include academic performance, involvement and interest in poultry, and achievement in and contribution to 4-H.

**Charles M. Collins Memorial Scholarship**

A scholarship will be awarded annually to a student who is enrolled in a program of study relating to Horticulture. The scholarship is in memory of Charles McKittrick Collins, who taught Horticulture at the Dalhousie Faculty of Agriculture, formerly NSAC, for twenty-five years and supervised the landscaping and maintenance of the campus grounds, and for whom the Collins Horticultural Building was named in 1975. Preference will be given to students studying in the Bachelor of Technology program in Environmental Landscape Horticulture who have not qualified for other significant awards.

**George & Lottie Cook Memorial Scholarship**

The George and Lottie Cook Memorial Scholarship is awarded annually to a Nova Scotia student enrolled in the first or second year of any program of study. Selection criteria include academic performance and financial need.

**The Renée Covill Scholarships**

Five scholarships will be awarded to Atlantic Canadian students studying in a program leading to a Bachelor's degree with a major in Plant Science (Agronomy or Horticulture) or Environmental Landscape Horticulture. Preference will be given to students who have course and project work that reflect a commitment to environmental issues and career interests in growing plants (including farming). Selection criteria are academic performance, financial need, and career plans.

**Dorothy Creelman Cox Memorial Scholarship**

A scholarship is awarded to a female student entering the second year of the BSc (Agr.) program in the Plant Science option. Selection is based on academic performance in the first year.

**Dr. Kenneth Cox Memorial Scholarship**

In memory of Dr. Kenneth Cox, former Principal, this scholarship is awarded to a student entering the final year of the BSc (Agr.) program.

**Dairy Farmers of New Brunswick Scholarship**

Dairy Farmers of NB offer a \$750 scholarship to an NB resident who is enrolled in any year of an approved technician or technology diploma or certificate program relating to agriculture. For further information and application form, contact nbmilk@nbmilk.com or (506) 432-4330. Application deadline is June 15.

**Dairy Farmers of Nova Scotia Bursary**

The Dairy Farmers of Nova Scotia awards a \$1,000 bursary to an NS student doing project or course work related to the dairy industry. Students in the third or fourth year of the BSc (Agr.) program (any option) or graduate students undertaking course or project work related to the dairy industry are eligible. Selection criteria include proven interest and experience in the dairy industry, the potential beneficial impact of study on the Nova Scotia dairy industry, and academic performance. Applications must be submitted to the Dalhousie Faculty of Agriculture Awards Office no later than September 24.

**Dartmouth Horticultural Society Bursary**

The Dartmouth Horticultural Society sponsors a bursary for a student who has completed at least one year of study in a Plant-related program of study. Selection criteria include financial need and academic performance. Preference will be given to students in the following priority: HRM; Nova Scotia; and elsewhere in Canada.

**Eastern Veterinary Technicians Association Bursary**

The Eastern Veterinary Technicians Association awards a bursary and a stethoscope to a second-year student in the Veterinary Technology program. This bursary will be awarded to the student who best demonstrates proficiency in veterinary clinical skills during the first year and externship at the Atlantic Veterinary College.

**Ernest L. Eaton Memorial Scholarship**

One scholarship will be awarded to a student entering the third year of the BSc (Agr.) program who has not received scholarships of higher value. Selection is based on the student's average in the second year of the program.

**Egg Producers of Newfoundland & Labrador Scholarship**

The Egg Producers Association of Newfoundland and Labrador awards a scholarship to a Newfoundland student entering the third or fourth year of the BSc (Agr.) program.

**Farm Credit Canada Scholarship**

The Atlantic Region of Farm Credit Canada awards a scholarship to a Canadian student entering the fourth or final year of the BSc (Agr.) program in the Agricultural Economics or Agricultural Business option. Selection criteria include academic performance, interest and competence in farm management and in the subjects associated with the economics of the farm business, interest and involvement in university and home community as demonstrated by participation in organizations and affairs, farm experience, and financial need.

**Farm Focus Bursary**

The Farm Focus Bursary is awarded to a student entering the second year of study. Selection is based on financial need and academic performance.

**Ena Fenton Memorial Scholarship**

Sponsored by the Bedford Horticultural Society, the Ena Fenton Memorial Scholarship is awarded to a second-year student from the Bedford-Sackville-Waverley district of Nova Scotia, studying Horticulture or Environmental Studies. In years when there is no suitable candidate from Bedford, Sackville, or Waverley, qualifies for the scholarship, consideration will be given to other students from HRM (excluding Halifax and Dartmouth). Selection will be based on financial need, career plans, and academic performance.

**T. Beverly Milligan Gale Memorial Bursary**

The T. Beverly Milligan Gale Memorial Bursary was established in 2010 in recognition of her spirit and love of the gardens at the Dalhousie Faculty of Agriculture. This bursary will go annually to a student who is enrolled in any year of study and who has shown an interest in horticulture, particularly landscape design and care. Preference will be given to mature students. Selection criteria will include career plans, academic performance, and financial need.

**Kevin Grant Memorial Scholarships**

In memory of Kevin Grant, who graduated from the Dalhousie Faculty of Agriculture (formerly NSAC) in 1975 with an Animal Science Technician diploma, two scholarships will be awarded to final-year students in a two-year technology program of study need. Selection criteria include academic performance, leadership and contribution to campus life, career plans, and financial need. Preference will be given to students enrolled on a full-time basis.

**Green Diamond Equipment/John Deere Atlantic Agriculture Bursary**

Green Diamond Equipment/John Deere sponsors a bursary for a student from Atlantic Canada studying at the Faculty of Agriculture with a life goal of working in agriculture. Students who have completed at least one year of study in any program are eligible. The main selection criterion will be financial need.

**Chuck Harrison Memorial Bursary**

In memory of Chuck Harrison, Class of 1970, a bursary is awarded to a final-year Diploma in Business Management student. Selection criteria include leadership and involvement in athletic and other activities at the Faculty of Agriculture, and a sound academic record.

**Bonnie R. Haviland Memorial Bursary**

The Bonnie R. Haviland Memorial Bursary will be awarded annually to a student entering the second year of the Veterinary Technology program whose performance in the program has demonstrated a caring attitude and a commitment to others. This bursary cannot be awarded with others of greater value.

**John Higgins Memorial Bursary**

In memory of John Higgins, who taught at the Dalhousie Faculty of Agriculture (formerly NSAC), the Atlantic Association of Landscape Designers sponsor a prize and a free association membership to a student entering the third year of the Bachelor of Technology in Environmental Landscape Horticulture program who has excelled in the area of landscape design during the Diploma in Managed Landscapes Technology program. Selection criteria include academic performance and skill and interest in landscape design.

**Isgonish Chapter Silver Anniversary IODE Renewable Bursary**

The Isgonish Chapter Silver Anniversary IODE Bursary is awarded to a student entering the third year of the B.Sc.(Agr.) program in the Aquaculture major. Selection criteria include financial need, academic performance, and participation and leadership in extracurricular activities. One bursary will be presented, either

to a third-year student or to a fourth-year student as a renewal to the previous year's recipient.

#### ***Dr. Bill Jenkins Memorial Scholarship***

In memory of Dr. Bill Jenkins, Class of 1938, who served as Principal of the former NSAC from 1964 to 1972, a scholarship will be awarded to a second- or third-year undergraduate student in any of the Business degree programs. Selection criteria will include overall academic performance, leadership record and financial need.

#### ***Randy and Gladys Keddy Memorial Bursary***

The Randy and Gladys Keddy Memorial Bursary will be awarded to a second-year technical or third-year degree student whose background, program of study, course and project work, and summer employment show a genuine interest in working in the agricultural industry following graduation. Selection criteria include career goals, academic performance, and financial need. Students receiving other scholarships valued at \$1,000 or greater are not eligible. Given similar or equal qualifications of candidates, preference will be given to students from the Annapolis Valley of Nova Scotia with farm backgrounds.

#### ***Kings Mutual Insurance Scholarships***

In memory of Past Directors, the Kings Mutual Insurance Company awards three scholarships to Nova Scotia students, in any year of any program of study. At least one scholarship will be awarded to a technical student. Selection criteria include financial need, academic performance, and demonstrated interest in a career in the Agri-food industry as reflected by summer employment and/or extracurricular involvement. This scholarship is not available to students receiving other scholarships totaling \$1,000 or more.

#### ***P. Max Kuhn Scholarship***

The P. Max Kuhn Scholarship will be awarded annually to a Nova Scotia student with a farm background who is enrolled full-time in any year of any program and whose course and project work and summer employment demonstrate an interest in working in the agriculture industry after graduation. Selection criteria include financial need and academic performance. Preference will be given to students who have completed at least one year of study. Students may receive this scholarship only once.

#### ***Landscape Nova Scotia Bursary***

Landscape Nova Scotia awards a bursary to a Nova Scotia student studying in a landscape-related program. Selection criteria include academic performance and financial need.

#### ***Lunenburg/Queens Federation of Agriculture Scholarship***

The Lunenburg/Queens Federation of Agriculture Scholarship is awarded to a student from Lunenburg or Queens County in Nova Scotia who has completed at least one year of study at the Faculty of Agriculture. Selection criteria include academic performance, farm or agricultural background or experience, and plans to pursue a career in the agricultural industry.

#### ***C. C. MacDougall Memorial Scholarship***

This scholarship is awarded to a student pursuing a degree or diploma in Agriculture, Home Economics or Veterinary Medicine. To be eligible, a student must have been a 4-H member from Kings County, NB, or have parents who raise or breed Guernseys anywhere in New Brunswick.

#### ***Dr. Allan and Barbara MacKay Scholarship***

The Dr. Allan and Barbara MacKay scholarship is awarded annually to a student admitted to the Atlantic Veterinary College. In recognition of his long association with the practice of veterinary medicine in NS and with the Faculty of Agriculture, Dr. J. Allan MacKay, Class of 1943, has established this scholarship.

#### ***Nova Scotia Power Inc. Centennial Scholarships***

Nova Scotia Power sponsors five scholarships with a two-year tenure to Engineering students at the Associated Universities in Nova Scotia who will be entering the third year of the B.Eng. program at Dalhousie University in September. Selection criteria include academic performance, personal attributes and involvement in extra-curricular activities.

#### ***Angus and Tena MacLellan Memorial Scholarship***

This scholarship is awarded to a student entering the third or fourth year of a degree program.

#### ***Paul R. MacPhail PEI Potato Industry Scholarship***

In memory of Paul R. MacPhail, the PEI Potato Board offers a scholarship to Prince Edward Island students studying at the graduate or undergraduate level of

an agricultural degree program at any recognized Canadian agricultural institution, or to students in a postgraduate degree program at a recognized Canadian university, carrying out research projects related to potato production and utilization (including all disciplines, e.g. biotechnology, pathology, entomology, etc.). Undergraduate students must demonstrate through course work, summer employment and/or home farm background an interest in working in the potato industry. Selection criteria for potential undergraduate scholarships include academic performance, extracurricular activities, and employment history. Graduate students will be considered on the basis of academic performance and relevance of the project to the improvement of the PEI potato industry.

#### ***Dr. Herbert F. MacRae Memorial Dalhousie Faculty of Agriculture/Macdonald College Exchange Award***

This award is designed to support student and staff exchange between the Dalhousie Faculty of Agriculture and Macdonald College of McGill University. Students considering a semester or a year of study at Macdonald College as part of the requirements of a program of study at the Faculty of Agriculture, or students transferring to a program of study at Macdonald College are eligible.

#### ***Edith Main Memorial Bursary***

In memory of Edith Main, the auxiliary to the Nova Scotia Veterinary Medical Association awards a bursary to a Nova Scotia student who has been admitted to a Canadian veterinary college.

#### ***Joseph E. Mapplebeck Memorial Bursaries***

In honour of Joseph E. Mapplebeck, who farmed for 50 years in Kings County, NS, and in recognition of his appreciation for the importance of a good education, family members have established two bursaries to be made available to technology students. Eligible candidates will have successfully completed the first year of a technology program and demonstrate financial need. At least one of the two awards will be made available annually to a student in the Plant Science Technology program.

#### ***Donald McInnes Award***

This scholarship is sponsored by Pictou Mutual Insurance Company to commemorate the 40 years of service Donald McInnes provided on their Board of Directors. This award is open to all students. Selection criteria include commitment to and involvement in the community and leadership provided in student activities, academic performance and financial need. A student may not be selected for this award more than once.

#### ***H. A. L. McLaughlin Memorial Scholarship***

In memory of H. A. L. McLaughlin, who taught horticulture at the Dalhousie Faculty of Agriculture, formerly NSAC, from 1953 to 1971, this scholarship is awarded to a student in Horticulture.

#### ***Bill Mathewson Memorial Bursary***

In memory of Professor Emeritus Bill Mathewson, who taught Animal Science course work for twenty years at Dalhousie Faculty of Agriculture, formerly NSAC, a bursary will be awarded annually to a student in any year of any program to assist in furthering their education through study/travel to another country. This bursary has been made available through generous contributions from students, Faculty of Agriculture colleagues, and friends and associates at church and within the agricultural industry, in particular the sheep breeders of Nova Scotia. In applying for consideration, students will submit a proposal to participate in such activities as a study semester abroad toward their Faculty of Agriculture degree/diploma, a specialized training course, an internship or a development project, or to attend a conference to make a presentation.

#### ***Karen Meek Memorial Scholarship***

In memory of Karen Meek, who studied Agricultural Business at the Dalhousie Faculty of Agriculture (formerly NSAC), 1980-82, a scholarship will be awarded annually to a student who has completed at least one year in the BSc (Agr.) Environmental Science program. Selection criteria include academic performance, financial need, and contribution to campus life. This scholarship is not available to students receiving other scholarships totaling \$1,000 or more.

#### ***John Miller Memorial Bursary***

The bursary is in memory of John Miller, who served as Secretary/Manager of Pork Nova Scotia from 1983 to 1997. The John Miller Memorial Bursary is awarded to a Nova Scotia student, in any year of any program at any agricultural university/college in Canada, whose course and project work and career plans reflect an interest in the hog industry or whose application shows interest, understanding, and appreciation for Nova Scotia's hog industry.

**John Reginald (Reg) Moore Memorial Bursaries**

In memory of J. R. (Reg) Moore, who graduated from Dalhousie Faculty of Agriculture (formerly NSAC) in 1947 and retired from a career with Farm Credit Canada, two bursaries will be awarded to students from Colchester County, Nova Scotia, who have completed at least one year of study in any program. Selection will be based on financial need and sound academic performance. Preference will be given to students studying full-time.

**A.C. Neish Memorial Trust Scholarship**

The A.C. Neish Memorial Trust awards a scholarship to a student entering the final year of the BSc (Agr.) program. Selection criteria include outstanding academic performance and qualities of leadership as indicated by participation and achievement in both academic and non-academic activities.

**New Brunswick Institute of Agrologists Scholarship**

The New Brunswick Institute of Agrologists awards a \$1,000 scholarship to an NB student entering the third year of a degree program in Agriculture at a recognized Canadian institution. Students should indicate their enrollment in one of the following Agrology disciplines: Agricultural Economics and Farm Management; Plant, Animal, Soil and Environmental Sciences; Pest Management; or Agrometeorology. Selection criteria include academic performance, participation in extracurricular activities, and financial need. Applications must be submitted no later than October 1 to either the Dalhousie Faculty of Agriculture Awards Office or Registrar, New Brunswick Institute of Agrologists, PO Box 3479, Station B, Fredericton, NB E3A 5H2 [www.nbagrologists.nb.ca](http://www.nbagrologists.nb.ca)

**Faculty of Agriculture Bursaries**

The Faculty of Agriculture provides bursaries to students in need of financial assistance. To be eligible students must be in good standing, must have spent at least one term of full-time study at Dalhousie Faculty of Agriculture, and must be registered on a full-time basis for both semesters of the academic year. Faculty of Agriculture students in need of financial assistance can apply for a Faculty of Agriculture bursary on an ongoing basis throughout the academic year.

**Dalhousie Faculty of Agriculture Athletic Bursaries**

Five awards will be presented to returning student athletes in the Faculty of Agriculture. Selection criteria include financial need, involvement in/member of a university varsity team, recommendation from a coach, and satisfactory academic performance.

**Dalhousie Faculty of Agriculture Alumni Family Bursaries**

Several bursaries will be awarded annually to family members of Dalhousie Faculty of Agriculture Alumni studying at the Faculty of Agriculture. Selection criteria include academic performance and financial need. Students in any year of any program are eligible. Application deadline is September 20. Apply online at <http://Dalhousie Faculty of Agriculture.ca/alumni/alumnifamilybursary/apply/>.

**Nova Scotia Animal Breeders Co-operative Limited Scholarship**

The Nova Scotia Animal Breeders Co-op awards two scholarships (one to a degree student and one to a technology student) to returning Nova Scotia students studying in an animal-related program whose home farm backgrounds, course and project work, and career interests reflect an interest in the dairy or beef industry. Students must not have received other major scholarships.

**Nova Scotia Egg Producers Association Scholarships**

Two scholarships will be awarded annually by the Nova Scotia Egg Producers Association to students enrolled in the Animal Science major of the B.Sc.(Agr.) program whose course and project work show an interest in poultry. At least one scholarship will be awarded to a final-year student conducting a poultry-related research project in RESM4002 and RESM4003.

**Nova Scotia Federation of Agriculture Bursaries**

The Nova Scotia Federation of Agriculture awards two bursaries to second-year NS students with farm or 4-H backgrounds (one technology and one degree). Selection criteria include financial need and academic performance.

**Nova Scotia Federation of Agriculture 100th Anniversary Scholarship**

In recognition of the 100th anniversary of the Nova Scotia Federation of Agriculture in 1995, a scholarship is awarded to a Nova Scotia student with a farm background, who has a solid academic record and financial need. Students studying in any year of any program who have not qualified for other significant awards are eligible.

**Nova Scotia 4-H Council Award**

A scholarship will be awarded to a second-year Nova Scotia student in any program. Selection criteria include academic performance, financial need, and participation in 4-H club activities.

**Nova Scotia Institute of Agrologists Scholarships**

The NSIA awards two scholarships to Nova Scotia students. One will be awarded to a student entering the third year of the BSc (Agr.) program; the second, recognizing the current anniversary of NSIA, to a student entering the second, third or fourth year of the BSc (Agr.) program. In awarding these scholarships, the selection committee will take into consideration academic performance, participation in school and community activities, and degree of interest in studying agrology and pursuing a career in the Agri-food industry. Financial need may also be considered. A student may receive this award only once.

**NSERC Undergraduate Student Research Awards (USRA)**

The Natural Sciences and Engineering Research Council of Canada sponsors a program of summer research awards to encourage outstanding undergraduate students to undertake graduate studies and pursue research careers in the natural sciences and engineering disciplines. The purpose of the award is to supplement the salary of a summer student who is working on an individual research project designed in conjunction with a faculty member who holds an NSERC research grant. The award is for a minimum of sixteen weeks on a full-time basis in research and development in natural sciences and engineering. To be eligible, students must be Canadian citizens or permanent residents, registered full-time as undergraduate students in a natural science or engineering discipline, and have completed at least one year of study with a minimum 70% cumulative average. Applications must be submitted to the Office of Graduate Studies and Research by February 22.

**Nutreco Canada Inc. Scholarship**

Nutreco Canada Inc. awards a scholarship to a final-year BSc (Agr.) student in the Animal Science option. Selection criteria include academic performance, leadership qualities, and participation in student & community affairs.

**Don Palfrey Memorial Scholarship**

A scholarship will be awarded annually in recognition of the many years of service and contributions to weed science in Nova Scotia by Don Palfrey. The scholarship will be awarded to an undergraduate student who is carrying out a senior-year research project in the area of pest management, with preference given to students involved in weed science, either through academic work or summer employment.

**Robert Parent Memorial Scholarship**

In memory of Robert Parent, Class of 1921, this scholarship will be awarded to an outstanding student studying in any year of any program who has not qualified for other significant awards.

**Passionate Plants Person Award**

The Passionate Plants Person Award, established by the Atlantic Rhododendron & Horticulture Society, is awarded to a second-year Nova Scotia student in the Diploma in Managed Landscapes program. The recipient will also receive a one-year membership with ARHS. Preference is given to students whose passion for plants is infectious and who will most impact the way we regard and understand plants in both public and private environments. Other criteria include communication and leadership abilities and financial need.

**Pork Nova Scotia Prize**

Pork Nova Scotia sponsors a prize to a Nova Scotia student with an interest and/or background in swine production. Selection criteria include demonstrated interest in the swine industry (through course or project work), academic performance, and financial need.

**Prajna Athletic Bursaries**

Two awards (one to a male student and one to a female student) will be presented to returning students. These awards were established by Dr. Andre Lirette, a former Professor in the former Animal Science Department. To be eligible, students must maintain sound academic performance and have been involved in either a varsity team or an intramural/recreational team at the Faculty of Agriculture. Selection criteria include financial need, leadership, and contribution to student life.

**Prince Edward Island Dairy Youth Trust Scholarship**

This scholarship is available to the son or daughter of a PEI resident currently pursuing their studies at a post secondary level. Preference will be given to

undergraduate students with an interest in animal science, animal genetics and/or business. Applicants must have successfully completed at least the first year of a university/college program. A student may receive the award once. Application deadline is June 1. Applications are available online at [www.holsteinpei.com](http://www.holsteinpei.com)

#### **Prince Edward Island Institute of Agrologists Scholarship**

The PEI Institute of Agrologists scholarship is awarded annually to a student from Prince Edward Island in the third or fourth year of the BSc (Agr.) program who is intending a career as a professional agrologist. This scholarship is awarded based on academic performance, university and community involvement, and financial need.

#### **Stuart Rath Junior 'A' Bearcat Hockey Education Award Fund**

Awards are available to members of the Truro Junior 'A' Bearcats Hockey Club. Selection is based on academic performance, community service, and the recommendation of the team coaches. Students in second semester and second year must successfully complete the course work in the previous semester to be eligible for continued support.

#### **Cliff & Grace Retson Memorial Bursary**

In memory of Cliff & Grace Retson, Class of 1934, a bursary is awarded to an international student. Students in any year of any program are eligible. Selection criteria include financial need, academic performance, and interest in and involvement in multi-cultural activities on campus.

#### **Ira L. Rhodenizer Memorial Scholarship**

In memory of Ira L. Rhodenizer, the Nova Scotia Federation of Agriculture awards a scholarship to a second-year Nova Scotia student. Selection criteria include academic performance, involvement in student affairs, and participation in the 4-H program.

#### **Dr. Robert G. Rix Bursary**

This bursary is awarded to a deserving student in financial need.

#### **J. Arnold Roberts Memorial Scholarship**

In memory of J. Arnold Roberts, a scholarship is awarded to an outstanding student from Atlantic Canada studying in any year of any program who has not received scholarships of greater value.

#### **Roop Realities Ltd. Renewable Scholarship**

The renewable Roop Realities Ltd. Scholarship is awarded to a student studying in a landscape-related program who has completed at least one year of study in either the technology or the B.Tech program. The scholarship is open to all students, either full-time or part-time.

#### **Howard W. Roper Memorial Bursary**

In memory of Howard W. Roper, a bursary will be awarded annually by the Nova Scotia/Newfoundland Branch of Holstein Canada to a student who has completed at least one year in any program. Preference will be given to second-year students in the Diploma in Business Management-Dairy Farming. Residents of Nova Scotia or Newfoundland and Labrador who are members of Holstein Canada or members of families with Holstein Canada membership are eligible to apply. Selection criteria include involvement in the dairy industry, extracurricular involvement, involvement in farm organizations, financial need, and satisfactory academic performance in the first year of study.

#### **Ted Rose Memorial Bursary**

The Ted Rose Memorial Bursary will be awarded to a student who plans to operate a livestock farm. Selection criteria include financial need, sound academic performance, and a commitment to animal welfare.

#### **Rotary Club of Truro International Student Bursary**

This bursary will be awarded annually by the Rotary Club of Truro to an International student. All undergraduate and graduate students paying the International tuition differential are eligible for consideration. Preference will be given to students registered in a full-time program of study, with additional preference given to students studying for the full year. Special consideration will be given to students from a developing country who plan to return and apply their education from the Faculty of Agriculture. Selection criteria include financial need and potential impact of the bursary on the student's lifestyle while at school.

#### **Rick Russell Memorial Bursary**

In memory of Rick Russell, a long-time woodsmen coach and Animal Science Technician graduate, a bursary will be awarded to a woodsmen athlete in the second, third, or fourth year of study in any Faculty of Agriculture program. The

selection criteria include financial need, involvement and leadership in the woodsmen program, and satisfactory academic performance.

#### **Anna Helvig Schousboe Memorial Scholarship**

This scholarship is awarded to a resident from Kings County, New Brunswick, working towards a degree or diploma in Agriculture, Veterinary Medicine, or Home Economics at a post-secondary institution.

#### **George James Schaller Memorial Scholarship**

In memory of George J. Schaller, Class of 1948, a scholarship will be awarded to an outstanding student studying in any year of any program who has not qualified for other significant awards.

#### **Gail Semple Memorial Bursary**

In memory of Gail Semple (née Johnson, Truro, NS), who had a strong commitment to animal welfare, a bursary is awarded annually to a student planning to study veterinary medicine who has completed at least one year of study at the Dalhousie Faculty of Agriculture or who was admitted to the Atlantic Veterinary College in the current year. To be eligible, applicants must be either currently or previously registered in the Pre-Veterinary program at the Faculty of Agriculture or currently in the first year of the DVM program at AVC. Selection criteria include financial need, academic performance, and a background with experience in animal welfare.

#### **George W. Slipp Memorial Scholarship**

The Chicken Farmers of New Brunswick Marketing Board awards an annual scholarship in memory of Mr. George W. Slipp, to a New Brunswick resident who is enrolled in a post-secondary agricultural program. Selection is based on academic achievement, financial need, involvement in agriculture, and interest in the poultry or food industry. Applications are available at the Dalhousie Faculty of Agriculture Awards Office, or by email from [nbchicken@rogers.com](mailto:nbchicken@rogers.com). Applications must be submitted to the Dalhousie Faculty of Agriculture Awards Office no later than October 15.

#### **G. G. Smeltzer Memorial Bursary**

The G. G. Smeltzer Memorial Bursary is awarded to a third- or fourth-year student from Atlantic Canada in the BSc (Agr.) program majoring in Plant Science (Agronomy specialization). Selection criteria include a genuine interest in the area of field crops reflected through course and project work and summer employment, and financial need.

#### **B. S. Sodhi Memorial Bursary**

The B. S. Sodhi Memorial Bursary is awarded annually to a student paying international student fees. Students in all programs of study are eligible. Preference will be given to students in undergraduate and technology programs and will be based on financial need.

#### **St. Margaret's Bay Garden Club Bursary**

The St. Margaret's Bay Garden Club Bursary is awarded to a student entering or studying Horticulture at the Faculty of Agriculture from the St. Margaret's Bay area. To be eligible students must live in the region that extends from West Dover to Bayswater, NS, and inland from the Bay a distance of 15 km. The application process for the bursary consists of a letter from the applicant with following criteria: name and home address, confirmation of enrollment form indicating program of study, reference letters, reason for choosing Horticultural program, how you plan to use your training in Horticulture and why you deserve the bursary. Send application letter to: P. R. Warm an, Chair of the Bursary Committee, SMBGC, 268 Boutilliers Pt Road, Boutilliers Pt, NS B3Z 1V1. Application deadline is March 15.

#### **Jennifer Hayes Starratt Scholarship**

In honour of Jennifer Hayes Starratt, who graduated in 1996 with a BSc (Agr.) degree majoring in Environmental Biology, a scholarship will be awarded to a female student entering the final year of the BSc (Agr.) program. Selection will be based on academic performance, leadership, and involvement in campus activities. The scholarship will not be awarded to a student receiving other significant scholarships. Preference will be given to students who have completed the first three years at the Faculty of Agriculture.

#### **Stewiacke Valley Garden Club Bursary**

The Stewiacke Valley Garden Club Bursary is awarded to a student from the Stewiacke Valley area of Nova Scotia. Selection criteria include involvement in extracurricular and community affairs, financial need, and academic performance.

**William Swetnam Memorial Scholarship**

In memory of William Swetnam, Class of 1956, the William Swetnam Memorial Scholarship will be awarded to an Atlantic Canada student studying in the third or fourth year of the BSc (Agr.) program who has displayed leadership qualities during their program.

**Syngenta Pest Management Awards**

Syngenta awards two scholarships to students whose course and project work reflect an interest in the Maritime potato industry. Selection criteria include academic performance, interest in the Maritime potato industry, and potato farm experience or background.

**Bruce Trenholm/Atlantic 1986 Scholarship**

A prize is awarded to an Atlantic Canada student entering the final year of any program who has a Holstein farm or 4-H (Holstein calf project) background. Selection criteria include academic performance and career goals.

**Vice-President's Scholarship**

This scholarship is awarded to a final-year BSc (Agr.) student.

**Florence (Pineo) Ward Memorial Awards**

In memory of Florence (Pineo) Ward, three to five bursaries will be awarded annually to students in financial need. Recipients will have completed at least one year of study in a technology, B.Tech, or BSc (Agr.) program. Preference will be given to students with sound academic background who have enrolled for technical training to enhance their employability but whose financial constraints are limiting their ability to continue their studies. In the event that two or more candidates otherwise qualify equally, preference will be given to students from Boutilier's Point, Halifax County, or Advocate, Cumberland County, Nova Scotia.

**Raymond Webber Memorial Scholarship**

Landscape Nova Scotia and the New Brunswick Horticultural Association jointly award a scholarship to the most promising second-year Diploma in Managed Landscapes Technology student. Selection criteria include academic performance and practical work skills.

**George B. Whalen Memorial Scholarship**

The New Brunswick Milk Marketing Board awards a scholarship in memory of George B. Whalen, who dedicated a great part of his life to the promotion of a more viable dairy industry in New Brunswick. Applicants must be New Brunswick residents enrolled in the second, third, or fourth year of study in a university degree program relating to agriculture or the dairy industry. Areas of study may include, but are not necessarily limited to, plant and animal science, agricultural engineering, veterinary medicine, agricultural economics, etc. Selection will be based on financial need, academic performance, and involvement in community and future plans. Applications including an essay (300-500 words), two letters of recommendation, and a transcript of marks must be submitted no later than June 15 to: Scholarship Committee, NB Milk Marketing Board, Box 490, Sussex, NB E0E 1P0. [www.nb4h.com/ewelcome/escholarship/escholarship.htm](http://www.nb4h.com/ewelcome/escholarship/escholarship.htm)

**Michael Whidden Memorial Award**

The Michael Whidden Memorial Award will be awarded to a student who has provided leadership on the Woodsmen Team, and has maintained a sound academic performance.

**Eric Williams Memorial Scholarships**

Two scholarships sponsored by the Dairy Farmers of Newfoundland and Labrador are awarded to students from Newfoundland and Labrador who have completed at least one year of study in any program (generally, one to a technology student and one to a degree student). Selection will be based on academic performance.

**Wild Blueberry Producers Association of Nova Scotia Scholarship**

The Wild Blueberry Producers Association of Nova Scotia awards a scholarship to a Plant Science student entering the third or fourth year of the BSc (Agr.) program. Selection will be based on academic performance and financial need. Preference will be given to someone with interest and experience in small fruits.

**Young Farmer's Bursary**

A bursary sponsored by the PEI Young Farmers' Association will be presented to a student returning for their last year of studies in either the degree program or another multiple-year program. To be eligible, a student must be a Prince Edward Island resident and must be returning to the farm after completion of their program.

**C. Faculty of Architecture and Planning**

These scholarships are administered by the academic unit. Please consult the Faculty of Architecture and Planning.

**75th Anniversary Alumni Family Scholarship**

The Engineering Alumni Association established this award in 1995 in recognition of the 75th anniversary of the Association. This award of \$1,750 is open to students registered in the penultimate or final undergraduate year of Computer Science, Architecture, Planning or Engineering. The recipient must be a family member (son/daughter, spouse, grandchild, niece/nephew, brother/sister) of an engineering graduate and have achieved satisfactory academic standing. Application required. Deadline: September 30.

**Aliant Ambassador Scholarship**

A one-year scholarship open to students registered in Year 4 or 5 of an Architecture, Planning, Computer Science, or Engineering program. Selection is carried out by the Scholarship & Awards Committee of the Faculty of Engineering. Application required. Deadline: September 30.

**The Harry Kitz Fund**

Interest from the fund, established in memory of the late Harry Kitz, is used to support one or more students in the Faculty of Architecture and Planning to undertake supervised planning, design, or construction activities on public property in the Halifax Regional Municipality. Proposals are evaluated on their imagination, practicality, and potential value to the community. Application Deadline: May 31.

**Mazankowski Foundation Entrance Scholarship**

This foundation has established a \$1,100 award for a student who fulfils or is expected to fulfil the minimum entrance requirements for admission to the BEDS program in Architecture or Year 3 of the Bachelor of Computer Science or Engineering. The Scholarship is awarded on the basis of the applicant's academic record at the Associated University or Dalhousie University. The Committee may also weigh financial and other considerations in reaching a decision. Application required. Deadline: April 30.

**The Medjuck Architectural Design Scholarship**

The Centennial Group of Companies Limited established this award of \$1,500 for a student with an outstanding record in Design in Year 3 of the BEDS program. The successful applicant is selected at the year-end review in April and receives the scholarship at the start of the next academic term, in May. Application not required.

**The Newfoundland and Labrador Association of Architects William J. Ryan Memorial Scholarship**

The Newfoundland Association of Architects established this \$2,000 award to an Architecture student entering Year 4 of the BEDS program who was born in Newfoundland or had lived in the province for a minimum of three years prior to entrance into a university in the province, and who demonstrates: (a) the best design ability through assigned projects; (b) practicality of design and ability to show that he or she can make the solution workable; (c) aptitude for a particular or several aspects, other than design of architecture and the built environment; (d) an indication of the development of professional ability; (e) highest overall marks in classes of study other than design; (f) financial need, if candidate is equal to others in at least three of the other criteria. Application not required.

**Newfoundland and Labrador Alumni Undergraduate Scholarship**

This award of \$1,000 was established by the St. John's Newfoundland Alumni Branch to a student registered in Year 4 in Architecture, Planning, Computer Science, or Engineering. The scholarship is awarded primarily on the basis of the applicant's academic record (first class mandatory) with preference given to students who were residents of Newfoundland and Labrador immediately prior to attending Dalhousie. The selection committee may weigh other considerations in reaching a decision. Deadline: September 30.

**President's Associates Entrance Scholarship**

The President's Associates Entrance Scholarship has been made possible by members of the Associate's Program (1994-96). The members represent business, industry, friends, faculty and university administrators. This award of \$1,000 is made annually to a student in undergraduate Architecture, Planning, Computer Science or Engineering on the basis of their academic record. Candidates must have fulfilled or expect to fulfil the entrance requirements for the BEDS program in Architecture or for entrance into third year of Engineering or Computer Science. Deadline: April 30.

### ***The Shaw Group Environmental Design Scholarship***

In the 1960s, The Shaw Group Limited established an award for the student in the School of Architecture who has derived the greatest benefit from Design classes during Year 3 of the Bachelor of Environmental Design Studies program. To be eligible for this \$2,500 award, a student must have been born in, and have a permanent residence in, Atlantic Canada. The recipient is selected at the year-end review in April and receives the scholarship at the start of the next academic term in May. No application is required.

## **D. Faculty of Arts and Social Sciences**

The following scholarships are administered by the Registrar's Office. Applications are not required.

### ***Nathan T. Ashkins Scholarship***

Each year the Nathan T. Ashkins fund provides for a scholarship to a student in Arts & Science who is beyond first year.

### ***Robert Bruce Scholarship***

Robert Bruce of Banlieue, Quebec, made a bequest to the University to establish bursaries and scholarships.

### ***Dalhousie Club of New York Scholarships***

A fund for this purpose, established by the Dalhousie Club of New York and placed in the hands of the Board of Governors of the University, endows several scholarships open to students in the Faculties of Arts & Social Sciences or Science.

### ***Dr. Frederick J. Gaudet Scholarship***

Dr. Gaudet bequeathed to the University in 1978 a sum of money to provide for a scholarship in Arts.

### ***The Hyman I. Jacobson Scholarship***

Under the will of the late Hyman Isaac Jacobson a bequest of \$5,000 was given to the University to benefit the Humanities and Social Sciences.

### ***The Khaki University Scholarships***

From the Khaki University of Canada and the Young Men's Christian Association Memorial Scholarship Fund, the trustees of Khaki University made a gift to Dalhousie University in 1921 of \$6,500 to endow scholarships.

### ***NewPage-Port Hawkesbury Mill Undergraduate Scholarship in Arts or Science***

On the occasion of their 25th Anniversary Stora Enso have established an endowment to provide one undergraduate scholarship open to students in Arts & Science. To be eligible, candidates must reside in Nova Scotia, have demonstrated academic excellence and have exhibited a desire to learn. Students will be considered after one year at Dalhousie.

### ***The Commodore Bruce S. Oland Scholarship***

An annual scholarship that alternates between the Department of English and the Faculty of Management. Awarded automatically by the Registrar's Office.

### ***The Alan Pollok Scholarship***

This scholarship of \$1,000 was established by The Scots North British Society in Halifax in memory of the Rev. Dr. Alan Pollok. The awardee will be a second year student in the College of Arts and Science at Dalhousie University.

### ***The Charles and Cecelia Zwerling Scholarship***

This fund was created by members of the Zwerling family in memory of Mr. and Mrs. Charles Zwerling for a scholarship beyond first year.

**The following scholarships are administered by the academic unit. Please consult the departments directly for details.**

## **1. English**

### ***Allan and Lura Bevan Memorial Scholarship***

Colleagues and friends of the late Allan Bevan have established a memorial scholarship of about \$1,000 a year. The scholarship is to be awarded, in the first place, to a student in the Major program (that is a student entering the third or fourth year of the Majors program). In the absence of a suitable candidate from the Major program, the scholarship will be awarded to a student entering the third or fourth year of the Honours program. If there are no suitable candidates from English, the selection will be made by the Department of Music.

### ***The Archibald MacMechan Chapter/IODE Scholarship in English***

This scholarship was presented to Dalhousie University as an endowment by the Archibald MacMechan Chapter, Imperial Order Daughters of the Empire. It is awarded to a Dalhousie student of special ability in English, and preference is given to graduates who intended to study for a Master's degree in English. Students registered at King's are not eligible.

## **2. French**

### ***The French Department Scholarship***

This scholarship is awarded to students entering the third or fourth year of a major or an Honours program in French, and who have spent a year studying in France. The award is based on meritorious performance in French classes. At the discretion of the Department, the scholarship may also be awarded to outstanding students who have not studied abroad. This award is conferred at a Departmental ceremony in the spring.

### ***The Ruth Murray Scholarship for French Studies***

An endowment fund has been established to honour the memory of Mrs. Ruth Murray by providing scholarships to students in the Department of French. These scholarships are open to undergraduate students who are academically sound and who are participating in a departmental program abroad.

At the discretion of the Department, the fund may also be used to provide financial assistance for on-campus students majoring in French who have demonstrated above average academic ability. This award is conferred at a Departmental ceremony in the spring.

## **3. History**

### ***The Atlantic World History Scholarship***

Before air travel and telecommunications, oceans were of prime importance in connecting the communities that encircled them. This scholarship was created by Dalhousie History graduate Susan Buggey to encourage excellent senior students whose undergraduate studies have focused on the history of the social, cultural, economic and political worlds that have been connected across and around the Atlantic Ocean. Recipients will have taken one or both of the History Department's second year survey classes in Atlantic World history, as well as two or more other classes with substantial Atlantic World content. This scholarship is awarded annually.

### ***The Gilbert F. Jennex History Scholarship***

This annual in-class scholarship created by Dalhousie History graduate Gilbert F. Jennex will be awarded to an undergraduate student in their 3rd year of study with a concentration in History. Preference will be given to students whose area of interest is in exploring the field of the Atlantic World and its relationship to the study of Atlantic Canada.

### ***Laurel V. King Scholarship***

This scholarship, in the amount of \$1,000, has been established by Laurel V. King to reward students who have been particularly motivated by the discipline of History to achieve academic excellence. The scholarship is awarded annually to a student in the second or subsequent year of her degree program. The recipient will have History as a subject of concentration, will have shown good academic ability, and will have shown an excellent level of performance in History classes. Preference is given to a female student.

### ***The George E. Wilson Memorial Scholarship***

On the occasion of the 50th anniversary of the graduation of the Class of 1930, a representative announced the establishment of a scholarship fund. The scholarships, in honour of Professor Wilson, are open to students in history.

## **4. Music**

### ***The Bornoff/Garamie Memorial String Scholarship***

A scholarship will be given to a student who is entering the third or fourth year of a music degree program who in the opinion of the Department has demonstrated outstanding talent as a string player. The fund was established to honour the memory of two significant string music teachers, George Bornoff and Arthur Garamie.

### ***Evanov Radio Group Scholarship***

A \$1,000 scholarship will be awarded to a student in the third or fourth year of the Bachelor of Music concentration in Composition. To be eligible, students must be

Canadian citizens or landed immigrants and must demonstrate artistic excellence and a commitment to performing arts in the community.

#### ***Honourable L.D. Currie Memorial Scholarship in Music***

The Scots North British Society established this scholarship in memory of the Honourable Lauchlin D. Currie in 1971. An annual scholarship in the amount of \$1,000 is available to a Canadian in any year of Music. The successful student will have demonstrated competence in vocal or instrumental performance.

#### ***The Elvira Gonnella Scholarship in Voice***

Upon the recommendation of the voice faculty, this scholarship may be awarded to a voice student entering his/her third or fourth year of a music degree program, who has demonstrated an outstanding level of performance and exceptional potential for a professional singing career. This scholarship is given by former faculty member Elvira Gonnella, in gratitude for having had the privilege of teaching in the Dalhousie Music Department.

#### ***Halifax Ladies Musical Club Scholarship***

The Halifax Ladies Musical Club sponsors an annual scholarship of \$700 for a first year student in Music at Dalhousie.

#### ***Elisabeth Meyerhof Scholarship in Music***

An annual scholarship of at least \$1,500 awarded to the student entering the fourth year of his/her undergraduate degree program in Music who has achieved a high average in the music classes of the first three years and who in the opinion of the Department has demonstrated exceptional promise for a professional career as an instrumentalist in the performance of classical music (including early music). If no instrumentalist qualifies, a voice student would be considered.

#### ***Dr. David Peters Music Scholarship***

This scholarship in music has been established by Dr. David Peters. It will be awarded annually to a student in an undergraduate Music degree program who, in the opinion of the Department, demonstrates outstanding achievement in organ, piano, harpsichord or keyboard performance, choral music or other church performance. The minimum value of the scholarship is \$400.

#### ***Richardson Family Performing Arts Scholarship - Music***

A scholarship of \$2,000 will be awarded to a Music student, based on nominations from Music Department faculty members. Students must be in their third or fourth year of a Music degree program and have a GPA of 2.70 in first and second year music classes. Students must demonstrate artistic excellence and a commitment to performing arts in the community. Preference will be given to students in financial need, as determined by the Music Department's Scholarship Committee. This award was established by Bill Richardson, a graduate of Dalhousie's Law School, and by Colin and Debbie Richardson, both of whom worked in support of numerous music student productions in the Dalhousie Arts Centre.

#### ***The Effie May Ross Scholarships in Music***

An endowment fund, established under the will of the late Effie May Ross, supports scholarships to outstanding vocalists or instrumentalists with 'advanced standing' in degree programs in Music. Scholarships range in value and number and are awarded at the discretion of the Music Department's Scholarship Committee.

#### ***Dr. Don Wright Scholarship in Music***

The Dr. Don Wright Scholarship fund will provide annual scholarships to outstanding full-time students in the third or fourth year of an undergraduate music degree who demonstrate a consistently high level of achievement in all of their studies. Priority will be given to students concentrating in Music instruction or students who demonstrate a particular interest in/intend to continue their studies in the area of music education

#### ***Tietje Zonneveld Scholarship in Piano Studies***

Tietje Zonneveld taught, performed music, coached and collaborated at the Department of Music from 1976 until her retirement in 2004. An annual scholarship of \$1,000 will be awarded to an undergraduate student entering third year of the Bachelor of Music (Piano Performance) program or equivalent. If there are no eligible third year students in a given year, consideration may be given to a fourth year student. The scholarship may also be split into two awards. The recipient will have a cumulative GPA of 3.70 or higher.

## **5. Spanish and Latin American Studies**

#### ***Sonia Jones Scholarship***

The Sonia Jones Scholarship provides assistance to advanced students of Spanish and Latin American Studies (honours or major) who are studying abroad in programs approved by the University.

## **6. Theatre**

#### ***Costume Studies Scholarship***

Awarded annually to a full-time student in the final year of the Costume Studies Program.

#### ***Lyn Gratwick-Theatre Arts Guild Scholarship in Costume Studies***

To honour the memory of Lyn Gratwick, this scholarship is awarded annually to one (or more) students in the Department of Theatre's Costume Studies Program who has (have) demonstrated artistic excellence in costume-making for theatre and who intend(s) to pursue a career as a costumer for a professional theatre company or an historic site.

#### ***Richardson Family Performing Arts Scholarships - Theatre***

Four scholarships awarded annually to Theatre students entering their third or fourth year of Theatre study, one in each of the following areas: Acting, Costume Studies, Scenography and Technical Scenography, and Theatre Studies. Eligible students must demonstrate artistic excellence and have career aspirations focused on performing arts.

#### ***Christine Zinck Scholarships***

Four scholarships awarded annually in each of the four streams of Theatre: Acting, Costume Studies, Scenography and Technical Scenography and Theatre Studies.

## **E. Faculty of Computer Science**

Unless otherwise noted, selection for these awards is carried out by the Faculty of Engineering Scholarships & Awards Committee, augmented by representatives from Architecture and Computer Science. Application forms are available from the offices of the appropriate dean.

#### ***75<sup>th</sup> Anniversary Alumni Family Scholarship***

The Engineering Alumni Association established this award in 1995 in recognition of the 75<sup>th</sup> anniversary of the Association. This award of \$1,750 is open to students registered in the penultimate or final year of Computer Science, Architecture and Planning, or Engineering. The recipient must be a family member (son/daughter, spouse, grandchild, niece/nephew, brother/sister) of an engineering graduate and have achieved satisfactory academic standing. Application required. Deadline: September 30.

#### ***Aliant Ambassador Scholarship***

A one-year scholarship open to students registered in Year 4 or 5 of an Architecture and Planning, Computer Science, or Engineering program. Application required. Deadline: September 30.

#### ***Mazankowski Foundation Entrance Scholarship***

This foundation has established a \$1,100 award for a student who fulfils or is expected to fulfil the minimum entrance requirements for admission to the BEDS program in Architecture and Planning, or Year 3 of the Bachelor of Computer Science or Engineering. The Scholarship is awarded on the basis of the applicant's academic record at the Associated University or Dalhousie University. The Committee may also weigh financial and other consideration in reaching a decision. Application required. Deadline: April 30.

#### ***Bruce and Dorothy Rosetti Engineering Entrance Scholarships***

The Bruce and Dorothy Rosetti bequest provides five \$1,000 scholarships to candidates who have fulfilled or expect to fulfil the minimum entrance requirements for Year 3 in an undergraduate program in the Faculties of Engineering & Computer Science. Application required. Deadline: April 30.

#### ***Bruce and Dorothy Rosetti Engineering Undergraduate Scholarships***

The Bruce and Dorothy Rosetti bequest provides five \$1,000 awards to undergraduate students in the penultimate year of a program in Engineering or Computer Science. Selection is made on the basis of the students' academic record at Dalhousie. Application required. Deadline: September 30.

### ***The Walter Gardner Stanfield Entrance Scholarships***

The Walter Gardner Stanfield bequest provides two awards valued at \$1,000 each to students who fulfil or are expected to fulfil the minimum (entrance) requirements into third year of Engineering or Computer Science. Application required. Deadline: April 30.

### ***Newfoundland and Labrador Alumni Undergraduate Scholarship***

This award of \$1,000 was established by the St. John's Newfoundland Alumni Branch for a student registered in the second year in Architecture and Planning, Computer Science, or Engineering. The scholarship is awarded primarily on the basis of the applicant's academic record (first class mandatory) with preference given to students who were residents of Newfoundland and Labrador immediately prior to attending Dalhousie. The selection committee may weigh other factors in reaching a decision. Application required. Deadline: September 30.

### ***President's Associates (Entrance) Scholarship***

The President's Associates Entrance Scholarship has been made possible by members of the Associate's Program (1994-96). The members represent business, industry, friends, faculty and university administrators. This award of \$1,000 is made annually to a student in undergraduate Architecture and Planning, Computer Science or Engineering on the basis of the academic record. Candidates must have fulfilled or expect to fulfil the entrance requirements for an undergraduate degree program in Architecture or for entrance into third year of Engineering or Computer Science. Application required. Deadline: April 30.

## **F. Faculty of Engineering**

Unless otherwise noted, applicants for these awards apply to the Scholarships and Awards Committee of the Faculty of Engineering. Students applying from Associated Universities for Third Year may obtain application forms from the Director/Head/Chair of Engineering at the Associated University or through the Office of the Associate Dean of Engineering at Dalhousie. Application deadlines for awards in this section are stated.

### ***75<sup>th</sup> Anniversary Alumni Family Scholarship***

The Engineering Alumni Association established this award in 1995 in recognition of the 75<sup>th</sup> anniversary of the Association. This award of \$1,750 is open to students registered in the penultimate or final undergraduate year of Computer Science, Architecture, Planning, or Engineering. The recipient must be a family member (son/daughter, spouse, grandchild, niece/nephew, brother/sister) of an engineering graduate and have achieved satisfactory academic standing. Application required. Deadline: September 30.

### ***Hira and Kamal Ahuja Engineering Scholarship***

This scholarship valued at \$1,000, has been established in memory of Mrs. Kamal Ahuja, by her family. Prof. Ahuja was Director of Continuing Education at the Technical University of Nova Scotia. Candidates must have fulfilled the requirements for entry to Year 3 of any Engineering program at the time of application. The award is based on a combination of grades and demonstrated financial need. Preference will be given to students who can demonstrate a significant cultural contribution to the East India community. Interested students must complete an application form and a covering letter, explaining their qualifications for this award. Application required. Deadline: April 30.

### ***Aliant Ambassador Scholarship***

A one-year scholarship open to students registered in Year 4 or 5 of an Architecture, Planning, Computer Science, or Engineering program. Selection is carried out by the Scholarship & Awards Committee of the Faculty of Engineering. Application required. Deadline: September 30.

### ***Atlantic Farm Mechanization Show (Entrance) Scholarship***

The Atlantic Farm Mechanization Show established this award of \$1,000. Eligible applicants are Canadian citizens/landed immigrants, residents of Atlantic Canada who are entering the Biological Engineering Program at Dalhousie. The scholarship is awarded on the basis of applicant's academic record at the Associated University or the previous years at Dalhousie with particular emphasis on performance in the machinery related classes - statics, strength of materials, dynamics of particles and dynamics of rigid bodies. The award is made on the recommendation of the chair of the Biological Engineering Program in consultation with the director of the student's Associated University and with the faculty members of the Department of Biological Engineering. Application required. Deadline: April 30.

### ***Atlantic Farm Mechanization Show Environmental Engineering (Entrance) Scholarship***

The Atlantic Farm Mechanization Show established this award of \$1,000. The scholarship is awarded on the basis of applicant's academic record in the Environmental Engineering Program. Selection will be carried out by the Scholarships & Awards Committee of the Faculty of Engineering in consultation with the Chair of the Environmental Engineering program after students come to Dalhousie. Application required. Deadline: April 30.

### ***Dr. Max L. Baker Scholarship***

An anonymous donor established this award of \$1,000 for students registered in the senior year of the Faculty of Engineering. The recipient will be selected on the basis of personality, leadership and scholarship. The letter of nomination on application should convey to the Committee the reasons the nominee or applicant is deemed worthy of the award. The Committee will accept either nominations or applications, by letter addressed to the Associate Dean of Engineering. Application required. Deadline: September 30.

### ***The A. David Blair Scholarship***

An endowment has been established to provide an annual scholarship in memory of A. David Blair, who graduated from Dalhousie in 1987 with a BSc degree. Candidates for the scholarship will be those who have fulfilled the requirements for promotion from Year II to Year III in the Dalhousie Faculty of Engineering. The awardee will have achieved high academic standing and demonstrated financial need. Application deadline: April 30.

### ***John G. Bruce Scholarship***

Two scholarships, valued at \$10,000 per year, are awarded to students entering their third year of engineering at Dalhousie and are renewable for the fourth or final year. They were created through a bequest from the Estate of Ian Gordon Bruce in memory of his father. Ian Bruce, who was killed in a motorcycle accident while on a trip to the Yukon, graduated from the Technical University of Nova Scotia in 1970 with a BEng in Industrial Engineering. John Bruce, who believed strongly in education, retired from the Canadian Navy in 1966 and spent most of the war escorting convoys in the North Atlantic. He later worked at the Bedford Institute of Oceanography as an electronic technician. The scholarships are awarded on the principal criterion of academic excellence. The committee may also weigh other considerations in reaching a decision. Application deadline: April 30.

### ***The Dr. Alan E. Cameron Scholarship***

An anonymous donor established this award of \$1,000 for students registered in the senior year of the Faculty of Engineering. The award is based primarily on the academic record of the applicant during the junior year, but will also take into account the personality, leadership ability and financial need of the applicant. Application required. Deadline: September 30.

### ***Dorothy Macdonald Crummey Memorial Scholarship***

This award was established by the family of the late Dorothy Macdonald Crummey to provide an annual scholarship to one or more worthy students entering their second year of study in the Bachelor of Applied Science (Food Science) Program. Ms. Macdonald attended the Halifax Ladies College (an affiliate of Dalhousie University), graduated with a diploma in Household Science in 1932 and worked as a dietitian at the Victoria General Hospital in Halifax. The recipient(s) will have achieved satisfactory academic standing. The Scholarships & Awards Committee of the Faculty of Engineering may use their discretion in making this award and not necessarily award it to the student with the highest grades. Application required. Deadline: September 30.

### ***CBCL Limited, Consulting Engineers' Scholarship***

CBCL Limited, Consulting Engineers established this award valued at \$2,000. Eligible students are registered in year four or five of Civil, Industrial, Mechanical or Electrical Engineering programs in the Faculty of Engineering. The Scholarship is awarded primarily on the basis of the applicant's academic record. Other factors such as personality, initiative, community involvement, other awards held by the applicant, etc. may also weigh in the decision. Application required. Deadline: September 30.

### ***The Dr. H.W.L. Doane, F.E.I.C. Scholarship***

Nova Scotia Power Inc. established this scholarship valued at \$400 in 1981 in recognition of dedicated service rendered by Dr. Doane as a member of the Nova Scotia Power's Board of Directors from 1953 to 1981. A distinguished engineer, Mr. Doane graduated from Dalhousie in 1913, was invested as an Honorary Doctor in 1957; was presented with the Sexton Memorial Award in 1964; and was

honorary president of the University's Alumni Association. Eligible students are Nova Scotia students registered in the senior year of Civil Engineering. Basis is academic achievement, leadership ability and qualities of personality and character. Application required. Deadline: September 30.

#### ***The Electrical and Computer Engineering Faculty Scholarship***

Faculty Members of the Department of Computer and Electrical Engineering established this award of \$1,000. Candidates must have fulfilled or expect to fulfil the minimum entrance requirements into third year of an undergraduate program in the Faculty of Engineering in Electrical and Computer Engineering. Selection is carried out by Scholarships & Awards Committee of the Faculty of Engineering on the recommendation of the Electrical and Computer Engineering Department. Application required. Deadline: April 30.

#### ***Mobil Oil Canada Scholarship***

Exxon Mobil Canada Ltd. established four scholarships of \$2,000 each. Eligible students are to be registered in the senior year of the Faculty of Engineering. Preference will be given to Canadian citizens or landed immigrants. The award is based on the academic record of the applicant at Dalhousie University. Application required. Deadline: September 30.

#### ***Faculty of Engineering Scholarship***

Five awards valued at \$500 each are open to students entering third year of an Engineering program. The awards are made on the basis of the applicant's academic record at the Associated University or the initial years of Engineering studies at Dalhousie. Application required. Deadline: April 30.

#### ***Fairey Canada Scholarship***

Fairey Canada Ltd. established this award of \$150. Eligible students are registered in Year 4 of Mechanical Engineering. The award is based on the academic record of the applicant and the financial need. Preference will be given to a native of the Atlantic Provinces; applicants are expected to have an interest in some aspect of aviation. Application required. Deadline: September 30.

#### ***Consulting Engineers of Nova Scotia Scholarships***

The Consulting Engineers of Nova Scotia (CENS) have established four annual awards, valued at \$500 each, for Engineering students entering their fourth year of study. Students who have completed or are currently serving a work term with a member of CENS will be given preference, as well as those interested in pursuing a career in the Nova Scotia Consulting Industry. Recipients of the award will have demonstrated professionalism and integrity in their engineering studies. Other factors such as personality, initiative, community involvement and another awards held by the applicant may also weight in the decision. Application required. Deadline: September 30

#### ***David F. Fanning Scholarship***

This award of \$1,000 was established in memory of David F. Fanning by his family and fellow members of the Civil Engineering class of 1980. Eligible students are Canadian students registered in the penultimate year of the Civil Engineering program. The scholarship is awarded on the basis of the applicant's academic record at Dalhousie. Preference will be given to a student who has displayed an interest in mathematical modelling and finite element analysis of structures. Application required. Deadline: September 30.

#### ***M. Roy Foran Scholarship***

Dr. M. Roy Foran, Dean Emeritus of the Nova Scotia Technical College and Professor Emeritus of Chemical Engineering, began his career at Dalhousie as Assistant Professor of Chemistry in 1944. Three years later, he joined the Nova Scotia Technical College as one of the founding members of the Chemical Engineering Department. He served as Department Head for 20 years and then as Dean of Graduate Studies, a post he held until 1974. Dr. Foran then became Registrar of the Nova Scotia Technical College, a position he held until his retirement in 1977.

Under the Will of the late M. Roy Foran, the University received an endowment which provides an annual scholarship for a student enrolled in their final year of the Chemical Engineering program with exceptional academic standing. Application required. Deadline: September 30.

#### ***Marc Garneau, P.Eng. Scholarships***

Engineers of Nova Scotia established two awards of \$2,000 each to commemorate the journey of the first Canadian astronaut, Marc Garneau, into space on October 5, 1984. Dr. Garneau is an honorary life member of Engineers Nova Scotia and he honored the Association by carrying its insignia on this historic flight. Eligible students are Nova Scotia students registered in the fourth and fifth years of an

undergraduate engineering program in the Faculty of Engineering. The scholarship is awarded on the basis of the applicant's academic record at Dalhousie University. While academic excellence will be the primary criterion for the award, the Selection Committee may also weigh other considerations in reaching a decision. Application required. Deadline: September 30.

#### ***The James L. Hall Scholarship in Earth Sciences***

This scholarship is awarded on the joint recommendation of the Faculty of Engineering and the Department of Earth Sciences, to a student who has completed his/her first year, who is planning on a career in the field of Mining Geology. The scholarship alternates between Engineering and Earth Sciences. Application not required.

#### ***Industrial Engineering Entrance Scholarships***

Up to five scholarships, established by the Department of Industrial Engineering, in the amount of up to \$2,000, will be awarded to top-ranked students applying to Industrial Engineering. All students who are accepted for entry to the Industrial Engineering program, at the end of Year 1 or Year 2, are eligible. Payment is applied to the student's first academic term in the upper division (Year 3, term five). Awards are based on the academic records submitted for entry into the Industrial Engineering program and no application is required.

An additional scholarship of \$1,000 is awarded to a student entering Dalhousie who has selected the program of Industrial Engineering and who has achieved a high academic standing within his/her prior university studies. Participation in extracurricular activities will also be given consideration. Candidates must have fulfilled or expect to fulfil the minimum entrance requirements into third year for the undergraduate program in the Faculty of Engineering. Application required. Deadline: April 30.

#### ***The John J. Jodrey Scholarship***

John J. Jodrey established this award valued at \$2,000. Eligible students are Atlantic Canadian students registered in the penultimate year of an Engineering program. The scholarship is awarded on the basis of the applicant's academic record at Dalhousie University. Application required. Deadline: September 30.

#### ***The Percy Bertram Jollota Scholarship***

From the Estate of Jean Minerva Jollota came a bequest, the annual income of which is to be used to provide scholarships in memory of her late husband, Percy Bertram Jollota. The awardees must be engaged in studies in engineering or physics. Application not required.

#### ***John R. Kaye Memorial Scholarship***

In 1981 a scholarship was established in memory of Mr. John R. Kaye, a notable engineer who served as Chairman of the Board at the Technical University of Nova Scotia, and received an honorary doctorate degree in 1961. This scholarship is to provide financial assistance to an engineering student who is a native-born Nova Scotian, and well-rounded individual. The successful candidate will be among those who have fulfilled the requirements for promotion from Year 1 to Year 2 in the Dalhousie Faculty of Engineering. S/he will be academically sound and will have demonstrated motivation, diligence, and promise in succeeding and being a credit to the engineering profession. Application not required.

#### ***J. Douglas Kline Memorial Scholarship***

The Halifax Water Commission established this award of \$2,500. Eligible students are Nova Scotia students registered in the final year of the undergraduate Civil Engineering program in the Faculty of Engineering. The applicant must be involved in water-related studies in Civil Engineering. The scholarship is awarded on the basis of the applicant's record at Dalhousie University. While academic excellence will be the primary criterion for the award, the selection committee may also weigh other considerations in reaching a decision. Application required. Deadline: September 30.

#### ***John Frederick Knodell Engineering Scholarship***

An annual award of \$5,000 has been established to honour the memory of J.F. Knodell, a graduate in electrical engineering from Dalhousie and Nova Scotia Technical College. The scholarship is awarded to a male Dalhousie engineering student who was born in Nova Scotia and attended schools in Nova Scotia. The successful candidate will be among those who have fulfilled the requirements for promotion from Year 2 to Year 3 in the Dalhousie Faculty of Engineering. The recipient must have achieved excellent academic standing and demonstrated greatest improvement from the first to second year of the engineering degree program. Application not required.

### ***Dorothy Macdonald Crummey Memorial Scholarship***

This award was established by the family of the late Dorothy Macdonald Crummey to provide an annual scholarship to one or more worthy students entering their second year of study in the Bachelor of Applied Science (Food Science) Program. Ms. Macdonald attended the Halifax Ladies College (an affiliate of Dalhousie University), graduated with a diploma in Household Science in 1932 and worked as a dietitian at the Victoria General Hospital in Halifax. The recipient(s) will have achieved satisfactory academic standing. The Scholarships & Awards Committee of the Faculty of Engineering may use their discretion in making this award and not necessarily award it to the student with the highest grades. Application required. Deadline: September 30.

### ***The Donald MacFadgen Memorial Scholarship***

The Mining Society of Nova Scotia has established this award of \$500. Eligible students are registered in the junior year of the Faculty of Engineering. The award is made on the basis of merit and need, with preference given to students enrolled in the programs of Mining and Materials Engineering. Application required. Deadline: September 30.

### ***Dr. G. David MacKay Scholarship***

Dr. G. David MacKay received both his Bachelor of Engineering and his Master's degree in Engineering from the Nova Scotia Technical College in 1955 and 1959, respectively. He then went on to complete his PhD in Chemical Engineering from McGill University in 1962. He returned to the Nova Scotia Technical College in 1965 where he taught for 30 years. During this time he served as Department Head for 11 years (1968-79), founded the Centre for Energy Studies, was its Director from 1978-87 and served on numerous committees. He was named Professor Emeritus of the Technical University of Nova Scotia in 1994. This endowment provides one or more scholarships to third year students who are entering Upper Division (BEng) Chemical Engineering. Application required. Deadline: April 30.

### ***The Dr. S.K. Malhotra Scholarship***

The \$1,500 scholarship was established by his family and friends in memory of Dr. S.K. Malhotra, former Dean of Graduate Studies and Professor for Civil Engineering at Dalhousie from 1965 to 1990. Eligible students are registered in the penultimate academic study term of the Civil Engineering Program of the Faculty of Engineering. The scholarship is awarded on the basis of the applicant's academic record at Dalhousie University. Preference will be given to a student who had displayed an interest in structural engineering. Application required. Deadline: September 30.

### ***NACE International "The Corrosion Society" Atlantic Canada Section Scholarship***

This award, valued at \$500, has been established by NACE International and is awarded to the student with the highest academic achievement in the class "Corrosion and Degradation of Materials" or to an undergraduate student who receives top marks in a corrosion-related research project or lab experiment/project. The winner is expected to meet the local NACE International Section members and encouraged to become a student member with the initial membership dues covered by the membership. Deadline: September 30.

### ***The Maritime and Northeast Pipeline Legacy Scholarship***

Two scholarships, in the amount of \$2,500 each, are awarded annually to students entering the third year (Upper Division) of the BEng program at Dalhousie. Preference will be given to students from the Atlantic Provinces, the first studying with a concentration in Environmental in either Biological or Civil Engineering, and the second studying either Mechanical or Chemical Engineering. Selection is also based on a minimum GPA of 3.0. Application required. Deadline: April 30.

### ***The Mazankowski Foundation Entrance Scholarship***

This foundation has established a \$1,100 award for a student who fulfils or is expected to fulfil the minimum entrance requirements for admission to the BEDS program in Architecture, or Year Three of the Bachelor of Computer Science or Engineering. The Scholarship is awarded on the basis of the applicant's academic record at the Associated University or Dalhousie University. The Committee may also weigh financial and other consideration in reaching a decision. Application required. Deadline: April 30.

### ***Gordon C. McCausland Scholarship***

Mrs. Elizabeth C. McCausland established this award of \$1,000. Eligible candidates must have fulfilled or expect to fulfil the minimum entrance requirements into third year of the undergraduate Civil Engineering program in the Faculty of Engineering. The award is made on the basis of the applicant's

academic record at the Associated University or at Dalhousie. Selection is carried out by the Scholarships & Awards Committee of the Faculty of Engineering on the recommendation of the Chair of the Civil Engineering program. Application required. Deadline: April 30.

### ***The Materials Engineering Faculty Scholarship***

The Materials Faculty Members of the former Department of Mining and Metallurgical Engineering established this award of \$1,000. Eligible candidates must have fulfilled or expect to fulfil the minimum entrance requirements into third year of an undergraduate program in the Faculty of Engineering in the field of Materials Engineering. Application required. Deadline: April 30.

### ***Minas Basin Pulp and Power Company Limited Scholarships***

The Minas Basin Pulp and Power Company Limited established three awards of \$1,000 each. Eligible candidates must have fulfilled or expect to fulfil the minimum entrance requirements into Year 3 of an engineering undergraduate program in the Faculty of Engineering. The award is made on the basis of the applicant's academic record. The Committee may also weigh financial and other consideration in reaching a decision. Application required. Deadline: April 30.

### ***The George Geoffrey Meyerhof Scholarship***

Dr. George Geoffrey Meyerhof established this award of \$1,000. Eligible students are registered in the senior year of Civil Engineering in the Faculty of Engineering. The award is based primarily on the academic record of the applicant during the junior year, but will also take into account personality and leadership ability. A letter of nomination or application should convey the reasons the nominee or applicant is deemed worthy of the award. Selection will be carried out by the Scholarships & Awards Committee of the Faculty of Engineering in consultation with the Chair of the Civil Engineering program. Application required. Deadline: September 30.

### ***Mineral Resource Engineering Entrance Scholarship***

This scholarship was established by the Mining Engineering graduates. Every year several scholarships of up to \$1,500 each are available to Mineral Resource Engineering students entering their third year of study at Dalhousie University. The recipients will primarily be selected on the basis of academic standing. Students in good academic standing with proven financial need will also be considered. Deadline: April 30.

### ***Guru Nanak Scholarship***

Dr. and Mrs. D. S. Chehil established this scholarship to encourage black Nova Scotia students to qualify for admission and complete the engineering degree at Dalhousie. This award of \$1,000, is tenable for up to three years or more, subject to maintenance of an acceptable academic average. Eligible candidates must be black Canadians born in Nova Scotia. The Scholarship is awarded primarily on the basis of the applicant's academic record prior to admission into third year or on the basis of the academic record at an Associated University or at the University entrance level. Other factors such as personality, initiative, community involvement and other awards held by the applicant may also be considered. Application required. Deadline: April 30.

### ***Newfoundland and Labrador Alumni Undergraduate Scholarship***

This scholarship of \$1,000 was established by the St. John's Newfoundland Alumni Branch. The Scholarship is awarded on the basis of the applicant's academic record (first class mandatory), with preference given to students who were residents of Newfoundland and Labrador immediately prior to attending Dalhousie. The selection committee may weigh other considerations in reaching a decision. The student must be registered in Year 4 at Dalhousie in a program in Architecture, Planning, Engineering, or Computer Science. Application required. Deadline: September 30.

### ***NewPage Port Hawkesbury Ltd. Scholarship***

Stora Forest Industries has established three awards of \$1,000 each to commemorate the 25th anniversary of the company in Nova Scotia. Eligible students are Nova Scotia students registered in the penultimate year of an undergraduate engineering program in the Faculty of Engineering. The Scholarships are awarded on the basis of the applicant's academic record while in attendance at this University. The Selection Committee may also weigh other factors in reaching a decision. Application required. Deadline: September 30.

### ***Allan D. Nickerson Memorial Scholarship***

This scholarship, valued at \$2,000, was made possible by a bequest from the estate of the late Allan D. Nickerson. It was established in memory of Allan D. Nickerson to promote academic excellence in Engineering studies. It is awarded primarily on the basis of the applicant's academic record (first class standing). Mr.

Nickerson graduated from the Nova Scotia Technical College (Electrical Engineering, 1929). He received an Honorary degree (D.Eng.) from the College in May, 1969. Application required. Deadline: September 30.

#### ***Nova Scotia Power Centennial Scholarships***

Nova Scotia Power Inc. established five awards valued at \$2,000 per year, tenable for two years. Eligible candidates are registered in the Faculty of Engineering at this University in one of the following fields of Study: Electrical, Mechanical, or Civil Engineering. Application is by letter submitted to the student's associated university by early January. Successful candidates may be offered term employment with Nova Scotia Power. The Selection Board considers academic excellence, personality, and involvement in extracurricular activities. Application required. Deadline: January 31.

#### ***The Nova Scotia Women in Engineering Scholarship***

The Province of Nova Scotia established this award valued at \$6,000 and renewable for another year. Applicants must demonstrate academic excellence, leadership ability, and contribution to school/community activities. Eligible candidates must be women graduates of Nova Scotia high schools, residents of Nova Scotia and entering their third year of an undergraduate engineering program at Dalhousie. Application required. Deadline: April 30.

#### ***O'Halloran Scholarship***

This scholarship is available to students entering their final year of a Bachelor of Engineering in Civil Engineering. The selected recipient will have scored well academically, shown initiative, enthusiasm and leadership in student and extracurricular activities and displayed an interest in pursuing a career in consulting engineering. Application required; applicants must also submit a current CV. Deadline: September 30.

#### ***The Everett Patterson Memorial Scholarship***

Ocean Contractors Limited established this award of \$1,000. Professor Patterson graduated from the Nova Scotia Technical College (TUNS) Civil Engineering in 1960. He taught at Dalhousie University in the Engineering Department for 27 years. During that time, he served as chairman of the department from 1976-1979 and again in 1983. Professor Patterson was a very dedicated teacher and faculty member who was highly respected by his students and colleagues both at Dalhousie and TUNS. This award is made on the basis of the applicant's record at Dalhousie University. Candidates must have fulfilled or expect to fulfil the minimum entrance requirements into third year of an undergraduate program in the Faculty of Engineering. Application required. Deadline: April 30.

#### ***Dr. Douglas G. Pincock Scholarship***

Amirix Systems Inc. has established a \$2,500 third year entrance scholarship in honour of Dr. Douglas G. Pincock. The award will be given to a student entering the third year Electrical & Computer Engineering specializing in Electrical Engineering. In addition to academic achievement, the student must have demonstrated extra curricular involvement in athletics, fine arts, student activities or volunteer work. Application required. Deadline: April 30.

#### ***President's Associates Scholarship***

The President's Associates Entrance Scholarship has been made possible by members of the Associate's Program (1994-96). The members represent business, industry, friends, faculty and university administrators. This award of \$1,000 is made annually to a student in undergraduate Architecture, Planning, Computer Science or Engineering on the basis of the academic record. Candidates must have fulfilled or expect to fulfil the entrance requirements for an undergraduate degree program in Architecture or for entrance into third year of Engineering or Computer Science. Application required. Deadline: April 30.

#### ***Dr. Edward (Ted) Rhodes Scholarship in Engineering***

Dr. Edward Rhodes, former President of the Technical University of Nova Scotia and former Principal of DalTech has established an annual scholarship open to a third or fourth year Engineering student who has maintained an interest in music or the arts. Application required. Deadline: September 30.

#### ***Roberto Rocca Scholarships***

Tenaris Global Services has established three annual awards, each valued at \$4,000, for Engineering students entering their fourth year of studies. This scholarship honours Roberto Rocca, a Metallurgical Engineer, committed to his conviction that engineers are a force for positive change in society. Selection will be based on academic excellence, with preference given to students from Northern Ontario and Alberta, and female students, as well as students involved in extracurricular activities. The recipients will have achieved a minimum GPA of

3.0, an demonstrated professionalism and integrity in their engineering studies. Application required. Deadline: September 30.

#### ***Bruce and Dorothy Rosetti Engineering Scholarships***

Five awards of \$1,000 each were established from the Bruce and Dorothy Rosetti bequest. Candidate must have fulfilled or expect to fulfil the minimum entrance requirements for entrance into third year an undergraduate program in the Faculty of Engineering. The scholarship is awarded on the basis of the applicant's academic record at the Associated University or in the initial program years at Dalhousie. Application required. Deadline: April 30.

#### ***Bruce and Dorothy Rosetti Engineering Undergraduate Scholarships***

The Bruce and Dorothy Rosetti Bequest has established five \$1,000 awards for students who are registered in the penultimate year of a program in the Faculty of Engineering. The scholarship is awarded one the basis of the applicant's academic record at Dalhousie University. Application required. Deadline: September 30.

#### ***Schlumberger Undergraduate Scholarships in Engineering***

Ten one-year scholarships valued at \$1,000. Candidates must have fulfilled the minimum entrance requirements in the upper division of an accredited undergraduate engineering degree program in the Faculty of Engineering. Scholarships will be awarded based on academic performance. Students selected must achieve a passing grade in all required classes as well as a minimum cumulative GPA of 3.0. Application required. Deadline: April 30.

#### ***The Scotsburn Dairy Group Scholarship***

This scholarship was established by the Scotsburn Dairy Group for students enrolled in third or fourth year studies in the program leading to the Bachelor of Applied Science (Food Science) program within the Faculty of Engineering. The scholarships will be awarded in the amount of \$2,000 per annum to candidates entering the third year of the program and may be renewed in the fourth year provided the recipients maintain a GPA of 3.3 or higher. Applications should be made through the office of the Associate Dean of Engineering, Sexton Campus. Application required. Deadline: April 30.

#### ***The Shaw Group Scholarship in Civil Engineering***

Since 1999, The Shaw Group Limited has awarded annually a one-year scholarship for the student who achieves the highest GPA within Civil Engineering studies and who has completed the penultimate year in Civil Engineering. To be eligible for the \$2,500 award, a student must have been born in, and have a permanent residence in Atlantic Canada. The Scholarships and Awards Committee of the Faculty of Engineering selects the winner. Application required. Deadline: September 30.

#### ***The Mr. and Mrs. S.H. Solomon Scholarship in Engineering***

This scholarship was made possible by Mr. and Mrs. S.H. Solomon and is to be awarded annually to a student entering the second year of Engineering. Application not required.

#### ***The C.W. Stairs Memorial Scholarships***

In 1960, William Stairs, Son & Morrow Limited of Halifax, on the occasion of the 150th anniversary of the firm donated \$10,000 to the University to set up this fund. It provides scholarships to students in Engineering, or in related subjects, who are entering the third year of the class and who, in the opinion of the Committee, are likely after graduation to contribute to the industrial development of Canada. Application not required.

#### ***The Walter Gardner Stanfield Scholarships***

The Walter Gardner Stanfield bequest provides two awards, valued at \$1,000 each, to students who fulfil or are expected to fulfil the minimum (entrance) requirements into third year of Engineering or Computer Science. Application required. Deadline: April 30.

#### ***Dr. A.E. Steeves Scholarship***

This \$1,000 scholarship was established in 1981 in honour of Dr. A.E. Steeves, Director of Administration of the Nova Scotia Technical College and Acting President from 1971-1977. The award is made on the basis of scholarship, personality and leadership ability. Eligible students are registered in the senior year of the BEng in the Faculty of Engineering. Application required. Deadline: September 30.

#### ***The Weldon Scholarship***

The Estate of Dr. R.S. Weldon established this award of \$450 per year. It is renewable for two years, subject to maintenance of a high academic standing. Eligible students are to be registered in the Mechanical Engineering program in

the Faculty of Engineering of this University. The award is based on the academic record of the applicant during Year 3 of the program. Application required. Deadline: September 30.

#### ***The G.P. Wilson Engineering in Business Scholarship***

This scholarship was established to honour Peter Wilson, born in Truro, and who attended King's College and completed his Engineering Diploma at Dalhousie. He graduated as a Mechanical Engineer from the Nova Scotia Technical College (NSTC) and went on to complete a Masters in Engineering Production in the area of Operations Research at the University of Birmingham in England. Professor Wilson was Executive Director of the Atlantic Industrial Research Institute, served as a Professor in Industrial Engineering, and was Head of the Department of Industrial Engineering at the Technical University of Nova Scotia and Dalhousie for more than 20 years. The G.P. Wilson Engineering in Business Scholarship is awarded to students who have completed the first year of engineering at any Canadian university, and who show outstanding promise to use engineering skills to improve Canadian business. The scholarship, in the amount of \$1,000 per term, is tenable at Dalhousie University in years three, four and five of the Industrial Engineering program. This scholarship is renewable for recipients maintaining a GPA of 3.5 in each subsequent academic study term. Interested students must complete an application and provide an essay discussing their views on engineering in business. Deadline: January 15

### **G. Faculty of Health Professions**

Unless otherwise noted, applicants for these awards should consult the department directly for details regarding application processes and deadlines.

#### **1. School of Health and Human Performance**

##### ***The Freda N. Wales Memorial Scholarship***

This is an in-class award given to a student entering the third or fourth year of study. The student must have a commitment to pursuing a program specializing in outdoor leadership at Dalhousie University. Selection will be based on academic achievement and professional ability. Apply through the School.

##### ***VIIth Pan American Wheelchair Games Scholarship***

This is an in-class award given to a student entering the third or fourth year of study in the School. The student must be committed to pursuing study in the area of recreation and leisure for the disabled. Selection is based on academic and professional capability.

#### **2. College of Pharmacy**

##### ***Sanofi Aventis Scholarship***

This scholarship of \$1,500 is to be presented annually to an outstanding pharmacy student who has successfully completed one or more years at the College of Pharmacy.

##### ***The Ralph H. Jenkins Memorial Pharmacy Scholarship***

This scholarship is awarded by the Prince Edward Island Pharmaceutical Association to a student from Prince Edward Island who has achieved a high academic standing.

##### ***The Col. J.D.B.F. MacKenzie Scholarship***

This scholarship of \$1,000 is awarded by the New Brunswick Pharmaceutical Society to a student from New Brunswick who excels in the first year classes of the Pharmacy curriculum.

##### ***The Dr. Jessie I. MacKnight Scholarship***

This scholarship of \$1,000 is awarded by the New Brunswick Pharmaceutical Society to the student from New Brunswick who excels in the second year classes of the Pharmacy class.

##### ***The New Brunswick Pharmaceutical Society Scholarship***

This scholarship of \$1,000 is awarded by the New Brunswick Pharmaceutical Society to the student from New Brunswick who excels in the third year classes of the Pharmacy curriculum.

#### **3. School of Social Work**

##### ***M. Caroline Prince Scholarship***

An endowment of funds by the late M. Caroline Prince for the benefit of the School of Social Work provides for the award of one or more scholarships to students engaged either in full time or part time study leading to the baccalaureate degree in Social Work. The award is made at the end of the winter term upon

recommendation of class instructors to the School's Bachelor of Social Work committee.

##### ***Calvin Ruck Scholarship***

For BSW and MSW African Nova Scotian students who have demonstrated a desire to improve the social conditions and further the interests of African Nova Scotian/Canadian people and their communities through the study and practice of Social Work. Careful consideration will be given to the purposes and vision of NSACP and to the qualities of courage, generosity, persistence, and leadership that characterizes Dr. Ruck's life and work. Application required.

### **H. Faculty of Management**

Unless otherwise stated, these scholarships are administered by the academic unit. Please consult the departments directly for details.

##### ***Acadian Lines Limited Scholarship***

Acadian Lines Limited has established a fund to provide a scholarship to a student, beyond first year, who has demonstrated superior academic performance in the preceding year(s) of the commerce program and, who has demonstrated outstanding leadership in the University's program of intercollegiate athletics.

##### ***The Wilfred Berman Scholarship***

A scholarship is offered to the student in Commerce who, at the end of third year, has attained the highest average mark in COMM 1101, 2102, 3105. The endowment for this scholarship was provided by friends and co-religionists of the late Professor Berman. Application is not required.

##### ***The Vincent Chew Memorial Endowment***

This award is given annually to the top academic student in the final year of the Bachelor of Management/Bachelor of Science- Recreation who demonstrates strong leadership, organizational and communication skills through volunteer work, extra curricular or school activities. In the event of students equally meeting the criteria above, preference will be given to a deserving student from New Brunswick or Nova Scotia.

##### ***The Eaton Foundation Scholarship in Business Studies***

A scholarship will be awarded annually to a student entering fourth year in the Commerce program who has the highest average mark in Introduction to Marketing, Consumer Behaviour, and Marketing Research, and who has demonstrated high academic standing throughout his or her previous years of study. The award was established by the Eaton Foundation, a philanthropic organization dedicated to supporting the arts, education, health, and social welfare across Canada with the generous support of the T. Eaton Co. Limited and Mr. John David Eaton. Application not required.

##### ***Stewart Lockie Gibson Scholarship in Commerce***

Several scholarships of varying amounts will be awarded annually to third and fourth year students of scholarship standing and good character who are proceeding to a degree in Commerce. Application not required. Awarded automatically by the Registrar's Office.

##### ***Samuel S. Jacobson Scholarship***

Beginning in 1975 the Samuel S. Jacobson Fund has provided one or more scholarships or bursaries. Preference is to be given to Nova Scotian students who are proceeding towards the Bachelor of Commerce degree. Awarded automatically by the Registrar's Office. Application not required.

##### ***The Harry Margolian Scholarships in Commerce***

A bequest of the late Harry Margolian, of Yarmouth, Nova Scotia, enables one or two scholarships per year to be awarded to students working towards degrees in Commerce. These will normally be awarded to students in their third or fourth years. Application not required. Awarded automatically by the Registrar's Office.

##### ***McCurdy Printing and Typesetting Limited Scholarship***

The Halifax firm of McCurdy Printing and Typesetting Limited established an endowment in 1985 to provide annually for a scholarship in the Rowe School of Business. The scholarship is open to a student, beyond first year, who has distinguished himself or herself scholastically during the preceding year(s) of study in the Bachelor of Commerce program. Application not required. Awarded automatically by the Registrar's Office.

##### ***Norman Newman Family Business Award***

This scholarship is offered as a tribute to Mr. Newman's record of leadership in business and the community. For students beyond first year in the Commerce program, Management program, or in the MBA program, a competition involving

a case study of a family business is the basis of awarding of the scholarship, with a first and second place winner. Application required.

#### ***The Commodore Bruce S. Oland Scholarship***

An annual scholarship that alternates between the Department of English and the Faculty of Management. Awarded automatically by the Registrar's Office. Application not required.

#### ***The Sagewood Group Award for Entrepreneurship***

This is an annual award designed to encourage entrepreneurship among Bachelor of Commerce students who have completed at least two full years. Its intent is to fund a business start-up, and selection will be based on assessed viability of the proposed business and demonstrated commitment and ability of the student. Application required by academic department.

#### ***Richard and Constance Glube Entrepreneurship Fellowship Fund***

Established in 2005 to recognize Richard Glube's contributions to the School of Business. The annual fellowship is for a third or fourth year Bachelor of Commerce or Bachelor of Management student wishing to pursue entrepreneurship related activities. The criteria for selection will include academic standing (GPA of 3.0 or greater), enrolment in the entrepreneurship curriculum (e.g. ESP program) and a written proposal on why the student intends to pursue an entrepreneurial path. The award will be administered through the Norman Newman Centre for Entrepreneurship.

#### ***Ronald G. Smith Scholarship***

This scholarship was established in recognition of the distinguished service rendered by Ronald G. Smith. An amount of \$400 will be awarded to a Nova Scotia student entering the fourth year of the Bachelor of Commerce program based upon academic achievement, leadership ability and qualities of personality and character. Application not required.

## **I. Faculty of Science**

These scholarships are administered automatically by the Registrar's Office. Applications are not required.

#### ***The L.A. DeWolfe Memorial Scholarship***

A fund has been established under the Will of the late Dr. L.A. DeWolfe to provide undergraduate scholarships in mathematics or science.

#### ***The Percy Bertram Jollota Scholarships***

From the Estate of Jean Minerva Jollota came a bequest, the annual income of which is to be used to provide scholarships in memory of her late husband, Percy Bertram Jollota. The awardees must be engaged in studies in engineering or physics.

#### ***The Constance MacFarlane Scholarship***

An endowment fund has been established to provide a scholarship to a deserving student in the second or subsequent year of the Honours program in either biology or marine biology. Candidates must have completed at least one class in each of ecology and botany.

#### ***The Carl Mushkat Memorial Scholarships***

The Carl Mushkat Memorial Fund was established at Dalhousie University in 1979 as a bequest under the Will of the late Carl Mushkat. The fund provides scholarships to students in mathematics or science.

#### ***NewPage-Port Hawkesbury Mill Undergraduate Scholarship in Arts or Science***

On the occasion of their 25th Anniversary Stora Enso have established an endowment to provide one undergraduate scholarship open to students in Arts & Science. To be eligible, candidates must reside in Nova Scotia, have demonstrated academic excellence and have exhibited a desire to learn. Students will be considered after one year at Dalhousie.

#### ***The Alan Pollok Scholarship***

This scholarship of \$1,000 was established by The Scots North British Society in Halifax in memory of the Rev. Dr. Alan Pollok. The awardee will be a second year student in the College of Arts and Science at Dalhousie University.

#### ***Betty Spencer Scholarship***

Betty Spencer was born in Saint John, New Brunswick in 1916. She graduated from Saint John Vocational School and worked for a time at Wasson's Pharmacy where she met her husband. They retired in Bangor, Maine and later in St. Andrews, New Brunswick. Although Betty had no specific connection to

Dalhousie, she generously bequeathed this endowment through her Will. Preference is given to students from the Atlantic provinces and recipients cannot hold other Dalhousie scholarships or bursaries.

#### ***The Ross Stewart Smith Scholarships***

A significant bequest established these memorial scholarships for students who excel in the sciences or mathematics.

**The following scholarships are administered by the academic unit. Please consult the departments directly for details.**

#### ***Laing Summer Undergraduate Research Awards***

Undergraduate students wishing to obtain research experience under the supervision of a grant holding faculty member over the summer should submit the NSERC Undergraduate Summer Research Award application to their department. Eligible students for the Laing Award must be in a 20 credit BSc program at Dalhousie University or at King's College, and be eligible to return for at least one semester prior to completion of this degree. The \$5,000 award is tenable during the period of May 1st to August 31st and is supplemented by additional funds. The award is distributed to the best applicant(s) on behalf of the Darrell and Emily Laing Foundation and is the top Faculty of Science undergraduate research award. See your department for deadlines and procedures.

#### ***Warr Summer Undergraduate Research Awards***

Undergraduate students wishing to obtain research experience under the supervision of a grant holding faculty member over the summer should submit the NSERC Undergraduate Summer Research Award application to their department. Eligible students for the Warr Award must be in a 20 credit BSc program at Dalhousie University or at King's College, be eligible to return for at least one semester prior to completion of this degree, and be both born in Nova Scotia and bona fide residents of Nova Scotia. The \$5,000 award is tenable during the period of May 1st to August 31st and is supplemented by additional funds. The award is distributed to the best applicant(s) on behalf of the John Richard Freeman Warr Memorial. See your department for deadlines and procedures.

## **1. Biology**

#### ***Hugh P. Bell Scholarship in Biology***

In 1968 the Class of 1928 established the H.P. Bell Fund to provide one or more annual scholarships. Each year the Biology Department will select the most promising honours biology student third year. That student shall hold the Hugh P. Bell Scholarship in the fourth year of the honours program.

#### ***The Sarah M. Lawson Scholarships in Botany***

At the discretion of the Honours/Undergraduate Awards Committee of the Department of Biology, the University may offer scholarships to students who have shown special ability in botany. This award is open to students at Dalhousie University or the University of King's College, and is given to support summer or fall (for Co-op students) research projects in botany at either the undergraduate or graduate level.

## **2. Chemistry**

#### ***Belle Crowe Scholarship***

This scholarship was established in 1944 in accordance with a gift from the estate of Miss Belle Crowe, a student at Dalhousie University in 1885/86. This scholarship is awarded to a Major or Honours degree Chemistry student on the basis of academic standing and demonstrated proficiency in chemistry and has been accepted into a graduate program to study inorganic chemistry. Application not required.

#### ***The E. Walter Todd Scholarship***

A bequest from the Estate of Mabel E. Todd in 1958 established a fund to provide a scholarship (and inscribed volume) in memory of her brother, E. Walter Todd, who was for many years a member of the Department. Application not required.

#### ***Norbert Wolter Memorial Scholarship***

This scholarship was established by Jennie Wolter (BSc '78), in loving memory of her husband, Norbert, who died at a young age. The scholarship is awarded to an undergraduate student enrolled in chemistry within the Faculty of Science at Dalhousie University and will be awarded to a Canadian citizen with first preference given to someone from Nova Scotia. The recipient must have achieved and maintain a GPA of 3.90.

### 3. Earth Sciences

#### *J. Ewart Blanchard Memorial Scholarship*

This scholarship was established in memory of Dr. J. Ewart Blanchard 1921 - 2003. Dr. Blanchard was an early physics pioneer in Nova Scotia. He was the first geophysicist appointed to Dalhousie's Physics Department and received an Honorary Degree from Dalhousie in 2000.

One or more scholarships will be awarded each fall to students enrolled in the degree programs of either the Department of Physics and Atmospheric Science or the Department of Earth Sciences who have achieved academic excellence and best exemplifies the qualities of initiative, experimental skill, leadership and enthusiasm for geophysics.

#### *Canadian Institute of Mining and Metallurgy Earth Science Scholarship for New Brunswick Students*

Awarded to a student entering second or subsequent year in an earth science discipline. Applicants must have been in New Brunswick or resided in New Brunswick for seven years, or have his/her immediate family reside in that province.

#### *Canadian Society of Exploration Geophysicists Scholarship*

This scholarship is available to a student applicant who is pursuing a class of studies directed toward a career in exploration geophysics in industry, teaching or research.

#### *Chamber of Mineral Resources of Nova Scotia Scholarship*

Senior students from Acadia University, Dalhousie University, St. Francis Xavier University or Saint Mary's University in a geology or mining-related bachelor degree program are considered for this scholarship. Selection is based upon the student's contribution to the development of the province's mineral resources sector as well as scholastic achievement.

#### *The James L. Hall Scholarship in Earth Sciences*

This scholarship is awarded on the joint recommendation of the Faculty of Engineering and the Department of Earth Sciences, to a student who has completed his/her first year, who is planning on a career in the field of mining geology. The scholarship alternates between Earth Sciences and Engineering. Application not required.

### 4. Economics

#### *Professor W. Russell Maxwell Memorial Scholarship*

Friends and colleagues of Professor Maxwell have established a fund to provide scholarships to outstanding students entering the second, third or fourth year of the General Degree or Honours Degree program in Economics. Preference will be given to candidates entering the fourth year of the Honours program.

### 5. Environmental Science

#### *Art and Dorothy Cooke Memorial Research Scholarship*

This scholarship was established in memory of Art and Dorothy Cooke by their daughters, Janet Jerico and Susan McKich. Art and Dorothy both attended Dalhousie University in the 1930s, taking degrees in English. They then lived near Dalhousie most of their lives, their children attended Dalhousie and Dorothy became University Librarian.

This Scholarship will be awarded to a full-time student entering their fourth year in an Honours or Combined Honours in Environmental Science whose Honours thesis research proposal is judged to be of strong merit.

### 6. Marine Biology

#### *Vemco Scholarship in Marine Biology*

The company Amirix Systems Inc., created a fund in July 2007 to award a Vemco Scholarship worth \$2,500 in the fall of each year to a student entering the final year of Marine Biology. Students can be in Marine Co-op as well but must be in the Honours program.

### 7. Mathematics and Statistics

#### *The Ralph and Frances Lewis Jeffery Scholarship*

From the Estate of Frances E. Jeffery came a bequest in 1979 to endow a scholarship which is to be awarded to a student who has completed the final year of an honours degree in mathematics, and who has maintained at least a second-class standing during the first three years of the class.

#### *Lorne O.L. Titus Scholarship*

Four scholarships are available to full-time students majoring in Biology, Math and Physics with the highest cumulative GPAs. Students must be in their second, third or fourth year of studies.

### 8. Physics and Atmospheric Science

#### *J. Ewart Blanchard Memorial Scholarship*

This scholarship was established in memory of Dr. J. Ewart Blanchard 1921 - 2003. Dr. Blanchard was an early physics pioneer in Nova Scotia. He was the first geophysicist appointed to Dalhousie's Physics Department and received an Honorary Degree from Dalhousie in 2000.

One or more scholarships will be awarded each fall to students enrolled in the degree programs of either the Department of Physics and Atmospheric Science or the Department of Earth Sciences who have achieved academic excellence and best exemplifies the qualities of initiative, experimental skill, leadership and enthusiasm for geophysics.

#### *Lorne O.L. Titus Scholarship*

Four scholarships are available to full-time students majoring in biology, mathematics and physics with the highest cumulative GPAs. Students must be in their second, third or fourth year of studies.

### 9. Psychology and Neuroscience

#### *Brimer Memorial Scholarship in Psychology*

The Charles J. Brimer Memorial Fund was established during 1971 in memory of the late Dr. Brimer, Acting Chairman of the Department of Psychology and Neuroscience. The income is awarded to a third year Honours student. Students enrolling for the Honours certificate in Psychology in the year equivalent to the fourth year of the Honours Psychology program are eligible for the prize. The Brimer Memorial Scholarship is restricted to Dalhousie Honours Psychology students and is not open to Joint Honours students from other departments or other universities. The scholarship will be given to the student who shows the greatest potential as a researcher in experimental psychology.

### J. College of Sustainability

#### *Vince Ginley Scholarships*

A fund has been established to provide one or more annual scholarships for third and fourth year students enrolled in the Environment, Sustainability and Society Major/Honours degree, based on academic achievement in the previous year.

## IV. Prizes, Medals, and Awards

Unless otherwise noted, the following awards are administered by the academic unit or the Department of Athletics.

### A. General - All Faculties

#### *The Alumni Association Medal*

The Sexton Campus Alumni Association provides a medal which is awarded at convocation each year to the graduating student in the University who has exhibited the most outstanding qualities of personality, scholarship and leadership during a class of studies at the campus. Selection is carried out by a Committee appointed by the Awards Committee of the DalTech Alumni Association.

#### *Athletic Awards*

A number of awards are provided by the athletic endowment for exceptional student athletes who qualify. Returning students must have been a full time student for at least two semesters in an academic year at Dalhousie with a minimum GPA of 2.0 in three full year classes or the equivalent. Entering candidates must have an average of 80% or higher.

#### a) The Graham Family Athletic Awards

John and Lina Graham have established the Graham Family Athletic Awards, which recognize the contributions that varsity student athletes make in enriching the quality of life at Dalhousie University. Awards are available to entering and continuing varsity athletes who have achieved high academic standing (minimum 80% entering and 3.0 GPA continuing students). Award recipients should demonstrate positive attributes in the areas of citizenship, sportsmanship and community service.

#### b) MacKean Scholarships

The Margaret Louise MacKean Scholarships were established through the estate of Charlotte Louise MacKean. Through a bequest in her will, the Margaret Louise MacKean Scholarships will eternally benefit Dalhousie student athletes who have demonstrated athletic, academic and citizenship excellence.

#### **The Annie L. Beer Prize**

Under the will of the late Mrs. Thomas (Annie L.) Beer of Charlottetown a bequest was established at Dalhousie University. The net income from the fund provides for a prize which is to be awarded to the youngest student from Prince Edward Island who enters this University in each year. The Registrar's Office selects and notifies the winner.

#### **Black and Gold Awards**

Each year the Dalhousie Black and Gold Club funds a number of awards that recognize outstanding student athletes and the contribution they make to university life. Returning students must have been a full time student for at least two semesters in an academic year at Dalhousie with a minimum GPA of 2.0 in three full year classes or the equivalent. Entering candidates must have an average of 80% or higher. Participation on a varsity team is a requirement. Applicants should apply through the head coach of their respective varsity teams. Eligibility is verified by the Registrar's Office.

#### **Jeff Bredin Memorial Scholarship in Men's Volleyball**

This scholarship was established in memory of Jeff Bredin who graduated from Dalhousie in May, 1985 with a Bachelor of Physical Education. While at Dalhousie, Jeff was a member of the varsity volleyball team for two years and was the recipient of numerous awards for his contribution to the University's volleyball team.

One or more scholarships will be awarded to entering or continuing student athletes on the Dalhousie men's volleyball team who demonstrate excellence in volleyball, sportsmanship and community service.

#### **Dalhousie Student Union Student Accessibility Award**

This award is open to Dalhousie students with a permanent disability (physical, mental or learning impairment). Applicants must apply by writing, taping or filming a personal statement on why they could benefit from this award. Interested students should contact the Vice-President, Internal, Dalhousie Student Union for additional details and application deadline.

#### **The Honourable W.H. Dennis Memorial Prizes for Literary Compositions in English**

Two prizes known as the Joseph Howe Prizes are offered each year. First prize \$200, second prize \$100, for a poem or collection of poems of any length greater than one hundred lines. Two prizes known as the James DeMille Prizes are offered each year, one of \$150 for an essay, the other of \$150 for a prose short story. Contact the Department of English for details.

1. Candidates for these prizes must be registered full-time undergraduate or graduate students at Dalhousie University.
2. Three copies of each composition must be sent in by the competitor.
  - a) These compositions must be typewritten, double spaced and on one side of the paper only.
  - b) A pseudonym is to be typed at the end of each typescript and after the pseudonym a statement as to whether or not a first or second or no prize has been previously awarded to the writer.
  - c) Compositions are to be accompanied by a sealed envelope bearing the same pseudonym in typewriting to the Jury of Award for either the Joseph Howe Prize or for the James DeMille Prize, as the case may be.
  - d) The envelope shall contain in typewriting the pseudonym, the titles of the entries and the candidate's full name and address.
  - e) Candidates submitting more than one prose entry must use the same pseudonym for each; different pseudonyms may be used for prose and poetry.
3. Candidates for the DeMille Prize may submit one entry in each of the essay and short story sections.
4. The winner of a prize in the poetry contest is not debarred from competing in the prose contest, and vice versa.
5. In the poetry contest no winner of a first prize is eligible to compete again, and no winner of a second prize is eligible for a second prize in a subsequent year.

6. In the prose contest no winner of a first prize is eligible to compete again, and no winner of a second prize is eligible for a second prize in a subsequent year.
7. Entries must reach the Department of English on the deadline.
8. Entries are adjudicated by a panels of judges which includes a professional writer. The decision of the judges is final.
9. No prize will be awarded for any composition that does not attain to a sufficiently high standard of merit.
10. *The Dalhousie Review* will be offered the first option to publish winning compositions. A copy of each winning composition is deposited in the University archives. Contestants retain ownership of copyright.
11. Contestants are urged to retain a copy of their typescript(s) since the copies cannot be returned.

#### **Shawn Dupuis Memorial Prize**

This prize was established in memory of Shawn Dupuis, of Dartmouth, NS, who was a member of the varsity swim team. This prize of \$300 will be awarded at the first AUS meet of the season held at Dalhousie, to a Dartmouth Crusader Swimmer entering his/her first year of study at Dalhousie University. Preference will be given to students who are enrolled in a class from the Bachelor of Commerce program or the Spanish and Latin American Studies Department, Faculty of Arts and Social Sciences.

#### **The Clare Murray Fooshee Poetry Prize**

One or more prizes will be awarded for the best poems, of any length, submitted by Dalhousie undergraduates. Prize money approximates \$400, which is the net income from a fund established by friends in memory of the poetess Mrs. Clare Murray Fooshee, BA (1924). Up to five poems may be submitted by each writer. Previous winners are ineligible. No award will be made unless a poem submitted is deemed to be of sufficient merit. Entries should reach the Chair of the Department of English by March 1.

#### **The SLT Bruce Galloway Memorial Prize**

Friends, family and shipmates of Sub-Lieutenant Bruce David Galloway, a member of the Ship's Company of H.M.C.S. Fraser and a 1983 Arts graduate of Dalhousie, have established a memorial fund. The prize is to be awarded to the student, male or female, attending Dalhousie University on the Regular Officer Training Plan who attained the highest academic standing (not less than a passing standing) in the program in which he or she is enrolled. A prize is to be awarded in each year in which there is a student attending Dalhousie on the Regular Officer Training Plan who achieves a passing standing. The Registrar's Office selects the winner.

#### **The Irving and Jeanne Glovin Award**

The Oskar Schindler Humanities Foundation established this award in 2003 to support research into the meaning and principles underlying "good human conduct". The research submitted will seek to define the meaning of "good human conduct" with which all persons could agree, to explore its sources, and develop pragmatic educational strategies and ways of teaching children, to show by action, respect and acceptance of others of any circumstances and/or background. The Irving and Jeanne Glovin Award will enable collaborative research by students, in the final year of undergraduate study or graduate study, in any major discipline or interdisciplinary program, together with a professor or mentor. The recipient will be preferably one who has a broad education and interdisciplinary interests appropriate to the research topic chosen. A copy of the research essay, accompanied by a letter of recommendation from the faculty member, must be submitted by April 15th each year to the Dean of Faculty of Arts and Social Sciences, or the Dean of Graduate Studies. The recipient will be asked to present the research essay.

#### **The Kim Rilda LeBlanc Memorial Award in Healing and the Arts**

This award was established to recognize outstanding interdisciplinary initiatives between the arts and the health sciences, and it honours the memory of this former graduate student in English. The competition is open to undergraduate and graduate students in the Faculties of Arts and Social Sciences, Medicine, and Health Professions. Faculty may nominate students who have completed an outstanding project, thesis, or research essay that combines work in the humanities or the arts with work in medicine or health care. Nomination letters, accompanied by three copies of the candidate's project, thesis, or research essay are to be submitted by 15<sup>th</sup> April each year to The Chair, The Kim Rilda LeBlanc Memorial Award Committee, Department of English.

### ***The Robert and Katherine MacDonald Award***

An endowment has been established to provide an annual prize for Chinese students at Dalhousie. The recipient will be engaged in undergraduate studies and be a member of the Dal-TUNS Chinese Students' Association or its successor. The recipient will have demonstrated good academic achievement combined with leadership qualities and contribution to University life. The Association will recommend a candidate or candidates to the Head of Student Services.

### ***Natatorial Award***

In honour of a former swim coach, Nigel Kemp, one or more annual awards are given to members of the Dalhousie University varsity swim team. Entering students must have achieved a minimum average of 80% from high school. Returning students must have achieved a minimum GPA of 3.0. Gender equity is considered by the selection body.

### ***Gordon S. Rankin Memorial Scholarship***

Gordon Rankin, born in Halifax in 1933, graduated from Dalhousie in 1957 with a Bachelor of Commerce degree. He played both varsity football and basketball, holding the position of Captain for a period of time on both teams. As a continuing tribute to Gord, this scholarship was formed to assist athletes in financing their studies while attending Dalhousie University.

### ***Dr. Ron Steward Award for Student Leadership in Global Health***

Awarded annually to a student who has demonstrated leadership in global health and a commitment to improving the health of marginalized communities during their time at Dalhousie. This award is coordinated through the International Health Office.

## **B. Convocation Awards**

The following three awards are administered by the Registrar's Office and are awarded at Convocation.

### ***Governor General's Silver Medal***

Offered by His Excellency the Governor-General of Canada, this medal is awarded to the undergraduate student who has achieved the highest academic standing among graduates of baccalaureate programs.

### ***University Silver Medal***

This medal is awarded to the student who is judged to be the leading First Class Honours student among graduates of baccalaureate programs. The recipient cannot have received the Governor General's Silver Medal.

### ***Avery Prize***

This prize, bequeathed by J.F. Avery, MD, will be awarded on graduation to the student standing highest among graduates of the general degree program. The recipient cannot have received the Governor General's Silver Medal or University Silver Medal.

For the aforementioned medals and prize, a student who is completing a second Dalhousie degree will have only those classes required for a second degree used when calculating their cumulative average. In addition, any disciplinary action by the Senate Discipline Committee shall be deemed sufficient cause for any student to be ineligible.

## **C. Faculty of Agriculture**

For more information on deadlines and application procedures, please visit [www.moneymatters.dal.ca](http://www.moneymatters.dal.ca)

### ***Canadian Agricultural Economics Association Prize***

The Canadian Agricultural Economics Association presents a book prize to a graduating student from the Agricultural Economics or Agricultural Business option of the BSc (Agr.) program. This prize is selected on the basis of overall performance.

### ***Canadian Society of Animal Science Prize***

The Canadian Society of Animal Science presents a book prize to a student in the fourth year of the Animal Science or Aquaculture options of the BSc (Agr.) program. This prize is selected on the basis of outstanding scholarship.

### ***K. de Geus Memorial Prize for Plant Science***

In memory of the late K. de Geus, a prize is awarded to a technical graduate. Selection is based on high standing in course work, and preference is given to students in the horticultural field.

### ***Noel Enman Memorial Award***

Established in 1984, the Noel Enman Memorial Award is presented annually in memory of alumnus Noel Enman (1961-1983) to a technical graduate whose personality and fellowship have contributed to student life and activities, thereby gaining the respect of the students and faculty. Nominations should be submitted through the office of the Dean of Student Services by February 18. The award is presented at the graduation class banquet prior to Convocation.

### ***Etta PHYS0050 Prize***

A \$100 Bookstore voucher will be presented to an outstanding returning student who achieves the highest mark in the PHYS0050 course. The prize may not be awarded every semester.

### ***Farm Credit Canada Business Planning Awards***

Sponsored by Farm Credit Canada, the purpose of this award program is to encourage agricultural students to apply their knowledge and create "real-life" farm and related business plans for their operations (home, existing, or start-up). The awards are open to students in the final year of the Diploma in Enterprise Management program who complete business plans during the business project course (MGMT0201). A student who has received an FCC Farm Business Planning Award is not eligible for a second one. Cash prizes are distributed based on the number of submissions from participating students (as individuals or teams).

### ***H. J. Fraser Memorial Prize for English***

In memory of the late Professor H. J. Fraser, a prize is awarded to a second-year student who has achieved excellence and provided significant contribution to the discussion in a first-year English course.

### ***Dr. Gerry W. Friars Undergraduate Research Prize***

The Dr. Gerry W. Friars Undergraduate Research Prize is awarded to the student who is judged to have completed the best written research report as part of the fourth-year project requirements. Dr. Friars, Class of 1948, was introduced to scientific research by an undergraduate research project, thus beginning a career in research and teaching.

### ***Governor General's Bronze Medal***

Offered by Her Excellency the Governor-General of Canada, this medal is awarded to the student who has achieved the highest academic standing among graduates of technology diploma programs.

### ***Hanna CHEM0050 Prize***

A Bookstore voucher will be presented to an outstanding returning student who achieves the highest mark in the CHEM0050 class. The prize may not be awarded every semester.

### ***JebJeb Prize for Preparatory Studies***

A Bookstore voucher will be presented to a mature student who achieves outstanding performance in all three preparatory courses completed in one academic year.

### ***Ketchum Manufacturing Company Limited Prize***

The Ketchum Manufacturing Company Limited Prize is awarded to a graduate of the Animal Science option.

### ***Leelee MATH0050 Prize***

A Bookstore voucher will be presented to an outstanding returning student who achieves the highest mark in the MATH0050 class. The prize may not be awarded every semester.

### ***Novartis Award***

The Novartis Award is presented to the top all-round student graduating from the Veterinary Technology program who has particularly excelled in the area of parasitology.

### ***Patterson Law Prize***

Patterson Law offers a prize to any full-time student who has lived or worked on a farm. Applicants are required to submit an essay (500-1000 words) regarding any major issue facing the farming community.

## **D. Faculty of Architecture and Planning**

### ***Lezlie Oler Prize in Community and Environmental Design***

This \$1,000 prize is presented to one or more students in the Bachelor of Community Design program or the Bachelor of Environmental Design Studies

program, based on a design proposal for urban beautification in the Halifax Regional Municipality. Apply to the Dean's office by December 10.

## 1. Architecture

### ***Bachelor of Environmental Design Studies Year 3 Portfolio Prize***

A prize is awarded to the student who has produced the best design portfolio at the end of Year 3 in the BEDS program.

### ***Bachelor of Environmental Design Studies Year 4 Portfolio Prize***

A prize is awarded to the student who has produced the best design portfolio at the end of Year 4 in the BEDS program.

## 2. Planning

### ***Community Design Achievement Award (second year)***

This prize is awarded to the student with the highest cumulative average in the second year of the Community Design program.

### ***Community Design Achievement Award (third year)***

This prize is awarded to the student with the highest cumulative average in the third year of the Community Design program.

### ***Community Design Service Prize***

The prize is awarded to a graduating Community Design student who has made a significant contribution to community design beyond the School.

### ***Community Design Thesis Prize***

This prize is given in recognition of excellent work in completing the thesis project for the Bachelor of Community Design.

### ***University Medal in Community Design***

This medal is awarded annually to the graduate who has attained the highest academic standing in Community Design.

## E. Faculty of Arts & Social Sciences

### ***The Clan Ramsay of Nova Scotia Prize***

To provide an annual prize to the student in the Faculty of Arts and Social Sciences who has written the best paper dealing with (any aspect of) the influence of Scottish culture within Canada. This award was established by the Clan Ramsay in Nova Scotia in recognition of the contribution of George Ramsay, 19th earl of Dalhousie, founder of Dalhousie University.

## 1. Canadian Studies

### ***University Medal in Canadian Studies***

A University Medal has been established for the student with the highest standing among those who graduate with First Class Honours.

## 2. Classics

### ***University Medal in Classics***

The Department of Classics offers to the top First Class Honours graduate in the classics program a medal in recognition of superior achievement in Classics.

## 3. Contemporary Studies

### ***University Medal in Contemporary Studies***

The Department of Contemporary Studies offers to the top First Class Honours graduate a medal in recognition of superior achievement.

## 4. Creative Writing

### ***University Medal in Creative Writing***

Awarded to the top First Class Honours graduate for recognition of superior achievement in Creative Writing.

## 5. Early Modern Studies

### ***University Medal in Early Modern Studies***

The Department of Early Modern Studies offers to the top First Class Honours graduate a medal in recognition of superior achievement.

## 6. English

### ***The Avie Bennett Prize***

This prize (\$500 plus a complete set of the New Canadian Library) is one of six established by Mr. Avie Bennett, Chairman and President of McClelland and Stewart to mark the company's 90<sup>th</sup> anniversary and the 40<sup>th</sup> anniversary of the New Canadian Library, of which the founding general editor was Dalhousie Professor Emeritus Dr. Malcolm M. Ross. It is awarded each year for the best essay on Canadian literature submitted from an undergraduate class at Dalhousie during the current academic year. Essays may have been written for classes in any department, but they should focus explicitly on a Canadian literary topic and not on history or culture more generally, and they must be written in English. Essays should be nominated by instructors; clean copies should be submitted by the specified date.

### ***Barbara Bennett Chittick Prize***

This prize is awarded annually to an outstanding first year student enrolled in introductory English at Dalhousie University. Section instructors will normally make nominations, which shall consist of a letter from the instructor on why the student should receive the award, the student's final grade, and a sample essay. The prize winner will be determined by a selection committee consisting of one member of the Undergraduate Committee and the co-ordinator of tutor-markers in the English Department.

### ***Graham Creighton Prize in English***

Established by his son, Wilfrid Creighton, this prize is to honour the memory of Graham Creighton, 1904 graduate of Dalhousie. Graham Creighton and his wife raised six children in their home on LeMarchant Street. All six children attended Dalhousie and graduated between 1915 and 1927. This prize is awarded annually to students majoring in English or in Honours English and entering their fourth year of study.

### ***Samantha Li Award***

The Samanth Li Memorial Award was established by family, friends, faculty, and students to honour the memory of Samantha Li by supporting the annual prize of approximately \$350 for a student in the Honours program in English. The recipient chosen will most closely reflect the academic and personal qualities of Samantha Li: intellectual reach and creativity; a passion for the exploration of literature and ideas; generosity toward and engagement with fellow students and professors.

### ***Paul McIsaac Memorial Prize***

A memorial gift provides for an annual prize for an undergraduate student, who shows an enquiring and original mind, in the second or third year of study in the Honours or Majors program in English.

### ***Margaret Nicoll Pond Memorial Prize in English***

A prize in English of about \$500 per year has been endowed by Mr. F.H. Pond of Halifax in memory of his wife, the late Margaret Nicoll Pond, a gifted teacher of English and a devoted alumna and governor of Dalhousie University. The prize will be awarded, on recommendation of the Department, to a woman graduate of Dalhousie University who leads her class in English.

### ***The James W. Tupper Graduate Fellowship in English***

Two fellowships are awarded by the English Department to outstanding students who propose to do graduate work in English at a university approved by the faculty.

### ***The University Medal in English***

Each year the Department of English offers a medal to the top First Class Honours graduate in recognition of superior achievement in the program.

### ***Varma Prizes in Gothic Literature***

These prizes were established to honour the memory and spirit of the late Devendra Varma who taught at Dalhousie University in the Department of English. Applicants should be undergraduate English majors or honours English students. Prizes shall be awarded to the winners of a gothic short story contest.

## 7. European Studies

### ***University Medal in European Studies***

A University Medal has been established for the student with the highest standing among those who graduate with First Class Honours.

## 8. French

### *Prix de l'Alliance française*

An annual book prize awarded to a third or fourth year student who has achieved outstanding results in the study of French language and literature. Suitable candidates are proposed by the Department before March 15. The award is bestowed at an official ceremony at the Alliance française in the Spring. The Alliance française is an internationally renowned non-profit organization with a mission to promote French language and culture.

### *Prix de l'Ambassadeur de France*

A book prize, offered by the French Embassy in Ottawa, is awarded annually to the graduating student with the highest standing in advanced French classes. This award is conferred at a Departmental ceremony in the spring.

### *Prix de l'Ambassadeur de Suisse au Canada*

A book prize, the gift of the Ambassador of Switzerland in Canada, is awarded to a graduating student who has won distinction by their work in the French language. This award is conferred at a Departmental ceremony in the spring.

### *Prix du Consul du Liban*

A book prize, the gift of the Consul of Lebanon, is awarded to a graduating student who has demonstrated excellence in their work in the French language. This award is conferred at a Departmental ceremony in the spring.

### *Prof. & Mrs. Robert Lloyd McIntosh Prize in French*

This fund provides an annual prize for a Major or Honours student in the Department of French who has demonstrated a superior level of achievement in the core classes required for second year Major and Honours students. Currently these classes are 2045, 2201 and 2202.

### *Marcelle Cendres Sandhu Memorial Prize*

Colleagues, friends and students of the late Marcelle Cendres Sandhu have established an annual prize to be awarded to a Major or Honours student in the Department of French who achieves excellence in third or fourth year French grammar classes.

### *University Medal in French*

The Department of French offers a medal to the top First Class Honours graduate in recognition of superior achievement.

## 9. Gender and Women's Studies

### *University Medal in Gender & Women's Studies*

A University Medal has been established for the student with the highest standing among those who graduate with First Class Honours.

## 10. German

### *Prize of the Ambassador of Austria in Canada, Prize of the Ambassador of Switzerland in Canada, and the Prize of the Ambassador of Germany in Canada*

The Austrian, German and Swiss embassies in Canada regularly offer German language books to the Department to be awarded to Dalhousie students whose achievement in German is outstanding. Awards are made at various levels of proficiency.

### *University Medal in German*

The Department of German offers a medal to the top First Class Honours graduate in recognition of superior achievement.

## 11. History

### *The Edith and Rose Goodman Prize in History*

Under the Will of the late Mrs. Jeanette Goodman a bequest was made to Dalhousie University to fund a prize(s) for the highest standing in Canadian History. The prize is awarded on the recommendation of the Department of History.

### *The Commonwealth History Prize*

To facilitate and encourage the study of Commonwealth or British history, this prize is awarded annually for the best undergraduate essay on a topic relating to the history of Britain and/or the Commonwealth countries. The prize is funded by a gift from Dr. David Jessop and Dr. Karen Ostergaard.

### *University Medal in History*

To the top First Class Honours graduate the Department of History offers a medal in recognition of superior achievement.

### *The Dr. George E. Wilson Prize in History*

In 1967 an endowment was established to provide an annual prize to be awarded for the best essay by a first year student in a first year class.

## 12. History of Science and Technology

### *University Medal in History of Science and Technology*

The History of Science and Technology program offers to the top First Class Honours graduate a medal in recognition of superior achievement.

## 13. International Development Studies

### *University Medal in International Development Studies*

A University Medal has been established for the student with the highest standing among those who graduate with First Class Honours.

## 14. Italian Studies

### *University Medal in Italian Studies*

A University Medal has been established for the student with the highest standing among those who graduate with First Class Honours.

## 15. Linguistics

### *University Medal in Linguistics*

Halifax Interuniversity Linguistics Program offers to the top First Class Honours graduate a medal in recognition of superior achievement.

## 16. Music

### *The Atlantic Barber Shop Harmony Award*

The Nova Scotia Chapter of the Society for the Presentation and Encouragement of Barber Shop Quartet Singing in America has established a fund to award an annual prize to a student enrolled in an undergraduate degree program in Music, who, in the estimation of the Department, demonstrates outstanding aptitude and achievement leading to a professional career in an aspect of choral music (conducting, composing, arranging, singing, etc.) Normally awarded to a fourth year student, with the discretion of the Department it may be used as a Graduation Prize.

### *Professor Ray. D. Byham Memorial Prize in Piano Studies*

A prize established with donations made by family, colleagues and friends of Professor Ray D. Byham, who taught at Dalhousie from 1969-1993, to provide one (or more) annual prize(s) to a student(s) entering fourth year piano studies in the Department of Music. The prize will be used to provide financial assistance toward continued piano performance studies at Dalhousie, a recognized piano-intensive workshop, a chamber music festival or similar event. The recipient will have a cumulative GPA of not less than 3.3, with at least two years prior, consecutive residency in the Dalhousie Bachelor of Music (Piano Performance) program or equivalent.

### *James and Abbie Campbell Prize, Campbell Incentive Award*

The Department of Music may from time to time award prizes to outstanding students from the James and Abbie Campbell Memorial Fund. The Campbell Incentive Award may on occasion be awarded under special circumstances.

### *James A. Faraday Memorial Music Award*

This annual scholarship is for a percussion student in the third or fourth year of a music degree program. To be considered, students must demonstrate a high standard of performance, a love music, a positive attitude and a collaborative spirit. The Music Department's Scholarship Committee will work in consultation with faculty members from the percussion program to choose an eligible student. The award will be made in the spring of each year. This award was established by family and friends to honour the memory of James A. Faraday, percussion teacher, mentor and friend, who inspired students at Dalhousie for over 30 years.

### *Dalhousie Alumni Association (Women's Division) Medal in Music*

The Women's Division provides an annual medal to the graduating student who achieves the highest cumulative GPA in music subjects over the four year Bachelor of Music degree.

***Dalhousie Women's Alumnae Prize***

This prize is presented to the graduating student who has achieved a high cumulative average in music subjects during the four-year Bachelor of Music degree program.

***The Beatrice Daviss Music Prize***

A fund has been established by members of the Dalhousie community to mark Women's Centennial Year (1985) at the University. The purpose of the fund is to provide an annual in-class prize to a female student in the Bachelor of Music program on the combined basis of high academic standing and performance ability as determined by the Department of Music. The prize is named after the first graduate in music in 1909.

***The Ernest and Dorothy Heighton Memorial Prize***

A prize established through bequests received from the estates of the late Dr. Ernest Heighton and his wife Dorothy, in the spirit of their keen interest and support for the Department of Music's Applied Skills training program and for the public performances of its students. Preference will be given to an outstanding student in the third or fourth year of the Bachelor of Music in Performance: Concentration in Jazz and Improvisation. The value of the prize shall not be less than \$400.

***The Lorne C. Huber Memorial Prize in Music***

This prize is awarded annually from a fund in memory of the late major Lorne C. Huber established by his widow and family, to an undergraduate student of outstanding potential in brass performance. The minimum value of this prize is \$100.

***The Erik Perth Memorial Award***

An award established to honour the memory of Erik Perth, a former Director of Cultural Activities at Dalhousie University. An annual prize will be awarded to a female vocal student who has completed the third year of a Bachelor of Music, or Bachelor of Arts Combined Honours, Music & Theatre, and who, in the opinion of the Department, has demonstrated both outstanding achievement in vocal performance, and an aptitude for a career in opera and/or musical theatre. The prize will be awarded in conjunction with the opening night performance of the annual Opera Workshop.

***Richardson Family Experiential Learning Award***

This award provides financial aid for music students who are attending experiential learning workshops, festivals and conferences, based on nomination from department faculty members. Preference will be made to grant one \$1,000 award for a student accepted in the Halifax Summer Opera Workshop, or successor program, and the other \$1,000 award to a student accepted into the Scotia Festival of Music, or successor program. This annually funded award was established by Bill Richardson, a graduate of Dalhousie's Law School, and by Colin and Debbie Richardson, both of whom worked in support of numerous music student productions in the Dalhousie Arts Centre.

***The Royal Saint George's Society of Halifax Prize in Music***

The Royal Saint George's Society of Halifax has established a prize in recognition of the University's successful role in the musical training and cultural enrichment of the community. This prize will be awarded annually to a student entering the third or fourth year of an undergraduate degree program in music who, in the estimation of the Department, shows particular potential in an orchestral instrument.

***The Georg Tintner Prize***

This fund was established by family, colleagues and friends, to honour the musical legacy and spirit of Dr. Georg Tintner, conductor and Music Director of Symphony Nova Scotia (1987-1994) and devoted supporter of the Dalhousie Music Department's performance activities. An annual prize will be awarded to an instrumental or voice student enrolled in a music degree program who, in the estimation of an audition panel, demonstrates exceptional musical talent with the potential for a professional performance career. The prize will be awarded at the annual Concerto Night concert.

***The William Tritt Recital Prize***

The Department of Music may, upon the recommendation of the Piano Faculty, award this prize to a piano student who has demonstrated a high level of performance on his/her third year or graduation recital. This prize will be awarded only when it is deemed warranted. This award is named after the late Canadian pianist and Dalhousie faculty member, William Tritt.

***The William Tritt/Scotia Festival Memorial Prize***

The Department of Music awards this prize upon the recommendation of the Piano Faculty to a senior level Piano student who has achieved a high standard of performance. This prize is to be applied to tuition costs for participation in the Young Artists Program of the Scotia Festival of Music. This award is named after the late Canadian pianist and Dalhousie faculty member, William Tritt.

***University Medal in Music***

The Department of Music offers a medal to the highest ranking student of the year who graduates with the equivalent of a First Class Honours degree in the Bachelor of Music program.

**17. Philosophy*****The F. Hilton Page Memorial Prize in Philosophy***

This annual prize is normally awarded to the honours graduate whose Honours essay is judged to be outstanding.

***Dr. H.L. Stewart Memorial Scholarship***

This prize is awarded to the student with the best record entering the final year of an Honours Philosophy degree program.

***University Medal in Philosophy***

The Department of Philosophy offers a medal to the top First Class Honours graduate in recognition of superior achievement in the program.

**18. Political Science*****The James H. Aitchison Award***

In 1979 colleagues of Dr. J.H. Aitchison established a fund from which an annual prize would be awarded in recognition of the best undergraduate honours essay. The fund was established to honour Professor Aitchison who was instrumental in founding the Department.

***Commonwealth Political Philosophy Prize***

Established by John W. Beveridge (BA, Honours 1971) for students who demonstrate interest and achievement in the field of political philosophy. The prize name derives from Commonwealth, understood as society and government that endeavours to serve and represent community, without tending towards a totalitarian system. This prize is awarded annually to the student who has achieved the highest grade in a class on political philosophy / the Foundations of Political Thought.

***The Eric Dennis Gold Medal***

Founded by Senator William Dennis and Mrs. Dennis, this medal will be awarded on graduation to the student who stands first among those taking First Class Honours in Government and Political Science. (This is the University Medal in Political Science.)

***The H.B. McCulloch Memorial Prize in Political Science***

This prize will be awarded annually to the student who, among all the first and second year students registered in introductory classes in political science, is judged to have written the best essay in the second term.

**19. Religious Studies*****University Medal in Religious Studies***

A University Medal has been established for the student with the highest standing among those who graduate with First Class Honours.

**20. Russian Studies*****University Medal in Russian Studies***

The Department of Russian Studies offers to the top First Class Honours graduate a medal in recognition of superior achievement in the program.

**21. Sociology and Social Anthropology*****The Rev. S.H. Prince Prize in Sociology***

A bequest under the will of the late Dr. S.H. Prince established a fund to provide an annual prize to be available to students at either Dalhousie or King's.

***University Medal in Social Anthropology***

The Department of Sociology and Social Anthropology offers a medal to the top First Class Honours graduate in the Social Anthropology program in recognition of superior achievement.

### ***University Medal in Sociology***

The Department of Sociology and Social Anthropology offers a medal to the top First Class Honours graduate in the Sociology program in recognition of superior achievement.

## **22. Spanish and Latin American Studies**

### ***Department of Spanish and Latin American Studies Citizenship Award***

The Citizenship Award recognizes the contributions of an individual to build a community atmosphere within the Department of Spanish and Latin American Studies.

### ***Dr. James E. Holloway, Jr. Memorial Prize***

The Holloway Memorial Prize is awarded to a graduating student with an honours degree (completed in the Department of Spanish and Latin American Studies) who has written a thesis with a focus upon Latin America.

### ***Sylvia Coffey Memorial Award***

The Sylvia Coffey Memorial Award is given to a female Spanish and Latin American Studies student studying in one of our programs abroad in Latin America.

### ***The de Carteret Memorial Prize***

Established as a gift in memory of the late Norman S. and Helier S. de Carteret and their sister, Phyllis de Carteret Nielsen, the de Carteret Memorial Prize is to be awarded on the recommendation of the Executive Committee of the Department to an outstanding student in the Department of Spanish and Latin American Studies.

### ***The Reverend J.B. Hibbitts Memorial Prize***

To honour the memory of a scholar, donor, and friend of the department, this prize is awarded annually to the graduating student with the highest overall honours GPA.

### ***University Medal in Spanish and Latin American Studies***

The Department of Spanish and Latin American Studies offers a medal to the top First Class Honours graduate in recognition of superior achievement in the Spanish and Latin American Studies program.

## **23. Theatre**

### ***Andrew and David Stitt Memorial Prize***

To honour the memory of Theatre students Andrew and David Stitt, two prizes will be awarded annually to two students entering the third year of the Acting Program who have shown promise in, and passion for, acting.

### ***Blackmore Award***

This award was created by Neptune Theatre of Halifax to honour scenic carpenters John and William Blackmore. The award is given to a student in his or her third year of a Theatre BA program who has shown promise in and passion for work in Technical Scenography.

### ***Department of Theatre Awards Fund***

This fund supports four awards to recognize the achievements of outstanding students in the Department of Theatre: the Basil Cook Award for students in Costume Studies, the Blanche Potter Award for students in Technical Scenography, the Martin Surette Award for students in Acting, and the Robert Merritt Award for students in Theatre Studies. The award will normally be made during the student's third year of study in the Theatre Department.

### ***Jopling Award for Out of Country Theatre Studies***

Earnings from this fund are used to support an annual award to assist students enrolled in the Department of Theatre to further their knowledge of theatre by study in another country during the summer. Eligible students must be enrolled full-time in a program of study in the Department of Theatre and have completed at least one year (both fall and winter semesters) of their program of study. In addition, eligible students will have been accepted to study theatre at an institution in a country other than Canada.

### ***University Medal in Theatre***

The Department of Theatre offers to the top First Class Honours graduate a medal in recognition of superior achievement.

### ***Women's Division - Dalhousie Alumni Association Medal in Costume Studies***

This medal is presented annually to the graduating student with the highest cumulative GPA in the Costume Studies Program.

### ***Christine Zinck Book Award***

This award recognizes an outstanding graduating honours student in Theatre Studies.

## **24. Transition Year Program**

### ***Morris Saffron Prize***

A bequest under the will of the late Morris Saffron established an endowment to provide an annual prize to a student in the Transition Year Program who is judged to have made the greatest academic achievement during the year.

### ***Jonathan Skeete Memorial Prize***

Friends, faculty and former students of the Transition Year Program have established an endowment from which to fund an annual prize. The award honours the memory of Jonathan Skeete who, following completion of the TYP, was graduated with a BComm degree and then served several years with the RCMP. An annual prize is available to a Black student who is enrolled in the Transition Year Program. Contact the Director of the Program for details.

## **F. Faculty of Computer Science**

### ***Ada Byron Award***

The Ada Byron Award recognizes the leadership and contributions of an individual to increase and promote the involvement of women in computer science.

### ***Citizenship Award***

The Citizenship Award recognizes the contributions of an individual to build a community atmosphere within the Faculty of Computer Science.

### ***Dean's List Award***

Students enrolled in an undergraduate major 20-credit program offered by the Faculty of Computer Science with at least 1.5 credits of classes offered at Dalhousie in the academic term being assessed, are automatically considered for the Dean's List designation and monetary award of \$250.

Students are eligible to receive the award for each term in which they achieve a minimum 3.70 GPA for the term being assessed. Part-time students are also eligible for the Dean's List if they have completed at least 1.5 credits during the academic year but less than 1.5 credits in any one term. Students cannot receive both a Dean's List Award and a Sexton Scholar Award in any one term.

### ***Gold, Silver and Bronze Awards***

The Gold (\$2,500), Silver (\$2,000) and Bronze (\$1,500) awards recognize the academic achievements of the top three students who are entering second, third, and fourth years of study.

To be eligible, students must be enrolled in an undergraduate major 20-credit program offered by the Faculty of Computer Science with at least 2.0 credits per term in the student's two academic terms prior to the award assessment; have completed at least five credits per year of study towards their computer science degree (incl. transfer credits), have completed all applicable CSCI core classes required that year and must have at least one academic term of 2.0 credits or more to complete for their computer science degree. All eligible students are automatically considered for these awards which are based solely on cumulative GPA. Students are assessed following the winter term.

### ***Leadership Award***

The Leadership Award recognizes the leadership and contributions of an individual in building a community atmosphere within the Faculty of Computer Science.

### ***Mobil Oil Award***

This award is given to the student with the highest GPA across CSCI 3120 and one of CSCI 3110 or CSCI 3111. Students are automatically assessed for the award at the end of the winter term or at their first eligibility.

### ***Sexton Scholar Award***

Students enrolled in an undergraduate 20-credit major program offered by the Faculty of Computer Science with at least 2.0 credits of classes offered at Dalhousie in the academic term being assessed, are automatically considered for

the Sexton Scholar designation and monetary award of \$400. Students are eligible to receive the award for each term in which they achieve a minimum 3.85 GPA for the term being assessed. Students cannot receive both a Dean's List Award and a Sexton Scholar Award in any one term.

#### **University Medal in Computer Science**

A medal is awarded to the top First Class Honours graduate in both BCS and BSE in recognition of superior achievement in computer science.

### **G. Faculty of Engineering**

#### **Adjeleian Award in the Aesthetics of Structures**

Dr. John Adjeleian established this award of \$1,000 to be made to a graduating student in either the School of Architecture's Master of Architecture program, or Civil Engineering. The award will be granted to the graduating student who demonstrates in a project both aesthetic principles in buildings and bridges, and unified roots of architecture and structural engineering. The award will alternate between Architecture and Civil Engineering. Selection is by Scholarships & Awards Committee of the Faculty of Engineering on the recommendation of one professor of Structural Engineering, one professor of Architecture, one Consulting Structural Engineer, and one Consulting Architect. Deadline: Architecture - no application required; Engineering - March 31.

#### **The Engineers (Nova Scotia) Award**

Engineers Nova Scotia provides an award made at convocation each year to that student graduating in engineering who best demonstrates promise of using outstanding abilities to serve society in an ethical manner as a Professional Engineer. The award candidates will be nominated by students of the graduating classes in consultation with their Engineering Department members. The award is an engraved certificate and \$1,000. Selection will be made by the Student Affairs Committee of Engineers Canada and based on a written and oral presentation.

#### **Atlantic Farm Mechanization Show Graduation Award**

Presented annually to the student graduating in Biological Engineering who has exhibited the greatest aptitude in the machinery related classes and who has demonstrated the greatest potential for a career in Biological Engineering. Value: \$1,000.

#### **Atlantic Land Improvement Contractors Association/ Environmental Engineering Association Award**

Presented annually to the student graduating in the Environmental Engineering program who had exhibited the greatest aptitude in the environmental engineering classes and who thus has demonstrated the greatest potential for a career in environmental engineering. Value: \$750.

#### **The Louie I. Baker Awards in Technical Communication**

Established by Dr. Max L. Baker in memory of his wife Louie are two prizes for the Technical Writing category valued at \$300 and \$200 each, and two prizes for the Oral Presentation category valued at \$300 and \$200 each. Dr. Baker was Professor Emeritus at Dalhousie and a former Head of Mechanical Engineering. Competition is open to all Dalhousie students registered in Engineering. Oral Presentation - student registered in the final year. Technical Writing - students registered in the penultimate year. The recipients shall be selected in February each year. The theme and rules governing the competition are available from the Office of the Associate Dean of Engineering. The details are published in the Guidelines for the Baker Awards.

Deadline: December - Technical Writing; January - Oral Presentation

#### **Camp 7 Iron Ring Award**

Established by Camp 7 Halifax, The Corporation of the Seven Wardens, this award is given to a graduating Engineering student who displays a uniquely high professional attitude towards their academic program that has produced quality academic results. Students are nominated for this award by their department, from those who have applied for in-class scholarships.

#### **The Canadian Society for Chemical Engineering Medal**

The Canadian Society for Chemical Engineering Medal is presented annually to the third year student in Chemical Engineering with the highest overall average during the third year of studies at Dalhousie.

#### **The Canadian Society for Civil Engineering Certificate**

In 1985, the Canadian Society for Civil Engineering established a Certificate of Achievement that is awarded annually to the student graduating in Civil Engineering with the highest aggregate in the last two years of study.

#### **The Canadian Society of Mechanical Engineering Medal**

The Canadian Society of Mechanical Engineering Medal is presented at Convocation each year to the student graduating in Mechanical Engineering with the highest overall average.

#### **Class of '85 Award**

The Class of '85 Award is presented annually at convocation to the student graduating in Biological and Environmental Engineering programs who has exhibited the most outstanding qualities of scholarship, leadership, and personality during his/her course of studies at Dalhousie.

#### **The Walter P. Copp Memorial Prize**

In 1979 an anonymous donor gave the University \$2,500 to establish an endowment for the purpose of funding this prize. It is awarded annually to the student for promotion from second year to third year in the Dalhousie Faculty of Engineering with the highest average in Engineering classes.

#### **The Dean Flynn Memorial Prize**

This prize consists of a medal which is awarded annually to the student graduating in Mining Engineering with the highest overall average in the program of studies at Dalhousie.

#### **IEEE Medal**

The Institution of Electrical and Electronics Engineers, Canadian Atlantic Section, provides a silver medal which is awarded at convocation each year to the student graduating in Electrical Engineering with the highest overall average in the program of studies at Dalhousie.

#### **Michael Lister Memorial Award**

To honour the memory of Michael Lister BEng'97, and his love of engineering, this award is available to a student graduating in Mineral Resource Engineering who has achieved good academic standing, combined with leadership qualities and a strong work ethic.

#### **The Charles F.H. Macdonald Memorial Prize**

The family of the late Charles F.H. Macdonald provided for a prize in his memory to be awarded each year to a student completing the Bachelor of Engineering program in Civil Engineering with a good academic average. The prize is awarded by the Scholarships & Awards Committee on the recommendation of the Chair of the Civil Engineering program. The award is \$300.

#### **The Ira P. MacNab Prize**

The late Dr. Ira P. MacNab, an alumnus of the University, provided funds for an annual award to be presented to the student graduating in Mechanical Engineering with the highest overall average in a program of studies at Dalhousie. The award is \$75.

#### **The Kenneth F. Marginson Award**

This prize is awarded annually to the student who achieves the highest standing in the first year of the Bachelor of Engineering program. Only students who are enrolled in University for the first time are eligible to receive this award. Presentation of the award is when the student enrolls in the second year of the Bachelor of Engineering program. This prize is funded from an endowment of \$2,500, established by an anonymous donor, in honour of Professor Kenneth F. Marginson, a former Head of the Department.

#### **The Mining Society of Nova Scotia Centennial Scholarship Medal**

The Mining Society of Nova Scotia Centennial Scholarship Medal will be awarded annually to a Mining or Materials Engineering student graduating at Dalhousie who demonstrates the best all-around merit in the course of studies at Dalhousie. Selection of the recipient is to be made at the discretion of the Department Head.

#### **The Society of Chemical Industry Merit Award**

The Society of Chemical Industry Merit Award is presented annually to the student graduating in Chemical Engineering with the highest overall average during the senior year of a program of studies at Dalhousie. The award is a gold key bearing the crest of the society, and a year's subscription to Chemical Engineering.

#### **The William Stairs Memorial Prize**

This prize consists of a medal which is presented annually to the student who shows outstanding ability in metallurgy, physical properties of metals or the use of metals in the arts of industry.

### ***The Dr. H.R. Theakston Memorial Award***

This non-monetary award is presented each year to the student who achieves the highest standing in Engineering Graphics. It was established in 1964 in remembrance of Dr. H.R. Theakston who for several decades was University Engineer and Head of the Engineering Department, taught Graphics throughout that period and enjoyed a long and prestigious career as a professional engineer. The award consists of a certificate suitable for framing.

### ***University Medal in Biological Engineering***

This medal is awarded annually to the graduate who has attained the highest academic standing in Biological Engineering.

### ***University Medal in Chemical Engineering***

This medal is awarded annually to the graduate who has attained the highest academic standing in Chemical Engineering.

### ***University Medal in Civil Engineering***

This medal is awarded annually to the graduate who has attained the highest academic standing in Civil Engineering.

### ***University Medal in Electrical and Computer Engineering***

This medal is awarded annually to the graduate who has attained the highest academic standing in Electrical and Computer Engineering.

### ***University Medal in Environmental Engineering***

This medal is awarded annually to the graduate who has attained the highest academic standing in Environmental Engineering.

### ***University Medal in Food Science***

This medal is awarded annually to the graduate who has attained the highest academic standing in Food Science.

### ***University Medal in Industrial Engineering***

This medal is awarded annually to the graduate who has attained the highest academic standing in Industrial Engineering.

### ***University Medal in Mechanical Engineering***

This medal is awarded annually to the graduate who has attained the highest academic standing in Mechanical Engineering.

### ***University Medal in Materials Engineering***

This medal is awarded annually to the graduate who has attained the highest academic standing Materials Engineering.

### ***University Medal in Mineral Resource Engineering***

This medal is awarded annually to the graduate who has attained the highest academic standing in Mineral Resource Engineering.

### ***The Bob Walter Award***

Given to the student who best combines fellowship, sportsmanship and scholarship, the Bob Walter Award is the highest honour which the Engineering Society can bestow upon its graduates. The award consists of an engraved gift and a certificate suitable for framing. Instituted in the 1940/41 academic year, the award honours the memory of an outstanding engineering student who was president of the Dalhousie Engineering Society.

## **H. Faculty of Health Professions**

### **1. University Medals**

In the College of Pharmacy, the School of Health and Human Performance, School of Health Sciences and School of Nursing, a University medal is awarded annually at the spring convocation to a graduating student who demonstrates outstanding academic performance. The medal is only awarded if the following criteria have been met:

- The candidate has successfully completed the equivalent of three full-time years in his/her respective baccalaureate program (90 credit hours) at Dalhousie.
- Has met the FHP cumulative GPA requirement or better on classes taken at Dalhousie towards the degree.
- Of those eligible, has the highest GPA.

All credits taken towards the degree at Dalhousie will be used in the calculations. Transfer credits taken prior to entry into the program are not counted towards either the 90 credit hours criterion, or towards the cumulative GPA requirement. Classes taken on Letters of Permission while registered in the program are

included in the 90 credit hours eligibility criterion and calculated as part of the cumulative GPA requirement.

Students graduating in the fall convocation are eligible for University Medal consideration in the following spring convocation. As the School of Social Work does not offer a three-year (90 credit hour) BSW degree, it is not eligible for the University Medal.

## **2. School of Health and Human Performance**

### ***Canadian Society for Exercise Physiology***

The Society provides an annual medal to the School to be awarded to an outstanding student in the Bachelor of Science in Kinesiology program. The recipient will be the graduating student who has achieved the highest academic standing in their undergraduate class in the scientific portion of the curriculum.

### ***The Dr. M.J. Ellis Award***

This award was established to give recognition to a graduating student who demonstrates exceptional interest and ability in research in one of the four undergraduate degree programs.

### ***Matthew Knox Award***

This award was inaugurated in 2005 to recognize and honour the accomplishments of the individual whose name this award bears. Matthew Knox, a fourth year Bachelor of Science (Kinesiology) student was one of three Dalhousie students in 2005 to win one of the three Rhodes Scholarships, awarded annually to Canada's Atlantic region for study at Oxford University. The Rhodes Scholarship, first established in 1902, is the oldest of the international study awards available to Canadian students. Of the 85 Dalhousie students to have won this award, since its inception, Matthew Knox was the first ever recipient from the Faculty of Health Professions.

The criteria for the Rhodes Scholarship, set down in the Will of the British philanthropist and colonial pioneer, are high academic achievement, integrity of character, a spirit of unselfishness, respect for others, potential for leadership and physical vigor. These basic characteristics are directed at fulfilling Cecil Rhodes' hopes that Rhodes Scholars would make an effective and positive contribution throughout the world. These criteria will be used as guidelines in the determination of appropriate prospective student recipients in the School of Health and Human Performance for the Matthew Knox Award on a perpetual basis.

### ***Leisure Research Congress Award***

The Fifth Canadian Congress on Leisure Research set up an endowment to provide an annual award to a student who has graduated from the Bachelor of Science (Recreation) program. The recipient will have attained a cumulative GPA of 3.00 or higher and will have demonstrated an aptitude for research related to recreation and leisure.

### ***PHE (Physical and Health Education) Canada Student Award***

This award recognizes undergraduate student leadership in the field of health, physical education, recreation or dance.

### ***The Dr. Hugh A. Noble Award***

This award is given to a graduating student from one of the four undergraduate degree programs in the School of Health and Human Performance. The awarding is based on academic accomplishments, qualities of citizenship as shown by involvement outside the University, leadership qualities as demonstrated in activities inside the University, and an estimate of the candidate's potential for contributing to the profession.

### ***Dr. John C. Pooley Sportsperson Award***

This award is presented to the student who has contributed significantly to the development of a sport.

### ***Dr. J. Singleton Leadership Award***

This award is given annually in recognition of a Dalhousie University student's involvement and commitment to Therapeutic Recreation professional organizations.

### ***Vincent Chew Memorial Award***

Vincent Chew graduated from Dalhousie University with a Bachelor of Commerce degree in 1997 and a Law degree in 2001. He was working as Communication & Marketing Manager with the International Council for Sport Science & Physical Education when he passed away in 2008 as a result of a road accident in Berlin, Germany. Prior to that, he was with the 15th Asian Games in

Qatar, and the Commonwealth Games in Melbourne, Australia. An avid sports and music fan, he enjoyed his varied interests while traveling extensively. Considering his passion for sport, sport management, and business, the Vincent Chew Memorial Award has been established by his parents at Dalhousie that will recognize academic excellence in the joint Recreational Management degree program (Bachelor of Management/Bachelor of Science - Recreation).

#### **University Medal in Health and Human Performance**

Please refer to H. Faculty of Health Professions, 1. University Medals on page 640 for details.

#### **The Women's Division of the Dalhousie Alumni Association H&HP Medals**

Three awards are available to students in the School of Health and Human Performance. For the students who achieve the highest standing in each of the Bachelor of Science in Recreation, the Bachelor of Science in Health Promotion and the Bachelor of Science in Kinesiology degree, the Women's Division sponsors a medal.

### **3. School of Health Sciences**

#### **3.a For Graduating Students**

##### **BHSc Faculty Award**

This award is given to the graduating student with the highest cumulative GPA following four consecutive years in the BHSc program.

##### **DRAXIMAGE Award**

This award is given to a full-time student graduating in Nuclear Medicine Technology who has achieved the highest cumulative GPA for their discipline-specific classes.

##### **Tim Mackenzie Memorial Award**

This award, in memory of Tim Mackenzie, a 1977 graduate of the School of Radiological Technology, is awarded to a graduating Radiological Technology student and is based on high standards of clinical practice and the respect of patients' rights and needs as individuals.

##### **Dr. Robert H. Martin Prize**

In memory of Dr. Robert H. Martin, this prize is awarded to a member of the graduating class in Nuclear Medicine Technology with the highest combined evaluation in clinical and academic performance over the four years of the degree.

##### **Radiologist's Awards**

These awards are sponsored by the QEII Health Sciences Radiologist Group and are awarded to a graduating student in each of the Nuclear Medicine Technology, Diagnostic Medical Ultrasound and Radiological Technology programs with highest cumulative GPA.

##### **Medigas Award for Clinical Achievement**

This award is sponsored by Medigas and is presented to a full-time graduating student of Respiratory Therapy who demonstrated high standards of clinical practice.

##### **University Medal in Health Sciences**

Please refer to H. Faculty of Health Professions, 1. University Medals on page 640 for details.

#### **3.b For Other Students**

##### **Dorothy Archibald Award**

This award is sponsored by Dorothy Archibald, a lifetime member with CAMRT, who is dedicated in her retirement to advancement of the Medical Radiation Technology professions. Awarded to two full-time students (one in each of Nuclear Medicine Technology and Radiological Technology) who have successfully completed Clinical Practicum II.

##### **Margaret Barrett-Banks Memorial Award**

This cash award is sponsored by the Margaret Barrett-Banks memorial fund in memory of Margaret Barrett-Banks, a dedicated health professional and educator. This is awarded to a student entering the fourth year of the BHSc degree program and is based on GPA, demonstration of financial need, demonstration of contribution to the community, university and/or health system through leadership and voluntary activities.

##### **Ian Collins Memorial Pediatric Award**

This award is sponsored by the Canadian Cystic Fibrosis Foundation and the IWK Health Centre Respiratory staff. The award is presented to a student completing Year 3 in Respiratory Therapy and is chosen based on demonstration of outstanding neonatal and pediatric care, outstanding academic, laboratory and clinical achievement and contribution to the care of cystic fibrosis patients and their families.

##### **Elsevier Canada Book Awards**

These awards are given to two students, one completing the first year and the other completing the second year of Respiratory Therapy. These awards are based on cumulative GPA and commitment to clinical excellence during the relevant year of study.

##### **Cynthia Johnson Evans Award**

This award is sponsored by the Nova Scotia Society of Diagnostic Medical Sonographers, in memory of Cynthia Johnson Evans, former educator and sonographer. It is awarded to the student who has consistently demonstrated high standards of clinical practice upon completion of year three in Diagnostic Medical Ultrasound.

##### **Heather Mattice Memorial Award**

The friends and family of Heather Mattice, a former student of Nuclear Medicine Technology, established this award in her memory. It is given to a student entering year four in Nuclear Medicine Technology and is based on financial need, academic standing, community and campus involvement and recommendation of the Nuclear Medicine Technology faculty.

##### **Nova Scotia College of Medical Laboratory Technologists (NSCMLT) Awards**

These three awards, sponsored by NSCMLT, are given to students, one from each of the classes entering second, third, and fourth years of the BHSc in Diagnostic Cytology, and who have consistently demonstrated clinical and academic excellence and maintained a minimum GPA of 3.30. Students who have completed third year must also demonstrate diagnostic excellence and clinical proficiency as well as excellence in professional practice and respect for the patient.

##### **Trudell Medical Marketing Limited Award**

This award is given to a student completing the third year in Respiratory Therapy and is based on GPA, commitment to clinical excellence during the three years of study and evidence of extracurricular involvement.

### **4. School of Nursing (Convocation Awards)**

##### **Undergraduate Alumni Leadership Award**

The recipient of this monetary award is a student graduating from the Basic Degree Program or the Post RN Degree Program who has demonstrated significant leadership during his/her years of study.

##### **Matthew Ayer Award for Community Nursing**

The Matthew Ayer award was established in 2008 by the family and friends of Matthew Ayer in his memory. Matthew was a student in the BScN program at the time of his death in October 2007. The recipient of this monetary award is a student in the Bachelor of Science (Nursing) Program at the School of Nursing, Dalhousie University, who has excelled in working with populations living on the margins of society due to social injustices.

##### **Capital Health Award for Professional Practice in Nursing (Basic Stream & Advanced Standing Stream - Basic Degree Program)**

Selected by his/her peers, this award recognizes a student graduating from the Basic Degree Program (May Convocation) and the Advanced Standing Stream (October Convocation) who has demonstrated the qualities of professional practice. The recipient of this monetary award epitomizes the Standards of Nursing Practice of accountability and responsibility, continuing competence and application of knowledge and advocacy, and the CNA Code of Ethics for Registered Nurses.

##### **Melda Dashevsky Memorial Award**

Melda Dashevsky (nee Crocker) graduated from Victoria General Hospital School of Nursing in 1962 and worked in many areas of nursing across Canada. She and several of her family members experienced struggles with cancer and benefited from the nursing care they received. This award is provided by Mrs. Dashevsky's husband, in her memory, and was originally presented to a student graduating from the Victoria General Hospital School of Nursing. The recipient of this

monetary award is a student graduating from the Basic Degree Program who has demonstrated interest and proficiency in Oncology Nursing.

#### ***Mary-Lou Ellerton Prize in Clinical Nursing***

Professor Mary Lou Ellerton was the Associate Director, Undergraduate Program Planning and Development at the School of Nursing, Dalhousie University. She was a graduate of the Universities of Ottawa and McGill and joined the faculty of the Dalhousie School of Nursing in 1979. She devoted her professional life to fostering excellence in clinical practice and made many significant contributions to both graduate and undergraduate programs in the School of Nursing as well as to the University and the broader nursing profession. Professor Ellerton was a woman of courage, integrity, wisdom and wit. She was posthumously awarded the IWK Health Centre's highest honour, the Award of Distinction. The recipient of this award is a graduating student who has consistently received excellent evaluations in the clinical nursing components of the program.

#### ***Elsevier Canada Award***

The recipient of this monetary award is a student graduating from the Basic Degree Program or the Post RN Degree Program who has shown progressive academic achievement.

#### ***Heather Fraser-Davey Book Award***

Heather Fraser-Davey was a professor with the Dalhousie School of Nursing for more than 24 years. She received her PhD in Adult Education from Dalhousie. She taught Pediatric and Surgical nursing as well as Maternal-Child nursing. Heather was involved in establishing a link with the Queen Margaret College, Department of Nursing, Edinburgh, Scotland. She also worked with the Tanzania project which linked the School of Nursing, Dalhousie and the School of Nursing, University of Dar es Salaam. She is Past President and a Life Member of the Atlantic Region of Canadian Association of University Schools of Nursing. Heather also held an Honorary Research Associate position in the School of Education, Dalhousie University. The recipient of this monetary award is a graduating student who has demonstrated interest in international nursing and nurse midwifery.

#### ***Highest Academic Achievement Certificate (Basic Degree Program & Post RN Degree Program)***

The recipient of this award is a student graduating from the Basic Degree Program & Post RN Degree Program with the highest cumulative GPA.

#### ***Highest Academic Achievement Prize (Undergraduate Degree Program)***

The recipient of this monetary award is a student graduating from the Basic Degree Program or the Post RN Degree Program with the highest cumulative GPA.

#### ***IWK Medical, Dental and Scientific Staff Award for Excellence in Children's Nursing***

The recipient of this monetary award is a student graduating from the Basic Degree Program who has demonstrated excellence in the area of Children's Nursing.

#### ***IWK Medical, Dental and Scientific Staff Award for Excellence in Women's and Newborn Nursing***

The recipient of this monetary award is a student graduating from the Basic Degree Program who has demonstrated excellence in the area of Women's and Newborn Nursing.

#### ***IWK Health Centre Prize for Excellence in the Care of Children and Families***

The recipient of this monetary award is a student who has demonstrated critical thinking, advocacy and autonomy in nursing children and their families in hospitals, homes and communities.

#### ***Elizabeth MacKinnon Lambie Award for Nutrition***

Elizabeth Lambie was a professor at Dalhousie School of Nursing for more than 23 years. She taught classes on human nutrition, the role of nutrition in health promotion and community development, and the economic, social and physical determinants of eating practices. She is a Life Member of the Atlantic Region of the Canadian Association of University Schools of Nursing; a Charter member, Past President, Nova Scotia Dietetics Association; Past President, Fellow, Canadian Dietetics Association; Past President, Public Health Association of Nova Scotia, and Board Member, International Council on Women's Health Issues. The recipient of this monetary award is a graduating student who has demonstrated the ability to apply community nutrition knowledge to the nursing profession.

#### ***Palliative Care Nursing Award***

For over one hundred years the Victoria General Hospital School of Nursing in Halifax educated quality, caring and compassionate nurses. In 1995 the last class graduated. The VGH School of Nursing Alumni continues to keep alive memories of this diploma school of nursing that was one of the oldest in Canada. The recipient of this monetary award is a student graduating from the Basic Degree program who has demonstrated exceptional nursing practice, professionalism and compassion while caring for patients in the area of Palliative Care Nursing.

#### ***Registered Nurses Professional Development Centre Award (RN-PDC)***

The recipient of this monetary award is a student graduating from the BScN Degree Program who has participated in the acute care nursing elective. The recipient has demonstrated exceptional nursing practice in the care of the individual and family in an intermediate acute care setting and is identified as having potential in adult acute care nursing practice.

#### ***Sigma Theta Tau (Rho Rho Chapter) Award for Medical-Surgical Nursing***

The Medical-Surgical Nursing Practice Award is granted to a student graduating from the Basic Degree Program who has demonstrated excellence in academic and clinical practice when caring for adults. This award is supported by Rho Rho Chapter of Sigma Theta Tau International. The recipient of this monetary award is chosen by professors and clinical instructors teaching in the medical-surgical classes in the BScN Degree Program.

#### ***Rosie Steele Prize In Nursing***

Rosie Steele was a nurse at the Grace Maternity Hospital for over 30 years. In 1973, she established a Post-Graduate Maternity Nursing Class for the continuing education of over 200 Maritime nurses. Through her work in nursing Mrs. Steele contributed greatly to positive changes in nursing education and Perinatal Care for families in Nova Scotia. The recipient of this monetary award is a student graduating from the Post RN Degree Program who has demonstrated academic achievement and leadership potential in Perinatal Nursing.

#### ***Phyllis Noerager Stern Award***

Phyllis Noerager Stern was a Director and Professor of the Dalhousie School of Nursing for over eight years. She taught classes in trans-cultural nursing, maternity nursing and research methods. Dr. Stern received a PhD in Family Health from the University of California and an honorary PhD from Dalhousie University. She went on to be Chair of the Department of Parent-Child Nursing at Indiana University, editor of Women's Health International and president of the International Council on Women's Health Issues. The recipient of this award is a graduating student who has (in the opinion of his/her peers) made outstanding contributions to the student body throughout the year.

#### ***University Medal***

This medal is presented to a graduating student with a cumulative GPA of at least 3.80 who meets the criteria set by the Faculty of Health Professions.

#### ***Women's Division of the Dalhousie Alumni Association Medal***

The recipient of this medal is a graduating student with the highest cumulative GPA in the BScN Basic Degree Program.

### **5. College of Pharmacy**

#### ***Becton Dickinson Award of Excellence in Endocrine Studies***

This \$500 award will be presented to the student who has the highest mark in Pharmacy 3060 (Endocrine PBL block) at the College of Pharmacy.

#### ***GR Buckley Community Pharmacy Award***

This award is presented annually to a student who has completed outstanding work in the fourth year of the community practical experience program. The award is selected from nominations received from preceptors.

#### ***The Dean George A. Burbidge Memorial Award***

This award of \$1,000 is given by the Nova Scotia College of Pharmacists to a student completing third year, from Nova Scotia, for outstanding qualities of character and pharmaceutical ability at the College of Pharmacy.

#### ***The R. Frank Chandler Award***

An endowment fund was established by Ortho Pharmaceutical (Canada) Ltd. in 1989 to support this Award. It will be presented to a student entering the final year of study at the College of Pharmacy. The candidate must have high qualities of character and spirit, must have well developed interpersonal skills, must show an

aptitude and proficiency for the profession, must show promise of making future contributions to the profession of pharmacy.

#### ***The F.R. Clayden Prize***

This prize of a book is presented in memory of Mr. F.R. Clayden (Class of 1912) to a deserving student completing the first year classes of the pharmacy program.

#### ***The Dean J. Esmonde Cooke Award***

This award of \$500 is awarded annually to a student who has successfully completed one or more years of the class leading to a degree in pharmacy and who is enrolled in pharmacy at the University for the coming year. Candidates must have attained a good academic standing and show promise of making future contributions to the profession of pharmacy. The student must be a graduate of a high school in Nova Scotia and should not be the recipient of other concurrent awards. The Selection Committee may also consider the financial need. This award is sponsored by the Pharmacy Association of Nova Scotia.

#### ***College of Pharmacists Dr. J. G. Duff Award***

One award of \$1,000 will be awarded annually to a Nova Scotia student who demonstrates a commitment to professionalism integrity and compassion.

#### ***Dale Daley Pharmacy Award for Excellence***

In 1990, Shoppers Drug Mart established an endowment to recognize the many contributions of Dale Daley to the profession of pharmacy. The award is presented annually to a third year pharmacy student who has demonstrated a good academic standing and whose contributions to undergraduate life at the university level.

#### ***Robert C. Dickison Memorial Award***

This award is presented to a student from New Brunswick on the basis of academic achievement, financial need and participation in student activities at the College of Pharmacy. The award is made available through a bequest of the late Mr. Charles D. Dickison.

#### ***The Sister Frances dePaul Award***

This award, a reference book or a subscription to a professional journal, is offered annually by the Nova Scotia Branch of the Canadian Society of Hospital Pharmacists and is presented to a graduating student entering a hospital pharmacy residency program, who is a member of CSHP, and excels in the PBL curriculum.

#### ***J.G. Duff Pharmacy Award***

An award of \$500 and a medal, was established by Dr. Duff's former students and associates in recognition of his contribution and devotion to pharmaceutical education in the Maritimes. The award and medal will be presented to a student entering the senior year for outstanding leadership and satisfactory scholastic attainment. A Senior Stick, bearing the names of the recipients, will be kept in trust by the Dalhousie Student Pharmacy Society. The recipient of the award will be selected by the student body.

#### ***The Charles E. Frosst Award***

This award of \$1,000 and a medal are presented by Merck Frosst Canada Inc. to the student who excels in the third year class.

#### ***Geri Kearnes Spirit of Pharmacy Award***

This award of \$500 is presented by the Nova Scotia College of Pharmacy to a fourth year student who has had a positive influence on the activities of the College of Pharmacy; who is regarded by others as hardworking and unpretentious; and who has a genuine and unfailing commitment to the practice of pharmacy.

#### ***The William Killorn Award***

Shoppers Drug Mart Associates and the pharmaceutical industry have established an endowment to pay tribute to Bill Killorn in honour of his 46 years of service to pharmacy in Atlantic Canada. The award is presented annually to a pharmacy student who, in the view of the College's Awards Committee, demonstrates strong leadership skills and excels in academic and extracurricular activities.

#### ***The Honourable John J. Kinley Pharmacy Award***

In 1972, Mrs. L. Kinley established an endowment in memory of her husband, the Honourable John J. Kinley, a pharmacist, and former Canadian Senator. In order to be considered for the award, candidates must have satisfactory academic standing and show promise of contributing to the profession. The financial need of the applicant may also be considered by the Selection Committee. The income from an established fund will be used to provide a monetary award as well as a book.

#### ***Scott Knowles Memorial Pharmacy Award***

This award was established by family, friends, and colleagues in memory of Scott Knowles, a graduate of the Class of 2007. The award is presented to a student from New Brunswick who exhibits a high degree of professionalism and possesses leadership qualities. Preference will be given to a student returning to New Brunswick to practice in an independent, rural, community-based pharmacy.

#### ***Dr. Jessie I. MacKnight Miss Mona W. Fleming Award in Hospital Pharmacy***

This award is presented annually to a student from New Brunswick and to a student from Nova Scotia who have completed outstanding work in the hospital portion of the practical experience program and in the fourth year multi-skill laboratory class. It is desirable that the recipients demonstrate an interest in hospital pharmacy practice.

#### ***The Helen Corston Marshall Award in Pharmacy***

This endowment was established in memory of Helen Corston Marshall, a student of the Maritime College of Pharmacy, by her family. This award is to be given annually to a student (or students) who has successfully completed one or more years of the class leading to a degree in pharmacy and who is enrolled in pharmacy at the University for the ensuing year. Candidates must have attained a satisfactory academic standing and must show promise of making future contributions to the profession of pharmacy. Financial need may be considered.

#### ***McKesson Medal***

This medal is awarded annually to the student on graduation who has obtained the second highest aggregate mark during his/her four years at the College of Pharmacy.

#### ***McNeill, Rhodes, Karayacoubian Award***

This award of \$500 will be given to a pharmacy student at the completion of his/her third or fourth year of the program. The recipient must have attained satisfactory academic standing and must be an active member of the class participating in college activities such as For the Health Of It, the class skit and be a member of an intramural team.

#### ***Merck Frosst Evidence-Based Clinical Practice Award***

This \$1,000 award is presented to a graduating student who has demonstrated outstanding interest, aptitude and leadership in the development and application of evidence-based and critical appraisal skills.

#### ***Merck Sharp and Dohme Pharmacy Award***

This award, of \$1,000 and the books, The Merck Index and The Merck Manual, is presented to the student entering third year who excels in pharmaceutical sciences (medicinal chemistry, pharmacokinetics).

#### ***Roger Montigny Memorial Award***

This award was established by family, friends, and colleagues in memory of L. Roger Montigny, a graduate of the Class of 1974. This award of \$1,000 is presented to a third year student from Prince Edward Island who demonstrates a passion for pharmacy and an interest in practicing community pharmacy. The recipient must demonstrate satisfactory academic standing and financial need.

#### ***Donald Moore Memorial Award in Pharmacy***

The Donald Moore Memorial Award was established with donations made by family, friends and a generous on-going grant from Shopper's Drug Mart Associates in memory of the late Donald Moore, a well known leader in hospital and community pharmacy in New Brunswick. This \$1,500 award is presented to students entering third year, who have demonstrated well-rounded skills by making a significant and continuing contribution to the student body at the College of Pharmacy and/or Dalhousie University.

#### ***Natural-Medicines Comprehensive Database Recognition Award***

The recipient of this award will be a graduating student who demonstrates an interest in natural products. The recipient will receive the new edition of the Natural Medicines Comprehensive Database book, a one-year subscription to Natural medicines Comprehensive Database website, a series of booklets entitled Natural Medicines in the Clinical Management of Disease, and an Award Certificate.

#### ***New Brunswick Pharmaceutical Society Centennial Medal***

In conjunction with its 100th anniversary of incorporation, the Society has established this commemorative medal to be presented annually to the New Brunswick student who has attained the highest aggregate mark during his/her four years at the College of Pharmacy.

***The Nova Scotia Association of Certified Dispensers Prize***

This prize, of a book, will be awarded annually to the top student in the first year multi-skills laboratory. The prize was established in 1984 with the gift of funds to provide the initial award and to set up an endowment to provide subsequent awards.

***The Nova Scotia College of Pharmacists Centennial Award***

In conjunction with its 100th anniversary of incorporation, the Society has established an award. Candidates will have a satisfactory academic standing and show aptitude for the profession. The financial need of the student may be considered in selecting recipients for the award.

***Nova Scotia College of Pharmacists Memorial Award***

The Society has established an award in memory of past members and friends of the Society. The award is available to a qualifying student who possesses good academic standing and aptitude for the profession. The financial need of the student may be considered in selecting the recipient for the award of \$1,000.

***Teva Canada Pharmacy Award***

This \$500 award is given to the student who excels in the second year Pharmacokinetics class.

***CPhA Centennial Award (External)***

This award, presented jointly by the Canadian Pharmacists Association (CPhA), and enables a third year student to join pharmacists and fellow students at the Annual General Meeting of the Canadian Pharmacists Association. The award program exposes student winners to several facets of the profession including the pharmaceutical industry, innovative pharmacy practice sites, hospitals and government agencies wherever possible. Selection is based on academic achievement and outstanding contributions to undergraduate activities.

***Eric & Ryan Post-Pharmacy Leadership Award***

This award is presented to a student who is completing their third year and who has demonstrated financial need and has also made significant contributions to pharmacy life at the College.

***The B. Trevoys Pugsley Memorial Pharmacy Award***

This award was established by a bequest from the Estate of B. Trevoys Pugsley for an undergraduate student who has completed one or more years of the pharmacy class. The criteria for the selection of the recipient are based on academic standing, aptitude for pharmacy and qualities of character. Financial need may also be considered.

***The Mrs. Vera B. Pugsley Award***

This award was established by a bequest from the Vera B. Pugsley estate. This award will be presented annually to a student who successfully completed one or more years of the class leading to a degree in pharmacy and who is enrolled in pharmacy at the University for the ensuing year. Candidates must have attained a satisfactory academic standing and must show promise of making future contributions to the profession of pharmacy.

***John J. Ryan Pharmacy Administration Awards***

These two awards of \$500 each are presented annually to the students who excel in PHAR 4060 (Advanced Patient Health Management) and PHAR 1060 (Pharmacy Law and Health Care Ethics). Financial need will also be considered. This award was made possible through income of the John J. Ryan Fund.

***John J. Ryan Award of Excellence in Pharmacy Administration***

This award of \$1,000 is presented to a graduating student who has demonstrated outstanding aptitude in the development and application of medication management and has achieved the top overall mark in all the social/administrative pharmaceutical sciences content of the curriculum.

***Sandoz Pharmacy Administration Award***

This award is presented to the student who excels in medication use management, PHAR 2060.

***The Leigh Semple Memorial Award***

An endowment has been established to provide an annual award to a third year pharmacy student from Prince Edward Island who has demonstrated strong academic ability and involvement in student activities.

***Dr. Samar B. Singh Prize in Anatomy***

An endowment fund has been established for the purpose of providing a prize to the highest standing student in first year anatomy among Nursing and Pharmacy enrollees. The prize, consisting of a book or books to the approximate value of

\$100, is a memorial to Dr. Singh, a long-time member of the Department of Anatomy. The awardee will be selected by the Head of the Department.

***The Whelan Family Award in Pharmacy***

This award of \$750 is presented to a student from New Brunswick who shows an aptitude for patient-centred care as demonstrated by excelling in Pharmacy Skills Lab.

***University Medal in Pharmacy***

Please refer to G. Faculty of Health Professions, 1. University Medals on page 630 for details.

**6. School of Social Work*****Dalhousie University Women Alumnae Medal***

This medal is presented annually to the BSW graduating student with the highest cumulative GPA in the baccalaureate program in the School of Social Work.

***Raoul Leger Memorial Humanitarian Award***

This award was established to honour the memory of Raoul Leger, who received a Master's degree in Social Work from Dalhousie University in 1977. His work at home and abroad exemplified his commitment to community development, peace and social justice. The award is presented to a graduating BSW or MSW student, who is nominated on the basis of achievement with a continued involvement in critical social issues.

***The School of Social Work BSW Alumni Award***

This alumni award has been established to support financial awards to be given to students in the Bachelor of Social work degree program who demonstrate the highest values of humanity, community, and service in the study of Social Work as reflected in contributions to the learning environment of the School. A student must be nominated for this award.

***J. Bernard MacNeil Memorial Award***

For a BSW student in their second year of studies who achieves high academic standing and who best meets the criteria of financial need and shows promise of making future contributions to the profession of social work in the areas of criminology or corrections.

**I. Faculty of Management*****Andrew Peacock Memorial Award***

An annual award named in honour of Dr. Andrew Peacock, Professor in the Rowe School of Business. Students who are in good standing and are enrolled in the Bachelor of Management or Bachelor of Commerce degrees in the second or third year of study are eligible. Students must have demonstrated interest and understanding of the issues related to person with disabilities, have demonstrated volunteerism and experience or interest in working in the not-for-profit sector. Application required in the fall term. Apply to the department.

**1. Commerce*****The Wilfred Berman Memorial Prize***

The Wilfred Berman Memorial Prize is payable from the income of a fund provided by former students of the late Professor Wilfred Berman to the student obtaining the highest mark in the class in first year Accounting.

***Commerce Alumni Association Awards***

The Commerce Alumni Association sponsors seven annual non-monetary awards to recognize academic achievement. There is one award for each of Accounting, Finance, Entrepreneurship, Marketing Management, Marketing Logistics, International Business and Managing People and Organizations.

***The Stewart Lockie Gibson Memorial Prize***

The Rowe School of Business offers a prize to the graduating student in the general Bachelor of Commerce program who has achieved the highest standing.

***The D.C. Mackay Award in Money Management***

An endowment has been established by Dr. Douglas C. Mackay, a successful investment banker, valued alumnus and active member of the Rowe School of Business Advisory Committee. A major prize is available to a student whose program concentration is Finance, whose career preparation is Money Management, who achieves excellent performance in COMM 3206 and who achieves satisfactory performance in research in the Money Management area.

### ***Christopher McKee Award of Merit***

This award is established in memory of Christopher McKee, a Commerce graduate of 1981, through the generosity of his family. The recipient will have at least a “B” average, and will have made significant contribution to the university as an organizer, or participant in university or community activities. Application to department is required.

### ***John R.E. Parker Prize in Accounting***

Established by Professor's John Parker and Joan Parker, who are passionate about the accounting profession, this prize is awarded to a Commerce student for excellence in attaining the best overall mark in Intermediate Financial Accounting I and Cost Management.

### ***University Medal in Commerce***

The Rowe School of Business offers a medal to the top graduate in the Bachelor of Commerce program. The awardee will be one who has fulfilled the high scholastic standard for this award.

## **2. Management**

### ***University Medal in Management***

The Faculty of Management offers a medal to the top graduate in the Bachelor of Management program. The awardee will be the one who has fulfilled the high scholastic standard for this award.

### ***Vincent Chew Memorial Award***

Vincent Chew graduated from Dalhousie University with a Bachelor of Commerce degree in 1997 and a Law degree in 2001. He was working as Communication & Marketing Manager with the International Council for Sport Science & Physical Education when he passed away in 2008 as a result of a road accident in Berlin, Germany. Prior to that, he was with the 15th Asian Games in Qatar, and the Commonwealth Games in Melbourne, Australia. An avid sports and music fan, he enjoyed his varied interests while traveling extensively. Considering his passion for sport, sport management, and business, the Vincent Chew Memorial Award has been established by his parents at Dalhousie that will recognize academic excellence in the joint Recreational Management degree program (Bachelor of Management/Bachelor of Science - Recreation).

## **J. Faculty of Science**

### ***Hertzman Prize***

In 1997 an endowment was established to fund an annual prize in memory of Dr. Victor Hertzman. The Faculty of Science awards the Hertzman Prize to the first year Bachelor of Science student who has achieved the highest GPA on the Dean's List.

## **1. Biochemistry & Molecular Biology**

### ***Peter Dolphin Memorial Prize in Biochemistry***

In memory of Professor Peter Dolphin, this prize is awarded annually to the fourth year science student who is judged to have the best overall performance in the Honours Research Project (Biochemistry 4604/4605).

### ***Kilmer MacMillan Memorial Book Prize***

This prize is awarded annually to the student who attains the highest aggregate mark for the three half-classes, BIOC 3700, 3300 and 3400.

### ***Douglas Russell Memorial Book Prize***

In memory of Dr. Douglas Russell, the Department of Biochemistry & Molecular Biology has established a prize to be awarded to the student with the highest standing in Biochemistry 2300, a class which owes its existence in large part to his efforts.

### ***The Society of Chemical Industry, Canadian Section, Merit Award***

This award (an engraved plaque) may be made to the Honours graduate in Biochemistry with the highest standing in the final year. A minimum average of 75% is required.

### ***University Medal in Biochemistry and Molecular Biology***

The Department of Biochemistry and Molecular Biology offers a medal to the top First Class Honours graduate in the Biochemistry program. The awardee will be the one who has attained the high scholastic standard of the Department.

## **2. Biology**

### ***The Aldous Prize***

On the occasion of the retirement of Dr. John G. Aldous, friends, colleagues and students established an endowment to provide for an annual prize to be awarded for the best achievement in Biology 4404 and 4407 combined. (This entry appears here for the information of Biology students. The Fund is administered by the Department of Pharmacology in the Faculty of Medicine.)

### ***B'nai B'rith Prize***

Two prizes are available annually to students for the highest standing in Biology 1010 and Biology 1011, when offered.

### ***Developmental Biology Prize***

This prize of \$500 is awarded annually to the top student, based on percentage grade mark, in Developmental Biology (BIOL 3050).

### ***David Durward Memorial Prize***

This prize is to be awarded to the best student in the Physiology of Marine Animals (MARI 3074 and MARI 3076).

### ***Alex Graham Memorial Prize***

This award was established in memory of Alex Graham, a Marine Biology graduate, who died tragically in a rafting accident in 2003. It is awarded annually to a Marine Biology major/undergraduate who has shown outstanding participation, dedication, and contribution to the Marine Biology program and to the Dalhousie Association of Marine Biology Students (DAMS) society; and has satisfactory academic performance.

### ***Gary Hicks Memorial Prize***

This award was established to honour the late Dr. Gary Hicks, an accomplished botanist and excellent teacher. It is awarded annually to an Honours student in the Plant Sciences.

### ***Shao Hua & Wen Hsiang Yoh Prizes***

Two prizes in memory of Shao Hua and Wen Hsiang Yoh, renowned Chinese educators, are awarded annually to two second year students who placed first and second in the core Biology classes (Biology 2020, 2030, 2040 and one of 2060, 2003, or 2004).

### ***The Dr. Ming Fang Li Memorial Prize in Marine Biology***

An endowment has been established to fund an annual prize to a third year student in the Co-operative Education program in Marine Biology. The recipient will be the one who is deemed to be the best, assessed on academic standing and work term performance.

### ***The Dr. J.G. Ogden Memorial Prize***

This prize will be awarded annually to a top fourth year honour student whose research falls within the realm of freshwater ecology, with preference given to those who study freshwater plant ecology. The recipient will be determined during the Cameron conference poster and oral presentations. In the event that there is more than one student whose research project meets these criterion, overall GPA will be the deciding factor.

### ***Cecelia Rajaratnam Memorial Prize in Plant Cell Biology***

The purpose of this prize is to recognize and reward a student who demonstrates a passion for the subject of Plant Cell Biology (Biology 4220) and excels academically in the class.

### ***University Medal in Biology***

The Department of Biology offers a medal to the top First Class Honours graduate in the Biology program in recognition of superior achievement.

### ***University Medal in Marine Biology***

The Department established this medal in 1983-84 to be awarded, where appropriate, to the student who stands highest among the First Class Honours graduates in the Marine Biology program.

## **3. Chemistry**

### ***The John Hamilton Barrett Prize***

This is the gift of his widow, Mrs. Marjorie Barrett. It is offered annually at the end of the fourth year of the class to a student who has shown exceptional ability in chemistry or other science. Application not required.

***The Canadian Society for Chemistry Silver Medal***

The CSC Silver Medal is provided to each university with a chemistry department and is awarded to the student with the highest standing in chemistry and allied subjects in the penultimate year. The successful student receives a medal and an inscribed certificate. Application not required.

***The John Carstairs-Arnell Prize***

This endowment was established to provide an annual prize to the student who has submitted and defended the best Honours Research Project in Chemistry. Dr. Arnell received his BSc (High Honours) from Dalhousie in 1939 and held many senior positions with the Canadian Armed Forces and the Department of National Defence. Application not required.

***Chemistry Achievement Award***

This award is available to undergraduate students in the chemistry program and is awarded on the basis of academic standing, demonstrated proficiency in chemistry, and other criteria such as employment, community service and extracurricular activities. Application not required.

***Walter J. Chute Prize in Chemistry***

This endowment was established to provide an annual prize to a chemistry student, with an outstanding record in organic chemistry, entering his or her final year in the Honours Chemistry program. Application not required.

***The CRC Freshman Achievement Award***

Awarded on the basis of outstanding academic achievement in freshman chemistry, the CRC Press Freshman Achievement Award is given at more than 2,000 schools. Winning students receive a complimentary copy of the CRC Handbook of Chemistry and Physics and a commemorative scroll to be mounted on the inside front cover. Application not required.

***The Hugh Graeme Fraser Memorial Prize in Advanced Chemistry***

This award was founded by members of the Class of 1931 and is awarded annually to a student at the end of his/her third year, who has, in the opinion of the Department, shown such aptitude for chemistry as to merit the award. Application not required.

***Kenneth and Dorothy Hayes Memorial Prize***

This endowment provides an annual prize to the student who has demonstrated interest in physical chemistry. The prize is awarded at the end of the penultimate year in the honours chemistry program to that student who has achieved satisfactory academic standing in third or fourth year level classes in physical chemistry. Application not required.

***Hypercube Scholar Award***

Awarded to a graduating BSc student going on to graduate school, where molecular modeling might be part of his/her future. Winning students receive a free copy of HyperChem software plus a small commemorative plaque. Application not required.

***Osvald Knop Prize in Chemistry***

This prize is awarded to the top student (or students, in the event of a tie) for the best achievement in both class and laboratory work in the 2000-level inorganic chemistry class.

***The Society of Chemical Industry, Canadian Section, Merit Award***

This award (an engraved gold key and subscription to Chemistry and Industry) may be made to the Honours graduate in chemistry with the highest standing in the final year. A minimum average of 75% is required. Application not required.

***The Spirit of Chemistry Prize***

The undergraduate Student Society Spirit of Chemistry Prize is meant to benefit students who are majoring in chemistry, and who help promote the subject through their enthusiastic participation in their studies and chemistry related activities. To be eligible to receive this prize, students must be majoring in chemistry, have a minimum of 2.30 GPA and must be nominated by a professor or instructor. Application not required.

***Undergraduate Award in Analytical Chemistry***

The Division of Analytical Chemistry of the American Chemical Society offers a number of gift subscriptions to Analytical Chemistry. These awards are intended to recognize students who have shown an aptitude for a career in analytical chemistry. Application not required.

***University Medal in Chemistry***

The Department of Chemistry offers a medal to the top First Class Honours graduate in recognition of superior achievement in chemistry.

**4. Earth Sciences*****The David Barlow Memorial Award***

The family, friends and classmates of David Barlow established in 1984 an endowment fund to provide an annual prize in his memory. The Dawson Geology Club in consultation with the Departmental Chairman will select a student in second year Earth Sciences who has demonstrated both a good academic record and leadership qualities.

***Canadian Society of Petroleum Geologists Award***

The Society sponsors an annual award consisting of a certificate and a one-year student membership to an undergraduate student who has demonstrated outstanding competence in petroleum geology or closely related fields.

***Canadian Society of Petroleum Geologists Student Industry Field Trip***

The society sponsors a field trip to a third-year Earth Sciences student who has an interest in petroleum geology, sedimentology and stratigraphy. The award consists of travel expenses and most field expenses for a trip to the Sedimentary Basin and Rocky Mountains of Western Canada.

***G.V. Douglas Memorial Prize in Earth Sciences***

In 1958-59, friends and former students of the late Professor G.V. Douglas, established a memorial fund from which the interest would provide a prize to be awarded to an outstanding student in first year Earth Sciences.

***Geological Association of Canada Student Prize***

Based on overall academic standing this prize is awarded annually to a student entering fourth year. The prize will consist of a one-year free membership in the GAC and a GAC "Special Paper" volume to be chosen by the recipient.

***Michael J. Keen Memorial Award***

This award was established to encourage greater participation of women in science. It will be awarded to a female student entering the second year earth science program who shows an interest in and commitment to the pursuit of a career in science and whose performance is of honours calibre.

***MacEachern-Ponsford Memorial Award***

Family, friends and classmates of Ian Joseph MacEachern and Mark Anthony Peter Ponsford have established a memorial fund. The purpose of the endowment is to provide an annual award to a student who has completed the second year of a program majoring in Earth Sciences, whose academic performance is of an honours calibre and who has been an active participant in student activities. The award is to be made on the recommendation of the Chairman of the Earth Sciences Department after consultation with the Dawson Geology Club and departmental staff.

***Mineralogical Association of Canada Student Prize***

This prize is open to an undergraduate student who has completed at least second year and has demonstrated excellence in one of mineralogy, crystallography, geochemistry, petrology and mineral deposits. The recipient will receive his/her choice of one of the MAC special publications.

***The Mining Society Centennial Scholarship Medal***

The Mining Society of Nova Scotia sponsors annual medals to students who have distinguished themselves during university studies in the mineral, metallurgical or petroleum fields. The Department awards the medal allocated to Dalhousie to the best all round graduating student.

***University Medal in Earth Sciences***

The Department of Earth Sciences offers to the top First Class Honours graduate a medal in recognition of superior achievement.

**5. Economics*****The Anonymous Economics Prize***

This prize, consisting of a book(s) and a sum of money, is open to the Dalhousie undergraduate who is not in the final year of study and who has shown through an essay during the second year of study of economics, the best promise of successfully applying economics to the solution of human problems as determined by the selection committee.

**Econometrics Prize**

The purpose of this prize is to provide an annual prize for an undergraduate Economics major. The Econometrics Prize will be awarded to the undergraduate Economics major with the highest combined average in the Econometrics I (ECON 3338) and Econometrics II (ECON 3339) sequence of classes.

**Economic Theory Prize**

The purpose of this prize is to provide an annual prize for an undergraduate Economics major. The Economic Theory Prize will be awarded to the undergraduate Economics major with the highest combined average in the Intermediate Microeconomics (ECON 2200 or 2220) and Intermediate Macroeconomics (ECON 2201) sequence of classes.

**Economics Honours Thesis Prize**

The purpose of this prize is to provide an annual prize for an undergraduate Economics major. The Economics Honours Thesis Prize will be awarded to the undergraduate Economics honours student with the best honours thesis, as determined by the Selection Committee.

**Economics International Student Essay Prize**

The purpose of this prize is to provide an annual prize for an undergraduate Economics major. The prize will be awarded to the undergraduate Economics 2+2 international student with the best essay written in their third year, as determined by the Selection Committee.

**Principles of Economics Prize**

The purpose of this prize is to provide an annual prize for an undergraduate Economics major. The prize will be awarded to the undergraduate Economics major with the highest combined average in the Principles of Microeconomics (ECON 1101) and Principles of Macroeconomics (ECON 1102) sequence of classes.

**University Medal in Economics**

The Department of Economics offers a medal to the top First Class Honours graduate in recognition of superior achievement in Economics.

**6. Environmental Science****Environmental Science Award**

This award is given to an Environmental Science student in her/his third year of study who has shown academic promise in her/his environmental class work.

**Environmental Science Honours Society Award**

The Honours Society Award is awarded annually to students graduating with a BSc Honours/Major in Environmental Science or BSc Combined Honours or a Double Major in Environmental Science who have achieved a cumulative GPA of 3.5 or more.

**Environmental Science Thesis Prize**

This prize is awarded annually to the student who is judged to have submitted and defended the best Honours Thesis.

**Owen Hertzman Prize**

The Owen Hertzman Prize is granted annually to an Environmental Science student who is deemed to have contributed significantly to Environmental Science school life.

**University Medal in Environmental Science**

Environmental Science offers to the top First Class Honours graduate a medal in recognition of superior achievement in environmental science.

**7. Mathematics and Statistics****Bernoulli Prize**

The Bernoulli Prize will be awarded annually to the student registered in the Co-op Mathematics Program who has the best cumulative academic record, subject to the restrictions that the prize can be awarded only once to a given individual and that the winner must have performed acceptably in all work term assignments.

**The Dr. Emil and Mrs. Stella Blum Prize in Mathematics**

A fund was established by Dr. Ilya Blum in memory of his parents Emil and Stella Blum. The prize will be awarded to an advanced major or Honours Mathematics student who achieves the highest grade in second year calculus.

**The Katherine M. Buttenshaw Prize**

This prize will be awarded annually to the student standing highest in the advanced mathematics classes.

**Ken Dunn Memorial Prize**

The fund which was established in memory of Ken Dunn will provide an annual prize to a student who has completed the third year of an Honours program in Mathematics or Statistics, or a combined Honours program in Mathematics and Statistics.

**Barry Ward Fawcett Memorial Prize**

Established by friends and colleagues of the late Dr. Barry Ward Fawcett who was an associate professor of Computing Science from 1982 until his untimely death at age 50 in 1991. This prize is awarded annually to a student who has completed between 30 and 60 credit hours, registered in a mathematics or statistics program, and has achieved the highest grade in MATH/CSCI 2113 (Discrete Structures II).

**The Ellen McCaughin McFarlane Prize**

A Fund has been established in memory of Ellen McCaughin McFarlane, Class of 1927. Initially, the Fund is to provide an annual prize to an Honours mathematics student who at the end of his/her first year\* in the honours program has achieved the highest standing. (\*Normally, this would be upon the completion of the second year at Dalhousie.)

**The Waverly Prize**

This prize will be awarded annually to the student with the highest standing in Mathematics 1010.

**The Sir William Young Gold Medal**

Founded by the bequest of the late Sir William Young, this medal will be awarded on graduation to the student who stands first among those taking First Class Honours in Mathematics, this is the University Medal in Mathematics.

**University Medal in Statistics**

The Department established this medal to be awarded to the student who stands highest among the First Class Honours graduates in the Statistics program.

**8. Microbiology and Immunology****Ron Carr Award**

The Department of Microbiology and Immunology offers a book award to a student who displays academic achievement, commitment to the betterment of colleagues, makes substantive contributions to the broader community and is involved in extra-curricular activities in the arts or environment.

**Honours Student Prize**

The Department of Microbiology and Immunology offers \$100 award for outstanding academic achievement during the Honours Program.

**University Medal in Microbiology**

The Department of Microbiology and Immunology offers to the top First Class Honours graduate a medal in recognition of superior achievement in the program.

**9. Physics and Atmospheric Science****The Dr. William J. Archibald Prize in Physics**

An annual prize will be awarded to a student who is considered by the Physics Department to be the most promising among those entering a second year Honours Physics program with first class standing.

**The Dr. E.W. Guptill Memorial Prize**

This is to be awarded to the undergraduate student who best exemplifies the qualities of Dr. E.W. Guptill in showing initiative, experimental skill, leadership and enthusiasm for Physics, thereby making an outstanding contribution to physics in this University. This prize will not necessarily be awarded every year.

**The Dr. George Henderson Prize in Physics**

This prize is awarded to the student with the best overall GPA in the first three years of an Honours degree in Physics.

**The James Gordon MacGregor Memorial Prizes**

Relatives of the late Dr. J.G. MacGregor contributed to the James Gordon MacGregor Memorial Fund which now provides awards to undergraduates in the study of physics. The undergraduate awards are scholarships.

**The Dr. A. Stanley MacKenzie Prizes in Physics**

These prizes will be awarded by the Department of Physics and Atmospheric Science to the most promising students in the first two years of the Physics program. The fund was established under the will of the late Miss Mary Alice Smith.

### ***The Burgess McKittrick Prizes in Physics***

The funds for these prizes come from the estate of F.J.A. McKittrick who graduated in 1894 with Honours in Mathematics and Mathematical Physics. He was the first Dalhousie graduate to receive the 1851 Exhibition Scholarship. The prizes are in memory of his brother, Burgess McKittrick, who graduated in 1877. A prize will be awarded to undergraduate students achieving the highest standing in each of Physics 1280/1290, 1300 and the core second year Physics classes. No student may receive more than one such prize in any one year. A prize will be awarded to the female Honours students whom achieves first class standing in each of second, third and fourth year levels. Consideration will occur in the fall.

### ***Burgess McKittrick Summer Research Studentships in Physics***

The Department offers up to two 3-4 month studentships for first year students intending to go into an Honours Physics program at Dalhousie.

### ***Darrell Montgomery Memorial Prize***

An endowment has been set up to provide an annual prize to a third year student in the Physics 3000/3010 experimental laboratory who is deemed to have shown a love of experimentation, the qualities of leadership and participation in student activities in physics related areas.

### ***The Diploma in Meteorology Prize***

This prize is awarded to the student with the highest GPA in the program.

### ***Dr. Masayoshi Senba Memorial Prizes***

One prize will be awarded to an undergraduate student attending classes typically taught by Masayoshi Senba, who, in the opinion of the faculty, possess outstanding skills, interest, promise, and determination in theoretical physics. The other prize will be awarded to a student in Physics (major or honours) in their third or fourth academic year who, compared to the previous academic year, exhibits the greatest improvement in his/her studies.

### ***The University Medal in Physics***

The Department of Physics and Atmospheric Science offers to the top First Class Honours graduate a medal in recognition of superior achievement in the Physics class.

## **10. Psychology and Neuroscience**

### ***Dr. Lilian E. White Prize***

A bequest from the Estate of Dr. Lilian E. White established an endowment to fund a prize to an undergraduate student in Psychology and in Neuroscience. The Department assigns prizes for use in recognizing the best performance of a student in second year in each program.

### ***Dr. W.K. Honig Prize in Psychology***

A fund has been established to provide for one or more annual prizes to students who have achieved the highest performance in the introductory psychology class(es) and who are undertaking a Major or Honours degree in Psychology or Neuroscience.

### ***Frances L. Stewart Memorial Prize in Psychology***

A fund has been established to provide a prize to a fourth year Honours student who shows outstanding potential as a scientist practitioner in Clinical Psychology.

### ***Susan Paula Forward Memorial Prize in Psychology***

Established in the memory of Susan Paula Forward who graduated in 1994 with a Bachelor of Science with Honours in Psychology. She achieved academic excellence during her time, being on the Dean's list for three consecutive years and receiving the University Medal in Psychology upon graduation. This prize is awarded to a graduating Psychology student who has achieved an excellent academic standing, with a strong background and demonstrated interest in pain research and child development.

### ***The David and Ruth Hubel Undergraduate Neuroscience Prize***

The Neuroscience Institute Prize was established in 1998 by donations from members of the Neuroscience Institute, Dalhousie University. Upon receiving a generous gift from Dr. David and Mrs. Ruth Hubel, the Neuroscience Institute changed the name of the prize in honour of the Hubels. The prize is awarded to a fourth year Neuroscience Honours student who shows outstanding potential as a researcher in Neuroscience.

### ***University Medal in Neuroscience***

The Department of Psychology and Neuroscience offers a medal to the top graduating student with First Class Honours in the program.

### ***University Medal in Psychology***

The Department of Psychology and Neuroscience offers a medal to the top graduating student with First Class Honours in the program.

## **K. College of Sustainability**

### ***Deborah Buszard Prize***

This prize is awarded annually in March to an ESS student who has contributed significantly to academic life in the College of Sustainability. Faculty members nominate students to the Awards Committee.

### ***ESS Academic Improvement Prize***

This prize is awarded annually in March to an ESS student in her/his fourth year of study who has shown the most academic improvement in her/his class work throughout the degree.

### ***ESS First-year Prize***

This prize is awarded annually in March to an ESS student in their second year of study who had the highest GPA in their first year classes at Dalhousie.

### ***ESS Honours Society***

Awarded at Convocation to ESS students graduating with a cumulative GPA of 3.7 or higher.

### ***ESS Second-year Prize***

This prize is awarded annually in March to an ESS student in their third year of study who had the highest GPA in their second year classes at Dalhousie.

### ***ESS Student Travel Award***

A fund has been established to support ESS students for travel with grants of \$300 - \$500. Students submit a cover letter and budget to the College of Sustainability Awards Committee. The cover letter should explain how the proposed travel will contribute to research experiences or to the application or expansion of the undergraduate academic experience. The budget should include all expected sources of income (including other successful and unsuccessful grant applications) and a list of expected experiences.

### ***ESS SUST-star Prize***

This prize is awarded annually at Convocation to the ESS student graduating with the highest average in all SUST classes.

### ***ESS Thesis Prize***

This prize is awarded annually at Convocation to the student that is judged to have submitted and defended the best Honours thesis.

### ***Rookie-of-the-year Prize***

This prize is awarded annually in March to an ESS student in their first year of study who has contributed significantly to life in the College of Sustainability. Faculty members nominate students to the Awards Committee.

### ***University Medal in Environment, Sustainability and Society***

The College of Sustainability offers to the top First Class Honours graduate a medal in recognition of superior achievement in Environment, Sustainability and Society. Awarded at Convocation.

## **V. Financial Aid and Loans**

### **A. Government Student Loans**

**IMPORTANT:** Please note that federal and provincial student loan regulations include stipulations for the Borrower in terms of the minimum class load, expressed as a percentage of the normal class load at the University, which the Borrower must carry in order to benefit from the program. This minimum must be maintained throughout the academic year, e.g., a student who wishes to receive either money or interest-free status under the Canada Student Loan Plan for the entire academic year must carry not fewer than 60 per cent of the normal class load (expressed in credit hours) for each term. Please note, to be eligible for provincial loan funding from Newfoundland, you must be registered in 80% of the normal class load. At Dalhousie, the normal credit hour load for student loan purposes is 30. The Borrower must carry not fewer than 18 credit hours, distributed equally between the terms, i.e., nine. If your particular program does not conform to this scheme, you should apply to Student Aid for funding for only that term in which your class load would fulfil this regulation. Federal and provincial rules can differ on this matter.

If you must drop or add classes, exercise care so as not to jeopardize your governmental student loan(s).

## B. Addresses of Provincial Student Aid Authorities

Canadian students are to apply for government assistance to the appropriate agency in that province or territory in which the applicant is a bona fide resident.

## C. Temporary Loans

### 1. For all Dalhousie Students

#### *Temporary Loans*

The University has established a temporary loan program to assist registered Dalhousie students with certain types of short-term financial difficulty when no other resource is available. Students must provide proof of their ability to repay the loan within the time period. (Loans are not made for tuition fee payment.) These loans have a short interest-free period, after which interest will be charged. Refer to the Temporary Loan Application for further details. Applications may be picked up in the Registrar's Office, Room 130, Henry Hicks Academic Administration Building, the Sexton Campus Student Service Centre, or online [www.moneymatters.dal.ca](http://www.moneymatters.dal.ca).

### 2. For Architecture and Planning, Computer Science & Engineering Students

#### *Student's Medical Response Trust Fund*

The fund was established with a generous donation from Professor and Mrs. Surain S. Sarwal, a member of Dalhousie Faculty along with Students, Staff, Faculty and Friends of Dalhousie.

The concept of the fund was developed in response to a medical emergency. Prior to the establishment of this Fund, Students, Staff, Faculty and Friends of Dalhousie joined together to provide special funding to assist a student. A committee will decide upon the distribution of funds. This committee will consist of the President of the Student Union, Dean of Students, Co-ordinator of International Students, presidents of all "A" societies (including the Engineering Undergraduate Society, the Graduate Student Society, the Architecture Students Association, the Graduate Planning Society and the Computer Science Society). Distribution of funding will be subject to the judgement of the committee taking into account the individual circumstances and needs.

## VI. Dalhousie Bursaries

The University's bursary program is intended as possible supplementary assistance to help qualifying students with a portion of their educational costs.

### General Intent of University Bursaries

The University has funds for the purpose of assisting its students who may face certain types of financial situations. These bursaries are awarded primarily on the basis of demonstrable need as determined by the appropriate University office or committee, satisfactory academic standing (see as defined in Academic Regulations) is also expected. Students whose financial needs are exceptionally large and/or students whose academic standing is unsatisfactory may not be assisted. Normally, bursaries will be awarded only to students who have availed themselves of assistance under the Canada Student Loan Program and/or corresponding provincial or territorial loan programs or bank loans. Normally, receipt of the first installment of such funding is a prerequisite to the University's consideration of an application for bursary assistance. Students may access the bursary program for a maximum of five years.

### A. General—All Faculties

The following bursaries, unless indicated otherwise, are administered by the Registrar's Office. Awards are made through the online bursary program. Please refer to [moneymatters.dal.ca](http://moneymatters.dal.ca) for the deadline dates for the online bursary program.

#### *Helen Archibald Memorial Bursary*

To provide one or more bursaries for undergraduate students from Cape Breton, NS, with preference given to students from Richmond County. Students will be first year full-time students. Apply through the general online bursary program. Deadline October 15.

#### *The Eva and David Ashkins Memorial Bursary*

The donors established this fund for the purpose of assisting pupils who have matriculated from selected high schools to enter Dalhousie. These high schools are (first) North Queen's Rural High School or Bridgewater High School, and (secondly) other high schools in the province of Nova Scotia. The recipient may be considered in subsequent years for further assistance. Apply through the general online bursary program.

#### *Helen and Earl Atkins Memorial Bursary*

A trust from the estate of Helen and Earl Atkins to provide bursaries for those who might otherwise be unable to attend university. Trust will provide one or more bursaries to first or second year undergraduate students. Preference given to students domiciled in rural Nova Scotia. Apply through the general online bursary program. Deadline: October 15

#### *Donnell and Betty Beaton Bursary*

This bursary is to provide one or more bursaries for undergraduate students from Cape Breton, NS; with first preference for students from Baddeck Rural High School entering full time studies in the Faculty of Arts and Social Sciences or the Faculty of Science. Recipients will have demonstrated financial need and satisfactory academic standing. Apply through the general online bursary program. Deadline: October 15

#### *Harry and Kaye Bernstein Bursary*

A bursary to an undergraduate student born and living in Halifax from a low income family, who shows financial need. Apply through the general online bursary program.

#### *George Boyd Bursary*

The income from the George Boyd Trust will provide an entrance bursary. Preference is to be given to a needy student from the Sydney, NS area. Apply through the general online bursary program.

#### *Ernest Brehaut Memorial Bursaries*

These bursaries were established by the gift of Mrs. Ernest Brehaut of Colorado Springs, USA, in memory of her husband, a distinguished graduate of Dalhousie, Harvard and Columbia. These bursaries are to be awarded by the Registrar's Office - Awards of the University, which will take into consideration any financial need of the applicant, to students from Prince Edward Island. Preference is to be given to relatives of the late Dr. Brehaut. The bursaries are to be continued throughout the classes of the students if they maintain creditable academic standing and show genuine need. Apply through the general online bursary program.

#### *The Lt.(E) Harry J. Brewer, MBE, CD, RCN (Ret.), Memorial Bursary*

A memorial bursary fund has been established to provide financial assistance to a full-time student who is enrolled in a degree or diploma program. The recipient(s) will have demonstrated financial need and satisfactory academic standing as defined in academic regulations. Apply through the general online bursary program.

#### *George Burris Scholarship*

The Scholarship was established by Mary Burris and Grace Burris in memory of their father, George Burris, to support Dalhousie students wishing to study in England as part of their academic program. Scholarships are awarded on the basis of academic and extracurricular excellence, financial need, and international experience.

Open to Dalhousie University upper year Canadian students who have applied for admission to participate in an International Program/Placement in England. Value: up to \$5,000 each. Interested students should complete an application available from the International Student and Exchange Services Office. Students must submit application a minimum of one month before departure.

#### *Enid Hager Clarke Textbook Fund*

A bequest from the Estate has set up an endowment from which to award bursaries to assist students from certain geographic areas of New Brunswick. Students who are domiciled in King's and Saint John counties are eligible under the terms of the bequest. Apply through the general online bursary program.

#### *Howard C. Clarke International Study Award*

A special endowment fund to assistance a Dalhousie student who is participating in a recognized study abroad or exchange program for academic credit. Student must demonstrate great financial challenges. Please contact the International Student and Exchange Office for details.

#### *The Rebecca Cohn Bursary Fund*

A gift of \$4,000 by the executors of the Estate of the late Rebecca Cohn provides an endowed bursary fund for needy students. Apply through the general online bursary program.

#### *Lenore Smith Cumming Bursary*

From the Estate of Charles Gordon Cumming came a bequest of \$10,000 US to endow a bursary fund to assist needy students. Mr. Cumming expressed a

preference for matriculants from Naparima College in Trinidad should such students attend Dalhousie. Apply through the general online bursary program.

#### ***Dalhousie Leadership Bursaries***

A limited number of bursaries are available annually to students who have exhibited a record of considerable leadership achievement. Candidates must also demonstrate consistent satisfactory academic accomplishment. The Selecting Committee may consider such other matters as financial need, service to the University and the community, and character. Submit completed forms to the Department of Athletics and Recreational Services, which will forward your application with supplementary information.

#### ***Dalhousie Memorial Bursary Fund***

From time to time at Dalhousie contributions have been made to the University as a memorial subscription in honour of some student or former student. Until now there has been no proper place into which these funds could be channeled. Because of these occurrences a Dalhousie Memorial Bursary Fund has been established. The existence of the fund will be commemorated by a book of remembrance to be located in a prominent place in the Killam Library. Names of persons in whose memory contributions have been made by relatives, friends, individuals or groups, to the Memorial Fund will be recorded in the book, along with the date of their birth and death. The pages will be turned on a regular basis. All money contributed to the Fund will be invested by the Board of Governors and only the investment income will be awarded. The award will be available to any full-time Dalhousie student, already registered and in attendance at classes, who can show a need for additional support. A student in straitened financial circumstances may be considered for possible assistance by applying through the general online bursary program. For further information please contact the External Relations Office, Dalhousie University.

#### ***Alfred George Darville Memorial Bursary***

This fund provides one bursary to a qualifying Dalhousie student. Applicants must be matriculants of Halifax West High School, be enrolled in first-year studies in an undergraduate program (as commonly understood), and demonstrate financial need to the satisfaction of the Selecting Body. Apply through the general online bursary program.

#### ***Charles Robert Raeffe Douthwaite Memorial Bursary***

To honour the memory of Charles Robert Raeffe Douthwaite, an endowment was established to provide bursaries for students graduating from Nova Scotia high schools. Apply through the general online bursary program.

#### ***The John Dunlop Memorial Bursary***

An endowment to provide a bursary to an academically sound student from a rural area. Apply through the general online bursary program.

#### ***Frances Hamilton Grant Bursaries***

An endowed bursary fund was established under the will of the late Constance Patricia Hamilton in the amount of \$18,900, the income to be used to assist students. Apply through the general online bursary program.

#### ***DSU Student Wise Health Plan Bursary***

To provide financial aid to an undergraduate student or students who are covered by the DSU health care plan. Apply through the general online bursary program. Deadline October 15.

#### ***MacCallum S. Grant Charitable Foundation Bursary***

The MacCallum S. Grant Charitable Foundation supports a number of bursaries for Dalhousie University students each year. First priority will be given to students who have lived in Halifax County, Guysborough County and Preston for a period of at least two years immediately prior to receiving a bursary. Students from the former City of Halifax, Dartmouth and the town of Bedford are not eligible to receive a bursary. The recipients will have demonstrated financial need and satisfactory academic progress. Apply through the general online bursary program. Deadline: October 15.

#### ***Annie M. Harrison Bursary***

The annual income from the bequest of \$5,000 from the Estate of Annie M. Harrison provides a number of bursaries. Apply through the general online bursary program.

#### ***Alice M. Haverstock Bursary***

From the Estate of Gertrude H. Fox came a bequest to endow a bursary fund in the name of Alice M. Haverstock. Apply through the general online bursary program.

#### ***The Annette S. Hill Bursaries***

The University received an endowment under the will of the late Annette S. Hill to set up a fund, the income to be used to assist needy students. Apply through the general online bursary program.

#### ***Ann Lavers Howe Hall Bursary***

The Ann Lavers How Hall Bursary was founded, by alumni and friends of Howe Hall, to provide financial assistance to a Dalhousie student who is a current Howe Hall resident. It is named in honour of Ann Lavers, staff member of Howe Hall from 1967-1994, who befriended many residents over her term of employment, in a variety of positions, at Howe Hall. The recipient must have a demonstrated financial need, be in good academic standing and also be an individual who has made a positive contribution to the residence community at Howe Hall. Application information is posted within the residence each January.

#### ***Kostman Family Bursary***

An endowment has been established in memory of Harry Kostman to provide one or more bursaries for undergraduate students of First Nations or African-Canadian descent who are graduates of TYP entering full-time studies. First preference will be given to single parents.

Harry Kostman had an enduring passion for education, and generously provided for his children and grandchildren while they attended university. Through this bursary, they strive to continue his legacy of support. Apply through the general online bursary program. Deadline: October 15.

#### ***Annie E. Longard Memorial Bursary***

An endowment has been established to provide an annual bursary in memory of an accomplished alumna and long-time participant in the Women's Division of the Dalhousie Alumni Association. The bursary is available to an undergraduate student at Dalhousie on the basis of demonstrated need and satisfactory academic standing. Apply through the general online bursary program.

#### ***The Rev. Kenneth Mackenzie Bursary***

Mrs. Harriet Mackenzie Morrison of Stornoway, Scotland, daughter of the Rev. Kenneth Mackenzie of Pictou County, bequeathed \$1,000 to the university in 1887 to be used as a bursary fund. Apply through the general online bursary program.

#### ***The Neil and Jessie Matheson Bursaries***

Established under the will of Miss Margaret J. Matheson, Truro, the income from this fund provides several bursaries. Students from the rural districts of Pictou County are to be given preference. Apply through the general online bursary program.

#### ***Military District No. 6 Provost Corps Bursary***

The Number 6 Provost Mutual Association established this bursary fund to assist descendants of those members of the Canadian Provost Corps who served in Military District No. 6. Applicants must fulfil the Corps' selection criteria, show satisfactory academic progress and demonstrate financial need. There are several sets of criteria. Apply through the general online bursary program. Deadline: October 15.

#### ***Tom Norwood Bursary***

The fund was established by Barbara Nielson to honor the memory of her son, Tom Norwood. The bursary is available to full-time Undergraduate students at Dalhousie on the basis of demonstrated financial need and satisfactory academic standing. First priority will be given to Canadian Citizens from Nova Scotia. Apply through the general online bursary program. Deadline: October 15.

#### ***Senator Donald Oliver Bursary for Black Atlantic Canadians***

Hugh J. Maccagno and Senator Donald Oliver (LLB 1964) established this bursary in 2004 to assist Black Atlantic Canadians in pursuing post-secondary educational opportunities at Dalhousie University. This fund provides one or more bursaries annually to Black Atlantic Canadians registered as full-time students. Apply through the general online bursary program. Deadline: October 15.

#### ***The Warren Publicover Class '25 Memorial Bursary***

The Warren Publicover Class '25 Memorial Fund was established in memory of Warren Publicover. The annual income from this fund is to be awarded in the form of a bursary for an individual who has successfully completed one year of university work at Dalhousie and is continuing as a full time student at this University. The bursary is to be awarded on the basis of satisfactory academic performance and demonstrated financial need, and is subject to renewal provided that the original requirements are maintained. It is a condition of the gift that

applicants for this bursary need not have availed themselves of governmental funding as is usually required by the University. Apply through the general online bursary program.

#### ***The S & L Bursary***

This bursary was established to provide financial assistance for a student with demonstrated financial need who is entering Dalhousie directly from high school. Students must be graduates of a high school in one of the following counties: 1) Colchester; 2) Guysborough; 3) Cumberland; or Pictou County. Apply through the general online bursary program. Deadline October 15.

#### ***Mr. & Mrs. Morris Saffron Bursary***

Established to provide financial assistance to students who are residents of the town of Springhill, Cumberland County. Apply through the general online bursary program.

#### ***Joe A. Muir Phi Kappa Pi Bursary***

This bursary was established by Joe Muir to provide an annual bursary to a brother of the Phi Kappa Pi Fraternity. The Fraternity will provide Dalhousie a short list of second year students who have a demonstrated financial need. Please contact the Phi Kappa Pi Fraternity for the application form. Deadline: September 30.

#### ***Leslie Shaw Bursary***

This bursary was established by Allan, Gabrielle and Sarah Shaw for Leslie Shaw to honour her and to celebrate her 60th birthday. Leslie Shaw dedicates her professional and volunteer life to the betterment of our society. This bursary is awarded annually to landed immigrants and/or international students whose first language is not English. First preference will be given to students who are either landed immigrants or intending to become landed immigrants. Apply through the general online bursary program. Deadline: February 15.

#### ***Charles A. Smith Memorial Bursary***

Charles A. Smith was a black Nova Scotian born in 1926. He pursued his career on the railway, starting as a sleeping car attendant and retiring at a senior level in customer service with Via Rail.

This renewable bursary will be available to assist one or more Nova Scotia black students who are single parents enrolled in undergraduate studies at Dalhousie. Apply through the general online bursary program. Deadline: October 15.

#### ***The Rt. Honourable Robert L. Stanfield Bursary***

Established by the Windsor Foundation in recognition of the contributions of the Rt. Honourable Robert L. Stanfield. This fund provides one or more bursaries annually to Black Nova Scotians who are full-time students at Dalhousie University. Apply through the general online bursary program. Deadline: October 15.

#### ***Supertemp Bursary***

This bursary, of \$1,000, is awarded annually to a mature undergraduate student who has demonstrated financial need. Apply through the general online bursary program. Deadline: October 15.

#### ***SWIF/ Study Work International Fund***

SWIF has been established by Dalhousie University, as part of the Student Assistance Program, to provide financial assistance to Dalhousie and King's students who wish to undertake international placements as part of their educational experience. Please contact the International Student and Exchange Office for details. Students must submit application a minimum of one month prior to departure.

#### ***TD Bank Financial Group Bursary***

This bursary is available to part-time or full-time students who demonstrate financial need. Recipients may be residents of any province or territory in Canada. Apply through the general online bursary program.

#### ***Dean and Marie Trimper Bursary***

Provides one or more bursaries to students who have graduated from Sir John A. MacDonald High School. Apply through the online bursary program.

#### ***Helen Tupper Memorial Bursary***

Provides one or more bursaries for students in their first year of an undergraduate degree program at Dalhousie University. Apply through the general online bursary program.

#### ***Dr. Gerald Turner Bursary***

An endowment has been established to provide a bursary to assist a needy student from Cape Breton in First Year. Apply through the general online bursary program.

#### ***Women's Division Bursaries***

A number of bursaries, based on financial need, will be offered directly from the Women's Division of the Dalhousie Alumni Association. Apply through the general online bursary program. A separate essay and one page application will also be required to be submitted to the Alumni Office addressed to the Chair of the Scholarship Committee, Women's Division. Deadline: for online application October 15; for additional essay and one page application to the alumni office December 10.

### **B. Faculty of Architecture and Planning**

Unless otherwise noted, selection for these bursaries is made by the Undergraduate Awards and Scholarships Committee of the Faculty of Engineering augmented by representatives of the Faculty of Architecture and Planning. Application forms are available from the Offices of the Deans of Engineering or Architecture and Planning.

#### ***Architecture and Planning Bursaries***

Proceeds from the former TUNS Board of Governors Fund are used at the Dean's discretion. They provide up to five \$1,000 bursaries to assist full-time students entering the winter term of the BEDS or MArch program in the School of Architecture or the BCD or MPlan program in the School of Planning. Applicants must be making satisfactory academic progress and must demonstrate financial need by submitting a bursary application. Selections are made by the Scholarship Committees of the School of Architecture and the School of Planning.

#### ***Dr. Ruth M. Goldbloom Bursary***

This fund was established in 1995 to honour Dr. Goldbloom CM, on the occasion of her installation as Chancellor of the Technical University of Nova Scotia. This bursary is awarded annually to a female student entering her third year of study in the Faculty of Architecture and Planning, Faculty of Computer Science or the Faculty of Engineering. The recipient will have achieved satisfactory academic standing and demonstrated financial need. Application required. Deadline: April 30

#### ***Maritime Hobbies and Crafts Bursary***

This \$500 bursary, donated by Maritime Hobbies and Crafts, provides financial assistance to a full-time student entering the winter term of the BEDS program or MArch program in the School of Architecture. Applicants must be making satisfactory academic progress and must demonstrate financial need by submitting a bursary application. The selection is made by the School of Architecture Scholarship Committee.

#### ***Barry and Margo Johns Family Bursary***

This \$1,000 bursary, donated by Barry Johns (BArch 1972), provides financial assistance to a student entering the B5 term of the BEDS program. Applicants must be making satisfactory academic progress and must demonstrate financial need by submitting a bursary application. The selection is made by the School of Architecture Scholarship Committee.

#### ***The Michael G. Johnston Memorial (Entrance) Bursary***

This annual \$500 bursary has been established in the memory of Michael G. Johnston by the Board of Governors of the University. Michael G. Johnston was a valued member of the Dalhousie Board of Governors who expressed sincere interest in all who came into contact with him. Candidates must have fulfilled or expect to fulfil the minimal entrance requirements for the BEDS program in Architecture, or for entrance into the third year of Computer Science and Engineering. The bursary is awarded on the basis of community involvement, scholastic ability, and financial need. Application required. Deadline: April 30.

### **C. Faculty of Arts & Social Sciences**

#### ***Robert Bruce Bursaries***

Several bursaries tenable in the third year of an Arts or Science class, will be awarded to students of promising abilities but of straitened circumstances. Apply through the general online bursary program.

#### ***R. J. Hill Bursary***

This award was created with a gift from Ronald James Will. The gift will provide a bursary to more undergraduate student(s) enrolled in the Faculty of Arts &

Social Sciences at Dalhousie University. The recipient must have demonstrated financial need and satisfactory academic standing. Please contact the Faculty of Arts & Social Sciences for the application process.

#### ***Eric Stanley Hillis Memorial Bursary***

An annual bursary for a student enrolled in the second, third, or fourth year of a Bachelor of Arts degree. Apply through the general online bursary program.

#### ***Wilfred E. Hillis Bursary***

The late Mrs. Olga Munro Hillis made provision for the establishment of the Wilfred E. Hillis Bursary Fund. The income derived therefrom is to be used as bursaries for worthy Arts and Science students who are in need of financial assistance. Apply through the general online bursary program.

#### ***Dr. Rosemary Theresa Holton & Stephen A. Holton Bursary***

Provides financial assistance for one or more undergraduate students who are majoring in English. Apply through the general online bursary program.

#### ***Annie S. MacKenzie Class of 1911 Bursary***

Under the will of the late Emelyn L. MacKenzie the University has been given a bequest to provide bursaries in Arts & Science, Dentistry and Law. One-third of the net income is allotted to the College of Arts and Science for the purpose of funding a bursary to one or more students. The recipient must be a bona fide resident of and domiciled in the County of Victoria (as defined by the boundaries then extant in AD 1900), Nova Scotia. Character and financial need are the main criteria. Apply through the general online bursary program.

#### ***Charles and Mary MacLennan Bursary in Theatre***

Established to honour the memory of Charles G. MacLennan, who was active in the musical life of Dalhousie University, and his wife, Mary Jackson MacLennan, who had a lifelong interest in amateur theatre. This bursary is awarded to one (or more) undergraduate student(s) in the Department of Theatre who has (have) shown artistic excellence in theatre (acting), writing, design, etc.). Eligible recipients will have completed at least one year of study in their undergraduate program at Dalhousie University. Applicants will apply to the general online bursary program as well as to the Department of Theatre's Awards Committee. Deadline: October 15.

#### ***Charles and Mary MacLennan Bursary in Music***

Established to honour the memory of Charles G. MacLennan, who was active in the musical life of Dalhousie University, and his wife, Mary Jackson MacLennan, who had a lifelong interest in amateur theatre. This bursary is awarded to one (or more) undergraduate student(s) in the Music Department who has (have) shown artistic excellence in music (vocal, instrumental or other). Eligible recipients will have completed at least one year of study in their undergraduate program at Dalhousie University. The value of the award is \$2,500. Applicants will apply to the general online bursary program as well as to the Department of Music Scholarships Committee. Deadline: October 15.

#### ***The Sophie MacLeod Memorial Bursary***

Sophie MacLeod (1901-2001) received a Bachelor of Arts from Dalhousie in 1925. She enjoyed a long and distinguished career in teaching and for many years taught English at Bloomfield School in Halifax. This bursary is awarded annually to students majoring in English or undertaking a double major or combined honours degree with English as one of their focuses. Apply through the general online bursary program.

#### ***John David and Ellen Matheson Allen Endowment Fund***

The bursaries to be known as John David and Ellen Matheson Allen bursaries, are in memory of John David Allen and his wife, Ellen Margaret Allen, both graduates of the Department of Education of the University. The bursaries are for students in the Arts and Science faculties. In the selection of the recipients of the bursaries, priority is to be given to First Nations, but where no such persons apply, the bursaries are to be given to other applicants as determined by the appropriate office of the University. Apply through the general online bursary program.

#### ***Professor W. Russell Maxwell Memorial Bursaries***

Any residual income remaining in the Fund after the annual scholarships have been determined may, after consultation with the Department of Economics, be used to fund one or more bursaries for deserving students entering the fourth year of the Honours program in Economics. Awarded by the Department of Economics and the Registrar's Office. Application not required.

#### ***The Kenneth and Lloyd McDonald Bursary***

A gift of the McDonald family in 1976 makes possible the funding of an annual bursary to a deserving and needy student. Apply through the general online bursary program.

#### ***Elizabeth McKenna Bursaries***

The Elizabeth McKenna Scholarship Fund was established in 1928 for the purpose of providing what are known today as bursaries. Applicants must be bona fide residents of one of the Maritime Provinces and be entering the first year in the College of Arts & Science. Apply through the general online bursary program.

#### ***The Ross Millar Bursary***

Under the will of Dr. Ross Millar, the sum of \$10,000 was bequeathed to the Board of Governors in trust to set up a bursary to be awarded annually. It is stipulated that "Other things being equal the recipient shall be an undergraduate in Arts or Letters who is qualifying himself for the Ministry of the Presbyterian Church in Canada by taking the Arts or Letters degree at Dalhousie." Apply through the general online bursary program.

#### ***Reverend J.W.A. Nicholson Bursaries***

This Fund was established in commemoration of the unselfish life of a distinguished Dalhousie graduate (BA 1897). One of his concerns was to help young people discover their talents. The income is used to assist Black Nova Scotians who are full-time students in the College of Arts & Science at Dalhousie. Awards are made at the discretion of the Registrar's Office - Awards. Apply through the general online bursary program.

#### ***Kathleen Stewart Memorial Bursary in Music***

An annual in-class bursary to one (or more) undergraduate student(s) in a Music degree program who demonstrate financial need and have shown academic excellence as demonstrated by GPA in relevant classes. The bursary is awarded to a student in their second, third or fourth year of Music studies. First preference will be given to students studying Piano and second preference will be given to students studying Voice. If there are no eligible students in these areas of study, the award may be granted to a Music performance student in any discipline. This award was created by family and friends in honour of Kathleen Stewart who was a passionate supporter of Dalhousie from 1954 until her death in 2008.

#### ***Walker Wood Foundation Theatre Bursary***

The Foundation will provide a four year renewable bursary to a student planning on majoring in Theatre. The student must major in Theatre, be in good standing, and must be Canadian Citizen with a demonstrated financial need. Preference will be given to a student entering directly from a high school in Atlantic Canada. Apply through the general online bursary program.

### **D. Faculty of Computer Science**

Unless otherwise noted, selection for these bursaries is made by the Undergraduate Awards and Scholarships Committee of the Faculty of Engineering augmented by representatives of the Faculty of Computer Science. Application forms are available from the Offices of the Deans of Engineering or Computer Science. Deadline: September 30.

#### ***Dr. Ruth M. Goldbloom Bursary***

This fund was established in 1995 to honour Dr. Goldbloom CM, on the occasion of her installation as Chancellor of the Technical University of Nova Scotia. This bursary is awarded annually to a female student entering her third year of study in the Faculty of Architecture and Planning, Faculty of Computer Science or the Faculty of Engineering. The recipient will have achieved satisfactory academic standing and demonstrated financial need. Application required. Deadline: April 30.

#### ***The Michael G. Johnston Memorial Entrance Bursary***

This annual \$500 bursary has been established in the memory of Michael G. Johnston by the Board of Governors of the University. Michael G. Johnston was a valued member of the Dalhousie Board of Governors who expressed sincere interest in all who came into contact with him. Candidates must have fulfilled or expect to fulfil the minimal entrance requirements for an undergraduate program in Architecture and Planning, or for entrance into the third year of Computer Science and Engineering. The bursary is awarded on the basis of community involvement, scholastic ability, and financial need. Application required. Deadline: April 30.

### ***The Rod Shoveller Memorial Bursary***

The bursary has been established by the Student Union of Dalhousie and is supported by students, alumni, family, friends and colleagues. Mr. Shoveller was the Athletic Director of TUNS from 1980 to 1991 and acted as counsellor, mentor, and friend to hundreds of students who came to know his compassion and understanding. The award of \$500 is made to a student who is maintaining an acceptable academic standard in the penultimate term of study in any faculty. Award is made on the basis of participation in Dalhousie athletics, with an emphasis on intramurals and financial need. Selection is carried out by the Scholarships & Awards Committee of the Faculty of Engineering. Application required. Deadline: September 30.

## **E. Faculty of Engineering**

Unless otherwise noted, selection of bursary awardees is carried out by the Scholarships and Awards Committee of the faculty of Engineering. Application forms are available from the Office of the Associate Dean of Engineering, Sexton Campus.

### ***J.D. (Dan) Arbing Memorial Nova Scotia Road Builders Association Bursary***

The N.S. Road Builders Association established this award of \$2,000. Eligible students are to be registered in the Senior Year in the Faculty of Engineering. The Committee will consider the applicant's financial need, academic standing, interest in highway or construction engineering, and executive ability in a construction company or highway department. Preference will be given to students registered in Civil Engineering. Deadline: September 30.

### ***Margaret Archibald Memorial (Entrance) Bursary***

The Family, Friends and Associates of Margaret Archibald established this award of \$500. Mrs. Margaret Archibald was a Dalhousie employee from December 1962 to May 1979. During this period of time, she worked for three Presidents. After her official retirement as Administrative Secretary to the President, Mrs. Archibald continued with the University working in the Public Relations Office until 1983. Margaret Archibald was a very loyal and dedicated employee with a keen interest in the Dalhousie community. The eligible candidate must be a woman who has fulfilled or expects to fulfil the minimum entrance requirements into third year of an undergraduate program in Architecture, Computer Science, or Engineering. Apply through Sexton Campus. Deadline: April 30.

### ***Birks Family Foundation Bursary***

The Birks Family Foundation provides two bursaries of \$1,000 each. Eligible students must have completed at least their third year of study within the Faculty of Architecture and Planning or the Faculty of Engineering. The award is made on the basis of financial need, provided that the applicant is maintaining an acceptable academic standard. Deadline: September 30.

### ***Wade Gates Memorial Bursary***

This bursary of \$500 has been established in memory of Wade Gates by colleagues, family and friends. Mr. Gates was a technologist in the Department of Chemical Engineering at Dalhousie for many years. Eligible students are to be registered in Year 4 or 5 of an undergraduate engineering program with preference given to Chemical Engineering students. The award is based primarily on financial need but the Committee also considers the academic record of the applicant. Deadline: September 30.

### ***Dr. Ruth M. Goldbloom Bursary***

This fund was established in 1995 to honour Dr. Goldbloom CM, on the occasion of her installation as Chancellor of the Technical University of Nova Scotia. This bursary is awarded annually to a female student entering her third year of study in the Faculty of Architecture and Planning, Faculty of Computer Science or the Faculty of Engineering. The recipient will have achieved satisfactory academic standing and demonstrated financial need. Application required. Deadline: April 30.

### ***The John J. Jodrey (Entrance) Bursary***

John J. Jodrey established two awards of \$500 each. Eligible candidates must have fulfilled or expect to fulfil the minimum requirement for entrance into the third year of an undergraduate program in the Faculty of Engineering. This award is restricted to Atlantic Canadians. Deadline: April 30.

### ***The Michael G. Johnston Memorial (Entrance) Bursary***

This annual \$500 bursary has been established in the memory of Michael G. Johnston by the Board of Governors of the University. Michael G. Johnston was a valued member of the Dalhousie Board of Governors who expressed sincere

interest in all who came into contact with him. Candidates must have fulfilled or expect to fulfil the minimal entrance requirements for an undergraduate program in Architecture and Planning, or for entrance into the third year of Computer Science and Engineering. The bursary is awarded on the basis of community involvement, scholastic ability, and financial need. Deadline: April 30.

### ***J. Winston MacDonald Bursary***

An endowment has been established to provide an annual bursary to a student enrolled in the Engineering program at Dalhousie University. The recipient will have demonstrated financial need and satisfactory academic standing. The bursary is given in memory of John Winston MacDonald who was graduated from Dalhousie University in 1929 with a Bachelor of Science degree and the Diploma in Engineering, and from the Nova Scotia Technical College in 1931. Apply through the Faculty of Engineering. Contact the department for the deadline.

### ***Ian Noseworthy Bursary***

This bursary has been established in memory of Ian Noseworthy by his family and friends. Mr. Noseworthy was a fourth-year student in Chemical Engineering at the time of his death. Eligible students are to be registered in the fourth year of a Bachelor of Engineering in Chemical Engineering. The award is made on the basis of demonstrated financial need and satisfactory academic standing. Deadline: September 30.

### ***Nova Scotia Department of Transportation and Public Works Bursary***

This endowment has been established to provide a bursary (ies) of \$1,250 to one or more full-time student(s) who are considered permanent residents of Nova Scotia and entering the third year of the undergraduate program of the Faculty of Engineering. The student(s) will have demonstrated financial need and achieved a 3.0 average. Co-op placement with the Department of Transportation and Public Works may be made available. Upon completion of study/graduation, an opportunity of employment may be extended. Applications should be submitted to the Awards committee of the Faculty of Engineering. Application deadline: April 30.

### ***The Jason Paquet Memorial Bursary***

This bursary, valued at \$500 has been established in memory of Jason Paquet by his family, friends, fellow students, faculty and alumni of mechanical engineering. Mr. Paquet was registered as a fourth year mechanical engineering student at the time of his death. Eligible students are to be registered in the Junior Year of the Mechanical Engineering program of the Faculty of Engineering. The award is based primarily on financial need. The Committee will also consider the academic record of the applicant and involvement in sports and community. Preference will be given to students who were residents of Prince Edward Island prior to attending Dalhousie. Deadline: September 30.

### ***The Rod Shoveller Memorial Bursary***

This \$500 bursary has been established by the Student Union of Dalhousie and is supported by students, alumni, family, friends and colleagues. Mr. Shoveller was the Athletic Director of TUNS from 1980 to 1991 and acted as counsellor, mentor and friend to the hundreds of students who came to know his compassion and understanding. Eligible students are entering their penultimate term of study in the Faculty of Architecture and Planning, Computer Science, or Engineering. The award is made on the basis of participation in Dalhousie athletics, with an emphasis on intramurals and financial need, provided that the applicant is maintaining an acceptable academic standard. Selection is carried out by the Scholarships & Awards Committee of the Faculty of Engineering. Deadline: September 30.

### ***The Dr. H.G. Sherwood Memorial Entrance Bursary***

This \$300 bursary has been established in memory of Dr. H.G. Sherwood by former employers, friends and colleagues. Dr. Sherwood was a dedicated professor in the Mining Engineering program at Dalhousie for many years. Eligible candidates must have fulfilled or expect to fulfil the minimum entrance requirements into year three of the Mining Engineering undergraduate program in the Faculty of Engineering. The Bursary is awarded on the basis of the applicant's academic record at an Associated University or in the previous years at Dalhousie. While academic excellence will be the primary criterion for the award, the selection committee may also weigh other considerations in reaching a decision. Deadline: April 30.

### ***Lloyd Hopkins Wickwire Bursary***

An endowment has been established through a bequest from the Estate of Lloyd H. Wickwire, an alumnus of the Nova Scotia Technical College and Dalhousie University. This endowment is meant to provide annual bursaries to students

studying engineering at Dalhousie University. Applicants must demonstrate financial need and be in good academic standing. Apply through the general online bursary program.

#### ***Susan (Cox) Wickwire Bursary in Engineering***

An endowment has been established in memory of Susan (Cox) Wickwire, a former school teacher whose four sons are University alumni. The bursary is open to students for promotion from Year I to Year II in the Dalhousie Faculty of Engineering. The recipient will have demonstrated financial need and satisfactory academic standing. Apply through the Faculty of Engineering. Contact the department for the deadline.

#### ***W. Lee and S. Wong Bursary***

This bursary celebrates 50 years of friendship between Wayne Lee and Sam Wong which roots in Halifax. To be awarded to international students within the Engineering Faculty (Undergraduate) on the basis of character, positive attitude and of need. Apply through the general online bursary program. Deadline: October 15.

## **F. Faculty of Health Professions**

### **1. College of Pharmacy**

PLEASE NOTE: The College administers the following bursaries. Applications are available directly from the College of Pharmacy and, upon completion, must be submitted to the College.

#### ***Alice and Louis Cassidy Award***

This award was established by Louis Cassidy in honour of Alice Cassidy. Mr. Cassidy graduated from Pharmacy in 1952 and practiced in the profession for over 50 years. This fund annually supports one or more bursaries for students in the Pharmacy program who have demonstrated satisfactory academic standing and financial need.

#### ***The Bert and Betty Collins Bursary***

An endowment has been established to award an annual bursary to a deserving pharmacy student from New Brunswick who demonstrates financial need and who has attained a satisfactory academic standing.

#### ***Jean Coutu Bursaries***

Two bursaries of \$500 each are offered annually to students from New Brunswick who are completing the first, second and third years of the Pharmacy program. These students must have satisfactory academic standing and financial need.

#### ***Elizabeth Foy Bursary***

In 2012 the Dalhousie University College of Pharmacy Student Endowment Committee established the Elizabeth Foy Bursary of \$1,000 to recognize Elizabeth Foy who retired from Dalhousie University after 43 years of dedicated service to thousands of pharmacy students. This bursary is given annually to a second or third year student who is an active participant in College activities, possesses excellent critical appraisal skills and demonstrates a financial need.

#### ***The Jack Kidd/ANCA Bursary***

In 1982, an endowment was established first for a scholarship and then in 1987 changed to a bursary that recognizes 43 years of service of Mr. Jack Kidd, a pharmaceutical sales representative, with Anca Inc. It is awarded to a student from New Brunswick or Prince Edward Island who has successfully completed one or more years of the class leading to a degree in pharmacy and who is enrolled in pharmacy at the University for the ensuing year. The student must have a satisfactory academic standing and demonstrate financial need.

#### ***Lawtons Drugs Bursary***

This bursary of \$500 is awarded to a second, third or fourth year student from the Atlantic Provinces, who has attained a satisfactory academic standing and who demonstrates financial need.

#### ***George MacDonald Bursary***

An endowment was established to honour Mr. George MacDonald on his retirement from W. Horner Inc. recognizing 37 years of service to the industry. This Bursary is awarded to a deserving pharmacy student, from the Atlantic Provinces who has satisfactorily completed at least one year of study at the College of Pharmacy and who demonstrates financial need.

#### ***Manrex Medication Delivery Bursary***

This bursary of \$1,000 is awarded bi-annually to a student entering their fourth year of study at the College of Pharmacy as a full-time student. The student must have achieved satisfactory academic performance and demonstrate financial need.

#### ***Nicholas P. Meagher Memorial Bursary***

Established in honour of Nicholas P. Meagher who received a BSc from Dalhousie in 1948 and was a popular and respected pharmacist at Dunswoth's Pharmacy on Quinpool Road for all of his working life. This fund annually supports one or more bursaries for students in the Pharmacy program who have demonstrated financial need.

#### ***New Brunswick Pharmaceutical Society Bursaries***

The New Brunswick Pharmaceutical Society offers four bursaries to be awarded to the students from New Brunswick completing the first, second, and third years of the Pharmacy class. The amount of each bursary is \$1,000. The bursaries are awarded on the basis of need to those students whose academic achievement, promise, and character are acceptable.

#### ***Tung Chun Ngan Memorial Bursary***

To provide a bursary to a first year student who has demonstrated financial need. First preference will be given to a Pharmacy student. Apply through the general online bursary program. Deadline: October 15.

#### ***Pharmachoice Bursary***

This bursary of \$500 is offered to a student who shows future promise and an interest in independent community pharmacy. The student must have a good academic standing and demonstrate financial need.

#### ***Pharmasave Bursaries***

Three bursaries of \$1,660 each are offered annually to students who have completed one to three years, have satisfactory academic standing and show financial need.

#### ***Sandoz Canada Bursary***

This bursary of \$1,000 is awarded to a student enrolled full-time in the College who demonstrated financial need.

#### ***Shoppers Drug Mart Community Pharmacy Bursaries***

Shoppers Drug Mart will sponsor three bursaries of \$1,000 each to awardees selected by the College. The selection committee will consider candidates on the basis of financial need, student involvement, academic proficiency and potential for contributing to the pharmacy profession. Normally, successful applicants will have completed the first year. Apply to the College of Pharmacy.

### **2. School of Health Sciences**

#### ***Dorothy Archibald Bursaries***

These awards valued at \$250, are sponsored by Dorothy Archibald, a lifetime member of the CAMRT, are awarded to full-time students in Nuclear Medicine and Radiological Technology who have successfully completed clinical practicum I (year 2, 3, 4). This award is based on the students' professional attributes and accountability, involvement in the student association or school committees, and GPA. Contact the department for the deadline.

### **3. School of Nursing**

#### ***Doreen Carroll Bursary in Cancer Nursing***

As a result of receiving excellent care from registered nurses, the Carroll family sponsors a bursary to assist BScN students who demonstrate interest and proficiency in Cancer Nursing. Eligible recipients must be full time students in the third or fourth year of the BScN program. Applicants who have selected (an) oncology/palliative care nursing elective class(s) in their program of study will be given preference over other applicants. Students must complete the School of Nursing Undergraduate Bursary Application and also submit a written application to the School of Nursing, demonstrating their interest and proficiency in Cancer Nursing, as well as a desire to establish a career and practice in Cancer Nursing. Contact the School of Nursing for the deadline.

#### ***School of Nursing Undergraduate Bursary***

This endowment was established to provide an annual bursary to one or more students in the second or third year of the Bachelor of Nursing program. Students enrolled in the accelerated program must have completed at least one full year of the undergraduate nursing program before applying. Students must be enrolled in

at least four classes and be in good academic standing. Applications are available at the School of Nursing. Contact the School of Nursing for the deadline.

#### 4. School of Social Work

##### 1. The following Bursaries are offered by the Registrar's Office.

###### **Hannah G. Matheson Bursaries**

These bursaries are open to students enrolled in studies in the School of Social Work at either the undergraduate or graduate level. Apply through the general online bursary program.

###### **Lloyd MacInnis Memorial Bursary**

The Lloyd Y. MacInnis Memorial Award Fund was established to provide an annual bursary to a qualifying student who is continuing his or her studies at the School in the baccalaureate program beyond first year. Apply through the general online bursary program.

###### **Jane Wisdom Memorial Bursary**

When Jane Wisdom began her caring work in Halifax shortly before the Great Explosion of 1917, she was truly a pioneer in what has come to be known as Social Work. It is in recognition of her distinguished service that anonymous donors in 1977 established an endowment fund whereby one or more annual bursaries to one or more deserving students would be granted to students in the baccalaureate program of the School of Social Work at Dalhousie University. Apply through the general online bursary program.

##### 2. The following Bursaries are offered by the School.

###### **The Janet Lee Myers Memorial Bursary**

For one or more students in the Bachelor of Social Work degree program at Dalhousie University who are in need of financial assistance. Deadline: October 15.

###### **Nova Scotia Association of Social Workers' Bursary**

The NSASW provides an annual bursary to a BSW student who best meets the selection criteria of financial need, satisfactory academic progress, and demonstrates social work values in prior endeavours. The recipient is expected to contribute in some way to the NSASW while a student at the School. Deadline: October 15.

###### **The Sonja R. Weil Memorial Bursary**

Family and friends established this endowment as a memorial to Sonja Weil and in tribute to her work as a social worker and psychotherapist. This bursary is open to students in the MSW (preference is given to MSW students) and BSW programs who demonstrate financial need, satisfactory academic standing and interest in those areas which most closely reflect Sonja Weil's work in child and family therapy. Apply to the School of Social Work. Deadline: October 15.

###### **Eva Mary and Judge Hiram S. Farquhar Bursary**

To provide an annual bursary(s) for one (or more) student(s) enrolled in the Bachelor or Master of Social work program at Dalhousie University who demonstrate financial need. Preference given to a student born in, or a resident of Hants County.

#### G. Faculty of Management

##### **Northstar Trade Finance - Thomas J. Bata International Exchange Bursaries**

Up to eight bursaries of \$2,000 each to support students who have been accepted into the international exchange program and might otherwise not be able to participate in the exchange without external funding.

These Bursaries were originally created by Mr. Scott Shepherd, MBA '83, as the Northstar Trade Finance - Mary Grover LeBlanc Memorial Fellowship. It was renamed the Northstar Trade Finance - Thomas J. Bata Memorial Fellowship in 2010, in memory of Mr. Thomas Bata. (1914-2008). Mr. Bata immigrated to Canada in 1939 from the former Czechoslovakia to form the Bata Shoe Company of Canada. Long before it was fashionable to do so, he provided opportunities for education and advancement to people of all races and creeds. He introduced his workforce to modern technology and previously unknown standards of quality and workmanship and helped many of them establish businesses of their own. Apply through the Center for International Trade and Transportation.

##### **The Louisbourg Investments Bursary**

Two bursaries are funded annually by Louisbourg Investments in order to assist students enrolled in the Rowe School of Business. Students must demonstrate financial need and be of satisfactory academic standing. Application required to the Rowe School of Business. Contact the Rowe School of Business for the deadline.

##### **3M Canada Bursary**

Two bursaries in the amount of \$1,000 each are given to students entering their graduating year of studies in Science or Commerce who have maintained grades establishing them in the top quartile of their programs and who are in need of financial support. Apply through the general online bursary program. Deadline: October 15.

#### H. Faculty of Science

##### **Alysia D. Abriel Memorial Bursary**

Dr. Monique C. Grelot created this bursary to honor the memory of her granddaughter Alysia Abriel who always followed and never questioned her passions.

The bursary is to assist a female student enrolled in the Honours Biology, Chemistry or Biochemistry program who has demonstrated financial need and a good academic standing. Apply through the general online bursary. Deadline: October 15.

##### **The Marje Brady Bursary**

Margie Wahtras Brady is a member of a family of WWII refugees from Estonia who immigrated to Canada in 1950 via Sweden.

This bursary is to provide bursaries to undergraduate science students enrolled at Dalhousie University who demonstrated financial need and satisfactory academic standing. Apply through the general online bursary. Deadline: October 15

##### **Audrey-Lea Dawson Memorial Bursary**

A memorial bursary is open annually to one or more female students enrolled in the Bachelor of Science program who have demonstrated financial need and satisfactory academic standing. Apply through the general online bursary program.

##### **David Andrew Dougall Memorial Bursary**

The intent of this award is to encourage and assist one or more students whose academic and financial status merit consideration. Please apply to the Department of Biology in September of each academic year.

##### **Allan Chaloner Hill Bursary**

The Allan Chaloner Hill Bursary endowment was established by his daughter Alison Biedermann-Hill in her father's memory. A bursary is available to a second or third year chemistry student. Apply through the general online bursary program. Deadline: October 15..

##### **Mathematics & Statistics Bursary Fund**

An annual bursary to be awarded to a student enrolled in the second, third or fourth year of an undergraduate program, leading to a degree in Mathematics or Statistics at Dalhousie University. The recipient will have demonstrated financial need and satisfactory academic standing. Apply through the general online bursary program. Deadline: October 15.

##### **Professor W. Russell Maxwell Memorial Bursaries**

Any residual income remaining in the Fund after the annual scholarships have been determined may, after consultation with the Department of Economics, be used to fund one or more bursaries for deserving students entering the fourth year of the Honours program in Economics. Awarded by the Department of Economics and the Registrar's Office. Application not required.

##### **Elizabeth McKenna Bursaries**

The Elizabeth McKenna Scholarship Fund was established in 1928 for the purpose of providing what are known today as bursaries. Applicants must be bona fide residents of one of the Maritime Provinces and be entering the first year in the College of Arts & Science. Apply through the general online bursary program.

##### **Dr. Catherine Olding Hebb Memorial Bursary**

This bursary was established in memory of Catherine Olding Hebb. The recipient must be a resident of one of the Atlantic provinces, must be studying in the Department of Biology, Bachelor of Science program and demonstrate financial need. Apply through the general online bursary program. Deadline: October 15.

### ***Ron Hayes and Dixie Pelluet Bursary in Biochemistry and Molecular Biology***

This bursary is to honour the memory of Ron Hayes and Dixie Pelluet by providing an annual bursary to a student enrolled in a BSc program in Biochemistry and Molecular Biology. Eligible recipients will have completed at least one year of study in their undergraduate program at Dalhousie. The bursary recognizes both academic excellence and financial need. Apply through the general online bursary program. Deadline: October 15.

### ***John E. Tasman Memorial Bursary in Chemistry***

Established in memory of John E. Tasman who graduated from Chemistry in 1942, this bursary is available to full-time students enrolled in the Faculty of Science and majoring in Chemistry. Apply through the general online bursary program. Deadline: October 15.

### ***Yau Hing Shum-Ngan Memorial Bursary***

Dr. Ngan established this bursary in memory of his mother, Yau Hing Shum-Ngan. The bursary shall be awarded to a first year undergraduate student enrolled with the Faculty of Science with demonstrated financial need. Apply through the general online bursary program. Deadline October 15.

### ***3M Canada Bursary***

Two bursaries in the amount of \$1,000 each are given to students entering their graduating year of studies in Science or Commerce who have maintained grades establishing them in the top quartile of their programs and who are in need of financial support. Apply through the general online bursary program. Deadline: October 15.

## **VII. Continuing Education Awards and Bursaries**

Students who are engaged in part-time studies for credit are eligible to be considered for awards and financial assistance. Each of these is described briefly below.

### ***The Frederick Thomas Parker Award for Part-Time Studies***

This award will provide an appropriate and flexible means of encouraging students intending to undertake degree or diploma studies at Dalhousie on a part-time basis. The selection committee will take into account both academic performance and financial need, depending upon circumstances. Applications are available at the College of Continuing Education.

### ***Canada Student Loan for Part-Time Students***

This particular federal loan is intended to help students who have a small cash-flow problem at the beginning of their studies. In order to qualify on the basis of class load for a standard academic year, a student must be planning to take between 20% and 59% of a class load. The application form is available from Nova Scotia Student Aid Office, and is to be completed by the Registrar's Office.

### ***Dalhousie University Undergraduate Bursaries***

Students who are registered in 6 credit hours per term will be considered for bursaries. Apply through the general online bursary program through the [monneymatters.dal.ca](http://monneymatters.dal.ca)

Program dates:	Fall:	September 15 - October 15
	Winter:	January 15 to February 15
	Summer:	May 15 - June 15

### ***Dalhousie Temporary Loans***

Students who are engaged in part-time studies for credit will be considered for temporary loans. Such loans are intended for short-term needs, and repayment is required after the expiration of a predetermined grace period. Application is to be made at the Registrar's Office.

# Awards Index

## Numerics

3M Canada Bursary .....	656–657
75th Anniversary Alumni Family Scholarship .....	623, 625–626

## A

Abriel, Alysia D. Abriel Memorial Bursary .....	656
Acadian Lines Limited Scholarship .....	630
Acadian Seaplants Limited Scholarship .....	617
Addresses of Provincial Student Aid Authorities .....	649
Adjeleian Award in the Aesthetics of Structures .....	639
Ahuja, Hira and Kamal, Engineering Scholarship .....	626
Aitchison, James H., Award .....	637
Aldous Prize .....	645
Aliant Ambassador Scholarship .....	623, 625–626
Allen, John David and Ellen Matheson, Endowment Fund .....	653
Alumni Association Medal .....	632
Animal Nutrition Association of Canada (Atlantic Division) Scholarship .....	617
Anonymous Economics Prize .....	646
Aramark Leadership Award .....	617
Arbing, J.D. (Dan), Memorial Nova Scotia Road Builders Association Bursary .....	654
Archibald, Dorothy Archibald Award .....	641
Archibald, Dorothy Bursaries .....	655
Archibald, Dr. William J., Prize in Physics .....	647
Archibald, Helen Archibald Memorial Bursary .....	650
Archibald, Margaret, Memorial (Entrance) Bursary .....	654
Architecture .....	635
Architecture and Planning Bursaries .....	652
Armstrong, Ralph H. Armstrong Memorial Bursary .....	618
Ashkins, Eva and David Memorial Bursary .....	650
Ashkins, Nathan T. Ashkins Scholarship .....	624
Athletic Awards .....	632
MacKean Scholarships .....	633
MacRae Scholarships .....	633
The Graham Family Athletic Awards .....	632
Atkins, Helen and Earl Atkins Memorial Bursary .....	650
Atlantic Barber Shop Harmony Award .....	636
Atlantic Council of Crop Life Canada Bursaries .....	618
Atlantic Farm Mechanization Show (Entrance) Scholarship .....	626
Atlantic Farm Mechanization Show Award .....	639
Atlantic Farm Mechanization Show Environmental Engineering (Entrance) Scholarship .....	626
Atlantic Farm Mechanization Show Scholarship .....	618
Atlantic Land Improvement Contractors Association Award .....	639
Atlantic Land Improvement Contractors Association Bursary .....	618
Atlantic Poultry Conference Scholarship .....	618
Atlantic Scholars Awards (tuition and residence fees) .....	614
Atlantic, The Atlantic World History Scholarship .....	624
Aventis, Sanofi, Scholarship .....	630
Avery Prize .....	634
Award Duration .....	608

Ayer, Matthew Ayer Award for Community Nursing .....	641
--	-----

## B

B'nai B'rith Prize .....	645
Babineau, Paul Babineau Memorial Scholarship .....	618
Bachelor of Environmental Design Studies Year 3 Portfolio Prize .....	635
Bachelor of Environmental Design Studies Year 4 Portfolio Prize .....	635
Bacon, The Honourable Dr. Roger S. Bacon Scholarship in Agriculture .....	618
Bailey, Doug Bailey Memorial Bursary .....	614, 618
Baker, Dr. Max L., Scholarship .....	626
Baker, Louie I., Awards in Technical Communication .....	639
Ball Scholarship, Marjorie .....	617
Banks, A. B. Banks Memorial Scholarship .....	618
Barlow, David, Memorial Award .....	646
Barrett, John, Hamilton, Prize .....	645
Barrett-Banks, Margaret Memorial Award .....	641
Beaton, Donnell and Betty Beaton Bursary .....	650
Beck, Dr. Kim Beck Memorial Scholarship .....	618
Becton Dickinson Award of Excellence in Endocrine Studies .....	642
Beer, Annie, L., Prize .....	633
Bell Entrance Scholarship in Science, Francis Hugh .....	612
Bell, Hugh, P., Scholarship in Biology .....	631
Bennett, Avie, Prize .....	635
Berman, Wilfred, Memorial Prize .....	644
Berman, Wilfred, Scholarship .....	630
Bernoulli Prize .....	647
Bernstein, Harry and Kaye Bursary .....	650
Beta Sigma Phi Scholarship to Dalhousie University .....	617
Bevan, Allan and Lura, Memorial Scholarship .....	624
BHSc Faculty Award .....	641
Bible Hill Garden Club Bursary .....	614, 618
Biochemistry and Molecular Biology .....	645
Biology .....	631, 645
Birks Family Foundation Bursary .....	654
Bisset, Scholarship .....	610
Black and Gold Awards .....	633
Blackmore Award .....	638
Blair, A. David, Scholarship .....	626
Blanchard, J. Ewart Blanchard Memorial Scholarship .....	632
Blanchard, Jotham, Scholarship .....	617
Blum, Dr. Emil and Mrs. Stella, Prize in Mathematics .....	647
Bornoff/Garamie Memorial String Scholarship .....	624
Boyd, George, Bursary .....	650
Brady, The Marje Brady Bursary .....	656
Bredin, Jeff Bredin Memorial Scholarship in Men's Volleyball .....	633
Brehaut, Ernst, Memorial Bursaries .....	650
Brewer, Lt. (E) Harry J., MBE, CD, RCN (Ret.), Memorial Bursary .....	650
Brimer Memorial Scholarship in Psychology .....	632
Brown, David W. Brown Memorial Bursaries .....	618
Brown, Edward Brown Memorial Bursary .....	618
Brown, Isabel, Scholarship .....	617
Bruce, John G. Bruce Scholarship .....	626
Bruce, Robert, Bursaries .....	652
Bruce, Robert, Scholarships .....	613, 624
Bubar, Dr. John Bubar Scholarships .....	618
Buckley, G.R. Buckley Community Pharmacy Award .....	642
Burbidge, Dean George A., Memorial Award .....	642
Burbidge, Minnie F., Scholarships .....	617
Burgess McKittrick Prizes in Physics .....	648

Burgess McKittrick Summer Research Studentships in Physics	648
Burris, George, Scholarship and Grant	610, 650
Buszard, Deborah Buszard Prize	648
Buttenshaw, Katherine M., Prize	647
Byham, Professor Ray. D., Memorial Prize in Piano Studies	636
Byron, Ada, Award	638

## C

Cail, Merle Cail Memorial Scholarship	618
Caldwell, Vera Caldwell Memorial Bursary	614, 618
Cameron, Dr. Alan E., Scholarship	626
Camp 7 Iron Ring Award	639
Campbell, George H., Memorial Scholarship	617
Campbell, James and Abbie, Memorial Scholarships	613
Campbell, James and Abbie, Prize, Campbell Incentive Award	636
Canada Student Loan for Part-Time Students*	657
Canadian Agricultural Economics Association Prize	634
Canadian Institute of Mining and Metallurgy Earth Science Scholarship for New Brunswick Students	632
Canadian Merit Scholarship Foundation	616
Canadian Society for Chemical Engineering Medal	639
Canadian Society for Chemistry Silver Medal	646
Canadian Society for Civil Engineering Certificate	639
Canadian Society for Exercise Physiology	640
Canadian Society of Animal Science Prize	634
Canadian Society of Exploration Geophysicists Scholarship	632
Canadian Society of Mechanical Engineering Medal	639
Canadian Society of Petroleum Geologists Award	646
Canadian Society of Petroleum Geologists Student Industry Field Trip	646
Canadian Studies	635
Canard Conservation Undergraduate Scholarship	614, 618
Capital Health Award for Professional Practice in Nursing	641
Card, James Card Memorial Bursaries	618
Carr, Ron Award	647
Carroll, Doreen, Bursary in Cancer Nursing	655
Carstairs-Arnell, John, Prize	646
Cassidy, Alice and Louis Cassidy Award	655
CBCL Limited, Consulting Engineers' Scholarship	626
Chamber of Mineral Resources of Nova Scotia Scholarship	632
Chandler, R. Frank, Award	642
Changing Degree Programs	609
Chartwells Scholarships	618
Chemistry	631, 645
Chemistry Achievement Award	646
Chew, The Vincent Chew Memorial Endowment	630
Chew, Vincent Chew Memorial Award	640, 645
Chiasson, Gerard Chiasson Memorial Bursary	618
Chicken Producers of Nova Scotia Bursary	614, 618
Chittick, Barbara Bennet, Prize	635
Chute, Walter, J., Prize in Chemistry	646
Citizenship Award	638
Clan Ramsay of Nova Scotia Prize	635
Clark, Donald E. Clark Memorial Scholarship	618
Clarke, Enid Hager, Textbook Fund	650
Clarke, Howard C., International Study Award	650
Class of '85 Award	639
Class of 1950 Bursary Fund	618
Classics	635
Clayden, F.R., Prize	643
Cobequid Dog Club Scholarship	618

Coffey, Sylvia Coffey Memorial Award	638
Coll, Colonel Charles Coll Memorial Scholarship	619
College of Pharmacists Dr. J. G. Duff Award	643
College of Pharmacy	630, 642, 655
College of Sustainability	632, 648
Collins, Bert and Betty, Bursary	655
Collins, Charles M. Collins Memorial Scholarship	619
Collins, Ian Memorial Pediatric Award	641
Commerce	644
Commerce Alumni Association Awards	644
Commonwealth History Prize	636
Commonwealth Political Philosophy Prize	637
Community Design Achievement Award (second year)	635
Community Design Achievement Award (third year)	635
Community Design Service Prize	635
Community Design Thesis Prize	635
Consulting Engineers of Nova Scotia Scholarship	627
Contemporary Studies	635
Convocation Awards	634
Cook, George & Lottie Cook Memorial Scholarship	614, 619
Cooke, Art and Dorothy Cooke Memorial Research Scholarship	632
Cooke, Dean J. Esmonde Cooke Award	643
Co-op Atlantic Agricultural Scholarships	615
Copp, Walter P., Memorial Prize	639
Costume Studies Scholarship	625
Coutu, Jean Coutu Bursaries	655
Covill, The Renée Covill Scholarships	619
Cox, Dorothy Creelman Cox Memorial Scholarship	619
Cox, Dr. Kenneth Cox Memorial Scholarship	619
CPhA Centennial Award (External), Pharmacists	644
CRC Freshman Achievement Award	646
Creative Writing	635
Creighton, Graham, Prize in English	635
Crowe, Belle Crowe Scholarship	631
Crummey, Dorothy Macdonald Crummey Memorial Scholarship	626, 628
Cumming, Lenore Smith, Bursary	650
Cumming, R. Stanley Cumming Scholarship	612
Currie, Honourable L.D., Memorial Scholarship in Music	625

## D

Dairy Farmers of New Brunswick Memorial Scholarship	615
Dairy Farmers of New Brunswick Scholarship	615, 619
Dairy Farmers of Nova Scotia Bursary	619
Daley, Dale, Pharmacy Award for Excellence	643
Dalhousie Alumni Association (Women's Division) Medal in Music	636
Dalhousie Alumni Association Scholarships, Women's Division of	617
Dalhousie Alumni Leadership Scholarships	610
Dalhousie Bursaries	650
General Intent	650
Dalhousie Club of New York Scholarships	613, 624
Dalhousie Faculty of Agriculture Alumni Family Bursaries	621
Dalhousie Faculty of Agriculture Athletic Bursaries	621
Dalhousie Leadership Bursaries	651
Dalhousie Memorial Bursary Fund	651
Dalhousie Student Union Student Accessibility Award	633
Dalhousie Temporary Loans	657
Dalhousie University Undergraduate Bursaries	657

Dalhousie University Women Alumnae Medal .....	644	English .....	624, 635
Dalhousie Women's Alumnae Prize .....	637	Enman, Noel Enman Memorial Award .....	634
Dartmouth Horticultural Society Bursary .....	619	Entrance Scholarship Funds .....	609
Darville, Alfred, George, Memorial Bursary .....	651	Entrance Scholarships .....	609–610
Davis, Frank R. Davis Memorial Scholarships .....	612	Environmental Science .....	632, 647
Daviss, Beatrice, Music Prize .....	637	Environmental Science Award .....	647
Dawson, Audrey-Lea, Memorial Bursary .....	656	Environmental Science Honour Society Medal .....	647
de Carteret Memorial Prize .....	638	Environmental Science Thesis Prize .....	647
de Gus, K. de Geus Memorial Prize for Plant Science .....	634	Eric & Ryan Post-Pharmacy Leadership Award .....	644
Dean's List Award .....	638	ESS Academic Improvement Prize .....	648
Dean's Scholarship (international and residence fees) .....	614	ESS First-year Prize .....	648
Dennis, Eric, Gold Medal .....	637	ESS Honours Society .....	648
Dennis, Honourable W.H., Memorial Prizes for Literary Compositions in English .....	633	ESS Second-year Prize .....	648
Department of Spanish and Latin American Studies Citizenship Award .....	638	ESS Student Travel Award .....	648
Department of Theatre Awards Fund .....	638	ESS SUST-star Prize .....	648
dePaul, Sister Frances, Award .....	643	ESS Thesis Prize .....	648
Developmental Biology Prize .....	645	Etta PHYS0050 Prize .....	634
DeWolfe, L.A., Memorial Scholarship .....	631	European Studies .....	635
Dharma Master Chuk Mor Memorial Scholarship .....	617	Evanov Radio Group Scholarship .....	610, 624
Dickison, Robert C., Memorial Award .....	643	<b>F</b>	
Diploma in Meteorology Prize .....	648	Facilities Management Employee Scholarship .....	610
Doane, Dr. H.W.L., F.E.I.C. Scholarship .....	626	Faculty of Agriculture .....	614, 617
Dolphin, Peter, Memorial Prize in Biochemistry .....	645	Faculty of Agriculture Alumni Family Bursaries .....	615
Dougall, David Andrew, Memorial Bursary .....	656	Faculty of Agriculture Bursaries .....	615, 621
Douglas, G.V., Memorial Prize in Earth Sciences .....	646	Faculty of Agriculture Renewable Entrance Scholarships to Cobequid Educational Centre Students .....	615
Douthwaite, Charles Robert Raefe, Memorial Bursary .....	651	Faculty of Agriculture Scholarships for International Students .....	615
DRAXIMAGE Award .....	641	Faculty of Architecture and Planning .....	623, 634, 652
DSU Accessibility Bursary .....	610	Faculty of Arts & Social Sciences .....	635, 652
DSU Student Wise Health Plan Bursary .....	651	Faculty of Arts and Social Sciences .....	624
Duff, J.G., Pharmacy Award .....	643	Faculty of Computer Science .....	625, 638, 653
Dunlop, John, Memorial Bursary .....	651	Faculty of Engineering .....	626, 639, 654
Dunn, Ken, Memorial Prize .....	647	Faculty of Engineering Scholarships .....	627
Dupuis, Shawn Dupuis Memorial Prize .....	633	Faculty of Health Professions .....	630, 640, 655
Durward, David, Memorial Prize .....	645	Faculty of Management .....	630, 644, 656
Dykeview Farms Ltd. Scholarship .....	615	Faculty of Science .....	631, 645, 656
<b>E</b>		Fairey Canada Scholarship .....	627
Early Modern Studies .....	635	Fairfax Financial Holdings Limited Entrance Award .....	610
Earth Sciences .....	632, 646	Fall River Garden Club Bursary .....	615
Eastern Veterinary Technicians Association Bursary .....	619	Fanning, David F., Scholarship .....	627
Eaton Foundation Scholarship in Business Studies .....	630	Faraday, James A. Faraday Memorial Music Award .....	636
Eaton, Ernest L. Eaton Memorial Scholarship .....	619	Farm Credit Canada Business Planning Awards .....	634
Econometrics Prize .....	647	Farm Credit Canada Scholarship .....	619
Economic Theory Prize .....	647	Farm Focus Bursary .....	619
Economics .....	632, 646	Farquhar, Eva Mary and Judge Hiram S. Farquhar Bursary .....	656
Economics Honours Thesis Prize .....	647	Faulkner, Ross, Scholarships .....	613
Economics International Student Essay Prize .....	647	Fawcett, Barry Ward, Memorial Prize .....	647
Edwards, Jeff D. & Martha Edwards Scholarship for Black Canadian & Bermudian Students .....	610	Fenton, Ena Fenton Memorial Scholarship .....	619
Egg Producers of Newfoundland & Labrador Scholarship .....	619	Financial Aid and Loans .....	648
Electrical and Computer Engineering Faculty Scholarship .....	627	Government Student Loans .....	648
Eligible Classes .....	608	Temporary Loans .....	650
Ellerton, Mary-Lou Ellerton Prize in Clinical Nursing .....	642	First Nations & Indigenous Black Students Scholarship .....	610
Ellis, Dr. M.J., Award .....	640	Flynn, Dean, Memorial Prize .....	639
Ellis, Marjorie F., Scholarships .....	617	Fooshee, Clare Murray, Poetry Prize .....	633
Elsevier Canada Award .....	642	Foran, M. Roy, Scholarship .....	627
Elsevier Canada Book Awards .....	641	Forsyth Family Nova Scotia Undergraduate Scholarship .....	610
Endowments and Annual Givings .....	613	Forward, Susan Paula Forward Memorial Prize in Psychology .....	648
Engineers (Nova Scotia) Award .....	639	Fountain, Frederick S. Fountain Scholarship .....	612
		Fountain, Frederick S., Scholarship .....	612
		Fountain, Marjorie Manning Scholarship .....	612

Todd, E. Walter, Scholarship .....	631
Towse, John L., and Glenna E., Scholarships .....	617
Transfer Students .....	609
Transition Year Program .....	638
Trenholm, Bruce Trenholm/Atlantic 1986 Scholarship .....	623
Trimper, Dean and Marie, Bursary .....	652
Tritt, William, Recital Prize .....	637
Tritt, William/Scotia Festival Memorial Prize .....	637
Trudell Medical Marketing Limited Award .....	641
Tupper, Helen, Memorial Bursary .....	652
Tupper, James W., Graduate Fellowship in English .....	635
Turner, Dr. Gerald, Bursary .....	652
Types of Awards .....	608

## U

Undergraduate Alumni Leadership Award .....	641
Undergraduate Award in Analytical Chemistry .....	646
University Medal .....	642
University Medal in Biochemistry and Molecular Biology .....	645
University Medal in Biological Engineering .....	640
University Medal in Biology .....	645
University Medal in Canadian Studies .....	635
University Medal in Chemical Engineering .....	640
University Medal in Chemistry .....	646
University Medal in Civil Engineering .....	640
University Medal in Classics .....	635
University Medal in Commerce .....	645
University Medal in Community Design .....	635
University Medal in Computer Science .....	639
University Medal in Contemporary Studies .....	635
University Medal in Creative Writing .....	635
University Medal in Early Modern Studies .....	635
University Medal in Earth Sciences .....	646
University Medal in Economics .....	647
University Medal in Electrical and Computer Engineering .....	640
University Medal in English .....	635
University Medal in Environmental Engineering .....	640
University Medal in Environmental Science .....	647
University Medal in European Studies .....	635
University Medal in Food Science .....	640
University Medal in French .....	636
University Medal in Gender & Women's Studies .....	636
University Medal in German .....	636
University Medal in Health and Human Performance .....	641
University Medal in Health Sciences .....	641
University Medal in History .....	636
University Medal in History of Science and Technology .....	636
University Medal in Industrial Engineering .....	640
University Medal in International Development Studies .....	636
University Medal in Italian Studies .....	636
University Medal in Linguistics .....	636
University Medal in Management .....	645
University Medal in Marine Biology .....	645
University Medal in Materials Engineering .....	640
University Medal in Mechanical Engineering .....	640
University Medal in Microbiology .....	647
University Medal in Mining Engineering .....	640
University Medal in Music .....	637
University Medal in Neuroscience .....	648
University Medal in Pharmacy .....	644
University Medal in Philosophy .....	637
University Medal in Physics .....	648
University Medal in Psychology .....	648
University Medal in Religious Studies .....	637
University Medal in Russian Studies .....	637
University Medal in Social Anthropology .....	637
University Medal in Sociology .....	638
University Medal in Spanish and Latin American Studies .....	638
University Medal in Statistics .....	647
University Medal in Theatre .....	638
University Medals .....	640
University Silver Medal .....	634
University Medal in Mineral Resource Engineering .....	640
Upham, L.A. & Edith, Scholarship .....	613

## V

Vair, Douglas, J., Scholarship .....	614
Varma Prizes in Gothic Literature .....	635
Vemco Scholarship in Marine Biology .....	632
Vernon, Marguerite I., Scholarship .....	613
Vice-President's Scholarship .....	623
VIIth Pan American Wheelchair Games Scholarship .....	630

## W

Wales, Freda N., Memorial Scholarship .....	630
Walker Wood Foundation Science Bursary .....	611
Walsh, F. W. Walsh Memorial Scholarship .....	616
Walter, Bob, Award .....	640
Ward, Florence (Pineo) Ward Memorial Awards .....	623
Warr Summer Undergraduate Research Awards .....	631
Waverly Prize .....	647
Webber, Raymond Webber Memorial Scholarship .....	623
Weil, Sonja R., Memorial Bursary .....	656
Weldon Scholarship .....	629
Wells, F. Hume Wells Scholarship .....	613
Whalen, George B. Whalen Memorial Scholarship .....	623
Whelan, The Whelan Family Award in Pharmacy .....	644
Where Dalhousie Scholarships can be Used .....	608
Whidden, Michael Whidden Memorial Award .....	623
White, Dr. Lilyan E. White Prize .....	648
Wickwire, Lloyd Hopkins, Bursary .....	654
Wickwire, Susan (Cox), Bursary in Engineering .....	655
Wild Blueberry Producers Association of Nova Scotia Scholarship .....	623
Williams, Eric Williams Memorial Scholarships .....	623
Wilson, Dr. George E., Prize in History .....	636
Wilson, G.P. Engineering in Business Scholarship .....	630
Wilson, George E., Memorial Scholarship .....	624
Wisdom, Jane, Memorial Bursary .....	656
Withdrawing .....	609
Wolter, Norbert Wolter Memorial Scholarship .....	631
Women's Division of the Dalhousie Alumni Association Medal ..	642
Women's Division - Dalhousie Alumni Association Medal in Costume Studies .....	638
Women's Division Bursaries .....	652
Women's Division of the Dalhousie Alumni Association H&HP Medals .....	641
Women's Division of the Dalhousie Alumni Association Scholarships .....	614
Wong, W. Lee and S. Wong Bursary .....	655
Wood, Walker Wood Foundation Theatre Bursary .....	653
Wright, Don, Scholarship in Music .....	625
Wright, Don, Scholarship of Excellence* .....	613

## Y

Yoh, Hua, Shao, & Wen Hsiang, Prizes .....	645
Young Farmer's Bursary .....	623
Young, Sir William, Gold Medal .....	647
Young, Sir William, Scholarship .....	617

## Z

Zinck, Christine, Book Award .....	638
Zinck, Christine, Scholarships .....	625
Zonneveld, Tietje, Scholarship in Piano Studies .....	625
Zwerling, Charles and Cecelia, Scholarship .....	624

# DALHOUSIE UNIVERSITY CAMPUS

## STUDLEY CAMPUS

02/2013

# DALHOUSIE UNIVERSITY CAMPUS

## CARLETON CAMPUS

- F**
- F100 Dentistry Building
  - F120 Burridge Building
  - F140 Forrest Building
  - F200 Tupper Building
  - F220 Clinical Research Centre
  - F260, F270 LSRI & Innovacorp

- H**
- H220 Bethune Building

- H**
- H220 Bethune Bldg.
  - VICTORIA GENERAL HOSPITAL /QE II

## SEXTON CAMPUS

Many Sexton Campus buildings are labelled both by name and letter (which appears in brackets in the listings where appropriate).

- J**
- J011-12 Ira MacLab Building (A)
  - J051-52 B Building
  - J100 Electrical Engineering (C)
  - J110 H.R. Theakston Building (C3)
  - J150 A.L. MacDonald Building (D)
  - J200 Sexton House (E)
  - J250 Chemical Engineering (F)
  - J280 G.H. Murray Building (G)
  - J301-02 Ralph M. Meduck Bldg. (Architecture and Planning) (H)
  - J351-52 F.H. Sexton Memorial Gymnasium
  - J400 Hart House, Engineering Mathematics (K)
  - J450 Moren House (L)
- M**
- M.M. O'Brien Hall (M)
  - N Building
  - Graduate Student Residence (O)
  - A.E. Cameron Building (P)
  - Bernard N. Cain Building (Q)
  - R1 Building
  - R2 Building
  - Dust Explosion Lab (T)
  - Metallurgy Research Lab (U)
  - Industrial Engineering, Dean of Engineering
  - Gerard Hall
  - Morris 5247
  - Electrical and Computer Engineering Mobile
- K**
- Engineering & Computer Science
  - Cooperative Education
